The practicum is designed to provide a structured practical experience for which the student is preparing. The assignment must be under the supervision of a qualified professional. The practicum is designed to provide the graduate student an actual field-based experience in a health, physical education, recreation, or athletic environment. The experience should give the student the opportunity to work with a working professional while enhancing and expanding the skills developed during their undergraduate and graduate programs. The practicum will consist of a minimum of 150 hours.

Prerequisite(s):

Complete a minimum of 18 graduate credit hours including KIN 503 and KIN 543 (minimum grade C).

Exercise Science

KIN 529 - Physiology of Exercise

3 Credit(s)

An advanced overview of the physiological basis of physical education and athletics. The effects of exercise on various systems will be considered. Practical application of exercise science to physical fitness and athletic training and performance will be emphasized.

KIN 530 - Human Performance Lab

3 Credit(s)

The Human Performance Lab Internship in the department of KIN is a planned, meaningful work experience. The primary purpose of the human performance lab internship is to allow students the opportunity for hands-on use of various methods of and equipment for exercise/ fitness testing, and to work directly with test subjects so that he/ she is able to apply some of the principles learned in the Physiology of Exercise course.

Prerequisite(s):

KIN 529

Co-requisite(s): KIN 529

KIN 539 - Strength and Conditioning

3 Credit(s)

This course is designed to provide information relative to the basic foundation of coaching sport conditioning including muscle physiology, bioenergetics, training methodology, exercise technique, program design, and facility management. Students will be given the opportunity to develop a general strength training program for a specific sport and to demonstrate their knowledge relative to proper lifting techniques and training procedures.

Prerequisite(s):

KIN 509 Minimum Grade: C

KIN 540 - Biomechanics

3 Credit(s)

This course will involve the study of the anatomical and mechanical principles underlying human movement. Practical application of biomechanical principles in human movement and various sport activities will be emphasized.

KIN 545 - Exercise and Sport Nutrition

3 Credit(s)

An advanced study of nutrition as it applies to exercise and sport. Application of nutrition practices to health, fitness and performance will be explored, as well as issues of supplementation, drug abuse, weight loss/gain strategies, and metabolic nutritional requirements for a variety of sports and exercising individuals.

Prerequisite(s):

KIN 529 Minimum Grade: B

Plus 6 KIN Elective Credits as approved by your Advisor

Plus 1 of the following options

Option 1 - Masters Thesis

KIN 593 - Master's Thesis

6 Credit(s)

This course represents the culminating experience for the graduate student in the Master of Science in Exercise Science program. This course will provide a practical and thorough experience working through a professionally designed research project. It will include a written and oral presentation of the thesis proposal, as well as a written and oral defense of the completed Masters thesis. This course will be taken in the last year of the students program at Adams State University.

Prerequisite(s):

KIN 503 Minimum Grade: C

AND

KIN 543 Minimum Grade: C

Option 2 - Capstone

KIN 596 - Capstone Project

3 Credit(s)

This course is designed to integrate coursework into a capstone experience. It is an applied research course requiring students to utilize the tools and information from all the students coursework into a timely, useful capstone project in cooperation with their professional needs. This course is designed to integrate coursework into a capstone experience. It is an applied research course requiring students to utilize the tools and information from all the students coursework into a timely, useful capstone project in cooperation with their professional needs.

Prerequisite(s):

KIN 503 Minimum Grade: C

AND

KIN 543 Minimum Grade: C

- 1 KIN elective course as approved by your advisor

Minor in Accounting

Go to: Business

A minor in accounting requires 18 hours in business and/or economics, of which a minimum of 15 hours must be in accounting. All 18 hours may be in accounting.

Minimum of 15 Hours from the Following

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 305 - Intermediate Accounting I

4 Credit(s)

The first of a two-course sequence of Intermediate Accounting designed to develop a framework for the role financial accounting plays in the world of business. A study of the conceptual basis of accounting will be conducted, creating a more in-depth understanding of the preparation and interpretation of financial statements and related information. This course will focus on the study of modern-day accounting theory and application of generally accepted accounting principles to various topics and financial statement elements. Students will be introduced to the U.S. Accounting Standards Codification and basic research tools.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 306 - Intermediate Accounting II

4 Credit(s)

The second of a two-course sequence of Intermediate Accounting designed to develop a framework for the role financial accounting plays in the world of business. A study of the conceptual basis of accounting will be conducted, creating a more in-depth understanding of the preparation and interpretation of financial statements and related information. This course will focus on the study of modern-day accounting theory and application of generally accepted accounting principles to various topics and financial statement elements. Students will continue their use of the U.S. Accounting Standards Codification as a research tools.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

BUS 307 - Managerial Cost Accounting I

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 308 - Managerial Cost Accounting II

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 307 Minimum Grade: C- OR T

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 358 - Accounting Ethics

3 Credit(s)

Ethics as it applies to the accounting and auditing professions and will be the focus of this course. Emphasis will be on the concept of independence, along with integrity, objectivity, ethical reasoning, and other core values necessary for a high level of professional ethics in the accounting profession.

Prerequisite(s):

BUS 306 Minimum Grade: C- OR T

BUS 360 - Government and Institution Accounting

3 Credit(s)

Study of accounting procedures related to governmental units and nonprofit institutions.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

BUS 371 - Payroll Accounting and Taxation

3 Credit(s)

This course is devoted to the principles of payroll computations and administration including creation and maintenance of payroll records as well as proper payroll tax depositing and reporting.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 377 - Agricultural Taxation

3 Credit(s)

This course is devoted to specific income tax laws associated with agricultural business to include farmers and ranchers both as individuals and as part of taxable entities.

Prerequisite(s):

BUS 355 Minimum Grade: C- OR T

BUS 405 - Advanced Accounting

4 Credit(s)

BUS-405 involves preparation and study of the need for consolidated financial statements. Additionally, it examines accounting problems associated with partnerships and foreign currency transactions.

Prerequisite(s):

BUS 306 Minimum Grade: C- OR T

BUS 407 - Auditing I

3 Credit(s)

Study of ethical standards, auditing standards, audit procedures, and evolution of internal control to learn how financial statements are examined and audit reports prepared in accordance with Generally Accepted Auditing Standards.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

AND

BUS 306 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 409 - Fraud Examination

3 Credit(s)

This class will explain how occupational fraud is committed, how fraudulent conduct can be deterred and how allegations of fraud should be investigated and resolved.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

BUS 455 - Entity Taxation

4 Credit(s)

Business 455 concentrates on the federal income tax consequences of the formation, normal operation, and the dissolution of corporations, partnerships, and fiduciaries. Other taxation problems of special interest may be covered.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 465 - Estate, Gift, and Fiduciary Tax Law

3 Credit(s)

This course will address the fundamentals of Estate, Gift, and Fiduciary tax law. Topics will include Federal Gift Tax, death transfer tax laws, and fundamentals and reporting returns for estates.

Prerequisite(s):

BUS 455 Minimum Grade: C- OR T

Plus 3 Credits of business or economics courses

Minor in Agribusiness

Go to: Business

A minor in Agribusiness requires 18 hours of agribusiness and/or business, of which 15 hours must be in agribusiness.

Minimum of 15 Hours from the Following

BUS 105 - Introduction to Agribusiness

3 Credit(s)

An introductory course designed to provide students with a basic background in agribusiness issues and practices to give them the foundation to be successful in upper level agribusiness courses and meet expectations for basic knowledge in agribusiness relationships.

BUS 364 - Agribusiness Management

3 Credit(s)

Management issues of agricultural businesses such as the forms of ownership, financial statements, analysis, and planning, investment analysis, strategic marketing, management of organizations, and human resources management.

Prerequisite(s):

BUS 105 Minimum Grade: C- OR T

AND

BUS 207 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

BUS 378 - Commodities/Risk Management

3 Credit(s)

The goal of this course is to provide students with knowledge of risk management for agricultural endeavors as well as practical knowledge of how the futures and options markets work, how to manage risk involved in agriculture production or operation, and various tools available to manage specific situations. BUS 103 Introduction to Business or instructor consent. BUS 105 Introduction to Agribusiness or instructor consent. BUS 318 Principles of Management or instructor consent.

Prerequisite(s):

BUS 103 Minimum Grade: D OR T

AND

BUS 105 Minimum Grade: D OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 384 - Natural Resources/Water Law

3 Credit(s)

The goal of this course is to provide students with knowledge of the regulatory responsibilities related to agriculture production and operations with respect to natural resources and water. The course will cover federal, state, and local requirements as well as application to agribusiness endeavors.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 211 Minimum Grade: C- OR T

BUS 398 - Farm and Ranch Management

3 Credit(s)

The application of economic and business principles to the management and operation of farms and ranches for decision making purposes.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 207 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 478 - Agricultural Marketing

3 Credit(s)

An overview of current marketing methods used for agricultural products and services, including value added marketing.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 488 - Agricultural Policy and Farm Bill

3 Credit(s)

Development and implementation of public policy in agriculture, implications of international competition and trade, and development and interpretation of argument in policy development.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Plus 3 Hours of a 300- or 400-level Business Elective

Minor in Anthropology

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

Degree Requirements

There are two possible tracks for the completion of the anthropology minor:

Required Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ANTH 205 - Physical Anthropology

3 Credit(s)

The course will examine physical anthropology as a sub discipline of anthropology. The goal is to understand how the physical realities of being human affects the nature of culture. The central theme will be the evolution of humans from the earliest hominid forms to modern Homo sapiens. The course will focus on the mechanisms of evolution, an understanding of primate behavior in general, and the fossil evidence for hominid development.

ANTH 300 - Archaeology

3 Credit(s)

This course will provide an overview of archaeological method and theory with a particular emphasis on American archeology, and provide a general survey of prehistory with an emphasis on the western United States.

ANTH 310 - Anthropological Linguistics

3 Credit(s)

After a general introduction to the nature of language (descriptive linguistics) this course will focus on human communication and the uses of language (psycholinguistics and sociolinguistics) and on the language cognition relationship (cognitive anthropology and symbolic anthropology).

Plus, Select 2 Courses from the Following Electives

ANTH 330 - Humans and Water

3 Credit(s)

This class will explore the relationship between humans and water through space and time, focusing on the American West. We will look at how different cultural groups interact with and manipulate water, as well as how they view the natural resource. In addition, we will analyze how changes in water resources influenced human cultures.

ANTH 339 - Field School in Archaeology

6 Credit(s)

The purpose of this course is to provide students with the basic skills, and the theories from which they are derived, necessary to do archaeological fieldwork. The student will learn basic techniques of site identification and recording, excavation, and artifact processing and analysis. In addition, they will learn instrument surveying and introductory applications of geographic information systems. The skills taught will be appropriate for either prehistoric or historic sites.

ANTH 360 - Forensic Anthropology

3 Credit(s)

This class examines the science and methods of physical anthropology as it relates to the medico-legal work done to identify unknown human remains in atypical circumstances. This introductory course will introduce students to human osteology and dentition in relation to identifying age, sex, stature, and ancestry, as well as bone pathologies and techniques for estimating time of death and post-mortem changes. As part of the course, some visual materials will depict trauma and decomposition of human remains.

ANTH 349 - Anthropology Internship

3 to 6 Credit(s)

This course provides the student with meaningful hands on experience in the field of Anthropology. Students will engage with internship work at a research library, museum, community organization, government agency, or other applicable institution to enhance their knowledge of sources, research methods, institutional cultures, and potential work environments.

ANTH 379 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

ANTH 450 - Southwest Archaeology

3 Credit(s)

This course explores the greater Southwest from the earliest human inhabitants to Spanish colonization. We will discuss significant changes and trends in subsistence, technology, social systems, and political organization over roughly 15,000 years; from hunter-gatherers following mammoths on the landscape to the Pueblo Revolt of 1680. The course will give students an appreciation of the adaptations of people in the Southwest to an often harsh environment, while also introducing them to the methods and theories archaeologists use to understand the past.

ANTH 460 - Medical Anthropology

3 Credit(s)

This course will explore the cross-cultural significance of health and wellness from an anthropological perspective. We will delve into the complex interplay of biological, psychological, social, environmental, and political-economic processes on the concepts of illness, suffering, and healing. Particular emphasis will be placed on the ethnographic approach to the lived context in which wellness and suffering are experienced, narrated, and addressed.

Minor in Art

Go to: [Art](#)

The art minor consists of 18 credit hours (6 courses) that can be taken alongside your major requirements during any semester at Adams. You can choose to take courses in any art discipline or you can take several courses within one studio areas. If you are interested in adding an Art minor to your degree you will need an art faculty advisor. Contact the Department Chair for more information.

Degree Requirements

Required Core

AR 208 - Drawing

3 Credit(s)

Develop basic drawing skills using a variety of media and subject matter (e.g. models, still lifes, landscapes, etc.). An emphasis on composition, contour, gesture, value, and linear perspective. This course has a course specific fee to cover the costs of some materials.

Plus One or More of the Following

AR 105 - Introduction to Art Criticism

3 Credit(s)

This course introduces students to art criticism and critical thinking in the field of visual art. Exercises in reading about art, observing art, and talking and writing about art, will develop the student's ability to discuss their own work and a

wide variety of artworks by others. Students will be introduced to and practice techniques for reading, thinking, writing, and speaking critically as applied to art.

AR 202 - In Design

3 Credit(s)

This course is intended for non-Art majors and will provide theory and practical experience on graphic design and applied art processes in print and presentation design. Students will study the basics in graphic design, the history of visual communication, typography, and the role of illustration and photography in graphic communications.

AR 209 - Beginning Drawing II

3 Credit(s)

This course is a further exploration of drawing with emphasis on integrating the principles of drawing and design into a meaningful composition on a two-dimensional surface. Problems of color and spatial organization are also stressed. A variety of subject matter will be considered. Instructor permission may be obtained to register for this course. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 208 Minimum Grade: C- OR T

AR 220 - Painting

3 Credit(s)

Studio problems exploring characteristics and techniques of painting media with emphasis on color, form, and structure as related to the painting surface. This course has a course specific fee to cover the costs of some materials.

AR 260 - Beginning Printmaking I

3 Credit(s)

An introduction to basic black and white printmaking techniques using relief, collograph, and intaglio processes. This course has a course specific fee to cover the costs of some materials.

AR 261 - Beginning Printmaking II

3 Credit(s)

An introduction to basic black and white printmaking techniques using monotype and lithography processes. This course has a course specific fee to cover the costs of some materials.

AR 280 - Beginning Black and White Photography

3 Credit(s)

A foundation course exploring the history and techniques of traditional black and white photography. Emphasis on photography as a medium for creative expression. Significant darkroom time is required. Students must have their own

35mm SLR camera. There is a lab fee for this course. This course has a course specific fee to cover the costs of some materials.

AR 281 - Beginning Digital Photography

3 Credit(s)

This course is an introduction to digital photography. The course will cover digital camera functions and an introduction to Adobe Bridge and Adobe PhotoShop applications. Emphasis on photography as a medium for creative expression. Students must supply their own digital camera. Cameras with the ability to shoot in a raw format are preferred. This course has a course specific fee to cover the costs of some materials.

AR 252 - Beginning 3D - Form and Extended Media

3 Credit(s)

This course emphasizes the conceptual aspects of sculpture while introducing the development of technical skills related to fabrication and subtractive processes and materials. The course is structured around assignments that emphasize individual work ethic and productivity, research skills, creative expressiveness, and class participation. Projects may include content in introductory metal fabrication, CAD/CAM technology, metal casting, and wood or stone carving. This course has a course specific fee to cover the costs of some materials.

AR 3XX: 3D Form & Media Rotator (3 Hours)

AR 253 - Ceramics: Handbuilding

3 Credit(s)

This course introduces students to the fundamental concepts of ceramic art. Topics include hand-forming methods such as pinch, coil, and slab building as well as an exploration of various surface treatment techniques such as slips and glazes. This course emphasizes the development of student's design vocabulary and innovative personal aesthetic as it applies to sculptural ceramic objects. As time permits, instruction will include various firing techniques such as oxidation, pit, saggar and Raku. This course has a course specific fee to cover the costs of some materials.

AR 352 - Molding Design and Cold Casting

3 Credit(s)

Mold design and cold casting are practical skills that can be applied to a wide variety of sculptural materials. In this course, students are introduced to the significant concepts for designing and fabricating single and multi-part molds. These molds will then be used to create unique pieces or mass-produced products. Additional emphasis is placed on conceptual themes that will vary depending on the instructor. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 252 Minimum Grade: C-
OR

AR 253 Minimum Grade: C-

AR 353 - Sculpting and Hot Casting

3 Credit(s)

This course emphasizes the conceptual aspects of sculpture while introducing the development of technical skills related to casting metal and related processes. The course is structured around assignments that emphasize individual work ethic and productivity, research skills, creative expressiveness, and class participation. Projects may include content in life cast molds, modeling clay, lost wax casting of bronze, aluminum, and/or iron, multipart rubber and support shell molds, TIG welding process, and patination of metal. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 252 Minimum Grade: C-
OR

AR 253 Minimum Grade: C-

AR 354 - Digital Sculpture

3 Credit(s)

This course emphasizes the conceptual aspects of sculpture while introducing the development of technical skills related to 3D digital design, rapid prototype fabrication, projection mapping and related processes. The course is structured around assignments that emphasize individual work ethic and productivity, research skills, creative expressiveness, and class participation. Projects may include content in 3D printing, CNC plasma, CNC laser, CNC milling and projection mapping software design and installation. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 252 Minimum Grade: C-
OR

AR 253 Minimum Grade: C-

AR 355 - Jewelry and Metalsmithing

3 Credit(s)

This course introduces students to the technical skills related to the design, fabrication and forming of metals and mixed media while emphasizing the conceptual aspects of jewelry and metalsmithing. The course is structured around assignments that highlight individual work ethic and productivity, research skills, creative expressiveness, and class participation. Projects may include the following: band ring fabrication, cuttlebone casting, raising, enameling, chain making, stone setting, cold connections, rolling mill processes, pattern dies, and hydraulic die forming. This course has a course specific fee to cover the costs of some materials.

AR 356 - Ceramics: Wheel Throwing

3 Credit(s)

Wheel-throwing introduces students to the pottery wheel as a tool for creating three-dimensional forms. This course emphasizes the development of student's design vocabulary and innovative personal aesthetic as it applies to utilitarian objects. Through technical demonstrations, image presentations, discussions and assignments, students are challenged to consider the role of the handmade functional object in contemporary material culture. Additionally, students develop skills in glazing and firing their work in electric and gas reduction kilns. This course has a course specific fee to cover the costs of some materials.

AR 357 - Experimental Ceramic Processes

3 Credit(s)

Experimental Ceramics is a forum for students to explore non-traditional ceramic forming methods in the creation of three-dimensional, sculptural artworks. Through technical demonstrations, image presentations, discussions and themed assignments, this course challenges students to experiment with large scale handbuilding, paperclay slip construction, alternative firing methods, non-ceramic surface treatments, as well as clay and glaze formulation. Additional emphasis is placed on content development by exploring complex forms, developing methods of narrative, and identifying source material for work. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 252 Minimum Grade: C-
OR

AR 253 Minimum Grade: C-

AR 358 - Papermaking

3 Credit(s)

The class utilizes handmade paper as a material for making art. A variety of techniques will be explored including handmade paper sheets, books, and sculptural objects. The historical origins of papermaking, production of pulp fiber, traditional eastern and western styles of papermaking, experimental paper sheet formation techniques, and three-dimensional paper construction methods will be presented. This course has a course specific fee to cover the costs of some materials.

Minor in Biology

Go to: [Biology](#)

Degree Requirements

Completion of at least 18 credits selected in consultation with the department chair or completion of the following required courses:

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1
OR ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score:
18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- OR BIOL-209 Minimum Grade: T OR BIOL-209 Minimum Grade: C- AND (CHEM-131 Minimum Grade: C- OR CHEM-131 Minimum Grade: T) OR (CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

BIOL 321 - Genetics

3 Credit(s)

A study of Mendelian and molecular genetics of eukaryotes and prokaryotes. Discussions include basic Mendelian principles, meiosis/mitosis, linkage, gene expression, and molecular techniques. Course includes 3 hours of lecture and 1 hour of peer learning activities per week.

Prerequisite(s):

BIOL 203 Minimum Grade: C- OR T
OR

BIOL-210 Minimum Grade: C- OR T

AND

BIOL 204 Minimum Grade: C- OR T

OR

BIOL-209 Minimum Grade: C- OR T

AND

CHEM-111 Minimum Grade: C- OR T

AND

CHEM-111L Minimum Grade: C- OR T

OR

CHEM-131 Minimum Grade: C- OR T

AND

CHEM-131L Minimum Grade: C- OR T

OR

CHEM-132 Minimum Grade: C- OR T

AND

CHEM-132L Minimum Grade: C- OR T

BIOL 323 - Cellular Biology

3 Credit(s)

The study of higher plant and animal cells and tissues at the biochemical level including: organelle structure, function, and metabolic role; cell growth, differentiation and specialization; and a survey of instrumentation and methodologies for investigating life processes at the biochemical level. Course includes three hours of lecture per week. Concurrent registration in BIOL 321 and BIOL 325 is recommended.

Prerequisite(s):

BIOL 203 Minimum Grade: C- OR T

OR

BIOL-210 Minimum Grade: C- OR T

AND

BIOL 204 Minimum Grade: C- OR T

OR

BIOL-209 Minimum Grade: C- OR T

AND

CHEM-111 Minimum Grade: C- OR T

AND

CHEM-111L Minimum Grade: C- OR T

OR

CHEM-131 Minimum Grade: C- OR T

AND

CHEM-131L Minimum Grade: C- OR T

BIOL 325 - Cellular Biology/Genetics Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with BIOL 321 and BIOL 323. Laboratory exercises in this

course are designed to demonstrate, complement, and extend concepts considered in BIOL 321 and BIOL 323. Students will engage in exercises involving a variety of techniques in which data pertinent to both disciplines will be gathered and analyzed. Course includes 3 hours of laboratory per week.

Prerequisite(s):

BIOL 203 Minimum Grade: C- OR T
OR

BIOL 210 Minimum Grade: C- OR T

AND

BIOL 204 Minimum Grade: C- OR T

OR

BIOL-209 Minimum Grade: C- OR T

AND

CHEM 111 Minimum Grade: C- OR T

AND

CHEM 111L Minimum Grade: C- OR T

OR

CHEM 131 Minimum Grade: C- OR T

AND

CHEM 131L Minimum Grade: C- OR T

Co-requisite(s): BIOL 321 BIOL 323

BIOL 330 - Ecology

4 Credit(s)

An introduction to major ecological concepts and models at the levels of individuals, populations, communities, and ecosystems. The laboratory includes laboratory and field exercises, and an introduction to data collection and analysis. Previous credit or concurrent registration in MATH 205 and BIOL 332 are recommended. Course includes 3 hours of lecture and 3 hours of laboratory per week.

Prerequisite(s):

BIOL 210 Minimum Grade: C- OR T
AND

BIOL 209 Minimum Grade: C- OR T

OR

GSCI 307 Minimum Grade: C- OR T

AND

BIOL 209 Minimum Grade: C- OR T

Co-requisite(s): BIOL-330L

BIOL 332 - Evolution

3 Credit(s)

A study of the history and development of evolutionary theory. Consideration is given to evidence for and mechanisms of evolution from anatomical, developmental, geological, mathematical, and molecular perspectives. Credit or concurrent registration in BIOL 330 is recommended. This course includes 3 hours of lecture per week.

Prerequisite(s):

BIOL 209 Minimum Grade: C- OR T
AND

BIOL 210 Minimum Grade: C- OR T

Minor in Business Administration

Go to: Business

Note: A minor in Business Administration is not allowed if a student also has a major in business.

Degree Requirements

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

Plus 6 Hours

from the following (may, but need not, come from the same subgroup):

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND/OR

BUS 307 - Managerial Cost Accounting I

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T
AND/OR

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

AND/OR

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

AND/OR

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 320 - Bus Computer Applications II

3 Credit(s)

The focus of this course is to explore application software on a comprehensive level to gain expertise to support decision-making and manage information. Study includes intermediate Word and Excel applications; intermediate to advanced PowerPoint; intermediate Access, integration of Office applications, and an introduction to HTML and building web pages.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

AND

BUS 365 - Small Business Management/Entrepreneurship

3 Credit(s)

This course presents the techniques and information necessary to create a comprehensive business plan for an entrepreneurial idea. Coursework addresses feasibility analysis, management, marketing, technology, and financial plans, culminating in presentation of a viable business plan.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256
AND

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T
AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

AND

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

Minor in Chemistry

Go to: Chemistry

Completion of at least 18 semester hours, including CHEM 131 and CHEM 132 and a one-year sequence of upper-division chemistry. The minor must be approved by the coordinator of the chemistry program.

Minor in Coaching

Go to: Department of Kinesiology

The coaching minor in Kinesiology is designed for those who are not majoring in Kinesiology but would like to coach at the amateur level, including elementary, junior high, secondary, or post-secondary levels.

Degree Requirements

A minor in coaching consists of the following (Total 18 hours):

KIN 302 - Sport Psychology

3 Credit(s)

Sport psychology is primarily concerned with the interaction between psychological variables and participation in sport and exercise. This course will review this interaction by addressing variables that affect the individual athlete, influence sport and exercise environments, shape group processes, enhance health and wellbeing, improve performance, and facilitate psychological growth and development in sport participants from diverse populations.

KIN 309 - Care / Prevention of Athletic Injuries

3 Credit(s)

The course will focus on the care and prevention of athletic injuries, including the evaluation, nature, types, and functions of various rehabilitation programs.

KIN 350 - Methods of Coaching

3 Credit(s)

This course is intended to provide the foundations of coaching for a person who wants to coach at the youth, elementary, high school or college level. Through a series of discussions, readings, and other projects, the potential coach will gain the knowledge and skills required to be an effective coach. This course will address the many roles and duties a coach must accept to provide positive experiences for athletes in sport.

KIN 380 - Diversity, Equity Sport, and Society

3 Credit(s)

This course has a two-fold purpose: first, it is designed to provide a sound introduction to diversity and equity in sport; and second, it is designed to encourage students to ask questions and think critically about sport as a part of society. This course will explore issues around diversity, equity and inclusion in sport and society.

KIN 391 - Sport Ethics and Leadership

3 Credit(s)

This course explores the myriad of moral and ethical issues pertaining to athletes, sports, and sport organizations and how these apply to professionals in the field of sport management. The course will also explore leadership theories and philosophies. Current examples of ethical dilemmas in sport and sport management will be presented, and students will explore their personal ethics in relation to these issues.

KIN 480 - Coaching Practicum

3 Credit(s)

In this course, students will gain actual field-based experience in coaching. This course will give the student an opportunity to gain documented experience as a coaching intern, apply the skills developed during his/her undergraduate program, and reflect on his/her experiences.

Prerequisite(s):

KIN 350 Minimum Grade: C- OR T

Note

A coaching practicum is required for the minor. The practicum may be accomplished, with the approval of the department chair, by assisting with an elementary, junior or senior high school program, or with college sports program.

Completion of the practicum will qualify the individual for the Adams State University Coaching Certification. A prerequisite to the practicum is KIN 350 AND at least 10 hours in the coaching minor core.

Minor in Computer Science

Go to: Engineering and Computer Science

Degree Requirements

CSCI 205 - Computer Science I

4 Credit(s)

This course is the second course in the introductory programming sequence for computer science majors. Through the study of object design this course introduces the basics of graphical user interfaces, data types, control structures,

methods, arrays, strings, files, simple graphics and fundamental algorithms. Students will also be introduced to object oriented design, polymorphism, interfaces, the concept of object abstraction, and simple design patterns.

Prerequisite(s):

CSCI 104 Minimum Grade: C- OR T

OR

CSCI 202 Minimum Grade: C- OR T

CSCI 206 - Computer Science II

4 Credit(s)

This course is the third course in the introductory programming sequence for computer science. The course continues object oriented programming and first concepts in object oriented software design. The course also covers classic data structures and algorithms. Concepts covered include streams, graphs, trees, recursion, complexity classes, sorting and searching routines, basic algorithm design and analysis, threading, and generic programming.

Prerequisite(s):

CSCI 205 Minimum Grade: C- OR T

A Minimum 12 Credits from the Following

CSCI 224 - Discrete Concepts

4 Credit(s)

A course on the fundamentals of discrete (as opposed to continuous) processes. The course is a foundational course for students pursuing the B.S. Mathematical Sciences Computer Science degree. The course covers a variety of discrete mathematical topics required for a solid background in computer science, including mathematical logic, set theory, induction, algorithmic complexity, combinatorics, discrete probability, basic graph theory, relations, Boolean algebra, finite state automata, and basic theory of computation.

Prerequisite(s):

Math Placement Test - Minimum Score: 5

OR

MATH 106 Minimum Grade: C- OR T

AND

CSCI 205 Minimum Grade: C- OR T

CSCI 307 - Programming Languages & Platforms

3 Credit(s)

This course will examine several of the most used programmable platforms/contexts, the programming languages that are used for each, and why each is the way it is. Specific cases and examples that will be considered are cloud

computing, mobile platforms, multiprocessors, service oriented architectures, virtual machines, functional programming, logic programming, web services, security, scripting, and even a little low level programming. Students will learn about the various types of programming languages and their appropriate use as well as the use of scripting languages, architectures, application programming interfaces, and programming practices to facilitate the management, integration and security of the systems that support an organization.

Prerequisite(s):

CSCI 205 Minimum Grade: C- OR T

CSCI 316 - Computer Architecture

3 Credit(s)

This class will introduce concepts of computer architecture and organization, including assembly level machine organization, data representation, memory systems, bus principles, digital logic, micro programs, functional machine architecture, RISC, CISC, parallel architectures and other advanced architectures. It will expose students to assembly-level programming and will make them implement assembly programs.

Prerequisite(s):

CSCI 206 Minimum Grade: C- OR T

CSCI 318 - Multiprocessor Computing

3 Credit(s)

Introduction to multiprocessor programming and application development covers the principles and practice of distributed system architectures and models, interprocess communication, distributed algorithms, concurrency, security, application programming interfaces, system performance, and programming paradigms appropriate for programming of multiprocessor systems.

Prerequisite(s):

CSCI 325 Minimum Grade: C- or T

CSCI 335 - Foundations of Networks

4 Credit(s)

This course introduces students to computer networks. Focus is on the concepts of networking like the OSI layered network architectures, network protocols and protocol design. Topics include the fundamentals of networking and communications, network management and wireless computing. Lab sessions feature computer networking hands-on exercises. The course also exposes students to network programming through the use of sockets

Prerequisite(s):

CSCI 205 Minimum Grade: C- OR T

CSCI 325 - Algorithm Design and Analysis

3 Credit(s)

Introduces formal techniques to support the design and analysis of algorithms, focusing on both the underlying mathematical theory and practical considerations of efficiency. Topics include asymptotic complexity bounds, techniques of analysis, algorithmic strategies, and an introduction to automata theory and its application to language

translation.

Prerequisite(s):

CSCI 205 Minimum Grade: C- or T
AND

CSCI 206 Minimum Grade: C- or T

AND

MATH 250 Minimum Grade: C- or T

CSCI 417 - Computer Systems and Architecture

4 Credit(s)

This class will familiarize students with the basics of the inner workings and design of Computer Systems. The course will examine how operating systems, computer hardware and other system software/hardware combine to produce a usable, efficient and secure system. Topics will include basic machine architecture, memory management (primary and secondary), bus principles, I/O devices, data representation, file systems, process/thread management, scheduling, simple digital logic, virtualization, real time systems concepts, and embedded systems. This course will also examine alternative system designs including basic distributed systems.

Prerequisite(s):

CSCI 206 Minimum Grade: C- OR T

CSCI 428 - Artificial Intelligence

3 Credit(s)

Provides both a brief overview of the basics of artificial intelligence and machine learning, and an in-depth investigation of selected hot topics in the field. The course will examine basic and advanced search techniques, knowledge representation, machine learning and data mining, natural language processing, and historical and philosophical issues regarding artificial intelligence. The course is a project-based course that will involve implementing and experimenting with open-source machine-learning software.

Prerequisite(s):

CSCI 206 Minimum Grade: C- or T
AND

CSCI 224 Minimum Grade: C- or T

Minor in Creative Writing

Go to: Languages, Literature, and Media Communication

Degree Requirements

All students are required to take:

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T
AND

ENG 102 Minimum Grade: C- OR T

ENG 227 - Introduction to Creative Writing

3 Credit(s)

Students write and read poetry, fiction, creative nonfiction, and drama, develop aesthetic standards, and evaluate their writing and that of their classmates. Course emphasizes the writing process, including strategies for invention and revision, and presents ideas for teaching creative writing.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

In Addition, Three Courses from the Following Must Be Selected

ENG 326 - Creative Writing Poetry Workshop I

3 Credit(s)

This course will teach students to develop their craft and creativity in the genre of poetry. Students submit original poems weekly, read selected works of contemporary, published poetry, and critique their own work and that of their classmates. Students practice revision and submit revised work in a final portfolio of at least 10 pages.

Prerequisite(s):

ENG 227 Minimum Grade: C- OR T
AND

ENG 210 Minimum Grade: C- OR T

OR

ENG 203 Minimum Grade: C- OR T

ENG 327 - Fiction Workshop I

3 Credit(s)

This course will teach students to develop creativity in the genre of prose fiction (short story). Students will submit their original writing, read works of published fiction, and critique their own work and the work of their classmates.

Prerequisite(s):

ENG 227 Minimum Grade: C- OR T

ENG 328 - Creative Nonfiction I

3 Credit(s)

This course covers techniques in nonfiction writing encompassing a variety of styles, forms, and topics, encouraging exploration of the genre's innumerable possibilities while developing the student's personal and critical theories of writing.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

AND

ENG 227 Minimum Grade: C- OR T

ENG 426 - Poetry Workshop II

3 Credit(s)

This course will teach students to further develop their craft and creativity in the genre of poetry. Students will submit original poems weekly, read selected works of contemporary published poetry, and critique their own work and the work of their classmates. They will practice revision and submit revised work in a portfolio of at least 15 pages.

Prerequisite(s):

ENG 326 Minimum Grade: C- OR T

ENG 427 - Fiction Workshop II

3 Credit(s)

This course will teach students to further develop their craft and creativity in the genre of prose fiction (short story). Students will submit their original writing, read works of published fiction, and critique their own work and the work of their classmates.

Prerequisite(s):

ENG 327 Minimum Grade: C- or T

ENG 428 - Creative Nonfiction II

3 Credit(s)

This course covers advanced techniques in nonfiction writing begun in ENG 328 as the student assembles a portfolio of work suitable for application to graduate programs.

Prerequisite(s):

ENG 328 Minimum Grade: C- OR T

ENG 497 - Capstone Writing Workshop

3 Credit(s)

This course is designed as a capstone for all Creative Writing majors. The content of the course will focus on organization, editing, and honing of a final writing project.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T
OR

ENG 210 Minimum Grade: C- OR T

AND

ENG 214 Minimum Grade: C- OR T

OR

THTR 213 Minimum Grade: C- OR T

AND

ENG 227 Minimum Grade: C- OR T

AND

ENG 326 Minimum Grade: C- OR T

AND

ENG 327 Minimum Grade: C- OR T

AND

ENG 328 Minimum Grade: C- OR T

In Addition, One Course from the Following Must Be Selected

ENG 458 - Reading Poetry

3 Credit(s)

A study of poetry from ancient to contemporary with an emphasis on form and technique.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T
OR

ENG 210 Minimum Grade: C- OR T

ENG 460 - Reading Short Prose

3 Credit(s)

A study of fiction and nonfiction short prose forms with an emphasis on authors writing in the English and American traditions, but including works in translation, and with special attention to form and technique.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T
OR

ENG 210 Minimum Grade: C- OR T

Minor in Economics

Go to: Business

Degree Requirements

A minimum 18 credits from the following:

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 307 - Managerial Cost Accounting I

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 320 - Bus Computer Applications II

3 Credit(s)

The focus of this course is to explore application software on a comprehensive level to gain expertise to support decision-making and manage information. Study includes intermediate Word and Excel applications; intermediate to advanced PowerPoint; intermediate Access, integration of Office applications, and an introduction to HTML and building web pages.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 378 - Commodities/Risk Management

3 Credit(s)

The goal of this course is to provide students with knowledge of risk management for agricultural endeavors as well as practical knowledge of how the futures and options markets work, how to manage risk involved in agriculture production or operation, and various tools available to manage specific situations. BUS 103 Introduction to Business or instructor consent. BUS 105 Introduction to Agribusiness or instructor consent. BUS 318 Principles of Management or instructor consent.

Prerequisite(s):

BUS 103 Minimum Grade: D OR T

AND

BUS 105 Minimum Grade: D OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 383 - International Financial Management

3 Credit(s)

A comprehensive study of international financial markets that covers currency exchange mechanisms in theory and practice. In line with the rapid globalization of the economy, the goal of this course is to analyze the international financial environment and how managers function in this increasingly uncertain global environment. The course will focus on three main areas of international finance: international financial environment, exchange rate behavior, and exchange risk management.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 414 - Commercial Banking

3 Credit(s)

Bank Management is an in-depth study of banking institutions, with special emphasis on commercial banks and their connection to the Federal Reserve System and other financial institutions. A risk management perspective is adopted, and the fast changing global regulatory and financial environments are discussed. A Uniform Bank Performance Report will be analyzed.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 416 - Business Financial Problems

3 Credit(s)

Emphasis on financial decision-making within the firm using case studies as the primary activity. Topics include financial goals and strategy, financial analysis and forecasting, capital budgeting, capital structure decisions, dividend policy, and firm valuation.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

ECON 425 - Economic Policy

3 Credit(s)

Study of the structure and functions of the U.S. economic system and the use of monetary, fiscal, and other policies to stabilize the economy. Emphasis on historical roots and the evolution into new behavioral economic ideas as well as the complex interplay of policy and economic forces.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

ECON 433 - Managerial Economics

3 Credit(s)

Application and integration of microeconomic theory and the tools of decision science to managerial decision-making. Particular emphasis placed on the economic differences caused by monopolies, cartels, and multi-national organizations and their domination of many industries. Understanding of game theory and new economic analysis tools.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

HCA 455 - Health Care Economics

3 Credit(s)

This course will examine health care decision-making and the functioning of health care markets in the U.S. The course is not designed as a pure economics theory course but instead emphasizes how you can frame and analyze various health issues using the principles of economics. By doing so, you will gain a powerful new perspective that will help you understand the decisions made by individuals and organizations in the face of scarce resources. Instructor permission.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Plus 3 Hours of a 300- or 400-level Business Elective

Minor in English

Go to: Languages, Literature, and Media Communication

Degree Requirements

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

AND

ENG 102 Minimum Grade: C- OR T

Completion of 18 total credits in English

Note:

Nine of the 18 hours must be 300 or 400-level. These nine upper-division courses must be taken at Adams State

Minor in English/Communication

Go to: Languages, Literature, and Media Communication

Degree Requirements

Completion of the core requirement (3 hours)

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

Completion of 4 Elective Courses

COMM 165 - Digital Filmmaking

3 Credit(s)

Course covers the aesthetics and practice of narrative, documentary, and experimental media production at an introductory level using a variety of digital filmmaking tools including digital photography, digital video, audio recorders, and editing software. Students will complete video products they can post to YouTube and similar sites.

OR

COMM 365 - Digital Filmmaking

3 Credit(s)

This course covers the aesthetics and practice of narrative, documentary, and experimental media production using a variety of digital filmmaking tools including digital photography, digital video, audio recorders, and editing software. Students will complete video products they can post to YouTube and similar sites.

Prerequisite(s):

COMM 230 Minimum Grade: C- OR T

COMM 190 - Radio Practicum

1 to 3 Credit(s)

Students earn one credit hour for every three hours of work weekly on KASF-FM or its web site. See station manager for details.

COMM 195 - Video Practicum

1 to 3 Credit(s)

Students earn one credit per three videos (or equivalent work) that they produce for the student-run Grizzly Video Productions (YouTube channel and Campus Cable Channel 5). Please see the Grizzly Video Productions faculty adviser or the student GVP General Manager for further details.

COMM 197 - Newspaper Practicum

1 to 3 Credit(s)

Students earn one credit per five stories (of 500 words apiece, or pre-approved substitutions) that they write for the Paw Print. Students should write on a variety of topics. Also required is the attendance of three newspaper staff meetings per credit registered. Please see the newspaper faculty advisor or the student editor for further details.

COMM 275 - News Writing and Criticism

3 Credit(s)

Inverted pyramid print writing and basic broadcast writing are covered in this course. Additionally, students critique, discuss, and analyze current print and broadcasting media conventions, ethics, and procedures.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

COMM 285 - Digital Media Production

3 Credit(s)

Teaches skills needed to produce effective digital media in print, audio, and video formats. Students are encouraged to take this course concurrently with newspaper, radio, and/or video practicum.

COMM 327 - Social Media

3 Credit(s)

Surveys the history of the early Internet and the transition to Web 2.0. Students will apply this knowledge by designing, creating, and developing social media presence for non-profits, local municipalities, etc., and training the recipients on how to maintain their social media presence

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

COMM 340 - Citizen Journalism and Freelance Writing

3 Credit(s)

This course focuses on the writing skills and theory behind being a freelance or citizen journalist, including feature writing and literary journalism, blogging, and video.

Prerequisite(s):

COMM 293 Minimum Grade: C- OR T

COMM 350 - Media Theory and Criticism

3 Credit(s)

Students will explore various theories that explain the nature of mass communication, the impact that media have on society, and the trends in media consumption. Particular emphasis will be placed on propaganda, violence in media, information processing, media monopolies, and critical media consumption. Students will be expected to track current media and debate contemporary media controversies in class.

Prerequisite(s):

COMM 255 Minimum Grade: C- OR T

COMM 360 - Media Management

3 Credit(s)

Students learn how various media organizations are managed and operated, with a specific focus on radio and television. Various management structures are also explored.

Prerequisite(s):

COMM 293 Minimum Grade: C- OR T

COMM 367 - Short Film/Movie Trailer Production

3 Credit(s)

This course is an intensive production workshop on the sort film and the structure of the commercial movie trailer. Students work in small groups to create an original narrative short film and work individually to create a movie trailer from existing material. Students will share their works in progress with the class and screen their final work through ASU media outlets such as the Grizzly Video YouTube and GRZ-TV campus cable channel 5.

Prerequisite(s):

COMM 165 Minimum Grade: C- OR T
AND

COMM 285 Minimum Grade: C- OR T

COMM 368 - Documentary Film Production

3 Credit(s)

Production course introduces students to the documentary, a form of non-fiction filmmaking. Students will create short documentaries in visual media, utilizing narration, video, still photos, and other elements to tell a story for general audiences.

Prerequisite(s):

COMM 165 Minimum Grade: C- OR T
AND

COMM 285 Minimum Grade: C- OR T

COMM 379 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student interests in the field.

COMM 420 - Rhetoric of Popular Culture

3 Credit(s)

This course takes seriously the idea human discourse is inherently persuasive. Further, it takes seriously the idea that popular culture is still human culture, and therefore worthy of analysis to understand how it influences human relationships and political struggle. Students will examine the messages and persuasive discourse found in everyday "texts" in film, television, the Internet, music, technology, celebrity, fashion, and other modes of cultural consumption.

COMM 430 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

Prerequisite(s):

COMM 350 Minimum Grade: C- OR T

COMM 457 - First Amendment and Copyright

3 Credit(s)

This course explores the First Amendment of the U.S. Constitution and current U.S. copyright laws, and how they apply to and affect both media practitioners and U.S. citizens.

Prerequisite(s):

COMM 255 Minimum Grade: C- OR T
AND

COMM 275 Minimum Grade: C- OR T

COMM 496 - Communication Internship

1 to 3 Credit(s)

Advanced communication students will work in a pre-employment capacity in the field of communications/journalism (broadcasting, video, print, satellite, or computing), applying learned skills in a working environment.

THTR 242 - Voice for Performance

3 Credit(s)

Study of the physical nature of voice production and the sound and mechanisms of speech, including articulation, register, and range. Individual analysis and performance.

THTR 250 - Cinema

3 Credit(s)

An introduction to American cinema. This course will cover such topics as the history of cinema, film analysis, cinematography, editing techniques, film genres, screen writing, and the motion picture industry's responses to cultural issues.

Minor in Environmental Science

Go to: Geosciences

Degree Requirements

Completion of at least 18 credit hours selected in consultation with the department chair or completion of the following.

Completion of Required Courses

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Completion of at Least 4 Credits from the Following

CHEM 334 - Environmental Chemistry

3 Credit(s)

This course is designed to introduce the student to a series of topics including stratospheric chemistry, air pollution, global warming, climate change, renewable energy, pesticides, water pollution, and heavy metal pollution.

Prerequisite(s):

CHEM 331 Minimum Grade: C- OR T

Co-requisite(s): CHEM 334L

CHEM 334L - Environmental Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM 334.

Co-requisite(s): CHEM 334

GSCI 212 - Natural Resource Management on Public Lands

3 Credit(s)

This course will examine public lands management from both a theoretical and descriptive perspective. The major political forces affecting public lands, and the specific details of energy policy, forests, rangelands, national parks, and wildlife on public lands are discussed.

Prerequisite(s):

GSCI 109 Minimum Grade: C-

OR

BIOL 330 Minimum Grade: C-

GSCI 311 - Climatology**4 Credit(s)**

This course examines the global patterns of climate and the processes that shape them. Particular attention is given to climate change mechanisms (past & present), human-induced changes to the climate system, and likely future climates. Field- and computer-based methodology relevant to the field of climatology is also emphasized.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

GSCI 321 - Geomorphology with Environmental Applications**4 Credit(s)**

This course is a study of the processes that control the development of the materials and landforms found on the earth's surface. An emphasis is placed upon the hydrologic and variables in generating landforms and human interactions with these formative processes. Field trips, topographic map, and aerial photo exercises are required. Offered spring semester of even-numbered years.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

GSCI 433 - Environmental Geochem Model**3 Credit(s)**

This lecture and computer modeling course examines the interaction of geological materials with the surface environment. Processes of transport and fate of contaminants and pollutants from natural and man made sources will be addressed, as well as the geology of some natural resources that contribute pollutants.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

AND

CHEM 131 Minimum Grade: C- OR T

OR

CHEM 132 Minimum Grade: C- OR T

Minor in Finance

Go to: Business

Degree Requirements

A minor in finance requires 18 hours in business and/or economics, of which a minimum of 15 must be in finance.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 367 - Financial Analysis

3 Credit(s)

Examination of techniques for analyzing, understanding, and applying financial information in decision situations. Topics start with financial statement analysis, development of financial models, financial forecasting, cost of capital estimation, and ends with company valuation. In addition, there will be a "hands on" project to provide students with experience in analyzing and understanding a corporate annual report using EXCEL spread sheet analysis.

Prerequisite(s):

BUS 320 Minimum Grade: C- OR T
AND

BUS 363 Minimum Grade: C- OR T

BUS 368 - Financial Institutions

3 Credit(s)

The course focuses on managing return and risk in modern financial institutions. It examines the financial services industry risk of financial intermediation, measurement of interest rate risk, credit and market risk, individual loan and liquidity risks, as well as off-balance sheet and sovereign risks. The course covers management of assets and liabilities, capital adequacy and depository insurance. Futures, forwards, options, caps, floors, collars, swaps and securitization will be also covered.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 383 - International Financial Management**3 Credit(s)**

A comprehensive study of international financial markets that covers currency exchange mechanisms in theory and practice. In line with the rapid globalization of the economy, the goal of this course is to analyze the international financial environment and how managers function in this increasingly uncertain global environment. The course will focus on three main areas of international finance: international financial environment, exchange rate behavior, and exchange risk management.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 414 - Commercial Banking**3 Credit(s)**

Bank Management is an in-depth study of banking institutions, with special emphasis on commercial banks and their connection to the Federal Reserve System and other financial institutions. A risk management perspective is adopted, and the fast changing global regulatory and financial environments are discussed. A Uniform Bank Performance Report will be analyzed.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 416 - Business Financial Problems**3 Credit(s)**

Emphasis on financial decision-making within the firm using case studies as the primary activity. Topics include financial goals and strategy, financial analysis and forecasting, capital budgeting, capital structure decisions, dividend policy, and firm valuation.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 426 - Money and Capital Markets**3 Credit(s)**

Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and

the interaction between financial markets. Topics include aggregate flow of funds analysis, an overview of financial markets, securities markets (money, bond, mortgage, stock, foreign exchange, derivative securities), as well as commercial banks, insurance and securities companies, mutual and pension funds markets. This course also covers financial markets risks and regulations.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 431 - Tech Analysis of Stock Trends

3 Credit(s)

Advanced studies in technical market analysis and trading, money management, investor psychology and analysis elements are considered. The Focus will be on the study of price action in trading markets, patterns and trends, price behavior of financial securities, trading tactics, and construction of a trading or investment model. The course will help students prepare for the Chartered Market Technician (CMT) designation.

Prerequisite(s):

BUS 373 Minimum Grade: C- OR T

BUS 432 - Series 7 General Securities Exam Review

3 Credit(s)

The Series 7 License Exam Review course is designed to prepare the student to take the National Association of Securities Dealers General Securities Representative Exam. After passing the Series 7 License exam the candidate can be licensed to sell various types of securities.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

AND

BUS 373 Minimum Grade: C- OR T

- BUS/ECON 300/400 Elective **3 Credit(s)**

Minor in Fitness Management

Go to: Department of Kinesiology

Degree Requirements

Required Core:

KIN 205 - Sports and Recreation Management

3 Credit(s)

The Sport and Recreation Management course is designed for students preparing for positions with sport and club teams, community recreation, intercollegiate and high school athletics programs, international sport organizations,

national and international amateur sport organizations, or firms specializing in sport. The course is designed to emphasize fundamental knowledge in sport and recreation and will prepare students for various roles in the industry. Through lectures, readings, video, and classroom assignments students will gain an understanding of the sport and recreation industry and how to successfully manage and lead an organization.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

KIN 210 - Sport Communication and Techniques

3 Credit(s)

This course introduces students to the main skills required for sports journalism and public relations, with particular emphasis on writing and public speaking. Students will learn about the historical development and cultural significance of sport and how those have shaped the business of sport. Students will also be introduced to technologies that impact on their abilities to write and disseminate stories and on how those technologies affect the character of messaging.

KIN 305 - Sport Facility Management

3 Credit(s)

This course introduces students to the discipline of facility management as they relate to the sport, recreation, and leisure industries. Key topics will include planning, designing, managing, scheduling, leading, and supervising sport facilities.

Prerequisite(s):

KIN 100 Minimum Grade: C- OR T

AND

BUS 103 Minimum Grade: C- OR T

KIN 390 - Risk Management

3 Credit(s)

This course explores the structure of the legal system, aspects of product liability, negligence, safety, and liability in the sport industry. Students will learn how to develop contracts designed to alleviate responsibility from a practitioner and/or organization from liability due to ordinary negligence. This course also includes discussions and practical applications for establishing a risk management system for facilities and sports programs.

Prerequisite(s):

KIN 120 Minimum Grade: C- OR T

AND

BUS 103 Minimum Grade: C- OR T

KIN 391 - Sport Ethics and Leadership

3 Credit(s)

This course explores the myriad of moral and ethical issues pertaining to athletes, sports, and sport organizations and how these apply to professionals in the field of sport management. The course will also explore leadership theories and

philosophies. Current examples of ethical dilemmas in sport and sport management will be presented, and students will explore their personal ethics in relation to these issues.

KIN 425 - Sport Law

3 Credit(s)

This course explores the structure of the legal system, aspects of constitutional law, labor and anti-trust law, tort law, product liability, contract law, administrative law, and statutory law applicable to the sport industry.

Prerequisite(s):

KIN 390 Minimum Grade: C- OR T

Total Credits: 18

Minor in Food Studies

Go to: Food Studies Department

Required Courses (12 credit hours)

FOOD 100 - Perspectives on Food

3 Credit(s)

This course is an exploration of the multitude of roles that food plays in the world. Each class will consist of a discussion of food through a different lens, such as culture, history, economy, nutrition, power, medicine, and ecology. The course will be highly discussion based and students will be challenged to explore their own personal relationship with food. Grades will be determined based on class participation, weekly reading reflections, a blog-post, and a food sharing presentation in which you will explore the history, culture and personal meaning of a specific dish.

FOOD 200 - U.S. Food Systems

3 Credit(s)

This course will provide an overview of the U.S. Food System, including the policy, agricultural, and cultural history that has led us to the food system that we have today. The course will include the following topics: the role of policy in shaping the food system; the history and current state of federal governmental food and agricultural programs; food as an industry (production, processing, distribution, sales, advertising, and consumer behavior). We will explore the implication of our current system for health, communities, and the environment.

FOOD 250 - Community Food Systems

3 Credit(s)

In this course, students will study local food systems, using the San Luis Valley as a case study for a broader understanding of the role of local food systems in community vitality and health. We will explore: the pathways of food from the farm, to the distributor, to consumer, and finally as waste; inequalities in food access within communities; strategies for creating a resilient and sustainable local food system; and the major players in the local food system.

Students will be provided with many examples of organizations using creative solutions to food system problems.

Prerequisite(s):

FOOD 100 Minimum Grade: C-
AND

FOOD 200 Minimum Grade: C-

FOOD 300 - Food Lab I

4 Credit(s)

This course prepares students for careers in which they will be working with food and covers basic knowledge and skills related to food safety, growing and harvesting food, procuring food, preparing food, and planning menus and educational content. We will spend time working in the Farm Park, helping with tasks and harvesting. In the classroom and kitchen, we will learn basic food preparation, seasonal and local foods, nutritional evaluation of foods, procurement, menu planning, and nutrition education.

Electives (choose 2 of the following)

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T
OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

BUS 105 - Introduction to Agribusiness

3 Credit(s)

An introductory course designed to provide students with a basic background in agribusiness issues and practices to give them the foundation to be successful in upper level agribusiness courses and meet expectations for basic knowledge in agribusiness relationships.

KIN 120 - Concepts in Wellness

3 Credit(s)

In this course, students will learn about the various dimensions of wellness, assess their own health status, and design interventions to improve personal health through lecture, video, laboratory experiences, and physical activities. This course will also provide students with the information necessary to make evidence-based decisions regarding personal wellness and to understand health disparities among diverse populations. There is a physical activity component to this course.

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

SOC 305 - Rural Sociology

3 Credit(s)

The purpose of this course is to introduce some of the social, political, environmental, and economic problems and prospects associated with rural America. Special attention will also be given rural community services and social institutions, with some focus on the San Luis Valley and other parts of rural Colorado.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

KIN 301 - Sport and Fitness Nutrition

3 Credit(s)

This course will present a review of basic nutrition. The course will also explore the areas of sport, exercise and fitness nutrition, supplementation, sport drug use and abuse, weight loss diets, eating disorders, weight gain nutrition, body composition, and the metabolic nutritional requirements of various sports and fitness activities.

Prerequisite(s):

KIN-329 Minimum Grade: C- OR T

AND

BIOL-112 Minimum Grade: C- OR T

OR

BIOL-205 Minimum Grade: C- OR T

BIOL 330 - Ecology

4 Credit(s)

An introduction to major ecological concepts and models at the levels of individuals, populations, communities, and ecosystems. The laboratory includes laboratory and field exercises, and an introduction to data collection and analysis. Previous credit or concurrent registration in MATH 205 and BIOL 332 are recommended. Course includes 3 hours of lecture and 3 hours of laboratory per week.

Prerequisite(s):

BIOL 210 Minimum Grade: C- OR T

AND

BIOL 209 Minimum Grade: C- OR T

OR

GSCI 307 Minimum Grade: C- OR T

AND

BIOL 209 Minimum Grade: C- OR T

Co-requisite(s): BIOL-330L

FOOD 350 - Food Lab II

4 Credit(s)

Food lab is a hands-on upper level course for Food Studies majors to learn about food from Farm to Table. Food Lab I & II should be taken in consecutive Spring and Fall semesters, as the Food Lab I students will ideally plant a garden to be harvested by the students in Food Lab II, the following fall. Even if not possible the courses will still be building upon each other. In Food Lab II, students in the class will work together to take care of the garden and harvest crops using sustainable practices. If this is not possible, students will still learn various skills for preparing the land for the harvesting season, taking care of plants, and learning various gardening skills through experiences working at other farms. Grades will be determined by attendance and participation, as well as a midterm reflection and a final project, paper, or exam. Students will also begin learning cooking techniques and styles, getting to practice and try food and skills from different parts of the world.

Prerequisite(s):

FOOD 300 Minimum Grade: C-

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

FOOD 400 - Food Studies Internship I

3 Credit(s)

This is the first internship for the Food Studies interdisciplinary degree. This course does not include regular classroom instruction, but is an internship in a food-related organization. The purpose of this internship is for the student to learn how the organization functions, its mission and principles, and to provide assistance to the organization.

Prerequisite(s):

FOOD 250 Minimum Grade: C-

SOC 470 - Social and Public Programs

3 Credit(s)

This course analyzes the historical development, current content, and adequacy of social welfare policies in the United States. Specific policy areas to be discussed include income maintenance (including social insurance and public

assistance), mental health, health care, and aging.

Prerequisite(s):

SOC 352 Minimum Grade: C- OR T

BUS 488 - Agricultural Policy and Farm Bill

3 Credit(s)

Development and implementation of public policy in agriculture, implications of international competition and trade, and development and interpretation of argument in policy development.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Minor in Geography

Go to: Geosciences

Degree Requirements

Required Courses (10 Credit Hours)

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

GSCI 201 - Introduction to Cartography and GIS

3 Credit(s)

This course will introduce students to the core concepts of Geographic Information Systems (GIS) and the importance and relevance of GIS in today's world. Students will learn what GIS is, what it is used for, and how to perform basic and core tasks involving GIS analysis. An objective is to help students develop the ability to think critically about cartographic processes and representations as well as develop their skills in creating maps. Students are expected to have basic computer proficiency prior to enrolling in this course.

GSCI 300 - World Geography

3 Credit(s)

The course examines human or cultural geography with a global perspective. It uses a topic-centered approach. It is intended to give the student an appreciation of the interaction between physical geography, environment, and cultural practices.

Electives

(Students must complete a minimum of 8 credit hours from the following)

GSCI 212 - Natural Resource Management on Public Lands

3 Credit(s)

This course will examine public lands management from both a theoretical and descriptive perspective. The major political forces affecting public lands, and the specific details of energy policy, forests, rangelands, national parks, and wildlife on public lands are discussed.

Prerequisite(s):

GSCI 109 Minimum Grade: C-
OR

BIOL 330 Minimum Grade: C-

GSCI 307 - Bio-Geography

3 Credit(s)

The course builds upon topics introduced in the introductory physical geography and general biology courses and synthesizes concepts addressed in other upper-division courses dealing with vegetation science, climatology, soil, historical geology, ecology, and evolution to explain patterns and processes influencing past and present distributions of organisms.

Prerequisite(s):

GSCI 109 Minimum Grade: C-
AND

BIOL 209 Minimum Grade: C-

GSCI 311 - Climatology

4 Credit(s)

This course examines the global patterns of climate and the processes that shape them. Particular attention is given to climate change mechanisms (past & present), human-induced changes to the climate system, and likely future climates. Field- and computer-based methodology relevant to the field of climatology is also emphasized.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

GSCI 321 - Geomorphology with Environmental Applications

4 Credit(s)

This course is a study of the processes that control the development of the materials and landforms found on the earth's surface. An emphasis is placed upon the hydrologic and variables in generating landforms and human interactions with these formative processes. Field trips, topographic map, and aerial photo exercises are required. Offered spring semester of even-numbered years.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

GSCI 330 - Nature and Properties of Soils

4 Credit(s)

This course analyzes soils as natural bodies and managed resources, focusing on impacts of landforms, hydrology, nutrients, and organisms on soils. The laboratory includes analysis of soil patterns, methods of sampling, and techniques of determining physical and chemical properties of soils. Course includes three hours of lecture and two hours of laboratory per week.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

AND

CHEM 111 Minimum Grade: C- OR T

OR

CHEM 131 Minimum Grade: C- OR T

GSCI 420 - Remote Sensing

4 Credit(s)

The course considers acquisition and interpretation of remote sensed environmental data, theory and sensors, and manual and computerized interpretation methods.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

AND

GSCI 201 Minimum Grade: C- OR T

GSCI 411 - Mountain Geography

3 Credit(s)

This class focuses on the physical science of mountains, including the origin of mountains as well as the climatic, geomorphic, and ecological processes and patterns found in mountain environments. The impact of mountains on human settlement and activities are discussed, as well as how humans have impacted mountain environments.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

GSCI 421 - Glacial and Periglacial Geography

3 Credit(s)

This course will examine geomorphological aspects of the cryosphere, giving emphasis to the study of landforms and sediments created by ice sheets and periglacial processes both past and present. Where relevant, the applied aspects of glacial and periglacial geomorphology will be given specific attention.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

Minor in Geology

Go to: Geosciences

Degree Requirements

Completion of the following required courses:

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

GSCI 112 - Earth History

4 Credit(s)

Introduction to the geological evolution of the earth through time using basic principles of stratigraphy and paleontology. Laboratory work includes identification and classification of fossils and correlation of sedimentary environments.

Prerequisite(s):

GSCI 109 Minimum Grade: C-

GSCI 123 - Geology of the San Luis Valley

1 Credit(s)

This course explores the local geology of the San Luis Valley and surrounding areas on day trips. Course is offered during the fall or spring semester. Outdoor activity required.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

GSCI 350 - Geology Excursion

2 Credit(s)

This course centers around a field trip experience of approximately one week, generally during spring break, to different areas of the southwestern U.S. This course may be taken only twice for credit. An additional fee is required. Camping and outdoor activity is required.

Prerequisite(s):

GSCI 109 Minimum Grade: C- OR T

- GSCI or GSCI 3XX or 4XX elective courses **7 Credit(s)**

Minor in Health Care Administration

Go to: Business

Degree Requirements

A minor in Health Care Administration requires five of the following courses, plus three elective credit hours in business, economics, or nursing, for a total of 18 credit hours.

Completion of 5 of the Following (15 Credits)

HCA 303 - Trends and Issues in Health Care

3 Credit(s)

This course is an introductory Health Care Administration course and will expose the student to the industry and its significant elements and trends of the current health care environment.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 311 - Health Care Law and Ethics

3 Credit(s)

This course presents an overview of the legal and ethical issues faced by health care consumers, practitioners, and administrators. The course will introduce students to the legal aspects of health care at the federal, state, and local levels. Topics covered will include criminal and civil claims against health care providers, corporate and individual liability, and legal and ethical decision-making, individual liability, and legal and ethical decision-making. HCA 361 Health Care Administration. Instructor permission.

Prerequisite(s):

BUS 211 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 312 - Health Care Med Terminology**3 Credit(s)**

This course will focus on the components of medical terms and the methods for analysis of word definitions. The emphasis will be on learning to define, pronounce, and spell medical terms using prefixes, suffixes, roots, and combining forms related to the anatomy and physiology of the human body. The course will include an introduction to operative, diagnostic, therapeutic, and symptomatic terminology of all body systems.

HCA 325 - Health Care Informatics**3 Credit(s)**

This course is a study of record keeping practices in the hospital and physician's office. Emphasis is placed in hospital and medical staff organization, patient record content, procedures in filing, numbering and retention of patient records, quantitative analysis, release of patient information, forms control and design, indexes and registers, reimbursement, regulatory and accrediting agencies, and alternate health care delivery systems. Instructor permission required.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 363 - Health Care Finance**3 Credit(s)**

This course is devoted to the practical aspects of finance in health care, an examination of current practices in financial management of health care organizations, and managerial applications to specific problems facing health care managers. The first part of the course will focus on an overview of health care finance, managerial accounting, and financial analysis. The second part will continue with managerial accounting and financial analysis and will concentrate on the various tools used in financial management. Emphasis is placed on unique issues and concerns that result from the regulatory framework of health care organizations. At the conclusion of this course, the student should be able to discuss the financial structure, market forces, controls and techniques used in the health care management field, be able to read and analyze financial statements and budgets and have the skill to interpret financial and operating performance.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 381 - Health Care Admin Internship

3 Credit(s)

The Health Administration Internship provides the students the opportunity to gain practical experience and integrate classroom knowledge and theory in an administrative setting within the health care industry.

Prerequisite(s):

HCA 303 Minimum Grade: C- OR T

HCA 402 - Public and Population Health

3 Credit(s)

This course consists of an examination of epidemiological concepts and methods of studying the distribution and determinants of morbidity and mortality in human population. The knowledge and skills acquired should enable one to understand and critically review scientific literature dealing with epidemiology concepts and measures. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 455 - Health Care Economics

3 Credit(s)

This course will examine health care decision-making and the functioning of health care markets in the U.S. The course is not designed as a pure economics theory course but instead emphasizes how you can frame and analyze various health issues using the principles of economics. By doing so, you will gain a powerful new perspective that will help you understand the decisions made by individuals and organizations in the face of scarce resources. Instructor permission.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 462 - Quality Management in Health Care

3 Credit(s)

Quality is an important aspect of health care; indeed, for most people, it is the most important aspect. Quality is defined in the dictionary as "degree of excellence" or "superiority in kind." Quality of care must be part of both the process and outcome of health care whenever possible. The issue is how does the system develop mechanisms to assure such quality? This course serves as an introduction to the process of quality management in health care organizations.

Principles of total quality in health care will be discussed. Differentiation between quality assurance and quality management will also be presented. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 480 - Health Care Policy

3 Credit(s)

This course is an introduction to health policy. It will focus on how U.S. health policy is developed and will provide students with a general understanding of the policy making process and debates related major U.S. health care legislations.

Prerequisite(s):

HCA 303 Minimum Grade: C- OR T

AND

HCA 305 Minimum Grade: C- OR T

AND

HCA 363 Minimum Grade: C- OR T

Plus One of the Following (3 Credits)

- BUS/ECON/NURS, 300-400 level course

Minor in History

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

Requirements

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

15 Credits of Elective History Courses (300-to 400-level).

Minor in International Business

Go to: Business

Degree Requirements

Minimum of 15 Hours from the Following

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 383 - International Financial Management

3 Credit(s)

A comprehensive study of international financial markets that covers currency exchange mechanisms in theory and practice. In line with the rapid globalization of the economy, the goal of this course is to analyze the international financial environment and how managers function in this increasingly uncertain global environment. The course will focus on three main areas of international finance: international financial environment, exchange rate behavior, and exchange risk management.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

ECON 425 - Economic Policy

3 Credit(s)

Study of the structure and functions of the U.S. economic system and the use of monetary, fiscal, and other policies to stabilize the economy. Emphasis on historical roots and the evolution into new behavioral economic ideas as well as the complex interplay of policy and economic forces.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T
AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

BUS 441 - International Marketing

3 Credit(s)

Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. This is accomplished through real life planning and implementation of an international marketing plan designed to market a product or service in a foreign country or countries

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

Plus a 3-hour Course

from political science, history or languages in consultation with advisor

Minor in Kinesiology

Go to: Kinesiology Department

A minor in Kinesiology is available in consultation with the department chair. It generally consists of 18 hours of core Kinesiology courses. Physical education activity classes cannot be used to fulfill minor requirements.

Minor in Latino Studies

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

The Latino Studies minor will provide students from departments across campus the opportunity to expand their understanding of economic, social and cultural relationships in an ever more globalized world. This cross-disciplinary minor includes courses from the fields of language, history, literature, sociology and political science. The minor is taught by faculty whose courses touch upon Latino culture, history, politics, language, and society.

Degree Requirements

Completion of the Following Required Course (4 Credits)

SPAN 103 - Elementary Spanish I

4 Credit(s)

A study of the principles of pronunciation, basic level conversation, essentials of grammar, written composition, and reading of materials of graded difficulty.

OR

SPAN 104 - Elementary Spanish II

4 Credit(s)

A continuation of SPAN 103. Covers the principles of pronunciation, conversation, essentials of grammar, written composition, and reading of materials of graded difficulty.

Prerequisite(s):

SPAN 103 Minimum Grade: C- OR T

Elective Courses (15 Hours)

Students must take one course in each of the following disciplines: ENG, POLS, HIST, and SOC from the offerings listed below. The remaining three credit hours may be taken from any of the courses below or any 300 or 400 level Spanish course.

ENG 365 - Ethnic and Minority Literature

3 Credit(s)

A study of the literature of Native American, African-American, Chicano, and other American ethnic and minority groups.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T

OR

ENG 210 Minimum Grade: C- OR T

ENG 375 - Chicano Literature

3 Credit(s)

This course explores the canon of Chicana/o Literature and its multiple influences. Specifically, the course deals with the cultural, political and societal climates that necessitated the literature. The course will focus on oral tradition and its evolution into other genres of Chicana/o Literature (poetry, fiction, & essay). Chicana/o Literature (poetry, fiction, & essay).

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T

OR

ENG 210 Minimum Grade: C- OR T

HIST 328 - Chicano History

3 Credit(s)

A survey of the historical development of the character, economy, social structure, politics, culture, and ideas of the Spanish-speaking people of Mexican descent in the U.S. from settlement until present, with particular attention given to the San Luis Valley.

HIST 355 - Latin America to 1830

3 Credit(s)

A survey of the economic, political, and social dimensions of the colonial system. Themes include the pre-Columbian civilizations of the Americas, the imposition of European rule, the place of Latin America in the emerging Atlantic economy, and the independence movements of the early 19th century. Major emphasis will be given to the "core" areas of Mexico, Peru, and Northeastern Brazil, but other regions will also be considered.

HIST 356 - Latin America Since 1830

3 Credit(s)

This course will examine the evolution of Latin America from the aftermath of independence to the present. Major themes include: the incorporation of Latin America into the global economy, the effect of the export economy on the region's peasant populations, the building of national states, the fate of revolutionary struggles in the 20th century, and Latin America's "neocolonial" relationship with the United States.

HIST 357 - Mexico

3 Credit(s)

Historical survey of the social, intellectual, and political developments from the conquest to the present.

POLS 325 - Political Mvmnts/Latin America

3 Credit(s)

This course broadens students' understanding of Latin America by introducing them to their political aspirations and modes of organization.

POLS 468 - U.S.-Latin American Relations

3 Credit(s)

This course will examine U.S.-Latin American Relations from the Monroe doctrine to the Present. It will explore recent developments in U.S.-Latin American relations, particularly the growing interdependence and the impact of the end of the cold war.

SOC 318 - Race, Class, and Gender

3 Credit(s)

The focus of this course is on the interrelated ascribed statuses of "race," social class, gender, and sexual orientation in American society, how they are perceived and reinforced, the social tensions that result and the dynamics of change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 365 - Race and Ethnicity in the U.S.

3 Credit(s)

This course provides a sociological approach to race and ethnic relations in the U.S. today. This course introduces the basic sociological theories and perspectives related to the study of race and ethnicity, the histories, and present status of different racial and ethnic groups in the United States and raises questions about continuing racial discrimination and inequality in our society. Issues of defining race, racial identity, interpersonal and institutional discrimination, segregation, and affirmative action (among others) are explored.

Note

ENG 375, HIST 379, POLS 379, and SOC 379 "Special Topics" courses that have content relevant to Latino Studies may also count as electives for the Latino Studies Minor. To determine a course's eligibility for inclusion in the minor, please consult with the student's advisor or the Chair of the HAPPSS Department.

Minor in Management

Go to: Business

Degree Requirements

A minor in management requires 18 hours in business and/or economics, of which a minimum of 15 must be in management.

Minimum of 15 Hours from the Following

BUS 315 - Sales and Sales Management

3 Credit(s)

This course is designed to introduce students to management techniques as they relate specifically to the marketing and sales area. Topics covered include: the selling process, compensation systems, motivation and leadership, time and territory management, sales forecasting, quotas, and evaluating the sales force.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 365 - Small Business Management/Entrepreneurship

3 Credit(s)

This course presents the techniques and information necessary to create a comprehensive business plan for an entrepreneurial idea. Coursework addresses feasibility analysis, management, marketing, technology, and financial plans, culminating in presentation of a viable business plan.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 401 - Organizational Behavior

3 Credit(s)

Participants in the course will explore the theory of human relations in organizations. The emphasis will be on the application of behavioral science knowledge to contemporary organizational issues, which may include individual and group dynamics, motivation, leadership, organizational change, and development.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 418 - Leadership Strategies

3 Credit(s)

This course presents contemporary theories and approaches to leadership practices in modern organizations. Students learn how effective leadership can assist in the creation of a strong organizational culture and the implications external forces have on individual leadership development and continued growth.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 419 - Organizational Change/Develop

3 Credit(s)

The study of planned and unplanned change in organizations to include diagnosis, planning, and implementation of organizational change initiatives. Emphasis is on teamwork within organizations and survey development.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 467 - Creativity and Innovation

3 Credit(s)

Course objectives are to develop skills in generating new and original ideas, increase ability to convert ideas into action and success, and increase knowledge and skill in creative problem solving as applied to business scenarios.

Prerequisite(s):

BUS 361 Minimum Grade: C-

BUS 468 - New Business Venturing

3 Credit(s)

This course introduces students to starting and operating a business. Students will be exposed to how business interacts with government, financial institutions, and society. This course will examine and study the process, challenges, risks, and rewards of starting up a new business. The student will be equipped with tools required to start their own business.

Prerequisite(s):

BUS 365 Minimum Grade: C-

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Plus 3 Hours of Business or Economics Courses, 300-400 Level

Minor in Marketing

Go to: Business

Degree Requirements

Minimum of 15 credit hours from the following:

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 315 - Sales and Sales Management

3 Credit(s)

This course is designed to introduce students to management techniques as they relate specifically to the marketing and sales area. Topics covered include: the selling process, compensation systems, motivation and leadership, time and territory management, sales forecasting, quotas, and evaluating the sales force.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 345 - Advertising

3 Credit(s)

Discusses the history, purposes, and regulations of the advertising industry. Topics covered include creative principles, media advantages and disadvantages, media planning, regulation of advertising, and coordination with other promotion activities.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 356 - Retailing

3 Credit(s)

Study of marketing and management problems faced in the operation of a retail business. Emphasis is given to techniques for solving problems in location, management, and merchandising, especially with the integration of Internet retailing (E-Tailing) as both a competitor and an extension of the storefront business.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 385 - Sports Marketing

3 Credit(s)

Illustrates the dynamic, progressive and influential nature of sports marketing. Explores the sport marketing concept as a consumer-driven, integrated, goal-oriented philosophy for a team, event, organization or athlete. Topics covered include: athletic endorsements, team sports, event sponsorships and alternative sports.

BUS 441 - International Marketing

3 Credit(s)

Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. This is accomplished through real life planning and implementation of an international marketing plan designed to market a product or service in a foreign country or countries

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 448 - Interactive/Social Media Marketing

3 Credit(s)

This course focuses on relationship marketing, interactive marketing, integration of consumer data, Internet marketing (E-commerce), media advertising, catalogs, mailing lists, telemarketing, and the use of direct marketing techniques to replace or enhance the traditional marketing methods of retail and direct sales.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 449 - Marketing in the 21st Century

3 Credit(s)

This course provides the practical tools and strategies required to successfully leverage social networks, capitalize on their powerful word-of-mouth lift, and how to measure these interactive marketing efforts. These tools will be used on an actual social media marketing campaign for a business or non-profit entity. Current and future marketing tools will be discussed and evaluated.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

BUS 448 Minimum Grade: C- OR T

BUS 454 - Market Research & Information

3 Credit(s)

Study of the theory and methods used in marketing research to address marketing problems. May include the completion of a research project where students learn by performing a research project from problem formulation to writing a research report. Also prepares the students for evaluating research performed by others.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 460 - Marketing Management

3 Credit(s)

Twelve hours of marketing courses and senior status required. Capstone course in marketing. Study of the problems faced by marketing managers as they make decisions and develop policies.

Prerequisite(s):

BUS 454 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

Plus 3 Credit Hours of Business or Economics Courses, 300-400 Level

Minor in Mathematics

Go to: Mathematics

Minor Requirements

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

MATH 220 - Calculus III

4 Credit(s)

This course is an introduction to the calculus of functions of several variables. Typical topics include three-dimensional analytic geometry, vectors, parametric curves and surfaces, arc length and curvature, limits, continuity, partial derivatives, gradients, directional derivatives, tangent planes, multiple integrals, vector fields, line and surface integrals, Green's theorem, Stokes' Theorem, and the divergence theorem.

Prerequisite(s):

MATH 121 Minimum Grade: C- OR T

MATH 250 - Introduction to Mathematical Thought

3 Credit(s)

This course looks at topics central to further study in mathematics. These include symbolic logic, especially as it

applies to mathematical proof; methods of mathematical proof such as direct proof, indirect proof, and by induction; use and meaning of mathematical quantifiers and predicates; sets; relations; equivalence relations and partitions; order relations; and functions and their properties.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

- MATH 3XX Electives approved by the dept. Chair.

Minor in Music

Go to: Music

Entrance Requirements

New music majors and minors are required to complete an entrance audition for admittance to the Department of Music.

Placement Examinations

- Transfer and new students in music must take placement examinations as appropriate in applied music and music theory.
- Students who have not been enrolled in applied music or music theory for two or more years must reaudition for admittance into the Department of Music and take a theory placement exam.

Course Completion Requirements

MUS 000 - Recital Attendance

0 Credit(s)

A requirement for music majors and minors, which consists of attendance at a designated number of concerts/recitals each semester.

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

MUS 103 - Introduction to Music Technology

1 Credit(s)

An introduction to music technology, covering a broad range of topics such as music notation, MIDI, music

sequencing, mixing, and basic audio editing. The programs to be used include Finale, Garageband, and Audacity, and students compose music utilizing basic concepts of music fundamentals and music theory. The goal of this course is to equip students with music technology skills and knowledge that will be of benefit during their collegiate and professional careers.

Prerequisite(s):

MUS 101 Minimum Grade: C- OR T

MUS 104 - Music Theory I

3 Credit(s)

Development of basic music skills and harmony with practical application through part-writing and composition.

Prerequisite(s):

MUS 101 Minimum Grade: C- OR T

MUS 108 - Aural Skills I

1 Credit(s)

Foundational work in sight singing and written dictation.

Prerequisite(s):

MUS 101 Minimum Grade: C- OR T

MUS 204 - Music Theory II

3 Credit(s)

Advanced study in music writing and analysis with emphasis on tonal and chromatic harmony.

Prerequisite(s):

MUS 104 Minimum Grade: C- OR T

MUS 208 - Aural Skills II

1 Credit(s)

Emphasis on sight singing in parts, more difficult keys and intervals, modulations, and rhythmic patterns in dictation.

Prerequisite(s):

MUS 104 Minimum Grade: C- OR T
AND

MUS 108 Minimum Grade: C- OR T

Co-requisite(s): MUS 204

MUS 140 - Applied Music

2 Credit(s)

Private instruction in applied music. May be repeated for credit (eight hours maximum).

MUS 141 - Applied Music

2 Credit(s)

Private instruction in applied music. May be repeated for credit (eight hours maximum).

Prerequisite(s):

MUS 140 Minimum Grade: D OR T

2 Semesters (2 Credits Total)

MUS 245 - Concert Band

1 Credit(s)

Open to all students, regardless of major field, who demonstrate sufficient ability on a standard wind or percussion instrument. May be repeated for credit.

MUS 247 - Concert Choir

1 Credit(s)

Open to all qualified students with repertoire selected from the standard choral concert literature. May be repeated for credit.

OR

MUS 257 - Chamber Choir

1 Credit(s)

An advanced mixed choral ensemble, open to students by audition. Repertoire is selected from standard and contemporary choral concert literature as well as music of other cultures, ethnicities and traditions. May be repeated for credit.

MUS 250 - Orchestra

1 Credit(s)

Open to all students, regardless of major field, who demonstrate sufficient ability on a standard orchestral instrument. May be repeated for credit.

Minor in Music Business

Go to: Business

Go to: Music

Degree Requirements

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 365 - Small Business Management/Entrepreneurship

3 Credit(s)

This course presents the techniques and information necessary to create a comprehensive business plan for an entrepreneurial idea. Coursework addresses feasibility analysis, management, marketing, technology, and financial

plans, culminating in presentation of a viable business plan.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

Optional class

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 401 - Organizational Behavior

3 Credit(s)

Participants in the course will explore the theory of human relations in organizations. The emphasis will be on the application of behavioral science knowledge to contemporary organizational issues, which may include individual and group dynamics, motivation, leadership, organizational change, and development.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

Minor in Philosophy

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

Degree Requirements

Required Core

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

Electives (15 hours from the following)

PHIL 202 - Ethics

3 Credit(s)

An examination of criteria governing ethical responses in typical situations as presented by representative thinkers. The application of principles in the development of reasonable standards of conduct and in the formulation of codes of ethics.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

PHIL 300 - Philosophy in Film and Literature

3 Credit(s)

This course will approach film and literature as a manifestation of thought which contains and reveals philosophical reflection and inquiry. The course will provide an exploration of the particular medium that is film, rendering more accessible its unique ways of advancing meaning through the combined and controlled use of color, texture, sound, perspective, transitions, and time, as well as narrative content. Equally, literary pieces will provide an exploration of aspects of the human condition and significant philosophical inquiry through narration, symbolism, tone, and style. Topics to be explored include: Metaphysics, Epistemology, Social/Political Philosophy, Absurdism and Existentialism, Morality and Choice/Free Will, Self and Identity, and Aesthetics.

PHIL 304 - Religions of the Western World

3 Credit(s)

A survey of major religious traditions of the west and their early influences. The course will cover but is not limited to Zoroastrianism, Mithraism, Manichaeism, Greek and Roman, Judaism, Christianity, Islam.

PHIL 379 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

PHIL 436 - American Thought

3 Credit(s)

The historical, philosophical, and literary ideas that have influenced American life and thought. Same as POLS 436.

PHIL 466 - Ancient Political Theory

3 Credit(s)

The first course of a two-semester course sequence designed to provoke philosophical reflection regarding the perennial, and still fundamental, questions about man in relation to the state. The first semester will focus on the period from Plato to St. Thomas. Same as POLS 467.

PHIL 467 - Modern Political Theory

3 Credit(s)

The second course of a two-semester course sequence designed to provoke philosophical reflection regarding the perennial, and still fundamental, questions about man in relation to the state. The second-semester course will treat thinkers for Machiavelli through Marx. Same as POLS 467.

PHIL 479 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

Minor in Physics

Go to: Engineering and Computer Science

Required Courses

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T

AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

PHYS 306 - Modern Physics

4 Credit(s)

A survey of topics in modern physics including: special relativity, properties of electromagnetic radiation, and introduction to quantum mechanics with applications to barriers and atoms. Additional topics vary from year to year and may include statistical mechanics, solid state physics, properties on nuclei and their transformations, natural and induced radioactivity, and elementary particles. Offered spring semesters of even years.

Prerequisite(s):

PHYS 232 Minimum Grade: C- OR T
AND

MATH 121 Minimum Grade: C- OR T

AND

CHEM 131 Minimum Grade: C- OR T

AND

CHEM 132 Minimum Grade: C- OR T

- PHYS XXX Electives approved by the department chair (4 hours)

Minor in Political Science

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

Degree Requirements

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

15 Elective Credits Chosen in Consultation with Department Head

Minor in Psychology

Go to: Psychology

A minor in psychology is a great complement for many majors, especially in fields like nursing and business where today's employers are putting more and more emphasis on interpersonal skills. The minor will provide a broad overview of several important areas in psychology, all of which will help students appreciate why people behave in certain ways.

9 Credits from the Following

PSYC 204 - Child Development

3 Credit(s)

The goal of this course is to examine the interaction of heredity and environment on human development from conception through pre-adolescence. Issues in physical, cognitive, and social development from the individual and normative perspectives are explored. Some topics include the birth process, early cognitive and language development, gender socialization, the impact of parenting styles, and moral reasoning.

Prerequisite(s):

PSYC 101 Minimum Grade: C or T

PSYC 205 - Adolescent and Adult Development

3 Credit(s)

This course continues the study of life-span development from adolescence through old age and death. Issues in physical, cognitive, and social development from the individual and normative perspectives are explored. Topics include identity formation, sexual orientation, marriage, models of aging, changes in cognition, social developments, and coping with old age.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

PSYC 230 - Psychology of Mental Health

3 Credit(s)

The purpose of this course is to provide students with the historical and social background necessary to understand mental health issues. Students will examine the psychodynamic, behavioral, and cognitive approaches related to the development and treatment of mental disorders and their classifications. Topics will include schizophrenia, depression, bipolar, and personality disorders.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

PSYC 245 - Brain and Behavior**3 Credit(s)**

This course provides students with a basic overview of the biological processes underlying human behavior. This course begins by presenting fundamental nervous system structure and processes and concludes by examining the role of biology in complex behaviors. Clinical case studies are used to illustrate psychological and neurological disorders. Sample topics include evolution and genetics, neural communication, major brain structures and their functions, human brain damage, sleep and dreaming, drug addiction, memory and amnesia, and stress and illness.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

PSYC 265 - Personalities in Perspective**3 Credit(s)**

This course provides an introduction to the psychodynamic, trait, behavioral, biological, cognitive and humanistic approaches to personality. Specific theories and current research within each approach are reviewed. The course covers such theorists as Freud, Jung, Erikson, Skinner, Bandura, Cattell, Allport, and May.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

Plus 9 Credits from any 300 or 400 Level Course

Minor in Sociology

Go to: Sociology

A Minor in Sociology (18 hours excluding SOC 201) is available through consultation with any sociology faculty member

Minor in Spanish

Go to: Languages, Literature, and Media Communication

Minor in Spanish (7 courses) available in consultation with any Spanish faculty member.

Minor in Sport Psychology

Go to: Psychology

A Minor in Sport Psychology Consists of the Following

KIN 302 - Sport Psychology

3 Credit(s)

Sport psychology is primarily concerned with the interaction between psychological variables and participation in sport and exercise. This course will review this interaction by addressing variables that affect the individual athlete, influence sport and exercise environments, shape group processes, enhance health and wellbeing, improve performance, and facilitate psychological growth and development in sport participants from diverse populations.

PSYC 205 - Adolescent and Adult Development

3 Credit(s)

This course continues the study of life-span development from adolescence through old age and death. Issues in physical, cognitive, and social development from the individual and normative perspectives are explored. Topics include identity formation, sexual orientation, marriage, models of aging, changes in cognition, social developments, and coping with old age.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

KIN 341 - Human Motor Development

3 Credit(s)

This course is designed to educate Kinesiology majors in the principles of human motor behavior and its influence on cognitive, affective, and psychomotor development throughout the lifespan. It will introduce students to factors that affect the intellectual, social, emotional, and physical development, growth and maturation of individuals relative to motor acquisition and regression.

Prerequisite(s):

BIOL 112 Minimum Grade: C- OR T
OR

BIOL 205 Minimum Grade: C- OR T

AND

BIOL 206 Minimum Grade: C- OR T

PSYC 386 - Theory and Practice

3 Credit(s)

This course presents the historical underpinnings of the major theories and principles of learning, and how they are used in applied settings. Classic learning theories are contrasted with contemporary approaches. Students will learn cognitive behavioral assessment and intervention strategies. Topics include traditional behavior modification, as well as contemporary social learning theory and cognitive-behavioral change strategies.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

KIN 380 - Diversity, Equity Sport, and Society

3 Credit(s)

This course has a two-fold purpose: first, it is designed to provide a sound introduction to diversity and equity in sport; and second, it is designed to encourage students to ask questions and think critically about sport as a part of society. This course will explore issues around diversity, equity and inclusion in sport and society.

PSYC 211 - Introduction to Statistics Lecture/Lab

4 Credit(s)

In this course, students will develop a working appreciation of statistical concepts and applications as employed in the behavioral sciences. The course presents descriptive and inferential statistics and their applications. The laboratory component of this course gives students an opportunity to develop skills in using statistical software.

Prerequisite(s):

PSYC 101 Minimum Grade: C- or T

AND

MATH 97 Minimum Grade: S-A or S-B or S-C or T

OR

MATH 99 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 121 Minimum Grade: C- or T

OR

MATH 140 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Plus One of the Following

PSYC 360 - Psychology of Gender

3 Credit(s)

This course will examine gender development from a variety of theoretical approaches, including evolutionary, cognitive, social learning, and cross-cultural. Topics will include how gender influences thinking, communication, interpersonal relationships, education, work, and family.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T
AND

PSYC 204 Minimum Grade: C- OR T

AND

PSYC 205 Minimum Grade: C- OR T

AND

PSYC 211 Minimum Grade: C- OR T

PSYC 375 - Human Sexuality

3 Credit(s)

In this multidisciplinary course, students will be introduced to the physiological, medical, sociological, psychological, legal, ethical, moral, and educational facets of human sexuality. Topics in this course include male and female sexual anatomy and sexual response, contraception and disease control, sexually transmitted diseases, and sexual orientation.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

PSYC 265 - Personalities in Perspective

3 Credit(s)

This course provides an introduction to the psychodynamic, trait, behavioral, biological, cognitive and humanistic approaches to personality. Specific theories and current research within each approach are reviewed. The course covers such theorists as Freud, Jung, Erikson, Skinner, Bandura, Cattell, Allport, and May.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

Minor in Taxation

Go to: Business

Degree Requirements

A minor in Taxation requires a minimum of 18 hours from the list below, completed with a grade of C- or T or better.

A Minimum 18 Credits from the Following

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 358 - Accounting Ethics

3 Credit(s)

Ethics as it applies to the accounting and auditing professions and will be the focus of this course. Emphasis will be on the concept of independence, along with integrity, objectivity, ethical reasoning, and other core values necessary for a high level of professional ethics in the accounting profession.

Prerequisite(s):

BUS 306 Minimum Grade: C- OR T

BUS 371 - Payroll Accounting and Taxation

3 Credit(s)

This course is devoted to the principles of payroll computations and administration including creation and maintenance of payroll records as well as proper payroll tax depositing and reporting.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 377 - Agricultural Taxation

3 Credit(s)

This course is devoted to specific income tax laws associated with agricultural business to include farmers and ranchers both as individuals and as part of taxable entities.

Prerequisite(s):

BUS 355 Minimum Grade: C- OR T

BUS 455 - Entity Taxation

4 Credit(s)

Business 455 concentrates on the federal income tax consequences of the formation, normal operation, and the dissolution of corporations, partnerships, and fiduciaries. Other taxation problems of special interest may be covered.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 465 - Estate, Gift, and Fiduciary Tax Law

3 Credit(s)

This course will address the fundamentals of Estate, Gift, and Fiduciary tax law. Topics will include Federal Gift Tax, death transfer tax laws, and fundamentals and reporting returns for estates.

Prerequisite(s):

BUS 455 Minimum Grade: C- OR T

BUS 381 - Business Internship

1 to 3 Credit(s)

Junior standing and approval of the department chair required. The internships are planned, meaningful work experiences that are academic in nature. Supervision consists of a site supervisor who is a qualified professional in the business or organization where the internship is arranged and a faculty sponsor who is a full-time professor in the School of Business, usually from the student's major. The site supervisor evaluates the work performed by the student on the job. The faculty sponsor is responsible for maintenance of academic quality and assigns the course grade. (30 contact hours=1 credit hour)

OR

BUS 481 - Business Internship II

1 to 3 Credit(s)

Senior standing and approval of the Department Chair required. The internships are planned, meaningful work experiences that are academic in nature. Supervision consists of a site supervisor who is a qualified professional in the business or organization where the internship is arranged and a faculty sponsor who is a full-time professor in the School of Business, usually from the student's major. The site supervisor evaluates the work performed by the student on the job. The faculty sponsor is responsible for maintenance of academic quality and assigns the course grade (30 contact hours=1 credit hour).

BUS 179 - Special Topics

1 to 3 Credit(s)

Offered periodically to meet student special interests in the field.

OR

BUS 379 - Special Topics

1 to 3 Credit(s)

Offered periodically to meet student special interests in the field.

Note

*The internship placement must be approved by accounting faculty.

**A maximum of 3 credit hours may be applied to the Taxation minor.

Minor in Theatre

Go to: Theatre

The minor in theatre arts is offered for those who wish to be more effective in communicating the knowledge of their major. The minor is highly relevant and practical in combination with other majors such as business, government, sociology, English, guidance and counseling, music, journalism, education, speech correction, health, physical education and recreation, and all pre-professional studies. Courses are to be selected in consultation with the program chair.

Minor in Water Studies

Go to: Interdisciplinary Studies

Water is the "lifeblood" of the San Luis Valley, greatly impacting the people and communities here. Water underlies our connection to the environment and wildlife, culture and history, agriculture and economy, and the strong sense of place that is core to the identity of the people here.

Salazar Rio Grande del Norte Center
SalazarRioGrandeCenter@adams.edu
719-587-8154

Water Studies Minor Degree Plan (18 Credits)

Required Courses (6 Credits)

WATR 101 - Water Essentials: How Water Works

3 Credit(s)

This course is an introduction and overview of water in the West, from its basic chemical structure and physics as well as hydrology and water's role in nature to how water serves and is managed as a beneficial resource for people. This course introduces foundational concepts of water's functional properties, how humans have put water to work and how we have developed systems of water allocation, administration, and management, including an overview of core terminology, and fundamental principles of water management. The course will focus on the Western water environment and issues, with specific discussions on the application and administration of water in Colorado's Rio Grande Basin.

WATR 201 - Fundamentals and Functions of Water

3 Credit(s)

This course is the second in a two-course series emphasizing essential water education. It will expand on fundamental concepts of ground and surface water functions and management as introduced in the prerequisite course, WATR 101 Water Essentials: How Water Works in the West. The design of this course is to explore the hydrologic processes and cycle in terms of both ground and surface water; examine the environmental aspects of watersheds that affect the hydrologic output, including forest health, precipitation accumulation, and infrastructure regulating surface water runoff; examine and analyze the administration of water and agricultural water use, with a focus and field experiences in the San Luis Valley and Rio Grande Basin of Colorado. The course will include required field trips.

Prerequisite(s):

WATR 101 Minimum Grade: C- OR T

Electives (Choose 12 Credits)

ANTH 330 - Humans and Water

3 Credit(s)

This class will explore the relationship between humans and water through space and time, focusing on the American West. We will look at how different cultural groups interact with and manipulate water, as well as how they view the natural resource. In addition, we will analyze how changes in water resources influenced human cultures.

BUS 384 - Natural Resources/Water Law

3 Credit(s)

The goal of this course is to provide students with knowledge of the regulatory responsibilities related to agriculture production and operations with respect to natural resources and water. The course will cover federal, state, and local requirements as well as application to agribusiness endeavors.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 211 Minimum Grade: C- OR T

ECON 360 - Natural Resource Economics

3 Credit(s)

This course studies the usage of natural resources in the economy, the value of natural resources to society, and the allocation of renewable and nonrenewable resources. The course introduces economic theories for efficient management of natural resources and considers sustainability, conservation, and preservation. The course will consider resources, such as water, on a local scale as well as a global scale.

ENG 420 - Environmental Literature

3 Credit(s)

This course is a survey of environmental literature poetry, fiction, and non-fiction spanning from the beginning of the conservation movement with Thoreau through the modern environmental movement with Carson, and to the present day with a focus on sustainability and the Southwestern United States with attention paid to the environmental impacts on indigenous populations and minority groups and authors, particularly Latinx. Students will analyze, criticize, reflect, and write about the reading, but also reflect upon field visits to farms, ranches, monuments, and parks throughout the region.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T

HIST 305 - The American West

3 Credit(s)

Historical survey of the Indian-, Hispanic-, and English-speaking groups of the West. Emphasis is on the frontier period.

HIST 340 - Water and Equity

3 Credit(s)

This course is an examination of water use and distribution among several cultures. Special attention will be devoted to Latino communities and current issues affecting aspects of equity in contemporary water policy.

OES 101 - Outdoor Recreation Essentials

3 Credit(s)

This course is a general introduction to outdoor recreation history, theories, natural resource management, and current trends in the outdoor recreation industry . Students are also introduced to essential outdoor skills for camping and backpacking including trip planning, equipment selection and care, food preparation, Leave No Trace environmental ethics, and risk management. Field trips are required including overnight trips.

OES 370 - Wildland Recreation Management

2 Credit(s)

This course immerses students into the field of recreation ecology. Hands-on experience participating in local stewardship projects with federal and state agencies will be a component of the course. Students will gain knowledge and experience with how agencies and organizations identify recreational impact oriented problems, collect data,

prioritize, allocate resources, and collaborate to accomplish conservation and stewardship objectives. Students will practice with professional approaches and strategies for planning and monitoring recreational use. Students are required to participate in a variety of learning experiences in various locations throughout the San Luis Valley.

Co-requisite(s): OES 370L

PHIL 320 - Water Ethics

3 Credit(s)

This class will explore the ethical concerns of water (re)production, usage, and distribution according to concepts of rights and responsibilities, socio-historical conditions, available resources, cultural usage, evaluation, and governance.

Minor in Women's and Gender Studies

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

Examine how ideas about gender and sexuality shape social roles and identities within a culture. With a choice of two tracks (Women's Studies and Gender and Sexualities) the minor in Women's and Gender Studies extends and enriches any major degree by heightening your awareness of the range of human experience, potential, and accomplishment.

Women's Studies Track

Students must take 2 required courses and 4 electives, as approved by the WGS advisor, for a total of 18 semester hours.

Required of All Minors, Who Are Advised to Take the Courses Early in Their Studies

WS 201 - Women's Studies

3 Credit(s)

An interdisciplinary analysis of women's position in society as presented through the disciplines of history, sociology, anthropology, theology, psychology, literature, and the fine arts. The course will examine theoretical approaches to the differential access to power between men and women and the existence of patriarchy in Western culture.

ENG 320 - Literature and Sexualities

3 Credit(s)

An examination of a variety of sexual identities and expressions as portrayed in literature.

Two of the Following Courses (6 Hours)

AR 367 - Women Artists in Art History

3 Credit(s)

A survey of women artists in the history of art from antiquity to the present.

Prerequisite(s):

AR 105 Minimum Grade: C- OR T

POLS 393 - Women, Politics, and Culture

3 Credit(s)

Interdisciplinary analysis of politics and culture. Course examines the role of gender in the political culture of the United States and selected societies in industrialized and developing nations. Of special interest to those wishing to pursue an interest in women's studies and/or cultural anthropology.

SOC 318 - Race, Class, and Gender

3 Credit(s)

The focus of this course is on the interrelated ascribed statuses of "race," social class, gender, and sexual orientation in American society, how they are perceived and reinforced, the social tensions that result and the dynamics of change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

THTR 329 - Women and Drama

3 Credit(s)

A survey of the history and literature associated with women in theatre. The course will include the history of actual women involved in the evolution of western and eastern theatre traditions as well as playscripts which deal with the subject of women's issues. There will be a strong emphasis on the incorporation of contemporary dramatic theory, especially feminist theory, to analyze dramatic texts. The course will cover Greek through Contemporary Drama.

PSYC 360 - Psychology of Gender

3 Credit(s)

This course will examine gender development from a variety of theoretical approaches, including evolutionary, cognitive, social learning, and cross-cultural. Topics will include how gender influences thinking, communication, interpersonal relationships, education, work, and family.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

AND

PSYC 204 Minimum Grade: C- OR T

AND

PSYC 205 Minimum Grade: C- OR T

AND

PSYC 211 Minimum Grade: C- OR T

One of the Following Courses (3 Hours)

ENG 403 - Shakespeare

3 Credit(s)

Combines study of comedies, histories, and tragedies.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T

OR

ENG 210 Minimum Grade: C- OR T

COMM 420 - Rhetoric of Popular Culture

3 Credit(s)

This course takes seriously the idea human discourse is inherently persuasive. Further, it takes seriously the idea that popular culture is still human culture, and therefore worthy of analysis to understand how it influences human relationships and political struggle. Students will examine the messages and persuasive discourse found in everyday "texts" in film, television, the Internet, music, technology, celebrity, fashion, and other modes of cultural consumption.

COMM 430 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

Prerequisite(s):

COMM 350 Minimum Grade: C- OR T

One of the Following Courses (3 Hours)

ENG 385 - Women and Literature

3 Credit(s)

A survey of literature written by women beginning with Sappho and focusing on the western tradition. An introduction to feminist literary criticism.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T

OR

ENG 210 Minimum Grade: C- OR T

SOC 419 - Gender and Society

3 Credit(s)

The aim of the course is for students to become familiar with the continuing differences and inequalities between women and men in the contemporary United States, and to begin to explain why and how they occur through a sociological lens. Understanding gender as it relates to other social identities (for example, race, class and sexuality) is an important organizing framework of the course. Students will learn about the gendered arrangements in a variety of social contexts such as education, the media, work and the economy, and the family.

PSYC 375 - Human Sexuality

3 Credit(s)

In this multidisciplinary course, students will be introduced to the physiological, medical, sociological, psychological, legal, ethical, moral, and educational facets of human sexuality. Topics in this course include male and female sexual anatomy and sexual response, contraception and disease control, sexually transmitted diseases, and sexual orientation.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

HIST 320 - History of American Women

3 Credit(s)

This course examines the role of women in American History with special emphasis on how the story of women is told by historians over time. It examines not only the lives of many famous white women, but also the experience of women from various ethnicities and economic backgrounds. In addressing how Americans construct their understanding of women's lives in the U.S., the course will also reassess how focusing on women's lives might alter one's understanding of the broader patterns and interpretations of American History.

BUS 394 - Women and Power: Gender, Business & Leadership

3 Credit(s)

The rise of women into powerful leadership roles in business, politics, and entrepreneurship is among one of the most profound social transformations in recent decades. This course examines contemporary issues relevant to women as leaders. Topics include recent research on women and applied leadership in the workplace; skills and strategies for negotiation, coalition-building and influencing the career path to leadership, and discussions by women from diverse personal and professional backgrounds with similar levels of career achievement.

Gender and Sexualities Track

Students must take 2 required courses and 4 electives, as approved by the WGS advisor, for a total of 18 semester hours.

Required of All Minors, Who Are Advised to Take the Courses Early in Their Studies

ENG 320 - Literature and Sexualities

3 Credit(s)

An examination of a variety of sexual identities and expressions as portrayed in literature.

WS 201 - Women's Studies

3 Credit(s)

An interdisciplinary analysis of women's position in society as presented through the disciplines of history, sociology, anthropology, theology, psychology, literature, and the fine arts. The course will examine theoretical approaches to the differential access to power between men and women and the existence of patriarchy in Western culture.

Two of the Following Courses (6 credits)

COMM 420 - Rhetoric of Popular Culture

3 Credit(s)

This course takes seriously the idea human discourse is inherently persuasive. Further, it takes seriously the idea that popular culture is still human culture, and therefore worthy of analysis to understand how it influences human relationships and political struggle. Students will examine the messages and persuasive discourse found in everyday "texts" in film, television, the Internet, music, technology, celebrity, fashion, and other modes of cultural consumption.

COMM 430 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

Prerequisite(s):

COMM 350 Minimum Grade: C- OR T

ENG 403 - Shakespeare

3 Credit(s)

Combines study of comedies, histories, and tragedies.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T
OR

ENG 210 Minimum Grade: C- OR T

PSYC 360 - Psychology of Gender

3 Credit(s)

This course will examine gender development from a variety of theoretical approaches, including evolutionary, cognitive, social learning, and cross-cultural. Topics will include how gender influences thinking, communication, interpersonal relationships, education, work, and family.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T
AND

PSYC 204 Minimum Grade: C- OR T
AND

PSYC 205 Minimum Grade: C- OR T
AND

PSYC 211 Minimum Grade: C- OR T

One of the Following Courses (3 credits)

AR 367 - Women Artists in Art History

3 Credit(s)

A survey of women artists in the history of art from antiquity to the present.

Prerequisite(s):

AR 105 Minimum Grade: C- OR T

HIST 320 - History of American Women

3 Credit(s)

This course examines the role of women in American History with special emphasis on how the story of women is told by historians over time. It examines not only the lives of many famous white women, but also the experience of women from various ethnicities and economic backgrounds. In addressing how Americans construct their understanding of women's lives in the U.S., the course will also reassess how focusing on women's lives might alter one's understanding of the broader patterns and interpretations of American History.

SOC 318 - Race, Class, and Gender

3 Credit(s)

The focus of this course is on the interrelated ascribed statuses of "race," social class, gender, and sexual orientation in American society, how they are perceived and reinforced, the social tensions that result and the dynamics of change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

THTR 329 - Women and Drama

3 Credit(s)

A survey of the history and literature associated with women in theatre. The course will include the history of actual women involved in the evolution of western and eastern theatre traditions as well as playscripts which deal with the subject of women's issues. There will be a strong emphasis on the incorporation of contemporary dramatic theory, especially feminist theory, to analyze dramatic texts. The course will cover Greek through Contemporary Drama.

One of the Following Courses (3 credits)

BUS 394 - Women and Power: Gender, Business & Leadership

3 Credit(s)

The rise of women into powerful leadership roles in business, politics, and entrepreneurship is among one of the most profound social transformations in recent decades. This course examines contemporary issues relevant to women as leaders. Topics include recent research on women and applied leadership in the workplace; skills and strategies for negotiation, coalition-building and influencing the career path to leadership, and discussions by women from diverse personal and professional backgrounds with similar levels of career achievement.

ENG 385 - Women and Literature

3 Credit(s)

A survey of literature written by women beginning with Sappho and focusing on the western tradition. An introduction to feminist literary criticism.

Prerequisite(s):

ENG 203 Minimum Grade: C- OR T

OR

ENG 210 Minimum Grade: C- OR T

POLS 393 - Women, Politics, and Culture

3 Credit(s)

Interdisciplinary analysis of politics and culture. Course examines the role of gender in the political culture of the United States and selected societies in industrialized and developing nations. Of special interest to those wishing to pursue an interest in women's studies and/or cultural anthropology.

PSYC 375 - Human Sexuality

3 Credit(s)

In this multidisciplinary course, students will be introduced to the physiological, medical, sociological, psychological, legal, ethical, moral, and educational facets of human sexuality. Topics in this course include male and female sexual anatomy and sexual response, contraception and disease control, sexually transmitted diseases, and sexual orientation.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

SOC 419 - Gender and Society**3 Credit(s)**

The aim of the course is for students to become familiar with the continuing differences and inequalities between women and men in the contemporary United States, and to begin to explain why and how they occur through a sociological lens. Understanding gender as it relates to other social identities (for example, race, class and sexuality) is an important organizing framework of the course. Students will learn about the gendered arrangements in a variety of social contexts such as education, the media, work and the economy, and the family.

Pre-Nursing Certificate

The Certificate of Completion of Pre-Nursing Prerequisites will allow students to demonstrate that they have successfully completed 51 pre-nursing credit hours successfully with a C or better. Successfully completing prerequisites allows students to be candidates for nursing school selection.

Complete the following Supporting/General Education Courses for Nursing with a Minimum Grade of C**Complete a First-Year Seminar Course****FYS 101 - First Year Seminar****1 to 3 Credit(s)**

First-year students launch into the Adams Experience through a First-Year Seminar (FYS) course. FYS will engage students by creating habits for success, learning to navigate college life, and build skills for success. Each FYS will focus on a unique topic that will be the theme of course discussions, experiences, and assignments. FYS will develop academic and social capital and support a successful transition into higher education, instill lifelong learning, and reinforce student persistence.

Complete all Courses**BIOL 125 - Nutrition GT-SC2****3 Credit(s)**

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 205 - Human Anatomy and Physiology I

4 Credit(s)

A lecture/laboratory course that uses the body-system approach to study the structure and function of the human body. Recommended for pre-nursing and certain Human Performance and Physical Education Department and allied health programs. Topics include gross anatomy, histology, cell function, regulation of body activities, and pathological changes in disease. The integumentary, skeletal, muscular, and nervous systems are studied. Course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Test - Minimum Score: 3 **OR** MATH 97 Minimum Grade: S or S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T and SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 101 Minimum Grade: C- or T **OR** ACT Reading - Minimum Score: 18 **OR** ENG 96 Minimum Grade: S or T

BIOL 206 - Human Anatomy and Physiology II

4 Credit(s)

A lecture/laboratory course that uses the body-system approach to study the structure and function of the human body. Recommended for pre-nursing and certain Human Performance and Physical Education Department and allied health programs. Topics include gross anatomy, histology, cell function, regulation of body activities, and pathological changes in disease. The digestive, respiratory, circulatory, urinary, endocrine, and reproductive systems are studied. Course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL 205 Minimum Grade: C- or T

OR

BIOL 210 Minimum Grade: C- or T

BIOL 215 - Microbiology for Health Sciences

4 Credit(s)

A lecture/laboratory course designed to fulfill requirements for pre-nursing and pre-pharmacy students as a practical introduction to microorganisms, especially bacteria and viruses, and their contribution to human health and disease. Laboratory exercises are designed to provide experience in handling microorganisms, bacterial identification, and other basic principles of microbiology. This course will not fulfill requirements for any of the biology degree tracks. Course includes 3 hours of lecture and 3 hours of laboratory per week.

Prerequisite(s):

BIOL-205 Minimum Grade: C- OR T

AND

CHEM-105 Minimum Grade: C- OR T

AND

CHEM-105L Minimum Grade: C- OR T

OR

CHEM-111 Minimum Grade: T OR C-

AND

CHEM-111L Minimum Grade: T OR C-

OR

BIOL-209 Minimum Grade: C- OR T

AND

BIOL-210 Minimum Grade: C- OR T

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

PSYC 233 - Lifespan Dev for Nurses

3 Credit(s)

This is a foundational course for nursing students in human growth and development. The goal of this course is to examine the interaction of heredity and environment on biological, cognitive, and social development from conception to death.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

Complete 1 of the Following Statistics Courses

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T
OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

PSYC 211 - Introduction to Statistics Lecture/Lab

4 Credit(s)

In this course, students will develop a working appreciation of statistical concepts and applications as employed in the behavioral sciences. The course presents descriptive and inferential statistics and their applications. The laboratory component of this course gives students an opportunity to develop skills in using statistical software.

Prerequisite(s):

PSYC 101 Minimum Grade: C- or T
AND

MATH 97 Minimum Grade: S-A or S-B or S-C or T

OR

MATH 99 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 121 Minimum Grade: C- or T

OR

MATH 140 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Complete 1 of the following Arts and Humanities Courses (GT-AH1, GT-AH2, or GT-AH3)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T
AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Complete 1 of the following History Courses (GT-HI1)

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Complete 1 of the following Mathematics Courses (GT-MA1)

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

Pre-Physical Therapy

Go to: Department of Kinesiology

Requirements

A physical therapy degree is an advanced degree program offered at selected universities. Some programs are at the master's degree level, but many are at the doctorate level. All require a bachelor's degree with a minimum GPA of 3.0 (average acceptance GPA of 3.5) and a GRE score higher than 1,500 (with a minimum of 500 in each section) for admission.

In addition, most require a minimum number of hours working with a physical therapist. The bachelor's degree may be in any major, but a set of core courses in the sciences and other disciplines is required. Often, a list of recommended courses is suggested. Students must check with the schools to which they will apply for specific requirements, preferably early in their undergraduate career, because of the wide diversity of requirements. This will facilitate scheduling of the required courses along with major and Undergraduate General Education Requirements.

Core Science and Math Courses Required for Many Programs Include

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 101L - Introductory Biology Lab

0 Credit(s)

Introductory Biology is a one-semester laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1**3 Credit(s)**

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

CHEM 131 - General Chemistry GT-SC1**4 Credit(s)**

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

BIOL 205 - Human Anatomy and Physiology I

4 Credit(s)

A lecture/laboratory course that uses the body-system approach to study the structure and function of the human body. Recommended for pre-nursing and certain Human Performance and Physical Education Department and allied health programs. Topics include gross anatomy, histology, cell function, regulation of body activities, and pathological

changes in disease. The integumentary, skeletal, muscular, and nervous systems are studied. Course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Test - Minimum Score: 3 **OR** MATH 97 Minimum Grade: S or S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T and SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 101 Minimum Grade: C- or T **OR** ACT Reading - Minimum Score: 18 **OR** ENG 96 Minimum Grade: S or T

BIOL 206 - Human Anatomy and Physiology II

4 Credit(s)

A lecture/laboratory course that uses the body-system approach to study the structure and function of the human body. Recommended for pre-nursing and certain Human Performance and Physical Education Department and allied health programs. Topics include gross anatomy, histology, cell function, regulation of body activities, and pathological changes in disease. The digestive, respiratory, circulatory, urinary, endocrine, and reproductive systems are studied. Course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL 205 Minimum Grade: C- or T
OR

BIOL 210 Minimum Grade: C- or T

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-
OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 226 - College Physics II

5 Credit(s)

The second course of a two-semester lecture-laboratory sequence introducing the fundamental principles of physics. In the second semester, students will be introduced to the areas of electricity, electric circuits, optics, and topics in modern physics. Conceptual understanding as well as problem-solving techniques will be emphasized in the lecture. The laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture.

Prerequisite(s):

PHYS 225 Minimum Grade: C- OR T

Other Courses That May Be Required or Recommended

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

PSYC 204 - Child Development

3 Credit(s)

The goal of this course is to examine the interaction of heredity and environment on human development from conception through pre-adolescence. Issues in physical, cognitive, and social development from the individual and normative perspectives are explored. Some topics include the birth process, early cognitive and language development, gender socialization, the impact of parenting styles, and moral reasoning.

Prerequisite(s):

PSYC 101 Minimum Grade: C or T

MATH 205 - Introduction to Statistical Methods

3 Credit(s)

Basic techniques of applied statistics, including data organization and presentation, experiment design, calculating statistical measures, choosing, applying, and interpreting statistical tests, correlation and regression, and software utilization.

Prerequisite(s):

MATH 104 Minimum Grade: C OR T
OR

MATH 106 Minimum Grade: C OR T

OR

MATH 107 Minimum Grade: C OR T

OR

MATH 120 Minimum Grade: C OR T

OR

Math Placement Test - Minimum Score: 4

PSYC 205 - Adolescent and Adult Development

3 Credit(s)

This course continues the study of life-span development from adolescence through old age and death. Issues in physical, cognitive, and social development from the individual and normative perspectives are explored. Topics include identity formation, sexual orientation, marriage, models of aging, changes in cognition, social developments, and coping with old age.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

PSYC 230 - Psychology of Mental Health

3 Credit(s)

The purpose of this course is to provide students with the historical and social background necessary to understand mental health issues. Students will examine the psychodynamic, behavioral, and cognitive approaches related to the development and treatment of mental disorders and their classifications. Topics will include schizophrenia, depression, bipolar, and personality disorders.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

CHEM 321 - Organic Chemistry

4 Credit(s)

A study of the relationship between structure and reactivity of carbon-containing compounds.

Prerequisite(s):

CHEM 132 Minimum Grade: C- OR T

Co-requisite(s): CHEM 321L

CHEM 321L - Organic Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM 321. Laboratory time will be divided among techniques, preparation, and mechanistic studies.

Co-requisite(s): CHEM 321

KIN 329 - Exercise Physiology

3 Credit(s)

This course presents an introduction and overview of the physiological bases of physical education, sport, and athletics. The effects of exercise on the various systems will be considered. Practical application of exercise science to physical fitness and athletic performance will be emphasized.

Prerequisite(s):

BIOL 112 Minimum Grade: C- OR T
OR

BIOL 205 Minimum Grade: C- OR T

Co-requisite(s): KIN-329L

KIN 340 - Kinesiology

3 Credit(s)

This course focuses on the nature of human movement as influenced by those motor factors, anatomical factors, and mechanical principles that apply at rest and in motion.

Prerequisite(s):

BIOL 112 Minimum Grade: C- OR T
OR

BIOL 205 Minimum Grade: C- OR T

AND

KIN 329 Minimum Grade: C- OR T

AND

KIN 329L Minimum Grade: C- OR T

CHEM 401 - Biochemistry

3 Credit(s)

A study of structural biochemistry. Course begins with a review of water, the lipophilic environment, noncovalent bonding, and bioenergetics. Topics include amino acids, peptides, proteins, nucleic acids, carbohydrates, and lipids. Enzymes are discussed with emphasis on mechanism and kinetics.

Prerequisite(s):

CHEM 322 Minimum Grade: C- OR T

Co-requisite(s): CHEM 401L

CHEM 401L - Biochemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-401. Laboratory time will be spent learning protein purification techniques and doing independent project work.

Co-requisite(s): CHEM-401

Note

Most schools require General Chemistry but some will allow CHEM 111 and CHEM 112 - Introductory Chemistry. MATH 106 and MATH 107 are pre- or co-requisites for General Chemistry and College Physics. A sufficiently high score on the mathematics portion of the ACT or SAT may waive these particular math requirements, but you need to take one math course as part of the Undergraduate General Education Requirements.

Associate of Arts

As part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18
OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic

concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments,

and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T

OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T

OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HII course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score: 18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- **OR** BIOL-209 Minimum Grade: T **OR** BIOL-209 Minimum Grade: C- **AND** (CHEM-131 Minimum Grade: C- **OR** CHEM-131 Minimum Grade: T) **OR** (CHEM-111 Minimum Grade: C- **OR** CHEM-111 Minimum Grade: C- **OR** CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the

non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-

OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T

AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the

system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

29 Elective Credits

Associate of Arts, Social Studies Emphasis

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

As Part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18
OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T
AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T
OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T
OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law of Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T
OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T
OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T
OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1**5 Credit(s)**

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HI1 course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses**ANTH 201 - Cultural Anthropology GT-SS3****3 Credit(s)**

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1**3 Credit(s)**

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C- or T **OR** ACT Reading - Minimum Score: 18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- **OR** BIOL-209 Minimum Grade: T **OR** BIOL-209 Minimum Grade: C- **AND** (CHEM-131 Minimum Grade: C- **OR** CHEM-131 Minimum Grade: T) **OR** (CHEM-111 Minimum Grade: C- **OR** CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T
OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-

OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1**1 Credit(s)**

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1**4 Credit(s)**

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T

AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1**1 Credit(s)**

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T

AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

Specific Courses Required for This Degree

- History - 9 Credits (in addition to those taken for General Education Area II):

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Government (3 Credits)

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ANTH 205 - Physical Anthropology

3 Credit(s)

The course will examine physical anthropology as a sub discipline of anthropology. The goal is to understand how the physical realities of being human affects the nature of culture. The central theme will be the evolution of humans from the earliest hominid forms to modern Homo sapiens. The course will focus on the mechanisms of evolution, an understanding of primate behavior in general, and the fossil evidence for hominid development.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

Philosophy (6 Credits)

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 202 - Ethics

3 Credit(s)

An examination of criteria governing ethical responses in typical situations as presented by representative thinkers. The application of principles in the development of reasonable standards of conduct and in the formulation of codes of ethics.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The

knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

Elective Courses

Students may, in consultation with the department chair of HAPSS, select enrichment courses with an HGP/HIST/POLS/PHIL/ANTH prefix, another course at the 100- to 200-level approved by the department chair, or any course from the menu above not taken to fulfill content area requirements.

Total completion of a minimum of 60 credits for this degree

Associate of Science

As Part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T
AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T
OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T
OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of

Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T

OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HI1 course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas

exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the

foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score: 18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- **OR** BIOL-209 Minimum Grade: T **OR** BIOL-209 Minimum Grade: C- **AND** (CHEM-131 Minimum Grade: C- **OR** CHEM-131 Minimum Grade: T) **OR** (CHEM-111 Minimum Grade: C- **OR** CHEM-111 Minimum Grade: C- **OR** CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T
OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-

OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T
AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

18 Elective Credits from Business or the Sciences

11 Elective Credits

Associate of Science, General Business Emphasis

Go to: Business

As Part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1**3 Credit(s)**

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3**3 Credit(s)**

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking**3 Credit(s)**

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1**3 Credit(s)**

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)**MATH 104 - Finite Mathematics GT-MA1****3 Credit(s)**

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T

OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T

OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HI1 course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH

99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score: 18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- OR BIOL-209 Minimum Grade: T OR BIOL-209 Minimum Grade: C- AND (CHEM-131 Minimum Grade: C- OR CHEM-131 Minimum Grade: T) OR (CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-

OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T
AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

Completion of the Following

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

- BUS or ECON electives (100- or 200-level): **3 Credit(s)**
- Electives: **4 Credit(s)**

Total completion of a minimum of 60 credits for this degree

Bachelor of Arts in Business Administration, General Business Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Bachelor of Arts in Elementary Education Licensure, Culturally and Linguistically Diverse Education (CLD) Emphasis

Go to: Bachelor of Arts in Elementary Education

Required CLD Courses

CLD 401 - Introduction to the Study of Language

3 Credit(s)

This course provides prospective teachers with an overview of the study of language and how it works. It is an introduction to the scientific study of language and linguistics. The course provides for examination of relevant theories of language and how language is acquired as well as cognitive, societal and cultural considerations affecting its use. Specific topics to be examined include: the structure of languages, grammatical constructs (e.g., morphology, syntax, semantics, phonetics, phonology, and discourse), the interactions between language use and social structures, and the representation of language in the brain. Instructional applications will be considered. The course presupposes no formal study or knowledge of language/ linguistics.

Prerequisite(s):

Clear Fingerprint background check

CLD 402 - Language and Culture

3 Credit(s)

This course explores the peculiar relationship between language and the cultural total of which the language is a part, including the connection between cultural identity and heritage language. It examines language variations within a community according to gender, age, geography, ethnicity, socioeconomic class and level of education. Specifically, the course deals with the linguistic factors characterizing differences in language and with the social and social-psychological variables associated with these differences. Attention is given to the different varieties of language within a speech community (e.g., dialect, register, and style) and the societal and cultural factors that define their use. Course content considers the educational, political and economic implications. The course presupposes no formal study or knowledge of language/ linguistics. Accordingly, the course focuses on the different ways people speak. It deals with the linguistic factors characterizing differences in language and with the social and social-psychological variables associated with these differences. Thus, having completed the course, students should (a) be aware of the different linguistic choices available to speakers in different social/ cultural contexts, (b) have an understanding of the factors

which influence the choosing of one variety over another and the societal implications of such choices, (c) gain an appreciation for language diversity and cultural pluralism and, for those in teacher education programs, and, for education majors, (d) be able to demonstrate ability to identify and adapt instructional applications that are responsive to learners from different cultural backgrounds.

Prerequisite(s):

Clear Fingerprint background check

CLD 403 - Second Language Acquisition

3 Credit(s)

Introduction to second language acquisition (SLA) theory and the application of SLA theory to second/foreign language teaching practices. Explores what it means to know a language and, hence, how one learns/ acquires a second language. The emphasis in the course is to provide an opportunity to become familiar with up-to-date major theories of language acquisition (e.g., linguistic, psychological, sociological, etc.). That is, what happens in the mind of L1 learners and expand to 2L learners. This is not a methodology course, though certain methods and approaches will be discussed as they are direct applications of 2L theories. Instead, students will be exposed to what research data show about the complex process of learning a second language, and to teach them how to rely on these data to understand a number of major models (theories) of 2LL and, as a result, be able to use this knowledge to evaluate different methods, materials and assessments for 2LL/CLD populations. The course presupposes no formal study or knowledge of language/ linguistics. As part of the course content, we will seek to foster cultural sensitivity to the diverse student population becoming increasingly prevalent in classrooms in the U.S. We will also be concerned with providing the basic skills needed to satisfactorily assess the suitability of diverse 2LL methodologies & programs to meet the needs of limited English proficiency (LEP) students. An underlying assumption of the course is that learning is a social process that takes place within the broader social milieu of the learner's speech community. Accordingly, 2L learners bring into the classroom diverse language and cultural backgrounds, as well as a unique set of competencies, skills, sensitivities, goals, and needs. In order to provide for a successful learning environment, teachers must be able to identify and relate to the diversity inherent in today's student population and be able to take affirmative steps towards addressing the needs of the students in their classrooms. Course content and activities will assist participants in developing a greater appreciation of democracy and diversity in the classroom as we prepare for a global society as reflected in current theories of 2L acquisition.

Prerequisite(s):

Clear Fingerprint background check

Select 3 Elective Courses

CLD 404 - TESOL Methods

3 Credit(s)

This course introduces students to the study, philosophy, aims and methods of teaching English as a second (or foreign language) with an emphasis upon the techniques and materials in current use. It aims at providing for examination of current theory and empirical data on language learning, as well as for scrutinizing pertinent pedagogical implications/ applications for the TESOL K-12/ CLD classroom intended to address the language needs of non-native speakers of English. In addition, the course reviews research-based instructional methodologies applicable to teaching language through the content areas. The course considers the large storehouse of information; currently available on how to successfully tap into this knowledge in order to develop and implement sound methodological approaches which will assist SL/ CLD learners in becoming proficient in the target language and successful in the academic content areas. Content addresses teachers' need to rely on effective instructional approaches and strategies that promote a climate that is conducive to opportunities for active involvement in learning about language, academic content, about classmates,

and about the whole world. The course examines a synthesis of current 2L theory that should serve as the basis for development, selection, and modification of suitable materials and methods that will predictably be conducive to successful learning in both the language and content area classroom.

Prerequisite(s):

Clear Fingerprint background check

CLD 405 - TESOL Reading

3 Credit(s)

This course introduces students interested in questions of language acquisition to the theories and practices relating to learning to read in a second language or second dialect. Topics included are models for acquiring foreign language reading skills, teaching strategies for second language/dialect literacy, evaluating literacy skills, current research about acquisition of literacy skills, and political and social implications of second language/dialect literacy. The content addresses specifics about teaching reading for ELL/ CLD populations in classrooms. Opportunity is provided for candidates to become familiar with resources and data on school populations. The main goal of this course is to assist practicing or prospective teachers to learn how to promote development or crucial reading skills among ELL students. The course seeks to reexamine the pedagogical issues central to the 2L reading classroom, to be able to select suitable materials, to develop appropriate reading activities, to identify valid assessment measures, and to plan effective reading lessons suitable for instruction of ESL/CLD students.

Prerequisite(s):

Clear Fingerprint background check

CLD 406 - TESOL Writing

3 Credit(s)

This course introduces students interested in questions of language acquisition to the theories and practices of learning to write in a second language or second dialect. Topics included are 2L literacy development, writing theory, writing strategies, and 2L writers and rhetorical concerns. In addition, content examines teaching methodologies for second language/dialect literacy, assessment/evaluation of literacy skills, current research about acquisition of literacy skills, and political, cultural and social implications of ESL/ CLD literacy development. The main goal of this course is to assist practicing or prospective teachers to develop proficiency in promoting development of crucial 2L literacy/ writing skills among English Language Learners (ELLs). Content is responsive to the need to reexamine pedagogical issues central to the 2L writing classroom, and also be able to select suitable materials, to develop appropriate activities that address both second language literacy and content area knowledge, to identify valid assessment measures, to integrate technology into classrooms and to plan effective writing lessons suitable to the 2L classroom. Lastly, as part of the course content, we will seek to foster cultural sensitivity to the diverse student population becoming increasingly prevalent in classrooms in the U.S. We will also be concerned with providing the basic skills needed to satisfactorily assess the suitability of diverse 2LL methodologies & programs to meet the needs of limited English proficiency (LEP) students. An underlying assumption of the course is that learning is a social process that takes place within the broader social milieu of the learner's speech community. Accordingly, 2L learners bring into the classroom diverse language and cultural backgrounds, as well as a unique set of competencies, skills, sensitivities, goals, and needs. They may also bring with them different levels of L1 literacy skills. In order to provide for a successful learning environment, teachers must be able to identify and relate to the diversity inherent in today's student population and be able to take affirmative steps towards addressing the needs of the students in their classrooms. Course content and activities will assist participants in developing a greater appreciation of democracy and diversity in the classroom as we prepare for a global society as reflected in current theories of 2L development for academic purposes.

Prerequisite(s):

Teacher Education Background Check Passed

CLD 407 - TESOL Tests & Measurements

3 Credit(s)

This course examines language assessments in TESOL/ CLD. Course contents is intended to provide a practical and comprehensive overview of the different phases and activities involved in developing and implementing sound, rational, and effective language assessment instruments and activities. The course recognizes the relevance of context, purposiveness, and realistic discourse in testing. Specifically, the initial segment of the course will emphasize an integrated approach to educating English language learners (ELL) students, which encompasses social, cognitive, academic as well as linguistic dimensions and how to better assess the language instruction needs of ESL/CLD students. The course will focus on the practical applications of fundamental assessment principles, as well as development and evaluation of teacher-generated instruments for placement and diagnosis. Content discusses various principles for guiding either practicing and prospective teachers through an assessment process mindful of standards-based instruction (e.g., dictation, cloze summary, oral interview, role-plays, portfolio assessment techniques) for teaching ESL/ CLD students at various levels. Specific topics addressed include, 1. Innovative means of assessing reading ability, 2. Standards and performance outcomes, 3. Evaluating writing & reading, 4. Computers in assessment, as well as computer-based tests, 5. Interpretation of summative assessments of content knowledge, 6. Administration and interpretation of the results of summative assessments of English language proficiency, 7. Development, administration and interpretation of the results of formative assessments, 8. Theoretical and practical foundations of assessment for CLD populations, 9. Practices and approaches to testing that is responsive to varied measurement contexts, 10. Evaluation of reliability and validity of measures, and a variety of techniques available that.

Prerequisite(s):

Clear Fingerprint background check

CLD 408 - Bilingualism

3 Credit(s)

This course is a study of what it means to be a bilingual child or adult. It explores both the mind's role in bilingualism and in language acquisition as well as societal considerations. It surveys educational systems' response to language variance among students and explores the social, academic and language learning consequences of growing up bilingual. Content seeks to familiarize students with various aspects of bilingual education and language contact from a social-psychological perspective. It aims at providing for analysis and evaluation of current theory and research on bilingualism, as well as for examination of pertinent pedagogical implications/applications. First, we are interested in both social and individual factors related to bilingualism. That is, how and why bilingualism originates both as an individual and a societal phenomenon, and the social-psychological consequences of the same. Accordingly, we will consider topics such as: language attitudes, language and nation, bilingualism and inter-group relations, speech style and social evaluation. Second, we will also consider some important aspects of language contact such as: linguistic borrowing; code switching; language maintenance and language shift; English as a language of wider communication; language and context; diglossia; conversational interactions; language policy; language and culture. Third, we will also examine some significant aspects of the psychology of bilingualism. Specific topics to be covered are: cognitive and sociocultural consequences of bilingualism; neurolinguistic aspects of language acquisition and bilingualism; theoretical and research issues of bilingual education; performance of bilingual children on standardized tests; alternative approaches to testing and assessment of bilinguals; the teaching of English to non-native English speakers in the state of Colorado. NOTE: A supervised field-based experience is a course requirement. Students will be required to wear photo identification as they participate in this field experience. Photo IDs must be obtained from the ASU Campus Card Office Prior to the beginning of the field experience component. Background check must be completed before classes begin. Lab assignments are off-campus; students are responsible for their own transportation.

Prerequisite(s):

Clear Fingerprint background check

CLD 479 - Special Topics

0.5 to 6 Credit(s)

Offered periodically to meet the needs of students.

Prerequisite(s):

Clear Fingerprint background check

Plus Additional Elementary Education Licensure Requirements from the School of Education

Bachelor of Arts in Elementary Education

Bachelor of Arts in Interdisciplinary Studies, Individualized program of study

Go to: Interdisciplinary Studies

Students design a degree program that intentionally combines coursework from two different disciplines.

The Bachelor of Arts in Interdisciplinary Studies degree allows students to design a program of study combining two subject areas. No more than 30 credits of coursework with the same prefix can be used to satisfy the combined 40 credits (20 + 20) needed for the emphasis areas (e.g. no more than 30 BUS credits, no more than 30 HIST credits, no more than 30 CHEM credits, etc. can be applied toward the emphases).

Area I (20 Credit Hours)

Area II (20 Credit Hours)

Requirements

- Courses applied toward the Undergraduate General Education Requirements cannot also be used for credit in an emphasis area.
- At least 15 of the required 42 upper-division hours must fall within the (combined) emphasis areas.
- Courses associated with emphasis areas must be completed with a grade of 'C-' or higher.
- At least 12 of the 40 credit hours associated with the emphasis areas must be Adams State University courses.
- At least 30 credit hours (of the required 120) must be Adams State University courses.

Bachelor of Arts in Media, Industry, and Communication (online only)

Go to: Languages, Literature, and Media Communication

Specific courses required for this degree:

Communication requirements (42 hours)

COMM 100 - Public Speaking

3 Credit(s)

Students will learn the theories behind and the techniques of public speaking. Students will compose, videotape, and upload speeches on various topics and various styles for peer and instructor critique. Students will also learn about the various models of public speaking and the fundamentals of communication theory.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

COMM 230 - Media Writing

3 Credit(s)

Students will survey the fundamental types of media writing, including inverted pyramid news writing, feature writing, blogging, and screenplays. News literacy will also be covered.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

COMM 293 - Media Practicum

3 Credit(s)

Students will work hands-on to learn various media industry-related skills. Students will deejay for Grizz Sound, and/or create podcasts, write for The Paw Print, and create a short video piece.

Prerequisite(s):

COMM 230 Minimum Grade: C- OR T

COMM 327 - Social Media

3 Credit(s)

Surveys the history of the early Internet and the transition to Web 2.0. Students will apply this knowledge by designing, creating, and developing social media presence for non-profits, local municipalities, etc., and training the recipients on how to maintain their social media presence

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

COMM 345 - Business of Radio and TV

3 Credit(s)

This course is designed for majors of Communication & Media, Media Industry & Communication, Public Relations, and other majors who are interested in careers in the radio and television industries. Students will study in-depth as to how the radio and television industries operate.

COMM 355 - Public Relations and Strategic Communication

3 Credit(s)

Students will study the theoretical and practical elements of the field of public relations and the use of strategic communication. Student will then compose public relations materials applying the elements studied.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

COMM 365 - Digital Filmmaking

3 Credit(s)

This course covers the aesthetics and practice of narrative, documentary, and experimental media production using a variety of digital filmmaking tools including digital photography, digital video, audio recorders, and editing software. Students will complete video products they can post to YouTube and similar sites.

Prerequisite(s):

COMM 230 Minimum Grade: C- OR T

COMM 380 - Spanish Media

3 Credit(s)

Students will examine the issues facing Spanish-speaking media in the United States, as well as its business model and

the skills needed to enter the field. Bilingual recommended but not required.

Prerequisite(s):

COMM 345 Minimum Grade: C- OR T

COMM 425 - Media Research Methods

3 Credit(s)

Students will examine the prominent methods of media research, including quantitative and qualitative research, reliability and validity, specific methods used in the industry, the Nielsen ratings, and market trends.

Prerequisite(s):

ENG 102 Minimum Grade: C-

COMM 430 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

Prerequisite(s):

COMM 350 Minimum Grade: C- OR T

COMM 457 - First Amendment and Copyright

3 Credit(s)

This course explores the First Amendment of the U.S. Constitution and current U.S. copyright laws, and how they apply to and affect both media practitioners and U.S. citizens.

Prerequisite(s):

COMM 255 Minimum Grade: C- OR T
AND

COMM 275 Minimum Grade: C- OR T

COMM 496 - Communication Internship

1 to 3 Credit(s)

Advanced communication students will work in a pre-employment capacity in the field of communications/journalism (broadcasting, video, print, satellite, or computing), applying learned skills in a working environment.

Note

An E-Portfolio of the student's work must be submitted during the senior year.

Guidelines for assembling the portfolio and deadlines for submissions are available from the department chair, the program coordinator or major advisor.

A minor in an area of specialization is recommended.

A minor in business or marketing is especially recommended.

Students must have at least 42 credit hours in 300 or 400 level courses to graduate.

Students must take the online interdisciplinary first year seminar and capstone.

Bachelor of Arts in Sociology, Criminology Emphasis

Go to: Sociology

Note for Sociology Students

- Completion of SOC 201 is a prerequisite for all other sociology courses.
- All Sociology Majors must meet the requirements of the Local Writing Assessment in Sociology as well as the Internship, ePortfolio, and Final Review.

Sociology Required Courses

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

SOC 245 - Criminology

3 Credit(s)

Criminology is an introductory course to the study of crime and criminal behavior with special emphasis on theories of crime and delinquency causation, rates and extent of crime, and social control agents (i.e., the police, courts, and "corrections"). Special topics examined may include gangs, white-collar crimes, property crimes, victimless crimes, and organized crime.

SOC 251 - Social Problems

3 Credit(s)

This course is designed to provide the student with a survey of selected contemporary social problems. Social problems addressed in the class may include poverty, addiction and substance abuse, mental health, violence with a focus on family violence, crime, teen sexuality and pregnancy, and health care issues. The causes, severity, and consequences of

the selected social problems are explored. In addition, strategies for alleviating social problems are presented.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

LS 225 Minimum Grade: C- OR T

SOC 255 - Research And Writing in Sociology

3 Credit(s)

This introductory course in social research and writing in sociology offers an overview of how sociologists study the social world, research social phenomena, and write about their findings. This class provides an overview of knowledge production and methods used by sociologists to develop a research agenda, test hypotheses, and refine theories and sociological inquiry. Students will gain the tools needed to conduct social research while also developing the skills necessary to read and critically evaluate sociological research. Students will learn fundamental concepts and mixed methods approach to sociological research. Students will summarize research and identify (1) the research question, (2) assumptions and propositions of the theory, (3) specific hypothesis, (4) methods used, and (5) the findings and results.

Prerequisite(s):

SOC 201 minimum grade C-

SOC 311 - Social Statistics

4 Credit(s)

This course presents a general overview of the statistical methods most commonly used in sociology and the social sciences. As a laboratory component, students will become proficient in SPSS, a computer program designed to aid statistical analysis. These skills will enable the student to read popular applications of statistics in the media with a critical eye; assess the use of statistics in the professional sociological literature; and use statistical tools to answer the sociological questions of interest.

Prerequisite(s):

SOC 255 Minimum Grade: C-
AND

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

SOC 318 - Race, Class, and Gender

3 Credit(s)

The focus of this course is on the interrelated ascribed statuses of "race," social class, gender, and sexual orientation in American society, how they are perceived and reinforced, the social tensions that result and the dynamics of change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 395 - Pre-Professional Seminar

2 Credit(s)

This course provides an introduction to the profession of sociology and the various career options available to graduates. Occupational and graduate school options are explored in detail through library research, presentations, observational and volunteer experiences, and informational interviews. Skills for job interviewing, resume development, and professional correspondence are explored.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 445 - Sociological Theory

3 Credit(s)

The major theories of society are covered in their classical and contemporary forms.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 455 - Qualitative Research Methods

4 Credit(s)

This course is designed to expose students to a variety of qualitative research methods. Students will be instructed in the fundamentals of research design and implementation, including ethical considerations. Students will read and study the research projects of selected sociologists. Students will engage in multiple hands-on activities to practice research methods. Each student will design a qualitative research project. In the lab component of the course, students will analyze and interpret qualitative data. Finally, students will learn to conduct content analysis, and use grounding theory to code and analyze their data and write a final project report. This course includes a lab day each week and is a 4-credit course.

Prerequisite(s):

SOC 201 Minimum Grade: C-
AND

SOC 255 Minimum Grade: C-

SOC 493 - Internship in Sociology

3 Credit(s)

Students in Sociology are placed at an internship site in the community and conduct a mentored capstone case study. Ninety hours of service with the agency are required. The student is supervised by both a Sociology faculty member and a representative from the human service agency. Instructor approval required for registration purposes.

Prerequisite(s):

Special permission and senior standing.

Criminology Emphasis

SOC 346 - Criminal Justice

3 Credit(s)

The focus of this course is on the organizational structures and social processes of the American criminal justice system. It will examine criminal law, policing, courts, and corrections.

SOC 447 - Correctional Systems

3 Credit(s)

This course will focus on corrections as one of the components of the American criminal justice system and its operation within a democratic form of government. The philosophical and historical underpinnings of punishment and correction will be analyzed and compared (e.g., punishment vs. rehabilitation).

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 346 Minimum Grade: C- OR T

Choose 1 of the following electives

SOC 347 - Juvenile Delinquency

3 Credit(s)

This course describes the nature of delinquency, including the trends, characteristics, and causes of juvenile delinquency. In addition, the course will examine theories of delinquency, social influences on delinquency, historical and contemporary overviews of the juvenile justice system, and the juvenile justice process from police involvement to the court system and corrections. Finally, methods of treatment and prevention will be identified.

SOC 348 - Women and Crime

3 Credit(s)

This course will address the role women play as criminals, victims, and professionals in the criminal justice system. This course will examine the important intersection between gender and crime, exploring the nature and extent of women's involvement in the criminal justice system. The course will investigate and discuss the relationship between victimization and offending, and study the unique way women are involved in and impacted by the criminal justice

system, with case study examples from real crimes.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 444 - Deviance and Control

3 Credit(s)

The sociology of deviance and control examines the nature of rule-making and rule-breaking in modern societies. The course includes theoretical considerations of the causes and consequences of deviance.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

Choose 2 Courses from these Sociology Electives

SOC 279 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 305 - Rural Sociology

3 Credit(s)

The purpose of this course is to introduce some of the social, political, environmental, and economic problems and prospects associated with rural America. Special attention will also be given rural community services and social institutions, with some focus on the San Luis Valley and other parts of rural Colorado.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 315 - Sociology of Education

3 Credit(s)

This course explores the relationship between education and society with special emphasis on the effects of this relationship on the lives of students in the American education system.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 320 - Marriages and Families

3 Credit(s)

This course will provide an overview of the family from a sociological perspective. The family is considered to be one of the most private and pervasive institutions in society. All of us have had contact with at least one family, and many

of us will be involved in several different families during our lifetime. Our experiences point to the numerous transformations in family life. To obtain a better understanding of these changes, recent sociological research and data on the family will be utilized in this course. In addition to examining the history of the family, the course will study the contemporary family and its diversity. The course will examine traditional marriage/family arrangements and alternative processes of mate selection and family formation. Finally, the course will examine parenting, the relationship between work and family, divorce and reconstituted families.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 345 - Women, Sport, and Society

3 Credit(s)

This course will explore how women have been involved in sports and athletics, how they have fought to claim recognition and legitimacy among historically male dominated settings, and how they continue to shape sports and the role of women in society. We will explore a wide variety of topics in society related to women in sports including historical influences, equitable access, characteristics of female sport participation, sport opportunities, and sport leadership. Topics will include Title IX, female bodies and physiology, sport diversity, gender identity, women's sport and aging, disabilities, sport and sexual violence, media and women's portrayal in sports, competitive sports in high school, college, and professional leagues, and marketing women's sports.

SOC 347 - Juvenile Delinquency

3 Credit(s)

This course describes the nature of delinquency, including the trends, characteristics, and causes of juvenile delinquency. In addition, the course will examine theories of delinquency, social influences on delinquency, historical and contemporary overviews of the juvenile justice system, and the juvenile justice process from police involvement to the court system and corrections. Finally, methods of treatment and prevention will be identified.

SOC 348 - Women and Crime

3 Credit(s)

This course will address the role women play as criminals, victims, and professionals in the criminal justice system. This course will examine the important intersection between gender and crime, exploring the nature and extent of women's involvement in the criminal justice system. The course will investigate and discuss the relationship between victimization and offending, and study the unique way women are involved in and impacted by the criminal justice system, with case study examples from real crimes.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 365 - Race and Ethnicity in the U.S.

3 Credit(s)

This course provides a sociological approach to race and ethnic relations in the U.S. today. This course introduces the basic sociological theories and perspectives related to the study of race and ethnicity, the histories, and present status of different racial and ethnic groups in the United States and raises questions about continuing racial discrimination and

inequality in our society. Issues of defining race, racial identity, interpersonal and institutional discrimination, segregation, and affirmative action (among others) are explored.

SOC 370 - Poverty and Wealth

3 Credit(s)

This course examines the historical and socio-cultural factors which influence the creation and maintenance of poverty and wealth. Emphasis will be on structural factors and theoretical explanations of poverty and inequality. This course will also focus on the implications for policy and social programs aimed at poverty and other social class issues. In addition, there will be exploration of systems of power, privilege, and domination that are central to the American social structure. Finally, the issues of empowerment, resistance, and solutions to social inequality will be assessed.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 251 Minimum Grade: C- OR T

SOC 379 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 391 - Sociology of Religion

3 Credit(s)

This course will introduce students to an examination of religion through sociological inquiry and imagination. Students will learn how sociologists study religion and will apply classical and contemporary sociological theories to understand both personal religious experiences/identities and organized religion as a social phenomenon. The course explores socialization into religions, the processes of conversion and apostasy, and various forms of organizational structures for religious groups. Other issues to be explored include how religious identity and structure connect to gender, race, sexuality, and social class; competition and conflict between different religious groups; as well as the tension between religion as a social institution and secularization trends in the contemporary US.

Prerequisite(s):

Junior standing

SOC 401 - Self & Society

3 Credit(s)

This course will look at social psychology from a sociological perspective. More specifically, students will utilize the symbolic interactionist theory to examine how identities, selves, social life, and social reality are products of ongoing social interactions.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 419 - Gender and Society

3 Credit(s)

The aim of the course is for students to become familiar with the continuing differences and inequalities between women and men in the contemporary United States, and to begin to explain why and how they occur through a sociological lens. Understanding gender as it relates to other social identities (for example, race, class and sexuality) is an important organizing framework of the course. Students will learn about the gendered arrangements in a variety of social contexts such as education, the media, work and the economy, and the family.

SOC 425 - Environment and Society

3 Credit(s)

The primary objective of this course is to look at the ways in which human societies - their values, behaviors, traditions, beliefs, institutions, and governments - relate to and impact the physical environment. Topics explored include: environmental movements, globalization environmental management, and government and economic policies.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 430 - Social Movements

3 Credit(s)

This course is designed to provide an analysis of social movements on a broad array of topics including issues of how they form, why they form, when are they successful, and whether they change society. We will be looking at broader historical movements from the civil rights movement, the environmental movement and the feminist movement as well as more recent movements, on race, class and gender issues. We will look at how they relate to diversity and equity, social justice, globalization, and cultural change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 440 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily research, case study, and discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

SOC 444 - Deviance and Control

3 Credit(s)

The sociology of deviance and control examines the nature of rule-making and rule-breaking in modern societies. The course includes theoretical considerations of the causes and consequences of deviance.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 479 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

Note:

- For students choosing the Criminology emphasis: SOC 352, SOC 370, and SOC 470 are also available as elective courses.
- For students choosing the Social Work emphasis: SOC 346, SOC 347, and SOC 447 are also available as elective courses.

Bachelor of Arts in Sociology, Social Work Emphasis

Go to: Sociology

Note for Sociology Students

- Completion of SOC 201 is a prerequisite for all other sociology courses.
- All Sociology Majors must meet the requirements of the Local Writing Assessment in Sociology as well as the Internship, ePortfolio, and Final Review.

Sociology Required Courses

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" 3 Credit(s)

The major theories of society are covered in their classical and contemporary forms.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 455 - Qualitative Research Methods

4 Credit(s)

This course is designed to expose students to a variety of qualitative research methods. Students will be instructed in the fundamentals of research design and implementation, including ethical considerations. Students will read and study the research projects of selected sociologists. Students will engage in multiple hands-on activities to practice research methods. Each student will design a qualitative research project. In the lab component of the course, students will analyze and interpret qualitative data. Finally, students will learn to conduct content analysis, and use grounding theory to code and analyze their data and write a final project report. This course includes a lab day each week and is a 4-credit course.

Prerequisite(s):

SOC 201 Minimum Grade: C-
AND

SOC 255 Minimum Grade: C-

SOC 493 - Internship in Sociology

3 Credit(s)

Students in Sociology are placed at an internship site in the community and conduct a mentored capstone case study. Ninety hours of service with the agency are required. The student is supervised by both a Sociology faculty member and a representative from the human service agency. Instructor approval required for registration purposes.

Prerequisite(s):

Special permission and senior standing.

Social Work Emphasis

SOC 352 - Social Work Practices

3 Credit(s)

This course is an introduction to the nuts-and-bolts of social work practice. The course is designed with several general objectives in mind: (1) to familiarize the student with specific techniques of social work such as the person-in-environment approach and case management, (2) to provide a fundamental understanding of roles of community and family in social work practice, (3) to explore the needs of selected special populations in the community, (4) to identify the biological, psychological, and social influences on development and behavior across the life cycle, and (5) to introduce the student to fundamental social work practice skills.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 251 Minimum Grade: C- OR T

SOC 470 - Social and Public Programs

3 Credit(s)

This course analyzes the historical development, current content, and adequacy of social welfare policies in the United States. Specific policy areas to be discussed include income maintenance (including social insurance and public assistance), mental health, health care, and aging.

Prerequisite(s):

SOC 352 Minimum Grade: C- OR T

Choose 1of the following electives

SOC 320 - Marriages and Families

3 Credit(s)

This course will provide an overview of the family from a sociological perspective. The family is considered to be one of the most private and pervasive institutions in society. All of us have had contact with at least one family, and many of us will be involved in several different families during our lifetime. Our experiences point to the numerous transformations in family life. To obtain a better understanding of these changes, recent sociological research and data on the family will be utilized in this course. In addition to examining the history of the family, the course will study the contemporary family and its diversity. The course will examine traditional marriage/family arrangements and

alternative processes of mate selection and family formation. Finally, the course will examine parenting, the relationship between work and family, divorce and reconstituted families.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 370 - Poverty and Wealth

3 Credit(s)

This course examines the historical and socio-cultural factors which influence the creation and maintenance of poverty and wealth. Emphasis will be on structural factors and theoretical explanations of poverty and inequality. This course will also focus on the implications for policy and social programs aimed at poverty and other social class issues. In addition, there will be exploration of systems of power, privilege, and domination that are central to the American social structure. Finally, the issues of empowerment, resistance, and solutions to social inequality will be assessed.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 251 Minimum Grade: C- OR T

Choose 2 Courses from these Sociology Electives

SOC 279 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 305 - Rural Sociology

3 Credit(s)

The purpose of this course is to introduce some of the social, political, environmental, and economic problems and prospects associated with rural America. Special attention will also be given rural community services and social institutions, with some focus on the San Luis Valley and other parts of rural Colorado.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 315 - Sociology of Education

3 Credit(s)

This course explores the relationship between education and society with special emphasis on the effects of this relationship on the lives of students in the American education system.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 320 - Marriages and Families

3 Credit(s)

This course will provide an overview of the family from a sociological perspective. The family is considered to be one of the most private and pervasive institutions in society. All of us have had contact with at least one family, and many of us will be involved in several different families during our lifetime. Our experiences point to the numerous transformations in family life. To obtain a better understanding of these changes, recent sociological research and data on the family will be utilized in this course. In addition to examining the history of the family, the course will study the contemporary family and its diversity. The course will examine traditional marriage/family arrangements and alternative processes of mate selection and family formation. Finally, the course will examine parenting, the relationship between work and family, divorce and reconstituted families.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 345 - Women, Sport, and Society

3 Credit(s)

This course will explore how women have been involved in sports and athletics, how they have fought to claim recognition and legitimacy among historically male dominated settings, and how they continue to shape sports and the role of women in society. We will explore a wide variety of topics in society related to women in sports including historical influences, equitable access, characteristics of female sport participation, sport opportunities, and sport leadership. Topics will include Title IX, female bodies and physiology, sport diversity, gender identity, women's sport and aging, disabilities, sport and sexual violence, media and women's portrayal in sports, competitive sports in high school, college, and professional leagues, and marketing women's sports.

SOC 347 - Juvenile Delinquency

3 Credit(s)

This course describes the nature of delinquency, including the trends, characteristics, and causes of juvenile delinquency. In addition, the course will examine theories of delinquency, social influences on delinquency, historical and contemporary overviews of the juvenile justice system, and the juvenile justice process from police involvement to the court system and corrections. Finally, methods of treatment and prevention will be identified.

SOC 348 - Women and Crime

3 Credit(s)

This course will address the role women play as criminals, victims, and professionals in the criminal justice system. This course will examine the important intersection between gender and crime, exploring the nature and extent of women's involvement in the criminal justice system. The course will investigate and discuss the relationship between victimization and offending, and study the unique way women are involved in and impacted by the criminal justice system, with case study examples from real crimes.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 365 - Race and Ethnicity in the U.S.

3 Credit(s)

This course provides a sociological approach to race and ethnic relations in the U.S. today. This course introduces the basic sociological theories and perspectives related to the study of race and ethnicity, the histories, and present status of different racial and ethnic groups in the United States and raises questions about continuing racial discrimination and inequality in our society. Issues of defining race, racial identity, interpersonal and institutional discrimination, segregation, and affirmative action (among others) are explored.

SOC 370 - Poverty and Wealth

3 Credit(s)

This course examines the historical and socio-cultural factors which influence the creation and maintenance of poverty and wealth. Emphasis will be on structural factors and theoretical explanations of poverty and inequality. This course will also focus on the implications for policy and social programs aimed at poverty and other social class issues. In addition, there will be exploration of systems of power, privilege, and domination that are central to the American social structure. Finally, the issues of empowerment, resistance, and solutions to social inequality will be assessed.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 251 Minimum Grade: C- OR T

SOC 379 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 391 - Sociology of Religion

3 Credit(s)

This course will introduce students to an examination of religion through sociological inquiry and imagination. Students will learn how sociologists study religion and will apply classical and contemporary sociological theories to understand both personal religious experiences/identities and organized religion as a social phenomenon. The course explores socialization into religions, the processes of conversion and apostasy, and various forms of organizational structures for religious groups. Other issues to be explored include how religious identity and structure connect to gender, race, sexuality, and social class; competition and conflict between different religious groups; as well as the tension between religion as a social institution and secularization trends in the contemporary US.

Prerequisite(s):

Junior standing

SOC 401 - Self & Society

3 Credit(s)

This course will look at social psychology from a sociological perspective. More specifically, students will utilize the symbolic interactionist theory to examine how identities, selves, social life, and social reality are products of ongoing social interactions.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 419 - Gender and Society**3 Credit(s)**

The aim of the course is for students to become familiar with the continuing differences and inequalities between women and men in the contemporary United States, and to begin to explain why and how they occur through a sociological lens. Understanding gender as it relates to other social identities (for example, race, class and sexuality) is an important organizing framework of the course. Students will learn about the gendered arrangements in a variety of social contexts such as education, the media, work and the economy, and the family.

SOC 425 - Environment and Society**3 Credit(s)**

The primary objective of this course is to look at the ways in which human societies - their values, behaviors, traditions, beliefs, institutions, and governments - relate to and impact the physical environment. Topics explored include: environmental movements, globalization environmental management, and government and economic policies.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 430 - Social Movements**3 Credit(s)**

This course is designed to provide an analysis of social movements on a broad array of topics including issues of how they form, why they form, when are they successful, and whether they change society. We will be looking at broader historical movements from the civil rights movement, the environmental movement and the feminist movement as well as more recent movements, on race, class and gender issues. We will look at how they relate to diversity and equity, social justice, globalization, and cultural change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 440 - Diversity in Media**3 Credit(s)**

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily research, case study, and discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

SOC 444 - Deviance and Control**3 Credit(s)**

The sociology of deviance and control examines the nature of rule-making and rule-breaking in modern societies. The

course includes theoretical considerations of the causes and consequences of deviance.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 479 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

Note:

- For students choosing the Criminology emphasis: SOC 352, SOC 370, and SOC 470 are also available as elective courses.
- For students choosing the Social Work emphasis: SOC 346, SOC 347, and SOC 447 are also available as elective courses.

Bachelor of Science / Masters of Business Administration - 5 Year Program

Go to: Business

The 5-year B.S./M.B.A. helps exceptional Adams State students get a head start in their career in business. The program provides a solid foundation for students to launch a successful career in business. The curriculum allows students several options so they can customize their degree to an emphasis in business most relevant to their career goals. Students must work closely with their advisor to determine appropriate courses for these emphases.

The B.S./M.B.A. provides a seamless transition from an undergraduate program to the graduate program, allowing students to cultivate and strengthen their business expertise and maintain the M.B.A. advantage that is sought after in today's highly competitive, global marketplace. The five-year B.S./M.B.A. program is designed for motivated students who are prepared for a streamlined, integrated academic experience that responds to the rapidly changing global environment of today's business world. The B.S./M.B.A. program is ideal for those who want to fast-track their careers while building sustainable skills with innovative and interactive curricula. Students are grounded in applications-based learning that engages new technologies, global perspectives, and ethics-based best practices.

Note: The B.S. portion of the B.S./M.B.A. program is offered either online or face to face. The M.B.A. portion of the program is ONLY offered online.

Admission Requirements for Combined Bachelor's/M.B.A. Degree Program

Undergraduates enrolled in a bachelor's degree program at Adams State University who have completed 75 credit hours of course work toward their degrees and have a cumulative GPA of 3.0 or above may apply for admission to a combined bachelor's/M.B.A. degree program. This program has been established to encourage students with strong scholarly interests to begin their M.B.A. program during their junior year and to provide flexibility in the scheduling and completion of undergraduate requirements along with their graduate course requirements for the M.B.A. degree.

The graduate degree will be awarded only after, or concurrently with, the award of Baccalaureate. There are two categories that could qualify a student for acceptance:

1. The student may be enrolled in either a graduate or undergraduate degree program, taking both undergraduate and graduate courses, with two degrees being conferred only when the requirements for both are completed. This student must be monitored and eligibility for certain financial aid programs may be restricted. A "500-Level Course Evaluation" form must be completed and approved by the M.B.A. director and the School of Business chair prior to registration. A student must have completed 90 credit hours prior to starting 500-level courses.
2. The student is an undergraduate taking graduate course(s) as part of their undergraduate degree program. The courses are being used to complete the undergraduate degree. This student is treated for financial aid purposes as a normal undergraduate student and no special financial aid processing is required.

Until students accumulate 120 total credit hours bachelor/M.B.A., they will be classified as undergraduates for financial aid and College Opportunity Fund (COF) purposes (COF applies to courses numbered 100, 200, 300, and 400 only).

Core Courses for both the BS and MBA portions of the Degree

Note:

- Courses required for emphases are not included in the Core Course Requirements
- ASU undergraduate/M.B.A. students may count up to 30 credits from 300-400-500 level (no more than 18 credits from 500 level) Business, Economics or Health Care Administration Courses.

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Master of Business Administration Core Requirements

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed

to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

BUS 505 - Creating Consumer Value

3 Credit(s)

This course presents learners with a comprehensive approach to creating consumer value. This includes marketing and brand management in for-profit firms as well as identifying and meeting consumer needs in non-profit and governmental organizations. Topics include segmentation and targeting of consumers; the positioning levers of product, price, promotion, and distribution; and brand management.

ECON 505 - Managerial Economics

3 Credit(s)

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Bachelor of Science in Business Administration, Entrepreneurship Emphasis

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

BUS 304 Minimum Grade: C- OR T
AND

BUS 361 Minimum Grade: C- OR T
AND

BUS 363 Minimum Grade: C- OR T
AND

ECON 255 Minimum Grade: C- OR T
AND

ECON 256 Minimum Grade: C- OR T

Plus 30 credits from 300- to 400-level business, economics, or health care administration courses

Bachelor of Science in Business Administration, Health Care Administration Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Health Care Administration Emphasis

HCA 303 - Trends and Issues in Health Care

3 Credit(s)

This course is an introductory Health Care Administration course and will expose the student to the industry and its significant elements and trends of the current health care environment.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 311 - Health Care Law and Ethics

3 Credit(s)

This course presents an overview of the legal and ethical issues faced by health care consumers, practitioners, and administrators. The course will introduce students to the legal aspects of health care at the federal, state, and local levels. Topics covered will include criminal and civil claims against health care providers, corporate and individual liability, and legal and ethical decision-making, individual liability, and legal and ethical decision-making. HCA 361 Health Care Administration. Instructor permission.

Prerequisite(s):

BUS 211 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 312 - Health Care Med Terminology

3 Credit(s)

This course will focus on the components of medical terms and the methods for analysis of word definitions. The emphasis will be on learning to define, pronounce, and spell medical terms using prefixes, suffixes, roots, and combining forms related to the anatomy and physiology of the human body. The course will include an introduction to operative, diagnostic, therapeutic, and symptomatic terminology of all body systems.

HCA 325 - Health Care Informatics

3 Credit(s)

This course is a study of record keeping practices in the hospital and physician's office. Emphasis is placed in hospital and medical staff organization, patient record content, procedures in filing, numbering and retention of patient records, quantitative analysis, release of patient information, forms control and design, indexes and registers, reimbursement, regulatory and accrediting agencies, and alternate health care delivery systems. Instructor permission required.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

HCA 363 - Health Care Finance

3 Credit(s)

This course is devoted to the practical aspects of finance in health care, an examination of current practices in financial management of health care organizations, and managerial applications to specific problems facing health care managers. The first part of the course will focus on an overview of health care finance, managerial accounting, and financial analysis. The second part will continue with managerial accounting and financial analysis and will concentrate on the various tools used in financial management. Emphasis is placed on unique issues and concerns that result from the regulatory framework of health care organizations. At the conclusion of this course, the student should be able to discuss the financial structure, market forces, controls and techniques used in the health care management field, be able to read and analyze financial statements and budgets and have the skill to interpret financial and operating performance.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 402 - Public and Population Health

3 Credit(s)

This course consists of an examination of epidemiological concepts and methods of studying the distribution and determinants of morbidity and mortality in human population. The knowledge and skills acquired should enable one to understand and critically review scientific literature dealing with epidemiology concepts and measures. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 455 - Health Care Economics

3 Credit(s)

This course will examine health care decision-making and the functioning of health care markets in the U.S. The course is not designed as a pure economics theory course but instead emphasizes how you can frame and analyze various health issues using the principles of economics. By doing so, you will gain a powerful new perspective that will help you understand the decisions made by individuals and organizations in the face of scarce resources. Instructor permission.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 462 - Quality Management in Health Care

3 Credit(s)

Quality is an important aspect of health care; indeed, for most people, it is the most important aspect. Quality is defined in the dictionary as "degree of excellence" or "superiority in kind." Quality of care must be part of both the process and outcome of health care whenever possible. The issue is how does the system develop mechanisms to assure such quality? This course serves as an introduction to the process of quality management in health care organizations. Principles of total quality in health care will be discussed. Differentiation between quality assurance and quality management will also be presented. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 480 - Health Care Policy

3 Credit(s)

This course is an introduction to health policy. It will focus on how U.S. health policy is developed and will provide students with a general understanding of the policy making process and debates related major U.S. health care legislations.

Prerequisite(s):

HCA 303 Minimum Grade: C- OR T
AND

HCA 305 Minimum Grade: C- OR T

AND

HCA 363 Minimum Grade: C- OR T

Bachelor of Science in Business Administration, Management Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 365 - Small Business Management/Entrepreneurship

3 Credit(s)

This course presents the techniques and information necessary to create a comprehensive business plan for an entrepreneurial idea. Coursework addresses feasibility analysis, management, marketing, technology, and financial plans, culminating in presentation of a viable business plan.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 401 - Organizational Behavior

3 Credit(s)

Participants in the course will explore the theory of human relations in organizations. The emphasis will be on the application of behavioral science knowledge to contemporary organizational issues, which may include individual and group dynamics, motivation, leadership, organizational change, and development.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 418 - Leadership Strategies

3 Credit(s)

This course presents contemporary theories and approaches to leadership practices in modern organizations. Students learn how effective leadership can assist in the creation of a strong organizational culture and the implications external forces have on individual leadership development and continued growth.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 419 - Organizational Change/Develop

3 Credit(s)

The study of planned and unplanned change in organizations to include diagnosis, planning, and implementation of organizational change initiatives. Emphasis is on teamwork within organizations and survey development.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

Plus 3 Credits from the following

ECON 425 - Economic Policy

3 Credit(s)

Study of the structure and functions of the U.S. economic system and the use of monetary, fiscal, and other policies to stabilize the economy. Emphasis on historical roots and the evolution into new behavioral economic ideas as well as the complex interplay of policy and economic forces.

Marketing Emphasis

BUS 315 - Sales and Sales Management

3 Credit(s)

This course is designed to introduce students to management techniques as they relate specifically to the marketing and sales area. Topics covered include: the selling process, compensation systems, motivation and leadership, time and territory management, sales forecasting, quotas, and evaluating the sales force.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 345 - Advertising

3 Credit(s)

Discusses the history, purposes, and regulations of the advertising industry. Topics covered include creative principles, media advantages and disadvantages, media planning, regulation of advertising, and coordination with other promotion activities.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 448 - Interactive/Social Media Marketing

3 Credit(s)

This course focuses on relationship marketing, interactive marketing, integration of consumer data, Internet marketing (E-commerce), media advertising, catalogs, mailing lists, telemarketing, and the use of direct marketing techniques to replace or enhance the traditional marketing methods of retail and direct sales.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 454 - Market Research & Information

3 Credit(s)

Study of the theory and methods used in marketing research to address marketing problems. May include the completion of a research project where students learn by performing a research project from problem formulation to writing a research report. Also prepares the students for evaluating research performed by others.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 460 - Marketing Management

3 Credit(s)

Twelve hours of marketing courses and senior status required. Capstone course in marketing. Study of the problems faced by marketing managers as they make decisions and develop policies.

Prerequisite(s):

BUS 454 Minimum Grade: C- OR T

Plus any 3 Courses from the Following

BUS 356 - Retailing

3 Credit(s)

Study of marketing and management problems faced in the operation of a retail business. Emphasis is given to techniques for solving problems in location, management, and merchandising, especially with the integration of Internet retailing (E-Tailing) as both a competitor and an extension of the storefront business.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 385 - Sports Marketing

3 Credit(s)

Illustrates the dynamic, progressive and influential nature of sports marketing. Explores the sport marketing concept as a consumer-driven, integrated, goal-oriented philosophy for a team, event, organization or athlete. Topics covered include: athletic endorsements, team sports, event sponsorships and alternative sports.

BUS 441 - International Marketing

3 Credit(s)

Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. This is accomplished through real life planning and implementation of an international marketing plan designed to market a product or service in a foreign country or countries

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 449 - Marketing in the 21st Century

3 Credit(s)

This course provides the practical tools and strategies required to successfully leverage social networks, capitalize on their powerful word-of-mouth lift, and how to measure these interactive marketing efforts. These tools will be used on an actual social media marketing campaign for a business or non-profit entity. Current and future marketing tools will be discussed and evaluated.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

BUS 448 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models

of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

Business Administration Certificate

Required Courses

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

BUS 505 - Creating Consumer Value

3 Credit(s)

This course presents learners with a comprehensive approach to creating consumer value. This includes marketing and brand management in for-profit firms as well as identifying and meeting consumer needs in non-profit and governmental organizations. Topics include segmentation and targeting of consumers; the positioning levers of product, price, promotion, and distribution; and brand management.

ECON 505 - Managerial Economics

3 Credit(s)

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Business Leadership Certificate

Go to: Business

Required Courses

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

BUS 545 - Leading Entrepreneurial Organizations

3 Credit(s)

Successful organizations emphasize learning to sustain their competitive advantage. This course will study entrepreneurship and intrapreneurship. Areas of emphasis include uncovering the methodologies and characteristics that foster innovations and achieve meaningful change in business that leads to the creation and implementation of profitable business opportunities.

BUS 550 - Technology and Innovation

3 Credit(s)

This course adopts the perspective of a general manager-- an individual charged with diagnosing complex situations and resolving them in ways that enhance organizational performance. The course emphasizes how general management decisions may contribute to the creation and appropriation of economic value through innovation.

BUS 555 - Leading for Results

3 Credit(s)

This course focuses on how leaders mobilize others within their organization to get extraordinary things done. You will analyze what characteristics you need to develop to achieve your own professional goals and reflect on ways you can develop your competencies as a leader.

BUS 560 - Leadership Capstone

3 Credit(s)

This capstone course integrates knowledge gained in the previous graduate business courses. It centers on the theme that organizations achieve sustained success when their managers have astute, timely, strategic game plans, and they implement these plans with proficiency. This class incorporates the "big picture" and cuts across the whole spectrum of business and leadership.

Business Qualitative Skills Certificate

Go to: Business

Required Courses

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

Data Analytics and Decision-Making Certificate (9 credits)

Required Courses

LEAD 560 - Data Analysis in Higher Education

3 Credit(s)

This course introduces the concepts and skills involved in understanding and analyzing research in a variety of areas in

higher education. The course provides an overview of basic, general knowledge of various research methodologies. It emphasizes the conceptual underpinnings of statistical analysis of data, including univariate and bivariate descriptive statistics, sampling distributions, statistical estimation, hypothesis testing and procedures in testing statistical hypothesis for one and two sample designs. This course also enhances students' abilities to locate, read, comprehend, and critically analyze research articles and reports.

LEAD 561 - Institutional Research, Planning, and Assessment

3 Credit(s)

This course provides students with an overview of decision-making strategies and techniques for effective planning, institutional research, and assessment. Particular attention will be given to the diversity of institutional settings and the context within which leaders in higher education practice, including small and large campuses, public and private colleges and universities, system offices, and state and federal level agencies.

LEAD 562 - Strategic Enrollment Management

3 Credit(s)

This course provides students with a study of purposes, organizations, and functions of strategic enrollment management (SEM) including relevant research, case studies of public and private college and university implementation of SEM, its context in higher education, and contemporary practical administrative SEM organizations and functions. Topics will be covered such as admissions, financial aid, student access and success, college completion, marketing and branding, technology, change management, and state and federal policies.

Doctor of Philosophy in Counselor Education and Supervision

- Go to: Counseling and Counselor Education

The Ph.D. in Counselor Education and Supervision prepares graduates to

- Work as counselor educators and supervisors, researchers and practitioners in academic and clinical settings.
- Extend the knowledge base of the counseling profession in a climate of scholarly inquiry.
- Publish and/or present the results of scholarly inquiry.
- Inform professional practice by generating new knowledge for the profession through dissertation or comparable research projects focused on areas relevant to counseling practice, counselor education, and/or supervision.
- Assume positions of leadership in the counseling profession and/or their area(s) of specialization.

Counselor Education and Supervision students at Adams State University will be

- Prepared to teach select courses in counseling skill, theory, ethics, research, assessment, group, supervision, instructional theory, and career.

- Knowledgeable and skilled in the practice of advanced clinical counseling.
- Knowledgeable and competent in cultural diversity.
- Experienced in online course development, delivery, and counseling supervision.
- Prepared to teach courses in the CACREP core.
- Prepared to supervise counselors and counseling students who provide individual and group counseling.
- Experienced in developing and conducting research.
- Experienced in presenting research results at state, regional, and national conferences.
- Experienced in writing for professional publications.
- Prepared to evaluate counselor education programs and clinical counseling sites.
- Experienced as professional counseling leaders, mentors, practitioners, and consultants.
- Experienced as active change advocates.

Degree Requirements

The Doctor of Philosophy program in Counselor Education and Supervision requires a minimum of 60 semester hours as described below. However, the order of the course offering is subject to change. Students must enter the doctoral program with a master's degree in counseling from a CACREP accredited program. If the student's degree is from a non-CACREP program, additional hours will be assessed.

COUN 705 - Advanced Theories and Career

3 Credit(s)

This course examines several major counseling and career theories that inform current counseling practice. Students will have an opportunity to compare and analyze and evaluate the compatibility and effectiveness of counseling theories in practice, including evidence based practices, and ethical and culturally relevant practice in multiple clinical settings. Students will demonstrate knowledge and application of major theories pertaining to the principles and practices of counseling and career development to include the conceptualization of clients from multiple theoretical perspectives.

COUN 708 - Quantitative Research Method

3 Credit(s)

This course examines advanced quantitative research models and methods of instrument design, such as experimental and quasi-experimental designs. Students will gain knowledge and skill in developing quantitative research questions appropriate for professional research, designing a quantitative research study, and submitting research proposals for human subjects/institutional review board reviews. Students will also be introduced to writing for publication. The course will also address ethical and diversity issues involved in research design, measurement, and implementation.

Prerequisite(s):

Admission to the doctoral program

COUN 710 - Supervision and Consultation

3 Credit(s)

Theoretical and applied aspects of the human learning process related to clinical supervision and consultation, with an emphasis on the concepts, issues, and strategies of applied clinical supervision and its delivery will be explored in this course. This course provides an opportunity for students to synthesize and apply knowledge of supervision and the consultations process as they develop their personal style for supervision and consultation. Students will be exposed to current theories, models, and topics related to supervision and consultation. Ethical and legal issues in supervision and consultation will be addressed.

COUN 712 - Qualitative Research Methodology

3 Credit(s)

This course examines advanced qualitative research design and approaches and explores and contrasts philosophical assumptions of qualitative and quantitative research. Students will gain knowledge and skill in developing qualitative research questions appropriate for professional research, designing a qualitative research study, and submitting research proposals for human subjects/ institutional review board reviews. Students will also be introduced to writing for publication. The course will also address ethical and diversity issues involved in research design, sampling, and implementation. Areas of emphasis include specific methodologies, such as phenomenology and grounded theory, in addition to other common and emergent qualitative approaches in counselor education.

COUN 715 - Advanced Multicultural & Ethical Issues

3 Credit(s)

This course will provide an understanding of the cultural context of relationships, issues and trends in a multicultural and diverse society using relevant professional ethical codes and principles. Emphasis will be placed on delivering culturally and ethically relevant counseling in multiple settings, conducting supervision, and conducting and reviewing research. Cultural and ethically relevant leadership and advocacy practices will be discussed. Students will explore current social and cultural issues, including social change theory and advocacy action planning. The role of racial, ethnic, and cultural heritage; nationality; socioeconomic status; family structure; age; gender; sexual orientation; religious and spiritual beliefs; occupation; physical and mental status; local, regional, national, and international perspectives; and equity issues in counselor education programs, counseling supervision, and counseling research.

COUN 717 - Instructional Theory in Counselor Education

3 Credit(s)

This course prepares students to teach counseling and related courses. Topics covered are learning theories, retention of material, motivation, classroom instructional strategies and techniques, and assessment of learning from the core learning expectations. This course will provide an overview of the history and development of counselor education with an examination of the theoretical orientation and practice skills necessary to function effectively as a counselor educator. Students will examine their personal philosophy of teaching and learning and demonstrate the ability to design, deliver, and evaluate methods appropriate to course objectives.

COUN 720 - Advanced Group Counseling

3 Credit(s)

This course focuses on a critical analysis of advanced group counseling theories, approaches, literature, and modalities applicable to working with groups. Students will engage in experiential learning focused on in-depth exploration of their personal approach to group leadership and supervision. Students will also develop advanced group counseling leadership skills and identify strategies based upon the special needs and characteristics of diverse client groups.

COUN 722 - Quantitative Data Analysis

3 Credit(s)

This course examines univariate and multivariate statistics most frequently used in psychological research. Students will learn how to read and interpret these statistics in published psychological research as well as how to apply them to the analysis of their own research projects. Students will learn how to select the appropriate statistical analyses, collect data in a controlled manner, analyze the data, and interpret the results. This course emphasizes skill in applying advanced statistical techniques to social science research, interpreting results of statistical analyses, and data analyses and presentations. This course will also address writing for professional publications and conference proposals, as well as ethical and diversity issues involved in analyzing and publishing research.

Prerequisite(s):

COUN 708

COUN 723 - Qualitative Data Analysis

3 Credit(s)

This course provides an in-depth exploration of qualitative research methodologies and the development of advanced-level qualitative research skills. Advanced topics in qualitative research are considered to foster critical thinking skills and to inform a long-term research agenda. Epistemological assumptions, theoretical considerations, data collection, and analytic procedures for grounded theory, phenomenological, narrative, case study, ethnographic research designs, and other emergent research practices and processes are reviewed. This course emphasizes skill in interpreting the results of qualitative data analyses; students will apply knowledge and skill to the analysis of their own research projects. This course will also address writing for professional publications and conference proposals and ethical and diversity issues involved in analyzing and publishing research.

Prerequisite(s):

COUN 712

COUN 725 - Seminar in Counselor Education

3 Credit(s)

This course is designed to facilitate the student's awareness and knowledge in current issues related to counselor educators. Students will discuss and present current issues in the field, providing a format for debate and discussion. The course will increase the student's awareness of the ever-changing areas of social and educational change.

COUN 727 - Advanced Practicum in Counseling

3 Credit(s)

This advanced supervised practicum in counseling will enable doctoral-level students to develop and/or refine advanced counseling skills and conceptually link counselor practice and supervision. The doctoral practicum focuses on additional supervised clinical counseling experience beyond the supervised experience completed in the student's master's degree program. Students are required to participate in a supervised doctoral-level practicum of a minimum of 100 hours in counseling, of which 40 hours must be in direct service with clients. The nature of the doctoral-level practicum experience is to be determined in consultation with program faculty and/or a doctoral committee. Students will participate in weekly group supervision with a faculty member and other practicum students.

COUN 729 - Seminar: Leadership & Advocacy

3 Credit(s)

This leadership focused course will focus on current issues in counseling to include the role of ethical and legal consideration in counselor education and supervision. Focus will be on the theories, skills and models of leadership as well as strategies for responding to community, national, and international crises and disasters. Students will explore current topical and political issues in counseling and how those issues affect the daily work of counselors and the counseling profession. Students must demonstrate the ability to provide leadership or contribute to leadership efforts of professional organizations and/or counseling programs and the ability to advocate for the profession and its clientele.

COUN 735 - Advanced Assessment and Program Evaluation

3 Credit(s)

This course serves as an advanced course on the principles of assessment, testing, and evaluation. Students will examine and critique assessment instruments used in counseling and counselor education. Students will develop knowledge and skills to prepare them for teaching assessment at the Master level. Additionally, this course focuses on the concepts and processes related to program evaluation and the steps in performing a program evaluation. Emphasis is on the application and demonstration of critical thinking skills related to analyzing and evaluating programs. Students will also gain foundational knowledge about writing grant proposals appropriate for research, program enhancement, and/or program development.

Prerequisite(s):

Admission into the doctoral program

COUN 736 - Dissertation Seminar

3 Credit(s)

This course focuses on developing the essential components of the student's dissertation. This seminar is designed to assist students in making substantive progress in identifying and developing their dissertation proposal. Students will critically examine the current literature associated with their research interests and examine the current literature associated with their research interests and examine applicable conceptual constructs and methodologies. Students will complete the first drafts of the first three chapters of their dissertation, which will be used for their dissertation proposal. A complete review of the literature and draft of the dissertation proposal will be evaluated for methodological strengths and weaknesses.

Prerequisite(s):

COUN 708 Minimum Grade: B-
AND

COUN 712 Minimum Grade: B-
AND

COUN 722 Minimum Grade: B-
AND

COUN 734 Minimum Grade: B-

COUN 737 - Doctoral Internship I-Supervision

1 Credit(s)

Students are required to complete doctoral-level counseling internships that total a minimum of 600 clock hours. The 600 hours must include supervised experiences in at least three of the five doctoral core areas (counseling, teaching, supervision, research and scholarship, leadership and advocacy). The 600 credit hours may be allocated at the discretion of the doctoral advisor of the doctoral advisor and the student on the basis of experience and training. Internship is designed to provide individual students with a planned program of advanced doctoral level professional experience in a college or community/agency setting. Internship assignments will be controlled and coordinated by a university instructor. An experienced professional at the internship site provides direct supervision. The doctoral-level internship will consist of providing individual and group supervision to master's level students, teaching and/or co-teaching master's level counseling courses, and participating in professional activities related to counselor education. If doctoral students have had limited clinical counseling experiences prior to beginning their doctoral work, they may also be required to complete credit hours in a counseling setting to gain more counseling experience

Prerequisite(s):

COUN 710 Minimum Grade: B-

COUN 738 - Doctoral Internship II Teaching

1 Credit(s)

Students are required to complete doctoral-level counseling internships that total a minimum of 600 clock hours. The 600 hours must include supervised experiences in at least three of the five doctoral core areas (counseling, teaching, supervision, research and scholarship, leadership and advocacy). The 600 credit hours may be allocated at the discretion of the doctoral advisor and the student on the basis of experience and training. Internship is designed to provide individual students with a planned program of advanced doctoral level professional experience in a college or community/agency setting. Internship assignments will be controlled and coordinated by a university instructor. An experienced professional at the internship site provides direct supervision. The doctoral-level internship will consist of student's engaging in teaching activities, which include but are not limited to teaching master's level students on-campus/online. If doctoral students have been limited clinical counseling experiences prior to beginning their doctoral work, they may also be required to complete credit hours in a counseling setting to gain more counseling experience.

Prerequisite(s):

COUN 710 Minimum Grade: B-
AND

COUN 737 Minimum Grade: B-

COUN 739 - Doctoral Internship III Supervision

1 Credit(s)

Students are required to complete doctoral-level counseling internships that total a minimum of 600 clock hours. The 600 hours must include supervised experiences in at least three of the five doctoral core areas (counseling, teaching, supervision, research and scholarship, leadership and advocacy). The 600 credit hours may be allocated at the discretion of the doctoral advisor and the student on the basis of experience and training. Program Total (60 Hours)

Educational Policy in LEAD Certificate (12 credits)

Go to: Educational Leadership

Go to: Master of Arts in Leadership Education Administration and Development (LEAD) with Emphasis in Higher Education Administration and Leadership (HEAL)

Required Courses

LEAD 530 - Budgeting and Finance in Higher Education

3 Credit(s)

This course provides students with an overview of finance and budgeting issues in higher education. It describes the financial resource management in institutions as well as the budgeting process.

LEAD 531 - Politics and Policy in Higher Education

3 Credit(s)

This course examines state and federal government policies that influence institutions of higher education (IHEs) generally and Hispanic Serving Institutions (HSIs) specifically. The intersection between policies and institutional actions creates a dynamic that influences administrative leadership and student access and success. Effective leaders must account for the context in which they operate, and state and federal policies contribute to that context and, as such, merit special consideration and study.

LEAD 532 - Legal Issues in Higher Education

3 Credit(s)

This course is designed to review the impact of the judiciary on higher education. The legal standing of institutions of higher education on issues of staff rights, student rights, and tort liability will be addressed. In addition, the impact of local ordinances, state and federal laws and regulations will be examined.

LEAD 533 - Historical/Contemporary Issues

3 Credit(s)

This course provides students with an overview of the evolution of American higher education as we know it today. The first half of the course is an examination of the history of American higher education, beginning with colonial

times and tracing its development to the present. The second half of the course examines current topics in higher education, focusing on perennial issues and why they continue to perplex higher education officials.

Finance Certificate

Go to: Business

Required Courses

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 531 - Multinational Financial Management

3 Credit(s)

Multinational Financial Management course has two emphases: one on the basics and the other on a managerial perspective. As international capital markets of the world become more integrated, an understanding of international financial management has become important for U.S. corporate decision making. This course provides students with groundwork for analysis that will serve them well in their future careers. The decision-making process in this course will teach students how to make knowledgeable managerial decisions in an ever changing global financial setting.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 532 - Portfolio Management and Investment Analysis

3 Credit(s)

The unifying theme of this course is that security markets are almost efficient, meaning that most securities are priced appropriately given their risk and return attributes. The course is a blend of practical and theoretical coverage combined with a complete digital solution to focus on making investment decisions from the perspective of the portfolio manager. This course also covers the Series 7 License and is designed to prepare the student for taking the National Association of Securities Dealers General Securities Representative Exam.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 533 - Financial Markets and Institutions

3 Credit(s)

This course is a great reflection of the latest developments from the field of financial markets. It helps students understand why financial markets exist, how financial institutions serve these markets, and what services those institutions offer. The course also focuses on the management, performance, and regulatory aspects of financial institutions and explores the functions of the Federal Reserve System, as well as the major debt and equity security markets, and derivative security market.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 534 - Finance Capstone

3 Credit(s)

This course uses a case study approach to solve complicated corporate problems and links managerial decisions to capital markets and the expectations of investors. Students will gain a deeper understanding of financial issues that they encounter in their professional career. At the core of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps the students understand the impact of the firm on the world around it.

Prerequisite(s):

BUS 525 Minimum Grade: B-

AND

BUS 531 Minimum Grade: B-

AND

BUS 532 Minimum Grade: B-

AND

BUS 533 Minimum Grade: B-

General Business Certificate

Go to: Business

Courses (16 credit hours)

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 179 - Special Topics

1 to 3 Credit(s)

Offered periodically to meet student special interests in the field.

Graduate Certificate in Diversity, Equity, and Inclusion in Sport

Go to: Kinesiology

This certificate, offered through the Kinesiology Department, is a 15-credit hour certification that will aid students in being able to better incorporate DEI measures into their respective professions.

Required Courses

KIN 502 - Women, Sport, and Society

3 Credit(s)

This course will explore how women have been involved in sports and athletics, how they have fought to claim recognition and legitimacy among historically male dominated settings, and how they continue to shape sports and the role of women in society. We will explore a wide variety of topics in society related to women in sports including historical influences, equitable access, characteristics of female sport participation, sport opportunities, and sport leadership. Topics will include Title IX, female bodies and physiology, sport diversity, gender identity, women's sport and aging, disabilities, sport and sexual violence, media and women's portrayal in sports, competitive sports in high school, college, and professional leagues, and marketing women's sports.

KIN 515 - Administration of Sport

3 Credit(s)

This course is designed to teach students the important principles, concepts, research, and theories of managing a sport organization. Students will develop the ability to apply the management principles to interscholastic, intercollegiate and professional and Olympic sports. Students will learn the fundamental principles such as: organizational development, marketing, human resources, strategic planning, sport culture, media relations, fundraising, event management, and leadership as it relates to sport.

Prerequisite(s):

BUS 500

KIN 538 - Diversity and Equity in Sport

3 Credit(s)

This course explores aspects of diversity and equity in sport. This course has a two-fold purpose: first, it is designed to provide a sound introduction to diversity and equity in sport; and second, it is designed to encourage students to ask questions and think critically about diversity, equity, and inclusion in sport and interaction with society. This course will explore issues around diversity, equity, and inclusion in sport and society.

KIN 556 - Strategic Management / Leadership

3 Credit(s)

This course will provide a detailed overview of strategic management and leadership with an emphasis on the management of sport organizations in the commercial, public and not for profit sectors. This course will enable learners to evaluate the relevance of distinctive strategic management tools and consider how these can be applied to support the development of effective sport and sport-related organizations. Students also will examine the principles of effective leadership and reflect on their personal leadership style, the skills and competencies that support the style as well as examining plans for personal and professional development.

Prerequisite(s):

BUS 500 Minimum Grade: C

KIN 587 - Diversity, Equity, and Inclusion in Sport Capstone

3 Credit(s)

The capstone is designed to provide a cumulative experience for students who are completing the Diversity, Equity, & Inclusion (DEI) in Sport certification through the School of Kinesiology & Health Sciences. The capstone provides graduate students an opportunity to integrate the content they've learned in the DEI-related Kinesiology (KIN) prerequisite classes into their anticipated professions post-graduation. More specifically, students will further learn from minorities' lived experiences while being challenged to consider how such lived experiences should influence how the student manages themselves in professional and personal matters with the intent to be more equitable and inclusive of all bodies in their professional and personal lives.

Health Administration Certificate (Graduate)

Go to: Business

Required Courses

- Any 4 HCA 500 level courses

Health Administration Certificate (Undergraduate)

Go to: Business

Courses (16 credits total)

HCA 303 - Trends and Issues in Health Care

3 Credit(s)

This course is an introductory Health Care Administration course and will expose the student to the industry and its significant elements and trends of the current health care environment.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

HCA 311 - Health Care Law and Ethics

3 Credit(s)

This course presents an overview of the legal and ethical issues faced by health care consumers, practitioners, and administrators. The course will introduce students to the legal aspects of health care at the federal, state, and local levels. Topics covered will include criminal and civil claims against health care providers, corporate and individual liability, and legal and ethical decision-making, individual liability, and legal and ethical decision-making. HCA 361 Health Care Administration. Instructor permission.

Prerequisite(s):

BUS 211 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 325 - Health Care Informatics

3 Credit(s)

This course is a study of record keeping practices in the hospital and physician's office. Emphasis is placed in hospital and medical staff organization, patient record content, procedures in filing, numbering and retention of patient records, quantitative analysis, release of patient information, forms control and design, indexes and registers, reimbursement, regulatory and accrediting agencies, and alternate health care delivery systems. Instructor permission required.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 363 - Health Care Finance

3 Credit(s)

This course is devoted to the practical aspects of finance in health care, an examination of current practices in financial management of health care organizations, and managerial applications to specific problems facing health care managers. The first part of the course will focus on an overview of health care finance, managerial accounting, and financial analysis. The second part will continue with managerial accounting and financial analysis and will concentrate on the various tools used in financial management. Emphasis is placed on unique issues and concerns that result from the regulatory framework of health care organizations. At the conclusion of this course, the student should be able to discuss the financial structure, market forces, controls and techniques used in the health care management field, be able to read and analyze financial statements and budgets and have the skill to interpret financial and operating performance.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 402 - Public and Population Health

3 Credit(s)

This course consists of an examination of epidemiological concepts and methods of studying the distribution and determinants of morbidity and mortality in human population. The knowledge and skills acquired should enable one to understand and critically review scientific literature dealing with epidemiology concepts and measures. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

BUS 179 - Special Topics

1 to 3 Credit(s)

Offered periodically to meet student special interests in the field.

Leadership Certificate (12 credits)

Required Courses

LEAD 500 - Leadership Theory

3 Credit(s)

This course provides a study/review of leadership theories and leadership development concepts. Students will gain an understanding of leadership, leadership theories, and leadership development.

LEAD 501 - Cultural Competency and Equity in Higher Ed

3 Credit(s)

This course focuses on issues of equity, cultural competency, diversity and allyship to provide students with the tools needed to create more inclusive and socially just environments in higher education.

LEAD 520 - Leadership in MSIs

3 Credit(s)

This course examines the various leadership theories that inform the practice of administration in colleges and universities and the higher education industry in general. Through assignments, special attention will be geared toward applying these theories to leadership within the context of Hispanic Serving Institutions (HSIs).

LEAD 521 - Administrative and Academic Collaboration

3 Credit(s)

This course provides students with an overview of staffing practices in higher education and the opportunities and challenges for collaboration between faculty, staff, and administration, with a special emphasis on acquiring a better understanding of who faculty are, what faculty do, and what faculty think. Particular attention will be given to how organizational culture drives collaborative efforts in minority serving institutions.

Master of Arts in Counseling, Clinical Mental Health Counseling Emphasis

- [Go to: Counseling and Counselor Education](#)

Master of Arts in Counseling

The Master of Arts in Counseling is offered in an online delivery modality. This program is designed to meet the educational needs of those students who are not within driving distance of a counseling program or whose work schedule will not allow physical attendance. The online program offers the same course content as the other accredited programs Adams State University offers, only in an online format. Students in the online program will spend one week on the Adams State campus during the two consecutive weeks in the program. During these weeks, students will interact with the faculty on campus and further develop their counseling and interpersonal skills, form learning groups, become acquainted with the program and its expectations, and receive tutoring, advising, and intensive supervision.

Core Requirements for the Master of Arts in Counseling

The degree programs in school and clinical mental health counseling require a minimum of 60 semester hours as described below. However, the order of the course offering is subject to change.

COUN 503 - Introduction to Research

3 Credit(s)

An introductory course to help students develop an understanding of the importance of research; overview basic elements of quantitative, qualitative, and action research ;methods, enhance skills to evaluate and critique research and literature; and gain an appreciation for conducting research.

COUN 515 - Multicultural and Diversity Issues

3 Credit(s)

This course is designed to assist students in understanding the impact of social/cultural forces upon identity development and formation. Students will explore various components of our pluralistic society and how oppressive systems can exclude and harm individuals. Change theory and advocacy principles will be introduced to aid students in dealing with these issues in their communities and with clients.

COUN 517 - Life Span Development

3 Credit(s)

This course is designed to provide an understanding of major influences of human development. Presentation of various developmental theories enable the student to understand the stages of the developmental process that include conception, childhood, adolescence, adulthood, aging process, and death and dying. Students will develop an appreciation and awareness of the complexity of human growth and development.

COUN 524 - Counseling Theories and Helping Relationships

3 Credit(s)

This course presents the major schools of thought influencing the practice of counseling. The relationship of philosophy, theory, and practice will be a primary focus. Students will understand the historical foundations of counseling and the beginnings of their own personal foundation of counseling.

COUN 527 - Group Counseling

3 Credit(s)

This course explores leadership styles, group dynamics, and group process necessary to run successful groups. The major group counseling theories will be explored, and group skills will be practiced. The course requires that students gain experience as both a growth group participant and as a co-leader.

Co-requisite(s): COUN 527L

COUN 527L - Group Counseling Lab

0 Credit(s)

Students are required to take COUN-527L Group Counseling Lab along with their COUN 527 course. The COUN-527L to engage in personal and professional growth as a group counselor in training while demonstrating self-awareness and professional behaviors required of counselors in training specifically in leading and engaging in Group activities. Students will experience the group process as both a group member and group leader while receiving individual/group supervision from program faculty.

Co-requisite(s): COUN 527

COUN 528 - Career Development

3 Credit(s)

This course provides students an understanding of the career planning process. Key career development theories will be examined and applied. The counseling process, the world of work, and career information resources, including computerized career assessment, will be examined in relation to career interventions.

COUN 530 - Couples/Family/Systems

3 Credit(s)

This course provides counseling students with the theoretical background and therapeutic skills necessary for therapeutic intervention in families, couples, and systems. Students will examine systems theory as it relates to families and couples and develop knowledge and skill pertaining to family-of-origin issues, addictions, parenting, and professional consultation.

COUN 536 - Pre-Practicum

3 Credit(s)

This course provides students an introduction to the counseling profession and helping relationships. The course will emphasize personal growth, self-awareness, and professional behavior. Students will experience the helping relationship as both client and counselor.

Co-requisite(s): COUN 536L

COUN 536L - Pre-Practicum Lab

0 Credit(s)

Students are required to take COUN-536L Pre-Practicum Lab along with their COUN 536 course. The COUN-536L is to engage in personal and professional growth as a counselor in training while demonstrating self-awareness and professional behaviors required of counselors in training. Students will experience the helping relationship as both client and counselor and receive individual/group supervision from program faculty.

Co-requisite(s): COUN 536

COUN 537 - Practicum

3 Credit(s)

Practicum is a clinical, experiential course that requires students to complete hours in a professional setting. The student will apply counseling techniques and skills in a supervised setting. The student will participate in the counseling process, refine techniques, and further enhance his/her therapeutic development.

Co-requisite(s): COUN 537L

COUN 537L - Practicum Lab

0 Credit(s)

Students are required to take COUN-537L Practicum Lab along with their COUN 537 course. The COUN-537L is to engage in personal and professional growth as a counselor in training while demonstrating self-awareness and professional behaviors required of counselors in training. Students will experience the helping relationship as both client and counselor and receive individual/group supervision from program faculty.

Co-requisite(s): COUN 537

COUN 538 - Crisis, Disaster, and Trauma

3 Credit(s)

This course focuses on knowledge of the many types of intervention used to address a range of crises. We will explore definitions of crisis, crisis theory, and models applied to specific crisis situations. The characteristics of effective crisis workers will be examined. Emergency services, school crisis teams, crisis hotlines, and other crisis response units will be discussed. Various activities will be used to practice the skills learned.

COUN 546 - Assessment in Counseling

3 Credit(s)

This course provides students with an understanding of individual and group approaches to assessment and evaluation. Students will learn various assessment and appraisal techniques with emphasis on multicultural and diversity, ethical, and legal issues.

COUN 549 - Foundations Addict Counseling

3 Credit(s)

This course provides counselors in training with an overview of the addictive process and the practice of addiction counseling. Models and theories of addiction along with professional issues in addiction counseling, co-occurring

disorders, such as process addictions will be addressed. Students will demonstrate conceptual knowledge, practical skills, and self-awareness concerning the etiology of addiction and its impact across the life-span, including criminology, neurological and societal implications. Assessment, diagnosis, and treatment of addictions with diversity and advocacy issues also being explored.

COUN 550 - Ethics and Professional Issues

3 Credit(s)

This course focuses on the ethical standards that govern the counseling profession. Current legislation and court decisions affecting professional behavior are examined. Particular emphasis is placed on the individual counselor's development of a professional identity within legal and ethical parameters.

Completion of the Requirements for the Clinical Mental Health Counseling Emphasis

COUN 542 - Diagnosis and Psychopathology

3 Credit(s)

The evolution of the DSM, its organization, and use will be explored. The student will develop an understanding of the process of diagnosis and the classification of mental disorders. The etiology and treatment of psychological disorders will be reviewed. Clinical writing skills will be practiced.

COUN 554 - Counseling Modalities for Clinical Mental Health

3 Credit(s)

This course focuses on applying the skills, interventions and modalities learned in the counseling courses to the Clinical Mental Health setting. Emphasis will be on learning to use evidence-based practices, working with clients with co-occurring diagnoses, and collaborating with multi-disciplinary teams.

COUN 555 - Clinical Mental Health Counseling

3 Credit(s)

This course focuses on issues in clinical mental health counseling including professionalism, roles and responsibilities, leadership, and management issues. The roles, responsibilities, and functions of the clinical mental health counselor will be discussed, showing the interrelatedness of community mental health counseling and other therapeutic professions (e.g., hospitals, law enforcement, and human services). In addition, the theoretical and historical framework within which the clinical mental health counselor has functioned in the past, the present, and the future will be explored.

COUN 585 - Internship I Clinical Mental Health

3 Credit(s)

Students will utilize knowledge and skills gained in coursework and the practicum experience in a supervised counseling setting. Students will receive supervision, increase knowledge of the profession, increase skill base, and continue the process of self-exploration, and self-awareness.

Prerequisite(s):

COUN 537 Minimum Grade: B

AND

COUN 555 Minimum Grade: C

COUN 595 - Internship II Clinical Mental Health**3 Credit(s)**

A continuation of Internship I, students will complete their supervised on-site experience, expand their acquired skills, and receive further supervision.

Prerequisite(s):

COUN 585 Minimum Grade: C

Plus 6 Elective Credits**Master of Arts in Cultural Resource Management**

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

The goals of the Cultural Resources Management program are to satisfy students' desires for directed study leading to a master's degree in Cultural Resource Management (prehistoric or historical focus), preparing them for advancement in that field or for going on to doctoral studies. All professors of CRM classes in this program have field experience in cultural resource management as archaeologists and/or administrators. They are committed to developing and encouraging students to achieve their academic potential. The degree is delivered through semester based, interactive, Internet courses.

Degree Requirements**Required Core****CRM 500 - Philosophy, Laws, and Standards****3 Credit(s)**

This is the introductory course for Cultural Resource Management. It covers the history and philosophy of CRM, the heritage preservation laws that created and govern the field, and current standards and practices of the field.

CRM 510 - Research Methods**3 Credit(s)**

This course serves as an introduction to the wide variety of technologies and techniques used in CRM. It will delve into pre-field, field, and post-fieldwork methods as related to developing a research design. Some technologies covered may include: Office Suite, GIS, LiDAR, compositional analysis, and dating techniques. Specific techniques will be adjusted to each student's previous background and technological expertise.

CRM 520 - Report Writing

3 Credit(s)

Central to all good archaeology is the writing of reports. This is especially true in cultural resource management, but these reports have unique requirements. They must meet professional standards, the standards of the agencies responsible for the resources, and they must be written in a way that is understandable to the project sponsors. This course will prepare students to produce well-written reports and correspondence for this profession.

CRM 571 - Archaeological Theory

3 Credit(s)

This is an online course which will cover the central theories that have driven the field of archaeology.

CRM 580 - Internship

3 Credit(s)

This is a practicum in cultural resource management during which the student will work on one or more actual CRM projects at least at the level of assistant project director. The work will be carried out in conjunction with a recognized CRM firm or a land managing agency.

CRM 591 - Thesis

3 Credit(s)

Students work through the research design, organization, and background material that will become their master's thesis. This will include a clear and decisive research question, a brief proposal, a hypothesis, and structural outline, all of which serve as guides in the organization of your thesis. Drafts of a culture history, environmental background and methods sections for the thesis are developed in conjunction with the committee chair.

Grade Mode: Pass/Fail

Prerequisite(s):

Approval of CRM advisor and/or course instructor. CRM 570 is recommended to prepare for this class, but not required.

CRM 592 - Continuing Thesis

1 to 6 Credit(s)

This course is required each fall and spring semester after the student has taken CRM 591 (Thesis) and until successful defense of the thesis.

Grade Mode: Pass/Fail

Context and Content

Complete 12 credits from the following courses selected in consultation with your advisor

ANTH 539 - Archaeology Field School

1 to 6 Credit(s)

Through actual field experience, the student will learn basic techniques of site identification and recording, excavation, and artifact processing and analysis. In addition, they will learn instruments surveying and introductory applications of geographic information systems. The skills taught will be appropriate for either prehistoric or historic sites.

ANTH 579 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

ANTH 592 - Workshop

1 to 6 Credit(s)

Short courses offered on an intermittent basis to meet the needs of special constituents.

ANTH 599 - Individual Studies

1 to 6 Credit(s)

Provides opportunity for individual research/study into problems of special interest in the field. By faculty permission and approval of the Department Chair.

CRM 530 - Pre-Contact North America

3 Credit(s)

This course is a survey of North American archaeology prior to European contact. Various periods and themes are explored, focusing on the current debates in the field of archaeology and CRM.

CRM 531 - Post-Contact North America

3 Credit(s)

This course is a survey of North American archaeology after European contact. Various periods and themes are explored, focusing on the current debates in the field of archaeology and CRM.

CRM 560 - Applied GIS/CRM Professionals

3 Credit(s)

This course will introduce students to real world applications of Geographical Information Systems (GIS) as it is used

in the Cultural Resource Management (CRM) field. Students will learn from applied examples about the critical thinking needed in cartography, digital data management, spatial data collection, resource management, statistical analysis, and visual learning.

CRM 561 - Geoarchaeology

3 Credit(s)

This online course is an introduction to geoarchaeology and the application of the geosciences to archaeological questions and research. This includes topics such as sedimentology, geomorphology, pedology, paleoenvironmental and paleoclimate reconstruction, geochemical provenance studies, Quaternary dating methods, and site formation processes.

CRM 570 - Selected Readings in CRM

3 Credit(s)

This course permits the student to work with an instructor to develop a syllabus of readings on a topic of the student and instructor's choice that is not otherwise offered through the institution.

CRM 579 - Special Topics

1 to 6 Credit(s)

This course will be developed by the instructor on topics of interest to the students in the CRM Master's Program that are not otherwise offered in the degree plan.

CRM 580 - Internship

3 Credit(s)

This is a practicum in cultural resource management during which the student will work on one or more actual CRM projects at least at the level of assistant project director. The work will be carried out in conjunction with a recognized CRM firm or a land managing agency.

OR

CRM 581 - Previous Archaeological Experience

3 Credit(s)

This course permits students to receive credit for prior professional employment and/or archaeological research.

Prerequisite(s):

Previous archaeological, museums, historic preservation, or other relevant field experience for a degree in cultural resource management.

Grade Mode: Pass/Fail

CRM 599 - Individual Studies

1 to 6 Credit(s)

Provides opportunity for individual research/study into problems of special interest in the field. By faculty permission and approval of the Department Head.

HIST 501 - State History

3 Credit(s)

A graduate-level survey of the history of a particular state, with emphasis on how meta and national phenomenon impacted a given state, as well as events and phenomena unique to the state.

HIST 505 - American West

3 Credit(s)

This course is a survey of the American West with an emphasis on interpretation by historians. Admission to the Master of Arts program is required.

HIST 520 - Topics in World History

3 Credit(s)

This course will involve intensive reading, analysis, and discussion of selected topics/controversies in world history.

HIST 546 - Borderlands

3 Credit(s)

This course explores borderlands as a site of historical scholarship with special emphasis on the southwestern United States and the United States-Mexico border.

HIST 551 - Atlantic History

3 Credit(s)

This course explores the Atlantic world as a field of historical scholarship with a special focus on European colonization of the Americas, African slavery, and the Age of Revolutions.

HIST 563 - Civil War and Reconstruction

3 Credit(s)

A graduate-level study of the antebellum South, sectional discord, armed conflict, and reconstruction of the Union.

HIST 579 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

Master of Arts in Education, Culturally and Linguistically Diverse (CLD) Endorsement

Go to: Educational Preparation

The five-semester Master of Arts in Education with a Culturally and Linguistically Diverse (CLD) endorsement focuses on the development of sound multicultural teaching competencies and educational leadership for service in schools.

Total degree hours: 33 Credits

Academic Core Requirements for MA Candidates only

ED 507 - Integrated Instruction & Assessment

3 Credit(s)

This course supports candidates in aligning their beliefs and values to develop their teaching identity. Metacognitive processes will help candidates be aware of their own motives and empower them to actively participate in their own learning as they begin to develop their art of teaching. Candidates will design a sequence or unit of study following the Understanding by Design framework which includes digging deeper into formative and summative assessments and interpreting assessment data to teach responsively. Alternative methods of facilitating instruction and assessing student performance and understanding will be investigated and implemented to increase the candidate's understanding of their students' abilities, interests, and needs. Candidate's will also discover strategies for fostering successful community partnerships.

ED 534 - Multicultural Perspectives

3 Credit(s)

This course provides students with an overview of the role of cultural diversity in the classroom and its effect on teaching and learning. While exploring issues of race, class, culture, and power, students will develop a deeper understanding of school demographics, perspectives on teaching and learning and the interaction between pedagogy and culture. Students will gain an understanding about the effects of different social, cultural, linguistic, and cognitive experiences on learner development, the impact this can have on their choices as teachers and leaders.

ED 557 - Research Methods

3 Credit(s)

Research methods is designed to provide candidates in the program with background knowledge of quantitative and qualitative research methods. The course will help candidates evaluate the appropriateness of each method when

designing a research project. Candidates will develop mini- proposals for each type of research in preparation for implementing and reporting on their own research project.

Cognate Requirements (24 Credits)

CLD 501 - Introduction to the Study of Language

3 Credit(s)

This course provides prospective teachers with an overview of the study of language and how it works. It is an introduction to the scientific study of language and linguistics. The course provides for examination of relevant theories of language and how language is acquired as well as cognitive, societal and cultural considerations affecting its use. Specific topics to be examined include: the structure of languages, grammatical constructs (e.g., morphology, syntax, semantics, phonetics, phonology, and discourse), the interactions between language use and social structures, and the representation of language in the brain. Instructional applications will be considered. The course presupposes no formal study or knowledge of language/ linguistics.

Prerequisite(s):

Admission to the Graduate School

CLD 502 - Language and Culture

3 Credit(s)

This course explores the peculiar relationship between language and the cultural total of which the language is a part, including the connection between cultural identity and heritage language. It examines language variations within a community according to gender, age, geography, ethnicity, socioeconomic class and level of education. Specifically, the course deals with the linguistic factors characterizing differences in language and with the social and social-psychological variables associated with these differences. Attention is given to the different varieties of language within a speech community (e.g., dialect, register, and style) and the societal and cultural factors that define their use. Course content considers the educational, political and economic implications. The course presupposes no formal study or knowledge of language/ linguistics.

Accordingly, the course focuses on the different ways people speak. It deals with the linguistic factors characterizing differences in language and with the social and social-psychological variables associated with these differences. Thus, having completed the course, students should (a) be aware of the different linguistic choices available to speakers in different social/ cultural contexts, (b) have an understanding of the factors which influence the choosing of one variety over another and the societal implications of such choices, (c) gain an appreciation for language diversity and cultural pluralism and, for those in teacher education programs, and, for education majors, (d) be able to demonstrate ability to identify and adapt instructional applications that are responsive to learners from different cultural backgrounds.

Prerequisite(s):

Admission to the Graduate School

CLD 503 - Second Language Acquisition

3 Credit(s)

Introduction to second language acquisition (SLA) theory and the application of SLA theory to second/foreign language teaching practices. Explores what it means to know a language and, hence, how one learns/ acquires a second language. The emphasis in the course is to provide an opportunity to become familiar with up-to-date major theories of language acquisition (e.g., linguistic, psychological, sociological, etc.). That is, what happens in the mind of L1 learners and expand to 2L learners. This is not a methodology course, though certain methods and approaches will be discussed as they are direct applications of 2L theories. Instead, students will be exposed to what research data show about the complex process of learning a second language, and to teach them how to rely on these data to understand a number of major models (theories) of 2LL and, as a result, be able to use this knowledge to evaluate different methods, materials and assessments for 2LL/CLD Introduction to second language acquisition (SLA) theory and the application of SLA theory to second/foreign language teaching practices. Explores what it means to know a language and, hence, how one learns/ acquires a second language. The emphasis in the course is to provide an opportunity to become familiar with up-to-date major theories of language acquisition (e.g., linguistic, psychological, sociological, etc.). That is, what happens in the mind of L1 learners and expand to 2L learners. This is not a methodology course, though certain methods and approaches will be discussed as they are direct applications of 2L theories. Instead, students will be exposed to what research data show about the complex process of learning a second language, and to teach them how to rely on these data to understand a number of major models (theories) of 2LL and, as a result, be able to use this knowledge to evaluate different methods, materials and assessments for 2LL/CLD populations. The course presupposes no formal study or knowledge of language/ linguistics. As part of the course content, we will seek to foster cultural sensitivity to the diverse student population becoming increasingly prevalent in classrooms in the U.S. We will also be concerned with providing the basic skills needed to satisfactorily assess the suitability of diverse 2LL methodologies & programs to meet the needs of limited English proficiency (LEP) students. An underlying assumption of the course is that learning is a social process that takes place within the broader social milieu of the learner's speech community. Accordingly, 2L learners bring into the classroom diverse language and cultural backgrounds, as well as a unique set of competencies, skills, sensitivities, goals, and needs. In order to provide for a successful learning environment, teachers must be able to identify and relate to the diversity inherent in today's student population and be able to take 'affirmative steps' towards addressing the needs of the students in their classrooms. Course content and activities will assist participants in developing a greater 'appreciation of democracy and diversity' in the classroom as we prepare for a global society as reflected in current theories of 2L acquisition.

TESOL Topics and Elective Courses *

CLD 504 - TESOL Methods

3 Credit(s)

This course introduces students to the study, philosophy, aims and methods of teaching English as a second (or foreign language) with an emphasis upon the techniques and materials in current use. It aims at providing for examination of current theory and empirical data on language learning, as well as for scrutinizing pertinent pedagogical implications/ applications for the TESOL K-12/ CLD classroom intended to address the language needs of non-native speakers of English. In addition, the course reviews research-based instructional methodologies applicable to teaching language through the content areas. The course considers the large 'storehouse of information' currently available on how to successfully tap into this knowledge in order to develop and implement sound methodological approaches which will assist SL/ CLD learners in becoming proficient in the target language and successful in the academic content areas. Content addresses teachers need to rely on effective instructional approaches and strategies that promote a climate that is conducive to opportunities for active involvement in learning about language, academic content, about classmates, and about the whole world. The course examines a synthesis of current 2L theory that should serve as the basis for development, selection, and modification of suitable materials and methods that will predictably be conducive to successful learning in both the language and content area classroom.

CLD 505 - TESOL Reading

3 Credit(s)

This course introduces students interested in questions of language acquisition to the theories and practices relating to learning to read in a second language or second dialect. Topics included are models for acquiring foreign language reading skills, teaching strategies for second language/dialect literacy, evaluating literacy skills, current research about acquisition of literacy skills, and political and social implications of second language/dialect literacy. The content addresses specifics about teaching reading for ELL/ CLD populations in classrooms. Opportunity is provided for candidates to become familiar with resources and data on school populations. The main goal of this course is to assist practicing or prospective teachers to learn how to promote development of crucial reading skills among ELL students. The course seeks to reexamine the pedagogical issues central to the 2L reading classroom, to be able to select suitable materials, to develop appropriate reading activities, to identify valid assessment measures, and to plan effective reading lessons suitable for instruction of ESL/CLD students.

CLD 506 - TESOL Writing

3 Credit(s)

This course introduces students interested in questions of language acquisition to the theories and practices of learning to write in a second language or second dialect. Topics included are 2L literacy development, writing theory, writing strategies, and 2L writers and rhetorical concerns. In addition, content examines teaching methodologies for second language/dialect literacy, assessment/evaluation of literacy skills, current research about acquisition of literacy skills, and political, cultural and social implications of ESL/ CLD literacy development. The main goal of this course is to assist practicing or prospective teachers to develop proficiency in promoting development of crucial 2L literacy/ writing skills among English Language Learners (ELLs). Content is responsive to the need to reexamine pedagogical issues central to the 2L writing classroom, and also be able to select suitable materials, to develop appropriate activities that address both second language literacy and content area knowledge, to identify valid assessment measures, to integrate technology into classrooms and to plan effective writing lessons suitable to the 2L classroom. Lastly, as part of the course content, we will seek to foster cultural sensitivity to the diverse student population becoming increasingly prevalent in classrooms in the U.S. We will also be concerned with providing the basic skills needed to satisfactorily assess the suitability of diverse 2LL methodologies & programs to meet the needs of limited English proficiency (LEP) students. An underlying assumption of the course is that learning is a social process that takes place within the broader social milieu of the learner's speech community. Accordingly, 2L learners bring into the classroom diverse language and cultural backgrounds, as well as a unique set of competencies, skills, sensitivities, goals, and needs. They may also bring with them different levels of L1 literacy skills. In order to provide for a successful learning environment, teachers must be able to identify and relate to the diversity inherent in today's student population and be able to take 'affirmative steps' towards addressing the needs of the students in their classrooms. Course content and activities will assist participants in developing a greater 'appreciation of democracy and diversity' in the classroom as we prepare for a global society as reflected in current theories of 2L development for academic purposes.

CLD 507 - TESOL Tests and Measurement

3 Credit(s)

This course examines language assessments in TESOL/ CLD. Course contents is intended to provide a practical and comprehensive overview of the different phases and activities involved in developing and implementing sound, rational, and effective language assessment instruments and activities. The course recognizes the relevance of context, purposiveness, and realistic discourse in testing. Specifically, the initial segment of the course will emphasize an integrated approach to educating English language learners (ELL) students, which encompasses social, cognitive, academic as well as linguistic dimensions and how to better assess the language instruction needs of ESL/CLD students. The course will focus on the practical applications of fundamental assessment principles, as well as development and evaluation of teacher-generated instruments for placement and diagnosis. Content discusses various

principles for guiding either practicing and prospective teachers through an assessment process mindful of standards-based instruction (e.g., dictation, cloze summary, oral interview, role-plays, portfolio assessment techniques) for teaching ESL/ CLD students at various levels.

CLD 508 - Bilingualism

3 Credit(s)

This course is a study of what it means to be a bilingual child or adult. It explores both the mind's role in bilingualism and in language acquisition as well as societal considerations. It surveys educational systems' response to language variance among students and explores the social, academic and language learning consequences of growing up bilingual. Content seeks to familiarize students with various aspects of bilingual education and language contact from a social-psychological perspective. It aims at providing for analysis and evaluation of current theory and research on bilingualism, as well as for examination of pertinent pedagogical implications/applications. First, we are interested in both social and individual factors related to bilingualism. That is, how and why bilingualism originates both as an individual and a societal phenomenon, and the social-psychological consequences of the same. Accordingly, we will consider topics such as: language attitudes, language and nation, bilingualism and inter-group relations, speech style and social evaluation. Second, we will also consider some important aspects of language contact such as: linguistic borrowing; code switching; language maintenance and language shift; English as a language of wider communication; language and context; diglossia; conversational interactions; language policy; language and culture. Third, we will also examine some significant aspects of the psychology of bilingualism. Specific topics to be covered are: cognitive and sociocultural consequences of bilingualism; neurolinguistic aspects of language acquisition and bilingualism; theoretical and research issues of bilingual education; performance of bilingual children on standardized tests; alternative approaches to testing and assessment of bilinguals; the teaching of English to non-native English speakers in the State of Colorado.

CLD 509 - TESOL Practicum/Capstone

3 Credit(s)

This course explores fundamental instructional considerations in TESOL by providing a school-based practical experience. This is an eight (8) week course under the direction of an experienced teacher/mentor and a university supervisor that provides classroom experience in an additional area of teaching certification for those who already hold certification in one area. Interns will observe teaching, participate in work with students (K-12), participate in planning sessions, teach and participate in all activities for which regularly employed teachers are responsible. This course is the culminating experience for the MA in Education with CLD Endorsement. A copy of the final summative teaching evaluation is placed in the candidate's file in the Teacher Education Department. All candidates are expected to demonstrate the basic skills relative to all teaching skills, such as lesson planning, unit planning, classroom management, effective instructional approaches, appropriate selection of materials, and knowledge of the teaching-learning process prior to being recommended for TESOL K-12 certification. Instruction should demonstrate alignment with the Colorado CLD Competencies. Candidates are required to teach at least six (6) lessons at an appropriate level (i.e., K-6, 7-12). As part of the evidence of competence to provide effective instruction in English as a Second Language/ CLD, class participants are required to generate a Professional Portfolio aligned with the Colorado CLD Competencies, aligned with the five TESOL/CAPE domain areas and to successfully pass a TESOL Portfolio Exit Interview.

CLD 579 - Special Topics in CLD

3 Credit(s)

This is a tutorial course that entails an examination of selected topics of education as they relate directly to first and second language learning, pedagogy, bilingualism, multicultural education and assessment. The course may focus on

different semesters on such topics as phonology and language learning, psycholinguistics and bilingualism, or teaching English in the content area classroom. This course may be repeated for credit once under different course subtitle. Prerequisite: consent of instructor. Course content is aligned with Colorado Culturally and Linguistically Diverse Competencies (CLD) and TESOL Teacher Preparation Standards. Students wishing to take a topics course must have a subject of study in mind which they wish to pursue; subjects or topics will not be furnished for them. Each student must have permission from the Chairman of the Teacher Education Department. Each student must design a program of study meeting the supervisory faculty member's approval. The CLD-579 - Topics in CLD or TESOL form must be filled out in triplicate (one for the student, one for the faculty member, one for the English Department Chairman) and approved prior to enrollment in CLD-579. Student enrollment without such approval will be cancelled. A student enrolled in CLD-579 will have one bi-weekly conference throughout the semester with the supervising faculty member (may take place via online).

Note

- Specific course content may vary based on instructor availability and topic demand.
- *15 Credits required for Post baccalaureate TESOL Certificate
- To add Endorsement Application, go to Colorado Department of Education's website, and complete "Application for an Added Endorsement Based on an Approved Program."

Master of Arts in Education, Curriculum and Instruction Emphasis

The goal of the five-semester Curriculum and Instruction emphasis is to develop strong planning and teaching skills in educators who are dedicated to ensuring all students, particularly students from diverse cultural and linguistic backgrounds, succeed academically.

Total credits: 30, including M.A. Academic Core of 9 credits

Academic Core Requirements for MA Candidates only

ED 507 - Integrated Instruction & Assessment

3 Credit(s)

This course supports candidates in aligning their beliefs and values to develop their teaching identity. Metacognitive processes will help candidates be aware of their own motives and empower them to actively participate in their own learning as they begin to develop their art of teaching. Candidates will design a sequence or unit of study following the Understanding by Design framework which includes digging deeper into formative and summative assessments and interpreting assessment data to teach responsively. Alternative methods of facilitating instruction and assessing student performance and understanding will be investigated and implemented to increase the candidate's understanding of their students' abilities, interests, and needs. Candidate's will also discover strategies for fostering successful community partnerships.

ED 534 - Multicultural Perspectives

3 Credit(s)

This course provides students with an overview of the role of cultural diversity in the classroom and its effect on teaching and learning. While exploring issues of race, class, culture, and power, students will develop a deeper

understanding of school demographics, perspectives on teaching and learning and the interaction between pedagogy and culture. Students will gain an understanding about the effects of different social, cultural, linguistic, and cognitive experiences on learner development, the impact this can have on their choices as teachers and leaders.

ED 557 - Research Methods

3 Credit(s)

Research methods is designed to provide candidates in the program with background knowledge of quantitative and qualitative research methods. The course will help candidates evaluate the appropriateness of each method when designing a research project. Candidates will develop mini- proposals for each type of research in preparation for implementing and reporting on their own research project.

Electives

ED 586 - Education Creation and Entrepreneurial Teachers

3 Credit(s)

The Educating Creative and Entrepreneurial Learners course will examine a variety of instructional strategies to foster engagement, understanding, and inquiry. This course will focus on student-directed and differentiated experiences to increase rigor and deepen learning.

ED 587 - Mentor Teacher Seminar I

3 Credit(s)

The Mentoring and Coaching Seminar I course is the co-requisite for ED 588 Mentoring and Coaching Internship I. This seminar course will support educators in developing their art of mentoring and coaching through intention, planning, practice, and reflection to actively engage in enhancing teaching practices and addressing systemic issues to aid in the transformation of schools.

Co-requisite(s): Admission to Mentor Endorsement Program and **ED 588**

ED 588 - Mentoring and Coaching Internship I

3 Credit(s)

The Mentoring and Coaching Internship I course is the co-requisite for ED 587 Mentor Seminar I. This internship will support educators in developing their art of mentoring and coaching through intention, planning, practice, and reflection to actively engage in enhancing teaching practices and addressing systemic issues to aid in the transformation of schools.

Grade Mode: P/F

Prerequisite(s):

Admission to Mentor Endorsement Program and **ED 587**

ED 590 - PLCs: Collaboration and Collective Responsibility

3 Credit(s)

Creating Collaborative Cultures and Collective Responsibility through Professional Learning Communities will challenge educators to alter long-held assumptions, beliefs, expectations, and habits. Candidates will examine the influences of beliefs and norms on classroom and school cultures. Additionally, candidates will explore how Professional Learning Communities can dramatically improve school performance, student engagement, and the self-efficacy of educators.

ED 591 - Capstone Project II

3 Credit(s)

In this Capstone II course educators will continue engaging in the action research process which involves collecting and analyzing data, reporting the results, and taking informed action. Educators will continue to reflect on and define their purpose for action research which may include building the reflective practitioner, making progress on school wide priorities, and building professional cultures. While planning and conducting action research, educators will respect the ethical obligations that educational researchers have and adhere to the codes and procedures involved.

ED 594 - Mentor Teacher Seminar II

3 Credit(s)

This internship will support educators in developing their art of mentoring and coaching through intention, planning, practice, and reflection to actively engage in enhancing teaching practices and addressing systemic issues to aid in the transformation of schools.

Prerequisite(s):

Admission to Mentor Endorsement Program and completion of ED 587

Co-requisite(s): ED 595

ED 595 - Mentoring and Coaching Internship II

3 Credit(s)

This internship will support educators in developing their art of mentoring and coaching through intention, planning, practice, and reflection to actively engage in enhancing teaching practices and addressing systemic issues to aid in the transformation of schools.

Grade Mode: P/F

Prerequisite(s):

Admission to Mentor Endorsement Program and completion of ED 588

Co-requisite(s): ED 594

ED 643 - Capstone I

3 Credit(s)

In this Capstone I course, educators will investigate the action research process which involves selecting a focus, identifying research questions, conducting a review of the literature, and generating a plan. Educators will reflect on and define their purpose for action research which may include building the reflective practitioner, making progress on school wide priorities, and building professional cultures. While planning and conducting action research, educators will recognize the ethical obligations that educational researchers have and adhere to the codes and procedures involved.

Additional Elective Requirements (9 Credits or equivalent)

Students will take or transfer in 9 semester hours of elective in an emphasis of their choice. Courses must be submitted to the Graduate Coordinator for approval.

Master of Arts in Education, Educational Leadership Program (Principal License)

The six-semester Educational Leadership program is designed to equip qualified and experienced educators with the knowledge and skills necessary to assume leadership positions in schools, particularly those of program supervisor/director or building principal/assistant principal. Studies include leadership; curriculum, instruction, and assessment; and school management, law and finance. The program emphasizes the role of a school leader as a collaborator and creator of a supportive and stimulating environment for children and teachers.

This course of study leads to a State of Colorado principal license.

Cognate Requirements

ED 503 - Understanding the Principalship

3 Credit(s)

This course is an introduction to the Principal Licensure program with assessment components, grounded in the Colorado's Principal Quality Standards, English Language Learner Standards, READ Act School Administrator Standards, and Standards for Educator Effectiveness. Candidates will be expected to critically examine each of Standards in terms of how they are implemented through policies and practices within their own districts while making recommendations for improving such policies based on current research and best practice.

Prerequisite(s):

Admission to principal licensure program

ED 505 - Inclusive and Responsive School Leadership

3 Credit(s)

This course will focus on how effective principals use inclusive and responsive leadership to promote equity among students, staff and the community. Candidates will draw upon research, theory and best-practice in diversity, equity and inclusion (DEI) to develop their skills in creating safe school environments that maximize support for student and staff well being and meaningful engagement with families and communities.

Prerequisite(s):

Admission to principal licensure program

ED 508 - School Law and Finance

3 Credit(s)

This course will provide an opportunity for administrative candidates to examine the ways in which legal and financial structures impact the operation of a school. Emphasis will be placed on legal obligations of school leaders and how these work in tandem with school funding processes to inform local policies, budgets, and administrative practices.

Prerequisite(s):

Admission to principal licensure program

ED 510 - Strategic and Ethical School Leadership

3 Credit(s)

This course will focus on how effective principals use strategic and ethical leadership to achieve strategic goals for students, educators, and themselves. Candidates will draw upon research, theory and best-practice to develop their skills in shared visioning, educator recruitment and hiring, educator retention and development, distributed leadership and leveraging strategic partnerships and resources sharing to achieve school and district goals.

Prerequisite(s):

Admission to principal licensure program

ED 515 - Principal Licensure Intern I

1 Credit(s)

During this 50 hour internship, field experience under the supervision of two building principals, one of which cannot be the building where the candidate is currently working or has worked, candidates will demonstrate competencies in the subject areas of Colorado Academic Standards, schools and society.*This course will also introduce administrative candidates to Action Research Project.*Students will pick a topic of educational interest or importance to be completed by the end of the endorsement*Students will be introduced to the IRB process and research procedures*Students will choose relevant educational topic(s)*Students will submit topic for approval (faculty and university)The principal internships will supplement the research and IRB process.

Prerequisite(s):

ED 503 Minimum Grade: B

ED 525 - Principal Licensure Intern II

1 Credit(s)

During this 50 hour internship, field experience under the supervision of two building principals (one of which cannot be in the building where the candidate is currently working or has worked) candidates will demonstrate competencies

in the subject areas of finance and school law. This course will also continue with administrative candidates Action Research Project.

Prerequisite(s):

ED 505 Minimum Grade: B

AND

ED 508 Minimum Grade: B

AND

ED 515 Minimum Grade: P

ED 528 - Instructional Leadership

3 Credit(s)

This course will prepare school leaders to assume roles as effective instructional leaders by implementing evidence-based practices in schoolwide management and improvement within a standards-based environment. Emphasis will be placed on managing curriculum and assessment in alignment with P-20 standards, supporting educator effectiveness through professional development and coaching, and supporting diverse students and families through tiered systems and responsive practices that honor diversity, equity and inclusion (DEI).

Prerequisite(s):

Admission to principal licensure program

ED 529 - Supervision and Evaluation of Instruction

3 Credit(s)

This course will prepare candidates for the supervision and evaluation of PK-12 educators to support effective instruction and enhance the academic achievement of PK-12 students. Candidates will gain an understanding best practices in observation, feedback, and using coaching modules to support educator reflection and growth. Candidates will also explore the role that potential bias can play in educator evaluation and develop skills for mitigating such bias within their practices as educational leaders.

Prerequisite(s):

Admission to principal licensure program

ED 535 - Principal Licensure Internship III

1 Credit(s)

During this 50 hour internship, field experience under the supervision of two building principals (one of which cannot be in the building where the candidate is currently working or has worked) candidates will demonstrate competencies in the subject areas of managing curriculum, instruction and assessment, supervision for improvement of instruction and building level assessment. Each area will include reflection papers and 50 hours of logged internship during the semester.

Prerequisite(s):

ED 525 Minimum Grade: B

ED 545 - Principal Licensure Internship IV

3 Credit(s)

During this 150 hour internship, field experience under the supervision of two building principals (one of which cannot be in the building where the candidate is currently working or has worked) candidates will demonstrate in a culminate final interview, competencies in the subject areas of schools and society, school law, fiscal management, personnel management, curriculum and instruction, assessment, supervision and building management. During this internship, candidates will write reflection papers, one on each topic and log 150 hours of internship during the semester. This course has the accumulation of the final/capstone presentation of the students Action Research Project.

Prerequisite(s):

ED 535 Minimum Grade: P

All candidates MUST successfully pass the Science of Reading exam administered in ED 545 Principal Internship IV to complete the program and be eligible for licensure

Academic Core Requirements for MA Candidates only

ED 507 - Integrated Instruction & Assessment

3 Credit(s)

This course supports candidates in aligning their beliefs and values to develop their teaching identity. Metacognitive processes will help candidates be aware of their own motives and empower them to actively participate in their own learning as they begin to develop their art of teaching. Candidates will design a sequence or unit of study following the Understanding by Design framework which includes digging deeper into formative and summative assessments and interpreting assessment data to teach responsively. Alternative methods of facilitating instruction and assessing student performance and understanding will be investigated and implemented to increase the candidate's understanding of their students' abilities, interests, and needs. Candidate's will also discover strategies for fostering successful community partnerships.

ED 534 - Multicultural Perspectives

3 Credit(s)

This course provides students with an overview of the role of cultural diversity in the classroom and its effect on teaching and learning. While exploring issues of race, class, culture, and power, students will develop a deeper understanding of school demographics, perspectives on teaching and learning and the interaction between pedagogy and culture. Students will gain an understanding about the effects of different social, cultural, linguistic, and cognitive experiences on learner development, the impact this can have on their choices as teachers and leaders.

ED 557 - Research Methods

3 Credit(s)

Research methods is designed to provide candidates in the program with background knowledge of quantitative and qualitative research methods. The course will help candidates evaluate the appropriateness of each method when designing a research project. Candidates will develop mini- proposals for each type of research in preparation for implementing and reporting on their own research project.

Master of Arts in Education, Post Baccalaureate Initial Teaching License - Elementary Education

Prerequisite to Professional Core

ED 501 - Perspectives in Teaching and Learning

3 Credit(s)

This course is a study of school, societal and cultural issues and their influences on teaching and learning. As an introductory course, the purpose is to learn about teaching as a career choice, the historical development of American education, social and political structures in the schools, and power groups influencing educational policy. Issues of educational reform will include civil rights, students' rights, ethnic, gender and racial issues, individualizing instructions, special education, learning theory models, (inclusive of diversity issues related to electronic media) and alternative school structures. Emphasis is placed on the orientation and development of a proficient and reflective professional educator.

ED 502 - The Exceptional Learner

3 Credit(s)

This course is designed to survey the foundations of special education, including historical, philosophical perspectives, legal issues and current trends in instruction and programming. Students will explore the role of general education as it relates to the education of the student with exceptional needs. Emphasis will be placed on developing knowledge of various disabling conditions, available resources and educational alternatives. Students will learn about the ethical and sociopolitical influences on prevention, intervention and educational programs for students with special needs, from birth through post-secondary ages. Learning characteristics and the diverse needs of students who receive special education services as well students who culturally and linguistically diverse will also be studied. From a pedagogically sound, as well as developmentally appropriate perspective, the similarities and differences within and between exceptionalities and typical development will be emphasized.

ED 547 - Teaching, Learning, and Technology

3 Credit(s)

This course is an introduction to the theories and applications of appropriate and effective uses of technology to achieve pedagogical goals. Content includes exploring emerging technologies, designing lessons aligned to the Colorado Essential Skills, integrating digital tools to strengthen teaching and improve student learning, identifying guidelines for designing and implementing online learning environments, comparing various theories of teaching and learning related to the design of virtual lessons/online programs, and describing effective instructional strategies for online learning. Using technology in K-12 classrooms is relevant to prepare students for success in post-secondary and workforce settings.

Prerequisite(s):

Teacher Education Background Check Passed

Pass Praxis II

Candidates are advised to take and pass all Praxis II exams prior to beginning the program and are required to take and pass all Praxis II exams prior to beginning the professional core.

Professional Core

ED 506 - Student Teaching-Elementary I

1 to 3 Credit(s)

This field experience is a required component of the post-baccalaureate teacher licensure program and provides candidates with a comprehensive experience in a public school setting. Candidates must complete all components outlined in the Student Teaching Handbook. A team of faculty supervisors and mentors will help the candidate acquire the necessary skills in the practice of building a community of learners while teaching and learning. The community of learners includes the student teacher, the cooperating mentor teacher, the university field supervisor, the building principal, and the classroom students. This student teaching experience requires a minimum of 640 hours of contact time over the course of an academic year.

Prerequisite(s):

Teacher Education Background Check Passed

ED 511 - STEM Methods

3 Credit(s)

This course provides a background on high leverage practices such as: explaining and modeling content, eliciting and interpreting, and diagnosing patterns of student thinking for STEM. The course will also include close examination of the P-6 Colorado Science and Mathematics Content Standards. This background prepares students to develop and implement STEM learning experiences for students at the elementary grade level. Emphasis is on the integration of STEM into the broader curriculum, especially literacy, and to instruction strategies that support success for all students, including linguistically and culturally diverse learners. Topics cover interpreting student work, checking student understanding, designing units, being precise with language in STEM content, and how to use inquiry.

Prerequisite(s):

Admission to Ed Prep Program and Clear fingerprint background check

ED 512 - Inclusive and Safe Classroom Management

3 Credit(s)

This course explores the foundational principles of effective classroom instruction, behavior evaluation, and management techniques while promoting a safe and healthy school environment. This course equips candidates with critical thinking skills to design and implement successful classroom management strategies, emphasizing student achievement through effective time management, communication, and record-keeping procedures. Candidates will also develop comprehensive management plans. Candidates will examine school law and professional ethics for educators. They will gain insights into the legal and ethical frameworks that guide their roles as educators, ensuring they are well-prepared to uphold the highest standards of professionalism and integrity. The content of this course addresses health and wellness topics, including conflict resolution, mediation, nutrition, emergency protocols, and first aid within the educational setting. Candidates will design and implement SEL curricula, considering diverse student needs and crisis prevention and intervention strategies. This course is essential for educators to create a safe, healthy, and inclusive learning environment.

NOTE:

- Licensure candidates will be required to wear photo identification as they participate in this field-experience.
- Photo IDs must be obtained PRIOR to the beginning of the field-experience component.
- Field-experience labs are off-campus and students are responsible for their own transportation.

Prerequisite(s):

Teacher Education Background Check Passed

Co-requisite(s): A pre-professional, supervised, field-based experience

ED 521 - Science of Reading

3 Credit(s)

This foundational course in reading explores literacy development and the structure of language by

1. defining the relationship between cognitive and linguistic development
2. assessing literacy development
3. nurturing the development of emergent literacy, and
4. investigating and planning instruction for the five components of reading which include phonemic awareness, phonics, fluency, vocabulary, and comprehension

Prerequisite(s):

Admission to Post Bacc Program and Clear Fingerprint Background Check

ED 522 - Pedagogical Strategies for Cultural Competence

3 Credit(s)

This is a dynamic and transformative course designed to equip future educators with the essential knowledge and skills to foster cultural competence in the classroom. Students will engage in learning that enhances their ability to use data to better understand and respond to diversity in their respective schools and communities. They will critically examine the impact of cultural values and bias on school curriculum and teacher practice, while applying strategies aimed at creating more culturally responsive experiences for diverse children. Students will also deepen their understanding and practice in working with vulnerable students and families, including those facing abuse, trauma, generational poverty and other forms of crisis.

NOTE: A pre-professional, supervised, field-based experience is a course requirement. Licensure candidates will be required to wear photo identification as they participate in this field experience. Photo IDs must be obtained PRIOR to the beginning of the field experience component. Field experience labs are off-campus and students are responsible for their own transportation.

Prerequisite(s):

Admission to Post Bacc Program and Clear fingerprint/background check

ED 560 - Educational Psychology

3 Credit(s)

This course supports teachers in developing practical and effective approaches to various forms of student assessment. Students will make distinctions between formative and summative assessments. Pre-service teachers will learn various approaches to gathering student and teacher feedback to facilitate students learning and guide instruction. The course

will explore grading systems that are consistent, reliable, and valid. This course has field lab hours, which are off-campus; students are responsible for their own transportation.

ED 561 - The Reading and Writing Connection

3 Credit(s)

This course delves into the art of effective teaching methods in the realms of reading and writing, highlighting the intricate link between these subjects. Furthermore, it addresses the reality that some students encounter difficulties in these areas. The course equips learners with the skills to employ a diverse range of assessments, encompassing both formal and informal approaches, to gauge a student's strengths and areas needing improvement. It will also elucidate the significance of employing various assessment methods and their impact on enhancing instruction and elevating student achievement. This course will involve lectures, discussions, and videos in a hybrid, online, or face-to-face model along with practice in the classroom. Students will complete associated hours of supervised field-based experiences (20 hours for undergraduate students) to observe and interact directly in educational environments. Field service hours are required for licensure. Documentation of verified hours will be collected as part of the undergraduate course. Students will be responsible for their own transportation to the field sites.

NOTE:

- A 20-hour, pre-professional, supervised, field-based experience is a course requirement.
- Licensure candidates will be required to wear photo identification as they participate in this field experience.
- Photo IDs must be obtained PRIOR to the beginning of the field-experience component.
- Field-experience labs are off-campus and students are responsible for their own transportation.

Prerequisite(s):

Admission to Post bacc Program and Clear fingerprint/background check

Student Teaching

ED 520 - Student Teaching-Elementary II

3 Credit(s)

This field experience is a required component of the post-baccalaureate teacher licensure program and provides candidates with a comprehensive experience in a public school setting. Candidates must complete all components outlined in the Student Teaching Handbook. A team of faculty supervisors and mentors will help the candidate acquire the necessary skills in the practice of building a community of learners while teaching and learning. The community of learners includes the student teacher, the cooperating mentor teacher, the university field supervisor, the building principal, and the classroom students. This student teaching experience requires a minimum of 640 hours of contact time over the course of an academic year.

Prerequisite(s):

Teacher Education Background Check Passed

Academic Core Requirements for MA Candidates only

ED 507 - Integrated Instruction & Assessment

3 Credit(s)

This course supports candidates in aligning their beliefs and values to develop their teaching identity. Metacognitive processes will help candidates be aware of their own motives and empower them to actively participate in their own learning as they begin to develop their art of teaching. Candidates will design a sequence or unit of study following the Understanding by Design framework which includes digging deeper into formative and summative assessments and interpreting assessment data to teach responsively. Alternative methods of facilitating instruction and assessing student performance and understanding will be investigated and implemented to increase the candidate's understanding of their students' abilities, interests, and needs. Candidate's will also discover strategies for fostering successful community partnerships.

ED 534 - Multicultural Perspectives

3 Credit(s)

This course provides students with an overview of the role of cultural diversity in the classroom and its effect on teaching and learning. While exploring issues of race, class, culture, and power, students will develop a deeper understanding of school demographics, perspectives on teaching and learning and the interaction between pedagogy and culture. Students will gain an understanding about the effects of different social, cultural, linguistic, and cognitive experiences on learner development, the impact this can have on their choices as teachers and leaders.

ED 557 - Research Methods

3 Credit(s)

Research methods is designed to provide candidates in the program with background knowledge of quantitative and qualitative research methods. The course will help candidates evaluate the appropriateness of each method when designing a research project. Candidates will develop mini- proposals for each type of research in preparation for implementing and reporting on their own research project.

Note for Candidates

Candidates may request transfer of up to 6 semester hours upon being admitted to the program. Candidates requesting transfer or substitution of prior coursework must declare so within the first semester of study.

Master of Arts in Education, Post Baccalaureate Initial Teaching Licensure - Secondary Education/K-12

Prerequisite to Professional Core

ED 501 - Perspectives in Teaching and Learning

3 Credit(s)

This course is a study of school, societal and cultural issues and their influences on teaching and learning. As an introductory course, the purpose is to learn about teaching as a career choice, the historical development of American education, social and political structures in the schools, and power groups influencing educational policy. Issues of educational reform will include civil rights, students' rights, ethnic, gender and racial issues, individualizing instructions, special education, learning theory models, (inclusive of diversity issues related to electronic media) and

alternative school structures. Emphasis is placed on the orientation and development of a proficient and reflective professional educator.

ED 502 - The Exceptional Learner

3 Credit(s)

This course is designed to survey the foundations of special education, including historical, philosophical perspectives, legal issues and current trends in instruction and programming. Students will explore the role of general education as it relates to the education of the student with exceptional needs. Emphasis will be placed on developing knowledge of various disabling conditions, available resources and educational alternatives. Students will learn about the ethical and sociopolitical influences on prevention, intervention and educational programs for students with special needs, from birth through post-secondary ages. Learning characteristics and the diverse needs of students who receive special education services as well students who culturally and linguistically diverse will also be studied. From a pedagogically sound, as well as developmentally appropriate perspective, the similarities and differences within and between exceptionalities and typical development will be emphasized.

ED 512 - Inclusive and Safe Classroom Management

3 Credit(s)

This course explores the foundational principles of effective classroom instruction, behavior evaluation, and management techniques while promoting a safe and healthy school environment. This course equips candidates with critical thinking skills to design and implement successful classroom management strategies, emphasizing student achievement through effective time management, communication, and record-keeping procedures. Candidates will also develop comprehensive management plans. Candidates will examine school law and professional ethics for educators. They will gain insights into the legal and ethical frameworks that guide their roles as educators, ensuring they are well-prepared to uphold the highest standards of professionalism and integrity. The content of this course addresses health and wellness topics, including conflict resolution, mediation, nutrition, emergency protocols, and first aid within the educational setting. Candidates will design and implement SEL curricula, considering diverse student needs and crisis prevention and intervention strategies. This course is essential for educators to create a safe, healthy, and inclusive learning environment.

NOTE:

- Licensure candidates will be required to wear photo identification as they participate in this field-experience.
- Photo IDs must be obtained PRIOR to the beginning of the field-experience component.
- Field-experience labs are off-campus and students are responsible for their own transportation.

Prerequisite(s):

Teacher Education Background Check Passed

Co-requisite(s): A pre-professional, supervised, field-based experience

ED 547 - Teaching, Learning, and Technology

3 Credit(s)

This course is an introduction to the theories and applications of appropriate and effective uses of technology to achieve pedagogical goals. Content includes exploring emerging technologies, designing lessons aligned to the Colorado Essential Skills, integrating digital tools to strengthen teaching and improve student learning, identifying guidelines for designing and implementing online learning environments, comparing various theories of teaching and learning related

to the design of virtual lessons/online programs, and describing effective instructional strategies for online learning. Using technology in K-12 classrooms is relevant to prepare students for success in post-secondary and workforce settings.

Prerequisite(s):

Teacher Education Background Check Passed

ED 563 - Content Area Literacy - Secondary

3 Credit(s)

This is a graduate level course that covers approaches and strategies for teaching secondary reading in various subject areas. Topics include textbook selection and readability, comprehension skills, study skills, and meeting needs of diverse student populations.

Content Methods

Methods courses will vary by licensure area and can be taken during either semester of the first year, depending on course offerings and availability

ED 504 - Secondary Teaching and Learning Methods

3 Credit(s)

Students will examine constructivist theory and mindset specific to instructional methods or a selected content area. This class will provide opportunities for observing, standards-based lesson and unit planning, teaching lessons, and assessment for understanding in support of the student's field experience. This will include working with students individually, in small groups, and with the whole classroom.

Prerequisite(s):

Teacher Education Background Check-minimum score 1, Admission to Graduate Study in Teacher Education.

ED 567 - Methods of Teaching Math - Secondary

3 Credit(s)

This course is designed to support the beginning secondary math teacher. Presuming a solid foundation of conceptual knowledge in the content area, the course emphasizes the development of a framework of instructional knowledge and skills to provide successful learning for all students. Students must take at least 24 semester hours of credit in math.

ED 568 - Methods of Teaching Science-Secondary

3 Credit(s)

This course provides a background in constructivist, inquiry-based science instruction for middle school and high school students that corresponds to the P-12 CO Science Education Standards. Pre-service students will gain expertise in planning standards-based science instruction, science teaching strategies and assessment bringing coherence to the activities of science teaching and learning. Utilizing materials, resources and technology that support secondary science education, pre-service teachers will learn to integrate inquiry-based, project and problem-based teaching models and collaborative strategies into long-term and daily secondary instructional plans. Emphasis is on the integration of science

into the broader curriculum, especially literacy, and to instruction strategies that support success for all students, including linguistically and culturally diverse learners.

Student Teaching I

ED 577 - Student Teaching Secondary I

1 to 3 Credit(s)

This field experience is a required component of the post-baccalaureate teacher licensure program and provides candidates with a comprehensive experience in a public school setting. Candidates must complete all components outlined in the Student Teaching Handbook. A team of faculty supervisors and mentors will help the candidate acquire the necessary skills in the practice of building a community of learners while teaching and learning. The community of learners includes the student teacher, the cooperating mentor teacher, the university field supervisor, the building principal, and the classroom students. This student teaching experience requires a minimum of 640 hours of contact time over the course of an academic year.

Prerequisite(s):

Admission to the Educator Preparation Program

Pass Praxis II

Candidates are advised to take and pass all Praxis II exams prior to beginning the program and are required to take and pass all Praxis II exams prior to beginning the professional core.

Professional Core

ED 522 - Pedagogical Strategies for Cultural Competence

3 Credit(s)

This is a dynamic and transformative course designed to equip future educators with the essential knowledge and skills to foster cultural competence in the classroom. Students will engage in learning that enhances their ability to use data to better understand and respond to diversity in their respective schools and communities. They will critically examine the impact of cultural values and bias on school curriculum and teacher practice, while applying strategies aimed at creating more culturally responsive experiences for diverse children. Students will also deepen their understanding and practice in working with vulnerable students and families, including those facing abuse, trauma, generational poverty and other forms of crisis.

NOTE: A pre-professional, supervised, field-based experience is a course requirement. Licensure candidates will be required to wear photo identification as they participate in this field experience. Photo IDs must be obtained PRIOR to the beginning of the field experience component. Field experience labs are off-campus and students are responsible for their own transportation.

Prerequisite(s):

Admission to Post Bacc Program and Clear fingerprint/background check

ED 560 - Educational Psychology

3 Credit(s)

This course supports teachers in developing practical and effective approaches to various forms of student assessment. Students will make distinctions between formative and summative assessments. Pre-service teachers will learn various approaches to gathering student and teacher feedback to facilitate students learning and guide instruction. The course will explore grading systems that are consistent, reliable, and valid. This course has field lab hours, which are off-campus; students are responsible for their own transportation.

Student Teaching II

ED 578 - Student Teaching Secondary II

3 Credit(s)

This field experience is a required component of the post-baccalaureate teacher licensure program and provides candidates with a comprehensive experience in a public school setting. Candidates must complete all components outlined in the Student Teaching Handbook. A team of faculty supervisors and mentors will help the candidate acquire the necessary skills in the practice of building a community of learners while teaching and learning. The community of learners includes the student teacher, the cooperating mentor teacher, the university field supervisor, the building principal, and the classroom students. This student teaching experience requires a minimum of 640 hours of contact time over the course of an academic year.

Academic Core Requirements for MA Candidates only

ED 507 - Integrated Instruction & Assessment

3 Credit(s)

This course supports candidates in aligning their beliefs and values to develop their teaching identity. Metacognitive processes will help candidates be aware of their own motives and empower them to actively participate in their own learning as they begin to develop their art of teaching. Candidates will design a sequence or unit of study following the Understanding by Design framework which includes digging deeper into formative and summative assessments and interpreting assessment data to teach responsively. Alternative methods of facilitating instruction and assessing student performance and understanding will be investigated and implemented to increase the candidate's understanding of their students' abilities, interests, and needs. Candidate's will also discover strategies for fostering successful community partnerships.

ED 534 - Multicultural Perspectives

3 Credit(s)

This course provides students with an overview of the role of cultural diversity in the classroom and its effect on teaching and learning. While exploring issues of race, class, culture, and power, students will develop a deeper understanding of school demographics, perspectives on teaching and learning and the interaction between pedagogy and culture. Students will gain an understanding about the effects of different social, cultural, linguistic, and cognitive experiences on learner development, the impact this can have on their choices as teachers and leaders.

ED 557 - Research Methods

3 Credit(s)

Research methods is designed to provide candidates in the program with background knowledge of quantitative and qualitative research methods. The course will help candidates evaluate the appropriateness of each method when designing a research project. Candidates will develop mini- proposals for each type of research in preparation for implementing and reporting on their own research project.

Note for Candidates

Candidates may request transfer of up to 6 semester hours upon being admitted to the program. Candidates requesting transfer or substitution of prior coursework must declare so within the first semester of study.

Master of Arts in Education, SPED Generalist Initial License

Go to: Educational Preparation

Academic Core Requirements for MA Candidates only

ED 507 - Integrated Instruction & Assessment

3 Credit(s)

This course supports candidates in aligning their beliefs and values to develop their teaching identity. Metacognitive processes will help candidates be aware of their own motives and empower them to actively participate in their own learning as they begin to develop their art of teaching. Candidates will design a sequence or unit of study following the Understanding by Design framework which includes digging deeper into formative and summative assessments and interpreting assessment data to teach responsively. Alternative methods of facilitating instruction and assessing student performance and understanding will be investigated and implemented to increase the candidate's understanding of their students' abilities, interests, and needs. Candidate's will also discover strategies for fostering successful community partnerships.

ED 534 - Multicultural Perspectives

3 Credit(s)

This course provides students with an overview of the role of cultural diversity in the classroom and its effect on teaching and learning. While exploring issues of race, class, culture, and power, students will develop a deeper understanding of school demographics, perspectives on teaching and learning and the interaction between pedagogy and culture. Students will gain an understanding about the effects of different social, cultural, linguistic, and cognitive experiences on learner development, the impact this can have on their choices as teachers and leaders.

ED 557 - Research Methods

3 Credit(s)

Research methods is designed to provide candidates in the program with background knowledge of quantitative and qualitative research methods. The course will help candidates evaluate the appropriateness of each method when designing a research project. Candidates will develop mini- proposals for each type of research in preparation for implementing and reporting on their own research project.

Required Courses for Licensure

SPED 531 - SPED for Culturally Linguistically Diverse (CLD) Students

3 Credit(s)

This course focuses on issues and trends related to the assessment, instruction and planning requirements for culturally linguistically diverse learners with exceptional needs. Emphasis will feature the overrepresentation and underrepresentation of culturally diverse students in special education and gifted education programs. It will also explore language, literacy and cultural variables that influence instruction and assessment practices for students with disabilities who come from culturally and linguistically diverse backgrounds.

SPED 534 - Domains of Learning

3 Credit(s)

This course will survey learning theories relevant to the following domains: Cognitive (e.g. brain-based learning), Cognition & literacy, affective, social, behavior/psycho-motor, cultural and communicative. Learning styles and problem-solving processes will also be addressed in the course. The application of theoretical frameworks for domains to enhance student learning outcomes and literacy skills (phonics, phonemic awareness, vocabulary, fluency, and comprehension) will be required.

SPED 535 - Identification, Teaching SPED

3 Credit(s)

This course is designed to provide students with knowledge of the areas of exceptionalities needed in the special education planning process. The course will include skills necessary in the multidisciplinary process for identifying students strengths/needs in order to develop and implement Individualized Education and Transition Plans in collaboration with other special education and regular education professionals. Alternative teaching methods and approaches to instructional materials to ensure student (including students who are English language Learners and CLD) success and achievement will be the focus of the course. Candidate will explore intensive intervention programs and structure based on progress monitoring data to improve instruction for students with intensive learning needs who are not responding to the standard protocol at Tier 1 and Tier 2 of MTSS

SPED 540 - Assessment in Special Education

3 Credit(s)

This course is an introduction to assessments and measurements in an educational setting. Students will develop skills for the systematic process of gathering, interpreting, and organizing educationally relevant information based on laws, policies and legal provisions. Emphasis is placed on effective assessment principles and procedures developing both theoretical and practical knowledge for assessment-based, instructional decision making about the provision of special services to exceptional students and students from cultural and linguistically diverse backgrounds. A focus will be on collaboration with stakeholders to interpret and apply assessment results for the determination of eligibility for special education services. Valid assessment methods/types will be utilized in order to limit the misidentification of CLD and CLDE students. The use of technology, including assistive technology, with all students, including those students with special learning and communication needs will also be explored. A range of technologies will be examined, from low-tech devices such as simple switches to computers, adaptive devices, and software appropriate for students with disabilities. Basic standard setting, grading, testing ethics, locating and evaluating measures, program evaluation,

development of foundational skills for assessing literacy development for students with disabilities served in general education setting and classroom research will also be presented.

SPED 542 - Special Education Law

3 Credit(s)

The principles of IDEA and implications for educational programming and instruction will be presented. Section 504 requirements and implications for special and regular education will be presented. Special attention to the educational needs of culturally and linguistically diverse special needs students will be addressed.

SPED 558 - Student Teaching in SPED

3 Credit(s)

The course addresses student teacher state required field experience hours to be completed in a secondary school setting with a focus on transition planning. The experience provided during student teaching will involve placement in a total inclusion setting. This practice experience helps candidates acquire necessary skills to build a community of learners in a secondary setting. The student teaching experience requires a minimum of 120 hours in a secondary setting (inclusion in content areas where applicable). Through a combination of classroom experiences and lab hours, the students will be able to address the significant support needs of exceptional learners including English language learners and students with disabilities who come from culturally and linguistically diverse backgrounds. The instructional team shall be composed of the secondary special education students, student teacher, cooperating teacher, college supervisor, and the building administrator.

Note

- All students are required to declare during admission whether they are in licensure-only or Special Education Generalist Master's Program. Once you declare that you are in licensure-only program and begin, you cannot change it in the middle of the program.
- All students must take and pass the PRAXIS in approved elementary education content exam, SPED Generalist exam and Teaching Reading exam.

Master of Arts in Leadership Education Administration and Development (LEAD) with Emphasis in Higher Education Administration and Leadership (HEAL)

Go to: Educational Leadership

This program prepares higher education professionals to manage and lead in institutions of higher education, especially Hispanic Serving Institutions (HSIs), and to enhance the success of the students they serve.

Degree Requirements (36 credits)

Complete the following 3 Certificates

- Data Analytics and Decision-Making Certificate (9 credits)

- Educational Policy in LEAD Certificate (12 credits)
- Leadership Certificate (12 credits)

Plus the Higher Education Capstone

LEAD 598 - Capstone/Portfolio in Higher Education

3 Credit(s)

Program coherence and student learning are demonstrated through a public exhibition and faculty assessment of a Capstone course. The Capstone is required for graduation with a masters degree. This course is designed to document what students have learned about higher education as a field of study and practice. Through the completion of case studies, two Star papers (scholarly-professional), and a reflective presentation, students will present evidence of how their learning aligns with the program goals of the curriculum. Capstone serves as a formative and summative evaluation of student learning.

Master of Arts in Leadership Education Administration and Development (LEAD) with Emphasis in Superintendent Licensure

Go to: Educational Leadership

Degree Requirements (36 credits)

Complete the following 3 Certificates

- Educational Policy in LEAD Certificate (12 credits)
- Leadership Certificate (12 credits)
- Superintendent Licensure Certificate (9 credits)

Plus a Data Analysis Course

LEAD 560 - Data Analysis in Higher Education

3 Credit(s)

This course introduces the concepts and skills involved in understanding and analyzing research in a variety of areas in higher education. The course provides an overview of basic, general knowledge of various research methodologies. It emphasizes the conceptual underpinnings of statistical analysis of data, including univariate and bivariate descriptive statistics, sampling distributions, statistical estimation, hypothesis testing and procedures in testing statistical hypothesis for one and two sample designs. This course also enhances students' abilities to locate, read, comprehend, and critically analyze research articles and reports.

Master of Arts in Music Education

Go to: Music

The Master of Arts in Music Education degree furthers Adams State University's mission by providing educational opportunities for K-12 teachers to earn a master's degree in music education at a reasonable cost. The Music Education master's program furthers students' musical and professional growth, enhances the success of the students they serve, and provides graduate coursework necessary for additional salary credit. The degree offers two tracks, using the cohort model. For the first track, all courses are delivered online. The second track is a combined online/on-campus program. Students in this track enroll in the same online core and supporting courses as the first track. Students in the second track choose an area of concentration in performance, composition, or conducting, in lieu of electives. These courses are delivered face-to-face and require a two semester residency in addition to the summer residency at the beginning of the degree program.

Admission Requirements

Degree Requirements

- Minimum degree requirements are 30 hours.
- Students must maintain a cumulative GPA of at least 3.0 throughout the degree.

All candidates for a master's degree in music education must meet graduation requirements as set forth in the Adams State University Academic Catalog.

Music Education Online Track

Course Requirements (minimum 30 credits)

Required Core

MUED 565 - Introduction to Music Ed Research

3 Credit(s)

This course serves as an introduction to research methodologies used in music and music education. It provides a broad foundation in research design, including quantitative, qualitative, historical, philosophical and non-experimental models. In addition, students familiarize themselves with basic statistical concepts, the library, and standard reference tools and electronic resources for the purpose of research.

MUED 567 - Music Ed History and Philosophy

3 Credit(s)

This course will address the historical and philosophical foundations of music education in the United States, with a focus on aesthetics and the role of the arts in education. Students will formulate a personal philosophy of music education to guide choices in curriculum, teaching, and assessment.

MUED 568 - Sociology and Psychology of Music Education

3 Credit(s)

This course will address the sociological and psychological foundations of music education in the United States focusing on relationships to current trends and best practices.

MUED 596 - Music Education Curriculum Project

3 Credit(s)

This course will address the curriculum and assessment in music education culminating in a curriculum project to be put into practice in the classroom.

Supportive Studies

MUED 503 - Analytical Techniques

3 Credit(s)

This course will examine the principle forms and structural elements of music from the Renaissance through the twentieth century. This course will introduce students to a variety of approaches and philosophies of musical analysis, accomplished through listening and analysis of musical repertoire.

MUED 504 - Orchestration and Arranging

3 Credit(s)

This course will provide instruction in music orchestration and arranging techniques pertinent to music educators. Students will apply these techniques to arrangements for voice and contemporary band/orchestral instruments and ensembles.

MUED 534 - Music Literature and Pedagogy

3 Credit(s)

A study of choral and instrumental literature, pedagogical techniques, and rehearsal techniques appropriate for school ensembles. The course explores resource materials, pedagogical practice, and effective teaching strategies.

Additional Supportive Studies

MUED 521 - World Music and Culture

3 Credit(s)

This course will provide the conceptual foundations necessary to explore and integrate music from around the world into the K-12 music curriculum. Through case study, critical writing, audio and video example, and individual research, students will investigate, experience, and synthesize the importance of music as it relates to different cultures, customs, religions, and history. Students will learn how music is correlated to everyday activities in a variety of societies.

MUED 523 - Topics in Jazz and Rock

3 Credit(s)

This course will examine the development and principle styles in jazz and rock music in the 20th and 21st centuries. The course will look at the important developments in both styles through musical, historical, and cultural lenses. The goal of this course is to go beyond a broad overview of these styles, with students doing in-depth listening to seminal albums in both jazz and rock.

MUED 533 - American Music History

3 Credit(s)

This course is designed as a survey of the development of music in the current United States, from the Spanish colonization in the 16th century to present times. Topics addressed will include the various musical styles and genres, composers of the period and their compositions. Emphasis will be placed on developing a thorough knowledge of music literature of the time, being able to place this music in its proper historical and cultural context, as well as being able to incorporate it into the K-12 curriculum.

Music Education Online/On-campus Track with Concentrations In

MUED 534 - Music Literature and Pedagogy

3 Credit(s)

A study of choral and instrumental literature, pedagogical techniques, and rehearsal techniques appropriate for school ensembles. The course explores resource materials, pedagogical practice, and effective teaching strategies.

Area of Concentration

MUED 540 - Applied Lessons

2 Credit(s)

This course is required for the combined online/on-campus track of the Master of Arts in Music Education.

MUED 541 - Applied Lessons

2 Credit(s)

This course is required for the combined online/on-campus track of the Master of Arts in Music Education.

MUED 595 - Graduate Recital

1 Credit(s)

Preparation and presentation of a public recital of approximately 60 minutes of prepared music.

Co-requisite(s): MUED 541

Small Ensemble

(2 credits total-courses may be repeated)

MUED 546 - Jazz Ensemble

1 Credit(s)

An advanced instrumental jazz ensemble, open by audition. Repertoire is selected from a variety of jazz styles and periods.

OR

MUED 548 - Jazz Singers

1 Credit(s)

An advanced vocal jazz ensemble, open by audition to students who will be expected to perform a significant leadership role in the ensemble. Repertoire is selected from a variety of jazz and popular styles and periods.

OR

MUED 549 - Chamber Ensemble

1 Credit(s)

Selected groups including instrumental, vocal, and mixed ensembles for performance of music in specific periods and mediums.

OR

Large Ensemble

(2 credits total-courses may be repeated)

MUED 545 - Band

1 Credit(s)

Open to all students regardless of major field who demonstrate sufficient ability on a standard wind or percussion instrument.

OR

MUED 547 - Concert Choir

1 Credit(s)

Open to all qualified students with repertoire selected from standard and contemporary choral concert literature as well as music of other cultures, ethnicities and traditions.

OR

MUED 550 - Orchestra

1 Credit(s)

Open to all students, regardless of major field, who demonstrate sufficient ability on a standard orchestral instrument.

Note:

An on-campus residency during the first two semesters of the program is required for completion of courses in the concentration area. Please contact Dr. Matthew Schildt (mschildt@adams.edu) with any questions.

Master of Arts in Public Administration

Go to: Business

This is a fully online 36 credit master's degree offered with the option of either two tracks: Applied Public Administration or General Public Administration.

The program is designed for professionals who are already working in the public and non-profit sectors or pre-professionals who want to start a career in public service. The program mixes skills-based coursework with real practical experience working in public agencies. It will prepare its graduates to work in positions in the federal, state, and local government as well as non-profit organizations.

The degree is delivered through semester based, interactive, online courses. The program, which can be completed in 2 years, is designed for students who are also working full-time. This MA degree can lead to career advancement for public servants who want to move into management positions. It will also provide the skill development necessary for public managers to do their jobs more effectively.

Program Goals

- Provide a high quality, low cost, master's degree focusing on public administration.
- Provide students with maximum flexibility through use of fully online delivery.
- Employ a curriculum that mixes skills based course work with real practical experiences.
- Prepare pre-professional students with the skills to enter the public service.
- Provide professionals already working in public administration with the skills to advance their careers.

Track 1: Applied Public Administration

Required Core

MPA 500 - Introduction to Public Administration

3 Credit(s)

An introductory survey to the field of public administration, especially historical, political, and organizational approaches to ethical and reflective professional practice.

MPA 503 - Applied Research Methods in Public Administration

3 Credit(s)

This course provides an introduction to the major research methods used in public administration. The goal of the course is to acquaint students with the basic approaches, concepts, and tools of research with a focus on their application in public and non-profit settings.

MPA 510 - Practicum

1 Credit(s)

This course provides students with actual experiences, through projects and practical activities, in the practice of public administration in a professional setting. Students will work with practicing administrators in public/non-profit agencies under the direction of a workplace supervisor. This practicum will require students to work at least 50 hours and demonstrate an ability to apply the concepts and skills learned in the classwork to a professional setting through artifacts tied to MPA 503 and MPA 508.

MPA 516 - Practicum II

1 Credit(s)

This course provides students with actual experiences, through projects and practical activities, in the practice of fiscal project, and/or human resources management in a professional setting. Students will work with practicing administrators in public/non-profit agencies under the direction of a workplace supervisor. This practicum will require students to work at least 50 hours and demonstrate an ability to apply the concepts and skills learned in the classwork to a professional setting through artifacts tied to MPA 512 and MPA 514.

MPA 520 - Practicum III

3 Credit(s)

This course provides students with actual experiences, through projects and practical activities, in the assessment of public policies and procedures in a professional setting. Students will work with practicing administrators in public/non-profit agencies under the direction of a workplace supervisor. This practicum will require students to work at least 150 hours and demonstrate an ability to apply the concepts and skills learned in the classwork to a professional setting.

MPA 528 - Practicum IV

1 Credit(s)

This course provides students with actual experiences, through projects and practical activities, in a professional setting. The practicum will focus on elements of community planning and economic development. Students will work with practicing administrators in public/non-profit agencies under the direction of a workplace supervisor. The

practicum will require students to work at least 50 hours and demonstrate an ability to apply the concepts and skills learned in the classwork to a professional setting through artifacts ties to MPA 524 and 526.

MPA 530 - Public Policy Analysis

3 Credit(s)

This course examines the multiple ways in which public policy is made in the U.S. including the various processes of policy making and the actors and institutions involved in overseeing those processes. It also examines a number of the pressing policy issues facing the nation today as well as some of the solutions that have been tried or proposed.

MPA 533 - Organizational and Community Behavior

3 Credit(s)

Examines the organizational and community context in which public manager must operate. Including a focus on why people behave the way they do in organizations and what can be done to change those behaviors. This includes the most effective communications strategies used in dealing with community groups, advisory boards and councils. The course will review a wide range of situations and examples of human behavior and connect them in foundational theories and effective practical management methods.

MPA 550 - Public Administration Capstone

3 Credit(s)

The Capstone Course offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MPA and MBA-PA programs. This involves completing a portfolio project reflecting the cumulative knowledge gained from these experiences.

Prerequisite(s):

Admission to MPA or MBA program

Elective Coursework - 15 Credits from MPA or MBA program

Track 2: General Public Administration

Required Core

MPA 500 - Introduction to Public Administration

3 Credit(s)

An introductory survey to the field of public administration, especially historical, political, and organizational approaches to ethical and reflective professional practice.

MPA 503 - Applied Research Methods in Public Administration

3 Credit(s)

This course provides an introduction to the major research methods used in public administration. The goal of the course is to acquaint students with the basic approaches, concepts, and tools of research with a focus on their application in public and non-profit settings.

MPA 530 - Public Policy Analysis

3 Credit(s)

This course examines the multiple ways in which public policy is made in the U.S. including the various processes of policy making and the actors and institutions involved in overseeing those processes. It also examines a number of the pressing policy issues facing the nation today as well as some of the solutions that have been tried or proposed.

MPA 533 - Organizational and Community Behavior

3 Credit(s)

Examines the organizational and community context in which public manager must operate. Including a focus on why people behave the way they do in organizations and what can be done to change those behaviors. This includes the most effective communications strategies used in dealing with community groups, advisory boards and councils. The course will review a wide range of situations and examples of human behavior and connect them in foundational theories and effective practical management methods.

MPA 550 - Public Administration Capstone

3 Credit(s)

The Capstone Course offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MPA and MBA-PA programs. This involves completing a portfolio project reflecting the cumulative knowledge gained from these experiences.

Prerequisite(s):

Admission to MPA or MBA program

Elective Coursework - 21 Credits from MPA or MBA program

Master of Arts in United States History

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

The History, Anthropology, Philosophy, Political Science, Spanish (HAPPSS) Department offers a Master of Arts in United States History. The goals of the United States history program are to satisfy students' desires for additional directed study of United States history, to assist teachers in meeting highly qualified status under NCLB, and to provide access for students to earn an M.A. degree before going on to doctoral studies. All professors in this program hold Ph.D.s and are committed to developing and encouraging students to achieve their academic potential. The degree is delivered using a mixture of face-to-face and Internet courses.

Degree Requirements

Required Core

HIST 500 - Historiography and Historical Methods

3 Credit(s)

A historiographical seminar in which students learn and demonstrate a mastery of a variety of methods historians use to understand the past.

HIST 591 - Thesis

3 Credit(s)

This course is the culminating experience for the MA program in which students demonstrate mastery of the discipline by producing an acceptable Master's Thesis. Successful completion of 21 hours of graduate-level work in History.

Context and Content

24 credit hours from the following menu selected in consultation with department chair.

HIST 501 - State History

3 Credit(s)

A graduate-level survey of the history of a particular state, with emphasis on how meta and national phenomenon impacted a given state, as well as events and phenomena unique to the state.

HIST 505 - American West

3 Credit(s)

This course is a survey of the American West with an emphasis on interpretation by historians. Admission to the Master of Arts program is required.

HIST 507 - Latino History

3 Credit(s)

This course will give special attention to the loss of land in the late nineteenth century, community formation during the early twentieth century, and the Chicano Movement of the late 1960's and early 1970's. At a deeper level, this course

explores both the strengths and weaknesses in the relevant historiography and fundamental questions about the practice of history and the forces that form and serve as custodians of memory.

HIST 510 - Teaching History

3 Credit(s)

This course explores best practices and trends in the teaching of history at the secondary and collegiate levels.

HIST 520 - Topics in World History

3 Credit(s)

This course will involve intensive reading, analysis, and discussion of selected topics/controversies in world history.

HIST 521 - Women in US History

3 Credit(s)

This course examines the role of women in American history with special emphasis on how the story of women is told by historians over time. It examines not only the lives of many famous white women, but also the experiences of women from various ethnicities and economic backgrounds. In addressing how Americans construct their understanding of women's lives in the U.S., this course will also reassess how focusing on women's lives might alter one's understanding of the broader patterns and interpretations of American history.

HIST 522 - Gilded Age and Progressive Era

3 Credit(s)

This course examines the United States from the end of Reconstruction through World War I. The Gilded Age covers the period of intense economic expansion after the Civil War, and examines the expansion of big business, the growth of the labor movement, and the crisis of the 1890's. The second half of the course studies the period of intense reform known as the Progressive Era, and concludes with U.S. participation in the First World War. Topics will include American overseas expansion, immigration, the suffrage movement, and the rise of governmental economic regulation.

HIST 526 - U.S. in the Era of World Wars

3 Credit(s)

A study of the United States History during World War I and World War II, or focused on either War, with special attention devoted to diplomatic, social, and political developments of the specific period under study with emphasis on the impact of immigration, urbanization, technology, and America's increasing involvement in world affairs.

HIST 540 - U.S. Presidency

3 Credit(s)

A study of the United States Presidency from 1789 to the present., with special attention devoted to the changing scope

and function of the office in the changing context of broader American History. Other topics of particular interest are the key figures who have altered the institution and the role of crises in changing the scope and functioning of the office. The course with separate subtitles can be repeated no more than 3 times.

HIST 546 - Borderlands

3 Credit(s)

This course explores borderlands as a site of historical scholarship with special emphasis on the southwestern United States and the United States-Mexico border.

HIST 550 - US Sports History

3 Credit(s)

A study of the history of sports and leisure in the United States Presidency from colonial times to the present, with special attention devoted to the changing social context in which sporting activities have taken place. Other topics of particular interest are the roles of race and gender in shaping the world of sport, and the roles of marketing, professional organizations, and media such as television in examining how sport has become part of the fabric of American life. This course views sport both as reflective of broader trends in American society but also as a catalyst of change.

HIST 551 - Atlantic History

3 Credit(s)

This course explores the Atlantic world as a field of historical scholarship with a special focus on European colonization of the Americas, African slavery, and the Age of Revolutions.

HIST 563 - Civil War and Reconstruction

3 Credit(s)

A graduate-level study of the antebellum South, sectional discord, armed conflict, and reconstruction of the Union.

HIST 568 - U.S.-Latin American Relations

3 Credit(s)

This course will examine U.S. - Latin Relations from the Monroe doctrine to the present with a more intensive and analytical focus on cold-war relations and the shift to post-cold-war dynamics.

HIST 579 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

HIST 590 - History Practicum

3 Credit(s)

A graduate-level practicum in the development and of United States History curriculum (education and public history).

HIST 592 - Workshop

0.5 to 6 Credit(s)

Short courses offered on an intermittent basis to meet the needs of special constituents.

HIST 599 - Individual Studies

1 to 6 Credit(s)

Provides opportunity for individual research/study into problems of special interest in the field. By faculty permission and approval of the Department Head.

Master of Business Administration, Finance Emphasis

Master of Business Administration

Online delivery allows today's busy working professional the opportunity to participate in a program without putting your career on hold. Whether you travel extensively, have a job that prevents you from attending traditional on-campus classes, or have family obligations that limit your available time, the flexibility of online delivery brings the Adams State University M.B.A. program to you, on your schedule.

The online M.B.A. curriculum is well suited for people with either business or non-business undergraduate degrees. You'll spend six continuous semesters, or two years, learning key business, health administration, leadership, and public administration concepts to make you more effective in your current job or to open new employment opportunities.

The online M.B.A. curriculum offers a level of quality and rigor consistent with Adams State's reputation for excellence as an educational institution. The distance M.B.A. program welcomes students from around the globe.

Master of Business Administration Core Requirements

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

BUS 505 - Creating Consumer Value

3 Credit(s)

This course presents learners with a comprehensive approach to creating consumer value. This includes marketing and

brand management in for-profit firms as well as identifying and meeting consumer needs in non-profit and governmental organizations. Topics include segmentation and targeting of consumers; the positioning levers of product, price, promotion, and distribution; and brand management.

ECON 505 - Managerial Economics

3 Credit(s)

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Finance Emphasis

BUS 531 - Multinational Financial Management

3 Credit(s)

Multinational Financial Management course has two emphases: one on the basics and the other on a managerial

perspective. As international capital markets of the world become more integrated, an understanding of international financial management has become important for U.S. corporate decision making. This course provides students with groundwork for analysis that will serve them well in their future careers. The decision-making process in this course will teach students how to make knowledgeable managerial decisions in an ever changing global financial setting.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 532 - Portfolio Management and Investment Analysis

3 Credit(s)

The unifying theme of this course is that security markets are almost efficient, meaning that most securities are priced appropriately given their risk and return attributes. The course is a blend of practical and theoretical coverage combined with a complete digital solution to focus on making investment decisions from the perspective of the portfolio manager. This course also covers the Series 7 License and is designed to prepare the student for taking the National Association of Securities Dealers General Securities Representative Exam.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 533 - Financial Markets and Institutions

3 Credit(s)

This course is a great reflection of the latest developments from the field of financial markets. It helps students understand why financial markets exist, how financial institutions serve these markets, and what services those institutions offer. The course also focuses on the management, performance, and regulatory aspects of financial institutions and explores the functions of the Federal Reserve System, as well as the major debt and equity security markets, and derivative security market.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 534 - Finance Capstone

3 Credit(s)

This course uses a case study approach to solve complicated corporate problems and links managerial decisions to capital markets and the expectations of investors. Students will gain a deeper understanding of financial issues that they encounter in their professional career. At the core of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps the students understand the impact of the firm on the world around it.

Prerequisite(s):

BUS 525 Minimum Grade: B-
AND

BUS 531 Minimum Grade: B-

AND

BUS 532 Minimum Grade: B-

AND

BUS 533 Minimum Grade: B-

Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Healthcare Emphasis

HCA 545 - Public Health

3 Credit(s)

This course provides a comprehensive coverage of traditional public health responsibilities- assessing the burden of disease, preventing and controlling health threats, and developing policies and public administration responses to improve health --in a contemporary framework. It covers the basics of administration, including public health law, human resources management, budgeting and financing, and legislative relations in public health.

HCA 550 - Elderly and Managed Care

3 Credit(s)

This course will consider long-term service delivery programs designed to meet the special needs of seniors. The

course will include a managerial overview of seniors' housing and care and will analyze the demographics of aging, the role of financing, and the evolving marketplace.

HCA 555 - Health Policy

3 Credit(s)

Critical analysis of federal and state health policy processes, outcomes, and issues. This course allows students to examine the efficiency and effectiveness of health policy issues associated with access, cost, and quality. Emphasis is placed on policy formulation, implementation, assessment, and modification.

Prerequisite(s):

HCA 303 Minimum Grade: C

HCA 590 - Practicum

3 Credit(s)

The MHA Practicum: executive skill development is designed to develop and enhance the skills necessary for success as a healthcare executive through management practice in health care administration. The course provides the students the opportunity to gain practical experience and integrate classroom knowledge and theory in an administrative setting within the health care industry.

OR

HCA 595 - HCA Thesis

3 Credit(s)

The research project serves as a capstone experience as students complete the MBA emphasis area of study. Students will complete a research project involving an introduction to the problem or research question, comprehensive in-depth review of the current literature, research methodology, data collection, and analysis if applicable, and conclusions.

Prerequisite(s):

BUS 515 Minimum Grade: C

Leadership Emphasis

BUS 545 - Leading Entrepreneurial Organizations

3 Credit(s)

Successful organizations emphasize learning to sustain their competitive advantage. This course will study entrepreneurship and intrapreneurship. Areas of emphasis include uncovering the methodologies and characteristics that foster innovations and achieve meaningful change in business that leads to the creation and implementation of profitable business opportunities.

BUS 550 - Technology and Innovation

3 Credit(s)

This course adopts the perspective of a general manager-- an individual charged with diagnosing complex situations and resolving them in ways that enhance organizational performance. The course emphasizes how general management decisions may contribute to the creation and appropriation of economic value through innovation.

BUS 555 - Leading for Results

3 Credit(s)

This course focuses on how leaders mobilize others within their organization to get extraordinary things done. You will analyze what characteristics you need to develop to achieve your own professional goals and reflect on ways you can develop your competencies as a leader.

BUS 560 - Leadership Capstone

3 Credit(s)

This capstone course integrates knowledge gained in the previous graduate business courses. It centers on the theme that organizations achieve sustained success when their managers have astute, timely, strategic game plans, and they implement these plans with proficiency. This class incorporates the "big picture" and cuts across the whole spectrum of business and leadership.

Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Public Administration Emphasis

BUS 580 - Public/Nonprofit Management

3 Credit(s)

This course is designed to examine public and nonprofit management. This type of management is driven by mission and/or executive/legislative direction. Students will learn both the theory and practice of public and nonprofit management, using the concept case method and service learning opportunities.

BUS 585 - Public Budgeting and Finance

3 Credit(s)

The course is designed to provide the student with an understanding of the primary financial management issues and decisions that confront senior management in the nonprofit and the public sectors. Students will gain an understanding and examine financial analysis techniques from both a practical and strategic perspective for operating and capital decisions.

BUS 590 - Policy Analysis

3 Credit(s)

This course introduces the study of public policy and analysis. It provides an overview of key policy areas and examines three aspects of public policy study: (a) government institutions and the policy making process, (b) the

concepts and methods of policy analysis, and (c) the role of policy analysis in clarifying public problems and helping citizens and policymakers choose from among policy alternatives.

BUS 595 - Public Administration Capstone

3 Credit(s)

The Capstone Course offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MBA-PA program. This involves completing a portfolio project reflecting the cumulative knowledge gained from these experiences.

Master of Science in Kinesiology, Applied Sport Psychology Emphasis (online)

Go to: Department of Kinesiology

This online program comprises 36 credits and offers a wide range of courses and practical experiences in order to provide students the knowledge and skills necessary to become a sport psychology professional. All courses are offered online which allows for greater flexibility and optimum convenience for students who hold full-time careers or cannot relocate. Students can complete the program in two years, which includes all coursework and internships.

Required Courses

KIN 503 - Introduction to Research

3 Credit(s)

This is an introductory research course for graduate students focusing on the area of physical education and human performance. Participants will develop an understanding of the purpose and importance of research in this specific area, overview basic elements of quantitative, qualitative, mixed methods, and action research methods, enhance skills to evaluate and critique problem statement for a specific research study, and gain an appreciation for conducting research.

KIN 506 - Psychology of Coaching

3 Credit(s)

This course will focus on the psychological principles of coaching and explore evidence-based practices in application to coaching. An emphasis will be placed on developing an understanding of human behavior in the sport context and how coaches can apply that knowledge to improve well-being and performance. There will also be a focus on applying these concepts to coaching diverse populations integrated throughout the course.

KIN 509 - Sports Physiology

3 Credit(s)

This course is designed to emphasize background knowledge in Exercise Physiology and Sport Science. Students will learn advanced structure and function of human neuromuscular and cardiovascular systems and develop working knowledge of adaptations made by these systems during training. Students will also learn to apply knowledge learned about external factors affecting these systems including the environmental conditions, nutrition, and ergogenic aids.

KIN 510 - Positive Psychology

3 Credit(s)

A study of positive psychology, specifically looking at well-being as it relates to participants in sport and performance settings.

KIN 520 - Mental Health in Sport

3 Credit(s)

A study of psychological disorders and abnormal human behavior as it relates to participants in sport and performance settings.

KIN 538 - Diversity and Equity in Sport

3 Credit(s)

This course explores aspects of diversity and equity in sport. This course has a two-fold purpose: first, it is designed to provide a sound introduction to diversity and equity in sport; and second, it is designed to encourage students to ask questions and think critically about diversity, equity, and inclusion in sport and interaction with society. This course will explore issues around diversity, equity, and inclusion in sport and society.

KIN 550 - Applied Sport Psychology

3 Credit(s)

This course focuses on application of sport psychology principles in practice. This course will focus on the scientist-practitioner model in relation to using evidence-based practices. There will be an emphasis on learning the various mental skills applied to teaching athletes, coaches, and teams; such as motivation, focus, composure, confidence, resiliency, quality practice, well-being, visualization, mastery and team cohesion.

KIN 560 - Mental Strength and Conditioning

3 Credit(s)

This graduate course focuses on advanced techniques and practices of mental strength and conditioning and explores evidence based practices in mental training. Effective coaching strategies, behavioral issues, and personal roles of mental strength coaches that enhance athletic performance will be discussed. This course will focus on the differences between levels in competitive sports, including youth programs, interscholastic, intercollegiate levels, professional/Olympic as well as other areas such as fitness/wellness, military and business.

KIN 570 - Ethics in Applied Sports Psychology

3 Credit(s)

This course will explore ethical and legal issues that applied sport psychology professionals often encounter in their work as teachers, researchers, and practitioners. This course is designed to educate the student on the Association for Applied Sport Psychology (AASP) Code of Ethics, which consists of 6 ethical principles and 26 standards and to meet standards for the required ethics course to sit to take the AASP Certified Mental Performance Consultant exam.

KIN 581 - Case Studies in Applied Sport Psychology

3 Credit(s)

Case studies of real life scenarios in the field of applied sport psychology will serve as discussion points and provide students the opportunity to apply their knowledge and skills in sport psychology to develop methods for how to work with a variety of populations and potential scenarios within applied sport psychology.

KIN 585 - Practicum in Applied Sport Psychology

3 Credit(s)

The practicum is designed to provide a structured practical experience for which the student is preparing. The assignment must be under the supervision of a qualified professional. The practicum is designed to provide the graduate student an actual field based experience in a health, physical education, recreation, or athletic environment. The experience should give the student the opportunity to work with a working professional while enhancing and expanding the skills developed during their undergraduate and graduate programs. The practicum will consist of a minimum of 100 hours.

Prerequisite(s):

Completed a minimum of 18 graduate credit hours including KIN 503 Minimum Grade: C

KIN 586 - Practicum II in Applied Sport Psychology

3 Credit(s)

The practicum is designed to provide a structured practical experience for which the student is preparing. The assignment must be under the supervision of a qualified professional. The practicum is designed to provide the graduate student an actual field-based experience in a health, physical education, recreation, or athletic environment. The experience should give the student the opportunity to work with a working professional while enhancing and expanding the skills developed during their undergraduate and graduate programs. The practicum will consist of a minimum of 100 hours.

Prerequisite(s):

Complete a minimum of 18 graduate credit hours including KIN 503. Minimum Grade: C

Master of Science in Kinesiology, Coaching Emphasis (online)

Go to: Department of Kinesiology

The online Master of Science in Coaching at Adams State University is a 36-credit hour program that offers a wide range of courses and practical experiences in order to provide students with the knowledge and skills necessary to become a more highly qualified coach.

Required Courses

KIN 503 - Introduction to Research

3 Credit(s)

This is an introductory research course for graduate students focusing on the area of physical education and human performance. Participants will develop an understanding of the purpose and importance of research in this specific area, overview basic elements of quantitative, qualitative, mixed methods, and action research methods, enhance skills to evaluate and critique problem statement for a specific research study, and gain an appreciation for conducting research.

KIN 504 - Methods of Coaching

3 Credit(s)

This graduate course focuses on the foundations of athletic coaching and explores evidence based practices in coaching. Effective coaching strategies, behavioral issues, and personal roles of coaches that enhance athletic performance will be discussed. This course will focus on the differences between levels in competitive sports, including youth programs, interscholastic, and intercollegiate levels as well as coaching diverse populations.

KIN 506 - Psychology of Coaching

3 Credit(s)

This course will focus on the psychological principles of coaching and explore evidence-based practices in application to coaching. An emphasis will be placed on developing an understanding of human behavior in the sport context and how coaches can apply that knowledge to improve well-being and performance. There will also be a focus on applying these concepts to coaching diverse populations integrated throughout the course.

KIN 509 - Sports Physiology

3 Credit(s)

This course is designed to emphasize background knowledge in Exercise Physiology and Sport Science. Students will learn advanced structure and function of human neuromuscular and cardiovascular systems and develop working knowledge of adaptations made by these systems during training. Students will also learn to apply knowledge learned about external factors affecting these systems including the environmental conditions, nutrition, and ergogenic aids.

KIN 520 - Mental Health in Sport

3 Credit(s)

A study of psychological disorders and abnormal human behavior as it relates to participants in sport and performance settings.

KIN 527 - Sport Law

3 Credit(s)

This course is designed to provide the student with an understanding of the legal issues involved in supervision, management, and conduct in sport and recreation.

KIN 538 - Diversity and Equity in Sport

3 Credit(s)

This course explores aspects of diversity and equity in sport. This course has a two-fold purpose: first, it is designed to

provide a sound introduction to diversity and equity in sport; and second, it is designed to encourage students to ask questions and think critically about diversity, equity, and inclusion in sport and interaction with society. This course will explore issues around diversity, equity, and inclusion in sport and society.

KIN 539 - Strength and Conditioning

3 Credit(s)

This course is designed to provide information relative to the basic foundation of coaching sport conditioning including muscle physiology, bioenergetics, training methodology, exercise technique, program design, and facility management. Students will be given the opportunity to develop a general strength training program for a specific sport and to demonstrate their knowledge relative to proper lifting techniques and training procedures.

Prerequisite(s):

KIN 509 Minimum Grade: C

KIN 556 - Strategic Management / Leadership

3 Credit(s)

This course will provide a detailed overview of strategic management and leadership with an emphasis on the management of sport organizations in the commercial, public and not for profit sectors. This course will enable learners to evaluate the relevance of distinctive strategic management tools and consider how these can be applied to support the development of effective sport and sport-related organizations. Students also will examine the principles of effective leadership and reflect on their personal leadership style, the skills and competencies that support the style as well as examining plans for personal and professional development.

Prerequisite(s):

BUS 500 Minimum Grade: C

KIN 584 - Exercise Science Practicum

3 Credit(s)

The practicum is designed to provide a structured practical experience for which the student is preparing. The assignment must be under the supervision of a qualified professional. The practicum is designed to provide the graduate student an actual field-based experience in a health, physical education, recreation, or athletic environment. The experience should give the student the opportunity to work with a working professional while enhancing and expanding the skills developed during their undergraduate and graduate programs. The practicum will consist of a minimum of 150 hours.

Prerequisite(s):

Complete a minimum of 18 graduate credit hours including KIN 503 and KIN 543 (minimum grade C).

Plus 6 KIN Elective Credits (advisor approved)

Master of Science in Kinesiology, Sport Administration Emphasis (online)

Go to: Department of Kinesiology

The online Masters of Science in Sport Administration at Adams State University is a 36-credit program that offers a wide range of courses and practical experiences in order to prepare students for employment in sport administration related careers. The Sport Administration Emphasis has two options: a Thesis option and a capstone option. The Thesis option will provide students the opportunity to further their research interest and prepare them for a doctoral program in sport administration. Students who do not want to pursue a Thesis may continue with the capstone option.

Required Core

KIN 503 - Introduction to Research

3 Credit(s)

This is an introductory research course for graduate students focusing on the area of physical education and human performance. Participants will develop an understanding of the purpose and importance of research in this specific area, overview basic elements of quantitative, qualitative, mixed methods, and action research methods, enhance skills to evaluate and critique problem statement for a specific research study, and gain an appreciation for conducting research.

KIN 585 - Practicum in Applied Sport Psychology

3 Credit(s)

The practicum is designed to provide a structured practical experience for which the student is preparing. The assignment must be under the supervision of a qualified professional. The practicum is designed to provide the graduate student an actual field based experience in a health, physical education, recreation, or athletic environment. The experience should give the student the opportunity to work with a working professional while enhancing and expanding the skills developed during their undergraduate and graduate programs. The practicum will consist of a minimum of 100 hours.

Prerequisite(s):

Completed a minimum of 18 graduate credit hours including KIN 503 Minimum Grade: C

Sport Administration Requirements

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

KIN 505 - Sports Marketing and Public Relations

3 Credit(s)

This course prepares students with the tools needed to develop effective marketing and public relations strategies for sports and athletic programs. Topics such as marketing, advertising, public relations strategies, consumer behavior, licensing, and sponsorship will be explored.

KIN 515 - Administration of Sport

3 Credit(s)

This course is designed to teach students the important principles, concepts, research, and theories of managing a sport organization. Students will develop the ability to apply the management principles to interscholastic, intercollegiate and professional and Olympic sports. Students will learn the fundamental principles such as: organizational development, marketing, human resources, strategic planning, sport culture, media relations, fundraising, event management, and leadership as it relates to sport.

Prerequisite(s):

BUS 500

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

KIN 525 - Facilities/Event Management

3 Credit(s)

This course introduces graduate students to the discipline of facility and event management as they relate to the sport, recreation, and leisure industries. Key topics will include planning, designing, managing, scheduling, maintaining, and supervising sport facilities. In addition, students will become familiar with the techniques and strategies needed to plan, promote, manage, and evaluate special sport and sport-related events.

KIN 527 - Sport Law

3 Credit(s)

This course is designed to provide the student with an understanding of the legal issues involved in supervision, management, and conduct in sport and recreation.

KIN 533 - Financing Sport

3 Credit(s)

This course applies financial and economic principles to various professional, collegiate, or high school level sport programs as well as exercise-related settings. The course will provide the student with a practical background regarding the principles of financial management, economic theory, and financial systems for the purpose of planning, administering, reporting, and evaluating the financial performance of a sport organization.

Prerequisite(s):

KIN 515 AND BUS 520

KIN 556 - Strategic Management / Leadership

3 Credit(s)

This course will provide a detailed overview of strategic management and leadership with an emphasis on the management of sport organizations in the commercial, public and not for profit sectors. This course will enable learners to evaluate the relevance of distinctive strategic management tools and consider how these can be applied to support the development of effective sport and sport-related organizations. Students also will examine the principles of effective leadership and reflect on their personal leadership style, the skills and competencies that support the style as well as examining plans for personal and professional development.

Prerequisite(s):

BUS 500 Minimum Grade: C

Capstone Option

KIN 538 - Diversity and Equity in Sport

3 Credit(s)

This course explores aspects of diversity and equity in sport. This course has a two-fold purpose: first, it is designed to provide a sound introduction to diversity and equity in sport; and second, it is designed to encourage students to ask questions and think critically about diversity, equity, and inclusion in sport and interaction with society. This course will explore issues around diversity, equity, and inclusion in sport and society.

KIN 596 - Capstone Project

3 Credit(s)

This course is designed to integrate coursework into a capstone experience. It is an applied research course requiring students to utilize the tools and information from all the students coursework into a timely, useful capstone project in cooperation with their professional needs. This course is designed to integrate coursework into a capstone experience. It is an applied research course requiring students to utilize the tools and information from all the students coursework into a timely, useful capstone project in cooperation with their professional needs.

Prerequisite(s):

KIN 503 Minimum Grade: C

AND

KIN 543 Minimum Grade: C

Thesis Option

KIN 591 - Thesis Proposal

3 Credit(s)

This course represents the first part of a two-part culminating experience for the graduate student in Kinesiology. It is intended that his course will provide a practical and thorough experience working through a professionally designed research project. Completion of at least 18 graduate KIN credits are also required prior to course registration.

Prerequisite(s):

KIN 503 Minimum Grade: C

AND

KIN 543 Minimum Grade: C

KIN 593 - Master's Thesis

6 Credit(s)

This course represents the culminating experience for the graduate student in the Master of Science in Exercise Science program. This course will provide a practical and thorough experience working through a professionally designed research project. It will include a written and oral presentation of the thesis proposal, as well as a written and oral defense of the completed Masters thesis. This course will be taken in the last year of the students program at Adams State University.

Prerequisite(s):

KIN 503 Minimum Grade: C

AND

KIN 543 Minimum Grade: C

Total Program Hours: 36

Minor in Business Administration

Go to: Business

Note: A minor in Business Administration is not allowed if a student also has a major in business.

Degree Requirements

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

Plus 6 Hours

from the following (may, but need not, come from the same subgroup):

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

AND/OR

BUS 307 - Managerial Cost Accounting I

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

AND/OR

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

AND/OR

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

AND/OR

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 320 - Bus Computer Applications II

3 Credit(s)

The focus of this course is to explore application software on a comprehensive level to gain expertise to support decision-making and manage information. Study includes intermediate Word and Excel applications; intermediate to advanced PowerPoint; intermediate Access, integration of Office applications, and an introduction to HTML and building web pages.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

AND

BUS 365 - Small Business Management/Entrepreneurship

3 Credit(s)

This course presents the techniques and information necessary to create a comprehensive business plan for an entrepreneurial idea. Coursework addresses feasibility analysis, management, marketing, technology, and financial plans, culminating in presentation of a viable business plan.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

AND

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

AND

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

Minor in Marketing

Go to: Business

Degree Requirements

Minimum of 15 credit hours from the following:

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 315 - Sales and Sales Management

3 Credit(s)

This course is designed to introduce students to management techniques as they relate specifically to the marketing and sales area. Topics covered include: the selling process, compensation systems, motivation and leadership, time and territory management, sales forecasting, quotas, and evaluating the sales force.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 345 - Advertising

3 Credit(s)

Discusses the history, purposes, and regulations of the advertising industry. Topics covered include creative principles, media advantages and disadvantages, media planning, regulation of advertising, and coordination with other promotion activities.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 356 - Retailing

3 Credit(s)

Study of marketing and management problems faced in the operation of a retail business. Emphasis is given to techniques for solving problems in location, management, and merchandising, especially with the integration of Internet retailing (E-Tailing) as both a competitor and an extension of the storefront business.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 385 - Sports Marketing

3 Credit(s)

Illustrates the dynamic, progressive and influential nature of sports marketing. Explores the sport marketing concept as a consumer-driven, integrated, goal-oriented philosophy for a team, event, organization or athlete. Topics covered include: athletic endorsements, team sports, event sponsorships and alternative sports.

BUS 441 - International Marketing

3 Credit(s)

Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. This is accomplished through real life planning and implementation of an international marketing plan designed to market a product or service in a foreign country or countries

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 448 - Interactive/Social Media Marketing

3 Credit(s)

This course focuses on relationship marketing, interactive marketing, integration of consumer data, Internet marketing (E-commerce), media advertising, catalogs, mailing lists, telemarketing, and the use of direct marketing techniques to replace or enhance the traditional marketing methods of retail and direct sales.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 449 - Marketing in the 21st Century

3 Credit(s)

This course provides the practical tools and strategies required to successfully leverage social networks, capitalize on their powerful word-of-mouth lift, and how to measure these interactive marketing efforts. These tools will be used on an actual social media marketing campaign for a business or non-profit entity. Current and future marketing tools will be discussed and evaluated.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T
AND

BUS 448 Minimum Grade: C- OR T

BUS 454 - Market Research & Information

3 Credit(s)

Study of the theory and methods used in marketing research to address marketing problems. May include the completion of a research project where students learn by performing a research project from problem formulation to writing a research report. Also prepares the students for evaluating research performed by others.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T
AND

BUS 318 Minimum Grade: C- OR T

BUS 460 - Marketing Management

3 Credit(s)

Twelve hours of marketing courses and senior status required. Capstone course in marketing. Study of the problems faced by marketing managers as they make decisions and develop policies.

Prerequisite(s):

BUS 454 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

Plus 3 Credit Hours of Business or Economics Courses, 300-400 Level

Minor in Sociology

Go to: Sociology

A Minor in Sociology (18 hours excluding SOC 201) is available through consultation with any sociology faculty member

Pre-Nursing Certificate

The Certificate of Completion of Pre-Nursing Prerequisites will allow students to demonstrate that they have successfully completed 51 pre-nursing credit hours successfully with a C or better. Successfully completing prerequisites allows students to be candidates for nursing school selection.

Complete the following Supporting/General Education Courses for Nursing with a Minimum Grade of C

Complete a First-Year Seminar Course

FYS 101 - First Year Seminar

1 to 3 Credit(s)

First-year students launch into the Adams Experience through a First-Year Seminar (FYS) course. FYS will engage students by creating habits for success, learning to navigate college life, and build skills for success. Each FYS will focus on a unique topic that will be the theme of course discussions, experiences, and assignments. FYS will develop academic and social capital and support a successful transition into higher education, instill lifelong learning, and reinforce student persistence.

Complete all Courses

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 205 - Human Anatomy and Physiology I

4 Credit(s)

A lecture/laboratory course that uses the body-system approach to study the structure and function of the human body. Recommended for pre-nursing and certain Human Performance and Physical Education Department and allied health programs. Topics include gross anatomy, histology, cell function, regulation of body activities, and pathological changes in disease. The integumentary, skeletal, muscular, and nervous systems are studied. Course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Test - Minimum Score: 3 **OR** MATH 97 Minimum Grade: S or S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T and SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 101 Minimum Grade: C- or T **OR** ACT Reading - Minimum Score: 18 **OR** ENG 96 Minimum Grade: S or T

BIOL 206 - Human Anatomy and Physiology II

4 Credit(s)

A lecture/laboratory course that uses the body-system approach to study the structure and function of the human body. Recommended for pre-nursing and certain Human Performance and Physical Education Department and allied health programs. Topics include gross anatomy, histology, cell function, regulation of body activities, and pathological changes in disease. The digestive, respiratory, circulatory, urinary, endocrine, and reproductive systems are studied. Course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL 205 Minimum Grade: C- or T

OR

BIOL 210 Minimum Grade: C- or T

BIOL 215 - Microbiology for Health Sciences

4 Credit(s)

A lecture/laboratory course designed to fulfill requirements for pre-nursing and pre-pharmacy students as a practical introduction to microorganisms, especially bacteria and viruses, and their contribution to human health and disease. Laboratory exercises are designed to provide experience in handling microorganisms, bacterial identification, and other basic principles of microbiology. This course will not fulfill requirements for any of the biology degree tracks. Course includes 3 hours of lecture and 3 hours of laboratory per week.

Prerequisite(s):

BIOL-205 Minimum Grade: C- OR T

AND

CHEM-105 Minimum Grade: C- OR T

AND

CHEM-105L Minimum Grade: C- OR T

OR

CHEM-111 Minimum Grade: T OR C-

AND

CHEM-111L Minimum Grade: T OR C-

OR

BIOL-209 Minimum Grade: C- OR T

AND

BIOL-210 Minimum Grade: C- OR T

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

PSYC 233 - Lifespan Dev for Nurses

3 Credit(s)

This is a foundational course for nursing students in human growth and development. The goal of this course is to examine the interaction of heredity and environment on biological, cognitive, and social development from conception to death.

Prerequisite(s):

PSYC 101 Minimum Grade: C- OR T

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

Complete 1 of the Following Statistics Courses

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T
OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

PSYC 211 - Introduction to Statistics Lecture/Lab

4 Credit(s)

In this course, students will develop a working appreciation of statistical concepts and applications as employed in the behavioral sciences. The course presents descriptive and inferential statistics and their applications. The laboratory component of this course gives students an opportunity to develop skills in using statistical software.

Prerequisite(s):

PSYC 101 Minimum Grade: C- or T
AND

MATH 97 Minimum Grade: S-A or S-B or S-C or T

OR

MATH 99 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 121 Minimum Grade: C- or T

OR

MATH 140 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Complete 1 of the following Arts and Humanities Courses (GT-AH1, GT-AH2, or GT-AH3)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T
AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Complete 1 of the following History Courses (GT-HI1)

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Complete 1 of the following Mathematics Courses (GT-MA1)

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

Public Administration Certificate

Go to: Business

Required Courses

- Any 4 MPA 500 level courses

Public Sector Leadership Certificate

Go to: Business

The certificate will provide an opportunity for graduate study in Public Administration without committing to earning a full master's degree. This should be especially appealing to current public managers who already have a graduate degree in another field.

Completion of the graduate certificate will also allow potential students to test out graduate study without entering a full degree program.

Required Courses

MPA 500 - Introduction to Public Administration

3 Credit(s)

An introductory survey to the field of public administration, especially historical, political, and organizational approaches to ethical and reflective professional practice.

MPA 550 - Public Administration Capstone

3 Credit(s)

The Capstone Course offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MPA and MBA-PA programs. This involves completing a portfolio project reflecting the cumulative knowledge gained from these experiences.

Prerequisite(s):

Admission to MPA or MBA program

Plus 6 credits of elective coursework from MPA offerings

School Counseling Certificate

The School Counseling Certificate will provide individuals who hold a Master's degree in Counseling from a CACREP-accredited institution a pathway to become a licensed school counselor in the state of Colorado. These certificate students will complete four classes (12 credits) in our existing school counseling degree plan. They will also be required to complete two semesters of School Counseling Internship (6 credits) in elementary, middle, and high school for a total of 600 hours. This certificate program will be run in a cohort model, and it will take students three semesters to complete the coursework and requirements.

Required Courses

COUN 534 - Counseling Modalities in a School Setting

3 Credit(s)

This course focuses on applying the skills interventions and modalities learned in the counseling courses to the school setting. Emphasis will be on learning to use evidence-based practices to help K-12 students function more effectively in the academic, personal/social, and career domains.

COUN 540 - Foundations of School Counseling

3 Credit(s)

This course provides an introduction to professional school counseling, including historical perspectives, theory, practice, employment settings, credentialing, legislation, research, and ethical considerations.

COUN 541 - Comprehensive School Counseling

3 Credit(s)

This course offers an in-depth exploration of current professional school counseling. Students will understand the skills needed in counseling, consulting, advocacy, and collaboration to promote academic success for all students. The course offers a comprehensive approach to a school counseling program. Students will learn the mechanism with which school counselors and school counseling teams design, coordinate, implement, manage and evaluate their programs for student success.

Prerequisite(s):

COUN 540 Minimum Grade: C

COUN 551 - Professional School Counseling Issues

3 Credit(s)

This course will focus on the day-to-day life of the school counselor and current trends in school counseling. Specifically, students will gain an understanding of the counselor as educational leader, working with parents and the community, diversity in schools, serving specific populations, crises/threat assessment, technology, career advisement, and ethical and legal issues.

COUN 586 - Internship I School Counseling

3 Credit(s)

Students will utilize knowledge and skills gained in coursework and the practicum experience in a supervised counseling setting. Students will receive supervision, increase knowledge of the profession, increase skill base, and continue the process of self-exploration and self-awareness.

Prerequisite(s):

COUN 537 Minimum Grade: B-

COUN 596 - Internship II- School Counseling

3 Credit(s)

A continuation of Internship I, students will complete their supervised on-site experience, expand their acquired skills, and receive further supervision.

Superintendent Licensure Certificate (9 credits)

Required Courses

LEAD 510 - The Superintendency

3 Credit(s)

This course provides a survey of the Superintendency as an executive position responsible for the organizational leadership and management of school districts in the United States. Emphasis will be placed on unpacking professional standards from the American Association of School Administrators (AASA) as well as Colorado-based standards for licensure as a school administrator/superintendent.

Candidates will be expected to critically examine each of Standards in terms of how they are implemented through policies and practices within their own districts while making recommendations for improving such policies based on current research and best practice

LEAD 511 - Superintendents as Transformational Leaders

3 Credit(s)

This course supports aspiring superintendents in developing the knowledge and skills necessary to be responsive, transformational leaders in diverse school contexts. Throughout the course, candidates will engage in case-study analysis and critical discussion to work through potential dilemmas and challenges while applying research and best practice in leadership to sustain a clear focus on student learning through well-managed systems. The content of this course aligns to Colorado Department of Education and AASA standards.

LEAD 512 - Superintendent Practicum

3 Credit(s)

During this 300-hour practicum, candidates will apply knowledge and skills gained throughout the program to demonstrate competency in each of the required licensure standards for Administrator/Superintendent in Colorado.

Candidates will document progress on each standard by logging their experiences and writing monthly reflection papers in which they explicitly address how they are progressing on demonstrating licensure standards. This course also includes the final/capstone project- a candidate driven project developed in coordination with the candidate's mentor and host site to address a local need.

Teaching of History at the College Level Certificate

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

This certificate will appeal to high school educators seeking 18 credit hours to teach college-level credit bearing courses at the secondary level.

Core Courses (6 credits)

HIST 500 - Historiography and Historical Methods

3 Credit(s)

A historiographical seminar in which students learn and demonstrate a mastery of a variety of methods historians use to understand the past.

HIST 510 - Teaching History

3 Credit(s)

This course explores best practices and trends in the teaching of history at the secondary and collegiate levels.

Choose 12 Elective Credits

HIST 501 - State History

3 Credit(s)

A graduate-level survey of the history of a particular state, with emphasis on how meta and national phenomenon impacted a given state, as well as events and phenomena unique to the state.

HIST 505 - American West

3 Credit(s)

This course is a survey of the American West with an emphasis on interpretation by historians. Admission to the Master of Arts program is required.

HIST 507 - Latino History

3 Credit(s)

This course will give special attention to the loss of land in the late nineteenth century, community formation during the early twentieth century, and the Chicano Movement of the late 1960's and early 1970's. At a deeper level, this course explores both the strengths and weaknesses in the relevant historiography and fundamental questions about the practice of history and the forces that form and serve as custodians of memory.

HIST 520 - Topics in World History

3 Credit(s)

This course will involve intensive reading, analysis, and discussion of selected topics/controversies in world history.

HIST 521 - Women in US History

3 Credit(s)

This course examines the role of women in American history with special emphasis on how the story of women is told by historians over time. It examines not only the lives of many famous white women, but also the experiences of women from various ethnicities and economic backgrounds. In addressing how Americans construct their understanding of women's lives in the U.S., this course will also reassess how focusing on women's lives might alter one's understanding of the broader patterns and interpretations of American history.

HIST 522 - Gilded Age and Progressive Era

3 Credit(s)

This course examines the United States from the end of Reconstruction through World War I. The Gilded Age covers the period of intense economic expansion after the Civil War, and examines the expansion of big business, the growth of the labor movement, and the crisis of the 1890's. The second half of the course studies the period of intense reform known as the Progressive Era, and concludes with U.S. participation in the First World War. Topics will include American overseas expansion, immigration, the suffrage movement, and the rise of governmental economic regulation.

HIST 526 - U.S. in the Era of World Wars

3 Credit(s)

A study of the United States History during World War I and World War II, or focused on either War, with special attention devoted to diplomatic, social, and political developments of the specific period under study with emphasis on the impact of immigration, urbanization, technology, and America's increasing involvement in world affairs.

HIST 527 - The Sixties Era

3 Credit(s)

The events of the 1960's continue to polarize the country today. This course is an in-depth examination of the transformation of the United States between World War II and the 1980's with a focus on the years 1964-1973, during which most of the events of what people understand as The Sixties took place. The major theme will be the transformation of the American political system, the social upheavals and cultural rebellion of the U.S. in the 1960's, the Vietnam War, and the Reagan Era. Of particular concern is how the era and events have been interpreted by scholars over time. This course is part of the core for the M. A. degree program in United States History. This course is designed for delivery through Blackboard and Blackboard Collaborate. It can also be adapted for a hybrid format, or a correspondence format.

HIST 540 - U.S. Presidency

3 Credit(s)

A study of the United States Presidency from 1789 to the present., with special attention devoted to the changing scope and function of the office in the changing context of broader American History. Other topics of particular interest are

the key figures who have altered the institution and the role of crises in changing the scope and functioning of the office. The course with separate subtitles can be repeated no more than 3 times.

HIST 546 - Borderlands

3 Credit(s)

This course explores borderlands as a site of historical scholarship with special emphasis on the southwestern United States and the United States-Mexico border.

HIST 550 - US Sports History

3 Credit(s)

A study of the history of sports and leisure in the United States Presidency from colonial times to the present, with special attention devoted to the changing social context in which sporting activities have taken place. Other topics of particular interest are the roles of race and gender in shaping the world of sport, and the roles of marketing, professional organizations, and media such as television in examining how sport has become part of the fabric of American life. This course views sport both as reflective of broader trends in American society but also as a catalyst of change.

HIST 551 - Atlantic History

3 Credit(s)

This course explores the Atlantic world as a field of historical scholarship with a special focus on European colonization of the Americas, African slavery, and the Age of Revolutions.

HIST 563 - Civil War and Reconstruction

3 Credit(s)

A graduate-level study of the antebellum South, sectional discord, armed conflict, and reconstruction of the Union.

HIST 568 - U.S.-Latin American Relations

3 Credit(s)

This course will examine U.S. - Latin Relations from the Monroe doctrine to the present with a more intensive and analytical focus on cold-war relations and the shift to post-cold-war dynamics.

HIST 579 - Special Topics

1 to 6 Credit(s)

Offered periodically to meet student special interests in the field.

HIST 590 - History Practicum

3 Credit(s)

A graduate-level practicum in the development and of United States History curriculum (education and public history).

HIST 592 - Workshop

0.5 to 6 Credit(s)

Short courses offered on an intermittent basis to meet the needs of special constituents.

HIST 599 - Individual Studies

1 to 6 Credit(s)

Provides opportunity for individual research/study into problems of special interest in the field. By faculty permission and approval of the Department Head.

Associate of Arts

As part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature

of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T
OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T
OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T

OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the

definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T

OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HI1 course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production

possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C- or T **OR** ACT Reading - Minimum Score: 18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- **OR** BIOL-209 Minimum Grade: T **OR** BIOL-209 Minimum Grade: C- **AND** (CHEM-131 Minimum Grade: C- **OR** CHEM-131 Minimum Grade: T) **OR** (CHEM-111 Minimum Grade: C- **OR** CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T
OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-

OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1**1 Credit(s)**

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1**4 Credit(s)**

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T

AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1**1 Credit(s)**

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T

AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

29 Elective Credits

Associate of Arts, Social Studies Emphasis

Go to: HAPPS (History, Anthropology, Philosophy & Political Science)

As Part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T
OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T
AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T

OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T
OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T
OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HII course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C-

or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score: 18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- OR BIOL-209 Minimum Grade: T OR BIOL-209 Minimum Grade: C- AND (CHEM-131 Minimum Grade: C- OR CHEM-131 Minimum Grade: T) OR (CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-

OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for

students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T
AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

Specific Courses Required for This Degree

- History - 9 Credits (in addition to those taken for General Education Area II):

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation

in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Government (3 Credits)

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ANTH 205 - Physical Anthropology

3 Credit(s)

The course will examine physical anthropology as a sub discipline of anthropology. The goal is to understand how the physical realities of being human affects the nature of culture. The central theme will be the evolution of humans from the earliest hominid forms to modern Homo sapiens. The course will focus on the mechanisms of evolution, an understanding of primate behavior in general, and the fossil evidence for hominid development.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

Philosophy (6 Credits)

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 202 - Ethics

3 Credit(s)

An examination of criteria governing ethical responses in typical situations as presented by representative thinkers. The application of principles in the development of reasonable standards of conduct and in the formulation of codes of ethics.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

Elective Courses

Students may, in consultation with the department chair of HAPSS, select enrichment courses with an HGP/HIST/POLS/PHIL/ANTH prefix, another course at the 100- to 200-level approved by the department chair, or any course from the menu above not taken to fulfill content area requirements.

Total completion of a minimum of 60 credits for this degree

Associate of Science

As Part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T

OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T
OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T
OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T
OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HII course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430
AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1
OR ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score:
18

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- OR BIOL-209 Minimum Grade: T OR BIOL-209 Minimum Grade: C- AND (CHEM-131 Minimum Grade: C- OR CHEM-131 Minimum Grade: T) OR (CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in

biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-
OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T
AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

18 Elective Credits from Business or the Sciences

11 Elective Credits

Associate of Science, General Business Emphasis

Go to: Business

As Part of the Graduation Requirements for Undergraduates, Complete:

General Education Requirements (31 Credits Total)

Area I. Communications (6 credits)

ENG 101 - Communication Arts I GT-C01

3 Credit(s)

This course is designed to provide students with the reading, writing and critical thinking skills necessary to produce effective college-level expository writing. Students entering Adams State who do not have English grades and/or test scores, or whose English grade point average is less than 2.5, or who score less than 18 on the ACT English sub-score, or who score less than 470 on the SAT Evidence-Based Reading & Writing are required to take the English Placement Exam (Essay Placement Exam). Students who do not agree with their placement based on their high school performance (e.g. grade point average) have the option of taking the Essay Placement Exam. Students who do not pass the Essay Placement Exam are placed in ENG-101 and the ENG 101L co-requisite lab class. Students who decline to take the Essay Placement Exam but fall below the threshold of ENG-101 admittance will automatically be placed in the ENG 101L co-requisite lab.

Prerequisite(s):

ACT English - Minimum Score: 18

OR

SAT Reading/Verbal - Minimum Score: 430

OR

SAT Evidence Based Reading/Writing Score - Minimum Score: 470

OR

Essay Placement Exam/Test - Minimum Score: 1

Co-requisite(s): ENG 101L

ENG 102 - Communication Arts II GT-C02

3 Credit(s)

The emphasis in this course is upon source-based writing designed to develop skills in critical reading, thinking, and writing. A series of written assignments, including a fully documented paper and oral presentation, are required.

Prerequisite(s):

ENG 101 Minimum Grade: D OR T

OR

ACT English - Minimum Score: 29

OR

SAT Reading/Verbal - Minimum Score: 660

Area II. Arts and Humanities (6 credits)

AR 101 - Art and Creativity GT-AH1

3 Credit(s)

Art and Creativity will introduce basic concepts in art through lectures and hands-on art-making classes. Lectures and readings will cover the role and function of visual art through history and in various cultures. Hands-on activities will develop creative thinking skills and teamwork. This course is designed for non-art majors. All hands-on activities and assignments are designed so that people with no prior art making experience or skills can enjoy and successfully complete them.

AR 103 - Art Appreciation GT-AH1

3 Credit(s)

Satisfies part of the humanities requirement. An introduction to art appreciation that provides a foundation in the basic concepts, materials, and processes of the visual arts, as well as a brief history of art. This course has a course specific fee to cover the costs of some materials.

COMM 255 - Fundamentals of Media Communication GT-AH2

3 Credit(s)

Students will examine how media form and are formed by culture and society. They will develop a sophisticated understanding of media by exploring the links between media production, media content, and a rapidly changing society. Media surveyed will include film, television, and Internet.

Prerequisite(s):

ENG 102 Minimum Grade: C- OR T

ENG 203 - Major Themes in Literature GT-AH2

3 to 6 Credit(s)

This course is designed to expose students to a variety of literature and to develop critical thinking, reading, and writing skills. ENG-203 is a prerequisite to all higher numbered English courses.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

AND

ENG 102 Minimum Grade: C- OR T

MUS 100 - Introduction to Music Literature GT-AH1

3 Credit(s)

An introductory course in music literature which includes a survey of Western art music from the Middle Ages to the

present and a survey of non-Western music. A brief study of musical elements as well as a study of the development of musical styles, major composers and compositions is included. Listening, lectures, readings and experiencing performances are vital components of this course.

PHIL 201 - Introduction to Philosophy GT-AH3

3 Credit(s)

A survey of philosophical inquiries, theories, and major problems arising from man's attempt to understand the significance of the world in which he lives and works.

PHIL 205 - Logic and Critical Thinking

3 Credit(s)

This course will develop student competencies to reason correctly through the identification, evaluation, and construction of arguments. Among the subjects covered are uses of language, types of arguments, informal fallacies, elementary deductive arguments, symbolic logic, and various forms of reasoning including moral, legal, scientific, and exegetical. In addition to improving reasoning skills, students will critically evaluate various disciplines, arguments, and forms of reasoning through the identification and evaluation of underlying assumptions or commitments. The knowledge and skills developed in this course will lead to success and competency in other disciplines and give students the tools and inspiration to become lifelong learners and effective citizens.

THTR 180 - Introduction to Theatre GT-AH1

3 Credit(s)

This course is a study of theatre as an art with an emphasis upon its cultural and social influence in society. It examines the simultaneous evolution of several facets of theatre, including acting, directing, play writing, the physical stage, performance conditions, and dramatic literature. The course focuses on demonstrating the collaborative, eclectic nature of theatre, and on providing students with a sophisticated understanding of how live performances have evolved to meet the demands of each society through the ages.

Area III. Mathematics (3 credits)

MATH 104 - Finite Mathematics GT-MA1

3 Credit(s)

Topics covered include functions and their graphs, matrices, linear programming, probability, and descriptive statistics. Applications are presented from the areas of biology, business, behavioral sciences, economics, and the social sciences.

Prerequisite(s):

MATH 97 Minimum Grade: S-C or T

OR

MATH 99 Minimum Grade: S-C or T

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

ACT Math - Minimum Score: 19

MATH 106 - College Algebra GT-MA1

3 Credit(s)

An introduction to the basic techniques of algebra. Topics include functions (linear, quadratic, polynomial, root, rational, exponential, and logarithmic), systems of equations, matrix algebra, inequalities, and complex numbers. Optional topics include partial fractions, synthetic division, mathematical induction, sequences and series, and counting principles.

Prerequisite(s):

MATH 99 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 22

OR

SAT Math - Minimum Score: 560

OR

SAT Math Section Score - Minimum Score: 580

MATH 107 - Trig/ Analytic Geometry GT-MA1

3 Credit(s)

An introduction to the tools and techniques of trigonometry. Topics include angles and their measures, the six trigonometric functions and their properties, inverse trigonometric functions, graphs, identities including the Law of Sines and the Law Cosines, trigonometric equations, and solving triangles. Optional topics include complex numbers, De Moivre's Theorem, polar coordinates, and analytic geometry.

Prerequisite(s):

MATH 106 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 25

OR

SAT Math - Minimum Score: 600

MATH 110 - Introduction to Statistics, GT-MA1

3 Credit(s)

Topics covered include sampling methods, types of random variables and parameters, descriptive statistics (such as 5-number summary, mean, standard deviation), data presentations (such as bar charts, histograms), introductory probability, standard normal and t distributions, z scores, hypothesis testing, confidence intervals, types of errors, and regression and correlation. Optional topics include chi-squared and probability distributions (such as binomial and geometric). Class periods will often be scheduled in a computer lab to exhibit calculations using technology. This can include using spreadsheets and statistics software packages. Students will be expected to write their conclusions, describe what the statistics tell us, and identify limitations and/ or problems with their conclusions.

Prerequisite(s):

MATH 95 Minimum Grade: S or S-C or T and ENG 102 Minimum Grade: C or T
OR

MATH 97 Minimum Grade: S or S-C or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

MATH 120 - Calculus I GT-MA1

5 Credit(s)

An introduction to the calculus of functions of one real variable. Topics include limits, continuity, derivatives, graphing techniques, optimization, related rates, Newton's method, indeterminate forms and L'Hopital's rule, antiderivatives, the definite integral, and the Fundamental Theorem of Calculus.

Prerequisite(s):

MATH 107 Minimum Grade: C or T
OR

ACT Math - Minimum Score: 26

OR

SAT Math - Minimum Score: 600

OR

SAT Math Section Score - Minimum Score: 620

MATH 121 - Calculus II GT-MA1

5 Credit(s)

A continuation of the calculus of functions of one real variable. Topics include integration, application of the definite

integral, techniques of integration, improper integrals, arc length, surface area, volume, infinite series, and Taylor series.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Area IV. Social and Behavioral Sciences/History (9 credits)

- at least one course must be a GT-SS*
- At least one course must be a GT-HII course
- the remaining course may come from either category
- Only one ECON course may be used towards the requirements in this General Education area

GT-SS* Courses

ANTH 201 - Cultural Anthropology GT-SS3

3 Credit(s)

The course will examine the field of anthropology. The concept of culture will be introduced as an overarching approach to understanding human behavior that draws on the other social and behavioral sciences. Introductory discussions of physical (biological) anthropology, archeology, and anthropological linguistics will precede a more in-depth examination of cultural anthropology. Students will examine the basic methods, theories, and concepts of cultural anthropology, developing a cross-cultural perspective on human diversity.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

POLS 291 - American Government GT-SS1

3 Credit(s)

This course examines American government and politics, including the Constitution, Congress, presidency, courts, public opinion, voting, socialization, civil rights and liberties, and public policy.

PSYC 101 - Introduction to Psychology GT-SS3

3 Credit(s)

This course provides students with a survey of research and theory in the science of psychology. An important goal of the course is to broaden the student's understanding of self and others. Course topics include critical thinking skills, research methods, neuroscience, sensation and perception, life-span development, learning, memory, personality, psychological disorders, and social psychology.

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

GT-HI1 Courses

HGP 110 - World History and Culture I GT-HI1

3 Credit(s)

Tour the ancient world as we survey the development of civilization from the dawn of history to 1500 CE. This course examines the major cultures of China, Japan, India, Egypt, Greece, Rome, Medieval Europe, the Byzantine Empire, Africa, the Islamic Empire, and the Mayan, Aztec, Incan, and Native American worlds. Students will gain a foundation in the world's major religious traditions such as Buddhism, Christianity, Hinduism, Islam, and Judaism, as well as explore philosophical and political traditions such as Confucianism and Greek thought.

HGP 111 - World History and Culture II GT-HI1

3 Credit(s)

A study of Western and Eastern civilizations from 1500 to the present, with emphasis on cultural and institutional developments. See the emergence of the modern world from the European Renaissance to today. Students will gain an understanding of the origins of modern Europe through the Renaissance, European Reformations, and overseas exploration and colonization. They will learn about the U.S., French, and Spanish American Revolutions, the changes brought by the Industrial Revolution, and the catastrophes of World War I and World War II. They will also gain an understanding of European imperialism and its impact on Africa, India, China, and the Middle East, and the resulting independence movements that ended imperialism. Finally, students will examine conflict in the modern era from the Cold War through the changes brought on by September 11.

HIST 202 - American History to 1865 GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

HIST 203 - American History 1865-Present GT-HI1

3 Credit(s)

A chronological examination of American problems and progress.

Area V. Physical and Natural Sciences (7 Credits)

One credit must be a lab:

BIOL 101 - Introductory Biology GT-SC1

4 Credit(s)

Introductory Biology is a one-semester lecture/laboratory course designed to acquaint the non-major with a broad overview of the fundamental principles of biology. Topics considered will include the scientific method of inquiry, evolution, the biology of cells, principles of inheritance, the biology of organisms including a survey of major groups, and ecology with emphasis on the adaptations of organisms to living and non-living environmental factors. The course includes 3 hours of lecture and 2 hours of laboratory per week.

Co-requisite(s): BIOL 101L

BIOL 125 - Nutrition GT-SC2

3 Credit(s)

A study of the fundamentals of human nutrition with emphasis on the impact of diet on health. Topics include the scientific method, evaluating nutritional information, the anatomy and physiology of the digestive system, the chemical nature and physiological roles of nutrient groups, principles of weight control, nutritional requirements at different life stages, eating disorders, food safety, and the role of nutrition in the prevention and treatment of disease. This course includes 3 hours of lecture per week.

BIOL 209 - General Biology I GT-SC1

5 Credit(s)

The first of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology I content focuses on principles of evolution and the diversity of life. The General Biology sequence is the foundation for biology majors and is prerequisite to all 300- and 400-level courses in biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19 **OR** SAT Math - Minimum Score: 460 **OR** SAT Math Section Score - Minimum Score: 500 **OR** Math Placement Tier (MPLC): 3 or higher **OR** MATH 97 Minimum Grade: S-C or T **OR** MATH 99 Minimum Grade: S or T **OR** MATH 104 Minimum Grade: C- or T **OR** MATH 106 Minimum Grade: C- or T **OR** MATH 107 Minimum Grade: C- or T **OR** MATH 110 Minimum Grade: C- or T **OR** MATH 120 Minimum Grade: C- or T **AND** SAT Reading/Verbal - Minimum Score: 430

AND

SAT Evidence Based Reading/Writing Score - Minimum Score: 470 **OR** Essay Placement Exam - Minimum Score: 1 **OR** ENG 96 Minimum Grade: S-C or T **OR** ENG 101 Minimum Grade: C-or T **OR** ACT Reading - Minimum Score:

BIOL 210 - General Biology II GT-SC1

5 Credit(s)

The second of a two-semester lecture/laboratory sequence introducing the fundamental principles of biology. General Biology II focuses on cellular, Mendelian, and molecular processes. The General Biology sequence is the foundation for Biology majors and is prerequisite to all 300 and 400 level courses in Biology. Course includes 4 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

BIOL-209 Minimum Grade: C- OR BIOL-209 Minimum Grade: T OR BIOL-209 Minimum Grade: C- AND (CHEM-131 Minimum Grade: C- OR CHEM-131 Minimum Grade: T) OR (CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: C- OR CHEM-111 Minimum Grade: T)

Co-requisite(s): BIOL-210L

CHEM 103 - Introduction to Forensic Chemistry GT-SC1

4 Credit(s)

This course serves as an introduction to chemistry using a forensics perspective and is specifically designed for the non-science major. The course is three credits of lecture and has an accompanying one credit of laboratory that count towards general education credit. Does not count towards a major or minor in chemistry.

CHEM 103L - Introduction to Forensic Chemistry Lab GT-SC1

0 Credit(s)

Required companion laboratory to CHEM 103.

Co-requisite(s): CHEM 103

CHEM 104 - Chemistry in Context GT-SC2

3 Credit(s)

This course is designed to establish chemical principles on a need-to-know basis for non-science majors, enabling them to learn chemistry in the context of their own lives and in significant issues facing science, technology, and society.

CHEM 111 - Introductory Chemistry GT-SC1

4 Credit(s)

A study of the fundamental concepts of chemistry. The course is satisfactory for nursing students, for biology majors who take only one year of chemistry, for HPPE advanced track, and for students preparing to take CHEM 131. It will not satisfy the requirements for a chemistry major or minor. It is suitable for the pre-professional programs such as pre-med, pre-dental, pre-vet or medical technology.

Prerequisite(s):

ACT Math - Minimum Score: 19
OR

SAT Math - Minimum Score: 460

OR

MATH 97 Minimum Grade: S-A or S-B

OR

MATH 97 Minimum Grade: S-C or S

OR

MATH 99 Minimum Grade: S or S-A

OR

MATH 99 Minimum Grade: S-B or S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 111L

CHEM 111L - Introductory Chemistry Lab GT-SC1

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-111.

Co-requisite(s): CHEM-111

CHEM 131 - General Chemistry GT-SC1

4 Credit(s)

A study of the principles and applications of chemistry suitable for science majors who plan additional course work in biology, chemistry, geology, physics, or mathematics. Organic chemistry is briefly included. The laboratory work consists of learning basic techniques and studying chemical and physical principles discussed in the lecture. This course is designed for students who have had high school chemistry, although is not a prerequisite.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 99 Minimum Grade: S or T

OR

MATH 106 Minimum Grade: C- or T

MATH 107 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

Co-requisite(s): CHEM 131L

CHEM 131L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-131.

Co-requisite(s): CHEM-131

CHEM 132 - General Chemistry GT-SC1

4 Credit(s)

A continuation of CHEM 131. This course is designed for students who have had high school chemistry, although it is not a prerequisite.

Prerequisite(s):

CHEM 131 Minimum Grade: C- OR T

Co-requisite(s): CHEM 132L

CHEM 132L - General Chemistry Lab

1 Credit(s)

Required companion laboratory to be taken concurrently with CHEM-132.

Co-requisite(s): CHEM-132

ENV 101 - Introduction to Environmental Science GT-SC1

4 Credit(s)

An introductory level study of ecosystems, evolution population growth dynamics and problems, atmospheric and geologic processes, nonrenewable resource use, soil and land use, nutrient cycling, energy use, pollution and conservation strategies.

Prerequisite(s):

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S-C or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

OR

MATH 150 Minimum Grade: C- or T

OR

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

Co-requisite(s):

GSCI 109 - Dynamic Earth GT-SC1

4 Credit(s)

This course is an introduction to the interwoven geoscience fields including the relationships among the four spheres of the Earth (i.e., atmosphere, biosphere, hydrosphere, and lithosphere). This course emphasizes the understanding of geoscience processes from the Earth's core to the fringes of outer space. A major focus is the relationship between humans and the environment, including global climate and environmental change. Laboratory work includes identification and classification of minerals and rocks, climate and weather analysis, surface and groundwater simulations, and topographic and geologic map exercises. This course includes 3 hours of lecture and 2 hours of laboratory per week.

Prerequisite(s):

ACT Math - Minimum Score: 19

OR

SAT Math - Minimum Score: 460

OR

SAT Math Section Score - Minimum Score: 500

OR

MATH 97 Minimum Grade: S or T

OR

MATH 99 Minimum Grade: S or T

OR

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 107 Minimum Grade: C- or T

PHYS 110 - Astronomy: Stars and Galaxies GT-SC2

3 Credit(s)

An introductory course in astronomy with primary focus placed on study of the universe beyond our solar system including stars, galaxies, black holes, and cosmology. Students may need to attend night-sky viewing sessions as a requirement of the course.

PHYS 225 - College Physics I GT-SC1

5 Credit(s)

The first course of a two-semester lecture/laboratory sequence introducing the fundamental principles of physics. In the first semester, students will be introduced to the areas of kinematics, dynamics, energy, momentum, heat, and sound. Conceptual understanding as well as problem solving techniques will be emphasized in the lecture. Laboratory sections meet for two hours each week and the exercises performed in the laboratory coincide closely with the topics presented in the lecture. Instructor permission must be obtained to register for this course.

Prerequisite(s):

MATH 107 Minimum Grade: C-
OR

MATH 107 Minimum Grade: T

OR

Math Placement Test - Minimum Score: 6

OR

ACT Math - Minimum Score: 26

PHYS 230 - General Physics I GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of mechanics, sound, heat. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 231) must be taken concurrently.

Prerequisite(s):

MATH 120 Minimum Grade: C- OR T

Co-requisite(s): PHYS 231

PHYS 231 - General Physics I Lab GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 230. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for theoretical behavior and to account for the errors which give them the observed behavior.

Co-requisite(s): PHYS 230

PHYS 232 - Gen Physics II (Cal) GT-SC1

4 Credit(s)

A calculus-based study of the fundamental principles and concepts of electricity, magnetism, and light. Designed for students planning additional course work in chemistry, physics, engineering, or mathematics. The laboratory (PHYS 233) must be taken concurrently. Note that there is no coverage of topics in "modern physics" (e.g., special relativity, quantum mechanics, etc.).

Prerequisite(s):

PHYS 230 Minimum Grade: C- OR T
AND

MATH 121 Minimum Grade: C- OR T

Co-requisite(s): PHYS 233

PHYS 233 - Gen Phys II Lab (Cal) GT-SC1

1 Credit(s)

One two-hour laboratory per week with lab projects that coincide with the lecture material in PHYS 232. A calculus-based treatment of data will be required for some lab projects. The laboratory experience provides a vital link for students in their development of an ability to apply mathematics to simple systems, allowing them to analyze the system for a theoretical behavior and to account for the errors which give them the observed behavior.

Prerequisite(s):

PHYS 230 Minimum Grade: D OR T
AND

PHYS 231 Minimum Grade: D OR T

Co-requisite(s): PHYS 232

Completion of the Following

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic

financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

- BUS or ECON electives (100- or 200-level): **3 Credit(s)**
- Electives: **4 Credit(s)**

Total completion of a minimum of 60 credits for this degree

Bachelor of Arts in Business Administration, Advertising Emphasis

Go to: Business

In addition to the Graduation Requirements for Undergraduates:

Advertising Emphasis

AR 281 - Beginning Digital Photography

3 Credit(s)

This course is an introduction to digital photography. The course will cover digital camera functions and an

introduction to Adobe Bridge and Adobe PhotoShop applications. Emphasis on photography as a medium for creative expression. Students must supply their own digital camera. Cameras with the ability to shoot in a raw format are preferred. This course has a course specific fee to cover the costs of some materials.

AR 202 - In Design

3 Credit(s)

This course is intended for non-Art majors and will provide theory and practical experience on graphic design and applied art processes in print and presentation design. Students will study the basics in graphic design, the history of visual communication, typography, and the role of illustration and photography in graphic communications.

AR 206 - Studio One

3 Credit(s)

A foundation studio course in art practice and concepts (includes two-dimensional and three-dimensional design fundamentals). It is recommended to take AR-206 Studio One prior to AR 207 Studio Two.

AR 207 - Studio Two

3 Credit(s)

A foundation studio course in art practice and concepts (includes two-dimensional, three-dimensional and time based/new media design fundamentals). There is no pre-requisite but it is recommended to take AR 206 Studio One prior to AR-207 Studio Two.

AR 208 - Drawing

3 Credit(s)

Develop basic drawing skills using a variety of media and subject matter (e.g. models, still lifes, landscapes, etc.). An emphasis on composition, contour, gesture, value, and linear perspective. This course has a course specific fee to cover the costs of some materials.

Plus 4 Courses of the Following

AR 301 - Typography

3 Credit(s)

This course is intended primarily for art majors who chose graphic design as their area of emphasis. It is also open to any other art major or non-art major. This course will focus on a broad study of typography, its terminology, history, and application in the field of graphic design.

Prerequisite(s):

AR 206 Minimum Grade: C- OR T

AR 306 - Illustrator

3 Credit(s)

This course is an advanced design class. Using Adobe Illustrator, students will study design concepts related to computer graphics, illustration, and typography as well as historical traditions in graphic design.

Prerequisite(s):

AR 202 Minimum Grade: C- OR T
OR

AR 281 Minimum Grade: C- OR T

AR 310 - Photoshop

3 Credit(s)

This course is an advanced study of the design relating to the work of the graphic designer. Students learn Adobe PhotoShop software and work on advanced design projects such as book and CD covers, posters, corporate identity projects, and package design, etc. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 202 Minimum Grade: C- OR T
OR

AR 281 Minimum Grade: C- OR T

AR 312 - Design for the Internet

3 Credit(s)

This course will provide an introduction to theories and practical experience with graphic design as applied to the Internet. Students will study the basics in web page and web site design using current industry standard software, HTML and XHTML. Within the course, students will create web pages and sites suitable for course work, professional purposes, and personal use. Students will also explore common web page formats and functions. Emphasis will be on the aesthetics of Internet design.

AR 381 - Intermediate Digital Photography

3 Credit(s)

Continued exploration of digital photography as an art medium. The course will delve further into photographic applications in Adobe Photoshop with emphasis on maximizing image quality using masks and blending modes. Introduction to fine art printing and papers. Emphasis on concept and creative expression. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 281 Minimum Grade: C- OR T

AR 401 - Advanced Graphic Design

3 Credit(s)

An advanced study of the design relating to the work of the graphic designer. Students learn PhotoShop software and

work on advanced design projects such as book and CD covers, posters, corporate identity projects, and package design, etc. This course has a course specific fee to cover the costs of some materials.

Prerequisite(s):

AR 306 Minimum Grade: C- OR T

AND

AR 310 Minimum Grade: C- OR T

Complete these Required Courses

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

AR 281 - Beginning Digital Photography

3 Credit(s)

This course is an introduction to digital photography. The course will cover digital camera functions and an introduction to Adobe Bridge and Adobe PhotoShop applications. Emphasis on photography as a medium for creative expression. Students must supply their own digital camera. Cameras with the ability to shoot in a raw format are preferred. This course has a course specific fee to cover the costs of some materials.

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 345 - Advertising

3 Credit(s)

Discusses the history, purposes, and regulations of the advertising industry. Topics covered include creative principles, media advantages and disadvantages, media planning, regulation of advertising, and coordination with other promotion activities.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 448 - Interactive/Social Media Marketing

3 Credit(s)

This course focuses on relationship marketing, interactive marketing, integration of consumer data, Internet marketing

(E-commerce), media advertising, catalogs, mailing lists, telemarketing, and the use of direct marketing techniques to replace or enhance the traditional marketing methods of retail and direct sales.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 454 - Market Research & Information

3 Credit(s)

Study of the theory and methods used in marketing research to address marketing problems. May include the completion of a research project where students learn by performing a research project from problem formulation to writing a research report. Also prepares the students for evaluating research performed by others.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T
AND

BUS 318 Minimum Grade: C- OR T

BUS 460 - Marketing Management

3 Credit(s)

Twelve hours of marketing courses and senior status required. Capstone course in marketing. Study of the problems faced by marketing managers as they make decisions and develop policies.

Prerequisite(s):

BUS 454 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

Plus 9 credits from speech and/or journalism

Plus 6 credits from business

**Bachelor of Arts in Business Administration, General Business
Emphasis**

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T
AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 383 - International Financial Management

3 Credit(s)

A comprehensive study of international financial markets that covers currency exchange mechanisms in theory and practice. In line with the rapid globalization of the economy, the goal of this course is to analyze the international financial environment and how managers function in this increasingly uncertain global environment. The course will focus on three main areas of international finance: international financial environment, exchange rate behavior, and exchange risk management.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 441 - International Marketing

3 Credit(s)

Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. This is accomplished through real life planning and implementation of an international marketing plan designed to market a product or service in a foreign country or countries

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Plus 9 Credits from Political Science, History, or Languages (in Consultation with Your Advisor)

Bachelor of Arts in Interdisciplinary Studies, Individualized program of study

Go to: Interdisciplinary Studies

Students design a degree program that intentionally combines coursework from two different disciplines.

The Bachelor of Arts in Interdisciplinary Studies degree allows students to design a program of study combining two subject areas. No more than 30 credits of coursework with the same prefix can be used to satisfy the combined 40 credits (20 + 20) needed for the emphasis areas (e.g. no more than 30 BUS credits, no more than 30 HIST credits, no more than 30 CHEM credits, etc. can be applied toward the emphases).

Area I (20 Credit Hours)

Area II (20 Credit Hours)

Requirements

- Courses applied toward the Undergraduate General Education Requirements cannot also be used for credit in an emphasis area.
- At least 15 of the required 42 upper-division hours must fall within the (combined) emphasis areas.
- Courses associated with emphasis areas must be completed with a grade of 'C-' or higher.
- At least 12 of the 40 credit hours associated with the emphasis areas must be Adams State University courses.
- At least 30 credit hours (of the required 120) must be Adams State University courses.

Bachelor of Arts in Sociology, Criminology Emphasis

Go to: Sociology

Note for Sociology Students

- Completion of SOC 201 is a prerequisite for all other sociology courses.
- All Sociology Majors must meet the requirements of the Local Writing Assessment in Sociology as well as the Internship, ePortfolio, and Final Review.

Sociology Required Courses

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

SOC 245 - Criminology

3 Credit(s)

Criminology is an introductory course to the study of crime and criminal behavior with special emphasis on theories of crime and delinquency causation, rates and extent of crime, and social control agents (i.e., the police, courts, and "corrections"). Special topics examined may include gangs, white-collar crimes, property crimes, victimless crimes, and organized crime.

SOC 251 - Social Problems

3 Credit(s)

This course is designed to provide the student with a survey of selected contemporary social problems. Social problems addressed in the class may include poverty, addiction and substance abuse, mental health, violence with a focus on family violence, crime, teen sexuality and pregnancy, and health care issues. The causes, severity, and consequences of the selected social problems are explored. In addition, strategies for alleviating social problems are presented.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

AND

LS 225 Minimum Grade: C- OR T

SOC 255 - Research And Writing in Sociology

3 Credit(s)

This introductory course in social research and writing in sociology offers an overview of how sociologists study the social world, research social phenomena, and write about their findings. This class provides an overview of knowledge production and methods used by sociologists to develop a research agenda, test hypotheses, and refine theories and sociological inquiry. Students will gain the tools needed to conduct social research while also developing the skills necessary to read and critically evaluate sociological research. Students will learn fundamental concepts and

mixed methods approach to sociological research. Students will summarize research and identify (1) the research question, (2) assumptions and propositions of the theory, (3) specific hypothesis, (4) methods used, and (5) the findings and results.

Prerequisite(s):

SOC 201 minimum grade C-

SOC 311 - Social Statistics

4 Credit(s)

This course presents a general overview of the statistical methods most commonly used in sociology and the social sciences. As a laboratory component, students will become proficient in SPSS, a computer program designed to aid statistical analysis. These skills will enable the student to read popular applications of statistics in the media with a critical eye; assess the use of statistics in the professional sociological literature; and use statistical tools to answer the sociological questions of interest.

Prerequisite(s):

SOC 255 Minimum Grade: C-

AND

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

SOC 318 - Race, Class, and Gender

3 Credit(s)

The focus of this course is on the interrelated ascribed statuses of "race," social class, gender, and sexual orientation in American society, how they are perceived and reinforced, the social tensions that result and the dynamics of change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 395 - Pre-Professional Seminar

2 Credit(s)

This course provides an introduction to the profession of sociology and the various career options available to graduates. Occupational and graduate school options are explored in detail through library research, presentations,

observational and volunteer experiences, and informational interviews. Skills for job interviewing, resume development, and professional correspondence are explored.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 445 - Sociological Theory

3 Credit(s)

The major theories of society are covered in their classical and contemporary forms.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 455 - Qualitative Research Methods

4 Credit(s)

This course is designed to expose students to a variety of qualitative research methods. Students will be instructed in the fundamentals of research design and implementation, including ethical considerations. Students will read and study the research projects of selected sociologists. Students will engage in multiple hands-on activities to practice research methods. Each student will design a qualitative research project. In the lab component of the course, students will analyze and interpret qualitative data. Finally, students will learn to conduct content analysis, and use grounding theory to code and analyze their data and write a final project report. This course includes a lab day each week and is a 4-credit course.

Prerequisite(s):

SOC 201 Minimum Grade: C-
AND

SOC 255 Minimum Grade: C-

SOC 493 - Internship in Sociology

3 Credit(s)

Students in Sociology are placed at an internship site in the community and conduct a mentored capstone case study. Ninety hours of service with the agency are required. The student is supervised by both a Sociology faculty member and a representative from the human service agency. Instructor approval required for registration purposes.

Prerequisite(s):

Special permission and senior standing.

Criminology Emphasis

SOC 346 - Criminal Justice

3 Credit(s)

The focus of this course is on the organizational structures and social processes of the American criminal justice system. It will examine criminal law, policing, courts, and corrections.

SOC 447 - Correctional Systems

3 Credit(s)

This course will focus on corrections as one of the components of the American criminal justice system and its operation within a democratic form of government. The philosophical and historical underpinnings of punishment and correction will be analyzed and compared (e.g., punishment vs. rehabilitation).

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 346 Minimum Grade: C- OR T

Choose 1 of the following electives

SOC 347 - Juvenile Delinquency

3 Credit(s)

This course describes the nature of delinquency, including the trends, characteristics, and causes of juvenile delinquency. In addition, the course will examine theories of delinquency, social influences on delinquency, historical and contemporary overviews of the juvenile justice system, and the juvenile justice process from police involvement to the court system and corrections. Finally, methods of treatment and prevention will be identified.

SOC 348 - Women and Crime

3 Credit(s)

This course will address the role women play as criminals, victims, and professionals in the criminal justice system. This course will examine the important intersection between gender and crime, exploring the nature and extent of women's involvement in the criminal justice system. The course will investigate and discuss the relationship between victimization and offending, and study the unique way women are involved in and impacted by the criminal justice system, with case study examples from real crimes.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 444 - Deviance and Control

3 Credit(s)

The sociology of deviance and control examines the nature of rule-making and rule-breaking in modern societies. The course includes theoretical considerations of the causes and consequences of deviance.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

Choose 2 Courses from these Sociology Electives

SOC 279 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 305 - Rural Sociology

3 Credit(s)

The purpose of this course is to introduce some of the social, political, environmental, and economic problems and prospects associated with rural America. Special attention will also be given rural community services and social institutions, with some focus on the San Luis Valley and other parts of rural Colorado.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 315 - Sociology of Education

3 Credit(s)

This course explores the relationship between education and society with special emphasis on the effects of this relationship on the lives of students in the American education system.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 320 - Marriages and Families

3 Credit(s)

This course will provide an overview of the family from a sociological perspective. The family is considered to be one of the most private and pervasive institutions in society. All of us have had contact with at least one family, and many of us will be involved in several different families during our lifetime. Our experiences point to the numerous transformations in family life. To obtain a better understanding of these changes, recent sociological research and data on the family will be utilized in this course. In addition to examining the history of the family, the course will study the contemporary family and its diversity. The course will examine traditional marriage/family arrangements and alternative processes of mate selection and family formation. Finally, the course will examine parenting, the relationship between work and family, divorce and reconstituted families.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 345 - Women, Sport, and Society

3 Credit(s)

This course will explore how women have been involved in sports and athletics, how they have fought to claim recognition and legitimacy among historically male dominated settings, and how they continue to shape sports and the

role of women in society. We will explore a wide variety of topics in society related to women in sports including historical influences, equitable access, characteristics of female sport participation, sport opportunities, and sport leadership. Topics will include Title IX, female bodies and physiology, sport diversity, gender identity, women's sport and aging, disabilities, sport and sexual violence, media and women's portrayal in sports, competitive sports in high school, college, and professional leagues, and marketing women's sports.

SOC 347 - Juvenile Delinquency

3 Credit(s)

This course describes the nature of delinquency, including the trends, characteristics, and causes of juvenile delinquency. In addition, the course will examine theories of delinquency, social influences on delinquency, historical and contemporary overviews of the juvenile justice system, and the juvenile justice process from police involvement to the court system and corrections. Finally, methods of treatment and prevention will be identified.

SOC 348 - Women and Crime

3 Credit(s)

This course will address the role women play as criminals, victims, and professionals in the criminal justice system. This course will examine the important intersection between gender and crime, exploring the nature and extent of women's involvement in the criminal justice system. The course will investigate and discuss the relationship between victimization and offending, and study the unique way women are involved in and impacted by the criminal justice system, with case study examples from real crimes.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 365 - Race and Ethnicity in the U.S.

3 Credit(s)

This course provides a sociological approach to race and ethnic relations in the U.S. today. This course introduces the basic sociological theories and perspectives related to the study of race and ethnicity, the histories, and present status of different racial and ethnic groups in the United States and raises questions about continuing racial discrimination and inequality in our society. Issues of defining race, racial identity, interpersonal and institutional discrimination, segregation, and affirmative action (among others) are explored.

SOC 370 - Poverty and Wealth

3 Credit(s)

This course examines the historical and socio-cultural factors which influence the creation and maintenance of poverty and wealth. Emphasis will be on structural factors and theoretical explanations of poverty and inequality. This course will also focus on the implications for policy and social programs aimed at poverty and other social class issues. In addition, there will be exploration of systems of power, privilege, and domination that are central to the American social structure. Finally, the issues of empowerment, resistance, and solutions to social inequality will be assessed.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

AND

SOC 251 Minimum Grade: C- OR T

SOC 379 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 391 - Sociology of Religion

3 Credit(s)

This course will introduce students to an examination of religion through sociological inquiry and imagination. Students will learn how sociologists study religion and will apply classical and contemporary sociological theories to understand both personal religious experiences/identities and organized religion as a social phenomenon. The course explores socialization into religions, the processes of conversion and apostasy, and various forms of organizational structures for religious groups. Other issues to be explored include how religious identity and structure connect to gender, race, sexuality, and social class; competition and conflict between different religious groups; as well as the tension between religion as a social institution and secularization trends in the contemporary US.

Prerequisite(s):

Junior standing

SOC 401 - Self & Society

3 Credit(s)

This course will look at social psychology from a sociological perspective. More specifically, students will utilize the symbolic interactionist theory to examine how identities, selves, social life, and social reality are products of ongoing social interactions.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 419 - Gender and Society

3 Credit(s)

The aim of the course is for students to become familiar with the continuing differences and inequalities between women and men in the contemporary United States, and to begin to explain why and how they occur through a sociological lens. Understanding gender as it relates to other social identities (for example, race, class and sexuality) is an important organizing framework of the course. Students will learn about the gendered arrangements in a variety of social contexts such as education, the media, work and the economy, and the family.

SOC 425 - Environment and Society

3 Credit(s)

The primary objective of this course is to look at the ways in which human societies - their values, behaviors, traditions, beliefs, institutions, and governments - relate to and impact the physical environment. Topics explored include: environmental movements, globalization environmental management, and government and economic policies.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 430 - Social Movements

3 Credit(s)

This course is designed to provide an analysis of social movements on a broad array of topics including issues of how they form, why they form, when are they successful, and whether they change society. We will be looking at broader historical movements from the civil rights movement, the environmental movement and the feminist movement as well as more recent movements, on race, class and gender issues. We will look at how they relate to diversity and equity, social justice, globalization, and cultural change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 440 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily research, case study, and discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

SOC 444 - Deviance and Control

3 Credit(s)

The sociology of deviance and control examines the nature of rule-making and rule-breaking in modern societies. The course includes theoretical considerations of the causes and consequences of deviance.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 479 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

Note:

- For students choosing the Criminology emphasis: SOC 352, SOC 370, and SOC 470 are also available as elective courses.
- For students choosing the Social Work emphasis: SOC 346, SOC 347, and SOC 447 are also available as elective courses.

Bachelor of Arts in Sociology, Social Work Emphasis

Go to: Sociology

Note for Sociology Students

- Completion of SOC 201 is a prerequisite for all other sociology courses.
- All Sociology Majors must meet the requirements of the Local Writing Assessment in Sociology as well as the Internship, ePortfolio, and Final Review.

Sociology Required Courses

SOC 201 - Social Imagination GT-SS3

3 Credit(s)

The social world is often taken for granted or reduced to explanations that stem from conventional wisdom and personal experience. This course is designed to encourage students to develop social scientific frameworks for analyzing the social world in a context that transcends conventional wisdom and personal experience. The major question is "what are the social forces, operating in society and often beyond the control of individuals, that shape individual behaviors and societal changes?" Topics include culture, socialization structure, organizational behavior, social groups, deviance, and social institutions (family, religion, education, and political economy).

SOC 245 - Criminology

3 Credit(s)

Criminology is an introductory course to the study of crime and criminal behavior with special emphasis on theories of crime and delinquency causation, rates and extent of crime, and social control agents (i.e., the police, courts, and "corrections"). Special topics examined may include gangs, white-collar crimes, property crimes, victimless crimes, and organized crime.

SOC 251 - Social Problems

3 Credit(s)

This course is designed to provide the student with a survey of selected contemporary social problems. Social problems addressed in the class may include poverty, addiction and substance abuse, mental health, violence with a focus on family violence, crime, teen sexuality and pregnancy, and health care issues. The causes, severity, and consequences of the selected social problems are explored. In addition, strategies for alleviating social problems are presented.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

LS 225 Minimum Grade: C- OR T

SOC 255 - Research And Writing in Sociology

3 Credit(s)

This introductory course in social research and writing in sociology offers an overview of how sociologists study the social world, research social phenomena, and write about their findings. This class provides an overview of knowledge production and methods used by sociologists to develop a research agenda, test hypotheses, and refine theories and sociological inquiry. Students will gain the tools needed to conduct social research while also developing the skills necessary to read and critically evaluate sociological research. Students will learn fundamental concepts and mixed methods approach to sociological research. Students will summarize research and identify (1) the research question, (2) assumptions and propositions of the theory, (3) specific hypothesis, (4) methods used, and (5) the findings and results.

Prerequisite(s):

SOC 201 minimum grade C-

SOC 311 - Social Statistics

4 Credit(s)

This course presents a general overview of the statistical methods most commonly used in sociology and the social sciences. As a laboratory component, students will become proficient in SPSS, a computer program designed to aid statistical analysis. These skills will enable the student to read popular applications of statistics in the media with a critical eye; assess the use of statistics in the professional sociological literature; and use statistical tools to answer the sociological questions of interest.

Prerequisite(s):

SOC 255 Minimum Grade: C-

AND

MATH 104 Minimum Grade: C- or T

OR

MATH 106 Minimum Grade: C- or T

OR

MATH 110 Minimum Grade: C- or T

OR

MATH 120 Minimum Grade: C- or T

SOC 318 - Race, Class, and Gender

3 Credit(s)

The focus of this course is on the interrelated ascribed statuses of "race," social class, gender, and sexual orientation in American society, how they are perceived and reinforced, the social tensions that result and the dynamics of change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 395 - Pre-Professional Seminar

2 Credit(s)

This course provides an introduction to the profession of sociology and the various career options available to graduates. Occupational and graduate school options are explored in detail through library research, presentations, observational and volunteer experiences, and informational interviews. Skills for job interviewing, resume development, and professional correspondence are explored.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 445 - Sociological Theory

3 Credit(s)

The major theories of society are covered in their classical and contemporary forms.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 455 - Qualitative Research Methods

4 Credit(s)

This course is designed to expose students to a variety of qualitative research methods. Students will be instructed in the fundamentals of research design and implementation, including ethical considerations. Students will read and study the research projects of selected sociologists. Students will engage in multiple hands-on activities to practice research methods. Each student will design a qualitative research project. In the lab component of the course, students will analyze and interpret qualitative data. Finally, students will learn to conduct content analysis, and use grounding theory to code and analyze their data and write a final project report. This course includes a lab day each week and is a 4-credit course.

Prerequisite(s):

SOC 201 Minimum Grade: C-
AND

SOC 255 Minimum Grade: C-

SOC 493 - Internship in Sociology

3 Credit(s)

Students in Sociology are placed at an internship site in the community and conduct a mentored capstone case study. Ninety hours of service with the agency are required. The student is supervised by both a Sociology faculty member and a representative from the human service agency. Instructor approval required for registration purposes.

Prerequisite(s):

Special permission and senior standing.

Social Work Emphasis

SOC 352 - Social Work Practices

3 Credit(s)

This course is an introduction to the nuts-and-bolts of social work practice. The course is designed with several general objectives in mind: (1) to familiarize the student with specific techniques of social work such as the person-in-environment approach and case management, (2) to provide a fundamental understanding of roles of community and family in social work practice, (3) to explore the needs of selected special populations in the community, (4) to identify the biological, psychological, and social influences on development and behavior across the life cycle, and (5) to introduce the student to fundamental social work practice skills.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

AND

SOC 251 Minimum Grade: C- OR T

SOC 470 - Social and Public Programs

3 Credit(s)

This course analyzes the historical development, current content, and adequacy of social welfare policies in the United States. Specific policy areas to be discussed include income maintenance (including social insurance and public assistance), mental health, health care, and aging.

Prerequisite(s):

SOC 352 Minimum Grade: C- OR T

Choose 1 of the following electives

SOC 320 - Marriages and Families

3 Credit(s)

This course will provide an overview of the family from a sociological perspective. The family is considered to be one of the most private and pervasive institutions in society. All of us have had contact with at least one family, and many of us will be involved in several different families during our lifetime. Our experiences point to the numerous transformations in family life. To obtain a better understanding of these changes, recent sociological research and data on the family will be utilized in this course. In addition to examining the history of the family, the course will study the contemporary family and its diversity. The course will examine traditional marriage/family arrangements and alternative processes of mate selection and family formation. Finally, the course will examine parenting, the relationship between work and family, divorce and reconstituted families.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 370 - Poverty and Wealth

3 Credit(s)

This course examines the historical and socio-cultural factors which influence the creation and maintenance of poverty and wealth. Emphasis will be on structural factors and theoretical explanations of poverty and inequality. This course will also focus on the implications for policy and social programs aimed at poverty and other social class issues. In addition, there will be exploration of systems of power, privilege, and domination that are central to the American

social structure. Finally, the issues of empowerment, resistance, and solutions to social inequality will be assessed.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 251 Minimum Grade: C- OR T

Choose 2 Courses from these Sociology Electives

SOC 279 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 305 - Rural Sociology

3 Credit(s)

The purpose of this course is to introduce some of the social, political, environmental, and economic problems and prospects associated with rural America. Special attention will also be given rural community services and social institutions, with some focus on the San Luis Valley and other parts of rural Colorado.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 315 - Sociology of Education

3 Credit(s)

This course explores the relationship between education and society with special emphasis on the effects of this relationship on the lives of students in the American education system.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 320 - Marriages and Families

3 Credit(s)

This course will provide an overview of the family from a sociological perspective. The family is considered to be one of the most private and pervasive institutions in society. All of us have had contact with at least one family, and many of us will be involved in several different families during our lifetime. Our experiences point to the numerous transformations in family life. To obtain a better understanding of these changes, recent sociological research and data on the family will be utilized in this course. In addition to examining the history of the family, the course will study the contemporary family and its diversity. The course will examine traditional marriage/family arrangements and alternative processes of mate selection and family formation. Finally, the course will examine parenting, the relationship between work and family, divorce and reconstituted families.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 345 - Women, Sport, and Society**3 Credit(s)**

This course will explore how women have been involved in sports and athletics, how they have fought to claim recognition and legitimacy among historically male dominated settings, and how they continue to shape sports and the role of women in society. We will explore a wide variety of topics in society related to women in sports including historical influences, equitable access, characteristics of female sport participation, sport opportunities, and sport leadership. Topics will include Title IX, female bodies and physiology, sport diversity, gender identity, women's sport and aging, disabilities, sport and sexual violence, media and women's portrayal in sports, competitive sports in high school, college, and professional leagues, and marketing women's sports.

SOC 347 - Juvenile Delinquency**3 Credit(s)**

This course describes the nature of delinquency, including the trends, characteristics, and causes of juvenile delinquency. In addition, the course will examine theories of delinquency, social influences on delinquency, historical and contemporary overviews of the juvenile justice system, and the juvenile justice process from police involvement to the court system and corrections. Finally, methods of treatment and prevention will be identified.

SOC 348 - Women and Crime**3 Credit(s)**

This course will address the role women play as criminals, victims, and professionals in the criminal justice system. This course will examine the important intersection between gender and crime, exploring the nature and extent of women's involvement in the criminal justice system. The course will investigate and discuss the relationship between victimization and offending, and study the unique way women are involved in and impacted by the criminal justice system, with case study examples from real crimes.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 365 - Race and Ethnicity in the U.S.**3 Credit(s)**

This course provides a sociological approach to race and ethnic relations in the U.S. today. This course introduces the basic sociological theories and perspectives related to the study of race and ethnicity, the histories, and present status of different racial and ethnic groups in the United States and raises questions about continuing racial discrimination and inequality in our society. Issues of defining race, racial identity, interpersonal and institutional discrimination, segregation, and affirmative action (among others) are explored.

SOC 370 - Poverty and Wealth**3 Credit(s)**

This course examines the historical and socio-cultural factors which influence the creation and maintenance of poverty and wealth. Emphasis will be on structural factors and theoretical explanations of poverty and inequality. This course will also focus on the implications for policy and social programs aimed at poverty and other social class issues. In addition, there will be exploration of systems of power, privilege, and domination that are central to the American social structure. Finally, the issues of empowerment, resistance, and solutions to social inequality will be assessed.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T
AND

SOC 251 Minimum Grade: C- OR T

SOC 379 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

SOC 391 - Sociology of Religion

3 Credit(s)

This course will introduce students to an examination of religion through sociological inquiry and imagination. Students will learn how sociologists study religion and will apply classical and contemporary sociological theories to understand both personal religious experiences/identities and organized religion as a social phenomenon. The course explores socialization into religions, the processes of conversion and apostasy, and various forms of organizational structures for religious groups. Other issues to be explored include how religious identity and structure connect to gender, race, sexuality, and social class; competition and conflict between different religious groups; as well as the tension between religion as a social institution and secularization trends in the contemporary US.

Prerequisite(s):

Junior standing

SOC 401 - Self & Society

3 Credit(s)

This course will look at social psychology from a sociological perspective. More specifically, students will utilize the symbolic interactionist theory to examine how identities, selves, social life, and social reality are products of ongoing social interactions.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 419 - Gender and Society

3 Credit(s)

The aim of the course is for students to become familiar with the continuing differences and inequalities between women and men in the contemporary United States, and to begin to explain why and how they occur through a sociological lens. Understanding gender as it relates to other social identities (for example, race, class and sexuality) is

an important organizing framework of the course. Students will learn about the gendered arrangements in a variety of social contexts such as education, the media, work and the economy, and the family.

SOC 425 - Environment and Society

3 Credit(s)

The primary objective of this course is to look at the ways in which human societies - their values, behaviors, traditions, beliefs, institutions, and governments - relate to and impact the physical environment. Topics explored include: environmental movements, globalization environmental management, and government and economic policies.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 430 - Social Movements

3 Credit(s)

This course is designed to provide an analysis of social movements on a broad array of topics including issues of how they form, why they form, when are they successful, and whether they change society. We will be looking at broader historical movements from the civil rights movement, the environmental movement and the feminist movement as well as more recent movements, on race, class and gender issues. We will look at how they relate to diversity and equity, social justice, globalization, and cultural change.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 440 - Diversity in Media

3 Credit(s)

Students will analyze how US media represents traditionally marginalized people in the United States. The course will be primarily research, case study, and discussion based, with students and instructor working together to generate ideas and critique dominant ideologies.

SOC 444 - Deviance and Control

3 Credit(s)

The sociology of deviance and control examines the nature of rule-making and rule-breaking in modern societies. The course includes theoretical considerations of the causes and consequences of deviance.

Prerequisite(s):

SOC 201 Minimum Grade: C- OR T

SOC 479 - Special Topics

1 to 5 Credit(s)

Offered periodically to meet student special interests in the field.

Note:

- For students choosing the Criminology emphasis: SOC 352, SOC 370, and SOC 470 are also available as elective courses.
- For students choosing the Social Work emphasis: SOC 346, SOC 347, and SOC 447 are also available as elective courses.

Bachelor of Science in Business Administration, Accounting Emphasis

Go to: Business

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T
AND

BUS 304 Minimum Grade: C- OR T
AND

BUS 361 Minimum Grade: C- OR T
AND

BUS 363 Minimum Grade: C- OR T
AND

ECON 255 Minimum Grade: C- OR T
AND

ECON 256 Minimum Grade: C- OR T

Accounting Emphasis

BUS 305 - Intermediate Accounting I

4 Credit(s)

The first of a two-course sequence of Intermediate Accounting designed to develop a framework for the role financial accounting plays in the world of business. A study of the conceptual basis of accounting will be conducted, creating a more in-depth understanding of the preparation and interpretation of financial statements and related information. This course will focus on the study of modern-day accounting theory and application of generally accepted accounting principles to various topics and financial statement elements. Students will be introduced to the U.S. Accounting Standards Codification and basic research tools.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 306 - Intermediate Accounting II

4 Credit(s)

The second of a two-course sequence of Intermediate Accounting designed to develop a framework for the role financial accounting plays in the world of business. A study of the conceptual basis of accounting will be conducted, creating a more in-depth understanding of the preparation and interpretation of financial statements and related information. This course will focus on the study of modern-day accounting theory and application of generally accepted accounting principles to various topics and financial statement elements. Students will continue their use of the U.S. Accounting Standards Codification as a research tools.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

BUS 307 - Managerial Cost Accounting I

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 360 - Government and Institution Accounting

3 Credit(s)

Study of accounting procedures related to governmental units and nonprofit institutions.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

BUS 405 - Advanced Accounting

4 Credit(s)

BUS-405 involves preparation and study of the need for consolidated financial statements. Additionally, it examines accounting problems associated with partnerships and foreign currency transactions.

Prerequisite(s):

BUS 306 Minimum Grade: C- OR T

BUS 407 - Auditing I

3 Credit(s)

Study of ethical standards, auditing standards, audit procedures, and evolution of internal control to learn how financial statements are examined and audit reports prepared in accordance with Generally Accepted Auditing Standards.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T
AND

BUS 306 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 409 - Fraud Examination

3 Credit(s)

This class will explain how occupational fraud is committed, how fraudulent conduct can be deterred and how allegations of fraud should be investigated and resolved.

Prerequisite(s):

BUS 305 Minimum Grade: C- OR T

BUS 455 - Entity Taxation

4 Credit(s)

Business 455 concentrates on the federal income tax consequences of the formation, normal operation, and the dissolution of corporations, partnerships, and fiduciaries. Other taxation problems of special interest may be covered.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

Electives

BUS 308 - Managerial Cost Accounting II

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 307 Minimum Grade: C- OR T

BUS 358 - Accounting Ethics

3 Credit(s)

Ethics as it applies to the accounting and auditing professions and will be the focus of this course. Emphasis will be on the concept of independence, along with integrity, objectivity, ethical reasoning, and other core values necessary for a high level of professional ethics in the accounting profession.

Prerequisite(s):

BUS 306 Minimum Grade: C- OR T

BUS 371 - Payroll Accounting and Taxation

3 Credit(s)

This course is devoted to the principles of payroll computations and administration including creation and maintenance of payroll records as well as proper payroll tax depositing and reporting.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 377 - Agricultural Taxation

3 Credit(s)

This course is devoted to specific income tax laws associated with agricultural business to include farmers and ranchers both as individuals and as part of taxable entities.

Prerequisite(s):

BUS 355 Minimum Grade: C- OR T

BUS 465 - Estate, Gift, and Fiduciary Tax Law

3 Credit(s)

This course will address the fundamentals of Estate, Gift, and Fiduciary tax law. Topics will include Federal Gift Tax, death transfer tax laws, and fundamentals and reporting returns for estates.

Prerequisite(s):

BUS 455 Minimum Grade: C- OR T

Bachelor of Science in Business Administration, Agribusiness Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both

defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Agribusiness Emphasis

BUS 105 - Introduction to Agribusiness

3 Credit(s)

An introductory course designed to provide students with a basic background in agribusiness issues and practices to give them the foundation to be successful in upper level agribusiness courses and meet expectations for basic knowledge in agribusiness relationships.

BUS 364 - Agribusiness Management

3 Credit(s)

Management issues of agricultural businesses such as the forms of ownership, financial statements, analysis, and planning, investment analysis, strategic marketing, management of organizations, and human resources management.

Prerequisite(s):

BUS 105 Minimum Grade: C- OR T

AND

BUS 207 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

BUS 378 - Commodities/Risk Management

3 Credit(s)

The goal of this course is to provide students with knowledge of risk management for agricultural endeavors as well as practical knowledge of how the futures and options markets work, how to manage risk involved in agriculture production or operation, and various tools available to manage specific situations. BUS 103 Introduction to Business or instructor consent. BUS 105 Introduction to Agribusiness or instructor consent. BUS 318 Principles of Management or instructor consent.

Prerequisite(s):

BUS 103 Minimum Grade: D OR T

AND

BUS 105 Minimum Grade: D OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 384 - Natural Resources/Water Law

3 Credit(s)

The goal of this course is to provide students with knowledge of the regulatory responsibilities related to agriculture production and operations with respect to natural resources and water. The course will cover federal, state, and local requirements as well as application to agribusiness endeavors.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 211 Minimum Grade: C- OR T

BUS 398 - Farm and Ranch Management

3 Credit(s)

The application of economic and business principles to the management and operation of farms and ranches for decision making purposes.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 207 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 478 - Agricultural Marketing

3 Credit(s)

An overview of current marketing methods used for agricultural products and services, including value added marketing.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 488 - Agricultural Policy and Farm Bill

3 Credit(s)

Development and implementation of public policy in agriculture, implications of international competition and trade, and development and interpretation of argument in policy development.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Plus 12 Upper-level Business Credits as Approved by Advisor

Bachelor of Science in Business Administration, Banking and Finance Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Finance Emphasis (21 credits from the following)

BUS 367 - Financial Analysis

3 Credit(s)

Examination of techniques for analyzing, understanding, and applying financial information in decision situations. Topics start with financial statement analysis, development of financial models, financial forecasting, cost of capital estimation, and ends with company valuation. In addition, there will be a "hands on" project to provide students with experience in analyzing and understanding a corporate annual report using EXCEL spread sheet analysis.

Prerequisite(s):

BUS 320 Minimum Grade: C- OR T
AND

BUS 363 Minimum Grade: C- OR T

BUS 368 - Financial Institutions

3 Credit(s)

The course focuses on managing return and risk in modern financial institutions. It examines the financial services

industry risk of financial intermediation, measurement of interest rate risk, credit and market risk, individual loan and liquidity risks, as well as off-balance sheet and sovereign risks. The course covers management of assets and liabilities, capital adequacy and depository insurance. Futures, forwards, options, caps, floors, collars, swaps and securitization will be also covered.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 383 - International Financial Management

3 Credit(s)

A comprehensive study of international financial markets that covers currency exchange mechanisms in theory and practice. In line with the rapid globalization of the economy, the goal of this course is to analyze the international financial environment and how managers function in this increasingly uncertain global environment. The course will focus on three main areas of international finance: international financial environment, exchange rate behavior, and exchange risk management.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 414 - Commercial Banking

3 Credit(s)

Bank Management is an in-depth study of banking institutions, with special emphasis on commercial banks and their connection to the Federal Reserve System and other financial institutions. A risk management perspective is adopted, and the fast changing global regulatory and financial environments are discussed. A Uniform Bank Performance Report will be analyzed.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 416 - Business Financial Problems

3 Credit(s)

Emphasis on financial decision-making within the firm using case studies as the primary activity. Topics include financial goals and strategy, financial analysis and forecasting, capital budgeting, capital structure decisions, dividend policy, and firm valuation.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 426 - Money and Capital Markets

3 Credit(s)

Discussion of how financial markets are organized, their role in the allocation of funds to various market segments, and the interaction between financial markets. Topics include aggregate flow of funds analysis, an overview of financial markets, securities markets (money, bond, mortgage, stock, foreign exchange, derivative securities), as well as commercial banks, insurance and securities companies, mutual and pension funds markets. This course also covers financial markets risks and regulations.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 431 - Tech Analysis of Stock Trends

3 Credit(s)

Advanced studies in technical market analysis and trading, money management, investor psychology and analysis elements are considered. The Focus will be on the study of price action in trading markets, patterns and trends, price behavior of financial securities, trading tactics, and construction of a trading or investment model. The course will help students prepare for the Chartered Market Technician (CMT) designation.

Prerequisite(s):

BUS 373 Minimum Grade: C- OR T

BUS 432 - Series 7 General Securities Exam Review

3 Credit(s)

The Series 7 License Exam Review course is designed to prepare the student to take the National Association of Securities Dealers General Securities Representative Exam. After passing the Series 7 License exam the candidate can be licensed to sell various types of securities.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

AND

BUS 373 Minimum Grade: C- OR T

Plus 6 Credits of any Business or Economics Courses

Bachelor of Science in Business Administration, Economics Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Economics Emphasis

ECON 360 - Natural Resource Economics

3 Credit(s)

This course studies the usage of natural resources in the economy, the value of natural resources to society, and the allocation of renewable and nonrenewable resources. The course introduces economic theories for efficient management of natural resources and considers sustainability, conservation, and preservation. The course will consider resources, such as water, on a local scale as well as a global scale.

ECON 365 - Political Economy

3 Credit(s)

This course offers a critical introduction to the central ideas used by Political Economists to understand the structure, social meaning, and historical development of capitalist economies. Lectures draw on competing traditions in Political Economy to provide a critical appreciation of the defining socio-economic relationships of capitalism, including wages, productivity, profits, inequality, prices, entrepreneurship, markets, capitalism, growth, crises, recessions, socialism, etc. While these discussions necessarily involve economic theory, the overall emphasis is on how an analytically diverse understanding of these relationships can open up unique, critical perspectives into the problems of contemporary capitalism.

ECON 370 - Economics of Crises

3 Credit(s)

This course studies the nature of economic crises in capitalism. The course will explore theories of crises such as

supply-side, demand-side, and financial crises. We will analyze the social consequences of crises as well as the policies implemented.

ECON 425 - Economic Policy

3 Credit(s)

Study of the structure and functions of the U.S. economic system and the use of monetary, fiscal, and other policies to stabilize the economy. Emphasis on historical roots and the evolution into new behavioral economic ideas as well as the complex interplay of policy and economic forces.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T
AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

ECON 433 - Managerial Economics

3 Credit(s)

Application and integration of microeconomic theory and the tools of decision science to managerial decision-making. Particular emphasis placed on the economic differences caused by monopolies, cartels, and multi-national organizations and their domination of many industries. Understanding of game theory and new economic analysis tools.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T
AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

HCA 455 - Health Care Economics

3 Credit(s)

This course will examine health care decision-making and the functioning of health care markets in the U.S. The course is not designed as a pure economics theory course but instead emphasizes how you can frame and analyze various health issues using the principles of economics. By doing so, you will gain a powerful new perspective that will help you understand the decisions made by individuals and organizations in the face of scarce resources. Instructor

permission.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T
AND

ECON 256 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T
AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

A Minimum of 12 Credits from the Following

BUS 307 - Managerial Cost Accounting I

3 Credit(s)

Principles and methods of recording and interpreting cost data. Major emphasis on developing accounting information for planning, control, and decision making.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 320 - Bus Computer Applications II

3 Credit(s)

The focus of this course is to explore application software on a comprehensive level to gain expertise to support decision-making and manage information. Study includes intermediate Word and Excel applications; intermediate to

advanced PowerPoint; intermediate Access, integration of Office applications, and an introduction to HTML and building web pages.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T

BUS 355 - Individual Income Taxation

4 Credit(s)

This course involves the study of federal income tax on individual and property transactions. Objectives of taxation are given major emphasis. The Internal Revenue Code is discussed in addition to textbook material in order to acquaint the student with the ultimate source of tax law. Income tax return problems and tax cases may be assigned to provide practical application of the tax law.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

BUS 373 - Investment Analysis

3 Credit(s)

BUS 318 recommended. The course is a study of personal investment planning, traditional and alternative investment vehicles, investment media, investment strategy, and portfolio analysis. The student will become familiar with both money market and capital investment markets as well as strategies for assessing returns and risks of various security instruments.

Prerequisite(s):

BUS 208 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

BUS 378 - Commodities/Risk Management

3 Credit(s)

The goal of this course is to provide students with knowledge of risk management for agricultural endeavors as well as practical knowledge of how the futures and options markets work, how to manage risk involved in agriculture production or operation, and various tools available to manage specific situations. BUS 103 Introduction to Business or instructor consent. BUS 105 Introduction to Agribusiness or instructor consent. BUS 318 Principles of Management or instructor consent.

Prerequisite(s):

BUS 103 Minimum Grade: D OR T

AND

BUS 105 Minimum Grade: D OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 383 - International Financial Management

3 Credit(s)

A comprehensive study of international financial markets that covers currency exchange mechanisms in theory and practice. In line with the rapid globalization of the economy, the goal of this course is to analyze the international financial environment and how managers function in this increasingly uncertain global environment. The course will focus on three main areas of international finance: international financial environment, exchange rate behavior, and exchange risk management.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 414 - Commercial Banking

3 Credit(s)

Bank Management is an in-depth study of banking institutions, with special emphasis on commercial banks and their connection to the Federal Reserve System and other financial institutions. A risk management perspective is adopted, and the fast changing global regulatory and financial environments are discussed. A Uniform Bank Performance Report will be analyzed.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 416 - Business Financial Problems

3 Credit(s)

Emphasis on financial decision-making within the firm using case studies as the primary activity. Topics include financial goals and strategy, financial analysis and forecasting, capital budgeting, capital structure decisions, dividend policy, and firm valuation.

Prerequisite(s):

BUS 363 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

Bachelor of Science in Business Administration, Entrepreneurship Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

Entrepreneurship Emphasis

BUS 315 - Sales and Sales Management

3 Credit(s)

This course is designed to introduce students to management techniques as they relate specifically to the marketing and sales area. Topics covered include: the selling process, compensation systems, motivation and leadership, time and territory management, sales forecasting, quotas, and evaluating the sales force.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 365 - Small Business Management/Entrepreneurship

3 Credit(s)

This course presents the techniques and information necessary to create a comprehensive business plan for an entrepreneurial idea. Coursework addresses feasibility analysis, management, marketing, technology, and financial

plans, culminating in presentation of a viable business plan.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

BUS 448 - Interactive/Social Media Marketing

3 Credit(s)

This course focuses on relationship marketing, interactive marketing, integration of consumer data, Internet marketing (E-commerce), media advertising, catalogs, mailing lists, telemarketing, and the use of direct marketing techniques to replace or enhance the traditional marketing methods of retail and direct sales.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 467 - Creativity and Innovation

3 Credit(s)

Course objectives are to develop skills in generating new and original ideas, increase ability to convert ideas into action and success, and increase knowledge and skill in creative problem solving as applied to business scenarios.

Prerequisite(s):

BUS 361 Minimum Grade: C-

BUS 468 - New Business Venturing

3 Credit(s)

This course introduces students to starting and operating a business. Students will be exposed to how business interacts

with government, financial institutions, and society. This course will examine and study the process, challenges, risks, and rewards of starting up a new business. The student will be equipped with tools required to start their own business.

Prerequisite(s):

BUS 365 Minimum Grade: C-

Plus 6 Credits of 300- to 400-level business or economics courses approved by the student's advisor

Bachelor of Science in Business Administration, General Business Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

Health Care Administration Emphasis

HCA 303 - Trends and Issues in Health Care

3 Credit(s)

This course is an introductory Health Care Administration course and will expose the student to the industry and its significant elements and trends of the current health care environment.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 311 - Health Care Law and Ethics

3 Credit(s)

This course presents an overview of the legal and ethical issues faced by health care consumers, practitioners, and administrators. The course will introduce students to the legal aspects of health care at the federal, state, and local levels. Topics covered will include criminal and civil claims against health care providers, corporate and individual liability, and legal and ethical decision-making, individual liability, and legal and ethical decision-making. HCA 361 Health Care Administration. Instructor permission.

Prerequisite(s):

BUS 211 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 312 - Health Care Med Terminology

3 Credit(s)

This course will focus on the components of medical terms and the methods for analysis of word definitions. The emphasis will be on learning to define, pronounce, and spell medical terms using prefixes, suffixes, roots, and combining forms related to the anatomy and physiology of the human body. The course will include an introduction to operative, diagnostic, therapeutic, and symptomatic terminology of all body systems.

HCA 325 - Health Care Informatics

3 Credit(s)

This course is a study of record keeping practices in the hospital and physician's office. Emphasis is placed in hospital and medical staff organization, patient record content, procedures in filing, numbering and retention of patient records, quantitative analysis, release of patient information, forms control and design, indexes and registers, reimbursement, regulatory and accrediting agencies, and alternate health care delivery systems. Instructor permission required.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

BUS 362 - Human Resource Management

3 Credit(s)

Analysis of techniques used to organize, motivate, and manage personnel in public or private organizations. Includes case studies and examines current literature and the current legal environment..

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

HCA 363 - Health Care Finance

3 Credit(s)

This course is devoted to the practical aspects of finance in health care, an examination of current practices in financial management of health care organizations, and managerial applications to specific problems facing health care managers. The first part of the course will focus on an overview of health care finance, managerial accounting, and financial analysis. The second part will continue with managerial accounting and financial analysis and will concentrate on the various tools used in financial management. Emphasis is placed on unique issues and concerns that result from the regulatory framework of health care organizations. At the conclusion of this course, the student should be able to discuss the financial structure, market forces, controls and techniques used in the health care management field, be able to read and analyze financial statements and budgets and have the skill to interpret financial and operating performance.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 402 - Public and Population Health

3 Credit(s)

This course consists of an examination of epidemiological concepts and methods of studying the distribution and determinants of morbidity and mortality in human population. The knowledge and skills acquired should enable one to understand and critically review scientific literature dealing with epidemiology concepts and measures. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 455 - Health Care Economics

3 Credit(s)

This course will examine health care decision-making and the functioning of health care markets in the U.S. The course is not designed as a pure economics theory course but instead emphasizes how you can frame and analyze various health issues using the principles of economics. By doing so, you will gain a powerful new perspective that will help you understand the decisions made by individuals and organizations in the face of scarce resources. Instructor permission.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 462 - Quality Management in Health Care

3 Credit(s)

Quality is an important aspect of health care; indeed, for most people, it is the most important aspect. Quality is defined in the dictionary as "degree of excellence" or "superiority in kind." Quality of care must be part of both the process and outcome of health care whenever possible. The issue is how does the system develop mechanisms to assure such quality? This course serves as an introduction to the process of quality management in health care organizations. Principles of total quality in health care will be discussed. Differentiation between quality assurance and quality management will also be presented. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 480 - Health Care Policy

3 Credit(s)

This course is an introduction to health policy. It will focus on how U.S. health policy is developed and will provide students with a general understanding of the policy making process and debates related major U.S. health care legislations.

Prerequisite(s):

HCA 303 Minimum Grade: C- OR T
AND

HCA 305 Minimum Grade: C- OR T

AND

HCA 363 Minimum Grade: C- OR T

BUS 466 - Business Ethics Decision Making

3 Credit(s)

This course explores various ethical issues facing business leaders in modern society. Students will utilize current issues to analyze ethical dilemmas and decision-making processes common to modern organizations. Emphasizes critical thinking, critical reading, and the importance of professional ethics.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

Plus 3 Credits from the following

ECON 425 - Economic Policy

3 Credit(s)

Study of the structure and functions of the U.S. economic system and the use of monetary, fiscal, and other policies to stabilize the economy. Emphasis on historical roots and the evolution into new behavioral economic ideas as well as the complex interplay of policy and economic forces.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

ECON 433 - Managerial Economics

3 Credit(s)

Application and integration of microeconomic theory and the tools of decision science to managerial decision-making. Particular emphasis placed on the economic differences caused by monopolies, cartels, and multi-national organizations and their domination of many industries. Understanding of game theory and new economic analysis tools.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

Plus 6 Credits of of 300 to 400 level business or economics courses approved by the student's advisor

Bachelor of Science in Business Administration, Marketing Emphasis

Business Administration Required Courses

BUS 103 - Introduction to Business

3 Credit(s)

An overview of business and economics for the non-major, and a first step for all business majors. The course both defines and applies the fundamental principles of economics, management, marketing, management information systems (MIS), accounting and finance, including personal finance.

BUS 120 - Bus Computer Applications I

3 Credit(s)

The focus of this course is to provide first and second year students with the computer and information system skills to support computer requirements for the School of Business program and meet essential business career demands. The course will cover an introduction to computers and information system technologies. In addition, the goal of the course is to learn basic skills in the Windows operating system, Internet essentials, and Microsoft Office.

BUS 207 - Principles of Accounting I

3 Credit(s)

Course begins with necessary bookkeeping skills for recording simple financial transactions and preparing basic financial statements. Theory behind accounting rules is emphasized so the student can apply knowledge gained to ever changing real-world situations.

BUS 208 - Principles of Accounting II

3 Credit(s)

Continuation of BUS 207. Covers accounting for capital provided through the partnership and corporate forms of business enterprise. At the conclusion of this course, the student will be able to read and interpret the three principal financial statements: the income statement, balance sheet, and statement of changes in financial position. Topics related to managerial accounting also covered.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T

BUS 211 - Business Law

3 Credit(s)

Study of the legal principles pertaining to contracts, agency, negotiable instruments, corporations, partnerships, and government regulations. Research of actual cases is required.

ECON 255 - Macroeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the national economy and macroeconomic principles: including opportunity cost, production possibility curve, demand and supply, fiscal and monetary policy, market failures, and the workings of the market system. Analysis of the changes in economic policies from a now globalized economy

ECON 256 - Microeconomics Principles GT-SS1

3 Credit(s)

Detailed understanding of the micro approach to the workings of the market system focusing on the individual and the firm and the economic tools needed to operate efficiently.

BUS 265 - Business Communications

3 Credit(s)

Emphasizes advanced business writing, verbal and non-verbal expression and communication, and presentation skills for contemporary business environments. This course explores the communication process used to strengthen personal and thus business relationships by preparing specific forms of business communication. Team communication, ethical communication, and multi-cultural communication are discussed in this course.

Prerequisite(s):

ENG 101 Minimum Grade: C- OR T

BUS 304 - Principles of Marketing

3 Credit(s)

Description and analysis of the marketing mix variables (Price, Place, Product, Promotion). Study of the various institutions involved in marketing. Emphasis on the methods available to marketers for building long-term relationships with customers. The importance of a customer perspective is stressed.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

BUS 318 - Business Statistics

3 Credit(s)

Provides a basic understanding of the fundamental principles with emphasis on the application of statistical techniques to the analysis and solution of real business problems.

Prerequisite(s):

MATH 104 Minimum Grade: C- OR T
OR

MATH 106 Minimum Grade: C- OR T

OR

MATH 107 Minimum Grade: C- OR T

OR

MATH 120 Minimum Grade: C- OR T

BUS 361 - Principles of Management

3 to 4 Credit(s)

Explores theory and practice of managing an organization and its personnel with emphasis on planning, designing, and controlling to meet the needs of modern public or private organizations. Includes emerging trends and international issues.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 430 - Production and Operations Mgmt

3 Credit(s)

Application of managerial decision making and quantitative analysis techniques. Covers forecasting, inventory models, utilization profiles, bottleneck analysis, wait time analysis, and revenue management models. Focus on the Toyota Production System and lean production by conduction process analysis and capacity planning, design of work systems, location planning, quality control, scheduling, and project management

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

MATH 104 Minimum Grade: C- OR T

BUS 480 - Global Business Strategies

3 Credit(s)

Senior status required. Designed to help students understand planning activities, determination of alternatives, policy formulation, execution of plans and development of corporate company strategy as currently used by business enterprises. Involves extensive case study.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

BUS 208 Minimum Grade: C- OR T

AND

BUS 304 Minimum Grade: C- OR T

AND

BUS 361 Minimum Grade: C- OR T

AND

BUS 363 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

Marketing Emphasis

BUS 315 - Sales and Sales Management

3 Credit(s)

This course is designed to introduce students to management techniques as they relate specifically to the marketing and sales area. Topics covered include: the selling process, compensation systems, motivation and leadership, time and territory management, sales forecasting, quotas, and evaluating the sales force.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 335 - Consumer Behavior

3 Credit(s)

Study of consumer behavior as it relates to the marketing functions. Emphasis on the models of consumer behavior and their application to practical marketing problems.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 345 - Advertising

3 Credit(s)

Discusses the history, purposes, and regulations of the advertising industry. Topics covered include creative principles, media advantages and disadvantages, media planning, regulation of advertising, and coordination with other promotion activities.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 448 - Interactive/Social Media Marketing

3 Credit(s)

This course focuses on relationship marketing, interactive marketing, integration of consumer data, Internet marketing (E-commerce), media advertising, catalogs, mailing lists, telemarketing, and the use of direct marketing techniques to replace or enhance the traditional marketing methods of retail and direct sales.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 454 - Market Research & Information

3 Credit(s)

Study of the theory and methods used in marketing research to address marketing problems. May include the completion of a research project where students learn by performing a research project from problem formulation to writing a research report. Also prepares the students for evaluating research performed by others.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

BUS 460 - Marketing Management

3 Credit(s)

Twelve hours of marketing courses and senior status required. Capstone course in marketing. Study of the problems faced by marketing managers as they make decisions and develop policies.

Prerequisite(s):

BUS 454 Minimum Grade: C- OR T

Plus any 3 Courses from the Following

BUS 356 - Retailing

3 Credit(s)

Study of marketing and management problems faced in the operation of a retail business. Emphasis is given to techniques for solving problems in location, management, and merchandising, especially with the integration of Internet retailing (E-Tailing) as both a competitor and an extension of the storefront business.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 385 - Sports Marketing

3 Credit(s)

Illustrates the dynamic, progressive and influential nature of sports marketing. Explores the sport marketing concept as a consumer-driven, integrated, goal-oriented philosophy for a team, event, organization or athlete. Topics covered include: athletic endorsements, team sports, event sponsorships and alternative sports.

BUS 441 - International Marketing

3 Credit(s)

Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods. This is accomplished through real life planning and implementation of an international marketing plan designed to market a product or service in a foreign country or countries

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

BUS 449 - Marketing in the 21st Century

3 Credit(s)

This course provides the practical tools and strategies required to successfully leverage social networks, capitalize on their powerful word-of-mouth lift, and how to measure these interactive marketing efforts. These tools will be used on an actual social media marketing campaign for a business or non-profit entity. Current and future marketing tools will be discussed and evaluated.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T

AND

BUS 448 Minimum Grade: C- OR T

HCA 305 - Health Care Marketing

3 Credit(s)

This course involves an analysis, evaluation, and implementation of marketing strategies within health care and managed-care environments. Designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models

of marketing fundamentals will be introduced.

Prerequisite(s):

BUS 304 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

Bachelor of Science in Business Administration, Systemic Change and Communities Emphasis

AND

ECON 256 Minimum Grade: C- OR T

Systemic Change and Communities Emphasis

24 credits from the following (8 Classes) is Required

BUS 316 - Public and Nonprofit Mgmt

3 Credit(s)

This course is designed to examine public and nonprofit management. This type of management is driven by mission and/or executive/legislative directions. It is not about the bottom line or profit. Students will learn both the theory and practice of public and nonprofit management, using the concept case method and service learning opportunities.

BUS 363 - Managerial Finance

3 Credit(s)

A comprehensive study of the field of finance, covering institutions, financial markets, investments, and financial theory and techniques relating to financial decisions in business. Topics include risk and rates of return, time value of money, stocks and bonds characteristics and valuation, cost of capital, capital budgeting techniques, dividend policy, analysis of financial statements, and working capital policy.

Co-requisite(s): BUS 208 BUS 318 ECON 255 ECON 256

BUS 419 - Organizational Change/Develop

3 Credit(s)

The study of planned and unplanned change in organizations to include diagnosis, planning, and implementation of organizational change initiatives. Emphasis is on teamwork within organizations and survey development.

Prerequisite(s):

BUS 361 Minimum Grade: C- OR T

BUS 488 - Agricultural Policy and Farm Bill

3 Credit(s)

Development and implementation of public policy in agriculture, implications of international competition and trade, and development and interpretation of argument in policy development.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

BUS 318 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

BUS 498 - World Food Distribution/Agricultural Economics

3 Credit(s)

Knowledge and application of economic concepts to the sectors of agriculture including microeconomic and macroeconomic relationships, world markets, and trade.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

AND

BUS 105 Minimum Grade: C- OR T

AND

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

ECON 360 - Natural Resource Economics

3 Credit(s)

This course studies the usage of natural resources in the economy, the value of natural resources to society, and the allocation of renewable and nonrenewable resources. The course introduces economic theories for efficient management of natural resources and considers sustainability, conservation, and preservation. The course will consider resources, such as water, on a local scale as well as a global scale.

ECON 365 - Political Economy

3 Credit(s)

This course offers a critical introduction to the central ideas used by Political Economists to understand the structure, social meaning, and historical development of capitalist economies. Lectures draw on competing traditions in Political Economy to provide a critical appreciation of the defining socio-economic relationships of capitalism, including wages, productivity, profits, inequality, prices, entrepreneurship, markets, capitalism, growth, crises, recessions, socialism, etc. While these discussions necessarily involve economic theory, the overall emphasis is on how an analytically diverse understanding of these relationships can open up unique, critical perspectives into the problems of contemporary capitalism.

ECON 370 - Economics of Crises

3 Credit(s)

This course studies the nature of economic crises in capitalism. The course will explore theories of crises such as supply-side, demand-side, and financial crises. We will analyze the social consequences of crises as well as the policies implemented.

ECON 425 - Economic Policy

3 Credit(s)

Study of the structure and functions of the U.S. economic system and the use of monetary, fiscal, and other policies to stabilize the economy. Emphasis on historical roots and the evolution into new behavioral economic ideas as well as the complex interplay of policy and economic forces.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

MATH 104 Minimum Grade: C- OR T

OR

MATH 106 Minimum Grade: C- OR T

HCA 402 - Public and Population Health

3 Credit(s)

This course consists of an examination of epidemiological concepts and methods of studying the distribution and determinants of morbidity and mortality in human population. The knowledge and skills acquired should enable one to understand and critically review scientific literature dealing with epidemiology concepts and measures. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 455 - Health Care Economics

3 Credit(s)

This course will examine health care decision-making and the functioning of health care markets in the U.S. The course is not designed as a pure economics theory course but instead emphasizes how you can frame and analyze various health issues using the principles of economics. By doing so, you will gain a powerful new perspective that will help you understand the decisions made by individuals and organizations in the face of scarce resources. Instructor permission.

Prerequisite(s):

ECON 255 Minimum Grade: C- OR T

AND

ECON 256 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 462 - Quality Management in Health Care

3 Credit(s)

Quality is an important aspect of health care; indeed, for most people, it is the most important aspect. Quality is defined in the dictionary as "degree of excellence" or "superiority in kind." Quality of care must be part of both the process and outcome of health care whenever possible. The issue is how does the system develop mechanisms to assure such quality? This course serves as an introduction to the process of quality management in health care organizations. Principles of total quality in health care will be discussed. Differentiation between quality assurance and quality management will also be presented. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

Plus 12 hours of upper level courses as determined in consultation with your advisor

Health Administration Certificate (Undergraduate)

Go to: Business

Courses (16 credits total)

HCA 303 - Trends and Issues in Health Care

3 Credit(s)

This course is an introductory Health Care Administration course and will expose the student to the industry and its significant elements and trends of the current health care environment.

Prerequisite(s):

BUS 103 Minimum Grade: C- OR T

HCA 311 - Health Care Law and Ethics

3 Credit(s)

This course presents an overview of the legal and ethical issues faced by health care consumers, practitioners, and administrators. The course will introduce students to the legal aspects of health care at the federal, state, and local levels. Topics covered will include criminal and civil claims against health care providers, corporate and individual liability, and legal and ethical decision-making, individual liability, and legal and ethical decision-making. HCA 361 Health Care Administration. Instructor permission.

Prerequisite(s):

BUS 211 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 325 - Health Care Informatics

3 Credit(s)

This course is a study of record keeping practices in the hospital and physician's office. Emphasis is placed in hospital and medical staff organization, patient record content, procedures in filing, numbering and retention of patient records, quantitative analysis, release of patient information, forms control and design, indexes and registers, reimbursement, regulatory and accrediting agencies, and alternate health care delivery systems. Instructor permission required.

Prerequisite(s):

BUS 120 Minimum Grade: C- OR T

AND

HCA 303 Minimum Grade: C- OR T

HCA 363 - Health Care Finance

3 Credit(s)

This course is devoted to the practical aspects of finance in health care, an examination of current practices in financial management of health care organizations, and managerial applications to specific problems facing health care managers. The first part of the course will focus on an overview of health care finance, managerial accounting, and financial analysis. The second part will continue with managerial accounting and financial analysis and will concentrate on the various tools used in financial management. Emphasis is placed on unique issues and concerns that result from the regulatory framework of health care organizations. At the conclusion of this course, the student should be able to discuss the financial structure, market forces, controls and techniques used in the health care management field, be able to read and analyze financial statements and budgets and have the skill to interpret financial and operating performance.

Prerequisite(s):

BUS 207 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

HCA 402 - Public and Population Health

3 Credit(s)

This course consists of an examination of epidemiological concepts and methods of studying the distribution and determinants of morbidity and mortality in human population. The knowledge and skills acquired should enable one to understand and critically review scientific literature dealing with epidemiology concepts and measures. Instructor permission.

Prerequisite(s):

BUS 318 Minimum Grade: C- OR T
AND

HCA 303 Minimum Grade: C- OR T

BUS 179 - Special Topics

1 to 3 Credit(s)

Offered periodically to meet student special interests in the field.

Master of Business Administration, Finance Emphasis

Master of Business Administration

Online delivery allows today's busy working professional the opportunity to participate in a program without putting your career on hold. Whether you travel extensively, have a job that prevents you from attending traditional on-campus classes, or have family obligations that limit your available time, the flexibility of online delivery brings the Adams State University M.B.A. program to you, on your schedule.

The online M.B.A. curriculum is well suited for people with either business or non-business undergraduate degrees. You'll spend six continuous semesters, or two years, learning key business, health administration, leadership, and public administration concepts to make you more effective in your current job or to open new employment opportunities.

The online M.B.A. curriculum offers a level of quality and rigor consistent with Adams State's reputation for excellence as an educational institution. The distance M.B.A. program welcomes students from around the globe.

Master of Business Administration Core Requirements

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

BUS 505 - Creating Consumer Value

3 Credit(s)

This course presents learners with a comprehensive approach to creating consumer value. This includes marketing and brand management in for-profit firms as well as identifying and meeting consumer needs in non-profit and governmental organizations. Topics include segmentation and targeting of consumers; the positioning levers of product, price, promotion, and distribution; and brand management.

ECON 505 - Managerial Economics

3 Credit(s)

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation

concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Finance Emphasis

BUS 531 - Multinational Financial Management

3 Credit(s)

Multinational Financial Management course has two emphases: one on the basics and the other on a managerial perspective. As international capital markets of the world become more integrated, an understanding of international financial management has become important for U.S. corporate decision making. This course provides students with groundwork for analysis that will serve them well in their future careers. The decision-making process in this course will teach students how to make knowledgeable managerial decisions in an ever changing global financial setting.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 532 - Portfolio Management and Investment Analysis

3 Credit(s)

The unifying theme of this course is that security markets are almost efficient, meaning that most securities are priced appropriately given their risk and return attributes. The course is a blend of practical and theoretical coverage combined with a complete digital solution to focus on making investment decisions from the perspective of the portfolio manager. This course also covers the Series 7 License and is designed to prepare the student for taking the National Association of Securities Dealers General Securities Representative Exam.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 533 - Financial Markets and Institutions

3 Credit(s)

This course is a great reflection of the latest developments from the field of financial markets. It helps students understand why financial markets exist, how financial institutions serve these markets, and what services those institutions offer. The course also focuses on the management, performance, and regulatory aspects of financial

institutions and explores the functions of the Federal Reserve System, as well as the major debt and equity security markets, and derivative security market.

Prerequisite(s):

BUS 525 Minimum Grade: B-

BUS 534 - Finance Capstone

3 Credit(s)

This course uses a case study approach to solve complicated corporate problems and links managerial decisions to capital markets and the expectations of investors. Students will gain a deeper understanding of financial issues that they encounter in their professional career. At the core of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps the students understand the impact of the firm on the world around it.

Prerequisite(s):

BUS 525 Minimum Grade: B-
AND

BUS 531 Minimum Grade: B-
AND

BUS 532 Minimum Grade: B-
AND

BUS 533 Minimum Grade: B-

This course presents learners with a comprehensive approach to creating consumer value. This includes marketing and brand management in for-profit firms as well as identifying and meeting consumer needs in non-profit and governmental organizations. Topics include segmentation and targeting of consumers; the positioning levers of product, price, promotion, and distribution; and brand management.

ECON 505 - Managerial Economics

3 Credit(s)

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Healthcare Emphasis

HCA 545 - Public Health

3 Credit(s)

This course provides a comprehensive coverage of traditional public health responsibilities- assessing the burden of disease, preventing and controlling health threats, and developing policies and public administration responses to improve health --in a contemporary framework. It covers the basics of administration, including public health law, human resources management, budgeting and financing, and legislative relations in public health.

HCA 550 - Elderly and Managed Care

3 Credit(s)

This course will consider long-term service delivery programs designed to meet the special needs of seniors. The course will include a managerial overview of seniors' housing and care and will analyze the demographics of aging, the role of financing, and the evolving marketplace.

HCA 555 - Health Policy

3 Credit(s)

Critical analysis of federal and state health policy processes, outcomes, and issues. This course allows students to examine the efficiency and effectiveness of health policy issues associated with access, cost, and quality. Emphasis is placed on policy formulation, implementation, assessment, and modification.

Prerequisite(s):

HCA 303 Minimum Grade: C

HCA 590 - Practicum

3 Credit(s)

The MHA Practicum: executive skill development is designed to develop and enhance the skills necessary for success as a healthcare executive through management practice in health care administration. The course provides the students the opportunity to gain practical experience and integrate classroom knowledge and theory in an administrative setting within the health care industry.

OR

HCA 595 - HCA Thesis

3 Credit(s)

The research project serves as a capstone experience as students complete the MBA emphasis area of study. Students will complete a research project involving an introduction to the problem or research question, comprehensive in-depth review of the current literature, research methodology, data collection, and analysis if applicable, and conclusions.

Prerequisite(s):

BUS 515 Minimum Grade: C

Master of Business Administration, Leadership Emphasis

Master of Business Administration

Online delivery allows today's busy working professional the opportunity to participate in a program without putting your career on hold. Whether you travel extensively, have a job that prevents you from attending traditional on-campus classes, or have family obligations that limit your available time, the flexibility of online delivery brings the Adams State University M.B.A. program to you, on your schedule.

The online M.B.A. curriculum is well suited for people with either business or non-business undergraduate degrees. You'll spend six continuous semesters, or two years, learning key business, health administration, leadership, and public administration concepts to make you more effective in your current job or to open new employment opportunities.

The online M.B.A. curriculum offers a level of quality and rigor consistent with Adams State's reputation for excellence as an educational institution. The distance M.B.A. program welcomes students from around the globe.

Master of Business Administration Core Requirements

BUS 500 - Leadership Skills for Managers

3 Credit(s)

This course teaches practical skills required for effective management at all levels of an organization, and is designed to increase a learner's understanding of key concepts and procedural guidelines related to organizational management, human resource, and leadership. The purpose is to be equipped to deal effectively with managerial challenges dealing with people.

BUS 505 - Creating Consumer Value

3 Credit(s)

This course presents learners with a comprehensive approach to creating consumer value. This includes marketing and brand management in for-profit firms as well as identifying and meeting consumer needs in non-profit and governmental organizations. Topics include segmentation and targeting of consumers; the positioning levers of product, price, promotion, and distribution; and brand management.

ECON 505 - Managerial Economics

3 Credit(s)

This course demonstrates how economics theory is applied to national and international managerial decision-making. The course covers topics such as demand analysis, production and cost functions, market structure, managerial understanding of public policy, and international trade finance topics. Pre-req.-Undergraduate Economics course with a grade of C or higher.

BUS 520 - Managerial Accounting

3 Credit(s)

This course provides a review of financial reporting standards and statements and analysis of those financial statements. Managerial accounting principles will be explored as well as budgeting, cost allocation, accumulation, cost behavior, and relevant costs; revenues are approached from a managers' perspective. Prerequisite: undergraduate accounting course with a grade of C or higher.

BUS 525 - Financial Analysis

3 Credit(s)

Students will embark on studying basic financial principles and enhance that with understanding various valuation concepts and methods. Emphasis is also placed on capital budgeting and long term financing as well as working capital management. The course will blend time-tested finance principles and the latest advancements with the practical perspectives of the financial manager. Prerequisite: undergraduate accounting course with a grade of C or higher.

Prerequisite(s):

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Leadership Emphasis

BUS 545 - Leading Entrepreneurial Organizations

3 Credit(s)

Successful organizations emphasize learning to sustain their competitive advantage. This course will study entrepreneurship and intrapreneurship. Areas of emphasis include uncovering the methodologies and characteristics that foster innovations and achieve meaningful change in business that leads to the creation and implementation of profitable business opportunities.

BUS 550 - Technology and Innovation

3 Credit(s)

This course adopts the perspective of a general manager-- an individual charged with diagnosing complex situations and resolving them in ways that enhance organizational performance. The course emphasizes how general management decisions may contribute to the creation and appropriation of economic value through innovation.

BUS 555 - Leading for Results

3 Credit(s)

This course focuses on how leaders mobilize others within their organization to get extraordinary things done. You will analyze what characteristics you need to develop to achieve your own professional goals and reflect on ways you can develop your competencies as a leader.

BUS 560 - Leadership Capstone

3 Credit(s)

This capstone course integrates knowledge gained in the previous graduate business courses. It centers on the theme that organizations achieve sustained success when their managers have astute, timely, strategic game plans, and they implement these plans with proficiency. This class incorporates the "big picture" and cuts across the whole spectrum of business and leadership.

Master of Business Administration, Public Administration Emphasis

Master of Business Administration

Online delivery allows today's busy working professional the opportunity to participate in a program without putting your career on hold. Whether you travel extensively, have a job that prevents you from attending traditional on-campus classes, or have family obligations that limit your available time, the flexibility of online delivery brings the Adams State University M.B.A. program to you, on your schedule.

BUS 520 Minimum Grade: C

BUS 540 - Strategy

3 Credit(s)

In this course, learners examine tools and techniques for competitive analysis, strategic planning, and strategy implementation. Learners gain knowledge of the tools and concepts needed to develop a business strategy including macro environmental scanning, industry and competitive analysis, value chain analysis, SWOT analysis, identification of critical success factors and driving forces, and development of strategic alternatives and recommendations.

Public Administration Emphasis

BUS 580 - Public/Nonprofit Management

3 Credit(s)

This course is designed to examine public and nonprofit management. This type of management is driven by mission and/or executive/legislative direction. Students will learn both the theory and practice of public and nonprofit management, using the concept case method and service learning opportunities.

BUS 585 - Public Budgeting and Finance

3 Credit(s)

The course is designed to provide the student with an understanding of the primary financial management issues and decisions that confront senior management in the nonprofit and the public sectors. Students will gain an understanding and examine financial analysis techniques from both a practical and strategic perspective for operating and capital decisions.

BUS 590 - Policy Analysis

3 Credit(s)

This course introduces the study of public policy and analysis. It provides an overview of key policy areas and examines three aspects of public policy study: (a) government institutions and the policy making process, (b) the concepts and methods of policy analysis, and (c) the role of policy analysis in clarifying public problems and helping citizens and policymakers choose from among policy alternatives.

BUS 595 - Public Administration Capstone

3 Credit(s)

The Capstone Course offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MBA-PA program. This involves completing a portfolio project reflecting the cumulative knowledge gained from these experiences.

General Education Requirements for Undergraduates

General Education Requirements for Undergraduates

As part of the Graduation Requirements for Undergraduates, Adams State University has prescribed a program of general education for all students seeking associate or baccalaureate degrees. This is done in the belief that our graduates must possess knowledge, skills, competencies, and an acquaintance with major areas of knowledge commonly possessed by educated persons. Students pursue the general education program goals through a range of formal and informal activities including, but not limited to, the successful completion of the below general education curriculum, Undergraduate Writing Proficiency, as well as their specific Undergraduate Programs .

All students must have a minimum GPA of 2.0 in general education courses to graduate (Fall 2011 admittance or later).

Area I. Communications

6 credits

- ENG 101 Communication Arts I GT-C01 **3 Credit(s)**
- ENG 102 Communication Arts II GT-C02 **3 Credit(s)**

AP SCORE OF 3 ON ENGLISH LANGUAGE/COMP OR ACT SCORE OF 29+ SAT SCORE OF 500+ (BEFORE 4/95) 580+ (BEFORE 5/10) 660+ (AFTER 5/10) - CREDIT (P) IS GIVEN FOR ENG 101.

Area II. Arts & Humanities

6 credits

- AR 101 Art and Creativity GT-AH1 **3 Credit(s)**
- AR 103 Art Appreciation GT-AH1 **3 Credit(s)**
- ENG 203 Major Themes in Literature GT-AH2 **3 to 6 Credit(s)**
- COMM 255 Fundamentals of Media Communication GT-AH2 **3 Credit(s)**
- MUS 100 Introduction to Music Literature GT-AH1 **3 Credit(s)**
- PHIL 201 Introduction to Philosophy GT-AH3 **3 Credit(s)**
- PHIL 205 Logic and Critical Thinking **3 Credit(s)**
- THTR 180 Introduction to Theatre GT-AH1 **3 Credit(s)**

Area III. Mathematics

3 credits

- MATH 104 Finite Mathematics GT-MA1 **3 Credit(s)**
- MATH 106 College Algebra GT-MA1 **3 Credit(s)**
- MATH 107 Trig/ Analytic Geometry GT-MA1 **3 Credit(s)**
- MATH 110 Introduction to Statistics, GT-MA1 **3 Credit(s)**

- MATH 120 Calculus I GT-MA1 **5 Credit(s)**
- MATH 121 Calculus II GT-MA1 **5 Credit(s)**

Area IV. Social and Behavioral Sciences/History

9 credits

- ANTH 201 Cultural Anthropology GT-SS3 **3 Credit(s)**
- ECON 255 Macroeconomics Principles GT-SS1 **3 Credit(s)**
- ECON 256 Microeconomics Principles GT-SS1 **3 Credit(s)**
- POLS 291 American Government GT-SS1 **3 Credit(s)**
- PSYC 101 Introduction to Psychology GT-SS3 **3 Credit(s)**
- SOC 201 Social Imagination GT-SS3 **3 Credit(s)**
- HGP 110 World History and Culture I GT-HI1 **3 Credit(s)**
- HGP 111 World History and Culture II GT-HI1 **3 Credit(s)**
- HIST 202 American History to 1865 GT-HI1 **3 Credit(s)**
- HIST 203 American History 1865-Present GT-HI1 **3 Credit(s)**

At least one course must be a GT-HI1 course; at least one course must be a GT-SS*; and the remaining course may come from either category. Only one ECON course may be used towards the requirements in this General Education area.

Area V. Physical and Natural Sciences

7 Credits

- BIOL 101 Introductory Biology GT-SC1 **4 Credit(s)**
- BIOL 125 Nutrition GT-SC2 **3 Credit(s)**
- BIOL 209 General Biology I GT-SC1 **5 Credit(s)**
- BIOL 210 General Biology II GT-SC1 **5 Credit(s)**
- CHEM 103 Introduction to Forensic Chemistry GT-SC1 **4 Credit(s)**
- CHEM 104 Chemistry in Context GT-SC2 **3 Credit(s)**
- CHEM 111 Introductory Chemistry GT-SC1 **4 Credit(s)**
- CHEM 111L Introductory Chemistry Lab GT-SC1 **1 Credit(s)**
- CHEM 131 General Chemistry GT-SC1 **4 Credit(s)**
- CHEM 131L General Chemistry Lab **1 Credit(s)**
- CHEM 132 General Chemistry GT-SC1 **4 Credit(s)**
- CHEM 132L General Chemistry Lab **1 Credit(s)**
- ENV 101 Introduction to Environmental Science GT-SC1 **4 Credit(s)**
- GSCI 109 Dynamic Earth GT-SC1 **4 Credit(s)**
- PHYS 110 Astronomy: Stars and Galaxies GT-SC2 **3 Credit(s)**
- PHYS 225 College Physics I GT-SC1 **5 Credit(s)**
- PHYS 230 General Physics I GT-SC1 **4 Credit(s)**
- PHYS 231 General Physics I Lab GT-SC1 **1 Credit(s)**
- PHYS 232 Gen Physics II (Cal) GT-SC1 **4 Credit(s)**

- PHYS 233 Gen Phys II Lab (Cal) GT-SC1 1 Credit(s)
One credit hour must be a lab.

Total 31 Credits

GT-Pathways

Adams State University general education requirements align with the State of Colorado GT-Pathways guaranteed transfer curriculum. Students who have completed the GT-Pathways curriculum in its entirety meet Adams State general education requirements. Likewise, any GT-Pathways course, regardless of where it was completed, will meet the equivalent requirement in the relevant GT-Pathways category.

A variety of courses are available in each general education category that meet the required content and competencies for general education. Many of the general education requirements are included in Adams State Institutional Learning Outcomes, and are indicated with (GT) next to the outcome.

Graduation Requirements for Undergraduates

Undergraduate Students include: Transfer, Adams State Online, and Correspondence Students studying for the Bachelor's Degree or the Associate's Degree

Students Must Complete the Following to Graduate with a Bachelor's Degree

Bachelor's Degrees include: The Bachelor of Arts (B.A.), Bachelor of Fine Arts (B.F.A), and Bachelor of Science (B.S) degrees

- A First Year Seminar Course
- General Education Requirements for Undergraduates with an average GPA of at least 2.0.
- All major, minor, area of concentration, or teacher licensure requirements for your chosen Undergraduate Program.
- Both ENG 102 and the Undergraduate Writing Proficiency.
- A minimum of 120 academic (non-PE) semester credits.
- At least 42 academic credits must be upper division (300- to 400-level).
- A cumulative scholastic average of 2.0.

Note

- No D+ grade may apply to a major or minor field.
- Students earning a degree with a double major where one major is in the Bachelor of Arts, Bachelor of Fine Arts, or Bachelor of Science degree area and the other major is another Bachelor's degree area must select the type of diploma they wish to be granted.

Students Must Complete the Following to Graduate with an Associate's Degree

Associate's Degrees include: The Associate of Arts (A.A.) and the Associate of Science (A.S.) degrees

- A First Year Seminar Course
- General Education Requirements for Undergraduates
- Undergraduate Writing Proficiency
- A minimum of 60 credits: 15 of those 60 credits can be in an approved concentration
- A minimum of 15 Adams State University credits

It is Your Responsibility to Know the Requirements for Your Degree

Always review the ASU academic catalog corresponding to the academic year/semester in which you were admitted or readmitted for policies and procedures regarding your degree requirements.

Undergraduate Writing Proficiency

As part of the Graduation Requirements for Undergraduates, proficiency in the use of standard written English is required of all students at Adams State University. Students must meet the Writing Requirements in order for a degree to be conferred. Normally, students will satisfy the writing requirement for a Bachelor's degree by successfully completing ENG 102. Students meeting any of the following criteria will be granted credit for ENG 101 and will be able to enroll directly into ENG 102:

1. earn a score of 29 or above on the English section of the ACT
2. earn a score of 660 or above on the verbal section of the SAT
3. earn a score of 3 or better on the Advanced Placement Exam (AP) in English Literature or a 5 on Literature and Composition.
4. earn a score of 4 or above on the Higher Level IB (International Baccalaureate) examination.

All students pursuing a bachelor's degree will also be required to complete a Writing Intensive Course (WIC) in their major, with a grade of C or better. Students pursuing a double major will only be required to complete a writing intensive course in one major in order to meet the writing proficiency requirement. However, if a WIC is a required course in each of the majors, students must successfully complete both courses.

Bethany Adams Clinical Faculty, Counselor Education

B.A., Psychology, University of Colorado
M.A., Clinical Mental Health, Denver Seminary

Christopher Adams (2021) Professor of Chemistry

B.S. in Chemistry, Adams State College
Ph.D. in Chemical Physics, University of Colorado

Courtney Allen (2015) Professor of Counselor Education

B.A. in Psychology from University of Florida, 1998
M.Ed./Ed.S in School Counseling from University of Florida, 2002
Ph.D. in Counseling and Counselor Education, University of Florida, 2015

Meredith Anderson (2015) Professor of Mathematics

B.S. in Mathematics, Ohio State University, 2008
B.A. in Psychology w/ honors, Ohio State University, 2008
M.S. in Mathematics, New Mexico State University, 2011
Ph.D. in Mathematics, New Mexico State University, 2015

David Bertolatus (2021) Assistant Professor of Biology

B.A. in Music Performance, University of Iowa, 2007
B.S. in Biology, Metropolitan State University of Denver, 2013
M.S. in Biology, University of Colorado Denver, 2016
Ph.D. in Integrative and Systems Biology, University of Colorado-Denver, 2021.

Bishal Bhattarai (2023) Assistant Professor of Mechanical Engineering

B.S. in Mechanical Engineerin, Visvesvaraya Technological University -India, 2015
M.S. in Renewable and Clean Energy Engineering, Wright State University, 2018
Ph.D. in Mechanical Engineering, University of Idaho, 2023.

Umesh Bhattarai (2018) Assistant Professor of Chemistry

B.S. in Chemistry, Tribhuvan University -Nepal, 2006
M.S. in Organic Chemistry, Tribhuvan University - Nepal, 2012
Ph.D. in Chemistry, University of New Mexico, 2007.

Beth Bonnstetter (2008) Professor of English and Communication

B.A. from Regis University, 1999
M.A. from Colorado State University, 2005
Ph.D. in Communications, University of Minnesota, 2008.

Benita Brink (1994) Professor of Biology

B.S. in Biology, Aquinas College, 1984
Ph.D. in Biology: Microbial Genetics, Marquette University, 1989.

Jessica Brown (2017) Associate Professor of English

A.A./A.S. in English/Biology, Casper College
B.A. in English, BYU, 2006
M.A. in English, BYU, 2010
Ph.D. in English, Arizona State University, 2018.

Laura Bruneau (2007) Professor of Counselor Education

B.A. in Psychology, Miami University, 1998
M.Ed. in Community Counseling, Kent State University, 2002
Ph.D. in Counselor Education and Supervision, Kent State University, 2007.

Zena Buser (2007) Professor of Agribusiness

B.S. in AgriBusiness, Northwestern Oklahoma State University, 1996
M.S. in AgriBusiness and Economics, West Texas A&M University, 2002
Ph.D. in Systems Agriculture, West Texas A&M University, 2007.

Reilly Caldwell (2023) Food Studies Program Coordinator and Lecturer

B.S. Sustainable Development: Community, Regional, and Global Development, Appalachian State University, 2021
M.A. Sustainable Communities, Northern Arizona University, 2023.

Cecilia Ibarra Cantu (2022) Assistant Professor of Marketing

B.S. in Actuarial Science, Universidad de las Americas, Puebla Mexico, 1994
M.B.A. in Universidad Popular Autonoma del Estado del Puebla, Mexico, 2001
Ph.D. in Business and Management, University of Huddersfield, UK, 2021.

Rebecca Caple() Clinical Faculty, Counselor Education

B.S. Psychology 1997 - Bridgewater University
M.Ed Mental Health Counseling 2004 - University of Massachusetts, Boston
Ph.D. Counselor Education and Supervision 2018 - Adams State University.

Lisa "Mari" Centeno (2004) Professor of Political Science

B.A. in Political Science, Purdue University, 1993
M.A. in Political Science, Arizona State University, 1996
Ph.D. in Political Science, Arizona State University, 2003.

Kim Chacon (2016) Associate Professor of Nursing

B.S. in Business Administration, Adams State College, 1998
B.S. in Nursing, Adams State College, 2007
M.S. in Nursing, University of Colorado, 2012.

Kathleen Chavez (2012) Instructor of English

M.A. in Education, Adams State College, 2003
M.A. in Leadership/Principal License, Adams State College, 2010
M.A. in English - 18 hr. Credential Requirement, Western New Mexico University, 2020.

Ashley Clayton (2016) Assistant Professor of Mathematics

B.S. in Mechanical Engineering, Midwestern State University, 2010
M.S. in Applied Mathematics, Texas Tech University, 2016
Ph.D. in Applied Mathematics, Texas Tech University, 2016.

Annaliesa Connor-Meissner (2021) Visiting Assistant Professor of Art

B.A. in Visual Arts with History, University of the West Indies - Trinidad and Tobago, 2006
M.A. in Art, Adams State University, 2015.

Carol Cotter (2021) Clinical Faculty, Counselor Education

B.A. in Psychology, University of Houston - Clear Lake, 1996
M.A. in Social Work, University of Houston, 1999
Ph.D. in Counselor Education and Supervision, Adams State University, 2021.

Fallon Crowther (2017) Assistant Professor of Nursing

B.S. in Commercial Recreation, Brigham Young University, 2008
B.S. in Nursing from Adams State University, 2015
M.S.N-Ed, Norwich University, 2019.

Morgan Cummons (2017) Visiting Assistant Professor of Nursing

B.S in Business, Adams State College, 2009

A.A.S. in Nursing, Fort Scott Community College, 2011
M.S. in Nursing, Grand Canyon University, 2017.

Terry Dupler (2019) Associate Professor of Human Performance and Physical Education

B.S. in Fitness and Human Performance, University of Houston - Clear Lake, 1989
M.S. in Fitness and Human Performance, University of Houston - Clear Lake, 1991
Ph.D. in Exercise Physiology, Texas A&M University, 1996.

Jeff Elison (2011) Professor of Psychology

B.S. in Computer Science, Mathematics Minor, Kutztown University, 1983
M.A. in Educational Psychology, University of Northern Colorado, 2000
Ph.D. in Psychology, University of Northern Colorado, 2003
Post-doc in Psychology, University of Denver, 2005.

Sara Erdner (2019) Clinical Professor of Kinesiology

B.S. in Communication Studies, University of Alabama - Huntsville, 2012
M.S. in Communication Studies, University of Tennessee, 2015
Ph.D. in Sport Psychology and Motor Behavior, University of Tennessee, 2018.

Joy Ferenbaugh (2023) Assistant Professor of Biology

B.S. in Zoology, University of California at Davis, 1995
M.S. in Wildlife Conservation, University of Minnesota - Twin Cities, 1999
Ph.D. in Biology - Ecological Specialization, Texas Tech University, 2007.

Melissa Freeman (2020) Visiting Assistant Professor of HEAL

B.S.S. in Specialized Studies, Ohio University, 1997
M.A. in Political Science, Ohio University, 2000
Ph.D. in Higher Education Administration, Ohio University, 2007.

Caroline Gabe (2019) Assistant Professor of Anthropology

B.A. in Classical Archaeology and History, University of Michigan, 2003
M.S. in Anthropology, University of New Mexico, 2008
Ph.D. in Anthropology, University of New Mexico, 2019
M.S. Higher Education Administration, Southern New Hampshire University, 2022.

Jess Gagliardi (2021) Director of First Year Seminars

B.A. in History, Government, Adams State University, 2011
M.A. in United States History, Adams State University, 2015
M.A. in Higher Education Administration, Louisiana State University, 2018
Ed.S. in Education Innovation & Leadership, Fort Hays State University, 2020.

Curtis Garcia (2015) Associate Professor of Education

B.A. in Political Science, Yale University, 2008
M.A. in Educational Leadership, Adams State University, 2011.
Ph.D. in Educational Leadership, Research and Policy, University of Colorado - Colorado Springs, 2020.

Sandra Gavin (2021) Assistant Professor of Counselor Education

B.S. in Psychology and Human Services, Upper Iowa University, 2015
M.A. in Clinical Mental Health Counseling, University of Northern Iowa, 2018
Ph.D. in Counselor Education and Supervision, Northern Illinois University, 2021.

Kyle Glenn (2017) Associate Professor of Economics

B.S. in Economics, Portland State University, 2010
M.A. in Economics, University of Denver, 2014
Ph.D. in Economics, The New School for Social Research, 2020.

Anthony Guntren (2021) Assistant Professor of Art

B.F.A. in Art, Western State College, 2000
M.A. in Art, Adams State University, 2011
M.F.A in Art (Sculpture), Colorado State University, 2015.

Christina Harrell (2020) Assistant Professor of Counselor Education

B.A. in Business Administration, Adams State University, 2011
M.A. in Counseling, Adams State University, 2013
Ph.D. in Counselor Education and Supervision, Adams State University, 2020.

Sherie Hawkins (2013) Clinical Faculty - Counselor Education

P.h.D in Counselor Education and Supervision, Regent University, 2014.

Janessa M. Henninger (2015) Clinical Faculty, Counselor Education and Supervision

B.S. In Psychology, College of Charleston, 2004
M.A. in Clinical Mental Health Counseling, University of Northern Colorado, 2011
Ph.D. in Counselor Education and Supervision with a doctoral minor in Applied Research and Statistics, University of Northern Colorado, 2015.

Elizabeth Hensley (2008) Professor of Business

B.S. in Business Administration (Emphasis in Marketing & Management), Adams State College, 2005
M.B.A. in Business Administration, Arizona State University, 2007
Ph.D. in Organization and Management, Capella University, 2016.

Stephanie Hilwig (2003) Professor of Sociology

B.A. in Sociology, Adams State College, 1994
M.A. in Sociology, California State University-Fullerton, 1999
Ph.D. in Sociology, University of Tennessee-Knoxville, 2003.

Karli Icceman (2023) Assistant Professor of Counselor Education

B.A. in English, Oakland University, 2016
B.A. in History, Oakland University, 2016
B.A. in Psychology, Oakland University, 2016
M.A. in Clinical Mental Health Counseling, Oakland University, 2018
Ph.D. in Counselor Education and Supervision, Oakland University, 2023.

Beth Johnston (2023) Assistant Professor of Art

B.A. in Psychology, Wake Forest University, Winston-Salem, North Carolina, 2008
M.F.A in Photography, Rhode Island School of Design, Providence, RI, 2022.

Jamie King (2023) Assistant Professor of Nursing

B.S. in Nursing from Adams State University, 2015
M.S.N-ED, Capella University, 2019.

Lynnea King (2011) Associate Professor of English

B.A. in English/Theatre, Wayland Baptist University, 1990
M.A. in English, Texas Tech University, 1993
Ph.D. in English (20th Century American Literature and Film), Texas Tech University, 1998.

Rena Kirkland (2017) Professor of Psychology

M.A. in Philosophy, University of South Florida, 2010
Ph.D. in Philosophy, University of South Florida, 2016.

James M. Lind (2023) Visiting Assistant Professor of Music and Director of Bands and Applied Brass

B.A. in Music, *Summa Cum Laude*, Texas Wesleyan University, 2003
M.M. in Music Performance, University of North Texas, 2005
D.M.A. in Music Performance and Wind Conducting, University of North Texas, 2012.

William Lipke (2001) Professor of Music

B.M. in Music Performance, University of Arizona, 1982
M.M. in Music Performance, University of Cincinnati, 1984
D.M.A. in Music Performance with a Doctoral Cogane in Music History, University of Cincinnati, 1990.

Richard Loosbrock (2000) Professor of History

B.A. in History, University of Kansas, 1988
M.A. in History, University of New Mexico, 1993
Ph.D. in History, University of New Mexico, 2005.

Michele Mann (2019) Assistant Professor of Teacher Education

B.S. in Biology, Furman University, 1986
M.A. in Biology/Science Education, University of South Florida, 2000
Ph.D. in STEM Education, University of Texas - Austin, 2019.

Mark Manzanares (1996) Professor of Counselor Education

B.A. in Psychology, Adams State College, 1989
M.A. in Community Counseling, Adams State College, 1992
Ph.D. in Education and Human Resource Studies, Colorado State University, 2004.

Maria Martinez (2014) Visiting Instructor of Human Performance and Physical Education

B.A. in Human Performance and Physical Education, Adams State University, 2012

M.S. in Human Performance and Exercise Science, Adams State University, 2014.

George McConnell (2019) Assistant Professor of Theatre

B.A. in Theatre Performance, Western Michigan University, 1997

M.A. in Theatre Studies, Florida State University, 2006

Ph.D. in Theatre Historiography, University of Minnesota, 2011.

Cheri Meder (2013) Chair and Professor of Counselor Education

B.A. in Psychology and Sociology, Western State College, 2004

M.A. in School Counseling, Adams State College, 2008

Ph.D. in Counselor Education and Supervision, Regent University, 2013.

Rebecca Meidinger (2022) Assistant Professor of Counselor Education

B.S. in Psychology, North Dakota State University, 2012

M.S. in School Counseling, University of Mary, 2014

Ph.D. in Counselor Education and Supervision, Adams State University, 2019.

Chris Merriman (2023) Visiting Assistant Professor of Anthropology

B.A. in Anthropology and History, Western State College, 2003

M.S. in Anthropology, University of New Mexico, 2008

Ph.D. in Anthropology, University of New Mexico, 2022.

Christina Miller (2001) Professor of Chemistry

B.S. in Chemistry, Adams State College, 1992

Ph.D. in Biochemistry, University of Arizona, 1998.

Gina Mitchell (2006) Associate Professor of Psychology

B.A. in Psychology/Spanish, University of South Dakota, 2002

M.S. in Psychology, Developmental and Biological Sciences, Virginia Tech, 2004

Ph.D. in Psychology, Developmental and Biological Sciences, Virginia Tech, 2006.

Steve Moody (2023) Clinical Professor, School of Counselor Education

B.S. in Mechanical Engineering, University of Wyoming, 1996

M.C. in Marital, Couple, and Family Counseling, Idaho State University, 2007

Ph.D. in Counselor Education and Counseling, Idaho State University, 2012.

Kieran Nduagbo (2019) Assistant Professor of Teacher Education

B.S.Ed. in Special Education, Loyola University, 2001

M.A. in Educational Administration, Governors State University, 2005

Ph.D. in Higher Education, Seaton Hall University, 2018.

Matthew Nehring (1998) Professor of Physics

B.S. in Physics Engineering, Colorado School of Mines, 1990

Ph.D. in Physics, University of Colorado-Boulder, 1995.

Jenna Neilsen (2007) Professor of Theatre

B.A. in Theatre and Psychology, Ohio Northern University, 2001

M.F.A. in Theatre, Virginia Commonwealth University, 2007.

Frank Novotny (2004) Professor of Chemistry

B.S. in Chemistry, St. Norbert College, 1989

Ph.D. in Chemistry, South Dakota State University, 1993.

Theresa O'Halloran (2001) Counselor Education Clinical Faculty

B.S. in Communication, Arizona State University, 1988
M.C. in Counseling, Arizona State University, 1992
Ed.D in Counselor Education, University of Northern Colorado, 1998.

Melissa O'Neil (2021) Counselor Education Clinical Faculty

B.A. in Psychology, University of Nebraska-Lincoln, 2009
M.A. in Counseling, Eastern New Mexico University, 2013
Ph.D. in Counselor Education and Supervision, Adams State University, 2021.

Meliza Ramirez (2023) Assistant Professor of Spanish

B.A. in English and Spanish, Idaho State University, 2002
M.A. in Romance Languages: Spanish, The University of Alabama, 2005
Ph.D. in Romance Languages: Spanish, The University of Alabama, 2008
M.A. in TESOL, University of Central Florida, 2019.

Blaine Reilly (2016) Counselor Education Clinical Faculty

B.A. in Psychology, Gonzaga University, 1999
M.C. in Counseling, Idaho State University, 2007
Ph.D. in Counselor Education, Idaho State University, 2016.

Neil Rigsbee (2015) Professor of Counselor Education

B.A. in Psychology, College of Santa Fe
M.A. in Counseling, Webster University
Ph.D. in Counselor Education, University of New Mexico.

Tracey Robinson (2001) Professor of Human Performance and Physical Education

B.S. in Human Kinetics, University of Guelph, 1985
M.S. in Physical Education and Biology, New Mexico State University, 1987
Ph.D. in Human Performance, Oregon State University, 1994.

Beth Robison (2009) Professor of Music

B.M. in Vocal Performance, Ohio University, 1986
M.M. in Choral Conducting, Ohio University, 2005
D.M.A. in Choral Conducting, University of Kansas, 2008.

Natalie Rogers (2014) Assistant Professor of Accounting

CPA; M.B.A. in Business Administration, Adams State College, 2011
M.S. in Accounting, Grand Canyon University, 2018.

Katrina Ruggles (2023) Clinical Faculty, Counselor Education and Supervision

B.A. in Psychology and Sociology/Social, Adams State University 1996
M.A. in Community Counseling 1998, School of Counseling Emphasis 2010, Adams State University
Ph.D. in Counselor Education and Supervision, Adams State University 2023.

Charles (Nick) Saenz (2013) Professor of History

B.A. in History and Political Science, University of Chicago, 2005
M.A. in History, University of California-San Diego, 2009
Ph.D. in History, University of California-San Diego, 2013.

Penny Sanders (2013) Counselor Education Clinical Faculty

B.S. in Radio/TV Communication, Eastern New Mexico University, 1984
M.A. in Counseling/Student Personnel, Northern Arizona University, 1988
Ed.D. in Counseling, Texas A&M -Commerce, 1999.

Kelsey Scanlan () Clinical Faculty, Counselor Education and Supervision

B.A. in Psychology from The Ohio State University (2012)
M.S. in Clinical Mental Health Counseling from Wright State University (2016)
Ph.D. in Counselor Education and Supervision from Adams State University (2023).

Colleen Schaffner (2018) Professor of Psychology

B.A. in Psychology, George Washington University, 1985
M.A. in Animal Behavior, Bucknell University, 1991
Ph.D. in Biological Psychology, University of Nebraska, 1996.

Matthew Schildt (2005) Professor of Music

B.M. in Music Recording Technology and Composition, Lebanon Valley College, 1998
M.A. in Music Composition, Kent State University, 2000
Ph.D. in Music Theory and Composition, Kent State University, 2005.

Heidi Schneider (2018) Associate Professor of Sociology

A.A. in Criminology and Justice Studies, Mira Costa Community College, 2007
B.A. in Criminology and Justice Studies, California State University-San Marcos, 2009
M.A. in Sociology, University of California-San Diego, 2013
Ph.D. in Sociology, University of California-San Diego, 2016.

Justine Schwarz (2023) Assistant Professor of Education

B.A. in Elementary Education, Truman State University, 1988
Masters in Teaching and Leadership, St. Xavier University, 2000
Ph.D. in Cognition and Instruction, Grand Canyon University, 2022.

Christopher Schwinghammer (2023) Assistant Professor of Biology

B.S. in Biology, Emporia State University, 2014
M.S. in Natural Science, Southeast Missouri State University, 2017
Ph.D. in Forest Resource Science, West Virginia University, 2022.

Ahmed Shafee (2021) Assistant Professor of Computer Science

B.S. in Communication and Information, Helwan University (Egypt), 2011
M.S. in Computer Engineering, Helwan University (Egypt), 2018
ABD in Electrical and Computer Engineering, Tennessee Technological University, 2022 (Expected in Spring).

Julie Silipo (2023) Clinical Faculty, School of Counselor Education

B.A. in Psychology, Whitman College, 2005
M.S. in School Counseling, Syracuse University, 2011
Ph.D. in Counselor Education and Supervision, Adams State University, 2023.

Kassiopeia Smith (2023) Assistant Professor of Mechanical Engineering

B.S. in Materials Science and Engineering, Washington State University, 2014
M.E. in Materials Science and Engineering, Boise State University, 2017
Ph.D. in Materials Science and Engineering, Boise State University, 2018.

Madeleine Stevens (2017) Counselor Education Clinical Faculty

B.A. in Liberal Arts with emphasis in Studio Arts, University of Colorado-Denver, 1994
M.A. in Art Therapy, Southwestern College, 2005
Ph.D. in Counselor Education and Supervision, Adams State University, 2020.

Colleen Stabolepszy (2023) Counselor Education Clinical Faculty

B.A. in Biology and Psychology, Adams State College (1993)
M.A. in Counseling, Adams State University (1997).

Michael Stewart (2017) Associate Professor of Sociology

B.S. in Sociology/Psychology, East Central University, 1996
M.S. in Sociology, Florida State University, 2003
Ph.D. in Sociology, Florida State University, 2008.

John Taylor (1999) Professor of Theatre

B.A. in Theatre, Wichita State University, 1988
M.A. in Theatre (Hist. Lit. Crit.), Ohio State University, 1990
Ph.D. in Theatre (Hist. Lit. Crit.), Ohio State University, 1994.

Jared Thiemann (2014) Associate Professor of Counselor Education

B.A. in General Studies, Idaho State University, 2007
M.C. in Marital, Couple, and Family Counseling, Idaho State University, 2009
Ph.D. in Counselor Education and Counseling, Idaho State University, 2013.

Kirk Thiemann (2022) Clinical Assistant Professor, School of Counselor Education

B.A. in General Studies, Idaho State University, 2013
M.COUN. in Student Affairs Counseling, Idaho State University, 2015
Ph.D. in Counselor Education and Supervision, University of Wyoming, 2021.

William (Bill) Tite (2019) Assistant Professor of Art

B.F.A. in Graphic Communications, Center of Creative Studies, 1980
