TABLE OF CONTENTS

Colorado Mesa University Catalog, 2023-2024	10	Scholarships and Financial Aid	40
About Colorado Mesa University	11	General Guidelines	40
Administration	11	Scholarships	40
Administrative Staff	11	Colorado Student Aid Programs	40
Board of Trustees	11	CMU Foundation	41
Emeritus Faculty and Visiting Professors	11	Federal Student Aid Programs	41
Faculty	13	Western Undergraduate Exchange (WUE)	41
University Leadership	21	Mountains and Plains (M&P)	41
Campuses and Facilities	21	Tuition, Fees, Residence Life and Student Accounts	43
Degrees and Programs of Study	24	Tuition and Fees	43
Disclosure Statements	25	Other Fees and Expenses	43
Overview of Colorado Mesa University	25	Tuition and Fee Schedule	44
Academic Calendar	29	College Opportunity Fund	45
Policy Statements	30	Residence Life and Dining	45
Undergraduate Admission Information	31	Residency Status	47
Undergraduate Admission Procedures for Degree-Seeking Students	31	Campus Payment Plan	49
Admission of First-time Freshmen	32	Residency Petition Deadlines	49
Admission of Transfer Students	32	Academic and Student Services, Offices and Activities	50
Admission of International Students	33	University-Wide Academic Offerings	56
Admission of Returning Students	33	Academic Honors Programs	56
Admission of Adult Students	34	Freshman Year Initiative (FYI) Program	56
Baccalaureate Admission Requirements	34	Study Abroad	56
Admission to Specific Undergraduate Programs	34	Undergraduate Developmental Courses	56
Undergraduate Admission Procedures for Non-Degree Seeking Students	34	Registration Policies and Procedures	57
Colorado Public Higher Education Admission Recommendations (HEAR)	35	General Undergraduate Academic Policies	60
Admission Decisions	35	Requirements for Undergraduate Degrees and Certificates	67
Acceptance of Transfer and Alternative Credits	35	Requirements for Degrees	67
Immunization Policy for Measles, Mumps, and Rubella	36	Requirements for Baccalaureate Degrees	68
Selective Service	36	Essential Learning, Lower- and Upper-Division Requirements	71
Veterans	36	Requirements for Associate Degrees	75
Concurrently Enrolled High School Students	36	Requirements for Undergraduate Certificates	76
Residency Status for Tuition Purposes	38	Colorado Statewide Guaranteed Transfer Courses	77
Confirmation of Attendance	38	Graduate Information and Programs	78
Undergraduate Admission Assessment and Counseling Tests	38	General Graduate Admissions Policies & Procedures	78
Acceleration of University Study	38	Graduate Degree Requirements	80
New Student Orientation	39	Graduation Checklist	82
Stampede Welcome Week	39	Research Activities	83
Early Start Programs	39	Graduate Certificate in Applied Mathematics	83
		Graduate Certificate in Rhetoric and Literary Studies	83
		Graduate Certificate in Social Science	83
		Graduate Certificates in Education	84

Initial Teacher Licensure	84	Graphics Technology, Applied Business (Technical Certificate)	121
Master of Arts in Criminal Justice Leadership and Policy	84	Management Foundations, Applied Business (Technical Certificate)	122
Master of Arts in Education	85	Marketing Graphics Technology, Applied Business (Technical Certificate)	123
Master of Business Administration	85	Office Technology, Applied Business (Technical Certificate)	124
Master of Physician Assistant Studies	86	Applied Technology	126
Master of Science in Athletic Training	86	Applied Technology (AAS)	126
Master of Science in Nursing	86	Archaeology	128
Master of Science in Occupational Therapy	87	Archaeology (Minor)	128
Master of Science in Sport Management	87	Art	129
Master of Social Work	88	Education: K-12 Education, Art (BFA)	130
Doctor of Nursing Practice	88	Studio Art, Art (BFA)	134
Doctor of Physical Therapy	89	Art History (BA)	137
Center for Teacher Education (Licensure)	90	Studio Art (BA)	140
Early Childhood Education – Special Education	90	Studio Art (Minor)	142
Elementary Education Licensure – Undergraduate	90	Film Studies and Digital Production (Minor)	143
Secondary Education Licensure – Undergraduate	90	Athletic Coaching and Officiating	144
K-12 Education Licensure – Undergraduate	91	Athletic Coaching and Officiating (Minor)	144
Graduate Programs in Education	91	Athletic Training	145
Areas of Study	92	Athletic Training (MS)	146
Accounting	93	Aviation Technology	149
Bachelor of Science in Accounting + Master of Business Administration (3+2)	94	Fixed Wing, Aviation Technology (AAS)	151
General Accounting, Accounting (BS)	94	Baking and Pastry	153
Public Accounting, Accounting (BS)	97	Baking and Pastry (AAS)	154
Accounting (Minor)	99	Bakeshop Production (Technical Certificate)	156
Addiction Studies	100	Biological Sciences	157
Addiction Studies (Professional Certificate)	101	Biology, Biological Sciences (BS)	157
Agriculture Science	102	Cellular, Molecular, and Developmental Biology, Biological Sciences (BS)	161
Agriculture Science (AS)	102	Ecology, Evolution, and Organismal Biology, Biological Sciences (BS)	165
Animation, Film, Photography, and Motion Design	105	Education: Secondary Education, Biological Sciences (BS)	169

COLORADO MESA UNIVERSITY CATALOG, 2023-2024

How to Use This Catalog

Use the top catalog menu bar, left navigation menu, or the search catalog option to find information in this catalog. Users may print or save a PDF of sections of the catalog or the catalog in its entirety using the Print Options feature at the bottom of the left navigation menu or using the floating printer button in the bottom right corner of the website.

This catalog is designed to assist all types of students - those considering college for the first time, those thinking of transferring from a community college or four-year institution, and those already attending Colorado Mesa University - in choosing the program of study that best fits their aspirations and goals. It includes information about admissions guidelines, financial aid, and academic requirements to allow students to make educated decisions about their futures. This catalog also describes aspects of student life at CMU, opportunities for personal growth outside the classroom, and procedures and policies pertinent to a student's success at CMU.

For those thinking about applying to Colorado Mesa University, the following steps may be helpful:

- a. Review the [Areas of Study](#) (p. 92) offered at Colorado Mesa University, and select disciplines that fall within an area of interest. From here, programs offered within each discipline can be reviewed.
- b. See the [Programs A-Z](#) (p. 752) section or link to a program listed in the chosen discipline(s) in [Areas of Study](#) (p. 92) for details on each specific program of interest. Program pages provide detailed program requirements, suggested plans of study, and contact information.
- c. Look up [course descriptions](#) (p. 769) for some of the courses listed in the program requirements. Courses that fulfill the CMU essential learning degree requirements are provided under [Requirements for Baccalaureate Degrees](#) (p. 71).
- d. Finally, once programs of interest have been selected, see [Undergraduate Admission Information](#) (p. 31) or [Graduate Information and Programs](#) (p. 78) to learn more about the application process and requirements; [Tuition, Fees, Residence Life and Student Accounts](#) (p. 43) and [Scholarships and Financial Aid](#) (p. 40) to learn more about tuition, expenses, financial aid, and housing; and [Academic and Student Services, Offices and Activities](#) (p. 50) to learn about student academic support, activities and services at Colorado Mesa University.

For those who are already students at Colorado Mesa University, this catalog is helpful for the following:

- Choose a major (follow Steps 1, 2, and 3 above.) Once you've declared a major contact the appropriate department to meet with your faculty advisor. If undeclared, contact the [IRIS Advising Center](#) (p. 50) to meet with an academic advisor and discuss options.
- Keep track of your academic progress (review the requirements for the selected [program of study](#) (p. 752) and track progress in DegreeWorks).
- Review courses, both required and elective, in [Course Descriptions](#) (p. 769).

- Review degree requirements and essential learning courses under the requirements applicable to the selected [Undergraduate](#) (p. 67) or [Graduate](#) (p. 78) degree type.

To learn more about career opportunities and programs of study available at Colorado Mesa University, you might also wish to review information provided on our [Academics](#) page and in the [Two-Year Course Planning Calendar/Matrix](#).

Emeritus Faculty and Visiting Professors

Colorado Mesa University Recent Emeritus Faculty

(Date in parentheses indicates year of retirement. In accord with Faculty Senate action, this list is limited to faculty awarded emeritus status in the past 10 years.)

- Thomas Acker**, BS MA, PhD, Professor of Spanish (2022)
- Monte Atkinson**, AS, BFA, MM, DMA, Professor of Music (2018)
- Julie Barak**, BA, MA, PhD, Professor of English (2021)
- Bruce Bauerle**, BA, MS, DA, Professor of Biology (2016)
- Susan Becker**, BA, MA, PhD, Professor of Psychology (2023)
- Clare Boulanger**, BS, MA, PhD, Professor of Anthropology (2014)
- Steven Bradley**, BA, MA, PhD, Professor of Art (2015)
- Julie Bruch**, BA, MA, PhD, Professor of Language (2019)

- Paula Casey**, BS, MA, Instructor of Speech (2023)
- Rex Cole**, AS, BS, PhD, Professor of Geology (2020)
- Adele Cummings**, BA, MS, PhD, Professor of Sociology (2015)
- Jack Delmore**, BM, MM, DMA, Professor of Music (2017)
- Arun Ektare**, PhD, Professor of Computer Science (2014)
- Byron Evers**, BS, MS, Associate Professor of Mass Communication (2013)
- Karen Ford**, BA, MA, PHD, Professor of Psychology (2017)
- Sandy Forrest**, BSN, MSN, PhD, Professor of Nursing (2017)
- Andrew Gordon**, BA, MA, PhD, Professor of Spanish (2012)
- Gig Leadbetter**, BA, MS, PhD, Professor of Kinesiology (2015)
- Daniel Flenniken**, Associate Professor of Mass Communication (2017)
- Myra Heinrich**, BS, MA, PhD, Professor of Psychology (2014)
- Arthur Houle**, BM, MM, DMA, Professor of Music (2020)
- Rick Livaccari**, BS, MS, PhD, Professor of Geology (2023)
- Gary Looft**, Technical Instructor of Applied Technology - Transportation Services (2016)
- Longino Luis Lopez**, BA, MA, PhD, Instructor of English (2012)
- Stephanie Matlock**, BA, MS, Instructor of Biology (2022)
- Robert Mayer**, BA, MS, Assistant Professor of Business (2017)
- Gabriele Mayer-Hunke**, BS, BA, MS, MA, Instructor of English and German (2017)
- Gary McCallister**, BS, MS, DA, Professor of Biological Sciences (2014)
- Tamera Minnick**, BS, PhD, Professor of Environmental Science and Technology (2022)
- Jerry Moorman**, BS, MEd, EdD, Professor of Business (2013)
- Maureen Neal**, BA, MA, PhD, Professor of English (2015)
- John Nizalowski**, BA, MA, Instructor of English (2022)
- Lori Payne**, BA, MS, PhD, Professor of Computer Science (2021)
- Carolyn Quinn-Hensley**, BFA, MFA, Professor of Art and Design (2019)
- John Redifer**, AA, BA, MA, PhD, Professor of Political Science (2018)
- Kristine Reuss**, BSN, MSN, PhD, Professor of Nursing (2017)
- David Rogers**, BA, MBA, Professor of Accounting (2012)
- Eric Sandstrom**, BA, MA, Assistant Professor of Mass Communications (2019)
- Bette Schans**, BS, MS, PhD, Professor of Radiologic Technology (2016)
- Steven Schulte**, BA, MA, PhD, Professor of History (2020)
- Daniel Schultz-Ela**, BA, MS, MS, PhD, Professor of Mathematics (2022)

Patrick Schutz, BS, MS, PhD, Professor of Business Administration (2018)

Luis Silva-Villar, MA, MA, PhD, Professor of Spanish (2022)

Gayla Jo Slauson, BA, MBA, Associate Professor of Computer Information Systems (2017)

William Tiernan, BA, PhD, Professor of Physics (2017)

Richard Vail, BSME, MBA, MSc, PhD, Professor of Business (2023)

Mayela Vallejos-Ramirez, BA, MA, PhD, Professor of Spanish (2022)

Heather Waggoner, AA, BA, MFA, Professor of Theatre Arts (2015)

Patti Ward, AAS, BS, MEd, PhD, Professor of Radiologic Sciences (2021)

Judy Williams, BSN, MSN, Associate Professor of Nursing (2022)

Colorado Mesa University Visiting Professors

Aspinall Professors

Carl Abbott (1985), History; BA, Swarthmore College; MA, PhD, University of Chicago

William Beezley (2008), History; BA, Chico State College; MA, PhD, University of Nebraska

Stephen Bennet (1995), History; BS, MS, Illinois State University-Normal; PhD, University of Illinois, Urbana-Champaign

Alan Block (1996), History, Political Science, and Public Affairs; AB, PhD, University of California-Los Angeles; MA, California State University

Peter Blodgett (2016), History; AB, Bowdoin College; MA, M. Phil, PhD, Yale University

Peter Boyle (1989), History and American Studies; MA, Glasgow University, Scotland; PhD, University of California, Los Angeles

Michael M. Brescia (2018), History; BA, West Virginia University; MA, PhD, University of Arizona

George Browder (2001), History; BS, Memphis State University; MA, PhD, University of Wisconsin at Madison

William Chaloupka (2009), Political Science; BS, University of Nebraska; MA, Arizona State University; PhD, University of Hawaii

Cornell Clayton (2014), BA, University of Utah, M.Lt; D.Phil, Oxford University

Walker Connor (1992), Political Science; John R Reitmayer Professor of Political Science, Trinity College

Martin Cook (2019), Philosophy; BA, University of Illinois; MA, PhD, University of Chicago

Thomas Davis (2007), History; BA, Fordham University; MA, PhD, Columbia University; JD, State University of New York-Buffalo

Roger Dingman (1991), History; BA, Stanford University; MA, PhD Harvard University

Richard W. Etulain (2010), History; AB, Northwest Nazarene College; MA, PhD, University of Oregon; DHL, Northwest Nazarene University

Richard Funston (1987), Political Science; BA, MA, PhD, University of California-Los Angeles; JD, University of San Diego

Andrew Gulliford (1997), History; BA, MAT, Colorado College; PhD, Bowling Green State University

Reynold Koslowski (2020), Political Science, History, and Public Affairs; PhD, University of Pennsylvania

Gordon Martin, Jr (1998), Political Science, History, and Public Affairs; AB, Harvard College; JD, New York University

Thomas Millington (2002), Political Science; BA, Williams College; MA, PhD, Johns Hopkins School of Advanced International Study

Erika Monahan (2021), History; BA, Dartmouth College; MA, PhD, Stanford University

Douglas Monroy (2022), History; BA, MA, PhD, University of California Los Angeles

Robert Mortimer (1986), Political Science; BA, Wesleyan University; MA, PhD, Columbia University

William Parrish (2000), History, Political Science and Public Affairs; BS, Kansas State University; MA, PhD, University of Missouri

Edwin Perkins (2003), History, Political Science, and Public Affairs; BA, College of William and Mary; MBA, University of Virginia; PhD, Johns Hopkins University

F. Ross Peterson (2015), History; BA, Utah State University, PhD Washington State University

Glenda Riley (1993), History, Political Science and Public Affairs; BA, Western Reserve University; MA, Miami University; PhD, University of Ohio

Pamela Riney-Kehrberg (1999), History; BA, Colorado College; MA, PhD, University of Wisconsin

William Robbins (1990), History; BS, Western Connecticut; MA, PhD, University of Oregon

Randolph Roth (2012), History and Sociology; BA, Stanford University; PhD, Yale University

Adam Soward, (2017), History; BA, University of Puget Sound; MA, PhD, Arizona State University

Dominik Stecula (2023), Political Science; BA, University of Michigan, Dearborn; MA, McGill University; PhD, University of British Columbia

Jerome Steffen (1988), History; BS, University of Wisconsin, Madison; MA, Eastern Michigan University; PhD, University of Missouri

Zachary Smith (1994), History, Political Science and Public Affairs; BA, California State University, Fullerton; MA, PhD, University of California, Santa Barbara

Robert Westbrook (2004), History; BA, Yale University; PhD, Stanford University

John Wills, Jr. (2005), History; BA, University of Illinois; MA, PhD, Harvard University

Peter H. Wood (2013), History; BA, Harvard University; BA, University of Oxford; PhD, Harvard University

Faculty

NOTE: Date in parentheses following faculty member's name indicates the first calendar year of a full-time faculty appointment at Colorado Mesa University or Western Colorado Community College. Only full time faculty are listed; prior temporary or part-time service is not indicated. Faculty members with a temporary appointment do not have a year listed.

A

William Adams (2017), Assistant Professor of Construction Management; BS, University of Georgia-Athens; MS, Kennesaw State University; MBA, Kennesaw State University; PhD, Texas State University

William Aikens (2016), Instructor of Music; BM, Duquesne University; MM, University of Cincinnati; DMA, Arizona State University

Shelly Almroth (2021), Instructor of Nursing; AAS, Owens Community College; BS, Regis University; MSN, Western Governors University

Brent Alumbaugh (2010), Instructor of Kinesiology; BA, Colorado Mesa University; MS, University of New Mexico

Tyler Anderson (2006), Professor of Spanish; AA, Ricks College; BA, Brigham Young University; MA, Brigham Young University; PhD, Pennsylvania State University

Jason Andrews (2017), Assistant Professor of Communication Studies; BA, St. Andrews Presbyterian College; BFA, St. Andrews Presbyterian College; MA, University of Florida; PhD, Pennsylvania State University

Sherine Antoun (2019), Assistant Professor of Computer Science; BCS, University of Wollongong; MPhil, University of Wollongong; PhD, University of Wollongong

April Arnhold (2022), Instructor of Nursing; AAS, Colorado Mesa University; BSN, Western Governors University; MS, Western Governors University

Andres Aslan (1999), Professor of Geology; BS, Brown University; MS, University of Colorado-Boulder; PhD, University of Colorado-Boulder

Ryan Avery Follensbee (2022), Technical Instructor of Viticulture and Enology; AAS, Walla Walla Community College; BS, Cornell University

James Ayers (2007), Associate Professor of Chemistry; BS, University of Texas-Austin; PhD, Stanford University

B

Nathan Bachman (2021), Instructor of Kinesiology; BS, Colorado Mesa University; MS, Colorado State University

Diana Bailey (2010), Associate Professor of Nursing; AS, Mesa State College; BSN, Mesa State College; MSN, Walden University

Abdulah Bajaba (2022), Assistant Professor of Business Management; BA, Boston University; MBA, Louisiana Tech University; DBA, Louisiana Tech University

Andrew Bajorek (2022), Assistant Professor of Music; BA, Edinboro University of Pennsylvania; MM, University of Florida

Gregory Baker (2019), Professor of Geology; BS, Lehigh University; MS, Lehigh University; PhD, University of Kansas

Carlos Baldo (2017), Associate Professor of Business Management, Department Head of Business; BBA, Universidad Fermin Toro; MBA, Lynn University; MS, Universidad Pablo de Olavide; PhD, Universidad Pablo de Olavide

Amelia Baldwin (2023), Instructor of Teacher Education;

Valeria Balogh (2022), Instructor of Psychology; BFA, Western Carolina University; MS, Walden University; PhD, Walden University

Dena Banta Corona (2020), Instructor of Nursing; BA, Colorado Mesa University; BSN, Colorado Mesa University; MS, Walden University

Nicholas Bardo (2018), Associate Professor, Department Head of Teacher Education; BA, Brown University; MA, Bowling Green State University; PhD, University of South Florida

Andrea Barnard (2013), Instructor of Mathematics; BS, Brigham Young University-Idaho; MEd, University of Texas-Arlington

Ram Basnet (2013), Associate Professor of Computer Science; BS, Colorado Mesa University; MS, New Mexico Institute of Mining and Technology; PhD, New Mexico Institute of Mining and Technology

Cecilia Battauz (2022), Assistant Professor of Spanish; BA, ISPN8 Alte. Guillermo Brown (Santa Fe, Argentina); MA, West Virginia University; PhD, University of Maryland, College Park

Adam Bavier (2022), Instructor of Outdoor Recreation Industry Studies; BS, Rutgers University; MS, Montana State University

Susan Becker (1996), Professor of Psychology; BA, Reed College; MA, University of Colorado-Colorado Springs; PhD, University of Arizona

Margot Beckett (2005), Professor of Biology; BS, Colorado Mesa University; PhD, Cornell University

Kate Belknap (2011), Instructor of English; BA, The University of the South; MA, University of Dallas

Jeremy Bergen (2009), Assistant Professor of Computer Science; BS, Colorado Mesa University; MS, Georgia Institute of Technology

Ana Berrizbeitia (2018), Assistant Professor of Mathematics; BS, University of Texas-Austin; Graduate Certificate, University of Iowa; MA, University of Texas-Austin; PhD, University of Iowa

Kelly Beville (2011), Associate Professor of Civil Engineering; BS, University of Colorado-Boulder; MS, Cornell University

Scott Beville (2010), Associate Professor of Mechanical Engineering, Department Head of Computer Science and Engineering; BS, University of Denver; MS, Stanford University; PhD, Stanford University

Blake Bickham (2007), Professor of Teacher Education; BA, Texas A&M University; MA, Texas A&M University; EdD, University of Houston

Catherine Bonan-Hamada (1996), Professor of Mathematics; BS, Colorado State University; MS, Colorado State University; PhD, University of Colorado

Edward Bonan-Hamada (1996), Associate Professor of Mathematics; BA, University of Rochester; MA, University of Hawaii; PhD, University of Colorado

Elizabeth Branscum (2016), Technical Instructor of Culinary Arts; BS, University of Central Missouri

Holly Buglewicz (2016), Instructor of Speech; BS, University of Nebraska; BA, University of Nebraska; MA, University of Nebraska

Bonnie Butler (2011), Instructor of English; BA, Fort Lewis College; MA, Colorado State University

Joshua Butler (2004), Professor of Art; BFA, Colorado State University; MFA, Colorado State University

C

Dale Call (2015), Instructor of Biology; MD, University of Maryland-College Park

Robin Calland (2009), Associate Professor of English; BA, University of Colorado-Denver; MA, University of Colorado-Boulder; PhD, University of Colorado-Boulder

Christopher Calver (2021), Technical Instructor of Manufacturing Technology; Certificate, Colorado Mountain College

William Campbell (2013), Technical Instructor of Welding Technology; AAS, Utah Valley University; BS, Utah Valley University

Christopher Carcia (2021), Associate Professor, Physical Therapy Program Director; BS, Arcadia University Glenside; MS, Institute of Health Professions at Massachusetts General Hospital; PhD, University of Virginia

Brooke Carlson (2021), Instructor of English; BA, Bowdoin College; MA, University of Southern California; PHD, University of Southern California

Michael Carlton (2012), Assistant Technical Professor of Manufacturing Technology; AAS, Mesa Community College

Colin Carman (2013), Assistant Professor of English; BA, Hamilton College; MA, University of California-Santa Barbara; PhD, University of California-Santa Barbara

Michael Carsten (2010), Technical Instructor of Transportation Services; Certificate, Southwest Texas Junior College

Terence Casey (1997), Professor of Political Science; BS, Northern Arizona University; MA, University of San Francisco; PhD, Arizona State University

Karl Castleton (2014), Associate Professor of Computer Science; AAS, Colorado Mesa University; BS, Colorado Mesa University; MS, Washington State University

Aisha Chapra (2023), Assistant Professor of Social Work; BA, McGill University; BSW, McGill University; MSW, University of Toronto

Shiang-Lih Chen McCain (2018), Associate Professor of Business; BBA, Providence University; MS, University of Nevada-Las Vegas; PhD, University of Nevada-Las Vegas

Cynthia Chovich (2007), Professor of Teacher Education; BA, California State University-San Marcos; MA, Grand Canyon University; Ded, Walden University

Carol Christ-Campbell (2004), Instructor of English; BA, Colorado Mesa University; MFA, Colorado State University

Rhonda Claridge (1999), Instructor of English; BA, New York University; MA, University of Colorado-Boulder

Kelly Coffin (2009), Instructor of Nursing; AS, Washburn University; BSN, Washburn University; MSN, Walden University

Christopher Cohu (2020), Assistant Professor of Environmental Science; BA, Western Colorado University; PhD, Colorado State University

David Collins (2007), Professor of Physics, Interim Department Head for Physical and Environmental Sciences; BS, Rhodes University; PhD, University of Texas-Austin

Melissa Connor (2012), Professor of Forensic Anthropology, Director of the Forensic Investigation Research Station; BA, University of Wisconsin; MA, University of Wisconsin; PhD, University of Nebraska-Lincoln

Patrice Connors (2019), Assistant Professor of Biology; BS, Ithaca College; PhD, University of Utah

A'lanne Conrad (2019), Assistant Clinical Professor of Physician Assistant Studies; BA, Colorado Mesa University; MS, University of the Sciences

Jill Cordova (1992), Professor of Kinesiology; BA, Humboldt State University; MA, Humboldt State University; PhD, University of New Mexico

Blake Crossley (2007), Instructor of Spanish; BA, Brigham Young University; MA, Brigham Young University

Linda Cummins (2022), Assistant Clinical Professor of Nursing; AAS, Southwestern Illinois College; BS, Ohio University; BS, Ohio University; MA, Webster University

Evan Curtis (2019), Assistant Professor of Art; BFA, Purchase College; MFA, Savannah College

Tracy Cyr (2017), Instructor of Biology; BS, University of California-Riverside; MS, Washington State University; PhD, University of Missouri-Columbia

D

Timothy D'Andrea (2008), Professor of Chemistry; BS, Ursinus College; PhD, University of Colorado

Laurena Davis (2022), Instructor of English; BA, Mesa State College; MA, Northern Arizona University; PhD, Texas Tech University

Michael Delaney (2008), Professor of Criminal Justice; BA, Transylvania University; JD, Salmon P. Chase College of Law; PhD, University of Cincinnati

Tevfik Demirciftci (2022), Assistant Professor of Hospitality Management; BS, Bilkent University; MS, University of Delaware; PhD, University of Nevada Las Vegas and Istanbul University

Sean DeVeau (2022), Instructor of Nursing; AS, Laramie County Community College; BS, Western Governors University; MS, Western Governors University; JD, University of Wyoming

Kathleen Diehl (2021), Assistant Professor of Dance; BA, State University of New York-Plattsburgh; MSW, Case Western Reserve University; MFA, The College at Brockport

Erin Donovan (2018), Assistant Professor of Nursing; ASN, College of Saint Mary-Omaha; BSN, College of Saint Mary-Omaha; MSN, College of Saint Mary-Omaha; EdD, College of Saint Mary-Omaha

Katie Dreiling (2011), Professor of Criminal Justice; BA, St. Cloud State University; MS, St. Cloud State University; PhD, South Dakota State University

Lisa Driskell (2010), Associate Professor of Mathematics, Department Head of Mathematics and Statistics; BS, Central Michigan University; PhD, Purdue University

Edward Dry (2017), Technical Instructor of Manufacturing Technology; AAS, Mesa State College

Lynn Duncan (2011), Associate Professor of Nursing and Clinical Education Center Coordinator; BSN, South Dakota State University; MSN, Colorado Mesa University

Megan Dunegan (2019), Surgical Technology Program Director/Instructor; AAS, Austin Community College

E

Jude Edeigba (2023), Assistant Professor of Accounting; MBA, University Selangor; PhD, Lincoln University

Eric Elliott (2015), Associate Professor of Art, Department Head of Art and Design; AA, Mesa Community College; BFA, University of California-Berkley; MFA, University of Washington-Seattle

Kristy Emerson (2019), Instructor of Nursing; BS, Colorado Mesa University; BSN, Colorado Mesa University; MPH, University of Northern Colorado

Megan Englund (2013), Technical Instructor of Marketing Education; BBA, Colorado Mesa University; MBA, Colorado Mesa University

F

Cathleen Farrell (2019), Instructor of Mathematics; BS, Florida Atlantic University; MS, Florida Atlantic University; MS, University of Florida

Cathy Feller (2011), Associate Professor of Nursing; BA, Brandeis University; BSN, University of Maine; MSN, Walden University

Cassandra Fenton (2016), Assistant Professor of Geology; BA, University of Rochester; MS, University of Salzburg; MS, University of Utah; PhD, University of Utah

Hazel Ferguson (2022), Assistant Professor of Nursing; AAS, Trinity Valley Community College; BS, Black Hills State University; BSN, University of Texas; MSN, University of Texas

Carolyn Ferreira-Lillo (2009), Assistant Technical Professor Mechatronics; AAS, Queensborough Community College; BSEE, City College of New York; MS, State University of New York at Stony Brook

Marc Fischer (2011), Instructor of Mathematics; BS, Colorado Mesa University; MS, Ruhr Universitat Bochum

Sean Flanigan (2006), Associate Professor of Music; BS, University of Illinois-Urbana Champaign; MM, University of Illinois-Urbana Champaign; DMA, University of North Texas

Jennifer Fortuna (2022), Assistant Professor of Occupational Therapy; PhD, Western Michigan University

Glenn Fossett (2004), Assistant Professor of Accounting; BA, University of Missouri-Kansas City; MBA, Western State College

Jeremy Franklin (2007), Instructor of Music Theatre; BM, Ouachita Baptist University

Lisa Friel-Redifer (1998), Professor of Teacher Education; BA, University of California-Santa Barbara; MEd, Northern Arizona University; EdD, Northern Arizona University

Keith Fritz (1997), Professor of Kinesiology; BS, Oregon State University; MS, University of New Mexico; PhD, University of New Mexico

G

Sean Gallagher (2022), Assistant Professor of History; BA, California State University - East Bay; MA, San Francisco State University; PhD, University of California, Davis

Fidel Garcia (2022), Technical Instructor of Paramedic;

Teresa Garner (1995), Professor of Art; BFA, Stephen F. Austin State University; MA, Stephen F. Austin State University; MFA, West Texas A&M University

Alicia Geary (2019), Instructor of Nursing; BSN, Colorado Mesa University

Barbara Geiger (2000), Instructor of English; BA, Texas Tech University; MA, Texas Tech University; PhD, Texas Tech University

TJ Gerlach (2005), Professor of English; BA, University of Utah; MFA, University of Utah; PhD, University of Denver

Ann Gillies (2014), Associate Professor of Teacher Education; BS, Ohio State University; MA, Ohio State University; PhD, University of South Florida

Susan Goebel (1998), Associate Professor of Nursing; BSN, University of North Dakota; MS, University of North Dakota

Justin Gollob (2008), Professor of Political Science, Department Head for Social and Behavioral Sciences; BS, Idaho State University; MA, Temple University; PhD, Temple University

Renee Good (2018), Instructor of Biology; BS, Washington State University; PhD, University of Colorado

Lucy Graham (2016), Associate Professor of Nursing, Department Head of Health Sciences; BSN, University of Kansas; BA, University of Kansas; MPH, University of Northern Colorado; PhD, University of Colorado

Michalene Grebski (2020), Instructor of Psychology; BS, Pennsylvania State University; MBA, Marywood University; MA, Rosemont College; PhD, Silesian University of Technology

Nicole Grider (2016), Instructor of Speech; BS, University of Central Missouri; MA, University of Central Missouri

Olga Grisak (2013), Associate Professor of Radiologic Sciences, Program Coordinator; AAS, Colorado Mesa University; BS, State University Lvivska Politekhnik; MS, State University Lvivska Politekhnik

Geoffrey Gurka (2001), Professor of Accounting; BA, University of Connecticut; MA, Florida State University; PhD, Michigan State University

Damion Gustafson (2016), Assistant Technical Professor of Welding Technology; AAS, Colorado Mesa University

Philip Gustafson (1998), Professor of Mathematics; BS, State University of New York-Oneonta; MS, Washington State University; PhD, Washington State University

H

Kurtis Haas (1999), Professor of English; BA, Truman State University; MA, Truman State University; PhD, University of Nebraska-Lincoln

Kristen Hague (2001), Professor of English; BA, Providence College; MA, University of New Mexico; PhD, University of New Mexico

Eli Hall (2011), Associate Professor of Art, Graphic Design; BFA, Missouri State University; MA, Lindenwood University; MFA, Colorado State University

Kathleen Hall (2015), Associate Professor Nursing; BS, University of Maryland; BSN, University of Alabama-Huntsville; MS, University of Arizona; PhD, University of Arizona

Amy Hammerich (2022), Associate Professor of Physical Therapy; BS, Miami University; MSPT, Regis University; DPT, Regis University; PhD, University of Colorado

Paul Hampton (2012), Professor of Biology; BS, Eastern Illinois University; MS, University of Texas-Tyler; PhD, University of Louisiana-Lafayette

Jennifer Hancock (2008), Associate Professor of English; BA, Oklahoma State University; MFA, Sarah Lawrence College; PhD, Oklahoma State University

Erik Hansen (2013), Professor of Biology; BS, Utah State University; MS, Utah State University; PhD, University of Wyoming

Shelly Hansen (2021), Instructor of Mathematics; BA, Azusa Pacific University; MA, Colorado Mesa University

Michele Hanson (2002), Instructor of English; BA, University of California-Santa Barbara; MA, University of New Hampshire; MLS, University of Arizona

Jesse Harmon (2019), Technical Instructor of Construction Electrical;

Tim Hatten (1995), Professor of Business; BA, Western State College; MS, Central Missouri State University; PhD, University of Missouri

Jeremy Hawkins (2013), Professor of Kinesiology, Department Head of Kinesiology; BS, Brigham Young University; MS, Oregon State University; PhD, Brigham Young University

Deborah Henderson (2014), Technical Instructor of Baking and Pastry; AA, Mesa Junior College

Megan Henley (2016), Associate Professor of Sociology; BA, University of California-Irvine; MA, University of Arizona; PhD, University of Arizona

Adrian Herrera Escobar (2021), Assistant Professor of Music; BA, Conservatorio Antonio Maria Valencia, Instituto dep; MA, City University of New York - Queens College; DMA, University of Illinois-Urbana Champaign

Jessica Herrick (1995), Professor of Psychology; BA, University of Wyoming; MS, University of Wyoming; PhD, University of Wyoming

Cassidy Herringer (2021), Assistant Professor, Director of Physical Therapy Clinical Education; BS, Whittier College; DPT, Temple University

Kristin Heumann (2011), Professor of Kinesiology; BA, Northwestern College; MS, Arizona State University; PhD, Arizona State University

Victoria Hibler (2023), Assistant Professor of Occupational Therapy;

Jonathan Hinkle (2012), Associate Professor of Music, Director of Bands; BME, Florida State University; MME, Florida State University; PhD, Florida State University

Calvin Hofer (1998), Professor of Music; BA, South Dakota State University; MME, University of Wisconsin; DMA, University of North Texas

Jill Holaday (2022), Instructor of Art History; BA, University of Evansville; MA, University of Illinois at Urbana-Champaign; PhD, University of Iowa

Pamela Holder (2014), Technical Instructor, Allied Health/Paramedic Program Director; BS, Colorado Christian University

Brian Hosterman (2014), Associate Professor of Physics; BS, Denison University; MS, University of Nevada-Las Vegas; PhD, University of Nevada-Las Vegas

Gary Hypes (2021), Instructor of Accounting; BS, West Liberty State College; MBA, University of Phoenix; JD, West Virginia University

I

Aaron Inouye (2022), Assistant Professor of Physician Assistant Studies; BA, Miami University; MS, Pacific University

J

Erika Jackson (2010), Professor of History; BA, Michigan State University; MA, Loyola University; PhD, Michigan State University

Eliot Jennings (2013), Associate Professor of Political Science; BS, University of North Texas; MPA, University of North Texas; PhD, University of North Texas

Mary Jo Stanley (2022), Professor of Health Sciences; BS, Son Jose State University; MS, Son Jose State University; PhD, University of Northern Colorado

Dirk Johnson (2022), Director of Vocal Ensembles; BM, Brigham Young University; MM, Brigham Young University; DMA, University of Cincinnati

Rhonda Johnson (2019), Technical Instructor of Applied Business; BS, California State Polytechnic University; MBA, Colorado Mesa University

Verner Johnson (1989), Professor of Geology; BA, Southern Illinois University; MS, Southern Illinois University; PhD, University of Tennessee

Dylan Jones (2022), Assistant Professor of Biochemistry; BA, Concordia College; PhD, University of Nevada-Reno

Jacob Jones (2011), Professor of Psychology; BS, Bluefield College; MS, Radford University; PhD, Indiana State University

Georgann Jouflas (2006), Instructor of Business; BA, University of Colorado; MBA, George Washington University

Jeremy Jurgens (2013), Instructor of English; BS, Utah Valley University; MA, Oregon State University

K

Darin Kamstra (2004), Professor of Music, Department Head of Music; BM, Eastern Washington University; MM, University of Northern Colorado; DMA, University of Illinois-Urbana-Champaign

Alaa Kassir (2008), Associate Technical Professor of Developmental Education-Math; BS, University of Wisconsin-Madison; MS, University of Wisconsin-Madison

Happy Katzer (2019), Assistant Professor of Radiologic Sciences; AAS, Colorado Mesa University; BS, Southern New Hampshire University

Kevin Kelley (2022), Assistant Professor of Psychology; BA, Saint Louis University; MS, Saint Louis University; PhD, Saint Louis University

Deborah Kennard (2005), Professor of Environmental Science and Technology; BA, Trinity University; MS, University of Florida; PhD, University of Florida

Suzanne Kenney (2006), Instructor of Chemistry; BS, Clarkson University; MS, Clarkson University

Brian Kessler (2010), Associate Professor of Mechanical Engineering; BS, University of Missouri; MS, University of Missouri; PhD, University of Missouri

Sharon Kettle-Kemp (2022), Technical Instructor of Veterinary Technology; AAS, Bel-Rea Institute of Animal Technology

Tiffany Kinney (2017), Associate Professor of English, Department Head of Languages, Literature, and Mass Communication; BA, Westminster College; MA, University of Oregon; PhD, University of Utah

Tiffany Kragnes (2020), Assistant Professor of Criminal Justice; BA, Iowa State University; MPA, Upper Iowa University; JD, Drake University; PhD, Walden University

Pamela Krch (2010), Instructor of History; BA, Colorado Mesa University; MA, New Mexico State University; PhD, University of Texas-El Paso

Brian Krinke (2017), Instructor of Music; BM, The Curtis Institute of Music; MM, The Julliard School

Zachary Kubin (2022), Instructor of Chemistry; BA, Gonzaga University; MS, University of Saint Joseph

L

Keara LaBonde (2020), Technical Instructor of Construction Technology; BA, Brigham Young University-Idaho

Barry Laga (1997), Professor of English; BA, Brigham Young University; MA, Brigham Young University; PhD, Purdue University

Richard LaMee (2012), Associate Professor of Theatre Arts, Department Head of Theatre; BA, Loretto Heights College; MFA, National Theatre Conservatory

Sarah Lanci (2015), Associate Professor of Mechanical Engineering; BS, Michigan State University; MS, Colorado School of Mines

Yen-Sheng Lee (2018), Associate Professor of Business-Finance; MS, Yuan-Ze University; MBA, University of Missouri; MS, University of New Orleans; PhD, University of New Orleans

Michael Legate (2014), Instructor of Theatre Arts; BFA, University of Montana; MFA, University of Nebraska-Lincoln

Sofia Leon (2021), Instructor of Spanish; BA, Colorado Mesa University

Steven Liff (2011), Instructor of Business; AAS, Colorado Mesa University; BS, Colorado State University; MS, Colorado State University

Kindra Loyd (2015), Instructor of Nursing; BSN, Colorado Mesa University

M

Warren MacEvoy (1996), Professor of Computer Science; BS, Colorado Mesa University; MS, University of Arizona; PhD, University of Arizona

Michael Mahoney (2016), Technical Instructor of Technology Integration; BA, California State University-Northridge

Kathleen Marshall (2012), Associate Professor of Nursing; BS, University of Colorado; MS, University of Colorado; DNP, University of Utah

Danielle Martin (2018), Instructor of Mass Communication; BA, Colorado Mesa University; MS, Montana State University-Billings

Britt Mathwich (2011), Associate Professor of Business; BA, University of New Mexico; MA, Eastern New Mexico University

Tracy Matthews (2011), Instructor, Program Director Medical Lab Technology; BS, University of Arkansas for Medical Sciences; MS, University of North Dakota

Melissa Mattner (2022), Assistant Professor of Occupational Therapy; BA, Spring Arbor University; MS, Western Michigan University

Amy Maurer (2021), Assistant Professor of Chemistry; BS, Colorado Mesa University; PhD, Colorado School of Mines

Miriah McCants (2022), Instructor of Nursing; BS, Colorado Mesa University

Kathryn McClain (2022), Instructor of English; BFA, Truman State University; MA, Truman State University; PhD, University of Kentucky

Jennifer McClendon (2022), Instructor of Nursing; BSN, University of Texas Arlington; MSN, Texas Woman's University; DNP, Texas Christian University

Denise McKenney (1996), Professor of Biology; BS, New Mexico State University; PhD, North Carolina State University-Raleigh

Christopher McKim (2013), Assistant Professor of Music; BM, Wichita State University; MM, Arizona State University; DMA, University of Colorado-Boulder

Kyle McQuade (2007), Professor of Biology; BS, Millikin University; PhD, University of Wisconsin-Madison

Carrie McVean (1996), Professor of Biology, Department Head of Biology; BS, Colorado State University; DVM, Colorado State University

Michelle Mellenthin (2019), Assistant Professor of Electrical & Computer Engineering; BS, Milwaukee School of Engineering; PhD, Colorado State University

Stephen Merino (2016), Associate Professor of Sociology; BS, Brigham Young University; MA, Pennsylvania State University; MS, University of Michigan; PhD, Pennsylvania State University

Joshua Meuwly (2014), Technical Instructor of Digital Design; BA, Art Institute of Colorado

Daniel Meyer (2018), Assistant Clinical Professor of Physician Assistant Studies; BA, University of Colorado; MS, Des Moines University

Chad Middleton (2006), Professor of Physics; BS, Eastern Illinois University; PhD, University of Tennessee- Knoxville

Greg Mikolai (2011), Instructor of Mass Communication; BA, University of Saint Thomas

Eric Miles (2015), Associate Professor of Mathematics; BS, Colorado Mesa University; MS, Colorado State University; PhD, Colorado State University

David Miller (2014), Technical Instructor of Developmental Education-Math; BS, Colorado Mesa University; MAEd, Colorado Mesa University

Les Miller (1998), Associate Professor of Philosophy; BA, Colorado Mesa University; MA, Claremont Graduate University; PhD, Claremont Graduate University

Troy Miller (2013), Assistant Professor of Engineering, Program Director of Construction Management; BS, Brigham Young University; MS, Colorado State University

Daniel Millward (2018), Assistant Clinical Professor; Program Director Physician Assistant Studies Program; BS, Brigham Young University; MMS, Salus University

Sloane Milstein (2019), Associate Professor of Kinesiology; BBA, University of New Mexico; MEd, Temple University; EdD, Southern Connecticut State University

Holly Mitchell (2017), Instructor of Mathematics; AA, North Central Texas College; BS, Texas Women's University; MS, Texas Women's University

Justin Montemarano (2022), Instructor of Biology; BS, Nazareth College; PhD, Kent State University

Brad Montgomery-Anderson (2018), Associate Professor of English; BA, University of Colorado-Boulder; MA, University of Illinois at Chicago; MA, University of Kansas-Lawrence; PhD, University of Kansas-Lawrence

Caitlin Moore (2021), Instructor of Music-Voice; BM, Lee University; BME, Lee University; MM, McGill University; DA, University of Northern Colorado

Joanelle Morales (2022), Instructor or Teacher Education; BA, University of Florida; Med, University of Florida; PhD, University of South Florida

Anneke Moresco (2021), Technical Instructor, Veterinary Technology Program Director; MS, Rijkuniversiet Utrecht, The Netherlands; DVM, Colorado State University; PhD, University of California-Dafis

Allison Morris (2011), Instructor of English; BA, Texas A&M University; MA, Texas A&M University

Laura Munoz (2022), Assistant Professor of Spanish; BA, University of California, Riverside; MA, University of California, Los Angeles; PhD, University of California, Los Angeles

N

Yanzhuo Niu (2022), Instructor of Psychology; BA, Changchun University of Science and Technology; MS, University of Wisconsin, Madison; PhD, University of Wisconsin

Christine Noel (2017), Associate Professor of Accounting; BS, Metropolitan State University of Denver; MS, University of Colorado-Denver; PhD, Trident University International

Jodi Noga (2017), Assistant Professor of Nursing; BSN, South Dakota State University; MSN, Regis University

O

Douglas O'Roark (1994), Professor of History; BA, Ohio State University; MA, Ohio State University; PhD, Ohio State University

Holly Oberle (2021), Assistant Professor of Political Science; BA, Knox College; MA, Jacobs University and Universitat Bremen; PhD, Frie Universitat

KyoungHwa Oh (2013), Associate Professor of Art; BFA, Washburn University; MFA, Southern Illinois University-Carbondale

Jacob Ongaki (2018), Assistant Professor of Business-Finance; BS, Daniel Webster College; MBA, South New Hampshire University; MA, South New Hampshire University; PhD, North Central University-Scottsdale

Marcos Ortiz (2018), Instructor of Mathematics; BA, University of North Carolina-Wilmington; BS, University of Buffalo; MS, University of Iowa; PhD, University of Iowa

Richard Ott (2006), Associate Professor of Statistics; BS, St. Mary's University; MS, University of Missouri-Rolla; PhD, Rice University

Gina Owens-Ott (2006), Professor of Accounting; BS, Norfolk State University; MBA, University of Missouri-Kansas City; MEd, Emporia State University; DBA, California Southern University

Darren Oxford (2010), Technical Instructor of Medical Preparation; AA, Colby Community College; BA, Colorado Mesa University

Ayşe Özsoy Bean (2010), Associate Professor of Biology; BS, Bogazici University-Turkey; PhD, University of North Carolina-Chapel Hill

P

Erik Packard (1995), Associate Professor of Mathematics; BS, Texas Tech University; MS, Texas Tech University; PhD, Texas Tech University

Kristina Pagel (2021), Assistant Professor of Psychology; BS, University of Wisconsin-Oshkosh; MA, University of Chicago; PhD, University of Chicago

Kristina Pagel-Martinez (2021), Assistant Professor of Psychology; BS, University of Wisconsin at Oshkosh; MA, University of Chicago; PhD, University of Chicago

Tammy Parece (2016), Assistant Professor of Geography; BS, Virginia Commonwealth University; MS, Virginia Polytechnic Institute & State University; PhD, Virginia Polytechnic Institute & State University

Brian Parry (2008), Professor of Psychology; BA, University of Utah; MS, Brigham Young University; PhD, Brigham Young University

Vincent Patarino (2003), Associate Professor of History; BA, University of Colorado-Boulder; BS, University of Colorado-Boulder; MA, University of Colorado-Boulder; PhD, University of Colorado-Boulder

Jason Pegis (2022), Instructor of Music; BM, Willamette University; MM, McGill University; DMA, University of California Los Angeles

Matthew Peiffer (2022), Technical Instructor of HVAC;

Christopher Penick (2016), Assistant Professor of Mechanical Engineering; BS, Wright State University; MS, University of Dayton

Dante Penington (2022), Assistant Professor of Criminal Justice;

James Perez (2015), Associate Professor of Mass Communication; BA, California State University-Long Beach; PhD, University of California-San Diego

Nathan Perry (2010), Professor of Economics; BA, Westminster College; PhD, University of Utah

Sean Phelps (2018), Assistant Professor of Kinesiology; AAS, Northwest Community College; BA, Eastern Montana College; MS, Montana State University-Billings; PhD, Florida State University

Michael Philipp (2016), Instructor of Accounting; MAcc, University of Central Arkansas; MBA, University of Kassel, Germany

Randy Phillis (1993), Professor of English; BA, Wichita State University; MFA, Wichita State University; PhD, Oklahoma State University

Michael Pierce (2021), Instructor of Mathematics; BS, California State University-Chico; MS, University of California-Riverside

Justin Pomeranz (2021), Instructor of Environmental Science and Technology; BS, Colorado State University; MS, Colorado State University; PhD, University of Canterbury, New Zealand

Alli Powell (2018), Assistant Professor of Kinesiology; BS, Colorado Mesa University; DAT, University of Idaho-Moscow

Zoe Praggastis (2021), Instructor of Biology/Lab; BA, University of Colorado-Boulder; MS, University of Utah

Nathan Pumulo (2023), Visiting Professor of Physics; MS, South Dakota School of Mines and Technology

Q

Joseph Quesenberry (2005), Technical Instructor of Applied Math; BS, Colorado Mesa University

R

Megan Radloff (2019), Instructor of Nursing; BS, Valparaiso University; MSN, Valparaiso University

Jennifer Radomski (2021), Instructor of Nursing; BS, Texas A&M University-College Station; BSN, University of Mary Hardin-Baylor; MSN, University of Texas-Arlington

John Reece (2006), Professor of Criminal Justice; BA, Colorado Mesa University; MPA, University of Colorado-Denver; PhD, Northcentral University

Amy Reed (2022), Lecturer of Radiation Technology;

Benjamin Reigel (2017), Associate Professor of Theatre Arts; BA, University of Minnesota; MFA, University of Delaware

Nicholas Reimer (2020), Technical Instructor of Electric Lineworker; Certificate, Colorado Mesa University

Markus Reitenbach (2006), Associate Professor of Mathematics; MS, University of Ulm; PhD, Syracuse University

Ariel Rendt Padron (2023), Lecturer of Social Work;

Dongjun Rew (2021), Assistant Professor of Marketing; BBA, Dankook University, South Korea; BS, Washington State University; MBA, Dankook University, South Korea; MS, Washington State University; PhD, University of Texas-Rio Grande Valley

Joseph Richards (1995), Professor of Chemistry; BA, University of San Diego; PhD, University of North Carolina

Eric Riddle (2023), Instructor of Composition; BA, Weber State University; MA, Weber State University; PhD, Oklahoma State University

Kerry Riley (2018), Instructor of Geology; BA, University of Colorado-Boulder; MS, Boise State University; PhD, Utah State University

Alison Robb (2015), Technical Instructor, Wildland Fire Management Program Director; BS, University of Montana; BA, University of Montana

Jason Roberson (2016), Assistant Technical Professor of Transportation Services; AAS, Colorado Mesa University; BS, Colorado Mesa University

Adam Rosenbaum (2011), Professor of History; BA, Virginia Wesleyan College; MA, Old Dominion University; PhD, Emory University

Brady Russell (2018), Assistant Professor of Nursing; BSN, University of Wyoming; MSN, University of Phoenix

Molly Ryan (2013), Instructor of Mathematics; BS, University of Northern Colorado; MA, Adams State University

S

Terry Salazar (2019), Technical Instructor of Paramedic; AAS, Pueblo Community College; BS, Colorado Christian University

Cassidy Sanders (2020), Assistant Professor of Physician Assistant Studies; AA, Bismark State College; BS, University of Mary; MPA, University of Utah School of Medicine

Christi Sanders Via (2018), Assistant Professor of Human Resources; BS, Tarleton State University; MS, Tarleton State University; PhD, Walden University

Kristin Santos (2017), Associate Professor of Criminal Justice; BS, Lake Superior State University; MS, University of Cincinnati; PhD, University of Akron

Jarrod Schiffbauer (2017), Visiting Assistant Professor of Physics; BS, Ohio University; MS, Ohio University; PhD, West Virginia University

Mark Schmalz (2014), Instructor of Teacher Education; BA, Colorado Mesa University; MA, Adams State College

Araan Schmidt (2012), Associate Professor of Art; BFA, Kansas City Art Institute; MFA, University of Minnesota

Lisa Schmidt (2022), Instructor of Surgical Technology;

Stacie Schreiner (2018), Assistant Professor of Nursing; BSN, Colorado Mesa University; MSN, Colorado Mesa University; DNP, Colorado Mesa University

John Seebach (2014), Associate Professor of Archaeology; BA, University of Texas-El Paso; MA, Southern Methodist University; PhD, Southern Methodist University

Elizabeth Sharp (2011), Professor of Kinesiology; BS, Arkansas Tech University; MEd, Arkansas Tech University; PhD, Middle Tennessee State University

Megan Sherbenou (2018), Assistant Professor of Biology; BA, University of Colorado-Boulder; MA, University of Colorado-Denver; PhD, University of Colorado-Denver

Anwar Shiekh (2010), Instructor of Physics; BS, Imperial College, London University; PhD, Imperial College, London University

Tammie Shultz-McCole (2018), Technical Instructor of Early Childhood Education; BA, Colorado Mesa University; MA, University of Colorado-Denver; MA, Concordia University

Sarah Shrader (2019), Instructor, Acting Director of Outdoor Recreation Industry Studies; BS, Indiana University; MA, Northern Arizona University

Wayne Smith (1998), Associate Technical Professor of Culinary Arts; AAS, Colorado Mesa University; BAS, Colorado Mesa University

John Snyder (2005), Professor of Computer Information Systems; BA, Fort Lewis College; MA, University of New Mexico; MS, Nova Southeastern University; PhD, University of New Mexico

Patrick Snyder (2017), Instructor of Mathematics; BS, Colorado Mesa University; MS, Western Illinois University

Steven Soychak (2015), Instructor of Business, Landman Energy Management Program Director; BS, University of Oklahoma

Karrie Stanfill (2020), Technical Instructor of Medical Office Assistant; AAS, Denver Technical College

Matthew Stansbury (2014), Associate Professor of Biology; BS, University of Nebraska-Omaha; PhD, Indiana University-Bloomington

Andrew Stephens (2018), Instructor of Mathematics; BBA, Colorado Mesa University; PGDE, University of Hong Kong; BS, University of Oregon; MS, University of Oregon

Stephen Stern (2011), Professor of Biology; BS, University of North Carolina-Asheville; PhD, University of Utah

Genell Stites (2008), Associate Professor of Nursing; BSN, University of Northern Colorado; MSN, Regis University

Kyle Stone (2013), Professor of Business; BS, Central Missouri State University; MEd, Colorado State University; PhD, Colorado State University

Michelle Sunkel (2020), Associate Professor of Social Work, Director of Master of Social Work Program; BS, Lincoln University; MSW, San Diego State University; DSW, Capella University

Thomas Sylvester (2017), Technical Instructor of Land Surveying;

T

Jerson Jesid Tellez Rodriguez (2021), Assistant Professor of Geosciences; BS, Universidad Nacional de Columbia; MS, University of Oklahoma; PhD, University of Oklahoma

Cynthia Thomas (2022), Technical Instructor of Nurse Aide; AAS, University of Phoenix; LPN, Southeast Community College

Jeremy Tost (2018), Associate Professor of Psychology; BA, Indiana University of Pennsylvania; MA, New Mexico State University; PhD, New Mexico State University

U

Karen Urban (2011), Instructor of Nursing; BSN, University of Pittsburgh; MSN, University of Pittsburgh; DNP, Colorado Mesa University

V

Jill Van Brussel (2013), Associate Professor of Theatre - Costume Design; BS, University of California-Santa Barbara; MA, Bowling Green State University; MFA, Purdue University

Rodger VanVoorhees (2022), Instructor of Nursing; BS, Colorado Mesa University

Johanna Varner (2016), Associate Professor of Biology; BS, Massachusetts Institute of Technology; MS, Massachusetts Institute of Technology; PhD, University of Utah

Allison Vogel (2021), Technical Instructor, Program Director of Pharmacy Technology; BS, Colorado Mesa University; MEd, Regis University

W

Richelle Walker (2021), Instructor of Nursing; Certificate, Technical College of the Rockies; BSN, Colorado Mesa University

Thomas Walla (2001), Professor of Biology; BA, University of California-San Diego; PhD, University of Oregon-Eugene

Kara Walter (2019), Assistant Professor of Economics; BA, University of Southern Indiana; MA, University of New Mexico; PhD, University of New Mexico

Wayn Ward (2008), Instructor of Mathematics; BS, Colorado Mesa University; MS, University of Nevada-Las Vegas

Victoria Warnaar (2021), Assistant Professor of Occupational Therapy; BA, Augustana College; DOT, Huntington University

Junichiro Watabe (2014), Associate Professor of Music; BM, Aichi Prefectural University of Fine Arts and Music; MM, University of Northern Colorado; DA, University of Northern Colorado

Heather Watt (2020), Assistant Professor of Occupational Therapy, Academic Fieldwork Coordinator; BS, Colorado State University; MSOT, Arizona School of Health Sciences; DOT, University of Utah

Eric Watters (2018), Assistant Professor of Criminal Justice; BPA, Barry University; MPA, Barry University; PhD, University of the Cumberland

Denita Weeks (2018), Assistant Professor of Biology; BS, Grand Valley State University; MS, California State University-Northridge; PhD, University of Memphis

David Weinberg (2011), Associate Professor of Chemistry; BA, University of San Diego; PhD, California Institute of Technology

Rachel Weinzimmer (2020), Assistant Professor of Physician Assistant Studies; BS, University of Connecticut; MS, University of St Francis

Enzo Wendler (2020), Instructor of Mathematics; BS, University of Alaska-Fairbanks; MS, University of Saskatchewan; PhD, Washington State University

Megan Wendler (2020), Assistant Professor of Mathematics; BS, University of Alaska-Fairbanks; MS, University of Saskatchewan; PhD, Washington State University

Steven Werman (1990), Professor of Biology; BS, California State University-Long Beach; MS, California State University-Long Beach; PhD, University of Miami

Shay West (2011), Instructor of Biology; BS, Colorado Mesa University; PhD, University of Colorado-Denver

Charles White (2020), Technical Instructor of Information and Communication Technology; AAS, Colorado Mesa University; BS, Barton College

Gannon White (2019), Associate Professor of Kinesiology; AS, Allen Community College; BGS, Lamar University; MEd, Stephen F. Austin State University; PhD, University of Northern Colorado

Catherine Whiting (2020), Assistant Professor of Physics; BS, University of Iowa; MS, University of Iowa; PhD, University of Iowa

Brenda Wilhelm (2000), Professor of Sociology; BA, University of Minnesota; MA, University of Arizona; PhD, University of Arizona

Carla Wilhite (2021), Assistant Professor, Program Director of Occupational Therapy; BS, University of New Mexico; MM, Regis University; DOT, Creighton University

Gilbert Willett (2023), Associate Professor of Physical Therapy;

Timothy Winegard (2018), Assistant Professor of History; BA, University of Western Ontario; BEd, Nipissing University; BA, University of Guelph; MA, Royal Military College of Canada; PhD, University of Oxford

Freddy Witarsa (2017), Associate Professor of Environmental Science and Technology; BS, Drake University; PhD, University of Maryland

Eileen Woolwine (2017), Assistant Professor of Nursing; BS, Western Governors University; MSN, Western Governors University

William Wright (1998), Professor of English; BA, Linfield College; MA, University of New Hampshire; PhD, University of Arizona

Z

Veronica Zarlingo (2018), Assistant Professor of Nursing; AAS, Colorado Mesa University; BSN, Colorado Mesa University; MSN, Walden University

Forrest Zerbe (2017), Instructor of Art; AAS, Colorado Mesa University; BGS, Indiana University-Purdue; MFA, Savannah College of Art and Design

University Leadership

Information about Colorado Mesa University's President, Vice Presidents, Provost, and unit Directors can be found on the [University Leadership](#) web page.

Campuses and Facilities

Colorado Mesa University's Main Campus encompasses 141 acres in the heart of Grand Junction, Colorado. Nestled between mountains and high-desert canyons, the area is home to some of the best outdoor recreation in the country and enjoys approximately 300 days of sunshine a year. Explore Colorado Mesa University's main campus virtually at coloradomesa.edu/virtual-tour.

Western Colorado Community College (WCCC) is located just a few miles from the Main Campus and includes strong partnerships between the University, Mesa County Valley School District 51 and area businesses. WCCC serves the career technical education and workforce training needs of both the university and area high school students. The community college also serves the community through summer camps and targeted certificates to serve industry and businesses. Explore all that WCCC has to offer at wccc.coloradomesa.edu.

Located at the base of the beautiful San Juan mountains, the Colorado Mesa University **Montrose Campus** provides access to a variety of associate and bachelor degree programs in a scenic, smaller community campus setting. The Montrose Campus is located on South Cascade Avenue in Montrose, Colorado, and offers courses leading to the completion of selected associate of art (AA) degrees; bachelor of art (BA) degree completion tracks; essential learning classes, and selected upper-division and graduate-level classes. Explore the Montrose Campus at coloradomesa.edu/montrose.

The **Electric Lineworker Training Facility**, located at 29 and D 1/2 roads in Grand Junction, Colorado, houses staff offices, training areas and classrooms for the electric lineworker program.

The **Whitewater Facilities** include CMU's Forensic Investigation Research Station, which remains the only high altitude facility of its kind in the nation. Also located in Whitewater is our Colorado Law Enforcement Training Center which is run jointly with Mesa County and the Grand Junction Fire Department.

Academic Buildings

Archuleta Center (2009), located near the Bishop Campus in the Foresight Industrial Park, houses classrooms and offices for construction management and machining technology programs. The center features an electrical lab, a computer lab and 9,200 square-feet of high bay learning labs.

Bishop Health Sciences (2013), located on the Bishop Campus, houses classroom and laboratory space for certificate and associate degree programs in health sciences.

Building B (1997), located on the Bishop Campus, houses WCCC student services offices and the Community Education Center, as well as instructional space for culinary arts, computer aided design, the peace officer standards and training academy, applied business, visual communications/filmmaking and high school programs.

Confluence Hall (2018), the new 68,700 square-foot engineering building opened in January 2018. It houses CMU's engineering programs,

including the civil, mechanical and electrical/computer engineering programs delivered at CMU through a partnership with the University of Colorado Boulder. The building is also the new home for Eureka! McConnell Math and Science Museum.

Dominguez Hall (2008) houses modern classrooms, lecture auditoriums, small breakout rooms for student collaboration and offices for business and teacher education faculty. It features an outdoor patio, a coffee bar and a technology-enhanced boardroom.

Escalante Hall (2014) The nearly 76,000-square-foot building is home to state-of-the-art classrooms, four computer labs, one open lab, several lecture-style classrooms, numerous smaller seminar rooms, two television studios and offices for language, literature and mass communication faculty and staff. A state-of-the-art television production studio is part of the mass communication facilities.

Foster Field House (2014, 2023) hosts numerous indoor sport activities throughout the year and includes the Chamberlin Cycling Center and a 38-foot climbing wall. The facility also hosts a litany of external sporting events and regional athletic tournaments. Expansion completed in 2023 included four new wood courts, Kinesiology space, drop down basketball hoops and volleyball nets, and a running track that connects to the Maverick Center.

Health Sciences Building (2014, 2017), located on the north end of the main campus, this building is the center of CMU's growing health care offerings. Once the home of Community Hospital, the building represents a core of CMU's comprehensive health care programs. The building has been remodeled and now houses classrooms, a simulation center and laboratory space for health science students.

Houston Hall (1940, 2011) is the first permanent building constructed on CMU's main campus. It was renovated and expanded in 2010-2011 and includes classrooms and computer laboratories where a variety of subject areas are taught including humanities and the social and behavioral sciences.

Jac Kephart Fine Arts Building (2002) provides studio laboratories, offices and classrooms for studio art and graphic design. This facility has a large covered outdoor work area for ceramics kilns and a bronze foundry. The building design allows viewing of the studio activities from the hallways.

Maverick Center (2009) houses the Department of Kinesiology, intercollegiate athletics and campus recreation facilities. Included in the Maverick Center are the:

- **El Pomar Natatorium** - One of the premier aquatic facilities in the western United States, it features a 50-meter competition pool that is ten lanes wide and eight feet deep with two movable bulkheads. The diving well includes a pair of one- and three-meter boards. The natatorium also features water agitators and 3M sparger, a state-of-the-art Colorado Time Systems with speedlights and aqua-grip touch pads, Paragon sand top starting platforms with quickset anchors, a 21-foot by 10-foot digital display system, 22 loudspeakers that surround the pool and 750 permanent balcony seats.
- **Hamilton Recreation Center** - It includes a large fitness/strength training area equipped with weights and cardiovascular machines, a recreation gymnasium for intramural and club sports, two championship racquetball/wallyball courts (one of which can convert into a Squash Court), an indoor track and a 38-foot high climbing wall. The center was expanded in 2014 and now offers extended service hours.

- **Monfort Family Human Performance Lab** - An integrative multi-use laboratory that features state-of-the art equipment and provides advanced physiological and biomechanical performance and wellness testing for students, faculty, staff and community members. The facility now features a new environmental chamber to test the effects of both temperature and altitude on performance.
- **Roe F. Saunders Field House** - Originally constructed in 1968 and expanded in 1996, it provides facilities for a variety of physical education and recreation activities and includes Brownson Arena, a 2000-seat arena that surrounds the Wayne Nelson Court and is home to Colorado Mesa University's basketball, volleyball and wrestling teams. The Brownson Arena lobby was remodeled in 2018 to include modern design, a retail Maverick Store outlet and an interactive, touch-screen television system showcasing the history of CMU athletics.

The north end of the Maverick Center complex includes the **Elliott Tennis Complex** and **Community Hospital Unity Field**, home to Maverick tennis, soccer, and lacrosse. Immediately west of the building is **Bus Bergman Sports Complex (2022)** encompassing physical education and practice athletic fields, the Baseball Field, the Softball Field, and the Track and Field.

Innovation and Cybersecurity Center (2019) is a building dedicated to advancing CMU's cybersecurity program in the lower level while the upper level is dedicated to providing creative space for students and the community. The Maverick Innovation Center focuses on technological innovation, patent protection, intellectual property designation, technology transfer and interdisciplinary, creative work space.

Moss Performing Arts Center (2002, 2009) is home to performance venues, classrooms, choral and instrumental rehearsal rooms, dressing rooms, and offices. It features the lobby, originally built in 1969; the 605-seat William S. Robinson Theatre with fly loft and modern drama lighting systems; the smaller, more intimate Mesa Experimental Theatre; and the 300-seat Love Recital Hall. A three-story addition to the south end includes a scene shop, a costume shop, and a dance studio. In 2019 the Dr. Ruth Maurer practice facility was established in the south section of the facility.

John U. Tomlinson Library (1986, 2015) expands the traditional library concept to include physical and electronic holdings and circulation of 365,000 library materials that are available in a variety of formats. About 23,000 journal titles are available via the library website and more than 20 million items are available through Prospector. The Tomlinson Library includes a diverse array of hospitality services including a full service cafeteria and coffee shop.

Kerry Youngblood Building (1992), located on the Bishop campus, houses WCCC administrative offices and classrooms and laboratories for automotive and diesel technology, welding, process systems technology and technology integration.

St. Mary's Medical Education Center (2022) houses the physician assistant, physical therapy and occupational therapy programs.

Wubben Hall and Science Center (1962, 2010) contains classrooms, laboratories, offices and storage areas for physical and life sciences, mathematics and computer sciences. A special feature is the Weldon Lecture Hall that seats 100 persons. This building was completely remodeled in 1998 and connected to the Science Center. In 2010, a three-story, 31,900 square-foot addition to the west of the existing facility expanded classroom and research space for the university's science

programs. The Science Center (1996, 2010) contains modern laboratories for biology, chemistry, geology and environmental sciences. This building also contains an electron microscopy laboratory and an herbarium. A special feature is the octagonal Saccomanno Lecture Hall that seats 120 persons and has full multimedia capabilities. An attractive courtyard between this building and Wubben Hall provides space for outdoor lectures and study. There is also a rooftop greenhouse that houses tropical vegetation for biology students to study.

Administrative Buildings

Admissions Welcome Center (2008) houses offices for admissions staff responsible for assisting students with a smooth transition into their higher education experience. The welcome center offers multimedia meeting spaces for visitation programs and campus tours.

Campus Services (2007) houses offices for purchasing, warehouse/receiving and mail room staff as well as offices, shops and storage areas for facilities staff.

Doug Sortor Hall houses the CMU Foundation and the Alumni Association.

Little Mavericks Learning Center (2018) is a newly acquired and renovated facility. The Little Mavericks Learning Center adjacent to **Mini Mavericks Learning Center** which offers infant care to students, faculty, CMU staff and the community.

Lowell Heiny Hall (1967) is a four-level building housing faculty and administrative offices. The garden level/first floor is home to IRIS (Integrated Resources for Information and Solutions), a hub for student services that includes the Office of Student Success and Financial Aid offices. The fourth floor houses the Registrar's Office and the Student Affairs Office. The west side of the building features the Gordon Gilbert Amphitheater (dedicated 2009), an outdoor gathering/classroom space.

Outdoor Program (2018, 2019) is Colorado Mesa University's headquarters for outdoor adventure and education. Located on North Avenue near Houston Hall, the OP office offers a gathering space and provides equipment rentals for biking, boating, camping, mountaineering, rock climbing, skiing, snowboarding and more.

Residence Life (2008), located directly adjacent to the Admission Welcome Center, houses staff responsible for the on-campus living experience. In addition to providing educational events and activities, Residence Life helps to create safe, positive communities; offers leadership opportunities; and manages student behavioral concerns.

Rotary Hall (1969, 2008, 2010, 2014), houses CMU's International Student Admissions and Programs Office as well as CMU's E-Sports program.

Residence Halls

Albers Hall (1935, 2008, 2012) previously housed staffed offices but transitioned to student housing in 2023.

Aspen Apartments (2020) are coed and house 124 second year and above students. Aspen Apartments are configured in four single bedroom apartments and offer study lounges, large community kitchens, and free laundry rooms on each floor. Each apartment includes a furnished living area with a 42" Television and kitchenette. The kitchenette includes a small refrigerator, sink, and cabinet/counter space. A student staffed front desk is also provided for your security and convenience.

Bunting Hall (2011) is a co-ed, suite-style building that can accommodate up to 328 students. The building offers suites with standard double rooms, lofted doubles, singles, super single rooms.

Garfield Hall (2013, 2014, 2015) is a traditional style residence hall that offers accommodations for 435 residents in double bedrooms. Each floor boasts three lounges and a community kitchen.

Grand Mesa Hall (2006) houses 286 residents in suites with a mixture of single, super single and double bedrooms. Each suite has at least two bathrooms with separate counter and sink facilities. Suites are furnished with "bunkable" beds and movable furniture. The living area in each suite has comfortable seating and a 32" flat screen, wall-mounted television.

Monument Hall (1997) provides suite-style living and is designated as our Substance Free Hall. Students who request to live in Monument must sign a contract pledging to be substance free on and off campus. Monument Hall houses 180 residents in suites that share a bathroom. Each double-bed room is furnished with carpet and movable furniture.

Lucero Hall (2009) is configured in five or six-bed suites in the east wing and houses 179 first- and second-year residents. This hall includes a 24hr Fitness Facility located in the lower level. At 1200 square feet, it includes cardio equipment, strength equipment and core/stretching equipment. All current, registered students have MAVcard access to this portion the hall.

Lucero Hall Apartments (2009) houses 120 second-year and above students. There are single and double rooms and six residents per semi-suite. Each apartment has a kitchen and two bathrooms with separate counter/sink areas. This hall includes a 24hr Fitness Facility located in the lower level. At 1200 square feet, it includes cardio equipment, strength equipment and core/stretching equipment. All current, registered students have MavCard access to this portion the hall.

Orchard Avenue Apartments (2012) offers fully furnished, three and six-person apartments for 185 students. Most apartments include individual balconies as well as large community rooms and balconies on each floor.

Piñon Hall (1967, 2015, 2019) was fully renovated in 2015 and 2019 and is one of the original housing facilities on campus.

Rait Hall (1966) and **Tolman Hall (1966)** provide comfortable living quarters for 200 residents in each hall. Most rooms are doubles, but a few single rooms are available.

Walnut Ridge Apartments (1978) are furnished three- and four-bedroom apartments available to 120 sophomores, juniors, and seniors. Kitchen and bathrooms were renovated in 2017.

Wingate Hall (2016) is a traditional style residence housing 148 first- or second-year students who have a strong focus on academics. Each suite of two rooms features a lofted study room for the four residents. Community kitchens, bathrooms, study lounges, TV lounges and laundry are on each floor. The Wingate Apartments expansion to the building is scheduled to be completed late 2023.

Community and Outdoor Spaces

Academic Quad is the quadrangle surrounded by Wubben Hall to the north, Moss Performing Arts Center to the east, Houston Hall to the south, and Tomlinson Library to the west. Throughout the year it is used as one of the campus' major corridors and as an outdoor meeting space for various campus events and activities.

Bike Park (2020), located adjacent to the Hotel Maverick, features multiple courses for bicycle enthusiasts of all kinds to test their skills and races each other.

Center for Reflection opened in spring 2021 and is a nondenominational, interfaith sanctuary. It provides a space for students, faculty and staff to reflect, contemplate and celebrate life. This campus sanctuary provides a space for candle light vigils, prayer circles and memorial services.

Delta Field is located in front of the Fine Arts Building. The space is used throughout the year for various campus activities and contains expansive fields for intramural and club sports.

Elm Avenue Quad sits between Monument Hall, the Admissions Welcome Center, and Albers Hall. This space is used for many student activities throughout the year including the Homecoming bonfire, Piñon Palooza, and some all-campus barbecues. Students are regularly found here playing Frisbee, tossing a football, or socializing. The quadrangle/pedestrian mall features "Where Rivers Meet" (2006), a fountain that seeks to portray the Grand Valley's history, geography and the legacy of the junction of the Colorado and Gunnison rivers.

Hotel Maverick (2020) is a 60-room boutique teaching hotel located in the heart of campus near the rugby pitch and pump track. The hotel features a high end restaurant, The Devil's Kitchen and Betty's Coffee Shop. The hotel provides hands-on learning experiences for business and culinary students.

The Plaza (2014) the central, ellipse-shaped open space in the heart of campus is bound on four sides by the University Center, Monument Hall, Escalante Hall and Dominguez Hall. It provides a venue for large-scale productions, events and recreational activities.

University Center (2010) is a two-story, 100,000 square-foot building and four-level parking structure that serves as the hub of campus life.

The facility features retail food service options that include a convenience store, Starbucks®, Chick-fil-A® and The Caf. It also houses an activity lounge for electronic gaming, pool tables, large screen TVs and The Point, a student-run pub. On the first floor you will also find the MAVcard Office, Career Services and the Information Desk/Parking Services customer service area, as well as The Maverick Store, Colorado Mesa University's Bookstore and Fan Shop.

The center's second floor houses offices for The Criterion newspaper, KMSA 91.3FM radio, the Campus Design Studio and the Student Life offices. It includes office and meeting spaces for Associated Student Government, Programming Activities Council, Club Advisory Board and the Cultural Diversity Board. The building also features the Meyer Ballroom, six meeting rooms and a large south-facing terrace.

Degrees and Programs of Study

Colorado Mesa University offers programs leading to awards in five levels: certificates (graduate, professional, and technical), associate's degrees, baccalaureate degrees, master's degrees and doctoral degrees.

General requirements for each degree and certificate program are listed in the graduation requirements sections of this catalog and in program descriptions found under [Areas of Study](#) (p. 92). While these general requirements are as correct and current as possible, some changes may occur as programs are updated.

Graduate degrees offered:

- Master of Arts in Education (MA, Education or MAEd)
- Master of Arts in Criminal Justice Leadership and Policy (MA)
- Master of Business Administration (MBA)
- Master of Physician Assistant Studies (MPAS)
- Master of Science in Athletic Training (MSAT)
- Master of Science in Nursing (MSN)
- Master of Science in Occupational Therapy (MSOT)
- Master of Science in Sport Management (MS)
- Master of Social Work (MSW)
- Doctor of Nursing Practice (DNP)
- Doctor of Physical Therapy (DPT)

Baccalaureate degrees offered:

- Bachelor of Applied Science (BAS)
- Bachelor of Arts (BA)
- Bachelor of Business Administration (BBA)
- Bachelor of Fine Arts (BFA)
- Bachelor of Music (BM)
- Bachelor of Music Education (BME)
- Bachelor of Science (BS)
- Bachelor of Science in Radiologic Science (BSRS)
- Bachelor of Science in Nursing (BSN)
- Bachelor of Social Work (BSW)

These are programs of study that generally consist of 120 or more credit hours and provide extensive preparation in a specific major. Concentrations are available within many of the baccalaureate degrees.

Engineering: Through a partnership with the University of Colorado Boulder, students can complete a Bachelor of Science in Civil Engineering, Electrical/Computer Engineering, or Mechanical Engineering from the University of Colorado-Boulder on the Colorado Mesa University campus.

Pre-Health Science Preparation: Admission to the study of dentistry, medicine, optometry, physical therapy, and veterinary medicine usually requires the completion of a baccalaureate degree, often in biological sciences. Students planning to enter one of these health fields should declare a major in one of the sciences after consultation with a faculty advisor.

Associate degrees are awarded in two broad areas:

- Associate of Arts or Associate of Science (AA, AS) degrees are available in a number of emphases at Colorado Mesa University. Students enrolling in these degrees may be preparing for immediate employment upon graduation or they may expect the two-year degree to be the first phase toward a baccalaureate degree. All AA and AS degrees include the statewide common core of general education curriculum and, when completed successfully, meet the lower-division essential learning requirements of most baccalaureate degree programs.
- Associate of Applied Science (AAS) degrees are offered in a variety of technical and vocational programs. AAS programs average two years in length.

Certificates are awarded in three categories:

- Graduate Certificates contain graduate level (5xx-7xx) courses. A student must be admitted as a graduate student to attempt a graduate certificate.
- Professional Certificates are comprised of primarily upper division (3xx-4xx) courses. For a student to attempt a Professional Certificate after the student has earned a baccalaureate degree, the student must be admitted to study as a post-baccalaureate student or as a graduate student.
- Technical Certificates are normally chosen by students whose immediate plans are a career in a technical area. They are comprised of lower division (1xx-2xx) courses. While the length may vary, these programs are usually one-year long and are designed to train for specific skills required for employment.

Non-Credit Continuing Education Courses

Non-credit continuing education courses toward personal, civic, vocational, and professional self-improvement are offered through the University's [Continuing Education Program](#).

Disclosure Statements

Accreditation Statement

Colorado Mesa University (CMU) is accredited by the Higher Learning Commission (HLC)

Higher Learning Commission
230 South LaSalle Street, Suite 7-500, Chicago, Illinois 60604-1411
Phone: 800.621.7440 / 312.263.0456 | Fax: 312.263.7462
| info@hlcommission.org

Verification of CMU's status can be found on the [HLC website](#). Additional details on CMU's HLC and program-specific state and national agency accreditation is provided in the [Overview of Colorado Mesa University](#) (p. 25).

HEOA (Higher Education Opportunity Act) Disclosure Information

In compliance with the Higher Education Opportunity Act of 2008, information about Colorado Mesa University is available on the [University's website](#). Information disclosed includes program information, physical plant facilities, faculty information, financial aid and textbook information, as well as student-right-to-know information.

Overview of Colorado Mesa University

History

The founding of Grand Junction Junior College in 1925, with 39 students enrolled in seven classes, marked the beginning of post-secondary education on Colorado's Western Slope. As Mesa Junior College, the number of students grew to 270 by fall 1937; headcount increased to 1,300 by 1963. Over that period, the range of community college programs expanded, and an area vocational school was added in 1967. By 1974, the college had evolved into a baccalaureate-granting institution, leading enrollment to triple in 16 years and reach 3,891 in fall 1979. In

1988, the College was renamed Mesa State College and in 1994 the Colorado legislature authorized Mesa State College to offer selected graduate degrees in response to regional needs.

With the addition of graduate programs, Mesa State College became the only four-year institution in Colorado to offer a full-range of undergraduate programming that spans technical certificates, associate degrees (both academic and vocational), and baccalaureate degrees to graduate certificates and degrees.

In 2003, Mesa State College was statutorily assigned the responsibility of meeting the educational needs for 14 Western Slope counties: Delta, Eagle, Garfield, Grand, Jackson, Mesa, Moffat, Montrose, Ouray, Pitkin, Rio Blanco, Routt, San Miguel and Summit.

In 2005, Mesa State College formally created a two-year, open admission division: Western Colorado Community College.

The role and mission of the institution was reenacted in 2010 by the Colorado General Assembly (Colorado Revised Statutes 23-53-101) and amended in 2011 when Mesa State College was renamed Colorado Mesa University. After a 2012 amendment, the role & mission is:

There is hereby established a university at Grand Junction, to be known as Colorado Mesa University, which shall be a general baccalaureate and graduate institution with selective admission standards. Colorado Mesa University shall offer liberal arts and sciences, professional, and technical degree programs and a limited number of graduate programs. Colorado Mesa University shall also maintain a community college role and mission, including career and technical education programs. Colorado Mesa University shall receive resident credit for two-year course offerings in its commission-approved service area. Colorado Mesa University shall also serve as a regional education provider.

Vision, Mission and Values

Vision

CMU aspires to be a Human Scale University that serves as a model of the world we want to create - a world where people aspire to love, extend dignity, choose courage, demonstrate humility, develop resiliency, celebrate curiosity, and use power for good.

Institutional Mission

As a Human Scale University, our mission is to provide an affordable and accessible education and form meaningful and mutually enriching partnerships that support the well-being and vibrancy of our community.

Values

To fulfill our mission and reach toward our vision, our work is grounded in seven values: love, dignity, courage, humility, resiliency, curiosity, and power. When we practice these values, we are able to support the diversity of our campus, learning from and honoring the rich assortment of beliefs and backgrounds that converge on our campus that make for a vibrant culture and community.

Accreditation

Colorado Mesa University is accredited by the Higher Learning Commission (hlcommission.org), an institutional accreditation agency recognized by the U.S. Department of Education.

The following programs at Colorado Mesa University are accredited and/or approved by external professional accreditation bodies specific to that discipline:

- **Athletic Training:** The Colorado Mesa University Master of Science in Athletic Training program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The program earned a 5-year initial accreditation in February 2021 and holds the accreditation status of *Active-in good standing*.
- **Aviation Technology:** Certified by the Federal Aviation Association (FAA)
- **EMT/Paramedic:** Accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).
- **Landman Energy Management Program:** American Association of Professional Landman (AAPL).
- **Mechanical Engineering Technology:** Students completing the Colorado Mesa University Mechanical Engineering Technology (MET) program will receive a Bachelor of Science degree in Mechanical Engineering Technology. The Bachelor of Science MET Program is accredited by the Engineering Technology Accreditation Commission of ABET.
- **Medical Laboratory Technician:** National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).
- **Music:** Accredited Member of the National Association of Schools of Music. 11250 Roger Bacon Drive, Suite 21 | Reston VA 20190-5248 | 703.437.0700 | info@arts-accredit.org.
- **Nursing:** The baccalaureate degree programs, master's degree programs, and Doctor of Nursing Practice program at Colorado Mesa University are accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street, NW, Suite 750, Washington, DC 20001, 202.887.6791.
- **Nursing:** The Practical Nursing Program at Colorado Mesa University located in Grand Junction, Colorado is accredited by the Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326, 404.975.5000. (404) 975-5000.
 - The most recent accreditation decision made by the ACEN Board of Commissioners for the Practical Nursing Program is Continuing Accreditation.
- **Nursing:** The Associate Nursing Program at Colorado Mesa University, located at the Montrose, Colorado campus, is accredited by the Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326, 404.975.5000. (<http://www.ccneaccreditation.org>).
 - The most recent accreditation decision made by the ACEN Board of Commissioners for the Associate Nursing Program is Initial Accreditation.
- **Occupational Therapy:** The profession's accrediting body, the American Occupational Therapy Association (ACOTE), has granted Candidacy status to this program. With Candidacy status, the first class of students were admitted for studies in January 2022. A required self-study of the program was submitted to ACOTE in November 2022. ACOTE performed an onsite visit in the Summer 2023 and the decision for full accreditation will follow in August 2023. If granted full accreditation, graduates of the program will be eligible to sit for the national certification examination for occupational therapists through the National Board for Certification in Occupational Therapy (NBCOT) and will be able to apply for licensure through the professional licensure board in the state in which the graduate wishes to practice.
 - ACOTE can be contacted at: Accreditation Council for Occupational Therapy Education (ACOTE®) 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449 P. (301) 652-2682 • F: (240) 762-5140 • E: accred@aota.org
- **Peace Officer Standards and Training (POST):** Approved by the Colorado Peace Officer Standards and Training Board.
- **Physical Therapy:** Effective April 25, 2023, Colorado Mesa University has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; phone: 703-706-3245; email: accreditation@apta.org). Candidate for Accreditation is an accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program may matriculate students in technical/professional courses. Achievement of Candidate for Accreditation status does not assure that the program will be granted Initial Accreditation. Candidacy is considered to be an accredited status, as such the credits and degree earned from a program with Candidacy status are considered, by CAPTE, to be from an accredited program. Therefore, students in the charter (first) class should be eligible to take the licensure exam even if CAPTE withholds accreditation at the end of the candidacy period. That said, it is up to each state licensing agency, not CAPTE, to determine who is eligible for licensure. Information on licensing requirements should be directed to the Federation of State Boards of Physical Therapy (FSBPT; www.fsbpt.org) or specific state boards (a list of state boards and contact information is available on FSBPT's website).
- **Physician Assistant Studies:** The ARC-PA has granted Accreditation - Provisional status to the Colorado Mesa University, Master of Physician Assistant Program sponsored by Colorado Mesa University. Accreditation - Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA *Standards* or when a program holding Accreditation - Provisional status appears to demonstrate continued progress in complying with the *Standards* as it prepares for the graduation of the first class (cohort) of students. Accreditation - Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class. The program's accreditation history can be viewed on the ARC-PA website at: <http://www.arc-pa.org/accreditation-history-colorado-mesa-university/>.
- **Radiologic Sciences:** The Baccalaureate of Science in Radiologic Sciences (BSRS) Program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT).
- **Social Work:** Council on Social Work Education.
- **Strength and Conditioning/Personal Training Program:** The Department of Kinesiology has met established educational program criteria to be designated as a National Strength and Conditioning Association (NSCA) Education Recognition Program (ERP).
- **Surgical Technology:** The Surgical Technology program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Accrediting Review Council on Education in Surgical Technology and Surgical Assisting (ARC/STSA). ARC/STSA contact information: Mailing address: 19751 East Mainstreet, Suite #339, Parker, CO 80138. Phone:(303)-694-9262, Email: info@arcstsa.org. CAAHEP

contact information: Mailing address: 9355 113th St. N, #7709, Seminole, FL 33775, Phone: (727) 210-2350.

- **Teacher Education:** Approved by the Colorado Commission on Higher Education and the Colorado Department of Education to prepare teachers for licensure application.
- **Transportation Services:** Certified by the Automotive Society of Engineers (ASE) Education Foundation.

Note: Students completing the University of Colorado Boulder/Colorado Mesa University Mechanical Engineering Partnership Program will receive a Bachelor of Science in Mechanical Engineering Degree from the University of Colorado Boulder. The ME Partnership Program is accredited by the Engineering Accreditation Commission of ABET.

For further information on program-level accreditation, please contact Academic Affairs.

The University is designated as balanced arts and sciences/professions with some graduate coexistence as part of the Carnegie classification of higher education institutions.

Auxiliary Campuses

Montrose Campus

The Montrose Campus of CMU provides the Western Slope's second largest community local access to postsecondary education. For local students pursuing a bachelor's degree, it offers a convenient location to complete general education courses before attending the main campus to take courses in their major. For students who want to complete their education in Montrose, the campus offers several associate degrees and certificate programs that include programs in Nursing and Criminal Justice, as well as a Bachelor of Science degree for students who have a LPN.

To meet the needs of high school graduates and adult working students, classes occur primarily in the afternoons and evenings. Classrooms are limited to no more than 30 students to ensure students receive personal attention from their instructors.

The campus is adjacent to the Montrose Regional Library. Facilities include classrooms with advanced instructional technology, computer labs, and study lounges. The campus also has a career and technical facility for welding, machining technology, and Police Officer Standards Training (POST) for students interested in a career in law enforcement.

Admissions, advising and student services staff are available in the Branscome Center, open from 8 a.m. to 6:30 p.m., Monday through Thursday, and until 5 p.m. on Friday. Services include admissions counseling, orientation, academic advising, financial aid, course registration, testing services, career counseling, and tutoring. Future and current students can make an advising appointment in advance by calling 970.249.7009.

Visit the [CMU Montrose](#) website for more information about the academic programs available at the Montrose campus.

Tilman M. Bishop Campus

The Tilman M. Bishop Campus of Colorado Mesa University is the result of a partnership of the University, Mesa County Valley School District 51, and area businesses. The applied technology programs at the Bishop Campus serve the technical education needs of both university and area high school students, primarily those in District 51.

Students at the Bishop Campus—the main site of Western Colorado Community College, Colorado Mesa University's two-year division—can earn two-year associate degrees or technical certificates. High school students can earn university credits through concurrent enrollment. Among the services available at the Bishop campus are college admission, class scheduling, academic and interest assessments, bill payments, financial aid assistance, resume preparation, job interviewing skills, and placement in internships and jobs. For more information call 970.255.2670 or toll free, 888.455.2617.

Diversity Statement

Colorado Mesa University extends its services to anyone regardless of age, race, color, national origin, religion, sex, disability, veteran status, or sexual orientation.

Following is the statement of philosophy on diversity which has been adopted by the faculty at Colorado Mesa University:

"Colorado Mesa University is a community of scholars in the liberal arts tradition. As faculty we believe that all people, regardless of age, race, color, national origin, religion, sex, disability, veteran status, or sexual orientation, have something worthwhile to contribute and that these contributions benefit us all. Therefore, we intend that within our academic community all cultural differences will be treated with equal respect and tolerance. We desire that our students have the opportunity to appreciate the diversity of our modern world, and we encourage them to partake of the resources available within our community. As faculty we pledge ourselves to provide as many divergent cultural experiences for our students as the resources of the college and the needs of our disciplines allow."

"To further tolerance and appreciation of our society's diversity, Colorado Mesa University requires that all graduates fulfill General Education requirements. In doing so we honor the validity of a liberal education. We hope that the experience will help our students understand how to appreciate the true diversity of the world. Because diversity promotes multiple opinions, techniques, viewpoints and approaches, it is not the individual courses within the General Education program which we believe will further the above-stated goals, but the whole experience of the program itself."

Colorado Mesa University expects all members of the campus community to uphold the highest standards of civil and ethical conduct and to promote a culture of respect and inclusiveness. For more information on these expectations, review the [Resolution Concerning Expectations Regarding Safety, Violence, Intimidation, Abuse and Discrimination at Colorado Mesa University](#).

Student Bill of Rights

The Colorado General Assembly implemented the Student Bill of Rights to assure that students enrolled in public institutions of higher education have the following rights:

- A quality general education experience that develops competencies in reading, writing, mathematics, technology and critical thinking through an integrated arts and science experience;
- Students should be able to complete their associate of arts and associate of science degree programs in no more than sixty credit hours or their baccalaureate programs in no more than one hundred twenty credit hours, unless there are additional degree requirements recognized by the commission;

- c. A student can sign a two-year or four-year graduation agreement that formalizes a plan for the student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
- d. Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
- e. Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
- f. Students, upon successful completion of core general education courses, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;
- g. Students have a right to know if courses from one or more public higher education institutions satisfy the students' graduation requirements;
- h. A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferable.

ACADEMIC CALENDAR

2023-2024 Academic Calendar

The following dates are subject to change. Changes will be published to the [Important Dates](#) webpage.

Summer Semester 2023

Date	Event
May 29	Memorial Day – No classes
May 30	Full semester and first summer module classes begin
June 1	Last day to add or drop a first summer module class
June 6	Last day to add or drop a full semester class
June 15	Last day to withdraw from a first summer module class with a grade of "W"
June 19	Juneteenth - No Classes
June 24	First summer module classes end
June 26	Second summer module classes begin
June 28	Last day to add or drop a second summer module class
June 28	Summer census – date after which credit hours are counted in COF attempted hours
July 3	No classes
July 4	Independence Day – No classes
July 5	Last day to withdraw from a full semester class with a grade of "W"
July 13	Last day to withdraw from a second summer module class with a grade of "W"
July 21	Full semester and second summer module classes end

Fall Semester 2023

Date	Event
August 8	Residency petitions due to Tuition Classification Officer (Admissions Office)
August 21	Full semester and first module classes begin
August 28	Last day to add or drop a first module class
September 4	Labor day - campus open - classes in session
September 5	Last day to add or drop a full semester class
September 5	Fall census – date after which credit hours are counted in COF attempted hours
September 11	Late start classes begin
September 21	Last day to add or drop a late start class
September 25	Last day to withdraw from a first module class with a grade of "W"
October 1	Deadline for filing Intent to Graduate form with Registrar's Office for spring and summer graduates
October 12	First module classes end
October 13-15	Fall Break – no classes
October 16	Second module classes begin
October 23	Last day to add or drop a second module class
October 23	Priority registration for spring 2024 classes begin
October 30	Last day to withdraw from a full semester class with a grade of "W"

November 6	Last day to withdraw from a late start session with a grade of "W"
November 16	Last day to withdraw from a second module class with a grade of "W"
November 18-26	Thanksgiving holiday – no classes
December 11-14	Final examinations
December 14	Fall semester ends
December 15	Commencement

Spring Semester 2024 (including January Term)

Date	Event
January 2	January term (J-Term) classes begin
January 3	Last day to add or drop a January term class
January 8	Residency petitions due to Tuition Classification Officer (Admissions Office)
January 12	Last day to withdraw from a January term class with a grade of "W"
January 15	Martin Luther King, Jr. Day – No Classes
January 20	January term classes end
January 22	Full semester and first module classes begin
January 29	Last day to add or drop a first module class
February 6	Last day to add or drop a full semester class
February 6	Spring census – date after which credit hours are counted in COF attempted hours
February 12	Late start classes begin
February 22	Last day to add or drop a late start class
February 27	Last day to withdraw from a first module class with a grade of "W"
March 1	Deadline for filing Intent to Graduate form with Registrar's Office for fall graduates
March 15	First module classes end
March 16-24	Spring Break – No Classes
March 25	Second module classes begin
April 1	Last day to add or drop a second module class
April 1	Priority registration for summer and fall 2024 begins
April 8	Last day to withdraw from full semester classes with a grade of "W"
April 15	Last day to withdraw from a late start session with a grade of "W"
April 25	Last day to withdraw from a second module class with a grade of "W"
May 13-16	Final examinations
May 16	Spring semester ends
May 18	Commencement

POLICY STATEMENTS

Additional FERPA information is available on the [Family Education Rights and Privacy](#) page of the website.

General Policy Statement

Colorado Mesa University is a comprehensive coeducational institution operated under the governance of the Board of Trustees of Colorado Mesa University. The programs, policies, statements, and procedures contained in this catalog are subject to change by the University without prior notice. Colorado Mesa University reserves the right to, at any time, withdraw courses or modify the rules, calendar, curriculum, graduation procedures, and any other requirements affecting students. While the information contained in this catalog is current and correct insofar as possible at the time of publication, students are advised to check with appropriate University officials, [department web pages](#), and [academic and student services offices](#) for up-to-date information.

This catalog is intended for the guidance of students and faculty but does not constitute a guarantee that all courses listed will actually be offered during any particular academic year. Colorado Mesa University reserves the right to withdraw or add courses prior to the beginning of any semester or summer term. In some programs, certain courses may be offered on an alternate-year basis or as determined by apparent demand. All program offerings are contingent upon adequate appropriations by the Colorado General Assembly.

Colorado Mesa University is committed to providing admission or access to, or treatment or employment in, its educational endeavors, consonant with applicable laws and without regard to race, creed, color, religion, sex, disability, age, national origin, veteran status, marital status, sexual orientation or gender identification.

Inquiries may be made to the Affirmative Action Officer, Human Resources Office, Lowell Heiny Hall, Room 237.

Colorado Mesa University is a Drug-Free Workplace. All employees and students of the University agree to abide by the requirements in the Federal Drug-Free Workplace Act and the policies stated in the brochure entitled Drug-Free Schools, Campuses and Workplaces Drug Use and Alcohol Abuse Prevention Program. All employees and students are provided copies.

As required by the Campus Security Act, Colorado Mesa University publishes campus safety policies and statistics annually. Copies of the annual report are available on the [Campus Security Reports](#) page of the website.

FERPA Policy Statement

The Family Educational Rights and Privacy Act (FERPA) provides students who are enrolled in an institution of postsecondary education the right to inspect, review, and challenge their educational records. Colorado Mesa University has the responsibility of maintaining and protecting the confidentiality of students' official educational records. Colorado Mesa University also supervises the access to and/or release of educational records of its students.

FERPA covers enrolled and former students, including those who are deceased. Students who are not accepted to Colorado Mesa University, or if accepted, do not attend, have no rights under FERPA. In addition, the University will not release personally identifiable records of students to any individual, agency or organization without the prior written consent of the student, except as provided by FERPA. For further information related to FERPA, see the Registration section of this catalog.

Undergraduate Admission Procedures for Degree-Seeking Students

How to Apply

To be considered for admission, undergraduate applicants should:

- a. Submit the Application for Undergraduate Admission along with a \$40 non-refundable application processing fee or fee waiver documentation.

Prospective students are highly encouraged to submit applications electronically via [apply to CMU](#) or the Common Application. Upon receipt of a completed admissions application and supporting documentation, applicants will be notified of their admissions status via the mail and by email.

Students may submit their application for the following terms as early as:

Spring semester 2024: May 1, 2023

Summer semester 2024: August 1, 2023

Fall semester 2024: August 1, 2023

- b. Submit the appropriate supporting documentation, as outlined in the table on the following page, directly to:

Colorado Mesa University
Admissions Office
1100 North Avenue
Grand Junction CO 81501-3122.

Letters of recommendation and a personal essay are optional and should be submitted to the Admissions Office.

For more information about admissions requirements, please also visit the admissions information page most applicable to the student's application status:

- [Admission of First-time Freshmen](#) (p. 32)
- [Admission of Transfer Students](#) (p. 32)
- [Admission of International Students](#) (p. 33)
- [Admission of Returning Students](#) (p. 33)
- [Admission of Adult Students](#) (p. 34)
- [Baccalaureate Admission Requirements](#) (p. 34)
- [Admission to Specific Undergraduate Programs](#) (p. 34)

Home-schooled

Students should provide a transcript of all courses taken at the high school level. Contact the Admissions Office if you are in need of a transcript template. Students should submit transcripts of any courses taken at a traditional high school and may also submit a portfolio to describe their high school education.

Transfer

Students who intend to transfer to Colorado Mesa University should contact the Admissions Office for help with the admissions and evaluation processes. Transfer students may be admitted into most baccalaureate degree programs if they are in good standing at another regionally accredited college or university and have a total minimum cumulative grade point average (GPA) of 2.4 for 24 or more semester credit hours. In calculating the cumulative admission grade point average, Colorado Mesa University will compute a transfer GPA based on prior college transcript(s) including all courses attempted. If the student has attended more than one prior institution, the GPA of each is combined for a total cumulative admission GPA. For students seeking a baccalaureate degree with less than 24 transfer credit hours, an admission decision will be based on the applicant's high school transcripts and it is recommended they meet HEAR recommendations as outlined in the [HEAR section](#) (p. 35) of this catalog.

Transfer students who are on probation or suspension from another college or university, or have a cumulative grade point average of less than 2.4, will not be admitted into a baccalaureate degree program but may enroll in Western Colorado Community College. Transfer students who are on probation or suspension from another college may be placed on probation at Colorado Mesa University.

An official evaluation of transfer courses is made once the student is fully admitted. Credit evaluations are completed in the Registrar's Office, with the assistance of academic department heads.

Also see [Admission of Transfer Students](#) (p. 32) for more details.

Admission of First-time Freshmen

The table below provides guidance for first-time freshman applicants. To use these:

- Select your applicant category in the far left row of the table.
- Review the documentation requirements listed to the right of your applicant category. The row on the top indicates the documentation category, and the text in your applicant category row indicates whether or not these need to be submitted with your application.

If you are applying to transfer to CMU, please instead refer to [Admission of Transfer Students](#) (p. 32) for applicable information. Additionally, applicants 23 years of age or older and/or who have been out of school for a minimum of five years and who are seeking undergraduate admission will not be held to the minimum first-time student and/or transfer student GPA admission standards. See details regarding admission of [first-time adult students](#) (p. 34).

Student Degree Intent	Official High School Transcript ¹	Standardized Test Scores ²
Four-Year Degree-Seeking	Required; sent directly to university from high school. ³	Optional ⁵
Two-Year Degree-Seeking (AA, AS)	Required; sent directly to university from high school	Optional ⁵
Two-Year Degree-Seeking (AAS)	Required; sent directly to university from high school	Optional ⁵
Certificate-Seeking	Required; sent directly to university from high school	Optional ⁵
Non-Degree-Seeking	None ⁴	Not required ⁵

¹ Preliminary transcript will be accepted until final transcript is submitted; also applies to home-schooled students.
² CMU will super score multiple test scores for admission and scholarship determination.
³ GPA and HEAR recommendations will be reviewed. If you take the SAT/ACT, results may be used for admission.
⁴ Must become degree-seeking by no later than completion of 30 credit hours and complete high school diploma or GED.
⁵ Placement tests or prerequisites may be required.

Note: In addition to the requirements shown above, some academic programs have additional admission requirements. Admission to Colorado Mesa University does not guarantee admission to those programs.

Admission of Transfer Students

The tables below provide guidance for transfer student applicants. To use these:

- Select the table that applies to the number of college-level semester credit hours you have completed/attempted post high school graduation.
- Select your applicant category in the top row of the table.

- Review the documentation requirements listed below your applicant category. The row on the far left indicates the documentation category, and the text below your applicant category indicates whether or not these need to be submitted with your application.

Applicants 23 years of age or older and/or who have been out of school for a minimum of five years and who are seeking undergraduate admission will not be held to the minimum first-time student and/or transfer student GPA admission standards. See details regarding admission of adult students.

0-23 Credit Hours

Category	Four-Year Degree-Seeking	Two-Year Degree-Seeking (AA, AS)	Two-Year Degree-Seeking (AAS)	Certificate-Seeking	Non-Degree Seeking
Official High School Transcript	Required; sent directly to university from high school. High School grads >= Spring 2008 encouraged to meet HEAR recommendations ³	Required; sent directly to university from high school	Required; sent directly to university from high school	Required; sent directly to university from high school	Not required ¹
Official College Transcript ²	Required; sent directly to university from previously attended institution(s)	Required; sent directly to university from all previously attended institution(s)	Required; sent directly to university from all previously attended institution(s)	Required; sent directly to university from all previously attended institution(s)	Not required ¹
Standardized Test Scores	Optional ⁴	Optional ⁴	Optional ⁴	Not required	Not required ¹

¹ Must become degree-seeking by no later than completion of 30 credit hours and complete high school diploma or GED.
² Must provide official transcript from every college/university attended, regardless of the type or amount of credit, academic status, or time elapsed since credit was earned. Failure to provide all college transcripts is grounds for rejection or dismissal. Include transcripts of college courses completed while still in high school.
³ CMU will review high school GPA and coursework along with transfer GPA and coursework for admission.
⁴ May be required for admission to selected programs; will be required for placement in essential learning courses.

24+ Credit Hours

Category	Four-Year Degree-Seeking	Two-Year Degree-Seeking (AA, AS)	Two-Year Degree-Seeking (AAS)	Certificate-Seeking	Non-Degree Seeking
Official College Transcript ¹	Required; sent directly to university from previously attended institution(s)	Required; sent directly to university from previously attended institution(s)	Required; sent directly to university from previously attended institution(s)	Required; sent directly to university from previously attended institution(s)	Not required ³
Transfer GPA	2.40	2.00 ²	No minimum	No minimum	Not required ³

¹ Include transcripts of college courses completed while still in high school.

² Students who left their previous institution(s) and were not in good academic standing must earn a minimum 2.00 GPA during their first semester.

³ Must become degree-seeking by no later than completion of 30 credit hours.

Note: In addition to requirements shown above, some academic programs have additional admission requirements. Admission to Colorado Mesa University does not guarantee admission to those programs.

Admission of International Students

International Student Admission Requirements:

To be considered for admission, students who have or will be seeking an F-1 international student visa must complete and submit the following items to the Colorado Mesa University International Student Admissions and Programs Office. Detailed requirements and forms are found on the [International Admissions](#) webpage.

- [International Student Application](#) with \$30 non-refundable application fee;
- Proof of English proficiency (see next section for details);
- Official secondary school transcript (transcripts not issued in English must be accompanied by official English translations);
- Official transcript(s) from all colleges or universities attended, if applicable. To receive possible transfer credit, an official copy of the professionally evaluated foreign transcript(s) evaluation;
- The [CMU Notarized Statement\(s\) of Financial Support](#) and official bank statement(s) showing proof of funds;
- Copy of ACT or SAT scores (if taken);
- For registration purposes, all international students are required to maintain health insurance. Students will be enrolled in CMU's international student group insurance plan unless waiver requirements are met;
- For registration purposes, all international students are required to comply with the Colorado law regarding the measles, mumps and rubella immunizations. A Colorado Mesa University official

[immunization form](#) must be completed and returned to the Registrar's Office.

Please note, students are encouraged to apply by May 1 for fall semester and by October 1 for spring semester.

English Proficiency Requirements:

Prospective undergraduate international students who are seeking admission to Colorado Mesa University and whose primary language is not English must provide documented evidence of the ability to read, write, speak, and understand the English language at a high proficiency. This requirement may be fulfilled in one of the following ways:

- Submission of TOEFL exam scores with a minimum average of 70 iBT/525 paper-based.
- Submission of IELTS exam scores with a minimum of Band 6.
- Enroll and successfully complete an approved intensive English program. A program must be pre-approved by the CMU International Student Admissions and Program Office.
- An international student who has been enrolled as a full-time student at a high school, college or university in the United States may request consideration of fulfillment of this requirement on an individual basis.
- Other evidence will be considered on an individual basis.

Proof of Financial Funds:

Before admission is granted, an international student must provide proof of financial ability to meet the estimated cost of tuition, fees, books, living accommodations, health insurance and incidental expenses for at least one full year. This is required to issue the I-20. Costs, additional information, and forms may be obtained from the [International Admissions](#) webpage.

International Transfer Students:

International transfer students with college credit from an institution outside the United States must provide the appropriate official, professionally evaluated transcript from an approved company of courses (or grade reports, exam results, degree awards, etc., depending on the standard of the particular country) before transfer credit can be determined. Please see the [International Admissions](#) webpage for more information on approved foreign transcription evaluation options. In most cases, course descriptions or syllabi are required to determine content of individual courses. Should a student decide to begin their degree from the beginning at CMU, official transcripts in English are required but a professionally evaluated transcript/degree is not.

Admission of Returning Students

Returning students (any student who has previously attended Colorado Mesa University and has been out for at least two semesters; summer and January terms excluded) must submit an online application at [Apply to CMU](#). If the student has attended another institution since last attending Colorado Mesa University, official transcripts of all course work must be sent directly to Colorado Mesa University, Registrar's Office, from each institution attended. Official transcripts must be submitted to continue enrollment at Colorado Mesa University. See "Applicable Catalog and Degree Requirements" in the [Requirements for Degrees](#) (p. 67) section to determine the catalog to be followed for graduation.

Students who are eligible to return after being on suspension must complete the Returning Student Application to be considered for re-admission. See the [General Undergraduate Academic Policies](#) (p. 60) section for more information on eligibility to return after academic suspension.

Admission of Adult Students

Applicants 23 years of age or older and/or who have been out of school for a minimum of five years and who are seeking undergraduate admission to Colorado Mesa University (CMU)/Western Colorado Community College (WCCC) will not be held to the minimum first-time student and/or transfer student GPA admission standards.

Transfer students shall be required to provide official transcripts from each college attended. First-time students and transfer students who have not completed 24 college-level semester credits shall provide an official high school transcript or GED test scores.

In the event an applicant cannot document that they have earned a high school diploma due to the closure of a private high school, then the institution will allow the following Conditional Admission by Exception.

Process:

- a. When a student seeking enrollment cannot document having a high school diploma because of school closure, the applicant will sign a statement so stating. Admissions staff will confirm independently that the high school no longer exists.
- b. Requirements for Conditional Admission by Exception:
 - i. Complete Placement Examinations in Mathematics and English
 1. If test scores indicate college-level course placement, students may be fully admitted, enroll for a maximum of 12 credit hours in their first semester, and declare a major.
 2. If test scores indicate developmental-level course placement, students must enroll in coursework to remedy any deficiencies in their first semester before and, based on successful completion of developmental courses, can then declare a major in their second semester.

Baccalaureate Admission Requirements

Full Admission

First-year students who are admitted to Colorado Mesa University's four-year division will be admitted based on their GPA, courses completed in high school with focus on HEAR recommendations and any other supporting documents provided by the student such as letters of recommendation or test scores.

Compass Program

Baccalaureate seeking students who are not recommended for full-baccalaureate admission based on the holistic review process may be offered provisional admission in the Compass Program. Students may transition to a baccalaureate program once they 1) complete 24 college-level credits at Colorado Mesa University, 2) earn a grade of C or higher in UNIV 100, 3) complete or be eligible to enroll in college-level English and math courses, and 4) earn a 2.0 cumulative grade point average.

GOALS Program

Greater Opportunity for Academic and Life Success (GOALS) is designed for students who do not meet the admission requirements to directly enter CMU's baccalaureate degree. Students in the GOALS Program are initially admitted to an Associate's degree until they meet the requirements to internally transition into a four-year baccalaureate degree. Students will take (UNIV 100), a course designed to provide skills to succeed in college in life. Students will focus on study skills, self-management skills, financial literacy, and major/career exploration. Additionally, students are supported through individualized academic advising and college success workshops.

The GOALS program supports students until they have successfully completed the following requirements: completed 24 credits of 100-level or above course work, college ready for both math and English, and has a cumulative 2.0 grade GPA or better. The GOALS program will help students explore the pathways toward either completing a certificate, associate or bachelor's degree.

Adult Students

Applicants 23 years of age or older and/or who have been out of school for a minimum of five years and who are seeking undergraduate admission will not be held to the minimum first-time student and/or transfer student GPA admission standards. See details regarding admission of adult students.

Admission to Specific Undergraduate Programs

Some baccalaureate, associate, and certificate programs may have specific entrance requirements in addition to general university admittance. Admission to Colorado Mesa University does not guarantee admission into an academic or technical program. More information is available in this catalog in the [Areas of Study](#) (p. 92) section. Prospective students should check with the department head of the specific academic program for special requirements.

Admission to CMU/CU-Boulder Engineering Partnership Program

Students enter CMU as "pre-engineering" majors. They may apply to the Civil, Electrical/Computer, or Mechanical Engineering Partnership Program:

- After one year at CMU if they have completed a two course sequence in calculus and a two course sequence in physical science with As or Bs and have an overall GPA of 3.0 or better, or
- After completing all required lower-division coursework at CMU with a GPA of 3.0 or better

Interested students can learn more about the program and admission options at [CMU/CU-Boulder Engineering Partnership Programs](#).

Undergraduate Admission Procedures for Non-Degree Seeking Students

Students who do not wish to pursue a degree or certificate at Colorado Mesa University may apply as non-degree seeking rather than being

formally admitted to the university. This includes students who wish to enroll in Colorado Mesa University courses while away from their "home" institution, such as during summer and January terms.

Policies and guidelines include:

- a. Applicants must complete the Colorado Mesa University Application for Undergraduate Admission, selecting the non-degree seeking student type, and submit it along with a non-refundable \$40 application fee.
- b. Students who do not wish to pursue a degree or certificate are not required to submit high school or college transcripts.
- c. Non-degree seeking students are not eligible for financial aid or scholarships and will not be assigned an advisor.
- d. Non-degree seeking students must consistently earn a minimum semester grade point average of 2.0 while enrolled at Colorado Mesa University.
- e. Non-degree seeking students who earn 30 semester hours at Colorado Mesa University must apply for admission to Colorado Mesa University as a degree-seeking student in order to continue taking classes at Colorado Mesa University.
- f. Degree-seeking students will have priority over non-degree seeking students regarding registration.
- g. Non-degree seeking students are advised that courses taken during non-degree seeking status are counted against the state's current allowance of 145 semester credit hours through the College Opportunity Fund (COF).

Non-degree seeking students have not been formally admitted to Colorado Mesa University and are not guaranteed admission should they later make formal application as degree-seeking.

Once non-degree seeking students apply for degree-seeking status at Colorado Mesa University, the admission policies in effect at the time of formal application will be used to determine admissibility into the university and general and/or specific academic programs. This includes satisfying all requirements for admission as summarized in the admissions table found earlier in this section.

Colorado Public Higher Education Admission Recommendations (HEAR)

The admissions policy of the Colorado Department of Higher Education (CDHE) recommends the completion of a precollegiate curriculum for admission to a four-year Colorado public college or university for students graduating from high school beginning 2008.

Transfer applicants with fewer than 24 college-level semester credit hours and students transferring within the same institution must also demonstrate academic preparation comparable to HEAR if they graduated from high school in 2008 or later. Such preparation can be demonstrated by completing the pre-collegiate curriculum in high school and/or by successfully completing (with a grade of C- or higher) a college-level course in each core area (English, mathematics, natural sciences, foreign language and social sciences) where the high school unit requirements have not been fulfilled.

For students who graduated in 2010, or later, high school course or unit recommendations include:

- Four years of English
- Four years of mathematics (algebra I or higher)
- Three years of natural science (two of which are lab-based)
- Three years of social studies (including one year of U.S. or world history)
- One year of world/foreign language
- Two years of academic electives

Additional details are available from the [CDHE website](#).

Admission Decisions

Students who are academically prepared may be admitted to either the university's four-year or two-year divisions, according to the student's degree intent. Admission to the university's four-year division, however, does not guarantee acceptance of a student into a specific course or academic program (i.e., admission to the university does not imply entry into any program which has selective admission standards). Some students may be required to enroll in special courses for correction of academic or other deficiencies before further consideration is given.

Applicants applying for enrollment in Western Colorado Community College, Colorado Mesa University's two-year division, are reviewed with the community college's open admission policy. Students may later request to transfer into a baccalaureate degree program after successfully completing a minimum of 24 college-level semester credit hours and a cumulative grade point average of 2.0 or better or after earning an associate degree. Students with less than 25 college-level credit hours may also be subject to the [Colorado Higher Education Admission Recommendations \(HEAR\)](#) (p. 35).

Any transfer student admitted to Colorado Mesa University on a probationary status must earn a minimum 2.0 GPA the first semester or be placed on academic suspension and will not be eligible to return to Colorado Mesa University as stated under the academic suspension guidelines.

Acceptance of Transfer and Alternative Credits

It is the policy of Colorado Mesa University to accept academic credits from:

- All public colleges and universities in the state of Colorado, provided they are currently regionally accredited. This applies regardless of the institution's accreditation status at the time the credit was earned.
- Private and out-of-state colleges and universities, provided the institution is currently regionally accredited and was accredited or was a candidate for accreditation at the time the credit was earned.
- Regionally accredited two-year community or junior colleges.
- Regionally accredited institutions that award "S" or "P" grades, if the granting institution states that such grade is equal to a grade of "C" or better.
- Regional accrediting bodies are:
 - Middle States Association of Colleges and Schools
 - New England Association of Schools and Colleges
 - Northwest Commission on Colleges and Universities
 - The Higher Learning Commission
 - North Central Association of Schools and Colleges

- Southern Association of Schools and Colleges
- Western Association of Schools and Colleges
- gtPathways, Colorado guaranteed general education transfer courses (see Catalog section on [Colorado Department of Higher Education Statewide Guaranteed Transfer Courses](#) (p. 77)).
- Colleges and universities outside of the United States, provided the institution maintains the equivalent of a regional accreditation and individual transcripts have been evaluated by World Education Services or another NACES-approved member.

To receive transfer credit, an official transcript must be sent directly from the institution that granted the credit to the Colorado Mesa University Admissions Office or Registrar's Office. Only courses with a grade of "C" or better are eligible to be applied toward a degree or certificate.

Colorado Mesa University reserves the right to evaluate, on a course-by-course basis, any credits earned 15 years or more prior to enrollment. Initially, only courses used to fulfill essential learning requirements will be accepted in transfer. Other courses will be transferred upon acceptance by the department head within the major. Additional transfer information is available on the [Transferring Credit web page](#).

Alternative Credit

Alternative credit includes other methods, such as:

- Military Credit
- [Advanced Placement \(AP\)](#) and [International Baccalaureate \(IB\)](#) Exams
- [College Level Examination Program \(CLEP\)](#) and [Dantes \(DSST\) Exams](#)
- [Credit for Prior Learning Portfolio](#)

For military credit and exams, an official transcript must be sent from the source directly to the CMU Registrar's Office.

More detail on the credit and credit guidelines can be found in the [Undergraduate Academic Policies](#) (p. 60) section under "Non-Traditional Credit" section.

Other Transfer Credit Policies:

Technical credits: refer to the requirements for the Bachelor of Applied Science degree under [Requirements for Undergraduate Degrees and Certificates](#) (p. 67).

Transfer of final credits for degree completion: refer to the section on Final Credit Requirements Taken at Another University under [Requirements for Undergraduate Degrees and Certificates](#) (p. 67).

Graduate credits: refer to the section on [Transfer Credit under Graduate Programs](#) (p. 78).

Immunization Policy for Measles, Mumps, and Rubella

Colorado State Immunization Law states that effective July 1, 1992, all college students born since January 1, 1957 must have two (2) measles, two (2) mumps, and two (2) rubella doses. If the student received a second measles dose prior to July 1, 1992, the second mumps and rubella are not required. The first measles, mumps and rubella (MMR) cannot be accepted if it was given more than four days before the first

birthday. The second dose of MMR must be given at least 28 days after the first dose of MMR.

Written evidence of titers (blood tests) showing immunity to measles, mumps, and rubella is acceptable. If the student completes an exemption form and an outbreak occurs, the student will be subject to exclusion from school.

Selective Service

Federal Law requires nearly all male US citizens and male immigrants, 18 through 25, to register with Selective Service. Before registering for classes at any state college or university in Colorado, male students under the age of 25 should go to the [Selective Service website](#) to learn more about the requirements and to register for selective service if applicable.

Veterans

Programs offered by Colorado Mesa University, with certain exceptions, are approved by the Community College and Occupational Education System for the education and training of those veterans and dependents of veterans eligible under applicable public laws.

A veteran or dependent should work with the CMU Veteran Services Office:

- to verify a program of study's eligibility for benefits prior to enrolling in the program.
- to complete the application process for veterans education benefits as soon as the decision to enroll is made. Each semester, the student must enroll in classes and submit all necessary documents. With advance application, the student may avoid needing to make other financial arrangements for payment of tuition and fees, books, supplies and living expenses until VA funds are received.
- to determine the correct documentation to gain transfer credit for military experience for veterans.
- when the service member or reservist is unable to attend class or must suspend their studies due to service requirements in order to comply with 34 C.F.R. Section 668.18.

The evaluation of previous postsecondary education and training is mandatory and required for VA beneficiaries. For students utilizing Veterans benefits who are approved for transfer credit as a result of this evaluation, the institution will grant appropriate credit, reduce the program length proportionately, notify the student and Veterans Affairs in writing of this decision, and adjust invoicing of the VA accordingly.

Concurrently Enrolled High School Students

Currently enrolled high school students may register for college-level classes through six distinct programs as provided through the Concurrent Enrollment Act (CE).

Early Scholars Program

Through Colorado Mesa University and Western Colorado Community College's Early Scholars Program, high school students may access college-level courses not replicated in the high school curriculum through enrollment on a Colorado Mesa University campus.

High School Scholars Program

College-level courses are taught at participating high schools by qualified and approved high school lecturers for academic programs at Colorado Mesa University.

Technical Scholars Program

Students enrolled in any of Western Colorado Community College's Career and Technical Education (CTE) courses can earn both high school and college credit.

ASCENT Program

Students meeting program qualifications may apply to enroll through Colorado's ASCENT program if they have completed all high school graduation requirements, will have earned at least 9 college credit hours prior to high school completion, and agree to the special enrollment terms of the ASCENT Program. Students should work with their high school counselor to determine eligibility. All acceptance decisions are made by the student's school district and subject to funding accommodations set by the state.

TREP

Students who are majoring in primary or secondary education may be eligible through their high school to participate in the Teacher Recruitment Education Program (TREP). This program allows approved students to take up to two years of courses within an educator pathway tuition free (paid for by the student's school district).

PTECH Program

Students enrolled in participating high schools may earn an Associate of Applied Science in a number of fields while they complete their high school graduation requirements. Students must apply and be accepted into the program through their high school. Students may take four, five, or six years (beginning at grade 9) to complete all their requirements.

Requirements to Participate

To participate in the Concurrent Enrollment Program, students must be currently enrolled in high school (public, private, or home-schooled) and meet the following in order to be considered:

- a. Meet competency requirements for placement in the student's desired course;
- b. Approval of high school official (not required if student is homeschooled and would be paying for courses out of pocket).

Note: Students may prove competency in Chemistry, Math, and/or English using test scores or previously earned college credit. Accepted standard test scores are from SAT, ACT, PSAT, Accuplacer, or other CMU approved placement methods (i.e. ALEKs math placement, Chemistry Placement Exam, etc.). WCCC Student Services or CMU Testing and Prometric Center may be consulted regarding acceptable placement testing.

In most cases, the school district will pay the tuition of the student to concurrently attend Colorado Mesa University or Western Colorado Community College. Students (or parents or legal guardians if student is a minor) are typically responsible for payment of any fees, books (most Tech Scholar books are provided), and supplies. Students must apply as a concurrent student and be admitted by the Western Colorado Community College Student Services Office.

Application Process

Early Scholars/High School Scholars Programs

All students wishing to enroll in the Early Scholars or High School Scholars programs must be enrolled in high school (or, if home-schooled, be at the junior or senior level). Qualified students must complete and submit the [Online Concurrent Enrollment Application](#). Upon admission, students then submit the [Registration Form](#), current high school transcript, and appropriate test score reports. All Early Scholars or High School Scholars Program students must submit a Concurrent Enrollment Program Registration form each semester. This form requires completion by the student, lists the desired courses to be taken, and requires the high school official's approval. Early Scholars students (taking classes on one of Colorado Mesa University's campuses) must also submit proof of two (2) measles, mumps, and rubella vaccinations.

Technical Scholars Program

Students earn college credits through the Technical Scholars Program while enrolled in the CTE programs at Western Colorado Community College. Students must complete and submit the [Online Concurrent Enrollment Application](#). Upon admission, students must then register using the appropriate Tech Scholar- High School Students Registration Form ([GJ-WCCC](#) or [Montrose](#)) prior to the start of each semester.

ASCENT Program

ASCENT stands for Accelerating Students through Concurrent Enrollment. Students who have completed at least 9 credit hours of postsecondary courses prior to completion of his/her 12th grade year may be eligible for the ASCENT Program. They remain students in their Local Education Provider (LEP) for one year following their 12th grade year, and the LEP receives ASCENT specific per-pupil state funding that it uses to pay their college tuition. Students receive their high-school diplomas at the end of their ASCENT year.

The LEP will pay the tuition (up to the maximum provided by the Department of Education) for qualified ASCENT students; however, students are responsible for fees, books, supplies, as well as any tuition not covered by the LEP. Students must indicate their initial interest through their high school counselor in the Fall semester (see school district for deadline and application). Qualified students must complete and submit the following to apply for the ASCENT program: Colorado Mesa University or Western Colorado Community College application, ASCENT Registration eForm, current high school transcript, and appropriate test score reports.

TREP Program

TREP stands for Teacher Recruitment Education Program. Students who have completed at least 3 credit hours of approved postsecondary courses prior to completion of his/her 12th grade year may be eligible for the TREP Program. They remain students in their Local Education Provider (LEP) for two years following their 12th grade year, and the LEP receives TREP specific per-pupil state funding that it uses to pay their college tuition. Students receive their high-school diplomas at the end of their TREP years.

The LEP will pay the tuition (up to the maximum provided by the Department of Education) for qualified TREP students; however, students are responsible for fees, books, supplies, as well as any tuition not covered by the LEP. Students must indicate their initial interest through their high school counselor in the Fall semester (see school district for deadline and application). Qualified students must complete and submit the following to apply for the TREP program: Colorado Mesa University

or Western Colorado Community College application, TREP Registration eForm, current high school transcript, and appropriate test score reports.

PTECH Program

PTECH stands for Pathways in Technology Early College High school.

Students, approved for the program through their high school, have the opportunity to earn an AAS in a selected technical field while simultaneously completing their high school graduation requirements.

Completion plans include four, five, and six year options, and some programs may require summer semester participation. In addition to academics, PTECH students are matched with adult mentors currently working in the student's field of interest. Students who are interested in this pathway should speak with their middle or high school counselor to understand what opportunities are available.

Obligations for Concurrently Enrolled Students

- a. Upon course registration, students may (or parents/legal guardians if student is a minor) incur a financial obligation to CMU.
- b. Students participating in this program must apply for the [College Opportunity Fund \(COF\)](#) stipend. A student not registered for COF is responsible for payment of the COF stipend in addition to any additional outstanding tuition/fee charges.
- c. Because Early Scholars/High School Scholars enroll in college-level course(s), participating students must meet the same course requirements as other college and university students.
- d. Most courses taken satisfy university graduation requirements. Note that Activities (KINA) and advanced placement courses may not be eligible under the Early Scholars/High School Scholars program.
- e. Online courses are subject to approval by the student's school district, and require the student to complete a brief D2L introduction course. Failure to complete the D2L introduction may result in the student being dropped from the online class.
- f. High school seniors may take developmental basic skills courses under the provisions of the Concurrent Enrollment program. Grades earned in the Concurrent Enrollment program are part of the student's permanent CMU record and will appear on his/her college transcript; this may affect future university admission and/or scholarship potential.
- g. Course credits will transfer only if a student earns a C or better in the course.
- h. Students who earn a grade of D or F in any CMU or WCCC course while enrolled in the Concurrent Enrollment program may be prohibited from enrolling in any additional courses, at the discretion of their high school district.
- i. If students withdraw from a course after the add/drop date, they will receive a grade of W or F on their CMU transcript. See official university academic calendar for [specific dates](#).
- j. Students participating in this program are not eligible for the following: university sports, and/or federal- or state-funded financial aid, including institutional scholarships funded with general fund dollars.
- k. Registration in the Early Scholars/High School Scholars/Technical Scholars programs does not admit the student into a degree program.
- l. Student should check with their local school district regarding specific eligibility and financial obligations.
- m. ASCENT students must re-apply to Colorado Mesa University/Western Colorado Community to continue beyond their ASCENT year.

Colorado Mesa University does not guarantee that the approved classes will be available upon registration. Before registering for a specific course, students must fulfill the prerequisites listed in the Colorado Mesa University catalog. Visit [Concurrent Enrollment](#) for more information.

Residency Status for Tuition Purposes

A student's tuition classification is governed by state law. For further information regarding tuition classification, please see the [Expenses](#) (p. 43) section of this catalog or contact the Tuition Classification Officer located in the Admissions Office at 970.248.1875.

Confirmation of Attendance

Incoming students will be sent information about their next steps after they receive their admission. Enrollment details include important dates, housing information, cost of attendance, financial aid, class registration, and campus arrival.

Undergraduate Admission Assessment and Counseling Tests SAT or ACT

SAT or ACT results are not required for admission purposes.

SAT or ACT scores may be used for merit scholarship consideration and institutional research. CMU will super score multiple test scores for scholarship determination. SAT or ACT test results may be used as an aid in course placement.

Prospective students are encouraged to take the SAT or ACT during their high school junior or senior year. Transfer students with less than 25 credit hours earned after high school are encouraged to have their SAT or ACT scores on file in the Admissions Office prior to registration.

Assessment and Evaluation After Enrollment

Students may be required to participate in testing and other programs necessary for evaluation and assessment purposes. Please see the Learning Progress Evaluation section under [General Undergraduate Academic Policies](#) (p. 60).

Acceleration of University Study

It is possible for students to satisfy requirements for baccalaureate degrees in less than the traditional four years (eight regular academic year semesters). Ways of accomplishing this include: enrolling in university classes while a junior or senior in high school; exceeding the normal course load at Colorado Mesa University or elsewhere; challenging by examination courses in which competence has previously been attained; earning credit by testing through the College Level Examination Program (CLEP), DANTES and/or Advanced Placement; obtaining credit for prior learning (competency credit). Additional information may be obtained from IRIS, faculty advisors or the Registrar's Office.

New Student Orientation

All new degree-seeking first-time freshmen are required to participate in new student registration to receive their first semester courses. Information regarding new student registration will be emailed to students upon notification of acceptance and also can be found on the Colorado Mesa University [Orientation website](#).

Students must be admitted prior to starting the new student registration process. For more information, call 970.248.1875.

Stampede Welcome Week

Welcome Week is an opening week program for all students hosted by our Programming Activities Council (PAC). Activities begin the first day of school and carry on throughout the whole week during both the fall and spring semesters.

New students to Colorado Mesa University are strongly encouraged to participate in the programs offered in order to meet fellow classmates and learn about the University's programs and facilities. Visit the [Welcome Week website](#) for schedules and information.

Early Start Programs

The transition from high school to college is a major step. CMU's Early Start Programs (ESP) are designed to give first-time traditional students valuable knowledge about their college journey.

There are three tracks in the Early Start Program: Full, Compass and GOALS – more information on each track is available below. Students will be automatically placed into a track based on their admission level. If you are not sure of your admission level, please contact your admissions counselor or the Admissions Office.

Full Track

Taught by CMU faculty, the Full Track is designed to give students a better understanding of the skills needed to be successful in college, such as study skills, test-taking strategies and time management techniques. Take advantage of this opportunity to meet your Mavily and learn how to navigate campus before the semester start. Participants will earn two credit hours by completing the UNIV 101 course. For more information, visit the [Early Start website](#).

Compass Track

We highly encourage Compass Program students to take advantage of this opportunity to delve into their next steps as a Maverick. By participating in the Compass Track, you will complete the required UNIV 100 course (one-credit) during your early arrival. If you choose not to participate in the ESP Compass Track and you are a Compass Program student, you will complete the full UNIV 100 course, weekly, during your first semester at CMU. For more information, visit the [Early Start website](#).

GOALS Track

The GOALS Track is centered around academic preparedness, team building and life success skills. Activities encompassing this week include success planning, connecting with current GOALS students and immersing yourself in the Grand Junction community. After the initial group meeting on Sunday, the GOALS Track will meet Monday-Friday

for programming that does not include a class or textbook. For more information, visit the [Early Start website](#).

SCHOLARSHIPS AND FINANCIAL AID

Overview

Financial aid at Colorado Mesa University consists of a balanced program of self-help, scholarships, and grants-in-aid awarded for outstanding academic achievement or outstanding performance in special skill areas including vocational skills, athletics, drama, music, etc. Colorado Mesa University also participates in federal and state programs of grants, loans, and student employment, the awarding of which is based primarily on need as determined by a need analysis system approved by the federal government. The application used to determine need is the [Free Application for Federal Student Aid \(FAFSA\)](#) or [Colorado Application for State Financial Aid for ASSET](#) for designated students.

Financial aid awards that are based on the need analysis system consider family resources as the primary source of funding for education, with federal and state sources considered secondary and supplemental. Because prospective students always apply for more financial aid than there is money available, the following priority order is used:

- a. As stated in federal law, a parent is primarily responsible for payment of educational expenses of a dependent child. Thus, parents of students attending college are expected to make every effort to assist the student financially.
- b. The student, as the benefactor of the educational experience, is the next most responsible person for payment of educational expenses.
- c. The third level of responsibility is from outside sources such as communities, clubs, corporations, etc.
- d. The final level is federal and state financial aid programs. There has never been enough funding to assist all students with need. Therefore, students should make every effort to obtain assistance at one of the three levels listed above.

Accurate and timely information from the student and parents to the Office of Financial Aid is the responsibility of the student. Failure on the part of the student to supply accurate information on the application may result in reduction or total loss of aid.

financialaid@coloradomesa.edu

General Guidelines

Financial need for educational expenses is an essential requirement to qualify for assistance from most programs. All levels of enrollment will receive consideration.

Since financial need is the primary requirement for determining eligibility for assistance under any of the federal student aid programs, Colorado Mesa University requires that the student applicant submit the FAFSA to the federal processor as soon as possible after October 1. The application is available on the [FAFSA website](#). Once your application is submitted the

Office of Financial Aid may request additional documentation to complete your application. View details on your MAVzone.

ASSET (Colorado Advancing Students for a Stronger Economy Tomorrow) designated students may be eligible for state student aid programs. Colorado Mesa University encourages the completion of the Colorado Application for State Financial Aid (CASFA) for all ASSET designated students as soon as possible after October 1. The application is available on the [CASFA website](#). Once your application is submitted, the Office of Financial Aid may request additional documentation to complete your application. View details on your MAVzone.

Federal Direct Loans are initiated with the FAFSA application but require that a Master Promissory Note/Loan Agreement and Entrance Loan Counseling be completed for first-time borrowers at Colorado Mesa University. Electronic links for these processes are found at [Financial Aid Links](#).

Students must maintain satisfactory academic progress as noted with the terms and conditions of financial aid to remain eligible for financial aid.

Scholarships

Scholarships represent an effort by the State of Colorado and Colorado Mesa University to recognize resident and non-resident students for outstanding achievement in academic and talent areas. Although need is not always a factor in determining recipients, students who are awarded a scholarship are also encouraged to submit a financial aid application.

After students have been admitted to Colorado Mesa University, they will automatically be reviewed for academic scholarship awarding. For more detailed information on academic scholarships, please visit our [website](#) or call either the Admissions Office at 970.248.1875 or the Financial Aid Office at 970.248.1396. For detailed information regarding talent scholarships, please contact the appropriate academic department or look for the Scholarship Application on your MAVzone.

Colorado Student Aid Programs

Programs are available to full-time, half-time and less-than-half-time students with priority given to full-time students.

Colorado Grants

Grants are awarded to Colorado resident students on the basis of documented financial need. Financial aid packages which include Colorado Grants may not exceed the documented financial need of the student.

Colorado Work-Study

The Work-Study program is designed to provide employment on campus for students with documented need and who meet the residency requirement for tuition purposes.

Colorado Graduate Grant

The Graduate Grants are awarded to Colorado resident students on the basis of documented financial need and enrolled in a graduate program allowable to receive the funds. Financial aid packages which include Colorado Grants may not exceed the documented financial need of the student.

Colorado Technical Education Grant

The Technical Education Grants are awarded to Colorado resident students on the basis of documented financial need and enrolled in a certificate of technical education program. Financial aid packages which include Colorado Grants may not exceed the documented financial need of the student.

CMU Foundation

The Colorado Mesa University Foundation was established in 1961 to solicit and receive charitable gifts for the institution. Today, the Foundation has established an endowment of more than \$49 million. It has over 370 named foundation scholarships which provide more than \$3.3 million in financial aid to CMU students every year.

The CMU Foundation is a non-profit organization governed by a Board of Directors. The board is comprised of talented and successful business and community leaders who recognize the University's pivotal role in the future of our state and wish to aid deserving students at Colorado Mesa University. This group, which functions independently of the University, raises funds for scholarships. The organization is also active in raising substantial gifts to support academic programs and capital expansion. Foundation leadership works closely with the University President to help address the institution's advancement priorities. The CMU Foundation serves as a charitable non-profit organization under Internal Revenue Service 501 (c) (3) designation, and retains fiduciary responsibility for the investment of the funds entrusted to it. Visit [Supporting CMU](#) for more information.

Foundation Scholarships

In addition to institutional scholarships, many scholarships and awards have been established for students of the University through philanthropic gifts from individuals and organizations who recognize the importance of Colorado Mesa University. The amounts of the awards vary, but all are designed to apply toward tuition and fees. Visit [CMU and Donor Scholarships](#) to apply or contact the Financial Aid office for more information.

Federal Student Aid Programs

Federal Pell Grant Program

This is a federally funded grant program available to students based on financial need, eligibility, and the number of credit hours enrolled at an eligible institution of post-secondary education.

College Based Programs

Colorado Mesa University participates in many other federal need-based student-aid programs. These include the following:

- a. Federal Supplemental Educational Opportunity Grant Program
- b. Federal Work Study Program

Funding is awarded per federal guidelines and on a first-come, first-served basis.

Federal Direct Loan Program

This is a loan program consisting of the Federal subsidized and unsubsidized Direct Loan Program and the Federal Direct Parent Loan for Undergraduate Students (PLUS), and the Federal Graduate PLUS Loan.

Details concerning these programs may be obtained on the [Financial Aid](#) website.

Western Undergraduate Exchange (WUE)

The Western Undergraduate Exchange (WUE) tuition program allows students from 14 western states to attend Colorado Mesa University by paying 150% of the cost of in-state tuition instead of out-of-state tuition. Students who are residents from the states of Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming are considered for the award; however, acceptance into WUE is not guaranteed. To be considered students must submit a completed CMU application and all required official transcripts. Students with a minimum GPA of 2.5 and a permanent address in one of the WUE qualifying states will be notified of their WUE status on their acceptance letter.

All undergraduate degree programs are open to WUE students. New freshman or transfer students (24–105 credits) enrolling for the first time at CMU are eligible for WUE consideration. Currently enrolled students cannot be considered for WUE after enrollment at CMU. Returning students (those sitting out one or more semesters) will be considered on an individual basis. Students with a prior bachelor's degree are ineligible. Through acceptance of the special WUE tuition classification, students acknowledge their intent to maintain their legal domicile in their home state at the time of application. If students desire to change their legal domicile to any other state, including Colorado, they must provide written notification to the Tuition Classification Officer in the Admissions Office. At that time a student may be changed to out-of-state for tuition purposes. Please note that time accrued while participating in the WUE tuition program cannot be used to establish domiciliary intent for purposes of claiming Colorado residency. To maintain WUE program status, students must:

- a. be a U.S. citizen or permanent resident of the U.S.;
- b. be enrolled in consecutive fall and spring terms registering in a minimum of 12 credits each semester. Summer term requires six credit hours;
- c. maintain a minimum 2.5 CMU GPA each academic year; and
- d. remain a permanent resident of your home WUE state (maintaining your home state driver's license will be required).

For more information please contact the Admissions Office at 970.248.1875.

Mountains and Plains (M&P)

The Mountains and Plains (M&P) tuition program allows students from nineteen states to attend Colorado Mesa University by paying 150% of the cost of in-state tuition instead of out-of-state tuition. Students who are residents from the states of District of Columbia, Delaware, Illinois, Indiana, Iowa, Kansas, Maryland, Michigan, Minnesota, Missouri, Nebraska, Ohio, New Jersey, New York, Oklahoma, Pennsylvania, Texas, Virginia, and Wisconsin are considered for the classification; however, acceptance into M&P is not guaranteed. To be considered students must submit a completed CMU application with all required transcripts and/or test scores. Shortly after admission, students with a minimum GPA of 2.5 and a permanent address in one of the M&P qualifying states will be notified of their M&P status.

All undergraduate degree programs are open to M&P students. New freshman or transfer students (24–105 credits) enrolling for the first time at CMU are eligible for M&P consideration. Currently enrolled students cannot be considered for M&P after enrollment at CMU. Returning students (those sitting out one or more semesters) will be considered on an individual basis. Students with a prior bachelor's degree are ineligible. Through acceptance of the special M&P tuition classification, students acknowledge their intent to maintain their legal domicile in their home state at the time of application. If students desire to change their legal domicile to any other state, including Colorado, they must notify the Tuition Classification Officer in the Admissions Office. At that time a student may be changed to out-of-state for tuition purposes. Please note that time accrued while participating in the M&P tuition program cannot be used to establish domiciliary intent for purposes of claiming Colorado residency. To maintain M&P program status, students must:

- a. be a U.S. citizen or permanent resident of the U.S.;
- b. be enrolled in consecutive fall and spring terms registering in a minimum of 12 credits each semester. Summer term requires six credit hours;
- c. maintain a minimum 2.5 CMU GPA each academic year; and
- d. remain a permanent resident of your home M&P state (maintaining your home state driver's license will be required).

For more information please contact the Admissions Office at 970.248.1875.

TUITION, FEES, RESIDENCE LIFE AND STUDENT ACCOUNTS

Colorado Mesa University reserves the right to adjust any and all charges, including tuition, fees, and room and board, at any time deemed necessary by the Board of Trustees.

Contents

- [Tuition and Fees](#) (p. 43)
- [Other Fees and Expenses](#) (p. 43)
- [Tuition and Fee Schedule](#) (p. 44)
- [College Opportunity Fund](#) (p. 45)
- [Residence Life and Dining](#) (p. 45)
- [Residency Status](#) (p. 47)
- [Campus Payment Plan](#) (p. 49)
- [Residency Petition Deadlines](#) (p. 49)

Tuition and Fees

Tuition and fees for the 2023-2024 academic year are current as of the time that this catalog was published. Students should check the University's website for the [most current rates and information](#). Note that summer term pre-registration is held at the same time as pre-registration for fall term and follows a separate policy regarding refunds.

Student Liability for Tuition and Fees

As agreed upon in the [Student Financial Responsibility Agreement](#) upon registration, students (or parents or legal guardian if student is a minor) incur a financial obligation to Colorado Mesa University. Anyone who registers for one or more classes is expected to pay the full amount of tuition and fees, unless they officially withdraw by the specified deadlines listed on the [Important Dates](#) web page. Students are responsible for payment of all incurred charges on student accounts. All charges are due and payable on the first day of class.

A 1% service charge will be assessed each month on all outstanding balances. All accounts are subject to a one-time 25% late fee up to \$100.00 in addition to service charges. No student will be allowed to register for classes, graduate or receive transcripts until their account is paid in full.

Students are liable for additional late fees and/or collection fees and costs, including attorney fees and other charges necessary for the collection of any overdue financial obligation incurred by the student.

Student financial information is available on the Colorado Mesa University website. If you have any questions, contact IRIS at 970.248.1177.

Note: Students should consult the Financial Aid Office regarding the eligibility of undergraduate and graduate certificates for financial aid funding.

Refunds and Tuition Adjustments for Course Changes

Once the term starts, the student is liable for tuition and course fees on any registered course regardless of attendance. It is the student's responsibility to seek guidance on how a change to their course schedule affects Financial Aid disbursements prior to making any changes.

To qualify for a full refund of tuition and course fees, the student must complete a Semester Withdraw request by the end of the second day of the term for 8-16 week courses or by the end of the first day of the term for all courses less than eight weeks. Following the applicable 1-2 day grace period up to the course drop dates, a Semester Withdraw request reverses tuition and course fees for all dropped courses except a \$225 partial tuition assessment. After the drop deadline, withdrawing from classes does not adjust tuition and course fees.

Students who stay registered for at least one class may add and drop courses within the published deadlines and will result in adjustments to tuition and fees to reflect the student's updated course schedule. After the drop deadline, withdrawing from a class does not adjust tuition and course fees.

Students must officially add, drop, or withdraw from courses as noted in the [Registration Policies](#) (p. 57) section in this catalog and by the registration dates published on the [Important Dates](#) page.

Student Financial Counseling

If students need assistance with payment arrangements, financial planning, and financial management, please contact IRIS at 970.248.1177, Lowell Heiny Hall 1st Floor.

Other Fees and Expenses

Books and Supplies

Course materials and supplies are sold at The Maverick Store, Colorado Mesa University's Bookstore and Fan Shop, located in the University Center and online at www.themaverickstore.com. Other items sold at the store include general books, art supplies, basic school supplies, calculators, imprinted clothing, backpacks, computers, and gift items.

The Maverick Store offers course materials in a variety of formats, including new texts, used texts, rentals and digital materials or e-books. Numerous courses use Direct Digital - a technology driven approach to learning materials that automatically delivers books to a student's personal online platform. Not only are materials digitally delivered on the first day of class, they appear on a student's account without any additional efforts or hassle. Not all titles will be available in all formats, but many titles are available in multiple formats. Prices will vary depending on format. The estimated cost of course materials is \$125-\$150 per course. Supply costs vary depending upon student preference and course requirements.

The Maverick Store buys select titles during buyback events held through finals week of fall and spring semesters.

Students may charge store purchases to their student account via the MAVcharge program. This program is available for a limited time at the start of each semester, and credit limits are based on enrollment status.

General store information, details on programs, payment options and other information is listed on the store [website](#).

Application, Evaluation, and Other Charges

Non-Refundable Fees:

Fee or Charge	Amount
Undergraduate Application	\$40.00
Graduate Application	\$50.00
Matriculation Fee	\$140.00
Housing Application Fee	\$50.00

Other Charges:

Fee or Charge	Amount
Housing Pre-payment	\$150.00
Enrollment Deposit	\$50.00
Activity Fee	\$60.00

Parking Permits:

Fee or Charge	Amount
Commuter	\$140.00
Online Day Permits	\$5.00
Faculty/Staff	\$140.00
Motorcycle	\$35.00
Pay Lots	\$1/hour
Reserved	\$345.00
Residence Hall	\$170.00
Reserved Residence Hall	\$250.00
Value Lots	\$65.00

Permits are valid for a full academic year.

Course-Specific Fees

When private and special instructional services are required, additional charges will be incurred by the student. Fees vary with the nature of the instruction. Private instruction in applied music is available from instructors approved by the university. Cost of this instruction is regular per credit hour tuition plus a specified amount for one thirty-minute lesson each week. Other special instructional services and courses that may require students to pay extra fees include: labs, program-specific fees, courses with transportation fees for field trips, and kinesiology courses such as skiing and snowboarding.

Personal Technology Recommendations

Colorado Mesa University recognizes the importance of computers as educational tools in the pursuit of higher education. Students are strongly encouraged, to the extent possible, to have a personal computer for their use while attending Colorado Mesa University. Wireless connectivity is available throughout the campus in all buildings, classrooms, and common areas. Wired and wireless access to the Internet is available in all residence halls.

Students who will be purchasing a personal computer, and peripherals, should consider the following recommendations:

Hardware: computers with higher processing power and greater quantities of RAM will improve performance and extend the usable life of

the system. Students majoring in computer intensive academic programs of study, such as Mass Communication, Graphic Design, Engineering, and others, are encouraged to consult with their department before purchasing a computer. These types of academic programs may require computers with higher end specifications to support the software used.

Desktop versus laptop/tablet: portability and wireless connectivity have made laptops the preferred choice by most students. Thoughtful consideration of your study habits in and outside of the classroom will help you choose the right type.

Printers: for black and white printing, laser printers are more cost effective compared to ink-jet printers in terms of the per page cost to print. Generally, ink jet printers are an acceptable choice for low volume color printing. Printers that connect via USB are the best option, as WiFi-only printers are not always compatible with the University's network. Students should also be aware of MAVPrint, CMU's campus printing system. This system provides printing in residence hall labs, computer labs, and the Library using campus computers. Personal printers should only be considered as a convenience.

Software: students may be required to purchase specific software for specific courses. In some cases, students will purchase software along with the textbook used for a given class at a nominal cost. Students should not purchase software until advised by instructors. CMU provides students free access to Microsoft 365 applications. Be sure to visit our **Getting Started: Students: Technology to Bring** page for more specific information.

Consumer Technology Devices: also, please visit our **Getting Started: Students: Technology to Bring** page for more specific information regarding the use of consumer technology devices such as smartphones, gaming consoles, media streaming devices, televisions, and other devices that frequently require WiFi access.

Matriculation Fee for New Undergraduate, Transfer, and Graduate Students

A \$140 matriculation fee will be assessed the first semester the student is enrolled at the undergraduate level and at the graduate level unless the student is accepted as non-degree seeking at Colorado Mesa University. This is in addition to the published tuition and fees for the courses. The matriculation fee covers add/drop, career placement, credential (resume) services, graduation (petition) and transcripts.

Tuition and Fee Schedule

The tuition rates and student fees shown below are for the catalog year; all rates are subject to change by the University's Board of Trustees. Rates can be found online at the [Office of Student Accounts website](#).

A one-time matriculation fee of \$140.00 will be assessed. This fee takes the place of add/drop fees, transcript fees, graduation fees, etc.

Examples:

1. Undergraduate who is full-time, in-state, COF-eligible. (Note: 12 credit hours per semester is full-time for financial aid purposes. COF availability and amounts are subject to change by actions of the Colorado General Assembly)

Per Semester

Description	Cost
Total tuition for 12 credit hours	\$5,074.20
Less COF (state's share of tuition)	-\$1,392.00
Equals student's share of tuition	\$3,682.20
Plus general purpose student fees	+\$474.00
Equals total due from student	\$4,156.20

2. Undergraduate WCCC Career & Technical Education (CTE) who is full-time, in-state, COF eligible.

(Note: Not all WCCC Programs qualify for the CTE rate).

Per Semester

Description	Cost
Total tuition for 12 credit hours	\$3,388.80
Less COF (state's share of tuition)	-\$1,392.00
Equals student's share of tuition	\$1,996.80
Plus general purpose student fees	+\$474.00
Equals total due from student	\$2,470.80

3. Undergraduate who is full-time, out-of-state, non-COF-eligible.

(Note: 12 credit hours is full-time for financial aid purposes)

Per Semester

Description	Cost
Total tuition for 12 credit hours	\$9,939.60
Plus general purpose student fees	+\$474.00
Equals total due from student	\$10,413.60

4. Undergraduate who is part-time, in-state, COF-eligible

Per Credit Hour

Description	Cost
Tuition per credit hour	\$422.85
Less COF per credit hour (state's share of tuition)	-\$116.00
Equals student's share of tuition	\$306.85
Plus general purpose student fees	\$39.50
Equals total due from student per credit hour	\$346.35

5. Undergraduate WCCC Career & Technical Education (CTE) who is part-time, in-state, COF eligible.

(Note: Not all WCCC Programs qualify for the CTE rate).

Per Credit Hour

Description	Cost
Tuition per credit hour	\$282.40
Less COF per credit hour (state's share of tuition)	-\$116.00
Equals student's share of tuition	\$166.40
Plus general purpose student fees	\$39.50
Equals total due from student per credit hour	\$205.90

6. Undergraduate who is part-time, out-of-state, non-COF-eligible

Per Credit Hour

Description	Cost
Tuition per credit hour	\$828.30
Plus general purpose student fees	+\$39.50
Equals total due from student per credit hour	\$867.80

7. Graduate tuition varies by discipline. Visit [Office of Student Accounts](#) for current tuition and fee rates.

College Opportunity Fund

The State of Colorado allocates money for Colorado in-state undergraduates to help offset the total tuition of their college education. The state's share of in-state tuition—paid from the College Opportunity Fund (COF)—is available for students once the student signs up for a COF voucher account and authorizes their Colorado Mesa University registration. The funds for the COF voucher will be sent directly to the institution. Students are then responsible only for their remaining share of total tuition.

Most in-state undergraduates qualify for participation in the program. Qualifications and the amount of the voucher are subject to actions by the Colorado General Assembly. Additional details are available on the Colorado Mesa University's [College Opportunity Fund website](#).

To create a COF voucher account, a student must register at cof.college-assist.org and provide a limited amount of information. Note that the process of creating a voucher account is separate from applying for admission to Colorado Mesa University and can be completed at any time prior to enrolling. Qualifying students who do not establish an account into which the voucher can be deposited are responsible for both the state's and the student's share of tuition.

Residence Life and Dining

On-campus living offers many advantages and choices. The location makes class attendance and activity participation very convenient for Colorado Mesa students. In addition, living on campus relieves the students of many time-consuming responsibilities that enable them to devote more energy to their studies, recreational activities, and making new friends. The many living options we offer help create different opportunities and experiences for you, the student. First and second year students are required to live on campus, with few exceptions - see *Residence Requirements* for details.

Each residence hall is staffed with an Area Coordinator or Residence Hall Coordinator, as well as Resident Assistants who are trained to help students. Staff members support the educational mission of the University by helping residents adjust to college life, offering social and educational activities, explaining policies, answering questions, and acting as resources.

Residence Hall Choices

There are several choices of on-campus housing available:

- Five traditional residence halls which require a meal plan (most rooms are designed for double occupancy, although there are a limited number of single rooms).
- Two semi-suite style residence halls with 4 students per suite that share one bathroom. These halls require a meal plan.

- c. Two suite style residence halls that house 4-9 students, in a mixture of single, super single and double bedrooms—along with sharing two bathrooms and a living area. These halls require a meal plan.
- d. Three apartment complexes, available for sophomores, juniors, and seniors. This gives you the true apartment feel, while being on campus and close to everything at Colorado Mesa University.
- e. Two modified apartment complexes of all single rooms in pods of four. Each pod has a mini kitchen and each floor has 1-2 common kitchens. Both halls are available for sophomores, juniors, and seniors. This residence hall requires a modified meal plan (7 meals a week), which is included in the price of the room.

Residence Hall and Dining Contract

Students applying for accommodations on campus are required to submit a \$150 prepayment and \$50 application processing fee with their signed contract and completed application. On-campus housing is not guaranteed, as availability is limited to approximately 2,659 students. Fall housing applicants will be placed using our auto-assign process until opening day. Students may use [My College Roomie](#) to help find a roommate of their choice.

The Residence Hall and Dining Contract is a legal agreement between the student and Colorado Mesa University regarding housing and meal plans on campus. The contract is in effect for the entire time with Residence Life (generally, a two year span). These services, however, are billed and payable by semester. The schedule for room and meal plan refunds is outlined in the contract.

Residence Requirement

Colorado Mesa University is committed to the success of our students. Knowing that students who live on campus and engage in activities have a greater success rate for graduation and maintain higher GPA's, CMU requires students who have earned less than 60 credit hours and are under the legal drinking age to live on campus, subject to room availability and unless approved for an exemption.

Students who have more than 60 credit hours and of the legal drinking age may - but are not required to - submit a Housing Application to live on campus.

Exemptions will be granted for the following reasons.

- a. Resides with parent(s) at their permanent address within Mesa County
- b. Will be the legal drinking age or older before first day of semester in which the exemption is requested; see § 18-13-122(3)(a), C.R.S
- c. Earned 60 or more credit hours
- d. Lived in CMU housing for four semesters
- e. Married or have a dependent child
- f. Attending only Montrose campus or taking only online classes
- g. Extreme Financial Hardship
 - For an exemption to be granted based on Extreme Financial Hardship, a student is required to complete a Free Application for Federal Student Aid (FAFSA) for the year in which they are requesting an exemption. Residence Life in conjunction with Financial Aid will use unmet need and Expected Family Contribution to determine if you qualify for this exemption.

You may NOT request an exemption based solely on the fact that you have found a less expensive off campus option or because you have signed a lease.

Questions concerning housing on campus should be directed to Residence Life at 970.248.1536 or email reslife@coloradomesa.edu.

Off-Campus Housing

The university and Residence Life do not manage off-campus housing placements but attempts to assist students in locating housing. Two great resources for CMU students are [Off Campus Partners](#) and [Almost Home](#). "Almost Home" is a Grand Junction community service for listing rental properties and roommate exchange. The listings are posted on the [Catholic Outreach](#) website. Properties are not religiously affiliated.

Campus Dining

Campus Dining Services offers food service to students at Colorado Mesa University which includes a choice of two meal plans (prices are per semester):

Plan	Service
A	Unlimited meals in the Dining Hall with \$150 in MAVmoney that can be used at several restaurants around campus
B	Unlimited meals in the Dining Hall with \$150 in MAVmoney that can be used at several restaurants around campus

Multiple entrees are served with unlimited seconds. Weekday breakfast starts at 6:45am for those in enrolled in meal plan A, and 10:30am for meal plan B. Only two meal periods are available on Saturday and Sunday (brunch and dinner). Both meal plans have full access to brunch and dinner 10:30am to 1:30pm and 5:00pm to 8:00pm. Aspen Apartments meals are accessible any time during operating hours. Menus are planned with special needs in mind with our Simple Servings, Vegan, and Healthy Choices sections. The General Manager and Executive Chef encourage students with special dietary needs or requests to meet with them to help plan healthy alternatives. This is at no additional costs to the student.

Students living in traditional residence hall rooms, semi-suites or suites are required to select a meal plan. Students living in on-campus apartments or living off-campus may purchase meal plans and/ or MAVmoney. Meals are served seven days per week during the academic year with limited meals during short breaks. Commuter students are welcome to purchase any of the resident student meal plans, or try one of our commuter plans. Call or visit the MAVcard Office (970.248.1059) for more information on dining services.

Room and Board Charges

All rates listed below are for the Fall 2023 semester, per student. A \$30 per semester charge will be added to all residents' accounts for a non-refundable activity fee.

Room and Apartment Rates

Meal plan required for all rooms and apartments unless otherwise noted.

Bunting Hall (semi-suite):

Room or Apartment Type	Rate
Lofted Double	\$3,360.00
Double room	\$3,775.00

Residency Status**Determination of Residency Status for Tuition Purposes**

Tuition classification is governed by state law (Colorado Revised Statutes, Sections 23-7-101 to 104 and 23-7-105) and by judicial decisions that apply to all public institutions of higher education in Colorado. Colorado Mesa University does not have the discretion to make exceptions to state law. Although an individual may be considered a state resident for voting and other legal purposes after being in the state for a short period of time, the tuition law specifies additional requirements for classification as "in-state" for tuition purposes.

Initial tuition classification is determined from information a student supplies on an application for admission to Colorado Mesa University. Failure to completely answer questions may lead to an initial classification of out-of-state for tuition purposes. A student's residency status will be stated within their admissions letter. Students who identify

that their classification is incorrect should contact the Admissions Office immediately.

Students who are entering a Colorado university after completing high school are granted in-state status if they:

- Are a United States citizen
- Graduated from a CO public or private high school (list school)
- Attended a CO high school for at least one year immediately preceding high school graduation (must list specific years of attendance)

Students who have earned a GED or high school equivalency exam in Colorado are granted in-state status if they:

- Are a United States citizen
- Successfully completed a GED test (list test date)
- Resided in CO for the 12 months preceding the proposed first semester of enrollment at a CO college (list specific years of residence)

New students seeking in-state status who are unable to answer either of the above series of questions will need to answer all questions on the residency section of the admissions application. If a student is under the age of 23 and not otherwise emancipated via marriage, having a dependent or having been in military service, then CO statute requires parental information to determine the student's residency status. A student under the age of 23 may be granted in-state tuition based on their parental information as long as the parent meets Colorado in-state statute requirements and the student is not otherwise emancipated as previously mentioned. All questions in the residency section of the admissions application should be answered with parent information in this case.

If a student under the age of 23 is emancipated via marriage, having a dependent or having been in military service, they need only provide their own information (not parent information). If a student is over the age of 23, questions need only be answered with student information (not parent information). Colorado statute requires physical presence (domicile) and intent to be a permanent resident of Colorado a full 12 months prior to the first day of the semester in which the student wishes to be considered in-state.

Students Under 23 with No Colorado Resident Parent

Students under the age of 23 seeking in-state tuition, that do not have a parent who resides in CO and are not otherwise emancipated as outlined above, must submit a Residency Petition to request in-state status on their own accord. These students must prove that their sources of income are sufficient to meet their financial needs without any parental assistance for a full 12 month period prior to the term they are seeking in-state status. In addition, they must prove 12 month's domicile (bodily living) in CO and that all prior state ties are severed and created in CO for that 12 month period. A Residency Petition will require documents be attached as proof and must be notarized.

Changing from Out-of-State to In-State Status

Students who begin classes at CMU with out-of-state tuition may petition for in-state status when they believe they have met all state of CO requirements for such. A Residency Petition may be submitted if:

- a. The student is under the age of 23 and their parent is now a CO resident;
- b. The student is under 23 and seeking in-state status on their own accord; or
- c. The student is over the age of 23 and believe they have now met CO requirements for in-state status.

A change in status is NOT automatic after attending CMU as an out-of-state student for one year; a student's way to request in-state status is by submitting a completed, notarized Residency Petition with all requested documents attached. Domicile (bodily living) in CO a full 12 months and intent to be a permanent resident of CO are required. Intent requires severing prior state ties and creating them in CO. Such items include, but are not limited to: driver's license, vehicle registration, voter registration and payment of CO state income tax.

The Residency Petition may be found on our [Admissions Forms](#) web page. Completed, notarized petitions with all requested documents attached are to be submitted directly to the Tuition Classification Officer located in the Admissions Office. Please see the [residency petition deadlines](#) (p. 49).

Residency Appeals

Students who do not agree with the decision of their residency petition may appeal the decision in writing within 15 days from the date their denial decision was e-mailed to them. The appeal and any additional documentation should be sent directly to the Tuition Classification Officer located in the Admissions Office. The decision of the Residency Appeals Committee is the final university determination. For further residency related questions, please contact the Tuition Classification Officer at 970.248.1875.

Military Exemptions and Tuition

Certain exemptions for in-state tuition status are available for military personnel if:

- Military personnel is active duty and stationed in CO – copy of orders needed to consider student, spouse, or children in-state without further documentation.
- Honorably discharged veterans, not using military education benefits, that have resided in Colorado less than 12 months are eligible for in-state tuition with a copy of their DD-214 showing honorable discharge and proof of Colorado being a true and fixed permanent state of residence before the first day of the term.
- Veteran is using VA Education benefits – a copy of Certificate of Eligibility must be provided to the CMU Veteran Services office.

Service members who do not receive an honorable discharge are not eligible for in-state status under the state statutes or for federal veteran education benefits. These students, may, however, meet Colorado in-state residency requirements outlined in C.R.S. 23-7-103.

Contact the Tuition Classification Officer in the Admissions Office for further details.

Dependents of Military Personnel

Certain exemptions for in-state tuition status are also available for dependents of military personnel if:

- Military personnel is an active duty member of armed forces in CO and is
 - stationed in CO or
 - was transferred out of Colorado;
- Military personnel is active duty in the state during the student's last year of high school and student intends to enroll in CMU within 12 months of graduating from high school;
- A veteran child dependent or spouse applying as a student must:
 - Have a military parent/spouse who was stationed in Colorado within the last 12 years on PCS orders
 - If a child dependent, be biological or legally adopted
 - If a spouse, have been married to the military member at the time the member was stationed in Colorado and at the time the spouse is requesting resident tuition classification
 - Veteran dependents who do not qualify for the exception above may qualify for in-state tuition if the dependent qualifies under the requirements of the Johnny Isakson and David P. Roe, M.D. Veterans Care and Benefits Improvement Act of 2020 Sec 1005. To qualify through Isakson and Roe, the student must be using transferred post-9/11 GI Bill benefits
- The honorably discharged service member does not reside in Colorado, but was assigned on permanent or temporary duty in Colorado within the past 12 years;
- Dependent is using VA Education benefits – a copy of Certificate of Eligibility must be provided to the CMU Veteran Services Office.

Citizenship and Tuition Classification

Unless otherwise noted in this section, only US citizens, permanent residents, and a select few Visa holders are eligible to be considered for in-state tuition status. Additionally, students without lawful immigration status may be eligible for in-state status if they meet all criteria through ASSET as outlined in the following paragraph.

Students without Lawful Immigration Status and Colorado ASSET Bill

SB 13-033, otherwise known as the ASSET bill, was signed into law in April of 2013. This bill allows certain students without lawful immigration status to be considered in-state for tuition purposes when all the following criteria are met:

- a. Attended a CO high school for a minimum of one year;
- b. Graduated from a CO high school;
- c. Have completed the College Opportunity Fund (COF) application process including attached Affidavit;
- d. Reside in Colorado for at least 12 consecutive months prior to enrolling at the institution.

Students having earned a GED may be considered as long as the GED or high school equivalency test is completed in Colorado and they have completed the COF application and affidavit. Students who were not admitted to the university within 12 months of their high school graduation or GED test date must prove 12 months physical domicile

in CO in addition to the above requirements. Please contact the Tuition Classification Officer in the Admissions Office for further details.

Tribal Registration

Under the [Colorado American Indian Tribes In-State Tuition Act](#) (effective Fall 2021), a student who would not otherwise qualify for in-state tuition and who is a registered member of one of the [federally recognized American Indian tribes with historical ties to Colorado](#), as designated by the Colorado Commission of Indian Affairs in partnership with History Colorado, is eligible to be classified as an in-state student for tuition purposes.

Special Immigrants & Refugees

According to Senate Bill 18-087 (effective Fall 2018), a foreign national admitted to the United States as a refugee or special immigrant who settles in Colorado upon entering the United States is eligible for classification as an in-state student immediately upon settlement in Colorado. The primary purpose for settlement in Colorado must not be solely for educational purposes.

Required documentation may include:

- A copy of your Form I-589 or other proof of application
- If you're under the age of 23: A copy of your Colorado parent's immigration status to the United States
- If you've recently applied for U.S. permanent residency: A copy of your I-485 receipt notice

Peace Corps

Senate Bill 23-096 (effective Fall 2023) requires a Peace Corps volunteer to be classified as an in-state student for tuition purposes if the student was certified by the director of the Peace Corps as having served satisfactorily as a Peace Corps volunteer.

Campus Payment Plan

Colorado Mesa University provides a payment program designed to meet the specific needs of students and parents. Semester charges for tuition, fees, institutional room and board, and other institutional charges can be paid in monthly, semi-monthly, or weekly installments, beginning in August (for fall), January (for spring) and May (for summer). Contact IRIS for more information or visit [ePay](#).

Residency Petition Deadlines

Semester	Qualifying Cut-Off Date	Submit Petitions No Earlier Than...	Submit Petitions No Later Than...
Fall 2023	First day of class	June 20, 2023	August 8, 2023
Spring 2024	First day of class	November 7, 2023	January 9, 2024
Summer 2024	First day of class	March 7, 2024	May 2, 2024
Fall 2024	First day of class	June 20, 2024	August 8, 2024

Admissions Office

1100 North Avenue
 800.982.6372 or 970.248.1875

The Admissions Office serves as the welcome center for prospective students and their families. Among the staff's responsibilities are the recruitment of students and the processing of admissions applications, new student academic scholarships, and petitions for changes to residency classification for tuition purposes. Activities of the University's student ambassadors are also coordinated through this office as well as daily tours.

Campus Recreation Services

Hamilton Recreation Center
 970.248.1592

Campus Recreation Services is established to provide varied programs and services that will contribute to the health and well-being of the students of Colorado Mesa University. Hamilton Recreation Center encourages responsible use of leisure time by providing an atmosphere that fosters the development of lifelong patterns of recreational activities and opportunities for participation in such activities regardless of age, sex, race, or motor ability. To do so, facilities and resources are designed to provide appropriate environments for participants through the following:

- Providing access to recreation facilities, equipment, and activities for convenient, informal participation (Open Recreation Program). These facilities include a multi-sport gymnasium, outdoor basketball and sand volleyball courts, cardio machines, free weights, cross-functional Rogue Infinity training rig, TRX suspension training, reinforced medicine ball wall, racquetball courts, 38-foot climbing wall, and premier swimming pool.
- Offering structured and non-structured opportunities for improving and maintaining physical fitness (Wellness Program). These opportunities include group exercise classes like yoga, spin, and Zumba, wellness assessments, personal training including exercise program prescription, massage therapy, and nutrition counseling.
- Offering students significant opportunities for career development, including the acquisition of leadership, management, and technical skills in all areas of Campus Recreation Services (Student Employment Program).

Our new 24hr fitness venue, Lucero Fitness Facility, was added in 2019. All current, registered students will have MavCard access to this space. It is located in the lower level of Lucero Hall. At approximately 1,200

square feet, it includes cardio equipment, strength equipment and core/stretching equipment.

CMU also offers structured competitive and social opportunities in a variety of individual and team sports (Intramural and Club Sports). Intramural sports are free for all students at CMU. Providing an opportunity to compete against classmates, dorm mates, and other campus members in soccer, flag football, basketball, volleyball, ultimate Frisbee, softball, dodgeball, and battleship leagues and one day tournaments. Head to the [Intramural Sports](#) website or contact the Intramural Sports office at 970.248.1591 for details on how to sign up for the next league!

The CMU Club sports department oversees 24 collegiate sport teams that participate in governing bodies outside the NCAA. These teams range from Varsity caliber sports to competitive club sports teams. However, they are all required to participate in collegiate leagues that award a National Championship at the end of the season.

Sport team: Alpine & Nordic Ski, Archery, Baseball, Bowling, Cycling, Disc Golf, E- Sports, Fencing, Ice Hockey, Rodeo, Men's Rugby, Men's Soccer, Men's Volleyball, Softball, Swim/Dive, Table Tennis, tennis, Shot gun, Ultimate Frisbee, Women's Rugby, Women's Soccer, Women's Volleyball, and Water Polo. For more information, please visit the [CMU Athletics website](#) or contact the Club Sports office at 970.248.1115.

Career Services

University Center, Room 107
 970.248.1404
career@coloradomesa.edu

Career Services provides resources and guidance for students and alumni in their journey toward reaching their career goals. We take an active role in providing career exploration, workshops, events, and on-campus employer visits to encourage students to investigate and gain information while creating their career path. We also help employers make campus connections to build relationships toward meeting their recruitment needs and hiring goals. Some services include:

- Events:
 - Fairs – Career & Job, Graduate School, Teacher and Major Specific
 - On-Campus and Virtual Employer Recruiting
 - Etiquette Dinner
- Office Resources:
 - [Handshake](#) (student and alumni job and internship online posting platform found in MAVzone apps)
 - Optimal Resume (resume builder found in MAVzone apps)
- Student Appointment Types:
 - Resume
 - Cover Letter
 - Job and Internship Search Assistance
 - Mock Interviews
 - LinkedIn Profile Review
 - Personal Statements – Graduate School
 - Major and Minor Guidance
 - Strong Interest Inventory Interpretations

For more information and updates go to our [website](#) and follow us on [Facebook](#), [Instagram](#), and [LinkedIn](#)!

¹ Some restrictions may apply.

Educational Access Services

Houston Hall, Room 108
970.248.1856

www.coloradomesa.edu/educational-access/

Support services for students with disabilities are available through Educational Access Services (EAS), a division of Academic Services. Reasonable accommodations are determined based upon an interactive interview with the student and the impact the disability has on the student. Services can include, but are not limited to, ASL interpreting, note taking accommodations, testing accommodations, textbooks in alternate formats, closed captioning and assistive technology resources/training. Students needing accommodations, must initiate a request for accommodations by completing the online [New Student Application](#). Prospective students are encouraged to contact the EAS to discuss accommodations as soon as possible since accommodations are not retroactive.

Emergency Contact Services

Lowell Heiny Hall, Room 441
970.248.1366

The Office of the Vice President for Student Services, located in LHH 441, is the referral point for emergencies encountered by students. Issues such as messaging for emergencies while a student is in class are determined on a case-by-case basis. It is important to note that the office cannot guarantee a contact with any student due to their highly mobile behavior, but a good faith effort will be made. This service is not for non-emergency situations.

Financial Aid Office

Lowell Heiny Hall, First Floor
970.248.1396

[Financial Aid Office Website](#)

The Financial Aid Office works with students to meet educational expenses through various monetary resources. Depending on a student's qualifications, aid is available in the form of scholarships and grants that do not need to be repaid. Additionally, students can apply for loans that are need- or non-need-based, as well as, work-study employment.

Intercollegiate Athletics

Maverick Center
970.248.1503

Intercollegiate athletics provides students with equitable opportunities to enhance their education, represent the University, and participate in athletics while developing skills and understanding. All undergraduate students are encouraged to participate in intercollegiate athletics as determined by their interests and capabilities.

Participation in the program, however, is secondary to the academic expectations of students. To this end, it is the responsibility of those administering the program to schedule the length of playing seasons, the frequency of practice sessions, and the number of contests so that they

shall not unreasonably conflict with students obligations to attend class regularly, to study, to develop their intellectual, moral, and social faculties, and to graduate from the university as educated men and women. The men's program at Colorado Mesa University includes baseball, basketball, football, golf, soccer, swimming, tennis, lacrosse, cross country, track and field, triathlon and wrestling. Basketball, cross country, golf, beach volleyball, soccer, softball, swimming, tennis, lacrosse, track and field, triathlon, volleyball, and wrestling are available to women.

Colorado Mesa University also offers competitive cheerleading.

International Student Admissions and Programs Office

Rotary Hall • 970.248.1802

The International Student Admissions and Programs Office oversees international student admissions and recruitment, international student services and advising, international initiatives and development, international student programming, and study abroad.

IRIS

Lowell Heiny Hall, First Floor
970.248.1177

[IRIS Website](#)

iris@coloradomesa.edu

CMU provides students holistic advising through the Integrated Resources for Information and Solutions (IRIS) center, where we assist students with anything from academic advising to financial counseling. Our mission is to advise and empower students to achieve their professional, educational, and financial goals by providing accurate, individualized support in their journey from admission to graduation.

Services provided at the IRIS center include:

- First year advisor for all new incoming freshman, including students admitted to the Compass program, GOALS program, and students returning from academic suspension
- Provide general academic advising by assisting in course selection and registration
- Guide students in major exploration and assist with strategies for academic success
- Educate about administrative campus policies and procedures
- Explain and complete the financial aid process
- Help with understanding the student account and billing statement
- Assist with making payments and setting up payment plans
- Support through financial counseling
- Connect students with campus resources and departments

The IRIS team is here to assist students with advising, registration, billing, and financial aid – so when you have a question, just remember ... askIRIS!

John U. Tomlinson Library

970.248.1244

Tomlinson Library is a welcoming, comfortable environment, providing assistance from professional librarians, reservable study rooms, 24-hour

study space, computers, printers, scanners, IT support, convenient dining options, outdoor seating with a fire pit, and much more.

The library collection includes over a million books, e-books, and audio-visual materials. Also available are over 200 databases which include access to full-text academic journals and other online resources. Additional materials are available for borrowing from many academic, research, and public libraries throughout Colorado and beyond. Materials can be delivered to the Montrose campus and Western Colorado Community College.

Librarians provide personalized research assistance to patrons. Faculty can request information literacy instruction from librarians to help students identify, evaluate, and ethically use information sources within and beyond the Library. Individualized research assistance is available at our Research Help Desk, by online chat, telephone, or email. Library staff are happy to answer any questions about the library's resources or services.

Little Mavericks and Mini Mavericks Learning Centers

Little Mavs
1704 N 8th Street
970.248.1318

Mini Mavs
880 Mesa Avenue
970.248.1998

Childcare is available year-round for children of Colorado Mesa University students, faculty, and staff, plus community, in that priority order, on a first-come-first-serve basis. Mini Mavs serves infants six weeks old up to three years of age. Little Mavs serves children ages two through six years. For further information, visit our [website](#) or email us at cmulittlemavs@coloradomesa.edu.

MAVcard Student ID

University Center
970.248.1059

The Colorado Mesa University MAVcard is your key to campus services at Colorado Mesa University. The MAVcard can be used at a variety of locations around campus which includes few places like Starbucks, Chick Fil A, The Caf, Hamilton Recreation Center, Residence Halls, CMU Athletic games, and Student Life events. It can also be used at off-campus merchants' location such as Mountain Grind Coffee Company, Bravo Pizza, Domino's Pizza, Sugar & Co., Jimmy John's (on 12th Street) and The Scramble at WCCC. The MAVcard can be enhanced by linking it to a U.S. Bank checking account, allowing your MAVcard to become your debit card. You also benefit from linking by receiving free ATM usage and direct deposits.

National Student Exchange Program (NSE)

Registrar's Office • 970.248.1813

Colorado Mesa University is a member of the National Student Exchange Program. NSE is a consortium of over 160 colleges and universities in the United States, its territories, and Canada. Colorado Mesa University students may be able to participate in this program at in-state tuition rates for up to one academic year and receive full credit for course

work completed while on exchange. For further information, contact the Registrar's Office or visit [CMU's National Student Exchange](#) website.

Student Accounts

Lowell Heiny Hall IRIS Desk • 970.248.1177

Student Accounts is responsible for student billing, collection of tuition, fees and other charges, as well as, refunding excess Financial Aid to Students. We administer various payment options and schedules (such as the campus tuition payment plan) to ensure bills are paid on time without penalty. For detailed information concerning the various costs and fees a student may incur and payment options please visit the [Student Accounts](#) website.

Student Services

Anchored by a fundamental commitment to student learning, character development, and student success, the Colorado Mesa University Student Services division strives to actively engage students of all backgrounds with intentional and purposeful on- and off-campus services and activities.

The departments within Student Services include IRIS, Student Life, the University Center, Residence Life, Admissions, International Programs, Financial Aid, Diversity and Inclusion, Campus Safety, Campus Recreation, as well as Student Health and Counseling Services. Within these departments, dedicated staff will engage, serve, and mentor students to help them succeed both inside and outside of the classroom. Additionally, staff within Student Services is dedicated to providing quality customer service to students, faculty, staff, alumni, and guests. For additional information please visit the [Student Services](#) website.

Student Success & Engagement

Lowell Heiny Hall, 1st Floor • 970.248.1340

Student Success & Engagement (SSE) encompasses different academic support services including Compass (previously PB), GOALS, mentoring, scholarship support services, first generation student support and TRIO SSS (Regular and STEM) among other support services.

SSE takes a personalized approach that is tailored to the individual student through one-on-one interactions with an SSE advisor for support. SSE has both professional Advisors and Peer Academic Coaches who will assist students with all aspects of their academic experience including gaining their academic footing, academic advising, mentoring and identify majors and careers they are interested in pursuing while providing a friendly face on campus that they can go ask any question that they may be having.

Students within the GOALS program are admitted into an Associate's degree upon acceptance to CMU. The GOALS program provides students with support to build skills needed to succeed both in and out of the classroom. The GOALS program supports students to pursue a pathway toward a major and degree best suited for them.

The students within the PB program fall between the Associate and Baccalaureate admission requirements for acceptance to CMU. The PB program gives students the opportunity to pursue a bachelor's degree while receiving additional advising and academic support. The primary role of the OSS is to assist the PB students in developing the skills they need to successfully transition to their desired Baccalaureate program.

Parking Services

Student Wellness Center 212 & 213
970.248.1921

A parking permit is required to park on campus year-round. Students and University faculty/staff members who wish to park on campus may purchase parking permits for designated areas. Your license plate is your permit (after it is registered, and the permit fee is paid). Multiple vehicles can be registered, but only one vehicle may be parked on campus. A parking permit does not guarantee a parking space but allows on-campus parking when such space is available. **Pay to Park, Reserved Lots, loading zones, handicapped spaces, and fire lanes are enforced all year, even during college breaks, move in and move out.** Visit the [Parking Services](#) website for more information.

Registrar's Office

Lowell Heiny Hall, Fourth Floor
970.248.1555

The Registrar's Office provides a variety of enrollment and academic records services. Enrollment services include readmission to Colorado Mesa University, course setup, course registration, enrollment appeals, evaluation of transfer credits and Veteran's benefits certification. Academic records services include issuing official transcripts, verification of enrollment, student demographic updates such as change of address, and answering questions about release of information that is protected by federal law. Additional services include certifying degree requirements for graduation, issuing degrees, publishing the academic calendar, and academic room scheduling. For more detailed information on any of the services, please visit the [Registrar's Office](#) website.

Student Diversity, Advocacy and Health

Student Wellness Center • 970.248.1754

The Student Diversity, Advocacy and Health office works alongside the office of Student Services to support a diverse student body of Colorado Mesa University. This office specializes in problem solving and helping students to become better informed and grow as adults; whether these decisions involve classes or any other aspect of university life. Student Diversity, Advocacy and Health department provides students with real life inclusion experiences by interacting and learning together to respect a broad range of people from diverse backgrounds. This office offers an arena for students to have a greater appreciation and understanding of inclusion and diversity so they are prepared to take on leadership roles in society. This office supports student wellness on campus, provides access to medical and behavioral health service providers, and links students to supportive resources on campus.

Student Life

University Center, Room 212
970.248.1111

There are a number of student fee-funded organizations that are administered by Colorado Mesa University students including the following:

- **Associated Student Government (ASG):** ASG is the representative body and official voice of the students. The ASG operates through the General Assembly, a legislative body composed of students elected by the student body. Students involved in ASG have an opportunity to gain leadership skills by representing student opinions to the CMU

administration and the University's Board of Trustees, and they are responsible for reviewing and administering student fee requests. Visit the [Associated Student Government](#) page for more details.

- **Campus Design Studio (CDS):** The Campus Design Studio is a student-run organization that provides high quality graphic design work for student clubs and organizations, on campus departments, and off-campus clients. The Campus Design Studio is responsible for most on-campus student publicity, including the Stall Street Journal.
- **Club Advisory Board (CAB):** Many student clubs and organizations exist at Colorado Mesa University. Currently CMU has over 125 active clubs on campus including honor societies, academic clubs, general interest clubs, fraternities and sororities, faith-based clubs and volunteer and activist clubs, which allow students to meet other students who share similar interests. A list of current active clubs and organizations can be viewed on [Presence](#) (CMU's student engagement software).
- **CMU-TV:** A student operated and managed television station, which broadcasts from the CMU campus on cablevision. CMU-TV normally provides news and sports twice per week. Although most staff members and managers are Mass Communication majors, students in all academic disciplines are encouraged to join CMU-TV to gain professional experience in television. The studio is located on the first floor of Escalante Hall in room 112.
- **The Criterion:** A bi-weekly student-published newspaper, covers campus news and represents student views on local, regional, and national issues. The Crite has been the voice of the students since 1931 – making it one of the oldest and longest running organizations at CMU. [Visit their website to see articles and learn how to contribute.](#)
- **Cultural Inclusion Council (CIC):** This board offers leadership experiences for students and organizes programs to educate students regarding multiculturalism. Member groups include the Black Student Alliance (BSA), Genders & Sexualities Alliance (GSA), Ho'olokahi Polynesian Alliance (HPA), International Student Alliance (ISA), Latino Student Alliance (LSA) and Native American Student Association (NASA). [Visit the Cultural Inclusion Council page](#) for more details.
- **Greek Executive Council (GEC):** This council is made up of leaders of the sororities (Alpha Sigma Alpha, Gamma Phi Beta) and fraternities (Kappa Sigma, Theta Xi). This group works to provide opportunities while at CMU, including lifelong friendships, academic excellence, philanthropy, and a commitment to inclusion and diversity.
- **Horizon Magazine:** Horizon Magazine is a full-color student magazine produced at least once each semester by CMU students. Horizon is a general interest magazine that contains feature articles and photography of the people, places and events that make up the community. Two thousand copies are distributed around campus and many other locations in Grand Junction. The magazine has expanded its reach by creating a full website, containing the content from each issue.
- **Intramural Sports:** now offering more than 30 different sports IM sports are a fun way to meet people and stay active. Leagues are always forming and run from one day tournaments to 8-week competition. Sports range from flag football, softball, racket-ball, battleships and many more. Visit the [Colorado Mesa University Intramural Sports](#) page for more details.
- **KMSA 91.3FM:** Established in 1975, KMSA is CMU's student-fun radio station. Student DJ's host their own shows in a variety of genres –

music for the Mavs. [You can listen locally on 91.3FM or stream on the website.](#)

- **Literary Review:** The Literary Review publishes short stories, short fiction, poetry, and art created by CMU students and is printed yearly in the spring. While it typically accepts only works created by Colorado Mesa University's full-time students, who pay student fees, the publication nevertheless encourages students taking at least one three-hour course at CMU to submit creative pieces, whether that course is offered on campus or on-line.
- **MAVRides:** Provides free and safe rides to all CMU students every Thursday, Friday and Saturday nights from 9pm-3am during the fall and spring semesters. Call for a ride or volunteer as a driver 970-248-2222, or visit the [MAVRides page](#) for more details.
- **Media Organizations:** These organizations include the student newspaper The Criterion, the student radio station KMSA 91.3 FM, the literary and art publication Literary Review, the Campus Design Studio and the Horizon Magazine. Each of these groups is professionally advised by faculty members and utilizes the latest equipment employed in their fields.
- **Outdoor Program:** This group is CMU's headquarters for outdoor adventure and education. The Outdoor Program organizes trips and classes including whitewater rafting, rock climbing, and skiing. The rental center is located off North Avenue between Houston Hall and Lucero Hall. Rent mountain bikes, canoes, kayaks, cross-country skis, backpacks, and other gear. More details are available on the [Outdoor Program website](#).
- **Performing Arts Organizations:** While not technically organizations under Student Life, all CMU students are encouraged to audition to join a musical group, participate in theatre, or be part of a dance performance. Performances in the arts are highly regarded at Colorado Mesa University and are well attended by students and the community. Please visit [Arts at CMU](#) for more information about programs, organizations, and shows.
- **Programming Activities Council (PAC):** PAC is responsible for Welcome Week, Homecoming and the spring concert as well as other entertainment activities including concerts, movies, dances, comedians, hypnotists and speakers. Best of all, every one of the over 100 yearly events are free for all CMU students. Details about the council and activities are provided on the [Programming Activities Council page](#).
- **Sustainability Council:** Committed to providing sustainable solutions to CMU, the [Sustainability Council](#) oversees a recycling program, a campus garden and compost facility, and a restoring program that receives donated goods from exiting CMU residents to be purchased by incoming students the next fall.

Student Wellness Center (SWC)

1060 Orchard Avenue, Suite O
970.644.3740

Good health, both physical and emotional, is an important factor in successful college work. It is the goal of the Student Wellness Center to provide competent, accessible and comprehensive health care and wellness to all CMU students who have a valid student I.D. card regardless of the number of credit hours carried.

Medical Services

Like your family physician, the SWC provides a source of basic medical assistance for all CMU students. Outpatient health services are

contracted with Community Hospital and students are required to pay a \$15.00 co-pay for all health services received at the SWC. The primary services provided are: first aid, dispensing of simple medications, assessment and referral to specialty physicians and dentists, providing counsel for personal health problems, simple physicals, screenings and limited lab tests for a nominal fee. Health services are provided by registered nurses, physicians and practitioners in providing a complement of health care. The physician/practitioner provides students with an initial health assessment and evaluation, treats minor illnesses, and refers students for hospitalization or specialized treatment as needed. A registered nurse is available to answer questions and provide medical information.

Behavioral Health Services

All CMU students are eligible for counseling services for a \$10 copay. Students can access and referrals can be made through any office on campus directly by calling the SWC to set up an appointment. These services are provided by licensed/certified counselors and are designed to support students in assisting them with any of life's challenges that maybe affecting their academic life.

Empowerment Classes

These classes are designed to support students in making adjustments to life's transitions and the changes in their lives. These classes are based on Cognitive Behavior Therapy (CBT) approaches that focuses on the aspects of mindfulness, emotional regulation, distress tolerance and interpersonal effectiveness.

Prime for Life Classes (PFL)

These classes are designed to address substance misuse and prevention. The University, which is an active participant in the Mesa County Prevention Policy Board, supports the concepts of proactive prevention as part of the University's overall policy of maintaining a safe and healthy campus. PFL is an evidenced-based, state approved curriculum for substance abuse prevention and is a harm reduction model that focuses on healthy lifestyle choices.

Behavioral Health Services are provided Monday-Saturday from 8am to 6pm for scheduled appointments. Students can schedule an appointment by stopping by the SWC or by calling 970.644.3740.

Hours of Operation

Monday–Saturday: 8am–6pm
Sunday: Noon–4pm

Medical walk in times are available during regular office hours and students can schedule a medical appointment online by selecting the Schedule Appointment Online button on the [Student Wellness Center website](#) or by calling 970.644.3740.

Study Abroad

Rotary Hall • 970.248.1802

In addition to developing direct agreements with foreign institutions for exchange opportunities, Colorado Mesa University is part of the International Student Exchange Program (ISEP). ISEP is a worldwide network of over 150 colleges and universities in over 50 countries. CMU students who choose to study abroad for a semester or academic year on ISEP "exchange" pay CMU tuition/fees and room/board during the semester/year abroad. Students may also choose to go "direct" and pay ISEP directly for their summer, fall, or full year study abroad. Visit CMU's [Study Abroad](#) webpage or contact the Office of International

Student Admissions and Programs for more information on all study abroad opportunities available to CMU students.

Testing Center

Houston Hall, Room 123
970.248.1260

[Testing Center Website](#)

The Testing Center services include, but are not limited to, examinations required for admission to graduate and professional schools, examinations for proficiency and certification in nursing and teaching, the credit by examination program, and community-based testing opportunities.

Transfer Services

Admissions Office
970.248.1232

The Center for Transfer Services, within the Admissions Office, assists students transferring into Colorado Mesa University from other institutions. Services include preliminary transcript evaluation, education planning, transition to academic departments, and resolution of transfer problems. Transfer Services staff is available by appointment and for walk-ins. As part of the Admissions Office, the Center works closely with the Registrar's Office to provide students with information about their transfer credits and how those credits may be applied to the student's intended major.

TRIO Student Support Services: Regular or STEM

Houston Hall, REGULAR: Room 125 A–D and STEM: In the TLC H114 A-B & 112C
970.248.1770

Colorado Mesa University has two (2) TRIO Student Support Services (TRIO-SSS) Programs. The Regular SSS Program serves all CMU majors. The STEM SSS program serves: Science, Technology, Engineering (if graduating from CMU), Mathematics and Health Sciences. TRIO-SSS assists participants in achieving their academic, personal and career goals. TRIO acts as a home base and its purpose is to increase the retention and graduation rates of the participants. Students apply to join the program and active participants are supported in a variety of areas including: individualized tutoring, academic advising, personal counseling, financial aid advising, peer coaching, personal financial literacy and career development. To be eligible for TRIO you must plan on finishing a four year degree from CMU, be a first generation college student and/or meet income qualifications and/or have a documented disability. TRIO is sponsored by the U.S. Department of Education and Colorado Mesa University, a department within Student Success and Engagement. For more information, visit the [TRIO Student Support Services \(TRIO-SSS\)](#) website.

Tutorial Learning Center

Houston Hall, Room 113
970.248.1392

The Tutorial Learning Center (TLC) provides free walk-in tutoring for a variety of courses and subjects. Students who would like to improve their writing skills, work through math, science, or other technical concepts, review material for any subject, or get one-on-one assistance and support

from other successful students are all encouraged to come to the TLC. Qualified peer tutors, recommended by faculty, are trained to help students with their academic endeavors. The central goals of peer tutors are to help students become more independent with their learning and to create opportunities for student success.

Online Tutoring

Online tutoring is offered for most subjects through TLC/Writing Center App on Mavzone. Tutors work with students through D2L, TEAMS or Zoom.

Veteran Services

Houston Hall, Room 121
970.248.1739

Veteran Services certifies students who are utilizing veteran education benefits while attending CMU. Trained staff and student workers can answer questions related to applying for, transferring, and using these benefits. Veterans, dependents, and active duty military can also get help with registration and schedule changes. Tutoring is available through our PAVE (Peer Advisors for Veteran Education) program. Applications, to apply for the Veteran Laptop Project, may be picked up if you want to rent a laptop for the semester. For more information, visit the [Veterans Services](#) website.

WCCC Student Services/IRIS

Building B, Room 102
970.255.2670

As a satellite office for IRIS (Integrated Resources for Information and Solutions), Student Services staff at Western Colorado Community College are available to assist students with a number of services including academic advising, registering for classes, financial aid assistance, help understanding their bill and setting up payment plans, taking tuition payments, conducting campus tours, and answering questions about our one year certificates and two year associate degrees. Student Services also administers the concurrent enrollment program that allows high school students to take college classes.

Writing Center

Houston Hall, Room 223
970.248.2208 or 970.248.1392

The Writing Center serves students across all disciplines and various stages of the writing process. We provide support for students to assimilate into the writing conventions of the university and into their specific academic disciplines. It is free for all CMU students. There is online and in person tutoring, group tutoring and English Language Learner support.

UNIVERSITY-WIDE ACADEMIC OFFERINGS

- [Academic Honors Programs](#) (p. 56)
- [Freshman Year Initiative \(FYI\) Program](#) (p. 56)
- [Study Abroad](#) (p. 56)
- [Undergraduate Developmental Courses](#) (p. 56)

Academic Honors Programs

Program Description

As a member of the National Collegiate Honors Council, Colorado Mesa University's Honors Program offers highly-motivated undergraduates enriched studies in their academic majors. Based within each academic department, completion of honors requirements varies by academic program, but each includes opportunities for students to actively engage in more advanced study through coursework and a capstone project that can include research or creative work presented in a scholarly venue. Students completing a program's academic honors requirements are recognized at CMU's Commencement Ceremony.

At a minimum, students seeking participation in an Academic Honors Program must have earned at least 45 semester credit hours with a minimum 3.5 grade point average (GPA) at the time of application; academic programs may have additional admissions criteria. An application process occurs each spring semester, and interested students should contact the Academic Department Head for the application deadline. In addition to the credit hour and GPA qualifications, an applicant also should submit:

- the application form; and
- a summary of no more than one, single-spaced page that:
 - details the applicant's academic background, community and/or University service, and academic awards; and
 - describes briefly why s/he is applying for an academic honors program of study.

Admission to the Academic Honors Program in each department is competitive. Applications will be reviewed by faculty members in the appropriate program/department, and students will be notified on their acceptance status within the time frame indicated in the program-specific information.

Contact Information

Please contact the appropriate Academic Department Head for the major.

Freshman Year Initiative (FYI) Program

Program Description

Colorado Mesa University offers first-year freshmen an opportunity to participate in a program designed specifically to enhance their first-year experience, ease the transition from high school to college, and improve their overall success in college. This program, Freshman Year Initiative (FYI), is offered to new freshmen prior to the start of each fall semester as one of our [Early Start Programs](#). The University's academic success course, First Year College Success, UNIV 101 is the primary focus of

the FYI Program. UNIV 101 is a two-credit elective course designed to introduce students to the resources of the University and to enhance their study skills in order to be better prepared for the expectations of college-level work.

Study Abroad

Program Description

Colorado Mesa University offers a variety of study abroad opportunities including exchanges with foreign university partners, through faculty-led experiences, and to over 150 universities in over 50 countries around the world through our partnership with the International Student Exchange Program (ISEP). ISEP's reciprocal exchange program allows CMU students to pay CMU tuition/fees and room/board during their semester or academic year abroad. Direct enrollment options are also available, as well as internships in a student's field of study. ISEP students are fully immersed in an intercultural experience at their host institution and are able to explore the global opportunities of their chosen academic field. Visit the [CMU Study Abroad](#) webpage for additional information including eligibility and application instructions.

Undergraduate Developmental Courses

Program Description

In order to maximize student success, Colorado Mesa University provides placement testing and college prep courses so that students can be assured they are prepared to do the college-level work required in their course of study. College prep courses in mathematics and English are designed for students needing to strengthen their skills before entering college-level classes. MATC 092 is a prerequisite for MATH 113. ENGC 090 is a prerequisite for ENGL 111. They are not intended for transfer purposes and will not fulfill degree requirements.

Contact Information

Office of Developmental Instruction
Houston Hall 113
970.248.1021

REGISTRATION POLICIES AND PROCEDURES

Students are responsible for looking up program requirements, viewing their [DegreeWorks](#) degree audit report, and meeting with an academic advisor prior to registration to determine courses needed for graduation. Not all courses available in this catalog are offered every semester or every year. Course schedule offerings for each semester, including registration instructions, are available through the [Registration Information](#) website. Students should register for classes via MAVzone. If that is not possible or if they need help, they may register in person with the assistance of IRIS.

Policies and Procedures

Add/Drops & Schedule Adjustments

Students may make adjustments to their schedules according to specified deadlines and procedures published on the [Important Dates](#) website. Students dropping all of their courses should refer to the Withdrawal Procedures below.

Attendance

Students are expected to attend all sessions of each course in which they are enrolled. Failure to do so may result in a lowered grade, exclusion from class at the discretion of the instructor, or an administrative drop for non-attended courses. Students should not assume that non-attendance will result in an automatic drop from a class (see the Student Liability for Tuition & Fees above).

Instructors may drop any student who fails to attend the first two class meetings or fails to participate in an online class. Instructors may also initiate a drop or withdrawal for a student who fails to attend classes regularly. ("Drops" are up to 15% of class elapsed; "withdrawals" are up to the two-thirds of the class.) Not all instructors will exercise this option; therefore, a student should not assume that non-attendance will result in an automatic drop from a class.

Students who receive financial aid and cease attending classes may need to repay all or a portion of their financial aid.

Attendance by a Guest

Instructor approval is required in advance if a student wishes to bring an occasional guest (or child) to class. Otherwise, the person must be enrolled to attend.

Absences and Tardiness

It is the responsibility of the student to arrange in advance with instructors for making up missed classwork, assignments or tests incurred because of a student's participation in required field trips, intercollegiate sports, or other trips. The coach, instructor, or other official whose activities require students to be absent from classes should give each participating student an "official" roster and schedule of events for the semester or other appropriate time span which may result in classes being missed. The student is responsible for contacting the instructor of each of his/her classes affected at least 24 hours in advance of each class that will be missed.

Absences due to serious illness or strictly unavoidable circumstances may be excused if the instructor in charge of the course is satisfied as to the cause. In the case of an emergency, the student may contact the Office of the Vice President for Student Services, and that office

will contact the student's instructors to inform them of the emergency. Informing the Office of the Vice President of Student Services is not a guarantee that the absence will be excused, however.

Being excused for an absence in no way relieves the student of responsibility for completing all work associated with the course to the satisfaction of the instructor. Being late to a class or leaving a class early is disruptive and is not acceptable except in extreme circumstances or with prior approval of the instructor.

Class Waitlists

Online waitlists are available to students during the registration process. For general classes, when a seat opens, the first student on the list is emailed and given a time period with which the student can add the course. It is the student's responsibility to check their CMU email for notification that his/her waitlisted class has opened. Failure to register within the designated time frame will result in the student being removed from the waitlist and the opportunity moving the next student on the list. The electronic waitlist is deleted after the first week of a sixteen-week class (1/16 of the class for non-standard parts of term).

Online waitlists for courses with co-requisites (lecture/lab combinations) are administered by the Registrar's Office. The open spaces are given to the first student on the waitlist who can successfully be registered for both the lecture and lab. The waitlist on co-requisite courses will be cleared the Friday before the semester starts to ensure class/lab combinations fill.

The time limit to add from the waitlist will drop from 72 hours to 48 hours the week before school starts and down to 24 hours once classes begin. Students still wishing to add a closed class after the waitlist has been deleted must submit a complete Change of Schedule form with instructor's signature to IRIS or the Registrar's Office prior to the add deadline (class census).

Family Educational Rights and Privacy Act (FERPA)

General Policy

The Family Educational Rights and Privacy Act (FERPA) provides students who are enrolled in an institution of postsecondary education the right to inspect, review, and challenge their educational records. Colorado Mesa University has the responsibility of maintaining and protecting the confidentiality of students' official educational records. Colorado Mesa University also supervises the access to and/or release of educational records of its students. FERPA covers enrolled and former students, including deceased students. Students who are not accepted to Colorado Mesa University, or if accepted, do not attend, have no rights under FERPA. In addition, the University will not release personally identifiable records of students to any individual, agency or organization without the prior written consent of the student, except as provided by FERPA.

Directory Information

Colorado Mesa University may, without the consent of the student, release to persons outside the institution information designated as Directory Information in accordance with the provisions of FERPA. Directory Information shall include information in an educational record which would not generally be considered harmful or an invasion of privacy if released, including but not limited to:

- Student name, address, telephone #
- Date and place of birth
- Major fields of study

- d. Participation in officially recognized activities and sports
- e. Weight and height of athletic team members
- f. Photographs
- g. Dates of attendance to include enrollment status (i.e., full time or part time)
- h. Degrees and awards received
- i. Most recent educational institution attended
- j. E-mail address

A student wishing to withhold Directory Information may add or remove a confidential indicator to their record via MAVzone under the MyAccount Personal tab. The confidential indicator will limit access to Directory Information to other parties without written permission. This request will be honored until the student removes the confidential indicator via MAVzone or submits the request in writing to the Registrar's Office. Adding a confidential indicator will restrict enrollment verification, graduation verification, and will require the student to conduct business in-person or via MAVzone.

Access to Student Educational Records

FERPA provides current students, former students, and parents of students who claim the student as a dependent (according to Internal Revenue Code of 1954, Section 152) for income tax purposes on their most current federal tax return the right to inspect, review, and challenge their educational records.

Students are permitted to inspect and review their educational records within a maximum of 45 days after the request is received. Students may not review financial information received from their parents or guardians; confidential letters and recommendations placed in their files prior to January 1, 1975; academic records containing information regarding other students; administrative, disciplinary, law enforcement, student health records, and/or records which are maintained in the sole possession of the maker.

While students who have a financial hold or past due account (all holds included) have a right to inspect their academic records, no transcript will be released to the student or other party until holds are reconciled. Bankruptcy, however, removes any financial obligations the student has to Colorado Mesa University. Please contact the Registrar's Office with questions regarding this policy.

Golden Scholars

Colorado Mesa University provides individualized support, including academic and scheduling decisions, for persons 60 years and older. For more detailed information, go to the [Golden Scholars](#) website

Classes for Credit

Persons 60 years or older who wish to enroll for credit must submit required admission and registration materials to the Admissions Office. The same deadlines, costs, etc., as for other students will apply.

Classes for No Credit

Persons 60 years of age or older who do not wish to earn college credit may attend undergraduate resident instruction classes on a space-available, instructor-approved basis at Colorado Mesa University for a reduced fee.

Interested persons should obtain an application from the [Golden Scholars](#) website. Once admitted, [registration for classes](#) is at the beginning of the semester either through MAVzone, IRIS, or the Registrar's Office.

No-Credit Desired/Audit Courses

A student who desires to attend certain undergraduate classes regularly, but does not wish to receive grades or credit, should register for these classes using the audit status.

Tuition charges for classes taken under the audit status are the same as for classes taken for credit, but are not eligible for the COF voucher. Financial aid does not apply to no-credit/audit courses.

The deadline for a student to change from audit to credit is the same as the deadline to add a class. The last day for a student to change from credit to audit is the same as the deadline to withdraw from a class.

Student Liability for Tuition & Fees

For all students, the act of registration automatically confirms attendance and the student will incur a financial obligation to the University. A registered student is responsible for paying his/her tuition and fees, regardless of whether or not he/she attend classes, unless the student officially withdraws from the University through IRIS, the Registrar's Office, or drops all courses via the web prior to the deadlines published on the Colorado Mesa University website. It is the student's responsibility to make a copy of the schedule reflecting any courses dropped via the web.

Withdrawal Procedures

Withdrawal from Individual Classes

A student may withdraw from an individual class via MAVzone prior to the first day of the session for the course (full semester, late start, modular, or variable length). After the session has begun, the student must submit the [Course Withdraw](#) online form up to the two-thirds of the way through the course as indicated on the [Important Dates](#) website. Within the published withdraw deadline, a student will receive a "W" on the transcript which will not be calculated in the grade point average. After the published deadline, a student will receive a grade of "F" which will be calculated in the grade point average. A student with extenuating, non-academic reasons should review the emergency hardship withdraw or add/drop/withdraw exception sections.

In addition to regular withdrawal from class(es) by the student, an instructor may initiate a course withdrawal for failure to attend classes, failure to turn in assignments over an extended period of time, or for disciplinary reasons. In such cases, the instructor must observe regular withdrawal deadlines as published on the [Important Dates](#) website.

Emergency or Hardship Withdrawal from Individual Classes

In the case of an event that qualifies as an emergency or hardship, a student may request an Emergency or Hardship Withdrawal from an instructor after 66 percent, but before 75 percent of a course is completed. An emergency or hardship situation is defined as a significant, unexpected non-academic circumstance beyond the student's control and is granted at the discretion of the instructor. Failing, poor performance in a course, or other academic-related reasons do not constitute circumstances for an emergency withdrawal.

A student seeking an [Emergency or Hardship Withdrawal](#) must consult the instructor and submit the online form by the deadline. Substantiating documentation (e.g., doctor's notes, court documents, death certificates) may be required at the request of the instructor.

Semester Withdrawal from the University

A student who desires to withdraw totally from all classes in a semester are advised to discuss their situation with their faculty advisor and/or IRIS prior to withdrawing.

Prior to the first day of the semester, a student may totally withdraw from Colorado Mesa University by dropping all classes via MAVzone. After the semester has begun, a student must submit the [Semester Withdraw](#) online form. See the calendar on the [Important Dates](#) website for course drop and withdraw details. Each course will be processed based on the start and end dates for the course session (full semester, late start, modular or other variable length). In the first 15% of the course session, the course will be dropped. After the drop and up to the two-thirds of the session, the withdrawn course will be denoted with a "W" on the transcript which will not be calculated in the grade point average. After two-thirds of the session, a grade of "F" will be assigned to the course which will be calculated in the grade point average. Courses that have been completed with an earned grade will retain the earned grade (include "F"s). A student with extenuating, non-academic reasons should review the add/drop/withdraw exception section.

Add/Drop/Withdraw Exceptions

Exceptions to add, drop or withdrawal deadlines are rare. To be considered, evidence of substantial and unexpected non-academic circumstances outside the student's control must be provided. To file an Enrollment Appeal, the student must supply a written request explaining the situation along with supporting documentation to the Registrar's Office within six months after the end of the semester being appealed. At the end of the six month period, the registration record is considered final and no further registration or tuition adjustments will be considered. The Enrollment Appeals Committee will review the provided documentation, course feedback from faculty and related enrollment information pertinent to the request. Filing an appeal does not guarantee approval.

GENERAL UNDERGRADUATE ACADEMIC POLICIES

Academic Integrity

All faculty, administration, and students of Colorado Mesa University have a responsibility for establishing and fostering an understanding of the importance of academic integrity. Academic dishonesty includes but is not limited to representing work of others as your own without proper acknowledgment, giving or receiving assistance on exams, papers, projects, or assignments unless authorized to do so; and misrepresenting your identity or allowing others to do so. Incidents should be reported to the instructor of the course if possible, or contact the Academic Department Head. Actions may be taken as a result of academic dishonesty. For more details, see the [Maverick Guide](#).

Academic Probation and Suspension

Good Standing

Signifies that the student is making satisfactory academic progress (see Academic Standards section) and is eligible to continue studies at Colorado Mesa University.

Academic Probation

Indicates a student is not in good standing and constitutes a warning to the student that the student's scholastic achievement needs improvement or suspension will result. Students will be placed on academic probation if their cumulative grade point average at Colorado Mesa University falls below the minimums listed under GPA minimum.

Upon being placed on academic probation, students are permitted to continue studies for one semester, during which time they are expected to improve their cumulative grade point average to the minimum required levels. Those who succeed will be removed from academic probation.

Students on academic probation will remain on academic probation until they raise their cumulative grade point average to the required level. Once on probation, a student must maintain a minimum semester grade point average of 2.00 to avoid being placed on academic suspension. Additionally, students with a cumulative Colorado Mesa University grade point average of 2.00 or lower will be limited to 15 credit hours per semester.

Academic Suspension

Indicates the student is not in good standing and represents a temporary, involuntary separation of the student from the University for a minimum of one semester for failure to meet minimum academic standards.

Following an academic suspension, a student must apply for readmission to Colorado Mesa University. For degree programs that do not have separate admission policies, the readmission to Colorado Mesa University is also readmission to the degree program as long as the degree still exists. For degree programs having admission policies over and above admission to Colorado Mesa University, the student must also reapply to the degree program.

A student may be suspended from and readmitted to Colorado Mesa University a maximum of two times. Academic suspension, when imposed, becomes effective immediately upon the recording of grades at the end of the semester or summer term.

The first suspension shall be for a period of one semester; i.e., a student suspended at the end of fall semester may not attend the following spring semester; a student suspended at the end of spring semester may not attend the following summer and fall semesters. A student suspended at the end of summer term may not attend the following fall semester.

The second suspension shall be for a period of two semesters (i.e., a student suspended at the end of fall semester may not attend the next spring or fall semester; a student suspended at the end of spring semester may not attend the following fall or spring semester). A student suspended at the end of summer term may not attend the following fall or spring semester.

If the suspension is due to substantial non-academic circumstances outside the student's control (i.e., major medical issues, serious car accident, etc.), the student may submit a letter of appeal with documentation to the Suspension Appeal Committee in the Registrar's Office. Deadlines and appeal instructions are outlined in the Registrar's Office website. Filing an appeal does not guarantee approval and the committee's decision is final.

Students may not enroll in any credit classes whatsoever (including summer term) during the period of suspension.

Academic Renewal

A student who re-enrolls at Colorado Mesa University following an absence of at least five years may be eligible for academic renewal. If academic renewal is approved, none of the course credits and grades earned at Colorado Mesa University prior to the five-year minimum absence will be used for meeting graduation requirements or in determining the student's grade point average.

Among the requirements to be eligible to apply/petition for "academic renewal" is that the student must have completed 24 academic course credits at Colorado Mesa University, excluding kinesiology courses and remedial courses below the 100 level, with a minimum grade point average of 3.00. The student must apply/petition in the Registrar's Office no later than the semester following the completion of these 24 semester credit hours. Matriculation and/or course completion at other institutions during the five-year period of absence has no bearing on the application/petition.

Academic Standards

The scholastic standing of a student at Colorado Mesa University is computed on the basis of all courses attempted at Colorado Mesa University (unless academic renewal has been approved; see next page). Grades awarded from any other institution will not be utilized in the grade point average (GPA) calculation.

Colorado Mesa University uses the four point system in computing the grade point average of its students. Under this system, a student receives four quality points for each semester hour of A; three points for each semester hour of B; two points for each semester hour of C; one point for each semester hour of D; and no quality points for an F. An example follows:

Hours Completed	Points Awarded
3 Semester Hours of A	12
3 Semester Hours of B	9
3 Semester Hours of C	6

3 Semester Hours of D	3
3 Semester Hours of F	0
15 Semester Hours	30

Thirty (30) points divided by 15 semester hours = 2.00 GPA

Calculation of Grade Point Average for Graduation

Only the grades and credits awarded at Colorado Mesa University will be used in calculating the student's grade point average for graduation. Grades awarded from any other institution will not be utilized in the grade point average calculation.

The specific discipline area program requirements must be completed as required by the appropriate academic department with a cumulative grade point average of 2.00 or higher.

Classification Status

A student is classified based on the number of semester hours successfully completed as follows:

Semester Hours Completed	Student Status
0 - 30	Freshman
31-60	Sophomore
61-90	Junior
91+	Senior

Course Repeat/Grade Improvement

Any course which is taken more than once for academic credit at Colorado Mesa University is done so only for "grade improvement" wherein academic credit is awarded only once and the best grade received is the one used to compute the student's cumulative grade point average and to fulfill requirements for the degree.

The lower grade will be excluded from the earned hours for the term taken and will be excluded from the GPA calculations. This may cause a negative effect on financial aid, Veteran benefits, athletic eligibility, scholarships, and other areas that use earned hours to determine student benefits. It is the student's responsibility to work with the appropriate departments to consider options and potential consequences prior to repeating the course.

Exceptions to this policy are DANC (performing dance), MUSL (music lessons) and MUSP (performing music) classes, each of which may be taken twice for academic credit; Independent Studies (a maximum of six semester credit hours may be taken for credit – see the Independent Study section in this catalog); and in some cases Topics, Practica, Seminars, Internships, Structured Research, and Cooperative Education. See program sheets and the appropriate department head or director for these exceptions.

Additionally, program-specific exceptions to retaking courses for grade improvement may exist regarding courses in the major. Students should check with the head of the academic department for their major to determine if there are any restrictions for repeating a course.

The option of repeating a course for grade improvement is available to a student only if the course s/he wishes to repeat is still offered at

Colorado Mesa University and is scheduled to be offered in the semester in which the student wishes to take it.

Courses taken at Colorado Mesa University may not be repeated at another university for improvement of the original grade and courses taken at another university may not be repeated at Colorado Mesa University for improvement of the original grade.

English and Mathematics Requirements

Colorado Mesa University students are required to complete the Essential Learning Core English and Mathematics requirements prior to exceeding 60 semester credit hours. Students should take the courses as freshmen. Those who need developmental courses before they are ready to enroll in the required courses should enroll in the developmental courses their first semester at Colorado Mesa University. Any required English and mathematics developmental courses must be completed with a "C" or higher. Students who are completing 60 hours of course work will have a registration hold placed on their account blocking them from enrolling in any additional courses until they have passed the required courses. Students are encouraged to work with the Registrar's office staff to enroll in courses. Exceptions to this policy require the written permission of the appropriate department head (Language, Literature and Mass Communication or Mathematics and Statistics) or their designee.

GPA Minimum

Students are considered to be making "satisfactory progress" toward a degree if they attain a cumulative GPA consistent with the table listed below. Incomplete ("I") and In Progress ("IP") grades are tentative grades and until changed are not considered in computing either the cumulative grade point average or the grade point average for the particular semester concerned. "W" hours do not count as hours attempted or in the GPA. (See section on Withdrawal Procedures)

Cumulative Credit Hours	Cumulative GPA
0 – 15	1.70
16 - 30	1.80
31 - 45	1.90
46 and above	2.00

Students failing to achieve the minimum GPAs listed above will be placed on academic probation. The student will remain on probation until the minimum GPA is achieved, providing the student earns a minimum semester GPA of 2.00. If a student already on academic probation fails to earn a semester GPA of 2.00, the student will be placed on academic suspension. The student will be prohibited from further attendance at Colorado Mesa University for a minimum of one semester (see Academic Probation and Suspension section.)

A student must achieve a cumulative grade point average of 2.00 or higher to graduate at the certificate, associate, or baccalaureate level. Some programs have additional GPA requirements to remain in and graduate from that program. See Programs of Study section and subject program sheet for specifics.

Grading System

Grades at Colorado Mesa University are as follows:

Grade	Description
A	Excellent to superior
B	Good to excellent

C	Satisfactory
D	Passing but not satisfactory
F	Fail
I	Incomplete
IP	In progress
W	Withdraw
NC	No credit
P	Pass

Incomplete (“I”) grades are temporary grades given to a student only in an emergency case and at the discretion of the instructor.

At the end of the semester following the one in which an “I” is given, the “I” becomes the grade that is submitted by the instructor to the Registrar’s Office. If the instructor does not submit a grade by the deadline for that semester, the grade becomes an “F.” For example, a grade of “I” given spring semester must be addressed by the end of the following fall term.

Extension of the time to complete work may be made in exceptional circumstances at the discretion of the instructor. A student with an “I” grade, however, may not change the “I” by enrolling in the same course another semester.

Grades of “P” are passing grades and are not included in the GPA. “P” grades at the undergraduate level are only used for zero credit hour courses, sub-100 level labs or non-traditional credits such as CLEP, AP, military credits, etc., and may be applicable toward graduation.

Honor Lists

President’s List

Made up of those students who earn a GPA of 4.00 while enrolled in a minimum of 12 semester hours for a particular semester.

Dean’s List

Includes students who achieve a grade point average of between 3.50 and 3.99 while enrolled in a minimum of 12 semester hours for a particular semester.

The lists are based on semester grades, not cumulative grade point averages. Regardless of grade point average, a student who receives a failing grade (“F”) in any course is not eligible for the Dean’s List.

To graduate with Honors or Distinction, the student’s cumulative grade point average will be used in the determination of inclusion in the Honors/Distinction categories listed below. Each year during formal commencement ceremonies Colorado Mesa University recognizes the following categories of academic achievement:

- For Associate Degrees:
 - With Distinction—Associate degree graduates with cumulative grade point averages of 3.50 to 3.74.
 - With High Distinction—Associate degree graduates with cumulative grade point averages of 3.75 to 4.00.
- For Baccalaureate Degrees:
 - Cum Laude—Baccalaureate degree graduates with cumulative grade point averages of 3.50 to 3.74.
 - Magna Cum Laude—Baccalaureate degree graduates with cumulative grade point averages of 3.75 to 3.89.

- Summa Cum Laude—Baccalaureate degree graduates with cumulative grade point averages of 3.90 to 4.00.

The grade point average for honors/distinction at commencement does not include final-term, in-progress courses. The ultimate honors/distinction recognition to appear on the permanent record/transcript will reflect the appropriate category based on the inclusion of the final-term course grades required for the completion of degree requirements.

Honor Societies

Alpha Chi

Membership in Alpha Chi is the highest academic honor which Colorado Mesa University can bestow upon its scholars. To be eligible for election, students must have completed at least 75 semester hours toward the baccalaureate degree with a GPA of 3.75 or better and be fully recognized by their faculty and department heads as having the qualities of character pertaining to the true scholar. Alpha Chi is the second oldest and second largest of those national scholastic honoraries, which elect members from all academic fields.

Alpha Phi Sigma

Alpha Phi Sigma is the national honor society in criminal justice. For membership in Alpha Phi Sigma, a political science major or other student who has completed at least four classes in criminal justice must maintain an overall GPA of 3.20.

Beta Beta Beta

Beta Beta Beta is the National Honor Society in biology at Colorado Mesa University. For full membership in Beta Beta Beta, a biology major must have completed at least three classes in biology and have a minimum GPA of 3.00. With these qualifications, a student may be nominated for membership.

Kappa Mu Epsilon

Kappa Mu Epsilon is an honor society for students of mathematics. Its chapters are located in colleges and universities of recognized standing which offer a strong mathematics major. The nominated and inducted members are selected from students of mathematics and other closely related fields who have maintained high standards of scholarship, have professional merit, and have attained academic distinction. The local chapter, Colorado Delta, is a working organization throughout the academic year. It functions as an integral part of the Department of Mathematics and Statistics of Colorado Mesa University.

Lambda Nu

Lambda Nu is the National Honor Society for the radiologic and imaging sciences. Its objectives are to foster academic success at the highest academic levels, promote research and investigation in the radiologic and imaging sciences, and recognize exemplary scholarship. Membership requires students complete one semester in the BSRS program and maintenance of a 3.0 GPA in program coursework.

Nu Kappa Chapter, Sigma Theta Tau International

Nu Kappa Chapter, Sigma Theta Tau International, recognizes achievement in nursing. The purposes of the society are to recognize superior achievement and leadership qualities, foster high professional standards, encourage creative work and strengthen commitment to the ideals and purposes of the profession. Students must have a minimum GPA of 3.00 and rank in the upper 35 percent of their class to be eligible for membership. Nurses from the community may also be nominated for

membership if they have demonstrated marked achievement in nursing education, practice, research or publication.

Phi Alpha Rho Sigma Tau

Phi Alpha Honor Society is the international honor society for social workers and Rho Sigma Tau is the honors chapter at Colorado Mesa University. This honor society promotes humanitarian goals and ideas while fostering high standards of education and practice. To be eligible for membership, social workers must attain excellence in leadership, scholarship, and achievement across social work and be in the top 35 percent of their academic class.

Phi Alpha Theta

Phi Alpha Theta is the international honor society in history. The objective of this professional honor society is the promotion of the study of history through the encouragement of research, good teaching, publication, and the exchange of learning and thought among historians. To be eligible for membership, a student must have completed twelve or more hours of history with a minimum GPA in history of 3.10 and a minimum overall GPA of 3.00.

Pi Sigma Alpha

Pi Sigma Alpha is the national honor society in political science. For membership in Pi Sigma Alpha, a political science major or other student who has completed at least four classes in political science (three at the 300 or 400 level) must maintain an overall GPA of 3.00 and a 3.2 GPA in political science.

Psi Chi

Psi Chi, the national honor society in psychology, is open for membership to students with either a major or minor in psychology. Minimum qualifications for membership are as follows: rank in the top 35% of one's class with a minimum 3.00 overall GPA; 3.25 psychology GPA; completion of 9 semester hours in psychology; and completion of at least three semesters of university coursework. The purpose of Psi Chi is to promote and maintain excellence in scholarship in the field of psychology and to advance the science of psychology.

Sigma Gamma Epsilon

Sigma Gamma Epsilon, a national honor society for the earth sciences, has for its objectives the scholastic and scientific advancement of its members and the extension of friendship and assistance among colleges, universities, and scientific schools for the advancement of the earth sciences. Membership in the Zeta Nu Chapter of Sigma Gamma Epsilon is open to continuing Earth Science majors with at least twelve credit hours of Earth Science coursework completed with a minimum GPA of 3.00. Qualified students are reviewed and may be nominated each semester.

Sigma Pi Sigma

Sigma Pi Sigma is the national honor society in physics. For membership in Sigma Pi Sigma, a physics major or other student who has completed at least three classes in physics must maintain an overall GPA of 3.00 and a 3.25 GPA in physics. A qualifying student may then be nominated for membership by the combined physics faculty.

Sigma Tau Delta

Sigma Tau Delta, the national English honor society, endeavors to encourage, promote, and recognize scholarship and achievement in English language and literature. Membership is open to sophomore, junior, and senior English majors with a minimum GPA of 3.00 in English.

Upsilon Pi Epsilon

Upsilon Pi Epsilon is the national honor society for computer science.

Independent Study

Independent study permits the motivated student an opportunity to expand his or her body of knowledge beyond the scope of the standard curriculum. It endeavors to foster qualities of self-initiative, organizational skills, self-discipline and independent thinking. It is expected that the student will engage in intensive study and research of the topic.

Independent study does not satisfy essential learning requirements or specific course requirements. Independent study hours may be taken for elective credit. Independent study is available primarily to students at the junior and senior levels with a minimum GPA of 2.75 except in certain certificate and AAS programs.

The work is to be completed within one semester from the initiation date and is limited to a total of six or fewer semester credit hours taken at Colorado Mesa University.

The department head or director of the academic department issuing credit must approve any exceptions.

An Individualized Learning Contract, available from the academic department head, is to be initiated by the student desiring independent study in consultation with a supervising instructor. The contract must include justification, description, monitoring, and evaluating procedures, and the approval by the instructor and department head.

Further restrictions apply in some disciplines. Students wishing to take an independent study should check with the appropriate instructor and/or department head or director well in advance.

With permission of the instructor, students may register for regular classes but do the work independently, or on their own. This is not the same as "Independent Study." Students who have made prior arrangement with the instructor will still register for the regular course, and not for Independent Study.

Laboratories

Many courses at Colorado Mesa University have both lecture and laboratory components to a single course. The class and laboratory portions are technically treated as different courses with distinctive numbers and individual grades. A student is usually required to be concurrently enrolled in both class and laboratory. Credit applied toward graduation cannot be earned for the class or laboratory unless credit is earned in both.

Learning Progress Evaluation

The evaluation of a student's learning progress in a course is considered to be a planned and continuous process and consists of a variety of activities including judgment, observation, testing, etc. Final examinations are a part of the evaluation process.

Article 13 of House Bill 1187, enacted in July of 1985 by the Colorado General Assembly, established that institutions of higher education in Colorado are to be held accountable for demonstrable improvements in student knowledge, capacities, and skills between entrance and graduation.

Students are required by Colorado Mesa University to take part in testing and other programs deemed necessary for compliance with

this legislation. Students who do not abide by these requirements may be denied registration and/or graduation privileges. Portions of the assessment process may require time outside the normal class periods.

Maverick Milestone

The Maverick Milestone (ESSL 290) and Essential Speech (ESSL 200) courses will be taken concurrently on a student's first attempt unless special permission is granted by the Assistant Vice President for Academic Affairs (AVPAA) for Assessment and Accreditation to do otherwise. A student may take the courses separately only for purposes of grade improvement or when the student wishes to take ESSL 290 for elective credit after the successful completion of the Essential Learning Capstone requirement (ESSL 290 and ESSL 200). ESSL 290 and ESSL 200 are technically treated as distinct courses with distinct grades. However, credit applied toward graduation requirements cannot be earned for either ESSL 290 or ESSL 200 until satisfactory credit (passing) is earned in both.

Students who are completing 75 hours of course work will not be permitted to enroll in any additional courses until they have passed both ESSL 290 and ESSL 200. Exceptions to the policy require the written permission of the AVPAA for Assessment and Accreditation or designee.

Non-Traditional Credit

Non-traditional credit can be earned from sources such as the following:

Military Credit

Qualified veterans and service members with a discharge under conditions other than dishonorable are eligible to receive credit. The credit for learning gained in the U.S. Military is based on the American Council on Education (ACE) Military Guide credit recommendations found on a Joint Services Transcript (JST) or a Community College of the Air Force Transcript (CCAF). Military credit is evaluated by the Registrar's Office when official copies of transcripts are received directly from JST or CCAF. Course equivalencies are based on the ACE recommendations, and current courses offered at Colorado Mesa University, with academic department input on specialization courses within the major. A maximum of 30 semester credit hours to be used toward lower and upper division courses may be accepted. Students with military credit should meet with the Veteran Services Office to discuss selecting a program of study that optimizes use of military credit for graduation. Contact the Registrar's Office for more information.

Advanced Placement Program

Students wishing academic credit or advanced placement for college level work done while enrolled in high school should take the appropriate College Board Advanced Placement examination. These exams are administered several times each year at numerous locations throughout the United States. College Board Advanced Placement examination scores currently accepted by Colorado Mesa University are: Studio Art-General; Studio Art-Drawing; Art History; Biology; Chemistry; Computer Science A; Computer Science AB; Macroeconomics; Microeconomics; English Literature & Composition; English Language & Composition; French Language; French Literature; German Language; German Literature; Latin-Virgil; Latin Literature; Spanish Language; Spanish Literature; Government & Politics-United States; Government & Politics-Comparative; US History; European History; World History; Human Geography; Mathematics-Calculus AB; Mathematics-Calculus BC; Music Theory; Physics B; Physics C-Mechanics; Physics C-Electricity & Magnetism; Psychology; and Statistics.

The Registrar's Office will supply information concerning the scores required for earning academic credit in the various subject areas.

Credit by Examination and Department Challenge Exams

Students attending Colorado Mesa University and Western Colorado Community College may earn college credit by examination in certain subject areas through the College Level Examination Program (CLEP) and DANTES Examination Program. The Registrar's Office will supply information concerning the scores required for earning academic credit in the various subject areas.

Credit may also be earned by subject matter tests offered through various departments at Colorado Mesa University and Western Colorado Community College through departmental challenge exams. See the specific department for more information on possible challenge exam options. Students must be accepted to Colorado Mesa University before the approved CLEP and challenge exam credits will be recorded as transferable credit.

International Baccalaureate Program

Colorado Mesa University recognizes the International Baccalaureate Diploma Program and awards credit to qualifying high school students based on their examination scores. For policy details contact the Registrar's Office or check the CMU website.

Credit for Prior Learning through Portfolio Assessment

The practice of awarding credit for college-level prior learning is based upon the belief that education which builds on, interprets, and incorporates past and present knowledge is the education that is most meaningful to the student. Colorado Mesa University and Western Colorado Community College recognize that students may have gained college-level knowledge and competencies through their work and life experiences which can be incorporated into their academic programs.

The development of a portfolio to demonstrate competency acquired through work or other life experience can be pursued for many technical or applications-based areas. Students wanting to pursue this option are strongly encouraged to enroll in UNIV 105 Competency Portfolio Development. The portfolio will be produced in collaboration with faculty from the desired department. Students must obtain course syllabi and complete the application for prior learning credit to participate in the Portfolio Development Workshop. For policy details see the [Credit for Prior Learning](#) webpage.

Cooperative Education, Internships, Practica

Cooperative education/Internships are a working partnership in which an educational institution such as Colorado Mesa University or Western Colorado Community College joins with an employer in a structured relationship. The basic purpose is that of providing a means whereby a student can combine college study with a work experience which is under employer supervision to fulfill the total requirements of a particular educational program.

Cooperative education is a three-way partnership involving the student, the employer and the university. There is a great deal of difference between cooperative education and simply holding a job. Cooperative education is based on learning objectives which are related to the student's academic discipline and are established in cooperation with student, the employer, the faculty advisor, and others at Colorado Mesa University.

Typically, cooperative education is open to junior and senior students. Interested students should consult with their faculty advisor and academic department head or director. There are limits on the number of credits which will apply towards a degree. Graduate students should consult the Graduate Policies and Procedures section of this catalog.

Non-traditional Credit Guidelines

The faculty and department head of each department determine if, and under what conditions, non-traditional credit is allowed. If allowed, the following limits apply:

- a. Military credits – maximum of 30 semester credit hours to be used toward lower and upper division courses as deemed appropriate.
- b. CLEP, DANTES & Credit by Examination/Department Challenge Exams – maximum of 30 semester credit hours for a baccalaureate degree, 20 semester credit hours for an Associate of Applied Science degree, 12 semester credit hours for an Associate of Arts or an Associate of Science degree, and 6 semester credit hours for a technical certificate. Students may not earn CLEP or DANTES credit in a class in which they have previously been enrolled including a class from which the student withdrew, so that the transcript shows a W, WP or WF. Students must receive approval and follow the procedure to challenge a course, including enrolling in that course. See the Registrar's Office for a copy of the procedure.
- c. Advanced Placement – maximum of 30 semester credit hours for a baccalaureate degree, 15 semester credit hours for an associate degree, or six semester credit hours for a technical certificate.
- d. International Baccalaureate – The subject exams and score shown on each student's transcript will determine the number of semester credit hours allowed. Maximum of 30 semester credit hours for a baccalaureate degree or 15 semester credit hours for an associate degree.
- e. Credit for Prior Learning through Portfolio Assessment – Portfolio assessment is limited by academic residency requirements and portfolio acceptance within the specific discipline. Additional guidelines may supersede department requirements if the degree is governed by accreditation standards. In the case of transfer, academic departments at CMU shall determine if the portfolio assessment credit awarded by the sending institution can apply to the student's major requirements. Other restrictions may apply. See the [Credit for Prior Learning](#) webpage for further details.
- f. Cooperative education, Internships, Practica, etc. – maximum of 15 semester credit hours may be used to satisfy the required academic semester credits for a baccalaureate degree and 6 semester credit hours may apply toward an Associate of Arts or Associate of Science degree. A maximum of 15 semester credit hours may apply toward the 40 upper division hour requirement. No restriction on the maximum number of semester credit hours above and beyond any degree requirement is intended. These restrictions do not apply to the Associate of Applied Science degree or technical certificate programs.

The total combination of non-traditional credit is limited by academic residency requirements for the degree. Additional guidelines may supersede department requirements if the degree is governed by accreditation standards. In the case of transfer, academic departments at CMU shall determine if the non-traditional credit awarded by the sending institution can apply to the student's major requirements.

Student Appeals

Students have the right to appeal actions or sanctions (such as those relating to grades or academic dishonesty) and should begin the process by meeting with the course instructor. The [Maverick Guide](#) provides a detailed explanation of Academic Integrity, Academic Dishonesty, Student Appeals, Grade Appeals and related processes. The University provides that all student concerns, grievances, and appeals that are not covered under a specific policy may be directed either to the Office of the Vice President for Academic Affairs or to the Office of the Vice President for Student Services.

Student Complaint Policy

An official complaint is when a student alleges:

- a. the institution has violated local, state, and/or federal law;
- b. a breach of contract e.g., failure to meet institutional obligations as presented in a recruiting material document, application for enrollment or student housing, course syllabus, etc.; or,
- c. a passive response by the institution to a complaint by a student that resulted in material damages to the student.

Disagreement with an administrative decision, or the outcome of an appeal of that decision, is not a complaint unless it alleges improper, unfair, or arbitrary treatment. The complaint must be in writing with an identifiable signature and is not already covered by another existing policy or process (see attached table).

A student wishing to file a complaint should do so as promptly as possible following the alleged violation, but by no later than February 15 for a concern occurring during the prior fall semester, June 15 for the prior spring semester, and September 15 for the prior summer term. The timely initiation of a complaint rests with the student. The complaint should be in writing and signed by the complainant or submitted electronically from a Colorado Mesa University student email address. The complaint should

- a. describe the issue that is the basis for the complaint, including the steps have been taken to informally resolve the problem, and
- b. include any relevant documents the student would like to be reviewed as part of the complaint process.

Depending on the nature of the violation, the complaint should be sent to the Office of the -

- Vice President for Academic Affairs or the Vice President for Community College Affairs if the concern is academic-related;
- Vice President for Finance and Administration if service-related;
- Vice President for Student Services if behavior or conduct-related; or
- Director of Human Resources if an alleged violation of discrimination in employment or education opportunity.

For the full complaint policy and links, go to the [Student Complaint Policy](#) on the Academic Affairs policies website.

Student Conduct

Colorado Mesa University is a community consisting of students, faculty, support staff, and administrators. The University does not attempt to define all "student conduct." It relies on students to assume the responsibility and obligation of conducting themselves in a manner compatible with the purpose of the University as an educational institution and the community as a place of residence. In addition to

University rules and regulations, all students are subject to the same local, state, and federal laws as non-students and are beneficiaries of the same safeguards of rights as non-students.

The Student Code of Conduct can be found in its entirety published in the [Maverick Guide](#). Questions relating to student conduct may be referred to the Office of the Vice President for Student Services, located on the fourth floor of Lowell Heiny Hall.

Student Load and Limitations

The normal student load is 15 semester hours (some disciplines require a higher number). The minimum load required for a student to be recognized as a full-time student is 12 semester hours. If students register for fewer than 12 semester hours, they are classified as part-time students.

Students receiving scholarships and/or financial aid are generally expected to complete 12 hours of credit courses each semester. In order to receive full Veteran's Administration financial benefits, veterans must be enrolled in 12 or more semester hours each semester of attendance, for the entire semester.

It is recommended that students in good academic standing limit their academic load to 18 semester hours or fewer. Students must obtain a signature from their advisor before attempting an overload between 19-21 semester hours in a regular semester or between 10-12 semester hours in a summer term. Students interested in enrolling for more than 21 hours in a regular term or more than 12 in a summer term must submit, in writing, their plan for success during the overload and obtain signature approval from their faculty advisor. Students must then obtain signature approval from the department head with oversight over their degree program and the Vice President for Academic Affairs (or designee). Students earning a cumulative Colorado Mesa University grade point average of 2.00 or lower will be limited to 15 credit hours in the fall/spring semesters.

Student Preparation/Academic Engagement for Class Meetings

In compliance with the requirements of the U.S. Department of Education and consistent with the expectations of the Colorado Commission on Higher Education, Colorado Mesa University defines a contact hour as 50 minutes. Thus a one credit hour, 15-week course equates to 750 minutes (15 contact hours) of academic engagement plus a minimum of 1500 minutes (30 hours) of student preparation.

An undergraduate student should expect to spend on an individual course a minimum of two hours outside the classroom for every hour in the classroom. The outside hours may vary depending on the number of credit hours or type of course. This expectation applies to all courses, regardless of wherever or however the instruction is delivered. More details are available from the faculty member or department office and in CMU's Curriculum Policies and Procedures Manual.

"Academic engagement" may include, but is not limited to, submitting an academic assignment, listening to class lectures or webinars (synchronously or asynchronously), listening to a guest speaker, taking an exam or quiz, completing a writing assignment, an interactive tutorial or computer-assisted instruction, attending a study group that is assigned by the institution, conducting research (e.g., for a project, play production, etc.), contributing to an academic on-line discussion, initiating contact with a faculty member to ask a question about the

academic subject studied in the class, conducting laboratory work, completing an externship or internship.

"Student preparation" may include, but is not limited to, homework such as reading and study time, completing outside assignments and projects, practice for performance, writing lab reports, attending mandatory theatre and music performances, observing professional meetings (e.g., school board meetings for education courses), and attending faculty seminars and colloquia.

REQUIREMENTS FOR UNDERGRADUATE DEGREES AND CERTIFICATES

Students are expected to assume responsibility for planning their academic programs in accordance with University and department policy. Students are responsible for obtaining information about program requirements via this catalog in the [Program A-Z](#) (p. 752) section or in the catalog for their program year, at the beginning of their time at CMU. They are responsible for reviewing the specific requirements for the degree, minor, and/or certificate being pursued. If enrolled at CMU as a degree-seeking student prior to the current year, students can use the [prior year's program sheets](#) website and choose the appropriate year in the left hand menu. Students are urged to consult with their advisors when creating their graduation plans. The University assumes no responsibility for difficulties arising when students fail to establish and maintain contact with their faculty advisors or department heads. Students are ultimately and solely responsible for knowing the requirements for a particular degree/minor/certificate and for fulfilling those requirements.

Requirements for Degrees

Some requirements may vary with the program and academic department. Students must abide by the rules set forth in the program sheet which may be obtained from the department offering the degree they are seeking or in the specific program as listed in [Programs A-Z](#) (p. 752). If enrolled at CMU as a degree-seeking student prior to Summer 2019, use the [prior year's program sheets](#) website and choose the appropriate year in the left hand menu.

A useful advising tool for students is DegreeWorks, an online degree audit reporting tool available via MAVzone. DegreeWorks utilizes the published program sheets and the graduation requirements printed in the catalog to create an electronic list of required courses and options in each degree. It is the student's responsibility to utilize DegreeWorks and consult with their advisor in order to plan out their progress toward graduation. Any discrepancies in requirements should be reported to the Registrar's Office.

Graduation Checklist and Commencement Deadlines

Graduation documents are due the semester prior to completion of all coursework and are available through the Registrar's Office. Candidates for all degrees must accomplish the following:

- a. Meet with their advisor to create the final graduation plan which outlines how all requirements will be met by the desired graduation date. Depending on department requirements, the plan should be entered on the DegreeWorks Plans tab titled "Final Graduation Plan" or be submitted on a "Graduation Planning Sheet" form to the advisor and the Registrar's Office. The plan must be approved by the advisor either in DegreeWorks or a signature on the planning sheet.
- b. Submit the [Intent to Graduate](#) form to the Registrar's Office by:
 - October 1 for May graduates.
 - March 1 for December graduates.
- c. Register for all needed courses and complete all requirements for each degree sought.

The Registrar's Office will use the DegreeWorks report to verify degree progress for all students. It is the student's responsibility to discuss any questions or concerns from their DegreeWorks reports with their advisor or academic department head. Perceived DegreeWorks errors should be reported to the Registrar's Office for official investigation.

Commencement Ceremony Requirements and Deadlines

Students are eligible to participate in a commencement ceremony based on which semester they complete their graduation requirements. It is the student's responsibility to ensure that they are enrolled in the necessary courses or have a plan on file with the Registrar's Office using the "Graduation Planning Sheet" or DegreeWorks Plan which outlines how all requirements will be met. In the four months prior to the ceremony, students must be on track to complete all requirements to remain eligible to participate in the commencement ceremony.

Students who complete graduation requirements during the:	Are eligible to participate in the:
Summer semester ¹	December commencement
Fall semester	December or May commencement
Spring semester	May commencement

¹ Summer graduates may participate in the May ceremony only if they are registered by April 15 for one or more summer courses that do not exceed six credits or an internship course that does not exceed 12 credits. The student must be able to finish the summer coursework by the end of the summer term.

Declaring a Major

The major students list on their application is considered for admission purposes. Once admitted, students may change their major. In order to be admitted/declared into the major, the major must be accepting students, and students must meet the requirements to be admitted to the degree. Some majors have additional admission requirements. Students must visit the department for more information. Students with an undeclared major are required to declare a major or meet with an academic advisor prior to registration.

Students should submit a [Major/Minor Change](#) form to request changes to declared majors or minors. The form is routed to the academic department associated with the desired major or minor. Once processed, the student will receive an email noting approved changes and any assigned faculty advisor(s). In addition, DegreeWorks will be updated to show the new major, minor, and advisor information. Questions regarding the process should be routed to the administrative assistant in the academic department for the major/minor.

Applicable Catalog and Degree Requirements

Students must follow the Colorado Mesa University graduation requirements from the catalog of the same academic year as the program sheet for the declared major. This is true provided that

- a. students remain “continuously enrolled” until graduation and
- b. the degree, emphasis or certificate area is still accepting students into the program when students officially declare their majors.

Students shall be considered to be “continuously enrolled” if there is no interruption in enrollment of more than one semester at any given time (excluding summer sessions). If an interruption in enrollment occurs so that students are no longer “continuously enrolled” as described above, the program sheet and catalog requirements applicable at the time of reenrollment shall apply.

If a candidate for a degree is unable to meet the major requirements because of some unforeseen circumstance, it is the candidate’s responsibility to petition for an exception from his or her faculty advisor or department head.

Assessment of Student Learning

Colorado Mesa University is committed to providing quality education for students across all disciplines through a variety of campus activities. One means of continuously improving the quality of University offerings is through identifying specific learning outcomes that reflect what a graduate should know and be able to do, and then assess how well students meet those outcomes.

Assessment of student learning in academic programs is one of the processes faculty use to measure student progress in the knowledge and skills necessary to be successful. All CMU students are expected to engage in assessment activities, such as submitting course assignments, taking examinations, developing e-portfolios and/or completing surveys. These assessments center on specialized knowledge and applied learning in each major, in addition to intellectual skills that include communication, computation, and critical thinking. Student learning outcomes specific to each program of study can be found on the relevant program sheet and supporting course syllabi. Beyond the classroom, a second part of assessment involves student learning in co-curricular activities such as student life or service learning.

CMU students should plan to participate in assessment efforts and provide honest feedback that will assist the University to enhance the quality of its programs. More specifically, learning outcome data are compiled to assist faculty and staff members in making improvements in majors at all levels, Essential Learning (General Education) coursework, and student life programming. Finally, aggregated assessment results are reported to members of the CMU community, accreditation organizations, and state and federal agencies.

Deficiencies

All academic and financial deficiencies must be removed (i.e., incomplete grades and/or unpaid financial obligations) before the degree or certificate is conferred.

Final Credit Requirements Taken at Another University

Colorado Mesa University generally accepts academic credits from regionally accredited colleges and universities. When a student intends to earn a Colorado Mesa University degree, but the final credits for completing that degree program are earned at another institution, the following restrictions apply:

- a. Specific approval of the proposed institution and courses must be given by the appropriate academic department head and the Office of the Registrar at Colorado Mesa University during the time of the student’s last enrollment at Colorado Mesa University, and the student must receive a grade of “C-” or higher in each course. Some departments may have higher requirements.
- b. No more than 30 semester hours of final credit will be accepted in transfer. It is the responsibility of the student to request official transcripts of their work from other institutions to be sent to the CMU Office of the Registrar.

Requirements for Baccalaureate Degrees

- Bachelor of Applied Science (BAS)
- Bachelor of Arts (BA)
- Bachelor of Business Administration (BBA)
- Bachelor of Fine Arts (BFA)
- Bachelor of Music (BM)
- Bachelor of Music Education (BME)
- Bachelor of Science (BS)
- Bachelor of Science in Nursing (BSN)
- Bachelor of Science in Radiologic Sciences (BSRS)
- Bachelor of Social Work (BSW)

Credit Hour Distribution

Colorado Mesa University offers baccalaureate degrees in the traditional liberal arts and sciences disciplines and professional fields of study. Candidates for baccalaureate degrees must complete, in general, a minimum of 120 semester credit hours for a baccalaureate degree program. The distribution of the credit hour requirement is:

- Essential Learning (General Education):
 - Essential Learning Core Courses: 31 semester credit hours
 - Essential Learning Capstone: 4 semester credit hours
Consists of the Maverick Milestone and Essential Speech (co-requisites)
- Wellness Requirement:
 - 2 – 3 semester credit hours (varies by major)
- Major Requirements:
 - 36 – 48 semester credit hours in the program discipline; some professional programs may exceed 60 hours when including foundation courses
- Degree Category Requirements:

- 3 – 6 semester credit hours
 - BS and BSN degrees require 3 semester credit hours.
 - BA and BSW degrees require 6 semester credit hours.
 - Some BFA degrees require 3 or 6 semester credit hours. This requirement does not apply to the BAS, BBA, and some BFA degrees. Select the chosen program of study in [Programs A-Z](#) (p. 752) for more information.
- Unrestricted Electives:
 - 0 – 36 semester credit hours

Students may not use the same course to satisfy more than one category within a degree. [Program requirements](#) (p. 752) indicate the specific number of semester hours that must be earned in courses numbered 300 or higher. For most baccalaureate degree programs, students need 40 credits earned in 300-level courses or higher in order to graduate. Students must achieve a cumulative grade point average of 2.00 or higher for all courses taken and for the courses which comprise the area of the major field of study.

The program requirements, found under [Programs A-Z](#) (p. 752), list all details for the degree program for the catalog under which students are working. For students who declared a major prior to the 2018-19 academic year, details applicable to their program of study can be found under [Program Sheets for Previous Years](#). These students should check with an advisor to make sure they are referencing the correct program sheet/program requirements. All students should refer to DegreeWorks to monitor their progress and ensure that requirements are met. Throughout their time of study, students should work closely with their faculty advisors to meet graduation requirements. Students are ultimately and solely responsible for knowing the requirements for a particular degree and for fulfilling those requirements.

Using Graduate Courses for Undergraduate and Graduate Degree Credit

With the consent of the instructor and the Graduate Program Director/Coordinator, students with more than 90 earned credit hours and a cumulative GPA of 3.50 or greater will be allowed to take up to 6 total credit hours of graduate credit and apply those credits to their undergraduate degree. Acceptance of credits is contingent on approval of individual departments. Those same credits may subsequently be applied toward the completion of a CMU graduate degree. If approved, the appropriate forms will need to be submitted to the Registrar's office prior to completion of the course(s) to ensure proper assignment of credits to both the undergraduate and graduate transcripts. Note that any grades earned in these courses will affect the student's undergraduate and graduate GPA.

Academic Residency for Baccalaureate Degrees

To receive a baccalaureate degree from Colorado Mesa University, students must complete a minimum of 30 of the last 60 semester hours of credit through CMU with at least 15 semester hours in major discipline courses numbered 300 or higher.

Degree-Specific Requirements and Degree Category

The requirements below are separate from and in addition to the Essential Learning requirements (i.e., the same course cannot be used for Essential Learning, degree category and/or other major requirements)

and are included in the foundation courses or major courses. When applicable, the requirements are a part of a major's requirements and must be completed with a grade of "C" or higher.

Bachelor of Arts and Bachelor of Fine Arts

Candidates for the BA degrees shall complete six sequential semester credit hours of one classical or modern foreign language with a grade of "C" or higher. At the discretion of the foreign language faculty and with the approval of the department head, a student may satisfy this requirement by demonstration of equivalent competency. Students with two or more years of high school coursework in a foreign language may

- a. see the department head for placement in a higher level class;
- b. receive credit by successful completion of a CLEP test in that language; or
- c. pursue another language.

Bachelor of Fine Arts degrees may or may not have a one or two semester foreign language requirement as described above. Select the chosen program of study in [Programs A-Z](#) (p. 752) for more information..

Bachelor of Music

The Bachelor of Music degrees are designed for those students who desire a professional career in music performance or the music business/industry.

This degree is a PTO program. See the description for PTO programs below.

Bachelor of Music Education

The Bachelor of Music Education degree provides students with the knowledge, skills, and musicianship to become a successful music educator. Studies in music theory, history, literature, ensemble performance, and applied study give the student a strong foundation on which to build a successful teaching career.

This degree is a PTO program. See the description for PTO programs below.

Bachelor of Science and Bachelor of Science in Nursing

Candidates for the BS and BSN degrees shall complete at least three semester credit hours of the following: CSCI 110 or higher or STAT 200 or higher, or a math course at a level beyond the Essential Learning requirement. Candidates must complete each of these courses with a grade of "C" or higher. At the discretion of the Math and Statistics faculty and with the approval of the Math and Statistics department head, a student may satisfy the requirement of their program by a demonstration of equivalent competency.

Bachelor of Social Work

Candidates for the BSW degree must meet the same foreign language requirements as those listed for the BA (see above).

Bachelor of Applied Science

In order to obtain a Bachelor of Applied Science (BAS) degree from Colorado Mesa University, the following requirements apply. All BAS students are required to meet with the department BAS advisor in order to plan and schedule all classes.

- Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution. Any

exceptions to this must be approved in advance by the department BAS advisor and the department head.

- In order to meet course prerequisites, additional courses may be required. Please meet with the BAS advisor to insure all prerequisites are completed.
- If a student decides to pursue a four-year degree that is not the BAS, technical credits transferred from another institution will be counted only as electives, with the number of hours determined through a course evaluation completed by the academic department head in collaboration with the CMU's Registrar's Office.
- Students who transfer in credits from a recognized technical program must complete the requirements for an AAS degree before their technical training will be recognized for credit in the appropriate BAS program. Applicants from a non-regionally-accredited institution must meet all Essential Learning program and total credit hour requirements from a regionally-accredited institution prior to graduation from Colorado Mesa with a BAS program.
- The requirement of at least 33 hours of upper division coursework must be met by all students seeking a BAS degree, with the exception of a BAS awarded in an interdisciplinary program.
- Students are required to participate in exit examinations, assessments, and any other programs deemed necessary to comply with the college accountability requirement.

A list of specific requirements for each BAS degree is available from the appropriate academic department head of the BAS program and the Transfer Resources section of the University's web site.

Professional, Technical or Other (PTO) Programs

A professional, technical or other baccalaureate degree is one wherein the curriculum must align with the requirements or recommendations of a nationally recognized accrediting, licensing, certifying, or professional organization in order to maintain the academic integrity of the program. Any program which is proposed to be in the PTO category must identify the accrediting, licensing, certifying, or professional organization with which it aligns. The number of hours required for a major in a PTO degree may exceed 60 hours when verified by the Undergraduate Curriculum Committee to be necessary to meet degree requirements which are set by the identified accrediting, licensing, certifying, or professional organization. For more information on specific PTO program requirements, students should refer to the requirements for the degree that they are seeking. See below for a list of approved PTO programs.

- BS Accounting
- BS Sport Management
- BS Computer Information Systems
- BS Construction Management
- BS Mechanical Engineering Technology
- BSW Social Work
- BM Music with Elective Studies in Business
- BM Music Performance
- BME Music Education K-12
- BA Kinesiology
- BAS Public Administration
- BAS Radiologic Technology
- BAS/BBA Business Administration
- BAS Computer Information Systems
- BAS Criminal Justice – Post Academy

- BAS Hospitality Management
- BAS Interdisciplinary Studies
- BFA Graphic Design
- BFA Animation, Film, Photography, and Motion Design
- BFA Dance
- BFA Theater
- BFA Art
- BSN Nursing
- BSRS Radiologic Science
- BA Elementary Education
- BA Secondary Education
- BA K-12 Education
- BA Early Childhood Education
- BS Secondary Education
- BFA K-12 Education

Requirements for Teacher Licensure

Students preparing to teach in the public schools (elementary, secondary, K-12) must contact both the Colorado Mesa University Center for Teacher Education regarding state licensure requirements and the appropriate department head regarding program requirements for the major. It is crucial that students seeking teacher licensure plan their schedules with their advisors early in their academic careers, preferably the first semester of their work at Colorado Mesa University.

Teacher licensure is a separate process and must be pursued in addition to a baccalaureate degree. See the section on Center for Teacher Education.

Additional Options While Earning a Baccalaureate Degree

Multiple Concentrations within One Degree

Under many of the baccalaureate degrees, concentrations are available. Before graduating with a baccalaureate degree, a student may complete requirements for one or several of the concentrations as desired. However, after a degree has been awarded, if courses are taken that would have satisfied requirements for an additional concentration, the additional concentration cannot be added to the degree already awarded.

Students wishing to receive multiple concentrations within one degree must satisfy all the requirements for each concentration. Only one degree will be awarded. All concentrations must be declared on the petition to graduate.

Second Baccalaureate Degree

A student seeking a second baccalaureate degree at Colorado Mesa University must earn a minimum of 30 additional semester hours of credit, at least 18 of which must be in courses numbered 300 and higher. None of these 30 credits may have been used toward another baccalaureate degree, and all must be earned at Colorado Mesa University. In addition, the student must satisfy all specific program requirements of the new degree and concentration as well as any graduation requirements not previously met (e.g., the degree category). Students with a baccalaureate degree who are pursuing a second baccalaureate degree from Colorado Mesa University are exempt from the Wellness and Essential Learning Capstone requirements.

Requirements for a Minor

A minor is an approved program of study to broaden the scope of the educational experience and can be awarded with any baccalaureate degree. A minor, if chosen, must be outside the major field of study. Students are urged to consult a faculty advisor and to discuss [program requirements](#) (p. 752) for the minor sought. A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree. A student may earn up to five minors with any bachelor's degree at Colorado Mesa University.

A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites. Since a minor is optional, courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable. At least 33 percent of the minor must be in courses numbered 300 or above and at least 25 percent of the classes must be taken at Colorado Mesa University. A cumulative grade point average of 2.00 or higher for the courses used for the minor must be achieved.

Essential Learning, Lower- and Upper-Division Requirements

Learn... Express... Do...: CMU's Integrated Curriculum Model for a Baccalaureate Degree

The broad philosophy that underlies CMU's curriculum is Integrated Learning. This approach expects students to draw upon knowledge and skills from courses across disciplines, critically evaluate information, and apply what they have learned in response to a problem, argument or issue. Colorado Mesa University expects that students will graduate with a well-developed capacity for analytical thought and a heightened awareness of their world. In the university learning environment, students are expected to embrace great ideas and expressions of creative energy that define the human condition. CMU baccalaureate students explore and integrate learning from a variety of fields of knowledge while also focusing their attention on a particular area of interest. This combination produces graduates with an adaptable skill set for use throughout their personal and professional lives.

Upon graduation, a CMU baccalaureate student will be able to:

- Construct a summative project, paper, or practice-based performance that draws on current research, scholarship and/or techniques, and specialized knowledge in the discipline (specialized knowledge/applied learning);
- Analyze data critically, reason logically, and apply quantitative analysis methods correctly to develop appropriate conclusions (quantitative fluency);
- Make and defend assertions about a specialized topic in an extended well-organized document and an oral presentation that is appropriate to the discipline (communication fluency);
- Describe reasoned conclusions that articulate the implications and consequences for a particular decision by synthesizing information and methodologies (critical thinking);
- Reflect on and respond to ethical, social, civic, and/or environmental challenges at local, national, and/or global levels (personal and social responsibility);

- Find relevant sources of information, evaluate information critically, and apply the information appropriately and effectively to specific purposes (information literacy).

Essential Learning Lower Division Requirements

Essential Learning Overview

At the lower division level, success in CMU's baccalaureate programs requires participation in the Essential Learning curriculum, which at many institutions is identified as General Education. This change in CMU's description of its lower division curriculum to Essential Learning represents a faculty and staff belief that these lower division courses form an important foundation for all majors in which students begin development of skills in written and oral communication, quantitative literacy and critical thinking. These courses also allow students to integrate what they learn in one course with that from others. The ability to integrate and apply learning and the development of the critical skills listed above are essential competencies for graduates to be successful in addressing the challenges of the twenty-first century.

The Essential Learning Program has two primary components: the Essential Learning Core (31 semester credit hours) and the Essential Learning Capstone (4 semester credit hours). The applicability of these components is described in the following section.

The Essential Learning Core provides students with a foundation in the arts and sciences, based on a range of courses in mathematics, natural sciences, fine arts, humanities and social sciences that complements and enhances a student's academic major. The exposure to multiple fields of study promotes intellectual respect for diverse people, ideas and cultures. This path of study develops skills critical to academic, personal and professional success while cultivating a passion for lifelong learning. Essential Learning courses, therefore, provide important tools that enable students to fully realize their potential at the baccalaureate level. When students have completed the Essential Learning Core, they possess enhanced abilities in critical thinking, quantitative analysis and communication that they will continue to develop in their academic major.

The Essential Learning Capstone culminates in the completion of the Maverick Milestone (3 credit hours) and its co-requisite, Essential Speech (1 credit hour). Building on the Essential Learning Core, the Maverick Milestone is a 200-level interdisciplinary, topics-oriented, writing-intensive course designed to help students develop the ability to approach problems and evaluate ideas using more than one set of intellectual tools. Students must enroll simultaneously in the Milestone's co-requisite, Essential Speech, which provides students with fundamental tools for verbally presenting ideas and information learned in the Milestone. Baccalaureate-seeking students are required to meet the Maverick Milestone/Essential Speech requirements in the time frame when they have earned between 45 and 75 credit hours. This pair of courses is an important transition between Essential Learning courses and upper-division work in the major.

Thus, upon completion of CMU's Essential Learning program, a student will be able to:

- Produce effective arguments and summaries in written English.
- Present information effectively in spoken English.
- Demonstrate quantitative literacy.
- Critically examine and evaluate an argument.

- Demonstrate investigative and analytical thinking skills to solve problems.
- Select and use appropriate information or techniques in an academic project.
- Construct an academic project using techniques and methodologies from multiple disciplines.

As students transition into upper division courses, they will focus more on specialized knowledge associated with their major. The on-going emphasis on developing written and oral communication, quantitative literacy and critical thinking skills will strengthen the students' problem-solving skills and integrate ways of thinking from various areas of study. By meeting the student learning outcomes for the lower-division coursework, students will enjoy an enriched learning experience in their major while also preparing for their chosen career paths.

Applicability of the Essential Learning Program Requirements

The Essential Learning Core applies to baccalaureate and associate degrees. The only exceptions to the Essential Learning Core requirements are:

- students who have earned a baccalaureate degree, Associate of Arts degree, or Associate of Science degree from a regionally accredited institution.
- students who have successfully completed the entire Colorado Core Transfer Consortium General Education Curriculum at another institution prior to transferring to WCCC/CMU.

In both these cases, the Essential Learning Core is complete unless specific requirements are noted in the [Programs A-Z](#) (p. 752) section for each program. The student must still meet this coursework as well as any other specified lower division requirements as part of the degree program.

The Associate of Applied Science (AAS) degree includes 15 credit hours of Essential Learning Core courses as outlined on the program sheet, which can be found under [Programs A-Z](#) (p. 752).

The Maverick Milestone and Essential Speech requirement only applies to baccalaureate degrees. Once a certificate or associate degree-seeking student makes the transition to a baccalaureate program, the Essential Learning Capstone requirement takes effect and should be completed in the earliest possible semester after which 45 credit hours has been earned.

Exceptions to the Maverick Milestone and Essential Speech requirements include:

- Students who have previously earned a baccalaureate degree, earned an Associate of Arts or Associate of Science degree from another institution, as well as those who have successfully completed the entire Colorado Core Transfer Consortium General Education Curriculum at another institution prior to transfer to WCCC/CMU, are exempt from the Maverick Milestone, Essential Speech and Wellness course requirements.
- Speechmaking/Public Speaking courses (CMU's SPCH 102), whether taken from CMU or transferred from another institution, will be accepted in lieu of the ESSL 200 requirement.

All students should review the program sheet for their major, provided in [Programs A-Z](#) (p. 752), and consult with an academic advisor as they consider their course selection.

Essential Learning Core Course Requirements

Each student must complete the 31 minimum semester hours Essential Learning Core requirement as specified by the Colorado Mesa University faculty. For specific course requirements and choices, refer to the section titled "Core Courses Approved for the Essential Learning Program Requirements."

English: 6 semester credit hours

Colorado Mesa University students are required to complete English composition for the Essential Learning requirement prior to exceeding 60 semester credit hours, preferably during their first year of enrollment. Those who are advised to enroll in developmental courses should do so before taking the required 100-level courses, preferably in their first semester at CMU.

English courses must be taken in sequence and students are encouraged to take them in consecutive semesters. Students must earn a "C" or higher in ENGL 111 before taking ENGL 112 or ENGL 219, and students must earn a "C" or higher in ENGL 112 to enroll in ENGL 219. Some programs may require a minimum grade of a "B" in all English Essential Learning courses.

Students who are completing 60 hours of course work will not be permitted to enroll in any additional courses until they have passed the required English courses. Exceptions to the policy require the written permission of the appropriate academic department head for English or designee.

Mathematics: 3 semester credit hours

Colorado Mesa University students are required to complete mathematics for the Essential Learning requirement prior to exceeding 60 semester credit hours, preferably during their first year of enrollment. Those who are advised to enroll in developmental courses should do so before taking the required 100-level courses. All prerequisite mathematics courses, as well as the Essential Learning mathematics course, must be completed with a "C" or higher.

Students who are completing 60 hours of course work will not be permitted to enroll in any additional courses until they have passed the required courses. Exceptions to the policy require the written permission of the appropriate academic department head for Mathematics or designee.

For specific mathematics requirements, students should complete the courses specified on the program sheet, which can be found under [Programs A-Z](#) (p. 752). For all majors, the mathematics requirement and any required mathematics prerequisite can only be met with a grade of "C" or higher.

History: 3 semester credit hours

Choose from selected history courses.

Three additional hours of history may be chosen to fulfill the Humanities requirement below.

Humanities: 3 semester credit hours

Choose from selected English, history, language, mass communication, philosophy and speech courses.

Social and Behavioral Science: 6 semester credit hours

Choose from selected archaeology, anthropology, computer science, economics, geography, political science, psychology, sociology and speech courses.

Fine Arts: 3 semester credit hours

Choose from selected art, dance, fine arts, music and theatre courses.

Natural Sciences: 7 semester credit hours

Choose from selected biology, chemistry, environmental sciences, geology and physics courses.

At least one of the two Natural Sciences courses must have an associated lab or field component, and both the lecture and lab must be taken in all courses listed which have both, if Essential Learning credit is to be received. Courses that fit this lecture and laboratory requirement are marked with an asterisk in the Natural Sciences list for Essential Learning.

Core Courses Approved for the Essential Learning Program Requirements

The following courses are approved to meet the Essential Learning Core requirements for baccalaureate and associate degrees from Colorado Mesa University. Students may select their Essential Learning courses from the list below according to their own preference unless specific Essential Learning Core courses are prescribed for their major or excluded after consultation with their advisor. Courses used to meet the requirements for the major cannot be used to fulfill the Essential Learning requirement. Essential Learning courses, however, can be double-counted between the major and minor or between majors. Requirements for a specific major can be found under [Programs A-Z](#) (p. 752).

Essential Learning Core course requirements may also be met with an appropriate AP, CLEP or DANTES test if the test has been approved by the appropriate academic department at Colorado Mesa University. Credit may also be awarded via the Credit for Prior Learning option. See Non-Traditional Credit section in this catalog for more information.

Most CMU Essential Learning Core courses below are approved by the Colorado Department of Higher Education for statewide guaranteed transfer, as part of the gtPathways program (see section on "Colorado Department of Higher Education Statewide Guaranteed Transfer Courses").

¹ The combination of ENGL 111 English Composition I-GTCO1 (3 s.h.) and ENGL 219 Introduction to Professional Writing-GTCO3 (3 s.h.) does not meet the Essential Learning English requirement.

² Students seeking the BA, BFA, BM, BME or BSW degree must complete MATH 110 Mathematical Investigations-GTMA1 (3 s.h.) or a higher level mathematics course with a grade of "C" or higher to fulfill their mathematics competency under Essential Learning; students seeking the BS, BSN or BBA degree must complete MATH 113 College Algebra-GTMA1 (4 s.h.) or higher level mathematics course with a grade of "C" or higher to fulfill their mathematics competency under Essential Learning; students seeking the BAS degree must refer to their specific program to determine the mathematics competency requirement under essential learning.

³ Not approved for gtPathways.

⁴ Cannot be used to substitute for ESSL 200 of the Essential Learning Capstone Requirement.

⁵ Only these courses fulfill the requirement of Natural Science with an associated lab or field component. Both the lecture and laboratory must be taken if Essential Learning credit or graduation credit is to be received.

⁶ Pending review by gtPathways.

Other Lower Division Requirements for Baccalaureate Degrees

In addition to the Essential Learning Core requirements described in the previous section, students pursuing a CMU baccalaureate degree must meet other lower division requirements as described below.

Essential Learning Capstone

Students are required to complete between 45 and 75 credit hours of coursework before enrolling in the four credits associated with the co-requisite Milestone and Speech courses:

Code	Title	Semester Credit Hours
ESSL 290	Maverick Milestone ¹	3
ESSL 200	Essential Speech	1

¹ See the Maverick Milestone policies included in the General Undergraduate Academic Policies section.

Wellness Requirement

Each student must take KINE 100 Health and Wellness (1 s.h.) plus either one or two activity courses, as specified on the program sheet for each major. Program sheets can be found under [Programs A-Z](#) (p. 752).

The only exception to taking KINE 100 Health and Wellness (1 s.h.) are those students who request and pass a proficiency test at least at the 80 percent level. Contact the Kinesiology Department Head or the CMU Testing Center for additional information.

Up to six KINA courses (excluding varsity athletics) may be taken as electives toward graduation with a baccalaureate degree.

Each course is scheduled for an eight-week module and designed to emphasize and assess basic skills, related knowledge, and the importance of physical activity in promoting and maintaining personal health. Students learn and apply health fitness concepts while gaining skills relating to the specific activity. Throughout the eight weeks, students complete various assignments designed to encourage physical activity, healthy lifestyle changes, and application health and fitness concepts. Prerequisites for all "Intermediate" or part II classes: the corresponding beginning course or instructor consent.

Courses approved for the Wellness requirement for baccalaureate degrees are as follows:

Code	Title	Semester Credit Hours
KINE 100	Health and Wellness	1
KINA 100-Level	Activity Courses	1
DANC 154	Dance Team	1
DANC 160	Beginning Ballet	1
DANC 169	Beginning Modern Dance	1
DANC 174	Beginning Jazz Dance	1
DANC 177	Beginning Tap Dance	1
DANC 180	Beginning Hip Hop Dance	1
MUSP 147	Marching Band	1
OREC 104	Orienteering	1
OREC 105	Backpacking	1
OREC 108	Stand Up Paddle Boarding	1
OREC 109	Kayaking	1
OREC 110	River Rafting	1
OREC 112	Rock Climbing II	1
OREC 135	Backcountry Winter Travel	1

Note on Varsity Athletics: Only one varsity sport activity course numbered KINA 180V or KINA 180-189 may be used to meet the Wellness activity requirement. Varsity athletics may not be used as elective credit.

Upper Division Requirements

Students seeking a baccalaureate degree must earn a minimum number of upper-division semester credit hours (numbered between 300 and 499), depending on the degree and major.

A minimum of 40 semester credit hours is required for all Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Music Education, Bachelor of Science, Bachelor of Business Administration and Bachelor of Social Work degrees. Students seeking a Bachelor of Science in Nursing or Bachelor of Applied Science should refer to their program sheet, located under [Programs A-Z](#) (p. 752), for the minimum upper-division credit hour requirement.

Requirements for Associate Degrees

- Associate of Arts (AA)
- Associate of Science (AS)
- Associate of Applied Science (AAS)

Credit Hour Requirements

For most associate degrees, 60 semester credit hours in approved course work must be earned. A cumulative grade point average of 2.00 or higher must be achieved for all courses including those which comprise the area of emphasis. Some programs have additional GPA requirements.

Academic Residency for Associate Degrees

To receive an associate degree from Colorado Mesa University, students must complete a minimum of 15 of the final 30 semester hours of credit through Colorado Mesa University.

Associate of Arts (AA) and Associate of Science (AS) Degree Requirements

AA and AS degree programs are designed to prepare students for transfer into upper division collegiate work (junior level) in colleges and universities granting the Bachelor of Arts (BA) or Bachelor of Science (BS) degree. The AA degree is structured for transfer into a baccalaureate degree program, with junior standing, in the arts, humanities, social or behavioral sciences, or one of the professional fields with such disciplines as its base. The AS degree is designed for transfer into a baccalaureate degree program, with junior standing, in one of the mathematical, biological, or physical sciences, or in one of the professional fields with such disciplines as its base.

CMU's Essential Learning Core coursework for all AA and AS degree programs aligns with the Colorado Statewide General Education Core and will thus meet the lower-division General Education requirements of most baccalaureate degree programs at public institutions in Colorado. A grade of "C" or higher is required in each Core course in order to be accepted for transfer under the Core Transfer Agreements.

Students should consult with their faculty advisors to assure that the emphasis and electives chosen will satisfy requirements of the particular baccalaureate programs to which they plan to transfer.

In general, coursework for the AA or AS degree includes:

- a. Completion of the university's 31 credit hour Essential Learning Core which fulfills the state's General Education curriculum. The same

English and mathematics requirements specified for baccalaureate-seeking students also apply to those pursuing an AA or AS degree.

Students pursuing an AA or AS degree do not have to complete the 4 credit hour Essential Learning Capstone courses unless they transfer into a baccalaureate degree program. Once a student makes the transition to a baccalaureate program, the Essential Learning Capstone requirements take effect and should be completed in the earliest possible semester after which 45 credit hours have been earned.

Specific information about the Essential Learning content areas, required hours and courses is found under the baccalaureate section "Essential Learning Core Course Requirements" and "Core Courses Approved for the Essential Learning Program Requirements."

- b. Other lower division requirements. For the Wellness requirement, an associate degree seeking student must earn two semester credit hours in Kinesiology. In addition to KINE 100, a student also must complete one activity course which include: KINA 100-level courses, DANC 160, DANC 169, DANC 174, DANC 177, DANC 180, MUSP 147, OREC 104, OREC 105, OREC 108, OREC 109, OREC 110, OREC 112, and OREC 135. Up to three KINA courses (excluding varsity athletics) may be taken as electives toward graduation with an associate degree.

Students seeking an associate degree must complete the Essential Learning Core, but do not have to enroll in the Essential Learning Capstone requirements until they formally declare a major in a baccalaureate degree.

- c. Discipline classes (emphasis).
d. Electives. May be required to meet the minimum 60 hours.

Associate of Applied Science (AAS) Degree Requirements

AAS degree programs are intended to prepare individuals to enter skilled and/or para-professional occupations or to upgrade/stabilize their employment. With the exception of the Bachelor of Applied Science degree, these programs generally are not intended for transfer to baccalaureate degree programs. Selected courses, however, may be accepted toward a baccalaureate degree at some institutions. The AAS degrees available at Colorado Mesa University, along with the courses required to complete each degree, are described in the Programs of Study section in this catalog. Students should consult a faculty advisor on specific degree requirements.

Required coursework for an AAS degree includes:

- a. Essential Learning courses (15 semester credit hours)
While some courses may be specified for a major, the following minimum requirements apply:
- i. 3 semester hours of Mathematics:
 - MATH 107 or higher

Note: MATH 107 and MATH 108 do not meet the mathematics Essential Learning (General Education) requirement for students who subsequently elect to pursue an AA, AS, or a baccalaureate degree.

- ii. 6 semester hours of Communication:

- ENGL 111 and
 - ENGL 112 or SPCH 101 or SPCH 102
- iii. 6 semester hours of other Essential Learning Core courses:
 - 6 semester hours Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities.

- b. Wellness Requirement: 2 semester hours
For the Wellness requirement, an associate degree seeking student must earn two semester credit hours in Kinesiology. In addition to KINE 100, a student also must complete one activity course which include: KINA 100-level courses, DANC 160, DANC 169, DANC 174, DANC 177, DANC 177, DANC 180, MUSP 147, OREC 104, OREC 105, OREC 108, OREC 109, OREC 110, OREC 112, and OREC 135. Up to three KINA courses (excluding varsity athletics) may be taken as electives toward graduation with an associate degree.
- c. Discipline classes (emphasis).
- d. Additional lower division requirements as relevant to some degrees, e.g. prerequisites.

Double Emphasis within an Associate Degree

Students who elect to pursue a double emphasis within one degree must satisfy all the requirements for each emphasis. Only one associate degree will be awarded, and all emphases must be declared on the petition to graduate.

Second Associate Degree

A minimum of 15 semester hours of credit beyond that required for the first associate degree must be earned by a student seeking a second associate degree at Colorado Mesa University. A minimum of one semester of residency at Colorado Mesa University is also necessary. In addition, the student must satisfy all specific requirements for the new degree. Only one AA and only one AS degree may be granted to any student.

Reverse Transfer

Colorado Mesa University participates in the [Colorado Reverse Transfer](#) initiative. This program allows students who transfer between Colorado two-year and four-year institutions to combine credits to apply toward an associates degree. Any student who recently attended Colorado Mesa University and then transferred to another Colorado institution may transfer credit back to CMU for consideration in an existing associates degree program. Qualified students are notified via email in March of each year and must choose to opt-in. Contact the Registrar's Office for more information.

Requirements for Undergraduate Certificates

Professional Certificate Requirements

Colorado Mesa University offers upper division, professional certificates for students interested in broadening their knowledge and/or enhancing job-related skills in a professional field of study. The requirements for professional certificates vary and include coursework in a discipline in addition to a mix of lower division Essential Learning Courses. Candidates for a Professional Certificate at Colorado Mesa University must satisfy all requirements specified on the certificate's program sheet with a cumulative grade point average of 2.00 or higher for all courses

taken to satisfy program requirements. A grade lower than a “C” in the program of study will not be counted toward meeting the certificate’s requirements. To meet academic residency at least fifty percent of the credit hours for the certificate must be earned through Colorado Mesa University. Students should contact the appropriate academic department head for specific certificate requirements.

Technical Certificate Requirements

Candidates for a Technical Certificate at Colorado Mesa University must satisfy all requirements specified on the certificate’s program sheet with a cumulative grade point average of 2.00 or higher for all courses taken to meet the certificate requirements. A grade lower than “C” in the program of study will not be counted toward meeting the certificate’s requirements. To meet academic residency, at least fifty percent of the credit hours for the certificate must be earned through Colorado Mesa University.

Colorado Statewide Guaranteed Transfer Courses

Colorado Department of Higher Education Statewide Guaranteed Transfer Courses

Colorado Mesa University offers a wide variety of Essential Learning courses that are approved for Colorado’s Guaranteed Transfer Pathways (gtPathways) General Education Curriculum, which ensures their acceptance for transfer to other Colorado public institutions of higher education. Additionally, CMU accepts the transfer of gtPathways approved courses from other Colorado public institutions of higher education. Guaranteed transfer courses are universally transferable across these institutions and are applicable to Essential Learning/ General Education requirements within all associate and baccalaureate degree programs.

GT Codes

To determine if a CMU course is eligible for gtPathways transfer, check for a GT code in the course description. Courses approved through Colorado’s gtPathways General Education Curriculum are grouped into five content areas, four of which have sub groupings:

Code	Title	Semester Credit Hours
Arts and Humanities:		
GT-AH1	Arts and Expression	
GT-AH2	Literature and Humanities	
GT-AH3	Ways of Thinking	
GT-AH4	World Languages ¹	
Communication:		
GT-CO1	Introductory Writing	
GT-CO2	Intermediate Writing	
GT-CO3	Advanced Writing	
Mathematics:		
GT-MA1 ²		
Natural and Physical Sciences:		
GT-SC1	Lecture Course with Required Laboratory	
GT-SC2	Lecture Course without Required Laboratory	
Social and Behavioral Sciences:		

GT-HI1	History
GT-SS1	Economic or Political Systems
GT-SS2	Geography
GT-SS3	Human Behavior, Culture, or Social Frameworks

¹ Intermediate, i.e., 200-level.

² Note: no subgroups.

All courses (except as noted) listed under the [Essential Learning Core Course Requirements](#) (p. 71) section, in addition to STAT 200, have been approved by the Colorado Department of Higher Education (CDHE) as guaranteed transfer courses. They also are designated in the [Course Descriptions](#) (p. 769) section of this catalog. More information is available at the [CDHE transfer website](#) as well as from the [CMU Registrar’s Office statewide transfer programs website](#) or a faculty advisor.

The above links are to general information on graduate programming, policies, and procedures at Colorado Mesa University. For details on specific graduate programs, including degree requirements and suggested course sequencing, please refer to program information found through the [Areas of Study](#) (p. 92) or [Programs A-Z](#) (p. 752) sections.

General Graduate Admissions Policies & Procedures

Admission Criteria

Faculty in each degree program establish admission standards for the individual graduate program, which may exceed the minimum standards set by Colorado Mesa University's Graduate Studies Advisory Committee. Applicants should consult the Graduate Program Coordinator for any additional admission requirements.

Individuals seeking to enter CMU as graduate students who have not yet been accepted into a graduate program or do not desire a credential may apply for "Non-Degree Seeking" admission. Each applicant must possess a baccalaureate degree from an accredited college or university, or equivalent certification. Faculty can make recommendations for admission of non-degree seeking students who do not meet the criteria to the Director of Graduate Studies.

An individual without a baccalaureate degree may be admitted to a master's degree program only if he or she is admitted to a combined program at CMU, such as the MBA 3+2 program.

Admission Procedures

To begin a graduate program at CMU, a student must possess a baccalaureate degree from an accredited institution. The following items must be submitted to the Admissions Office online:

- a. A completed Application for Admission to Graduate Programs and a \$50 application fee. The fee is non-refundable and is not applicable toward tuition. The application form may be found on the Graduate Studies webpage or the admissions homepage under "graduate application".
- b. Official transcripts of all college and university work must be sent directly to the Graduate Admissions Coordinator by email at graduate@coloradomesa.edu or directly to the coordinator by each institution attended. Unofficial copies of transcripts can accompany the original application, but official copies will be required before full admission is granted. Transcripts received directly from students cannot be accepted except for advising purposes. The transcripts of students who previously attended CMU must still be requested from the Registrar's Office.
- c. Test scores, if required by the program, from either the Educational Testing Services for the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT), or from the Psychological Corporation for the Miller Analogies Test (MAT) must be provided. Students must request the scores be sent to the Admissions Office. See the specific degree program for required examinations.
- d. Acceptance for admission is determined by the specific program's Graduate Admission Committee, which acts as the selection committee for new or readmitted applicants. Final approval for admission is subject to Department Head approval with notification to the Director of Graduate Studies.
- e. Academic departments offering graduate programs may admit a student based upon supplemental/alternate criteria that have been established by the major department. If someone is recommended for admission who does not meet CMU's graduate program standards, a rationale must be provided stating the factors which were considered in recommending the student: GPA in the discipline; letters of recommendation; samples of the student's work; GRE, MAT or GMAT scores; or other compelling factors. The Director of Graduate Studies reviews all recommendations for admission below the standard.

Applicants should check with individual programs regarding specific application and admission deadlines. After the program faculty make a final decision on admission, the student will be notified of the outcome.

Admission Expiration

Students who do not enroll in the semester in which they are admitted and who do not notify the program should reapply for admission and adhere to program admission deadlines, deadlines, the Graduate Program Coordinator can move an admission term if it is within one year, if it is beyond that the student must re-apply.

Students who wish to defer beginning of the program may request deferred admission for a period of up to one calendar year with permission of the Program Director/Coordinator, Academic Department Head, and Director of Graduate Studies, the Graduate Program Coordinator can move an admission term if it is within one year, if it is beyond that the student must re-apply. .

Conditional Admission

Conditional admission refers to applicants admitted pending the receipt of application requirements specified by either the Admissions Office and/or the academic department. Applicants for admission may be accepted into a graduate program or with the provision that they complete deficiencies as noted in and by the dates specified in their acceptance letter.

International Student Admission

To be considered for admission, a prospective international graduate student who has or will be seeking an F-1 student visa, must apply for admission and satisfy all requirements with the [graduate program](#) as well as the [Office of International Student Admissions and Programs](#).

International applicants are required to:

- a. Provide all university transcripts from previous institutions. For courses taken and degree(s) earned at a college/university outside of the United States, a professional transcript evaluation from an approved company must be received. Please see the [International Graduate Admissions](#) webpage for information on approved foreign transcript evaluation options and verify with the graduate program if a specific type of evaluation is needed and/or from a specific company. In most cases, course descriptions or syllabi are required to determine content of individual courses.
- b. Provide proof of English proficiency. Submit exam scores from within two years for the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Please see the [International Graduate Admissions](#) webpage for more information and verify with the graduate program if a specific test is required for that program.
- c. Complete and have notarized the CMU Statement of Financial Support and submit this form, along with official bank statement(s), demonstrating proof of sufficient financial resources. Costs and forms may be obtained from the [International Graduate Admissions](#) webpage.
- d. For registration purposes, all international students are required to maintain health insurance. Students are automatically enrolled in CMU's international student group insurance plan. Contact the [International Programs Office](#) for wavier information if adequate coverage is already maintained.
- e. For registration purposes, all international students are required to comply with the Colorado law regarding the measles, mumps and rubella immunizations. A Colorado Mesa University official [immunization form](#) must be completed.

International students on an F-1 or J-1 visa are required to register for a full-time course load of a minimum of six credit hours per semester, or minimum full-time, as determined by the graduate program. International students on a visa are limited in regards to the number of web/online credits in which a student can enroll each semester. Students are encouraged to discuss this and other regulations with the International Programs Office.

Enrollment Prior to Admission

Students who have applied for admission to a graduate program at CMU are not permitted to enroll for more than nine credit hours in that graduate program as a non-degree seeking student. A hold shall be placed on the student's registration, and the student cannot continue to enroll until an admission decision has been reached. A student's

application must be complete, and the program faculty must recommend either a regular admission or must deny admission by the earning of nine credit hours.

Financial Aid

Students should consult the Financial Aid Office for eligibility requirements of undergraduate & graduate programs.

Admission Appeals

An applicant who has been denied admission to a graduate program or who has received Conditional Admission may request reconsideration by writing to the Graduate Program Department Head within 10 days of the date of denial or notification of conditional admission status. Requests should include the reasons for requesting reconsideration, along with supporting materials and information that was not submitted with the original application. Appeals should follow the appeal process listed in the [Graduate Policies and Procedure Manual](#).

Academic Advisor

Each student shall be assigned a Graduate Advisor upon acceptance into a graduate program by the appropriate department. The student's Graduate Advisor, in consultation with the student's Graduate Committee or Graduate Program Director/Coordinator, should approve all courses applied to graduation requirements. The Graduate Advisor also is responsible for assisting students with questions regarding their academic programs such as expectations for comprehensive examinations, thesis, and/or practicum as well as professional advising and guidance for academic and professional endeavors. Any advisor-approved deviations from published program requirements or degree plans must be approved by the Graduate Program Director/Coordinator, the Academic Department Head and the Director of Graduate Studies.

Note: The importance of the Graduate Advisor cannot be overstated. Advising includes all aspects of students' present and future academic and professional planning. It is often the Graduate Advisor who is able to help students conceptualize their academic program within the context of their own professional goals and aspirations.

Degree Plan

After acceptance into a graduate program, each student shall meet with his or her Graduate Advisor and determine a degree plan that, when completed, leads to the attainment of the graduate degree. The degree plan shall be constructed before the student completes one semester or nine credit hours of coursework. This degree plan should follow the guidelines of CMU and the academic department. The respective degree plan shall list all courses, including those needed for any remediation and/or weaknesses deemed by the academic advisor, and practicum, thesis, and research requirements necessary to complete the specific degree. The degree plan should have the approval of the student, the academic advisor, the Graduate Advisor, the Graduate Program Director/Coordinator, and the Academic Department Head. Upon completion of the degree plan and all requirements, and upon the recommendation of the Faculty, the student shall be awarded the respective graduate degree.

Note: An addendum can be submitted to the degree plan provided the approval of the student, the Graduate Advisor, the Graduate Program Director/Coordinator, the Academic Department Head, and the Director of Graduate Studies are secured approving the changes.

Transfer Credit

Students can transfer up to 30% from another accredited institution into their degree plan for a graduate degree provided they meet the general transfer policies of CMU and are approved by the Graduate Advisor, the Graduate Program Director/Coordinator, and the Academic Department Head.

- a. Transfer work is not applied in the calculation of the graduate GPA.
- b. Grades earned on transferred courses should be equivalent to B- or better. Only courses graded by "letter" grades are transferable.
- c. Courses graded S/U or P/F are not transferable (this includes thesis, dissertation, practicum, and capstone credits that may be awarded letter grades at other institutions).
- d. Transfer courses should be numbered as graduate level (5XX, 6XX, 7XX) according to the institution's graduate transcript. Transfer courses should be from regionally accredited institutions of higher education that offer equivalent level degrees or graduate level coursework.
- e. Graduate internship credit transferred from another institution may be considered for transfer credit. Requirements may vary by academic program.
- f. Thesis credit or credit for a master's project is not eligible for transfer credit unless the thesis or research project is a collaborative or joint effort between CMU and another accredited institution offering graduate programs and degrees.
- g. After beginning their graduate program of study at CMU, students wishing to take one or more courses at another institution for graduate credit should first consult their Graduate Program Director/Coordinator. Permission may be granted following the procedure for transferring the credits earned at other institution as described above.
- h. Non-credit courses, including lifetime learning seminars and continuing education courses, are not eligible for transfer credit.
- i. Students wishing to take one or more courses at another institution for graduate credit after beginning their graduate program of study at CMU must first consult their program graduate advisor. Permission may be granted following the procedure for transferring the credits earned at other institution as described above.

Students who wish to transfer credit must provide the Registrar's Office with complete documentation showing the course(s) to be transferred. The student then must present the complete transcript to the program advisor for approval or disapproval. Any transfer credits must be included on the degree plan. Courses requested for transfer must meet all criteria for credit transfer (see general transfer policies) to be approved by the department.

Students seeking transfer credit may also be asked to provide the published course description, and learning objectives, course requirements, including assignments and grading criteria, information on the course syllabus, textbook, etc. to the program advisor for consideration.

Academic Integrity

Academic misconduct includes, but is not limited to, plagiarism, the appropriating of written, artistic, or musical composition of another, or portions thereof; or the ideas, language, or symbols of the same and passing them off as the product of the student's own mind. Plagiarism

includes not only the exact duplication of another's work but also the lifting of a substantial or essential portion thereof.

Regarding written work in particular, direct quotations, statements which are a result of paraphrasing, summarizing the work of another, and other information which is not considered common knowledge must be cited or acknowledged. As long as students adequately acknowledge their sources and as long as there is no reason to believe that they have attempted to pose as the originator, students shall not be charged with plagiarism even though the form of the acknowledgement may be unacceptable. However, students should be aware that most professors require certain forms of acknowledgment and that adequate referencing (or acknowledgement) may be a part of the grading criteria for specific graduate coursework or program requirements. More information on academic misconduct can be found in the [Maverick Guide](#)

Graduate Degree Requirements

Graduate students have higher expectations placed upon them than undergraduate students. These expectations are in the areas of scholarship, participation, leadership, and integrity. Graduate coursework is designed to advance students personally and professionally and produce scholars, researchers, and practitioners educationally empowered as critical thinking citizens and agents of innovation, opportunity, and change.

For more information on policies and procedures concerning graduate study at CMU, please refer to the [Graduate Policies and Procedure Manual](#).

Graduate Degree Requirements

Credits in a master's degree program should be designated minimally at the 500 level. The student's Graduate Advisor, in consultation with the student's Graduate Committee or Graduate Program Director/Coordinator, should approve all courses applied to graduation requirements.

Up to nine credit hours of course work completed as a non-degree student may be credited subsequently to a degree program with the approval of the Graduate Program Director/Coordinator in consultation with the student's Graduate Advisor and the program's Graduate Committee.

Note: Upon prior written permission of the instructor, the academic advisor, and the department head, a currently enrolled undergraduate student may take up to six 500-level graduate credit hours and apply them to an undergraduate degree in addition to a graduate degree.

Doctoral Degree Requirements

A minimum of 60 credit hours is required for doctoral degrees. Additional graduate hours may be required as specified by individual programs.

The doctoral degree requires a culminating activity in the form of a dissertation, practicum, research project, or capstone experience. In addition, some programs require a qualifying examination for advancement to candidacy approximately midway through the program and may require an oral defense at the completion of the program. Refer to academic departments for specific culminating degree requirements or to find out if a qualifying examination is necessary.

Doctoral programs also require a formal paper and oral presentation in defense of the culminating activity. In the case of programs requiring a qualifying examination, eligibility to take the exam is determined by

the Program Director/Coordinator, based on the completion of program specific policies. Examinations are graded as Pass/Fail as determined by members of the student's Graduate Committee. The result of the exam are forwarded to the Director of Graduate Studies.

Other criteria and requirements for doctoral programs may exist. Refer to specific guidelines for each graduate program.

Doctoral coursework should be a learning experience for both the student and the faculty member. The nature of doctoral coursework is to expand the boundaries of known knowledge and to create and explore new ideas, processes, artistic endeavors, or other scholarly works that engage members of the discipline. In this process of exploration, the doctoral student is expected to engage in a scholarly project in his/her field or conduct research that contributes to existing bodies of knowledge at a professional level. This effort should include taking what the student knows, incorporating new material and ideas, and advancing the field. Students should produce scholarly works acceptable to the professional communities in their fields as a result of doctoral coursework and other requirements.

Masters Degree Requirements

A minimum of 30 credit hours is required for master's degrees. Additional graduate hours may be required as specified by individual programs.

In 3+2 (or similar) programs, credit used for the graduate portion of the program, should minimally be at the 500 level.

Master's degrees require a culminating activity(ies) in the form of a thesis, practicum, research project, capstone experience and/or comprehensive exam. In addition, some programs require a qualifying examination for advancement to candidacy approximately midway through the program and may require an oral defense at the termination of the program. Refer to academic departments for specific culminating activity requirements.

Coursework progressing toward the master's degree should illustrate students' commitment toward mastery of a subject beyond the level expected of an undergraduate student. This mastery should be evidenced in the student's attendance, participation in discussions, mentoring of others, research quality, and general interactivity within their field of study. Students in a master's program should be able to assess the quality of research articles in their field, interpret analyses of data, and evaluate the validity of arguments from a variety of sources. In addition, writing at the master's level should be noticeably advanced compared to that of the undergraduate level. These advances should take the form of engaging the body of literature on a topic, scholarly writing to include literature reviews, appropriate formatting, and extensive analysis of sources of information. As a result of master's coursework, students should possess the ability to explore, manage and converse regarding information in the field with the integrity necessary for consistency with other professional peers.

Graduate Certificate Requirements

Graduate certificates contain a minimum of 6 credit hours.

Graduate certificate programs may be embedded within graduate degree programs, but such certificates are not automatically awarded upon the completion of a graduate degree. Students must apply to have the certificate awarded.

Graduate certificates are not required to address all graduate-level student learning outcomes, but are required to address some of the institutionally established outcomes.

Dual-listed Courses

Undergraduate courses may not be taken for graduate credit. Within undergraduate courses that are dual-listed (for example 460/560), the graduate student is expected to perform at a higher level and complete more extensive and challenging academic work than the undergraduates in the same course.

Note: At least 70 percent of a student's master's degree program must be in courses that are at the 500 level and not dual listed. All courses in the doctoral program must be at the 500 level or above.

Grades

Grades of "A," "B," "C," "D," and "F" are used and computed in the GPA. Other marks used are "I" (incomplete); "W," (withdrawn); "NC," (no credit); and "P," (passing). At the discretion of graduate programs, Pass/Fail (or "P/F") grades may be allowed for research, practicum, and thesis courses. Grades of "I," "W," "NC," and "P" are not counted in determining GPA. Courses for which "C," "D," "F," "I," "W," or "NC" grades are awarded shall not count in graduate degree programs and shall not satisfy program deficiency requirements.

Incomplete ("I") grades are temporary grades given to a student only in an emergency case and at the discretion of the instructor.

At the end of the semester following the one in which an "I" is given, the "I" becomes the grade that is submitted by the instructor to the Registrar's Office. If the instructor does not submit a grade by the deadline for that semester, the grade becomes an "F." For example, a grade of "I" given spring semester should be addressed by the end of the following fall term unless a longer term is specified by the instructor.

Extension of the time to complete work may be made in exceptional circumstances at the discretion of the instructor. A student with an "I" grade, however, may not change the "I" by enrolling in the same course another semester, except in the case of thesis and dissertation courses, which require continuous enrollment while progressing toward the degree. Grades can be changed, using the Special Grade Report, within the first two weeks of the semester following the receipt of the original grade by the Registrar's Office.

GPA Requirement

Students must have a GPA at least a 3.0 to graduate.

Students may not apply coursework with a grade of "C" toward graduation requirements for a graduate program. Students may have the option to repeat a course for grade improvement to a "B" or better, depending on individual program guidelines.

As allowed by specific program requirements, students may repeat a maximum of two different courses at the graduate level for up to 6 credit hours. No course may be repeated more than once, except in the case of thesis and dissertation courses, which require continuous enrollment while progressing toward the degree. When a course is repeated, the highest grade earned is computed into the student's GPA. All attempted courses and grades remain in the academic record but are not computed in the overall average. In these cases, transcripts will contain a statement

indicating the grade point average has been re-computed and stating the basis for re-computation.

Students with a cumulative grade point average of less than 3.0 are placed on academic probation. Students have one semester to improve to good standing. Two semesters of probationary status may result in dismissal from the graduate program.

Transfer of Graduate Credit

Upon approval, up to 30% of the credit hours required for a graduate degree may be transferred from another accredited institution. Individual programs may have more stringent transfer limits. Please consult the individual program for specific limits.

Requests for credit to be transferred toward a graduate degree are reviewed by the appropriate program Graduate Admission Committee. Recommendations are then reviewed by the Department Head and sent to the Registrar for review and documentation. The desired transferred credit should represent graduate-level work relevant to the degree being sought with course content and level of instruction resulting in student competencies at least equivalent to those of currently enrolled students at CMU as determined by the program's Graduate Admission Committee.

Dismissal from Program

Students may be dismissed from a degree program for the following reasons:

- The student earns a "D" or "F" in a course.
- The student is placed on probation for a second time.
- The student fails to maintain a 3.0 cumulative GPA for two semesters.
- The student fails the written and/or oral comprehensive examination or its approved equivalent as specified by specific program requirements.
- The student submits an unsatisfactory thesis, practicum paper, or culminating activity.
- The student exceeds the time allowed for completion of the program prior to completing all degree requirements.
- The student has not maintained a "B" or better in all credit-bearing courses.
- The student violates the criteria or procedures in this manual or set forth by the department in its graduate handbook.
- The student fails to behave in a professional manner, this includes instances of academic misconduct.
- The student fails to make satisfactory progress on the remedial terms specified in a formal letter of probation.
- The student on probation for earning a "C" earns a "C" in a second course.
- The student is found to have committed research misconduct by the Office of Sponsored Programs. (see Section Section XII.)

Students are notified of their dismissal in a written letter from the Graduate Program Director/Coordinator after the director has consulted with the student's Graduate Committee and the Academic Department Head. The letter will specify the date and exact reason for dismissal and copy will be sent to the Director of Graduate Studies and the University Registrar. Appeals of dismissal follow the Appeals Process outlined in the [Graduate Policies and Procedure Manual](#)

Program Time Limits

Master's degree students have six calendar years from the date of first registration in a Colorado Mesa University graduate program to complete the program. At the end of the fifth year or after 10 semesters, the Graduate Program Director/Coordinator should notify students that they have one academic year or two semesters to complete their program requirements.

Doctoral students have 10 calendar years from the date of first registration in a Colorado Mesa University graduate program to complete the program. At the end of the eighth year or after 16 semesters, the Graduate Program Director/Coordinator should notify students that they have two academic years or four semesters to complete their program requirements.

Students may submit a written request for a time extension to their advisor and the Graduate Program Director/Coordinator, which should be approved by the Academic Department Head and Director of Graduate Studies. Departments or programs may set shorter time requirements.

Graduation Checklist

Graduate students must apply for graduation no later than March 1 for fall graduates and October 1 for spring graduates.

Students should consult their Graduate Advisor and have a graduation plan saved to the DegreeWorks Plans tab outlining the final term courses and requirements.

Students also should submit an [Intent to Graduate](#) to the Registrar's Office.

Graduation requirements are reflected in DegreeWorks in accordance with the specific degree plan, the CMU Catalog, the Graduate Policy and Procedures Manual, and individual program requirements that are department-specific and specified in the CMU Catalog. In the event that there is a discrepancy, the Graduate Policy and Procedures Manual takes precedence. If the DegreeWorks audit does not correctly reflect all remaining requirements, including individual student adjustments, the Registrar or Registrar's designee should be notified of necessary corrections via email for official investigation.

The catalog used to meet graduation requirements is normally the one published for the academic term during which the student first enrolled and after which remains continuously enrolled. The student may specify this or a later version of the catalog under which he or she wishes to be evaluated and should then meet the requirements in that catalog. The student may select a subsequent catalog up to and including the current one, provided the student was in attendance at CMU during the selected academic year.

CMU reserves the right to modify or change catalog provisions, based on existing mechanisms, in order to fulfill the CMU Role and Mission. Such changes or modifications may be implemented as applicable to all students at the time the changes are made, unless there is written approval stating otherwise from the Office of Graduate Studies and the Vice President of Academic Affairs. CMU reserves the right to terminate or modify program requirements, content, and the sequence of program offerings from time to time for educational or financial reasons that it deems sufficient to warrant such actions.

Research Activities

Research is an important component of graduate study. Specific research requirements and activities are defined by each degree program.

Sponsored Programs

The Office of Sponsored Programs mission is to provide support to faculty and other university personnel in obtaining and administering external funds for research and other scholarly activities. Research at Colorado Mesa University includes explorations that lead to the discovery and dissemination of new knowledge, the development of new applications of existing knowledge, the development of new paradigms for teaching and learning, and/or related creative activities in the fine arts.

The Office of Sponsored Programs is responsible for protecting university interests through the review of sponsored project proposals to non-university sources, contract and grant award review and negotiation, administration of award funds, and policy and procedure initiation and implementation.

Human Subjects and Animal Research

All research conducted by faculty, staff, or students that involves human subjects must be reviewed and approved by the Human Subjects Committee (also known as the Institutional Review Board or IRB). All research conducted by faculty, staff, or students that involves animals must be reviewed and approved by the Institutional Animal Care and Use Committee (IACUC). Graduate student research to fulfill course, thesis, or dissertation requirements is also subject to this regulation when animal or human subjects are used.

The Office of Sponsored Programs encourages all students to meet with their advisor if they intend to do research with humans or animals. Human subject research can include something as simple as an interview or survey. Failure to obtain approval by the IRB or IACUC before beginning a research project can be grounds for rejecting a thesis or dissertation and constitutes a serious breach of academic research ethics and federal law.

The policy, procedure, and forms required for human subject or animal research are available on the [Sponsored Programs](#) website. In addition, students may contact the Office of Sponsored Programs at osp@coloradomesa.edu.

Research Misconduct

In order to fulfill its obligations and ensure the public's trust, Colorado Mesa University (CMU), as a state institution of higher education, is committed to maintaining the integrity of all research, scholarship, and creative activities. To this end, CMU will take action to prevent research misconduct and, in cases where misconduct is alleged, will actively investigate the allegations.

In accordance with federal regulations, the University has in place a Misconduct in Research Policy. This policy applies to the conduct of research and/or related activities, whether the research is funded or not and regardless of: the field of study; presentation and/or publication of results; process of applying for funds; expenditure of project funds; and fiscal reporting on the use of project funds. This policy applies to all faculty, students, administrators, and staff on all Colorado Mesa

University campuses. A copy of this policy may be found on the [Research Policies and Procedures](#) web page.

Graduate Certificate in Applied Mathematics

This program is inactive and is not currently accepting new students.

The Graduate Certificate in Applied Mathematics is intended to provide licensed secondary mathematics teachers the post-secondary teaching credentials required by the Higher Learning Commission and to enable other professionals to enhance their knowledge of applied mathematics. For more complete program information: [Applied Mathematics \(Graduate Certificate\)](#) (p. 341).

Graduate Certificate in Rhetoric and Literary Studies

The graduate certificate in Rhetoric and Literary Studies invites students to explore literary and cultural texts, creative writing, linguistics, and rhetorical and literary theory. Students gain a better sense of the discipline and contribute their own scholarly voice to the conversation. The certificate prepares those who already have an undergraduate degree in English and need advanced expertise to teach composition and literature in concurrent enrollment high school settings and undergraduate institutions of higher education. The program may also appeal to those who want to explore particular fields in greater depth, test aptitude for graduate school, or take steps towards an MA in English or Education.

The graduate certificate in Rhetoric and Literacy Studies is fully online to accommodate working professionals. It can be combined with additional coursework, through CMU's Center for Teacher Education, into a [Masters of Arts in Education degree](#).

The certificate program focuses on key expertise that develop close readers, persuasive writers, and critical thinkers:

- Rhetoric and Composition
- Literature
- Literary Theory
- Creative writing
- Linguistics

For more information, including program requirements, see [Rhetoric and Literary Studies \(Graduate Certificate\)](#) (p. 351).

Graduate Certificate in Social Science

The Graduate Certificate program in Social Science provides licensed secondary social science teachers the credentials required by the Higher Learning Commission to teach concurrent college History or Political Science courses. The program also provides professionals and post-graduates an opportunity to take individual courses to enhance their education in History and Political Science or to serve as a bridge to other graduate programs in the social sciences.

Completion of the Graduate Certificate in Social Science requires 18 semester hours of study with an option to complete a Master of Arts in Education at Colorado Mesa University. The same graduate admission

process applies to both the Master of Arts program and the Graduate Certificate program.

This program is inactive and is not currently accepting new students. Classes within the Graduate Certificate in Social Science will no longer be taught after Summer 2023.

Contact Information

Department of Social and Behavioral Sciences
Lowell Heiny Hall 413
970.248.1696

Requirements

See [Social Science \(Graduate Certificate\)](#) (p. 352) for information on program requirements.

Graduate Certificates in Education

The Center for Teacher Education offers graduate certificates in Educational Leadership and Exceptional Learner/Special Education. Both of these certificates may lead to a [Master of Arts in Education](#) (p. 85) if the candidate chooses to pursue that track and are Colorado Department of Education approved, endorsement programs:

- Educational Leadership (EDLD) = Principal License
- Exceptional Learner/Special Education (EDSE) = Special Education Generalist Ages 5-21

Requirements

Specific requirements for each graduate certificate in education are linked below. For information on the Initial Teacher Licensure graduate certificates, please see graduate programming.

- [Educational Leadership \(EDLD\) \(Graduate Certificate\)](#) (p. 343)
- [Exceptional Learner/Special Education \(EDSE\) \(Graduate Certificate\)](#) (p. 345)

Initial Teacher Licensure

Students already holding a Bachelor's degree may pursue an initial teaching license at CMU in Elementary, Secondary, or K-12 Physical Education. Secondary licensure may be obtained in: Science, Social Studies, English, Mathematics, or Spanish.

For students pursuing coursework and preparation that leads solely to an initial teaching license, the Center for Teacher Education offers an intensive post-baccalaureate preparation program that can be completed in 12 months. The same coursework is also available at the undergraduate level in a 3-4 semester sequence at a somewhat slower pace. Either of these options lead to a recommendation for Colorado's initial teaching license with successful program completion.

The initial teacher preparation coursework is incorporated in the MA, Education degree, allowing a student to complete teacher licensure and a master's degree in five semesters. The coursework begins at the post-baccalaureate initial teacher licensure level and includes internship experiences. The Master of Arts in Education core content follows in the second year; these courses are shown in the Graduate Education programs section.

First steps, prior to formal application, require review of bachelor's degree or other previous coursework transcripts. Leveling courses may be

required prior to admission into the graduate program. Please contact the Center for Teacher Education at 970.248.1786 for more information or see the [Center for Teacher Education website](#).

Requirements Elementary ITL

- [Education: Initial Teacher Licensure - Elementary \(Graduate Certificate\)](#) (p. 346)
- [Education: Initial Teacher Licensure - Elementary \(MA, Education\)](#) (p. 331)

Secondary ITL

- [Education: Initial Teacher Licensure - Secondary \(Graduate Certificate\)](#) (p. 348)
- [Education: Initial Teacher Licensure - Secondary \(MA, Education\)](#) (p. 332)

K-12 Physical Education ITL

- [Education: Initial Teacher Licensure K-12 Physical Education \(Graduate Certificate\)](#) (p. 349)
- [Education: Initial Teacher Licensure K-12 Physical Education \(MAEd\)](#) (p. 334)

Up to nine credit hours may be taken as non-degree seeking and later applied to program requirements. Up to nine graduate credit hours of applicable courses, with a grade of B or higher, may be transferred from a regionally accredited institution into the master's degree program. Courses for transfer must be approved by the CTE Graduate Committee to meet program requirements. MA core classes are not accepted for transfer.

Master of Arts in Criminal Justice Leadership and Policy

The Criminal Justice Leadership and Policy program is a graduate academic program offered in the Department of Social and Behavioral Sciences, leading to a Master of Arts in Criminal Justice Leadership and Policy (MACJLP) degree.

Criminal Justice practitioners and scholars are highly qualified, multi-skilled public safety professionals who collaborate with other entities in the American criminal justice system as well as the general public to prevent and control crime, ensure due process, rehabilitate convicted offenders, and implement evidence-based practices.

The MACJLP program is a six term (including summers) academic program. Admission into the program is competitive. The MACJLP program ensures the highest quality of education by offering collective learning experiences that emphasize leadership, policy, and administration, which enable students to pursue numerous career paths and promotional advancement within the criminal justice field. Graduates of the MACJLP program are well positioned to secure employment and promotional opportunities in policing, the courts system, corrections, or continuing graduate studies.

Requirements

Important information about this program:

- 33 semester hours for the Master of Arts in Criminal Justice Leadership and Policy.
- MCJLP Program acceptance (see the catalog and program website for specific admissions requirements).
- CRMJ 511 Foundational Seminar to be completed within a student's first 15 credit hours.
- All courses and course sequencing are required and must be completed at CMU or through applicable transfer credit.
- Complete a culminating graduate-level project (Master's Capstone).

See [Criminal Justice Leadership and Policy \(MA\)](#) (p. 267) for a complete overview of all requirements, important information, and suggested course sequencing for the program.

For additional details on admission requirements, please visit the [Social and Behavioral Sciences Department](#) page of the university website.

Master of Arts in Education

The Master of Arts in Education meets the needs of people already holding a baccalaureate or higher degree who wish to earn a teaching license or current teachers who wish to gain expertise in additional state endorsement areas. The degree is awarded after successful completion of all required college coursework. In addition to the cognate area coursework, the master's program provides the student with twelve hours of core knowledge in education research; curriculum theory and design; culture and pedagogy; education technology; and a master's capstone project.

The current cognate areas are Educational Leadership (EDLD), Rhetoric and Literary Studies, Teaching and Leadership (EDTL), Exceptional Learner/Special Education (EDSE), and Initial Teaching Licensure (ITL) (Elementary, Secondary, Physical Education).

Admission to the program follows the guidelines for graduate admission procedures indicated in this catalog. The [application packet](#) is available online and lists additional admissions materials required for acceptance.

Capstone

The Master of Arts in Education requires the successful completion of a capstone experience (EDUC 600). See individual program information for details.

Requirements

Specific requirements for each Master's degree in education are linked below. Each cognate group can also be completed as a graduate certificate for candidates not wishing to complete a full master's degree program. The same graduate admissions process applies to graduate certificates. Requirements for graduate certificates may be found under graduate programming.

- [Educational Leadership \(EDLD\) \(MA, Education\)](#) (p. 327)
- [Initial Teacher Licensure - Secondary \(MA, Education\)](#) (p. 332)
- [Initial Teacher Licensure - Elementary \(MA, Education\)](#) (p. 331)
- [Initial Teacher Licensure - K-12 Physical Education \(MA, Education\)](#) (p. 334)
- [Rhetoric and Literary Studies \(MAEd\)](#) (p. 338)
- [Teaching and Leadership \(MA, Education\)](#) (p. 336)
- [Exceptional Learner/Special Education \(EDSE\) \(MA, Education\)](#) (p. 329)

Master of Business Administration

The Colorado Mesa University online MBA is a challenging program designed to prepare graduates for the changing business world. The degree is awarded after successful completion of 36 semester hours of rigorous study. The program is designed to provide the student with a broad background in business. To this end, students acquire knowledge of management operations, an appreciation of the interrelationships of the functional areas of business, an understanding of the economic, political and social environment in which businesses function, and behavioral and leadership skills that are essential to the manager's role in the implementation of business decisions. The MBA program endeavors to provide an atmosphere conducive to the development of each student's ability to think in a creative manner. The program makes extensive use of the latest learning management systems to disseminate course materials, lectures, simulations, group projects, case studies, and applied research. All of our courses are taught by qualified graduate faculty with exceptional experience in higher education and industry.

The program is open to all baccalaureate-holding applicants who can demonstrate academic preparation in the core requirements including statistics, computer literacy, management, finance, marketing, and accounting, regardless of the undergraduate field of study. Students without this background or adequate depth of background will be required to complete leveling courses.

For information about admission to the MBA Program, please see [department specific requirements](#).

Candidates not meeting all the specific requirements may be admitted under conditional status.

MBA for Those Without a Business Degree

The opportunity for study is available for the non-business degree holder. For these students, a series of leveling courses will be identified individualized to each student.

Leveling Courses

An applicant must demonstrate—through academic transcripts, CLEP, MOOC, or a formal test-out process—an appropriate background in Financial Accounting, Business Information Technology, Managerial Finance, Principles of Management, Principles of Marketing, and Business Statistics. An applicant without this background will be required to score at a sufficient level on an entrance qualifying examination administered by the CMU MBA Office. The exam covers the topics listed above. A student can prepare for the exam through independent study based on a program-supplied study guide. CMU courses that provide appropriate background are: ACCT 201, CISB 101, FINA 301, MANG 201, MARK 231, and CISB 241 or STAT 241. This requirement must be met prior to taking related coursework.

General Policies

Up to nine credit hours may be taken in a "non-degree seeking student" status and later applied to the program requirements. Up to thirty percent of the credit hours required, with a grade of "B" or higher, may be transferred from a regionally accredited institution into the program. Additional information may be found in the [Transfer Credit section](#) (p. 78).

Requirements

See [Business Administration \(MBA\)](#) (p. 178) for a complete overview of all requirements, important information, and suggested course sequencing for the program.

Please see the MBA Director for Track Courses (6–15 hours). Tracks include the Professional Track, the Management Information Systems Track, and the Sports Management Track.

Students are required to meet with their advisor and submit information by the appropriate deadlines.

All graduate courses for the MBA are listed in the [Course Descriptions](#) (p. 769) section of this catalog in the prefix areas of [Accounting \(ACCT\)](#) (p. 770), [Business Administration \(BUGB\)](#) (p. 794), [Computer Information Systems \(CISB\)](#) (p. 800), [Economics \(ECON\)](#) (p. 817), [Education \(EDUC\)](#) (p. 818), [Entrepreneurship \(ENTR\)](#) (p. 837), [Finance \(FINA\)](#) (p. 841), [Human Resource Management \(HRMA\)](#) (p. 859), [Kinesiology \(KINE\)](#) (p. 860), [Management \(MANG\)](#) (p. 867), and [Marketing \(MARK\)](#) (p. 869).

Master of Physician Assistant Studies

The Master of Physician Assistant Studies (MPAS) Program consists of didactic and clinical academic work over the course of 27 months. Graduates of the program will be eligible to sit for the national certification examination for physician assistants through the National Commission on the Certification of Physician Assistants (NCCPA) and will be able to apply for licensure through the Board of Medical Examiners in the state in which they wish to practice medicine. The MPAS Program has been granted **Accreditation-Provisional** status by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA *Standards* or when a program holding Accreditation-Provisional status appears to demonstrate continued progress in complying with the *Standards* as it prepares for the graduation of the first class (cohort) of students.

For updates on program accreditation and general program information, please visit the [Masters of Physician Assistant Studies](#) website.

For a complete list of program requirements, please see the [program sheet](#) (p. 629).

Master of Science in Athletic Training Program Overview

The Master of Science in Athletic Training program is a two-year, 38-credit-hour, master's degree, delivered via in-person, online, and hybrid formats. The degree employs course content that focuses on the competencies needed to practice the art and science of athletic training, leading to compassionate and exceptional care meeting the regional needs of western Colorado and beyond. In alignment with the mission of the Department of Kinesiology, the program emphasizes promoting wellness and physical activity across a diverse population of patients.

Students will learn the importance of self-care and fostering resilience and wellness in themselves to extend better care to others.

Program Accreditation

Colorado Mesa University Master of Science in Athletic Training is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The program earned a 5-year initial accreditation in February 2021 and holds the accreditation status of *Active-in good standing*.

Requirements

The [Master of Science in Athletic Training](#) offers two options for admission. See the program below for complete overview of all requirements, important information, and suggested course sequencing.

- [Athletic Training \(MS\)](#) (p. 146)

Master of Science in Nursing

The Master of Science in Nursing (MSN) program prepares nurses for roles as family nurse practitioners (FNPs), adult-gerontology nurse practitioners (AGNPs), or nurse educators (NEs) in healthcare or academic settings. Graduates formulate clinical, administrative, or policy decisions to promote health among patients, families, or communities along the continuum of wellness and illness. The MSN curriculum is based on competencies and guidelines established by the Colorado Board of Nursing, the American Association of Colleges of Nursing (AACN), Quality and Safety Education for Advanced Nursing Practice (QSEN), and the National Task Force for Quality Nurse Practitioner Education (NTF). Graduates of the MSN FNP and AGNP tracks are eligible to take the national nurse practitioner certification examinations and are eligible for state licensure as nurse practitioners. Graduates of the MSN NE track are eligible to take the national certified nurse educator (CNE) examination. Graduates of the MSN program, regardless of track, may also pursue doctoral education (e.g., PhD, DNP, EdD).

Admission to Colorado Mesa University does not guarantee admission to the MSN Program. The MSN Program is accredited by the Commission on Collegiate Nursing Education (CCNE).

MSN students choose one of three tracks as their substantive area of study: FNP, AGNP, or NE. MSN courses are delivered on-line, allowing students to reside in their home communities. However, students travel to complete clinical hours (e.g., rural health). Objective standardized clinical exams (OSCEs), and graduate program student intensive (GPSI) sessions are held in both in-person and online formats.

MSN coursework, regardless of track, includes advanced pharmacology, advanced pathophysiology, advanced health assessment, nursing theory, and evidence-based practice. The FNP track includes coursework in primary care (pediatrics, adults, older adults) and care of rural/underserved populations. Students in the MSN FNP track are required to complete a minimum of 700 direct care hours. The AGNP track includes coursework in primary care (adults, older adults) and care of rural/underserved populations. Students in the AGNP track are required to complete a minimum of 600 direct care hours. The NE track includes coursework in curriculum evaluation and design, technology in the classroom, and teaching strategies. Students in the MSN NE cognate are required to complete a minimum of 250 clinical hours, 90 of which must be in direct care. Clinical rotations vary by track, but may include academic, inpatient, long-term care, primary care, and community-based sites.

MSN coursework ends with a capstone service-learning project during which students partner with health care and/or academic stakeholders

to develop, implement, or evaluate a variety of projects. Students present their capstone projects publicly prior to graduation. Students are expected to submit their original work for presentation at area conferences.

Admission to the MSN Program

Students must have the following for the duration of their time in the Graduate Nursing Program.

- Earned bachelor's degree in nursing (BSN) from an accredited program.
- Unencumbered registered nurse (RN) license from a US state or territory. This must be maintained for the duration of enrollment in the Graduate Nursing Program.
- Cardiopulmonary resuscitation (CPR) for health care providers. This must be maintained for the duration of enrollment in the Graduate Nursing Program.
- Malpractice insurance as a graduate nursing student. Nurse practitioner students must obtain nurse practitioner student malpractice insurance once they begin clinical coursework. All students must maintain malpractice insurance for the duration of their enrollment in the Graduate Nursing Program.
- Criminal background check.
- Drug screen.
- Current immunizations. This must be maintained for the duration of enrollment in the Graduate Nursing Program. Exemptions are accepted by the program, based on the state of Colorado's policies. Immunization status may be evaluated by health care organizations prior to student placement.
- All students must provide proof of training in cultural competency and the Health Insurance Portability and Accountability Act (HIPAA) prior to enrollment in clinical courses.

General Policies

Up to nine credit hours may be taken as a non-degree seeking status and later applied to program requirements. Up to 18 credits of applicable courses, with a grade of "B" or higher, may be transferred from an accredited institution. Additional information may be found in the Transfer Credit section.

Requirements

The [Department of Health Sciences](#) offers three Master of Science in Nursing cognate options. See the programs below for complete overviews of all requirements, important information, and suggested course sequencing.

- [Adult-Gerontology Nurse Practitioner \(MSN\)](#) (p. 593)
- [Family Nurse Practitioner, Nursing \(MSN\)](#) (p. 595)
- [Nursing Education, Nursing \(MSN\)](#) (p. 597)

Master of Science in Occupational Therapy

The MS Occupational Therapy program prepares students with a baccalaureate degree to become qualified occupational therapists. The didactic portion of this program includes four terms of on-campus coursework followed by two terms of experiential and hybrid coursework. The program requires successful completion of academic courses

and integrated fieldwork concluding with two, 12-week offsite fieldwork experiences.

Accreditation

The profession's accrediting body, the American Occupational Therapy Association (ACOTE), has granted Candidacy status to this program. With Candidacy status, the first class of students were admitted for studies in January 2022. A required self-study of the program was submitted to ACOTE in November 2022. If granted Pre-Accreditation, ACOTE will perform an onsite visit in the Summer 2023 and the decision for full accreditation would follow in August 2023. If granted full accreditation, graduates of the program will be eligible to sit for the national certification examination for occupational therapists through the National Board for Certification in Occupational Therapy (NBCOT) and will be able to apply for licensure through the professional licensure board in the state in which the graduate wishes to practice.

ACOTE can be contacted at:

Accreditation Council for Occupational Therapy Education (ACOTE®)
6166 Executive Blvd., Suite 200
North Bethesda, MD 20852-4929
Ph: 301.652.6611
Email: accred@aota.edu

Requirements

A cumulative minimum grade point average (GPA) of 3.0 in undergraduate coursework and minimum 2.7 GPA for prerequisite coursework is required from an accredited university. Evidence of completion of the Bachelor's degree and all prerequisites must be received prior to the start of the program. Please check with the CMU Occupational Therapy Program Director or the Occupational Therapist Centralized Application Service (OTCAS) for the complete list of additional admission requirements.

For additional details on admission requirements, please visit the [Department of Kinesiology](#) page of the university website.

Master of Science in Sport Management

Program Overview

The Master of Science in Sport Management serves to develop students' conceptual skills, theoretical comprehension, and practical knowledge in order that they are prepared to become the next generation of leaders in the sport industry. The degree leads to a wide variety of career choices. Sport management graduates work in school, university and college settings as athletic administrators, public relations/marketing directors, or in professional or amateur sports areas.

Admission Requirements

- Applicants must have a baccalaureate degree from a regionally accredited institution.
- Applicants must achieve a score of 385 or higher on the Miller Analogies Test or a score of 286 or higher on the Graduate Record Examination (850 on the old exam) (verbal and quantitative) or 380 on the GMAT. Students must request the scores be sent to the CMU Admissions Office.
- Applicants must have a grade point average (GPA) of at least 3.0 on a 4.0 scale on the most recent 60 credit hours.

- Applicants must provide a formal Statement of Goals that should explain in at least 500 words why they want to be admitted into the program and what they plan to do with the degree.
- Applicants must provide a current resume or curriculum vitae.
- Applicants must provide two letters of recommendation from individuals who can speak to the applicant's academic potential and professional capabilities. One should be from a university faculty member who is familiar with the applicant's work as a student. One should come from a supervisor in which he/she has evaluated the applicant's current or prior work.

Conditional Admission Requirements

- Students not satisfying the unconditional admission requirements may be conditionally admitted to the program pending satisfactory completion of the first 9 semester hours with a 3.0 grade point average.
- Students not satisfying conditional admission requirements will be dropped from the program for one calendar year, after which time the student must petition for readmission.

Program Requirements

For a complete list of program requirements, please see the [program sheet](#) (p. 688).

Master of Social Work

Overview

The MSW program has HLC approval and is in the CSWE accreditation process.

"The purpose of the social work profession is to promote human and community well-being. Guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, the purpose of social work is actualized through its quest for social, racial, economic, and environmental justice, the creation of conditions that facilitate the realization of human rights, the elimination of poverty, and the enhancement of life for all persons, locally and globally. To fully realize our commitment to social justice, social workers must engage in anti-racist, culturally responsive social work practice at the individual, family, group, organizational, community, research, and policy levels, informed by the theories and voices of those who have been marginalized. In an ever-shifting social and environmental context, social work is agile, responsive, and generative.

Social work education at the baccalaureate, master's, and doctoral levels shapes the profession's future through the education of competent professionals, the generation of knowledge, the promotion of evidence-informed practice through scientific inquiry, and the exercise of leadership. Social work education prepares competent policy practitioners to develop socially responsible policy, address the policy implications of their work, and implement strategies that result in a more engaged public and better educated policymakers to address inequalities and inequities.

Social workers share a commitment to promoting social welfare, helping people of all backgrounds overcome their unique challenges, advocating for social and economic justice for all members of the community, and embodying a professional code of ethics" (CSWE, 2022).

Professional social workers are found in a wide variety of settings including schools, hospitals, mental health clinics, senior centers, elected

office, private practices, prisons, military, corporations, and in numerous public and private agencies that serve individuals and families in need. They often specialize in one or more of the following practice areas:

- Alcohol and drug abuse, addictions, substance abuse treatment centers
- Psychiatric Social Work (mental health centers, medical hospitals, psychiatric hospitals)
- Child welfare (abuse and neglect; adoption, foster care)
- Clinical - Private Practice (therapist, mental health, addictions, family, divorce)
- Forensic Social Work (jails, prisons, courts, public defenders, district attorney, alternative defense, specialty courts)
- Geriatric facilities (nursing homes, home health, Alzheimer's units)
- Hospice & Palliative Care (end of life care)
- International Social Work (United Nations, WHO - global social work; economic stress; liberation, community organizing)
- Medical Social Work (inpatient and outpatient hospitals, health clinics, specialty clinics)
- Military & Veterans services (United States & International)
- Police Department (co-responder, crisis intervention, therapist)
- School Social Work (public or private schools K-12)
- Trauma and Violence (combat, sexual violence, human trafficking, refugee, natural disaster)

Important Information about this program:

- The MSW program offers Foundation and Advanced Standing.
- MSW Foundation Program is open to all students who have completed a baccalaureate degree from an accredited university. This is a two-year program that requires 74 credits with 1050 hours of practicum/internship training.
- MSW Advanced Standing is open to all students who have completed a baccalaureate of Social Work degree from a CSWE accredited university. CMU allows admission into the advanced standing program with the completion of your baccalaureate of Social Work within the last five years. This is a one-year program and requires 44 credits with 600 hours of internship training.
- The MSW is a degree that allows for licensure in all 50 states.
- MSW Program Acceptance required prior to enrollment. Please see the program website for specific admission requirements.

Requirements

The [Department of Social and Behavioral Sciences](#) offers two Master of Social Work options. See the programs below for complete overviews of all requirements, important information, and suggested course sequencing.

- [Social Work: Advanced Standing \(MSW\)](#) (p. 666)
- [Social Work: Foundation \(MSW\)](#) (p. 669)

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree is for nurses who are interested in an advanced practice role as a family nurse practitioner (FNP) and nurse leader in healthcare systems. The DNP-FNP curriculum is based on guidelines and competencies established by the Colorado Board of Nursing, American Association of Colleges of Nursing (AACN),

and the National Task Force for Quality Nurse Practitioner Education (NTF). DNP graduates work as FNPs in direct patient care and as leaders in academic, healthcare, or community-based systems. DNP-FNP program graduates are eligible to take the national FNP certifying examination and are eligible for licensure as an FNP. Courses are delivered via an on-line format allowing students to reside in their home communities. However, students travel to complete clinical hours (e.g., rural health). Courses are delivered via an on-line format allowing students to reside in their home communities. Objective standardized clinical exams (OSCEs), and graduate program student intensive (GPSI) sessions are held in both in-person and online formats. The DNP program requires students to complete a minimum of 1000 clinical hours, 800 of which must be in direct care. The remainder of the hours may be in indirect care (e.g., simulation, leadership, health policy), including hours spent on the students' DNP scholarly projects.

Admission to the University does not guarantee admission to the program. The DNP program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Coursework includes advanced pharmacology, advanced pathophysiology, advanced health assessment, primary care across the lifespan (pediatrics, adults, older adults), rural/underserved populations, quality improvement, health policy, leadership, and health systems change. The last two years of the program include students' completion of their DNP scholarly projects. The scholarly project requires students to develop, implement, and evaluate a primary care-focused intervention to address a clinical gap in practice. Students present their scholarly project publicly and submit their original work for publication at the conclusion of the DNP program.

Admission to the DNP-FNP Program

Students must have the following for the duration of their time in the Graduate Nursing Program.

- Earned bachelor's degree in nursing (BSN) from an accredited program.
- Unencumbered registered nurse (RN) license from a US state or territory. This must be maintained for the duration of enrollment in the Graduate Nursing Program.
- Cardiopulmonary resuscitation (CPR) for health care providers. This must be maintained for the duration of enrollment in the Graduate Nursing Program.
- Malpractice insurance as a nurse practitioner student. This must be maintained for the duration of enrollment in the Graduate Nursing Program.
- Criminal background check.
- Drug screen.
- Current immunizations. This must be maintained for the duration of enrollment in the Graduate Nursing Program. Exemptions are accepted by the program, based on the state of Colorado's policies. Immunization status may be evaluated by health care organizations prior to student placement.
- All students must provide proof of training in cultural competency and the Health Insurance Portability and Accountability Act (HIPAA) prior to enrollment in clinical courses.

General Policies

Up to nine credit hours may be taken as non-degree seeking and later applied towards program requirements. Up to 18 credits of applicable

courses, with a grade of "B" or higher, may be transferred from an accredited institution. Additional information may be found in the Transfer Credit section.

Requirements Program of Study

See [Doctor of Nursing Practice - Family Nurse Practitioner \(DNP-FNP\)](#) (p. 591) for information on program requirements.

Doctor of Physical Therapy

The Physical Therapy program is a professional program leading to a Doctor of Physical Therapy (DPT) degree.

Physical therapists are health care professionals that are movement experts who improve quality of life by prescribing exercise, incorporating hands-on care and patient education.

The professional curriculum will be 8 semesters in duration, 105 credits and include 34 weeks of full-time clinical education over 4 separate rotations. The rotations will be 6, 8, 8 & 12 weeks in duration. Students will complete these rotations at a variety of clinical sites (e.g. acute care, long term rehabilitation, outpatient orthopedic, etc.). The program has been designed to meet all requirements associated with Commission on Accreditation in Physical Therapy Education (CAPTE).

To practice physical therapy, students must be licensed in the state in which they desire to practice. To obtain licensure, students must graduate from an accredited program and pass the National Physical Therapy Exam (NPTE).

Effective April 25, 2023, Colorado Mesa University has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; phone: 703-706-3245; email: accreditation@apta.org). If needing to contact the program/institution directly, please call 970-248-2266 or email dptprogram@coloradomesa.edu.

Candidate for Accreditation is an accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program may matriculate students in technical/professional courses. Achievement of Candidate for Accreditation status does not assure that the program will be granted Initial Accreditation.

Candidacy is considered to be an accredited status, as such the credits and degree earned from a program with Candidacy status are considered, by CAPTE, to be from an accredited program. Therefore, students in the charter (first) class should be eligible to take the licensure exam even if CAPTE withholds accreditation at the end of the candidacy period. That said, it is up to each state licensing agency, not CAPTE, to determine who is eligible for licensure. Information on licensing requirements should be directed to the Federation of State Boards of Physical Therapy (FSBPT; www.fsbpt.org) or specific state boards (a list of state boards and contact information is available on FSBPT's website).

For a complete list of program requirements, please see the [program sheet](#) (p. 627).

CENTER FOR TEACHER EDUCATION (LICENSURE)

The Center for Teacher Education offers licensure programs in Elementary, Secondary, K-12, and Early Childhood. An initial license to teach in public schools in the State of Colorado requires each teacher candidate to complete a degree including a sequence of professional education courses that includes extensive field experience in classrooms. Teaching licensure coursework and field experiences are completed through the Center for Teacher Education, while the content degree coursework is completed through the academic department of the discipline area, with both departments coordinating to assist teacher candidates in completing the program. Formal admission to the Center for Teacher Education is required of all students expecting to obtain a Colorado Educator License in any teaching field.

In addition to the Bachelor's programs that lead to a teaching license, for students who already possess an undergraduate degree, The Center for Teacher Education offers an intensive, post-baccalaureate pathway to a teaching license through Initial Teacher Licensure programs (See Graduate Programs in Education below).

The Center for Teacher Education also offers added endorsement, graduate programs in Special Education and Principal Licensure. These graduate, endorsement programs may be completed as graduate certificates or applied towards a Master of Arts in Education (See Graduate Programs in Education below).

In order to complete all licensure requirements in a timely manner it is important that students contact the Center as soon as possible after enrolling at Colorado Mesa University. For information on the graduate and/or MA programs, see the Graduate Programs section.

[Center for Teacher Education Website](#)

Early Childhood Education - Special Education

(Colorado Initial Teaching License in Early Childhood Education, Birth to Age 8 AND Colorado Teaching Endorsement in Early Childhood Special Education: Birth to Age 8).

Students should meet with a Center for Teacher Education advisor as soon as possible in order to obtain information specific to the early childhood/early childhood special education license program. The

components of the Colorado Mesa University early childhood/early childhood special education license program are as follows:

- Academic Major: All early childhood/early childhood special education license students must complete the requirements for a Bachelor of Arts in Education.
- Admission: Formal admission to the Center for Teacher Education, usually after their sophomore year.
- Professional Education Sequence for Early Childhood/Early Childhood Special Education Teacher License/Endorsement: Coursework must be taken in the prescribed sequence; see Suggested Course Plan in the links below.
 - [Education: Early Childhood Special Education, Early Childhood Education \(BA\)](#) (p. 307)

All teacher license programs require passing the PRAXIS II professional license exams prior to beginning the student teaching semester.

Elementary Education Licensure – Undergraduate

(Colorado Initial Teaching License in Elementary Education, Grades K through 6.)

Students should meet with a Center for Teacher Education advisor as soon as possible in order to obtain information specific to the elementary education license program. The components of the Colorado Mesa University elementary license program are as follows:

- Academic Major: All elementary license students must complete the requirements for a Bachelor of Arts in Liberal Arts (Interdisciplinary Studies), with a concentration in English, Mathematics, OR Social Science.
- Admission: Formal admission to the Center for Teacher Education (usually prior to junior year).
- Professional Education Sequence for Elementary Teacher License: Coursework must be taken in the prescribed sequence; see Suggested Course Plan in the links below.
 - [Education: Elementary Teaching, English, Liberal Arts \(BA\)](#) (p. 480)
 - [Education: Elementary Teaching, Mathematics, Liberal Arts \(BA\)](#) (p. 484)
 - [Education: Elementary Teaching, Social Science, Liberal Arts \(BA\)](#) (p. 487)

All teacher license programs require passing the PRAXIS II professional license exams prior to beginning the student teaching semester.

Secondary Education Licensure – Undergraduate

Colorado Initial Teaching License in Secondary Education, Grades 7 through 12, Bachelor of Arts or Science in one of the following academic disciplines: Biology, English, History, Mathematics, Physical Science (Geology), or Spanish.

Students should meet with a Center for Teacher Education advisor as soon as possible in order to obtain information specific to the secondary education license programs. The following are components of the Colorado Mesa University secondary license programs:

- a. Academic Major: All secondary license students must complete the requirements for a Bachelor of Arts or Science in one of the following academic disciplines: Biology, English, History, Mathematics, Physical Science (Geology), or Spanish.
- b. Admission: Formal admission to the Center for Teacher Education (usually during the junior year).
- c. Professional Education Sequence for Secondary Teacher License: EDUC Coursework must be taken in the prescribed sequence. Refer to the applicable program listed below.
 - [Education: Secondary Education, Biological Sciences \(BS\)](#) (p. 169)
 - [Education: Secondary Education, English \(BA\)](#) (p. 368)
 - [Education: Secondary Education, Geosciences \(BS\)](#) (p. 415)
 - [Education: Secondary Education, History \(BA\)](#) (p. 440)
 - [Education: Secondary Education, Mathematics \(BS\)](#) (p. 530)
 - [Education: Secondary Education, Spanish \(BA\)](#) (p. 680)

All teacher license programs require passing the PRAXIS II professional license exams prior to beginning the student teaching semester.

K-12 Education Licensure – Undergraduate

(Colorado Initial Teaching License in Art, Music or Kinesiology, Grades Kindergarten through 12)

Students should meet with a Center for Teacher Education advisor as soon as possible in order to obtain information specific to the K-12 Education license program in Art, Music or Kinesiology. Following are the components of the Colorado Mesa University K-12 teacher license programs.

- a. Academic Major: K-12 license students must complete the requirements for the Bachelor of Arts in Kinesiology, a Bachelor of Fine Arts in Art, or a Bachelor of Music Education.
- b. Admission: Formal admission to the Center for Teacher Education (usually during the junior year).
- c. Professional Education Sequence for K-12 Teacher Licensure: Coursework must be taken in the prescribed sequence. Refer to the applicable program listed below.
 - [Education: K-12 Education, Art \(BFA\)](#) (p. 130)
 - [Education: K-12 Education, Kinesiology \(BA\)](#) (p. 469)
 - [Education: K-12 Music Education \(BME\)](#) (p. 579)

All teacher license programs require passing the PRAXIS II professional license exams prior to beginning the student teaching semester.

Graduate Programs in Education

Acceptance of Registration and Admission

Acceptance of registration by Colorado Mesa University and admission to any education program at the University does not constitute a contract or warranty that the University will continue to offer the program in which a student is enrolled. The University expressly reserves the right to change, phase out or discontinue any program. The listing of courses contained in any University bulletin, catalog or schedule is by way of announcement only and shall not be regarded as an offer of contract. The University expressly reserves the right to:

- add or delete programs and/or courses from its offerings,
- change times or locations of courses or programs,
- change academic calendars without notice,
- cancel any course for insufficient registrations, or
- revise or change rules, charges, fees, schedules, courses, requirements for degrees, and other policies or regulations affecting students, including, but not limited to, evaluation standards, whenever the same is in the best interests of the University.

NOTE: Students should consult the Financial Aid Office for eligibility requirements of undergraduate & graduate certificates.

Assessment of Student Learning

Colorado Mesa University is committed to providing quality education for students across all disciplines through a supportive learning environment. Assessment of student learning is a process used to measure student progress in the knowledge and skills necessary to be successful after graduation. All students will participate in the process by engaging in assessment activities through submitting course assignments, taking examinations, completing surveys and/or writing standardized tests. Evidence collected through assessment assists faculty in program improvement at the certificate, undergraduate and graduate level.

Student learning at CMU is centered on specialized knowledge and applied learning in the discipline as well as the intellectual skills of communication fluency, quantitative fluency, information literacy, personal and social responsibility, and critical thinking. Assessment

also involves student learning at the co-curricular level in a variety of areas. Data gathered will be evaluated in aggregate form and reported to respective members of the CMU community as well as accreditation organizations. Assessment is a key element to improve teaching and learning, and to enhance the quality of programs at the University.

Accounting Program Description

Accounting is a degree with lots of possibilities. Every business needs accounting expertise, whether it's a Wall Street law firm, a professional sports team, a movie production company or a rock band. With the proper accounting education, employment options are endless.

The Public Accounting concentration provides students with basic business skills as well as the accounting knowledge needed to pass the Certified Public Accountant (CPA) exam. Graduates of CMU's program have a very high CPA exam pass rate and are heavily recruited by local and regional CPA firms.

The General Accounting concentration is designed for undergraduate students who do not wish to pursue CPA certification. This program provides students with basic business skills as well as accounting knowledge needed to work in an accounting department in private industry or government.

The Accounting minor offers students majoring in other areas the opportunity to enhance their degrees with basic accounting knowledge. Since all businesses rely heavily on accounting functions, graduates with an accounting minor have a competitive advantage, particularly in the area of decision-making. Accounting knowledge is critical for business and, independent of major, the more accounting knowledge students have, the better prepared students will be for management positions.

The Accounting program also offers an option of a five year (3+2) program which allows students to graduate with a Bachelor of Science in Accounting and a Master of Business Administration. This combination prepares students to earn the hours needed to sit for the CPA exam. Through careful planning and coordination, students can complete their four-year degree and begin their graduate degree, finishing both simultaneously.

Programs of Study Bachelors/Minors

- [Accounting \(Minor\)](#) (p. 99)
- [Bachelor of Science in Accounting + Master of Business Administration \(3+2\)](#) (p. 94)
- [General Accounting, Accounting \(BS\)](#) (p. 94)
- [Public Accounting, Accounting \(BS\)](#) (p. 97)

Bachelor of Science in Accounting + Master of Business Administration (3+2)

The accounting program also offers an option of a five year (3+2) program which allows students to graduate with a Bachelor of Science in Accounting and a Master of Business Administration. This combination provides students with the opportunity to earn the hours required to be licensed as a Certified Public Accountant (CPA). Through careful planning and coordination, students can complete their four-year degree and begin their graduate degree, finishing both simultaneously. For more information, please see [3+2 Program](#). For more information about our accounting degrees and programs, please see [Bachelor of Science in Public Accounting](#).

The Colorado Mesa University Master of Business Administration (MBA) degree is a challenging program designed to prepare graduates for the changing business world. The degree is awarded after successful completion of 36 semester hours of rigorous study. The program is designed to provide the student with a broad background in business. To this end, students acquire knowledge of management operations, an appreciation of the interrelationships involved in business, an understanding of the economic, political and social environment in which businesses function, and behavioral skills that are essential in the manager's role in the implementation of business decisions. The MBA program endeavors to provide an atmosphere conducive to the development of each student's ability to think in a creative manner and to effectively problem solve. The program makes extensive use of the latest learning management systems to disseminate course materials, lectures, simulations, group projects, case studies, and applied research. All of our courses are taught by qualified graduate faculty with exceptional experience in higher education and industry. More information about our MBA Program can be found at [MBA Program Information](#).

General Accounting, Accounting (BS)

Degree: Bachelor of Science
Major: Accounting
Concentration: General Accounting
Program Code: 3104

About This Major . . .

Accounting is the one degree with 360 degrees of possibilities. Every business needs accounting expertise, whether it's a Wall Street law firm, a professional sports team, movie production company, or a rock band. With the proper accounting education, your employment options are endless. This program is designed for undergraduate students who do not wish to pursue CPA certification. The General Accounting concentration provides students with basic business skills as well as the accounting knowledge needed to work in an accounting department in private industry or government.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Utilize relevant and critically evaluated accounting information to apply accounting knowledge and skills in appropriate business contexts and transfer knowledge and skills to new situation. (Critical Thinking Information Literacy)
- Communicate clearly, appropriately, and persuasively to the audience, both orally and in writing. (Effective Communication)
- Effectively work in a team. (Applied Learning)
- Recommend appropriate ethical actions. (Ethical Awareness)
- Develop professional relationships with CMU stakeholders (CPAs and community members) by assisting area residents with annual income tax return filing requirements. (Personal Social Responsibility)
- Apply quantitative analysis methods correctly to develop appropriate business conclusions. (Quantitative Fluency)
- Demonstrate a mastery of the accounting body of knowledge appropriate for the bachelor's degree level. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Public Accounting, Accounting (BS)

Degree: Bachelor of Science
Major: Accounting
Concentration: Public Accounting
Program Code: 3108

About This Major . . .

Accounting is the one degree with 360 degrees of possibilities. Every business needs accounting expertise, whether it's a Wall Street law firm, a professional sports team, movie production company, or a rock band. With the proper accounting education your employment options are endless. The Public Accounting concentration provides students with basic business skills as well as the accounting knowledge needed to pass the Certified Public Accounting CPA exam. Graduates of this program have a very high CPA exam pass rate and are heavily recruited by local and regional CPA firms. Most graduates will have job offers months before they graduate.

This program is designed to be the undergraduate component of the 3+2 accounting program which can earn the graduate a Bachelor of Science in Accounting and a Master of Business Administration (MBA) in five years. In order to meet Colorado CPA licensing requirements (150 hours), students will need to complete the 3+2 program. The Public Accounting concentration is the required pathway for the 3+2 program and, in conjunction with the 3+2 program, will provide the curriculum needed for CPA licensure.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Utilize relevant and critically evaluated accounting information to apply accounting knowledge and skills in appropriate business contexts and transfer knowledge and skills to new situation. (Critical Thinking Information Literacy)
 - Communicate clearly, persuasively to the audience, both orally and in writing. (Effective Communication)

Accounting (Minor)

Minor: Accounting
Program Code: M135

About This Minor. . .

Accounting is the one degree with 360 degrees of possibilities. Every business needs accounting help, whether it's a Wall Street law firm, a professional sports team, a movie production company, or a rock band. With the proper accounting education, your employment options are endless.

Accounting is the language of business and regardless of your major, the more accounting you have the better prepared you will be for a

management position. This is a rigorous minor that will stand out on a résumé.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Addiction Studies

Program Description

This certificate program will provide students with the knowledge and skills that are in high demand in all aspects of the behavioral health field. Students receiving this certificate will be provided with the latest evidence-based practices, research studies and best practices in the field of addictions. This certificate is offered to meet educational requirements that are needed for the Certified Addiction Counselor (CAC) II training as outlined by the Colorado Department of Human Services (CDHS), Office of Behavioral Health (OBH). These courses seek to enhance the student's counseling abilities, knowledge and competencies in becoming an addictions professional. By completing the educational requirements of this certificate, students are eligible to take the National Association for Addictions Professionals (NAADAC) NCAC I or NCAC II exam for CAC II certification as required in Colorado. All required classes seek to enhance the student's ability to offer addiction treatment services in a manner that respects gender, race and ethnicity, sexual orientation, cultural, familial, systemic and socioeconomic diversity.

Addiction Studies (Professional Certificate)

Award: Professional Certificate
Program of Study: Addiction Studies
Program Code: 1711

About This Program. . .

The Addictions Studies certificate program is designed for students who desire a career within the addictions profession and health care industry. Addiction students who receive their certificate can either be self-employed or work with mental health organizations or practices throughout the state. Student who receive this certificate will have completed the educational requirements and learning objectives that are needed for becoming a Certified Addiction Counselor Level Two (CAC II) as outlined by the Colorado Department of Human Services (CDHS) and the Office of Behavioral Health (OBH). Students who complete the educational requirements and learning objectives of this certification program are eligible to take the Association for Addiction Professionals (NAADAC) National Certified Addiction Counselor (NCAC I) or (NCAC II) exam and apply to Department of Regulatory Agency (DORA) for CAC II certification as required in Colorado.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Complete practiced-based performance standards that draws on current research, scholarship and/or techniques, and acquire specialized knowledge in the discipline. (Specialized Knowledge/ Applied Learning)
- Analyze data critically, reason logically, and apply quantitative analysis methods correctly to develop appropriate conclusions. (Quantitative Fluency)
- Make and defend assertions about a specialized topic in an extended well-organized document and oral presentations that is appropriate to the discipline. (Communication Fluency)
- Describe reasoned conclusions that articulate the implications and consequences for a particular decision by synthesizing information and methodologies in the field of addictions. (Critical Thinking)
- Complete practiced-based performance standards that draws on current research, scholarship and/or techniques, and acquire specialized knowledge in the discipline. (Specialized Knowledge/ Applied Learning)
- Analyze data critically, reason logically, and apply quantitative analysis methods correctly to develop appropriate conclusions. (Quantitative Fluency)
- Make and defend assertions about a specialized topic in an extended well-organized document and oral presentations that is appropriate to the discipline. (Communication Fluency)
- Describe reasoned conclusions that articulate the implications and consequences for a particular decision by synthesizing information and methodologies in the field of addictions. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Agriculture Science

Program Description

The Agriculture Science curriculum is designed to provide students the fundamentals of agriculture and related business practices. With this degree, students will be well positioned to transfer into a bachelor's degree program in agriculture. Graduates of this Associate of Science degree are qualified for employment in a variety of positions associated with sustainable agriculture, including horticultural and livestock operations, wholesale and retail management, nursery operations, and environmental and agricultural education.

About This Major . . .

The Agriculture Science curriculum is designed to provide students the fundamentals of agriculture and related business practices. With this degree, students will be well positioned to transfer into a bachelor degree program in agriculture. Graduates are qualified for employment in a variety of positions associated with sustainable agriculture, including horticultural and livestock operations, wholesale and retail management, nursery operations, and environmental and agricultural education.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal and written, and electronic forms that are needed for entry level employment (communication fluency).
- Apply Mathematical and applied physics concepts for industry to meet employment requirements (quantitative fluency).
- Research, evaluate, synthesize and apply information/data relevant to business, sciences, and technical careers (specialized knowledge).
- Demonstrate knowledge of terminology, symbols, business practices, and principles and application of associated technical skills (critical thinking).
- Perform the necessary applied skill sets to fulfill the needs of entry level employment (applied learning).
- Demonstrate ethical, civic, and work place responsibility as part of professional behavior (specialized knowledge).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.

- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Animation, Film, Photography, and Motion Design

Program Description

The Bachelor of Fine Arts degree in Animation, Film, Photography, & Motion Design focuses on the study of time, motion and light in regards to various entertainment fields, including Film, Animation, TV, Photography, Web, Games, Visual Effects, Music Videos, and Advertising. Coursework concentrates on creating traditional and digital 2D, 3D, and stop motion animation; digital filmmaking, post production, visual effects, and sound design; and traditional, alternative, and digital Photography. These fields are explored through narrative, non-fiction, and experimental storytelling techniques to allow students a range of expression for their artistic vision. Graduates are prepared to become animators, filmmakers, photographers, storyboard artists, character designers, concept artists, motion designers, screenwriters, producers, editors, and cinematographers.

Animation, Film, Photography and Motion Design (BFA)

Degree: Bachelor of Fine Arts
Major: Animation, Film, Photography, and Motion Design
Program Code: 3284

About This Major . . .

The BFA in Animation, Film, Photography and Motion Design teaches all aspects of the production process. Classes are structured around experiential learning, providing students with extensive hands-on practice with individual and collaborative projects that reflect industry standards.

Animation, Film, Photography and Motion Design encourages students to explore their passions and interests by allowing certain projects to be customized to their individual career goals. This degree cultivates a positive learning environment for experimentation and exploration with an emphasis on the study of time, motion and light in regards to various narrative, non-fiction, and experimental techniques. Students develop into critical, analytical, and independent problem solvers, thinkers, and creators.

The program offers cross-disciplinary coursework, which emphasizes the relationships between Animation, Film, Photography, and Motion Design so that each course enhances the others.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Interpret and apply formal elements and principles of design. (Specialized Knowledge)
- Demonstrate application of tools, materials, techniques, and proper use and care for equipment through quality craftsmanship. (Applied Learning)
- Generate individual response through concept and theory beyond formal elements to create personal content. (Communication Fluency)
- Communicate clearly regarding the critical analysis of art and design both historical and contemporary. (Critical thinking/ Communication Fluency)
- Reflect on and respond to ethical, social, civil, and/or environment challenges as they relate to art, design, and new media. (Personal and Social Responsibility)
- Determine the best medium, methods and artistic strategies for evaluating information critically and developing a message by finding relevant sources of information, and applying the information effectively to visual culture. (Information Literacy)
- Design and publish a professional portfolio and demo reel that meet current industry standards. (Applied Learning)
- Demonstrate technical, aesthetic, and conceptual decisions based on application of the creative design process for photographic and time-based media. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Animation (Minor)

Overview

Minor: Animation
Program Code: M204

About This Minor. . .

The Animation Minor will acquaint students with core elements related to the study and profession of animation production. This minor is a cross-discipline collaboration and includes one course with the Theatre Arts Department. The minor has been designed to provide an additional skill set that may be useful for obtaining employment, and enhancing professional opportunities, in the areas of arts, design, entertainment, film, animation, TV, video editing, graphic design, game design, computer science, marketing and/or advertising.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.

- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Requirements

(24 Semester Hours)

Code	Title	Semester Credit Hours
ARTA 224 or ARTA 222	Principles of Film ¹ Principles of Digital Photography	3
ARTA 225	Principles of Animation	3
ARTA 323	Character Design and Story Concepts ¹	3
ARTA 324	Animation Production ¹	3
ARTA 327	Sound Design and Post-Production ¹	3
ARTA 426	Advanced Motion Studio	3
ARTH 331	History of the Moving Image ¹	3
THEA 150	Fundamentals of Acting	3
Total Semester Credit Hours		24

¹ This course has a prerequisite that must be taken prior to this course, which could increase the total credits for the minor to 42 credit hours.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Applied Anthropology and Geography

The applied anthropology and geography major combines rigorous academic preparation in anthropology and geography with hands-on skills in GIS (Geographic Information Systems), archaeology and forensic anthropology. Upon graduation, all students will have knowledge of cartography and GIS as well as physical anthropology and archaeology.

The ability to use GIS is an applied skill that will give the students in the anthropological sub-disciplines a niche to set them apart from other anthropology undergraduates.

Programs of Study Bachelors/Minors

- [Applied Anthropology and Geography \(BA\)](#) (p. 109)

Applied Anthropology and Geography (BA)

Degree: Bachelor of Arts
Major: Applied Anthropology and Geography
Program Code: 3780

About This Major...

The digital humanities and social sciences, an interdisciplinary field that combines technology skills with social science knowledge, is a growing, innovative collaboration of disciplines making its impact nation-wide. Upon graduation, all students will have knowledge of cartography and GIS, as well as physical anthropology and archaeology. GIS is an applied skill that will give the students in the anthropological sub disciplines a niche to set them apart from other anthropology undergraduates. The anthropological disciplines provide students, who focus on GIS, a subject matter with which to hone their GIS skills.

BA-seeking students in this program will learn to think critically and ask theoretically-grounded questions about human lives in the immediate area, the surrounding region, and ultimately, across the western USA, in a program that seamlessly blends the acquisition of academic and professional skills. Furthermore, practical training in archaeological, geographical and forensic anthropological field research allows students to take full advantage of the applied employment opportunities available across the western slope and Colorado Plateau as part of energy extraction, law enforcement and/or civil engineering (for example).

Important Information for this degree:

- Students must maintain a 2.0 cumulative GPA or higher in all CMU coursework.
- Students must earn a minimum of a "C" or higher in all courses for the major.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate effective communication both orally and in writing by being precise, including factual, well-cited details, organizing facts appropriately, and using non-judgmental language through professional documentation and/or oral presentations. (Communication Fluency)
- Demonstrate tools to be life-long learners to include evaluation of information from other students' research, material found on the internet, and scholarly journal articles. (Critical Thinking, Information Literacy)
- Demonstrate the ability to create maps in a geographical information system program and do basic spatial analysis. (Specialized Knowledge)
- Reflect on and respond to changes in anthropology and geography at various scales – i.e., ethical, social, civic, and/or environmental challenges at local, national, and/or global levels (personal and social responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a

baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course

sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Applied Business Program Description

This program prepares students for an exciting career in the field of business. An associate's degree gives students an opportunity to lead a team, start a business, and develop skills to improve an existing business.

The Applied Business program at Western Colorado Community College features:

- Technical, interpersonal and soft skill courses that prepare students to enter the workforce.
- Course content that is relevant to today's business needs. Training is focused on current business trends and demands, diverse learning styles, hands-on classroom experience and practical program-related work.
- Small class sizes ensure students receive the level of instruction needed to excel in today's business world.
- Traditional classroom instruction and classes offered at night or online.
- Flexible curriculum that includes several one-semester Technical Certificates.
- An agreement with Colorado Mesa University's Department of Business enabling students who complete a two-year degree to

seamlessly move to CMU to earn a Bachelor of Applied Science in Business Administration.

Administrative Support, Applied Business (AAS)

Degree: Associate of Applied Science
Major: Applied Business
Emphasis: Administrative Support
Program Code: 1300

About This Major . . .

This program prepares students to be effective, efficient professionals. Students develop skills in budget analysis, office technology, grammar, oral presentations, information systems, current software programs, human relations and communications. The administrative support curriculum prepares the student to be an effective and efficient staff member in business, government or non-profit organizations and/or their own microbusiness.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Create professional business documents per industry standards. (Communication Fluency)
- b. Utilize business software applications proficiently. (Critical Thinking)

- c. Recognize and illustrate effective, efficient, entry level office professional behavior. (Applied Learning)
- d. Define and identify the significance of trustworthiness, confidentiality, dependability, self-motivation, and attitude.(Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 62 semester hours total for the AAS in Applied Business, Administrative Support emphasis.

Frontline Supervision, Applied Business (AAS)

Degree: Associate of Applied Science

Major: Applied Business

Emphasis: Frontline Supervision

Program Code: 1301

About This Major . . .

This program prepares students to be effective, efficient, entry-level professionals. Students develop skills in supervision, the basics of human resources, and how to work with others in a business environment. The Frontline Supervision curriculum prepares the student to be an effective staff member in business, government or non-profit organizations. Students learn the importance of human behavior in organizations, how to supervise employees, and basic human resource practices.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop skills necessary to communicate properly with subordinates, supervisors and peers using both verbal and non-verbal techniques (Communication Fluency).
- Discuss the supervisor's function, place in the management team and role in the business environment (Specialized Knowledge).
- Demonstrate appropriate business professional skills needed in the workplace (Personal and Social Responsibility).
- Identify and describe human resource management (Applied Learning).

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Marketing Communications, Applied Business (AAS)

Degree: Associate of Applied Science

Major: Applied Business

Emphasis: Marketing Communication

Program Code: 1302

About This Major . . .

This program prepares students to be effective, efficient, entry-level marketing professionals and microbusiness owners. Students develop skills in customer service, digital design tools, human behavior in organizations, and social media. The Marketing Communications curriculum prepares the student to be an effective staff member in business, government or non-profit organizations and/or microbusiness owner. Students learn how to work with others, how to help others, how to use social media to the businesses advantage, and how to use entry level digital tools.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Identify essential marketing concepts used in entry level marketing positions. (Applied Learning)
- Create marketing material using Adobe Photoshop, Illustrator, and InDesign and other marketing materials programs. (Applied Learning)
- Evaluate the use and strategy of the implementation of social media. (Communication Fluency)
- Define and identify the significance of trustworthiness, confidentiality, dependability, self-motivation, and attitude. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 62 semester hours total for the AAS in Applied Business, Marketing Communication emphasis.

Administrative Support, Applied Business (Technical Certificate)

Award: Technical Certificate

Program of Study: Applied Business

Specialization: Administrative Support

Program Code: 1100

About This Program . . .

This program prepares students to be effective, efficient, entry-level office professionals. Students develop skills in computer office programs, basics of human resources, and human relations in organizations. The Administrative Support curriculum prepares the student to be an effective staff member in business, government or non-profit organizations.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Define and identify appropriate workplace behaviors (Applied Learning).
- Apply software applications to business office situations (Communication Fluency).
- Create documentation and training materials for office technology (Communication Fluency).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course

sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Marketing Graphics Technology, Applied Business (Technical Certificate)

Award: Technical Certificate
Program of Study: Applied Business
Specialization: Marketing Graphics Technology
Program Code: 1102

About This Program . . .

This program prepares students to be effective, efficient, entry-level marketing professionals. Students develop skills in customer service, human behavior in organizations, and social media. The Marketing Graphics Technology curriculum prepares the student to be an effective staff member in business, government or non-profit organizations. Students learn how to work with others, how to help others, and how to use social media to the businesses advantage.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Compare and contrast the different types of customer service (Specialized Knowledge).
- Create marketing material using Adobe Photoshop, Illustrator, and InDesign. (Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.

- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(18 semester hours, must earn a grade of “C” or better in each course.)

Applied Technology

Overview

This degree is designed for a student who has completed a technical certificate from an area technical college and would like to scaffold that degree into an Associate of Applied Science Degree. The technical certificate must be from a regionally accredited institution or an institution with which WCCC/CMU has an articulation agreement. The student may transfer up to 43 Technical Certificate hours into the AAS in Applied Technology degree. The completed Technical Certificate, any additional technical coursework (from a single area of study) from WCCC needed to bring the total technical hours to 43 hours, and the completion of 17 hours of Essential Learning (general education) coursework from CMU and any other degree requirements will allow the student to earn the Associate of Applied Science in Applied Technology.

The Associate of Applied Science in Applied Technology degree is designed to provide students with an individualized, quality education in a technology area leading to a technical specialty and core knowledge through Essential Learning (general education) courses. Applied Technology is an area that encourages students to develop the necessary conceptual understanding, disciplinary skills, and subject knowledge to investigate and solve real-life problems. The Career and Technical Certificate, in addition to the Essential Learning (general education) hours, will prepare students for employment with needed technical and academic skills.

Important information about this program:

- The Technical certificate must be in an area of study where a complementary AAS is not currently offered through WCCC.
- Transfer is limited to a Technical Certificate from a regionally accredited institution or an institution with which WCCC has an articulation agreement for the area of study.
- Eligibility of credit transfer will be determined through transcript evaluation by the Registrar's Office.
- All transfer credit hours must be a "C" or better to be eligible for transfer.
- Certificate graduates can transfer up to 43 Certificate credit hours into the AAS in Applied Technology.
- 17 credits of Essential Learning (general education) and lower division courses taken from CMU are required.
- A minimum of 15 of the final 30 credit hours must be taken from CMU/WCCC.
- Students must complete all other degree requirements.
- Up to 43 credits from a completed CTE Certificate may be applied to the AAS in Applied Technology. Students completing a CTE Certificate of less than 43 credit hours must complete additional credit hours from a single WCCC technical certificate as approved by an advisor/department head to reach the 43-hour requirement.

Applied Technology (AAS)

Overview

Degree: Associate of Applied Science
Program Code: 1335

About This Major . . .

This degree is designed for a student who has completed a technical certificate from an Area Technical College and would like to scaffold that degree into an Associate of Applied Science Degree. The technical certificate must be from a regionally accredited institution or an institution with which WCCC/CMU has an articulation agreement. The student may transfer up to 43 Technical Certificate hours into the AAS in Applied Technology degree. The completed Technical Certificate, any additional technical coursework (from a single area of study) from WCCC needed to bring the total technical hours to 43 hours and the completion of 17 hours of Essential Learning (general education) coursework from CMU and any other degree requirements will allow the student to earn the Associate of Applied Science in Applied Technology.

The Associate of Applied Science in Applied Technology degree is designed to provide students with an individualized, quality education in a technology area leading to a technical specialty and a core knowledge through Essential Learning (general education) courses. Applied Technology is an area which encourages students to develop the necessary conceptual understanding, disciplinary skills and subject knowledge to investigate and solve real-life problems. The Career and Technical Certificate in addition to the Essential Learning (general education) hours will prepare students for employment with needed technical and academic skills.

Important information about this program:

- The Technical certificate must be in an area of study where a complementary AAS is not currently offered through WCCC.
- Transfer is limited to a Technical Certificate from a regionally accredited institution or an institution with which WCCC has an articulation agreement for the area of study.
- Eligibility of credit transfer will be determined through transcript evaluation by the Registrar's Office.
- All transfer credit hours must be a "C" or better to be eligible for transfer.
- Certificate graduates can transfer up to 43 Certificate credit hours into the AAS in Applied Technology.
- 17 credits of Essential Learning (general education) and lower division courses taken from CMU are required.
- A minimum of 15 of the final 30 credit hours must be taken from CMU/WCCC.
- Students must complete all other degree requirements.
- Up to 43 credits from a completed CTE Certificate may be applied to the AAS in Applied Technology. Students completing a CTE Certificate of less than 43 credit hours must complete additional credit hours

from a single WCCC technical certificate as approved by an advisor/department head to reach the 43 hour requirement.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize evidence on an assigned topic addressing a course or discipline-related question or a question of practice in a work or community setting. (Specialized Knowledge/Applied Learning)
- Use program-level mathematical concepts and methods to understand, analyze, and explain issues in quantitative terms. (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 60 total semester hours are required for the AAS in Applied Technology.
- The Technical certificate must be in an area of study where a complementary AAS is not currently offered through WCCC.
- Transfer is limited to a Technical Certificate from a regionally accredited institution or an institution with which WCCC has an articulation agreement for the area of study.
- Eligibility of credit transfer will be determined through transcript evaluation by the Registrar's Office.
- All transfer credit hours must be a "C" or better to be eligible for transfer.
- Certificate graduates can transfer up to 43 Certificate credit hours into the AAS in Applied Technology.
- 17 credits of Essential Learning (general education) and lower division courses taken from CMU are required.
- A minimum of 15 of the final 30 credit hours must be taken from CMU/WCCC.
- Students must complete all other degree requirements.

Essential Learning Requirements

(15 semester hours)

Suggested Course Plan

To be determined by the academic advisor.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Archaeology

Program Description

The Archaeology minor provides students with an introduction to archaeological research, with a focus on the (pre)history of North America, and introduces students to the knowledge and skills necessary to carry out archaeological investigations and to treat what is recovered through such investigations appropriately. The required courses cover anthropology and the science of archaeology, while the elective choices give students the opportunity to select courses on specific topics or time periods of interest. Courses taken as part of the minor will provide students with background knowledge of North American prehistory and in-depth studies of regional sequences within that prehistory. The Archaeology Minor especially complements such degree BA programs as Applied Anthropology and Geography, History, and Environmental Science and Geology. Students with the background in Archaeology and Cultural Resource Management that the Minor supplies will be well prepared to enter the burgeoning local market in these areas.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

¹ Some courses require prerequisites not required for completion of this minor. Please review all prerequisites and work with your advisor to select courses.

² It is advised that students take the course in fulfillment of the Essential Learning Laboratory Science requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Art

Program Description

The Bachelor of Fine Arts (BFA) degree in Studio Art is designed for students who are interested in pursuing a career as a professional artist or entering graduate school for further studies. It combines a strong foundation in design, drawing, and art history with a broad technical base in the disciplines of ceramics, sculpture, painting, printmaking, and photography. With this base in place and as their interests develop, each student artist can then tailor their degree path by focusing on one or

more of these disciplines. The coursework develops critical and creative thinking, visual and conceptual problem solving, keen aesthetic judgment, effective communication, and a broad cultural awareness. The Bachelor of Fine Arts degree emphasizes studio art professional practices and culminates in professional portfolio development and a required senior thesis exhibition in the university gallery.

The Bachelor of Arts (BA) degree in Studio Art is designed for students interested in studio art who would like to combine their artistic and creative skills with majors or minors in other disciplines. There is less of an upper division intensive portfolio development focus, when compared to the Studio Art BFA, so that students can tailor their degree to choose from a variety of career paths. For example, owning and operating a gallery or art related business (combine the BA in Studio Art with a business major/minor) or art therapy (combine the BA in Studio Art with a psychology minor/major). This degree helps students develop the essential skills of critical thinking, creative problem solving, effective communication, aesthetic judgment, and cultural awareness. Students will become proficient with the materials, tools, and techniques of drawing, painting, printmaking, ceramics, sculpture, and photography. Art History studies engage students in historic and contemporary artists, art movements, and styles. Students can customize their course selections to meet their individual needs. This degree does not require a senior gallery exhibition.

The Bachelor of Arts (BA) degree in Art History combines strong curriculum requirements in art history and a sampling of studio art, design, and time-based media courses. Students in this major engage in an in-depth study of historic and contemporary artists, art movements, and styles. This degree can lead to professional employment in art museums and galleries, art publishing houses, and other areas of art services. The degree also prepares students for advanced, graduate-level art history studies.

The Bachelor of Fine Arts (BFA) degree in Art, concentrating in K-12 education, leads to licensure for Colorado K-12 Art Education. The visual art emphasis includes coursework in theory, art history, and studio art. Art teaching methods courses in elementary and secondary art are an integral part of the degree plan. Students accumulate over 200 hours of classroom experience before beginning student-teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. Please see the Teacher Education Admission Packet for further information on admissions criteria for entering the Teaching Program at CMU.

The Studio Art Minor acquaints students with some of the core elements in either two- or three-dimensional studio art. Students develop skills, sensitivity and aesthetic judgment while pursuing individual interests within studio areas such as drawing, painting, printmaking, ceramics, sculpture, or photography. A background in the visual arts can provide a variety of opportunities in the areas of studio art, art gallery organizations, art therapy, and applied design.

Education: K-12 Education, Art (BFA)

Degree: Bachelor of Fine Arts
Major: Art
Concentration: K-12 Teaching
Program Code: 3270

About This Major . . .

The Bachelor of Fine Arts degree leads to licensure for Colorado K-12 Art Education. The visual art emphasis includes coursework in theory, art history, and studio art. Art teaching methods courses in Elementary and Secondary Art are an integral part of the degree plan. As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education K-12 licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information for this program:

- 2.8 cumulative GPA or higher in all CMU coursework.
- K-12 Art licensure candidates are expected to show proficiencies in State of Colorado Performance-Based and Art Model Content Standards. Formal evaluation of that knowledge is shown through a professional proficiency portfolio, developed throughout licensure coursework and reviewed by both Art Education and Teacher Education faculty at the end of the student teaching internship.
- Candidates are expected to earn a minimum grade of "B" in all licensure classes (EDUC prefix courses), which must be taken in sequence prescribed by the Center for Teacher Education. The licensure sequence is begun during the junior year (usually fall semester), and requires four semesters for completion.
- Professional dispositions for teaching are measured throughout the licensure sequence and include qualities such as ethical and responsible behaviors, personal presentation, ability to work in collegial capacities, ability to manage time, paperwork and resources, and an aptitude for elevating the academic standing of the Art Education field.
- Completion of admission to the K-12 Art Licensure program includes:
 - All requirements and prerequisite courses are met for the Center for Teacher Education's application for admission (usually completed during the sophomore year).

- A meeting with Art Education faculty to discuss professional goals and establish a timeline for completion of requirements.
- Must pass all studio and art history courses with a grade of “B” or higher.
- Completion of ARTE 101, ARTE 102, ARTE 118, ARTE 119, ARTS 151, ARTS 152, ARTS 225, ARTS 241, ARTS 242, and ARTS 274 or ARTS 275 within the first 60 hours.
- Additional fees are required through the licensure program and range from \$200-\$300, covering basic proficiency tests, fingerprinting, and content exam, in addition to the cost of textbooks and art materials.
- Students are required to participate in exit examinations or other programs deemed necessary to comply with the college accountability requirement.
- Students must pass the PRAXIS II exam in the content area prior to beginning the student teaching internship.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Art Outcome 1: Interpret and apply formal elements and principles of design. (Critical Thinking)
 - b. Art Outcome 2: Demonstrate proper use of tools, materials, techniques, and proper use and care for equipment through quality craftsmanship. (Applied Learning)
 - c. Art Outcome 3: Generate individual response through concept and relevant sources of information to create personal content. (Communication Fluency and Information Literacy)
 - d. Art Outcome 4: Communicate clearly regarding the critical analysis of art and design both historical and contemporary. (Specialized Knowledge/ Communication Fluency)
 - e. Art Outcome 5: Reflect on and respond to ethical, social, civil, and/or environmental challenges as they relate to art, design, and new media. (Personal and Social Responsibility)
 - f. Art Outcome 6: Create and sustain a body of work through self-directed research, experimentation, risk-taking, and reflective analysis. (Applied Learning)
 - g. Art Outcome 7: Justify analysis of artwork based on concept and materials. (Critical Thinking)
 - h. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
 - i. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
 - j. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
 - k. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- I. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 2.8 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for

your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Studio Art, Art (BFA)

Degree: Bachelor of Fine Arts

Major: Art

Concentration: Studio Art

Program Code: 3272

About This Major . . .

The BFA degree in Art with a concentration in Studio Art is designed to prepare students with strong technical skills in a variety of art media. This skill combined with an art historical background will allow them to develop an individual focus in their art. Students can take a variety of two-dimensional courses in drawing, painting, printmaking, or photography. In the three-dimensional area, they can study ceramics, metal casting and sculpture. Extensive studies in Art History engage the students in historic and contemporary artists, art movements, and artistic styles and allows students to understand and place their art within a historical context. A BFA with a concentration in Studio Art prepares the student for graduate school and a career as a professional artist.

Important information for this degree:

- 3.00 cumulative GPA or higher in all 200-, 300-, and 400-level Studio Art major courses.
- Minimum grade of "C" in all 200-, 300-, and 400-level Studio Art major courses.
- No more than 6 semester hours of independent study courses can be used toward the degree.
- Special requirements for admission into the Studio Art program: Every student who is a sophomore in academic standing, or a transfer student with 60 credits or more (including students transferring into a Studio Art emphasis from K-12 Teaching, Graphic Design, or Art History) must satisfy the following requirements:
 - Completion of ARTE 294 Sophomore Seminar with grade of "B" or better.
 - Completion of Art Foundation Courses ARTE 101, ARTE 102, ARTE 118, ARTE 119 and ARTS 151, ARTS 152, with a 3.00 cumulative GPA or higher.

- Additional fees are required throughout the studio art program for materials.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Interpret and apply formal elements and principles of design. (Critical Thinking)
- Demonstrate proper use of tools, materials, techniques, use and care for equipment through quality craftsmanship, and analysis of scale, proportion, and measuring. (Applied Learning and Quantitative Literacy)
- Generate individual response through concept and relevant sources of information to create personal content. (Communication Fluency and Information Literacy)
- Communicate clearly regarding the critical analysis of art and design both historical and contemporary. (Specialized Knowledge/Communication Fluency)
- Reflect on and respond to ethical, social, civil, and/or environmental challenges as they relate to art, design, and new media. (Personal and Social Responsibility)
- Determine the best medium, methods and artistic strategies for evaluating information critically and developing a message by finding relevant sources of information, and applying the information effectively to visual culture. (Information Literacy)
- Create and sustain a body of work through self-directed research, experimentation, risk-taking, and reflective analysis. (Applied Learning)
- Justify analysis of artwork based on concept and materials. (Critical Thinking)

should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Art History (BA)

Degree: Bachelor of Arts

Major: Art History

Program Code: 3278

About This Major . . .

The BA degree in Art History provides students with an understanding of the importance of the visual arts to society and culture through the study of historic and contemporary artists, art movements and styles. Art History teaches students to critically analyze visual images in their original social and political context; the emphasis on visual literacy and critical thinking are especially valuable today. This degree can lead to professional employment in art museums and galleries, art publishing houses, and other areas of art services. The degree will also prepare students for advanced, graduate-level art history studies.

Important information about this major:

- 3.00 cumulative GPA or higher in all art foundation or art major courses with no individual course grades lower than a "C".
- No more than 6 semester hours of independent study courses can be used toward the degree.
- Additional fees are required throughout the art program for materials.
- KINA Activity courses can NOT be used to fulfill general elective credit requirements.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Interpret and apply formal elements and principles of design (Critical Thinking)
- Demonstrate proper use of tools, materials, techniques, use and care for equipment through quality craftsmanship, and analysis of scale, proportion, and measuring. (Applied Learning and Quantitative Literacy)
- Generate individual response through concept and relevant sources of information to create personal content (Communication Fluency and Information Literacy)
- Communicate clearly regarding the critical analysis of art and design both historical and contemporary (Specialized Knowledge/Communication Fluency)
- Reflect on and respond to ethical, social, civil, and/or environmental challenges as they relate to art, design, and new media (Personal and Social Responsibility)
- Demonstrate an array of critical approaches to the study of historic art and visual culture in written or oral presentations (Specialized Knowledge)
- Execute research projects involving visual analysis, reading research, critical thinking, writing and standard methods of documentation (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this Degree:

- 3.00 cumulative GPA or higher in all art foundation or art major courses with no individual course grades lower than a “C”.
- Additional fees are required throughout the art program for materials.
- KINA Activity courses can NOT be used to fulfill general elective credit requirements.

Essential Learning Requirements

(31 semester hours)

Advising and Graduation**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Studio Art (BA)

Degree: Bachelor of Arts
Major: Studio Art
Program Code: 3277

About This Major . . .

A Bachelor of Art in Studio Art gives students strong technical skills and an art historical background while providing a general exposure to all of the disciplines in the studio art program. A BA in Art provides students numerous career paths requiring an art education. Students take a variety of 2D and 3D courses in drawing, painting, printmaking, ceramics, and sculpture. Students may customize their degree to meet their individual needs and would be well prepared to enter the art field and look for jobs that require a studio art education.

Important information about this major:

- No more than 6 semester hours of independent study courses can be used toward the degree.
- Additional fees are required throughout the studio art program for materials.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Interpret and apply formal elements and principles of design. (Critical Thinking)

- b. Demonstrate proper use of tools, materials, techniques, and proper use and care for equipment through quality craftsmanship. (Applied Learning)
- c. Generate individual response through concept and relevant sources of information to create personal content. (Communication Fluency and Information Literacy)
- d. Communicate clearly regarding the critical analysis of art and design both historical and contemporary. (Specialized Knowledge/Communication Fluency)
- e. Reflect on and respond to ethical, social, civil, and/or environmental challenges as they relate to art, design, and new media. (Personal and Social Responsibility)
- f. Create and sustain a body of work through self-directed research, experimentation, risk-taking, and reflective analysis. (Applied Learning)
- g. Justify analysis of artwork based on concept and materials. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.

- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Studio Art (Minor)

Minor: Studio Art
Program Code: M200

About This Minor. . .

The Studio Art Minor will acquaint students with some of the core elements in either two or three-dimensional studio art. Students will develop skills, sensitivity, and aesthetic judgment while pursuing individual interests within studio areas such as drawing, painting, printmaking, ceramics or sculpture. A background in the visual arts can provide a variety of opportunities as a studio artist, within art organizations, galleries, and applied design.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Film Studies and Digital Production (Minor)

Minor: Film Studies and Digital Production
Program Code: M203

About This Minor. . .

The Film Studies and Digital Production Minor will acquaint students with some of the core elements related to the study and profession of film, video editing and video production. This minor represents a unique collaboration with the Departments of Art and Design; Language, Literature and Communications and the Theatre Arts Department. The minor has been designed by these three departments to provide a student with a secondary skill set that may be useful for obtaining employment in the area of film, video editing and video production. This skill set has been determined to be a top request nationwide among prospective employers. A background in Film Studies and Digital Production can enhance professional opportunities in the areas of public relations, business, graphic design, film, marketing and/or advertising.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Athletic Coaching and Officiating

There is lack of professionally trained coaches and officials in the United States. This minor combines courses in Sport Management and Kinesiology to prepare students to enter the fields of coaching and officiating. Courses will focus on overarching topics of coaching and officiating such as: the certification process, roster management, budget, legal issues, ethics, behavior management as well as the philosophical and psychological components associated with coaching and officiating. Students will gain theoretical knowledge along with practical experience, while working towards industry certification. This minor is best suited for Sport Management and education students, and will be open to all majors.

Athletic Coaching and Officiating (Minor)

Minor: Athletic Coaching and Officiating
Program Code: M105

About This Minor. . .

There is lack of professionally trained coaches and officials in the United States. This minor combines courses in Sport Management

and Kinesiology to prepare students to enter the fields of coaching and officiating. Courses will focus on overarching topics of coaching and officiating such as: the certification process, roster management, budget, legal issues, ethics, behavior management as well as the philosophical and psychological components associated with coaching and officiating. Students will gain theoretical knowledge along with practical experience, while working towards industry certification. This minor is best suited for Sport Management and education students, and will be open to all majors.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Athletic Training

The Master of Science in Athletic Training program is a two-year, 38-credit-hour, master's degree, delivered via traditional, online, and hybrid formats. The degree employs course content that focuses on the competencies needed to practice the art and science of athletic training, leading to compassionate and exceptional care to meet the regional needs of western Colorado and beyond. In alignment with the mission of the Department of Kinesiology, the program emphasizes promoting wellness and physical activity across a diverse population of patients.

Students will learn the importance of self-care and fostering resilience and wellness in themselves to extend better care to others.

There are two types of applicants for the MSAT program. The first type is the Traditional MSAT applicant who has earned an undergraduate degree. The second type of applicant has not yet earned their undergraduate

degree and is currently enrolled at CMU in a bachelor's of science program and may qualify to pursue the MSAT as part of a Bachelor's degree 3+2 MSAT concurrent enrollment program. For additional information about applying to the program, please visit the website.

Athletic Training (MS)

Degree: Master of Science
Major: Athletic Training
Program Code: 8155

About This Program . . .

The Athletic Training program is a professional program offered in the Department of Kinesiology, leading to a Master of Science in Athletic Training degree (MSAT).

Athletic trainers (ATs) are highly qualified, multi-skilled health care professionals who collaborate with physicians to provide preventative services, emergency care, clinical diagnosis, therapeutic intervention and rehabilitation of injuries and medical conditions. Athletic trainers work under the direction of a physician as prescribed by state licensure statutes.

The MSAT program is a four semester clinical program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Admission into the program is competitive. The MSAT program ensures the highest quality of education by offering collective learning experiences that enable the student to successfully challenge the Board of Certification examination and pursue numerous career paths as a certified athletic trainer. Certified athletic trainers gain employment in a variety of settings including but not limited to: high school/college athletic programs, professional sport programs, outpatient physical therapy/sports medicine clinics, industrial/corporate settings, and the US military.

There are two types of applicants for the MSAT program. The first type is the **Traditional MSAT** applicant who has earned an undergraduate degree.

The second type of applicant has not yet earned their undergraduate degree and is currently enrolled at CMU in the BS Exercise Science program and may qualify to pursue the MSAT as part of a Bachelor degree **3+2 MSAT** concurrent enrollment program.

Important information for the Traditional MSAT applicant

Applicants must meet the following criteria for the MSAT program:

- Earned bachelor's degree or higher from a regionally accredited institution of higher learning
- Minimum overall GPA of 3.0 (on 4.0 scale)
- Minimum science GPA of 3.0 (on 4.0 scale)

- Science GPA includes all courses with subject codes of Biology/ Zoology, Chemistry, and Physics

Prerequisite Course Requirements

- The candidate must have completed the following prerequisites with a grade of C or higher
- All prerequisite coursework must be earned from a regionally accredited institution and be verifiable through official transcripts, or accepted by a U.S. equivalency reporting agency
- A single course cannot be used to meet multiple requirements
- All applicants must complete the required prerequisites
 - Six of the nine required prerequisites must be completed at the time of application
 - A plan to complete outstanding coursework must be documented in the application
 - Any outstanding prerequisites must be completed with a grade of "B" or higher
 - Any grades under "B" can disqualify an applicant from matriculating into the program
 - All transcripts for outstanding prerequisite coursework must be received by CMU no later than July 1
- Prerequisite coursework (CMU equivalent)
 - Biology (BIOL 101/101L)
 - General Chemistry (CHEM 131/131L and 132/132L)
 - Physics (PHYS 100 or PHYS 111/111L and PHYS 112/112L)
 - Psychology (PSYC 150)
 - Anatomy and Physiology (BIOL 209/209L and 210/210L)
 - Statistics (STATS 200)
 - Biomechanics (KINE 370/370L)
 - Nutrition (KINE 203)
 - Exercise Physiology (KINE 303/303L)
- It is recommended that applicants obtain 150 hours of athletic training experience.
- The Graduate Record Examination (GRE) is not required for admission to the Master of Science in Athletic Training Program.
- To be considered for an interview, all applicants for whom English is a second language must achieve a minimum score of 550 paper-based on the Test of English as a Foreign Language (TOEFL; 213 on the computer-based tests or 79-80 on the internet-based test), within the past two years.
- Advanced placement will not be granted under any circumstance.
- All students who enter the program must fulfill all program requirements.

Important information for the 3+2 MSAT applicant

Applicants must meet the following criteria in addition to all of the criteria for the MSAT program:

- Declared Exercise Science major.
- Classified as a senior (i.e., at least 90 credit hours including hours in which student is currently enrolled and for which the student is registered for a future semester).
- At least a 3.0 overall GPA and must have at least a 3.0 GPA in courses in the student's declared major.
- A 3+2 Concurrent Enrollment application form to the MSAT Program Director.

- Submit to the MSAT Program Director how all remaining bachelor degree requirements and all MSAT requirements will be met in two years.
- Complete the MSAT program admission process.

After admission into the Bachelor Degree 3+2 MSAT Concurrent Enrollment Program, the student must:

- Follow the two-year recommended course sequence (see below) for the MSAT course component.
- Notify the MSAT Program Director immediately if justifiable life circumstances do not allow the student to complete both undergraduate and graduate programs within two years of admission into the program.
- Complete ALL bachelor degree graduation requirements in the same semester or prior to completing all MSAT graduation requirements.
- Submit the necessary paperwork to graduate with the bachelor degree to the Department of Kinesiology with a copy to the MSAT Program Director AND must submit the necessary paperwork to graduate with the MSAT to the MSAT Program Director. This requirement must be met before the published deadline in the semester prior to intended graduation.

Important information for this program:

- All courses and course sequencing are required and must be completed at CMU.
- Students must successfully pass all didactic and clinical course work as well as a summative exit exam.
- Students will complete a culminating project.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Develop appropriate prevention and health promotion strategies. (Critical Thinking, Information Literacy, Ethical Reasoning)
- Evaluate pathologies common to a physically active population in a correct and efficient manner. (Specialized Knowledge, Critical Thinking, Information Literacy)
- Design therapeutic interventions to maximize a patient's participation and health related quality of life. (Specialized Knowledge, Critical Thinking, Information Literacy, Ethical Reasoning)
- Propose and integrate appropriate psychosocial techniques into a patient's treatment program, recognizing when and how to refer if necessary. (Information Literacy, Ethical Reasoning)
- Demonstrate the ability to clearly communicate specialized knowledge. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or

"Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Aviation Technology

Program Description

The Aviation Technology program with a Fixed Wing emphasis will provide a technical certificate for college credit as identified in the Colorado Mesa University mission established by the Colorado Legislature. The goals of the program are: to prepare the students for FAA Certification as a Commercial Pilot with an Instrument Rating and as a Certified Flight Instructor. In addition, the program offers opportunities to enhance knowledge and expertise in the field of aviation by improving technical skills. Successful completion of the Aviation Technology program will also help prepare AAS students for BS programs in Aviation Technology.

Additional requirements for admission to this program:

1. Must complete all Developmental Education requirements prior to starting the program.
2. Submit a copy of your government-issued ID and birth certificate OR a valid US passport, to establish U.S. Citizenship.
3. Complete a flight physical exam with an FAA-designated Aviation Medical Examiner. Third class is required, first class is recommended. To help locate a qualified doctor go to <http://ame.cami.jccbi.gov> for a list by city and state.
4. Contact the Director of Aviation at 970-255-2683.

For more information on what you can do with this major, visit WCCC's Programs of Study page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in a specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Acquire substantial aeronautical knowledge of Private Pilot, Commercial Pilot, and Instrument Flight contained in an FAA Part 141 curriculum. (Specialized Knowledge)
2. Demonstrate flight proficiency skills in Private Pilot, Commercial Pilot, and Instrument Flight operations contained in an FAA Part 141 curriculum. (Specialized Knowledge)
3. Demonstrate strong quantitative literacy skills and the ability to think critically in a demanding environment. (Quantitative Literacy, Critical Thinking)
4. Evaluate and implement FAA standards for aviation safety, Aeronautical Decision Making, and accident reporting, including evaluating personal limitations. (Specialized Knowledge, Critical Thinking, Communication Fluency)
5. Implementation of the FAA required physiological limitations and best practices in the performance of professional pilot duties. (Specialized Knowledge)

TOTAL	74,473.20

Notes

*This is curriculum required flight hours for all students. If hours exceed those indicated here, the student is responsible for additional costs.

**The provided tuition rates are based on in-state Tuition and Fees for COF-eligible Colorado residents. Higher rates apply for non-COF-eligible students.

***The provided costs for textbooks and course materials are estimates only. Textbooks and course materials are not included and must be purchased by students.

Fixed Wing, Aviation Technology (AAS)

Degree: Associate of Applied Science

Major: Aviation Technology

Emphasis: Fixed Wing

Program Code: 1378

About This Major . . .

The Aviation Technology program with a Fixed Wing emphasis will provide technical certificate for college credit as identified in the Colorado Mesa University mission established by the Colorado Legislature. The goals of the program are: prepare the students for FAA Certification as a Commercial Pilot with an Instrument Rating, and as a Certified Flight Instructor. In addition, the program offers opportunities to enhance knowledge and expertise in the field of aviation by improving technical skills. Successful completion of the Aviation Technology program will also help prepare AAS students for BS programs in Aviation Technology.

Additional requirements for admission to this program:

- Must complete all Developmental Education requirements prior to starting the program.
- Submit a copy of your birth certificate to establish U.S. Citizenship.
- Complete a flight physical exam with an FAA-designated Aviation Medical Examiner. Recommend a second class medical certificate minimum. To help locate a qualified doctor go to <http://ame.cami.jcabi.gov> for a list by city and state.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Acquire substantial aeronautical knowledge of Private Pilot, Commercial Pilot and Instrument Flight contained in a FAA Part 141 curriculum. (Specialized Knowledge)
- Demonstrate flight proficiency skills in Private Pilot, Commercial Pilot and Instrument Flight operations contained in a FAA Part 141 curriculum. (Specialized Knowledge)
- Demonstrate strong quantitative literacy skills and the ability to think critically in a demanding environment. (Quantitative Literacy, Critical Thinking)
- Evaluate and implement FAA standards for aviation safety, Aeronautical Decision Making, and accident reporting, including

evaluating personal limitations. (Specialized Knowledge, Critical Thinking, Communication Fluency)\ \

- e. Implementation of the FAA required physiological limitations and best practices in the performance of professional pilot duties. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 66 semester hours total for the AAS, Aviation Technology - Fixed Wing.
- A minimum of 40 semester hours must be taken at CMU in no fewer than three semesters.
- A cumulative grade point average of 2.5 or higher must be maintained for all courses taken.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
Communication		
ENGL 111	English Composition I-GTCO1	3
Select one of the following courses:		3
ENGL 112	English Composition II-GTCO2

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Baking and Pastry Program Description

This program will prepare students for employment in the field of baking and the art of pastries. The Associate of Applied Science program will develop the students' skills and understanding in the production of chocolates, confections, pastries, ice creams and frozen desserts, yeast products, quick breads, sculpted items, sugar work, use of fruits and international desserts. Business and management courses to be taken include nutrition, purchasing, supervision, and business information technology.

Upon completion of the program, students will be prepared for entry-level positions in the broad and expanding hospitality industry, as well

as prepared to continue for advanced study in the Bachelor of Applied Science in Hospitality Management.

Baking and Pastry (AAS)

Degree: Associate of Applied Science
Major: Baking and Pastry
Major Code: 1340

About This Major . . .

This program will prepare students for employment in the field of baking and the art of pastries. The Associate of Applied Science program will develop the students' skills and understanding in the production of chocolates, confections, pastries, ice creams and frozen desserts, yeast products, quick breads, sculpted items, sugar work, use of fruits and international desserts. Business and management courses to be taken include nutrition, purchasing, supervision, and business information technology.

Upon completion of the program, students will be prepared for an entry-level position in the broad and expanding hospitality/industry as well as prepared to continue for advanced study in the Bachelor of Applied Science in Hospitality Management.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply food safety concepts to demonstrate personal hygiene guidelines, consumer safety, and sanitation procedures for preparation, storage, and service of food. (Applied Learning)
- Apply mathematical concepts and practices to the field of baking and pastry as a basis for accurate ingredient measurements, high altitude adjustment, and formula yield conversion. (Quantitative Fluency)
- Apply appropriate vocabulary used in the field of baking and pastries for equipment, tools, ingredients and menu items. (Specialized Knowledge/Communication Fluency)
- Identify, formulate and assess a variety of baked products. When assessing, identify faults and likely causes in baked goods. (Specialized Knowledge/Critical Thinking)

- Reflect on and respond to ethical issues relating to preparing baked goods for consumers with allergens or dietary restrictions based on health, religion, and/or culture. (Personal and Social Responsibility)
- Identify, utilize and cite various sources of information in a baking research project. (Information Literacy)

Requirements

Bakeshop Production (Technical Certificate)

Award: Technical Certificate
Program of Study: Bakeshop Production
Major Code: 1141

About This Program . . .

This program will prepare students for employment in the field of baking and the art of pastries. The certificate program will develop the students' skills and understanding in the production of pastries, yeast products, quick breads, use of fruits and international desserts. Students completing the certificate program could find employment in the following areas: baker, baking assistant, journeyman baker, cake decorator, or pastry cook, and are prepared to continue for advanced study in the Associates of Applied Science in Baking and Pastry, and Bachelors in Hospitality Management.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply food safety concepts to demonstrate personal hygiene guidelines, consumer safety, and sanitation procedures for preparation, storage, and service of food. (Applied Learning)
- Apply mathematical concepts and practices to the field of baking and pastry as a basis for accurate ingredient measurements, high altitude adjustment, and formula yield conversion. (Quantitative Fluency)
- Identify, formulate and assess a variety of baked products. (Specialized Knowledge)

Requirements

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(17 semester hours, must earn a grade of "C" or better in each course.)

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Biological Sciences

The Bachelor of Science degree with a biological science concentration provides a broad background in the biological sciences. Students can choose biology courses from a variety of areas: cellular, developmental and molecular biology; anatomical and physiological biology; organismal biology; and ecology, evolution and systematics. The biology concentration also offers outdoor field courses and laboratories. Biology Faculty have a diversity of specialties including: cell signaling, genetics, small mammal biology, fisheries, plant pathology, herpetology, human/animal physiology, the evolution of development, plant evolution, and tropical ecology. Graduates of the program pursue careers in the medical field, botany, wildlife biology, cell biology or biotechnology, among the many career options available with a biology degree from Colorado Mesa University.

Students wishing to obtain teacher certification complete a concentration in secondary education leading to teacher licensure. Graduates of the program can teach in the state of Colorado or use their teaching expertise in other careers. After completing foundation sciences classes in biology, chemistry, physics and geology, students choose 10 hours of upper level biology course work, in consultation with their advisor. Students must be admitted into the teaching program to complete the licensure requirements. For more information about these requirements, contact the Center for Teacher Education.

Biology, Biological Sciences (BS)

Degree: Bachelor of Science
Major: Biological Sciences
Concentration: Biology
Program Code: 3410

About This Major . . .

The Bachelor of Science degree with a Biological Science major provides a broad background in the biological sciences. Students choose biology courses from four areas: cell, developmental, and molecular biology; anatomical and physiological biology; organismal biology; and ecology, evolution, and systematics. Students wishing to obtain teacher certification complete a concentration in Teacher Licensure. The

Biology Concentration also offers field courses on tropical ecosystems in Ecuador. The Department of Biology operates the only electron microscope facility in the area. Graduates of our program pursue careers in the medical field, plant pathology, wildlife biology, cell biology or biotechnology, among just a few of the career options available with a Biology degree from Colorado Mesa University.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate a broad, comprehensive knowledge of the main areas of biology (including evolution, diversity, ecology, cell biology, and genetics) and the ability to apply this knowledge to address new questions. (Specialized knowledge)
- Collect and analyze quantitative data and interpret quantitative data presented in primary scientific literature. (Quantitative Fluency/ Applied Learning)
- Utilize science as a way of thinking and problem solving, and make key observations, ask questions, formulate hypotheses, design experiments, collect data, draw logical conclusions, and explain and defend those conclusions to others. (Critical Thinking)
- Demonstrate effective biological communication skills, both in writing and orally. (Communication fluency)
- Evaluate and defend contrasting viewpoints related to ethical, social, civic, and/or environmental challenges in the field of biological sciences. (Personal Social Responsibility)
- Critically search, evaluate, and appropriately apply information from primary scientific literature. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).

- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

CHEM 132 & 132L	General Chemistry II-GTSC1 and General Chemistry Laboratory II-GTSC1	3
Total Semester Credit Hours		31

¹ Must receive a grade of "C" or better and must be complete by the time the student has 60 semester hours.

² This is a 4 credit course. 3 credits apply to the Essential Learning requirements and 1 credit applies to elective credit. Also, professional schools (medical, veterinary, dental) may require one semester or two semesters of calculus. MATH 151 and MATH 152 may be used to fulfill the Mathematics requirement. If Math higher than MATH 113 is needed, an ALEKS Math Placement Test will determine the appropriate Math course.

³ CHEM 131 & CHEM 131L and CHEM 132 & CHEM 132L are 5 credit hours each for a total of 10 semester hours. 7 credit hours will apply to Essential Learning Natural Sciences and 3 credit hours will apply to electives.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Cellular, Molecular, and Developmental Biology, Biological Sciences (BS)

Degree: Bachelor of Science

Major: Biological Sciences

Concentration: Cellular, Molecular, and Developmental Biology

Program Code: 3414

About This Major . . .

The Bachelor of Science degree with a Biological Sciences major provides a broad background in the biological sciences. Students choose biology courses from four categories: cellular, molecular, and developmental biology; anatomical and physiological biology; organismal biology; and ecology, evolution, and systematics. The Cellular, Molecular, and Developmental Biology Concentration will provide a solid background in cell and molecular biology, genetics, and biochemistry. The concentration prepares graduates of this program for careers in the medical field, cell biology, and biotechnology, which are just a few of the career options available.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate a broad, comprehensive knowledge of the main areas of biology (including evolution, diversity, ecology, cell biology, and genetics) and the ability to apply this knowledge to address new questions. (Specialized knowledge)
- Collect and analyze quantitative data and interpret quantitative data presented in primary scientific literature. (Quantitative Fluency/ Applied Learning)
- Utilize science as a way of thinking and problem solving and make key observations, ask questions, formulate hypotheses, design

experiments, collect data, draw logical conclusions, and explain and defend those conclusions to others. (Critical Thinking)

- d. Demonstrate effective biological communication skills, both in writing and orally. (Communication fluency)
- e. Evaluate and defend contrasting viewpoints related to ethical, social, civic, and/or environmental challenges in the field of biological sciences. (Personal Social Responsibility)
- f. Critically search, evaluate, and appropriately apply information from primary scientific literature. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Ecology, Evolution, and Organismal Biology, Biological Sciences (BS)

Degree: Bachelor of Science

Major: Biological Sciences

Concentration: Ecology, Evolution, and Organismal Biology

Program Code: 3409

About This Major . . .

The Bachelor of Science degree with a Biological Sciences major provides a broad background in the biological sciences. Students choose biology courses from four categories: cellular, molecular, and developmental biology; anatomical and physiological biology; organismal biology; and ecology, evolution, and systematics. The Ecology, Evolution, and Organismal Biology Concentration will provide a solid background in ecology and evolution, and offers field courses in a variety of areas, in addition to internships and research opportunities. Graduates of this program may pursue careers in ecology, plant biology, fish and wildlife

biology, and evolutionary biology, which are just a few of the career options available.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate a broad, comprehensive knowledge of the main areas of biology (including evolution, diversity, ecology, cell biology, and genetics) and the ability to apply this knowledge to address new questions. (Specialized knowledge)
- Collect and analyze quantitative data and interpret quantitative data presented in primary scientific literature. (Quantitative Fluency/ Applied Learning)
- Utilize science as a way of thinking and problem solving and make key observations, ask questions, formulate hypotheses, design experiments, collect data, draw logical conclusions, and explain and defend those conclusions to others. (Critical Thinking)
- Demonstrate effective biological communication skills, both in writing and orally. (Communication fluency)
- Evaluate and defend contrasting viewpoints related to ethical, social, civic, and/or environmental challenges in the field of biological sciences. (Personal Social Responsibility)
- Critically search, evaluate, and appropriately apply information from primary scientific literature (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.

- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTCO1	3
ENGL 112	English Composition II-GTCO2	3
Mathematics ¹		
MATH 113	College Algebra-GTMA1 ²	3
History		
Select one History course		3
Humanities		
Select one Humanities course		3
Social and Behavioral Sciences		
Select one Social and Behavioral Sciences course		3
Select one Social and Behavioral Sciences course		3
Fine Arts		
Select one Fine Arts course		3
Natural Sciences ³		
CHEM 131 & 131L	General Chemistry I-GTSC1 and General Chemistry Laboratory I-GTSC1	4
CHEM 132 & 132L	General Chemistry II-GTSC1 and General Chemistry Laboratory II-GTSC1	3
Total Semester Credit Hours		31

¹ Must receive a grade of "C" or better and must be complete by the time the student has 60 semester hours.

² This is a 4 credit course. 3 credits apply to the Essential Learning requirements and 1 credit applies to elective credit. Also, professional schools (medical, veterinary, dental) may require one semester or two semesters of calculus. MATH 151 and MATH 152 may be used to

fulfill the Mathematics requirement. If Math higher than MATH 113 is needed, an ALEKS Math placement test will determine the appropriate Math course.

³ CHEM 131/131L and CHEM 132/132L are 5 credit hours each for a total of 10 semester hours. 7 credit hours will apply to Essential Learning Natural Sciences and 3 credit hours will apply to electives.

Other Lower Division Requirements

Code	Title	Semester Credit Hours
Wellness Requirement		
KINE 100	Health and Wellness	1

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Secondary Education, Biological Sciences (BS)

Degree: Bachelor of Science

Major: Biological Sciences

Concentration: Biology, Secondary Education

Program Code: 3412

About This Major . . .

The Biology program offers coursework, in conjunction with the Center for Teacher Education, leading to licensure in secondary education science. Graduates of the program can teach in the state of Colorado or use their teaching expertise in other careers. After completing foundation sciences classes in Biology, Chemistry, Physics and Geology, students choose 10 hours of upper level Biology course work, in consultation with their advisor.

The secondary licensure program provides teacher education candidates with broad content knowledge in science and prepares them as teachers for grades 7 through 12. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115, What It Means to be an Educator, and EDUC 215, Teaching as a Profession, must be taken before applying to the program.

Important information for this degree:

- 2.80 cumulative GPA or higher required in all CMU coursework.
- All EDUC prefix courses must be completed with a grade of "B" or better.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
- A grade of "C" or better must be earned in all required courses, unless otherwise stated.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Biological Sciences Outcome 1: Utilize the scientific approach to address novel questions and problems through the development of

hypotheses, design of experiments, collection of data, analysis of data, and interpretation of results. (Quantitative Fluency/Applied Learning)

- b. Biological Sciences Outcome 2: Identify, examine, evaluate and discuss the scientific literature. (Critical Thinking)
- c. Biological Sciences Outcome 3: Articulate biological principles and ideas effectively, both in written and oral form. (Communication Fluency)
- d. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- e. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- f. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- g. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- h. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a

baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 2.80 cumulative GPA or higher required in all CMU coursework.

Essential Learning Requirements

(31 semester hours, must earn a grade of "C" or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Biology, Liberal Arts (AS)

Degree: Associate of Science

Major: Liberal Arts

Emphasis: Biology

Program Code: 2411

About This Major . . .

The Associate of Science (A.S.) degree is designed for students who intend to continue their education and obtain a baccalaureate degree.

The A.S. is the appropriate choice for students who will take upper division coursework in mathematics, biological sciences, and physical sciences. The Essential Learning requirements of this degree program meet the Colorado Statewide General Education Core and the lower division general education requirements at most public institutions in Colorado.

In the Biology Program students choose courses from four areas: cell, molecular, and developmental biology; anatomical and physiological biology; organismal biology; or ecology, evolution, and systematics. Graduates of our program with an A.S. degree may then seek to continue their education to pursue careers in teaching, plant pathology, wildlife biology, cell biology or biotechnology, among just a few of the career options, or may use their A.S. to support careers in other disciplines.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate a basic knowledge of the main areas of biology (including plant and animal biology, evolution, ecology, cell biology and genetics) and the ability to apply this knowledge to address new questions. (Specialized Knowledge)
- Gather, organize and analyze scientific data and draw logical conclusions. (Critical Thinking)
- Demonstrate effective communication skills, both in writing and orally in Biology. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Students that intend to continue with Colorado Mesa University should take ESSL 290 - Maverick Milestone and ESSL 200 - Essential Speech during the final semester of their Associate of Science work.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course

sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Biology (Minor)

Minor: Biology
Program Code: M400

About This Minor. . .

In the Biology Program students choose courses from four areas: cell, developmental, and molecular biology; anatomical and physiological biology; organismal biology; and ecology, evolution, and systematics. Graduates of our program with a Minor in Biology may then seek to continue their education in Biology or may use their Minor to support careers in other disciplines.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Business

(Also see [Computer Information Systems](#) (p. 235), [Energy Management/Landman](#) (p. 366), and [Hospitality Management](#) (p. 446))

Program Description

Master of Business Administration

The Master of Business Administration (MBA) is a challenging degree that prepares graduates for the ever-changing business world. With a combination of theory and application of current business practices, classes provide students the opportunity to analyze actual business scenarios. See [Graduate Policies and Programs](#) section (p. 78) of this catalog for complete degree requirements.

Bachelor of Business Administration

The Bachelor of Business Administration (BBA) degree provides an in-depth study of the many facets of business. The program's extensive business core provides students with the knowledge, skills and abilities to compete in both local and global business environments. The business core covers functional areas of business and offers an applied approach, providing students with an opportunity to apply concepts and theories learned in class to real-life business projects. Students choose from the listed concentrations and gain additional depth in one or more areas.

The BBA is a very versatile and valuable degree. In addition to positions in corporate America, graduates hold positions in nonprofit organizations like hospitals, schools, and theaters, as well as positions in organizations ranging from entry-level manager to Chief Executive Officer. Colorado Mesa University's BBA graduates are entrepreneurs, small business owners, bank vice-presidents, product managers in advertising firms, and project and operations managers in manufacturing organizations.

BBA Concentrations (Students must choose at least one)

Requirements vary with the concentration selected. See program concentration options with links to program details in the Programs of Study tab and visit Degree Works for complete requirements for the major and selected concentration.

Bachelor of Applied Science: Business Administration

The Bachelor of Applied Science (BAS) in Business Administration combines the technical skills and business proficiency necessary for success. A unique program, the BAS degree allows students who have already earned an Associate of Applied Science (AAS) degree to build

upon their technical specialties with essential learning courses and junior and senior level business courses. This allows associate degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework. Business courses include courses in marketing, promotion, management, accounting, finance, small business management and entrepreneurship. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen industries. Prospective students not holding an AAS degree can begin their university career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the BAS. This degree will provide students with the ability to move into supervision/management positions.

Bachelor of Science: General Accounting

This program is designed for undergraduate students who do not wish to pursue CPA certification. The General Accounting concentration provides students with basic business skills as well as the accounting knowledge needed to work in an accounting department in private industry or government.

Bachelor of Science: Public Accounting

The Public Accounting concentration provides students with basic business skills as well as the accounting knowledge needed to pass the Certified Public Accounting (CPA) exam. Graduates of this program have a very high CPA exam pass rate and are heavily recruited by local and regional CPA firms. Most graduates will have job offers months before they graduate. This program is designed to be the undergraduate component of the 3+2 accounting program which can earn the graduate a Bachelor of Science in Accounting and a Master of Business Administration (MBA) in five years. The Public Accounting concentration is the required pathway for the 3+2 program and, in conjunction with the 3+2 program, will provide the curriculum needed for CPA licensure.

Bachelor of Science: Computer Information Systems

The Bachelor of Science in Computer Information Systems is a degree required today as organizations face the challenges of technology management. This program provides graduates with business management skills and computer information expertise to manage computer systems in today's organizations. Graduates of this program are employed in occupations such as systems analysts, analyst/programmers, database administrators, network administrators, web page designers, help desk specialists and IT managers. Graduates assist businesses with creating, obtaining and maintaining computer information systems that solve problems and assist in facilitating routine business events. As businesses increasingly rely on technology to provide a competitive advantage, employees with an understanding of both business concepts and computer systems are necessary. Computer information systems studies require students to examine computer systems from organizational, social, psychological and technical perspectives. Graduates from this program will have taken a variety of courses that were developed based on national guidelines for quality degrees in information systems.

Associate of Arts: Business Administration

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The Business Administration AA degree, in addition to providing students with their essential learning courses, is useful in giving students an overview of business. The AA is also an appropriate choice for students who will take upper division coursework in the arts, humanities, or social and

behavioral sciences. Through the acquisition of essential learning credits, the degree also positions students for completion of a four-year degree in business. The degree includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado.

Associate of Applied Science: Hospitality Management

The field of hospitality management combines the technical skills and business proficiency necessary for success in today's business world.

Minors

Minors are designed to prepare non-business students with an overview of business knowledge, allowing students to combine other disciplines with necessary business skills. Four functional areas of business are covered in the minor with additional upper division courses required based upon the chosen minor.

Accounting

Accounting is the language of business and regardless of your major, the more accounting you have the better prepared you will be for a management position. This is a rigorous minor that will stand out on a resume.

Business Administration

The Business Administration minor complements many other degrees and is designed to prepare students to enter the world of business with the basic business skills needed to contribute more efficiently and effectively in the workplace. Courses in management, marketing and workplace communication provide students an opportunity to build a foundation in business. Additionally, courses in accounting, finance and computer information systems allow students to choose classes that best fit their career goals. A Business Administration minor coupled with a non-business major can increase the employment opportunities available in a variety of areas.

Business Analytics

The minor in Business Analytics is designed to prepare students for managerial level decision making based on the use of information and computer technology. Today's world presents a wealth of data. Using data effectively requires insight and talent with a variety of tools. The Business Analytics minor is intended for students who are interested in expanding their knowledge and skills in the use of data and related technologies. A Business Analytics minor coupled with any major can increase the employment opportunities available in a wide variety of areas.

Computer Information Systems

The Computer Information Systems minor allows students majoring in other subjects to enhance their degree with information systems knowledge. Graduates may use their expertise to help solve computer system problems for businesses. Since many businesses rely heavily on computer systems as decision-making tools, graduates with this minor will have a competitive advantage over those without it when applying for positions in many organizations. This minor may also give students an advantage when attempting to advance within an organization. Additionally, many employees across numerous organizations find themselves using computer hardware and software as productivity tools within their positions on a daily basis. The Computer Information Systems minor assists students in learning skills and background information that they will need in all occupations.

Cybersecurity

Housed under the Computer Information Systems program, this is a new interdisciplinary minor in cybersecurity designed for students enrolled in various degrees and programs at CMU. Students enrolled in this minor program take six (6) courses in total; three (3) from Computer Information Systems and three (3) from Computer Science. Visit the [Cybersecurity page](#) (p. 284) for additional details about this minor.

Economics

The Economics minor is designed to prepare non-business students with an overview of business knowledge, allowing students to combine other disciplines with necessary business skills. The functional areas of business are covered in the minor with additional upper division courses required based upon the chosen minor. The minor in economics is designed to prepare students with an overview of the basics of economics. Coursework includes the principle classes in macroeconomics and microeconomics, plus intermediate macroeconomics and microeconomics courses. The required coursework prepares students with the critical thinking and problem solving skills needed in today's world, as well as the ability to apply economic rationale in the decision making process.

The Davis School of Business also offers the Bachelor of Business Administration with a concentration in economics.

Entrepreneurship

The minor in entrepreneurship is designed to equip students with the basic knowledge and skills needed to successfully operate a small business. The Entrepreneurship minor is intended for students in disciplines other than business who wish to begin small businesses in their major area. The minor will provide students with the basics needed as they face the exciting challenges of small business ownership.

The Davis School of Business also offers the Bachelor of Business Administration with a concentration in entrepreneurship.

Hospitality Management

For the student interested in the area of hospitality, a minor coupled with a bachelor's degree can increase the employment opportunities available in a variety of hospitality-related areas.

International Business

The International Business minor is designed for students who would like to combine business studies with their interest in the Spanish language and Hispanic culture. This multidisciplinary minor provides students the opportunity to develop required skills to operate in multinational firms and global markets.

Certificates

Business certificates are designed to provide entry-level knowledge, skills and abilities in a specific area. The coursework in each of the certificates can also be used as hours toward a two-year or four-year degree in that specialization. Emphasis in each certificate is on knowledge and skill development.

Computer Information Systems: Decision Support Systems

The certificate in decision support systems is designed to expose students and business managers to the knowledge and skills needed to use computer software to solve business problems, particularly to

support decision making. The certificate will provide students with an overview of information they would encounter if they went on to earn the BBA concentration in information systems or the BS in computer information systems, each of which more fully prepares students to work in or manage the information systems functions of organizations.

Cybersecurity

Housed under the Computer Science (CS) program and the Computer Science and Engineering department, the applied technical certificate degree is especially designed for CS majors to concentrate in cybersecurity fundamentals and principles grounded on the strong foundation of CS knowledge. However, working professionals with a strong background in system and network administration of computer science in general can enroll in this program independent of the major and degree. Students take three (3) security courses (along with programming remedial course(s), if required) to get their professional certificate in cybersecurity. Visit the [Cybersecurity page](#) (p. 284) for additional details about this certificate.

Energy Management/Landman

The certificate in energy management/landman is designed to provide students with the knowledge and skills needed to engage in landman/energy management activities in the workplace. The certificate also better prepares students if they choose to then pursue a BBA with a concentration in energy management/landman.

Entrepreneurship

The certificate in entrepreneurship is designed to expose students and prospective entrepreneurs to the beginning knowledge and skills needed to examine and evaluate entrepreneurship opportunities. The certificate will provide students with an overview of business knowledge, which more fully prepares them to operate their own businesses.

Real Estate

The certificate in real estate offers students invaluable knowledge of the real estate industry, knowledge that can be used both personally and professionally. With over five million people currently employed in the real estate industry, this certificate provides opportunities in many differing real estate careers. Students will be provided opportunities to learn all aspects of the industry to include: appraisal and assessment, property management, commercial and residential investment opportunities and management, real estate law, and real estate financing. Students will also learn the tools needed to analyze and evaluate both personal and professional potential real estate investment opportunities. This certificate is not intended to lead to real estate licensure.

Business Administration (MBA)

Degree: Master of Business Administration
Program Code: 8100

About This Program . . .

The Colorado Mesa University Master of Business Administration degree is a challenging program designed to prepare graduates for the changing business world. The degree is awarded after successful completion of 36-39 semester hours of rigorous study. The program is designed to provide the student with a broad background in business while allowing the student to focus on a specified area of study, if desired. To this end, students acquire knowledge of management operations; an appreciation of the interrelationships involved in business; an understanding of the economic, political and social environment in which businesses function; and behavioral skills that are essential in the manager's role in the implementation of business decisions. The MBA program endeavors to provide an atmosphere conducive to the development of each student's ability to think in a creative manner and to effectively problem solve. The MBA program is 100% online with no residency requirements. We make extensive use of the latest learning management systems to disseminate course materials, lectures, simulations, group projects, case studies and

applied research. All of our courses are taught by qualified graduate faculty with exceptional experience in higher education and industry.

An MBA student can pursue one of several tracks; Professional track, Management Information Systems track, Healthcare Administration, or Sports Management track. Each track has three basic components: a 27-hour core, a 3-hour research component, and 6-9 hours of additional master's level coursework consistent with a chosen track.

There are two types of applicants for the MBA program. The first type is the **Traditional MBA** applicant who has earned an undergraduate degree.

The second type of applicant has not yet earned their undergraduate degree and is currently enrolled at CMU in the BS Public Accounting program, the BBA Finance program, or the BS Construction Management program and may qualify to pursue the MBA as part of a Bachelor degree **3+2 MBA** concurrent enrollment program.

Important information for the **Traditional MBA** applicant:

- An applicant must:
 - Domestic applicants must possess an undergraduate degree from a regionally accredited college or university;
 - Have earned a GPA of 3.0 or better from the most recent 60 credit hours of course work earned toward a bachelor's degree, including required leveling courses;
 - Submit an essay indicating reasons for seeking a Master of Business Administration degree including professional and/or career goals and pertinent past work experience. The minimum length is 750 words, submitted as MS Word document with 1" margins, 12 pt. font and a cover page which includes the name of applicant and date;
 - Provide a current resume;
 - Provide contact information for two (2) recommendations: one professional and one academic;
- An international student must take the TOEFL and achieve a score of 550 or higher (213 on the computer-based tests or 79-80 on the internet-based test), and meet other requirements as specified under International Student Admission criteria.
- Leveling Courses provide a foundation for success in the MBA program. Applicants who enter the program with an undergraduate degree in business come prepared with business knowledge from these courses. Non-business majors are encouraged, but not required, to prepare for their MBA experience by taking the following courses. While each of these courses is offered by CMU, additional delivery methods are available, including online instruction.. The leveling courses are: ACCT 201, CISB 101, FINA 301, MANG 201, MARK 231, and CISB 241 or STAT 241.
- 36-39 Semester Hours are required for the MBA Degree.
- No class grade lower than "B" will be counted in the degree.
- It is the student's responsibility to read, understand, and follow all policies and procedures in the MBA Handbook.
- Prior to completing their first semester or first six hours of the program a student must file a Degree Planning Sheet with the MBA Coordinator to delineate that student's specific degree requirements.
- Admission to the program also follows all general admissions policies & procedures for graduate programs outlined in the university catalog.

Important information for the **3+2 MBA** applicant:

Applicants must meet the following criteria in addition to all of the criteria for the MBA program.

- a. Accepted into one of the following four-year bachelor degree programs, must have successfully completed the indicated courses, and must have earned the indicated number of credit hours in the bachelor degree major.
 - i. BS in Accounting, Public Accounting Concentration; ACCT 322 or currently enrolled in it; 11 hours of ACCT.
 - ii. BBA, Finance Concentration; FINA 301 and FINA 320; 17 hours of BBA Foundation Courses.
 - iii. BS in Construction Management; CONM 340, 361, and 362 or 379; 17 hours of BS Foundation Courses.
- b. Classified as a senior (i.e., at least 90 credit hours including hours in which the student is currently enrolled and for which the student is registered for a future semester).
- c. At least a 3.25 overall GPA and must have at least a 3.25 GPA in courses in the student's declared major.
- d. A 3+2 Concurrent Enrollment application form to the MBA Office.
- e. Submit to the MBA Liaison in the business school office, a program completion plan demonstrating how all remaining bachelor degree requirements and all MBA requirements will be met in two years.
- f. Provide to the business school office a letter of recommendation from a faculty member in the bachelor degree department.
- g. Submit official transcripts to the business school office.
- h. Complete the MBA program admission process.
- i. Meet with MBA Coordinator and have been approved for study in the 3+2 concurrent enrollment program.

After admission into the Bachelor Degree 3+2 MBA Concurrent Enrollment Program, the student:

- a. Must follow the two-year recommended course sequence (see below) for the MBA course component.
- b. Must notify the MBA Coordinator immediately if justifiable life circumstances do not allow the student to complete both undergraduate and graduate programs within two years of admission into the program.
- c. Must complete ALL bachelor degree graduation requirements in the same semester or prior to completing all MBA graduation requirements.
- d. Must submit an intent to graduate and meet with their advisor. This requirement must be met before the published deadline in the semester prior to intended graduation.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- a. Apply business-specific knowledge within projects individually and/or collaboratively. (Specialized Knowledge/Applied Learning)
- b. Employ advanced mathematical, statistical methods, or other analytical processes to address issues within a business environment. (Quantitative Fluency)
- c. Create oral and written arguments or explanations, well-grounded in business related theories and methods. (Communication Fluency)
- d. Formulate and evaluate hypotheses as related to business problems, issues, concepts, and various perspectives. (Critical Thinking)

- e. Synthesize, evaluate, or refine the information base of various business scholarly sources. (Information Literacy)
- f. Articulate moral, ethical, legal, or professional challenges within the business environment. (Ethical Reasoning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Program Specific Requirements

(36 - 39 semester hours, must pass all courses with a grade of "B" or higher.)

Code	Title	Semester Credit Hours
Required MBA Core Courses

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Bachelor of Business Administration in Finance + Master of Business Administration (3+2)

A degree in Finance positions a graduate to be a Chief Financial Officer, Financial Planner, Industrial Broker or Investment Counselor.

An understanding of finance not only prepares students for a variety of interesting and rewarding careers, but also equips them to make better decisions as investors throughout their lives. Virtually every business decision has financial implications and determining whether a particular

decision will likely create value or decrease it is the underlying principle of the finance discipline.

Finance graduates are sought to fill a variety of positions that include Financial Analyst, Retail Bank Manager, Cash Manager, Trust Officer, Credit Analyst, Financial Planner, Loan Officer, Real Estate Appraiser, Stockbroker, Insurance Agent, Portfolio Manager, Underwriter, Mortgage Banker, or Pension Fund Manager, to name a few.

For more information about the finance degree, please see ([Bachelor of Business Administration and Finance Degree Information](#)).

This program is also the undergraduate component of the 3+2 program, in which students can earn a Bachelor of Business Administration with a Finance Concentration and a Master of Business Administration (MBA, as described below) in five years. Through careful planning and coordination students can complete their four-year degree and their graduate degree simultaneously. For more information please see [3 + 2 MBA Program Information](#).

The Colorado Mesa University Master of Business Administration (MBA) degree is a challenging program designed to prepare graduates for the changing business world. The degree is awarded after successful completion of 36 semester hours of rigorous study. The program is designed to provide the student with a broad background in business while allowing the student to focus on a specified area of study, if desired. To this end, students acquire knowledge of management operations; an appreciation of the interrelationships involved in business; an understanding of the economic, political and social environment in which businesses function; and behavioral skills that are essential in the manager's role in the implementation of business decisions. The MBA program endeavors to provide an atmosphere conducive to the development of each student's ability to think in a creative manner and to effectively problem solve. The program makes extensive use of lectures, seminars, group projects, case studies and independent research. More information about our MBA Program can be found at [MBA Program Information](#).

Business Administration (BAS)

Degree: Bachelor of Applied Science
Major: Business Administration
Program Code: 3170

About This Major . . .

The Bachelor of Applied Science in Business Administration combines the technical skills and business proficiency necessary for success in today's business world. A unique program, the BAS allows students who have already earned an associate of applied science degree to build upon their technical specialties with Essential Learning courses and junior and senior level business courses. This allows associate degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework.

Business courses to be taken include courses in marketing, promotion, management, accounting, finance, small business management and entrepreneurship. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen industries.

Prospective students not holding an associate of applied science degree can begin their college career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the BAS. This

degree will provide students upward mobility in their area of employment as they move into supervision/management positions.

Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution. Any exceptions to this must be approved in advance by the department BAS advisor and the academic department head. All students must meet with the BAS advisor to plan and schedule all classes.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- a. Apply business knowledge and skills in appropriate business contexts (Critical Thinking) (SLO #1: Critical Thinking/Problem Solving Skills)
- b. Transfer knowledge and skills to new business situations. (Critical Thinking) (SLO #1: Critical Thinking/Problem Solving Skills)
- c. Analyze business data critically, reason logically, and apply quantitative analysis methods correctly to develop appropriate business conclusions. (Quantitative Fluency) (SLO #1: Critical Thinking/Problem Solving Skills)
- d. Analyze business data critically, reason logically, and apply qualitative analysis methods correctly to develop appropriate business conclusions. (Critical Thinking) (SLO #1: Critical Thinking/Problem Solving Skills)
- e. Communicate clearly, appropriately, and persuasively to the audience in writing. (Communication Fluency) (SLO #2: Effective Communication Skills)
- f. Communicate clearly, appropriately, and persuasively to the audience orally (Communication Fluency) (SLO #2: Effective Communication Skills)
- g. Demonstrate an understanding of the role of teams in organizations (Specialized Knowledge/Applied Learning) (SLO #3: Teamwork)
- h. Demonstrate behaviors consistent with effective teamwork (Specialized Knowledge/Applied Learning) (SLO #3: Teamwork)
- i. Analyze an issue within an ethical framework (Specialized Knowledge/Applied Learning) (SLO #4: Ethical Awareness)
- j. Recommend a solution based on an ethical framework (Specialized Knowledge/Applied Learning) (SLO #4: Ethical Awareness)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Business Economics, Business Administration (BBA)

Degree: Bachelor of Business Administration

Major: Business Administration

Concentration: Business Economics

Program Code: 3122

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as, the business world of tomorrow. The program provides students with the knowledge, skills and abilities to compete in both local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics, or hospitality management.

The BBA is a very versatile, flexible and valuable degree. Colorado Mesa's BBA graduates have the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

Economists are called upon for a variety of tasks including economic analysis of the overall economy as well as a data collection, research analysis, forecasting, planning and consulting. The ability to make decisions at the macroeconomic level as well as use economic modeling tools make this concentration valuable for all industries as well as local, state and federal government entities. The increased emphasis on analytical, quantitative and technology skills sets this concentration apart.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head for Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- a. Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)

- b. Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- c. Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- d. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- e. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- f. 3.1-Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
 - i. Recommend a solution based on an ethical framework. (Critical Thinking)
 - j. Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Energy Management/Landman, Business Administration (BBA)

Degree: Bachelor of Business Administration

Major: Business Administration
 Concentration: Energy Management/Landman
 Program Code: 3118

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The program provides students with the knowledge, skills and abilities to compete in both the local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics, entrepreneurship, insurance, energy management or hospitality management.

The BBA degree can be applied in various fields such as medicine, the arts, sports, and education. In addition to positions in corporate America, nonprofit organizations like hospitals, school systems, and theaters also require people with business training and skills. Graduates of BBA programs hold positions in organizations from entry level manager to chief executive officer.

Colorado Mesa's BBA graduates are entrepreneurs, small business owners, bank vice-presidents, product managers in advertising firms and project and operations managers in manufacturing organizations. The BBA is a very versatile, flexible and valuable degree. Colorado Mesa BBA graduates have great success stories in the business world as well as the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

Energy Management/Landman professionals provide expertise for energy companies including oil, gas and alternative energy sources, such as solar and wind. These students work both with landowners to acquire or obtain rights to land usage as well as with companies providing expertise in managing the complexities of the energy industry. Job opportunities abound in the energy industry, not only in the United States but also around the world as students in this concentration help provide solutions to the growing world demand for energy.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- a. Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- b. Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- c. Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- d. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- e. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- f. Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
 - i. Recommend a solution based on an ethical framework. (Critical Thinking)
 - j. 4.3-Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a

baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Entrepreneurship, Business Administration (BBA)

Degree: Bachelor of Business Administration
Major: Business Administration
Concentration: Entrepreneurship
Program Code: 3119

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today’s organizations, as well as, the business world of tomorrow. The program provides students with the knowledge, skills and abilities to compete in both local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, insurance, human resource management, marketing, finance, economics, and hospitality management.

The BBA is a very versatile, flexible and valuable degree. Colorado Mesa’s BBA graduates have the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today’s job market. Small business is a major economic driver of the economy and a concentration in entrepreneurship can provide the knowledge and skills necessary to successfully run a small business. Coursework that provides opportunities to work with local small business owners provides valuable lessons in the reality of operating a small business in today’s economy.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services’ [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University’s Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students

who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- Analyze an issue within an ethical framework. (Personal and Social Responsibility)
- Recommend a solution based on an ethical framework. (Critical Thinking)
- 4.3-Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select “Print Options.” This will give you the options to either “Send Page to Printer” or “Download PDF of This Page.” The “Download PDF of This Page” option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.

- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Finance, Business Administration (BBA)

Degree: Bachelor of Business Administration

Major: Business Administration

Concentration: Finance

Program Code: 3125

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The program provides students with the knowledge, skills and abilities to compete in both local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics, entrepreneurship, energy management, insurance, landman/energy management and hospitality management

The BBA is a very versatile, flexible and valuable degree. Colorado Mesa's BBA graduates have great success stories in the business world as well as the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

Opportunities for students with a finance concentration include both large and small businesses, government entities, schools and universities, health care, non-profit organizations and individuals. Finance professionals become critical participants not only in day-to-day decision making but also in planning financial strategies to grow a business into the future. Finance professionals also assist people in developing sound personal financial strategies. Finance plays a critical role not only in business but also for each of us personally.

There is also an option of a five year (3+2) program to allow a student to graduate with the BBA in Finance and the Master of Business Administration (MBA). It is intended to assist students to prepare to

take the Certified Financial Analyst exam. See the MBA Director for more information.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- Analyze an issue within an ethical framework. (Personal and Social Responsibility)
 - Recommend a solution based on an ethical framework. (Critical Thinking)
 - Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information,

scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential

in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Hospitality Management, Business Administration (BBA)

Degree: Bachelor of Business Administration
Major: Business Administration
Concentration: Hospitality Management
Program Code: 3171

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The BBA with a concentration in Hospitality Management combines the technical skills and business proficiency necessary for success in today's business world. Business courses to be taken include courses in marketing, promotion, management, accounting, finance, small business management, and entrepreneurship.

The BBA is a very versatile, flexible and valuable degree. Many of Colorado Mesa's BBA graduates have gone on to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

Potential employment opportunities with this 4-year degree include management in any of the following areas: resort and hotel management, food and beverage management, travel and tourism management health care and education food service management, etc. With the ever expanding world hospitality market, this degree has endless opportunities

both within the United States and also in the every-growing global hospitality industry.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- a. Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- b. Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- c. Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- d. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- e. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- f. Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
 - i. Recommend a solution based on an ethical framework. (Critical Thinking)
 - j. Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information,

scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Human Resource Management, Business Administration (BBA)

Degree: Bachelor of Business Administration
Major: Business Administration
Concentration: Human Resource Management
Program Code: 3128

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The program provides students with the knowledge, skills, and abilities to compete in both local and global

business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics, entrepreneurship, human resource management, energy management, insurance, or hospitality management.

The BBA is a very versatile, flexible, and valuable degree. Colorado Mesa's BBA graduates have great success stories in the business world as well as the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

With impending legislation, the need for additional personnel in the area of human resource management will only grow in the future.

Become a part of the industry that performs vital functions for all businesses: finding the right people for the right job and then providing training and development for that employee. This concentration has been recognized as aligning with the Society for Human Resource Management curriculum.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

The 21 semester hours listed under Foundation Courses, as well as the Essential Learning English, Essential Learning Math and Essential Learning Social and Behavioral Sciences Requirement must be completed within the student's first 60 hours.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)

- f. Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
- i. Recommend a solution based on an ethical framework. (Critical Thinking)
- j. Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

International Business, Business Administration (BBA)

Degree: Bachelor of Business Administration
Major: Business Administration
Concentration: International Business

Program Code: 3174

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The program provides students with the knowledge, skills, and abilities to compete in both the local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics, entrepreneurship, insurance, energy management or hospitality management. The BBA degree can be applied in various fields such as medicine, the arts, sports, and education. In addition to positions in corporate America, nonprofit organizations like hospitals, school systems, and theatres also require people with business training and skills. Graduates of BBA programs hold positions in organizations from entry level manager to chief executive officer.

Colorado Mesa's BBA graduates are entrepreneurs, small business owners, bank vice-presidents, product managers in advertising firms and project and operations managers in manufacturing organizations. The BBA is a very versatile, flexible and valuable degree. Colorado Mesa BBA graduates have great success stories in the business world as well as the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)

- e. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- f. Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
- i. Recommend a solution based on an ethical framework. (Critical Thinking)
- j. Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Program Code: 3173

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The program provides students with the knowledge, skills, and abilities to compete in both local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics, entrepreneurship, insurance, energy management and hospitality management.

The BBA is a very versatile, flexible and valuable degree. Colorado Mesa BBA graduates have great success stories in the business world as well as the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)\ \

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- d. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- e. Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- f. Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
- i. Recommend a solution based on an ethical framework. (Critical Thinking)
- j. Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.

¹ Essential Learning Capstone must be taken after completion of the Essential Learning English and Mathematics requirements, and when a student has earned between 45 and 75 hours.

Foundation Courses

(21 semester hours. These courses plus Essential Learning Math & English requirements must be completed within the student's first 60 hours.)

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Marketing, Business Administration (BBA)

Degree: Bachelor of Business Administration
Major: Business Administration

Concentration: Marketing
Program Code: 3127

About This Major . . .

The Bachelor of Business Administration (BBA) is designed to prepare students for the challenges of today's organizations, as well as the business world of tomorrow. The program provides students with the knowledge, skills and abilities to compete in both local and global business environments. Additionally, the program allows for an emphasis in a specialized area such as management, marketing, finance, economics or hospitality management. The BBA is a very versatile, flexible and valuable degree. Colorado Mesa's BBA graduates have the ability to earn advanced degrees in business such as the Master of Business Administration – one of the most sought after degrees by employers in today's job market. Marketing is a critical part of today's business. Classes in promotion, consumer behavior, sales and sales management, creating marketing materials, and advanced marketing will place marketing students on a path to an exciting, fast-paced career in marketing for large and small businesses, health care and nonprofits to name a few areas. Selling skills are essential for all areas of business providing marketing students with an important skill to build their resume.

To be admitted to the Bachelor of Business Administration program, certain prerequisites must be satisfied. Please see the Department Head of Business for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Business Administration, Liberal Arts (AA)

Degree: Associate of Arts
Major: Liberal Arts
Emphasis: Business Administration
Program Code: 2141

About This Major . . .

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA is also an appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide Essential Learning Core and meets the lower-division Essential Learning requirements at most public institutions in Colorado. The Business Administration AA degree, in addition to providing students with Essential Learning coursework, is useful in giving students an overview of the business world.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize information on an assigned business topic. (Specialized Knowledge)
- Recognize mathematical concepts and methods in relation to business issues. (Quantitative Fluency)
- Communicate clearly and appropriately basic business information. (Communication Fluency)
- Describe beginning business concepts in appropriate business contexts. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.

- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Total Semester Credit Hours	60

Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Arts work.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Business (Minor)

Minor: Business
Program Code: M130

About This Minor. . .

The minor in Business is designed to prepare students to enter the world of business with the basic business skills needed to contribute more efficiently and effectively in their place of work. A foundation in accounting, management, marketing and workplace communication, provides students an opportunity to build a foundation in business. Additionally, courses in management, marketing, accounting, finance, and computer information systems allow students to choose classes that best fit their program goals. A business minor coupled with a non-business major can increase the employment opportunities available in a variety of areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24 semester hours)

- Before entering the minor in Business, students are presumed to have basic communication and computer literacy, including working knowledge of word processing and spreadsheet software. Students lacking this basic knowledge are responsible for attaining it through coursework, tutorials, or workshops.

Code	Title	Semester Credit Hours
Required Courses		
ACCT 201	Principles of Financial Accounting	3
MANG 201	Principles of Management	3
BUGB 211	Business Communications	3
or MANG 410	Effective Workplace Communication	
MARK 231	Principles of Marketing	3
Select four courses of the following: ¹		12
ACCT 202	Principles of Managerial Accounting	
BUGB 231	Survey of Business Law	
CISB 305	Solving Problems Using Spreadsheets ²	
ECON 201	Principles of Macroeconomics-GTSS1	
ENR 300	Small Business and Entrepreneurship	
ENR 450	Entrepreneurship ²	
FINA 301	Managerial Finance ²	
HRMA 371	Human Resource Management	
MANG 301	Organizational Behavior	
MANG 410	Effective Workplace Communication	
MARK 325	Consumer Behavior	
Total Semester Credit Hours		24

¹ At least two, and in some cases three courses, must be upper division. If a student takes BUGB 211 rather than MANG 410, then the student must take three upper-division courses in the choices listed above.

² Requires additional course prerequisites beyond those required for the Minor.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Economics (Minor)

Minor: Economics
Program Code: M710

About This Minor. . .

The minor in Economics is designed to prepare students with an overview of the basics of economics. Coursework includes the principles classes in Macroeconomics and Microeconomics plus the Intermediate Macroeconomics and Microeconomics courses.

The analytical skills plus the economics coursework required prepares students with the critical thinking and problem solving skills needed in today's world as well as the ability to apply economic rationale in the decision making process.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Entrepreneurship (Minor)

Minor: Entrepreneurship
Program Code: M150

About This Minor. . .

The minor in Entrepreneurship is designed to equip students with the basic knowledge and skills needed to successfully operate their own small business. A foundation in accounting, management, marketing, and finance provides students an opportunity to build a working knowledge of business. The entrepreneurship minor is intended for students in disciplines other than business who wish to begin small businesses in their major area. The minor will provide students with the basics needed as they face the exciting challenges of small business ownership.

International Business (Minor)

Minor: International Business

Program Code: M754

About This Minor. . .

The International Business Minor is designed for students who would like to combine business studies with their interest in the Spanish language and Hispanic culture. This multidisciplinary minor provides students the opportunity to develop required skills to operate in multinational firms and global markets. Students will be able to build their understanding of how language and cultural knowledge affects their global mindset, thus preparing them for positions in international companies. This minor may enhance students' employment opportunities in organizations with a worldwide presence (NGO or for-profits).

Entrepreneurship (Professional Certificate)

Award: Professional Certificate
Program of Study: Entrepreneurship
Program Code: 1171

About This Program . . .

The Certificate in Entrepreneurship is designed to expose students and prospective entrepreneurs to the beginning knowledge and skills

needed to examine and evaluate entrepreneurship opportunities. The certificate will provide students with an overview of information they would encounter if they went on to earn the minor in Entrepreneurship or BBA concentration in Entrepreneurship, each of which more fully prepares people to operate their own small business.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Fraud Examination (Professional Certificate)

Overview

Award: Professional Certificate
Program of Study: Fraud Examination
Program Code: 1702

About This Program . . .

The Fraud Examination Certificate is designed to prepare students to conduct financial fraud examinations in a variety of organizations. The curriculum is aligned with the Association of Certified Fraud Examiners (ACFE) requirements to sit for the Certified Fraud Examiner (CFE) exam.

The curriculum will focus on adding to existing accounting students' and professionals' knowledge of financial statement auditing and enable the certificate holder to achieve an additional professional certification beyond the Certified Public Accountant (CPA). Courses will include study of Fraud and Forensic Accounting, Data Analysis for Accounting, Forensic and Fraud Legalities, and Fraud Examination.

Throughout the program, students will be given opportunities to participate in hands-on learning activities. The program can be completed in one year and can be completed in on-campus, hybrid, and/or online courses.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply key principles of fraud examination and investigation. (Specialized Knowledge/Applied Learning)
- Apply data analysis techniques to financial data to look for evidence of fraud (Quantitative Fluency, Specialized Knowledge/Applied Learning)
- Evaluate the legalities and ethics related to investigation of financial frauds. (Communication Fluency, Personal and Social Responsibility, Specialized Knowledge/Applied Learning)
- Develop skills to conduct a fraud examination and pass the Certified Fraud Examiner Exam. (Quantitative Fluency, Specialized Knowledge/Applied Learning)

Human Resource Management (Professional Certificate)

Award: Professional Certificate

Program of Study: Human Resource Management

Program Code: 1178

About This Program . . .

The Human Resource Management Certificate is designed to prepare students to practice HR Management in a variety of organizations.

The curriculum is aligned with the Society for Human Resource Management (SHRM) Body of Competency and Knowledge (BoCK). Students will gain technical HR knowledge and expertise to demonstrate mastery of critical HR functions including: HR Strategic Planning, Talent Acquisition, Employee Engagement & Retention, Training and Development, Total Rewards, Structure of the HR Function, Organizational Effectiveness & Development, Workforce Management. HR in the Global Context, Diversity & Inclusion, Risk Management, Corporate Social Responsibility, and U.S. Employment Law & Regulations.

Throughout the program, students will be given opportunities to participate in hands-on learning activities. The program can be completed in one year and can be completed fully online or as a hybrid of on-campus and online courses.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply key principles of human resource management (HRM), such as employment laws, staffing, training development, compensation, safety health, employee labor relations, ethics, and employee performance management. (Communication Fluency, Specialized knowledge/Applied Learning, Personal and Social Responsibility)
- Analyze and forecast organizational staffing requirements and their outcomes. (Communication Fluency, Quantitative Fluency, Specialized Knowledge/Applied Learning)
- Evaluate the functions of training and development in organizations, with emphasis on learning theory, learning objectives, instructional methods, needs assessment, evaluation of training effectiveness, and emerging concepts in workplace education. (Communication Fluency, Specialized Knowledge/Applied Learning)
- Design strategic compensation systems with emphasis on seniority; merit, incentive, and person-focused pay; job evaluation; internal and external equity; benefits administration; international, executive, and flexible workforce compensation systems; and diversity and ethical considerations. (Quantitative Fluency, Specialized Knowledge/Applied Learning, Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Requirements

(12 semester hours)

Code	Title	Semester Credit Hours

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated

requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Supervision (Technical Certificate)

Award: Technical Certificate
Program of Study: Supervision
Program Code: 1172

About This Program . . .

The Certificate in Supervision is designed to expose students and business managers to the knowledge and skills needed to supervise employees in the workplace. The certificate will provide students with an overview of information they would encounter if they went on to earn the Management Concentration in the BBA, which more fully prepares people to manage business functions and employees.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course

sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Business Analytics

(See [Business](#) (p. 175))

Chemistry

Program Description Chemistry

Chemistry is the systematic study of matter in the universe. It is often referred to as the "central science" in that it acts as the connection between many other disciplines including physics, biology, engineering, earth science, environmental science and medicine. Chemistry students gain a unique perspective on the composition, properties and reactivity of the substances surrounding them. These students gain problem-solving skills that can be applied in chemistry labs, in other classes and in day-to-day life. By having chemistry faculty with a diverse range of specialties (analytical chemistry, biochemistry, inorganic chemistry, physical chemistry and organic chemistry), our chemistry majors have the opportunity to learn about each of these fields. Recent graduates have been successful in the chemical industry and in secondary education. Many have continued their education in graduate and professional schools (including the University of Illinois Urbana-Champaign, University of Denver, University of Florida, University of Utah, and the University of Washington).

Opportunities for student research are numerous and the program is well equipped with modern chemical instrumentation, including a 400 MHz FT-NMR spectrometer, FT-IR and UV-visible spectrophotometers, high performance liquid and ion chromatographs and an inductively-coupled plasma atomic emission spectrometer.

As the “central science,” a strong background in chemistry is a wonderful complement to many other majors. A chemistry minor should be considered by any student who is interested in a career in science, medicine, patent law or technical sales.

Biochemistry

We offer a concentration in biochemistry within the chemistry degree. Biochemistry students build a strong foundation in chemistry and apply their knowledge to problems in chemistry and biology. Students learn to critically analyze chemical structures and chemical and biochemical reactions, skills which are necessary for success in fields of biochemistry, medicinal chemistry, medicine, pharmacy and chemical biology. By taking upper division courses in chemistry and biology, biochemistry majors develop a strong understanding of both subjects. Through research under a chemistry or biology faculty member, students can enhance their laboratory and critical thinking skills.

Biochemistry, Chemistry (BS)

Degree: Bachelor of Science
Major: Chemistry
Concentration: Biochemistry
Program Code: 3476

About This Major . . .

Biochemistry students build a strong foundation in chemistry and apply their knowledge to problems in chemistry and biology. Students learn to critically analyze chemical structures and chemical and biochemical reactions, skills which are necessary for success in fields of biochemistry, medicinal chemistry, medicine, pharmacy and chemical biology. By taking upper division courses in chemistry and biology, biochemistry majors develop a strong understanding of both subjects. Through research under a chemistry or biology faculty member, students can enhance their laboratory and critical thinking skills.

The program culminates in two courses designed to bridge students' coursework with their entry into the workforce, a medical degree program, or graduate school. The Advanced Laboratory course helps students to synthesize knowledge from various chemical disciplines and apply it to solving chemical problems in a practical manner. This is similar to the type of process that they are likely to experience after graduation. Our Communicating in the World of Chemistry course couples with our Advanced Laboratory course to help students express themselves in a professional manner while applying for and entering their new positions.

Colorado Mesa University graduates have been successful in finding jobs in the pharmaceutical industry and in secondary education, as well as being placed in graduate, pharmacy and medical schools.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate fluency in the concepts from major fields of chemistry (organic, physical, analytical, and biochemistry.) (Specialized Knowledge)
- Utilize mathematics to solve chemical and biological problems. (Quantitative Fluency)
- Employ proper experimental techniques. (Applied Learning)
- Interpret chemical and biological information from peer-reviewed publications. (Critical Thinking)
- Communicate chemical and biological topics effectively, both verbally and in writing. (Communication Fluency)
- Demonstrate a solid understanding of genetics, cellular, and molecular biology. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Chemistry (BS)

Degree: Bachelor of Science
Major: Chemistry
Program Code: 3470

About This Major . . .

Chemistry students gain a unique perspective on the composition, properties, and reactivity of the substances surrounding them. These students gain problem-solving skills that can be applied in chemistry labs, in other classes, and in day-to-day life. By having chemistry faculty with a diverse range of specialties (analytical, inorganic, physical, organic, and biochemistry), chemistry majors have the opportunity to learn about each of these fields, and they are provided with a wide variety of research opportunities. Students are trained to independently use modern instrumentation, including a 300 MHz nuclear magnetic resonance spectrometer liquid chromatograph, a mass spectrometer, and an ICP atomic emission spectrophotometer. The programs culminate in two courses designed to bridge students' coursework with their entry into the workforce or graduate school. In Advanced Laboratory, students synthesize knowledge from various chemical disciplines and apply it to solving chemical problems in a practical manner. Our Communicating in the World of Chemistry course couples with our Advanced Laboratory course to help students express themselves in a professional manner while applying for and entering their new positions.

Colorado Mesa graduates have jobs in the chemical industry and secondary education, and have gone to graduate, pharmacy, and medical schools. Our graduates have completed Ph.D. programs at the University of Denver, Arizona State University, University of Utah and University of Wyoming in chemistry, biomedical engineering and environmental engineering.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate fluency in the concepts from the major fields of chemistry (inorganic, organic, physical, and analytical). (Specialized Knowledge)
- Utilize mathematics to solve chemical problems. (Quantitative Fluency)
- Employ proper experimental techniques. (Applied Learning)
- Interpret chemical information from peer-reviewed publications. (Critical Thinking)

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTCO1	3
ENGL 112	English Composition II-GTCO2	3
Mathematics ¹		
MATH 151	Calculus I-GTMA1 ²	3
History		
Select one History course		3
Humanities		
Select one Humanities course		3

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Chemistry (Minor)

Minor: Chemistry
Program Code: M410

About This Minor. . .

Chemistry can be described as the systematic study of matter in the universe. It is often referred to as the "central science" in that it acts as the connection between many other disciplines including physics, biology, engineering, earth science, environmental science and medicine.

As such, a strong background in chemistry is a wonderful complement to many other majors. A chemistry minor should be considered by any student who is interested in a career in science, medicine, patent law, forensics, or technical sales.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Civil Engineering

Program Description

Colorado Mesa University and the University of Colorado Boulder partner to deliver a civil engineering program in its entirety in Grand Junction. Civil engineers design and supervise the construction of the buildings and infrastructure that make up our world - roads, bridges, tunnels, skyscrapers, transit systems, water treatment facilities, and offshore structures. They solve problems and meet challenges such as pollution,

clean drinking water, climate change, energy and transportation needs, urban development, and community planning.

Students completing the program will be awarded a Bachelor of Science in Civil Engineering degree from CU Boulder.

Special Requirements

Students enter CMU as "pre-civil engineering" majors. They may apply to the Civil Engineering Partnership Program:

- After one year at CMU if they have completed a two course sequence in calculus and a two course sequence in physical science with As or Bs and have an overall technical GPA of 3.0 or better, or
- After completing all required lower-division coursework at CMU with a technical GPA of 3.0 or better.

Interested students can learn more about the program and admission options on the [Department of Computer Science and Engineering website](#).

Civil Engineering, CMU/CU-Boulder Partnership Program (BSCE)

Degree: Bachelor of Science in Civil Engineering
Major: Civil Engineering
Program Code: 3454

This section provides links to information for the CMU/CU Boulder Civil Engineering Partnership Program. An official review of your coursework will be performed by CU administration to ensure completion of all graduation requirements. The BSCE degree is conferred by the CU Boulder.

Important information for this program:

- All Math, Science and Engineering courses completed at CMU must be completed with a grade of "C" or better to be eligible to transfer to CU Boulder.
- Minimum credits taken from CU Boulder: 45 hrs
- Minimum credits to graduate: 128 hrs

[More information for CMU/CU Boulder Partnership Degree in Civil Engineering](#)

Classical Studies

Program Description

Classical Studies provides the opportunity to explore the civilizations of ancient Greece and Rome—the roots of Western history, literature, philosophy, and culture.

As an interdisciplinary field, Classical Studies encourages students to develop multiple intellectual skills and to think about the world around them from different perspectives. Current course offerings include Greco-Roman literature, mythology, history, archaeology, philosophy, political science, rhetoric, and of course, Latin and Greek. There is a significant amount of flexibility in the classical studies minor in terms of the courses one takes, but the study of ancient languages is the core of the program, and all minors must take one year of either Latin or Greek.

Classical studies complements other areas of study because a student can emphasize those aspects of classical civilization that relate to his or her primary field of study (e.g. literature, history, language, etc). In a more general sense, the skills and perspectives one acquires are well suited for those considering graduate school or any kind of post-graduate educational program such as law school or medical school. As a result of being interdisciplinary, the classical studies minor encourages students to employ a variety of methodologies in various disciplines while still developing a cohesive body of knowledge relevant to many fields and professions. The linguistic component ensures that one has a deeper understanding of language and can write, speak, and think more clearly. Furthermore, the fact that a great deal of specialized legal and medical terminology is based on Latin and Greek means that a minor in classical studies is great training for someone considering any kind of legal or medical profession. Above all, Classical Studies enriches our lives by helping us understand the source of some of our most important and relevant values, ideas, beliefs, and social structures.

Program Specific Minor Requirements

(24 semester hours)

Code	Title	Semester Credit Hours
Required Courses		
Greek and/or Latin. Select one or both of the following options: ¹		6-12
FLGK 111 & FLGK 112	Introductory Greek I and Introductory Greek II	
FLLT 111 & FLLT 112	Introductory Latin I and Introductory Latin II	
Select two or three of the following:		6-9
ENGL 301	Classical Greek and Latin Literature	

HIST 430	The Ancient Mediterranean World	
ENGL 222	Mythology-GTAH2	
Total Semester Credit Hours		12-21

¹ Students must take at least six hours in one language.

Code	Title	Semester Credit Hours
Restricted Electives		
Select one to four of the following, depending on the options chosen 3-12 above:		
POLS 452	Political Theory: Classical and Medieval	
ENGL 335	The Bible as Literature	
ENGL 370	Major Author ¹	
ENGL 386	Roots of Modern Rhetoric	
ENGL 494	Seminar in Literature ¹	
FLAV 290	Special Studies in Foreign Languages ²	
FLAV 390	Special Studies in Foreign Languages ²	
HIST 396	Topics ¹	
HIST 435	Classical Archaeology	
HIST 440	Early and Medieval Christianity	
HNRS 396	Topics ¹	
Total Semester Credit Hours		3-12

¹ ENGL 370, ENGL 494, HIST 396, and HNRS 396 may only count towards the Classical Studies minor if they focus on an author or topic directly related to the Greco-Roman world. Before taking one of these, students should meet with a faculty member affiliated with the classics minor in order to determine if it meets that qualification.

² FLAV 290 and FLAV 390 are offered occasionally based on need for students who have already completed at least one year of Latin or Greek.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Computer Information Systems

Program Description

The Bachelor of Applied Science (BAS) in computer information systems combines technical skills with the business proficiency needed today. A unique program, the BAS allows students who have already earned an AAS to build upon their technical specialties with essential learning courses and junior/senior level computer information coursework. This allows associate degree holders to gain a four-year degree in approximately four additional full-time semesters, depending upon prior coursework. Computer information systems courses include coursework in data analytics, project management, systems analysis and design, database administration, networking, electronic commerce, productivity tools and decision support, as well as systems development and implementation, including programming and information systems theory. BAS students will be technically and academically prepared for management positions within information technology. Prospective students not holding an associate of applied science degree can begin their university career at CMU in a chosen field of study with a two-year degree and then progress to a four-year degree using the BAS.

The Bachelor of Science (BS) in computer information systems is a degree required as organizations face the challenges of technology management. The program provides graduates with business management skills and computer information expertise to manage computer systems in today's organizations. As businesses increasingly rely on technology to provide a competitive advantage, employees with an understanding of both business concepts and computer systems are a necessity. Graduates of this program are employed in occupations such as systems analysts, analyst/programmers, database administrators, network administrators, web page designers, help desk specialists, and information technology managers. Graduates assist businesses with creating, obtaining, and maintaining computer information systems that solve problems and assist in facilitating routine business events. Computer information systems studies require students to examine computer systems from organizational, social, psychological and technical perspectives. Graduates from this program have taken a variety of courses that were developed based on national guidelines for quality degrees in information systems.

The Associate of Arts (AA) degree provides students an overview of computer information systems and business. By earning essential learning credits, the degree also positions students for completion of a four-year degree in business. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. The AA degree with an emphasis in business computer information systems, in addition to providing students with all of their essential learning, is useful in providing students with a working knowledge of computer hardware and software. Common productivity tools such as presentation software, spreadsheets and database management software used in businesses are learned. If a student earns an associate's degree, the Business Computer Information Systems AA degree provides skills that can be used in the workplace immediately.

The Computer Information Systems minor allows students majoring in other areas to enhance their degrees with information systems knowledge. Such graduates may use their expertise to help solve computer system problems for businesses. Since many businesses rely

heavily on computer systems as decision-making tools, graduates with this minor have a competitive advantage. Additionally, many employees in numerous organizations find themselves daily using computer hardware and software as productivity tools within their positions. The Computer Information Systems minor assists students in learning skills and background information that they will need in all occupations.

The certificate in decision support systems is designed to expose students and business managers to the knowledge and skills needed to use computer software to solve business problems, particularly in the support of business decision making. This certificate addresses the need of today's managers to more fully manage the information systems functions of an organization. The certificate will provide students with an overview of information they would encounter if they went on to earn the BS in Computer Information Systems, which more fully prepares students to work in or manage the information systems functions of organizations.

The Davis School of Business also offers the Bachelor of Business Administration with a concentration in business analytics.

Computer Information Systems (BAS)

Degree: Bachelor of Applied Science
Major: Computer Information Systems
Program Code: 3167

About This Major . . .

The Bachelor of Applied Science in Computer Information Systems combines the technical skills and business proficiency necessary for success in today's business world. A unique program, the BAS allows students who have already earned an associate of applied science degree to build upon their technical specialties with Essential Learning courses and junior and senior level computer information systems courses. This allows associate degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework.

Computer Information Systems courses to be taken include coursework in project management, systems analysis and design, database administration, networking, electronic commerce, productivity tools, decision support, systems development and implementation including

programming and information systems theory. BAS students will be technically and academically prepared for leadership positions within the information technology functional areas in their chosen industries.

Prospective students not holding an associate of applied science degree can begin their college career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the BAS. This degree will provide students upward mobility in their area of employment as they move into supervision/management positions.

Important information for this program:

- To be admitted to the BAS degree, an applicant must possess an AAS degree from an accredited school in computer information systems, computer programming, electronic engineering technology, information technology, network technology, telecommunications, or related area such as computer aided design or graphics design. Any exceptions to this must be approved in advance by the department BAS advisor and the academic department head. All students must meet with the BAS advisor to plan and schedule all classes.
- Requests for more than 6 hours of internship must be approved by the advisor.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- Analyze an issue within an ethical framework. (Personal and Social Responsibility)
- Recommend a solution based on an ethical framework. (Critical Thinking)
- Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Computer Information Systems (BS)

Degree: Bachelor of Science

Major: Computer Information Systems

Program Code: 3165

About This Major . . .

The Bachelor of Science in Computer Information Systems is a degree required today as organizations face the challenges of technology management. This program provides graduates with business management skills and computer information expertise to manage computer systems in today's organizations. Graduates of this program are employed in occupations such as systems analysts, analyst/programmers, database administrators, network administrators, web page designers, help desk specialists, and IT Managers.

Graduates assist businesses with creating, obtaining, and maintaining computer information systems that solve problems and assist in facilitating routine business events. As businesses increasingly rely on technology to provide a competitive advantage, employees with an understanding of both business concepts and computer systems are necessary. Computer information systems studies require students to examine computer systems from organizational, social, psychological, and technical perspectives. Graduates from this program will have taken a variety of courses that were developed based on national guidelines for quality degrees in information systems.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business knowledge and skills in appropriate business contexts. (Specialized Knowledge/Applied Learning)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)
- Analyze business issues critically utilizing qualitative research methodologies. (Critical Thinking)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)

- f. Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- g. Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- h. Analyze an issue within an ethical framework. (Personal and Social Responsibility)
- i. Recommend a solution based on an ethical framework. (Critical Thinking)
- j. Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Major: Liberal Arts
 Emphasis: Business Computer Information Systems
 Program Code: 2145

About This Major . . .

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide Essential Learning Core and meets the lower-division Essential Learning requirements at most public institutions in Colorado.

The CIS AA degree, in addition to providing students with Essential Learning coursework is useful in giving students a working knowledge of computer hardware and software. Common productivity tools such as presentation software, spreadsheets and database management software used in businesses are presented. This skill set will give students an edge in future classes pursued. If a student graduates with the associate's degree, the CIS AA provides skills that can be used in the workplace immediately.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Locate, gather and organize information on an assigned computer information topic. (Specialized Knowledge)
2. Recognize mathematical concepts and methods in relation to computer information systems issues. (Quantitative Fluency)
3. Communicate clearly and appropriately basic computer information systems information. (Communication Fluency)
4. Describe beginning computer information systems concepts in appropriate business contexts. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Business Computer Information Systems, Liberal Arts (AA)

Degree: Associate of Arts

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Business Analytics (Minor)

Minor: Business Analytics
Program Code: M146

About This Minor. . .

The minor in Business Analytics is designed to prepare students for managerial level decision making based on the use of information and computer technology. Today's world presents a wealth of data. Using data effectively requires insight and talent with a variety of tools. The Business Analytics minor is intended for students who are interested in expanding their knowledge and skills in the use of data and related technologies. A Business Analytics minor coupled with any major can increase the employment opportunities available in a wide variety of areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total

number of credit hours for a student who has not already taken those prerequisites.

- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

¹ Course requires additional course prerequisites beyond those required for the minor.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their

advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Computer Information Systems (Minor)

Minor: Computer Information Systems
Program Code: M751

About This Minor. . .

The CIS Minor allows students majoring in other subjects to enhance their degree with information systems knowledge. Graduates may use their expertise to help solve computer system problems for businesses. Since many businesses rely heavily on computer systems as decision-making tools, graduates with this minor will have a competitive advantage over those without it when applying for positions in many organizations. This minor may also give students an advantage when attempting to advance within an organization.

Additionally, many employees in numerous organizations find themselves daily using computer hardware and software as productivity tools within their positions. The CIS minor assists students in learning skills and background information that they will need in all occupations.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.

- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(21 semester hours)

Code	Title	Semester Credit Hours
Required Courses		
CISB 205	Advanced Business Software	3
CISB 210	Fundamentals of Information Systems	3
CISB 309	Enterprise Systems	3
CISB 315	Information Systems Infrastructure	3
CISB 410	Project Management	3
CISB 470	Management of Information Systems	3
Select one of the following:		
CISB 305	Solving Problems Using Spreadsheets	3
CISB 306	Solving Problems Using Databases	3
CISB 442	Systems Analysis and Design ¹	3
Total Semester Credit Hours		21

¹ Course requires additional prerequisites beyond those related to this minor.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should

follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Decision Support Systems (Professional Certificate)

Award: Professional Certificate

Program of Study: Decision Support Systems

Program Code: 1170

About This Program . . .

The Certificate in Decision Support Systems is designed to expose students and business managers to the knowledge and skills needed to use computer software to solve business problems, particularly to support decision making. The certificate will provide students with an overview of information they would encounter if they went on to the BS in Computer Information Systems, which more fully prepares students to work in or manage the information systems functions of organizations.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Computer Science Program Description

Computer science is the study of algorithms and the issues involved in implementing them. The **Bachelor's in Computer Science** includes core courses in algorithms, data structures, logic, programming languages, software design and advanced mathematics. Electives in web page design, artificial intelligence, robotics, computer graphics, video game design, databases, security, multimedia and networks are also possible. The program and course offerings are constantly evolving to keep up with the latest changes in the computer science field. The small class sizes at Colorado Mesa University allow for close interaction between faculty and students, with independent research projects and internships available.

A wide variety of professional and academic opportunities exist for graduates in the computer science field, including software engineering, software testing, computational finance, game design, computer graphics, robotics, artificial intelligence, internet systems and technology, security, hardware development, animation, medicine, biotechnology, business management and consulting and modeling, as well as master's and doctoral studies in computing-related fields. Graduates have continued on to advanced degrees in top tier schools and are employed at IBM, Microsoft, Northrup-Grumman, Lockheed-Martin and many other technical companies.

The **Associate of Science in Computer Science** with an emphasis in computer science includes courses in web page design, various programming languages, data structures and computer architecture. While the associate's degree prepares students to complete a Bachelor of Science in Computer Science (which is strongly recommended), employment opportunities are open to the successful graduate, including positions such as web developers, computer operators and technical support specialists.

A **Minor in Computer Science** is an excellent enhancement to degrees in the many fields which make extensive use of computer software, such as engineering, physics and mathematics, but also for non-science fields such as graphic arts, education or sociology. The degree prepares students to understand computer science foundations in software development and in hardware, as well as common application software development such as database software, graphical user interfaces and video game design.

The **Professional Certificate in Web Application Development** is designed for those who wish to develop in this popular field, and who may be either active professionals or new students to the field. The degree will prepare students in popular web programming languages such

as JavaScript, as well as preparing the student to work with popular database programs necessary for most web applications today.

About This Major . . .

Computer science studies algorithms and the issues involved in implementing them. The program includes core courses in algorithms, data structures, logic, programming languages, software design, and advanced mathematics. Electives in web page design, artificial intelligence, robotics, computer graphics, video game design, databases, security, multimedia, and networks are also possible. The program and course offerings are constantly evolving to keep up with the latest changes in the Computer Science field. The small class sizes allow for close interaction between faculty and students, with independent research projects and internships available.

A wide variety of exciting professional and academic opportunities exist for graduates of computer science including software engineering, software testing, computational finance, game design, computer graphics, robotics, artificial intelligence, internet systems and technology, security, hardware development, animation, medicine, biotechnology, business management and consulting, modeling, as well as masters and doctoral studies in computing-related fields. Our graduates have continued to advanced degrees in top-tier schools and are employed at Amazon, IBM, Microsoft, Northrup Grumman, Lockheed-Martin, and many other technology companies.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource or the CMU [Computer Science](#) website.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions. (Critical Thinking, Applied Learning, Quantitative Fluency)
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline. (Specialized Knowledge, Quantitative Fluency)
- Evaluate and apply relevant information to communicate effectively in a variety of professional contexts. (Information Literacy, Communication Fluency)
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles. (Personal and Social Responsibility)
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline. (Specialized Knowledge)
- Apply computer science theory and software development fundamentals to produce computing-based solutions. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTCO1	3
ENGL 112	English Composition II-GTCO2	3
Mathematics ^{1,2}		
MATH 151 or MATH 135	Calculus I-GTMA1 Engineering Calculus I	3

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Computer Science, Liberal Arts (AS)

Degree: Associate of Science

Major: Liberal Arts

Emphasis: Computer Science

Program Code: 2421

About This Major . . .

Computer Science is the study of computers and computational systems. It is a broad field which includes everything from the programming languages that make up software to how software interacts with hardware to how well software is developed and designed. The Computer Science Associates Degree includes courses in web page design, various programming languages, data structures and computer architecture.

While the degree prepares students to complete a BS in Computer Science (which is strongly recommended), employment opportunities are open to the successful graduate, including positions such as web development, computer operators, and/or technical support positions.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource or the CMU [Computer Science](#) website.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline. (Specialized Knowledge, Quantitative Fluency)
- Evaluate and apply relevant information to communicate effectively in a variety of professional contexts. (Information Literacy, Communication Fluency)
- Apply computer science theory and software development fundamentals to produce computing-based solutions. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 2.50 cumulative GPA or higher in all CMU coursework and in coursework toward major content area.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It

is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Computer Science (Minor)

Minor: Computer Science
Program Code: M450

About This Minor. . .

Computer science is the study of algorithms and the issues involved in implementing them. A Minor in Computer Science is an excellent enhancement to degrees in the many fields which make extensive use of computer software, such as engineering, physics, and mathematics, but also for non-science fields such as graphic arts, education, or sociology. The degree prepares students to understand computer science foundations in software development and in hardware, as well as common application software development such as database software, graphical user interfaces, or in video game design.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(23-24 semester hours)

Code	Title	Semester Credit Hours
Required Courses		
CSCI 111 or CSCI 130	CS1: Foundations of Computer Science Introduction to Engineering Computer Science	4
CSCI 112	CS2: Data Structures	4
CSCI 250	CS3: Introduction to Algorithms	3
Select one of the following:		3-4
CSCI 241	Computer Architecture and Assembly Language	
CSCI 206	Web Page Design II	
CSCI 260	Introduction to Database	
Select three of the following:		9
CSCI 306	Web Page Design III	
CSCI 310	Advanced Programming ¹	
CSCI 322	Embedded Systems	
CSCI 333	UNIX Operating Systems	
CSCI 337	User Interface Design	
CSCI 375	Object Oriented Programming and Design Patterns	
CSCI 460	Database Design	
Total Semester Credit Hours		23-24

¹ CSCI 310 is offered for different languages for 1-3 credit hours. A student may meet the required in any combination number of

languages/courses/hours, to reach a total minimum of 3 hours taken. No language may be counted for credit more than once.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Data Science (Professional Certificate)

Overview

Award: Professional Certificate
Program of Study: Data Science
Program Code: 1703

About This Program . . .

Data science is an interdisciplinary process that uses scientific methods, algorithms, and automated systems to transform data into information to gain knowledge from noisy structured and unstructured data. Data science also expands knowledge of statistical data analysis techniques utilized in business decision-making. This certificate program explores concepts and techniques of knowledge extraction/discovery to derive actionable insights from data. This program prepares students to apply quantitative modeling and data analysis techniques to solve real-world business problems, communicate findings, and effectively present results using data visualization techniques.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Make and defend assertions about a specialized topic in an extended well-organized document and an oral presentation that is appropriate to the discipline. (Specialized Knowledge, Communication Fluency)

- Analyze data critically, reason logically, and apply quantitative analysis methods correctly to develop appropriate conclusions. (Critical Thinking, Quantitative Fluency)
- Reflect on and respond to ethical, social, civic, and/or environmental challenges at local, national, and/or global levels. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 21 credit hours are required for the Professional Certificate in Data Science.
- Program admission requirements include:
 - MATH 131 or MATH 135 or MATH 151
 - STAT 200 or STAT 215 or STAT 241 or CISB 241
 - CSCI 112

Program Specific Requirements

(21 Semester Hours)

Code	Title	Semester Credit Hours
CSCI 110	Beginning Programming	3
CSCI 365	Data Mining	3
CSCI 425	Python Machine Learning	3
MATH 225	Computational Linear Algebra	3
STAT 301	Computational Statistics	3
STAT 312	Correlation and Regression	3
Select three hours from the following:		3
CISB 342	Data Mining and Visualization ¹	
MATH 361	Numerical Analysis ²	
MATH 362	Fourier Analysis ²	
STAT 435	Introduction to Time Series	
Total Semester Credit Hours		21

¹ Since CISB 241/STAT 241 are equivalent courses, either may be used to satisfy the prerequisite.

² This course requires a prerequisite.

Suggested Course Plan

First Year

Fall Semester		Semester Credit Hours
CSCI 110	Beginning Programming	3
MATH 225	Computational Linear Algebra	3
STAT 301	Computational Statistics	3
Semester Credit Hours		9
Spring Semester		Semester Credit Hours
STAT 312	Correlation and Regression	3
CSCI 365	Data Mining	3
Complete one of the following:		3
CISB 342	Data Mining and Visualization	
MATH 361	Numerical Analysis	
MATH 362	Fourier Analysis	
STAT 435	Introduction to Time Series	
Semester Credit Hours		9

Second Year

Spring Semester		Semester Credit Hours
CSCI 425	Python Machine Learning	3
Semester Credit Hours		3
Total Semester Credit Hours		21

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Web Application Development (Professional Certificate)

Award: Professional Certificate

Program of Study: Web Application Development

Program Code: 1540

About This Program...

The certificate in Web Application Development is designed to provide students with the knowledge and skills needed to build modern web applications. The program's goal is to provide a hands-on degree in web application development to meet the growing needs and demands from various industries.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource or the CMU [Computer Science](#) website.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Identify strengths and weaknesses of competing web application tools, languages, frameworks and defend a choice for a given situation. (Critical Thinking)
- Write back-end server-side code for web applications using SQL and NoSQL and configure web and database servers. (Applied Learning)
- Design and develop secure and modern web applications. (Applied Learning)
- Demonstrate clear and effective communication on the design of web applications. (Communication Fluency)

- e. Demonstrate independent learning and use of new technologies in web application design. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(16 semester hours)

Code	Title	Semester Credit Hours

Communication Studies

Program Description

The Communication Studies minor offers a broad range of courses focusing on human communication behaviors and is designed to complement any major. The coursework is designed to improve oral message sending and relational communication skills. In a global survey of industries, companies and public organizations, communication skills ranked FIRST among the personal qualities of college graduates sought by employers. A communication studies minor gives graduates communication credibility and opens many doors. It also enhances interpersonal relationships — students gain valuable conflict resolution and leadership skills, learn to win arguments, discover the power of persuasion, speak out publicly, use nonverbal and visual communication more effectively, and are able to do it all in an increasingly connected, diverse global society.

About This Minor. . .

In a global survey of industries, companies, and public organizations, Communication Skills ranked FIRST among the personal qualities of college graduates sought by employers. The Communication Studies minor offers a broad range of courses focusing on human communication behaviors and is designed to complement any major.

The Minor offers classes intended to give you ample opportunities to enhance your skills in presenting and persuading, logic and listening, understanding and relating, and all of it in the context of diverse real-life applications. Enhance your interpersonal relationships, gain valuable conflict resolution and leadership skills, win arguments, discover the power of persuasion, speak

out publicly, use nonverbal and visual communication, and be able to do it all in an increasingly connected, diverse global society.

A Minor in Communication Studies will absolutely enhance your résumé, giving you the communication credibility to open many doors. But beyond that, the Minor in Communication Studies will make a real, positive difference in your personal and professional lives and the lives of those around you.

Requirements

Construction Electrical

Program Description

The AAS degree in Construction Electrical is designed to prepare students for a wide range of opportunities in the construction electrical field. The curriculum incorporates courses in building materials, estimating, planning and scheduling, installations, codes, safety, tools, calculations, and print reading, as well as Essential Learning courses that develop supervisory skills. Career options include obtaining a position as an apprentice electrician, journeyman, electrician, electrical installer, or maintenance and repair electrician.

Major: Construction Electrical

Program Code: 1392

About This Major . . .

The AAS degree in Construction Electrical is designed to prepare students for a wide range of opportunities in the Construction Electrical field. The curriculum incorporates courses in building materials, estimating, planning and scheduling, installations, codes, safety, tools, calculations, and print reading. Career options include obtaining a position as an apprentice electrician, journeyman electrician, electrical installer, or maintenance and repair electrician.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply principles of grammar and vocabulary in the documentation required to perform the duties of a construction electrician. (Communication Fluency)
- Apply Mathematical concepts and practices that are required to properly calculate electrical formulas, and linear measurements. (Quantitative Fluency)
- Evaluate evidence discovered during the diagnosis/troubleshooting of electrical systems and apply those findings to strategies to properly repair these systems. (Critical Thinking)
- Describe the scope and application of principle features of the field of study, including core practices of a construction electrician. (Applied Learning)
- Demonstrate personal and professional ethical behavior as applied to a construction electrician. (Specialized Knowledge)
- Demonstrate mastery of the current terminology in the construction electrician industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 64 semester hours total for the AAS, Construction Electrical.
- A minimum of 16 credits taken at CMU in no fewer than two semesters.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

About This Program . . .

This certificate in Construction Electrical is designed to prepare students for an apprenticeship electrician opportunity in the Construction Electrical field. The curriculum incorporates courses in building materials, installations, codes, safety, tools, calculations, and print reading. Career options include obtaining a position as an: apprentice electrician, or electrical installer.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate personal and professional ethical behavior as applied to a construction electrician. (Specialized Knowledge, Ethical Reasoning)
- Demonstrate basic knowledge of terminology in the construction electrician industry. (Specialized Knowledge)
- Apply basic mathematical concepts that are required for an entry-level employment in the construction electrician field. (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Construction Electrical (Technical Certificate)

Award: Technical Certificate
Program of Study: Construction Electrical

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(30 semester hours, must earn a grade of “C” or better in each course and maintain a 2.00 cumulative GPA or higher in coursework.)

Construction Management Program Description

Construction managers plan, direct and coordinate a wide variety of construction projects, including the building of all types of residential, commercial and industrial structures, and roads and bridges. Construction managers coordinate and supervise the construction process from the conceptual development stage through final construction, insuring the project is completed on time and within budget. They are salaried or self-employed managers who oversee construction supervisors and workers. They are also responsible for the safety of the work environment. Potential majors must be comfortable with mathematics, technical instruction, physical science, computers and software programs. They should work well under pressure and have good oral and written communication skills. This degree is intended to provide students with the needed knowledge, skills and abilities to be successful in this fast-paced challenging environment. Graduates of the construction management program will possess an OSHA 10-hour safety card upon graduation.

Programs of Study Bachelors/Minors

- [Bachelor of Science Construction Management + Master of Business Administration \(3+2\)](#) (p. 261)
- [Construction Management \(BS\)](#) (p. 261)

Bachelor of Science Construction Management + Master of Business Administration (3+2)

At Colorado Mesa University the Bachelor of Science degree in Construction Management and Masters of Business Administration 3+2 program is designed to prepare students with knowledge and skills required to be successful managers and leaders in a challenging and rapidly changing construction industry.

Construction Management is the discipline of planning, organizing, directing and controlling the labor, material and equipment required to construct and deliver a completed residential, commercial, heavy civil or industrial construction project to a private or public owner. Construction management is a team effort with each participant working to achieve the project objectives of delivering the project on or ahead of schedule, at or under budget, achieving the required level of standards and quality, maintaining a safe project site, and having a minimal impact on the natural environment.

We are affiliated with Western Colorado Community College (WCCC) which offers an Associates of Applied Science (A.A.S.) degree in [Construction Technology](#). The Construction Management program has been articulated with WCCC's Construction Technology program, allowing a student with an earned A.A.S. degree to easily transition into the bachelors of science degree in construction management at Colorado Mesa University. For more information about the Construction Management Program please see [Construction Management Program Information](#).

This program is also the undergraduate component of the 3+2 program, in which students can earn a Bachelor of Science in Construction Management and a Master of Business Administration (MBA, as described below) in five years. Through careful planning and coordination students can complete their four-year degree and their graduate degree simultaneously. For more information please see [3 + 2 MBA Program Information](#).

The Colorado Mesa University Master of Business Administration (MBA) degree is a challenging program designed to prepare graduates for the changing business world. The degree is awarded after successful completion of 36-45 semester hours of rigorous study. The program is designed to provide the student with a broad background in business while allowing the student to focus on a specified area of study, if desired. To this end, students acquire knowledge of management operations; an appreciation of the interrelationships involved in business; an understanding of the economic, political and social environment in which businesses function; and behavioral skills that are essential in the manager's role in the implementation of business decisions. The MBA program endeavors to provide an atmosphere conducive to the development of each student's ability to think in a creative manner and to effectively problem solve. The program makes extensive use of seminars,

group projects, case studies and independent research. More information about our MBA Program can be found at [MBA Program Information](#).

Construction Management (BS)

Degree: Bachelor of Science
Major: Construction Management
Program Code: 3180

About This Major . . .

Construction managers plan, direct, and coordinate a wide variety of construction projects, including the building of all types of residential, commercial and industrial structures, roads, and bridges. They are salaried or self-employed managers who oversee construction supervisors and workers. Construction managers coordinate and supervise the construction process from the conceptual development stage through final construction, insuring the project is completed on time and within budget. They are also responsible for the safety of the work environment. Graduates of the Construction Management program will possess an OSHA 10-hour safety card upon graduation.

Potential majors must be comfortable with mathematics, technical instruction, physical science, computers, and software programs. They should work well under pressure and have good oral and written communication skills. They are managers of processes and people and must excel in both technical and human interaction skills.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop knowledge and skills to observe, analyze, make inferences, communicate and problem solve. (Critical Thinking)
- Create professional Construction Management work products and presentations, independently and collaboratively. (Specialized Knowledge)
- Communicate clearly, appropriately, and persuasively to the identified audience, both orally and in writing. (Communication Fluency)
- Analyze construction documents, materials, means and methods, and other communications critically, reason logically, and apply analysis methods correctly to develop appropriate conclusions. (Quantitative Fluency)
- Utilize current industry trends and technology that facilitate efficient workflows. (Information Literacy, Specialized Knowledge)
- Identify, formulate and solve construction related problems by applying knowledge of mathematics, science, innovation, construction materials, means and methods. (Specialized Knowledge, Quantitative Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Construction Technology

Program Description

The AAS in Construction Technology with an emphasis in supervision is designed to prepare students for a wide range of opportunities in the construction field that require management skills. The curriculum incorporates courses in building materials and testing, estimating,

planning and scheduling, project management, and other supervisory and essential learning courses that develop management skills. Career options include obtaining a position as a purchasing manager, salesperson, crew supervisor, or project manager in the field of construction.

Students wishing to further their education with a four-year degree can do so seamlessly with a Bachelor of Science in Colorado Mesa University's Construction Management program.

Supervision, Construction Technology (AAS)

Degree: Associate of Applied Science
Major: Construction Technology
Emphasis: Supervision
Program Code: 1372

About This Major . . .

The AAS degree in Construction Technology with an emphasis on Supervision is designed to prepare students for a wide range of opportunities in the Construction field that require management skills.

The curriculum incorporates courses in building materials and testing, estimating, planning and scheduling, project management, and other supervisory and Essential Learning courses that develop management skills. Career options include obtaining a position as a purchasing estimator, salesperson, crew supervisor, or project manager in the field of construction.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate the fundamental skill in the oral and written language as required to effectively communicate within the construction industry. (Communication Fluency)
- Demonstrate blueprint reading skills, and the surveying skills necessary to function in the profession. (Specialized Knowledge)
- Interpret, locate, organize and evaluate problems and tasks that arise in the building industry, solve these through the use of information resource skills necessary to the construction industry. (Critical Thinking)

- d. Describe the scope and application of principle features of the field of study, including core practices in the construction industry. (Specialized Knowledge)
- e. Demonstrate the mastery of OSHA safety standards in the construction industry. Generate a substantially error free product or process for the workforce. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 63 semester hours total for the AAS, Construction Technology, Supervision.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Criminal Justice

Program Description

Criminal Justice practitioners and scholars are highly qualified, multi-skilled public safety professionals who collaborate with other entities in the American criminal justice system as well as the general public to prevent and control crime, ensure due process, rehabilitate convicted offenders, and implement evidence-based practices.

The Criminal Justice Leadership and Policy program is a post-baccalaureate academic program offered in the Department of Social and Behavioral Sciences, leading to a Master of Arts in Criminal Justice Leadership and Policy (MACJLP) degree. The MACJLP program ensures the highest quality of education by offering collective learning experiences that emphasize leadership, policy, and administration, which

enable students to pursue numerous career paths and promotional advancement within the criminal justice field.

The Bachelor of Arts (BA) in Criminal Justice is designed to provide students interested in careers in the American justice system with the knowledge, communication and critical thinking skills necessary for success in their field. The degree will also assist students with upward mobility in their area of employment. Graduates secure positions in law enforcement, courts, probation, parole and other aspects of corrections. Many also use this degree as the starting point in their pursuit of a law degree or graduate school.

The Bachelor of Applied Science (BAS) in Criminal Justice combines the POST requirements of the AAS degree with the academic rigor of the baccalaureate degree.

The Associate of Applied Science (AAS) in Criminal Justice is designed for students who have completed or wish to complete the police academy program at Western Colorado Community College (WCCC) and incorporates instruction gained from the Peace Officer Standards and Training (POST) program. Students in the AAS program must complete the essential learning requirements and choose additional law enforcement related courses either before or after completing the academy. Completion of the AAS in Criminal Justice may provide graduates with promotional opportunities in law enforcement areas, such as police and sheriff departments, state law enforcement agencies, probation and parole offices, liquor and marijuana enforcement or wildlife enforcement. Law enforcement agencies in some areas require an AAS degree for entry-level positions.

The Criminal Justice minor is designed to provide students interested in the American justice system with the knowledge, communication and critical thinking skills necessary for success in their field. The Forensic Investigation - Criminal Justice minor combines courses in criminal justice with forensic investigation courses. It provides a student with a solid foundation in forensic investigation, and the recognition and collection of physical evidence. Students are better prepared to apply investigative concepts and techniques in the criminal justice profession.

The criminal justice program sponsors the Criminal Justice Association club, Mock Trial club, and a local chapter of the criminal justice honor society, Alpha Phi Sigma. Through active membership in these organizations, students learn from current practitioners in the field, become involved in community service projects, and take part in regional and national conferences and competitions.

Special Requirements

The Associate of Applied Science (AAS) degree is based on completing the Peace Officer Standards and Training (POST) program at WCCC. (See the POST entry elsewhere in this section). Students who have completed the POST program must complete the essential learning requirements and five additional specified courses to earn an AAS.

Criminal Justice Leadership and Policy (MA)

Degree: Master of Arts

Major: Criminal Justice Leadership and Policy

Program Code: 8701

About This Program . . .

The Criminal Justice Leadership and Policy program is a post-baccalaureate academic program offered in the Department of Social and Behavioral Sciences, leading to a Master of Arts in Criminal Justice Leadership and Policy (MACJLP) degree.

Criminal Justice practitioners and scholars are highly qualified, multi-skilled public safety professionals who collaborate with other entities in the American criminal justice system as well as the general public to prevent and control crime, ensure due process, rehabilitate convicted offenders, and implement evidence-based practices.

The MACJLP program is a six semester (including summers) academic program. Admission into the program is competitive. The MACJLP program ensures the highest quality of education by offering collective learning experiences that emphasize leadership, policy, and administration, which enable students to pursue numerous career paths and promotional advancement within the criminal justice field. Graduates of the MACJLP program are well positioned to secure those employment and promotional opportunities in policing, the courts system, corrections, or continuing graduate studies.

Important information about this program:

- MACJLP Program acceptance (see the catalog and program website for specific admissions requirements).
- CRMJ 511 Foundational Seminar needs to be completed within a student's first 15 credit hours.
- Completion of a culminating graduate-level project required - Master's Culminating Experience

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Critique criminal justice policies and practices based upon advanced knowledge of criminological theory and recommend new practices or policies as needed. (Communication Fluency, Critical Thinking)
- Evaluate complex ethical issues in criminal justice and develop pragmatic resolutions/recommendations to address those issues. (Ethical Reasoning)
- Recommend and implement advanced leadership theories and skills in Criminal Justice program and policy development and administration. (Specialized Knowledge, Communication Fluency)
- Design and conduct a capstone project using qualitative and/or quantitative research methods related to evidence-based practices, leadership, or administration of criminal justice practices and policies. (Quantitative Fluency, Critical Thinking, Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

All CMU master-level graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative reasoning, ethical reasoning, information literacy, and specialized knowledge/applied learning.

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Graduate Degree Requirements (p. 80)" in this catalog for a complete list of graduation requirements.

- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this degree:

- 33 semester hours for the Master of Arts in Criminal Justice Leadership and Policy.
- MACJLP Program acceptance (see the catalog and program website for specific admissions requirements).
- CRMJ 511 Foundational Seminar to be completed within a student's first 15 credit hours.
- All courses and course sequencing are required and must be completed at CMU or through applicable transfer credit.
- Complete a culminating graduate-level project (Master's Culminating Experience).

Total Semester Credit Hours		33

¹ CRMJ 593 may be repeated up to four times to allow a student sufficient time to complete the Culminating Experience. Each time CRMJ 593 is taken, the grade received will be factored into the student GPA.

Successful completion of CRMJ 593 is required to earn the MA in Criminal Justice Leadership and Policy graduate degree.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Criminal Justice (BA)

Degree: Bachelor of Arts

Major: Criminal Justice

Program Code: 3706

About This Major . . .

The Bachelor of Arts in Criminal Justice is designed to provide students interested in careers in the justice system with the knowledge, communication and critical thinking skills necessary for success in their field. Graduates secure positions in policing, courts, and corrections. Many also use this degree as the starting point in their pursuit of a law degree. Finally, the degree will assist students in their upward mobility in their area of employment.

Important information for this degree:

- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.
- Selective Admissions: All students intending to obtain a BA or BAS in Criminal Justice will initially be enrolled as pre-criminal justice majors. Students must earn a "C" or better in CRMJ 110 and CRMJ 201 prior to enrolling in any additional program specific courses. Core courses CRMJ 110, CRMJ 201, CRMJ 310, CRMJ 320, and CRMJ 328 must be completed with a "C" or better before students will be admitted into the BA/BAS major. Students must also complete MATH 110 (or higher) and ENGL 111 – both with a "C" or better prior to acceptance as a Criminal Justice major. GPA within these subjects must be at least 2.5. Overall cumulative GPA after 45 credit hours (approximately 3 semesters) must be at least 2.5. Please see the Criminal Justice Student Handbook for more information. Transfer students will be evaluated on a case-by-case basis.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Discuss the history and practice of each segment of the Criminal Justice System: police, courts, and corrections. (Specialized Knowledge)
- Examine diversity issues and assess their impact on work and ethical practices in criminal justice (Ethical Reasoning/Personal and Social Responsibility).
- Apply major criminological theories to criminal behavior. (Critical Thinking)
- Recognize quantitative and qualitative research methods, navigate scholarly information systems, identify and select quality sources and materials, and assess the validity and reliability of data (Quantitative Fluency and Information Literacy).
- Demonstrate proficient oral communication and writing skills that are formal and professional in nature. (Communication Fluency)

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Total Semester Credit Hours		31

¹ Must receive a grade of "C" or better and must be completed by the time the student has 60 semester hours.

² Recommended: POLS 101, PSYC 150, SOCO 260, or SOCO 264.

³ One course must include a lab.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

POST Academy, Criminal Justice (BAS)

Degree: Bachelor of Applied Science

Major: Criminal Justice

POST Academy

Program Code: 3701

About This Major . . .

The Bachelor of Applied Science in Criminal Justice is designed to provide students interested in careers in the justice system, and specifically in policing/law enforcement, with the knowledge, communication, and critical thinking skills necessary for success in their field. Graduates will be job ready and able to secure positions in various policing/law enforcement positions (e.g., police officer, deputy sheriff, parole officer, etc.). The degree combines the technical skills required within entry-level law enforcement positions with the academic rigor of the baccalaureate degree. The degree will also assist students in their upward mobility in their area of employment.

Important information about this program:

- To be admitted to the BAS degree, certain prerequisites must be satisfied. Please see the Social and Behavioral Sciences department head or program faculty for complete requirements and application form.
- All students intending to obtain a BA or BAS in Criminal Justice will initially be enrolled as pre-criminal justice majors. Students must earn a "C" or better in CRMJ 110 and CRMJ 201 prior to enrolling in any additional program specific courses. Core courses CRMJ 110, CRMJ 201, CRMJ 310, CRMJ 320, and CRMJ 328 must be completed with a "C" or better before students will be admitted into the BA/BAS major. Students must also complete MATH 110 (or higher) and ENGL 111 – both with a "C" or better prior to acceptance as a Criminal Justice major. GPA within these subjects must be at least 2.5. Overall cumulative GPA after 45 credit hours (approximately 3 semesters) must be at least 2.5. Please see the Criminal Justice Student Handbook for more

information. Transfer students will be evaluated on a case-by-case basis.

- Students are encouraged to attend the Western Colorado Peace Officers Academy (WCPOA). Up to 31 credits can be transferred from other Colorado POST approved academies associated with accredited institutions of higher learning or through existing articulation agreements with Colorado Mesa University. Students wishing to transfer credit from all other academies (e.g., agency, private, or out-of-state academies) can earn up to 30 credit hours through the [Credit for Prior Learning program](#).
- It is highly recommended that students complete all required coursework prior to enrolling in the POST Academy. Please see the criminal justice student handbook for more information.
- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Discuss the history and practice of each segment of the Criminal Justice System: police, courts, and corrections. \ (Specialized Knowledge)
- Examine diversity issues and assess their impact on work and ethical practices in criminal justice (Ethical Reasoning/Personal and Social Responsibility).
- Apply major criminological theories to criminal behavior. \ (Critical Thinking)
- Recognize quantitative and qualitative research methods, navigate scholarly information systems, identify and select quality sources and materials, and assess the validity and reliability of data (Quantitative Fluency and Information Literacy).
- Demonstrate proficient oral communication and writing skills that are formal and professional in nature. \ (Communication Fluency)
- Demonstrate proficiency in basic skills (driving, firearms, and arrest control) required for entry level policing. \ (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Criminal Justice (AAS)

Degree: Associate of Applied Science

Major: Criminal Justice

Program Code: 1360

About This Major . . .

This program is designed for students who want the credentials of an Associate's Degree combined with the Colorado Peace Officer Standards and Training (POST) certification. It is highly recommended that students seeking this degree complete their essential learning and elective requirements prior to enrolling in the Western Colorado Community College POST Academy. Once a student has passed all the minimum requirements of Colorado POST he or she has a timeline of ONLY 3 years to be hired by a law enforcement agency. Successful completion of the POST Academy is a requirement of this degree.

Upon successful completion of the requirements, the student would be awarded an A.A.S. degree in Criminal Justice by Colorado Mesa University. This degree provides graduates with an advantage in the competitive law enforcement career market. Graduates are qualified to apply for jobs in police departments, sheriff's offices, county jails, alternative sentencing programs, Colorado State Parks, Dept. of Corrections and the State Patrol. Current professionals may increase their promotional opportunities.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Criminal Process: Explain the functions of the criminal justice system in protecting the constitutional rights of all individuals within the United States, regardless of citizenship. (Specialized Knowledge)
- b. Basic Law: Explain the current rules for peace officer conduct as it pertains to arrest, search and seizure. (Specialized Knowledge, Information Literacy)
- c. Victim's Right: Explain the laws relating to victim rights and community resources available for crime victim's services. (Specialized Knowledge, Information Literacy)
- d. Community Policing: Identify and recognize community policing and the necessary elements for implementation of community policing practice and philosophy and recognize community partnerships as an integral component in community policing and problem solving. (Critical Thinking)
- e. Professional Behavior: Identify the traits that officers should exemplify and explain the benefits of professional and ethical behavior to the officer, department, and community. (Personal and Social Responsibility)
- f. Patrol Observation and Perception: Analyze and interpret information gathered during patrol operations, differentiate between proactive and reactive patrol, and demonstrate different patrol methods. (Critical Thinking)
- g. Traffic Code: Recognize elements of traffic code violations as defined in Title 42 C.R.S. (Specialized Knowledge)
- h. Preliminary Investigations: Identify and explain procedures for responding to a crime scene, conducting an initial crime scene

investigation, interviewing victims, witnesses, and suspects, and conducting a follow up investigation. (Communication Fluency, Critical Thinking, Specialized Knowledge)

- i. Report Writing: Apply the basic requirements of written communication in law enforcement. (Communication Fluency)
- j. Wellness: Explain why wellness is an integral component of the law enforcement profession, and the necessity of being in good physical condition. (Personal and Social Responsibility)
- k. Tactical Casualty Care: Apply lifesaving medical actions in the context of a hazardous situation such as an active shooter, specific medical interventions, and skills. (Specialized Knowledge, Quantitative Literacy)
- l. Identify, utilize and cite various sources of policing information in academic assignments and on-the-job requirements. (Information Literacy).
- m. Use program-level mathematical concepts and methods to understand, analyze, and explain policing issues in quantitative terms (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
Communication		
ENGL 111	English Composition I-GTCO1	3
ENGL 112	English Composition II-GTCO2	3
or SPCH 102	Speechmaking	
Mathematics		
MATH 108	Technical Mathematics (or higher) ^{1,2}	3
Other Essential Learning Core Courses		
Select two of the following:		6
PSYC 150	General Psychology-GTSS3	
SPCH 102	Speechmaking	
SOCO 144	Marriage and Families-GTSS3	
SOCO 260	General Sociology-GTSS3	
PHIL 120	Ethics-GTAH3	
Total Semester Credit Hours		15

- ¹ MATH 108 is a 4 semester credit hour course; however, if a student completes a higher-level, Essential Learning eligible Mathematics course at 3 semester credit hours, that course would fulfill the Mathematics Essential Learning requirement.

- ² MATH 110 or higher is required for BA or BAS in Criminal Justice.

Other Lower Division Requirements

Code	Title	Semester Credit Hours
Wellness Requirement		
KINE 100	Health and Wellness	1
KINA 127	Physical Conditioning ¹	1
Total Semester Credit Hours		2

- ¹ KINA 127 is taken simultaneously with POST Academy.

Program Specific Degree Requirements

(43 semester hours)

Code	Title	Semester Credit Hours
CRJW 101	Basic Police Academy I	4
CRJW 102	Basic Police Academy II	5
CRJW 103	Basic Police Academy III	7
CRJW 104	Basic Police Academy IV	6
CRJW 106	Arrest Control	3
CRJW 107	Law Enforcement Driving	2
CRJW 108	Firearms	3
CRMJ 110	Orientation to Criminal Justice Inquiry	1
CRMJ 201	Introduction to Criminal Justice	3
SPCH 101	Interpersonal Communications	3
POLS 101	American Government-GTSS1	3
SOCO 264	Social Problems-GTSS3	3
Total Semester Credit Hours		43

Suggested Course Plan

Due to a potential variation in semester credit hours for the Essential Learning Mathematics credits, the following sequencing results in variable credit hours; however, students in this major must complete a minimum of 60 semester credit hours, including satisfactory completion of all required courses, for satisfactory completion of degree.

First Year		Semester Credit Hours
Fall Semester		
ENGL 111	English Composition I-GTCO1	3
SPCH 101	Interpersonal Communications	3
POLS 101	American Government-GTSS1	3
Essential Learning Social and Behavioral Sciences or Humanities course		3

Semester Credit Hours		15
Spring Semester		
ENGL 112	English Composition II-GTCO2	3
or SPCH 102	or Speechmaking	
CRMJ 110	Orientation to Criminal Justice Inquiry	1
CRMJ 201	Introduction to Criminal Justice	3
SOCO 264	Social Problems-GTSS3	3
MATH 108	Technical Mathematics (or higher) ¹	3-4
KINE 100	Health and Wellness	1
Semester Credit Hours		14-15
Second Year		
Fall Semester		
CRJW 101	Basic Police Academy I	4
CRJW 102	Basic Police Academy II	5
CRJW 103	Basic Police Academy III	7
CRJW 104	Basic Police Academy IV	6
CRJW 106	Arrest Control	3
CRJW 107	Law Enforcement Driving	2
CRJW 108	Firearms	3
KINA 127	Physical Conditioning	1
Semester Credit Hours		31
Total Semester Credit Hours		60-61

- ¹ MATH 108 is a 4 semester credit hour course; however, if a student completes a higher-level, Essential Learning eligible Mathematics

course at 3 semester credit hours, that course would fulfill the Mathematics Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Criminal Justice (Minor)

Minor: Criminal Justice
Program Code: M701

About This Minor. . .

This minor is designed to provide students interested in careers in the justice system with the knowledge, communication and critical thinking skills necessary for success in their field. Graduates secure positions in policing, probation, parole and other aspects of corrections. Many also use this degree as the starting point in their pursuit for a law degree.

Graduates of this minor will be able to:

- Discuss the history and practice of each segment of the Criminal Justice System: police, courts, and corrections. (Specialized Knowledge)

- Examine diversity issues and assess their impact on work and ethical practices in criminal justice (Ethical Reasoning/Personal and Social Responsibility).
- Apply major criminological theories to criminal behavior. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Forensic Investigation - Criminal Justice (Minor)

Minor: Forensic Investigation - Criminal Justice
Program Code: M717

About This Minor. . .

This minor combines courses in criminal justice with forensic investigation courses. It provides a student with a solid foundation in forensic investigation, and the recognition and collection of physical evidence. Students are better prepared to apply investigative concepts and techniques in the criminal justice profession.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Culinary Arts

Program Description

The culinary arts program trains students interested in developing professional food preparation and management skills. From future chefs to foodies, students will learn basic to advanced cooking and baking techniques. Small class sizes and modernized culinary labs energize both students and highly-skilled instructors to share and hone key industry skills, as well as to gain critical real-world applications to culinary marketing, and dining room and restaurant management.

Culinary Arts (AAS)

Degree: Associate of Applied Science
Major: Culinary Arts
Program Code: 1350

About This Major . . .

Students in the Culinary Arts Program learn the fundamental skills and techniques needed to succeed in the professional kitchen. Areas of study include; safety and sanitation, nutrition, food preparation, baking, dining room management, beverage service, hospitality supervision, cost controls, and purchasing. The curriculum meets the requirements of the American Culinary Federation for sanitation, nutrition, and supervision training. Upon completion of the program, students will be prepared for an entry-level position in the broad and expanding hospitality industry, as well as prepared to continue for advanced study in the Bachelor of Applied Science in Hospitality Management.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Compare and contrast a variety of cuisines based on ingredients, preparation methods, serving styles, and culture to define key characteristics of a region or country's cuisine. (Applied Learning)
- Apply appropriate mathematical concepts to the field of culinary arts as a basis for menu planning, purchasing and recipe conversion. (Quantitative Fluency)
- Apply food safety concepts to demonstrate personal hygiene guidelines, consumer safety, and sanitation procedures for preparation, storage, and service of food. (Critical Thinking/ Specialized Knowledge)
- Demonstrate an ability to work as part of a team to prepare and serve food to established standards in a professional setting. (Applied Learning/ Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 62 semester hours total for the AAS, Culinary Arts.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
Communication		
ENGL 111	English Composition I-GTCO1	3

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and

should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Food Preparation (Technical Certificate)

Award: Technical Certificate

Program of Study: Food Preparation

Program Code: 1142

About This Program . . .

Students enrolled in the Technical Certificate in Food Preparation learn the fundamental skills and techniques of food and bakery production, safety, and sanitation. Upon completion of the program, students will be prepared for an entry-level position in the broad and expanding hospitality industry, as well as prepared to continue for advanced study in the Associate of Applied Science in Culinary Arts or the Bachelor of Applied Science in Hospitality Management.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate an ability to develop and prepare a menu that showcases organization, knife skills, cooking methods, and plate presentation. (Applied Learning)
- Apply appropriate mathematical concepts to the field of culinary arts as a basis for menu planning, purchasing and recipe conversion. (Quantitative Fluency)
- Apply food safety concepts to demonstrate personal hygiene guidelines, consumer safety, and sanitation procedures for preparation, storage, and service of food. (Critical Thinking/ Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(17 semester hours, must earn a grade of "C" or better in each course.)

- Additional expenses - Students in Culinary Arts are required to purchase cooking tools and uniforms. This does not include required textbooks. These costs vary with student needs and brand or quality of tools purchased.

Cyber Security

Program Description

Professional Certificate in Cybersecurity

The Professional Certificate in Cybersecurity includes courses and topics from basic computer and system security to more advanced topics in network and application security areas of information assurance.

Cybersecurity (Minor)

The minor in Cybersecurity, a collaborative effort between Computer Information Systems for Business (CISB) and Computer Science (CSCI) faculty, provides a solid base of understanding in macro cybersecurity strategies and principles, as well as an in-depth review of applied cybersecurity tools and techniques

These programs are excellent enhancements to computer science and related fields. They are designed to provide students interested in careers in cybersecurity areas with the knowledge and skills necessary for success in this very important and demanding field of information assurance.

Cyber Security (Professional Certificate)

Award: Professional Certificate
Program of Study: Cyber Security
Major Code: 1364

About This Program . . .

The certificate in Cyber Security is designed to provide students with the knowledge and skills needed to engage in activities pertaining to protecting computer systems, networks, applications, and data. The program also prepares students for successfully completing internationally recognized certifications such as Certified Information Systems Security Professional (CISSP), CEH (Certified Ethical Hacker), etc.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Identify strengths and weaknesses of competing cyber defense tools and defend a choice for a given situation. (Critical Thinking)
- Write simple scripts in scripting languages (e.g., to automate system administration tasks). (Applied Learning)
- Evaluate the security of computer systems, networks, and applications. (Applied Learning)
- Demonstrate clear effective communication on the importance of cyber security. (Communication Fluency)
- Demonstrate independent learning and use of new technologies in cyber security. (Specialized Knowledge)

Requirements

Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Cybersecurity (Minor)

Minor: Cybersecurity
Program Code: M451

About This Minor. . .

The interdisciplinary Cybersecurity Minor is a collaborative effort between the Computer Information Systems for Business (CISB) faculty and the Computer Science (CSCI) faculty. It is designed to prepare students for managerial decision-making in an information security context. Such positions require in-depth knowledge of established cybersecurity principles, tools, and techniques as well as knowledge of how those principles can be aligned to larger organizational strategies. The Interdisciplinary Cybersecurity Minor is intended for students who are interested in expanding their knowledge and skills in the application of cybersecurity. An Interdisciplinary Cybersecurity Minor, coupled with any major, can increase the employment opportunities available across a wide variety of areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.

- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(18 semester hours)

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Dance

Program Description

The Department of Theatre Arts offers one of the most successful training degree programs in Colorado. The Bachelor of Arts in Dance

is focused on helping students acquire a sound understanding of the performing arts in dance.

Dance at CMU is thriving, with an array of dance styles, performance opportunities, and travel. Equal emphasis is placed on Modern, Jazz, Ballet, and Hip Hop with course offerings from beginner to advanced levels. Other courses include Tap, Dance Composition, Improvisation, Pedagogy, Dance History and Philosophy, Healthy Dancer, and Repertory Performance. Dance at Colorado Mesa University features courses with an emphasis on physical inquiry and cultural relevance in diverse dance forms with faculty that value and teach methods of embodied awareness, strong technical foundation, and performance as a practice.

The faculty members have professional backgrounds across multiple forms of dance. With three dance concerts a year, Colorado Mesa University faculty and students choreograph and invite visiting guest artists from the professional dance world. Students annually travel to American College Dance Association, conferences, and engage in local and state outreach.

The BA in Dance is constructed to help students meet the rigorous demands of a professional dance career and provide a strong foundation and practical experience for future dance artists. With smaller class sizes, students are given the personal attention and mentorship that will better prepare them for careers in the field of dance.

Special Requirements

Students seeking admission as dance majors must successfully audition for acceptance into the program. Admission to the University does not guarantee admission into one of these programs. Prospective theatre majors should consult the department's website or contact the department directly for information regarding audition dates and requirements. Prospective students interested in departmental scholarships must audition no later than April 15 of the year they seek admission.

Dance (BA)

Degree: Bachelor of Arts
Major: Dance
Program Code: 3257

About This Major . . .

The BA in Dance offers a broad, liberal arts approach to the study of dance and movement. Dance majors are immersed in a holistic approach to dance studies with coursework in a variety of dance forms, somatic practices, conditioning, movement analysis, dance history, choreography, pedagogy, dance company, and experiential anatomy. Additionally,

students have numerous opportunities to choreograph, perform, and teach throughout their degree.

The CMU Dance program is unique in that we offer a strong technical foundation, across a variety of dance styles. Through our diverse curriculum, students develop versatility and an appreciation for historical roots and current trends in the field. Within a supportive learning community, students engage not only in rigorous technical training, but are also invited to explore creative experimentation and collaborative possibilities.

Through our guest artist series, community engagement programs, and annual participation in the American College Dance Association Conference, our students have numerous opportunities to develop professional and networking skills. These experiences not only offer potential professional connections, but also expose students to other areas of dance scholarship, including current practices in dance medicine, dance psychology, etc. Our dance majors have the unique opportunity to explore additional degrees in other disciplines at CMU that align with their studies in dance and movement.

CMU Dance students are prepared for employment in various aspects of the dance field as performers, choreographers, teachers, and studio owners. Additionally, they are prepared to pursue graduate degrees, specialized certifications in performance, choreography, production, arts management, movement therapy, and numerous related areas of dance and movement research.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- b. Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- c. Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
- d. Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
- e. Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)
- f. Analyze ethical, social, and/or civic challenges and their intersection with the performing arts at the local, national, and global levels. (Personal and Social Responsibility)
- g. Find, critically evaluate, and effectively apply relevant sources of information to discipline-specific projects. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and

should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Dance (BFA)

Degree: Bachelor of Fine Arts

Major: Dance

Program Code: 3267

This program is no longer accepting new students.

About This Major . . .

The Department of Theatre Arts offers one of the most successful training degree programs in Colorado. The Bachelor of Fine Arts in Dance is focused on helping students acquire a sound understanding of the performing arts in state-of-the-art facilities.

Dance at CMU is thriving, with an array of dance styles, performance opportunities and travel. Modern, jazz, ballet and tap are offered from beginning to professional levels. Other courses include composition, improvisation, pedagogy, history, music analysis, healthy dancer and repertory performance.

The faculty members have professional backgrounds in all forms of dance and musical theatre. With four dance concerts a year, Colorado Mesa University provides students with a chance to choreograph original works and to dance for and with visiting guest artists from the professional dance world. Students travel throughout the United States to share the art of dance with other universities and colleges. Dance at Colorado Mesa University features courses with an emphasis on positive reinforcement from challenging professors and a strong technical foundation. It is a place where dancers can establish lifelong relationships as they strive for excellence in the art of dance.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
- Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
- Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)
- Analyze ethical, social, and/or civic challenges and their intersection with the performing arts at the local, national, and global levels. (Personal and Social Responsibility)
- Find, critically evaluate, and effectively apply relevant sources of information to discipline-specific projects. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Dance (Minor)

Minor: Dance
Program Code: M220

About This Minor. . .

The Department of Theatre offers one of the most successful theatre training degree programs in Colorado. Students majoring in Theatre Arts can choose from four distinct concentrations (Acting/Directing, Design/Technical, Music Theatre and Dance) and acquire a sound understanding of the performing arts in our newly built, state-of-the-art facilities.

Dance at CMU is thriving with an array of dance styles, performance opportunities and travel. Modern, jazz, ballet and hip hop are offered from beginning to professional levels. Other courses include somatic practices,

conditioning, movement analysis, dance history, choreography, pedagogy, dance company, and experiential anatomy.

Through our diverse curriculum, students develop versatility and an appreciation for historical roots and current trends in the field. Within a supportive learning community, students engage not only in rigorous technical training, but are also invited to explore creative experimentation and collaborative possibilities.

Through our guest artist series, community engagement programs, and annual participation in the American College Dance Association Conference, our students have numerous opportunities to develop professional and networking skills. These experiences not only offer potential professional connections, but also expose students to other areas of dance scholarship, including current practices in dance medicine, dance psychology, etc.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Decision Support

(See [Computer Information Systems](#) (p. 235))

Digital Filmmaking

Program Description

Students majoring in the Associate of Applied Science in Digital Filmmaking with an emphasis on Writing/Directing will acquire a sound understanding of the narrative filmmaking process. Delivery of the program is primarily face-to-face with an extensive project-based learning approach.

The Writing/Directing emphasis helps students understand the craft of narrative filmmaking. Majors focus on screenwriting, cinematography, lighting, basic video editing and audio design, directing talent, leadership and supervision, film producing, production management, freelancing, and essential film marketing.

Because filmmaking is a highly collaborative business, students work together on significant projects. This process allows film students to take advantage of each others' acquired skills.

² Certificates progress in the following order: Elements, Basic, Intermediate.

Digital Filmmaking, Production Design (AAS)

Degree: Associate of Applied Science

Major: Digital Filmmaking

Emphasis: Production Design

Program Code: 1303

About This Major...

This program is no longer accepting new students.

The Digital Filmmaking: Production Design emphasis prepares and develops students for entry-level careers in the film, broadcast, and commercial video industries. Digital Filmmaking – Production Design is all about using technology to help further a director's story vision to audiences. During this program, you will cover the in-depth fundamentals of research for the production's style and look. You will also use common research skills, collaboration, non-linear video editors and video compositors. Plus, students learn not only the filmmaking business but information they can use if they want to become freelancers.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal, written, and electronic forms that are needed for entry-level employment (Communication Fluency).
- Apply math and applied physics concepts for industry to meet job requirements (Quantitative Fluency).
- Research, evaluate, synthesize, and apply information/data relevant to business, the sciences, and technical careers (Critical Thinking).
- Demonstrate knowledge of terminology, symbols, business practices, principles, and application of technical skills (Specialized Knowledge/Applied Learning).

- Perform the applied skill sets to fulfill the needs of entry-level employment (Specialized Knowledge/Applied Learning).
- Demonstrate ethical, civic, and workplace responsibility as part of professional behavior (Specialized Knowledge/Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Digital Filmmaking, Writing/Directing (AAS)

Degree: Associate of Applied Science

Major: Digital Filmmaking

Emphasis: Writing/Directing

Program Code: 1304

About This Major...

The Digital Filmmaking: Writing/Directing major prepares and develops students for entry-level production and management jobs in the film, broadcast, and documentary video industries. Writing/Directing is all about storytelling. Students write scripts, plan and shoot productions, and complete their projects in postproduction. Majors use common research skills, collaborate, direct talent and crew, set up lighting and sound, and perform non-linear video editing and compositing. They also learn essential entrepreneurial business practices such as budgeting, scheduling, and forming their own video production company.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Perform the required skill sets to fulfill entry-level employment needs in the film and video production industries. (Specialized Knowledge)
- Apply the physics of light, sound, and electricity to meet the film industry's technical job requirements. (Quantitative Fluency)
- Apply business communication using listening, verbal, written, and electronic forms needed for entry-level employment with a production company or as a freelance creator. (Communications Fluency)
- Research, evaluate, synthesize, and apply information/data relevant to above- or below-the-line production careers. (Critical Thinking)
- Demonstrate ethical, civic, and workplace responsibility as part of professional behavior for the film and video production industry. (Applied Learning)

- Define and apply film and video terminology, symbols, business practices, principles, and application of technical skills. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 61 semester hours total for the AAS, Digital Filmmaking: Writing/Directing.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Digital Filmmaking, Production Design Elements (Technical Certificate)

Award: Technical Certificate

Program of Study: Digital Filmmaking

Specialization: Production Design Elements

Program Code: 1124

About This Program . . .

This program is no longer accepting new students.

This Digital Filmmaking: Production Design Elements certificate helps prepare students with foundational skills needed for entry-level careers in the film, TV, and commercial video industries.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal, written, and electronic forms that are needed for entry-level employment. (Communication Fluency)
- Apply math and applied physics concepts for industry to meet job requirements. (Quantitative Fluency)
- Research, evaluate, synthesize, and apply information/data relevant to business, the sciences, and technical careers. (Critical Thinking)
- Demonstrate knowledge of terminology, symbols, business practices, principles, and application of technical skills. (Specialized Knowledge/Applied Learning)
- Perform the applied skill sets to fulfill the needs of entry-level employment. (Specialized Knowledge/Applied Learning)

- Demonstrate ethical, civic, and workplace responsibility as part of professional behavior. (Specialized Knowledge/Applied Learning)

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Digital Filmmaking, Writing/Directing Elements (Technical Certificate)

Award: Technical Certificate
 Program of Study: Digital Filmmaking
 Specialization: Writing/Directing Elements
 Program Code: 1146

About This Program . . .

This Digital Filmmaking: Writing/Directing Elements certificate helps prepare students with the foundational skills needed for entry-level careers in the film, TV, and documentary video industries.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Recognize the required skill sets to fulfill entry-level employment needs in the film and video production industries. \ (Specialized Knowledge)\
- Describe the physics of light, sound, and electricity to meet the film industry's technical job requirements. \ (Quantitative Fluency)\
- Use elemental listening, verbal, written, and electronic forms of communications needed for entry-level employment with a production company or as a freelance creator. \ (Communications Fluency)\
- Explore information relevant to above- or below-the-line production careers. \ (Critical Thinking)\

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.

- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(12 semester hours, 2.00 cumulative GPA or higher in program coursework.)

Digital Filmmaking, Basic Writing/Directing (Technical Certificate)

Award: Technical Certificate
Program of Study: Digital Filmmaking
Specialization: Basic Writing/Directing
Program Code: 1147

About This Program . . .

This Digital Filmmaking: Basic Writing/Directing certificate helps prepare students with the basic skills needed for entry-level careers in the film, TV, and commercial video industries.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply basic business communication skills using listening, verbal, written, and electronic forms needed for entry-level employment with a production company or as a freelance creator. (Communication Fluency)
- Research, evaluate, synthesize, and apply information/data at a basic level relevant to above- or below-the-line production careers. (Critical Thinking)
- Perform basic-level skill sets to fulfill entry-level employment needs in the film and video production industries. (Specialized Knowledge)
- Define basic film and video terminology, symbols, business practices, and principles. (Information Literacy)

Education: Early Childhood

Program Description

Bachelor of Arts

The Early Childhood/Early Childhood Special Education program provides teacher education candidates with a broad content knowledge and prepares them as teachers for early childhood including preschool through second/third grade (birth to age 8) in an inclusive setting. Graduates from the bachelor's program are qualified to receive a Colorado Initial Teaching License in Early Childhood (EC-Age 8) and an endorsement in Early Childhood Special Education (EC-Age 8). Students gradually accumulate over 200 hours of classroom experience before beginning student teaching. Student teaching will be completed the final semester and is at least 600 field hours. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. A minimum of 60 credit hours of essential learning and foundation coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education program. Please see the Teacher Education Admission Packet for further information on admissions criteria.

The Early Childhood Education, Inclusive Non-Licensure program provides teacher education candidates with broad content knowledge and prepares them as teachers for early childhood including children ages birth through Pre-Kindergarten in an inclusive setting. A minimum of 67 credit hours of essential learning and foundation coursework must be completed with a minimum GPA of 2.50 before a candidate may apply for admission to the Center for Teacher Education program. Please see the Teacher Education Admission Packet for further information on admissions criteria.

Associate of Arts

The early childhood certificate program prepares students for careers in licensed early childhood care and education programs and enables

students to meet the educational qualifications of the Colorado Department of Human Services. Students who wish to work in licensed early childhood classrooms may complete the director or teacher sequence and then continue on to earn an Associate of Arts in Early Childhood Education. Career options include opportunities in childcare centers and preschools.

The Associate of Arts (AA) with an early childhood education emphasis provides students with a foundation for working with children from birth to age eight in a variety of settings. Our faculty offer one-on-one guidance for course selection, field placements, student teaching and employment. With an increasing focus on quality early education, many organizations are requiring their employees to demonstrate a level of expertise provided by the AA degree. Our students complete their degree with a culminating student teaching experience, giving them an opportunity to teach in a preschool classroom for a semester. Graduates of the early childhood program are employed in large and small child care centers, operate their own home care centers, work in other school settings, or use coursework as a foundation to continue into elementary education. In addition, the program aligns with state requirements for early childhood teacher certification and large center director qualification.

Special Requirements

Study directed toward the Associate of Arts degree may serve as a basis for the Bachelor of Arts degree with elementary education licensure. Programs of study are sequential and advanced planning is necessary for an efficient transition from an associate program to a baccalaureate program. Faculty advisors assist students in planning programs to meet requirements. Students seeking childcare center director qualification should meet with an advisor in order to meet specific certification requirements.

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs, early childhood programs, and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The Early Childhood Special Education program provides teacher education candidates with broad content knowledge and prepares them as teachers for early childhood including birth through second/third grade (birth to age 8) in an inclusive setting. A minimum of 70 credit hours of essential learning and foundation coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education program. Please see the Teacher Education Admission Packet for further information on admissions criteria.

Important information about this program:

- 123 semester hours total for the BA in Early Childhood Education, Early Childhood Special Education.
- 2.80 cumulative GPA or higher in all CMU coursework.
- 2.80 cumulative GPA or higher in coursework toward the major content area.
- All ECSE/EDUC prefix courses must be completed with a grade of B or better.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
- A grade of C or better must be earned in all required courses, unless otherwise stated.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- Collect and critically analyze student assessment data and use results to inform planning and instruction. (Critical Thinking/Quantitative Fluency)
- Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 122 semester hours required for the BA in Early Childhood Education: Early Childhood Special Education degree.

Essential Learning Requirements

(31 semester hours, must earn a grade of "C" or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others

may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Early Childhood Education, Inclusive Non-Licensure (BA)

Degree: Bachelor of Arts

Major: Early Childhood Education, Inclusive Non-Licensure

Program Code: 3206

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to the preparation of Early Childhood Educators who will teach in diverse, inclusive early childhood classrooms. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and in early childhood programs in the community.

As a student, you will accumulate a wealth of classroom experience. School districts and early childhood care programs throughout western Colorado provide opportunities to gain experience with young children from all backgrounds in a variety of program settings.

The Early Childhood Education, Inclusive Non-Licensure program provides teacher education candidates with broad content knowledge and

prepares them as teachers for early childhood including children ages birth through PreKindergarten in an inclusive setting. A minimum of 67 credit hours of essential learning and foundation coursework must be completed with a minimum GPA of 2.50 before a candidate may apply for admission to the Center for Teacher Education program. Please see the Teacher Education Admission Packet for further information on admissions criteria.

Important information about this program:

- 121 semester hours total for the BA in Early Childhood Education, Inclusive Non-Licensure.
- 2.50 cumulative GPA or higher in all CMU coursework.
- 2.50 cumulative GPA or higher in coursework toward the major content area.
- Must earn a grade of "C" or better in all Essential Learning, Lower Division, and Foundation coursework.
- All ECSE/EDUC prefix courses must be completed with a grade of B or better.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with young learners in diverse, inclusive settings. (Specialized Knowledge/Applied Learning)
- Design and establish a safe, engaging, inclusive, and respectful early childhood learning environment for a diverse population of young students. (Specialized Knowledge/Applied Learning)
- Plan and deliver effective instruction to young students, based on high-leverage, research-based pedagogical practices. (Communication Literacy/Information Literacy)
- Collect and critically analyze young student assessment data and use results to inform planning and instruction. (Critical Thinking/Quantitative Fluency)
- Demonstrate professionalism through ethical conduct, reflection, and leadership in early childhood settings. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 121 semester hours total for the BA in Early Childhood Education, Inclusive Non-Licensure.
- 2.50 cumulative GPA or higher in all CMU coursework.
- 2.50 cumulative GPA or higher in coursework toward the major content area.
- Must earn a grade of "C" or better in all Essential Learning, Lower Division, and Foundation coursework.
- All ECSE/EDUC prefix courses must be completed with a grade of B or better.

Essential Learning Requirements

31 semester hours

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Must earn a grade of "C" or better in all Essential Learning courses.

Code	Title	Semester Credit Hours

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Early Childhood Education, Liberal Arts (AA)

Degree: Associate of Arts
 Major: Liberal Arts
 Emphasis: Early Childhood Education
 Program Code: 2263

About This Major . . .

This degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The A.A. is the appropriate choice for students, who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at most public institutions in Colorado.

The Early Childhood Education Program provides students with a foundation for working with children from birth to age eight in a variety of settings. Our faculty offer one-on-one guidance for course selection, field placements, student teaching and employment.

With an increasing focus on quality early education, many organizations are requiring their employees to demonstrate a level of expertise provided by this AA degree. Our students complete their degree with a culminating student teaching experience giving them an opportunity to teach in a working classroom in the community for a semester.

Graduates of the early childhood program go on to be employed in large and small child care centers, open up their own home care centers, work in public school settings, or use coursework as a foundation to continue into Early Childhood or elementary teacher license education. In addition, our program aligns with state requirements for early childhood teacher certification and large center director qualification.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Apply the National Association for the Education of Young Children principles and practices in interactions with young children, families and other professionals. (Applied Learning)
- b. Utilize mathematical skills required to instruct young children. (Quantitative Fluency)
- c. Demonstrate effective written communication skills. (Communication Fluency)
- d. Demonstrate effective verbal communication skills. (Communication Fluency)
- e. Analyze interactions and teaching experiences from personal journals/administrative evaluations to improve teaching practices. (Critical Thinking/ Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- Students must have current First Aid/CPR cards.
- Student must create a portfolio following department requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for

your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for the transfer under the Core Transfer Agreements.

Education: Early Childhood Education (AAS)

Degree: Associate of Applied Science
Major: Early Childhood Education
Emphasis: Early Childhood Education
Program Code: 1394

About This Major . . .

This degree is designed for students who intend to enter the workforce upon completion. This degree also supports students who intend to continue their education and obtain a Baccalaureate in Applied Science Degree. The program aligns with state requirements for early childhood teacher certification and childcare center director qualifications. This degree includes 15 hours of the Colorado Statewide General Education Core and meets 15 hours of the lower division general education requirements at most public institutions in Colorado.

Important information about this program:

- Students must pass a background check.
- Students must possess current First Aid/CPR cards.
- Students must create a portfolio following department requirements.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Early Childhood Education Assistant Teacher (Technical Certificate)

Award: Technical Certificate

Program of Study: Early Childhood Education Assistant Teacher
Program Code: 1195

About This Program . . .

The Early Childhood Education program is designed to prepare students to work with young children (birth to age eight) in a variety of settings. This certificate is designed for students wishing to work as lead teachers in a childcare classroom. Students who wish to work in licensed early childhood care and education programs may complete the sequence of courses for Early Childhood Education Assistant Teacher and then continue on to earn an Associate of Arts degree in Early Childhood Education. The Early Childhood Education Assistant Teacher certificate enables students to meet the educational qualifications established by the Colorado Department of Human Services.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate effective written and verbal communication skills. (Communication Fluency)
- Evaluate current professional resources relating to several different domains of early childhood education. (Critical Thinking)
- Explain the impact of the Colorado Department of Child Care Rules and Regulations on children and families. (Specialized Knowledge)
- Apply the National Association for the Education of Young Children principles and practices in interactions with young children, families and other professionals. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 9 semester hours required for the Technical Certificate in Early Childhood Education Assistant Teacher.

Education: Early Childhood Education Director (Technical Certificate)

Award: Technical Certificate

Program of Study: Early Childhood Education Director

Program Code: 1192

About This Program . . .

This certificate prepares students for careers in licensed early childhood care and education programs. The Director certificate enables students to meet the educational qualifications of the Colorado Department of Human Services. Students who wish to work in licensed early childhood classrooms may complete the Director sequence and then continue on to earn an Associate of Arts degree in Early Childhood Education. Career options include opportunities in childcare centers and pre-schools both public and private.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Demonstrate effective written communication skills (Communication Fluency)
- b. Demonstrate effective oral communication skills (Communication Fluency)
- c. Utilize mathematical concepts required to create a child care business budget (Quantitative Fluency)
- d. Analyze data collected from different evaluation tools to create logical next-step solutions for improving quality in a child care business. (Critical Thinking)

- e. Create documents that are substantially error-free for families, staff and government agencies using current early childhood professional terminology. (Applied Learning)
- f. Apply the National Association for the Education of Young Children principles and practices in interactions with young children, families, and other professionals. (Applied Learning)

Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Teacher Licensure Program Description

The Center for Teacher Education offers Initial Teaching License programs in elementary, secondary and K-12 education. An Initial Teaching License for public schools in the state of Colorado requires each teacher candidate to complete coursework in a content area and a sequence of professional education courses that include extensive field experience and classroom placements. For undergraduate students, teacher license coursework and field experiences are completed through the Center for Teacher Education, while the content degree coursework is completed in the academic department of the discipline area. Both departments coordinate to assist teacher candidates in completing the program. Formal admission to the Center for Teacher Education is required of all students planning to obtain a Colorado Educator License. Admission to Colorado Mesa University does not guarantee admission to the Teacher Education program, which requires a separate application process. Contact the Center for Teacher Education for information; also see the section in this catalog on the Center for Teacher Education.

In order to complete all license requirements in a timely manner, it is important that students contact the center as soon as possible after enrolling at Colorado Mesa University. Interested students should enroll in EDUC 115 and EDUC 215 before applying for formal admission to the Center for Teacher Education.

Please see [Graduate Programs](#) (p. 78) for post-graduate options for the initial teaching license.

The following programs are inactive and not accepting applicants:

- Education: English for Speakers of Other Languages (ESOL) (Graduate Certificate)
- Education: English for Speakers of Other Languages (ESOL) (MAEd)

Education: Applied Mathematics (MAEd)

Award: Master of Arts in Education
 Program of Study: Applied Mathematics
 Program Code: 8241

This program is inactive and is not currently accepting new students.

About This Major . . .

The Master of Arts in Education, Applied Mathematics is a 33-hour program.

Important information about this program:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- Acceptance into the Applied Mathematics graduate certificate program.

- 33 semester hours and capstone presentation are required for the Master of Arts in Education Degree in Applied Mathematics.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

As a component of this program, students will earn an Graduate Certificate in Applied Mathematics prior to beginning coursework specific to the Master of Arts in Education in Applied Mathematics degree. Upon completion of the Graduate Certificate in Applied Mathematics, graduates will be able to:

- Employ mathematical, computational and/or statistical methods to address topics in applied mathematics (specialized knowledge/applied learning, quantitative fluency);
- Create oral and written arguments, well-grounded in theories and methods of applied mathematics (communication fluency, quantitative fluency);
- Formulate and evaluate hypotheses related to applied problems, issues, concepts, and perspectives (critical thinking, quantitative fluency).

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Create and deliver oral and written communication based on sound educational theory and research for public education. (Communication Fluency)
- Evaluate and formulate education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges for instruction. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Quantitative Fluency)
- Work individually and collaboratively on research based change and innovation in education. (Specialized Knowledge and Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Program Specific Requirements

(33 semester hours, must pass all courses with a grade of "B" or better.)

- 33 semester hours *and* capstone presentation are required for the Master of Arts in Education Degree in Applied Mathematics.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Education: Educational Leadership (EDLD) (MAEd)

Degree: Master of Arts in Education

Program of Study: Educational Leadership (EDLD)

Program Code: 8201

About This Major . . .

The Master of Arts in Education, Educational Leadership/Principal Licensure is designed as a dynamic program to meet the needs of education professionals as they gain additional expertise in one or more state endorsement areas. The degree is awarded after successful completion of 36 semester hours for the Educational Leadership concentration. The program is designed to provide the student with 12 hours of Master's foundation courses in theory of curriculum design and assessment, educational technology, culture and pedagogy, research, and a capstone project. The subsequent courses focus on Educational Leadership skills and competencies.

The program is guided and adheres to the Colorado Professional Standards for Principals. Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference from the profession, educator professional license, and a statement of purpose. Applicants must hold a valid teaching licensure to be considered for admission. The degree is granted after completion of all courses with a grade of B or better, successful completion of a capstone project, and a ranking of proficient or better on all elements of a comprehensive exam.

Important information about this program:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- Applicants must hold a valid Professional Colorado Educator License.

- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Create and deliver oral and written communication based on sound educational theory and research for public education leadership. (Communication Fluency)
- Evaluate and formulate education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges from the perspective of an educational leader. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Quantitative Fluency)
- Work individually and collaboratively on research-based change and innovation in Education. (Specialized Knowledge and Applied Learning)

Education: Exceptional Learner/ Special Education (EDSE) (MAEd)

Degree: Master of Arts in Education

Program of Study: Exceptional Learner/Special Education (EDSE)

Program Code: 8216

About This Major . . .

The Master of Arts in Education, Exceptional Learner/Special Education is designed as a dynamic program to meet the needs of education professionals as they gain additional expertise in one or more state endorsement areas. The degree is awarded after successful completion of 36 semester hours with a Capstone Project. The program is designed to provide the student with 12 hours of Master’s foundation courses in theory of curriculum design and assessment, educational technology, culture and pedagogy, research, and a capstone project. The subsequent courses focus on Exceptional Learner/Special Education skills and competencies.

The program is designed in accordance with the Council for Exceptional Children (CEC) accreditation standards for Special Education generalist endorsement and approved by the Colorado Department of Education. Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference from the profession, educator professional license, and a statement of purpose. Only students with valid teaching licensure will be considered for admission. The degree is granted after completion of all courses with a grade of B or better and a ranking of proficient or better on a Capstone Project.

Important information for this program:

- A bachelor’s degree from an accredited college is required, prior to beginning the program.
- Admission to the program follows the general admissions policies and procedures for graduate programs outlined in the university catalog and online.
- A Statement of Purpose commenting on your personal educational philosophy and interest in the program and evidence of active involvement with youth and a copy of your Colorado Teaching Certificate are required.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical

reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Create and deliver oral and written communication based on sound educational theory and research in guiding instruction for learners who are exceptional. (Communication Fluency)
- Evaluate and formulate education plans based on research and legal requirements outlined in federal legislation. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges from the perspective of an advocate for learners who are exceptional. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Quantitative Fluency)
- Work individually and collaboratively on research-based change and innovation in Education. (Specialized Knowledge and Applied Learning)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Education: Initial Teacher Licensure - Elementary (MAEd)

Degree: Master of Arts in Education

Program of Study: Initial Teacher Licensure – Elementary

Program Code: 8213

About This Major . . .

The Master of Arts in Education is designed as a dynamic program to meet the needs of education professionals as they gain additional expertise in one or more state endorsement areas or seek initial licensure. The degree is awarded after successful completion of 42 semester hours. The program is designed to provide the student with 12 hours of core courses in theory of curriculum design and assessment, educational technology, culture and pedagogy, research, and a capstone project. The additional coursework concentrates on Initial Teacher Licensure – Elementary concentration.

The program is designed using the cohort model with a group of participants completing all requirements in a two-year cycle. New cohorts may begin each summer. Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference, proof of working with youth, and a statement of purpose.

Important information about this degree:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- Pre-requisite leveling classes may be required prior to admittance to the program.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Create and deliver oral and written communication based on sound elementary educational theory and research for public education instruction. (Communication Fluency)
- Evaluate and formulate elementary education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges from the perspective of an elementary educator. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning at the elementary level with respect to district, state, and federal goals. (Quantitative Fluency)
- Work individually and collaboratively on research-based change and innovation in Education. (Specialized Knowledge and Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Program Specific Requirements

(42 semester hours, must earn a grade of "B" or better in each course.)

- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Education: Initial Teacher Licensure - Secondary (MAEd)

Degree: Master of Arts in Education

Program of Study: Initial Teacher Licensure – Secondary

Program Code: 8215

About This Major . . .

The Master of Arts in Education is designed as a dynamic program to meet the needs of education professionals as they gain additional expertise in one or more state endorsement areas or seek initial licensure. The degree is awarded after successful completion of 42 semester hours. The program is designed to provide the student with 12 hours of core courses in theory of curriculum design and assessment, educational technology, culture and pedagogy, research, and a capstone project. The additional coursework allows the student to focus on a Post Baccalaureate Licensure Program – Secondary education concentration.

The program is designed using the cohort model with a group of participants completing all requirements in a two-year cycle. New cohorts may begin each year. Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference, proof of working with youth, and a statement of purpose.

Important information about this program:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.

- Pre-requisite leveling classes may be required prior to admittance to the program.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Create and deliver oral and written communication based on sound secondary level educational theory and research for public education instruction. (Communication Fluency)
- Evaluate and formulate secondary education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges from the perspective of a secondary educator. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning at the secondary level with respect to district, state, and federal goals. (Quantitative Fluency)
- Work individually and collaboratively on research-based change and innovation in Education. (Specialized Knowledge and Applied Learning)

Education: Teaching and Leadership (EDTL) (MAEd)

Degree: Master of Arts in Education
Program of Study: Teaching and Leadership (EDTL)
Program Code: 8217

About This Major . . .

The Master of Arts in Education is designed as a dynamic program to meet the needs of education professionals as they gain additional expertise. The degree is awarded after successful completion of 30 semester hours for the Teaching and Leadership concentration. The program is designed to provide the student with 12 hours of Master's foundation courses in theory of curriculum design and assessment, educational technology, culture and pedagogy, research, and a capstone

project. The subsequent courses focus on Teaching and Leadership skills and competencies.

The program is guided and adheres to national standards researched and created by the Teacher Leadership Exploratory Consortium. Admission to the program follows the stated guidelines for graduate admission procedures as outlined in the university catalog. Additionally, students must provide two letters of reference from the profession and a statement of purpose. The degree is granted after completion of all courses with a grade of B or better.

Important information for this program:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Education: Rhetoric and Literary Studies (MAEd)

Award: Master of Arts in Education

Program of Study: Rhetoric and Literary Studies

Program Code: 8221

About This Major . . .

The Master of Arts in Education, Rhetoric and Literary Studies program is a dynamic program designed to meet the needs of education professionals who desire to teach lower-division college English courses in high school or higher education but who don't have the necessary graduate credits to do so. The degree is awarded after successful completion of 33 credit hours in graduate coursework in English and education, and the program is designed to provide students with more advanced knowledge in education research, curriculum, instruction, culture and pedagogy, educational technology, composition and rhetoric, literary theory, linguistics, creative writing, and American and British literature.

Important information for this program:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- Acceptance into the Rhetoric and Literary Studies graduate certificate program.
- 33 semester hours and capstone presentation are required for the Master of Arts in Education Degree in Rhetoric and Literary Studies.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

As a component of this program, students will earn an Graduate Certificate in Rhetoric and Literary Studies prior to beginning coursework specific to the Master of Arts in Education in Rhetoric and Literary Studies degree. Upon completion of the Graduate Certificate in Rhetoric and Literary Studies, graduates will be able to:

- a. Contribute to scholarly advancement in composition/rhetoric, linguistics, creative writing and literary studies by completing projects individually and collaboratively. (Specialized Knowledge/Applied Learning)
- b. Generate oral and written communication based on sound theories of composition/rhetoric, linguistics, creative writing and literary studies. (Communication Fluency)
- c. Formulate hypotheses related to research problems, issues, and concepts in the fields of composition/rhetoric, linguistics, creative writing and literary studies. (Critical Thinking)
- d. Synthesize information from a base of scholarly resources related to composition/rhetoric, linguistics, creative writing and literary studies. (Information Literacy)

- e. Evaluate moral, ethical, legal, or professional challenges in the disciplines of composition/rhetoric, linguistics, creative writing and literary studies. (Ethical Reasoning)

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- a. Create and deliver oral and written communication based on sound educational theory and research for public education. (Communication Fluency)
- b. Evaluate and formulate education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- c. Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- d. Evaluate and articulate responses to moral, ethical, legal, and professional challenges for instruction. (Ethical Reasoning)
- e. Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Quantitative Fluency)
- f. Work individually and collaboratively on research based change and innovation in education. (Specialized Knowledge and Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “[Graduate Degree Requirements](#) (p. 80)” in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Program Specific Requirements

(33 semester hours, must pass all courses with a grade of “B” or better.)

- 33 semester hours *and* capstone presentation are required for the Master of Arts in Education Degree in Rhetoric and Literary Studies.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Education: Social Science (MAEd)

Award: Master of Arts in Education
Program of Study: Social Sciences
Program Code: 8271

This program is inactive and is not currently accepting new students.

About This Major . . .

The Master of Arts in Education, Social Sciences is a 33 credit hour program. This program is designed for high school teachers who need certification to teach history and political science courses for lower-division college level credit.

Important information for this program:

- A bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- Acceptance into the Social Sciences graduate certificate program.
- 33 semester hours and capstone presentation are required for the Master of Arts in Education Degree in Social Sciences.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

As a component of this program, students will earn an Graduate Certificate in Social Science prior to beginning coursework specific to the Master of Arts in Education in Social Science degree. Upon completion of the Graduate Certificate in Social Science, graduates will be able to:

- a. Contribute to scholarly advancement in the chosen field by completing projects individually and collaboratively (specialized knowledge/applied learning);
- b. Create oral and written arguments or explanations, well-grounded in discipline-specific theories and methods, for specified audiences (communication fluency);
- c. Formulate and evaluate hypotheses as related to research problems, issues, concepts, and various perspectives (critical thinking);
- d. Synthesize, evaluate, or refine the information base of various scholarly sources (information literacy); and
- e. Evaluate moral, ethical, legal, or professional challenges within the discipline (ethical reasoning).

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- a. Create and deliver oral and written communication based on sound educational theory and research for public education. (Communication Fluency)
- b. Evaluate and formulate education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- c. Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- d. Evaluate and articulate responses to moral, ethical, legal, and professional challenges for instruction. (Ethical Reasoning)
- e. Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Quantitative Fluency)

- f. Work individually and collaboratively on research based change and innovation in education. (Specialized Knowledge and Applied Learning).

Applied Mathematics (Graduate Certificate)

Award: Graduate Certificate
Program of Study: Applied Mathematics
Program Code: 7441

This program is inactive and is not currently accepting new students.

About This Major . . .

This program leads to a Graduate Certificate in Applied Mathematics with an option to complete a Master of Arts degree in Education. This 18-credit hour program is designed to be completed in a two-year cycle, and serves several purposes:

- The program is intended to provide licensed secondary mathematics teachers the credentials required by the Higher Learning Commission to teach concurrent college or university mathematics courses.
- The program enables professionals interested in enhancing their knowledge of applied mathematics an opportunity to take individual courses and/or earn a graduate certificate in the subject area.
- The program provides an opportunity for post-graduates to take courses that serve as a bridge between a baccalaureate degree and a master's degree in mathematics or related field. In this case the transferability of the courses towards a specific master's degree

(other than the Master of Arts in Education) is not guaranteed and would depend on the individual masters programs.

Important information about this program

- A bachelor's degree from an accredited college is required, preferably in mathematics, mathematics education, or an area with a significant mathematics requirement.
- It is strongly recommended that applicants have completed 18-24 hours of undergraduate mathematics courses, including at least two semesters of calculus, a course in probability and statistics, and a course that includes writing mathematical proofs. Each applicant should address how their background relates to these recommendations in their letter of intent (see below), and discuss any particular strengths if they do not meet these recommendations.
- A fully completed application including official transcripts is required prior to beginning the program, two letters of recommendation (one page in length) and a letter of intent that provides information about the student's background, interests, and aspirations, and how they relate to the Graduate Certificate in Applied Mathematics.
- For additional information on applicable policies, please refer to the Graduate Policies and Procedures Manual.

Graduate certificates will, at a minimum, align with either two Masters student learning outcomes or two Doctoral student learning outcomes, depending on certificate level. Certificates may choose to use more than two student learning outcomes, if desired. In addition to these campus-wide student learning outcomes, all recipients of this Graduate Certificate will be able to:

- Employ mathematical, computational and/or statistical methods to address topics in applied mathematics (specialized knowledge/applied learning, quantitative fluency);
- Create oral and written arguments, well-grounded in theories and methods of applied mathematics (communication fluency, quantitative fluency);
- Formulate and evaluate hypotheses related to applied problems, issues, concepts, and perspectives (critical thinking, quantitative fluency).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Education: Educational Leadership (EDLD) (Graduate Certificate)

Award: Graduate Certificate in Education

Program of Study: Educational Leadership (EDLD)
Program Code: 7202

About This Major . . .

The Graduate Certificate in Educational Leadership for Principal Licensure is awarded after successful completion of 24 semester hours focusing on Educational Leadership skills and competencies that adhere to the Colorado Professional Standards for Principals. This certificate program prepares candidates, who already hold a Master's Degree, to take the State Required License Exam and apply for a Colorado Principal License.

Students must hold a valid teaching license to be considered for the certificate program. The certificate is granted after completion of all courses with a grade of B or better and a ranking of proficient or better on all elements of a comprehensive exam.

Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference and a statement of purpose.

Important information for this program:

- A master's degree from an accredited college is required, prior to beginning the program.
- A fully completed application including official transcripts is required prior to beginning the program.
- Applicants must hold a valid Professional Colorado Educator License.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Graduate certificates will, at a minimum, align with either two Masters student learning outcomes or two Doctoral student learning outcomes, depending on certificate level. Certificates may choose to use more than two student learning outcomes, if desired. In addition to these campus-wide student learning outcomes, all recipients of this Graduate Certificate will be able to:

- Create and deliver oral and written communication based on sound educational theory and research for public education leadership. (Communication Fluency)
- Evaluate and formulate education plans based on research, current issues, and public education stakeholders. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges from the perspective of an educational leader. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Quantitative Fluency)
- Work individually and collaboratively on research-based change and innovation in Education. (Specialized Knowledge and Applied Learning)

Education: Exceptional Learner/ Special Education (EDSE) (Graduate Certificate)

Award: Graduate Certificate in Education
Program of Study: Exceptional Learner/Special Education (EDSE)
Program Code: 7203

About This Major . . .

This graduate certificate is designed for education professionals to earn an endorsement to work with K-12 students with exceptionalities in accordance with the Council for Exceptional Children (CEC) standards.

Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference and a statement of purpose.

This certificate program prepares candidates, who must already hold a Master's Degree, to take the PRAXIS exam and apply for a Colorado Department of Education Special Education Generalist Licensure.

Students must hold a valid teaching license to be considered for the certificate program. The certificate is granted after completion of all courses with a grade of B or better.

Important information about this program:

- Applicants must hold a valid Professional Colorado Educator License.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Graduate certificates will, at a minimum, align with either two Masters student learning outcomes or two Doctoral student learning outcomes,

depending on certificate level. Certificates may choose to use more than two student learning outcomes, if desired. In addition to these campus-wide student learning outcomes, all recipients of this Graduate Certificate will be able to:

- Create and deliver oral and written communication based on sound educational theory and research in guiding instruction for learners who are exceptional. (Communication Fluency)
- Evaluate and formulate education plans based on research and legal requirements outlined in federal legislation. (Critical Thinking and Specialized Knowledge)
- Synthesize, evaluate, and refine information from an information base of scholarly resources. (Information Literacy)
- Evaluate and articulate responses to moral, ethical, legal, and professional challenges from the perspective of an advocate for learners who are exceptional. (Ethical Reasoning)
- Employ statistically valid processes to analyze assessment data to evaluate student learning with respect to district, state, and federal goals. (Qualitative Fluency)
- Work individually and collaboratively on research-based change and innovation in Education. (Specialized Knowledge and Applied Learning)

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See “[Graduate Degree Requirements](#) (p. 80)” in this catalog for a complete list of graduation requirements.
- All policies for graduate certificates are outlined in the [Graduate Policies and Procedures Manual](#), which is provided on the [Graduate Studies website](#).

Program Specific Requirements

(24 semester hours, must earn a grade of "B" or better in each course.)

- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Education: Initial Teacher Licensure - Elementary (Graduate Certificate)

Award: Graduate Certificate in Education

Program of Study: Initial Teacher Licensure - Elementary

Program Code: 7205

About This Major . . .

The Graduate Certificate in Education, ITL - Elementary is designed as a dynamic program to meet the needs of education professionals as they seek initial state licensure. The degree is awarded after successful completion of 30 semester hours.

The program is designed using the cohort model with a group of participants completing all requirements in a one-year cycle. New cohorts may begin each year.

Admission to the program follows the stated guidelines for graduate admission procedures outlined in the university catalog. Additionally, students must provide three letters of reference, proof of working with youth, and a statement of purpose.

Graduate certificates will, at a minimum, align with either two Masters student learning outcomes or two Doctoral student learning outcomes, depending on certificate level. Certificates may choose to use more than two student learning outcomes, if desired. In addition to these campus-wide student learning outcomes, all recipients of this Graduate Certificate will be able to:

- a. Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- b. Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- c. Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- d. Collect and critically analyze student assessment data and use results to inform planning and instruction. (Critical Thinking/Quantitative Fluency)
- e. Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master’s degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a “B” toward graduation requirements.

- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “[Graduate Degree Requirements](#) (p. 80)” in this catalog for a complete list of graduation requirements.
- All policies for graduate certificates are outlined in the [Graduate Policies and Procedures Manual](#), which is provided on the [Graduate Studies website](#).

Program Specific Requirements

(30 semester hours, must earn a grade of "B" or better in each course.)

- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

Rhetoric and Literary Studies (Graduate Certificate)

Award: Graduate Certificate
Program of Study: Rhetoric and Literary Studies
Program Code: 7221

About This Major . . .

The Colorado Mesa University Graduate Certificate in Rhetoric and Literary Studies is a dynamic program designed to meet the needs of education professionals who desire to teach lower-division college English courses in high school or higher education but who don't have the necessary graduate credits to do so. The certificate is awarded after

successful completion of 18 credit hours in graduate coursework in English, and the program is designed to provide students with more advanced knowledge in composition and rhetoric, literary theory, linguistics, creative writing, and American and British literature.

Important information for this program:

- A Bachelor's degree from an accredited college is required, prior to beginning the program.
- A fully completed Application for Admission to Graduate Programs including official transcripts is required prior to beginning the program.
- Applicants must also submit to the English Department a Letter of Intent of no fewer than 1000 words that provides information about the students' background, interests, and inspirations, including how they relate to the Graduate Certificate in Rhetoric and Literary Studies.
- For additional information on applicable policies, please refer to the Graduate Policies and Procedures Manual.

Graduate certificates will, at a minimum, align with either two Masters student learning outcomes or two Doctoral student learning outcomes, depending on certificate level. Certificates may choose to use more than two student learning outcomes, if desired. In addition to these campus-wide student learning outcomes, all recipients of this Graduate Certificate will be able to:

- Contribute to scholarly advancement in composition/rhetoric, linguistics, creative writing and literary studies by completing projects individually and collaboratively. (Specialized Knowledge/Applied Learning)
- Generate oral and written communication based on sound theories of composition/rhetoric, linguistics, creative writing and literary studies. (Communication Fluency)
- Formulate hypotheses related to research problems, issues, and concepts in the fields of composition/rhetoric, linguistics, creative writing and literary studies. (Critical Thinking)
- Synthesize information from a base of scholarly resources related to composition/rhetoric, linguistics, creative writing and literary studies. (Information Literacy)
- Evaluate moral, ethical, legal, or professional challenges in the disciplines of composition/rhetoric, linguistics, creative writing and literary studies. (Ethical Reasoning)

Requirements

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Social Science (Graduate Certificate)

Award: Graduate Certificate
Program of Study: Social Sciences
Program Code: 7771

This program is inactive and is no longer accepting new students.

About This Program . . .

This graduate certificate is designed for high school teachers who need certification to teach history and political science courses for lower-division college level credit.

Graduate certificates will, at a minimum, align with either two Masters student learning outcomes or two Doctoral student learning outcomes, depending on certificate level. Certificates may choose to use more than two student learning outcomes, if desired. In addition to these campus-wide student learning outcomes, all recipients of this Graduate Certificate will be able to:

- Contribute to scholarly advancement in the chosen field by completing projects individually and collaboratively (specialized knowledge/applied learning);
- Create oral and written arguments or explanations, well-grounded in discipline-specific theories and methods, for specified audiences (communication fluency);
- Formulate and evaluate hypotheses as related to research problems, issues, concepts, and various perspectives (critical thinking);
- Synthesize, evaluate, or refine the information base of various scholarly sources (information literacy); and
- Evaluate moral, ethical, legal, or professional challenges within the discipline (ethical reasoning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate certificates are outlined in the [Graduate Policies and Procedures Manual](#), which is provided on the [Graduate Studies website](#).

Program Specific Requirements

(18 semester hours, must pass all courses with a grade of "B" or better.)

- For additional information on applicable policies, please refer to the Graduate Policies and Procedures Manual.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Electrical/Computer Engineering

Program Description

Colorado Mesa University and the University of Colorado Boulder partner to deliver a electrical and computer engineering (ECE) program in its entirety in Grand Junction. Electrical and computer engineers design and create a wide range of products. The degree is designed to train engineers who understand computer programming as well as hardware design necessary to perform complicated tasks (e.g., robotics, mechatronics, digital twins, the Internet of Things, etc.).

Students completing the program will be awarded a Bachelor of Science in Electrical and Computer Engineering degree from CU Boulder.

Special Requirements

Students enter CMU as "pre-ECE engineering" majors. They may apply to the Electrical and Computer Engineering Partnership Program:

- After one year at CMU if they have completed a two course sequence in calculus and a two course sequence in physical science with "A" or "B" grades and have an overall technical GPA of 3.0 or better, or
- After completing all required lower-division coursework at CMU with a technical GPA of 3.0 or better.

Interested students can learn more about the program and admission options on the [Department of Computer Science and Engineering website](#).

Electrical/Computer Engineering, CMU/CU-Boulder Partnership Program (BS ECEE)

Degree: Bachelor of Science in Electrical and Computer Engineering
Major: Electrical and Computer Engineering
Program Code: 3456

This section provides links to information for the CMU/CU Boulder Electrical and Computer Engineering Partnership Program. An official review of your coursework will be performed by CU administration to ensure completion of all graduation requirements.

Important information for this program:

- All Math, Science and Engineering courses completed at CMU must be completed with a grade of "C" or better to be eligible to transfer to CU Boulder.
- Minimum credits taken from CU Boulder: 45 hrs
- Minimum credits to graduate: 128 hrs

Electric Lineworker

Program Description

This program covers all areas of training required to work with electric lines including basic skills and studies of electricity, math, fundamentals of line work, transformer connections, and underground installation. In addition to training at the field location, all students will receive the following certificates of completion, which are critical requirements for lineworker employment: American Heart Association – First Aid, CPR and AED Training, OSHA 10-Hour Class, Use of Wood Pole Fall Restraints, Setup for Digger Derricks, Set-up for Aerial Unit Devices, Pole-top and Aerial Unit Rescue, Powered Industrial Truck Training (Forklift), and Basic Rigging Class. It is strongly recommended that students obtain their CDL after completing the program for optimal employment

opportunities. With this certificate, students will be prepared for entry-level positions including temporary utility worker, groundman, and/or apprentice lineworker.

Special Requirements

Climbing and working on poles and towers at a height of 50+ feet is required. Students receive field training and practical theory in all phases of powerline installation and maintenance. An outdoor laboratory covers climbing (with a Wood Pole Fall Arrest Device), setting and removing various sizes of poles (with the use of a Digger Derrick), guy work, conductors, stringing and splicing, transformers, street lights, installation of services and the use and care of safety equipment. Prospective students are encouraged to contact WCCC regarding physical requirements. This program begins only in the fall semester of each year.

This is a highly competitive program; applicants are encouraged to enroll early. [Click here for the Lineworker program application checklist and information sheet.](#)

Electric Lineworker (AAS)

Degree: Associate of Applied Science
Major: Electric Lineworker
Program Code: 1391

About This Major . . .

This program covers all areas of training required to work with electric lines, including: basic skills in studies of electricity, math, fundamentals of line work, transformer connections, and underground installation. Students will be prepared for entry-level positions as electric line mechanics, electric line workers, or power line workers

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply principles of grammar and vocabulary in the documentation required to perform the duties of a ground man or lineman in the electrical distribution industry. (Communication Fluency)

- Apply mathematical concepts to perform electrical formula calculations used for finding voltages, amperes, resistance, and power. (Quantitative Fluency)
- Demonstrate familiarity with Standard Operating Procedures regarding climbing structures, replacing associated equipment, pole setting procedures, and soil recognition for underground applications and perform all required safety procedures. (Specialized Knowledge)
- Evaluate a situation, and determine which Standard Operating Procedure (SOP) applies to perform the job in a safe and timely manner. (Applied Learning)
- Describe the scope and application of principle features of an electric line worker, including core practices required by the electrical distribution industry. (Critical Thinking)
- Evaluate company policies, ethical standards and perform in a manner that is consistent to Federal and State laws. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 62 semester hours total for the AAS, Electric Line Worker.
- A minimum of 16 semester hours taken at CMU in no fewer than two semesters.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Electric Lineworker (Technical Certificate)

Award: Technical Certificate
Program of Study: Electric Lineworker
Program Code: 1381

About This Program . . .

This program covers all areas of training required to work with electric lines, including: basic skills in studies of electricity, math, fundamentals of line work, transformer connections, and underground installation. With this certificate, students will be prepared for entry-level positions as electric line mechanics, electric line workers, or power line workers.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply principles of grammar and vocabulary in the documentation required to perform the duties of a Ground man or an Apprentice Lineman for the electrical industry. (Communication Fluency)
- Describe the scope and application of principle features of an electric line worker, including core practices required by electrical industry. (Critical Thinking)
- Demonstrate familiarity with Standard Operating Procedures regarding climbing structures, replacing associated equipment, pole setting procedures, and soil recognition for underground applications while performing all required safety procedures. (Specialized Knowledge)
- Perform as a member of a crew in an ethical manner consistent with public, and company policy. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.

- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(36 semester hours, must earn a "C" or higher in each course.)

- Additional expenses - Students will be required to purchase or have approximately \$2600.00 in tools and personal equipment. This does not include required textbooks or an adequate pair of work boots. These costs may vary with student needs and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.
- Students will only be able to register for second semester courses upon the successful completion of first semester courses with a "C" or higher in each course.

Emergency Management and Disaster Planning

Program Description

An Emergency Management and Disaster Planning certificate is an addition for students from a variety of majors interested in engaging in emergency and disaster related services in the public, non-profit and private sectors. The certificate provides the knowledge and skills necessary for students to engage in activities related to responding to, recovering from, preparing for and mitigating against disasters. The certificate also prepares students for completing the national certification program in emergency management.

- [Emergency Management and Disaster Planning \(Professional Certificate\)](#) (p. 359)

Emergency Management and Disaster Planning (Professional Certificate)

Award: Professional Certificate
Program of Study: Emergency Management and Disaster Planning
Program Code: 1771

About This Program . . .

The certificate in emergency management and disaster planning is designed to provide students with the knowledge and skills needed to engage in emergency management and disaster preparedness activities in public, private, and nonprofit organizations. It also prepares students for successfully completing the exam and essay requirements for the International Association of Emergency Managers' certified emergency manager certification process. Completion of the certificate in emergency management and disaster planning will also contribute to the training requirements for the International Association of Emergency Managers' certified emergency manager certification process.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Synthesize current theories, principles, and practices in emergency management. (Specialized Knowledge)
- Communicate emergency management perspectives to various audiences. (Communication Fluency)
- Apply problem-solving skills to issues in emergency management. (Critical Thinking)

- Combine emergency management theory with practitioner experience and skills. (Applied Learning)

Emergency Medical Services

Program Description

The Emergency Medical Technician (EMT) represents the first component of the emergency medical technician system. An EMT is trained to care

for patients in their home, in an emergency situation or at the scene of an accident, and while transporting patients by ambulance to the hospital under medical direction. EMT coursework typically emphasizes emergency skills, such as patient assessment, communication, anatomy and physiology, airway management, trauma, obstetrics, and cardiac emergencies. Formal courses are combined with skills practice, practical application, and clinical time in an emergency room and on an ambulance for a total of 195 contact hours. The program also provides instruction and practice in dealing with bleeding, fractures, airway obstruction, cardiac arrest, and emergency childbirth. Students learn how to use and maintain common emergency equipment, such as suction devices, splints, oxygen delivery systems, stretchers, blood pressure cuffs, stethoscopes, medications and, when appropriate, current backboarding devices. The program prepares the graduate to take the NREMT examination and become certified as an EMT. Career options include opportunities in hospital emergency rooms, fire departments, physicians' offices, private ambulance services, ski patrol, Urgent Care Centers, wildland firefighting, and with search and rescue.

The Paramedic represents the most advanced level of training of the Emergency Medical Technician system. At this level, the caregiver receives advanced training in patient assessment, the use of advanced procedures, medications, and the paramedic skills necessary to lead a team in the management of medical emergencies and traumatic injuries in patients of all ages. Paramedics provide the most extensive pre-hospital care. Through performance of assessments and providing advanced medical care, their goal is to prevent and reduce mortality and morbidity due to illness and injury. Paramedics primarily provide care to emergency patients in and out of the hospital setting. This program prepares the graduate to take the NREMT examination and become certified or licensed as a Paramedic. Extensive related coursework and clinical and field experience is required. Students admitted to the program must have and maintain EMT certification throughout the Paramedic program and must have completed IV Therapy and basic EKG courses. It is recommended that students take Anatomy and Physiology and /or Pathophysiology prior to entering the Paramedic program.

Admission to the Paramedic program is competitive. Admission into Colorado Mesa University does not guarantee acceptance into the Paramedic program, which requires a separate application process. Paramedics should be emotionally stable, have good dexterity, agility, and physical coordination, and be able to lift and carry heavy loads. Paramedics are employed by fire, police, rescue agencies, hospitals, private ambulance companies, flight for life, and in a variety of businesses and industries with a high potential for accidental injury or illness. Graduates from either the certificate or the AAS degree program will graduate as street-ready paramedics.

Special Requirements

Students must earn a "C" or higher for all courses required for completion of the EMS programs. This policy applies regardless of when the course was taken.

Students must possess a current CPR card while in all EMS courses.

Students must be 18 years of age prior to the start of clinical rotations-see instructor.

A Criminal Background Check and Drug Screen are required for all EMS students.

As a graduate of a Career and Technical Education program you will be contacted by CMU/WCCC in approximately six month after completion

to verify your employment information. This information gathering is a federal requirement to ensure that WCCC receives certain federal funding.

EMT - Paramedic (AAS)

Degree: Associate of Applied Science
Major: Emergency Medical Technician - Paramedic
Program Code: 1632

About This Major . . .

The EMT-Paramedic represents the most advanced level of training of the emergency medical technician system. At this level, the caregiver receives advanced training in the use of procedures, medications and equipment to manage medical emergencies and traumatic injuries in patients of all ages. EMT-Paramedics (EMT-4) provide the most extensive pre-hospital care. Through performance of assessments and providing medical care, their goal is to prevent and reduce mortality and morbidity due to illness and injury. Paramedics primarily provide care to emergency patients in an out-of-hospital setting. The program prepares the graduate to take the NREMT examination and become certified as an EMT-Paramedic. Extensive related coursework and clinical and field experience is required.

Students admitted to the program must have and maintain EMT-Basic certification throughout the EMT-Paramedic program. Admission to the Paramedic program is competitive. EMTs and paramedics should be emotionally stable, have good dexterity, agility, and physical coordination, and be able to lift and carry heavy loads.

EMT-Paramedics are employed by fire, police and rescue agencies, hospitals, private ambulance companies and in a variety of businesses and industries with a high potential for accidental injury or illness.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate intellectual reasoning, rational inquiry, and effective problem-solving skills while maintaining empathy, professionalism, and compassion for another. (Intellectual Skills: Critical Thinking)

- Recommend access to resources necessary to meet the diverse health care needs of individuals, families, and communities within cultural, ethical, legal, social, economic, and professional parameters. (Specialized Knowledge/ Applied Learning)
- Manage the collaborative health care of individuals, families, and communities through use of clear, effective, thorough, and accurate communication (Intellectual Skills/ Communication Fluency)
- Practice Paramedic level care, which includes emergency care, illness and restorative care, and health education based on a systematic assessment that is reflective of current emergency theory and research (Specialized Knowledge/Applied Learning)
- Demonstrate NREMT standards of practice, including legal basics, principles for delegation, and principles of documentation while maintaining a culture of respect and safety. (Specialized Knowledge/ Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 63 semester hours total for the AAS, Emergency Medical Technician-Paramedic.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

EMT - Basic (Technical Certificate)

Award: Technical Certificate

Program of Study: Emergency Medical Technician

Specialization: Basic

Program Code: 1631

About This Program . . .

The EMT-Basic represents the first component of the emergency medical technician system. An EMT-B is trained to care for patients at the scene of an accident and while transporting patients by ambulance to the hospital under medical direction. The EMT-B has the emergency skills to assess a patient's condition and manage respiratory, cardiac, and trauma emergencies. EMT-Basic coursework typically emphasizes emergency skills, such as patient assessment, managing respiratory, trauma, and cardiac emergencies. Formal courses are combined with skills practice and time in an emergency room or ambulance for a total of 195 contact hours. The program also provides instruction and practice in dealing with bleeding, fractures, airway obstruction, cardiac arrest, and emergency childbirth. Students learn how to use and maintain common emergency equipment, such as backboards, suction devices, splints, oxygen delivery systems, and stretchers. Graduates of approved EMT-Basic training programs who pass a written and practical examination administered by the State certifying agency or the NREMT earn the title "Registered EMT-Basic."

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these

campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate the theoretical knowledge and practical skills in the performance of patient assessment and develop a proper treatment plan. (Specialized Knowledge)
- Demonstrate skills practice according to NREMT standards in safety, professional behavior and ethical conduct. (Applied Learning)
- Apply standard of care skills and procedures to ensure the proper care and dosage of medications given to a patient. (Quantitative Fluency)
- Communicate courteously and effectively with Dispatch personnel, other health care professionals, patients and with the public. (Communication Fluency)
- Demonstrate error recognition and the ability to correctly interpret patient signs and symptoms, and establish a course of action to solve problems and improve patient outcome. (Critical Thinking)

Crosswalk Between CMU and CCCS EMT Curricula

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(10 semester hours, must maintain a 2.00 cumulative GPA or higher.)

Energy Management/Landman

Program Description

For more information on the BBA in Energy Management/Landman, see [Business](#) (p. 175).

The certificate in energy management/landman is designed to provide students with the knowledge and skills needed to engage in landman activities in the energy sector. The certificate will provide students with a foundation for further study in the Energy Management/Landman concentration in the BBA, which more fully prepares a person for a successful career in the growing energy industry.

English

Program Description

Colorado Mesa University offers a Bachelor of Arts in English or English Secondary Education, a Professional Certificate in Editing and Technical Communication, and a graduate certificate in Rhetoric and Literary Studies. Students gain breadth as they read widely in world, British, and American literatures, and they gain depth as they engage contemporary literary theory, linguistics, and rhetoric. With the intense focus on writing and critical thinking, graduates will be well prepared as they enter master and doctoral programs, law school, library science programs, or move directly into the work force as public relations reps, guidance counselors, technical writers, or administrators at institutions related to the arts.

Opportunities abound as they hone their craft in poetry, fiction, and creative non-fiction workshops. Students may join the Creative Writers Club or work as an editor for CMU's own literary magazine, *The Literary Review*, *Horizon Magazine*, or *Pinyon Poetry*, a nationally-circulating literary periodical. These opportunities provide invaluable experience and prepare students for careers that value creative and insightful employees.

For those with an interest in teaching, students gain expertise in literature and language that prepares them to focus on teaching as they design assignments, learn pedagogical theories, work closely with local middle and high school teachers, and complete student teaching internships. The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. The secondary licensure program provides teacher education candidates with broad content knowledge in English and prepares them as teachers for grades 7 through 12.

Above all, by reading, interpreting, and evaluating complex literature, theories, and criticism, students learn to organize ideas, assert and

defend claims, and research. Employers will value their ability to solve problems and present ideas in effective language to a wide range of audiences. They learn how to weigh evidence, identify assumptions, evaluate persuasive appeals, and recognize faulty reasoning. Employers want smart, flexible, and creative employees, all hallmarks of a Colorado Mesa University graduate in English.

The English minor interests students who want to broaden their backgrounds in the liberal arts as well as embark on careers that demand an expertise in critical thinking, close reading, and writing, such as law, journalism, advertising, theatre, business, public service, or graduate study in other academic and professional subjects. The Professional Certificate in Editing and Technical Communication, an interdisciplinary credential that combines copy editing, technical writing expertise, and design courses, is designed for those who want a career improving, producing, and sharing documents. For those who want to pursue graduate work, we offer a Graduate Certificate in Rhetoric and Literary Studies delivered online. The certificate offers a range of courses, from composition theory and British and American literature to literary theory, linguistics, and creative writing.

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to

develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. The secondary licensure program provides teacher education candidates with broad content knowledge in English and prepares them as teachers for grades 7 through 12. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215, must be taken before applying to the program.

Important information for this degree:

- 2.80 cumulative GPA or higher in all CMU coursework.
- 2.80 cumulative GPA or higher in coursework toward the major content area.
- All EDUC prefix courses must be completed with a grade of "B" or better.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
- A grade of "C" or better must be earned in all required foundation and major courses, unless otherwise stated.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Express themselves effectively in a variety of forms. (Specialized Knowledge)
- State and support, sometimes using research, interpretive claims about a variety of texts. (Critical Thinking)
- Identify the salient features of literary texts from a broad range of English and American literary periods. (Specialized Knowledge)
- Employ knowledge of literary traditions to produce imaginative writing. (Communication Fluency/Applied Learning)
- English Outcome 5: Use research to assist in problem-solving. (Critical Thinking)
- Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)

- j. Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

English (BA)

Degree: Bachelor of Arts
Major: English
Program Code: 3210

About This Major . . .

The English Program offers concentrations leading to a Bachelor of Arts in English and Secondary Education. The skills a student develops as an English major, such as writing, editing, problem solving, and critical thinking and analysis, are highly prized by employers in nearly every profession. The English Program is proud of what it offers – cultural experiences, unique and interesting courses and instruction, committed faculty and support staff, and a desire to provide the best liberal arts education possible.

Many occupations require individuals who can write and speak well, solve problems, learn new information quickly, and work well with others on a team. This means that English graduates use their education in a wide variety of fields, and your future career may relate more to your personal career interests, work values, and transferable skills than anything specific to the content of your major. Who hires English Majors? Book publishers, magazines, arts organizations, political offices, large corporations, radio/television stations, advertising agencies, social service agencies, chambers of commerce, research institutions, marketing consultants, newspapers, greeting card publishers, law firms, public interest organizations, consumer action groups, health organizations, educational institutions, literary agencies, theaters, printing firms, high tech firms, tutoring services, public and corporate libraries, government agencies, and public relations firms.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Express themselves effectively in a variety of forms. (Specialized Knowledge)
- Support interpretive claims about a variety of texts. (Critical Thinking)
- Identify the salient features of literary texts from a broad range of English and American literary periods. (Specialized Knowledge)
- Employ knowledge of literary traditions to produce imaginative writing. (Communication Fluency/Applied Learning)
- Select and evaluate information to assist in problem-solving. (Information Literacy/Critical Thinking)
- Demonstrate knowledge of the history or culture of the English language (Specialized Knowledge)
- Explore cultural and historical lessons from literature and apply the lessons to contemporary events and cultural concerns (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Literature, English (BA)

Degree: Bachelor of Arts

Major: English

Concentration: Literature

Program Code: 3212

About This Major . . .

This program is no longer accepting new students.

The English Program offers concentrations leading to a Bachelor of Arts in Literature, Creative Writing, and Secondary Education. The skills a student develops as an English major, such as writing, editing, problem solving, critical thinking, and analysis, are highly prized by employers in nearly every profession. The English Program is proud of what it offers – cultural experiences, unique and interesting courses and instruction, committed faculty and support staff, and a desire to provide the best liberal arts education possible.

Many occupations require individuals who can write and speak well, solve problems, learn new information quickly, and work well with others on a team. This means that English graduates use their education in a wide variety of fields, and your future career may relate more to your personal career interests, work values, and transferable skills than anything specific to the content of your major. Who hires English Majors? Book publishers, magazines, arts organizations, political offices, large corporations, radio/television stations, advertising agencies, social service agencies, chambers of commerce, research institutions, marketing consultants, newspapers, greeting card publishers, law firms, public interest organizations, consumer action groups, health organizations, educational institutions, literary agencies, theaters, printing firms, high tech firms, tutoring services, public and corporate libraries, government agencies, and public relations firms.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Express themselves effectively in a variety of forms. (Communication Fluency/Specialized Knowledge)
- Support interpretive claims about a variety of texts. (Critical Thinking)

- c. Identify the salient features of literary texts from a broad range of English and American literary periods. (Specialized Knowledge)
- d. Employ knowledge of literary traditions to produce imaginative writing. (Communication Fluency/Applied Learning)
- e. Use research to assist in problem-solving. (Critical Thinking)
- f. Apply standard conventions of English grammar and punctuation and explain grammatical structures using relevant terminology. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

English (Minor)

Minor: English

Program Code: M242

About This Minor. . .

The English minor should be of interest to students who want to broaden their backgrounds in the liberal arts as well as to those planning careers in which experience in literature and writing is useful, such as law, journalism, advertising, theatre, business, public service, or graduate study in other academic subjects.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements sheet you should follow.

- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(18 semester hours)

- Students may NOT count ENGL 111 and ENGL 112 toward the English minor.

Code	Title	Semester Credit Hours
Required Courses		
Complete 18 hours (6 courses) in English, 6 hours of which must be upper division		18
Total Semester Credit Hours		18

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Editing and Technical Communication (Professional Certificate)

Award: Professional Certificate

Program of Study: Editing and Technical Communication

Program Code: 1720

About This Program . . .

The Editing and Technical Communication certificate offers students a valuable and focused skill set that combines copy editing, expertise in producing technical documents, and common technology used in the field. Every occupation requires individuals who can write and speak well, solve problems, learn new information quickly, and work well with others on a team. More specifically, many fields and occupations require quantitative analysis, but they also need to produce correct, well-

written, and audience-appropriate documents. A certificate in Editing and Technical Communication prepares students to support and produce these documents.

Who would hire someone with a certificate in Editing and Technical Communication? First, any organization that produces documents to read, from every conceivable kind of publisher to individuals and groups that produce online content. Second, technical fields—e.g. engineering, science, health sciences, computer software, etc.—are constantly producing documents and presentations, and these forms of communication need editors, writers, and presenters.

For more information on what you can do with this major visit Career Services’ [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Use “common industry standard” writing and design software programs (Specialized Knowledge)
- Produce and edit a range of technical documents using a variety of style guides and programs (Applied Knowledge)
- Apply standard written conventions of English grammar and punctuation (Specialized Knowledge)
- Navigate ethical dilemmas within the field of Editing and Technical Communication (Ethical Problem Solving)
- Communicate findings, expectations, and questions through drafts and final products to a variety of stakeholders in written and oral means (Communication Fluency)
- Apply knowledge of the writing process to professional communication genres (i.e. proposals, grant project, etc.), rhetorical situations, and audiences (Critical Thinking)
- Identify and improve documents written by others under appropriate constraints (i.e. large volumes of text, limited time) (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select “Print Options.” This will give you the options to either “Send Page to Printer” or “Download PDF of This Page.” The “Download PDF of This Page” option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.

- A grade lower than “C” in the program of study will not be counted toward meeting the certificate’s requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(18 semester hours)

Code	Title	Semester Credit Hours
ENGL 392	Introduction to Copy Editing ¹	3
ENGL 499	Internship	3
Writing		
Select three of the following:		9
ENGL 219	Introduction to Professional Writing-GTCO3 ¹	
ENGL 320	Report and Proposal Writing ¹	
ENGL 325	Writing for Engineers	
ENGL 385	Technical and Professional Writing ¹

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Environmental Science and Technology

Program Description

The goal of the Environmental Science and Technology program is to educate students in the science, protection and restoration of our natural resources—air, water, land and ecosystems. Students develop a foundation in biology, chemistry, mathematics, statistics and communication skills, then apply this knowledge to the study and solution of environmental problems. Theory is balanced with hands-on practice, which includes considerable work outdoors in the local environment during lab periods. Individual and group projects are a key component of courses and students participate in work performed in partnership with the Bureau of Land Management, U.S. Forest Service, Colorado National Monument and other organizations. Students must choose either the Pollution Monitoring and Control option, which focuses on pollution prevention as well as investigation, monitoring and cleanup, or the Ecosystem Restoration option, which focuses on protecting and restoring natural resources.

The Environmental Science and Technology minor is a valuable asset to students who are majoring in biology, chemistry or geology and planning to work in an environmental profession.

Students majoring in Environmental Science and Technology may also be interested in the certificate in [Sustainability Practices](#) (p. 700) and the minor in [Watershed Science](#) (p. 747).

Many environmental scientists use geographic information systems in their work. Students can learn this technology by pursuing the certificate in [Geographic Information Systems and Technology](#) (p. 404).

Degree: Bachelor of Science
Major: Environmental Science and Technology
Program Code: 3443

About This Major . . .

We educate students in the science, protection, and restoration of our natural resources—air, water, land, and ecosystems. Students develop a foundation in biology, chemistry, mathematics, statistics,

and communication skills, then apply this knowledge to the study and solution of environmental problems. We balance theory with hands-on practice, and include considerable work outdoors in our spectacular local environment. Students choose either the Pollution Monitoring & Control option, which focuses on pollution prevention as well as investigation and cleanup, or the Ecosystem Restoration option, which focuses on strategies for managing natural resources. Students complete the program with our Capstone course, in which they work in small groups on real-life projects for an off-campus client. Each group plans and implements a project and presents the final results to its client. In addition to providing students with a chance to showcase the knowledge and abilities they have acquired through their studies, students learn how to deal with the challenges of real-life project work.

Our graduates take positions as environmental professionals with consulting firms, industry, and government agencies (e.g., U.S. Bureau of Land Management, U.S. Geological Survey, and U.S. Army Corps of Engineers). Some continue their studies in graduate school (e.g., Colorado School of Mines, Colorado State University, University of Denver).

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Define terminology, concepts, theories, and practices in environmental science. (specialized knowledge)
- Find information relevant to environmental science, evaluate information critically, and apply the information appropriately and effectively to specific purposes (information literacy, critical thinking).
- Demonstrate the ability to design an environmental study. (quantitative fluency, critical thinking, applied learning)
- Demonstrate the ability to use appropriate tools, technology, and methods for measuring and analyzing environmental data. (quantitative fluency, applied learning)
- Demonstrate the ability to analyze quantitative environmental data, effectively translate data into graphs or tables, and interpret the results. (quantitative fluency)
- Construct an organized argument (oral and written) supported by current research on a technical issue in environmental science appropriate for a specialized audience. (communication fluency)
- Complete a field-based project that evaluates and proposes a logical solution for an environmental issue or need by effectively synthesizing applicable concepts from environmental science and related disciplines. (applied learning, critical thinking, personal and social responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print

Options. This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTCO1	3
ENGL 112	English Composition II-GTCO2	3
Mathematics ¹		
MATH 113	College Algebra-GTMA1 ^{2,3}	3
History		
Select one History course		3
Humanities		
Select one Humanities course		3

Social and Behavioral Sciences		
Select one Social and Behavioral Sciences course		3
Select one Social and Behavioral Sciences course		3
Fine Arts		
Select one Fine Arts course		3
Natural Sciences ⁴		
Select one Natural Sciences course ⁵		3
Select one Natural Sciences course with a lab		4
Total Semester Credit Hours		31

¹ Must receive a grade of "C" or better and must be complete by the time the student has 60 semester hours.

² This is a 4 credit course. 3 credits apply to the Essential Learning requirements and 1 credit applies to elective credit.

³ Students who plan to take Calculus I-GT-MA1 (MATH 151) should take Precalculus Mathematics-GTMA1 (MATH 119) or Algebra for Calculus (MATH 119A) and Trigonometry for Calculus (MATH 119B) instead of College Algebra-GTMA1 (MATH 113).

⁴ 7 semester hours, one course must include a lab.

⁵ Students who did not pass the CHEM 131 placement exam should take CHEM 111.

Other Lower Division Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Environmental Science and Technology (Minor)

Minor: Environmental Science and Technology
Program Code: M440

About This Minor. . .

We educate students in the science, protection, and restoration of our natural resources—air, water, land, and ecosystems. We balance theory with hands-on practice, and include considerable work outdoors in our spectacular local environment. Individual and group projects are a key part of our courses. Our students have opportunities to take part in work done through partnerships with organizations such as the Colorado National Monument and the Bureau of Land Management.

The Environmental Science minor is an invaluable asset to students who are majoring in biology, chemistry, or geology and planning to work in an environmental profession.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total

number of credit hours for a student who has not already taken those prerequisites.

- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(15 semester hours)

Code	Title	Semester Credit Hours
Select one of the following options: ¹		3-4
ENVS 104	Environmental Science: Global Sustainability	
ENVS 101 & ENVS 105	Introduction to Environmental Science-GTSC2 and Readings in Environmental Science	
Select courses from Environmental Science and Technology (ENVS)11-12 to bring total semester hours to 15 ²		
Total Semester Credit Hours		14-16

¹ Either ENVS 104 or ENVS 101/ENVS 105 may be taken for credit, but not both.

² At least 5 of the semester hours required for this minor must be upper division.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sustainability Practices (Professional Certificate)

Award: Professional Certificate
Program of Study: Sustainability Practices
Program Code: 1464

About This Program . . .

"Sustainability" is a way of living that meets the needs of the present without compromising the ability of future generations to meet their own needs. In order to achieve sustainability, we must examine our approach to energy, food, shelter, transportation, and other aspects of everyday life.

Can we continue our current approach indefinitely? What changes need to occur to make our approach sustainable? What can we do to make those changes?

Through the Certificate in Sustainability Practices, students learn the principles of sustainability along with specific ways to implement them.

Anyone seeking to understand and practice this approach will benefit from completion of the program. For some, the program can serve as a first step toward a more in-depth knowledge that may lead to a career.

Earning this certificate helps professionals to improve their business practices and community leaders to understand trends in community planning. Any citizen will learn ways to improve the environment through their personal choices.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.

- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than “C” in the program of study will not be counted toward meeting the certificate’s requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(9 semester hours, must earn a “C” or better in each course.)

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the

student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Exercise Science

Program Description

Students enrolled in this major should have a strong interest in the sciences as this program applies science to human function. The student will begin studies with science courses such as physics, general chemistry, and human anatomy and physiology. Continued studies will include courses such as exercise physiology, anatomical kinesiology, biomechanics, physical activity and aging, human nutrition, and sports nutrition, among other subject areas. Exercise Science students frequently continue their studies for graduate or professional degrees at universities widely recognized as top programs in athletic training, exercise physiology, occupational therapy, physical therapy, physical education, physician assistant studies, and public health.

About This Major . . .

Students enrolled in this concentration should have a strong interest in the sciences as this program applies science to human function. The student will begin studies with science courses such as physics, general chemistry, and human anatomy & physiology. Continued studies will include courses such as: exercise physiology, anatomical kinesiology, biomechanics, physical activity and aging, medical conditions and pharmacology, and sports nutrition, among other subject areas. This major is designed to prepare students for graduate programs such as: physical therapy, physician's assistant, occupational therapy, and exercise physiology.

Colorado Mesa students frequently continue their study for graduate or professional degrees at universities widely recognized as top programs in exercise physiology, physical therapy, occupational therapy, physical education and public health.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Evaluate the functions of the individual body systems. (Specialized Knowledge)
- Identify risk factors, exercise cautions and other safety concerns. (Specialized Knowledge)
- Identify the scope and definitions of health, fitness, and human performance with the ability to analyze the data critically. (Applied Learning, Quantitative Fluency)
- Describe procedures and/or statistical analyses for physiological assessments. (Quantitative Fluency)
- Apply biomechanical principles to movement and be able to communicate and formulate conclusions about the results. (Critical Thinking)
- Demonstrate the ability to clearly communicate specialized knowledge. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Exercise Science (Minor)

Minor: Exercise Science
Program Code: M104

About This Minor. . .

Students enrolled in the Exercise Science minor should have a strong interest in fitness, health promotion, and exercise science. Students will explore subject areas that include: anatomy, physiology, kinesiology, applications of physical fitness, and exercise physiology.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.

- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Finance

(See [Business](#) (p. 175))

Fire Science Technology

Program Description

The Fire Science Technology program is designed to prepare students for entry level occupation in structural fire service as well as provide training and skills for individuals already employed in the fire service that are interested in career advancement.

Job opportunities may be found in small or large municipal fire departments, fire protection districts, or industrial fire departments.

This program provides intensive instruction that satisfies the certification requirement to take the State Colorado Division of Fire Prevention and Control Firefighter I exam. The Academy's rigorous instruction includes lectures at WCCC/CMU by seasoned firefighters and hands-on practice at state-of-the-art live burn facilities.

The Academy student will experience operations such as house burns, car fires, forcible entry, and many others. If you are looking for a career in firefighting, or if you simply want to serve as a volunteer firefighter, this is an excellent place to begin.

Students wishing to further their education with a four-year degree have the opportunity to do so through select university programs.

About This Major . . .

The Fire Science Technology program is designed to prepare students for entry level occupation in Structural fire service as well as provide training and skills for individuals already employed in the fire service that are interested in career advancement.

Job opportunities may be found in small or large municipal fire departments, fire protection districts, or industrial fire departments.

This program provides intensive instruction that satisfies the certification requirement to take the State Colorado Division of Fire Prevention and Control Firefighter I exam. The Academy's rigorous instruction includes lectures at WCCC/CMU by seasoned firefighters, and hands-on practice at state-of-the-art live burn facilities.

The Academy student will experience operations such as house burns, car fires, forcible entry, and many others. If you are looking for a career in firefighting, or if you simply want to serve as a volunteer firefighter, this is an excellent place to begin.

Students wishing to further their education with a four-year degree have the opportunity to do so through select university programs.

Program courses will be offered in two formats, traditional lecture and lab activities and as hybrid courses (partially face-to-face and partially online). The Fire Science curriculum is designed in accordance with the International Fire Service Training Association (IFSTA) standards.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize evidence and be able to demonstrate basic principles of determining area or origin, cause of fire, and application of sound investigative principles. (Specialized Knowledge)\ \
- Apply Chemistry and Mathematics principles to solve fire protection problems and concepts and be able to demonstrate those methods to analyze and explain issues in quantitative terms. (Quantitative Fluency)
- Demonstrate proficient formal and informal communication and writing skills that are professional in nature. (Communication Fluency)
- Demonstrate the scope and application of principle skills, fire behavior, and core practices of firefighting strategies, practices and policies that guide the modern fire and emergency services profession, particularly in a dynamic and multicultural environment. (Critical Thinking)
- Reflect on and respond to ethical, social, civic, and/or environmental challenges at local, national, and/or global levels of firefighting. (Personal/Social Responsibility)\ \
- Explain the administrative workings of a fire department including budget preparation, resource allocation, long-range planning, and fiscal projections. (Information Literacy)\ \

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 63 semester hours required for the AAS in Fire Science Technology
- Only the courses listed may be used as substitutes, if a student has already taken a required course. A substitution form approved by the department must be submitted to the Registrar's Office to allow the change.
 - FSTR 201 Instructional Methodology
 - FSTR 203 Fire Hydraulics and Water Supply
 - FSTR 205 Fire Investigation I
 - FSTR 252 Fire Investigation II
 - FSWM 156 Firefighter Type I and Fire Line Leadership
 - FSWM 244 Wildland Training for Structural Fire Fighters

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Fire Academy Level 1 (Technical Certificate)

Award: Technical Certificate
Specialization: Fire Academy Level 1
Program Code: 1167

About This Certificate . . .

The Fire Academy Level I Certificate is designed to prepare students for entry level employment in the Structural fire service as well as provide training and skills for individuals already employed in fire service that are interested in specialized training.

This program provides instruction that satisfies the certification requirement to take the State Colorado Division of Fire Prevention and Control Firefighter I exam. The Academy instruction includes lectures at WCCC/CMU by seasoned firefighters, and hands-on practice at state-of-the-art live burn facilities.

The Academy student will experience operations such as house burns, car fires, forcible entry, and many others. If you are looking for a career in firefighting, or if you simply want to serve as a volunteer firefighter, this is an excellent place to begin.

Program courses will be offered in two formats, traditional lecture and lab activities and as hybrid courses (partially face-to-face and partially online). The Introduction to Structural Firefighting course is designed in accordance with the International Fire Service Training Association (IFSTA) standards.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize evidence and demonstrate basic principles of determining area or origin, cause of fire, and application of sound investigative principles. (Specialized Knowledge)

- b. Apply Chemistry and Mathematics principles to solve fire protection problems and concepts and demonstrate those methods to analyze and explain issues in quantitative terms. (Quantitative Fluency)
- c. Effectively evaluate a real-time fire or rescue situation to develop and communicate an effective incident action plan to the rest of the team. (Communication Fluency)
- d. Assess a dynamic fire scene including risk management profile, rapidly changing fire conditions, and life safety concerns to establish and implement an effective incident management strategy. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Fitness and Health Promotion

Program Description

Students enrolled in fitness and health promotion should have a strong interest in the sciences as this program applies science to human function. The student will explore exercise physiology, anatomical kinesiology, community health or worksite health promotion, physical activity and aging, and human and sports nutrition. Career opportunities include: strength coaches in the private sector, secondary education, the university, or professional sports programs; sports, health, and wellness program instructors or directors; managers and leaders in the worksite health promotion setting; occupational therapists*; health department staff at the local, state, regional, or federal level; and personal trainers or group exercise instructors.

*This profession will require additional schooling.

Programs of Study Bachelors

- [Fitness and Health Promotion \(BS\)](#) (p. 399)

Fitness and Health Promotion (BS)

Degree: Bachelor of Science
Major: Fitness and Health Promotion
Program Code: 3150

About This Major...

Students enrolled in this major should have a strong interest in the sciences as this program applies science to human function. The student will explore exercise physiology, anatomical kinesiology, community health, physical activity and aging, worksite health promotion, and sports nutrition, among other subject areas. Career opportunities include: sports and wellness program instructors and directors; strength coaches for college, university and professional sports¹ programs; managers and exercise leaders in corporate wellness programs; nutritionists¹; occupational therapists¹; and personal trainers.

¹ Career requires additional post-baccalaureate studies.

Colorado Mesa students frequently continue their study for graduate or professional degrees at universities widely recognized as top programs in exercise physiology, occupational therapy, physical education, and public health.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Evaluate the functions of the individual body systems. (Specialized Knowledge)
- Identify risk factors associated with chronic disease. (Specialized Knowledge)
- Identify and describe nutritional practices related to disease, health, fitness and human performance. (Critical Thinking)
- Identify the scope and definitions of health, fitness, and human performance, with the ability to analyze the data critically. (Applied Learning, Quantitative Fluency)
- Describe and communicate how physical activity relates to health. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

Graduation and Advising

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Forensic Anthropology

Program Description

Forensic anthropology is the use of anthropological techniques to assist law enforcement, with the focus on the study of the human skeleton. Generally, physical anthropologists concentrate on the recovery and identification of human remains, most often where the victim's remains are in advanced stages of decomposition. There are two main foci: osteology (the study of bones) and taphonomy (the study of how organic matter decays). An osteological analysis of a skeleton assesses the age, sex, ancestry, stature, and unique features of an individual from the skeleton. The study of taphonomy helps to determine a post-mortem interval and what happened to a body from the time of death to the time

of discovery. The minor is suited to those majoring in criminal justice or biology with an interest in death investigation.

Programs of Study

Bachelors/Minors

- [Forensic Anthropology \(Minor\)](#) (p. 402)

Forensic Anthropology (Minor)

Minor: Forensic Anthropology
Program Code: M715

About This Minor. . .

The Forensic Anthropology minor introduces students to the knowledge and skills necessary to employ anthropological techniques in a forensic context. Students become familiar with both field and laboratory techniques used in forensic anthropology. Students in the minor use the Forensic Investigation Research Station, a facility built to study the decomposition of the human body. The Minor especially complements such degree programs as Criminal Justice and Biology. Students with the background in Forensic Anthropology will be better prepared for jobs in areas related to death investigation.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.

- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(22 semester hours)

Code	Title	Semester Credit Hours
Select one of the following options:		
ANTH 270 & 270L	Death and Forensic Science and Death and Forensic Science Laboratory	3-4
ANTH 231 & 231L	Survey of Biological Anthropology-GTSS3 and Survey of Biological Anthropology Laboratory-GTSS3	
ANTH 331 & 331L	Forensic Anthropology and Forensic Anthropology Laboratory	3
ANTH 478	Professional Issues in Forensic Science	3
ANTH 499	Internship ¹	3-4
CRMJ 280 & 280L	Crime Scene Processing and Crime Scene Processing Laboratory	3
Select 6 credits of the following:		
ANTH 420 & 420L	Field Methods in Archaeology and Field Methods in Archaeology Laboratory	6
BIOL 217 & 217L	Forensic Entomology and Forensic Entomology Laboratory	
BIOL 410 & 410L	Human Osteology and Human Osteology Laboratory ²	
Total Semester Credit Hours		21-23

¹ The number of internship credits will be determined by whether the student takes ANTH 231/ANTH 231L (4cr) or ANTH 270/ANTH 270L (3cr). Either way, the student will take sufficient internship credits to bring the total of required course credits to 22.

² These courses have prerequisite courses not required for this minor. Refer to course information for more details.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards

a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Forensic Investigation - Psychology

(See [Psychology](#) (p. 645))

Forensic Science

Program Description

Forensic science is a growing professional field throughout the United States. Forensic science is the interface between analytical science and the law. Students with a minor in forensic science can seek employment with Colorado Bureau of Investigation (CBI) and other employers conducting forensic investigations, or they may continue their education by seeking a master's degree in forensic science at another institution. The minor is best suited for students majoring in biology or chemistry. It will enhance students' skills in the molecular biology, analytical chemistry and criminologist techniques used in forensic investigations.

About This Minor. . .

Forensic science is a growing professional field throughout the United States. Forensic science is the interface between analytical science and the law. Students with a minor in Forensic science can seek employment with CBI and other employers conducting forensic investigations, or they may continue their education by seeking a Master's degree in Forensic science at another institution. The minor is best suited for students majoring in Biology or Chemistry. The minor will enhance students'

skills in the molecular biology, analytical chemistry, and criminalistic techniques used in forensic investigations.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24-26 semester hours)

Code	Title	Semester Credit Hours
CHEM 301 & 301L	Analytical Chemistry and Analytical Chemistry Laboratory	4
BIOL 301 & 301L	Principles of Genetics and Principles of Genetics Laboratory	4
CHEM 315	Biochemistry I	3
CHEM 317L	Biochemistry Laboratory	1
ANTH 270 & 270L	Death and Forensic Science and Death and Forensic Science Laboratory	3

ANTH 478	Professional Issues in Forensic Science	3
Complete two of the following options:		6-8
BIOL 209 & 209L	Human Anatomy and Physiology and Human Anatomy and Physiology Laboratory	
BIOL 217 & 217L	Forensic Entomology and Forensic Entomology Laboratory	
BIOL 344 & 344L	Forensic Molecular Biology and Forensic Molecular Biology Laboratory	
BIOL 410 & 410L	Human Osteology and Human Osteology Laboratory	
BIOL 442	Pharmacology	
CHEM 431 & 431L	Instrumental Analysis and Instrumental Analysis Laboratory	
CRMJ 280 & 280L	Crime Scene Processing and Crime Scene Processing Laboratory	
Total Semester Credit Hours		24-26

Lectures and coordinating labs must be taken together for credit towards graduation.

Geographic Information Science and Technology Program Description

Colorado Mesa University offers a certificate and a minor in Geographic Information Science and Technology. The courses are open to all students interested in broadening their knowledge and enhancing job-related skills in a rapidly expanding market of computer-based technology. The multidisciplinary nature of geographic information science and technology allows students from a wide variety of fields to participate in this exciting program.

There is a strong demand for people who are trained in geographic information science and technology and this certificate assists students in securing jobs in this rapidly growing field. GIS/GPS can be used for cartography, geology, business, biology, environmental science, history, archaeology and criminal justice.

Geographic Information Science and Technology (Minor)

Minor: Geographic Information Science and Technology
Program Code: M752

About This Minor. . .

The Physical and Environmental Sciences (PES) Department at Colorado Mesa University offers a minor in Geographic Information Science and Technology. The courses are open to all students interested in broadening their knowledge and enhancing job-related skills in a rapidly expanding market of computer-based technology. The multidisciplinary nature of the Geographic Information science and technology allows students from a wide variety of fields to participate in this exciting program.

Geographic Information Science and Technology includes Geographic Information Systems, Global Positioning Systems, and Remote Sensing. A geographic information system (GIS) is a computer-based tool for mapping and analyzing geospatial data. GIS technology is a subset of information systems where the databases consists of features, activities, or events that are definable in space as points, lines, or areas.

GPS (Global Positioning System) is a satellite system that allows users to collect precise geographic data for use in mapping. Remote sensing refers to any technique whereby information about objects and the environment is obtained from a distance, such as from aircraft or satellites. Remote sensing often permits us to greatly expand our spectral view of the earth and "see" the world much more clearly than we can with the unaided eye.

Demand is strong for people who are trained in Geographic Information Science and Technology. This minor will assist students in securing jobs in this rapidly growing field. GIS/GPS can be used for cartography, business, biology, geology, environmental science, history, archeology, and criminal justice.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(16-18 semester hours)

16-18 semester hours for the Minor in Geographic Information Science and Technology.

Code	Title	Semester Credit Hours
Select one of the following courses:		
GIST 305	Cartography for GIS	1-3
GEOG 131	Introduction to Cartography	
GIST 332	Introduction to Geographic Information Systems	2
GIST 332L	Introduction to Geographic Information Systems Laboratory	1
GIST 422	GIS Data Management and Editing	2
GIST 422L	GIS Data Management and Editing Laboratory	1

GIST 432	Spatial Analysis and Modeling in GIS	2
GIST 432L	Spatial Analysis and Modeling in GIS Laboratory	1
Select a minimum of six semester hours of the following:		6
CIVE 212	Introduction to Geomatics	
CSCI 110	Beginning Programming	
GIST 321	Introduction to Remote Sensing	
GIST 321L	Introduction to Remote Sensing Laboratory	
GEOG 341	GIS for Social Scientists	
GEOG 341L	GIS for Social Scientists Lab	
GIST 375	Global Positioning Systems for GIS	
GIST 375L	Global Positioning Systems for GIS Laboratory	
XXXX 395	Independent Study ¹	
XXXX 495	Independent Study ¹	
XXXX 497	Independent Study ¹	
Total Semester Credit Hours		16-18

¹ Must have a GIS focus and be approved by the GIS program advisor.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Geographic Information Science and Technology (Professional Certificate)

Award: Professional Certificate

Program of Study: Geographic Information Science and Technology

Program Code: 1770

About This Program . . .

The Physical and Environmental Sciences (PES) Department at Colorado Mesa University offers a certificate in Geographic Information Science and Technology. The courses are open to all students interested in broadening their knowledge and enhancing job-related skills in a rapidly expanding market of computer-based technology. The multidisciplinary

nature of the geographic information science and technology allows students from a wide variety of fields to participate in this exciting program.

Geographic Information Science and Technology includes Geographic Information Systems, Global Positioning Systems, and Remote Sensing. A geographic information system (GIS) is a computer-based tool for mapping and analyzing geospatial data. GIS technology is a special case of information systems where the database consists of features, activities, or events that are definable in space as points, lines, or areas.

GPS (Global Positioning System) is a satellite system that allows users to collect precise geographic data for use in mapping. Remote sensing refers to any technique whereby information about objects and the environment is obtained from a distance such as aircraft or satellites. The remote sensing often permits us to greatly expand our spectral view of the earth and "see" the world much more clearly than we can with the unaided eye.

Demand is strong for people who are trained in Geographic Information Science and Technology. This certificate will assist students in securing jobs in this rapidly growing field. GIS/GPS can be used for cartography, business, biology, geology, environmental science, history, archeology, and criminal justice.

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(16-18 semester hours)

Code	Title	Semester Credit Hours
Select one of the following courses:		
GIST 305	Cartography for GIS	1-3
GEOG 131	Introduction to Cartography	
GIST 332 & 332L	Introduction to Geographic Information Systems and Introduction to Geographic Information Systems Laboratory	3
GIST 422 & 422L	GIS Data Management and Editing and GIS Data Management and Editing Laboratory	3
GIST 432 & 432L	Spatial Analysis and Modeling in GIS and Spatial Analysis and Modeling in GIS Laboratory	3
Select a minimum of six semester hours of the following:		
CIVE 212	Introduction to Geomatics	6
CSCI 110	Beginning Programming	
GEOG 341 & 341L	GIS for Social Scientists and GIS for Social Scientists Lab	
GIST 321 & 321L	Introduction to Remote Sensing and Introduction to Remote Sensing Laboratory	
GIST 375 & 375L	Global Positioning Systems for GIS and Global Positioning Systems for GIS Laboratory	
XXXX 395	Independent Study ¹	
XXXX 495	Independent Study ¹	
XXXX 497	Practicum ¹	
Total Semester Credit Hours		16-18

¹ Must have a GIS focus and be approved by the GIS program advisor.

Suggested Course Plan

First Year		Semester Credit Hours
Fall Semester		
GEOG 131 or GIST 305	Introduction to Cartography or Cartography for GIS	1-3
GIST 332 & 332L	Introduction to Geographic Information Systems and Introduction to Geographic Information Systems Laboratory ¹	3
Semester Credit Hours		4-6
Spring Semester		
GIST 422 & 422L	GIS Data Management and Editing and GIS Data Management and Editing Laboratory	3
3 credit hours of any restricted elective		3
Semester Credit Hours		6

Second Year

Fall Semester

GIST 432 & 432L	Spatial Analysis and Modeling in GIS and Spatial Analysis and Modeling in GIS Laboratory	3
Select 3 credit hours from the following restricted elective		3
CIVE 212	Introduction to Geomatics	
CSCI 110	Beginning Programming	
GIST 321	Introduction to Remote Sensing	
GIST 321L	Introduction to Remote Sensing Laboratory	
GIST 375	Global Positioning Systems for GIS	
GIST 375L	Global Positioning Systems for GIS Laboratory	
Semester Credit Hours		6
Total Semester Credit Hours		16-18

¹ Either GEOG 131 or GIST 305 can be prerequisite or co-requisite

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Geosciences

Program Description

The Department of Physical and Environmental Sciences offers three concentrations and three minors within Geosciences.

Geoscience instruction takes place in a state-of-the-art science complex, which houses several instructional laboratories, a projects room, a computer applications laboratory, a petrology-mineralogy laboratory, rock storage facilities and a sample preparation room.

Most classes have a strong field component so that students experience the diverse geological setting of the Grand Junction area. Equipment available includes a computer-assisted X-ray diffractometer, an X-ray fluorescence spectrometer, research petrographic microscopes, binocular microscopes, GPS units, a seismometer and a magnetometer. Computer facilities include modern PC systems with software basics for communications, database management, word-processing, and geographic information systems (GIS).

Geology

The geology concentration is designed for students who: (1) desire a strong liberal arts education with emphasis on the earth sciences, (2) wish to pursue a graduate degree in geology, or (3) desire a professional or technical geoscience career. Recent graduates are attending graduate programs at major universities or have entered the work force as geological technicians or professional geologists.

Environmental Geology

The environmental geology concentration is designed for students who: (1) desire a strong liberal arts education with emphasis on environmental issues within the earth sciences, (2) wish to pursue a graduate degree in environmental geology, or (3) desire a professional or technical career. The environmental geology concentration has the same basic framework as the geology concentration, but has a stronger emphasis on ground-water and surface-water hydrology, and low-temperature geochemistry. Recent graduates are attending graduate programs at major universities or have entered the work force as geological technicians or professional geologists.

Geology–Secondary Education

The geology secondary education licensure concentration is structured for graduates to pursue teaching careers at the middle or high school level. The basic curriculum includes all of the major topics within a traditional geology program while also incorporating teacher education courses required for licensure by the state of Colorado.

A minimum of 75 credit hours of essential learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply to the Center for Teacher Education secondary licensure program. Please contact the Center for Teacher Education for further information on admissions criteria.

Geology Minor

The geology minor is designed for students who wish to take additional basic geology courses in support of their degree aspirations in other areas. A geology minor can be a valuable complement to majors in the other science disciplines and archaeology.

Watershed Science Minor

Many geology students complete the [Watershed Science](#) (p. 747) minor, which prepares them to serve the regional need for scientists with a strong background in water-related issues.

Geographic Information Systems and Technology Minor and Certificate

Many geoscientists use geographic information systems in their work. Students can learn this technology by pursuing the minor or certificate in [Geographic Information Systems and Technology](#) (p. 404).

Environmental Geology, Geosciences (BS)

Degree: Bachelor of Science
Major: Geosciences
Concentration: Environmental Geology
Program Major Code: 3473

About This Major . . .

The Bachelor of Science degree with a major in Geosciences and a concentration in Environmental Geology is designed for students who (1) desire a strong liberal arts education with emphasis on environmental issues within the earth sciences, (2) wish to pursue a graduate degree in environmental geology, or (3) desire a professional or technical geoscience career. The Environmental Geology option has the same basic framework as the Geology concentration with a stronger emphasis on geologic hazards, ground-water and surface-water hydrology, biological systems, and environmental science. Recent graduates are attending graduate programs at major universities or have entered the work force as geological technicians or professional geologists.

Most classes have a strong field component so that students benefit from the diverse geological setting of the Grand Junction area. Equipment available includes hydrologic research equipment such as flow meters, stream tables, surveying equipment, and GPS units. Students engage in a capstone research project/thesis during their senior year that involves independent research and the completion of a professional report and presentation. This capstone experience develops

professional skills and provides students with a portfolio of their work for future employers or graduate schools.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Complete a comprehensive assessment exam that draws on current research, scholarship and/or techniques, as well as specialized geoscience knowledge at both the beginner and advanced levels. (Specialized Knowledge/Applied Learning)
- Analyze data critically, reason logically, apply quantitative analysis methods correctly to geological data, and develop appropriate conclusions. (Quantitative Fluency)
- Make and defend assertions about a geoscience-related topic in an extended well-organized document and an oral presentation that is appropriate to the geosciences community. (Communication Fluency)
- Describe reasoned conclusions that articulate the implications and consequences of a geologic map by synthesizing geological field information using standard data collection methodologies. (Critical Thinking)
- Reflect on and respond to ethical responsibilities required during intensive, collaborative group work in the geosciences. (Personal and Social Responsibility)
- Find relevant sources of geological information, evaluate information critically, and apply the information appropriately and effectively to specific purposes typical of the geosciences. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
