UNIVERSITY OF ILLINOIS
DEC 28 1914

UNIVERSITY OF COLORADO.

BOULDER.

To the State Superintendent of Public Schools, Colorado.

DEAR SIR:

The Ninth Biennial Report of the State University is hereby presented by the Regents.

Departments.

The departments of the University remain nearly the same as described in the last report, and are as follows:

COLLEGE OF LIBERAL ARTS.

CLASSICAL COURSE, leading to the degree of B. A.

PHILOSOPHICAL COURSE, leading to the degree of Ph. B.

SCIENTIFIC COURSE, leading to the degree of B. S.

LITERARY COURSE, leading to the degree of B. L.

GRADUATE COURSES, leading to the degrees M. A., M. S., and Ph. D.

COLORADO SCHOOL OF APPLIED SCIENCE.

CIVIL ENGINEERING, leading to the degree of B. S., (C. E.)

ELECTRICAL ENGINEERING, leading to the degree of B. S., (E. E.)

COLORADO SCHOOL OF MEDICINE.

COLORADO SCHOOL OF LAW.

COLORADO STATE PREPARATORY SCHOOL, conducted by the University.

Attendance.

The attendance has strongly and steadily increased in spite of the financial depression, and this fact is one of the most gratifying which the Regents have to report. That in a period of financial prosperity this increase would have been much greater can not be doubted.

The following table shows the attendance during each of the last four years. The enrollment for 1894 will yet be increased considerably by new names.

	UNIV. STUDENTS.	PREP. STUDENTS.	TOTAL.
1891-2	66	103	169
1892-3	129	158	287
1893-4	159	146	305
1894-5 (to Oct. 1)	181	182	363
The students of this year are distributed as follows:			
College of Liberal Arts.....			113
Colorado School of Applied Science, (entering class).....			10
Colorado School of Medicine.....			41
Colorado School of Law.....			17
			181
Colorado State Preparatory School.....			182
			363

College of Liberal Arts.

Since the last report a Professor of Philosophy and Pedagogy has been added to the College Faculty. This important chair could no longer remain vacant. Philosophy is a department of every College and University, and Pedagogy is finding a place in nearly every progressive University. This chair is especially important in state universities which are a part of the Public School system, and must bear an intimate reciprocal relation to some of the other functions of that system. Of the men and women who go forth from the Collegiate Department, many will become special instructors in high schools, principals, or professors in college. The history and philosophy of education have a practical value for all people; and they are important as a part of liberal culture.

Last year the collegiate work was completely reorganized, and the most modern thought upon university problems was considered in its relation to the conditions in Colorado. The result met the unanimous approval of the Faculty, and it is presented to the State and the country with confidence in its excellence. Only the most progressive American universities have as yet attained this standard of curriculum. As formerly four degrees are recognized. Certain required studies called Basic are common to all the courses. Each course has certain Characteristic studies appropriate to the degree sought, as Greek for the B. A. degree, and Science for the B. S. degree. The remainder are free electives.

The large number of electives enables the student, in addition to his general training, to become proficient in some specialty according to his aims and inclinations. In these days the theory that education is simply a means to the end of selfish enjoyment of the knowledge emotions, and serene contemplation of Beauty and Goodness is abandoned, and a man's training, in addition to enlarging his manhood and increasing his happiness, must contribute to more useful citizenship. Every student to-day in a modernized university may develop his mind broadly and at the same time direct his knowledge and power toward some one field of thought and useful activity. The theory is, know many things, but also much of some one thing.

The standard of the University has been so often shown that attention hardly needs to be called to it. An unusually large per cent. of the Professors possess the Doctor's degree in their specialties, and several have made important contributions to the literature of their subjects. It is safe to say that no university, in proportion to its size and needs has an abler body of professors. That the University is prepared to meet the ends for which it was founded may be claimed with entire confidence.

Graduate Courses.

The modern university must not only provide for collegiate and professional studies, but must furnish additional instruction and facilities for advanced work. This is to be the characteristic feature of the coming universities, and each State university must maintain Graduate Courses. Most of the departments already offer either majors or minors in advanced lines, and the very remarkable number of thirteen graduate students is enrolled this year. Part of these are candidates for the Master's degree which requires one year of additional residence, and part are candidates for the Doctor's degree which requires at least two additional years of residence. Residence for the Doctor's degree is at present interpreted to mean such proximity to the University as will enable candidates to report to the professors at frequent intervals for direction, instruction and examination. The standard of the degree is carefully guarded.

School of Applied Science.

In accordance with the promise made two years ago, a School of Applied Science has been opened and an entering class of ten gives great encouragement for the future. This might be reckoned as a part of the College of Liberal Arts, as it actually is in Michigan and many other universities. It is impossible to escape the logic of events demanding provision for civil and electrical engineering for college students. Much of Civil Engineering is required as laboratory work in a collegiate department of Mathematics, and much of Electrical Engineering as laboratory work in the department of Physics. This would be offered informally by those departments, if not formally in separate courses. Most of the state universities have Engineering, and this is historic proof of the demand for it as a university department. Many who have finished a high school course demand an opportu-

nity to proceed with their education in engineering courses containing a considerable element of general culture. Accordingly the standard of admission is placed unusually high, and the entering students rank as regular freshmen.

The extra expense to the State for these engineering courses is merely nominal; only one additional professor has been employed, the Professor of Civil Engineering. The Professor of Physics conducts the special work in Electrical Engineering.

This great economy comes from the fact that nearly every collegiate department, without additional expense, contributes to the studies of the engineering courses.

An electrical plant has been established sufficient for immediate needs, and the most important apparatus is in position. The physical laboratory—one of great excellence—furnishes all the general and elementary work. The department of civil engineering is supplied with the most important instruments.

Medical School.

The experiment of conducting part of the medical work in Denver has succeeded beyond expectation. The clinical instruction thus provided has given a new life to the department, and the students number six to one as compared with the former enrollment. The salary received by the professors and lecturers is merely nominal, yet the organization and efficiency of the department merit high commendation.

Law School.

The law school, opened two years ago so auspiciously, maintains its promise and its high standard of work. The law students are among the hardest workers of the University; theirs is a genuine student life, and the privilege of electing college studies in addition to regular law studies adds much to the opportunities of the school. The standard of examination last year was spoken of in terms of high praise. There were twelve graduates in the law class of '94, the first to receive their diplomas. The devoted work of Dean, Secretary, Professors and Lecturers can not be appreciated too highly by the people of Colorado; and there should be no delay in making possible an increase in the funds of the school. A considerable library has been collected, and new rooms in the Hale Building have been assigned to the department.

Preparatory School.

The Preparatory School, as well as the University proper, shows a large growth. The school has been entirely removed from the University campus, and is conducted in a building a few blocks distant. This change has been made for the following reasons: First, there is not room upon the campus for both University and Preparatory students; the history of universities shows that it is not favorable to the growth of either to conduct university and preparatory work under the same roof; and the energy of the University must be directed more and more to the University departments. The co-operation of the City of Boulder has

been secured in supporting the school, on the ground of advantage to the Preparatory pupils resident in the city. At present the District provides room, heat and incidentals for the school, and pays nearly half of the salaries. The classes in chemistry and biology are conducted in the University laboratories.

The Regents believe that an equitable arrangement for the immediate future would be as follows: the school to be conducted as a Preparatory school; the courses and work to be maintained at a satisfactory standard and the University to pay pro rata for the pupils from other districts. The school will be of value to the State for several years to come, because many communities maintain no high-school, and have need of the advantages of the Preparatory School. At present the statutes require the Regents to conduct a Preparatory School; these should be so changed as to leave the matter to the option of the Regents.

The school has grown not only in size but in standard and efficiency. Its great need is more room.

Improvements.

The improvements upon the grounds have been made with much care for expense. We may mention important changes. The sewerage has been centered and conducted off the grounds; a new fence, cheap but neat and substantial, has replaced the old barbed wire fence; the surface stones have been removed from all parts of the campus; the stone walks have been extended, and a small amount of grading has been done.

The Hale Scientific Building has been completed. This structure is of four stories, one hundred by sixty feet in plan. It is built of white and red sandstones and presents a fine architectural appearance. The first story is given entirely to physics and is fitted with all modern conveniences and improvements in the way of tables, cases, tanks, dark rooms, apparatus, etc. The second story is devoted to mathematics and civil engineering. The Law School at present occupies the north end of this floor. The third floor is occupied by the biological lecture rooms, laboratories and cabinets.

The Main Building has been strengthened; important repairs and changes have been made from roof to basement. The plumbing was entirely replaced. The chemical laboratory has been removed from the upper floor to another building, and nearly the entire third story has been given to the library. Several semi-nary rooms are located adjacent to the library rooms. Three rooms on the second floor have been prepared for the art collection donated by Colonel Ivers Phillips.

The old Hospital which was used last year for the Law School has been converted into a chemical laboratory. Every room has been completely fitted for some department of chemical work. This is one of the most important changes that has been made.

A central heating plant has been established which connects with the main buildings. It is proving satisfactory and economical.

The first story of an engineering building has been erected, and an engine and electrical machinery are already in place and in working order. A dynamo and

storage battery with measuring instruments are part of the equipment.

Nearly all the buildings on the campus have undergone important repairs.

Books to the value of one thousand dollars were added to the library during the summer; and the sum of fifteen hundred dollars was expended for apparatus. These sums are a very small part of the amount needed for these purposes.

Needs.

It is safe to say that half a million dollars should be expended upon the University grounds, buildings and equipments as soon as the State is able. The University of Missouri has received from the State since February, 1891, by direct appropriation and in interest on its endowment, \$1,525,000. The equipment of the University should be the next work taken up by Colorado after the completion of the Capitol Building. Kansas completed her University before erecting her Capitol. The Regents are not ignorant of the condition of the State's finances and will keep it in view while urging the immediate wants of the University.

A Library Building should be begun at once; one wing could be erected now and the rest could be completed later. A Gymnasium should be provided as soon as possible. An Observatory is a necessary part of a university equipment. Further repairs and improvement of the grounds are indispensable. The furnishing of some of the buildings is incomplete.

The library should be increased by several thousand volumes; and several thousand dollars should be expended for apparatus.

Finances.

The immediate needs as just enumerated are:

A Library Building,

A Gymnasium,

An Astronomical Observatory,

Improvement of Buildings and Grounds,

Addition of Furniture,

Additions to Library,

Additions to Apparatus.

The proceeds for the next year from the one-fifth mill tax will be about \$40,000. This amount will cover only the pay roll of the University, leaving nothing for other running expenses and for repairs and improvements. In addition to this revenue the \$20,000 lost by cutting off the one-tenth mill tax for 1894-5 should be made good to the University, and the one-tenth mill should again be levied for the Institution; or in some way its equivalent should be given. In addition as large a sum as possible should be set apart for the needs mentioned above.

The one-tenth mill levy would have supplied some of the University's wants, had it not been cut off, and had not the shrinkage in taxes occurred. These reasons were assigned when asking for the extra levy: (1) increased number of students; (2) needs of the library; (3) demands for apparatus; (4) need of additional professors; and (5) the expenses of the law school. The library has received only

about \$1,000; the various laboratories only about \$1,500; only two professors have been added; and the law school receives only \$2,500 per year for all expenses. The larger part of the needs enumerated still remains. Not more than one-eighth of the additional sum expected has it been possible to devote to the above uses.

The special appropriation of \$34,000 for buildings and grounds has been wholly expended or contracted. The items are to be seen in the appendix to this report. The larger sums were used as follows: to repay \$8,500 previously borrowed from the University income for the Hale Building; to complete the Hale building; and to construct a Heating Plant. The balance was used for minor improvements and repairs. The appropriation was not enough to meet pressing needs, since part of the regular income is now being used for indispensable permanent improvements.

It should be sufficient to place the needs of the University before our legislators with the expectation that they will be met cordially, so far as the State's finances will allow. The educational interests of the State should be made secondary to no other consideration.

The usefulness of the University to the people of Colorado is rapidly increasing, and its growth will be limited only by lack of proper financial support.

It requires a little power of imagination to see things in perspective; to discover future success and advantage to be wrought out by present means. Already twenty graduates of one high school are in the various departments of the University and nearly every genuine high school in Colorado has its representatives. The history of other states shows that from 25 to 50 per cent of the high school graduates in Colorado will soon use the advantages of the University. Then every community will have a vital interest in its welfare. It is important that it be so supported as to properly perform its function in the system of public education.

Gifts and Endowments.

It has not been customary to endow state universities by private benefaction. The reasons are too obvious to require mention. We may expect an important change of sentiment in this regard. There are already some notable exceptions to the rule, and recently important assistance has been rendered state universities by private bounty.

There is no way in which educational endowments could be so well employed as in supplementing the work done by the State. Such union of effort would produce magnificent results, and reach the largest number of young men and women.

Endowments and gifts could well be made for any of the following purposes:

Building for the Christian Associations, (This would be in the hands of trustees of the associaton),

New Main Building,

Library Building,

Building for Law School,

Building for Medical school,

Gymnasium,
 Astronomical Observatory,
 Endowment of Chairs,
 Art collections,
 Library endowments and contributions,
 Apparatus,
 Improvement of Grounds.

Relation to the Public Schools and the People.

The University is the capstone of the public school system. Without it the structure of public education would be incomplete and insecure. It offers to the pupils of the common schools the hope of something ahead and inspires to earnest endeavor. It is an incentive to establish high schools and to maintain them at a creditable standard. Already twelve schools have been placed upon the accredited list of the University; an equal number is striving for that recognition; other communities are desirous to begin and maintain high school work.

The work of the University is to fill every profession with men of high training, to contribute to the ranks of practical educators, to increase scientific knowledge, to influence indirectly every industry and occupation, to make intelligent, moral citizens of the highest capacity for usefulness who are in sympathy with the people, to raise the standard of manhood and womanhood and to bring material prosperity and high reputation to the State.

Reports Submitted.

There are submitted herewith the reports of the Secretary of the Board of Regents, the Treasurer of the University and the Librarian; also a list of professors with their salaries and the enrollment of students for the current year.

Respectfully submitted,

JAMES H. BAKER,
 President.

THE BOARD OF REGENTS
 OF THE STATE UNIVERSITY.
 S. A. GIFFIN,
 Secretary.

APPENDIX.

Pay Roll of the State University,

(Including all Expenses of Law and Medical Schools.)

JAMES H. BAKER, M. A., LL. D., President, Professor of Ethics..... \$4,500.00

College of Liberal Arts.

J. RAYMOND BRACKETT, PH. D., Dean, Professor of Comparative and English Literature.....	\$2,000.00
MARY RIPPON, Professor of German Language and Literature.....	1,600.00
WILLIAM J. WAGGENER, M. A., Professor of Natural Philosophy. (In Europe on leave of absence.).....	— —
CHARLES SKEELE PALMER, PH. D., Professor of Chemistry.....	2,000.00
IRA M. DELONG, M. A., Professor of Mathematics.....	2,000.00
JOHN GARDINER, B. SC., Professor of Biology. (In Europe on leave of absence.).....	— —
MAURICE E. DUNHAM, M. A., Professor of Greek.....	2,000.00
CARL W. BELSER, PH. D., Professor of Latin.....	2,000.00
GEORGE H. ROWE, B. S., Professor of Physics (ad interim).....	1,500.00
JAMES H. MCLEAN, PH. D., Professor of History and Political Science....	1,600.00
B. C. BURT, M. A., PH. D., Professor of Philosophy and Pedagogy (ad interim)....	1,600.00
WINFIELD S. NICKERSON, S. D., Professor of Biology and Histology (ad interim).....	1,400.00
CHARLES H. FARNSWORTH, Instructor in Music.....	900.00
DELPHINE BELL, Instructor in French.....	675.00
FREDERICK F. KRAMER, M. A., B. D., Instructor in Oratory.....	225.00
IRVING C. ANDREWS, B. S., Assistant in Chemistry.....	300.00
FRANK Y. MOSELEY, Assistant in Biology.....	500.00
RUSSELL T. MASON, E. M., Secretary.....	600.00
ALFRED E. WHITAKER, M. A., Librarian.....	1,000.00

Carried Forward, \$26,400 00

School of Applied Science.

Brought Forward, \$26,400.00

HENRY FULTON, M. S., Acting Dean, Professor of Civil Engineering. 1,600.00
 GEORGE H. ROWE, B. S., Professor of Electrical Engineering, (already listed as Professor of Physics.)

The remaining work of the School of Applied Science is done in the College of Liberal Arts.

School of Medicine.

Sum set apart by the Regents for total expenses of the Medical School. . . \$ 4,500.00

JEREMIAH T. ESKRIDGE, M. D., DEAN, Professor of Nervous and Mental Disease and Medical Jurisprudence.

HERBERT W. MCLAUTHLIN, M. D., SECRETARY; Professor of Principles and Practice of Medicine and Clinical Medicine.

LUMAN M. GIFFIN, M. D., TREASURER; Professor of Anatomy and Physiology.

CHARLES SKEELE PALMER, PH. D., Professor of Chemistry.

JOHN GARDINER, B. SC., Professor of Histology.

HORACE O. DODGE, M. D., Professor of Physical Diagnosis and Hygiene.

....., Professor of Gynecology and Abdominal Surgery.

A. STEWART LOBINGIER, M. D., Professor of Pathology and Clinical Surgery.

CLAYTON PARKHILL, M. D., Professor of Principles and Practice of Surgery and Clinical Surgery.

G. MELVILLE BLACK, M. D., Professor of Laryngology and Rhinology.

JOHN CHASE, M. D., Professor of Ophthalmology and Otology.

JOHN W. O'CONNOR, M. D., Professor of Railway and Clinical Surgery.

HERBERT B. WHITNEY, M. D., Professor of the Diseases of Children.

LEWIS E. LEMEN, M. D., Professor of Clinical Surgery.

GEORGE B. PACKARD, M. D., Professor of Orthopedic Surgery.

THOMAS E. TAYLOR, M. D., Professor of Obstetrics.

JOSIAH N. HALL, M. D., Professor of Materia Medica, Therapeutics and Clinical Medicine.

JOHN VROOM, M. D., Lecturer on Bandaging, Minor Surgery and Operative Surgery on the Cadaver.

H. C. CROUCH, M. D., Lecturer on Bacteriology.

WALTER A. JAYNE, M. D., Lecturer on Gynecology.

SAMUEL D. HOPKINS, M. D., Lecturer on Medical Chemistry and Urinary Analysis.

A. MANSFIELD HOLMES, M. D., Lecturer on Applied Anatomy.

EMLEY B. QUEAL, M. D., Demonstrator of Anatomy.

EARL H. FISH, M. D., Assistant to the Chair of Surgery.

Carried Forward, \$32,500.00

School of Law.

Brought Forward, \$32,500.00

Sum set apart by the Regents for total expense of the Law School. \$2,500.00

MOSES HALLETT, LL. D., DEAN; Professor of American Constitutional Law and Federal Jurisprudence.

CHARLES M. CAMPBELL, P. B., B. C. L., SECRETARY; Professor of Law.

OSCAR O. F. A. GREENE, M. A., Professor of Roman Law.

HERBERT B. SHOEMAKER, B. A., LL. B., Professor of Law.

LEWIS S. YOUNG, B. L., Professor of Law.

WILLIAM M. MAGUIRE, Assissant Professor of American Constitutional Law and Federal Jurisprudence.

ALBERT A. REED, LL. B., Instructor in Law.

LECTURERS.

VINCENT D. MARKHAM, B. A., Lecturer on the Law of Contracts.

EBENEZER T. WELLS, Lecturer on the Law of Real Property.

WILLARD TELLER, B. A., Lecturer on Equity Jurisprudence, Pleading and Practice.

HUGH BUTLER, Lecturer on Common Law and Code Pleading and the Peculiarities of Colorado Law and Practice.

VICTOR A. ELLIOTT, Lecturer on the Irrigation Laws of the West.

LUTHER M. GODDARD, LL. B., Lecturer on the Law of Patents, Copy-rights and Trade-marks.

ROBERT S. MORRISON, Lecturer on the Law of Mines and Mining.

JOHN CAMPBELL, M. A., LL. B., Lecturer on the Law of Private and Municipal Corporations.

CHARLES S. THOMAS, LL. B., Lecturer on the Law of Bailments and Evi-dence.

WILLIAM C. KINGSLEY, Lecturer on the law of Domestic Relations.

HENRY T. ROGERS, M. A., Lecturer on the Law of Wills, Executors and Administrators.

THOMAS WARD, JR., B. A., Lecturer on Criminal Law.

JOHN D. FLEMING, B. A., LL. B., Lecturer on the Law of Insurance.

LUCIUS M. CUTHBERT, M. A., LL. B., Lecturer on the Conflict of Laws.

CALVIN E. REED, B. A., LL. B., Assistant Lecturer on the Law of Real Property.

HENRY C. CHARPIOT, B. S., LL. B., Assistant Lecturer on the Law of Domestic Relations.

ALBERT S. BLAKE, Assistant Lecturer on the Law of Contracts.

HORACE G. LUNT, B. A., Assistant Lecturer on the Law of Private and Municipal Corporations.

WILLIAM H. BRYANT, B. S., LL. B., Assistant Lecturer on the Law of Bailments and Evidence.

Carried Forward, \$35,000.00

Brought Forward, \$35,000.00

GEORGE Z. DIMMITT, M. A., LL. B., Assistant Lecturer on Criminal Law.

JOHN H. DENISON, B. A., Assistant Lecturer on Equity Jurisprudence,
Pleading and Practice.FRANK E. GOVE, B. A., LL. B., Assistant Lecturer on Common Law and Code
Pleadings and the Peculiarities of Colorado Law and Practice.**Preparatory School.**WILLIAM L. BURDICK, PH. D., Principal, Teacher of History and Greek.

This report does not include the special appropriation of \$34,000.00 made by the last Legislature for improving the Campus. This \$34,000.00 was kept in the State Treasury and the President and Secretary drew warrants directly upon the State Treasurer.

Respectfully submitted,

October 1st, 1894.

S. A. GIFFIN,
Secretary of Board of Regents.

Report on Use of Special Appropriation of \$34,000.

Amount of Appropriation.....	\$34,000.00
Repaid General Fund of the University as provided in the statutes	\$8500.00
Expended on Hale Scientific Building.....	8935.76
Expended for Heating Plant.....	7200.00
Expended for building for Heating Plant and for Engineering... ..	5733.33
Expended on President's house.....	41.00
Expended on Main building and Chemical Laboratory (formerly Medical building)	1762.91
	\$32173.00
Balance.....	1827.00
	\$34,000.00

The balance of \$1827.00 is due on final payments on the contracts for the Hale Scientific building and for the Heating Plant.

S. A. GIFFIN,
Secretary.

JAMES H. BAKER,
President.

Librarian's Report.

BOULDER, Colo., Oct. 12th, 1894.

DR. JAMES H. BAKER,
President of the Board of Regents,
University of Colorado.

Dear Sir:—I have the honor to submit herewith the Report of the Librarian, covering the period from Oct. 1st, 1892, to Oct. 1st, 1894.

INVENTORY OF BOOKS.

VOLUMES.	OCT. 1, 1892.	OCT. 1, 1893.	OCT. 1, 1894.	INCREASE.
General Library	6244	6525	6973	729
Public Document library..	1965	2235	2381	416
	<hr/>	<hr/>	<hr/>	<hr/>
	8209	8760	9354	
Total net increase.....				1145

The necessity of greater space and facilities for the consultation and reading of periodicals and the bound volumes of magazines, which we mentioned in the previous Report, has been amply met in the Library's new quarters on the third floor; the entire west room, spacious and light, being devoted, exclusively, to periodicals, magazines and newspapers.

The list of one hundred (100) periodicals is continued, and the completed volumes have been preserved and bound. No binding was done in the first year covered by this report, but during the past year thirty-seven (37) volumes have been bound and two hundred and fifty (250) more, included in the present report, are in the binder's hands. This will bring our periodical literature well up to date, and increase, by so much, our too meager sources of reference.

Very respectfully yours,

ALFRED E. WHITAKER,
Librarian.
