Report on Diversity, April 2009

University of Colorado at Boulder

CU-Boulder: Building a More Inclusive University Community

The University of Colorado at Boulder maintains a strong commitment to the campus diversity plan, *A Blueprint for Action*, which has been in place since 1999 and has served as the basis for implementation of diversity initiatives and programs on the campus. The initial leadership for development, deployment, and integration of the plan was provided by the former Office of Diversity and Equity (ODE), established in 1998 and headed by the late Dr. Ofelia Miramontes, CU-Boulder's first associate vice chancellor for diversity and equity.

In 2007, the Chancellor's cabinet was expanded to include the new position of vice chancellor for diversity, equity, and community engagement. The former ODE is now known as the Office for Diversity, Equity and Community Engagement (ODECE—pronounced "Odyssey"). The office is headed by Dr. Sallye McKee, CU-Boulder's first vice chancellor—a position designed to bolster CU-Boulder's commitment to diversity and inclusive excellence. The mission of the office is to enhance and expand existing program offerings and services while working with the campus to enhance diversity and to create greater value for the practice of inclusive excellence across all divisions.

This report presents a brief summary of CU-Boulder's diversity plan, the institutional structures in place to develop and initiate programs and services that help create and maintain a supportive climate for all members of the campus community, and examples of ongoing and recent diversity initiatives.

Campus Diversity Plan: Goals and Accountability

The campus diversity plan, *A Blueprint for Action*, has three primary goals: (1) to build and maintain an inclusive campus environment; (2) to recruit, support, retain, and graduate a diverse student population; and (3) to maintain and enhance diversity in employment of staff, faculty, and administrators. Under the leadership of Dr. Alphonse Keasley (ODECE's Assistant Vice Chancellor for Campus Climate and Community Engagement), CU-Boulder is in the process of updating its diversity plan. The primary aim of the update is to specify a campus commitment to the practice of "inclusive excellence." Inclusive excellence extends the concept of diversity beyond the inclusion and presence of people from traditionally underrepresented groups in all facets of higher education to the recognition that institutional excellence requires *all* faculty, students, and staff to understand and practice multicultural competence from a global context, regardless of origins or personal identities.

Accountability and responsibility for implementing the diversity plan and for achieving success are shared throughout the campus from the Chancellor and other administrators to faculty, staff, students, and governance groups. Performance and progress towards the goals of the diversity plan are measured annually. In addition, more comprehensive reviews are done during periodic assessments of schools, colleges, departments, and research institutes, and of student affairs and administrative units.

Mission and Vision

One of the eight core initiatives of CU-Boulder's current long-range strategic plan, *Flagship 2030*, is to "develop, implement, and assess university strategies to improve the diversity of faculty, students, and staff as well as to foster a supportive, more inclusive community for all." It is ODECE's mission to ensure that diversity is a core value expressed in the work and conduct of all students, faculty, and staff. ODECE works with faculty, staff, students, and alumni to initiate and enhance opportunities to achieve understanding and excellence through diversity, thereby promoting faculty and student success, enhancing campus climate, and strengthening community engagement. ODECE's efforts are guided by three main commitments: respect for the perspectives of others; a high value on open communication; and the practice of inclusive excellence.

We envision a campus that acknowledges and addresses the special needs of groups and individuals who historically have faced institutional barriers, a place where the quality of education is

enhanced and enriched by a diverse campus community, and an environment where the entire campus benefits from participation in a multicultural community. By 2030 we aim to make CU-Boulder a model for the nation in applying best practices in support of diversity and inclusive excellence.

Building a New Leadership Structure for Campus Diversity Efforts

After a national search, Dr. Sallye McKee was appointed in August 2007 as the first CU-Boulder vice chancellor of the newly-established ODECE division. With the historic appointment of a vice chancellor for diversity, CU-Boulder took another step forward in its commitment to engaging and leading faculty, staff, students, and external campus constituencies in initiatives and programs that support diversity in all of its forms.

As a member of the chancellor's cabinet, Dr. McKee works to ensure that diversity-related issues are key considerations in budgetary, administrative, academic, and governance decisions. VC McKee works with other campus administrators, faculty, staff, students, and alumni to strengthen existing campus diversity programs. She is also developing new outreach and partnership programs and initiatives with local and state constituent groups to create a welcoming campus environment.

In April 2008, ODECE was expanded to include two units formerly housed in the Division of Student Affairs: Disabilities Services (DS) and the Center for Multicultural Affairs (CMA). In addition, three programs (Pre-Collegiate Development, University of Colorado Upward Bound, and Roaring Fork Pre-Collegiate) were moved from the Student Academic Services Center and reorganized to develop a new department, the Office of Pre-College Services. The new focus is to enhance and expand the university's pre-college outreach efforts. The VC/ODECE oversees comprehensive diversity efforts in these areas. ODECE is focused on faculty success, student success, campus climate, community outreach and engagement, multicultural affairs, pre-college services, and disability services. A roster of the VC's staff is included at the end of this report.

Student Success

The following overview of campus commitment to student diversity includes information about recruitment and admission, cross-time enrollment patterns, graduation and retention rates, and a summary of new initiatives and programs aimed at developing and maintaining a campus climate that welcomes, respects, and supports all students.

Student Recruitment

- The Colorado Department of Higher Education (CDHE) specifies varied admission standards across thirteen four-year public institutions in the state of Colorado. CU-Boulder's "selective admission standard" as specified by statute (CRS 23-20-101) is the highest CDHE freshman admission index (103) of all public comprehensive colleges and universities in Colorado. The available cohort of Colorado high school graduates of color who are college bound is limited, and their academic preparation is, on average, lower than that of other high school graduates. This poses a particular recruitment challenge. Active support and action from constituent communities across the state will be necessary as part of any effort to enhance the number of qualified college-bound high school graduates of color with strong academic preparation.
- In 2008 CU-Boulder established the department of Pre-College Services to coordinate, enhance, and expand recruitment/outreach strategies that strengthen CU-Boulder's partnerships with K-12 initiatives throughout the state and nation (see <http://www.colorado.edu/sasc/precollege.html>). Working with Mr. David Aragon, Executive Director for Student Success, this department has begun identifying outreach programs and/or partnerships that currently exist between the CU-Boulder campus and the community at large, new partnership opportunities throughout the state, populations that are underserved by existing programs and/or partnerships, and ways to provide access for underrepresented communities. Recent efforts include:
 - Collaboration with the College of Engineering and the University of Alaska to co-author a grant to include CU-Boulder as a participating institution in the Indigenous Alliance, which

provides pre-college outreach to the local Native American community in science, technology, engineering and, mathematics (STEM) (see <http://www.uaa.alaska.edu/news/ansep-receives-600k-to-expand-indigenous-alliance.cfm> for more information).

- Initiation of working partnerships with the Aurora and Denver Public Schools to increase opportunities for students in those districts to visit the CU-Boulder campus. Aims are to expose high school students to the wide variety of opportunities available to students on the Boulder campus, to introduce them to college students who share backgrounds similar to theirs, and to help dispel any misconceptions that CU-Boulder is inhospitable to students from less affluent and diverse backgrounds.
- Discussions with local sponsors of the *I Have A Dream* program to develop ways to increase their students' exposure to the Boulder campus and their interaction with CU-Boulder student groups and support programs. For example, UCB multicultural fraternities and sororities can be encouraged to adopt a Dreamer class from a local school, providing the students with mentorship and academic support (tutoring, skills development, etc.) as they move through middle and high school. Such long-term interactions can encourage Dreamers to graduate from high school, develop their networking skills at an early age, and establish a support group should they choose to attend CU-Boulder.
- Continuation of CU-Boulder's sponsorship of the *Upward Bound Program* (described at <http://www.colorado.edu/sasc/cuub.html>). This federally funded program provides pre-college programming to approximately 80 Native American high school students from 28 high schools in 13 reservation communities in Colorado and across the country. This program prepares students from its target communities to successfully matriculate to the university/college of their choice. The *CU Upward Bound Program* has been a part of the university community since 1980 and was recently awarded another four-year renewal grant (\$1.85M) from the U.S. Department of Education to continue its quality work among and for the Native American community.
- In addition, CU-Boulder is in its seventh year of partnership with the Roaring Fork School District, the Aspen Community Foundation, and Colorado Mountain College in providing pre-college programming to approximately 180 middle and high school students from the Roaring Fork Valley. This unique partnership between a school district, a local community foundation, a local community college and a major university has allowed CU-Boulder to extend its pre-college outreach to a rurally isolated community, which further demonstrates that CU-Boulder considers itself in service to the entire state and not just the Colorado Front Range. The partnership has begun to bear fruit for the university as an increasing number of students from the program are being admitted and choosing to matriculate to CU-Boulder. As a result of the success of this partnership, efforts are currently underway with the Summit County School District to assist in developing similar pre-college programming for its student population.
- Additional information on the many programs that work with K-12 students, parents, and teachers is available at <http://www.colorado.edu/SASC/pcdp.html>.

Student Admission

- In fall 2008, CU-Boulder offered admission to 1,174 Colorado resident students of color with a CDHE admission standard index of 103 or above. Forty-seven percent of those offered admission (553 students) enrolled at CU-Boulder. This is very close to the matriculation percentage of non-minority Colorado admits (48%) with indices of 103 or above.

Fall 2008 resident freshman applications, acceptances, and enrollment by race/ethnicity

- The proportion of applicants admitted and proportion of admits enrolling were similar across all groups.

Undergraduate and graduate fall headcount enrollment by race/ethnicity, 2002 through 2008

- Fall 2008 showed the highest number of minority students in this period for undergraduates, with the percentage minority stable at 11% for graduate, 15% for undergraduate.
- For undergraduates, 2008 was also highest for African American (403) and Hispanic/Latino students (1,592).
- Number of minorities enrolled fall 2008: Undergraduate 3,732; graduate 501.

Degrees awarded by race/ethnicity

- 747 bachelor's degrees (14%) to minorities in FY 2008, with an all-time high of 325 to Hispanic/Latino students
- 121 master's, 27 doctoral, and 36 JD's to minorities

Freshmen 6-year graduation rates by race/ethnicity

- Two-thirds of all first-time full-time summer/fall freshmen graduate from CU-Boulder within six years of entry, as do 61% of minority freshmen.

Freshman retention rates by race/ethnicity

- 84% of all first-time full-time summer/fall freshmen enroll their second fall, as do 80% of minority freshmen.

First-generation undergraduates (with neither parent possessing a bachelor's degree or higher) – New in the 2008-09 report

- 21% of resident undergraduates and 9% of non-resident were first-generation students in fall 2008.
- A total of 4,328 first generation undergraduates were enrolled fall 2008.

Students with disabilities – New in the 2008-09 report

- There are over 1,400 CU-Boulder students registered and active with Disability Services (DS).
- Approximately 85% have non-visible disabilities (ADD/ADHD, learning disability, psychiatric/psychological and/or traumatic brain injury).
- 15% have visible disabilities (blind/visual impairments, deaf/hard of hearing, physical and/or systemic).
- Approximately 12% of students with disabilities identify as students of color.
- In FY 2008 Disability Services also served 32 students with temporary injuries.

Pell grant recipients – New in the 2008-09 report

- 16% of resident undergraduates and 5% of non-resident were Pell recipients in fall 2008.
- A total of 3,001 Pell recipients were enrolled as degree-seeking undergraduates in fall 2008.
- Retention: 84% of first-time full-time summer/fall resident freshmen Pell recipients enroll their second fall, vs. 66% for non-resident freshmen Pell recipients.
- CU-Boulder grants over 1,000 bachelor's degrees each year to students receiving Pell grants at some time in their undergraduate career. The 1,135 in 2008 is 21% of all bachelor's degrees.

Student Programs and Initiatives

VC McKee has included on her staff an Executive Director for Student Success. Mr. David Aragon fills this position, and his purview includes programs and program development for pre-college students and undergraduates. The rich infrastructure of academic and support programs and services at CU-Boulder provides the foundation for a diverse and inclusive learning and working environment across campus. Examples of these programs and services are:

- CU-Boulder has recently begun construction on its new Center for Community (C4C) building. Official groundbreaking is scheduled for March 2009, and the building is scheduled to open in late 2010. C4C will be home to a dining center and a student center featuring 11 core programs and

services from two divisions, ODECE and Academic and Student Affairs. ODECE's units include the Center for Multicultural Affairs (CMA), Disability Services (DS), and the Office of Pre-College Services (PCS). Other units include: Counseling and Psychological Services, Career Services, Gay Lesbian Bisexual Transgender Resource Center, Office of International Education, Ombudsmen Office, Student Cultural Centers, Students in Recovery Program, and the Victim Assistance Program. C4C will be a place that exemplifies diversity, intercultural understanding, and community engagement; it will provide opportunities for students to expand their horizons beyond their known world; and it will introduce them to the breadth of thought, ideas, cultures, and traditions that make our world so rich and interesting.

- In 2008 the College of Arts & Sciences established competitive Graduate Minority Fellowships for students who contribute to the diversity goals of their departments.
- In 2008 the College of Engineering & Applied Science developed the new Broadening Opportunity through Leadership and Diversity (BOLD) Center, which includes the Women in Engineering Program, the Multicultural Engineering Program, diverse engineering societies, the GoldShirt Transitional Program for graduating high school students who are motivated but not yet fully prepared to succeed in an undergraduate engineering program, and the Student Success Center, a free tutoring program that provides over 30 hours weekly of assistance with first- and second-year engineering courses.
- Disability Services, in collaboration with Career Services, hosted the 2009 Workforce Recruitment Program for College Students with Disabilities at CU-Boulder. This program, co-sponsored by the U.S. Dept of Labor and the U.S. Dept of Defense, brings a federal recruiter to college campuses. This year, the recruiter interviewed nine CU-Boulder students for federal jobs.
- Karen Boyd, Deaf/Hard of Hearing Coordinator, presented a Deaf Culture and American Sign Language educational session to the residents of Hallett Hall for its diversity program.

Faculty and Staff Success

The following section includes demographic data on CU-Boulder faculty and staff, and a summary of new and ongoing initiatives and programs aimed at promoting and sustaining greater diversity in these campus populations.

Faculty Diversity—updated in February 2009 to include fall 2008 data

Recruitment and retention of a diverse faculty continues to be a high priority at CU-Boulder. There are 1,051 full-time tenured and tenure-track faculty at CU-Boulder. In fall 2008, there were 94 new faculty in the tenured and tenure track rank, of whom thirty-nine percent were female faculty, twenty-one percent were faculty of color, and seventeen percent were international faculty. Although the majority of the faculty are white, over time there has been a steady increase in tenured and tenure-track faculty of color (African Americans, Asian Americans, Hispanics/Latinos, and Native Americans) and in female tenured and tenure-track faculty.

- Seventeen percent of tenured/tenure-track faculty who are US citizens or permanent US residents, and who have ethnicity recorded on PeopleSoft, are recorded as African American, Asian American, Hispanic/Latino, or Native American.
- The number of faculty of color in tenured/tenure-track positions has more than doubled over the last 19 years, from 70 faculty of color in tenured/tenure-track positions in 1990 to 168 faculty of color in these positions in 2008-09.
- The percentage of women among tenure/tenure track-faculty is now 31% and has increased slowly but steadily over the last 10 years, from approximately one quarter of tenure/tenure-track positions held by women faculty (26%) to almost one third (31%) held by women.
- The percentage of women holding full professorships has been steadily increasing— from 14% in 1999 to 19% in 2008.

- Forty-four percent of assistant professors and 55% of instructors and senior instructors were women in fall 2008. The number of women in the assistant professor ranks increased by 33% in the last eight years, from 100 women in this rank in 2000 to 133 women in 2008.

Faculty Programs/Initiatives

VC McKee has included on her staff an Associate Vice Chancellor for Faculty Diversity and Development. Professor Patricia Rankin fills this position, and her purview includes programs and program development for graduate students, post doctoral fellows/researchers, faculty, and administrators. Her charge is to ensure that CU-Boulder attracts and retains a more diverse faculty. Since this is the first year of operations, a significant amount of time and effort has been spent in planning and in developing connections, both state and national, and in obtaining a better understanding of the issues. Faculty initiatives in place or being furthered include the following:

- Associate VC Rankin has been working with the Associate Vice Chancellor for Faculty Affairs, Deans, and Department Chairs on the development and implementation of plans that will increase recruitment and retention of a more diverse faculty. These plans include working on how to improve departmental climates, strengthen departmental mentoring programs, and work directly with chairs to help them better understand their roles and responsibilities (especially with respect to ensuring inclusive excellence).
- Under AVC Rankin's leadership ODECE is exploring avenues to create stronger networks with other institutions in the Rocky Mountain region to provide broader support for faculty of color.
- The UCB departmental review process has been revamped so that similar units are now reviewed together—a change used to encourage departments to think about diversity plans in a broader context and to look for ways to work together on these plans.
- Two ongoing grant programs encourage more diverse outlooks among faculty. The Big 12 Faculty Fellowship program funds faculty exchanges within the Big 12. Faculty Fellows spend two weeks in residence at another Big 12 school to do research or creative work, collaborate on curriculum development or other educational projects, consult with colleagues and students, offer lectures, or engage in other professional activities. The purpose of the IMPART (Implementation of Multicultural Perspectives and Approaches in Research and Teaching) grant program is to further develop a campus environment which supports and encourages gender, ethnic, and cultural diversity in approaches to scholarly work and teaching. The most recent competitions for both awards were held during January 2009. For more information on these programs, see <http://www.colorado.edu/cu-diversity/faculty.html>. The Provost and the Chancellor have held luncheon meetings with faculty of color to allow those faculty to raise their issues and concerns and to help campus administrators understand their needs.

Staff Diversity—updated in February 2009 to include fall 2008 data

There has been a steady long-term increase in female and racial/ethnic minority representation among administrators and among classified staff in selected job classes.

- The number of campus administrators (officers and professional exempt) who are people of color has nearly doubled over the last 13 years from 56 in 1995 to 120 in 2008.
- The number of female administrators is at an all-time high of 343 and now represents 54% of all administrators.
- Females represent 52% of classified staff outside food service and custodial positions. People of color hold 17% of these positions, up from 15% in 2007.
- There has been a slight increase in the number of women employed in service maintenance positions in the last few years. In 2008 women filled 43% of these positions, whereas 40% of women were working in these positions in 2001. The proportion of people of color working in these positions also increased—from 60% in 2001 to 66% in 2008.

Diversity-related Programs for Exempt and Classified Staff

Ongoing diversity-related programs and services for UCB staff include:

- The provision of New Employee Orientation and Sexual Harassment Policy training in Spanish as well as English, as well as translation of other important Human Resources information for Spanish-speaking employees.
- Availability of English-language courses for employees for whom English is a second language to assist in improving their English language skills.
- Encouragement to participate in diversity education and easy access to information about diversity training and education resources, which include formal and informal programs both on and off-campus (please see <http://www.colorado.edu/cu-diversity/training.html>).
- Availability of simultaneous translation equipment for employees with limited English abilities. This equipment is available for training and other activities and can translate up to six languages other than English. There are 108 receivers available for employees.

Colleges, Schools and Other Campus Units

The CU-Boulder campus diversity plan was used as a template for the development of departmental and unit diversity plans across campus. As reflected in their plans and progress reports, many campus units have shown impressive strategies and advancement towards improving climate and making their unit's staff, students, and faculty more diverse by actions such as infusing diversity into the curriculum, encouraging unit members to attend diversity-related trainings and events, and engaging their unit members in mentoring, recruiting, and outreach. Diversity plans and progress reports are posted at <http://www.colorado.edu/cu-diversity/plans.html>. Examples of recent campus-wide achievements include:

- In February 2009, staff from the divisions of Academic Affairs, Student Affairs, and Administration co-planned the annual Diversity Summit, an example of a premier diversity education opportunity for the whole campus. The two-day conference included campus- and community-based experts who presented workshops on a range of topics related to enhancing inclusive excellence.
- The 11th Annual Assistive Technology Conference in November 2008 brought nearly 200 attendees for 50 sessions/workshops on current practices in assistive and adaptive technologies for students with disabilities in higher education, as well as legal and policy issues and accessible campus media/information, e.g., web pages, library resources.
- The libraries opened a new research area with improved facilities for users with disabilities; please see also <http://ucblibraries.colorado.edu/about/disabilities.htm>.
- Libraries hired an East Asian librarian to continue building East Asian Collections.
- In the fall of 2008, Davian Gagne, an experienced social worker and outreach director, was named the gender violence prevention and education coordinator for the University of Colorado at Boulder, a new five-year position.
- As part of its ongoing series of symposia on Ethics and Civic Engagement, the School of Journalism devoted its December 2008 symposium to issues of diversity in media. The proceedings of the symposium will be published and distributed to our campus colleagues and to Journalism and Mass Communication colleagues across the country.
- In October 2008, the Black Law Student Association spearheaded the first annual "CU Law Diversity Week." Every student organization was invited to participate in a designated week dedicated to addressing issues related to diversity. Organizations that participated included Women's Law Caucus, Asian Pacific Law Student Association, Latino Law Student Association, and Diversity Awareness Now.
- In February 2008, in honor of African American History Month, the School of Law Dean's Diversity Committee partnered with the Black Law Student Association to host a panel discussion on African American youth in the criminal justice system. A panel discussion also addressed the legal issues raised by Amendment 46.

- Disabilities Services staff, the ADA Coordinator, and Legal Counsel meet regularly to discuss relevant campus disability issues and have developed Campus Accessibility Guidelines and procedures for the Central Access Fund. These guidelines can be found at <http://www.colorado.edu/cu-diversity/downloads/ADAcordinator.pdf>.

Campus Climate/Community Engagement

The University of Colorado at Boulder strives to create a welcoming and supportive climate on and around our campus in which people reflecting diverse and multiple individual identities are free to hold, share, and express differing ideas and opinions. Dr. Alphonse Keasley, Assistant VC for Campus Climate and Community Engagement (CC/CE), oversees efforts in this area.

Campus Climate

Examples of initiatives and programs aimed at developing and maintaining a campus climate that welcomes, respects, and supports all members of the campus community include:

- The Leadership, Excellence, Achievement, and Diversity (CU-LEAD) Alliance and Scholarship Program, a set of multidisciplinary academic neighborhoods whose students, faculty, and staff are united to promote diversity and educational excellence for the CU-Boulder campus through access for students of color and first-generation students. For more information, please see <http://www.colorado.edu/cu-diversity/lead.html>.
- Four Chancellor's Advisory Committees that oversee initiatives to address campus climate issues related to gender, race and ethnicity, disability/accessibility, and sexual identity. This past year, VC McKee and the Chancellor organized the Chancellor's Diversity Advisory Board (CDAB), with members from across the state representing many facets of diverse communities, to provide feedback and advice to supplement our campus-based advisory committees.
- ODECE meetings with constituents from around the campus on how to prevent bias-motivated incidents and to educate the campus community about bias incidents. Chaired by the Assistant VC for CC/CE, these discussions have included the directors from the Office of Discrimination and Harassment, the Office of Judicial Affairs, Career Services, Sexual Assault Prevention, Alcohol and Other Drugs, Office of Victims Assistance, Student Involvement and Assistant to the Associate Provost for Undergraduate Education, and others. The Office of International Education is providing an opportunity for the Assistant VC for CC/CE to present a session at faculty-led International Education workshops.
- Mandatory discrimination and harassment workshops for employees.
- Disability Services staff collaborated with Dr. Willem Van Vliet and graduate students in Environmental Design and Research, School of Architecture for the iCAN Interactive Mapping Project, which was to develop a three-dimensional mapping system on campus. A campus community forum of individuals with disabilities and interested staff provided valuable needs assessment. Funding and technical assistance was garnered from Google, UROP and CARTS Scholars Seed Fund. Also, a campus accessibility workshop was held for 25 CU staff on creating physical access.

Community Engagement

Recent CU-Boulder efforts to further community engagement on diversity issues include:

- Collaborative meetings in 2008-09 between Assistant VC Keasley, city council members Crystal Gray and Angelique Espinoza, and other city and campus personnel to work toward improved inclusion and social sustainability in our community
- Establishing a partnership with the city of Boulder's Bias-Incident Hotline, which offers survivors and witnesses of hate-motivated incidents support, advocacy, and referral services
- Cooperative effort of the Reading to End Racism program (serving Boulder county) and the office of the Assistant VC for CC/CE to promote greater collaboration with the university students, staff, and faculty.

- There is a history of diverse people acting locally on problems that directly impact their families, friends, and communities. Historically, many believe that those who prioritize environmental issues are perceived to be upper class, white, and college educated. Integrating these voices in the mainstream has long been a goal of the environmental movement, but it has remained elusive. In the wake of Hurricanes Katrina and Rita, local issues have become global. The campus invited environmental speaker Jerome Ringo who demonstrated why making these voices heard has become more urgent than ever.

Conclusion

The University of Colorado at Boulder aspires to be a world-class university where respect for diversity is a cultural norm practiced by all faculty, staff and students. We look forward to more fully realizing the power and promise of diversity, intercultural understanding, and community engagement to promote a greater sense of multiculturalism and inclusiveness on our campus.

Additional information on diversity efforts and accomplishments at CU-Boulder can be found at <http://www.colorado.edu/pba/div/divplanprogress.htm>. The chart included at the end of this report describes selected recent accomplishments that enhance an environment of inclusive excellence at CU-Boulder.

2008-09 Staff appointments in the Office of Diversity, Equity, and Community Engagement (ODECE)

- Associate Vice Chancellor for Faculty Diversity and Development, **Professor Patricia Rankin**, Physics and former Principal Investigator of the Leadership, Education for Advancement and Promotion (LEAP) of Faculty.

April 2009

University of Colorado at Colorado Springs Report on Diversity, April 2009

Prepared by the University of Colorado at Colorado Springs Associate Vice Chancellor for Diversity & Inclusiveness and the Office of Institutional Research

DIVERSITY STRATEGIC PLAN—VISION AND IMPLEMENTATION

The UCCS Diversity Strategic Plan 2007 provides a vision of the central role of diversity and inclusiveness in achieving academic excellence. This document was developed with wide participation of faculty, staff, students, administrators and community members. It provides definitions of diversity, inclusiveness, and cultural competence; overarching and comprehensive diversity strategies; and a framework for devising yearly action priorities and resource issues. The UCCS Diversity Strategic Plan 2007 was adopted by the Board of Regents in June 2007.

The Associate Vice Chancellor for Diversity and Inclusiveness (AVCDI) heads the implementation of the Diversity Strategic Plan. This position is structured according to a collaborative model of chief diversity officer. As the result of a regional search, Professor Kee Warner from the department of sociology was appointed to this position in April 2008 after serving in an interim capacity since September 2007 and as director of diversity strategic planning for UCCS for the year prior to that. The Diversity Foundations committee acts as an overarching advisory committee to the AVCDI. This committee includes representation (Diversity Catalysts) from all of the academic colleges and each non-academic division and meets on a semi-monthly basis. The AVCDI is a member of the Chancellor's Strategy Team, the Academic Affairs Leadership Team, and Deans' Council and meets regularly with the Provost and the Chancellor. A critical dimension of diversity and inclusiveness work at UCCS is the effective collaboration between academic affairs and student success. This strong campus tradition is reflected in the integration of faculty, staff, and students in all diversity initiatives. Regular meetings of the chief diversity officers from each campus with the Assistant Vice President for Diversity and the Vice President for Academic Affairs have fostered cooperation within the University of Colorado system.

The AVCDI does not have a support staff or a list of direct reports, but very strong "dotted line" relationships within academic affairs (Faculty Minority Affairs Committee and Women's and Ethnic Studies), student success (MOSAIC: Multicultural Office for Student Access, Inclusiveness, and Community, Student Recruitment, Retention), and administration and finance (Human Resources, Compliance).

STUDENT SUCCESS

Enrollment

The growth of UCCS as a campus is closely tied to increasing the diversity of the student body and broadening access to higher education, particularly in Southern Colorado. This year, students of color comprise nineteen percent of undergraduate student body, the highest proportion in the past eight years. The ten percent increase in Latino students is

even more than the robust growth of 5.9% annually over the past five years. The proportion of African American students has not shown the same gains, in part reflecting the demography of Southern Colorado. African American applicants end up enrolling at UCCS at a lower rate (36%) than other groups, but students of color as a whole enroll at a slightly higher rate (39% of those who apply) than White students (38% of those who apply). First generation students (37%) and Pell recipients (21%) continue to comprise a substantial portion of the undergraduate student population, though this has fallen slightly in the past year. Graduate enrollment as a whole has not been as robust in the past five years and the proportion of minority students (14.7%) has also declined slightly.

Our success in increasing the diversity of the student body is based on establishing and building pipeline programs; providing holistic outreach to prepare families for the admission and financial aid process; expanding scholarship programs; effectively partnering with the community colleges; and strategically recruiting. Outreach efforts are integrally linked with student support and retention programs.

Our successful Pre-Collegiate program has been expanded to new communities in Southern and Western Colorado—La Junta, Ridgeway, Eagle. The program serves, not only first-generation students, but a high proportion of students of color. Other campus programs have adopted the technique of bringing students to campus to engage in academic activities and to interact with UCCS faculty, staff and students. These include the Mountain Lion Experience, the Colorado Educational Services and Development Association (CESDA) College Symposium, and Partnership in Innovative Preparation for Educators and Students (PIPES).

The Chancellor has actively developed resources to support education for promising students from underrepresented groups and/or with financial challenges. This includes UCCS scholarships, such as Reach Your Peak, as well as close partnership with other scholarship programs—for example Kane, Reisher, Daniels Fund, and Denver Scholarship Foundation. UCCS not only publicizes these scholarships and assists with screening and selection, but provides the personal contact and ongoing-support to students and their families that helps scholarship recipients succeed in college.

Transfer students from the community colleges are another important component of our student body. UCCS has established a very close collaboration with Pikes Peak Community College, the local community college, including a concurrent enrollment program in engineering. This is a model for building closer ties with other community colleges, particularly in Southern College. The College of Nursing and Health Sciences obtained a Johnson Foundation grant to link the two-year nursing program at Otero Junior College with our four-year program. Health Sciences is also working with Pueblo Community College on wellness programming. All of these programs enhance the visibility of UCCS among community college transfers. In addition, scholarships such as the University Connection provide direct support to transfer students.

The new Dean of the Graduate School is actively seeking support for graduate students across the board. Graduate merit fellowships have been increased by forty percent and four new research assistantships have been created in the engineering college. UCCS partnered with four other institutions of higher education on “Bridge to the Doctorate”

proposal to the National Science Foundation that was submitted in January 2009. If approved, this grant will provide one million dollars of funding for UCCS students during the fourth year of the program (2012). This will fund minority students at UCCS earning their bachelor's degree in engineering and continuing on for a doctorate.

Retention and Graduation

Improving retention and graduation rates at UCCS is extremely important to our institutional success. The office for Student Retention and First Year Experience focuses on the academic and non-academic challenges facing our students. The retention rate for students of color this year rose to 69%, only slightly below the 70% retention rate for the entire freshman class. While the proportion of undergraduate degrees awarded to minorities over the past five years has held steady in the range of fifteen to nineteen percent, the number of undergraduate degrees awarded to minority students has gone up thirty percent (2003-2008). Also, the six-year graduation rate for minority students (45%) is actually two points higher than that of white students (43%). The same general pattern holds for graduate degrees though both the proportion of degrees awarded to minority students and the increase in the number of degrees are lower. Over the past five years, the proportion of graduate degrees awarded to minority students has held between twelve and fifteen percent. The actual number of degrees awarded minority students during that time frame increased by eight percent.

Improved retention from freshman to sophomore year is partly due to the high level of participation in the Freshman Seminar. While the Freshman Seminar is not required, it is strongly encouraged and is attracting a significant proportion of the freshman class—sixty eight percent in 2008. This academically grounded class allows students to work directly with faculty and advanced student mentors in small sections of twelve to fifteen students. Students are introduced to support services and coached for success inside and outside of the classroom. Learning communities are being piloted to provide additional educational opportunities that extend beyond the limits of a single class. The retention office identifies and engages with students who are academically at-risk through an Early Alert program.

The Office of Student Multicultural Affairs was renamed this year to emphasize its role in fostering and advocating an inclusive environment for all students in addition to providing particular support for students from underrepresented and/or marginalized groups. The new name is MOSAIC, Multicultural Office for Student Access, Inclusiveness, and Community. The director of MOSAIC is part of the Student Success Division Leadership Team and collaborates closely with the Office for Retention and the First Year Experience and with the AVCDI. MOSAIC works closely with the Diversity Alliance Committee consisting of student support staff from across the campus. The philosophy of MOSAIC is to involve diverse students and their families in the college experience. This is exemplified by the La Familia reception for incoming students and by the Multicultural Graduation Celebration co-sponsored by the Faculty Minority Affairs Committee.

In addition to providing ongoing individual student support, the core programs of MOSAIC include a campus-wide mentoring program and student leadership development including participation in such programs as the Big Twelve Conference for African-American student organizations and national conferences such as the Hispanic Association of Colleges and Universities and the National Conference on Race and Ethnicity.

CAMPUS CLIMATE

Providing an inclusive campus climate is a value that cuts across all the functional areas of the university and affects students, staff, faculty, administrators and community partners. The goal of inclusiveness at UCCS has been defined so that it encompasses not only differences of race, ethnicity, and gender, but also such issues as sexual orientation, disability, gender expression, age, and military service. This requires, not only an openness to other perspectives, but understanding the inequalities created by patterns of privilege and disadvantage and a commitment to join in the work of making the university more inclusive.

The BIG Idea Building Inclusiveness Workshop has been a central campus initiative funded under the auspices of the AVCDI and carried out by a BIG Idea faculty of staff and faculty trainers directed by a program coordinator. The 2.5 hour interactive workshop is designed to provide a ground floor of understanding appropriate for every campus constituency and leading to individual action commitments. The workshop is not mandatory, but has been strongly encouraged by leadership across campus. The Chancellor and her strategy team participated as a group in a workshop and workshops have been organized for each college and various functional areas. Workshops have also been held for specific groups such as freshman seminar instructors, learning center staff, resident assistants, the Chancellor's leadership class, and the Student Government Association. The workshop has been very well received and attended by more than four hundred people during the pilot phase and first year. Based on 223 evaluation responses from seven workshops between August 2008 and February 2009, the average rating of the workshop was eight on a ten-point scale. The BIG Idea Workshop will be incorporated into the required professional development program for student leadership during the coming academic year. We are assembling the BIG Idea faculty for the coming year and considering spin-off activities such as advanced workshops and learning modules for classroom application.

In response to the student government association president's controversial decision not to sign the form approving funding for a "Coming Out Day" sponsored by SPECTRUM, a student organization, extensive conversations have taken place this year between the administration, faculty and student organizations to clarify the responsibilities and procedures of student government officials and the obligation of the university to guarantee free speech while protecting the access, safety and fair treatment of all students inside and outside of the classroom. Faculty members have organized a new committee, the PRIDE Committee to represent Lesbian, Gay, Bisexual, Transgender, Queer and Intersex (LGBTQI) concerns and have requested recognition by the Faculty Assembly. The Chancellor, Vice Chancellor for Student Success, and AVCDI have met with SPECTRUM to discuss concerns and ways to make support for LGBTQI students more visible and available on campus. The Chancellor has convened a task force this Spring to address the climate, policies, practices and procedures important for our LGBT students, faculty, and staff in support of our UCCS core values.

Following recommendations from the Diversity Strategic Plan and from Faculty Representative Assembly, this year UCCS initiated an ombuds program to provide free and informal guidance to any member of the campus community regarding conflicts or concerns. After a regional search, retired faculty member Dr. Adelina Gomez was hired to

direct the program on a part-time basis. The Boulder and Denver Ombuds offices have been extremely supportive in sharing their experience with us during this start-up phase.

The AVCDI in coordination with the BIG Idea Faculty and Institutional Research has piloted a survey to gather student perceptions of campus climate. A preliminary round of responses have been gathered by means of an online survey. The responses will be used to refine the survey and to propose an instrument and reporting protocol to the Chancellor and Leadership Team for implementation in the coming academic year.

FACULTY AND STAFF DIVERSITY

The diversity of the staff and faculty as a whole has not kept pace with the diversity of the student body. Fourteen percent of all staff and faculty are minority, but there is a great deal of variation by job type, rank, and college. As a whole, women have made greater gains, comprising 54% of the faculty and staff, though this also varies by job type, rank, and college. Within the faculty ranks, the highest proportion of minority faculty is among assistant professors (16%), followed by ten percent of associate professors, and eight percent of full professors. Since most faculty are hired at the assistant professor level, this likely reflects the increased emphasis on diversity in faculty searches although the drop-off at higher ranks may also result from senior faculty taking positions elsewhere. Among the colleges, the College of Education has the highest proportion of minority faculty with fourteen percent and the College of Business is lowest at three percent.

Among the staff, there is a higher proportion of minorities among the classified staff (23%) than among the professional-exempt (13%). Interestingly, one third of the university officers (Deans, Associate Vice Chancellors, Vice Chancellors, and the Chancellor) are minorities, which is equaled only by the minority representation in service jobs. Women constitute a majority in all staff classifications except officers and service occupations.

The Human Resources Office has worked in collaboration with the AVCDI to provide training to search committees. The Human Resources Compliance Director meets in person with search committees for professional-exempt and faculty searches. The AVCDI also meets with faculty search committees and officer level administrative searches. The search committee training links recruitment with the strategies of the Diversity Strategic Plan, identifies the characteristics of active recruitment, and flags common misconceptions regarding the recruitment of women and minority candidates. In addition to advocating diversity within pools of candidates at each stage of recruitment, the training urges committees to consider the contributions the new hire may make to campus diversity and inclusiveness strategies over and above the identity of the person who accepts the job. In this way, search committees are encouraged to consider the commitment and experience that candidates offer in advancing diversity and inclusiveness through their pedagogy, scholarship, and professional service. This approach assures that diversity and inclusiveness concerns are addressed with all candidates.

The search process has also been modified to reflect this approach to diversity and inclusiveness. In the past, search committees were required to include a woman and a minority (not the same person) within their membership. Because of the lack of diversity in

many departments, this often meant inviting faculty, staff, and even students from outside the department to join search committees and to “represent” these issues. Being outsiders to the department put these advocates at a substantial disadvantage in arguing the merits of the candidates and, to some degree, sent the message that diversity was not a central departmental concern. While we still encourage search committees to include diverse people within their membership, we are also asking each committee to designate a “diversity champion” who is a voting member of the department in question. The diversity champion is not necessarily a woman or minority, but assumes the role of advocating inclusiveness in the search in terms of active outreach and connection with diversity and inclusiveness strategies. The diversity champion is expected to report back to the Human Resources at the end of the search on best practices and challenges. We are developing a program for support and professional development for diversity champions, beginning this year with an end-of-the-year working breakfast to discuss what we have learned. Human Resources is also introducing the campus to the Jobs@CU. The mail-in postcard system for reporting candidate gender and ethnicity used in the past has proven unreliable. Jobs@CU will provide more consistent, voluntary and confidential data for retrospectively evaluating the diversity of candidate pools.

The Opportunity Hire fund managed by the AVCDI provides limited funds for one-time costs associated with diversity hires. These funds have been used by two colleges in the past year to bring in additional candidates for campus visits. One of these resulted in hiring a female international faculty member in a department with few women. These funds are also available to assist with start-up packages. This year one department accessed funds for a Native American professor who will join the faculty next year.

We recognize that all of the time and energy devoted to faculty and professional searches is for naught unless we provide necessary support for new members of our campus community. This concern was identified in the Diversity Strategic Plan and has been taken up by the Faculty Minority Affairs Committee (FMAC) along with the AVCDI in the form of a Newcomers’ Project. While the Diversity Strategic Plan recommended the introduction of an exit survey procedure, the FMAC felt it was critical to identify concerns and problems well before someone chose to leave UCCS. The Newcomer’s Project was initiated by Dr. Christina Jimenez as a faculty associate to the AVCDI and as chair of FMAC. In consultation with others, she designed an interview schedule for FMAC committee to meet with new faculty during their first year of employment at UCCS. This was not limited to women and minority faculty, but was extended to all newcomers. Dr. Jimenez compiled this information and assembled a report that will be presented to the Provost identifying best practices and areas of concern. In conjunction with the AVCDI and Jessica Wood, an Emerging Leaders Fellow, Dr. Jimenez constructed a questionnaire that will be used in connection with the newcomer interviews this academic year. FMAC and the AVCDI will propose that this process be institutionalized under the auspices of the Provost office. In a similar vein, the FMAC has for several years hosted a Fall reception for all new faculty and open to all faculty and staff. The FMAC also worked with the AVCDI to accomplish another strategy from the Diversity Strategic Plan, the creation of an annual Faculty Award for Outstanding Contribution to Diversity and Inclusiveness. This \$1,000 award, funded by FMAC and the Chancellor’s office, will be given at the end-of-year campus award ceremony.

TRANSFORMING TEACHING AND SCHOLARSHIP

Advancing diversity and inclusiveness for institutional excellence implies transforming the way that we teach, how we produce scholarship, and how we support our students. Certain programs at UCCS have been at the leading edge of advancing teaching and scholarship in these directions. Our new program in Women's and Ethnic Studies (WEST) combines two free-standing minors into a major that employs an innovative intersectional lens. The result is a new model for preparing students for professional and academic careers in a multicultural and global context. After a national search, a director was hired to guide the development of this program and to build the faculty. The enthusiastic response to the first faculty search within WEST reflects a robust appreciation for the intersectional paradigm. The associated Matrix Center for the Advancement of Social Equity and Inclusion promotes understanding and engagement with inclusiveness through activities ranging from the White Privilege Conference to the Knapsack Institute for curricular transformation. The AVCDI has provided scholarships to support the participation of UCCS faculty in the nationally known, Knapsack Institute. Another example is the fourth annual Culturally Responsive Teaching, Leadership, and Counseling (CRTLC) symposium held by the College of Education which brings nationally known scholars to campus for the professional development of UCCS students, staff, and faculty as well as personnel from Colorado school districts.

In addition to this leading edge work, the Diversity Strategic Plan called for broadening the base of faculty who address diversity and inclusiveness through their scholarship. The AVCDI created a new program entitled Innovations in Scholarship for Inclusive Excellence (ISIE) providing small research grants to faculty that address diversity and inclusiveness in their scholarship in one of three ways: 1) producing scholarship that advances our understanding of diversity and inclusiveness; 2) creating scholarly projects that promote diversity in the research process; or, 3) scholarship that is of value to diverse communities and builds their linkage with the university. Five grants of \$1,000 were awarded for projects from the College of Letters, Arts, and Sciences, the College of Education, and the College of Engineering and Applied Sciences.

On the system-wide level, UCCS faculty are engaged in institutional transformation by planning and participating in a new system-wide conference focused on these issues. *Building Inclusiveness at CU* on May 15, 2009 will showcase best practices from faculty and staff throughout the CU System. UCCS faculty and staff will present nine sessions at the conference.

COMMUNITY ENGAGEMENT

As a result of the high value for community engagement, UCCS has been rated one of the most engaged campuses in the country. Community engagement is also critical for building the diversity and inclusiveness of the campus on all fronts. This encompasses activities of a very wide range of actors: from the Chancellor's leadership in advocating for education in Southern Colorado to the custodian who earned accolades from Goodwill Industry for his successful record of hiring and supervising developmentally disabled workers.

Here we highlight just a few areas of activity:

- *Collaboration with Colorado Springs Diversity Forum*—Business and community leaders formed the Colorado Springs Diversity Forum to promote inclusiveness as integral to economic and cultural vitality of the Pikes Peak region. The group has highlighted the long-standing traditions of inclusiveness on the area to counterbalance outside perceptions. UCCS has participated in the Everybody Welcome celebration and co-sponsored Black History events on our campus for the past two years.
- *Participation in Community Banquets and Scholarship events*—As a campus, we have mapped out a calendar of community events so that scarce resources can be directed to the events that produce the greatest impact for students and for higher education.
- *Community Celebrations on Campus*—UCCS is increasing its community visibility by hosting events on campus. This will be further facilitated by the construction of the events center. In the past year, UCCS provided a venue for the Juneteenth celebration organized by the African American Voice. Cinco de Mayo, Inc. also considered the prospect of moving their event to campus.
- *Collaboration on Gender Expression Issues*—The campus has worked with local organizations to clarify our commitment to gender expression as an aspect of diversity and inclusiveness and to assure support for transgendered students.
- *Disability Awareness Week*—The Office of Disability Services worked with local agencies to provide a series of informational activities on campus on disability issues.
- *Black Pastors' Union of Southern Colorado*—The AVCDI hosted a luncheon for the Black Pastors' Union of Southern Colorado with campus leadership to provide information on student outreach and support and to begin to develop outreach programs with their constituencies.
- *National presentations on diversity and inclusiveness programs*—UCCS teams have presented our approaches to planning and implementing diversity and inclusiveness programs at national conferences including the American Association of Colleges and Universities and the Hispanic Association of Colleges and Universities.

Summary

In summary, UCCS is successfully building the infrastructure for diversity and inclusiveness as an element of academic excellence, broadening participation of faculty, staff, and students, and fostering a climate that welcomes and supports all types of students. These efforts are bearing fruit, but there is continued room for growth and innovation. The commitment of UCCS leadership is clear and the broad engagement of campus constituencies are producing results even in an environment of scarce resources.

April 2009

University of Colorado Denver Report on Diversity, April 2009

Prepared by the UC Denver Office of Diversity and Inclusion

About This Report

In fall 2006, the University of Colorado Denver began implementing the second phase of Chancellor M. Roy Wilson's "Blueprint for Action," a response to the Blue Ribbon Commission's recommendations for diversity activities on the university's downtown and Anschutz medical campus. The colleges, schools and administrative units throughout the institution were asked to develop plans to align with the commission's recommendations. In doing so, they worked closely with faculty governance bodies, engaged staff and student constituencies.

As they developed their plans, the schools and colleges established overarching goals for direction. They defined objectives, set timelines, identified areas of responsibility, designated milestones and established methods of assessing progress.

This report presents a summary of UC Denver diversity initiatives and accomplishments.

Mission, Vision and Values

Diversity is at the heart of the University of Colorado Denver's new mission, vision and value statements, driving its success in reaching the people and communities it serves. We can advance the creation, dissemination and application of knowledge in a culture where boundaries are flexible and permeable only if we promote and sustain diversity.

UC Denver's values embrace mutual respect for all members of the university community; collaboration; the power of community in teaching, learning and scholarship; creativity, innovation and flexibility; service to the public good; personal growth and professional success; and cultural diversity and enrichment. True diversity not only drives, but is driven by these values, and all members of the UC Denver community take it very seriously.

Building a Leadership Structure

After an extensive search, the first Chief Diversity Officer (CDO) at UC Denver was selected. Dr. Zenaido Camacho comes to us with extensive experience at undergraduate, graduate and health science institutions. He has developed a national reputation for his successful efforts in diversity for almost 40 years. In addition to working in several executive positions at these institutions, he has served as professor in the areas of

pathology, molecular and cell biology, community medicine and medicine. His extensive experience in these positions has made him a valuable addition to the university.

Shortly after his arrival, Dr. Camacho selected a new director for the Office of Diversity and Inclusion at the Anschutz Medical Campus (AMC) and restructured the office to ensure the recruitment and retention of diverse health profession students. He strengthened the leadership by helping to recruit a faculty member from the medical school to become the Associate Dean of Diversity at the School of Medicine, Dr. Ann-Christine Nyquist. In addition to his role as CDO, Dr. Camacho was appointed Senior Associate Dean of Diversity, the position Dr. Nyquist will report to.

Strategic Plan

UC Denver has developed a university-wide strategic plan with short-, medium- and long-term goals. A priority of the strategic plan is to infuse a philosophy of diversity in all aspects of the institution. Subsequently, a specific and comprehensive strategic plan for diversity has been completed and many of the action items are being addressed. The institution's diversity plan has the strong support of all segments of the schools and colleges, including deans, chairs, faculty, administrators, staff and students. The plan lays a foundation for efforts in the next decade.

Admissions

The number of diverse students enrolling on the UC Denver downtown campus continues to be strong. For Fall 2008, 36.6 percent of resident freshmen self-identified as students of color.

Much of this success in recruiting and enrolling diverse students comes from strong Preschool-20 (P-20) partnerships, the development of pre-collegiate preparation programs and outreach initiatives such as the Denver Transfer Initiative Title V grant, and recent collaborations with Aurora Public Schools. UC Denver's Downtown Campus pre-collegiate program enrolls more than 50 percent of its program participants. The new residential facility, Campus Village Apartments, has attracted diverse students to the campus. Details about these and other programs will be addressed later in this report.

There continues to be a lack of diversity in the health sciences programs, especially in the School of Medicine. National competition for medical students of color is intense, and UC Denver must find ways to attract those students. The strategic plan calls for expanding the pipeline between the diverse student body on the Downtown Campus and the Anschutz Medical Campus. A more diverse health sciences faculty also will attract a more diverse pool of applicants.

Retention

The retention rate of freshmen has improved the past three years with students of color persisting at a rate of 10 percent higher than white students: 78 percent to 68 percent respectively. This might be attributed to focused grant programs and services for first-generation and low-income students as well as UC Denver providing a residential experience. New and established programs and strategies have been implemented to improve student success during the first year and throughout their academic careers. They include:

- **Experiential Learning Center (ELC):** The recently created ELC serves students, faculty, employers, and community partners as a resource for experiential learning opportunities. Experiential Learning, broadly defined as “hands-on” learning, engages students in active learning beyond traditional classroom, laboratory or studio pedagogy. Well-planned, supervised and evaluated learning experiences promote interdisciplinary learning, civic engagement, career development, cultural awareness, leadership, problem solving and other professional and intellectual skills. Off-campus internships, undergraduate research and service learning are the most common forms of experiential learning. Experiential learning is an important community outreach tool and enhances UC Denver’s image and reputation. Experiential learning is an important form of student engagement, which promotes student persistence and improves graduation rates.
- **Denver Transfer Initiative (DTI):** DTI is a federally funded partnership program with the Community College of Denver. The program was created to provide a smoother transition from CCD to the university. Collaboration with student and academic departments, workshops and advising for students provides the foundations of the program.
- **Campus Village Apartments – First-Year Programming:** Studies have shown that students who live in campus housing during their first year of college have a higher rate of success in school. Programming designed to help with transitions as well as supporting student academic success will be implemented in Fall 2009.
- **Veteran’s Affairs Office:** The Downtown Campus is developing a robust office to more specifically address the needs of veterans. The office serves as a resource for students, faculty and staff by providing outreach and educational services.
- **Early Alert:** A web-based system allows faculty to refer students who are having academic difficulty. These students are referred to academic advisers who guide the students to appropriate resources. The program is a partnership of the College of Liberal Arts and Sciences, Undergraduate Experiences and the Academic Success and Advising Center of Student Affairs.
- **Supplemental Instruction (SI):** The Learning Resource Center (LRC) has developed partnerships with Chemistry and Biology to offer SI for classes in these disciplines. These areas were identified because of the high D/F/W rates in the beginning classes. The SI model calls for a close working relationship between faculty and the SI student facilitators trained by the LRC.
- **Academic Success Packet:** Utilizing an intrusive advising model, students on probation flagged on SIS (the Student Information System) are required to meet with an adviser before registering for classes. Students also are required to

- complete the Academic Success Packet, which is designed for self-reflection, goal-setting and as an introduction to campus resources. The undergraduate schools and colleges are moving toward a uniform packet across entities to be used as an intervention tool.
- **Early Contact:** This program recognizes the need for the institution to connect early with students. Examples of early contact efforts are:
 - Preparation checklist sent with each acceptance letter
 - Orientation programs
 - Individual contact and welcome by advisers; phone calls from alumni to welcome new students at the beginning of each semester
 - **First-year Seminars:** UC Denver offers an optional program of First-Year Seminars (FYS) designed to assist students to successfully make the transition from high school to college, improve student retention and boost new student confidence. The FYS courses integrate rigorous academic content with academic skills such as library usage, campus resources, information literacy, time management, communication skills and career counseling. An important objective of the First-Year Seminars is to both challenge and support new students so they can excel academically and socially at UC Denver. The strong academic component of the UC Denver FYS courses allows the course to count toward graduation requirements in the UC Denver Core Curriculum, or general education program, required of all undergraduate students.
 - **TRiO Student Support Services (SSS):** A federally funded program that supports low income, first generation and disabled students in the achievement of their academic goals. The UC DENVER SSS program is funded to work with 165 students. Students participate in workshops, cultural enrichment, tutoring and supportive advising to help guide them to success.
 - **Writing/Math Centers:** The Writing Center and Online Math tutoring provide additional academic support for students seeking to address weaknesses in writing and/or mathematics.

Graduation

The percent of baccalaureate degrees awarded to students of color has remained steady during recent years, but the actual number of degrees awarded to this student population has increased in each year since 2006. However, six-year graduation rates for students of color have experienced a significant decline in recent years. Some of these declining graduation rates might be attributed to an increase in the number of undergraduate students who are first-generation. Another factor might include rising tuition expenses.

Foundations of Excellence

UC Denver is part of a national consortium of universities analyzing the experiences of first-year students. The Foundations of Excellence process examines nine specific areas, one of which is diversity. Part of the analysis includes surveying students, faculty and

staff on how first-year students are exposed to diverse cultures and ideas. A committee examines the survey results, along with other sources of evidence, to take a candid and comprehensive look at the institution's strengths and weaknesses and to write a report with recommendations to improve efforts.

Community Presence

Since his arrival, Dr. Camacho has made a concerted effort to meet with area leaders, including members of the Denver City Council, administrators from Denver Public Schools and Aurora Public Schools, members of the Blue Ribbon Commission, heads of the metro-area chambers of commerce, constituents from other institutions of higher education, and many other key players in the Denver and Aurora communities. In these meetings, Dr. Camacho has furthered UC Denver's commitment to diversity and the desire to partner with these affiliates to make an impact at the university and in the community at large.

Partnership with Aurora Public Schools and Denver Public Schools

Through the Office of Diversity and Inclusion, UC Denver has partnered with local public schools to create pipeline programs to ensure the success of their students. Aurora students are entering UC Denver programs as early as the 5th grade to expose them to the health profession fields and to prepare them for success as they finish high school and enter college. Currently, there are 60 high school juniors and seniors in this program, and it is anticipated that in the future at least 200 seniors will graduate with a curriculum focused on health professions. This initiative was strengthened through a grant from the Department of Health and Human Services.

Conversations with the leadership of the Denver School of Science and Technology are focused on developing an additional high school academy that would prepare students in the Denver area for careers in the health professions. This school has a successful track record and UC Denver leadership is confident that this success will easily translate to students, enabling them to be successful in college and to be strong candidates for admission to any professional school at the AMC.

Joint Admission to UC Denver Undergraduate Programs and Medical School

UC Denver is exploring the possibility of providing high school graduates the opportunity to simultaneously be admitted to the Downtown Campus and to the medical school. Discussions are taking place to determine the criteria for selection of the students and the performance goals that must be met during the undergraduate training. This exciting initiative will elevate the academic profile and strength of incoming freshmen students. It is anticipated that this type of joint admission also will be provided for students interested in other health professions as well as graduate school.

Faculty Initiatives

Faculty initiatives in place or being furthered include:

- The Office of Diversity and Inclusion contacted all new faculty hires to describe the mission, vision and values of the office, and to recruit faculty interested in diversity initiatives. In addition, a diversity discussion was a major component of the new faculty orientation. These efforts have led to a large number of new faculty becoming engaged in diversity programs and curricular issues.
- The Minority Affairs Committee (MAC) – a subcommittee of Faculty Assembly – led two major campus events that included a debate on Amendment 46 and a symposium, “Crisis of Inclusion.” Both events attracted a large number of on-campus and community participants. The MAC has become a dynamic group of faculty who want to provide opportunities for students as well as faculty of color.
- The Office of Diversity and Inclusion, in partnership with Ethnic Studies, the Auraria Library and the Center for Faculty Development, held a workshop for faculty on diversifying syllabi. Workshops will be held during the 2009-2010 school year, with accompanying Web pages featuring information and resources presented at the workshops. This initiative provides UC Denver faculty with valuable resources that enable them to include a variety of diversity issues in their courses.
- Dr. Camacho mentors faculty members at the Downtown Campus and at the AMC. Faculty of color in particular have approached his office for professional development assistance. Feedback from faculty is quite clear that they appreciate the insight and advice given to them in preparing for promotion and tenure, as well as assisting them in day-to-day activities. In addition to one-on-one mentoring, Dr. Camacho meets with groups of young faculty to provide assistance and direction.
- Ethnic Studies has submitted a proposal to establish an Ethnic Studies major. To date, only a minor has been offered. The number of students taking Ethnic Studies courses has increased dramatically the past few years and this increase is the catalyst for the request to offer a major. This important curricular offering will provide a large number of students the opportunity to take several new courses. In order to accommodate this major, Ethnic Studies will increase its faculty numbers by one.
- Dr. Camacho has initiated discussions with several young, dynamic faculty members from different departments to see if a center could be created that would be composed of faculty interested in research involving racial and equity issues. It is envisioned that much of the research will be focused on improving UC Denver communities. This model has resulted in an increase in faculty members of color at other institutions. This concept will continue to be discussed with the goal of establishing a research center in the near future. This initiative will supplement concerns with race and ethnicity by incorporating broader notions of citizenship and democracy.

Human Resources

The Office of Human Resources implemented the following initiatives during the past year:

- Jobs@CU has been fully implemented for faculty and staff searches. As a result the available gender and ethnicity data for applicant pools have doubled compared to the previous manual data collection process.
- Exit surveys are being sent to all faculty and staff members leaving the university and HR is working to improve the response rate.
- UC Denver Human Resources hosted a university-wide search fair to help departments develop more creative strategies for recruiting diverse candidates.
- Search committee training is being revised to promote more outreach to diverse prospective candidates.

Summary

The University of Colorado Denver has built upon its strength as the most diverse university in the state, thanks to coordinated efforts enabled by the Chancellor's Blueprint for Action. With dedicated leadership in the office of diversity, the university now is poised to make further gains.

To recap the university's improvements:

- A formal leadership structure, with a Chief Diversity Officer and a Director of Diversity and Inclusion at the Anschutz Medical Campus.
- A new strategic plan in which diversity is not only a stated value, it also permeates the expression of all university goals.
- Active recruiting programs and an inclusive environment have helped build a current freshman class that is 36.6 percent students of color.
- Retention of students of color is 78 percent, higher than the university's average.
- The university profile has been raised through personal diplomacy of the Chief Diversity Officer and through new joint projects with city, school districts and community organizations.
- Efforts to recruit a diverse faculty and staff have become more coordinated.

To recap areas of focus:

- Six-year graduation rates for students of color have declined. The factors behind this phenomenon must be better understood. This issue will be addressed in the implementation of our strategic plan.
- Diversity in health sciences programs must be increased. Building closer connections between the comprehensive Downtown Campus and the Anschutz Medical Campus is a clear objective. Increased diversity in health sciences faculty and research programs also is important.

Because of the university's established culture of inclusion, it has become integral to the Metro area's economic, social and cultural wellbeing. We are proud of the diversity we have achieved, and our new and continuing programs aim to expand access to excellence for Coloradans of all walks.

Students of Color as % of Total	11%	11%	11%	12%	12%	13%	11%	11%

As with UG degrees, the proportion of graduate degrees to students of color has remained fairly consistent over time. There have, however, been declines in the *numbers* of degrees awarded since 2006. The latter appears to have a direct correlation with the decline in overall enrollment of graduate students of color in 2005 and 2006.

**University of Colorado Denver

Based on SURDS enrollment files. Excludes students exclusively enrolled in Extended Studies Programs.

*Percent minority based on percent of US domestic

**Definitions (per State of Colorado and US Department of Education):

"Non-resident alien" is "A person who is not a citizen or national of the United States and who is in this country on a visa or temporary basis and does not have the right to remain indefinitely."

This excludes US citizens (native or naturalized) and permanent residents. The "Domestic subtotal" includes all students except "non-resident aliens."
