- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.

- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are

responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Geology, Geosciences (BS)

Degree: Bachelor of Science

Major: Geosciences

Concentration: Geology

Program Code: 3472

About This Major . . .

The Bachelor of Science degree with a major in Geosciences and a concentration in Geology is designed for students who (1) desire a strong liberal arts education with emphasis on the earth sciences, (2) wish to pursue a graduate degree in geology, or (3) desire a professional or technical geoscience career.

Recent graduates are attending graduate programs at major universities or have entered the work force as geological technicians or professional geologists. Instruction takes place in a state-of-the-art science complex, which houses several instructional laboratories, a projects room, computer-applications laboratory, petrology-mineralogy laboratory, rock-storage facilities, and a sample preparation room.

Most classes have a strong field component so that students benefit from the diverse geological setting of the Grand Junction area. Equipment includes research petrographic microscopes, binocular microscopes, x-ray diffractometer, x-ray fluorescence, GPS units, local seismic network, and a magnetometer. Computer facilities include PC systems with software for communications, database management, word-processing, geographical information systems (GIS), and geostatistics.

Students engage in a capstone research project/thesis during their senior year that involves independent research and the completion of a professional report and presentation. Students develop professional skills and complete a portfolio of their work for future employers or graduate schools.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Complete a comprehensive assessment exam that draws on current research, scholarship and/or techniques, as well as specialized geology knowledge at both the beginner and advanced levels. (Specialized Knowledge/Applied Learning)
- Analyze data critically, reason logically, and apply quantitative analysis methods correctly to geological data to develop appropriate conclusions. (Quantitative Fluency)
- Make and defend assertions about geological hypotheses in an extended well-organized document and an oral presentation. (Communication Fluency)
- Describe reasoned conclusions that articulate the implications and consequences for a particular decision by synthesizing geological information and geology methodologies. (Critical Thinking)
- Reflect on and respond to ethical and environmental challenges at local, national, and/or global levels. (Personal and Social Responsibility)
- Find relevant sources of geological information, evaluate information critically, and apply the information appropriately and effectively to geologic problems. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.

- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Education: Secondary Education, Geosciences (BS)

Degree: Bachelor of Science
Major: Geosciences
Concentration: Secondary Education
Program Code: 3474

About This Major . . .

The Geosciences secondary licensure degree is structured for graduates to pursue teaching careers at the middle or high school level. The basic curriculum includes all of the major topics within a traditional geology program while also incorporating teacher education courses required for licensure by the state of Colorado. The degree plan includes basic chemistry, physics, and biology. Instruction takes place in a state of the art science complex on campus which houses several instructional laboratories, projects rooms, a computer applications lab, petrology-mineralogy lab, and rock storage facilities. Most classes include a strong field component, allowing students to take advantage of the diverse geological setting of the Grand Junction area. Students have access to department equipment that includes research petrographic microscopes, binocular microscopes, a computer-assisted x-ray diffractometer, scanning electron microscopes, GPS units, short- and long-period seismometers, and a magnetometer.

The secondary licensure program provides teacher education candidates with broad content knowledge in science and prepares them as teachers for grades 7 through 12. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115, What It Means to be an Educator, and EDUC 215, Teaching as a Profession, must be taken before applying to the program.

Important information about this degree:

- 2.80 cumulative GPA or higher in all CMU coursework.
- 2.80 cumulative GPA or higher in coursework toward the major content area.
- A "C" or higher is required in all major and foundation courses.
- All EDUC prefix courses must be completed with a grade of "B" or better.

- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Geosciences Outcome 1: Articulate the fundamental knowledge base and ideas of the major fields of geoscience. (Specialized Knowledge)
- Geosciences Outcome 2: Collect and interpret geoscience field data. (Applied Learning/Critical Thinking)
- Geosciences Outcome 3: Collect and interpret geoscience laboratory data. (Applied Learning/Critical Thinking)
- Geosciences Outcome 4: Use technology (e.g. computer software) for evaluating quantitative geoscience data. (Quantitative Fluency)
- Geosciences Outcome 5: Write an effective report on a geoscience study. (Communication Fluency)
- Geosciences Outcome 6: Give an effective oral presentation on a geoscience study. (Communication Fluency)
- Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 126 semester hours required for the BS in Geosciences, Secondary Education.
- 2.80 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTC01	3
ENGL 112	English Composition II-GTC02	3

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Geology, Liberal Arts (AS)

Degree: Associate of Science
Major: Liberal Arts
Emphasis: Geology
Program Code: 2431

About This Major . . .

The Associate of Science (AS) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AS is the appropriate choice for students who will take upper division coursework in mathematics, biological sciences, and physical sciences. The degree program includes the Colorado Statewide Essential Learning Core and meets the lower division Essential Learning requirements at most public institutions in Colorado. A number of emphases are available

within the AS degree. Students choosing one of these emphases will take courses in a discipline in addition to the Essential Learning core.

An Associate of Science (AS) degree with a geology emphasis is offered through the Physical and Environmental Sciences Department. This degree prepares students for employment as geological technicians in government and industry, or for entrance into the geology baccalaureate program at Colorado Mesa University or other four-year institutions. The curriculum includes basic courses in geology as well as Essential Learning courses. All of the geology courses place emphasis on the spectacular geologic features in western Colorado and eastern Utah.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Articulate the fundamental knowledge base and ideas of the major fields of geoscience. (Specialized Knowledge)
- Collect and interpret geoscience field data. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Geology (Minor)

Minor: Geology
Program Code: M420

About This Minor. . .

The Geology Minor is designed for students who wish to take additional basic geology courses in support of their degree aspirations in other areas. A total of 21 geology credit hours are required. Most classes have a strong field component so that students can enjoy the diverse geological setting of the Grand Junction area. Laboratory work takes place in a state-of-the-art science complex.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Total Semester Credit Hours		21

¹ Either GEOL 111/GEOL 111L or GEOL 113/GEOL 113L may be taken for credit, but not both.

² Either GEOL 204 or GEOL 250 may be taken for credit, but not both.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Watershed Science (Minor)

Minor: Watershed Science
Program Code: M470

About This Minor. . .

The minor in watershed science is an interdisciplinary program designed to serve the regional need for scientists with a strong background in water-related issues (e.g., Bureau of Land Management, U.S. Geological Survey, U.S. Forest Service, U.S. Fish and Wildlife Service, and the Colorado Division of Wildlife). Some government agencies, such as the U.S. Forest Service, are shifting their management organization to focus on watersheds, and this minor supports needs in this area.

The minor will complement majors in Physical and Environmental Science and Biology by providing students in these (or related) fields focused coursework on the three critical components of watershed science: surface water, groundwater, and water chemistry. Combined with the relevant B.S., plus additional calculus and physics courses, the minor satisfies the federal government's requirements for qualification as a "hydrologist." The proximity of Colorado Mesa University to the Colorado, Gunnison, and Green Rivers, the drainages of the Colorado National Monument, and the high arroyos create an ideal location for the study of watershed science.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(18 semester hours)

Code	Title	Semester Credit Hours
GEOL 414 & 414L	Hydrology and River Dynamics and Hydrology and River Dynamics Laboratory	4
GEOL 415 & 415L	Introduction to Ground Water and Introduction to Ground Water Laboratory	4
ENVS 331 & 331L	Water Quality and Water Quality Laboratory	4
Choose six semester hours (minimum) from the list below:		6
BIOL 414 & 414L	Freshwater Ecology and Freshwater Ecology Laboratory

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Gerontology Program Description

The Gerontology program focuses on the psychological and social impact of aging. It provides theoretical and practical experiences of human services, policies and programs related to the aging population and the aging brain for the student to gain access to entry level positions in the field. The program provides a variety of subjects in community activities, cognitive behavior of the elderly, Alzheimer's and end-of-life care. Graduates of this program may find careers in social services, community services for the elderly, housing authorities, nursing homes, private home care programs and other public agencies.

Gerontology Specialist (AAS)

Degree: Associate of Applied Science
Major: Gerontology Specialist

Program Code: 1305

About This Major...

The Gerontology program is for individuals who wish to develop careers in the field of aging, those already employed or active in gerontology or related fields who wish to enhance their career paths, and those seeking challenging and meaningful career changes in response to new opportunities created by an aging society.

The coursework for the AAS Degree, provides a foundation for gerontology knowledge and application with a biopsychosocial perspective on the aging process. It focuses on preparation for positions in organizations that provide services, care, and programs for senior adults; though typically, another degree or additional education/experience is warranted for such positions. It also provides applicable learning and relevancy as an additional degree, valuable to Health Science and Social/Behavioral Science majors who want to specialize in working with the elderly population.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply biopsychosocial gerontological knowledge to case studies and real-life situations involving older persons. (Specialized Knowledge/Applied Learning)
- Present and explain effective interventions, practices, or activities promoting an older person's strengths and adaptations to maximize well-being, health and mental health. (Communication Fluency)
- Critically evaluate arguments regarding issues and controversies within the field of aging and present a position, supporting it with evidence. (Critical Thinking)
- Associate social conditions in the current and recent past with their potential impact on future aging cohorts. (Personal and Social Responsibility)
- Evaluate the impact of diversity in terms of race, gender, ethnicity, religion, and citizenship on aging outcomes nationally and globally, citing sources of information. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 63 semester hours total for the AAS, Gerontology Specialist.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Behavioral and Cognitive Care, Gerontology (Technical Certificate)

Award: Technical Certificate

Program of Study: Gerontology

Specialization: Behavioral and Cognitive Care

Program Code: 1165

About This Program . . .

The Gerontology program is for individuals who wish to develop careers in the field of aging, those already employed or active in gerontology or related fields who wish to enhance their career paths, and those seeking challenging and meaningful career changes in response to new opportunities created by an aging society.

The coursework for this Technical Certificate provides an emphasis on gaining gerontology knowledge and application pertaining to the aging mind, dementia care, and mental health of older adults. It also provides applicable learning and relevancy as an additional certificate, valuable to Health Science and Social/Behavioral Science majors who want to specialize in working with the elderly population.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Discuss and synthesize the aging process from a biological, psychological, and sociological perspective to build a foundation of gerontology knowledge. (Specialized Knowledge/Applied Learning)
- Critically evaluate arguments regarding issues and controversies within the field of aging and present a position, supporting it with evidence. (Critical Thinking)
- Present and explain effective interventions, practices, or activities promoting an older persons' strengths and adaptations to maximize well-being, health and mental health. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course

sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Graphic Design

Program Description

The Bachelor of Fine Arts degree with a Graphic Design: Visual Design major focuses on design as a professional craft and as a vehicle for communication and connecting with society. Students learn to see design as a visual language and force for cultural change within our world by giving them the tools to enhance the visual experience of the public. Course work includes color theory, drawing, traditional illustration, digital illustration, composition, typography, letterpress, identity design, web design and UX Design. All course work focuses on the best practices for designers to meet the needs of the profession. The degree concludes with a portfolio development course and the successful degree candidate is prepared to enter professions within graphic design including advertising, branding, packaging design, identity design, illustration, digital design, web design and a myriad of related fields.

Transfer students, like all students pursuing a degree in Graphic Design, are expected to complete and pass a Sophomore Review before being

formally admitted into the program. Admission in the program will be contingent upon the student satisfying the following requirements: (a) Completion of the Graphic Design Admission Application Form; (b) Coursework at CMU in or transfer credits equivalent to ARTE 101 Two-Dimensional Design, ARTE 102 Three-Dimensional Design, ARTS 151 Foundation Drawing I, ARTG 215 Graphic Design I, and ARTG 221 Graphic Design II, with a grade of B or A in each course; (c) Successful completion of the Graphic Design Entrance Exam with a minimum score of 80%; and (d) a Portfolio Review comprised of Graphic Design work showing competency in 200-Level graphic design, typography and layout skills.

The graphic design minor acquaints students with some of the core elements related to the study and profession of graphic design. Courses will consist of both academic lecture and practical studio. This minor provides students an opportunity to integrate personal creativity with any specified major degree. A background in graphic design can promote a variety of professional opportunities including areas of applied design, public relations, business graphics, product design, marketing and advertising.

Please see a faculty advisor and the programs listed in the Programs of Study tab for program requirement details.

Visual Design, Graphic Design (BFA)

Degree: Bachelor of Fine Arts
Major: Graphic Design
Concentration: Visual Design
Program Code: 3274

About This Major . . .

The Graphic Design–Visual Design concentration focuses on current and professional industry standards within graphic design. Our degree is illustration-based and combines traditional hands-on media with the digital. The program, like the professional world is a fast-paced environment that mimics real-world design studios. Students will learn traditional layout design, composition, screenprinting, drawing, graphic design art history, CNC routing all as it applies to design. These areas are all combined with conceptual skills to make graduates in the area marketable. Entry in the program is contingent upon the successful completion of a portfolio review and exam during the sophomore year. A portfolio capstone course prepares students upon graduation for employment with a portfolio designed to gain employment. The program boasts two Graphic Design computer labs each furnished with Apple computers and the latest graphic design application software. Students can be a part of a community of student designers involved in a graphic design activities and field trips locally, nationally and abroad.

Entering students are encouraged to pay close attention to course sequencing and consult their advisor in order to complete the degree in

four years. The successful Graphic Design degree candidate is prepared to enter professions within graphic design including advertising design, web design, package design, illustration, marketing and a myriad of related fields.

Important information about this program:

- No more than 6 semester hours of independent study courses can be used toward the degree.
- KINA Activity courses can NOT be used to fulfill general elective credit requirements.
- In an effort to meet industry standards, Macintosh computers are used exclusively in all computer-based ARTG courses. Majors are strongly advised to consider purchasing a Macintosh and related print and web publication software for personal use.
- ARTG 300-level courses and ARTG 400-level courses may be taken upon acceptance into the Graphic Design Program.
- Admission in the program after the sophomore year will be contingent upon the student's satisfying the following requirements:
 - Completion of Graphic Design Admission Application Form.
 - Completion of ARTE 101 Two-Dimensional Design, ARTE 102 Three-Dimensional Design, ARTG 215 Graphic Design I, ARTG 221 Graphic Design II, and ARTG 222 Illustration I with a grade of B or A.
 - A grade of B or A in all coursework in the major.
 - Successful completion of the Graphic Design entrance exam with a minimum score of 80%.
 - Portfolio Review comprised of Graphic Design work that meets the established Portfolio Review Criteria.
 - Transfer students must pass the Portfolio Review and entrance exam to be formally accepted into the Graphic Design Program.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Interpret and apply formal elements and principles of design. (Specialized Knowledge)
- Demonstrate proper use of tools, materials, techniques, and proper use and care for equipment through quality craftsmanship. (Applied Learning)
- Generate individual response through concept and relevant sources of information to create personal content. (Communication Fluency and Information Literacy)
- Communicate clearly regarding the critical analysis of art and design both historical and contemporary. (Critical Thinking/ Communication Fluency)
- Reflect on and respond to ethical, social, civil, and/or environmental challenges as they relate to art, design, and new media. (Personal and Social Responsibility)
- Design and publish a professional portfolio that meets current industry standards. (Applied Learning)
- Demonstrate technical, aesthetic, and conceptual decisions based on the application of the design process. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTCO1	3

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated

requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Graphic Design (Minor)

Minor: Graphic Design
Program Code: M201

About This Minor. . .

The Graphic Design Minor will acquaint students with some of the core elements related to the study and profession of Graphic Design. Courses will consist of both academic lecture and practical studio-based media. This minor provides students an opportunity to integrate personal creativity with any specified major degree. A background in Graphic Design can promote a variety of professional opportunities including areas of applied design, public relations, business graphics, product design, marketing, museum work and/or advertising.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or

"Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24 semester hours, must pass all courses with a grade of "B" or better.)

- In an effort to meet industry standards, Macintosh computers are used exclusively in all computer-based ARTG courses. Majors are strongly advised to consider purchasing a Macintosh and related publication software for personal use.
- Graphic Design majors are required to complete a formal Portfolio Review before being admitted to 300 level Graphic Design courses.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Heating, Ventilation, and Air Condition (HVAC)

Overview

Program Description

The Heating, Ventilation, and Air Conditioning Program prepares the student with entry-level skills required by employers in this industry.

It is industry-focused, with the student having the opportunity to earn their EPA section 608 certification, NATE (North American Technical Excellence) certification, plus many specialized certifications from ESCO (Energy Service Company). ESCO exams are supported by the Refrigeration Service Engineers Society (RSES), Air Conditioning Contractors of America (ACCA), Gas Appliance Manufacturer's Association (GAMA), Plumbing, Heating and Cooling Contractors Association (PHCC), Heating, Air Conditioning & Refrigeration Distributors International (HARDI) and the Air Conditioning, Heating & Refrigeration Institute (AHRI).

The Heating focus of the program consists of education in job safety, soldering and brazing, basic electricity, forced air gas furnace service, hydronic service, airflow problems, duct sizing, and troubleshooting gas-fired equipment. Performance testing after repairs is emphasized. State-of-the-art Simutech computer simulation programs are used along with live equipment in the lab.

The Air Conditioning focus of the program consists of basic refrigeration, refrigerant recovery training, principles of A/C operation, heat pumps, further airflow problems, analysis, and troubleshooting of the total system. Performance testing after repairs is emphasized. State-of-the-art Simutech computer simulation programs are used along with live equipment in the lab.

Important information about this program:

- EPA certification is part of this program and students will be required to pay the examination fee.
- NATE and ESCO certifications are optional and will have additional examination costs.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate professional behavior and communication skills including listening, speaking, and writing specifically to the HVAC industry. (Communication Fluency)
- Demonstrate safe work habits in the performance of tasks in the HVAC industry. (Specialized Knowledge, Applied Learning)
- Demonstrate professional and ethical behavior, and workplace responsibility as a HVAC repair technician. (Personal and Social Responsibility)
- Demonstrate basic troubleshooting skills and repair skills to fulfill the requirements of HVAC service and repair technicians. (Critical Thinking)
- Utilize mathematical concepts to analyze and implement troubleshooting systems including systems containing hardware and software components of HVAC systems. (Quantitative Fluency)

Heating, Ventilation, and Air Conditioning Technician (AAS)

Overview

Degree: Associate of Applied Science
Major: Heating, Ventilation, and Air Conditioning
Program Code: 1388

About This Major . . .

The Heating, Ventilation, and Air Conditioning Program prepares the student with entry-level skills required by employers in this industry.

It is industry focused, with the student having the opportunity to earn their EPA certification, plus ICE certification (Industry Competency Exams), administered by the Air Conditioning, Heating & Refrigeration Institute, located in Arlington, Virginia. ICE exams are supported by

the Refrigeration Service Engineers Society (RSES), Air Conditioning Contractors of America (ACCA), Gas Appliance Manufacturer's Association (GAMA), Plumbing, Heating and Cooling Contractors Association (PHCC), Heating, Air Conditioning & Refrigeration Distributors International (HARDI) and the Air Conditioning, Heating & Refrigeration Institute (AHRI).

The Heating focus of the program consists of education in job safety, soldering and brazing, basic electricity, forced air gas furnace service, hydronic service, air flow problems, duct sizing, and troubleshooting gas fired equipment. Performance testing after repairs is emphasized. State-of-the-art Simutech computer simulation programs are used along with live equipment in the lab.

The Air Conditioning focus of the program consists of basic refrigeration, refrigerant recovery training, principles of A/C operation, heat pumps, further air flow problems, analysis and troubleshooting the total system. Performance testing after repairs is emphasized. State-of-the-art Simutech computer simulation programs are used along with live equipment in the lab.

Important information about this program:

EPA certification is part of this program and students will be required to pay the examination fee.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate professional behavior and communication skills to include listening, speaking, and writing specific to the HVAC industry. (Communication Fluency)
- Demonstrate safe work habits in performance of tasks in the HVAC industry. (Specialized Knowledge, Applied Learning)
- Demonstrate professional and ethical behavior, and work place responsibility as a HVAC repair technician. \ (Personal and Social Responsibility)
- Demonstrate basic troubleshooting skills and repair skills to fulfill the requirements of HVAC service and repair technicians. (Critical Thinking)
- Utilize mathematical concepts to analyze and implement troubleshooting systems to include systems containing hardware and software components of HVAC systems. (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 61 semester hours required for AAS in Heating Ventilation and Air Conditioning Technician.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

HVAC: HVAC Fundamentals (Technical Certificate)

Overview

Award: Technical Certificate

Program of Study: Heating, Ventilation, and Air Conditioning

Specialization: HVAC Fundamentals

Program Code: 1161

About This Program . . .

The Heating, Ventilation, and Air Conditioning Program prepares the student with entry-level residential skills required by employers in this industry. This initial certificate concentrates on HVAC fundamentals and allows the student to begin working in the HVAC industry as an apprentice as well as scaffolding into the HVAC AAS Degree option.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate safe work habits in performance of tasks in the HVAC industry. (Specialized Knowledge)
- Identify and explain basic HVAC Fundamentals used in troubleshooting repair scenarios. (Specialized Knowledge, Critical Thinking)
- Demonstrate professional behavior and communication skills to include listening, speaking, and writing specific to the HVAC industry. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Institutional Degree Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.

- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

History

Program Description

The study of history provides students with vital skills in critical thinking; oral and written presentation of ideas; an understanding of cause and effect relationships; and historical context to assess contemporary issues. Graduates of the History program come prepared to enter the workforce in a variety of areas.

History majors work closely with their advisor to create a program that balances upper-division course offerings in U.S., European, and World History, where students learn to make thematic connections across time and varied cultures. Our graduates take numerous paths to law or graduate school, as well as careers in education, library sciences, archival management, journalism/mass media, politics, non-profit work, and government. Some recent graduates have gone on to attend law or graduate school at Colorado State University, University of Denver, University of Oregon, and Rutgers University. Internship opportunities allow our students to participate in experiential learning while continuing to take classes. Recent interns have worked at the Museum of the West, Tomlinson Library Special Collections, Palisade Historical Society, the Atomic Legacy Cabin, and as student interns in all of the middle and high schools of District 51. Many former students received offers of employment following successful experiences within their internship. History majors can also gain leadership experience serving in an advisory role in Phi Alpha Theta, the national history honors society.

There are numerous program options students from which students can select including history, history/secondary education, and minors in history and public history. The Center for Teacher Education offers

a comprehensive program of study that leads to licensure in Colorado. Faculty offer one-on-one guidance for course selection, field placements, student teaching and employment. Students accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. The Public History minor incorporates classes that prepare students for the professional skills needed in museum management and curatorial work including the study of material culture, leadership and professionalism, and proper preservation of archival collections.

History (BA)

Degree: Bachelor of Arts
Major: History
Program Code: 3716

About This Major . . .

The study of history prepares the student for understanding present society and culture through a study of the past. The history program familiarizes students with the great historical civilizations and issues that have shaped our present world. History teaches students how to critically analyze information and make a compelling argument; skills that everyone needs to be successful in all their endeavors. Internships are available through museums, historical societies and public agencies. CMU history graduates pursue careers in teaching and public history, as well as private employment, and have also been very successful in gaining entrance to graduate study and law school.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Formulate the relationships of cause and effect. (Specialized Knowledge/Applied Learning);
- Assess the importance of historical context.(Specialized Knowledge/Applied Learning);
- Critically analyze an argument based on secondary sources. (Critical Thinking);
- Critically analyze primary sources. (Critical Thinking);

- e. Formulate a clear and persuasive argument based on evidence. (Communication Fluency);
- f. Construct a clear thesis with strong topic sentences. (Communication Fluency).
- g. Evaluate how local, national, or global societies have responded to ethical, social, civic, and/or environmental changes in the historical past. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- A grade of "C" or better must be earned in all required courses, unless otherwise stated.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Secondary Education, History (BA)

Degree: Bachelor of Arts

Major: History

Concentration: Secondary Education

Program Code: 3704

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The secondary licensure program provides teacher education candidates with broad content knowledge in history and prepares them as teachers for grades 7 through 12. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information about this program:

- 2.80 cumulative GPA or higher in all CMU coursework.
- 2.80 cumulative GPA or higher in coursework toward the major content area.
- A grade of "C" or better must be earned in all required courses, unless otherwise stated.

- All EDUC prefix courses must be completed with a grade of "B" or better.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- History Outcome 1: Formulate the relationships of cause and effect. (Specialized Knowledge/Applied Learning)
- History Outcome 2: Assess the importance of historical context. (Specialized Knowledge/Applied Learning)
- History Outcome 3: Critically analyze an argument based on secondary sources. (Critical Thinking)
- History Outcome 4: Critically analyze primary sources. (Critical Thinking)
- History Outcome 5: Formulate a clear and persuasive argument based on evidence. (Communication Fluency)
- History Outcome 6: Construct a clear thesis with strong topic sentences. (Communication Fluency)
- Evaluate how local, national, or global societies have responded to ethical, social, civic, and/or environmental changes in the historical past. (Personal and Social Responsibility)
- Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

History (Minor)

Minor: History
Program Code: M720

About This Minor. . .

The study of history prepares the student for understanding present society and culture through a study of the past. The history program familiarizes students with the great historical civilizations and issues that have shaped our present world. History teaches students how to critically analyze information and make a compelling argument; skills that everyone needs to be successful in all their endeavors. Internships are available through museums, historical societies, and public agencies.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Public History (Minor)

Minor: Public History

Program Code: M721

About This Minor. . .

The public history minor prepares students to use historical skills outside the classroom in positions such as museums, archives, historical societies, and public agencies.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Hospitality Management

Program Description

The Bachelor of Applied Science (BAS) in hospitality management combines the technical skills and business proficiency necessary for success. A unique program, the BAS degree allows students who have already earned an Associate of Applied Science (AAS) degree to build upon their technical specialties with essential learning courses and junior and senior level business courses. This allows associate degree holders to gain a four-year degree in approximately four additional full-time semesters, depending upon prior coursework. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen industries. Prospective students not holding an Associate of Applied Science degree can begin their university career at CMU in a chosen field of study with a two-year degree and then progress to a four-year degree using the BAS. This degree will provide students with upward mobility in their area of employment as they move into supervision/management positions.

Upon completion of the Associate of Applied Science (AAS) in hospitality management, students will be prepared for an entry-level position in the broad and expanding hospitality industry, as well as be prepared to pursue the Bachelor of Applied Science in hospitality management. Business courses to be taken include courses in marketing, promotion, management, accounting, finance, small business management and entrepreneurship.

The minor in hospitality management is designed to prepare students to enter the world of hospitality management. Coursework in the areas of marketing, management, and community tourism will provide students the basic skills needed in order to contribute more efficiently and effectively in the industry. For the student interested in the industry, a minor coupled with a bachelor's degree can increase the employment opportunities available in a variety of hospitality-related areas.

Hospitality Management (BAS)

Degree: Bachelor of Applied Science
Major: Hospitality Management
Program Code: 3163

About This Major . . .

The Bachelor of Applied Science in Hospitality Management combines the technical skills and business proficiency necessary for success in today's business world. A unique program, the B.A.S. allows students who have already earned an associate of applied science degree to build upon their technical specialties with Essential Learning courses and junior and senior level business courses. This allows associate of applied science degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework.

Business courses to be taken include courses in marketing, promotion, management, accounting, finance, small business management and entrepreneurship. Upon completion of the program, students will be technically and academically prepared for leadership positions in the hospitality industry. Potential employment opportunities with this 4-year degree include management in any of the following areas: resort and hotel management, food and beverage management, travel and tourism management, health care and education food service management, etc. With the ever expanding world hospitality market, this degree has endless opportunities.

Prospective students not holding an associate of applied science degree can begin their college career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the B.A.S. This degree will provide students with upward mobility in their area of employment as they move into supervision/management positions.

Important information about this program:

- Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution. Any exceptions to this must be approved in advance by the department BAS advisor and the academic department head. All students must meet with the BAS advisor to plan and schedule all classes.
- To be admitted to the BAS degree, certain prerequisites must be satisfied. Please see the Business department head for complete requirements and application form.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

Mission: As a student-focused teaching and research department, Colorado Mesa University's Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

Student Learning Outcomes:

- Apply business knowledge and skills in appropriate business contexts. (Critical Thinking)
- Analyze business issues critically utilizing quantitative research methodologies. (Quantitative Fluency)

- Analyze business issues critically utilizing qualitative research methodologies. (Quantitative Fluency)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience in writing. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Utilize relevant and critically evaluated information in the process of communicating clearly, appropriately, and accurately to the audience orally. (Communication Fluency, Information Literacy, Specialized Knowledge/Applied Learning)
- Differentiate various functions of teams within organizations. (Specialized Knowledge/Applied Learning)
- Demonstrate behaviors consistent with effective teamwork. (Specialized Knowledge/Applied Learning)
- Analyze an issue within an ethical framework. (Personal and Social Responsibility)
 - Recommend a solution based on an ethical framework. (Critical Thinking)
 - Engage in a local, regional, national, and/or international activity that positively impacts society. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree

Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Hospitality Management (AAS)

Degree: Associate of Applied Science

Major: Hospitality Management

Program Code: 1163

About This Major . . .

The field of Hospitality Management combines the technical skills and business proficiency necessary for success in today's business world. Business courses to be taken include courses in marketing, business law, business technology, management, accounting, finance, economics, and hospitality specific courses. Upon completion of the program, students will be prepared for an entry-level position in the broad and expanding hospitality industry, as well as prepared to continue for advanced study in the Bachelor of Applied Science in Hospitality Management.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize information on an assigned hospitality management topic. (Specialized Knowledge)
- Recognize mathematical concepts and methods in relation to hospitality management issues. (Quantitative Fluency)
- Communicate clearly and appropriately basic hospitality management information. (Communication Fluency)
- Describe beginning hospitality management concepts in appropriate business contexts. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course

sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 66 semester hours total for the AAS, Hospitality Management.

Essential Learning Requirements

(16 semester hours)

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24 semester hours)

Code	Title	Semester Credit Hours
HMGT 101	Travel Industry I	3
HMGT 200	Management and Supervisory Skills for the Hospitality Industry	3
HMGT 370	Managing Quality Service	3
HMGT 450	Strategic Hospitality Sales and Marketing	3
Select 12 semester hours from the following:		12
HMGT 350	Private and Commercial Recreation Systems	
HMGT 352	Public Recreation Systems	
HMGT 371	Events Management	
HMGT 410	Hospitality Facilities Management	
HMGT 470	Hospitality Management Strategies	
HMGT 299	Internship	
HMGT 499	Internship	
Additional courses may qualify in the elective category with permission of advisor

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Humanities

Program Description

The Humanities refer to disciplines that focus on the human condition, including the social and cultural relationships we form with others. In contrast to math and the natural sciences, which privilege empirical and quantitative methods to study society and the natural world, the humanities tend to use analytical, qualitative, and narrative approaches to understand our social, cultural, and personal contexts. After completing Essential Learning requirements, students will choose courses that help them explore how we understand and express ourselves, from Art, Dance, English, Graphic Arts, and Foreign Languages, to Literature, Mass Communication, Music, Philosophy, Speech, and Theater. The Associate of Arts (AA) degree can be a terminal degree or serve as a pathway to a baccalaureate degree in the humanities.

Associates

- [Humanities, Liberal Arts \(AA\)](#) (p. 452)

Humanities, Liberal Arts (AA)

Degree: Associate of Arts
Major: Liberal Arts
Emphasis: Humanities
Program Code: 2230

About This Major . . .

The Associate of Arts degree (AA) works in two ways: 1) it can function as a terminal degree; 2) it can function as a pathway into a baccalaureate degree in the humanities. The degree program meets the requirements of the Colorado Statewide Essential Learning Core. A student who is granted this degree can transfer to any institution in Colorado and graduate in a baccalaureate degree program by taking no more than 60 hours from that institution. The same applies for students who decide to move from the AA program into any Colorado Mesa BA program. A number of emphases are available within the AA degree. Students can build a course of study that focuses on their area of interest in the following disciplines: Creative Writing Fine and Performing Arts, Foreign Languages, Literature, Mass Communications, Philosophy and/or Speech.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Arts work.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Information and Communication Technology

Program Description

The Information and Communication Technology program will prepare you for a variety of specializations within the rapidly evolving Information and Communications Technology career field. The core of the program is the Cisco CCNA Networking series of classes. These classes are the best path to achieving a Cisco Certified Network Associate certification. In addition, the program emphasizes technologies that the entry-level employee will encounter: network hardware and software; business-class computer hardware and software; convergent data/voice/media communication hardware and software; internet of things hardware and software; 3D printing hardware and software; UAS (drones) and robotics (land drones) hardware; and software and management.

The curriculum is accredited, approved, and aligned with national and international certifications by major businesses and industries in the computing, networking, and ICT career fields.

Program Strengths:

- Modern labs using current technology, equipment, and software
- Coursework aligned with national and international industry certifications including Cisco, A+/N+, CET, and Convergence Technology Professional (CTP)
- Hands-on application-based curriculum

Students wishing to further their education with a four-year degree can do so seamlessly with a Bachelor of Applied Science in Computer Information Systems, as well as other select university programs.

Information and Communication Technology (AAS)

Degree: Associate of Applied Science
Major: Information and Communication Technology
Program Code: 1318

About This Major . . .

This program, Information and Communication Technology, prepares students for a variety of specializations within the rapidly evolving information and communications technology field. The core of the program is the Cisco Certified Network Associate (CCNA) series of classes. As computer network security has become a major focus in the industry, course content will reflect this emphasis. These classes are the best path to achieving Cisco and CompTia certifications.

It is designed to educate students in areas of business-class computer hardware and software, convergent data/voice/media communication hardware and software, computer network hardware and software, and the Internet of Things hardware and software. The program utilizes CISCO curriculum for most courses, including the core Cisco Certified Network Associate (CCNA) courses to prepare students for the certification exam.

Curriculum is accredited, approved and aligned with national and international certifications by major business and industry in the networking and ICT career fields.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication skills, listening, verbal, written, and electronic, needed for entry level information technology employment. (Communication Fluency)
- Apply mathematical concepts to meet information technology industry employment requirements. (Quantitative Fluency)

- Research, evaluate, synthesize and apply information/data relevant to information technology careers. (Critical Thinking)
- Demonstrate knowledge of terminology, symbols, business practices, and principles and application of information technology technical skills. (Specialized Knowledge/Applied Learning)
- Demonstrate ethical, civic, and work place responsibility as part of information technology professional behavior. (Specialized Knowledge)

Requirements

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 61 semester hours total for the AAS Information and Communication Technology.

Computer Repair, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate
 Program of Study: Information and Communication Technology
 Specialization: Computer Repair
 Program Code: 1144

About This Program . . .

Upon completion of the computer repair technician program, students will have the knowledge and skills to ensure the most secure and up-to-date IT infrastructure is in place for an organization or a client. Students will assemble and disassemble computers, manage the assessment, installation, maintenance, and repair of computers, utilizing networks as needed. A person in this role must be skilled in a variety of computer operating systems and utilize network functions. Computer repair technicians may work for an organization, specific clients, or a repair shop. The most common certifications for this skill level are the COMPTIA A+ and Network+ Certifications.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal and written, and electronic forms that are needed for information technology entry level employment. (Communication Fluency)
- Apply Mathematical concepts to meet information technology employment requirements. (Quantitative Fluency)
- Utilize terminology, symbols, business practices, and principles and application of associated technical information technology skills. (Specialized Knowledge and Applied Learning)
- Demonstrate ethical, civic, and work place responsibility as part of information technology professional behavior. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 18 semester hours required for Technical Certificate in Information and Communication Technology: Computer Repair.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Healthcare Information Networking, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Information and Communication Technology

Specialization: Healthcare Information Networking

Program Code: 1116

About This Program . . .

This certificate prepares students for Healthcare ICT jobs by teaching them the special needs of the healthcare industry including the Health Insurance Portability and Accountability Act, Electronic Health Records, the Universal Protocol and how to design, implement, monitor, and troubleshoot networks in healthcare environments. This course complements the Cisco CCNA curriculum and is designed for students who would like to expand their networking abilities by developing specialized healthcare networking skills. Hands-on labs throughout the course help students gain practical experience, including procedural and troubleshooting labs, skills integration challenges, and model building.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Describe the concepts and provisions of Electronic Health Records and the Health Insurance Portability and Accountability Act. (Specialized Knowledge/Applied Learning)
- Describe how Information and Communication Technology is used in the Healthcare Industry. (Communication Fluency)
- Describe the unique requirements and solutions for protecting healthcare information and networks. (Specialized Knowledge/Applied Learning)
- Explain how to support, maintain, and troubleshoot a medical group network. (Critical Thinking)

- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Help Desk Technician, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Information and Communication Technology

Specialization: Help Desk Technician

Program Code: 1117

About This Program . . .

Upon completion of the program, the student will be able to demonstrate skills, knowledge, and training for employment in an Information and Communication Technology Help Desk support position. Students learn the fundamentals of computer hardware and software, mobile devices, security and networking concepts, the responsibilities of the help desk technician and how to provide customer support.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Identify best practice information security policies. (Specialized knowledge, Critical thinking)
- Describe the use of Convergent Technologies in a computer network. (Specialized knowledge)
- Demonstrate proficiency and knowledge required for basic use of computer hardware, software, and the Internet. (Specialized knowledge)
- Ability to install, configure and provide instruction on basics of using common office software tools. (Specialized knowledge, Critical Thinking)
- Ability to identify, manage and overcome barriers to communication. (Communication fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Network Technician, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Information and Communication Technology

Specialization: Network Technician

Program Code: 1118

About This Program . . .

This certificate is based on the Cisco CCNA Routing and Switching series of courses and prepares students for the Cisco Certified Network Associate exam. The CCNA certification will prepare students for any entry-level networking career. Additional classes cover computers, information security, convergent communications technologies, best practice customer relations and workplace behavior.

The coursework in this certificate is aligned with national and international certifications including Cisco, A+/N+, CET, and Convergent Technology Professional (CTP). Program content has been structured to give a basic education to all graduates entering this field. Emphasis has been placed on providing a common core of training for all students due to the convergence of the communication industries.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Identify best practice information security policies. (Specialized Knowledge)
- Demonstrate proficiency and knowledge required for basic use of computer hardware, software, and the Internet. (Specialized Knowledge)
- Ability to install, configure and provide instruction on basics of using common office software tools. (Critical Thinking)
- Ability to identify, manage and overcome barriers to information technology communication. (Communication Fluency)

Innovation

The Professional Certificate in Innovation is a three-course sequence designed to spark new thinking for any CMU undergraduate student. All students can benefit from augmenting innovation into their chosen majors and minors to create products and processes that have not existed before. Students experience the process of innovation, examine the development of historical innovations, and take their own innovation from ideation through commercialization in the Maverick Innovation Center.

Programs of Study Certificates

- [Innovation \(Professional Certificate\)](#) (p. 463)

Innovation (Professional Certificate)

Award: Professional Certificate
Program of Study: Innovation
Program Code: 1701

About This Program. . .

The Professional Certificate in Innovation is a three-course sequence designed to spark new thinking for any CMU undergraduate student. All students can benefit from augmenting innovation into their chosen majors and minors to create products and processes that have not existed before. Students experience the process of innovation, examine the development of historical innovations, and take their own innovation from ideation through commercialization in the Maverick Innovation Center.

While not mandated, students are strongly encouraged to complete a minor that is not traditionally seen as being closely aligned with their chosen major in order to broaden their perspective and spark critical thinking. In the book, "The Opposable Mind", Roger Martin notes "innovative thinkers have the capacity to hold two diametrically opposed ideas in their heads. Without panicking or simply setting one alternative or the other, they're able to produce a synthesis that is superior to either opposing idea." Fundamentally this exemplifies the essence of a Liberal Arts education.

In lieu of choosing a minor significantly different from their major, students have the option of working with an innovation advisor in selecting a group of courses that would best augment their integrated pathway.

This certificate may be completed beginning in a student's sophomore year.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate ability to identify a problem/opportunity then create a solution via the process of innovation.
- Create a unique innovation connecting diverse academic disciplines from ideation through commercialization.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- This certificate may be completed beginning in a student's sophomore year.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

International Studies Program Description

The International Studies minor recognizes the complex interconnections between academic disciplines, peoples in varying cultural contexts and opportunities for social and economic advancement for our graduates. Students from a wide variety of disciplines can supplement their major in business, social sciences, natural sciences or humanities with an international focus through this minor. Students choose from a menu of options drawn from disciplines across the campus. The interdisciplinary nature of the International Studies minor is essential for preparing students to enter the new global marketplace of ideas and goods. Students taking the International Studies minor are encouraged to enhance their experience by participating in a variety of study abroad opportunities available while attending CMU.

About This Minor. . .

The International Studies Minor recognizes the complex interconnections between academic disciplines, peoples in cultural contexts, and opportunities for social and economic advancement for our graduates.

Students from a wide variety of disciplines can supplement their major in business, social sciences, natural sciences or humanities with an international focus through this minor. This will help them to understand the changing nature of their field while making their degree more marketable in a global workforce.

Students choose from a menu of options drawn from disciplines across the campus. The interdisciplinary nature of the international studies minor is essential for preparing our students to enter into the new global marketplace of ideas and goods. Students taking the International Studies Minor are encouraged to enhance their experience at Colorado Mesa by participating in a variety of Study Abroad opportunities available while attending CMU.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or

"Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24 semester hours)

- As part of their program, students will be encouraged to participate in an international experience in consultation with their advisors. This experience could be a semester or summer abroad, an international internship, an intensive immersion language program in another country, or participation in a growing number of study abroad opportunities offered by Colorado Mesa University. The credits received from this experience could be used to fulfill essential learning requirements or program requirements including unrestricted electives, but are not intended to add to the 120-hour graduation requirement. Substitutions would need to be approved by an advisor and department chair prior to the international experience.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Jazz Studies

(See [Music](#) (p. 559))

Kinesiology

Program Description

The Bachelors of Arts in Kinesiology includes two concentration options: Adapted Physical Education and K-12 Teaching.

Students concentrating in adapted physical education will learn to adapt or modify the physical education curriculum and/or instruction to address specific abilities of individuals. Students will learn to develop activities that are appropriate and effective for persons with disabilities. Career opportunities include: adapted physical education teacher (K-12), which requires completing the K-12 concentration coursework; activity director at an assisted living center or rehabilitation facility; physical therapist¹; and occupational therapist¹.

¹ Career requires additional post-baccalaureate studies.

The K-12 teaching concentration prepares students to teach elementary, middle and high school physical education. The degree plan includes coursework covering human anatomy and physiology, team and individual sports, exercise science and teaching methods courses. Students will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. Before being admitted into the teacher education program, the following courses must be completed with a grade of B or better:

Code	Title	Semester Credit Hours
ENGL 111	English Composition I-GTC01	3
ENGL 112	English Composition II-GTC02	3
PSYC 233	Human Growth and Development-GTSS3	3
EDUC 115	What It Means To Be An Educator	1
EDUC 215	Teaching as a Profession	1

A grade of C or better is required for MATH 110. Also, a minimum cumulative GPA of 2.8 (including transfer and CMU coursework) is required of all students for admission into the program.

Students enrolled in the personal training certificate should have a strong interest in fitness, health promotion and personal training. Students will engage in practical experiences that will help them with the possibility of a future career in personal training. Students will explore subject areas that include: anatomy, physiology, kinesiology, applications of physical fitness and exercise physiology.

- [Personal Training \(Professional Certificate\)](#) (p. 473)

Adapted Physical Education, Kinesiology (BA)

Degree: Bachelor of Arts
Major: Kinesiology
Concentration: Adapted Physical Education
Program Code: 3132

About This Major . . .

Students who select this major will learn to adapt or modify the physical education curriculum and/or instruction to address specific abilities of individuals. Students will learn to develop activities that are appropriate and effective for persons with disabilities. Career opportunities include: adapted physical education teacher (K-12) which requires completing the K-12 concentration coursework; activity director at an assisted living center or rehabilitation facility; physical therapist¹; occupational therapist¹. Colorado Mesa students frequently continue their study towards graduate or professional degrees at other universities.

¹ Career requires additional post-baccalaureate studies.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Describe physiological and biomechanical concepts related to movement and be able to communicate and formulate conclusions about the results. (Critical Thinking)
- Apply motor development theory and principles related to skillful movement, physical activity, and fitness. (Communication Fluency, Specialized Knowledge)
- Identify the scope and definitions of health, fitness, and human performance with the ability to analyze the data critically. (Applied Learning, Quantitative Fluency)
- Develop developmentally appropriate learning experiences that address the diverse needs of all individuals. (Applied Learning)
- Use a variety of assessments and feedback procedures to foster student learning. (Applied Learning, Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: K-12 Education, Kinesiology (BA)

Degree: Bachelor of Arts
Major: Kinesiology
Concentration: K-12 Teaching
Program Code: 3137

About This Major . . .

Students will be prepared to teach elementary, middle, and high school physical education. The degree plan includes coursework covering human anatomy and physiology, team and individual sports, exercise science, and teaching methods courses. Students will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

Before being admitted into the Teacher Education program, the following courses must be completed with a grade of B or better:

Code	Title	Semester Credit Hours
ENGL 111	English Composition I-GTCO1 ¹	3
ENGL 112	English Composition II-GTCO2 ¹	3
PSYC 233	Human Growth and Development-GTSS3	3
EDUC 115	What It Means To Be An Educator	1
EDUC 215	Teaching as a Profession	1

¹ English honors may be substituted for ENGL 111 and ENGL 112.

A grade of C or better is required for MATH 110. Also, a minimum cumulative GPA of 2.8 (including transfer and CMU coursework) is required of all students for admission into the program.

Important information about this program:

- Students must maintain a 2.80 cumulative GPA or higher in all CMU coursework.
- All other coursework toward the degree must be successfully completed prior to the internship.
- Kinesiology licensure students must pass the Praxis II content exam prior to student teaching (fee required).
- Students must have ENGL 111 ENGL 112(or ENGL 219), PSYC 233, EDUC 115, EDUC 215 (All with grade of "B" or higher) and MATH 110

or higher (with grade of “C” or higher) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services’ [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Kinesiology Outcome 1: Apply scientific concepts that relate to the development of physically educated individuals. (Critical Thinking)
- b. Kinesiology Outcome 2: Consistently display competent motor skills and fitness levels. (Applied Learning)
- c. Kinesiology Outcome 3: Plan and teach developmentally appropriate standard based lesson plans. (Specialized Knowledge)
- d. Kinesiology Outcome 4: Demonstrate teaching skills and strategies that improve learning for all student abilities. (Communication Fluency)
- e. Kinesiology Outcome 5: Use a variety of assessments and feedback procedures to foster student learning. (Applied Learning, Quantitative Fluency)
- f. Kinesiology Outcome 6: Engage in behaviors that reflect professional ethics, professional growth, and advocacy of physical education. (Applied Learning)
- g. Teacher Education Outcome 1: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- h. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- i. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- j. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- k. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Personal Training (Professional Certificate)

Award: Professional Certificate
Program of Study: Personal Training
Program Code: 1145

About This Program . . .

Students enrolled in the Personal Training certificate program should have a strong interest in fitness, health promotion, and personal training. Students will engage in practical experiences that will help them with the possibility of a future career in personal training. Students will explore subject areas that include: anatomy, physiology, kinesiology, nutrition, applications of physical fitness, and exercise physiology. This program is designed to provide the student with the knowledge required to pass national certification examinations to become a National Strength and Conditioning Association – Certified Personal Trainer (NSCA-CPT), National Strength and Conditioning Association – Certified Strength and Conditioning Specialist (NSCA-CSCS), American College of Sports Medicine Certified Personal Trainer (ACSM-CPT), and/or American College of Sports Medicine Certified Exercise Physiologist (ACSM c-EP).

Important information about this program:

- 33 semester hours for the Professional Certificate in Personal Training.
- 2.00 cumulative GPA or higher in the certificate is required.
- At least 33 percent of the credit hours required for the certificate must be in courses numbered 300 or above.
- CPR/First Aid Certification is a graduation requirement for this certificate.
- Students are required to provide documentation (proof of payment and scheduled date) that they are registered to take one of the following exams:
 - American College of Sports Medicine Certified Personal Trainer (ACSM-CPT)
 - American College of Sports Medicine Certified Exercise Physiologist (ACSM c-EP)¹

- National Strength and Conditioning Association Certified Personal Trainer (NSCA-CPT)
- National Strength and Conditioning Association Certified Strength and Conditioning Specialist (NSCA-CSCS)¹

¹ Both of these certificates require the student to be in their final semester of the baccalaureate degree.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Evaluate the functions of the individual body systems.
- Identify risk factors associated with chronic disease.
- Identify exercise cautions and other safety concerns.
- Describe procedures for physiological assessments.
- Demonstrate the ability to clearly communicate specialized knowledge.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(33 semester hours, must earn a grade of “C” or better in each course.)

Additional notes about requirements for completion of this degree:

- At least 33 percent of the credit hours required for the certificate must be in courses numbered 300 or above.
- CPR/First Aid Certification is a graduation requirement for this certificate.
- Students are required to provide documentation (proof of payment and scheduled date) that they are registered to take one of the following exams:
 - American College of Sports Medicine Certified Personal Trainer (ACSM-CPT)
 - American College of Sports Medicine Certified Exercise Physiologist (ACSM c-EP)¹
 - National Strength and Conditioning Association Certified Personal Trainer (NSCA-CPT)
 - National Strength and Conditioning Association Certified Strength and Conditioning Specialist (NSCA-CSCS)¹

¹ Both of these certificates require the student to be in their final semester of the baccalaureate degree.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical

to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Land Surveying and Geomatics Program Description

The Land Surveying program prepares students to use equipment that is an integral part of land development for areas of engineering, construction projects and planning. Students learn to measure elevations, use equipment to measure on or below the surface and use technology to process data. The students will gain the knowledge needed for state certification.

All surveyor-specific courses can be completed for the two-year degree.

An online certificate program allows students who are already working as survey interns to complete the necessary computation/calculation, error analysis, and math and ethics coursework to enable them to take and successfully pass the state’s Professional Surveyor Exam (progressive work experience in land surveying and geomatics is an additional requirement for examination eligibility).

Land Surveying and Geomatics students will:

- Understand the fundamentals of land surveying and the importance of record research;
- Use the components of Global Positioning Systems (GPS) and Geographical Information Systems (GIS) and be able to gather and analyze data from these systems;

- Develop spreadsheets and utilize other relevant computer programs (CAD and industry specific software programs) to provide accurate surveying analytics;
- Apply higher level mathematical concepts that are necessary to complete complex survey tasks (analytical geometry, upper level algebra, calculus, statistics);
- Utilize the Common Law roots of Boundary Law, its importance in maintaining accurate records and be able to apply those principles in surveying;
- Work within the ethical, as well as the practical, role of surveying, including the applicable state and local laws.

Career Opportunities

- Surveyors
- Geodetic Surveyors
- Soil and Water Conservationists
- Landscape Architects
- Title Examiners, Abstractors, and Searchers
- Appraisers, Real Estate

Land Surveying and Geomatics (AAS)

Degree: Associate of Applied Science
Program of Study: Land Surveying and Geomatics
Program Code: 1334

About This Major . . .

The Land Surveying and Geomatics program prepares students to use surveying equipment that is an integral part of land development for areas of engineering, construction projects and planning. Students learn to use surveying equipment to measure elevations, and positions on or below the surface of the earth. They also learn to use technology to process the measured data. Students also learn the mathematical and technical calculation fundamentals associated with their measurements, and the fundamental boundary law principles as they apply to boundary surveys and boundary determinations.

The AAS in Land Surveying and Geomatics degree meets the Colorado education requirements to be eligible to take the Fundamentals of Surveying examination for Land Surveyor Intern in the state of Colorado under C.R.S. 12-25-212 (3) (a) (II) (A) "Have graduated from a board-approved two-year surveying curriculum", provided they have the requisite progressive land surveying experience listed under part (II)(B) "Have a

cumulative record of two years or more of progressive land surveying experience".

The AAS in Land Surveying and Geomatics degree also meets the Colorado education requirements to be eligible to take the Professional Land Surveyor's examination for licensure as a Professional Land Surveyor in the state of Colorado under C.R.S. 12-25-214 (2)(a) and (b)(III)(A) "Have graduated from a board-approved two-year surveying curriculum or a four year engineering curriculum that included surveying course work as specified by the board by rule", provided they have the requisite progressive land surveying experience under (III)(B) "Have six years of progressive land surveying experience of which four years shall have been under the supervision of a professional land surveyor or an exempt federal employee as defined under 12-25-203 (1)(b); and

(III)(C) "Have been enrolled as a land surveyor-intern in this state">

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate the theoretical knowledge used in the performance of land surveying and geomatics professions. (Specialized Knowledge)
- Demonstrate the practical skills and use of surveying tools according to the Land Surveying and Geomatics curriculum. (Applied Learning)
- Demonstrate the practical skills and use of other surveying, drafting, and GIS tools according to the Land Surveying and Geomatics curriculum. (Applied Learning)
- Demonstrate and apply higher level mathematical concepts that are necessary to complete complex survey tasks. (Quantitative Fluency)
- Describe and understand the Common Law roots of Boundary Law and their importance in maintaining and generating accurate land transaction records and be able to apply those principles in land surveying. (Communication Fluency)
- Analyze surveying problems and issues to determine the proper approach to the correct solution, including proper measuring and calculation techniques and the common law legal principles to apply to arrive at the proper results and interpretation of these surveying problems. (Critical Thinking)
- Describe the ethical, as well as the practical role of surveying, including the applicable federal, state and local laws. (Personal and Social Responsibility)
- Demonstrate an ability to meet the expected norms of the workforce. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 61 credit hours total required for the AAS in Land Surveying and Geomatics.

Essential Learning Requirements

(17 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Land Surveying and Geomatics (Technical Certificate)

Award: Technical Certificate

Program of Study: Land Surveying and Geomatics

Program Code: 1122

About This Program . . .

WCCC/CMU has established a post-baccalaureate certificate in an online format that allows individuals across Colorado – and in surrounding states – to complete 37 hours of surveying and math-specific course work and a combined internship/capstone project. Colorado state law has established certain educational requirements for licensure as a Professional Land Surveyor. The Colorado Architects, Professional Engineers, and Professional Land Surveyors Board (AES Board) has then established more detailed educational requirements to meet the state law. This certificate would allow students who have an engineering degree of four or more years that needs the supplemental education in surveying and math-specific course work as established by the AES Board to meet the education requirements for eligibility to take the Colorado required exams for the Professional Land Surveyor's License.

For those students with a non-surveying curriculum or non-engineering curriculum of four or more years, additional courses in technological and/or business disciplines, basic science disciplines, and additional math disciplines may be required above this certificate in order to meet the educational requirements for eligibility to take the Colorado required exams to attain a Professional Land Surveyor's License. For those with a bachelor's degree in a non-surveying or non-engineering field, contact the Program Director of the Land Surveying and Geomatics Program for an opinion on whether the Post Baccalaureate Certificate will meet the AES Board defined education requirements when combined with their bachelor's degree. For some, the Associates of Applied Science in Land Surveying and Geomatics may be the more appropriate route to meet that requirement.

As an Admissions requirement for this Post Baccalaureate Certificate Program, students must provide evidence of an earned bachelor's degree in any field from an accredited bachelor's granting program to the Program Director before acceptance into the program can occur.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate the theoretical knowledge used in the performance of land surveying and geomatics professions. (Specialized Knowledge)

- b. Demonstrate the practical skills and use of surveying tools according to the Land Surveying and Geomatics curriculum. (Applied Learning)
- c. Demonstrate and apply higher level mathematical concepts that are necessary to complete complex survey tasks. (Quantitative Fluency)
- d. Describe the Common Law roots of Boundary Law and their importance in maintaining and generating accurate land transaction records and be able to apply those principles in land surveying. (Communication Fluency)
- e. Analyze surveying problems and issues to determine the proper approach to the correct solution, including proper measuring and calculation techniques and the common law legal principles to apply to arrive at the proper results and interpretation of these surveying problems. (Critical Thinking)
- f. Describe the ethical, as well as the practical role of surveying, including the applicable federal, state and local laws. (Personal and Social Responsibility)
- g. Demonstrate an ability to meet the expected norms of the workforce. (Personal and Social Responsibility)

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Requirements:

As an Admissions requirement for this Post Baccalaureate Certificate Program, students must provide evidence of an earned bachelor's degree in any field from an accredited bachelor's granting program to the Program Director before acceptance into the program can occur.

For those with a bachelor's degree in a non-surveying or non-engineering field, contact the Program Director of the Land Surveying and Geomatics Program for an opinion on whether the Post Baccalaureate Certificate will meet the Colorado State Board of Architects, Professional Engineers, and Professional Land Surveyors education requirements when combined with their bachelor's degree. For some, the Associates of Applied Science in Land Surveying and Geomatics may be the more appropriate route to meet that requirement instead of this certificate.

Program Specific Certificate Requirements

(37-39 semester hours, must earn a grade of "C" or better in each course.)

Code	Title	Semester Credit Hours
STAT 200	Probability and Statistics-GTMA1	3
MATH 130	Trigonometry	3
Complete one of the following courses:		3-5
MATH 141	Analytical Geometry

Suggested Course Plan

For Post Baccalaureate Certificate students working full time:

First Year	Fall Semester	Semester Credit Hours
MATH 130	Trigonometry	3
SURV 203	Legal Aspects of Surveying	3
SURV 204	Real Property Descriptions	2
Semester Credit Hours		8

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Liberal Arts

(Interdisciplinary Majors)

Program Description

While Colorado Mesa University provides a wide range of specific program options, the university also provides students the chance to explore broadly and still earn a degree. A liberal arts degree is designed to offer students the opportunity to craft a plan of study to suit their individual career and academic aspirations. Under the direction of an advisor, a liberal arts degree-seeking student can design a coherent program by choosing appropriate courses that focus on several of the interests that the student has. The Liberal Arts degree can be pursued at the two-year or at the four-year levels, leading to an AA, an AS, or a BA. As listed under the Programs of Study tab, some of the options offer more focus while others are quite broad.

Elementary Education Tracks

As listed under the Programs of Study tab, The Center for Teacher Education offers a comprehensive program of study that leads to a

teaching license in Colorado with a focus on the liberal arts. Candidates choose a concentration in English, mathematics, or social science. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. The elementary licensure program provides teacher education candidates with a broad content knowledge and prepares them as teachers for grades kindergarten through six. Please see the elementary education programs of study as well as the [Center for Teacher Education's website](#) for further information on admissions criteria.

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The elementary licensure program provides teacher education candidates with a broad content knowledge and prepares them as teachers for grades kindergarten through six. A minimum of 60 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education elementary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information for this program:

- Students must maintain 2.80 cumulative GPA or higher in all CMU coursework
- Must earn a grade of "C" or better in all required courses, unless otherwise noted.
- Foreign language proficiency must be demonstrated by high school course work (2 years), college coursework (2 semesters), or competency testing.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. All other coursework toward the degree must be successfully completed prior to the internship.
- The program requires ENGL 111, ENGL 112, PSYC 233, EDUC 115 and EDUC 215, MATH 105, and MATH 205 (all with a grade of "B" or better) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Express themselves effectively in a variety of forms. (Communication Fluency)
- Support interpretive claims about a variety of texts. (Critical Thinking)

- c. Identify the salient features of literary texts from a broad range of English and American literary periods. (Specialized Knowledge)
- d. Employ knowledge of literary traditions to produce imaginative writing. (Communication Fluency/Applied Learning)
- e. Use research to assist in problem-solving. (Critical Thinking)
- f. Demonstrate knowledge of the history or structure of the English language. (Specialized Knowledge)
- g. Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- h. Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- i. Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- j. Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- k. Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 126 semester hours required for the BA in Liberal Arts, Elementary Education, English.

Essential Learning Requirements

(31 semester hours, must earn a grade of "C" or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTC01	3

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Elementary Education, Mathematics, Liberal Arts (BA)

Degree: Bachelor of Arts
Major: Liberal Arts, Elementary Education
Concentration: Mathematics
Program Code: 3491

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The elementary licensure program provides teacher education candidates with a broad content knowledge and prepares them as teachers for grades kindergarten through six. A minimum of 60 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education elementary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information for this program:

- Students must maintain 2.80 cumulative GPA or higher in all CMU coursework.
- Must earn a grade of "C" or better in all required courses, unless otherwise noted.
- Foreign language proficiency must be demonstrated by high school course work (2 years), college coursework (2 semesters), or competency testing.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. All other coursework toward the degree must be successfully completed prior to the internship.
- The program requires ENGL 111, ENGL 112, PSYC 233, EDUC 115, EDUC 215, MATH 105, and MATH 205 (all with a grade of "B" or better) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Mathematics Outcome 1: Demonstrate familiarity with the logical and historical development of mathematics and the implications of this development. (Specialized Knowledge)
- Mathematics Outcome 2: Demonstrate a deep and coherent proficiency in the mathematics underlying elementary curricula. (Quantitative Fluency)
- Mathematics Outcome 3: Effectively communicate mathematics using oral and written exposition appropriate for teachers of mathematics. (Communication Fluency)
- Mathematics Outcome 4: Reason mathematically and communicate precisely using clear definitions, appropriate symbols, correct units of measure with an appropriate degree of precision, proper labels, and coherent chains of logic. (Applied Learning)
- Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 126 semester hours required for the BA in Liberal Arts, Elementary Education, Mathematics.

Essential Learning Requirements

(31 semester hours, must earn a grade of "C" or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Elementary Education, Social Science, Liberal Arts (BA)

Degree: Bachelor of Arts
Major: Liberal Arts, Elementary Education
Concentration: Social Science
Program Code: 3791

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The elementary licensure program provides teacher education candidates with a broad content knowledge and prepares them as teachers for grades kindergarten through six. A minimum of 60 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education elementary licensure program. Please see the [Teacher Education Admission Packet](#) for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information for this program:

- Students must maintain 2.80 cumulative GPA or higher in all CMU coursework.
- Must earn a grade of “C” or better in all required courses, unless otherwise noted.
- Foreign language proficiency must be demonstrated by high school course work (2 years), college coursework (2 semesters), or competency testing.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. All other coursework toward the degree must be successfully completed prior to the internship.
- The program requires ENGL 111, ENGL 112, PSYC 233, EDUC 115, EDUC 215, MATH 105, and MATH 205 (all with a grade of “B” or better) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- b. Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- c. Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- d. Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- e. Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)
- f. Assess the importance of historical and cultural context. (Specialized Knowledge/Applied Learning)
- g. Critically analyze an argument based on secondary sources. (Critical Thinking)
- h. Formulate the relationships of cause and effect. (Specialized Knowledge/Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 126 semester hours required for the BA in Liberal Arts, Elementary Education, English.

Essential Learning Requirements

(31 semester hours, must earn a grade of “C” or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for

your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

General Studies, Liberal Arts (BA)

Degree: Bachelor of Arts
Major: Liberal Arts - General Studies
Program Code: 3250

About This Major . . .

While Colorado Mesa University provides a wide range of programs, the university may not offer a standard bachelor's degree program that serves a student's particular need. A liberal arts degree, however, is designed to offer a student the opportunity to craft a plan of study to suit his/her individual career and academic aspirations. Under the direction of an advisor, a liberal arts major will design a coherent program by choosing appropriate courses that focus on a very specific field of study.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Evaluate the interconnections of knowledge within and across at least two major disciplines;
- Synthesize insights, content, and/or methodologies of two or more major disciplines
- Develop solutions to specific problems by drawing from several relevant fields of study
- Effectively defend conclusions in verbal and written presentations

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Interdisciplinary Studies, Liberal Arts (BAS)

Degree: Bachelor of Applied Science
Major: Interdisciplinary Studies
Program Code: 3050

About This Major . . .

The Bachelor of Applied Science in Interdisciplinary Studies builds upon a technical specialty to hone the critical thinking, communication, and problem-solving skills necessary to move into leadership positions in any industry. By completing the full Essential Learning curriculum, including the Essential Learning Capstone, students will gain exposure to multiple disciplines and ways of approaching problems. Students will work with an advisor to identify upper-division courses that will best meet their interests and career goals. The BAS in Interdisciplinary Studies is a path for two-year technical degree graduates to earn a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen field.

Important information about this degree:

- Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution.
- In order to pursue the BAS: Interdisciplinary Studies, a student must first provide to the Office of Academic Affairs a signed letter from a faculty member in her or his chosen focus area indicating a course sequencing for the focus area as well as a broad description of the student's summative project. Upon approval by an Assistant Vice-President for Academic Affairs, the student will be declared a BAS: Interdisciplinary Studies major, and the faculty recommender will be assigned as academic advisor. Changes to the course sequencing provided in the letter will require approval by the academic advisor.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct a summative project, paper or practiced-based performance that draws on current research, scholarship and/or techniques, and specialized knowledge in a discipline (communication; specialized knowledge/applied learning).
- Integrate knowledge between their applied field and one other discipline (critical thinking).

- c. Describe reasoned conclusions that articulate the implications and consequences for a particular decision by synthesizing information and methodologies (critical thinking).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

University Studies, Liberal Arts (AA)

Degree: Associate of Arts

Major: Liberal Arts

Emphasis: University Studies

Program Code: 2050

About This Major . . .

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. The University Studies emphasis, by offering a broad range of flexibility in elective courses, provides an opportunity for students who may be potentially exploring their career and major options without regard to a particular disciplinary track.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize evidence on an assigned topic addressing a course or discipline-related question or a question of practice in a work or community setting (specialized knowledge/applied learning);
- Use program-level mathematical concepts and methods to understand, analyze, and explain issues in quantitative terms (quantitative fluency);
- Make and defend claims in a well-organized, professional document and/or oral presentation that is appropriate for a specific audience (communication fluency);
- Identify and gather the information/data relevant to the essential question, issue and/or problem and develop informed conclusions (critical thinking).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Manufacturing Technology

Program Description

Computer-Aided Design Technology

The Computer-Aided Design program prepares the student for employment in Mechanical, Architectural and Civil Design. Through the use of current CAD software, students will build their skill level beginning with two dimensional drawings and working their way up to three dimensional solid based modeling. With the majority of the work completed on the computer and a project in the area of student's interest, this program ties the course to real world concepts. Career options include Architectural Drafter/Designer, Mechanical Drafter/ Designer and Civil Drafter/Designer.

Machine and Manufacturing Trades

The machining and manufacturing trades specialization offers classroom instruction and related lab work with hands-on activities in the use of machine tools and the operation of equipment found in manufacturing. Students work in the area of blueprint reading, computer numerical control (CNC), machining, general machining and maintenance, CAD and related mathematics. The program is designed to meet competency-based standards set by the industry. Attitude and quality of workmanship are stressed. Career options include entry level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician and manufacturing inspection technician.

Machining Technology

The Associate of Applied Science with the manufacturing technology major offers classroom instruction and related lab work with hands-on activities in the use of machine tools and the operation of equipment found in manufacturing. In the machining technology emphasis students learn to apply industrial knowledge and skills to plan and implement designs, operate manual mills and lathes, operate computer-aided machinery with CAD/CAM software and computer numerical controlled (CNC) machines. Students also develop the skills that enable them to read blueprints, apply appropriate mathematical concepts and understand the properties of metal and polymers. This course of study is designed to meet competency-based standards set by the manufacturing industry. With this degree, students will be qualified for the following employment opportunities: entry-level machinist, computer numerical control operator, numerical tool and process technician, manufacturing engineering technician and manufacturing inspection technician.

Welding Technology

The Welding Technology program is designed to provide training and opportunity to become proficient at SMAW, GMAW, GTAW, FCAW, OAW, OAC, PAC, CAC-A on plate, and Robotic Welding with state-of-the art welding instruction. This program offers classroom lecture and related lab work. Students study welding, cutting, layout, fabrication and technical math. Safety, attitude and quality of workmanship are stressed throughout this course. The welding certificate prepares students for entry-level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program trains students to become certified AWS, API, ASME welders in the welding industry.

The Welding Technology AAS degree prepares students for advanced level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society.

Certificate programs are designed to be employment-directed for beginning level jobs. Students should check with a welding instructor/ advisor about options for specialized employment training requiring a shorter period of training.

The Associate of Applied Science degree program includes many of the same technical courses as the technical certificate. Also included are machining and Computer Aided Design (CAD) courses that are essential for job advancement to more technical levels after employment.

Courses are designed to give students an adequate knowledge of metals, layout work and welding processes, along with an opportunity to gain hands-on skills and the related information needed to enter and progress in various welding occupations. Instruction and shop practice is offered in SMAW, GMAW, FCAW and GTAW of mild steel in all positions as well as pipe and specialty welding. Various cutting and fabrication methods are included. Students can arrange work experience as an elective part of the regular program after completing two semesters or more.

Machining Technology, Manufacturing Technology (AAS)

Degree: Associate of Applied Science

Major: Manufacturing Technology

Emphasis: Machining Technology

Program Code: 1331

About This Major . . .

The Associate of Applied Science with the Manufacturing Technology major offers classroom instruction and related lab work with hands-on activities in the use of tools and the operation of equipment found in manufacturing. In the Machining Technology emphasis students learn to apply industrial knowledge and skills to plan and implement designs, operate manual mills and lathes, operate computer-aided machinery with CAD/CAM software, and computer-numerical controlled (CNC) machines. Students also develop the skills that enable them to read blueprints, apply appropriate mathematical concepts, and understand the properties of metal and polymers. This course of study is designed to meet competency-based standards set by the manufacturing industry. With this degree, students will be qualified for the following employment opportunities: entry-level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician, and manufacturing inspection technician.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Use written and oral communication skills needed for entry level employment in the manufacturing industry (Communication Fluency).
- Apply mathematical concepts to perform machining tasks (Quantitative Fluency).
- Summarize business practices, principles and application of associated technical skill in the machining industry (Specialized Knowledge).
- Apply the necessary machining skill sets to perform specified manufacturing processes (Applied Learning).
- Determine ethical and civil responsibility necessary for employees in the machining industry (Specialized Knowledge).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 61 semester hours total for the AAS, Manufacturing Technology - Machining Technology.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Welding Technology, Manufacturing Technology (AAS)

Degree: Associate of Applied Science
Major: Manufacturing Technology
Emphasis: Welding Technology
Program Code: 1332

About This Major . . .

This Welding Technology Degree program is designed to provide training and opportunity to become proficient at SMAW, GMAW, GTAW, FCAW, OAC, PAC, blueprint reading, pipe welding, fabrication, automation, layout, mathematics, and safety. This program offers classroom lecture and related lab work. Students study welding, cutting, layout, fabrication and technical math. Safety, attitude and quality of workmanship are stressed throughout this course. The welding AAS degree prepares students for advanced level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program prepares students to become AWS certified welders.

For more information on what you can do with this major, visit WCCC’s [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal and written forms that are needed for entry level employment in the industry. (Communication Fluency)
- Apply Mathematical concepts for the Welding industry to meet entry level employment requirements. (Quantitative Fluency)
- Research, evaluate, synthesize and apply information/data relevant to the welding industry. (Critical Thinking)
- Demonstrate knowledge of terminology, symbols, business practices, principles and application of associated technical skills in the industry. (Specialized Knowledge)
- Perform the necessary applied welding skill sets to fulfill the needs of entry level employment. (Applied Learning)
- Demonstrate ethical and civic responsibility necessary for employees in the welding industry. (Specialized Knowledge)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It

is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Architectural Drafting, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Architectural Drafting
Program Code: 1175

About This Program . . .

In this Technical Certificate, students learn drafting concepts and the processes of orthographic projection, pictorial drawing, dimensioning, and geometric construction by hand and with CAD software and equipment. Students will also gain fundamental knowledge of architectural drafting. The majority of a student's work will be completed on the computer. A project in the area of the student's interest will tie the course to real world concepts.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply principles of grammar and vocabulary in documentation required to perform the duties of an Architectural Drafting technician and effectively interview clients and communicate with constituents. (Communication Fluency)

- b. Apply mathematical concepts and practices that are required to properly perform calculation for design. (Quantitative Fluency)
- c. Utilize correct materials, size and design based upon client consultation and industry knowledge. (Critical Thinking)
- d. Demonstrate mastery of terminology, concepts, methodologies in the Architectural Drafting industry. (Specialized Knowledge)
- e. Demonstrate mastery of specific Architectural CAD software and generate substantially error free designs. (Specialized Knowledge).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Basic Welder, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Manufacturing Technology

Specialization: Basic Welder

Program Code: 1110

About This Program . . .

This Basic Welder program is designed to provide training and opportunity to become proficient at SMAW, GMAW, OAC, PAC, blueprint reading, mathematics, and safety. This program offers classroom lecture and related lab work. Welding, cutting, layout, safety, attitude and quality of workmanship are stressed throughout this program. The Basic Welding certificate prepares students for welding helper-apprentice position in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program prepares students to become certified AWS certified welders in the welding industry upon successful completion of the appropriate test standard.

For more information on what you can do with this major, visit WCCC’s [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal and written forms that are needed for entry level employment in the industry. (Communication Fluency)
- Apply Mathematical concepts to meet entry level employment requirements. (Quantitative Fluency)
- Research, evaluate, synthesize and apply information/data relevant to the industry. (Critical Thinking)
- Demonstrate knowledge of welding terminology, symbols, business practices, principles and application of associated technical skills (Specialized Knowledge/Applied Learning)
- Perform the necessary applied welding skill sets to fulfill the needs of entry level employment. (Applied Learning)
- Demonstrate ethical and civic responsibility necessary for employees in the industry. (Specialized Knowledge).

- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(16 semester hours)

- Students in Welding may be required to purchase approximately \$500.00 in tools and personal safety welding equipment. This does not include required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

CNC Machinist, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Manufacturing Technology

Specialization: CNC Machinist

Program Code: 1129

About This Program . . .

WCCC's Machine Technology program offers affordable, accessible, high quality manufacturing education and training at the Archuleta Engineering Center. Students learn to apply industrial knowledge and skills to plan and implement designs, operate manual mills and lathes, operate computer aided machinery with CAD/CAM software, and computer-numerical controlled (CNC) machines.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply the necessary CNC machining skill sets to perform specified manufacturing processes.(Applied Learning)
- Demonstrate the basic operation of manual mills, lathes and operate computer-aided machinery with software. (Specialized Knowledge)

Computer Aided Design/Computer Aided Manufacturing (CAD/CAM), Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
 Program of Study: Manufacturing Technology
 Specialization: CAD/CAM
 Program Code: 1111

About This Program . . .

Through the use of Computer-aided Manufacturing (CAM) and Computer-aided Design (CAD), the student will learn the techniques of basic drafting principles and methods used in today’s manufacturing industry.

Dimensioning, and geometric construction will be explored with CAD/CAM software and transferred to Computer Numerical Controlled (CNC) machines to operate machine tools and related machinery in the manufacturing and design of work pieces.

For more information on what you can do with this major, visit WCCC’s [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Use written and oral communication skills needed for entry level employment in the manufacturing industry. (Communication Fluency)
- Apply mathematical concepts to perform machining tasks. (Quantitative Fluency)
- Distinguish between tolerances and dimensions, as used in the machining industry. (Critical Thinking)
- Summarize business practices, principles and application of associated technical skill in the machining in industry. (Specialized Knowledge)
- Apply the necessary machining skill sets to perform specified manufacturing processes. (Applied Learning)
- Determine ethical and civil responsibility necessary for employees in the machining industry. (Specialized Knowledge)

Entry Level Machining, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Entry Level Machining
Program Code: 1127

About This Program . . .

Entry Level Machining program introduces manufacturing, print reading/sketching, and machining. Produces machined parts by operating a computer numerical control (CNC) machine; maintaining quality and safety standards; keeping records; maintaining equipment and supplies.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Use written and oral communication skills needed for entry-level employment in the manufacturing industry. (Communication Fluency)
- Demonstrate basic manufacturing print reading/sketching and machining skills. (Applied Learning)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Machine and Manufacturing Trades, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Manufacturing Technology

Specialization: Machine and Manufacturing Trades

Program Code: 1337

About This Program . . .

This program offers classroom instruction and related lab work with hands-on activities in the use of tools and the operation of equipment found in manufacturing. Students will work in the areas of blueprint reading, computer numerical control (CNC) machining, general machining and maintenance, computer-aided drafting (CAD), and related mathematics. This course is designed to meet competency-based standards set by the industry. Attitude and quality of workmanship is stressed. Career options include entry level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician, and manufacturing inspection technician.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Use written and oral communication skills needed for entry level employment in the manufacturing industry (Communication Fluency).
- Summarize business practices, principles and application of associated technical skill in the machining industry (Specialized Knowledge).
- Apply the necessary machining skill sets to perform specified manufacturing processes (Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Manual Machinist, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Manufacturing Technology

Specialization: Manual Machinist

Program Code: 1128

About This Program . . .

WCCC's Manual Machinist program provides an intensive overview of skills necessary to perform manual machining. Students learn how to apply industrial knowledge and skills work holding, math, inspection, safety, machining, materials, quality, grinding, and assembly to work as a Manual Machinist.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Distinguish between tolerances and dimensions, as used in the machining industry. (Quantitative Literacy)
- Apply the necessary Manual machining skill sets to perform specified manufacturing processes.(Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

Mechanical Drafting, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Mechanical Drafting
Program Code: 1177

About This Program . . .

In this Technical Certificate, students learn drafting concepts and the processes of orthographic projection, pictorial drawing, dimensioning, and geometric construction by hand and with CAD software and equipment. Students will also gain fundamental knowledge of mechanical drafting. The majority of a student’s work will be completed on the computer. A project in the area of the student’s interest will tie the course to real world concepts.

For more information on what you can do with this major, visit WCCC’s [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply principles of grammar and vocabulary in the documentation required to perform the duties of a Mechanical Drafting technician

and interviewing clients and communicating with constituents. (Communication Fluency)

- b. Apply mathematical concepts and practices that are required to properly perform calculation for design. (Quantitative Fluency)
- c. Interview clients, to help decide on materials, size and design, based on client's needs and students' knowledge of the industry. (Critical Thinking)
- d. Demonstrate mastery of terminology in the Mechanical drafting industry. (Specialized Knowledge)
- e. Demonstrate mastery of Specific Mechanical Design CAD software and generate substantially error free designs. (Specialized Knowledge)

Requirements

Welding Technology, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Manufacturing Technology

Specialization: Welding Technology

Program Code: 1338

About This Program . . .

This Welding Technology program is designed to provide training and opportunity to become proficient at SMAW, GMAW, GTAW, FCAW, OAC, PAC, blueprint reading, fabrication, layout, mathematics, and safety. This program offers classroom lecture and related lab work. Students study welding, cutting, layout, fabrication and technical math. Safety, attitude and quality of workmanship are stressed throughout this course. The welding certificate prepares students for entry level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program prepares students to become AWS certified welders in the welding industry.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Apply business communication using listening, verbal and written forms that are needed for entry level employment in the industry. (Communication Fluency)
- b. Apply Mathematical concepts to meet entry level employment requirements. (Quantitative Fluency)
- c. Research, evaluate, synthesize and apply information/data relevant to the industry. (Critical Thinking)
- d. Demonstrate knowledge of welding terminology, symbols, business practices, principles and application of associated technical skills (Specialized Knowledge/Applied Learning)
- e. Perform the necessary applied welding skill sets to fulfill the needs of entry level employment. (Applied Learning)
- f. Demonstrate ethical and civic responsibility necessary for employees in the industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(33 semester hours, a grade of "C" or higher is required for all WELD courses.)

- Students in Welding may be required to purchase approximately \$500.00 in tools and personal safety welding equipment. This does not include required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

Mass Communication

Program Description

The Mass Communication program provides students with a concentration in media strategies and applications. A series of core classes offer students the opportunity to develop the knowledge, theory, and skills that prepare them for the ever-changing, broad field of mass communication. Students have the opportunity to take a wide range of elective courses that focus on audio and video production, journalism, public relations, and emerging content creation, such as managing social media platforms. In addition, all students work with at least one of the campus student media organizations or clubs (CMU-TV, KMSA radio, *The Criterion* newspaper, *Horizon Magazine*, Photo Club, Society for Professional Journalists, or the PR Club) as well as an outside media business or client for an internship to gain real-world experience. The Mass Communication program prepares graduates to enter graduate school and/or find successful careers across the country in traditional mass media (magazines, newspapers, radio, TV stations, public relations, and advertising), as well as in non-traditional settings such as online media, non-profits and government agencies.

Media Strategies and Applications, Mass Communication (BA)

Degree: Bachelor of Arts
Major: Mass Communication
Concentration: Media Strategies and Applications
Program Code: 3256

About This Major . . .

The Bachelor of Arts degree in Mass Communication is a concentration in Media Strategies and Applications. The overriding goal of the program is to offer students opportunities to develop the knowledge, theory and skills that will assist them in securing careers in the ever-changing fields of mass communication.

Graduates of Colorado Mesa University's Mass Communication program establish successful careers in media (magazines, newspapers, radio,

television, public relations, advertising, and Internet-based media), as well as in other venues such as non-profit organizations, and government agencies.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Apply specific paradigms for critical thinking to mass communication. (Critical Thinking)
- b. Evaluate and apply diversity, objectivity, and balance to any form of mass communication. (Critical Thinking)
- c. Justify the decision for resolving moral or ethical mass communication dilemmas. (Specialized Knowledge)
- d. Write compelling content that demonstrates proper grammar, well-organized facts, and story-telling techniques for a variety of media. (Communication Fluency)
- e. Determine validity of sources and research techniques and interpret data. (Quantitative Fluency)
- f. Evaluate mass communication theories and assess their use. (Specialized Knowledge)
- g. Demonstrate proper application of industry tools and techniques common to mass communication. (Applied Learning)
- h. Determine the best methods and strategies for developing a message. (Communication Fluency)
- i. Reflect on and respond to ethical, social, civic, and/or environmental challenges at local, national, and/or global levels (Personal and Social Responsibility)
- j. Find relevant sources of information, evaluate information critically, and apply information appropriately and effectively to specific purposes (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.

- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Mass Communication (Minor)

Minor: Mass Communication
Program Code: M250

About This Minor. . .

The Bachelor of Arts degree in Mass Communication is a concentration in Media Strategies and Applications. The overriding goal of the program is to offer students opportunities to develop the knowledge, theory and skills that will assist them in securing careers in the ever-changing fields of mass communication.

Graduates of Colorado Mesa University's Mass Communication program establish successful careers in media (magazines, newspapers, radio, television, public relations, advertising, and Internet-based media), as well as in other venues such as non-profit organizations, and government agencies.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(19 semester hours, must maintain a 2.50 cumulative GPA or higher.)

Code	Title	Semester Credit Hours
MASS 110	Mass Media: Impact and History-GTAH2	3
MASS 140	Media Theory Introduction	3
MASS 144	Multimedia Storytelling	3
MASS 213	Introduction to Media Writing and Reporting	3
MASS 397	Practicum	1
Select six hours of Upper Division Mass Communication (MASS) electives ¹		6
Total Semester Credit Hours		19

¹ See the current catalog for a full list of courses. May also use ENGL 392.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards

a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Arts Media Communication (Professional Certificate)

Overview

Award: Professional Certificate
Program of Study: Arts Media Communication
Program Code: 1704

About This Program . . .

The Arts Media Communication certificate offers students a valuable and focused skill set that combines arts critiques, media writing, and common technology used in the field. Many modern occupations require knowledge of producing media content across different platforms and/or working with the media.

In the Arts Media Communication certificate, students will craft a unique voicing for their media content. They will learn to create dynamic content for many different types of audiences, and they will gain real world experience with interviewing and interacting with varied arts communities both on campus and off campus.

Students will choose from a collection of art courses with the option to focus on their desired forms and mediums (music, dance, film, etc.), and learn about those histories. Then they will learn how to write for the media, with a focus in learning to write about (and for) the arts. Finally, students will gain real-world experience by working with a publication on campus, as well as with an arts focused off-campus client through an internship.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Place a work of artistic expression in a useful historical context. (Specialized Knowledge)
- Navigate ethical dilemmas within the field of Arts Journalism. (Ethical Reasoning)
- Interpret and critique aesthetic expressions. (Critical Thinking)
- Create and edit a range of media content using industry standards for multiple platforms. (Applied Knowledge).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Mathematics

Program Description

An **Associate of Science in Mathematics** provides students with a reasonable exposure to foundational college-level mathematics. This degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at most public institutions in Colorado. By completing this degree, students should be able to matriculate into a baccalaureate degree in mathematics with only 60 additional hours of coursework.

Pursuing a **Baccalaureate degree in Mathematics**, students develop powerful problem-solving, logical, and critical thinking skills. By completing the required coursework, students gain an appreciation of the nature of proof, a broad general understanding of mathematics, and a deep comprehension of at least one area of mathematics. Math majors also develop independent learning skills and oral and written mathematical communication skills. Mathematics majors get jobs in a wide variety of areas. CMU graduates have worked for local businesses, have run their own businesses, and have worked for scientific companies. Other graduates have continued their educations by attending graduate school (in mathematics, computer science, and engineering), law school, medical school, and veterinary school.

Students who pursue a **Baccalaureate degree in Mathematics with a concentration in Applied Mathematics** will develop powerful problem-solving, logical, and critical thinking skills. Students will use methods of applied mathematics from areas including modeling, linear algebra, ordinary and partial differential equations, numerical methods, computer programming, and statistics to model and solve applied problems. Students will also gain an understanding of the nature of proof and will complete a senior capstone project that includes developing research skills, writing skills, and presentation skills. Applied mathematics graduates can choose to find work in a variety of areas within business, industry, and government or may choose to continue their educations by attending graduate school in areas such as applied mathematics, computer science, and engineering.

The **Baccalaureate degree in Mathematics with a concentration in Secondary Education** will prepare students to teach in both middle schools and high schools. While completing this degree, students develop problem-solving and critical thinking skills and are introduced to the logical and historical development of mathematical ideas. Students also learn the professional skills in teaching methods and content necessary for secondary mathematics teachers. Nationally recommended curriculum guidelines are followed in order to ensure that graduates have the mathematical content and conceptual understanding necessary for all high school mathematics courses. Graduates from this program are in demand both locally and statewide with the scarcity of mathematics teachers.

With a **Baccalaureate degree in Mathematics with a concentration in Statistics**, students develop problem-solving, logical, and critical thinking skills. While completing the required coursework, students gain an appreciation of the nature of proof, a general understanding of mathematics, and a knowledge of statistical reasoning, necessary assumptions, and the correct use of statistical analysis procedures. Students also develop statistical software skills and oral and written mathematical communication skills. The statistics concentration in mathematics prepares students for graduate work in statistics or to enter the job force. With some additional job-specific training, students entering the job market could function as applied statisticians working in areas such as actuarial science, wildlife management, marketing, quality control, and epidemiology to name a few.

With a **Baccalaureate degree in Mathematics with a concentration in Actuarial Science**, students develop problem-solving, logical, and critical thinking skills. While completing this degree, students develop a general understanding of mathematics and a knowledge of statistical reasoning including the use of statistical software to aid in problem-solving and investigation, applying appropriate statistical procedures, and drawing valid statistical conclusions. Coursework in economics and finance also helps prepare students for graduate work in actuarial science or to enter the job force. After graduation and upon the successful completion of the Society of Actuaries Probability Exam and Financial Mathematics Exam, individuals entering the job market could function as actuaries in the insurance field or as applied statisticians working in areas such as risk management and marketing.

A **Minor in Mathematics** is a natural enhancement to many majors outside mathematics where an understanding of mathematics is needed (e.g., physics, computer science, chemistry, biology, geology). A minor in mathematics enables non-mathematics majors to complete a focused course of study in mathematics on a smaller scale.

A **Minor in Statistics** is a natural enhancement to many majors outside statistics where an understanding of statistical analysis of data is needed (e.g., biology, business, psychology, sociology, history, human performance and wellness, political science). A minor in statistics enables students to complete a focused course of study in statistics on a smaller scale.

The **Graduate Certificate in Applied Mathematics** is intended to provide licensed secondary mathematics teachers the credentials required by the Higher Learning Commission to teach concurrent enrollment classes and to enable other professionals to enhance their knowledge of applied mathematics. For more complete program information: [Applied Mathematics \(Graduate Certificate\)](#) (p. 341). *[This program is inactive and is not currently accepting applicants.]*

Actuarial Science, Mathematics (BS)

Degree: Bachelor of Science
Major: Mathematics
Concentration: Actuarial Science
Program Code: 3438

About This Major...

The actuarial science concentration in mathematics prepares students for graduate work in actuarial science or to enter the job force. With some additional job-specific training, students entering the job market could function as actuaries in the insurance field or as applied statisticians working in areas such as risk management and marketing.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct multi-step problem-solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
- Use statistical software (including calculators) to aid in problem-solving and investigation, and recognize its limitations. (Applied Learning, Critical Thinking)
- Apply appropriate statistical procedures and defend chosen assumptions. (Applied Learning, Personal and Social Responsibility)
- Draw statistical conclusions and evaluate the validity of others' reported conclusions. (Critical Thinking, Information Literacy)

- Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
- Communicate technical analyses to non-specialists. (Communication Fluency)
- Apply concepts of finance, economics, and risk management in statistical decision making. (Specialized Knowledge, Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Applied Mathematics, Mathematics (BS)

Degree: Bachelor of Science

Major: Mathematics

Concentration: Applied Mathematics

Program Code: 3437

About This Major . . .

Applied mathematicians use mathematics to solve problems. This program provides mathematics coursework commonly found in applied math settings. Applied mathematics graduates can choose to find work in a variety of areas, or may choose to continue their educations by attending graduate school in areas such as applied mathematics, computer science and engineering.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource and the [Society for Industrial and Applied Mathematics](#) career information web page.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Use methods of applied mathematics to model and solve applied problems (Specialized Knowledge, Applied Learning, Quantitative Fluency)
- Use mathematical software (including calculators) to aid in problem-solving and investigation, and recognize its limitations. (Applied Learning)
- Prove propositions deductively from definitions and theorems, using clear and precise prose. (Critical Thinking)
- Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
- Research an advanced topic in applied mathematics and deliver written and oral presentations. (Specialized Knowledge, Communication Fluency, Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Mathematics (BS)

Degree: Bachelor of Science
Major: Mathematics
Program Code: 3424

About This Major . . .

Mathematics majors get jobs in a wide variety of areas. Our graduates have worked for local businesses, have run their own businesses, and have worked for scientific companies. Other graduates have continued their educations by attending graduate school (in mathematics, computer science and engineering), law school, medical school, and veterinary school.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource and the [Mathematics](#) website.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct multi-step problem-solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
- Use mathematical software (including calculators) to aid in problem-solving and investigation, and recognize its limitations. (Applied Learning)
- Prove propositions deductively from definitions and theorems, using clear and precise prose. (Critical Thinking)
- Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
- Research an advanced topic in mathematics and deliver written and oral presentations. (Specialized Knowledge, Communication Fluency, Information Literacy)

Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and

should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Secondary Education, Mathematics (BS)

Degree: Bachelor of Science

Major: Mathematics

Concentration: Secondary Education

Program Code: 3430

About This Major . . .

The major in mathematics with a concentration in secondary education will prepare students to teach in both middle schools and in high schools.

While completing this degree, students develop problem-solving and critical thinking skills and are introduced to the logical and historical development of mathematical ideas. Students also learn the professional skills in teaching methods and content necessary for secondary mathematics teachers. Nationally recommended curriculum guidelines are followed in order to ensure that graduates have the mathematical content and conceptual understanding necessary for all high school mathematics courses. Graduates from this program are in great demand both locally and statewide with the scarcity of

Important information for this program:

- 2.80 cumulative GPA or higher required in all CMU coursework.
- 2.80 cumulative GPA or higher required in coursework toward the major content area.
- All EDUC prefix courses must be completed with a grade of "B" or better.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
- A grade of "C" or better must be earned in all required courses, unless otherwise stated.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource and the [Mathematics](#) website.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Mathematics Outcome 1: Construct multi-step problem solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
- b. Mathematics Outcome 2: Use mathematical software (including calculators) to aid in problem-solving and investigation, and recognize its limitations. (Applied Learning)
- c. Mathematics Outcome 3: Prove propositions deductively from definitions and theorems in clear and precise prose. (Critical Thinking)
- d. Mathematics Outcome 4: Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
- e. Mathematics Outcome 5: Demonstrate familiarity with the logical and historical development of mathematics and the implications of this development. (Specialized Knowledge)
- f. Mathematics Outcome 6: Research a topic in mathematics education and deliver written and oral presentations. (Specialized Knowledge, Communication Fluency, Information Literacy)
- g. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- h. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- i. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- j. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- k. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 2.80 cumulative GPA or higher required in all CMU coursework.

Essential Learning Requirements

(31 semester hours, must pass all courses with a grade of "C" or higher, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
English ¹		
ENGL 111	English Composition I-GTC01	3
ENGL 112	English Composition II-GTC02	3
Mathematics ²		
MATH 119	Precalculus Mathematics-GTMA1 (or higher) ^{3,4}	3
History

Humanities		
Select one Humanities course		3

Social and Behavioral Sciences		
PSYC 233	Human Growth and Development-GTSS3 ⁵	3
Select one Social and Behavioral Sciences course ⁶		3
Fine Arts		
Select one Fine Arts course		3
Natural Sciences⁷		
Select one Natural Science course with lab		4
Select one Natural Science course		3
Total Semester Credit Hours		31

¹ Must receive a grade of "B" or better and must be completed by the time the student has 60 semester hours.

² Must receive a grade of "C" or better, must be completed by the time the student has 60 semester hours.

³ MATH 119 is a 5 semester credit hour course. 3 credits apply to the Essential Learning requirements and 2 credits apply to elective credit.

⁴ May also satisfy this requirement by completing both MATH 119A: Algebra for Calculus (4 credits) and MATH 119B: Trigonometry for Calculus (3 credits).

⁵ Must receive a grade of "B" or higher.

⁶ GEOG 103 - World Regional Geography (3) recommended.

⁷ One course must include a lab.

Other Lower Division Requirements

Must pass all courses with a grade of "C" or higher, unless otherwise noted.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and

should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Statistics, Mathematics (BS)

Degree: Bachelor of Science

Major: Mathematics

Concentration: Statistics

Program Code: 3434

About This Major . . .

The statistics concentration in mathematics prepares students for graduate work in statistics or to enter the job force. With some additional job-specific training, students entering the job market could function as applied statisticians working in areas such as actuarial science, wildlife management, marketing, quality control, and epidemiology to name a few.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct multi-step problem-solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
- Use statistical software (including calculators) to aid in problem-solving and investigation, and recognize its limitations. (Applied Learning, Critical Thinking)
- Apply appropriate statistical procedures and defend chosen assumptions. (Applied Learning, Personal and Social Responsibility)
- Draw statistical conclusions and evaluate the validity of others' reported conclusions. (Critical Thinking, Information Literacy)
- Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)

- Perform advanced statistical analysis on real data and deliver written and oral presentations (Specialized Knowledge, Communication Fluency, Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

Mathematics, Liberal Arts (AS)

Degree: Associate of Science

Major: Liberal Arts

Emphasis: Mathematics

Program Code: 2425

About This Major . . .

The Associate of Science (A.S.) degree with an emphasis in mathematics provides students with a reasonable exposure to foundational college-level mathematics. The A.S. is the appropriate choice for students who will take upper division coursework in mathematics, biological sciences, and physical sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at most public institutions in Colorado. By completing this degree, students should be able to matriculate into a baccalaureate degree in mathematics with only 60 additional hours of coursework.

Important information for this degree:

- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource and the [Mathematics](#) website.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct multi-step problem-solving strategies, and communicate solutions effectively in written form. (Specialized Knowledge/Quantitative Fluency)
- Use mathematical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

Total Semester Credit Hours		60-62

¹ Students that intend to continue with Colorado Mesa University should also take ESSL 290 and ESSL 200 during the final semester of their Associate of Science work.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It

is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Mathematics (Minor)

Minor: Mathematics
Program Code: M460

About This Minor. . .

A minor in mathematics is a natural enhancement to many majors outside mathematics where an understanding of mathematics is needed (e.g. physics, engineering, computer science, chemistry, biology, geology).

A minor in mathematics enables non-mathematics majors to complete a focused course of study in mathematics on a smaller scale.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(19-24 semester hours)

Code	Title	Semester Credit Hours
MATH 152 or MATH 136	Calculus II Engineering Calculus II	4-5
Complete two courses from Group A OR two courses from Group B:		6-8
Group A:

Mechanical Engineering Program Description

Colorado Mesa University and the University of Colorado Boulder have created a partnership to deliver a mechanical engineering program in its entirety in Grand Junction. The CMU/CU Boulder Mechanical Engineering Partnership Program prepares students for careers in a wide range of industries through the rigorous study of mechanical engineering. Students completing the program will be awarded a Bachelor of Science in Mechanical Engineering degree from CU Boulder.

Special Requirements

Students enter CMU as "pre-engineering" majors. They may apply to the Mechanical Engineering Partnership Program:

- After one year at CMU if they have completed a two-course sequence in calculus and a two-course sequence in physical science with As or Bs and have an overall GPA of 3.0 or better, or

- After completing all required lower-division coursework at CMU with a GPA in technical courses (calculus, science, and engineering) of 3.0 or better

Interested students can learn more about the program and admission options on the [Department of Computer Science and Engineering website](#).

Contact Information

Confluence Hall

Mechanical Engineering, CMU/CU-Boulder Partnership Program (BSME)

Degree: Bachelor of Science in Mechanical Engineering
Major: Mechanical Engineering
Program Code: 3451

This section provides a link to information for the CMU/CU Boulder Mechanical Engineering Partnership Program. An official review of your coursework will be performed by CU administration to ensure completion of all graduation requirements.

Important information for this program:

- All Math, Science and Engineering courses completed at CMU must be completed with a grade of "C" or better to be eligible to transfer to CU Boulder.
- Minimum credits taken from CU Boulder: 45 hrs
- Minimum credits to graduate: 128 hrs

[More information for CMU/CU Boulder Partnership Degree in Mechanical Engineering](#)

Mechanical Engineering Technology

The Bachelor of Science in Mechanical Engineering Technology degree is accredited by the ETAC Accreditation Commission(s) of ABET, <https://www.abet.org>, under the General Criteria and the Mechanical Engineering Technology Program Criteria.

Program Description

The **Bachelor of Science in Mechanical Engineering Technology** aims to provide the knowledge necessary to apply state-of-the-art techniques to design and build products and systems to meet the current and future needs of society. The mechanical engineering technology major is designed for a student who is a doer or implementer—one who is able to apply mathematics, the natural and engineering sciences, engineering principles and current engineering practices to the solution of design problems and to the operation and testing of mechanical systems.

Laboratory courses are an integral component of the mechanical engineering technology program and are designed to develop student competence to apply experimental design methods, as well as provide a “hands-on” approach to designing and building products and systems to meet the current and future needs of society.

The **Associate of Applied Science in Mechanical Engineering Technology** provides graduates the skills and knowledge for a successful transition to either a career as a mechanical engineering technician or to continue in the Bachelor of Science program.

Mechanical Engineering Technology (BS)

Degree: Bachelor of Science
Major: Mechanical Engineering Technology
Program Code: 3453

About This Major . . .

The objective of the Mechanical Engineering Technology Program (MET) is to provide the knowledge necessary to apply state-of-the-art techniques to design and build products and systems to meet the current and future needs of society. The Bachelor of Science Degree in Mechanical Engineering Technology is designed for a student who is doer or implementer - one who is able to apply mathematics, the natural and engineering sciences, engineering principles, and current engineering practices to the solution of design problems and to the operation and testing of mechanical systems.

The MET graduate applies established procedures that use current state-of-the-art techniques to work with mechanical systems. Laboratory courses are an integral component of the MET program and are designed to develop student competence to apply experimental design methods, as well as provide a “hands-on” approach to designing and building products and systems to meet the current and future needs of society. The employment of METs in manufacturing related areas should increase as the demand for improved machinery and machine tools grows and industrial machinery and processes become increasingly complex. Emerging technologies in biotechnology, and nanotechnology will create new job opportunities for METs. In addition to job openings from growth, many openings should result from the need to replace workers who leave the labor force.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline. (Critical Thinking/Applied Learning)
- Design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline. (Specialized Knowledge)
- Apply written, oral, and graphical communication in broadly defined technical and non-technical environments, and identify and use appropriate technical literature. (Information Literacy, Communication Fluency)
- Conduct standard tests, measurements, and experiments and analyze and interpret the results to improve processes. (Quantitative Fluency)
- Function effectively as a member as well as a leader on technical teams. (Specialized Knowledge)
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. (Ethical Reasoning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a

baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 127 semester hours for the BS in Mechanical Engineering Technology.
- Students must register for and complete the Fundamentals of Engineering (FE) exam at an NCEES-approved test center prior to graduation.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Mechanical Engineering Technology (AAS)

Degree: Associate of Applied Science
Major: Mechanical Engineering Technology
Program Code: 1453

About This Major . . .

The objective of the Associate of Applied Science (AAS) in Mechanical Engineering Technology (MET) is to provide the knowledge necessary to aid in the design and realization of products and systems to meet the current and future needs of society. Completion of this applied engineering technology program provides graduates with the skills and knowledge for a successful transition to either a career as a mechanical engineering technician or to the Bachelor of Science program in Mechanical Engineering Technology.

The AAS in MET is designed for a student who is a doer or implementer - one who is able to apply mathematics, the natural and engineering sciences, engineering principles, and current engineering practices to the operation and testing of mechanical systems. Laboratory courses are an integral component of the MET program and are designed to develop student competence to apply experimental design methods, as well as provide a "hands-on" approach to building products and systems.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply the knowledge, techniques, skills, and modern tools of engineering to engineering problems. (Critical Thinking/Applied Learning)
- Apply knowledge of mathematics, science, and technology to engineering problems. (Quantitative Fluency)
- Effectively use oral, written, and graphical communication skills to address both technical and non-technical audiences. (Communication Fluency)
- Apply the ethical standards of the discipline to engineering problems. (Personal and social responsibility)
- Develop scholarly arguments by locating, evaluating, applying, and synthesizing information from sociological and other social scientific sources. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 68 semester hours total for the AAS, Mechanical Engineering Technology.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements.

Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Mechatronics Program Description

The Mechatronics program is developed around the interface of mechanical and electrical systems frequently used in manufacturing. Other applied fields involve commercial and industrial companies that use automated mechanical and electrical systems to assemble, separate, monitor, and transfer products.

Through sequenced coursework, students learn how to integrate various types of electrical, pneumatic, and mechanical motors. Specifically, instruction focuses on the use of Program Logic Controller (PLC) programming and diagnostics. Students will also learn how to read and create schematics for mechanical-electrical component production and installation for real-world applications.

Ultimately, students will build functioning interdependent PLC-driven systems using hydraulic, pneumatic, electrical, and motor controls. Using this combination of software and hardware culminates in the construction of a fully functioning assembly line trainer to help students develop the design, implementation, and troubleshooting skills required across various industries. Hands-on experience is provided through our on-campus labs as well as the Sturm-ANB Bank Mobile Learning Lab, a state-of-the-art mobile lab, that incorporates modern manufacturing equipment and controllers to create a mini manufacturing floor specifically designed for learning. The Mobile Learning Lab is used

to provide experience in operations, troubleshooting, and repair of electromechanical systems.

Mechatronics (AAS)

Degree: Associate of Applied Science
Major: Mechatronics
Major Code: 1398

About This Major . . .

The Mechatronics program responds to a new and emerging career that trains technicians with "multi-craft" skills to work on robotic and "intelligent" equipment ranging from ATM machines to multi-million-dollar manufacturing cells. The skills taught include electrical, mechanical, and computer technologies. Mechatronics technicians will assist the design, development and engineering staff, and install, maintain, modify and repair mechatronic systems, equipment and component parts. The program combines academic training with hands-on activities.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate communication skills to include listening, speaking, writing and electronic formats.(Communication Fluency)
- Demonstrate ethical, civic, and work place responsibility as part of professional behavior.(Specialized Knowledge)
- Analyze and implement systems containing hardware and software components.(Specialized Knowledge)
- Demonstrate safe work habits in performance of tasks. (Applied Learning)
- Demonstrate basic troubleshooting skill sets and repair skill sets to fulfill the needs of entry-level employment. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- A minimum of 60 semester credit hours is required for the AAS in Mechatronics.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
Communication		
ENGL 111	English Composition I-GTC01	3
Select one of the following courses:		
ENGL 112	English Composition II-GTC02	3
SPCH 101	Interpersonal Communications	
SPCH 102	Speechmaking	
Mathematics		
MATH 108	Technical Mathematics (or higher) ¹	3
Other Essential Learning Core Courses		
Select one Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities course		3
Select one Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities course		3
Total Semester Credit Hours		15

¹ MATH 108 is a 4 semester credit hour course; however, if a student completes a higher-level, Essential Learning eligible MATH course at 3 semester credit hours, that course would fulfill the Mathematics Essential Learning requirement. If MATH 108 is completed, the extra one hour will count as a general elective hour.

Other Lower Division Requirements

Code	Title	Semester Credit Hours
Wellness Requirement		
KINE 100	Health and Wellness	1
KINA 1XX	Activity Course	1
Total Semester Credit Hours		2

Program Specific Degree Requirements

(43 semester hours, must earn a grade of "C" or better in each course)

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Mechatronics: Electronics Technician (Technical Certificate)

Overview

Award: Technical Certificate
 Program of Study: Mechatronics
 Specialization: Electronics Technician
 Program Code: 1197

About This Program . . .

Students enrolled in the Mechatronics Program learn a multitude of skills to help prepare them to enter a variety of careers: entry level employment as electronics technicians, process operators or technicians, related to computer systems, computer system administration and networking, electronics, and telecommunications engineering. Students begin the program studying basic core classes including communications, DC/AC circuitry, information technology hardware and software, and Cisco Systems Network training.

The coursework in this certificate is aligned with the Associate Level certification named the Associate Certified Electronics Technician (CeTa), given by the Electronics Technicians Association. This represents the electronics industry, which incorporates from the technician and educator to the corporate institution. Widely known for electronics certification programs and accredited by the International Certification Accreditation Council (ICAC), Program content has been structured to give a basic education to all graduates entering this field.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate and communicate safe work habits in performance of tasks of entry-level employment as an electronics technician.\ (Specialized Knowledge and Communication Fluency)\
- Demonstrate basic electrical/electronic circuit troubleshooting skill sets and repair skill sets to fulfill the needs of entry-level employment as an electronics technician.(Critical Thinking)
- Demonstrate use of programmable logic\ controller (PLC), to fulfill the needs of entry-level employment as an electronics technician.(Critical Thinking)\ \

**Medical Laboratory Technician
Program Description**

The Medical Laboratory Technician (MLT) Program at Colorado Mesa University is five semesters in length. Essential Learning requirements and foundation courses are taken the first year and summer and the second year consists mainly of MLT program courses, followed by one semester of clinical internship at an affiliated site in western Colorado. The Medical Laboratory Technician program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

The majority of MLT courses are delivered in a blended format. Lecture is delivered online with lab sessions held on campus. All MLT courses are taken concurrently for each semester offered and in sequence starting in the fall.

The student will receive an Associate of Applied Science degree upon successful completion of the program. The graduate is eligible to take the Medical Laboratory Technician national certification exam through the American Society of Clinical Pathologists (ASCP). A passing score on the ASCP exam will allow the student to use the credentials of MLT (ASCP) CM after their name.

Phlebotomy courses are also offered to non-degree seeking students on a permission and space available basis; see the health sciences department for additional information.

Special Requirements

Admission into the University does not guarantee admission into the medical laboratory technology program which requires a separate application submitted in the spring for fall semester courses. Students planning on enrolling in medical laboratory technology courses must submit additional requirements. See the [Health Sciences Department](#) for additional information.

Medical Laboratory Technician (AAS)

Degree: Associate of Applied Science
Major: Medical Laboratory Technician

Program Code: 1641

About This Major . . .

The Medical Laboratory Technician (MLT) Program at Colorado Mesa University is five semesters in length. Students complete Essential Learning, Program Specific Requirements, and Other Lower Division Requirements courses during the first year and summer. The MLTP program is competitive and requires a separate application process with selective admission requirements and set application deadlines. Students apply in the spring of the first year. Once accepted, the program is completed in three semesters and all program-specific MLT courses are taken concurrently for each semester offered and in sequence.

During the second year, students are enrolled in MLT theory and lab courses only. The MLT theory courses are delivered in a blended format, both online and in person. Weekly lab sessions are held on campus two days a week. The final semester of the program occurs during the fall semester of the third year. During this semester, students perform a clinical internship at an affiliated hospital located in western Colorado

Students successfully completing the program will receive an Associate of Applied Science as a Medical Laboratory Technician. Graduates are eligible to become nationally certified Medical Laboratory Technicians by examination through the American Society for Clinical Pathology (ASCP).

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate the theoretical knowledge and technical skills in the performance of routine laboratory testing. (Specialized Knowledge/ Applied Learning)
- Demonstrate error recognition and the ability to integrate and interpret analytical data and establish a course of action to solve problems. (Critical Thinking)
- Communicate courteously and effectively with laboratory personnel, other health care professionals, patients and the public. (Communication Fluency)
- Apply mathematical calculations and statistical methods to ensure the accuracy of laboratory test results. (Quantitative Fluency)
- Demonstrate laboratory practice standards in safety, professional behavior and ethical conduct. (Personal and Social Responsibility)
- Identify, utilize, and cite various sources of relevant medical laboratory information. (Information literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 71 semester hours total for the AAS, Medical Laboratory Technician.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated

requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Medical Office Assistant

Program Description

This program prepares individuals to perform routine clinical and administrative functions in healthcare facilities, primarily medical clinics or physician's offices. Students who successfully complete this program will be able to perform the administrative tasks of a medical receptionist and work in clinical areas by providing assistance with physical examinations, diagnostic tests, and treatment procedures. All students who successfully complete the program are eligible to take the national certification examination offered by the American Medical Technologists, a national certifying agency, to become a Registered Medical Assistant.

Students admitted to the Medical Office Assistant program must undergo a background check, submit proof of immunizations, and obtain professional liability insurance.

Medical Office Assistant (AAS)

Degree: Associate of Applied Science
Major: Medical Office Assistant
Program Code: 1396

About This Major . . .

This program prepares individuals to perform clinical and administrative functions in health care facilities, primarily medical clinics or physician's offices. Students successfully completing this program will be able to perform administrative tasks and work in the clinical areas by providing assistance with physical examinations, diagnostic tests, treatments, and procedures.

All students successfully completing the program are eligible to take the national certification examination offered by the American Medical Technologists, a national certifying agency, to become a Registered Medical Assistant.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate proficient client assessment and use of information management systems in the medical setting.
- Demonstrate accurate mathematical skills and quantitative reasoning as a base for patient care decisions.
- Demonstrate effective oral and written communication utilizing medical terminology, computerized technology, accurate documentation, and verbal expression.
- Provide safe, quality care by incorporating evidenced-based practice.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 61 semester hours total for the AAS, Medical Office Assistant.
- A minimum of 16 hours taken at CMU in no fewer than two semesters.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Medical Office Assistant (Technical Certificate)

Award: Technical Certificate

Program of Study: Medical Office Assistant

Program Code: 1158

About This Program . . .

This program prepares individuals to perform routine clinical and administrative functions in health care facilities, primarily medical clinics or physician's offices. Students successfully completing this program will be able to perform the administrative tasks of a medical receptionist and work in the clinical areas by providing assistance with physical examinations, diagnostic tests and treatment procedures.

All students successfully completing the program are eligible to take the national certification examination offered by the American Medical Technologists, a national certifying agency, to become a Registered Medical Assistant.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Locate, gather and organize evidence on an assigned topic. (Specialized Knowledge)
- Use program-level mathematical concepts and methods to understand, analyze, and explain issues in quantitative terms. (Quantitative Fluency)
- Make and defend claims in a well-organized, professional and/or oral presentation that is appropriate for a specific audience. (Communication Fluency)
- Identify and gather the information/data relevant to the essential question, issue and/or problem and develop informed conclusions. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 41 semester hours for the Technical Certificate in Medical Office Assistant.

Program Specific Certificate Requirements

(41 semester hours, must earn a grade of “C” or better in each course.)

Music

Program Description

The Bachelor of Music with Elective Studies in Business is designed for students who desire a career within the music industry. The comprehensive core curriculum in music includes courses in theory, history, literature, music technology, improvisation, applied study on the major instrument or voice, and ensemble performance. Also included are specialized courses in Music Industry and Marketing, Entrepreneurship, Arts Management, Electronic Music, and Advanced Music Technology. Required business courses include options in the areas of Marketing, Management, Accounting, Economics, and the Legal Environment of Business. Finally, an internship component provides the opportunity for students to gain real-world experience in the music industry areas of their choice. Professional success in the musical arts requires a comprehensive understanding of the new business models at work in our digital world. Our program seeks to provide this up-to-date information to enhance success for the student at every level.

The Bachelor of Music Performance is designed for those students who desire a performance-focused career. A strong core curriculum of musicianship courses includes music theory, history, literature, pedagogy, ensemble performance, and applied study. These courses develop the student's abilities and prepare them to perform in a plethora of venues. As a musician in the 21st Century, this degree also seeks to create excellent performers who create their own future. This program will train musicians with professional skills to make their own opportunities, shape their careers like entrepreneurs, produce their own performances, collaborate with artists from other genres and art forms and perform at a high artistic level. Training in the following areas will assist performers to create a meaningful career in music: identifying entrepreneurial opportunities in music and the creative sector, interdisciplinary collaborations, e-marketing your music, creating an artist's digital portfolio, video marketing, and independent business website.

The Music Education K-12 degree provides students with the knowledge, skills, and musicianship to become successful music educators in their intended career path (instrumental, vocal/choral, elementary music). Based on area of specialization, a student will choose Option 1: Instrumental and Keyboard Focus, or Option 2: Vocal Focus. Within these options, students take specific courses appropriate to their specialization in literature, instrumental techniques, advanced conducting, and teaching special ensembles. In addition to instrumental methods and two instrumental techniques courses, vocal majors take two courses in diction and vocal pedagogy to strengthen their knowledge and skill in the vocal/choral area of specialization.

The Bachelor of Arts in Music is a liberal arts degree with a breadth of general studies in English, Math, Humanities, Natural Sciences, History, Social and Behavioral Sciences and Fine Arts. Combined with courses in music theory, music history and literature, ensembles and applied studies, this curriculum provides a strong foundation that is integrated with 25 course credits of the student's choosing, allowing the flexibility to creatively design a personalized degree program. Students in this major have the ability to create a curriculum tailored to their

strengths and career interests that can focus on traditional music, contemporary commercial music, their own musical compositions, or an interdisciplinary program of study designed by the student.

The Bachelor of Arts in Music: Liberal Arts (Commercial Music) is a liberal arts degree focused on jazz and commercial music with a breadth of general studies in English, math, humanities, natural sciences, history, social and behavioral sciences and fine arts. Combined with courses in music business, music theory, contemporary music history and literature, commercial ensembles and applied studies, this curriculum provides a strong foundation as well as courses specifically tailored to jazz and commercial music.

The Minor in Instrumental Music offers students in other majors the opportunity to stay involved with music in college, gaining experience and skills in music lessons, ensembles, and academics. The minor includes three years of ensembles and lessons on an applied instrument; academic courses in music theory, appreciation, and literature; as well as an upper division elective.

The Vocal Music Minor provides training and performance opportunities for students seeking music development in voice as their secondary area of study. Fundamental studies in piano, music reading and theory, two years of voice lessons, three years of performing in choral ensembles, studies in diction and conducting, and performance training in opera scenes comprise this minor. Audition for acceptance into the Vocal Minor is required.

The Jazz Studies Music Minor provides the opportunity for students to obtain a comprehensive set of fundamental skills in the jazz area, including large-ensemble performance, small-group performance, improvisation, composition and arranging, history and literature, and private instruction. Music majors who add this minor will broaden their skill set and marketability beyond the classical music area, and non-music majors may add this minor as a secondary area of study. Entrance to the Jazz Studies Music Minor requires an audition and prior jazz experience.

Special Requirements

Students seeking admittance as a music major or minor must pass a performance audition, a music theory placement exam, and a piano proficiency assessment. Admission to Colorado Mesa University does not guarantee admission into a music degree program. Prospective music majors should consult the music department website or contact the music department for information about audition material and scheduling an audition with the faculty in their area of interest. Following the audition, students will be notified of audition results.

About This Major . . .

The Bachelor of Arts in Music is a liberal arts degree with a breadth of general studies in English, math, humanities, natural sciences, history, social and behavioral sciences and fine arts. Combined with courses in music theory, music history and literature, ensembles and applied studies, this curriculum provides a strong foundation that when innovatively integrated with 25 course credits of the student's choosing, allows the flexibility to creatively design a personalized degree program. Students in this major have the ability to create a curriculum tailored to their strengths and career interests that can focus on traditional music, contemporary-commercial music, their own musical compositions or an interdisciplinary program of study, designed by the student.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop and express music judgments through solo performance. (Critical Thinking)
- Use music knowledge to formulate insights, perspectives, or demonstrate practical applications relating to other disciplines. (Specialized Knowledge)
- Conduct research on a specialized topic in music that results in a well-organized document or oral presentation. (Communication Fluency)

Requirements

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

- Some Essential Learning credits will have to be completed in the junior year.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music: Commercial Music (BA)

Degree: Bachelor of Arts

Major: Music

Concentration: Commercial Music

Program Code: 3288

About This Major . . .

The Bachelor of Arts in Music: Liberal Arts (Commercial Music) is a liberal arts degree focused on jazz and commercial music with a breadth of general studies in English, math, humanities, natural sciences, history, social and behavioral sciences and fine arts. Combined with courses in music business, music theory, contemporary music history and literature, commercial ensembles and applied studies, this curriculum provides a strong foundation as well as courses specifically tailored to jazz and commercial music.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop and express music judgments through solo performance. (Critical Thinking)
- Use music knowledge to formulate insights, perspectives, or demonstrate practical applications relating to other disciplines. (Specialized Knowledge)
- Conduct research on a specialized topic in music that results in a well-organized document or oral presentation. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music Performance: Instrumental (BM)

Degree: Bachelor of Music
Major: Music Performance – Instrumental Performance
Program Code: 3285

About This Major . . .

The Bachelor of Music Performance is designed for those students who desire a performance-focused career. A strong core curriculum of musicianship courses includes music theory, history, literature, pedagogy, ensemble performance, and applied study. These courses develop the student's abilities and prepare them to perform in a plethora of venues. As a musician in the 21st Century, this degree also seeks to create excellent performers who create their own future. This program will train musicians with professional skills to make their own opportunities, shape their careers like entrepreneurs, produce their own performances, collaborate with artists from other genres and art forms, and perform at a high artistic level. Training in the following areas will assist performers to create a meaningful career in music: identifying entrepreneurial opportunities in music and the creative sector, interdisciplinary collaborations, e-marketing your music, creating an artist's digital portfolio, video marketing, and independent business website.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop and express music judgments through solo performances (Critical Thinking)
- Demonstrate knowledge of music history and music theory in oral and written presentations. (Communication Fluency)
- Synthesize knowledge of repertory and pedagogy specific to the student's instrument. (Specialized Knowledge)
- Create digital portfolio, and create their own marketing and/or business brand that reflects current trends in the music profession. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music Performance: Keyboard (BM)

Degree: Bachelor of Music

Major: Music Performance – Keyboard Performance

Program Code: 3286

About This Major . . .

The Bachelor of Music Performance is designed for those students who desire a performance-focused career. A strong core curriculum of musicianship courses includes music theory, history, literature, pedagogy, ensemble performance, and applied study. These courses develop the student's abilities and prepare them to perform in a plethora of venues. As a musician in the 21st Century, this degree also seeks to create excellent performers who create their own future. This program will train musicians with professional skills to make their own opportunities, shape their careers like entrepreneurs, produce their own performances, collaborate with artists from other genres and art forms and perform at a high artistic level. Training in the following areas will assist performers to create a meaningful career in music: identifying entrepreneurial opportunities in music and the creative sector, interdisciplinary collaborations, e-marketing your music, creating an artist's digital portfolio, video marketing, and independent business website.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop and express music judgments through solo performances (Critical Thinking)
- Demonstrate knowledge of music history and music theory in oral and written presentations. (Communication Fluency)

- c. Synthesize knowledge of repertory and pedagogy specific to the student's instrument. (Specialized Knowledge)
- d. Create digital portfolio, and create their own marketing and/or business brand that reflects current trends in the music profession. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for

your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music with Elective Studies in Business (BM)

Degree: Bachelor of Music
Major: Music with Elective Studies in Business
Program Code: 3281

About This Major . . .

The Bachelor of Music with Elective Studies in Business is designed for students who desire a career within the music industry. The comprehensive core curriculum in music includes courses in theory, history, literature, music technology, improvisation, and applied study on the major instrument or voice and ensemble performance. Also included are specialized courses in Music Industry and Marketing, Entrepreneurship, Arts Management, Advanced Music Technology and Electronic Music. Required business courses include the areas of Marketing, Management, Economics, and the Legal Environment of Business. Finally, an internship component provides the opportunity for students to gain real world experience in the music industry areas of their choice. Professional success in the musical arts requires a comprehensive understanding of the new business models at work in our digital world. Our program seeks to provide this up-to-date information to enhance success for the student at every level.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Develop and express music judgments through solo performances. (Critical Thinking)
- Create materials for effective marketing in the arts field. (Communication Fluency)
- Apply music industry concepts to an approved capstone, which may consist of a senior presentation and/or recital. (Applied Learning)
- Produce digital audio projects through multi-track recording, sequencing and editing using industry standard software. (Applied Learning)
- Identify ethical and social challenges in the music industry. (Personal and Social Responsibility)
- Find relevant sources of information, evaluate information critically, and apply the information appropriately and effectively to specific purposes. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

¹ Students only need to complete MUSA 129, MUSA 229, or MUSA 368. MUSA 129 and MUSA 229 are options for vocal students, and MUSA 368 is an option for instrumental students. For semesters in which these courses are listed, MUSA 129, MUSA 229, or MUSA 368 only need to be taken if two of the other options are not in the student's plan for progress to degree. This results in variation in hours suggested for enrollment for these semesters.

² Student must complete either MUSA 326 (offered in Fall only) or MUSA 327 (offered in Spring only), as well three credits of Music Electives. If a student opts to take MUSA 326 their Third Year/Fall Semester, then they should complete their Music Elective in Third Year/Spring Semester. Alternatively, if a student opts to take MUSA 327 in Third Year/Spring Semester, then they should complete their Music Elective in Third Year/Fall Semester.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It

is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Music Education K-12 (BME)

Degree: Bachelor of Music Education

Major: Music Education K-12

Program Code: 3282

About This Major . . .

The Music Education K-12 degree provides students with the knowledge, skills, and musicianship to become successful music educators in their intended career path (instrumental, vocal/choral, elementary music). Based on area of specialization, a student will choose Option 1: Instrumental and Keyboard Focus, or Option 2: Vocal Focus. Within these options, students take specific courses appropriate to their specialization in literature, instrumental techniques, advanced conducting, and teaching special ensembles. In addition to instrumental methods and two instrumental techniques courses, vocal majors take two courses in diction and vocal pedagogy to strengthen their knowledge and skill in the vocal/choral area of specialization.

Studies in music theory, history, literature, ensemble performance, and applied study give students a strong foundation on which to build a successful teaching career. Regardless of the student's area of specialization, all music education majors take classes in beginning conducting and instrumental, choral, and elementary techniques to develop the skills and knowledge needed for a rewarding career as a K-12 music educator. The combined skills and knowledge from these courses, in addition to the courses in the area of specialization, are applied during field experiences and the student teaching internship.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Music Education Outcome 1: Develop and express music judgments through solo performances. (Critical Thinking)
- b. Music Education Outcome 2: Identify current national and state music education standards. (Specialized Knowledge)
- c. Music Education Outcome 3: Demonstrate strategies associated with teaching general music curricula. (Specialized Knowledge)
- d. Music Education Outcome 4: Conduct research on a specialized topic in music that results in a well-organized document or oral presentation. (Communication Fluency)
- e. Music Education Outcome 5: Demonstrate teaching techniques in an instrumental or vocal setting. (Specialized Knowledge)
- f. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- g. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- h. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- i. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- j. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 126 semester hours required for the BME in Music Education K-12.
- 2.80 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

For this program, some Essential Learning credits will have to be completed in the junior year. See suggested course sequencing for more details.

Praxis II Exam Passed		
Total Semester Credit Hours		17

¹ While the total for this section reads 24-26, students must complete 25 hours. The variation is due to courses that differ for vocal versus instrumental and keyboard students.

² Students must select the option that aligns with their area of focus.

³ Must be completed with a grade of "B" or better.

⁴ Program Requirements: ENGL 111, ENGL 112, PSYC 233, EDUC 115 and EDUC 215 (all with a grade of "B" or better) and formal acceptance to the Teacher Education Program

All EDUC prefix courses listed above must be completed with a grade of "B" or better to progress through the program sequence. Students must pass the PRAXIS II exam in the content area prior to commencing the internship. Also, ALL other coursework toward the degree must be successfully completed prior to the internship.

Suggested Course Plan

Suggested 8-semester course sequencing

It is highly suggested to take summer and J-term courses to finish the degree in this time frame. Most students require remedial piano courses to meet their piano proficiency requirement as well.

While the total semester hours below reads 124-133, students in this program (both vocal and keyboard/instrumental) actually complete a minimum of 126 hours. This variation in the total hours count is due to differences in requirements for vocal versus instrumental and keyboard students and how specific course ranges reflect in the total count.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It

is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music: Jazz Studies (Minor)

Minor: Jazz Studies
Program Code: M213

About This Minor. . .

The Jazz Studies Music Minor provides the opportunity for students to obtain a comprehensive set of fundamental skills in the jazz area, including large-ensemble performance, small-group performance, improvisation, composition and arranging, history and literature, and private instruction. Music majors who add this minor will broaden their skill set and marketability beyond the classical music area, and non-music majors may add this minor as a secondary area of study. Entrance to the Jazz Studies Music Minor requires an audition and prior jazz experience.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music: Instrumental (Minor)

Minor: Music - Instrumental
Program Code: M210

About This Minor. . .

The Minor in Instrumental Music offers students in other majors the opportunity to stay involved with music in college, gaining experience and skills in music lessons, ensembles, and academics. The minor includes three years of ensembles and lessons on an applied instrument; academic courses in music theory, appreciation, and literature; as well as an upper division elective.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

Music: Vocal (Minor)

Minor: Music - Vocal
Program Code: M211

About This Minor. . .

The Vocal Music Minor provides training and performance opportunities for students seeking music development in voice as their secondary area of study. Fundamental studies in piano, music reading and theory, two years of voice lessons, three years of performing in choral ensembles, studies in diction and conducting, and performance training in opera scenes comprise this minor. Audition for acceptance into the Vocal Minor is required.

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course

sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24 semester hours)

Code	Title	Semester Credit Hours
MUSA 113	Fundamentals of Theory	3
or MUSA 114	Theory I-Introduction	
MUSA 116	Ear Training and Sightsinging I	2
MUSA 129	Singer's Diction I: English and Italian	1
MUSA 130	Class Piano I	2
MUSL 137	Voice ¹	1
MUSL 137	Voice ¹	1
MUSL 237	Voice ²	1
MUSL 237	Voice ²	1
MUSA 410	Vocal Pedagogy	3
MUSA 318	Vocal Literature	3
or MUSA 319	Choral Literature	

Complete 6 semester hours of MUSP Vocal Ensemble, 2 hours each at 100, 200, and 300 levels:

MUSP 1__	1
MUSP 1__	1
MUSP 2__	1

MUSP 2__	1
MUSP 3__	1
MUSP 3__	1
Total Semester Credit Hours	24

¹ MUSL 137 taken twice, 1 semester hour per semester = 2 semester hours

² MUSL 237 taken twice, 1 semester hour per semester = 2 semester hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Nurse Aide

Program Description

The Nurse Aide certificate program provides the student with entry-level skills required for employment as a nurse aide in a long-term care facility, an acute care facility, or a home health care agency. The special needs of the geriatric population are emphasized. Students who successfully complete this certificate qualify to take the National Nurse Aide Assessment Program Examination (NNAAP) in order to become certified and placed on the Colorado Nurse Aide Registry.

Instruction includes basic nursing skills, personal care skills, care of cognitively impaired clients, skills that meet the psycho-social and mental health needs of clients, and basic restorative services. Students gain an understanding of professional communication and interpersonal skills in healthcare, infection control, safety, and emergency procedures, promoting clients' independence, and respecting clients' rights. A minimum of 92 hours of training is required.

Students admitted to the Nurse Aide program must undergo a background check, submit proof of immunizations, and obtain professional liability insurance.

Nurse Aide (Technical Certificate)

Award: Technical Certificate
Program of Study: Nurse Aide
Program Code: 1602

About This Program . . .

This certificate is designed to provide the student with entry-level skills required for employment as a nurse's aide in a long-term care facility, an acute care facility or a home health care agency. Special needs of the geriatric population are emphasized. Students who successfully complete this certificate qualify to take the State Certification Examination. Instruction includes basic nursing assistant procedures, skills, restorative services, general household activities, patient care, safety, and emergency care. Students gain an understanding of the responsibilities involved in working with patients of all ages, in both wellness and illness, issues of mental health, patient rights, and patient/family interactions. A minimum of 92 contact hours of training is required.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Examine the professional certified nursing assistant's potential strength in various roles within the health care delivery system (Specialized Knowledge)
- Demonstrate skills outlined by the State board of Nursing for nursing assistants in regards to the five terminal competencies (Applied Learning)
- Discuss the characteristics that health care workers demonstrate that promote professionalism and explain the importance of each characteristic (Specialized Knowledge)
- Describe the ethical standards that govern the nursing profession in particular and the health care profession in general. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course

sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(5 semester hours, must maintain a 2.00 cumulative GPA or higher in coursework.)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Nursing Program Description

The practical nurse (PN) program is designed for students interested in entry-level positions in nursing. The PN program is accredited by the Accreditation Commission for Education in Nursing (ACEN) and has full approval by the Colorado State Board of Nursing. Completion of the PN program allows students to progress for advanced placement in the Bachelor of Science in Nursing (BSN) program. The PN program prepares the student to be a direct care giver in hospitals, and in long-term care and ambulatory care settings. This program has selective admission

requirements. Admission to the University does not guarantee admission to the program. A separate admission application to the program is required.

The LPN–BSN program is for licensed practical nurses (LPNs) seeking to become a baccalaureate-prepared registered nurse (RN). Graduates of the LPN-BSN program generally have more employment opportunities, compensation, and job security compared with graduates of the PN program. The LPN–BSN program is accredited by the Commission on Collegiate Nursing Education (CCNE) and has full approval by the Colorado State Board of Nursing. The LPN–BSN program prepares students to work as RNs in a variety of health care settings. This program has selective admission requirements. Admission to the University does not guarantee admission to the program. A separate admission application to the program is required. The LPN-BSN program begins in the spring each year and is completed in three semesters.

The RN-BSN program enrolls RNs with current unencumbered licenses from Associate Degree in Nursing (ADN) and diploma nursing programs. The RN-BSN student's prior coursework is considered in terms of the Colorado Nursing Articulation Agreements. The RN-BSN program offers a flexible, accelerated model of instruction using an on-line format. Courses are offered in 8-week modules. There are five start dates and students may take one or two classes per session. The RN-BSN program is accredited by the CCNE. Admission to the University does not guarantee admission to the program.

The four-year Bachelor of Science in Nursing (BSN) program was developed to prepare a professional nurse generalist for practice in a variety of healthcare settings. The program integrates nursing theory, practice, and science with a broad liberal arts education. Graduates of the program enter the nursing profession with the knowledge and skill necessary to provide high-quality nursing care. The program also provides the foundation for graduate study in nursing. The BSN program utilizes a holistic admissions process that includes completion of all prerequisite courses and evaluation of GPA and Kaplan Nursing School Entrance exam score. Applicants who meet the qualifications are invited to interview for possible acceptance into the program. More information about the admission process can be found on the Department of Health Sciences website (<https://www.coloradomesa.edu/health-sciences/index.html>). The baccalaureate degree program in nursing is accredited by the Commission on Collegiate Nursing Education (<https://www.aacnursing.org/CCNE>)

The Master of Science in Nursing (MSN) program prepares nurses for roles as family nurse practitioners (FNPs) or nurse educators (NEs) in healthcare or academic settings. MSN graduates formulate clinical, administrative, or policy decisions to promote health among patients, families, or communities along the continuum of wellness and illness. Students complete a capstone project, based on their clinical areas of interest and substantive expertise. Graduates may continue to doctoral education. Courses are delivered via an on-line format, allowing students to reside in their home communities. However, students travel to complete clinical hours (e.g., rural health). Objective standardized clinical exams (OSCEs), and graduate program student intensive (GPSI) sessions are held in both in-person and online formats. Admission to the university does not guarantee admission to the program. The MSN program is accredited by the CCNE.

The Doctor of Nursing Practice (DNP) degree is for nurses who are interested in an advanced practice role as a family nurse practitioner (FNP) and nurse leader in healthcare systems. DNP graduates are prepared as experts in the delivery of direct patient care and in health

systems change. The curriculum focuses on primary care across the life span, health policy, epidemiology, and evidence-based practice. Students must complete a DNP scholarly project which requires them to develop a systems-level intervention to address a gap in clinical practice. DNP courses are delivered on-line allowing students to reside in their home communities. However, students travel to complete clinical hours (e.g., rural health). Objective standardized clinical exams (OSCEs), and graduate program student intensive (GPSI) sessions are held in both in-person and online formats. Admission to the University does not guarantee admission to the program. The DNP program is accredited by the CCNE.

Special Requirements

Progression requirements: All nursing courses must be completed in sequence. In the traditional BSN program, all required 300-level courses must be completed before 400-level nursing courses may be taken. The graduate nursing programs (MSN and DNP) require a Bachelor of Science in Nursing degree from a nationally accredited institution.

Students transferring in credit for human anatomy and physiology taken at out-of-state accredited colleges/universities must provide evidence that these courses had separate laboratory components before the course can be accepted to fulfill program requirements.

High school courses in biology, chemistry and algebra are recommended. All non-nursing college courses must be completed before a student can be admitted to the nursing programs with the exception of the RN-BSN program. An admission committee selects students who best meet program requirements. All admission materials must be on file in the Department of Health Sciences prior to deadlines established for each program.

Application deadlines for each program are as follows:

- PN Program:
 - March 1 for fall entrance
- AAS Program
 - April 15 for fall entrance
- LPN–BSN Program:
 - September 15 for spring entrance
- BSN Program:
 - Spring and Fall applications: refer to application and checklist for deadline dates
- RN-BSN:
 - Five start dates, please see dates online
- MSN Program:
 - April 1 for fall entrance
- DNP Program:
 - April 1 for fall entrance

Undergraduate students must have a 2.0 (“C”) on a 4.0 scale or higher grade for all courses required for completion of the undergraduate nursing programs (PN, AAS, BSN, LPN-BSN, RN-BSN). This policy applies regardless of when the course was taken.

Graduate students must have a 3.0 (“B”) on a 4.0 scale or higher grade for all courses required for completion of the graduate nursing programs (MSN, DNP). This policy applies regardless of when the courses were taken. A “C” grade or lower in any required course will not count toward graduation requirements. See Graduate Programs section of this catalog for complete degree requirements.

Students admitted to nursing programs must undergo a background check and drug screening and must maintain CPR certification and professional liability insurance for clinical practice. Students in the RN-BSN program must also maintain a current unencumbered nursing license. Students enrolling in graduate (MSN, DNP) nursing clinical courses are required to hold unencumbered RN licenses in states where clinical rotations are completed. Graduate nursing students must maintain RN licenses, cardiopulmonary resuscitation (CPR) certification, liability insurance, and current vaccinations for the duration of their graduate studies.

Doctor of Nursing Practice - Family Nurse Practitioner (DNP-FNP)

Degree: Doctor of Nursing Practice
Program of Study: Family Nurse Practitioner (FNP)
Program Code: 9611

About This Program . . .

The Doctor of Nursing Practice (DNP) is designed for those nurses who are interested in assuming an advanced nursing practice role as a Family Nurse Practitioner (FNP). DNP graduates are prepared as clinical experts in the delivery of primary care, with a focus on critical thinking, leadership, and policy skills needed to advocate and create changes in healthcare practice at all individual (patient and family) and aggregate (organization, community, public policy) levels. The program includes 1000 hours of immersion in clinical practice to build and assimilate knowledge for advanced practice at a high level of complexity. These experiences provide the context within which the final DNP scholarly project is completed.

The DNP degree is built upon the generalist foundation acquired through a baccalaureate in nursing; advanced placement is also available for students with a prior master's degree in nursing. Graduates prepared for an advance practice role as a Family Nurse Practitioner will demonstrate practice expertise, specialized knowledge, and expanded responsibility and accountability in the care and management of individuals and families.

The program uses an online delivery format, providing flexibility for students to remain in their current work positions and home communities. Opportunities for personal interactions are included with faculty and peers in focused intensive sessions at selected points during the semester. Students will complete most clinical requirements in their home communities, but may need to travel for specialized clinical experiences including rural health care settings.

Important information about this program:

- Admission to the program follows the general admissions policies & procedures for graduate programs outlined in the university catalog.
- A bachelor's degree in nursing from a regionally accredited college or university is required, prior to beginning the program. Applicants must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.
- 78 Semester Hours are required for the Doctor of Nursing Practice Degree.
- Applicants must hold a current, unrestricted license to practice as a registered nurse in their state of practice.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU doctoral-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Build intra and interprofessional collaboration to improve health-care quality across diverse populations. (CMU 2)
- Compile and evaluate health care information systems to strengthen, support, or improve the health delivery system. (CMU 2)
- Interpret social justice, equity, and ethical policies in health care for complex decision making for individuals and populations. (CMU 6)
- Develop theoretical and scientific practice initiatives and/or policies for quality improvement to promote a culture of safety in diverse organizational cultures and populations. (CMU 1, 6)
- Modify complex clinical situations and health care systems through the integration and utilization of evidence-based practice to promote optimal outcomes. (CMU 3)
- Improve the delivery of care to individuals, families, and communities through advanced nursing science. (CMU 1, 4, 5)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print

Options. This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this degree:

- 78 semester hours are required for the Doctor of Nursing Practice degree.

Program Specific Requirements

(78 semester hours, no class grade lower than a "B" will be counted toward the degree. It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Adult-Gerontology Nurse Practitioner (MSN)

Overview

Degree: Master of Science in Nursing
Cognate: Adult-Gerontology Nurse Practitioner
Program Code: 8616

About This Program . . .

The Master of Science in Nursing (MSN) program Adult-Gerontology Nurse Practitioner cognate is designed for students wishing to practice as primary care nurse practitioners with adult and older adult populations. Graduates of MSN programs are prepared with additional knowledge and clinical expertise that builds on baccalaureate nursing practice. The MSN program at Colorado Mesa University is based on the Essentials: Core Competencies for Professional Nursing Education and the Standards for Quality Nurse Practitioner Education.

MSN graduates will be prepared to advance to higher levels of nursing education including Doctor of Nursing Practice (DNP), Doctor of Education (EdD), or Doctor of Philosophy in Nursing (PhD) programs. The MSN program is delivered via an online format, providing flexibility for students to remain in their home communities. However, students may need to travel for clinical rotations (e.g. rural health care) or focused intensive sessions during the program.

Graduates of the Adult-Gerontology Nurse Practitioner cognate are prepared for an advance practice role as an adult-gerontology primary care nurse practitioner. Graduates will demonstrate practice expertise, specialized knowledge, and expanded responsibilities in the care and management of adult and older adult populations, including those residing in rural or underserved areas.

Important information for this program:

- There are 42 credit hours for the MSN in Nursing: Adult-Gerontology Nurse Practitioner degree. Students are required to complete a minimum of 600 clinical hours.
- Students are expected to participate in objective structured clinical examinations (OSCEs) each semester. OSCEs are held both in person and virtually and are used to assess students' attainment of clinical competencies.
- Admission to the Graduate Nursing Program follows general admission policies and procedures for graduate programs outlined in the university catalog.
- A bachelor's degree in nursing (BSN) from an accredited college or university is required, prior to beginning the program. Applicants must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.
- Applicants must hold a current, unrestricted license to practice as a registered nurse (RN) in their state of practice.
- It is recommended that students work closely with their faculty advisors when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Discover nursing leadership skills and behaviors for communication and interprofessional collaboration. (Specialized Knowledge/Applied Learning, Communication Fluency)
- Analyze quality improvement initiatives to generate or evaluate data for the practice environment. (Quantitative Fluency)
- Utilize information literacy for interprofessional collaboration, learning, and practice. (Information Literacy)
- Evaluate legal, ethical, and regulatory processes that impact professional nursing practice. (Ethical reasoning)
- Create culturally relevant evidence-based health policy strategies for individual and aggregate populations. (Information Literacy)
- Synthesize nursing and related sciences for applied learning across diverse populations. (Specialized Knowledge; Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this program:

- 42 semester hours are required for the MSN in Nursing: Adult-Gerontology Nurse Practitioner degree.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Family Nurse Practitioner, Nursing (MSN)

Degree: Master of Science in Nursing

Major: Nursing

Cognate: Family Nurse Practitioner (FNP)

Program Code: 8615

About This Program . . .

The Family Nurse Practitioner program at the Master of Science in Nursing (MSN) level is designed for students wishing to practice as advanced practice nurses in primary care across the lifespan. Graduates of master's degree programs in nursing are prepared with additional

knowledge and clinical expertise building on baccalaureate nursing practice. The MSN program at Colorado Mesa University is based on the “Essentials of Masters Education for Advanced Nursing Practice” identified by the American Association of Colleges of Nursing.

MSN graduates will be prepared to advance to higher levels of nursing education including Doctor of Nursing Practice (DNP) or Doctor of Philosophy in Nursing (PhD) programs. The program is an online format, providing flexibility for students to remain in their current work positions and home communities. Opportunities for personal interaction are included with faculty and peers in focused intensive sessions at selected points during the program. Students are expected to participate in objective structured clinical examinations (OSCEs) each semester. OSCEs are held both in person and virtually and are used to assess students’ attainment of clinical competencies.

Graduates of the Family Nurse Practitioner cognate are prepared for an advance practice role as a Family Nurse Practitioner will demonstrate practice expertise, specialized knowledge, and expanded responsibility and accountability in the care and management of individuals and families.

Important information for this program:

- There are 47 credit hours for the MSN in Nursing: Family Nurse Practitioner.
- Admission to the program follows general admission policies and procedures for graduate programs outlined in the university catalog.
- A bachelor’s degree in nursing from a regionally accredited college or university is required, prior to beginning the program. Applicants must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.
- Applicants must hold a current, unrestricted license to practice as a registered nurse in their state of licensure.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- a. Discover nursing leadership skills and behaviors for communication and interprofessional collaboration. (Specialized Knowledge/Applied Learning, Communication Fluency)
- b. Analyze quality improvement initiatives to generate or evaluate data for the practice environment. (Quantitative Fluency)
- c. Utilize information literacy for interprofessional collaboration, learning, and practice. (Information Literacy)
- d. Evaluate legal, ethical, and regulatory processes that impact professional nursing practice. (Ethical reasoning)
- e. Create culturally relevant evidence-based health policy strategies for individual and aggregate populations. (Information Literacy)
- f. Synthesize nursing and related sciences for applied learning across diverse populations. (Specialized Knowledge; Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select “Print Options.” This will give you the options to either “Send Page to Printer” or “Download PDF of This Page.” The “Download PDF of This Page” option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master’s degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a “B” toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “[Graduate Degree Requirements](#) (p. 80)” in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this program:

- 47 semester hours are required for the MSN in Nursing: Family Nurse Practitioner (FNP) degree.

Nurse Educator, Nursing (MSN)

Degree: Master of Science in Nursing

Cognate: Nurse Educator

Program Code: 8614

About This Program . . .

The Master of Science in Nursing (MSN) degree provides graduates with a foundation for practice as an entry-level educator in health care systems or academic settings. MSN graduates are prepared with

additional knowledge and clinical expertise building on baccalaureate nursing practice. The MSN program at Colorado Mesa University is based on the "Essentials of Masters Education for Advanced Nursing Practice" identified by the American Association of Colleges of Nursing.

The MSN program is designed for students already possessing a baccalaureate degree in nursing and adds the first graduate step on the nursing career ladder at Colorado Mesa University. MSN graduates are prepared to advance to higher levels of nursing education including Doctor of Nursing Practice (DNP) or Doctor of Philosophy in Nursing (PhD) programs. The program is offered in an online format, providing flexibility for students to remain in their current work positions and home communities. Opportunities for personal interaction are included with faculty and peers in focused intensive sessions at selected points. Students are expected to participate in objective structured clinical examinations (OSCEs) each semester. OSCEs are held both in person and virtually and are used to assess students' attainment of clinical competencies.

Important information for this program:

- Admission to the MSN Nurse Educator program follows the general admissions policies & procedures for graduate programs outlined in the university catalog.
- A bachelor's degree in nursing from a regionally accredited college or university is required, prior to beginning the program. Applicants must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.
- 36 semester hours are required for the MSN Nurse Educator degree.
- Applicants must hold a current, unrestricted license to practice as a registered nurse in their state of practice.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- a. Discover nursing leadership skills and behaviors for communication and interprofessional collaboration. (Specialized Knowledge/Applied Learning, Communication Fluency)
- b. Analyze quality improvement initiatives to generate or evaluate data for the practice environment. (Quantitative Fluency)
- c. Utilize information literacy for interprofessional collaboration, learning, and practice. (Information Literacy)
- d. Evaluate legal, ethical, and regulatory processes that impact professional nursing practice. (Ethical reasoning)
- e. Create culturally relevant evidence-based health policy strategies for individual and aggregate populations. (Information Literacy)
- f. Synthesize nursing and related sciences for applied learning across diverse populations. (Specialized Knowledge; Critical Thinking)

LPN to BSN, Nursing (BSN)

Degree: Bachelor of Science in Nursing
Major: Nursing
Concentration: LPN-BSN Option
Program Code: 3610

About This Major . . .

The Bachelor of Science in Nursing (LPN-BSN option) is approved by the Colorado State Board of Nursing. This program is designed for Licensed Practical Nurses to achieve a bachelor of science in Nursing Degree, opening up greater employment opportunities, increased compensation, and more job security. The LPN-BSN program integrates nursing theory, practice and science with a liberal arts education. This program has selective admission requirements. It is the student's responsibility to obtain the current admission requirements.

All Essential Learning requirements, other lower-division requirements, and foundation courses must be in progress or completed before applying to the program with a C or higher. Additional admission requirements also apply. Please visit the [Department of Health Sciences' website](#) for a complete list of admission requirements and program information.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct a practice-based performance/project drawing on knowledge, skills, and attitudes specific to the discipline of nursing. (Specialized Knowledge)

- b. Employ quantitative reasoning in making judgments and reaching conclusions. (Quantitative Fluency)
- c. Make and defend assertions about a nursing practice topic in a well-organized evidence-based document or presentation. (Communication Fluency)
- d. Demonstrate critical thinking behaviors as a basis for practice. (Critical Thinking)
- e. Utilize information from relevant sources to improve health among diverse populations. (Information Literacy)
- f. Engage in ethical reasoning to provide optimal nursing care. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Nursing (BSN)

Degree: Bachelor of Science in Nursing
Major: Nursing
Program Code: 3611

About This Major . . .

The four-year Bachelor of Science in Nursing (BSN) program was developed to prepare a professional nurse generalist for practice in a variety of healthcare settings. The program integrates nursing theory, practice, and science with a broad liberal arts education. Graduates of the program enter the nursing profession with the knowledge and skill necessary to provide high-quality nursing care. The program also provides the foundation for graduate study in nursing. The BSN program utilizes a holistic admissions process that includes completion of all prerequisite courses and evaluation of GPA and Kaplan Nursing School Entrance exam score. Applicants who meet the qualifications are invited to interview for possible acceptance into the program. More information about the admission process can be found on the Department of Health Sciences website (<https://www.coloradomesa.edu/health-sciences/index.html>). The baccalaureate degree program in nursing, master's degree program in nursing, and Doctor of Nursing Practice program at CMU are accredited by the Commission on Collegiate Nursing Education (<https://www.aacnnursing.org/CCNE>).

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct a practice-based performance/project drawing on knowledge, skills, and attitudes specific to the discipline of nursing. (Specialized Knowledge)
- Employ quantitative reasoning in making judgments and reaching conclusions. (Quantitative Fluency)
- Make and defend assertions about a nursing practice topic in a well-organized evidence-based document or presentation. (Communication Fluency)
- Demonstrate critical thinking behaviors as a basis for practice. (Critical Thinking)
- Utilize information from relevant sources to improve health among diverse populations. (Information Literacy)
- Engage in ethical reasoning to provide optimal nursing care. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

RN to BSN, Nursing (BSN)

Degree: Bachelor of Science in Nursing
Major: Nursing
Concentration: RN-BSN Option
Program Code: 3613

About This Major . . .

The Registered Nurse to Baccalaureate of Science in Nursing (BSN) Program is accredited by the Commission on Collegiate Nursing Education (CCNE). This program is designed for Associate degree and Diploma RNs. Up to 38 credits from the Associate or diploma degree may transfer toward this BSN degree. The program provides educational experiences to prepare a professional nurse generalist to practice in a variety of health care settings. The program integrates nursing theory, practice, and science with a broad liberal arts education. The program has been developed to prepare a highly competent professional with the education necessary to meet the increasing need for quality health care in society today and provides students with the foundation for graduate study in nursing.

Colorado Mesa's BSN nursing program started in 1988 and has been fully accredited since its inception. The RN-BSN program began originally in 1979 and currently provides all nursing courses in an online format to provide better access to registered nurses.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Construct a practice-based performance/project drawing on knowledge, skills, and attitudes specific to the discipline of nursing. (Specialized knowledge)

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Nursing (AAS)

Degree: Associate of Applied Science
Major: Nursing
Program Code: 1615

About This Major...

This program, which is offered on the Montrose campus, allows the student to achieve an Associate of Applied Science in Nursing degree, opening up greater employment opportunities, increased compensation, and more job security. The Associate of Applied Science in Nursing program prepares the student to achieve a balance between general college and nursing education. The Associate of Applied Science in Nursing RN is prepared to be a direct caregiver in hospitals, long-term facilities, and ambulatory care-clinical settings.

This program has selective admission requirements. It is the student's responsibility to obtain the current admission requirements.

Important information for this program:

- All essential learning requirements and prerequisite courses must be in progress or completed before applying to the program. Additional admission requirements also apply. Please visit the Department of Health Sciences' website for a complete list of admission requirements and program information.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Exhibit professional nursing care to diverse patients across the life span. (Specialized Knowledge/Applied Learning)
- Utilize health information systems to provide safe patient care throughout the health care environment. (Specialized Knowledge/Applied Learning)
- Incorporate therapeutic communication into all interactions. (Communication Fluency)
- Incorporate evidence based practice in the application of care to provide safe quality outcomes. (Critical Thinking)
- Utilize principles of leadership and management skills in caring for patients throughout the lifespan. (Specialized Knowledge/Applied Learning)
- Display accountability utilizing ethical reasoning. Incorporate compassionate and empathetic behaviors while providing care. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 79 semester hours required for the AAS in Nursing.
- Must have a "C" or better in all courses.

Essential Learning Requirements

(15 Semester hours, must earn a grade of "C" or better in each course for this degree.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others

may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Practical Nursing (Technical Certificate)

Award: Technical Certificate
Program of Study: Practical Nursing
Program Code: 1612

About This Program . . .

This program is designed for students interested in becoming a Licensed Practical Nurse as an entry into the nursing career ladder program. Completion of the Practical Nurse Certificate allows students to progress on to the Bachelor of Science in Nursing, LPN to BSN program. The Practical Nursing program prepares the student to be a direct care giver in hospitals, long-term facilities, and ambulatory care-clinic settings.

This program has selective admission requirements. It is the student's responsibility to obtain the current admission requirements.

Important information about this program:

- All Essential Learning requirements and prerequisite courses must be in progress or completed before applying to the program. Additional admission requirements also apply. Please visit the [Department of Health Sciences' website](#) for a complete list of admission requirements and program information.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Promote a therapeutic environment supporting communication across the lifespan for vulnerable and diverse populations. (Communication Fluency)\
- Recognize changes, and responses to interventions while providing a safe environment. (Quantitative Fluency)\
- Implement the nursing process, utilizing critical thinking by collecting patient data, identifying patient needs, reporting findings, and providing input into the plan of care. (Specialized knowledge/Applied learning)\
- Utilize critical thinking skills in the application of the nursing process to provide safe quality care by incorporating evidence-based practice. (Critical Thinking)\
- Organize and incorporate assessment data collaboratively (using critical thinking) to plan/revise patient care based on established nursing diagnosis, assessments, and evaluation data. (Specialized knowledge/Applied learning)\ \
- Utilize data to ensure quality improvement and support of evidence-based practice. (Quantitative Fluency)\
- Demonstrate competent nursing practice within a legal and ethical framework providing effective and individualized patient care, which respects values, culture and expressed needs. (Specialized\ knowledge/Applied learning)\ \

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and

internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

- 58 semester hours for the Technical Certificate in Practical Nursing.

Essential Learning Requirements

(15 Semester Hours, must maintain a 2.0 cumulative GPA or higher for coursework in this area.)

Code	Title	Semester Credit Hours

¹ Students desiring to progress onto the LPN- Bachelor of Science should check with their advisor to develop a full time schedule of Essential Learning and program requirements during this first year.

² BIOL 209/BIOL 209L and BIOL 210/BIOL 210L must have been completed within five years prior to applying to the nursing program.

³ This course is counted with the Essential Learning courses, but is a prerequisite for the Licensed Practical Nursing program.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Occupational Therapy

The MS Occupational Therapy program prepares students with a baccalaureate degree to become qualified occupational therapists. The didactic portion of this program includes four terms of on-campus coursework followed by two terms of experiential and hybrid coursework. The program requires successful completion of academic courses

and integrated fieldwork concluding with two, 12-week offsite fieldwork experiences.

Admission Requirements:

A cumulative minimum grade point average (GPA) of 3.0 in undergraduate coursework and a minimum 2.7 GPA for prerequisite coursework are required from an accredited university. Evidence of completion of the Bachelor's degree and all prerequisites must be received prior to the start of the program. Please check with the CMU Occupational Therapy Program Director or the Occupational Therapist Centralized Application Service (OTCAS) for the complete list of additional admission requirements.

Contact Information

Occupational Therapy Program
113 St. Mary's Medical Education Center
970.248.1484

Accreditation

The profession's accrediting body, the American Occupational Therapy Association (ACOTE), has granted Candidacy status to this program. With Candidacy status, the first class of students were admitted for studies in January 2022. A required self-study of the program was submitted to ACOTE in November 2022. If granted Pre-Accreditation, ACOTE will perform an onsite visit in the Summer 2023 and the decision for full accreditation would follow in August 2023. If granted full accreditation, graduates of the program will be eligible to sit for the national certification examination for occupational therapists through the National Board for Certification in Occupational Therapy (NBCOT) and will be able to apply for licensure through the professional licensure board in the state in which the graduate wishes to practice.

ACOTE can be contacted at:

Accreditation Council for Occupational Therapy Education (ACOTE®)
6166 Executive Blvd., Suite 200
North Bethesda, MD 20852-4929

Programs of Study

Graduate

- [Occupational Therapy \(MS\)](#) (p. 612)

Occupational Therapy (MS)

Degree: Master of Science
Major: Occupational Therapy
Program Code: 8158

About This Program . . .

The MS Occupational Therapy program prepares students with a baccalaureate degree to become qualified occupational therapists.

The didactic portion of this program includes four semesters of on-campus coursework followed by two semesters of experiential and hybrid coursework. The program requires successful completion of academic courses and integrated fieldwork concluding with two, 12-week offsite fieldwork experiences.

Admission Requirements:

- Applicants must have achieved a minimum 3.0 cumulative grade point average overall or
- A minimum of 3.0 cumulative GPA of the last 60 credits may be considered for a holistic approach.
- If under a minimum of 2.7 GPA, there may be special consideration for a holistic approach.

Evidence of completion of the Bachelor's degree and all prerequisites must be received prior to the start of the program. Please check with the CMU Occupational Therapy Program Director or the Occupational Therapist Centralized Application Service (OTCAS) for the complete list of additional admission requirements.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Critically apply the latest research and knowledge bases that support occupational therapy practice and contribute to the growth and dissemination of research and knowledge. (Critical Thinking, Information Literacy)
- Articulate and apply therapeutic use of occupations with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings. (Communication Fluency, Critical Thinking)
- Develop and implement client-centered care that is inclusive of cultural values, beliefs and needs. (Specialized Knowledge)
- Articulate and apply occupational therapy theory and evidence-based evaluations and interventions to achieve expected outcomes as related to occupation. (Specialized Knowledge, Communication Skills)
- Plan and apply evidence-based occupational therapy interventions to address the physical, cognitive, functional cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts and environments to support engagement in everyday life activities that affect health, well-being, and quality of life, as informed by the Occupational Therapy Practice Framework (OTPF). (Critical Thinking, Specialized Knowledge)
- Employ therapeutic use of self and science driven evidence in all practice areas and settings inclusive of: a direct care provider, consultant, educator, manager, researcher, and advocate for the profession and the consumer. (Specialized Knowledge, Quantitative Fluency)

Accreditation

The profession's accrediting body, the American Occupational Therapy Association (ACOTE), has granted Candidacy status to this program. With Candidacy status, the first class of students were admitted for studies in January 2022. A required self-study of the program was submitted to ACOTE in November 2022. The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this degree:

- 76 semester hours required for the Master of Science in Occupational Therapy

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Outdoor Recreation Industry Studies Program Description

The Outdoor Recreation Industry Studies degree program prepares students to enter the world of outdoor industry business management, sales and marketing, adventure services, guide services, outdoor education, public lands management, conservation advocacy, and adventure leadership. The Outdoor Recreation Industry Studies degree program recognizes the multifaceted nature of the outdoor industry, combining a wide range of coursework in outdoor leadership, business management, innovation and entrepreneurship, adventure planning, hospitality, risk management, stewardship, and technical outdoor skills.

Through study and experience, students completing the degree in Outdoor Recreation Industry Studies will be prepared to work in one of the largest growing segments of the economy: the outdoor recreation industry. At more than 2% of the GDP and over \$880B in consumer spending per year, the outdoor recreation industry is a powerhouse economic driver that demands a highly skilled workforce. Students will gain qualifications for jobs in such fields as outdoor industry business, resort and ski area management, public lands work, outdoor education, camp administration, conservation nonprofits, professional guiding, and adventure filmmaking.

Outdoor Recreation Industry Studies (BS)

Degree: Bachelor of Science
Major: Outdoor Recreation Industry Studies
Program Code: 3151

About This Major . . .

The Outdoor Recreation Industry Studies degree program prepares students to enter the world of outdoor industry business management, sales, and marketing, adventure services, guide services, adventure programming, expedition planning and adventure leadership. The Outdoor Recreation Industry Studies degree program recognizes the multifaceted nature of the outdoor industry, combining a wide range of coursework in outdoor leadership, business management, innovation and entrepreneurship, adventure planning, tourism, risk management, stewardship and sustainability.

Through study and experience, students completing the degree in Outdoor Recreation Industry Studies will be prepared to work in one of the largest growing segments of the economy: the outdoor recreation industry. At more than 2% of the GDP and over \$880B in consumer spending per year, the outdoor recreation industry is a powerhouse economic driver that demands a highly skilled workforce. Students will gain qualifications for jobs in such fields as outdoor industry business-including retail and manufacturing- resort and ski area management, state and national park service, outdoor education, camp administration, and professional guiding.

For more information on what you can do with this major, visit Career Service's [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Critically evaluate historical, socio-economical, and philosophical aspects of the outdoor recreation industry. (Critical Thinking)
- Apply fundamental concepts of management, administration, marketing, finance, and economics to the outdoor recreation industry. (Applied Learning)
- Apply technical skills of survival, risk management, and leadership in outdoor settings. (Applied Learning)
- Construct codes of personal ethics and apply codes of professional and environmental ethics within the outdoor recreation industry profession. (Personal and Social Responsibility)
- Explain and navigate the relationships between the outdoor recreation industry and state/federal legislation, public lands and water, climate science, wildlife corridors, and regulatory agencies. (Critical Thinking, Information Literacy)
- Articulate the implications of economic development, education and workforce, public health and wellness, and conservation and stewardship within the outdoor recreation industry. (Specialized Knowledge, Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option

prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- Wilderness First Responder course certificate

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Outdoor Recreation Studies (Minor)

Minor: Outdoor Recreation Studies
Program Code: M111

About This Minor. . .

The minor in Outdoor Recreation Studies is designed to equip students with the basic knowledge and skills needed to grow as a professional in the outdoor recreation industry. Students will learn how outdoor recreation impacts economies, communities, tourism and the environment. All of the course work is rooted in leadership. The minor will encourage every student to pursue their own outdoor passion.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Paramedic

(See [Emergency Medical Services](#) (p. 360))

Peace Officer Standards and Training (POST)

Program Description

This police academy certificate program exceeds the Colorado Peace Officers Standards and Training (POST) requirements for peace officer entry level training. The individual training requirements for arrest control, law enforcement driving, and firearms are included in the program. Successful completion of all academic and skills training are required to take the CO POST Certification Exam. Students enrolled in the program will earn 31 credit hours that may be applied towards an associate's or bachelor of applied science degree at Colorado Mesa University.

Special Requirements

This is a physically and academically rigorous 16-week program that requires full time participation and one hundred percent attendance during the weeks of enrollment. The program is not an open enrollment and requires a separate application to the academy. Students applying to the POST program must undergo a comprehensive background check and are selected to attend by the academy director. The selection process requires the submission of fingerprints to the Colorado Bureau of Investigation, as well as drug, personality, medical, and physical fitness testing. Additionally, criteria such as drug use (including marijuana), criminal record, driving, employment, and academic history are all reviewed. Agency sponsored students have priority seating.

See the academy director for details.

Peace Officer Academy - Peace Officer Standards and Training (POST) (Technical Certificate)

Award: Technical Certificate

Program of Study: Peace Officer Academy - P.O.S.T. Certification
Program Code: 1361

About This Program . . .

The Peace Officer Academy certificate program exceeds the Colorado Peace Officers Standards Training (P.O.S.T.) requirements for peace officer entry level training. The individual training requirements for Arrest Control, Law Enforcement Driving, and Firearms are included in the program. Students enrolled in the program will earn 31 credit hours that may be applied toward Associate or Bachelor's degrees at Colorado Mesa University.

This is an intensive 16 week course that requires full time participation during the weeks of enrollment, including some weekends. Many course days are 12 hours long: Mandatory Physical Fitness training occurs throughout the semester. The Grand Junction-based WCPOA (Western Colorado Peace Officers Academy) is sponsored by the Grand Junction Police Department, Mesa County Sheriff's Office and 21st Judicial District Attorney's Office. The Montrose-based WCLEA (Western Colorado Law Enforcement Academy) is sponsored by Montrose PD, Montrose County Sheriff's Office, and 7th Judicial District Attorney's Office. The program is not an open enrollment program and requires a separate application to the Academy. Please contact the Academy Directors or visit our web pages for details.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Criminal Process: Explain the functions of the criminal justice system in protecting the constitutional rights of all individuals within the United States, regardless of citizenship. (Specialized Knowledge)
- b. Basic Law: Explain the current rules for peace officer conduct as it pertains to arrest, search and seizure. (Specialized Knowledge, Information Literacy)
- c. Victim's Right: Explain the laws relating to victim rights and community resources available for crime victim's services. (Specialized Knowledge, Information Literacy)
- d. Community Policing: Identify and recognize community policing and the necessary elements for implementation of community policing practice and philosophy and recognize community partnerships as an integral component in community policing and problem solving. (Critical Thinking)
- e. Professional Behavior: Identify the traits that officers should exemplify and explain the benefits of professional and ethical behavior to the officer, department, and community. (Personal and Social Responsibility)
- f. Patrol Observation and Perception: Analyze and interpret information gathered during patrol operations, differentiate between proactive and reactive patrol, and demonstrate different patrol methods. (Critical Thinking)
- g. Traffic Code: Recognize elements of traffic code violations as defined in Title 42 C.R.S. (Specialized Knowledge)
- h. Preliminary Investigations: Identify and explain procedures for responding to a crime scene, conducting an initial crime scene investigation, interviewing victims, witnesses, and suspects, and conducting a follow up investigation. (Communication Fluency, Critical Thinking, Specialized Knowledge)
- i. Report Writing: Apply the basic requirements of written communication in law enforcement. (Communication Fluency)
- j. Wellness: Explain why wellness is an integral component of the law enforcement profession, and the necessity of being in good physical condition. (Personal and Social Responsibility)
- k. Tactical Casualty Care: Apply lifesaving medical actions in the context of a hazardous situation such as an active shooter, specific medical interventions, and skills. (Specialized Knowledge, Quantitative Literacy)

Requirements

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Personal Training

(See [Kinesiology](#) (p. 466))

Pharmacy Technician

Overview

Program Description

The Pharmacy Technician Program is designed to cover both the academic and clinical skills necessary to perform as a pharmacy technician. The program begins fall semester of each year. The Certificate in Pharmacy Technician Program is designed to be completed in one year. For the Associate of Applied Science in Pharmacy Technician Degree, prerequisite courses, including Essential Learning courses, are

completed in year two of the program. The application process occurs in the second semester of the first year. Once accepted to the program, the second year prepares students to work as advanced pharmacy technicians and assist in pharmacy operations.

Pharmacy Technicians who pass the certifying examination offered by the PTCB (Pharmacy Technician Certification Board) are certified and authorized to use the initials CPhT to designate their status as Nationally Certified Pharmacy Technicians, which further allows them to apply for licensure in their individual states.

Pharmacy Technician (AAS)

Overview

Degree: Associate of Applied Science
Major: Pharmacy Technician
Program Code: 1399

About This Major . . .

The Pharmacy Technician Program is designed to cover both the academic and clinical skills necessary to perform as a pharmacy technician. The program begins fall semester of each year. The Certificate in Pharmacy Technician Program is designed to be completed in one year. For the Associate of Applied Science in Pharmacy Technician Degree, prerequisite courses, including Essential Learning courses, are completed in year two of the program. The application process occurs in the second semester of the first year. Once accepted to the program, the second year prepares students to work as advanced pharmacy technicians and assist in pharmacy operations.

A pharmacy technician is someone who works beside licensed pharmacists to process prescriptions, dispense medication, perform pharmacy-related functions, and provide information to customers. One of the most challenging aspects of being a pharmacy technician is maintaining knowledge on changes that occur within the field, since pharmacy practice changes on a weekly basis with new generics and new drugs.

Job duties include dispensing prescription drugs and other medical devices to patients, instructing on their use, performing administrative duties in pharmaceutical practice, and reviewing prescription requests with doctor's offices and insurance companies to ensure correct medications are provided and payment is received. Pharmacy technicians may be employed in retail settings, hospitals, mail-order pharmacies,

long-term care pharmacies, specialty compounding pharmacies, nuclear pharmacies, oncology clinics, and insurance companies.

Pharmacy Technicians who take and pass the certifying examination offered by the PTCB (Pharmacy Technician Certification Board) are certified and authorized to use the initials CPhT to designate their status as Nationally Certified Pharmacy Technicians, which further allows them to apply for licensure in their individual states.

For more information on what you can do with this major, visit WCCC's Programs of Study page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate familiarity with brand and generic drug names, appearance, manufacturer, dosage forms(s), and route of administration for at least the top 200 drugs. (Information Literacy)
- Demonstrate the ability to process a medication order completely, accurately, and efficiently (interpretation, drug product selection, computer warnings, packaging, and labeling, filling a prescription in an outpatient setting, and preparing IV medication using aseptic technique), while working under the supervision of a licensed pharmacist. (Specialized Knowledge and Applied Learning)
- Perform accurate pharmacy calculations and proficiently apply computer skills, record keeping and billing in adherence to applicable industry regulations. (Quantitative Fluency)
- Uphold legal and ethical standards and adhere to principles of patient confidentiality within the health care and community environment as defined by HIPAA. (Personal and Social Responsibility)

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.

- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 60 semester hours required for the AAS in Pharmacy Technician degree.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Entry-Level Pharmacy Technician (Technical Certificate)

Award: Technical Certificate

Program of Study: Entry-Level Pharmacy Technician

Program Code: 1199

About This Program . . .

The Entry-Level Pharmacy Technician Certificate is designed to cover both the academic and clinical skills necessary to perform as an entry-level pharmacy technician. The program begins fall semester of each year. The Certificate in Pharmacy Technician Program is designed to be completed in one year. The certificate will allow the student to sit for the

National Certification Exam. The 31 credit hours will also count toward the Associate of Applied Science, Pharmacy Technician.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate the ability to process a medication order completely, accurately, and efficiently (interpretation, drug product selection, computer warnings, packaging, and labeling, filling a prescription in an outpatient setting, and preparing IV medication using aseptic technique), while working under the supervision of a licensed pharmacist. (Specialized Knowledge and Applied Learning)
- Perform accurate pharmacy calculations and proficiently apply computer skills, record keeping and billing in adherence to applicable industry regulations. (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.

- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Philosophy

Program Description

Philosophy explores fundamental questions such as: Who am I? What is important? What is valuable? Why am I here? How do we tell truths from falsehoods? How should we behave? What is the best way to live? How do we know what we know? What is beautiful? The answers to these questions apply to other disciplines, problems, and life endeavors. As Michael Morgenstern explains, philosophy can help us to be "better, more critical thinkers and communicators in our jobs. It can teach us to be skeptical of political rhetoric and advertising. It can help us to consider what is worth caring about and so perhaps to begin to make the world a better place." And Edward Tenner reminds us that, "Philosophy majors also score highest among disciplines in verbal reasoning and analytical writing on the GRE aptitude test." Rebecca Newberger Goldstein adds that philosophy is "always a good thing to know, no matter what you go on to study—to be able to think critically. To challenge your own point of view. Also, you need to be a citizen in this world. You need to know your responsibilities. You're going to have many moral choices every day of your life. And it enriches your inner life. You have lots of frameworks to apply to problems, and so many ways to interpret things. It makes life so much more interesting. It's us at our most human. And it helps us increase our humanity. No matter what you do, that's an asset." In short, philosophy exemplifies a university education: you encounter iconic works, engage in rigorous debate, and learn to think critically. Studying philosophy complements any major.

Philosophy (Minor)

Minor: Philosophy
Program Code: M280

About This Minor. . .

Philosophy is unlike any other field, yet it applies to them all as it is the field from which all others arose. Philosophy retains as part of its function the critical inquiry into all other disciplines, problems, and life endeavors. While a career in philosophy usually means teaching philosophy, many professionals—writers, journalists, psychologists, doctors, lawyers, scientists, and many others—have degrees in philosophy because the skills philosophical thinking requires are essential to so many other areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.

- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Physical Therapy

Overview

The Physical Therapy program is a professional program leading to a Doctor of Physical Therapy (DPT) degree.

Physical therapists are health care professionals that are movement experts who improve quality of life by prescribing exercise, incorporating hands-on care and patient education.

The professional curriculum will be 8 semesters in duration, 105 credits and include 34 weeks of full-time clinical education over 4 separate rotations. The rotations will be 6, 8, 8 & 12 weeks in duration. Students will complete these rotations at a variety of clinical sites (e.g. acute care, long term rehabilitation, outpatient orthopedic, etc.). The program has been designed to meet all requirements associated with Commission on Accreditation in Physical Therapy Education (CAPTE).

To practice physical therapy, students must be licensed in the state in which they desire to practice. To obtain licensure, students must graduate from an accredited program and pass the National Physical Therapy Exam (NPTE).

Effective April 25, 2023, Colorado Mesa University has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; phone: 703-706-3245; email: accreditation@apta.org). If needing to contact the program/institution directly, please call 970-248-2266 or email dptprogram@coloradomesa.edu.

Candidate for Accreditation is an accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program may matriculate students in technical/professional courses. Achievement of Candidate for Accreditation status does not assure that the program will be granted Initial Accreditation.

Candidacy is considered to be an accredited status, as such the credits and degree earned from a program with Candidacy status are considered, by CAPTE, to be from an accredited program. Therefore, students in the charter (first) class should be eligible to take the licensure exam even if CAPTE withholds accreditation at the end of the candidacy period. That said, it is up to each state licensing agency, not CAPTE, to determine who is eligible for licensure. Information on licensing requirements should be directed to the Federation of State Boards of Physical Therapy (FSBPT; www.fsbpt.org) or specific state boards (a list of state boards and contact information is available on FSBPT's website).

Institutional Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this degree:

- 105 semester hours required for Doctor of Physical Therapy (DPT) degree.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Physician Assistant

The Master of Physician Assistant Studies (MPAS) Program consists of didactic and clinical academic work over the course of 27 months. Graduates of the program will be eligible to sit for the national certification examination for physician assistants through the National Commission on the Certification of Physician Assistants (NCCPA).

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted **Accreditation - Provisional** status to the **Colorado Mesa University Physician Assistant Program** sponsored by Colorado Mesa University. Accreditation - Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA *Standards* or when a program holding Accreditation - Provisional status appears to demonstrate continued progress in complying with the *Standards* as it prepares for the graduation of the first class (cohort) of students.

Accreditation - Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class.

The program's accreditation history can be viewed on the [ARC-PA website](#).

For updates on program accreditation and general program information, please visit the [Masters of Physician Assistant Studies website](#).

Programs of Study Graduate

- [Physician Assistant \(MPAS\)](#) (p. 629)

Physician Assistant (MPAS)

Degree: Master of Physician Assistant Studies

Program of Study: Physician Assistant

Program Code: 8160

About This Program . . .

The Physician Assistant program is a post-baccalaureate program, leading to a Master of Physician Assistant Studies degree (MPAS).

A Physician Assistant (PA) is a healthcare professional who is licensed to practice medicine under the supervision of a Doctor of medicine (MD) or Doctor of osteopathic medicine (DO) and can exercise delegated autonomy in decision-making. Physician Assistants can make clinical decisions and provide a variety of diagnostic, therapeutic, preventive, and health maintenance services to patients.

The CMU PA program offers a student-centered curriculum that has a unique emphasis on training compassionate and competent PAs to be ambassadors of wellness in their careers and communities. Our program places emphasis on wellness promotion and disease prevention for the individual patient and the community. The program is a rigorous 27-month, full-time on campus program consisting of 112 credits. The CMU PA Program curriculum is designed to educate clinicians with the knowledge and skills to be agents of excellence and innovation in the delivery of quality healthcare to the communities of Western Colorado and beyond.

To become a certified PA following completion of a Master's program, you must pass the [Physician Assistant National Certifying Exam \(PANCE\)](#).

Important information for this program:

- Enrollment requires PA program acceptance. Please see the catalog and program website for specific admissions requirements.
- All courses and course sequencing are required and must be completed at CMU.
- Students must successfully pass all didactic, clinical course work, and summative exam.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Demonstrate creativity and the ability to think critically and analytically.
- Demonstrate the ability to work individually and in collaboration with others, in contributing to the scholarly advancement in their field.
- Demonstrate advanced written and oral communication skills and the ability to access and analyze information from various literary sources.

- d. Demonstrate the ability to recognize and articulate moral and ethical challenges within their discipline and demonstrate leadership.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this program:

- 112 semester hours for the MPAS in Physician Assistant.

Program Specific Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around.

Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Physics

Program Description

Physics is the study of the universe: what it's made of and how it works. Physics uses a small collection of basic laws and principles to describe a vast range of natural phenomena, such as black holes, galaxies, plasmas, superconductivity, nanostructured materials, lasers, photons and atoms.

Physics is the foundation of other fields such as engineering, materials science, electronics and chemistry. Beyond these, it finds application in many technical fields, such as optics, scientific instrumentation, biology and medicine.

A degree in Physics equips students with strong analytical problem solving, mathematical, experimental and computational skills. These have enabled physics majors to secure employment in research, engineering, medical physics and business as well as enter graduate programs in physics, chemistry, aerospace engineering, nuclear engineering and planetary science.

A physics minor is a valuable complement to a major in mathematics, biology, chemistry, geology or environmental science.

About This Major . . .

Physics is the study of the universe: what it is made of and how it works, ranging from stars and galaxies to atoms and nuclei and everything in between. Physics forms the foundation of many technical fields including electronics and optics. Physics also features prominently in many of the hottest areas of current research and innovation, such as the multidisciplinary fields of nanotechnology and biophysics.

The physics program serves as a foundation for a wide array of careers. Physics majors from Colorado Mesa University have gone on to graduate programs in physics, astrophysics, chemistry, materials science, and aerospace engineering. They have also gone directly into jobs in engineering, business, and research.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Show fluency with the major fields of physics (classical mechanics, electromagnetism, statistical physics, and quantum theory). (Specialized Knowledge)
- Use mathematical representations to analyze physical scenarios. (Quantitative Fluency)
- Use laboratory techniques to investigate experimentally physical phenomena. (Applied Learning)
- Communicate effectively about topics in physics. (Communication Fluency)
- Execute a project which addresses a significant and complex issue in physics. This project will integrate knowledge and techniques from different areas of physics. (Specialized Knowledge/Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print

Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Physics, Liberal Arts (AS)

Degree: Associate of Science

Major: Liberal Arts

Emphasis: Physics

Program Code: 2433

About This Major . . .

The Associate of Science (AS) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AS is the appropriate choice for students who will take upper division coursework in mathematics, biological sciences, and physical sciences. The degree program includes the Colorado Statewide Essential Learning Core and meets the lower division Essential Learning requirements at most public institutions in Colorado. A number of emphases are available within the AS degree. Students choosing one of these emphases will take courses in a discipline in addition to the Essential Learning core.

Physics is the study of the universe: what it's made of and how it works, ranging from stars and galaxies to atoms and nuclei and everything in between. Physics forms the foundation of many technical fields including electronics and optics. Physics also features prominently in many of the hottest areas of current research and innovation, such as the multidisciplinary fields of nanotechnology and biophysics. Our goal is to provide students with the critical and analytical thinking skills needed to solve problems. This skill set prepares students for further study and for jobs in engineering, business, and research.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Show fluency with aspects of the major fields of physics typical for introductory and sophomore level physics courses. (Specialized Knowledge)
- Use mathematical representation to analyze physical scenarios. (Quantitative Fluency)
- Use laboratory techniques to analyze physical scenarios. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

¹ Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Science work.

Advising and Graduation**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Physics (Minor)

Minor: Physics
Program Code: M430

About This Minor. . .

Physics is the study of the universe: what it is made of and how it works, ranging from stars and galaxies to atoms and nuclei and everything in between. Physics forms the foundation of many technical fields, including electronics and optics. Physics features prominently in many of the hottest areas of current research and innovation, such as the multidisciplinary fields of nanotechnology and biophysics.

A physics minor is a good complement to a mathematics, chemistry, geology, environmental science, or biology major.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.

- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(20 semester hours)

Code	Title	Semester Credit Hours
PHYS 131	Fundamental Mechanics-GTSC1	4
PHYS 131L	Fundamental Mechanics Laboratory-GTSC1	1

Total Semester Credit Hours		20

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Political Science

Program Description

The political science program provides students with a working knowledge of the concepts, theories, approaches and practical applications of political and governmental systems within the local, state, national and international arenas. Graduates are equipped to compete in the job market and the marketplace of ideas.

Regarding the job market, majors work closely with their academic advisor to customize a curriculum that prepares them for competitive applications to law or graduate school, and/or careers in government, non-profit organizations, global advocacy, business, military or homeland security, and emergency management. In addition to holding elective office, graduates have worked as lobbyists, congressional staff members, gubernatorial staff, and state agency officials. Graduates have also been admitted to law school or graduate school at: University of Denver, Cornell University, Colorado State University, George Mason University, The University of Minnesota, the University of New Mexico, UC Denver, and the University of Colorado. Internship opportunities allow students to gain experience and employment while furthering their education. Recent interns have served in the U.S. Congress, the Colorado General Assembly, the Mesa County District Attorney's Office, state-level agencies, the City of Fruita, and congressional campaigns. Many former student interns are now working in jobs they obtained directly as a result of their internship experience.

Regarding the marketplace of ideas, the program builds engaged, global citizens who explore all sides of issues, think critically, communicate clearly, and use their skills responsibly. To that end, students work with faculty on research projects (as volunteers or as paid research assistants) on recreation management, natural resource management, and/or economic development. Faculty in the Program sponsor a Political Science Club and a local chapter of the national honor society Pi Sigma Alpha.

A minor in political science is an excellent complement for students majoring in many other fields, particularly mass communications, business, and criminal justice. The minor provides a diverse understanding of politics and government organizations; this is helpful to anyone working in a career that is either regulated by government, has government as a customer, or needs to lobby government to protect its interests.

Desmond Tutu famously said: "Don't raise your voice, improve your argument." Nowhere does this advice seem more pertinent than in today's political environment. Graduates leave the program with strong arguments and marketable skills. The goal of the political science faculty is to help students become well-rounded citizens by preparing them to compete in both the employment market and the marketplace of ideas.

Political Science (BA)

Degree: Bachelor of Arts
Major: Political Science
Program Code: 3718

About This Major . . .

The Political Science program provides students with a working knowledge of the concepts, theories and approaches to the discipline of Political Science and their practical application to political and governmental systems within the state, national and international arenas.

Students majoring in Political Science are prepared for careers in government, law, criminal justice, and non-governmental organizations. Many graduates are currently employed as Congressional Staff members, Gubernatorial Staff, state agency officials, hold elective office or have successfully graduated from law school.

One attractive aspect of the program is the opportunity to intern in a variety of settings in Washington, D.C., Denver and Grand Junction. These internships allow students a chance to acquire practical experience while increasing the opportunity to network. Many of our student interns are now working in jobs they obtained directly as a result of their intern experience. CMU political science graduates have also been successful in gaining entrance to graduate and law schools. The Political Science program supports a Political Science Club and a local chapter of the national honor society Pi Sigma Alpha.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Critically analyze the theories and concepts relevant to political science (Specialized Knowledge);
- Defend a political argument using established methods (empirical and normative) in the field of political science (Intellectual Skills, Communication Fluency, Quantitative Fluency);
- Articulate diverse perspective surrounding a political issue (Critical Thinking, Information Literacy);
- Devise a strategy to promote civic involvement within the broader community for themselves and others (Civic Engagement)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- Experiential learning component is required for this degree. Please see your advisor for details specific to your plan of study.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Political Science (Minor)

Minor: Political Science
Program Code: M730

About This Minor. . .

A minor in Political Science is a great complement for students majoring in any other field, particularly Mass Communications and Criminal Justice. The degree provides a thorough understanding of politics and government organizations which is helpful to anyone working in a career that is either regulated by government, has government as a customer, or needs to lobby government to protect its interests.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Process Systems Technology

Program Description

The Process Systems Technology program prepares students for entry-level employment as process operators or technicians. A process operator/technician is a key member of a team of people responsible for planning, analyzing, and controlling the production of products from the acquisition of raw materials through the production and distribution of products to customers in a variety of process industries.

This program provides an understanding of process equipment and its principles of operation and control. The graduate will understand the technical aspects of the work, the responsibilities of the work, and the importance of safety in this vitally important, shift-oriented position. Industries interested in the graduates from the program include, but are not limited to, oil exploration and production, mining and mineral

processing, petroleum product manufacturing, advanced manufacturing, pharmaceutical production, food and beverage, electric power generation, drinking water treatment, and wastewater treatment.

This program is no longer offered. Please see the [Mechatronics](#) (p. 547) program.

A process operator/technician is a key member of a team of people responsible for planning, analyzing, and controlling the production of products from the acquisition of raw materials through the production and distribution of products to customers in a variety of process industries.

This program will provide the student with an understanding of process equipment and its principles of operation and control. The graduate will understand the technical aspects of the work, the responsibilities of the work and the importance of safety in this vitally important, shift-oriented position. The industries interested in the graduates from the program include, but are not limited to, oil exploration and production, mining and mineral processing, petroleum product manufacturing, advanced manufacturing, pharmaceutical production, food and beverage, electric power generation, drinking water treatment, and wastewater treatment.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal and written and electronic forms that are needed for entry level employment. (Communication Fluency)

- Apply mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
- Research, evaluate, synthesize and apply information/data relevant to business, sciences and technical careers. (Critical Thinking)
- Demonstrate knowledge of terminology, symbols, business practices, and principles and application of technical skills. (Specialized Knowledge)
- Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)
- Demonstrate ethical, civic and work place responsibility as part of professional behavior. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Electronics Technician, Process Systems Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Process Systems Technology
Specialization: Electronics Technician
Program Code: 1115

About This Program . . .

Students enrolled in Process Technology Program learn a multitude of skills to help prepare them to enter a variety of careers: Entry level employment as electronics technicians, process operators or technicians, related to computer systems, computer system administration and networking, electronics, and telecommunications engineering. Students begin the program studying basic core classes including communications, DC/AC circuitry, information technology hardware and software, and Cisco Systems Network training.

The coursework in this certificate is aligned with the Associate Level certification called the Associate Certified Electronics Technician (CeTa) is given by the ETA. This represents the electronics industry, which incorporates from the technician and educator to the corporate institution. Widely known for electronics certification programs and accredited by the International Certification Accreditation Council (ICAC), Program content has been structured to give a basic education to all graduates entering this field.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

Psychology

Program Description

The Psychology program provides students with a working knowledge of the methods and findings of modern psychology. Students may pursue the Bachelor of Arts (BA) in Psychology that is congruent with APA guidelines for the undergraduate psychology major. All majors are required to complete some laboratory coursework in which they conduct psychological science research using modern statistical analyses. Internships are available for senior psychology majors and are based on student interest and availability in the local community. Students majoring in psychology are prepared to work in a wide variety of settings, including human services (counseling and social work), public affairs, business, sales, criminal justice and (following graduate study) mental health counseling, teaching, and research. The Psychology program provides a strong foundation for graduate study in psychology and related disciplines.

The Psychology program sponsors the Psychology Club, NAMI on Campus, and a local chapter of the national honor society in psychology, Psi Chi. Through active membership in these organizations, students are encouraged to become involved in community service and to attend and present their research at regional and national psychology conferences.

A minor in psychology requires the student to acquire working knowledge of the methods and findings of modern psychology. To earn the minor, a student must take the research methods course, along with several topical courses in psychology. A student with this minor will have a

deeper understanding of the processes that shape behavior, which can then be applied to a wide variety of areas.

A minor in forensic investigation – psychology provides students a base in forensic psychology. Students may be better prepared to enter graduate programs in forensic psychology. Students will be better prepared to use psychological concepts in criminal justice investigation jobs.

Counseling Psychology, Psychology (BA)

Degree: Bachelor of Arts
Major: Psychology
Concentration: Counseling Psychology
Program Code: 3724

This program is no longer accepting new students.

About This Major . . .

Students may pursue the Psychology BA degree or the Psychology BA degree with a concentration in Counseling Psychology. All majors are required to complete some laboratory coursework in which they conduct research in psychological science. Practica are required for counseling students and are available at nearby human service agencies and treatment centers. The psychology programs provide students with a working knowledge of the methods and findings of modern psychology.

Students majoring in psychology are prepared to work in a wide variety of settings, including human services (counseling and social work), public affairs, business, sales, criminal justice, and (following graduate study) psychotherapy, teaching and research. The psychology program at provides a strong foundation for graduate study in psychology and related disciplines.

Many of CMU's psychology majors have successfully continued their education in graduate programs in psychology. A few have continued on to medical school or law school. The psychology program sponsors a Psychology Club and a local chapter of the national honor society in psychology, Psi Chi. Through active membership in these organizations, students are encouraged to become involved in community service and to attend and present their research at regional and national conferences.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Think critically to solve problems in psychological of analysis using academic sources of information. (Specialized Knowledge/Applied Learning)
- Compare basic research methodology in psychology, including research design, data analysis and interpretation. (Critical Thinking/Personal and Social Responsibility)
- Communicate clearly in written and oral presentations in standard American Psychological Association format. (Communication Fluency)
- Apply statistical concepts to decision making and problem solving in areas of psychological application.(Quantitative Fluency)
- Think critically to solve problems in psychological areas of analysis using academic sources of information. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with

your advisor or academic department to determine which catalog year and program requirements you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and

should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Psychology (BA)

Degree: Bachelor of Arts

Major: Psychology

Program Code: 3726

About This Major . . .

Students may pursue the Psychology B.A. degree or the Psychology B.A. degree with a concentration in Counseling Psychology. All majors are required to complete some laboratory coursework in which they conduct psychological science research. Practica are required for counseling students and are available at nearby human service agencies and treatment centers. The psychology programs provide students with a working knowledge of the methods and findings of modern psychology.

Students majoring in psychology are prepared to work in a wide variety of settings, including human services (counseling and social work), public affairs, business, sales, criminal justice, and (following graduate study) psychotherapy, teaching and research. The psychology program provides a strong foundation for graduate study in psychology and related disciplines.

The psychology program sponsors a Psychology Club and a local chapter of the national honor society in psychology, Psi Chi. Through active membership in these organizations, students are encouraged to become involved in community service and to attend and present their research at regional and national conferences.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Critically analyze the historical trends in psychology (Specialized Knowledge)

- b. Compare basic research methodology in psychology, including research design, data analysis and interpretation (Applied Learning)
- c. Communicate clearly in written and oral presentations in standard American Psychological Association format (APA) (Broad Integrative Knowledge/Applied Learning)
- d. Apply statistical concepts to decision making and problem solving in areas of psychological application (Quantitative Fluency)
- e. Think critically to solve problems in psychological areas of analysis using academic sources of information. (Intellectual Skills)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Forensic Investigation - Psychology (Minor)

Minor: Forensic Investigation - Psychology
Program Code: M716

About This Minor. . .

This minor combines courses in psychology with forensic investigation courses. It provides a student a base in forensic psychology. Students may be better prepared to enter graduate programs in forensic psychology. Students may also be better prepared to use psychological concepts in criminal justice and investigative jobs.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Psychology (Minor)

Minor: Psychology
Program Code: M740

About This Minor. . .

A minor in Psychology requires the student to acquire working knowledge of the methods and findings of modern psychology. To earn the minor, a student must take the research methods course, along with several topical courses in psychology. A student with this minor will have a

deeper understanding of the processes that shape behavior, which can then be applied to a wide variety of areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

Public History

(See [History](#) (p. 437))

Radiologic Sciences

Program Descriptions

The Bachelor of Science in Radiologic Sciences program at Colorado Mesa University prepares individuals for certification and professional practice in the Radiologic Sciences. Radiologic technologists are an important part of the professional health care team, providing physicians with medical images that are vital for the diagnosis and treatment of injury, degeneration and disease. The BSRS program is accredited by

the Joint Review Committee on Education in Radiologic Technology (JRCERT).

The four-year program provides educational experiences to prepare a professional radiologic technologist to practice in a variety of health care settings. After meeting the ethics, education and clinical competency requirements, graduates are eligible to take the certifying examination from the American Registry of Radiologic Technologists (ARRT). The program integrates theory, practice, and science with a broad liberal arts education. The program is designed to deliver quality education in both the classroom and clinical settings.

Professional Certificate in Radiologic Sciences

The Radiologic Sciences program offers certified radiologic technologists with an associate or baccalaureate degree the opportunity for post-primary certification in computed tomography. After meeting the ethics, structured education, and clinical competency requirements, graduates are eligible to take the appropriate certifying examination from the American Registry of Radiologic Technologists. This can lead to greater employment opportunities, increased compensation, and job security. All coursework is in an online format.

Special Requirements

Students applying for admission into the program must be admitted into the general University. Admission to Colorado Mesa University does not guarantee admission into the radiologic sciences programs, which require a separate application. Please contact the health sciences department for additional information.

Radiologic Sciences (BSRS)

Degree: Bachelor of Science in Radiologic Sciences
Major: Radiologic Sciences
Program Code: 3623

About This Major . . .

The Baccalaureate of Science in Radiologic Sciences (BSRS) Program is accredited based by the Joint Review Committee on Education in Radiologic Technology (JRCERT). The four-year program provides educational experiences to prepare a professional radiologic technologist to practice in a variety of health care settings. The program integrates theory, practice, and science with a broad liberal arts education. Following successful completion of the Radiologic Sciences Program and after meeting ethics and examination requirements, the graduate is

eligible to sit for the national certification examination administered by the American Registry of Radiologic Technologists. A passing score on this examination results in the granting of a certificate of registration that allows the privilege to use the title "Registered Technologist" and to use the abbreviation R.T. following the graduate's name.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate written communication skills. \ (Communication fluency)
- Assess oral communication techniques used in professional practice. (Communication fluency)
- Relate ethical principles to real-life problems in the radiologic sciences. \ (Personal and Social Responsibility)
- Combine academic theory with practitioner experience and skills. (Applied learning).
- Reason and solve quantitative problems in the radiologic sciences. (Quantitative fluency)
- Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in the radiologic sciences. (Critical thinking).
- Find relevant sources of information, evaluate information critically, and apply the information appropriately and effectively to professional practice in the radiologic sciences. (Information literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.

- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Radiologic Sciences (BAS)

Degree: Bachelor of Applied Science

Major: Radiologic Sciences

Program Code: 3622

About This Major . . .

This program is no longer accepting new students.

The Bachelor of Applied Science in Radiologic Sciences combines the technical skills and patient care skills necessary for success in today's health care arena. A unique program, the BAS allows students who have already earned an associate of applied science degree to build upon their technical specialties with Essential Learning courses and junior and senior level radiologic science courses. This allows associate degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework.

Courses to be taken include advanced patient care, quality management, informatics in radiology, research and areas of specialization such as computed tomography, and magnetic resonance imaging. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen specialties.

Prospective students not holding an associate of applied science degree can begin their college career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the BAS. This degree will provide students upward mobility in their area of employment as they move into specialty areas as well as supervision/management positions.

Important information for this program:

- Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution. Any exceptions to this must be approved in advance by the department BAS advisor and the academic department head. All students must meet with the BAS advisor to plan and schedule all classes.

- Applicants must be certified by the American Registry of Radiologic Technologists or its equivalent to be admitted to the program.
- Program applicants must possess an AAS degree in Radiologic Technology or Radiologic Science. Acceptance of AAS radiologic technology credits will be limited to no more than 36 hours unless approved by both the BAS advisor and the academic department head.
- Applicants possessing a certificate of completion from a JRCERT accredited program in Radiologic Technology may also be admitted conditionally to the program while completing the requirements for an AAS degree. Please see the Radiologic Science Program Director for complete requirements and application form.
- All degree requirements must be completed as described. Any exceptions or substitutions must be recommended in advance by the faculty advisor and approved by the Department Head. Students are required to participate in exit examinations or other programs deemed necessary to comply with the university accountability requirement.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Relate ethical principles to real-life problems in the radiologic sciences. (Specialized Knowledge)
- Combine academic theory with practitioner experience and skills. (Applied Learning)
- Apply quantitative analysis methods to develop appropriate conclusions (Quantitative Fluency)
- Communicate effectively through written documents. (Communication)
- Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in advanced specialty areas in the radiologic sciences. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 121 semester hours required for the BAS in Radiologic Sciences.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

registered with the ARRT in radiography, nuclear medicine technology (NMTCB also accepted) or radiation therapy and hold the minimum of an associate degree. Coursework from the certificate can be applied to the Bachelor of Applied Science in Radiologic Sciences.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Combine academic theory with practitioner experience and skills (applied learning).
- Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in the radiologic sciences (critical thinking).
- Promote value based behaviors for professional practice (critical thinking).

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Computed Tomography (Professional Certificate)

Award: Professional Certificate
 Program of Study: Computed Tomography
 Program Code: 1605

About This Program . . .

The Professional Certificate in Computed Tomography is designed to prepare certified and registered radiologic technologists for post-primary certification and registration with the American Registry of Radiologic Technologists (ARRT) in computed tomography. Students must be

Real Estate

The certificate in Real Estate is designed to prepare students to learn more about many aspects of the real estate industry. The three-course sequence, which can be taken in any order, includes topics such as a general real estate industry overview, real estate financing, and real estate development. This certificate is aimed at students in all areas of study to supplement their coursework and increase their understanding of the real estate industry, which will help in many facets of students' personal and professional lives.

Real Estate (Professional Certificate)

Award: Professional Certificate
Major: Real Estate
Program Code: 1700

About This Program . . .

The Certificate in Real Estate offers students invaluable knowledge of the Real Estate Industry, knowledge that can be used both personally and professionally. With over 5 million people currently employed in the real estate industry, this certificate provides opportunities in many differing real estate careers. Students will be provided opportunities to learn all aspects of the industry to include: appraisal and assessment, property management, commercial and residential investment opportunities and management, real estate law, and real estate financing. Students will also learn the tools needed to analyze and evaluate both personal and professional potential real estate investment opportunities. This certificate is not intended to lead to real estate licensure.

For more information on what you can do with this major visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Produce industry appropriate written documentation with the ability to effectively orally communicate real estate information. (Communication Fluency)
- Construct, apply, and document appropriate financial methodologies to evaluate potential real estate investment opportunities. (Quantitative Fluency)
- Apply and analyze appropriate investment strategies to evaluate potential real estate investment opportunities. (Critical Thinking)

Social Science

Program Description

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA with an emphasis in social science is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at institutions in Colorado. The social science emphasis provides students with the opportunity to develop a broad understanding of the various disciplines which traditionally constitute the social sciences: anthropology, history, political science, sociology, psychology, economics and geography.

The Social Science graduate certificate is designed for high school teachers who already have a Bachelor's Degree and need the credentials required by the Higher Learning Commission to teach history and political science courses for lower-division, college-level, concurrent enrollment classes.

Students in this certificate program will acquire 18 credit hours of graduate coursework in the fields of history and political science. The courses are spread over a two-year period, as shown in the schedule below.

In addition, the program allows students to explore history and political science in greater depth, and to prepare themselves for masters-level graduate degrees in these fields. The transferability of these courses towards a specific Master's degree is not guaranteed, and would depend on the individual Master's program to which the students choose to apply.

The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential

in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Social Work

Program Description

Social Work is a profession dedicated to social and economic justice through a commitment to anti-oppressive and anti-racist practice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, and those living in poverty. Social workers help people overcome some of life's most difficult challenges: poverty, discrimination, abuse, addiction, physical illness, divorce, educational problems, disability, and mental illness. Social workers who graduate from a generalist Bachelor of Social Work (BSW) program gain the education and training to work with individuals, families, communities and organization across the micro, mezzo, and macro levels of intervention. The CMU BSW program is fully accredited by the Council of Social Work Education (CSWE).

The practice of social work requires knowledge of human development and behavior; of social, economic, and cultural institutions, and of the interaction of all these factors as well as skills in developing relationships, assessing needs and services while facilitating change. Social workers seek to strengthen relationships among people to promote, restore, maintain, and enhance the well-being of individuals, families, social groups, organizations, and communities (<http://www.socialworkers.org/>).

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social

responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Demonstrate proficiency in utilizing the social work professions 9 core competencies and 20 practice behaviors through a senior-year practicum in a social service agency in our community (Specialized Knowledge/Applied Learning).
- b. Demonstrate the ability to use practice informed research and practice the use of the scientific method to develop research informed practice in academic assignments and at practicum (Quantitative Fluency).
- c. Demonstrate effective oral and written communication in working with individuals, families, groups, organizations, communities and colleagues through practicum, required classes, and oral presentations (Communication Fluency).
- d. Demonstrate critical thinking to inform and communicate professional judgments through distinguishing, appraising, and integrating multiple sources of knowledge; and through analyzing models of assessment, prevention, intervention, and evaluation (Critical Thinking),
- e. Engage with anti-racism, diversity, equity and inclusion (ADEI) in social work classes and practicum; Demonstrate ethical and professional behavior in classes, with peers, and in practicum by adhering to the NASW Code of Ethics (Personal and Social responsibility).
- f. Demonstrate effective skills in evaluating information and applying the information to specific purposes; demonstrate ethical use of social media and technology in the classroom, in assignments, and in practicum (Information literacy).

Social Work: Advanced Standing (MSW)

Overview

Degree: Master of Social Work
Program of Study: Social Work: Advanced Standing
Program Code: 8703

About This Program . . .

The MSW program has HLC approval and is in the CSWE accreditation process.

“The purpose of the social work profession is to promote human and community well-being. Guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, the purpose of social work is actualized through its quest for social, racial, economic, and environmental justice, the creation of conditions that facilitate the realization of human rights, the elimination of poverty, and the enhancement of life for all persons, locally and globally. To fully realize our commitment to social justice, social workers must engage in anti-racist, culturally responsive social work practice at the individual, family, group, organizational, community, research, and policy levels, informed by the theories and voices of those who have been marginalized. In an ever-shifting social and environmental context, social work is agile, responsive, and generative.

Social work education at the baccalaureate, master's, and doctoral levels shapes the profession's future through the education of competent professionals, the generation of knowledge, the promotion of evidence-informed practice through scientific inquiry, and the exercise of leadership. Social work education prepares competent policy practitioners to develop socially responsible policy, address the policy implications of their work, and implement strategies that result in a more engaged public and better educated policymakers to address inequalities and inequities.

Social workers share a commitment to promoting social welfare, helping people of all backgrounds overcome their unique challenges, advocating for social and economic justice for all members of the community, and embodying a professional code of ethics” (CSWE, 2022).

Professional social workers are found in a wide variety of settings including schools, hospitals, mental health clinics, senior centers, elected office, private practices, prisons, military, corporations, and in numerous public and private agencies that serve individuals and families in need. They often specialize in one or more of the following practice areas:

- Psychiatric Social Work (mental health centers, medical hospitals, psychiatric hospitals)
- Child welfare (abuse and neglect; adoption, foster care)
- Alcohol and drug abuse, addictions, substance abuse treatment centers
- Medical Social Work (inpatient and outpatient hospitals, health clinics, specialty clinics)
- School Social Work (public or private schools K-12)
- Geriatric facilities (nursing homes, home health, Alzheimer's units)
- Military & Veterans services (United States & International)
- Hospice & Palliative Care (end of life care)
- International Social Work (United Nations, WHO - global social work; economic stress; liberation, community organizing)
- Forensic Social Work (jails, prisons, courts, public defenders, district attorney, alternative defense, specialty courts)
- Clinical - Private Practice (therapist, mental health, addictions, family, divorce)
- Trauma and Violence (combat, sexual violence, human trafficking, refugee, natural disaster)

- Police Department (co-responder, crisis intervention, therapist)
- Community Organizing

Important Information about this program:

- The MSW program has two tracks: Foundation and Advanced Standing.
- MSW Foundation Program is open to all students who have completed a bachelor's degree from an accredited university. This is a two-year program that requires 74 credits with 1050 hours of practicum/internship training.
- MSW Advanced Standing is open to all students who have completed a Bachelor of Social Work degree from a CSWE accredited university within the last five years. This is a one-year program and requires 44 credits with 600 hours of internship training.
- The MSW is a degree that allows for licensure in all 50 states.
- MSW Program Acceptance required prior to enrollment. Please see the program website for specific admission requirements.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Demonstrate Ethical and Professional Behavior \ \ Demonstrate ethical decisions making by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to the context; demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication; manage personal and professional value conflicts and affective reactions; use technology ethically and appropriately to facilitate practice outcomes; and use supervision and consultation to guide professional judgment and behavior. (Applied Learning, Communication Fluency, Critical Thinking, Ethical Reasoning)\
- Engage in Anti-Racism, Diversity, Equity, and Inclusion in Practice \ \ Demonstrate anti-racist social work practice at the individual, family, group, organizational, community, research, and policy levels, informed by the theories and voices of those who have been marginalized; demonstrate cultural humility applying critical reflexivity, self-awareness, and self-regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies acknowledging them as experts of their own lived experiences. (Specialized Knowledge/Applied Learning, Communication Fluency, Critical Thinking, Information Literacy, Ethical Reasoning)\
- Advance Human Rights and Social, Racial, Economic, and Environmental Justice \ \ Advocate for human rights at the individual and system levels; and \ engage in practices that advance social, racial, economic, and environmental justice for equal justice and the dismantling of structural racism and oppression. (Specialized Knowledge/Applied Learning, Communication Fluency, Critical Thinking, Information Literacy, Ethical Reasoning)\ \
- Engage in Practice Informed Research and Research informed Practice \ \ Apply research findings to inform and improve practice, policy, and programs; and identify strategies for use of quantitative and qualitative methods of research to advance the purposes of social work. (Quantitative Fluency, Critical Thinking, Information Literacy)\ \

- Engage in Policy Practice \ \ Assess how social welfare policies affect the delivery of and access to social services; and apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice. (Applied Learning, Communication Fluency, Critical Thinking, Ethical Reasoning)\
- Engage with Individuals, Families, Groups, Organizations, and Communities \ \ Apply knowledge of human behavior and person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies. (Applied Learning, Communication Fluency, Critical Thinking, Information Literacy)\
- Assess with Individuals, Families, Groups, Organizations, and Communities \ \ Apply knowledge of human behavior and person-in-environment and other culturally responsive multidisciplinary theoretical frameworks when assessing clients and constituencies; and demonstrate respect for client self-determination during the assessment process collaborating with clients and constituencies in developing mutually agreed-on goals. (Specialized Knowledge, Applied Learning, Communication Fluency, Critical Thinking, Ethical Reasoning)\ \
- Intervene with Individuals, Families, Groups, Organizations, and Communities \ \ Engage with clients and constituencies to critically choose and implement culturally responsive, evidenced-based interventions to achieve mutually agreed-on practice goals and enhance capacities of clients and constituencies; and incorporate culturally responsive methods to negotiate, mediate, and advocate, with and on behalf of clients and constituencies. (Specialized Knowledge, Applied Learning, Communication Fluency, Critical Thinking, ethical Reasoning)\
- Evaluate with Individuals, Families, Groups, Organizations, and Communities \ \ Select and use appropriate methods for evaluation of outcomes; and critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities. (Specialized Knowledge, Applied Learning, Quantitative Fluency, Communication Fluency, Critical Thinking, Ethical Reasoning)\

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this degree:

- MSW program acceptance required prior to enrollment. See the program website for specific admissions requirements.
- MSW in Social Work: Advanced Standing program is open only to graduates with a bachelor of social work degrees from a CSWE accredited program. The bachelor of social work degree completion must be within five years to apply for this program. This program requires a completion of 44 credits hours and 600 hours of internship. This is a one year program.
- Students must successfully pass all didactic and field education requirements.
- All courses and course sequencing are required and must be completed at CMU or through applicable transfer credit.

Program Specific Requirements

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress

towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Social Work: Foundation (MSW)

Overview

Degree: Master of Social Work
Program of Study: Social Work: Foundation
Program Code: 8702

About This Program . . .

The MSW program has HLC approval and is in the CSWE accreditation process.

"The purpose of the social work profession is to promote human and community well-being. Guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, the purpose of social work is actualized through its quest for social, racial, economic, and environmental justice, the creation of conditions that facilitate the realization of human rights, the elimination of poverty, and the enhancement of life for all persons, locally and globally. To fully realize our commitment to social justice, social workers must engage in anti-racist, culturally responsive social work practice at the individual, family, group, organizational, community, research, and policy levels, informed by the theories and voices of those who have been marginalized. In an ever-shifting social and environmental context, social work is agile, responsive, and generative.

Social work education at the baccalaureate, master's, and doctoral levels shapes the profession's future through the education of competent professionals, the generation of knowledge, the promotion of evidence-informed practice through scientific inquiry, and the exercise of leadership. Social work education prepares competent policy practitioners to develop socially responsible policy, address the policy implications of their work, and implement strategies that result in a more

engaged public and better-educated policymakers to address inequalities and inequities.

Social workers share a commitment to promoting social welfare, helping people of all backgrounds overcome their unique challenges, advocating for social and economic justice for all members of the community, and embodying a professional code of ethics" (CSWE, 2022).

Professional social workers are found in a wide variety of settings including schools, hospitals, mental health clinics, senior centers, elected office, private practices, prisons, military, corporations, and in numerous public and private agencies that serve individuals and families in need. They often specialize in one or more of the following practice areas:

- Psychiatric Social Work (mental health centers, medical hospitals, psychiatric hospitals)
- Child welfare (abuse and neglect; adoption, foster care)
- Alcohol and drug abuse, addictions, substance abuse treatment centers
- Medical Social Work (inpatient and outpatient hospitals, health clinics, specialty clinics)
- School Social Work (public or private schools K-12)
- Geriatric facilities (nursing homes, home health, Alzheimer's units)
- Military & Veterans services (United States & International)
- Hospice & Palliative Care (end of life care)
- International Social Work (United Nations, WHO - global social work; economic stress; liberation, community organizing)
- Forensic Social Work (jails, prisons, courts, public defenders, district attorney, alternative defense, specialty courts)
- Clinical - Private Practice (therapist, mental health, addictions, family, divorce)
- Trauma and Violence (combat, sexual violence, human trafficking, refugee, natural disaster)
- Police Department (co-responder, crisis intervention, therapist)
- Community Organizing

Important Information about this program:

- The MSW program has two tracks: Foundation and Advanced Standing.
- MSW Foundation Program is open to all students who have completed a bachelor's degree from an accredited university. This is a two-year program that requires 74 credits with 1050 hours of practicum/internship training.
- MSW Advanced Standing is open to all students who have completed a Bachelor Social Work degree from a CSWE accredited university within the last five years. This is a one-year program and requires 44 credits with 600 hours of internship training.
- The MSW is a degree that allows for licensure in all 50 states.
- MSW Program Acceptance required prior to enrollment. Please see the program website for specific admission requirements.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- a. Demonstrate Ethical and Professional Behavior \ \ Demonstrate ethical decisions making by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to the context; demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication; manage personal and professional value conflicts and affective reactions; use technology ethically and appropriately to facilitate practice outcomes; and use supervision and consultation to guide professional judgment and behavior. (Applied Learning, Communication Fluency, Critical Thinking, Ethical Reasoning)\
- b. Engage in Anti-Racism, Diversity, Equity, and Inclusion in Practice \ \ Demonstrate anti-racist social work practice at the individual, family, group, organizational, community, research, and policy levels, informed by the theories and voices of those who have been marginalized; demonstrate cultural humility applying critical reflexivity, self-awareness, and self-regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies acknowledging them as experts of their own lived experiences. (Specialized Knowledge/Applied Learning, Communication Fluency, Critical Thinking, Information Literacy, Ethical Reasoning)\
- c. Advance Human Rights and Social, Racial, Economic, and Environmental Justice \ \ Advocate for human rights at the individual and system levels; and \ engage in practices that advance social, racial, economic, and environmental justice for equal justice and the dismantling of structural racism and oppression. (Specialized Knowledge/Applied Learning, Communication Fluency, Critical Thinking, Information Literacy, Ethical Reasoning)\ \
- d. Engage in Practice Informed Research and Research informed Practice \ \ Apply research findings to inform and improve practice, policy, and programs; and identify strategies for use of quantitative and qualitative methods of research to advance the purposes of social work. (Quantitative Fluency, Critical Thinking, Information Literacy)\ \
- e. Engage in Policy Practice \ \ Assess how social welfare policies affect the delivery of and access to social services; and apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice. (Applied Learning, Communication Fluency, Critical Thinking, Ethical Reasoning)\
- f. Engage with Individuals, Families, Groups, Organizations, and Communities \ \ Apply knowledge of human behavior and person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies. (Applied Learning, Communication Fluency, Critical Thinking, Information Literacy)\
- g. Assess with Individuals, Families, Groups, Organizations, and Communities \ \ Apply knowledge of human behavior and person-in-environment and other culturally responsive multidisciplinary theoretical frameworks when assessing clients and constituencies; and demonstrate respect for client self-determination during the assessment process collaborating with clients and constituencies in developing mutually agreed-on goals. (Specialized Knowledge,

Applied Learning, Communication Fluency, Critical Thinking, Ethical Reasoning)\ \

- h. Intervene with Individuals, Families, Groups, Organizations, and Communities \ \ Engage with clients and constituencies to critically choose and implement culturally responsive, evidenced-based interventions to achieve mutually agreed-on practice goals and enhance capacities of clients and constituencies; and incorporate culturally responsive methods to negotiate, mediate, and advocate, with and on behalf of clients and constituencies. (Specialized Knowledge, Applied Learning, Communication Fluency, Critical Thinking, ethical Reasoning)\
- i. Evaluate with Individuals, Families, Groups, Organizations, and Communities \ \ Select and use appropriate methods for evaluation of outcomes; and critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities. (Specialized Knowledge, Applied Learning, Quantitative Fluency, Communication Fluency, Critical Thinking, Ethical Reasoning)\

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.

- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Specific to this degree:

- MSW program acceptance required prior to enrollment. See the program website for specific admissions requirements.
- MSW in Social Work: Foundation program is open to all bachelor degrees from an accredited university. This program requires a completion of 74 credit hours and 1050 hours of practicum/internship. This is a two year program.
- Students must successfully pass all didactic and field education requirements.
- All courses and course sequencing are required and must be completed at CMU or through applicable transfer credit.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Social Work (BSW)

Degree: Bachelor of Social Work
Major: Social Work
Program Code: 3765

About This Major . . .

Social Work is a profession dedicated to social and economic justice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, at-risk populations, and those living in poverty.

Social workers help people overcome some of life's most difficult challenges: poverty, discrimination, abuse, addiction, physical illness, divorce, educational problems, disability, and mental illness.

The practice of social work requires knowledge of human development and behavior; of social, economic, and cultural institutions, and of the interaction of all these factors as well as skills in developing relationships, assessing needs and services while facilitating change. Social workers seek to strengthen relationships among people to promote, restore, maintain, and enhance the well-being of individuals,

families, social groups, organizations, and communities (<http://www.socialworkers.org/>).

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate proficiency in utilizing the social work professions 9 core competencies and 31 practice behaviors through a senior-year practicum in a social service agency in our community (Specialized Knowledge).
- Demonstrate the ability to use practice experience to inform scientific inquiry and use research evidence to inform practice (Quantitative Fluency).
- Demonstrate effective oral and written communication in working with individuals, families, groups, organizations, communities and colleagues through professional documentation and oral presentations (Communication Fluency).
- Demonstrate critical thinking to inform and communicate professional judgments through distinguishing, appraising, and integrating multiple sources of knowledge; and through analyzing models of assessment, prevention, intervention, and evaluation (Critical Thinking).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.

- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours

Program Specific Degree Requirements

(48 semester hours. To graduate with a major in social work, a student must earn, with no more than two attempts, at least a grade of "C" in each course and maintain a 2.50 cumulative GPA or higher in coursework in this area.)

- Students majoring in social work must apply to get into the social work program prior to taking any of the social work core courses. Application requirements include: completion of all Essential Learning requirements, completion of the two foundation courses (maintaining a 2.0 GPA), completion of the two social work introductory courses, completion of 60+ credits (junior standing), and a formal application, essay and faculty evaluation. If accepted into the social work program, students will take the social work core courses in sequence as part of a cohort system their junior and senior years.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Social Work (Minor)

Minor: Social Work
Program Code: M745

About This Minor. . .

Social Work is a profession dedicated to social and economic justice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, at-risk populations, and those living in poverty. Social workers help people overcome some of life's most difficult

challenges: poverty, discrimination, abuse, addiction, physical illness, divorce, educational problems, disability, and mental illness.

The practice of social work requires knowledge of human development and behavior; of social, economic, and cultural institutions, and of the interaction of all these factors as well as skills in developing relationships, assessing needs and services while facilitating change. Social workers seek to strengthen relationships among people to promote, restore, maintain, and enhance the well-being of individuals, families, social groups, organizations, and communities (<http://www.socialworkers.org/>).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sociology

Program Description

Sociology is the scientific study of social life. It is the exploration of social change and the complexities of the causes – and consequences – of human behavior, focusing on the ways social factors shape human behavior. Sociologists study a broad range of topics including families, politics, religion, education, race, class, and gender (and much more!). Sociologists ask questions about patterns of human life, and then answer those questions using a variety of theoretical perspectives and research methodologies. Sociologists frequently contribute to public debate about the causes of social problems and what we could do to help bring about positive social change.

The BA in Sociology exemplifies Colorado Mesa University's liberal arts mission, emphasizing a wide range of skills and content areas. The Sociology program encourages students to develop critical thinking skills, quantitative literacy, and the ability to apply their "sociological imagination" to problems, programs, and policies in the real world.

Beyond this, sociology prepares students for responsible action in the social world and provides a foundation for lifelong learning and civic participation.

The American Sociological Association calls sociology a "21st Century Major" because it offers the flexibility students will need in a fast-changing and increasingly global labor market. Graduates who choose to go directly into a career can find work in human resources, social services, government, business, the health professions, the criminal justice system, and a wide variety of other industries. Sociology graduates are also very well-prepared for graduate study in sociology and related disciplines.

Sociology (BA)

Degree: Bachelor of Arts
Major: Sociology
Program Code: 3728

About This Major . . .

Sociology is the scientific study of social life, social change, social organization, and the complex social causes and consequences of human behavior. Since all human behavior is social, the subject matter of sociology covers a broad array of topics, including family, religion, crime, politics, life course, race, gender, and social class. Sociology provides many distinctive perspectives on the social world, as well as a range of research methodologies that can be applied to virtually any aspect of social life, from corporate downsizing to problems of peace and war to the expression of emotion and beyond. Because sociology addresses the most challenging issues of our time, it is an expanding field increasingly tapped by those who craft policies and create social programs. For more information on the subject matter of sociology, go to www.asanet.org/topics.

Sociology majors gain important skills in critical thinking, research methods and responsible citizenship. Sociology majors are prepared for future graduate work in sociology and related disciplines, as well as for a wide variety of careers in such sectors as business, the health professions, the criminal justice system, social services, human resources and government.

For more information on what you can do with this major, visit Career Services and the American Sociological Association's *Careers in Sociology* web page.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply Scientific Principles to an Understanding of the Social World in a Summative Project (Specialized Knowledge/Applied Learning)
- Rigorously Analyze and Evaluate the Quality of Social Scientific Methods and Data (Quantitative Reasoning)
- Defend Sociological Analyses of Social Phenomena in Formal Papers and Oral Presentations. (Communication Fluency)
- Critically Evaluate Explanations of Human Behavior and Social Phenomena (Critical Thinking)
- Use Sociological Knowledge to Contribute to Public Understanding of Social Issues, Policy Debates, and the Development of a Sense of Civic Duty (Personal and Social Responsibility; Applied Learning)
- Develop Scholarly Arguments by Locating, Evaluating, Applying, and Synthesizing Information from Sociological and Other Social Scientific Sources (Information Literacy)

- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic

department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sociology (Minor)

Minor: Sociology
Program Code: M750

About This Minor. . .

Students who minor in sociology develop an understanding of social life, social change, social organization, and the social causes and consequences of human behavior. Sociology minors also develop critical thinking and communication skills that are useful in any career path they choose. The sociology minor combines well with a wide variety of majors and serves to encourage a sense of social responsibility.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.

- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Total Semester Credit Hours		21

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Spanish Program Description

The Spanish and Hispanic Studies Program at CMU develops students' abilities to speak and write Spanish, understand spoken and written Spanish, as well as develop cultural competency, which enables them to interact with citizens of various Spanish-speaking countries. In addition to the core classes, students may select from a variety of courses in language, literature, and applied professional Spanish. If they are interested in professional Spanish, students can strengthen their skills in a professional environment, including translation, interpreting, business, and medical, and social services. They may also gain experience through internships in a variety of settings, including the sheriff's department, the county courthouse, various medical offices, and non-profit organizations. Students may choose courses that provide theoretical and applied insights into Spanish language, linguistics, and literature. Here they will examine specific literary genres as well as a variety of the periods, regions, and movements. They can explore language variation in the Hispanic world through Phonetics & Phonology and Sociolinguistics.

An optional Spanish Summer Study Abroad Program provides direct exposure to language and culture in a variety of countries. Coordinated with the Spanish content courses, the Center for Teacher Education at CMU offers a comprehensive program of study that leads to a secondary teaching licensure in Colorado. At 21 credits, the Spanish minor is also a perfect complement to any majors.

With our ever-increasing contact with Spanish speakers both at home and abroad, bilingual skills will help you communicate with those in your field, whether you pursue a career in health, law, engineering, construction management, business, or social work. This ability can open doors in any profession you choose. Studies have shown that job candidates who have bilingual abilities are highly sought after. Employers value the ability to communicate in Spanish, and strong language skills enhance graduates' opportunities, especially when they combine their Spanish degree with other CMU programs.

About This Major . . .

Spanish majors for secondary licensure study all aspects of the language and cultures of the Spanish-speaking world and its teaching, including linguistics, phonetics and phonology, foreign language teaching methods, and the literatures of Spain and Latin America.

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop *Educators as Innovators*; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of various ages and backgrounds in a variety of school settings. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215, must be taken before applying to the program.

Important information about this degree:

- 2.80 cumulative GPA or higher in all CMU coursework.
- 2.80 cumulative GPA or higher in coursework toward the major content area.
- All EDUC prefix courses must be completed with a grade of "B" or better to progress through the program sequence.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
- A grade of "C" or better must be earned in all required foundation and major courses, unless otherwise stated.
- Any combination of FLAS 212, FLAS 301, FLAS 302, and FLAS 303 may also be used to satisfy the requirements of a major in which there exists a foreign language requirement.
- FLAV 496 and FLAS 422 may be taken more than once as long as the title/content of each course differs. Permission may be required to take some Topics courses. Check with the professor.
- Topics courses may be taken more than one time only if the course has a different topic.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- a. Spanish Outcome 1: Express themselves coherently in written and oral Spanish. (Communication)

- b. Spanish Outcome 2: Apply knowledge of the structure of the Spanish language, including syntax, phonetics/phonology, and morphology. (Specialized Knowledge)
- c. Spanish Outcome 3: Demonstrate an awareness and appreciation of important literary and artistic movements/works, and cultural aspects in relation to the Spanish-speaking world. (Specialized Knowledge)
- d. Spanish Outcome 4: Develop a research project focused on second language acquisition or teaching methodologies. (Critical Thinking)
- e. Spanish Outcome 5: Compare commonalities and differences between Hispanic and other U.S. cultures. (Critical Thinking)
- f. Spanish Outcome 6: Demonstrate knowledge of linguistic variations that exist in the Spanish-speaking world. (Specialized Knowledge)
- g. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
- h. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
- i. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
- j. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
- k. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.

- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 2.80 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Hispanic Studies, Spanish (BA)

Degree: Bachelor of Arts

Major: Spanish

Concentration: Hispanic Studies

Program Code: 3247

About This Major . . .

Spanish majors at Colorado Mesa University take classes which provide knowledge and skills intended to produce effective communication in Spanish as well as an understanding of the relationship of the Spanish language and its cultures to the world in which we live. Spanish and Hispanic Studies majors gain valuable insights into Peninsular and Latin-American language and literature as well as their histories and cultures. Students are also introduced to the linguistic properties of the Spanish language, with a focused study of Spanish phonetics and phonology. Students also take classes which provide insights into Spanish in the professions, such as translation, interpreting, and medical. Spanish graduates work in a variety of professions, where they apply their cultural competencies. In addition to that, many continue their studies in graduate schools.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Express themselves coherently in written and oral Spanish. (Communication Fluency)
- Apply knowledge of the structure of the Spanish language, including syntax, phonetics/phonology, and morphology in speech and writing. (Applied Learning)
- Demonstrate an awareness, understanding, and appreciation of important literary and artistic movements/works, linguistics, history, translation, interpretation, and/or cultural aspects in relation to the Spanish-speaking world. (Specialized Knowledge)
- Demonstrate knowledge of the linguistic variations that exist in the Spanish-speaking world. (Specialized Knowledge)
- Develop a research project focused on the application of Spanish in an area of the student's choosing (e.g. analyzes significant literary movements/works and the authors; the application of Spanish in a professional context; second language acquisition or teaching methodologies). (Critical Thinking)
- Compare commonalities and differences between Hispanic and other U.S. cultures. (Critical Thinking)

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Spanish (Minor)

Minor: Spanish
Program Code: M245

About This Minor. . .

The minor in Spanish at CMU is focused on developing students' abilities to speak, write and understand the Spanish language, as well as increasing the understanding of the cultures of Spanish-speaking countries. The goal is that those who graduate with this minor will become proficient enough to enable them to use Spanish effectively in a variety of practical settings.

Students pursuing this minor are allowed certain flexibility to choose classes that best complement their major area of study.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(21 semester hours, must pass all courses with a grade of "C" or higher.)

- FLAV 496 may be taken more than once as long as the title/content of each course differs. Permission may be required to take some Topics courses. Check with the professor.
- FLAV courses count for the Spanish minor only when taught in Spanish and as approved by your advisor.

Code	Title	Semester Credit Hours
FLAS 213	Spanish Conversation and Grammar ¹	3
6-7 additional 300- or 400-level FLAS or FLAV courses		18-21
Total Semester Credit Hours		21-24

¹ FLAS 213 can be waived for those with sufficient proficiency.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sport Management

Program Description

The Master of Science in Sport Management serves to develop students' conceptual skills, theoretical comprehension, and practical knowledge in order to prepare them as next generation leaders in the sport industry. The degree leads to a wide variety of career choices. Sport management graduates work in school, university, and college settings as athletic administrators, in public relations/marketing, or in professional or amateur sports areas.

The Bachelor of Science in Sport Management prepares students to enter the world of sport business or pursue a graduate degree. The sport management degree provides an overview of the history and role of sport in society and covers topics such as leadership and ethics, governance and communication and legal considerations in sport operations. Students will also obtain business administration skills through courses in accounting, marketing, economics and business information technology.

The Associate of Science in Sport Management is designed for students who intend to continue their education and obtain a baccalaureate degree. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. Graduates of this program may obtain entry-level positions in sport management or continue to pursue their bachelor-level education to obtain eventual higher-level positions related to sport management, business, or kinesiology.

The minor in Sport Management provides a strong platform for students to combine their interests in business with the business of

sports. Students will explore subject areas which include: principles of management, organization/administration/legal considerations, marketing, governance and communication, sport law and risk management, leadership and ethics. This minor complements business or mass communication majors.

Opportunities for college graduates with sport management education and experience are very diverse and challenging. As sport has evolved into an integral part of the American culture, the operations of sports programs have become more sophisticated and complex. With an understanding of the intricacies of sport activities and knowledge of effective business practices, graduates will be prepared to oversee sport programs and facilities. Sport management positions are found in a variety of settings including schools, colleges and universities, public and private agencies, private businesses, government and the military.

About This Program . . .

The Department of Kinesiology offers the Master of Science degree in Sport Management. The mission of the degree program is to develop students' conceptual skills, theoretical comprehension, and practical knowledge in order that they are prepared to become the next generation of leaders in the sport industry.

The degree leads to a wide variety of career choices. Sport management graduates work in school, university and college settings as athletic administrators, public relations/marketing directors, or in professional or amateur sports areas.

This program requires completion of a thesis or internship-related project.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

- Relate advanced principles of the sport management field.
- Incorporate a variety of oral and written business and professional communications skills.
- Practice ethical behavior in the workplace.
- Incorporate advanced sport management principles and theories.
- Integrate education in the workplace.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master's degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "[Graduate Degree Requirements](#) (p. 80)" in this catalog for a complete list of graduation requirements.
- All policies for graduate degrees are outlined in the [Graduate Policies and Procedures Manual](#), [Capstone Guidelines Manual](#), and [Thesis and Dissertation Guidelines Manual](#), all of which are provided on the [Graduate Studies website](#).

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Sport Management (BS)

Degree: Bachelor of Science
Major: Sport Management
Program Code: 3147

About This Major . . .

The Bachelor of Science in Sport Management prepares students to enter the world of sport business or pursue a graduate degree. The Sport Management degree provides an overview of the history and role of sport in society, and covers topics such as leadership and ethics, governance and communication, and legal considerations in sport operations. Students will also obtain business administration skills through courses in accounting, marketing, economics, and business information technology.

Opportunities for college graduates with sport management education and experience are very diverse and challenging. As sport has evolved into an integral part of the American culture, the operations of sports programs have become more sophisticated and complex. With an

understanding of the intricacies of sport activities and knowledge of effective business practices, graduates will be prepared to oversee sport programs and facilities. Sport Management positions are found in a variety of settings including schools, colleges, and universities, public and private agencies, government, and the military.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Critically evaluate the historical, socio-cultural, and philosophical aspects of sport. (Quantitative Fluency)
- Apply fundamental concepts of management, administration, marketing, finance, and economics to sport organizations. (Applied Learning)
- Construct codes of personal ethics and apply professional codes of ethics to a sport setting. (Critical Thinking)
- Apply skill in interpersonal and organizational communication, to the mass media, in both print and electronic medium. (Communication Fluency)
- Explain the relationships between sport and state/federal legislation, the court system, contract law, tort liability, agency law, antitrust law, constitutional law and collective bargaining. (Critical Thinking)
- Articulate the implications of the various agencies that govern sport at the professional, collegiate, high school, and amateur levels. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.

- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

About This Major . . .

The Associate of Science (A.S.) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. Graduates of this program may obtain entry-level positions in sport management or continue to pursue their bachelor-level education to obtain eventual higher-level positions related to sport management, business, or kinesiology.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Critically evaluate the historical, socio-cultural, and philosophical aspects of sport. (Quantitative Fluency)
- Identify fundamental concepts of management, administration, marketing, finance, and economics to sport organizations. (Applied Learning, Specialized Knowledge)
- Construct codes of personal ethics and apply professional codes of ethics to a sport setting. (Critical Thinking)
- Apply skill in interpersonal and organizational communication, to the mass media, in both print and electronic medium. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sports Management, Liberal Arts (AS)

Degree: Associate of Science
Major: Liberal Arts
Emphasis: Sport Management

- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sport Management (Minor)

Minor: Sport Management
Program Code: M103

About This Minor. . .

The minor in Sport Management provides a strong platform for students to combine their interests in business with the business of sports. Students will explore subject areas which include: principles of management, organization/administration/legal considerations, marketing, governance and communication, sport law and risk management, leadership, and ethics. This minor could complement business or mass communications majors.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sports Medicine

Students enrolled in the Sports Medicine certificate program should have a strong interest in the prevention, evaluation, and treatment of injuries to the physically active. Students will engage in practical experiences that will help them towards the possibility of a future career in Athletic Training while being exposed to Occupational Therapy, Physical Therapy, and Physician Assistant Studies. Students will explore subject areas that include risk management, prevention and evaluation of medical and musculoskeletal conditions, therapeutic modalities, therapeutic exercise in rehabilitation, and pharmacology. This program aims to advance the knowledge base of a paramedic and better prepare students enrolled in a degree program to work in a sports medicine environment.

About This Program. . .

Students enrolled in the Sports Medicine certificate program should have a strong interest in the prevention, evaluation, and treatment of injuries to the physically active. Students will engage in practical experiences that will help them towards the possibility of a future career in Athletic Training while being exposed to Occupational Therapy, Physical Therapy, and Physician Assistant Studies. Students will explore subject areas that include risk management, prevention and evaluation of medical and musculoskeletal conditions, therapeutic modalities, therapeutic exercise in rehabilitation, and pharmacology. This program aims to advance the knowledge base of a paramedic and better prepare students enrolled in a degree program to work in a sports medicine environment.

Important information about this program:

- 11 semester hours for the Sports Medicine Professional Certificate.
- 2.00 cumulative GPA or higher in the certificate is required.
- CPR/First Aid Certification is a graduation requirement for this certificate.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, critical thinking, and personal and social responsibility. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Identify the general medical or musculoskeletal pathology present based on signs, symptoms, and special tests outcomes. (Critical Thinking)
- Implement therapeutic interventions and pharmacological interventions appropriately and according to the needs of the patient. (Specialized Knowledge)
- Practice clinically in accordance with knowledge gained in courses taken. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(11 semester hours, must earn a grade of "C" or better in each course.)

Additional notes about requirements for completion of this degree:

- CPR/First Aid Certification is a graduation requirement for this certificate.
- 1 credit of KINE 399 is to be taken concurrently with KINE 420 and KINE 430.

Surgical Technology Program Description

This program prepares entry-level surgical technologists who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession. Students work in surgical operations areas under the supervision of surgeons, registered nurses, or other surgical personnel. The surgical technology program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC/STSA).

Coursework for an Associate of Applied Science degree is required prior to application to the program. Graduates of the program are eligible to take the certification examination given by the National Board of Surgical Technology and Surgical Assisting (NBSTSA). The program requires both classroom time and clinical time as described in the course syllabi. Clinical placements will be at surgical site affiliations in western Colorado.

This program requires an admission process to the program in addition to general admission to CMU. Students may apply to the surgical technology program during the last semester of the required pre-requisite courses. Please contact the Health Sciences Department for further information.

Programs of Study Associates

- [Surgical Technology \(AAS\)](#) (p. 698)

Surgical Technology (AAS)

Degree: Associate of Applied Science
Major: Surgical Technology
Program Code: 1651

About This Major . . .

The Associates of Applied Science in Surgical Technology Program is designed to cover both the academic and clinical skills necessary to perform as a surgical technologist. The program begins fall semester of each year. Prerequisite courses, including Essential Learning courses, are completed in year one prior to admission to the professional portion (year two) of the program. The application process occurs in the second semester of the first year. Once accepted to the program, the second year prepares students to work as surgical technologists and assist in surgical operations.

Surgical technologists work as members of a healthcare team alongside surgeons, registered nurses, and other health care workers. They prepare operating rooms, arrange equipment, and help doctors during surgeries. Students are prepared to work in a variety of surgical settings. A surgical technologist’s responsibilities include preparing patients for surgery, washing and disinfecting incision sites, positioning patients on the operating table, covering patients with sterile drapes, and transporting patients to and from the operating room. Surgical technologists prepare sterile solutions and medications used in surgery and check that all surgical equipment is working properly. They help the surgical team put on sterile gowns and gloves. During operations, surgical technologists pass instruments and supplies to surgeons and first assistants. They hold retractors and may hold internal organs in place during procedures. Surgical technologists may handle specimens taken for laboratory analysis. Surgical technologists who take and pass the certifying examination offered by the NBSTSA (National Board for Surgical Technology and Surgical Assisting) are certified and authorized to use the initials CST to designate their status as Certified Surgical Technologists.

For more information, visit Career Services’ [What to Do with a Major?](#) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Describe the scope and breadth of surgical technology and related skills using evidence-based resources. (Specialized Knowledge/ Applied Learning, Critical Thinking)
- Calculate therapeutic interventions for selected patient populations. (Quantitative Fluency)
- Summarize discipline-specific case presentations to professionals and peers. (Communication Fluency)
- Interpret administrative and clinical policies to advocate for patient safety during surgical procedures. (Personal and Social Responsibility)
- Translate discipline-specific concepts into clinical surgical practice. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select “Print

Options. This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 65 semester hours total for the AAS, Surgical Technology.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sustainability Practices

Program Description

"Sustainability" is a way of living that meets the needs of the present without compromising the ability of future generations to meet their own needs. In order to achieve sustainability, we must examine our approach to energy, food, shelter, transportation and other aspects of everyday life. Can we continue our current approach indefinitely? What changes need to occur to make our approach sustainable? What can we do to make those changes?

Through courses required for the certificate in sustainability practices, students learn the principles of sustainability along with specific ways to implement them. Anyone seeking to understand and practice this approach will benefit from completion of the program. For some, the program can serve as a first step toward a more in-depth knowledge that may lead to a career. This certificate could help professionals to distinguish their business practices, community leaders to better understand future trends in community planning and any student, educator or citizen to make a positive difference in the environment.

Certificates

- [Sustainability Practices \(Professional Certificate\)](#) (p. 389)

Sustainable Agriculture

Program Description

Sustainable agriculture is a holistic approach to agricultural practices using the principles of ecology – the study of relationships between organisms and their environment. Sustainable practices include an integrated system of plant and animal production practices, often with a long term, site-specific application. These principles are integrated throughout each course of the sustainable agriculture degree, addressing how to enhance environmental quality of food production, while also taking into account the economic viability of farm and ranch operation. Graduates of this Associate of Applied Science degree will be well-

prepared for a work place environment with a solid foundation of sustainable agricultural principles, theory-based lectures, and hands-on experiential learning.

Programs of Study Associates

- [Sustainable Agriculture \(AAS\)](#) (p. 701)

Sustainable Agriculture (AAS)

Degree: Associate of Applied Science
Major: Sustainable Agriculture
Program Code: 1310

About This Major . . .

The Sustainable Agriculture curriculum is designed to provide the entrepreneurial and technical skills necessary to manage a profitable, environmentally sound, community based small farm or agricultural business. Students learn the fundamentals of sustainable agriculture, focusing on crop and animal production with farm business. Emphasis is placed on entrepreneurial and practical field training. Students will complete a business plan and an agricultural internship in marketing and farming. Graduates are qualified for employment in a variety of positions associated with sustainable agriculture, including horticultural and livestock operations, wholesale and retail management, nursery operations, and environmental and agricultural education.

This program will provide the student with an understanding of Sustainable Agriculture and its principles of operation and control. The graduate will understand the technical aspects of the work, the responsibilities of the work and the importance of safety in this vitally important career.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply business communication using listening, verbal and written and electronic forms that are needed for entry level employment. (Communication Fluency)
- Apply mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
- Research, evaluate, synthesize and apply information/data relevant to business, sciences and technical careers. (Critical Thinking)
- Demonstrate knowledge of terminology, symbols, business practices, and principles and application of technical skills. (Specialized Knowledge)

- Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- A minimum of 16 hours taken at CMU in no fewer than two semesters.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Teacher Education

(See [Art](#) (p. 129), [Early Childhood Education](#) (p. 306), [Education: Teacher Licensure](#) (p. 324), [English](#) (p. 367), [History](#) (p. 437), [Kinesiology](#) (p. 466), [Liberal Arts](#) (p. 479), [Mathematics](#) (p. 521), [Music](#) (p. 559), and [Social Science](#) (p. 663) for graduate and undergraduate programs)

Theatre Arts

Program Description

The Theatre program offers rigorous conservatory-style training within a well-rounded liberal arts education at an affordable public school price. The program is constructed to help students meet the rigorous demands of a professional career in theatre and to provide a strong artistic foundation and practical experience. The program is led by a dynamic faculty composed of current and former artistic directors, actors, singers, designers, and dancers with deep connections to top industry professionals from coast to coast.

Acting/Directing students at CMU can expect a full sequence of Stanislavski-based acting classes in addition to training in Shakespeare, voice, speech, acting for the camera, script analysis, movement, stage combat, make-up, dance, and more. Unlike many other undergraduate programs, CMU also offers students the opportunity to not only take directing classes but also direct full productions as part of the performance season. The program is large enough to tackle ambitious projects and yet small and flexible enough to tailor to students' particular needs. Classes are intimate, with a small faculty-to-student ratio, allowing for significant individual attention, and each season's productions are picked specifically for the current class of students. Opportunities to perform begin in the freshman year.

The Music Theatre concentration represents one of the most unique programs offered in Colorado, stressing strong technical foundations in music, theatre, and dance. This approach creates "triple threats" and enhances a young performer's potential for a career in musical theatre. To complement technique courses, students also participate in a wide variety of performance-related assignments. Students develop all disciplines of performance in an intimate and rigorous setting. Individuality and diversity are at the heart of all acting courses (from contemporary to "Shakespeare", vocal studies (including jazz, pop, and rock), and dance classes (jazz, tap, and hip hop).

Dance at CMU is thriving, with an array of dance styles, performance opportunities, and travel. Equal emphasis is placed on Modern, Jazz, Ballet, and Hip Hop with course offerings from beginner to advanced levels. The faculty members have professional backgrounds across multiple forms of dance. With three dance concerts a year, Colorado Mesa University faculty and students choreograph and invite visiting guest artists from the professional dance world. Students annually travel to American College Dance Association, conferences, and engage in local and state outreach. The BA in Dance is constructed to help students meet the rigorous demands of a professional dance career and provide a strong foundation and practical experience for future dance artists.

For our Design/Technology major, we cultivate daring artistic and scholarly pioneers poised to be the luminaries our industry demands. CMU strives to promote an environment where students exist as an ensemble of artists, who create work together and are active supporters of each other. This is an intimate and rigorous program. We give personalized attention to students with a specific focus on making

students the best versions of themselves. The program accentuates absolute involvement and immersion in our seasons. This deep involvement within a production process prepares students for the rigors and demands of producing theatre well beyond the walls of CMU. Technology in the Moss Performing Arts Center is state-of-the-art. We have a multi-level costume construction and design facility, a spacious scenic construction area, a robust and fully rigged proscenium space, and an experimental black-box-style theatre.

The goal of our Theatre Generalist BA program is to encourage theatre studies for students who may be interested in cultivating a broad range of theatrical skills or who want to pursue theatrical careers outside of performance or design/technology, such as producing, arts administration, teaching, dramaturgy or playwriting. Beginning with the first semester, students follow a curriculum that offers a grounding in the fundamentals while allowing the flexibility to focus or move between dance, theatre, musical theatre, or design/technical theatre options.

Through the theatre minor, students may choose courses from a broad range of theatrical endeavors including acting, scenery, costumes, theatre history, the teaching of theatre, arts management, and dramatic literature. Students will also have the opportunity to gain hands-on experience in the creation of two mainstage shows during the CMU theatre season. The training afforded by the study of theatre is also attractive to many other professions, including teaching, non-profit leadership, human resources, and law.

Special Requirements

Students seeking admission as theatre majors must successfully audition for acceptance into the Acting/Directing, Music Theatre, and Dance concentrations. Admission to the University does not guarantee admission into one of these programs. Prospective theatre majors should consult the department's website or contact the department directly for information regarding audition dates and requirements. Prospective students interested in departmental scholarships must audition no later than April 15 of the year they seek admission.

- Students deficient in piano skills will be required to complete MUSA 130 and MUSA 131. MUSA 130 and MUSA 131 may be taken as lower-division electives or Musical Theatre Support Courses.
- Students deficient in theory skills will be required to complete MUSA 113 before taking MUSA 114. MUSA 113 may be taken as a lower division elective or a Musical Theatre Support Course.

Acting/Directing, Theatre Arts (BFA)

Degree: Bachelor of Fine Arts
Major: Theatre Arts
Concentration: Acting/Directing
Program Code: 3265

About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from three distinct concentrations in the Bachelor of Fine Arts degree (Acting/Directing, Music Theatre, or Design/Technology), the Bachelor of Arts degree (Theatre Arts), or the Bachelor of Fine Arts degree in Dance, and acquire a sound understanding of the performing arts in state-of-the-art facilities.

The Acting/Directing concentration is constructed to help students meet the rigorous demands of a professional acting career and provide a strong foundation and practical experience for future directors. Beginning with the first semester, students enroll in performance courses taught by academically and professionally experienced faculty. Unlike larger institutions, acting opportunities in all productions at Colorado Mesa University are open to motivated and talented freshmen. In acting courses, students are exposed to techniques and approaches that are industry standards today. Training is grounded in Stanislavski, Cohen, and Chekhov. Voice and movement courses are complemented by performance opportunities in student in faculty directed productions.

Acting students also audition for one act plays directed by directing students each year. Experimental and other challenging productions are offered at the Mesa Experimental Theatre.

Colorado Mesa is strategically located at the hub of a circle of important entertainment centers such as Aspen, Telluride, Moab, and Park City, Utah. There are regional theatres of international repute within driving distance, such as the Utah Shakespeare Festival, the Denver Center for the Performing Arts, and the Colorado Shakespeare Festival. There is a thriving theatrical scene in Grand Junction that offers opportunities for summer employment, including CMU's own Mesa Repertory Theatre. At Colorado Mesa, we are committed to the philosophy of training theatrical entrepreneurs. We offer low teacher-to-student ratios so that personal attention and mentoring are possible. Our many graduates in the industry have informed us that Colorado Mesa's approach was invaluable.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)

- d. Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
- e. Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music Theatre, Theatre Arts (BFA)

Degree: Bachelor of Fine Arts
Major: Theatre Arts
Concentration: Music Theatre

Program Code: 3266

About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from two distinct concentrations in the Bachelor of Fine Arts degree in Theatre Arts (Acting/Directing or Music Theatre), two concentrations of the BA (Theatre Arts or Design/Technology) or the BFA in Dance and acquire a sound understanding of the performing arts in state-of-the-art facilities.

The Music Theatre concentration provides strong technical foundations in Music, Theatre, and Dance. This approach is to create "triple threats" and enhance the young performer's potential for an exciting career in Musical Theatre. Students begin training with music theory and ear training, private voice instruction, choir and class piano. Acting I and II, Ballet and Tap are also included to complete first year academic requirements. To complement technical courses, students also participate in a wide variety of performance related assignments which include two Main stage productions, Experimental Theatre productions, choral ensembles, dance concerts, student directed one-acts, and technical crew assignments.

Students continue interdisciplinary course work in audition techniques and resume writing, as well as preparing and performing Vocal/Acting auditions and specialty performances throughout their next three years.

The Music Theatre concentration offers highly personalized instruction from skilled professors who are seasoned performers, coaches, directors, teachers, and technicians; working graduates cite this as the prime reason for their success in gaining employment in both local and national venues. Music Theatre graduates currently work on Broadway, Off-Broadway, in National Broadway tours, Regional Theatres, dinner theatres, cruise ships, and with Disney and Universal Studios.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication Fluency)
- Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication Fluency)
- Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
- Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
- Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Design/Technology, Theatre Arts (BFA)

Degree: Bachelor of Fine Arts
Major: Theatre Arts
Concentration: Design/Technology
Program Code: 3269

About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from four distinct concentrations in the Bachelor of Fine Arts degree in Theatre Arts (Acting/Directing, Design/Tech, Dance, or Music Theatre), or a concentration in the BA (Theatre Arts), and acquire a sound understanding of the performing arts in state-of-the-art facilities.

The BFA in Design/Technology exposes students to the visual and technical aspects of Theatre, including Costume, Lighting, Sound, Scenery, and Stage Management. The first-year centers on courses that develop aesthetic sensitivity and technical proficiency. Subsequent years are devoted to studio work that continues to develop a student's visual storytelling, creative problem solving and collaborative processes.

Coursework focuses on the development of the student as a theatre professional, whether they lean toward technology or design areas, and will include classroom and hands-on production experiences in drafting, rendering, scenic and costume construction and craft work, and other methods of communicating, collaborating, and contributing to the theatrical production process. The program culminates in a final design or technology project during the fourth year.

Students can expect personalized instruction and supervised "hands-on" design experiences that stretch from designs on paper to fully realized Black Box and Mainstage productions. Graduates of the Design/Technology concentration will have the necessary skills for success in graduate studies or the professional theatre.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
- Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Theatre Arts, General (BA)

Degree: Bachelor of Arts
Major: Theatre Arts (General)
Program Code: 3264

About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from three distinct concentrations in the Bachelor of Fine Arts degree in Theatre Arts (Acting/Directing, Music Theatre, or Design/Technology), a BA Theatre Arts (for those desiring a broader approach) or the BA in Dance and acquire a sound understanding of the performing arts in state-of-the-art facilities.

The Bachelor of Arts' primary goal is to encourage general theatre studies for students who may be interested in theatrical careers outside of performance or design/technology, such as producing, arts administration, teaching, dramaturgy, and playwriting. Beginning with the first semester, students follow a curriculum that offers a grounding in the fundamentals while allowing the flexibility to focus or move between dance, theatre, musical theatre or design/technical theatre options.

Colorado Mesa is strategically located at the hub of a circle of important entertainment centers such as Aspen, Telluride, Moab, and Park City, Utah. There are regional theatres of international reputation within driving distance, such as the Utah Shakespeare Festival, the Denver Center for the Performing Arts, and the Colorado Shakespeare Festival. At Colorado Mesa, we are committed to the philosophy of training theatrical entrepreneurs. We offer low teacher-to-student ratios so that personal attention and mentoring are possible. Our many graduates in the industry have informed us that Colorado Mesa's approach was invaluable.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
- Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)

- Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
- Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)
- Analyze ethical, social, and/or civic challenges and their intersection with the performing arts at the local, national, and global levels. (Personal and Social Responsibility)
- Find, critically evaluate, and effectively apply relevant sources of information to discipline-specific projects. (Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Theatre (Minor)

Minor: Theatre
Program Code: M270

About This Minor. . .

The Department of Theatre Arts is one of the most successful theatre training programs in Colorado. Through the Theatre Minor, students may choose courses from a broad range of theatrical endeavor including: acting, scenery, costumes, theatre history, the teaching of theatre, arts management, and dramatic literature. Students will also have the opportunity to gain hands on experience in the creation of shows in the CMU Theatre season. The training afforded by study of theatre is also attractive to many professions including teaching, human resources, and law.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Transportation Services

Program Description

The Transportation Services program covers the theory and fundamentals of operation, troubleshooting, diagnostic testing, and repair of: drive trains, gas and diesel engines, hydraulic and air brakes, alignment, suspension and steering, climate control, electronic body and chassis controls, engine performance, and emission systems, charging and starting systems, hybrid drive systems, and hydraulic and pneumatic systems, safety, technical mathematics, oral and written communication, and leadership skills. The student may choose one of two certificates and/or an Associate of Applied Science automotive degree and a certificate and/or Associate of Applied Science degree in Diesel Technology. The focus of the programs is the repair of late-model vehicles, with an emphasis on computer controls.

The program is accredited by the ASE Education Foundation (Formerly NATEF, the National Automotive Technicians Education Foundation) as a Master Automotive Service Technician program. The courses prepare the student to take the ASE, Automotive Service Excellence, certification examinations; the ASE examinations are administered at CMU quarterly.

By successfully completing a technical certificate, an Associate of Applied Science in Transportation Services, or an Associate of Applied Science of Diesel Technology, students will be prepared for careers as automotive/diesel technicians, parts and service distributors, industrial sales representatives, service managers, and business owners in the transportation services industry.

The Associate of Applied Science in Diesel Technology can be fully completed in four semesters.

Special Requirements

Excellent dexterity, eye-hand coordination, and critical thinking are a plus for a technician. Proper selection, care, and safe use of power, hand and diagnostic tools, and equipment are emphasized.

Advanced Automotive Service Technician, Transportation Services (AAS)

Degree: Associate of Applied Science
Major: Transportation Services
Emphasis: Advanced Automotive Service Technician
Program Code: 1386

About This Major . . .

In the Associate of Applied Science degree with a major in Transportation Services, and emphasis in Advanced Automotive Service Technician, students learn the fundamentals of electronics, starters, ignition, and charging systems, air conditioning, cooling and heating systems, safety, technical math, use of technical manuals, basic management skills, written and oral communication skills, and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting, suspension systems, and alignment and wheel balance. The Advanced Automotive Service Technician emphasis prepares students for careers as automotive technicians, parts and service distributors, industrial sales representatives, service managers, and business owners in the transportation services industry.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
- Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those findings to strategies to properly repair the vehicle. (Critical Thinking)
- Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
- Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)
- Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)
- Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)
- Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 70 semester hours total for the AAS, Transportation Services - Advanced Automotive Service Technician.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Diesel Technology, Transportation Services (AAS)

Degree: Associate of Applied Science
Major: Transportation Services
Emphasis: Diesel Technology
Program Code: 1342

About This Major . . .

In the Associate of Applied Science degree with a major in Transportation Services and emphasis in Diesel Technology, students learn the fundamentals of electronics, starters, ignition, and charging systems; air conditioning, cooling and heating systems; safety; technical math; use of technical manuals; basic management skills; written and oral communication skills; and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting; suspension systems; and alignment and wheel balance. The diesel technology emphasis concentrates on on-road trucks and light duty diesel-powered vehicles. Students will be prepared for careers as diesel technicians, parts and service distributors, industrial sales representatives, service managers, and business owners in the transportation services industry.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply Mathematical concepts and practices that are required to properly perform diesel vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
- Evaluate evidence discovered during the diagnosis and troubleshooting of diesel vehicles and apply those findings to strategies to properly repair the vehicle. (Critical Thinking)
- Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
- Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a diesel repair technician. (Specialized Knowledge)
- Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)
- Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs

may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 61 semester hours total for the AAS, Transportation Services - Diesel Technology.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Automotive Service Technician, Transportation Services (Technical Certificate)

Award: Technical Certificate

Program of Study: Transportation Services

Specialization: Automotive Service Technician

Program Code: 1312

About This Program . . .

Students learn the fundamentals of electronics, starters, ignition, and charging systems, air conditioning, cooling and heating systems, safety, technical math, use of technical manuals; basic management skills, written and oral communication skills, and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting, suspension systems, and alignment and wheel balance. Career options include automotive/diesel technician, parts and service distributor, industrial sales representative and service manager.

*Students must complete the Light Duty Technician Technical Certificate before enrolling in this technical certificate. Please contact an advisor for additional information.

For more information on what you can do with this major, visit WCCC’s [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
- Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those findings to strategies to properly repair the vehicle, beyond basic service technician technical knowledge. (Critical Thinking)
- Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
- Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select “Print Options.” This will give you the options to either “Send Page to Printer” or “Download PDF of This Page.” The “Download PDF of This Page” option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(40 semester hours)

- Additional Expenses – Students entering the program may be required to purchase or have hand tools and appropriate clothing and safety gear with a total cost of approximately \$2,500.00 This does not include cost of required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Light Duty Automotive Technician Foundations I, Transportation Services (Technical Certificate)

Award: Technical Certificate

Program of Study: Transportation Services

Specialization: Light Duty Automotive Technician Foundations I

Program Code: 1119

About This Program . . .

Students learn the fundamentals of electronics, starters, ignition, and charging systems, air conditioning, brakes, suspension and steering, cooling and heating systems, safety, technical math, use of technical manuals, basic management, communication and leadership skills. Career options include light duty automotive/diesel technician, parts and service distributor.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply principles of grammar and vocabulary in the documentation required to perform the duties of a repair technician to properly repair vehicles. (Communication Fluency)
- Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
- Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those findings to strategies to properly repair the vehicle. (Critical Thinking)
- Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
- Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)
- Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)

- g. Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)
- h. Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

- This program is a required precursor to the Technical Certificate in Light Duty Automotive Technician Foundations II.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(9 semester hours, must earn a grade of "C" or better in each course.)

- Additional Expenses – Students entering the program may be required to purchase or have hand tools and appropriate clothing and safety gear with a total cost of approximately \$2,500.00. This does not include cost of required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Light Duty Automotive Technician Foundations II, Transportation Services (Technical Certificate)

Award: Technical Certificate

Program of Study: Transportation Services

Specialization: Light Duty Automotive Technician Foundations II

Program Code: 1120

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Unmanned Aircraft Systems

This program prepares students to be a commercial Unmanned Aircraft Systems (UAS) pilot (a UAS pilot is sometimes referred to as a drone pilot). Students develop skills in flight planning, programming, maintaining and piloting small UAS. Preparation for the Federal Aviation Administration (FAA) Remote Pilot Knowledge test is included. Students learn how to acquire and transmit data and participate in live flight training of UAS, both indoor and outdoor.

The program will also develop students' knowledge and understanding of UAS history, terminology, operational capabilities and limitations, and FAA Part 107 compliance and regulation. Key skills of emphasis include flight operation and maintenance, preflight procedures, and sectional chart reading.

Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Veterinary Technology Program Description

This program prepares the student for employment as a Veterinary Technician. These professionals are integral members of the veterinary care team in private veterinary practices, research laboratories, kennels, zoos, and public practice/government agencies. Students are trained to work with a broad range of animal species and to become proficient in performing a variety of tasks including medical and surgical nursing procedures, laboratory testing, anesthesia induction, recovery maintenance, monitoring, holding and restraining animals during exams and treatments, collecting specimens, taking diagnostic X-rays, administering medication or treatments, assisting in surgery, and assisting with client education.

Successful completion of the program will lead to an Associate of Applied Science in Veterinary Technology and prepares students to take the Veterinary Technician National Examination for certification.

Students admitted to the Veterinary Technology program must undergo a background check, submit proof of immunizations and health insurance.

Veterinary Technician Program Accreditation

- Higher Learning Commission (HLC)
- Specialized Accreditation American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA CVTEA)

Western Colorado Community College (WCCC) Veterinary Technology Program has achieved program approval through the Higher Learning Commission (HLC) and the AVMA CVTEA.

This is a competitive program; applications are due in the fall of each year for admission into the program in Spring. Pre-requisite classes can be completed in the fall prior to the intended admission to the program. A link to the application form and information about the interview process can be found here:

<https://www.coloradomesa.edu/wccc/programs/veterinary-technology.html>

Programs of Study Associates

- [Veterinary Technology \(AAS\)](#) (p. 735)

Veterinary Technology (AAS)

Degree: Associate of Applied Science
Major: Veterinary Technology

Program Code: 1306

About This Major . . .

The Veterinary Technology program is for all individuals who wish to develop careers as an important member of the veterinary care team by providing humane and quality care to animals. Veterinary technicians perform a variety of tasks including medical and surgical nursing procedures, laboratory testing, anesthesia induction, recovery maintenance, monitoring, holding and restraining animals during exams and treatments, collecting specimens, taking diagnostic X-rays, administering medication or treatments, assisting in surgery, and assisting with client education. Your education will lead to an Associate of Applied Science in veterinary technology and prepares you to take the Veterinary Technician National Examination for certification. Graduates may find career opportunities in private veterinary practices, research laboratories, kennels, zoos, and local, state and federal agencies.

Important information about this program:

- Program admission requires a minimum overall GPA of 2.5 and a grade of "C" or better in ENGL 111, SPCH 101, MATH 108, BIOL 105, and BIOL 105L.
- A minimum grade of C is required for all VETT courses.

For more information on what you can do with this major, visit Career Services' [What to Do with a Major?](#) resource.

Veterinary Technician Program Accreditation –

Higher Learning Commission (HLC) and Specialized Accreditation American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA CVTEA)

Western Colorado Community College (WCCC) Veterinary Technology Program has achieved program approval through the Higher Learning Commission (HLC) and is in the process of completing accreditation requirements for accreditation through the AVMA CVTEA. The AVMA CVTEA application does not guarantee accreditation nor does it grant any temporary status of accreditation. While students may take classes that are potentially required for a degree, students will not be eligible to sit for the Veterinary Technician National Exam until AVMA CVTEA program approval is granted. WCCC is actively seeking this accreditation.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate in a professional manner to the veterinary team and clients, in all formats - written, oral, non-verbal, and electronic (Communication Fluency).
- Safely and effectively perform applied skill sets and techniques necessary for the profession and applicable to a broad range of animal species, at a competent level and in a proficient manner (Critical Thinking; Specialized Knowledge/Applied Learning).
- Follow and uphold applicable laws and the veterinary technology profession's ethical codes to provide high quality care to patients (Personal and Social Responsibility).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 82 semester credit hours required for the AAS, Veterinary Technology.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Viticulture and Enology

Program Description

The Viticulture and Enology curriculum is designed to provide the entrepreneurial and technical skills necessary to manage a profitable, environmentally sound vineyard and/or winemaking business. Students learn the fundamentals of sustainable viticulture, focusing on cultivars that are suitable for Colorado, as well as the science of fermentation, and the fundamentals of producing and testing wine. The new Warren Winiarski-Gerald Ivancie Institute of Viticulture and Enology allows students to collaborate with grape growers and wine makers providing valuable research that is needed for a thriving wine industry. Emphasis is placed on entrepreneurial and practical field training. As part of their education, students will learn the challenges of establishing a vineyard and growing high-quality grapes in a harsh environment, and apply knowledge learned in all aspects of the winemaking process in a hands-on atmosphere. Graduates are qualified for employment in a variety of positions associated with viticulture and winemaking businesses.

This program will provide the student with an understanding of the viticulture and enology industry, the principles and science underlying operation and control decisions, and financial practices and measures common to the businesses. The graduate will understand the fundamentals of making a high-quality wine starting in the vineyard through bottling in this vitally important career.

Viticulture and Enology (AAS)

Degree: Associate of Applied Science

Major: Viticulture and Enology

Program Code: 1309

About This Major . . .

The Viticulture and Enology curriculum is designed to provide a multifaceted education of the wine business. The Colorado wine industry is made up of boutique size wineries. Owners, managers, and key employees need to have a strong knowledge of all aspects of the business to aid in their success including grape growing, wine production and sales/marketing.

Graduates from the Associate of Applied Science in Viticulture and Enology have the knowledge and skills to start their own winery or begin a variety of careers in viticulture or the wine business. Emphasis is placed on entrepreneurial and practical field training.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply appropriate terminology used in winemaking and sensory analysis, including a presentation of this information to the class. (Communication Fluency)
- Apply chemistry and mathematics principles to solve problems and calculations needed throughout the winemaking process. (Quantitative Fluency)
- Evaluation of wines to assess quality and solve problems through research and information learned throughout the program. (Critical Thinking, Information Literacy)
- Describe the personal and legal responsibility in the wine business; including applicable federal, state and local laws. (Personal and Social Responsibility)
- Recognize and describe the production of a high-quality wine, including starting parameters, fermentation and aging. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs

may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 65 semester hours total for the AAS, Viticulture and Enology.
- A minimum of 16 semester hours taken at CMU in no fewer than two semesters.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Viticulture and Enology: Enology (Technical Certificate)

Award: Technical Certificate

Program of Study: Viticulture and Enology

Specialization: Enology

Program Code: 1109

About This Program . . .

Enology Technical certificate in the Viticulture and Enology program is a concentrated study in both the art and science involved in the winemaking process. The certificate provides a solid foundation of knowledge from grape to bottle. Students apply the skills in a hands-on setting through small-scale winemaking with individual projects and applied research projects for the industry.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply appropriate terminology used in winemaking and sensory analysis, including the presentation of this information to the class. (Communication Fluency)
- Apply chemistry and mathematic principles to solve problems and calculations needed throughout the winemaking process. (Quantitative Fluency)
- Evaluation of wines to assess quality and solve problems through research and learned information. (Critical Thinking)
- Describe and explain the production of a high-quality wine, including starting parameters, fermentation, and aging. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(17 semester hours, must earn a grade of "C" or better in each course.)

Viticulture and Enology: Viticulture (Technical Certificate)

Award: Technical Certificate
 Program of Study: Viticulture and Enology
 Specialization: Viticulture
 Program Code: 1107

About This Program . . .

Viticulture Technical certificate in the Viticulture and Enology program prepares students with the skills to establish a vineyard, or a career in grape growing. Eighty percent of the grapes grown in Colorado are located in the Grand Valley. Students build a solid foundation and participate in workshops with local growers. Courses are taught in a hands-on setting in the vineyard. Students will visit several vineyard sites through courses that make up this certificate.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate clearly and appropriately basic grape growing protocols in a site evaluation. (Communication Fluency)
- Apply mathematical and applied chemistry concepts for use in calculations needed in the field. (Quantitative Fluency)
- Evaluate and apply information learned/researched to identify problems in the vineyard. (Critical Thinking)
- Research and demonstrate knowledge for establishing a successful vineyard site. (Specialized Knowledge)

Viticulture and Enology: Wine Appreciation (Technical Certificate) Overview

Award: Technical Certificate
 Program of Study: Viticulture and Enology
 Specialization: Wine Appreciation
 Program Code: 1143

About This Program . . .

Wine Appreciation Technical certificate in the Viticulture and Enology program gives the student an opportunity to learn about winemaking, wine styles, wine regions, grape varieties and an opportunity to develop or improve their palate through sensory analysis. This certificate would benefit students in a restaurant, winery tasting room, retail/wholesale or used as a foundation to be successful toward a sommelier certification.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate clearly and appropriately the basics of the winemaking process. (Communication Fluency)
- Describe and identify wines produced from different regions using different grape varieties. (Specialized Knowledge)
- Evaluate and apply knowledge learned to identify through problem-solving individual wine styles. (Critical Thinking)

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 8 semester hours required for Technical Certificate in Viticulture and Enology: Wine Appreciation.

Program Specific Requirements

(8 semester hours required.)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Viticulture and Enology: Wine Fermentation (Technical Certificate)

Overview

Award: Technical Certificate
 Program of Study: Viticulture and Enology
 Specialization: Wine Fermentation
 Program Code: 1149

About This Program . . .

Wine Fermentation Technical certificate in the Viticulture and Enology program is a concentrated study in all aspects of the fermentation process. Fermentation is the process of microorganisms converting sugar to ethanol that cannot be visualized. Students use lab analysis, sensory and a strong foundation of knowledge to understand the process of fermentation. The courses in the certificate are taught in a hands-on setting applying skills learned to gain understanding of the process. Although this certificate is directed toward making wine from grapes, fruit and/or honey; fermentation is fermentation, and the knowledge gained could be used in both beer and cider making.

For more information on what you can do with this major, visit [WCCC's Programs of Study page](#).

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Apply appropriate terminology used in fermentation and winemaking, including a presentation to the class to deliver the information. (Communication Fluency)
- Evaluation of wines to assess quality and solve problems through research and learned information. (Critical thinking)
- Describe and explain the production of a high-quality wine, including starting parameters, fermentation and aging. (Specialized Knowledge)
- Apply chemistry and mathematic principles to solve problems and calculations needed throughout the fermentation process. (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.

Viticulture and Enology: Wine Professional (Technical Certificate)

Award: Technical Certificate
 Program of Study: Viticulture and Enology
 Specialization: Wine Professional
 Program Code: 1108

About This Program . . .

Wine Professional Technical certificate in the Viticulture and Enology program introduces students to the service/sales side of wine. The student will gain knowledge in all aspects of wine production, wine marketing, sensory analysis and social media. This would be an ideal

certificate for a student looking to work in the hospitality sector, tasting room sales/management, or wine club manager.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, communication fluency, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Communicate clearly and appropriately the basics of the winemaking process. \ (Communication Fluency)
- Research and apply knowledge learned to develop a successful marketing plan in a saturated industry. (Critical Thinking)
- Demonstrate a broad, comprehensive knowledge of sensory evaluation and the process of identifying a wine. \ (Specialized Knowledge)

Watershed Science Program Description

The Watershed Science minor is an interdisciplinary program designed to serve the regional need for scientists with a strong background in water-related issues. It is a useful complement to environmental, physical and biological science majors, providing students in these fields with focused coursework. Combined with the relevant bachelor of science degree, plus additional calculus and physics courses, the minor satisfies the federal government’s requirements for qualification as a hydrologist. The proximity of Colorado Mesa University to the Colorado, Gunnison and Green Rivers and the drainages of the Colorado National Monument create an ideal location for the study of Watershed Science.

Wildland Fire Management Program Description

The Associate of Applied Science (AAS) in Wildland Fire Management program covers the fundamentals of basic wildland firefighting, fire management and safety.

The program prepares students for entry-level positions in the wildland firefighting profession and is designed to provide students who are interested in careers in emergency and natural resource management with the knowledge, communication, and critical thinking skills necessary for success in the field.

Subjects covered are varied and include wildland fire fundamentals, leadership skills, fire behavior, meteorology, basic aviation, pumps and water hydraulics, incident command system, communications, ignition methods, and organizational management related to wildland fire emergency services. Program instructors contribute up-to-date industry expertise, and three credit internships are also available in the

summer months with wildland fire agencies to enhance the student's field knowledge and practical experiences.

Students successfully completing the program are eligible for industry certification. The wildland fire courses presented meet National Wildfire Coordination Group (NWCG) standards and are accepted by federal, state, and local agencies with wildland fire management jurisdictions. This degree provides graduates with a competitive advantage in gaining employment with the wildland fire service and land management career markets. Students with this AAS in Wildland Fire Management combined with industry certification will be highly competitive for employment and future promotional opportunities in this field.

Special Requirements

Wildland Fire operations are rigorous in nature and some of the field training is arduous in order to simulate actual fire scene environments. Students are responsible for providing their own boots and gloves that meet NWCG requirements for personal protective equipment.

- [Wildland Fire Management \(AAS\)](#) (p. 748)

Wildland Fire Management (AAS)

Degree: Associate of Applied Science
Major: Wildland Fire Management
Program Code: 1363

About This Major . . .

This program is designed for students who want the credentials of an associate degree combined with the technical training that meets the National Wildfire Coordination Group (NWCG) standards. The courses offered align with the NWCG Curriculum.

This degree provides graduates with a competitive advantage in gaining employment in the Wildland fire and land management career markets. Graduates are qualified to apply for jobs with the Bureau of Land Management, U.S. Forest Service, National Park Service, Fish and Wildlife, as well as state, county, and contracted wildland firefighting entities.

For more information on what you can do with this major, visit WCCC's [Programs of Study](#) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

- Demonstrate proficient formal and informal communication and writing skills that are professional in nature (Communication Fluency)
- Apply mathematical concepts required of entry level wildland firefighters. (Quantitative Fluency)

- Demonstrate specialized and holistic knowledge of interagency Wildland Fire Management (Specialized Knowledge)
- Demonstrate proficiency in basic skills required for entry level Wildland Fire Management professionals (Applied Learning)
- Evaluate leadership and ethical issues specific to Wildland Fire Management (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 62 semester hours total for the AAS, Wildland Fire Management.

Essential Learning Requirements

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for

your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Code	Title	Semester Credit Hours
Communication		
ENGL 111	English Composition I-GTCO1	3
Select one of the following:		
ENGL 112	English Composition II-GTCO2	3
SPCH 101	Interpersonal Communications	
SPCH 102	Speechmaking	
Mathematics		
MATH 108	Technical Mathematics (or higher) ¹	4
Other Essential Learning Core Courses		
Select one Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities course		3
Select one Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities course		3
Total Semester Credit Hours		16

¹ MATH 108 is a 4 semester credit hour course. 3 credits apply to Essential Learning. A higher course will satisfy the mathematics requirement for this AAS, and MATH 110, MATH 113, or higher may be required for BAS and BS degrees at CMU. See next intended degree for details if continuing to baccalaureate study after completion of AAS. Should a student successfully complete a higher MATH course for 3 semester credit hours, this would fulfill the Mathematics Essential Learning Requirement and reduce the Essential Learning hours to 15. It would also reduce the overall hours for degree to 61, which is sufficient for graduation with this degree *only* when this hour difference is due to successful completion of a higher level MATH course at 3 semester credit hours.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at <http://www.coloradomesa.edu/registrar/graduation.html>.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Women's and Gender Studies

Program Description

The Women's and Gender Studies minor recognizes the centrality of gender to a variety of disciplines, professions, personal experiences, and world views. Students will take coursework in disciplines such as Criminal Justice, History, Literature, Political Science, Psychology, and Sociology with an aim of developing an interdisciplinary understanding of issues related to women and gender in contemporary and historical contexts.

By augmenting students' chosen majors, the Women's and Gender Studies minor prepares students looking for strong interdisciplinary perspectives along their path to careers and/or further studies in social work, counseling, law, education, business, political science, and the arts, among others.

Women's and Gender Studies (Minor)

Minor: Women's and Gender Studies
Program Code: M705

About This Minor. . .

The Women's and Gender Studies Minor recognizes the centrality of gender to a variety of disciplines, professions, and personal experiences and world views. Students will take coursework in at least three academic disciplines with an aim toward developing an interdisciplinary understanding of issues related to women and gender in both contemporary and historical contexts.

By augmenting students' chosen majors, the Women's and Gender Studies minor prepares students looking for strong interdisciplinary perspectives along their path to careers and/or further studies in social work, counseling, law, education, business, and the arts, among others.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives **can** be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(15 semester hours)

- Students must take courses in at least three disciplines within the minor.
- Note that upper-division courses have prerequisites, which can be completed as a part of your Essential Learning courses; prerequisites may be waived solely at the instructor's discretion. Some upper-division courses are offered in alternate years; students are advised to plan accordingly.

HIST 425	History of Sexuality
POLS 373	Global Politics of Women and Gender
PSYC 335	Psychology of Women
PSYC 411	Human Sexuality
PSYP 410	Introduction to Marriage and Family Counseling
SOCI 101	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies-GTSS3
SOCO 340	Sociology of Gender
SOCO 345	Sociology of Sexuality
SOCO 351	21st Century Families
Or special course offerings such as Topics and Major Authors courses with the approval of minor advisor and Department Head	

Total Semester Credit Hours

15

¹ Students must take courses in at least three disciplines within the minor.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

PROGRAMS A-Z

To view program requirements for a previous year, visit either the [archived program sheets page](#) or the [Catalog Archives](#). **Requirements for years 2017-2018 and earlier can be accessed via the [archived program sheets page](#). Requirement for years 2018-2019 and later can be accessed via [Catalog Archives](#).**

Each program page can be printed or saved. To do so:

- Navigate to the desired program page.
- Once on the correct program page, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Bachelors/Minors

- [Accounting \(Minor\)](#) (p. 99)
- [Acting/Directing, Theatre Arts \(BFA\)](#) (p. 705)
- [Actuarial Science, Mathematics \(BS\)](#) (p. 522)
- [Adapted Physical Education, Kinesiology \(BA\)](#) (p. 466)
- [Animation \(Minor\)](#) (p. 108)
- [Animation, Film, Photography and Motion Design \(BFA\)](#) (p. 105)
- [Applied Anthropology and Geography \(BA\)](#) (p. 109)
- [Applied Mathematics, Mathematics \(BS\)](#) (p. 525)
- [Archaeology \(Minor\)](#) (p. 128)
- [Art History \(BA\)](#) (p. 137)
- [Athletic Coaching and Officiating \(Minor\)](#) (p. 144)
- [Bachelor of Business Administration in Finance + Master of Business Administration \(3+2\)](#) (p. 181)
- [Bachelor of Science Construction Management + Master of Business Administration \(3+2\)](#) (p. 261)
- [Bachelor of Science in Accounting + Master of Business Administration \(3+2\)](#) (p. 94)
- [Biochemistry, Chemistry \(BS\)](#) (p. 226)
- [Biology \(Minor\)](#) (p. 174)
- [Biology, Biological Sciences \(BS\)](#) (p. 157)
- [Business \(Minor\)](#) (p. 216)
- [Business Administration \(BAS\)](#) (p. 181)
- [Business Analytics \(Minor\)](#) (p. 243)
- [Business Analytics, Business Administration \(BBA\)](#) (p. 208)
- [Business Economics, Business Administration \(BBA\)](#) (p. 184)
- [Cellular, Molecular, and Developmental Biology, Biological Sciences \(BS\)](#) (p. 161)
- [Chemistry \(BS\)](#) (p. 229)
- [Chemistry \(Minor\)](#) (p. 232)
- [Civil Engineering, CMU/CU-Boulder Partnership Program \(BSCE\)](#) (p. 233)
- [Classical Studies \(Minor\)](#) (p. 234)
- [Communication Studies \(Minor\)](#) (p. 256)
- [Computer Information Systems \(BAS\)](#) (p. 236)
- [Computer Information Systems \(BS\)](#) (p. 238)
- [Computer Information Systems \(Minor\)](#) (p. 244)
- [Computer Science \(BS\)](#) (p. 247)
- [Computer Science \(Minor\)](#) (p. 252)
- [Construction Management \(BS\)](#) (p. 261)
- [Counseling Psychology, Psychology \(BA\)](#) (p. 646)
- [Criminal Justice \(BA\)](#) (p. 269)
- [Criminal Justice \(Minor\)](#) (p. 278)
- [Cybersecurity \(Minor\)](#) (p. 285)
- [Dance \(BA\)](#) (p. 286)
- [Dance \(BFA\)](#) (p. 290)
- [Dance \(Minor\)](#) (p. 293)
- [Design/Technology, Theatre Arts \(BFA\)](#) (p. 712)
- [Ecology, Evolution, and Organismal Biology, Biological Sciences \(BS\)](#) (p. 165)
- [Economics \(Minor\)](#) (p. 217)
- [Education: Early Childhood Education, Inclusive Non-Licensure \(BA\)](#) (p. 310)
- [Education: Early Childhood Special Education, Early Childhood Education \(BA\)](#) (p. 307)
- [Education: Elementary Education, English, Liberal Arts \(BA\)](#) (p. 480)
- [Education: Elementary Education, Mathematics, Liberal Arts \(BA\)](#) (p. 484)
- [Education: Elementary Education, Social Science, Liberal Arts \(BA\)](#) (p. 487)
- [Education: K-12 Education, Art \(BFA\)](#) (p. 130)
- [Education: K-12 Education, Kinesiology \(BA\)](#) (p. 469)
- [Education: Music Education K-12 \(BME\)](#) (p. 579)
- [Education: Secondary Education, Biological Sciences \(BS\)](#) (p. 169)
- [Education: Secondary Education, English \(BA\)](#) (p. 368)
- [Education: Secondary Education, Geosciences \(BS\)](#) (p. 415)
- [Education: Secondary Education, History \(BA\)](#) (p. 440)
- [Education: Secondary Education, Mathematics \(BS\)](#) (p. 530)
- [Education: Secondary Education, Spanish \(BA\)](#) (p. 680)
- [Electrical/Computer Engineering, CMU/CU-Boulder Partnership Program \(BS ECEE\)](#) (p. 354)
- [Energy Management/Landman, Business Administration \(BBA\)](#) (p. 186)
- [English \(BA\)](#) (p. 372)
- [English \(Minor\)](#) (p. 381)
- [Entrepreneurship \(Minor\)](#) (p. 218)
- [Entrepreneurship, Business Administration \(BBA\)](#) (p. 190)
- [Environmental Geology, Geosciences \(BS\)](#) (p. 408)
- [Environmental Science and Technology \(BS\)](#) (p. 384)
- [Environmental Science and Technology \(Minor\)](#) (p. 388)
- [Exercise Science \(BS\)](#) (p. 391)
- [Exercise Science \(Minor\)](#) (p. 394)
- [Film Studies and Digital Production \(Minor\)](#) (p. 143)
- [Finance, Business Administration \(BBA\)](#) (p. 193)
- [Fitness and Health Promotion \(BS\)](#) (p. 399)
- [Forensic Anthropology \(Minor\)](#) (p. 402)
- [Forensic Investigation - Criminal Justice \(Minor\)](#) (p. 279)
- [Forensic Investigation - Psychology \(Minor\)](#) (p. 652)
- [Forensic Science \(Minor\)](#) (p. 403)
- [General Accounting, Accounting \(BS\)](#) (p. 94)

- [General Studies, Liberal Arts \(BA\)](#) (p. 491)
- [Geographic Information Science and Technology \(Minor\)](#) (p. 405)
- [Geology \(Minor\)](#) (p. 421)
- [Geology, Geosciences \(BS\)](#) (p. 412)
- [Graphic Design \(Minor\)](#) (p. 432)
- [Hispanic Studies, Spanish \(BA\)](#) (p. 684)
- [History \(BA\)](#) (p. 437)
- [History \(Minor\)](#) (p. 444)
- [Hospitality Management \(BAS\)](#) (p. 446)
- [Hospitality Management \(Minor\)](#) (p. 451)
- [Hospitality Management, Business Administration \(BBA\)](#) (p. 196)
- [Human Resource Management, Business Administration \(BBA\)](#) (p. 199)
- [Interdisciplinary Studies, Liberal Arts \(BAS\)](#) (p. 493)
- [International Business \(Minor\)](#) (p. 219)
- [International Business, Business Administration \(BBA\)](#) (p. 202)
- [International Studies \(Minor\)](#) (p. 464)
- [Literature, English \(BA\)](#) (p. 375)
- [LPN to BSN, Nursing \(BSN\)](#) (p. 599)
- [Management, Business Administration \(BBA\)](#) (p. 205)
- [Marketing, Business Administration \(BBA\)](#) (p. 211)
- [Mass Communication \(Minor\)](#) (p. 518)
- [Mathematics \(BS\)](#) (p. 527)
- [Mathematics \(Minor\)](#) (p. 539)

- [Education: Initial Teacher Licensure - Secondary \(Graduate Certificate\)](#) (p. 348)
- [Education: Initial Teacher Licensure - Secondary \(MAEd\)](#) (p. 332)
- [Education: Initial Teacher Licensure K-12 Physical Education \(Graduate Certificate\)](#) (p. 349)
- [Education: Initial Teacher Licensure K-12 Physical Education \(MAEd\)](#) (p. 334)
- [Education: Rhetoric and Literary Studies \(MAEd\)](#) (p. 338)
- [Education: Social Science \(MAEd\)](#) (p. 339)
- [Education: Teaching and Leadership \(EDTL\) \(MAEd\)](#) (p. 336)
- [Family Nurse Practitioner, Nursing \(MSN\)](#) (p. 595)
- [Nurse Educator, Nursing \(MSN\)](#) (p. 597)
- [Occupational Therapy \(MS\)](#) (p. 612)
- [Physical Therapy \(DPT\)](#) (p. 627)
- [Physician Assistant \(MPAS\)](#) (p. 629)
- [Rhetoric and Literary Studies \(Graduate Certificate\)](#) (p. 351)
- [Social Science \(Graduate Certificate\)](#) (p. 352)
- [Social Work: Advanced Standing \(MSW\)](#) (p. 666)
- [Social Work: Foundation \(MSW\)](#) (p. 669)
- [Sport Management \(MS\)](#) (p. 688)

Programs by Campus

The lists below outline programs offered at each of our three campuses as well as those that are offered in an online-only format. While these lists indicate the campus at which a given program is based, some courses may need to be completed online or at another campus. Additionally, some programs are offered on more than one campus, and students should make sure to enroll in courses on their campus of choice as they may be available at multiple locations. Please reach out to the contact for your [Area of Study](#) (p. 92) with questions or for more information.

To view program requirements for a previous year, visit either the [archived program sheets page](#) or the [archived catalogs page](#). **Requirements for years 2017-2018 and earlier can be accessed via the archived program sheets page. Requirement for years 2018-2019 and later can be accessed via archived catalogs.**

Each program page can be printed or saved. To do so:

- Navigate to the desired program page.
- Once on the correct program page, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Graduate

- [Adult-Gerontology Nurse Practitioner \(MSN\)](#) (p. 593)
- [Applied Mathematics \(Graduate Certificate\)](#) (p. 341)
- [Athletic Training \(MS\)](#) (p. 146)
- [Business Administration \(MBA\)](#) (p. 178)
- [Criminal Justice Leadership and Policy \(MA\)](#) (p. 267)
- [Doctor of Nursing Practice - Family Nurse Practitioner \(DNP-FNP\)](#) (p. 591)
- [Education: Applied Mathematics \(MAEd\)](#) (p. 325)
- [Education: Educational Leadership \(EDLD\) \(Graduate Certificate\)](#) (p. 343)

Main CMU Campus

Associates

- [Biology, Liberal Arts \(AS\)](#) (p. 172)
- [Business Administration, Liberal Arts \(AA\)](#) (p. 214)
- [Business Computer Information Systems, Liberal Arts \(AA\)](#) (p. 241)

Programs by Area of Study

Additional information about each discipline listed below can be found through the [Areas of Study page](#) (p. 92).

To view program requirements for a previous year, visit either the [archived program sheets page](#) or the [archived catalogs page](#). **Requirements for years 2018-2019 and earlier can be accessed via the archived program sheets page. Requirement for years 2019-2020 can be accessed via 2019-2020 archived catalog.**

Each program page can be printed or saved. To do so:

- Navigate to the desired program page.
- Once on the correct program page, scroll to the bottom of the left-hand navigation menu and select "Print Options." This will give you the options to either "Send Page to Printer" or "Download PDF of This Page." The "Download PDF of This Page" option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Accounting

Bachelors/Minors

- [Accounting \(Minor\)](#) (p. 99)
- [Bachelor of Science in Accounting + Master of Business Administration \(3+2\)](#) (p. 94)
- [General Accounting, Accounting \(BS\)](#) (p. 94)
- [Public Accounting, Accounting \(BS\)](#) (p. 97)

Addiction Studies

Certificates

- [Addiction Studies \(Professional Certificate\)](#) (p. 101)

Agriculture Science

Associates

- [Agriculture Science \(AS\)](#) (p. 102)

Animation, Film, Photography, and Motion Design

Bachelors/Minors

- [Animation \(Minor\)](#) (p. 108)
- [Animation, Film, Photography and Motion Design \(BFA\)](#) (p. 105)

Applied Anthropology and Geography

Bachelors/Minors

- [Applied Anthropology and Geography \(BA\)](#) (p. 109)

Applied Business

Associates

- [Administrative Support, Applied Business \(AAS\)](#) (p. 112)
- [Frontline Supervision, Applied Business \(AAS\)](#) (p. 114)
- [Marketing Communications, Applied Business \(AAS\)](#) (p. 116)

Certificates

- [Graphics Technology, Applied Business \(Technical Certificate\)](#) (p. 121)
- [Management Foundations, Applied Business \(Technical Certificate\)](#) (p. 122)
- [Marketing Graphics Technology, Applied Business \(Technical Certificate\)](#) (p. 123)
- [Office Technology, Applied Business \(Technical Certificate\)](#) (p. 124)

Archaeology

Bachelor/Minors

- [Archaeology \(Minor\)](#) (p. 128)

Art

Bachelors/Minors

- [Art History \(BA\)](#) (p. 137)
- [Education: K-12 Education, Art \(BFA\)](#) (p. 130)
- [Film Studies and Digital Production \(Minor\)](#) (p. 143)
- [Studio Art \(BA\)](#) (p. 140)
- [Studio Art \(Minor\)](#) (p. 142)
- [Studio Art, Art \(BFA\)](#) (p. 134)

Athletic Coaching and Officiating

Bachelors/Minors

- [Athletic Coaching and Officiating \(Minor\)](#) (p. 144)

Athletic Training

Graduate

- [Athletic Training \(MS\)](#) (p. 146)

Aviation Technology

Associates

- [Fixed Wing, Aviation Technology \(AAS\)](#) (p. 151)

Baking and Pastry

Associates

- [Baking and Pastry \(AAS\)](#) (p. 154)

Certificates

- [Bakeshop Production \(Technical Certificate\)](#) (p. 156)

Biological Sciences

Associates

- [Biology, Liberal Arts \(AS\)](#) (p. 172)

Bachelors/Minors

- [Biology \(Minor\)](#) (p. 174)
- [Biology, Biological Sciences \(BS\)](#) (p. 157)
- [Cellular, Molecular, and Developmental Biology, Biological Sciences \(BS\)](#) (p. 161)
- [Ecology, Evolution, and Organismal Biology, Biological Sciences \(BS\)](#) (p. 165)
- [Education: Secondary Education, Biological Sciences \(BS\)](#) (p. 169)

Business

Associates

- [Business Administration, Liberal Arts \(AA\)](#) (p. 214)

Bachelors/Minors

- [Bachelor of Business Administration in Finance + Master of Business Administration \(3+2\)](#) (p. 181)
- [Bachelor of Science Construction Management + Master of Business Administration \(3+2\)](#) (p. 261)
- [Bachelor of Science in Accounting + Master of Business Administration \(3+2\)](#) (p. 94)
- [Business \(Minor\)](#) (p. 216)
- [Business Administration \(BAS\)](#) (p. 181)
- [Business Analytics \(Minor\)](#) (p. 243)
- [Business Analytics, Business Administration \(BBA\)](#) (p. 208)
- [Business Economics, Business Administration \(BBA\)](#) (p. 184)
- [Economics \(Minor\)](#) (p. 217)
- [Energy Management/Landman, Business Administration \(BBA\)](#) (p. 186)
- [Entrepreneurship \(Minor\)](#) (p. 218)
- [Entrepreneurship, Business Administration \(BBA\)](#) (p. 190)
- [Finance, Business Administration \(BBA\)](#) (p. 193)
- [Hospitality Management, Business Administration \(BBA\)](#) (p. 196)
- [Human Resource Management, Business Administration \(BBA\)](#) (p. 199)
- [International Business \(Minor\)](#) (p. 219)
- [International Business, Business Administration \(BBA\)](#) (p. 202)
- [Management, Business Administration \(BBA\)](#) (p. 205)
- [Marketing, Business Administration \(BBA\)](#) (p. 211)

Certificates

- [Entrepreneurship \(Professional Certificate\)](#) (p. 220)
- [Fraud Examination \(Professional Certificate\)](#) (p. 221)
- [Human Resource Management \(Professional Certificate\)](#) (p. 222)
- [Real Estate \(Professional Certificate\)](#) (p. 662)
- [Supervision \(Technical Certificate\)](#) (p. 224)

Graduate

- [Business Administration \(MBA\)](#) (p. 178)

Business Analytics

(See [Business](#) (p. 175))

Chemistry

Bachelors/Minors

- [Biochemistry, Chemistry \(BS\)](#) (p. 226)
- [Chemistry \(BS\)](#) (p. 229)
- [Chemistry \(Minor\)](#) (p. 232)

Civil Engineering

Bachelors/Minors

- [Civil Engineering, CMU/CU-Boulder Partnership Program \(BSCE\)](#) (p. 233)

Classical Studies

Bachelors/Minors

- [Classical Studies \(Minor\)](#) (p. 234)

Communication Studies

Bachelors/Minors

- [Communication Studies \(Minor\)](#) (p. 256)

Computer Information Systems

Bachelors/Minors

- [Business Analytics \(Minor\)](#) (p. 243)
- [Computer Information Systems \(BAS\)](#) (p. 236)
- [Computer Information Systems \(BS\)](#) (p. 238)
- [Computer Information Systems \(Minor\)](#) (p. 244)

Associates

- [Business Computer Information Systems, Liberal Arts \(AA\)](#) (p. 241)

Certificates

- [Decision Support Systems \(Professional Certificate\)](#) (p. 245)

Computer Science

Associates

- [Computer Science, Liberal Arts \(AS\)](#) (p. 250)

Bachelors/Minors

- [Computer Science \(BS\)](#) (p. 247)
- [Computer Science \(Minor\)](#) (p. 252)

Certificates

- [Data Science \(Professional Certificate\)](#) (p. 253)
- [Web Application Development \(Professional Certificate\)](#) (p. 254)

Construction Electrical

Associates

- [Construction Electrical \(AAS\)](#) (p. 257)

Certificates

- [Construction Electrical \(Technical Certificate\)](#) (p. 259)

Construction Management

Bachelors/Minors

- [Bachelor of Science Construction Management + Master of Business Administration \(3+2\)](#) (p. 261)
- [Construction Management \(BS\)](#) (p. 261)

Construction Technology

Associates

- [Supervision, Construction Technology \(AAS\)](#) (p. 264)

Criminal Justice

Associates

- [Criminal Justice \(AAS\)](#) (p. 276)

Bachelors/Minors

- [Criminal Justice \(BA\)](#) (p. 269)
- [Criminal Justice \(Minor\)](#) (p. 278)
- [Forensic Investigation - Criminal Justice \(Minor\)](#) (p. 279)
- [POST Academy, Criminal Justice \(BAS\)](#) (p. 272)

Graduate

- [Criminal Justice Leadership and Policy \(MA\)](#) (p. 267)

Culinary Arts

See also [Baking and Pastry](#) (p. 153).

Associates

- [Culinary Arts \(AAS\)](#) (p. 280)

Certificates

- [Food Preparation \(Technical Certificate\)](#) (p. 282)

Cyber Security

Bachelors/Minors

- [Cybersecurity \(Minor\)](#) (p. 285)

Certificates

- [Cyber Security \(Professional Certificate\)](#) (p. 284)

Dance

Bachelors/Minors

- [Dance \(BA\)](#) (p. 286)
- [Dance \(BFA\)](#) (p. 290)
- [Dance \(Minor\)](#) (p. 293)

Decision Support

(See [Computer Information Systems](#) (p. 235))

Digital Filmmaking

Associates

- [Digital Filmmaking, Production Design \(AAS\)](#) (p. 295)
- [Digital Filmmaking, Writing/Directing \(AAS\)](#) (p. 297)

Certificates¹

- [Digital Filmmaking, Basic Production Design \(Technical Certificate\)](#) (p. 300)
- [Digital Filmmaking, Basic Writing/Directing \(Technical Certificate\)](#) (p. 304)
- [Digital Filmmaking, Intermediate Production Design \(Technical Certificate\)](#) (p. 301)
- [Digital Filmmaking, Intermediate Writing/Directing \(Technical Certificate\)](#) (p. 305)
- [Digital Filmmaking, Production Design Elements \(Technical Certificate\)](#) (p. 299)
- [Digital Filmmaking, Writing/Directing Elements \(Technical Certificate\)](#) (p. 303)

¹ Certificates progress in the following order: Elements, Basic, Intermediate.

Economics

(See [Business](#) (p. 175))

Education: Early Childhood

Associates

- [Education: Early Childhood Education \(AAS\)](#) (p. 316)
- [Education: Early Childhood Education, Liberal Arts \(AA\)](#) (p. 314)

Bachelors/Minors

- [Education: Early Childhood Education, Inclusive Non-Licensure \(BA\)](#) (p. 310)
- [Education: Early Childhood Special Education, Early Childhood Education \(BA\)](#) (p. 307)

Certificates

- [Education: Early Childhood Education Assistant Teacher \(Technical Certificate\)](#) (p. 318)
- [Education: Early Childhood Education Director \(Technical Certificate\)](#) (p. 320)
- [Education: Early Childhood Education Entry-Level Teacher \(Technical Certificate\)](#) (p. 321)
- [Education: Early Childhood Education Teacher \(Technical Certificate\)](#) (p. 323)

Education: Teacher Licensure

Graduate

- [Applied Mathematics \(Graduate Certificate\)](#) (p. 341)
- [Education: Applied Mathematics \(MAEd\)](#) (p. 325)

- [Education: Educational Leadership \(EDLD\) \(Graduate Certificate\)](#) (p. 343)
- [Education: Educational Leadership \(EDLD\) \(MAEd\)](#) (p. 327)
- [Education: Exceptional Learner/Special Education \(EDSE\) \(Graduate Certificate\)](#) (p. 345)
- [Education: Exceptional Learner/Special Education \(EDSE\) \(MAEd\)](#) (p. 329)
- [Education: Initial Teacher Licensure - Elementary \(Graduate Certificate\)](#) (p. 346)
- [Education: Initial Teacher Licensure - Elementary \(MAEd\)](#) (p. 331)
- [Education: Initial Teacher Licensure - Secondary \(Graduate Certificate\)](#) (p. 348)
- [Education: Initial Teacher Licensure - Secondary \(MAEd\)](#) (p. 332)
- [Education: Initial Teacher Licensure K-12 Physical Education \(Graduate Certificate\)](#) (p. 349)
- [Education: Initial Teacher Licensure K-12 Physical Education \(MAEd\)](#) (p. 334)
- [Education: Rhetoric and Literary Studies \(MAEd\)](#) (p. 338)
- [Education: Social Science \(MAEd\)](#) (p. 339)
- [Education: Teaching and Leadership \(EDTL\) \(MAEd\)](#) (p. 336)
- [Rhetoric and Literary Studies \(Graduate Certificate\)](#) (p. 351)
- [Social Science \(Graduate Certificate\)](#) (p. 352)

Electric Lineworker

Associates

- [Electric Lineworker \(AAS\)](#) (p. 355)

Certificates

- [Electric Lineworker \(Technical Certificate\)](#) (p. 357)

Electrical/Computer Engineering

Bachelors/Minors

See information provided in [Electrical/Computer Engineering \(p. 354\)](#) for CMU/CU-Boulder BS ECE partnership program.

- [Electrical/Computer Engineering, CMU/CU-Boulder Partnership Program \(BS ECEE\)](#) (p. 354)

Emergency Management and Disaster Planning

Certificates

- [Emergency Management and Disaster Planning \(Professional Certificate\)](#) (p. 359)

Emergency Medical Services

Associates

- [EMT - Paramedic \(AAS\)](#) (p. 361)

Certificates

- [EMT - Basic \(Technical Certificate\)](#) (p. 363)
- [EMT - Paramedic \(Technical Certificate\)](#) (p. 364)

Energy Management/Landman

Bachelors/Minors

- [Energy Management/Landman, Business Administration \(BBA\)](#) (p. 186)

Certificates

- [Energy Management/Landman \(Professional Certificate\)](#) (p. 366)

Engineering

(See [Civil Engineering \(p. 233\)](#), [Electrical/Computer Engineering \(p. 354\)](#), [Mechanical Engineering \(p. 541\)](#), or [Mechanical Engineering Technology \(p. 541\)](#).)

English

Bachelors/Minors

- [Education: Secondary Education, English \(BA\)](#) (p. 368)
- [English \(BA\)](#) (p. 372)
- [English \(Minor\)](#) (p. 381)
- [Literature, English \(BA\)](#) (p. 375)
- [Writing, English \(BA\)](#) (p. 378)

Certificates

- [Editing and Technical Communication \(Professional Certificate\)](#) (p. 382)

Graduate

- [Rhetoric and Literary Studies \(Graduate Certificate\)](#) (p. 351)

Environmental Science and Technology

Bachelors/Minors

- [Environmental Science and Technology \(BS\)](#) (p. 384)
- [Environmental Science and Technology \(Minor\)](#) (p. 388)

Certificates

- [Sustainability Practices \(Professional Certificate\)](#) (p. 389)

Exercise Science

Bachelors/Minors

- [Exercise Science \(BS\)](#) (p. 391)
- [Exercise Science \(Minor\)](#) (p. 394)

Finance

(See [Business \(p. 175\)](#))

Fire Science Technology

Associates

- [Fire Science Technology \(AAS\)](#) (p. 395)

Certificates

- [Fire Academy Level 1 \(Technical Certificate\)](#) (p. 397)

Fitness and Health Promotion

Bachelors

- [Fitness and Health Promotion \(BS\)](#) (p. 399)

Forensic Anthropology

Bachelors/Minors

- [Forensic Anthropology \(Minor\)](#) (p. 402)

Forensic Investigation - Criminal Justice

(See [Criminal Justice](#) (p. 266))

Forensic Investigation - Psychology

(See [Psychology](#) (p. 645))

Forensic Science

Bachelors/Minors

- [Forensic Science \(Minor\)](#) (p. 403)

Geographic Information Science and Technology

Bachelors/Minors

- [Geographic Information Science and Technology \(Minor\)](#) (p. 405)

Certificates

- [Geographic Information Science and Technology \(Professional Certificate\)](#) (p. 406)

Geosciences

Associates

- [Geology, Liberal Arts \(AS\)](#) (p. 419)

Bachelors/Minors

- [Education: Secondary Education, Geosciences \(BS\)](#) (p. 415)
- [Environmental Geology, Geosciences \(BS\)](#) (p. 408)
- [Geology \(Minor\)](#) (p. 421)
- [Geology, Geosciences \(BS\)](#) (p. 412)
- [Watershed Science \(Minor\)](#) (p. 422)

Gerontology

Associates

- [Gerontology Specialist \(AAS\)](#) (p. 423)

Certificates

- [Behavioral and Cognitive Care, Gerontology \(Technical Certificate\)](#) (p. 426)
- [End of Life Care, Gerontology \(Technical Certificate\)](#) (p. 427)

Graphic Design

Bachelors/Minors

- [Graphic Design \(Minor\)](#) (p. 432)
- [Visual Design, Graphic Design \(BFA\)](#) (p. 429)

Heating, Ventilation, and Air Conditioning

Associate

- [Heating, Ventilation, and Air Conditioning Technician \(AAS\)](#) (p. 433)

Certificates

- [HVAC: HVAC Fundamentals \(Technical Certificate\)](#) (p. 436)

History

Bachelors/Minors

- [Education: Secondary Education, History \(BA\)](#) (p. 440)
- [History \(BA\)](#) (p. 437)
- [History \(Minor\)](#) (p. 444)
- [Public History \(Minor\)](#) (p. 445)

Hospitality Management

Associates

- [Hospitality Management \(AAS\)](#) (p. 449)

Bachelors/Minors

- [Hospitality Management \(BAS\)](#) (p. 446)
- [Hospitality Management \(Minor\)](#) (p. 451)
- [Hospitality Management, Business Administration \(BBA\)](#) (p. 196)

Humanities

Associates

- [Humanities, Liberal Arts \(AA\)](#) (p. 452)

Information and Communication Technology

Associates

- [Information and Communication Technology \(AAS\)](#) (p. 455)

Certificates

- [Computer Repair, Information and Communication Technology \(Technical Certificate\)](#) (p. 457)
- [Healthcare Information Networking, Information and Communication Technology \(Technical Certificate\)](#) (p. 458)
- [Help Desk Technician, Information and Communication Technology \(Technical Certificate\)](#) (p. 460)
- [Network Technician, Information and Communication Technology \(Technical Certificate\)](#) (p. 461)

Innovation

Professional Certificate

- [Innovation \(Professional Certificate\)](#) (p. 463)

International Studies

Bachelors/Minors

- [International Studies \(Minor\)](#) (p. 464)

Jazz Studies

(See [Music](#) (p. 559))

Kinesiology

Bachelors/Minors

- [Adapted Physical Education, Kinesiology \(BA\)](#) (p. 466)
- [Education: K-12 Education, Kinesiology \(BA\)](#) (p. 469)

Certificates

- [Personal Training \(Professional Certificate\)](#) (p. 473)

Land Surveying and Geomatics

Associates

- [Land Surveying and Geomatics \(AAS\)](#) (p. 475)

Certificates

- [Land Surveying and Geomatics \(Technical Certificate\)](#) (p. 477)

Liberal Arts

Associates

- [Biology, Liberal Arts \(AS\)](#) (p. 172)
- [Business Administration, Liberal Arts \(AA\)](#) (p. 214)
- [Business Computer Information Systems, Liberal Arts \(AA\)](#) (p. 241)
- [Computer Science, Liberal Arts \(AS\)](#) (p. 250)
- [Education: Early Childhood Education, Liberal Arts \(AA\)](#) (p. 314)
- [Geology, Liberal Arts \(AS\)](#) (p. 419)
- [Humanities, Liberal Arts \(AA\)](#) (p. 452)
- [Mathematics, Liberal Arts \(AS\)](#) (p. 537)
- [Physics, Liberal Arts \(AS\)](#) (p. 635)
- [Social Science, Liberal Arts \(AA\)](#) (p. 663)
- [Sport Management, Liberal Arts \(AS\)](#) (p. 693)
- [University Studies, Liberal Arts \(AA\)](#) (p. 495)

Bachelors/Minors

- [Education: Elementary Education, English, Liberal Arts \(BA\)](#) (p. 480)
- [Education: Elementary Education, Mathematics, Liberal Arts \(BA\)](#) (p. 484)
- [Education: Elementary Education, Social Science, Liberal Arts \(BA\)](#) (p. 487)
- [General Studies, Liberal Arts \(BA\)](#) (p. 491)
- [Interdisciplinary Studies, Liberal Arts \(BAS\)](#) (p. 493)

Manufacturing Technology

Associates

- [Machining Technology, Manufacturing Technology \(AAS\)](#) (p. 498)
- [Welding Technology, Manufacturing Technology \(AAS\)](#) (p. 500)

Certificates

- [Architectural Drafting, Manufacturing Technology \(Technical Certificate\)](#) (p. 502)
- [Basic Welder, Manufacturing Technology \(Technical Certificate\)](#) (p. 504)
- [Civil Drafting, Manufacturing Technology \(Technical Certificate\)](#) (p. 505)
- [CNC Machinist, Manufacturing Technology \(Technical Certificate\)](#) (p. 506)
- [Computer Aided Design/Computer Aided Manufacturing \(CAD/CAM\), Manufacturing Technology \(Technical Certificate\)](#) (p. 507)
- [Entry Level Machining, Manufacturing Technology \(Technical Certificate\)](#) (p. 509)
- [Machine and Manufacturing Trades, Manufacturing Technology \(Technical Certificate\)](#) (p. 510)
- [Manual Machinist, Manufacturing Technology \(Technical Certificate\)](#) (p. 511)
- [Mechanical Drafting, Manufacturing Technology \(Technical Certificate\)](#) (p. 512)
- [Welding Technology, Manufacturing Technology \(Technical Certificate\)](#) (p. 514)

Mass Communication

Bachelors/Minors

- [Mass Communication \(Minor\)](#) (p. 518)
- [Media Strategies and Applications, Mass Communication \(BA\)](#) (p. 515)

Mathematics

Associates

- [Mathematics, Liberal Arts \(AS\)](#) (p. 537)

Bachelors/Minors

- [Actuarial Science, Mathematics \(BS\)](#) (p. 522)
- [Applied Mathematics, Mathematics \(BS\)](#) (p. 525)
- [Education: Secondary Education, Mathematics \(BS\)](#) (p. 530)
- [Mathematics \(BS\)](#) (p. 527)
- [Mathematics \(Minor\)](#) (p. 539)
- [Statistics \(Minor\)](#) (p. 540)
- [Statistics, Mathematics \(BS\)](#) (p. 534)

Graduate

- [Applied Mathematics \(Graduate Certificate\)](#) (p. 324)

Mechanical Engineering

Bachelors/Minors

- [Mechanical Engineering, CMU/CU-Boulder Partnership Program \(BSME\)](#) (p. 541)

Mechanical Engineering Technology

Associates

- [Mechanical Engineering Technology \(AAS\)](#) (p. 545)

Bachelors

- [Mechanical Engineering Technology \(BS\)](#) (p. 542)

Mechatronics

Associates

- [Mechatronics \(AAS\)](#) (p. 547)

Certificates

- [Mechatronics: Automation and Instrumentation \(Technical Certificate\)](#) (p. 549)
- [Mechatronics: Electronics Technician \(Technical Certificate\)](#) (p. 551)

Medical Laboratory Technician

Associates

- [Medical Laboratory Technician \(AAS\)](#) (p. 552)

Medical Office Assistant

Associates

- [Medical Office Assistant \(AAS\)](#) (p. 555)

Certificates

- [Medical Office Assistant \(Technical Certificate\)](#) (p. 557)

Music

Bachelors/Minors

- [Education: Music Education K-12 \(BME\)](#) (p. 579)
- [Music Performance: Instrumental \(BM\)](#) (p. 566)
- [Music Performance: Keyboard \(BM\)](#) (p. 569)
- [Music Performance: Vocal \(BM\)](#) (p. 572)
- [Music with Elective Studies in Business \(BM\)](#) (p. 576)
- [Music: Commercial Music \(BA\)](#) (p. 563)
- [Music: Instrumental \(Minor\)](#) (p. 586)
- [Music: Jazz Studies \(Minor\)](#) (p. 585)
- [Music: Liberal Arts \(BA\)](#) (p. 560)
- [Music: Vocal \(Minor\)](#) (p. 587)

Nurse Aide

Certificates

- [Nurse Aide \(Technical Certificate\)](#) (p. 588)

Nursing

Associates

- [Nursing \(AAS\)](#) (p. 607)

Bachelors/Minors

- [LPN to BSN, Nursing \(BSN\)](#) (p. 599)
- [Nursing \(BSN\)](#) (p. 602)
- [RN to BSN, Nursing \(BSN\)](#) (p. 605)

Certificates

- [Practical Nursing \(Technical Certificate\)](#) (p. 610)

Graduate

- [Adult-Gerontology Nurse Practitioner \(MSN\)](#) (p. 593)
- [Doctor of Nursing Practice - Family Nurse Practitioner \(DNP-FNP\)](#) (p. 591)
- [Family Nurse Practitioner, Nursing \(MSN\)](#) (p. 595)
- [Nurse Educator, Nursing \(MSN\)](#) (p. 597)

Occupational Therapy

Graduate

- [Occupational Therapy \(MS\)](#) (p. 612)

Outdoor Recreation Industry Studies

Bachelors/Minors

- [Outdoor Recreation Industry Studies \(BS\)](#) (p. 615)
- [Outdoor Recreation Studies \(Minor\)](#) (p. 618)

Paramedic

(See [Emergency Medical Services \(p. 360\)](#))

Peace Officer Standards and Training (POST)

Certificates

- [Peace Officer Academy - Peace Officer Standards and Training \(POST\) \(Technical Certificate\)](#) (p. 619)

Personal Training

(See [Kinesiology \(p. 466\)](#))

Pharmacy Technician

Associates

- [Pharmacy Technician \(AAS\)](#) (p. 621)

Certificates

- [Entry-Level Pharmacy Technician \(Technical Certificate\)](#) (p. 623)

Philosophy

Minors

- [Philosophy \(Minor\)](#) (p. 625)

Physical Therapy

Graduate

- [Physical Therapy \(DPT\)](#) (p. 627)

Physician Assistant

Graduate

- [Physician Assistant \(MPAS\)](#) (p. 629)

Physics

Associates

- [Physics, Liberal Arts \(AS\)](#) (p. 635)

Bachelors/Minors

- [Physics \(BS\)](#) (p. 632)
- [Physics \(Minor\)](#) (p. 637)

Political Science

Bachelors/Minors

- [Political Science \(BA\)](#) (p. 638)
- [Political Science \(Minor\)](#) (p. 642)

Process Systems Technology

Certificates

- [Control Systems Technician, Process Systems Technology \(Technical Certificate\)](#) (p. 643)
- [Electronics Technician, Process Systems Technology \(Technical Certificate\)](#) (p. 644)

Psychology

Bachelors/Minors

- [Counseling Psychology, Psychology \(BA\)](#) (p. 646)
- [Forensic Investigation - Psychology \(Minor\)](#) (p. 652)
- [Psychology \(BA\)](#) (p. 649)
- [Psychology \(Minor\)](#) (p. 652)

Public History

(See [History](#) (p. 437))

Radiologic Sciences

Bachelors/Minors

- [Radiologic Sciences \(BAS\)](#) (p. 657)
- [Radiologic Sciences \(BSRS\)](#) (p. 654)

Certificates

- [Computed Tomography \(Professional Certificate\)](#) (p. 659)
- [Magnetic Resonance Imaging \(Professional Certificate\)](#) (p. 660)

Real Estate

Certificates

- [Real Estate \(Professional Certificate\)](#) (p. 662)

Social Science

Associates

- [Social Science, Liberal Arts \(AA\)](#) (p. 663)

Graduate

- [Social Science \(Graduate Certificate\)](#) (p. 352)

Social Work

Bachelors/Minors

- [Social Work \(BSW\)](#) (p. 672)
- [Social Work \(Minor\)](#) (p. 675)

Graduate

- [Social Work: Advanced Standing \(MSW\)](#) (p. 666)
- [Social Work: Foundation \(MSW\)](#) (p. 669)

Sociology

Bachelors/Minors

- [Sociology \(BA\)](#) (p. 676)
- [Sociology \(Minor\)](#) (p. 679)

Spanish

Bachelors/Minors

- [Education: Secondary Education, Spanish \(BA\)](#) (p. 680)
- [Hispanic Studies, Spanish \(BA\)](#) (p. 684)
- [Spanish \(Minor\)](#) (p. 687)

Sport Management

Associates

- [Sports Management, Liberal Arts \(AS\)](#) (p. 693)

Bachelors/Minors

- [Sport Management \(BS\)](#) (p. 690)
- [Sport Management \(Minor\)](#) (p. 695)

Graduate

- [Sport Management \(MS\)](#) (p. 688)

Statistics

(See [Mathematics](#) (p. 521))

Studio Art

(See [Art](#) (p. 129))

Supervision

(see [Business](#) (p. 175))

Surgical Technology

Associates

- [Surgical Technology \(AAS\)](#) (p. 698)

Sustainability Practices

Certificates

- [Sustainability Practices \(Professional Certificate\)](#) (p. 389)

Sustainable Agriculture

Associates

- [Sustainable Agriculture \(AAS\)](#) (p. 701)

Teacher Education

(See [Art](#) (p. 129), [Early Childhood Education](#) (p. 306), [Education: Teacher Licensure](#) (p. 324), [English](#) (p. 367), [History](#) (p. 437), [Kinesiology](#) (p. 466), [Liberal Arts](#) (p. 479), [Mathematics](#) (p. 521), [Music](#) (p. 559), and [Social Science](#) (p. 663) for graduate and undergraduate programs)

Theatre Arts

Bachelors/Minors

- [Acting/Directing, Theatre Arts \(BFA\)](#) (p. 705)
- [Design/Technology, Theatre Arts \(BFA\)](#) (p. 712)

COURSE DESCRIPTIONS

The course descriptions in this catalog indicate the content of the course and prerequisites when applicable. Courses are listed in alphabetical order with a four-letter prefix code, followed by number and title. The number in parentheses at the end of the course title indicates the credit granted, in terms of semester hours, for each course. Generally, the number of semester hours is the number of times a class will meet each week. Exceptions are noted in individual course descriptions and, in most cases, prerequisites and/or corequisites stated. The course number after the prefix indicates the college year in which the courses should ordinarily be taken.

Course Number	College Year
100-199	Freshman year
200-299	Sophomore year
300-399	Junior year
400-499	Senior year

Courses numbered 01-099 are developmental in nature, not intended for transfer purposes, and will not usually fulfill degree requirements.

Colorado Mesa University reserves the right to withdraw any program or course which is not justified due to lack of enrollment or availability of instructor. Other courses may be added if there is sufficient demand. Certain courses are only offered during the fall or spring semesters, or may be available only in alternating years. It is the student's responsibility to meet with their advisor and check the two-year course matrix on the Colorado Mesa University website for course availability. Learn more on the [Colorado Mesa University Academics](#) page.

Accounting (ACCT)

ACCT 201 Principles of Financial Accounting³ Credits

Introduction to bookkeeping, generally accepted accounting principles, and financial statements.

Terms Typically Offered: Fall, Spring, Summer.

ACCT 202 Principles of Managerial Accounting³ Credits

A basic course that introduces the use of accounting information in managerial decision making, control, and planning.

Prerequisites: ACCT 201.

ACCT 311 Advanced Managerial Accounting3 Credits

An advanced course primarily for non-accounting majors that provides in-depth coverage on the applications of accounting information in decision-making, organization, control and planning.

Prerequisites: ACCT 202.

ACCT 321 Intermediate Accounting I5 Credits

Development of a foundational understanding of Generally Accepted Accounting Principles and their application to external financial statements.

Prerequisites: ACCT 201.

ACCT 322 Intermediate Accounting II4 Credits

Continuation of ACCT 321.

Prerequisites: ACCT 321.

ACCT 331 Cost Accounting3 Credits

Costs and their relationship to planning, controlling, inventory valuation, and decision making.

Prerequisites: ACCT 202.

ACCT 350 Ethics for Accounting Professionals3 Credits

The field of ethics as applied to the accounting and finance professions. Ethical standards of the profession, accounting and finance scandals in recent history, and methods to overcome ethical dilemmas encountered as professionals.

Prerequisites: ACCT 321.

ACCT 360 Professional Preparation I1 Credit

Communication skills and other soft skills needed to be successful as an accounting professional, including higher order thinking, written and oral communication, effective and responsible use of social and other electronic media, and ethical considerations of the communication process.

Prerequisites: ACCT 201, ACCT 202, and ACCT 321.

Terms Typically Offered: Fall, Spring.

ACCT 392 Accounting Information Systems3 Credits

A study of the concepts and design of the Accounting Information System with emphasis on the internal control structures, requirements, and professional standards.

Prerequisites: ACCT 321.

ACCT 393 Cooperative Education3-12 Credits

Cooperative Education provides students an opportunity to put their education to practical use in the workplace under the joint supervision of an employer participating in the Cooperative Education program and a faculty member designated by the institution. (See "Cooperative Education" in this catalog).

Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ACCT 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 399 Internship1-10 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 401 Governmental Accounting3 Credits

Accounting principles as they apply to governmental and non-profit units.

Prerequisites: ACCT 322.

ACCT 402 Advanced Accounting3 Credits

Consolidated financial statements, partnership accounting, bankruptcy, and international operations.

Prerequisites: ACCT 322.

ACCT 411 Auditing I3 Credits

Scope and purposes of the attestation work of a certified public accountant focusing on generally accepted auditing standards (GAAS). Includes theory of auditing, professional ethics, legal liability of the auditor, and internal control.

Prerequisites: ACCT 322; and CISB 241 or STAT 241.

Terms Typically Offered: Fall, Spring, Summer.

ACCT 412 Auditing II3 Credits

Continuation of ACCT 411. This course provides coverage of the application of auditing theory to financial statements, including examination of the audit programs, procedures, and work papers used in each phase of an audit.

Prerequisites: ACCT 411.

ACCT 441 Individual Income Tax4 Credits

In-depth treatment of federal income tax law as it relates to individual taxpayers. Introduction to basic tax research.

Prerequisites: ACCT 322, and senior standing.

Terms Typically Offered: Fall.

ACCT 442 Advanced Tax and Tax Research5 Credits

Federal income tax law for C corporations, S corporations, and partnerships. Introduction to federal gift transfer tax. Required participation in the Volunteer Income Tax Assistance Program to acquire practical experience in communication with taxpayers and preparation of tax returns.

Prerequisites: ACCT 441.

Terms Typically Offered: Spring.

ACCT 460 Professional Preparation III1 Credit

This course is a concentrated review of accounting subjects in preparation for the CPA exam using self-study techniques and professor-led discussions and review.

Prerequisites: ACCT 201, ACCT 202, ACCT 321, ACCT 322, ACCT 360, ACCT 401, and ACCT 441.

ACCT 470 Fraud and Forensic Accounting3 Credits

Exploration of investigative techniques, interviewing techniques, and reporting processes at different levels of judicial and prosecutorial environments. Specific skills in detecting and investigating fraud developed and various reporting methodologies explored. Includes presentations and speakers from fraud investigative environments.

Prerequisites: ACCT 201.

ACCT 471 Data Analytics for Accounting3 Credits

Study of the use of big data and analytics for accounting, including its history and current trends. Application of data analysis techniques to transform raw data into useful decision-making information and communicate those results in a meaningful way for stakeholders.

Prerequisites: ACCT 322; CISB 241 or STAT 241.

Terms Typically Offered: Fall, Spring, Summer.

ACCT 473 Fraud Legalities3 Credits

Study of both civil and criminal systems, procedures, laws, as well as related areas that pertain to criminal financial activity and fraud.

Prerequisites: BUGB 349 or BUGB 351.

Terms Typically Offered: Fall, Spring, Summer.

ACCT 475 Fraud Examination3 Credits

Study of financial transactions and schemes, law, investigations, as well as fraud prevention and deterrence in preparation for the Certified Fraud Examination (CFE) administered through the Association of Certified Fraud Examiners.

Prerequisites: BUGB 349 or BUGB 351; ACCT 470; ACCT 471; and Senior Standing.

Terms Typically Offered: Fall, Spring, Summer.

ACCT 493 Cooperative Education3-12 Credits

See description of ACCT 393.

Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ACCT 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 499 Internship1-9 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 500 Managerial Accounting3 Credits

Provides students with an understanding of management information systems which are used in the decision-making process. The class is designed with a "hands-on" approach. It will encourage student participation and interaction through the use of computer projects, case studies, and classroom discussion. Topics covered include basic cost accounting concepts and terminology, product costing and pricing, planning and controlling a business operation through budgets and variance analysis, and managerial decision-making using such techniques as cost-volume-profit analysis and variable costing.

ACCT 505 Advanced Fraud and Forensic Accounting3 Credits

Exploration of investigative techniques, interviewing techniques, and reporting processes at different levels of judicial and prosecutorial environments. Specific skills in detecting and investigating fraud developed and various reporting methodologies explored. Includes presentations and speakers from fraud investigative environments. Demonstration of mastery of material through graduate level projects, writing, and presentations.

Prerequisites: ACCT 201, ACCT 322, and permission of instructor.

Addictions Counseling (ADAP)

ADAP 301 Foundations of Addictions Counseling1 Credit

Provides a foundation for the theoretical, practical, and applied addictions counseling skills necessary for individuals wanting to work in the addictions field.

Prerequisites: PSYC 233.

ADAP 350 Cultural and Ethical Issues in Addictions Treatment1 Credit

Provides an overview of ethical, cultural, and legal considerations associated with the field of addictions.

Prerequisites: ADAP 301.

ADAP 380 Pharmacology and Addictions1 Credit

Provides an overview of pharmacology and infectious diseases associated with the field of addictions.

Prerequisites: ADAP 301.

ADAP 401 Special Populations and Addictions1 Credit

Outlines the unique treatment needs of special addiction populations and the promising new practices within the addictions field.

Prerequisites: ADAP 301.

ADAP 420 Addiction Counseling Approaches1 Credit

Outlines the different evidence-based treatment approaches in the addictions field.

Prerequisites: ADAP 301 and ADAP 350.

ADAP 450 Addictions Assessment and Group Counseling1 Credit

Exploration of the approaches to addictions clinical assessment, treatment planning and group counseling skills as outlined by the Colorado Office of Behavioral Health. Meets the educational requirements for becoming a Certified Addictions Counselor Level II.

Prerequisites: ADAP 301.

Terms Typically Offered: Fall, Spring.

ADAP 460 Advanced Addictions Practice1 Credit

Exploration of the clinical addictions practices and advanced motivational interviewing as outlined by the Colorado Office of Behavioral Health (OBH). Meets the educational requirements for becoming a Certified Addictions Counselor Level III.

Prerequisites: ADAP 301.

Terms Typically Offered: Summer.

ADAP 470 Addictions Clinical Supervision1 Credit

Introduction to the core competencies for addictions supervision. Meets the Certified Addictions Counselor Level three (CAC III) requirements as outlined by the Colorado Office of Behavioral Health (OBH) for Clinical Supervision I and II.

Prerequisites: ADAP 301.

Terms Typically Offered: Summer.

ADAP 499 Internship1-3 Credits

Professional practice with individuals, groups, and communities in various sites under professional supervision.

Course may be taken multiple times up to maximum of 10 credit hours.

Agricultural Science (AGRS)

AGRS 100 Practical Crop Production3 Credits

Production and adaptation of cultivated crops. Emphasis on crops grown in the western region of the United States. Growth, development, production, and use covered.

Corequisites: AGRS 100L.

AGRS 100L Practical Crop Production Laboratory1 Credit

Laboratory experiences supporting instruction in the production and adaptation of cultivated crops. Emphasis on crops grown in the western region of the United States. Growth, development, production, and use covered.

Corequisites: AGRS 100.

Fees: Yes.

AGRS 102 Agriculture Economics3 Credits

Focus on economic principles applied to agriculture through price discovery with producer supply and consumer demand, governmental politics, rural development, and resource management.

AGRS 103 Introduction to Entomology2 Credits

Covers insect identification and classification, introduces integrated pest management concepts, and an in-depth study of selected insects of agricultural economic importance.

Corequisites: AGRS 103L.

AGRS 103L Introduction to Entomology Laboratory1 Credit

Lab component required for AGRS 103.

Corequisites: AGRS 103.

Fees: Yes.

AGRS 105 Animal Science3 Credits

Fundamentals of livestock production. Principles of breeding, genetics, nutrition, health, and physiology of beef, sheep, swine, dairy, and horses. Focus on the animal science industry in general and each species industry in regard to history, current situation, and future.

AGRS 108 Composting3 Credits

Exploration of the microbiology behind composting and procedures for various types of composting. Evaluation of the benefits of using compost in a variety of applications, including soil health and its roles in sustainable and regenerative agriculture. Covers potential hazards and regulations associated with making compost, industrial applications of composting, and employment possibilities in the composting field.

Terms Typically Offered: Fall.

AGRS 110 Integrated Pest Management3 Credits

Identification and control of economically important weeds, insects, and diseases through systems approach management concepts including cultivation, chemical, and biological control mechanisms.

AGRS 118 Farm Structures and Green Houses3 Credits

Safety, hand and power tool use, farm building planning and site location, concrete, farm building design and construction, and materials of construction. Greenhouse design, systems, management, and major greenhouse crops and their cultural needs.

AGRS 125 Agricultural Machinery3 Credits

Emphasizes the safe operation, construction, purpose, maintenance, and adjustment of farm machinery.

AGRS 131 Water and Irrigation: Principles and Practices2 Credits

Exploration of water, soil, and plant relationships; water quality assessment; principles of irrigation, methods, and systems.

Prerequisites: AGRS 100/AGRS 100L.

Corequisites: AGRS 131L.

AGRS 131L Water and Irrigation: Principles and Practices Laboratory1 Credit

Applications in water, soil, and plant relationships; water quality assessment; principles of irrigation, methods, and systems.

Prerequisites: AGRS 100/AGRS 100L.

Corequisites: AGRS 131.

Fees: Yes.

AGRS 195 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

AGRS 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

AGRS 205 Farm and Ranch Management3 Credits

Provide students with practical experience in applying principles of economics, business, marketing, and finance to the management of a farm/ranch operation.

AGRS 208 Agricultural Finance3 Credits

Emphasizes principles of finance and their application to agriculture and agribusiness, including the time value of money, net present value analysis, interest, credit lending institutions, financial statements, and financial ratios.

AGRS 210 Agricultural Marketing3 Credits

Applied study of the agricultural marketing system. Methods of marketing crops and livestock. Emphasis on hedging with futures and options.

AGRS 224 Integrated Ranch Management3 Credits

Management pertaining to the economics of a ranching enterprise. Includes principles of system management, resource inventory and management, ranch decision making, nutrition, selection, record keeping, financial management, and marketing.

AGRS 225 Feeds and Feeding4 Credits

Basic nutrients, common feeds and feed additives, anatomy of digestive systems, and basic feeding practices for beef, sheep, and dairy. Lab devoted to calculating and balancing rations to fulfill nutrient requirement of farm animals for growth, finishing, reproduction, lactation, work, and wool production. Explores least cost ratio balancing.

AGRS 230 Farm Animal Anatomy and Physiology3 Credits

Introduction to basic concepts of farm animal anatomy and physiology. Emphasizes nutrition, reproduction, immunology, and growth of the basic farm species. Anatomy and physiology is taught in the context of applying basic principles to production practices in the industry including reproductive management, livestock nutrition management, and animal health practices.

Prerequisites: AGRS 105.

AGRS 240 Introduction to Soil Science3 Credits

Formation, physical properties, chemical properties, and management of soils emphasizing conditions affecting plant growth.

Corequisites: AGRS 240L.

AGRS 240L Introduction to Soil Science Laboratory1 Credit

Formation, physical properties, chemical properties, and management of soils emphasizing conditions affecting plant growth in the lab environment.

Corequisites: AGRS 240.

Fees: Yes.

AGRS 250 Live Animal and Carcass Evaluation1 Credit

Explores meat carcass evaluation and the related yield and quality grading system. Emphasizes selection of breeding stock based on performance data. Covers comparative selection, grading, and judging of market and breeding classes of livestock based on knowledge of phenotype, performance, information, and/or carcass merit.

Prerequisites: AGRS 105.

Corequisites: AGRS 250L.

AGRS 250L Live Animal and Carcass Evaluation Laboratory2 Credits

Lab component required for AGRS 250.

Prerequisites: AGRS 105.

Corequisites: AGRS 250.

AGRS 260 Plant Propagation3 Credits

Theory, biology, and practical applications of plant propagation technologies. Propagation by seed, cuttings, budding, grafting, layering, and tissue culture. Propagation environment, techniques of stock plant management, and seed handling.

AGRS 265 Integrated Plant Health Management3 Credits

Multi-faceted approaches to the management of plant health through analysis of soil characteristics, nutrients, irrigation, and integrated pest management techniques for reducing pest susceptibility and enhancing crop production yield and quality.

Prerequisites: AGRS 100/AGRS 100L.

AGRS 288 Livestock Practicum3 Credits

Provides experiential learning with beef cattle, dairy cattle, swine, and sheep.

AGRS 293 Cooperative Experience 5 Credits

Employment in an agricultural production setting. Work experience in all facets of the operation. Guidance and supervision is the responsibility of the supervising employer and Coordinator of Production Agriculture. Emphasis on records, managerial decisions, and production agriculture skills.

Course may be taken multiple times up to maximum of 5 credit hours.

AGRS 295 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

AGRS 296 Topics 1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Anthropology (ANTH)

ANTH 196 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ANTH 202 Introduction to Anthropology-GTSS33 Credits

Human nature and behavior from the broad perspective of contemporary anthropology. Four primary subfields of anthropology, biology, cultural, linguistics, and archaeology discussed to integrate various aspects of the human condition.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ANTH 220 Principles of Archaeology-GTSS33 Credits

Investigation of modern archaeology as an interdisciplinary anthropological science. Explores the objectives, methodologies, and ethics of reconstructing prehistoric life. Examples are drawn from around the world.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ANTH 222 World Prehistory-GTSS33 Credits

Exploration of human cultural evolution as documented through global archaeology. Topics to be discussed include foraging and early agriculture, the rise of complex states, and the origin of civilization in both the eastern and western hemispheres.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall.

ANTH 225 North American Archaeology 3 Credits

Survey of Pre-Columbian North America, highlighting the cultural evolution of indigenous societies in all North American culture areas. The state-level societies of Mesoamerica are also discussed. Development of archaeological theory and its application to the study of prehistoric sites in North America.

Terms Typically Offered: Spring.

ANTH 231 Survey of Biological Anthropology-GTSS33 Credits

Exploration of culture through the lens of evolutionary biology. Students will study culture as a changing entity that helps our biological species adapt to multiple physical and social environments. Includes discussion of non-human primates and the application of biological anthropology to forensic science.

Corequisites: ANTH 231L.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall.

ANTH 231L Survey of Biological Anthropology Laboratory-GTSS31 Credit

Exploration of culture through the lens of evolutionary biology. Students will study culture as a changing entity that helps our biological species adapt to multiple physical and social environments. Includes discussion of non-human primates and the application of biological anthropology to forensic science. Lab component for ANTH 231.

Corequisites: ANTH 231.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall.

ANTH 270 Death and Forensic Science 2 Credits

Exploration of forensic science, emphasizing medico-legal death investigation. Includes an overview of the sciences in death investigation (pathology, anthropology, entomology, toxicology) and the forensic sciences common in a crime laboratory (pattern evidence, chemistry, biology). Emphasizes professional standards and ethics.

Prerequisites: ENGL 111 and MATH 110.

Corequisites: ANTH 270L.

Terms Typically Offered: Spring.

ANTH 270L Death and Forensic Science Laboratory 1 Credit

Exploration of forensic science, emphasizing medico-legal death investigation. Includes an overview of the sciences in death investigation (pathology, anthropology, entomology, toxicology) and the forensic sciences common in a crime laboratory (pattern evidence, chemistry, biology). Emphasizes professional standards and ethics.

Prerequisites: ENGL 111 and MATH 110.

Corequisites: ANTH 270.

Terms Typically Offered: Spring.

ANTH 296 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ANTH 321 Paleoindian Archaeology 3 Credits

Multidisciplinary analysis of the controversies surrounding the colonization of the western hemisphere and the Pleistocene and early Holocene archaeology of North America.

Prerequisites: ANTH 220 or ANTH 225.

Terms Typically Offered: Fall.

ANTH 326 Colorado Archaeology: A Geographical Perspective 3 Credits

Survey of Colorado prehistory using a geographic perspective, including adjacent portions of the Great Plains, Intermountain West, and Great Basin. The focus is on regional sequences in their environment settings and major research questions from the Paleoindian to Protohistoric and Historic Euroamerican periods.

Prerequisites: ANTH 202 or ANTH 220.

Equivalent Course(s): GEOG 326

Terms Typically Offered: Spring.

ANTH 331 Forensic Anthropology2 Credits

Introduction to forensic anthropology. Development of skills associated with analyzing skeletal remains, including estimating the sex, age, ancestry, and stature of the unknown individual from the skeleton. This course gives the student an overview of techniques to complete an osteological profile.

Prerequisites: ANTH 270/ANTH 270L or ANTH 231/ANTH 231L or BIOL 209/BIOL 209L.

Corequisites: ANTH 331L.

Terms Typically Offered: Fall.

ANTH 331L Forensic Anthropology Laboratory1 Credit

Introduction to forensic anthropology. Development of skills associated with analyzing skeletal remains, including estimating the sex, age, ancestry, and stature of the unknown individual from the skeleton. This course gives the student an overview of techniques to complete an osteological profile.

Prerequisites: ANTH 270/ANTH 270L or ANTH 231/ANTH 231L or BIOL 209/BIOL 209L.

Corequisites: ANTH 331.

Terms Typically Offered: Fall.

ANTH 341 Indigenous Cultures of North America3 Credits

Examination of the diversity of past and present Native American peoples and cultures through ethnography. Presents the outcomes of culture change due to colonialism and modern efforts towards cultural revitalization.

Prerequisites: ANTH 202.

Terms Typically Offered: Fall.

ANTH 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ANTH 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ANTH 420 Field Methods in Archaeology3 Credits

Overview of contemporary methods of archaeological survey, site recordation, and excavation techniques. Artifact collection, interpretation, and analysis presented as is record keeping, artifact conservation, and curation. Topics include maps and mapping, geographic information systems (GIS), Global Positioning System (GPS), field and specimen photography, and recovery and analysis of supplemental materials (macrobotanical, pollen, chronometric, etc.).

Prerequisites: ANTH 202 or ANTH 220.

Corequisites: ANTH 420L.

Terms Typically Offered: Spring.

ANTH 420L Field Methods in Archaeology Laboratory2 Credits

Overview of contemporary methods of archaeological survey, site recordation, and excavation techniques. Artifact collection, interpretation, and analysis presented as is record keeping, artifact conservation, and curation. Topics include maps and mapping, geographic information systems (GIS), Global Positioning System (GPS), field and specimen photography, and recovery and analysis of supplemental materials (macrobotanical, pollen, chronometric, etc.). Lab component required for ANTH 420.

Prerequisites: ANTH 202 or ANTH 220.

Corequisites: ANTH 420.

Terms Typically Offered: Spring.

Fees: Yes.

ANTH 421 Cultural Resource Management3 Credits

Introduction to the principles and practice of public archaeology. Topics include cultural resource legislation, project management, the National Register of Historic Places, and the federal and state offices in charge of managing archaeological heritage.

Prerequisites: ANTH 220 and ANTH 225.

Terms Typically Offered: Spring.

ANTH 422 Southwest Archaeology3 Credits

Prehistory and cultural background of the southwestern United States. Archaeological sites of Colorado, Utah, Arizona, and New Mexico highlighted. Introduction to cultures inhabiting these areas for the last 5,000 years with emphasis on the Ancestral Puebloans, Hohokam, Mogollon, Fremont, Uto-Aztecan, and Athabaskan groups.

Prerequisites: ANTH 220 or ANTH 225.

Terms Typically Offered: Fall.

ANTH 423 Field Research in Archaeology6 Credits

Exploration of modern archaeological practice. Over six weeks, students will take part in archaeological field research including excavation, survey, mapping, and occasionally rock art recording. Includes field trips to significant western Colorado sites.

Prerequisites: ANTH 420 and ANTH 420L.

Terms Typically Offered: Summer.

Fees: Yes.

ANTH 424 Archaeological Laboratory Methods4 Credits

Introduction to techniques of laboratory cataloging, artifact analysis, and technical report writing. Photography, special sample preparation, and other topics will also be discussed.

Prerequisites: ANTH 420 and ANTH 420L.

Terms Typically Offered: Spring.

ANTH 478 Professional Issues in Forensic Science3 Credits

Exploration of professional issues specific to forensic science practitioners. Topics include problems seen with forensic practitioners and in forensic science facilities, the Organizations of Scientific Area Committees (OSACs), admissibility of forensic evidence, courtroom testimony, and report writing. Job and graduate school applications are discussed. Ethical dilemmas, their resolution, and standards of ethics codified by professional forensic organizations are presented.

Prerequisites: CRMJ 280/CRMJ 280L or ANTH 270/ANTH 270L.

Terms Typically Offered: Fall.

ANTH 495 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ANTH 496 Topics1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ANTH 499 Internship1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Applied Business (ABUS)

ABUS 101 Budget Analysis3 Credits

Introduction to the basic elements and concepts of accounting, with emphasis on payroll, budgets, statements, and terms and accounting language.

ABUS 102 Business Basics3 Credits

Introduction to small business management. This course covers the basic principles of marketing, management and finance needed to manage or start a small business. The course assists in the development of a business plan and introduces methods of financing a business launch.

ABUS 105 Internet Marketing Strategies3 Credits

Overview of succeeding in business online. Web business models are discussed. Online branding, traffic building, search engine optimization, and online retailing will be examined through examples and case studies. Students will gain exposure to doing business solely online as well as using it as a supplement for business activities.

Terms Typically Offered: Fall, Spring.

ABUS 106 Marketing Your Image1 Credit

Exploration of skills students can use to market themselves to prospective employers, clients, professional groups, and audiences of all types. Major emphasis will be placed on skills used to gain employment (resumes, interview, and professional appearance), and to achieve continued personal success (professional behavior and attitude). The course will include at least one simulated interview.

ABUS 114 Digital Layout3 Credits

Introduction to InDesign, a page layout program which integrates seamlessly with other Adobe design programs. InDesign delivers creative freedom and productivity to DTP. Class discussions and independent projects supplement hands-on classroom work.

ABUS 116 Principles of Supervision3 Credits

Introduction to the principles and techniques of supervising and motivating personnel. This course is designed for students who are interested in supervising others or for those currently in supervisory roles. Course content focuses on the human interaction in supervision.

ABUS 120 Digital Design Tools3 Credits

Exploration of the capabilities of digital cameras, raster photo-editing software, vector drawing software, and digital painting software. The course will cover how these image tools can be applied to create digital images, graphics, and videos.

ABUS 128 Workplace Behavior3 Credits

Exploration of the importance of effective communication in our personal lives, as well as in the world of business. Practical business applications such as employee motivation, handling customer complaints, and effectively resolving conflict in the workplace will be a major part of the curriculum.

ABUS 145 Data Management3 Credits

Exploration of a complete array of database skills, includes table, query, form, and report creation and modification. Other topics include application integration and automation of database tasks within the database.

ABUS 155 Social Media for Business3 Credits

Exploration of social media as a business strategy and how to match that strategy with the goals of the business. This course addresses current trends, ethics, regulations, legal challenges, strategy, content development, and change management. Students develop a better understanding of the similarities and differences between social media marketing and traditional marketing.

ABUS 156 Problem Solving in the Business Environment3 Credits

Exploration of the problem-solving and decision-making processes. Those processes include: identifying decision elements, recognizing characteristics of good and bad decisions, practicing various approaches to decision making, utilizing a 9-step process for organization decision making, exploring the nature of problems, understanding situation factors, identifying problems, considering the human side of problem solving, and utilizing a 6-step problem solving process.

ABUS 160 Introduction to Customer Service3 Credits

Principles of customer service, including learning the relationship of self to customers, problem solving, and understanding the importance of communicating with customers. Specific emphasis is given to managing customer expectations by building customer rapport and creating positive outcomes.

ABUS 165 Work Readiness1 Credit

Exploration and development of current workplace requirements. Skills include job search methods, networking, interview process and techniques, personal and professional development, personal finance, employer expectations, essential skills needed, professional etiquette, ethics, drug usage in the workforce, background checks, and techniques to maintain employment and advance in any career.

Terms Typically Offered: Fall, Spring.

ABUS 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ABUS 200 Business Rules and Regulations3 Credits

Introduction to the contemporary issues, theories, and principles used to effectively manage human resources. Topics include recruiting, hiring, compensation and benefits, training and development, employee relations, and legal issues.

ABUS 210 MicroBusiness Money Management3 Credits

Overview of managing money for small businesses. Recording, analyzing, reporting cash functions, managing payroll, budgeting and planning for the future will be discussed. Programs that assist with money management will be reviewed.

Terms Typically Offered: Fall, Spring.

ABUS 257 Managing Office Technology I3 Credits

Introduction to basic computer terminology, file management, and PC system components. Provides an overview of office application software including word processing, spreadsheets, and presentation graphics. Includes the use of a web browser to access the internet.

ABUS 258 Managing Office Technology II3 Credits

Introduction to a wide range of uses of the electronic spreadsheet with special emphasis on using it as a business tool. Includes fundamentals and terms, creating and saving workbooks, entering and using formulas, formatting, printing, multiple-page workbooks, creating charts, entering and using functions, managing lists, and simple macros.

ABUS 289 Applied Business Capstone3 Credits

Exploration of presentation techniques, regarding both verbal and nonverbal skills. Demonstrate presentation techniques using supporting knowledge gained from current academic program.

ABUS 299 Internship1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Archaeology (ARKE)

ARKE 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARKE 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARKE 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Fees: Yes.

ARKE 499 Internship1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Art (ARTE)

ARTE 101 Two-Dimensional Design-GTAH13 Credits

Introduction to the design process using the elements and principles of art with an emphasis on composition, mark making, color theory, and craftsmanship. Two hours of lecture and two hours of studio per week.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

ARTE 102 Three-Dimensional Design-GTAH13 Credits

Introduction to principles of form and function in three-dimensional design with emphasis on materials, process, and craftsmanship.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

ARTE 103 Digital Art and Design-GTAH13 Credits

Exploration of technical and conceptual processes through hands-on creative projects, with emphasis on Digital Literacy, Visual Communication, Design Thinking, and Problem Solving for Digital Artwork.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ARTE 115 Art Appreciation-GTAH13 Credits

Some of the hows, whys, and whos of painting, sculpture, and functional design in selected periods and places. This course is intended for non-art majors. Art majors should take ARTE 118 instead.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ARTE 118 History of Art, Prehistory to Renaissance-GTAH13 Credits

Survey of the development of art from Prehistory up to the emergence of the Renaissance. Course focus will be the study of major monuments to gain an understanding of the important factors that defined the artistic production of each civilization and historic period.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ARTE 119 History of Art, Renaissance to Present-GTAH13 Credits

Survey of the development of art from the Renaissance to the late 20th century. Course focus will be the study of major monuments to gain an understanding of the important factors that defined the artistic production of different historic periods.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ARTE 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 294 Sophomore Seminar3 Credits

Development of intended personal direction for creative activity and scholarly work in upper division studio and art history courses. Honing creative critical thinking skills through formal analysis of artwork, art critiques, basic art theory and contemporary art concepts, developing the annual juried student art exhibition, fundamentals of matting, framing, basing, and portfolio development, woodshop safety, exposure to local and regional art scene, and exploring career options in art.

Prerequisites: ARTH 220.

ARTE 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTE 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 494 Studio Art Senior Seminar3 Credits

Examination of the current state of the studio arts and various career options through research, discussion, and practical application in the coordination of a required studio art exhibition. Includes development and presentation of a professional portfolio package including artist statement, resume, and web presence. Must enroll in the course during the spring semester in which the senior exhibition is presented. Each student must be working directly with a full time faculty member in their discipline to select work for their senior exhibition.

Prerequisites: ARTE 294 with grade of "B" or higher.

Terms Typically Offered: Spring.

ARTE 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTE 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 498 Studio Assistant and Teaching Aid3 Credits

Teaching experience via preparing demonstrations and performing in-studio maintenance of studio equipment. Taught in conjunction with 200-level classes. Designed for the senior level artist.

Prerequisites: Permission of instructor.

Terms Typically Offered: Fall, Spring.

Course may be taken 3 times for credit.

ARTE 499 Internship3 Credits

Placement in a gallery, art center, or museum setting. The student is expected to complete 135 clock hours.

Prerequisites: Permission of instructor.

ARTE 596 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Art - Animation (ARTA)

ARTA 123 Lights! Camera! Action!3 Credits

Exploration of fundamental components of digital design and time-based media, such as photography, animation, digital filmmaking, and motion design. Students focus on the elements of light, sound, and motion as key time-based design factors. Individual and group projects.

Terms Typically Offered: Fall.

Fees: Yes.

ARTA 222 Principles of Digital Photography3 Credits

Exploration of photographic principles through the use of the digital single lens reflex camera.

Fees: Yes.

ARTA 223 Image and Motion3 Credits

Introduction to tools, techniques, and practices relating to images and time-based media. Integration of images, typography, digital film, and sound.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTA 224 Principles of Film3 Credits

Introduction to various stages of film production. Emphasis on screenwriting, planning and scheduling, cameras, lenses, lighting, and editing.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 225 Principles of Animation3 Credits

Introduction to the core principles of animation through animated exercises that explore various techniques and tools for creating the illusion of life.

Prerequisites: ARTA 123.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTA 322 Intermediate Photography3 Credits

Discovery of vision and the art of seeing through the lens of a camera.

Prerequisites: ARTE 101 and ARTA 222.

Fees: Yes.

ARTA 323 Character Design and Story Concepts3 Credits

In-depth exploration of the power of story and how it influences the design process. World building through character design and concept art for animation, live-action, comics, and video games.

Prerequisites: ARTA 225.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 324 Animation Production3 Credits

Development of a personal aesthetic through advanced individual or collaborative short animations and character performances, based on original concepts and stories. Involves storyboarding, pre-production, and post-production.

Prerequisites: ARTA 224 and ARTA 225.

Terms Typically Offered: Fall.

Fees: Yes.

ARTA 325 3D Digital Modeling3 Credits

Exploration of the basics of 3D animation. Focus on modeling, texturing, lighting, cameras, animation, and rendering. Emphasis will also be on creative expression in these areas.

Prerequisites: ARTA 223, ARTA 224, and ARTA 225.

Fees: Yes.

ARTA 326 Intermediate Filmmaking3 Credits

Continuation of ARTA 224. Exploration of intermediate filmmaking techniques and aesthetics.

Prerequisites: ARTA 222, ARTA 223, ARTA 224, and ARTA 225.

Terms Typically Offered: Fall.

Fees: Yes.

ARTA 327 Sound Design and Post-Production3 Credits

Exploration of the relationship between sound and image through post-production techniques including editing, coloring, and sound design. Creation of Foley sound effects for short films, podcasts, and video games.

Prerequisites: ARTA 324 and ARTA 326.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTA 421 Advanced Filmmaking I3 Credits

Advanced studies in digital filmmaking focusing on each student's individual creative interests such as experimental filmmaking or the combination of film with additional media.

Prerequisites: ARTA 326.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 422 Advanced Photography and Studio Lighting3 Credits

Exploration of light and the development of a studio lighting portfolio.

Prerequisites: ARTE 101, ARTA 222, and ARTA 322.

Fees: Yes.

ARTA 423 Advanced Filmmaking II3 Credits

Further investigation and development of techniques and practices in digital filmmaking. End of semester film is publicly screened.

Prerequisites: ARTA 421.

Terms Typically Offered: Spring.

ARTA 424 Animation, Film, and Photography Studio I3 Credits

Creation of pre-production and concept development for an individual or collaborative senior thesis. Students are encouraged to focus on their personal interests, career goals, and portfolio needs.

Prerequisites: ARTA 322, ARTA 323, ARTA 324, and ARTA 326.

Terms Typically Offered: Fall.

Fees: Yes.

ARTA 425 Animation, Film, and Photography Studio II3 Credits

Continuation of ARTA 424; Production of individual or collaborative thesis. Emphasis is placed on industry criteria for professional presentation in portfolios, festivals, and public exhibitions.

Prerequisites: ARTA 424.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 426 Advanced Motion Studio3 Credits

Development of emerging personal direction. Opportunities for unique, experimental, and personal projects working individually or in collaboration with other students.

Prerequisites: Upper division standing.

Terms Typically Offered: Fall.

Course may be taken 2 times for credit.

Fees: Yes.

ARTA 427 Portfolio and Demo Reel3 Credits

Preparation of demo reel, resume, and promotional materials for entry into the professional job market.

Prerequisites: ARTA 424.

Terms Typically Offered: Spring.

Fees: Yes.

ARTA 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTA 499 Internship1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Art - Art Education (ARTD)

ARTD 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTD 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 410 Elementary Art Education Methods3 Credits

Explorations of theory, methods, and materials for teaching art, kindergarten through sixth grade. Required for K-6 elementary teachers and K-12 Art Education majors. Studio applications, aesthetics, creative problem solving, art history, lesson, and unit plans explored.

Prerequisites: EDUC 115, EDUC 215, and EDUC 343, all with a grade of "B" or higher.

Terms Typically Offered: Fall, Spring.

ARTD 410L Field/Studio Experience in Elementary Art Education Methods1 Credit

Required for K-12 art education majors only. Forty field hours in local public schools.

Prerequisites: EDUC 115, EDUC 215, EDUC 343, all with a grade of "B" or higher.

Corequisites: ARTD 410.

ARTD 412 Secondary Art Education Methods4 Credits

Seminar that covers theory, methods, and materials for teaching art in middle and high schools, grades 7-12. Applies options in teaching through embedded field hours. Development of a year-long art curriculum. Required for K-12 Art Education majors.

Prerequisites: EDUC 115, EDUC 215, EDUC 343, all with a grade of "B" or higher.

ARTD 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTD 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 596 Topics:0.5-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Art - Art History (ARTH)

ARTH 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTH 220 History of Modern Art3 Credits

General survey of Western and non-Western art from 1850 to the 21st Century, with an emphasis on modern and contemporary art. This is a survey on the major movements and civilizations, methods of analysis, historical and cultural context.

Prerequisites: ARTE 101, ARTE 102, ARTE 118, and ARTE 119.

Terms Typically Offered: Fall, Spring.

ARTH 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTH 315 Nineteenth-Century Art3 Credits

Comprehensive survey of the major art movements of the nineteenth century: Neoclassicism, Romanticism, Academic Art, the invention of photography, Realism, Impressionism, Post-Impressionism, Symbolism, and Art Nouveau.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 316 20th Century Art to 19503 Credits

Foundations of modernism from Post-Impressionism through Surrealism through the study of major artists and art works and related manifestations including important theories of modern art, the modernist transformation of design aesthetics, and social and political reactions to modern art.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 317 American Art History3 Credits

Examination of art and artists of America from colonial times up to the present with attention to the role of the artist and the visual arts in American social experiment.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 318 Development of Contemporary Art3 Credits

Examination of art produced within the past 40 years with attention to the plurality of successful styles and subjects pursued by artists, the increasingly important role of the art critic and the contemporary art museum in interpreting trends, the impact of the commercial art market on the production and dissemination of contemporary art, and various experimental art forms developed by artists to counteract the influence of critics, institutions and commercial interests.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 319 Art of the American West3 Credits

Examination of the artist's encounter with the West as both real and imagined experience from the works of expeditionary artists of the early 19th century to recent large scale "earthworks" that transform the Western landscape. Emphasis on the works of the major 19th century protagonists of the heroic Western image as well as the important role of Santa Fe and other Western locations in the development of a Western art tradition.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 321 Gothic and Northern Renaissance Art and Architecture3 Credits

Architectural accomplishments of Gothic style and the revival and development of painting and sculpture from the Gothic period through the Renaissance in the North. Includes invention of oil painting, growth of realism and direct observation of the real world in art, and effects of the Protestant Reformation on artistic styles and content.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 322 Expressionism in 20th Century Art3 Credits

Expressionism in Germany during the early 20th century and its recurrence in the latter half of the 20th century. Visual language of expressionism as a distinctive style and the artistic goals of Expressionism that define a specific role for the artist in society.

Prerequisites: ARTE 118, ARTE 119, and ARTH 316.

ARTH 323 History of Modern Architecture3 Credits

Modern architecture as a form of applied artistic expression. Examination of major stylistic developments in architecture and applied design from 19th century historically-inspired styles through 20th century innovations that transformed traditions of architectural design and the role of the architect in modern society.

Prerequisites: ARTE 118 and ARTE 119; and ARTH 315 or ARTH 316.

ARTH 324 History of Graphic Design3 Credits

Exploration of the history of graphic design from the advent of writing through the digital revolution, focusing on development of design techniques and styles.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 325 Italian Renaissance Art History3 Credits

Explores origins, development, and end of Italian Renaissance. Late thirteenth to mid-sixteenth century. Emphasis on major works of sculpture, painting, architecture, and the artists responsible for their creation.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 326 Medieval Art: Early Christian to the Romanesque3 Credits

Explorations of Christian art through time and geographic regions. Emphasizes major works including sculpture, manuscripts, and architecture as well as the forces which shaped their creation and determined their meaning and significance.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 327 History of Western Architecture3 Credits

Explores beginnings of architecture in prehistory and traces development through time and geographic regions through the end of the Italian Renaissance. Emphasizes major works of architecture with discussions of form, function, and relation to other works of architecture.

Prerequisites: ARTE 118 and ARTE 119.

ARTH 331 History of the Moving Image3 Credits

Exploration of the history of the moving image from the pre-industrial era through the contemporary and digital era, focusing on the history of both technological and artistic development, and the moving image in its varied types.

Prerequisites: ARTE 118 and ARTE 119.

Terms Typically Offered: Fall.

ARTH 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTH 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTH 400 Art Theory3 Credits

Introduction to the development of art history as a discipline and how art historians evaluate and interpret complex issues of style, form, content, and theory in visual art. Structured discussion of historical art works studied in other upper division art history courses. Readings of seminal art historical theories and interpretive methodologies. Hands-on practice with library research tools.

Prerequisites: ARTE 118; ARTE 119; and ARTH 315 or ARTH 316.

Terms Typically Offered: Spring.

ARTH 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTH 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTH 499 Internship1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Art - Graphic Design (ARTG)

ARTG 122 Design It3 Credits

Exploration of design as the foundation of all the visual arts. Approaching design through a broad hands-on tactile experience.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTG 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 201 Adobe Illustrator2 Credits

Introduction. Techniques for using vector-based drawing program explored through exercises to learn the application and features as used by graphic designers for print and electronic media.

ARTG 202 Adobe Photoshop2 Credits

Introduction. Techniques for using raster-based software for print, video, web, and other multi-media applications.

ARTG 203 Adobe InDesign2 Credits

Techniques for using the program explored. Exercises to learn the application and features as used by graphic designers and professional publishers.

ARTG 215 Graphic Design I3 Credits

Basic use and operation of graphics computer, exclusively Macintosh, with focus on terminology, hardware, peripheral devices, system management, and software (systems and applications). Including establishment of operation files, job information files, information capture and placement, and maintenance.

Fees: Yes.

ARTG 220 UX Design I3 Credits

Application of modern techniques of WordPress web hosting, design, and real-world uses.

Prerequisites: ARTG 215.

Corequisites: ARTG 221 and ARTG 222.

Terms Typically Offered: Fall.

Fees: Yes.

ARTG 221 Graphic Design II3 Credits

Principles of design and layout techniques, including thumbnail, rough, and comprehensive layouts: work planning and preparation of artwork with focus on computer and hand generated images.

Prerequisites: ARTE 101, ARTE 102, and ARTG 215.

Corequisites: ARTG 220 and ARTG 222.

Terms Typically Offered: Fall.

Fees: Yes.

ARTG 222 Illustration I3 Credits

Approaches to traditional and contemporary illustration. Materials will be introduced and developed for practical use.

Prerequisites: ARTG 215.

Corequisites: ARTG 220 and ARTG 221.

Terms Typically Offered: Fall.

Fees: Yes.

ARTG 223 Commercial Typography and Sign Painting3 Credits

Cultivation of skills necessary to create professional level industrial advertisement including pounce patterns, wood working, hand lettering techniques, and gilding.

Prerequisites: ARTG 222.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTG 290 UX Design II3 Credits

Development of websites with focus on the end user by applying tested UX design.

Prerequisites: ARTG 220.

Terms Typically Offered: Spring.

Fees: Yes.

ARTG 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 301 Digital Illustration3 Credits

Advanced creation of digital imagery focusing on visual content and composition in print and multi-media applications.

Prerequisites: ARTG 215, ARTG 221, and ARTG 222.

Fees: Yes.

ARTG 320 Letterforms and Typography3 Credits

Study of letterforms and typography including terminology, type style identification and design, use of type within a design, composition, copyfitting, and basic principles of pattern and spatial design.

Prerequisites: ARTG 215 and ARTG 221.

Fees: Yes.

ARTG 321 Advanced Typography3 Credits

Explore traditional and contemporary forms of typography and compositions through letterpress and hand rendering approaches.

Prerequisites: ARTG 320.

Fees: Yes.

ARTG 333 Illustration II3 Credits

Illustration techniques in context of contemporary materials and methods. Advanced use of materials.

Prerequisites: ARTG 221 and ARTG 222.

Fees: Yes.

ARTG 337 Illustration III3 Credits

Storytelling through traditional and contemporary illustration medium. Emphasis placed on developing concepts, execution, and professional practices.

Prerequisites: ARTG 333.

Fees: Yes.

ARTG 338 Brand Design3 Credits

Exploration of the branding process common to the promotion of products and services, including conducting research, clarifying strategy, creating touchpoints, and advertisements. Emphasis will be placed on design processes, production of advertisements, and the management of assets.

Prerequisites: ARTG 301 and ARTG 320.

Terms Typically Offered: Spring.

Course may be taken 3 times for credit.

Fees: Yes.

ARTG 360 Sketchbook3 Credits

The sketchbook as a primary medium for developing creativity and the artist's thought processes. This course will include exploratory exercises and field assignments for developing skills in keeping an individual sketchbook as a place for recording ideas and the artist's visual experience.

Prerequisites: ARTS 151 and ARTG 222.

Course may be taken 2 times for credit.

Fees: Yes.

ARTG 373 Screen Printing for Graphic Design3 Credits

Introduce concepts and techniques of screen printing within Graphic Design and Illustration. Become familiar with industry tools, equipment and processes.

Prerequisites: ARTG 221.

Course may be taken 2 times for credit.

Fees: Yes.

ARTG 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTG 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 401 Digital Painting3 Credits

Introduction to the language of digital painting. Fundamental skills of proportion, perspective, and color mixing. Translating light and color into a digital space. Perceptual problem solving in the practical application of digital painting.

Prerequisites: ARTG 301.

Fees: Yes.

ARTG 405 UX Design III3 Credits

Creation and development of well-designed and functional web pages/sites to accommodate clients' promotional and business needs. Topics covered include software, creation of graphics, publishing, design theory for the web, typography, and promotion.

Prerequisites: ARTG 290, ARTG 301, and ARTG 320.

Terms Typically Offered: Spring.

Fees: Yes.

ARTG 406 UX Design IV3 Credits

Investigation, analysis and application of User Experience, and emerging website design trends.

Prerequisites: ARTG 405.

Terms Typically Offered: Fall.

Fees: Yes.

ARTG 421 Contemporary Letterpress3 Credits

Approaches to traditional and contemporary letterpress. Materials will be introduced and technique developed for practical use.

Prerequisites: ARTG 221.

Course may be taken 2 times for credit.

Fees: Yes.

ARTG 427 Lab Assistant1-3 Credits

Practice with technologies used within the Graphic Design labs. Maintain and use equipment.

Prerequisites: ARTG 221.

Terms Typically Offered: Fall.

Course may be taken 3 times for credit.

ARTG 437 Illustration IV3 Credits

Advanced illustration development focusing on concept, content, materials, and techniques. Emphasis on individual artistic style and personal visual communication perception.

Prerequisites: ARTG 337 or permission of instructor.

Fees: Yes.

ARTG 450 Identity Design3 Credits

Exploration of visual communication designed for public and private business and organization identity. Emphasis will be placed on the process of design and approaches to image generation for identity systems and standards.

Prerequisites: ARTG 301 and ARTG 320.

Fees: Yes.

ARTG 493 Portfolio Development3 Credits

Development of portfolio materials to be used for gaining employment. Emphasis placed on current industry professional practices including presentation formats, resume development, contracts, and salary negotiations.

Prerequisites: ARTG 405 and ARTG 406.

Course may be taken multiple times up to maximum of 15 credit hours.

Fees: Yes.

ARTG 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTG 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 499 Internship1-3 Credits

Placement in an agency or corporate department to provide an enhanced transition from the classroom to the work setting through first-hand experience. The student is expected to complete 135 clock hours.

Prerequisites: ARTG 450.

Art - Sculpture/Studio (ARTT)

ARTT 270 Sculpture I3 Credits

Introduction of technique and processes practiced in advanced sculpture courses. Basic welding, mold making, bronze casting and fabrication/construction using multimedia explored. Development of aesthetic concepts stressed and their successful applications. Projects conclude with group critiques.

Fees: Yes.

ARTT 371 Sculpture/Construction I3 Credits

Exploration of MIG welding, beginning metal fabrication techniques, woodworking and multimedia. Historical contexts. Aesthetic concepts stressed and projects conclude with group critiques.

Prerequisites: ARTT 270.

Fees: Yes.

ARTT 372 Sculpture/Construction II3 Credits

Introduction of advanced fabrication techniques and tools in steel, wood and multimedia. Advanced finishes and finishing techniques also introduced. Continued focus on historical contexts.

Prerequisites: ARTT 371.

Fees: Yes.

ARTT 380 Bronze/Casting I3 Credits

Bronze casting using the lost wax process and ceramic shell. Includes history, terminology, equipment, and procedure. Includes working in wax, spruing the art, ceramic shell investment, technical-pouring procedures, devesting the shelled patina. Studio emphasis on technique and creative process ending in finished bronze sculpture.

Prerequisites: ARTT 270.

Fees: Yes.

ARTT 381 Bronze/Casting II3 Credits

Creating in wax using various techniques. Explorations in wax using representational and abstract forms. Advanced finishes and patinas introduced.

Prerequisites: ARTT 380.

Fees: Yes.

ARTT 471 Sculpture/Construction III3 Credits

Sculpting in steel, wood and multimedia. Introduction to forge work. Direction chosen based on interests in materials and processes taught in previous sculpture/construction courses. Independent work via professor contract.

Prerequisites: ARTT 371.

Fees: Yes.

ARTT 472 Sculpture/Construction IV3 Credits

Thematic concepts for development of a BFA exhibit explored. Independent work via professor contract.

Prerequisites: ARTT 471.

Fees: Yes.

ARTT 475 Sculpture Workshop I3 Credits

Continued focus on a student's individual BFA direction. Independent work via student/professor contract.

Prerequisites: ARTT 472.

Fees: Yes.

ARTT 476 Sculpture Workshop II3 Credits

Emphasis placed on finishing sculpture representative of BFA direction. Sculpture focused and finished for professional presentation, independent work via student/professor contact.

Prerequisites: ARTT 475.

Fees: Yes.

ARTT 480 Bronze/Casting III3 Credits

Creating in wax using various techniques including advanced mold making. Focus on history and dynamics of furnace building and foundry equipment manufacture.

Prerequisites: ARTT 381.

Fees: Yes.

ARTT 481 Bronze/Casting IV3 Credits

Thematic concepts for development of a BFA exhibit explored. Independent work via professor contract.

Prerequisites: ARTT 480.

Fees: Yes.

ARTT 483 Bronze Workshop I3 Credits

Continued focus on a student's individual BFA direction. Independent work via student/professor contract.

Prerequisites: ARTT 481.

Fees: Yes.

ARTT 484 Bronze Workshop II1-3 Credits

Emphasis placed on finishing sculpture representative of the student's BFA direction. Sculpture will be focused and finished for professional presentation. Independent work via student/professor contract.

Prerequisites: ARTT 483.

Course may be taken 2 times for credit.

Fees: Yes.

ARTT 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Art - Studio Art (ARTS)

ARTS 151 Foundation Drawing I3 Credits

Introduction to drawing with an emphasis on perceptual drawing. Perspective, light, shadow, form, volume, and mark-making strategies are explored, as well as an introduction to composition using a variety of media. Preparation for more advanced art classes.

ARTS 152 Foundation Drawing II: Figure Drawing3 Credits

Continuation of ARTS 151. Further development of drawing techniques and an introduction to drawing the human figure. Issues of form, structure, volume, movement, composition, and expressive possibilities are explored and practiced.

Prerequisites: ARTS 151.

ARTS 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTS 221 Metalsmithing3 Credits

Prerequisites: ARTE 102 or permission of instructor.

Fees: Yes.

ARTS 225 Introduction to Photography3 Credits

Exploration of digital photography through technical and creative skill development using the digital single lens reflex camera.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 231 Fibers Workshop I3 Credits

Introduction to fiber and fabric art forms, including creation of original weaving, felt and fabric collage, batik and other applications.

Prerequisites: ARTE 101 and ARTS 151.

ARTS 241 Beginning Hand Building3 Credits

Introduction to the ceramic process using traditional materials and methods for hand formed ceramics objects. Involvement in clay from raw material through the glazing and firing process. Studio emphasis on technique and creative process.

Fees: Yes.

ARTS 242 Beginning Wheel Throwing3 Credits

Beginning throwing processes. Creating vessels while learning the technique of shaping clay by throwing. Form and function explored. Initial firing process for bisque fire taught. Development of under-glaze and glaze techniques.

Fees: Yes.

ARTS 251 Life Drawing3 Credits

Introduction to drawing the human figure. Issues of form, structure, volume, movement, composition, and expressive possibilities are explored and practiced.

Prerequisites: ARTE 101 and ARTS 152.

Fees: Yes.

ARTS 252 Mixed Media Drawing3 Credits

Artistic exploration of experimental media, dry and wet, and alternative media alone or combined on varied drawing surfaces to give dimension, texture and vitality to a drawing. Figure and still life are main subject matter for observational approach.

Prerequisites: ARTS 251.

Fees: Yes.

ARTS 274 Printmaking: Intaglio and Relief3 Credits

Introduces concepts and techniques of intaglio and relief printmaking processes. Includes non-acid and acid intaglio techniques such as drypoint, hard ground/line etch, soft ground, aquatint, multiple plate printing, a la poupee wiping, and chine-colle. Relief processes include linoleum cut and woodcut.

Fees: Yes.

ARTS 275 Printmaking: Screen Printing and Lithography3 Credits

Introduction to the techniques, concepts, and history of screen print and lithography printmaking processes. Screen printing techniques include experimental monoprint, multiple color registration, and photo emulsion. Lithography techniques include black and white and multiple color printing from stone and photo plates. Emphasis will be placed on technical development, concept and idea generation, craftsmanship, and studio participation.

Terms Typically Offered: Spring.

Fees: Yes.

ARTS 291 Painting I: Intro to Painting3 Credits

Introduction to the language of painting through studio practice. Fundamental skills of color mixing and practical applications of painting and how they relate to perceptual problem solving. Focus on light and color and how it translates into pictorial space through observational painting.

Prerequisites: ARTS 151.

Fees: Yes.

ARTS 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTS 321 Metalsmithing3 Credits

Prerequisites: ARTS 151 and ARTS 221.

Fees: Yes.

ARTS 325 Intermediate Photography3 Credits

Development and discovery of individual artistic vision through the use of film photography.

Prerequisites: ARTE 101 and ARTS 225.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 331 Fibers Workshop II3 Credits

Intermediate examination of several fiber or fabric applications.

Prerequisites: ARTS 231.

ARTS 335 Digital Alternative Processes3 Credits

Exploration of fine art print making using digital photographic processes that contains a hands on element through continuation of digital photography studies.

Prerequisites: ARTS 325.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 336 Photography Workshop I3 Credits

Advanced development of personal vision and style through the lens of a camera.

Prerequisites: ARTS 335.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 342 Throwing Workshop I: Intermediate Throwing3 Credits

A continuation of the throwing process involving more complex vessels and techniques using lids, spouts, and pedestals. Assignment to firing teams for studio production for high fire clay.

Prerequisites: ARTS 242.

Fees: Yes.

ARTS 344 Throwing Workshop II3 Credits

Alteration of thrown vessels using several techniques, including wet shaping, leatherhard shaping, marks, incising, and stamping. Creating larger vessels using a two-piece technique. Kiln teams assigned for high firings. Develop and study glazes and empirical formulas. Introduction to basic molecular composition of raw materials.

Prerequisites: ARTS 342.

Fees: Yes.

ARTS 351 Drawing Workshop I3 Credits

Traditional and contemporary drawing processes and advanced compositional strategies. Perceptual, abstract, and conceptual ideas explored within the context of strengthening the artist's formal skills and idea development. Individual and group critiques ongoing.

Prerequisites: ARTS 152.

Fees: Yes.

ARTS 352 Drawing Workshop II3 Credits

Formal mastery of the visual language and development of a personal artistic direction. Critical thinking skills about individual artistic influences explored. Individual and group critiques ongoing.

Prerequisites: ARTS 351.

Fees: Yes.

ARTS 353 Visual/Conceptual Thinking3 Credits

Learning meaningful questioning. Engaging in creative problem solving. Assumptions about art questioned. Media selection is not limited; problems posed may be solved with 2D or 3D media.

Prerequisites: ARTS 251.

ARTS 354 Intermediate Life Drawing3 Credits

Continuation of the study of the human figure through an exploration and practice of composition, form, structure, volume, movement, anatomy and drawing processes.

Prerequisites: ARTS 251.

Course may be taken 2 times for credit.

Fees: Yes.

ARTS 362A Artists' Books1 Credit

Introduction to the art of making visual books, including book structure, binding techniques, and strategies for developing sequential imagery.

Prerequisites: ARTE 101 and ARTS 152, or permission of instructor.

ARTS 362B Artists' Books1 Credit

Continuation of the art of making visual books, including book structure, binding techniques, and strategies for developing sequential imagery.

Prerequisites: ARTE 101 and ARTS 152, or permission of instructor.

ARTS 362C Artists' Books1 Credit

Further exploration of the art of making visual books, including book structure, binding techniques, and strategies for developing sequential imagery.

Prerequisites: ARTE 101 and ARTS 152, or permission of instructor.

ARTS 364 Figure Painting I3 Credits

Exploration of proportion, perspective and volume through painting from a model. Investigation of various techniques and conceptual development encouraged through use of oil or acrylic. Individual and group critiques.

Prerequisites: ARTS 251 and ARTS 291.

Fees: Yes.

ARTS 365 Painting II: Methods and Materials3 Credits

Exploration and experimentation with various techniques, materials, and alternative processes inherent to contemporary painting. Through this exploration of painting, students will begin to develop a direction of investigation and a conceptual framework for their own personal painting practice.

Prerequisites: ARTS 151.

Fees: Yes.

ARTS 366 Painting 2: Observational Painting3 Credits

Further exploration of observational painting through various techniques, materials, and processes inherent to contemporary observational painting. This course builds on the foundation of observational painting in ARTS 291 allowing students to further develop their observational painting skills.

Prerequisites: ARTS 291.

ARTS 370 Printmaking: Intermediate Lithography3 Credits

Introduces advanced concepts and techniques of fine art lithography, including traditional aluminum plate lithography, multiple color, hybrid or combination prints, and chine-colle techniques. Development of creative skills, conceptual direction, craftsmanship, and studio involvement.

Prerequisites: ARTS 275.

Fees: Yes.

ARTS 371 Printmaking Workshop I3 Credits

Develop skills with intaglio, relief, and lithograph. Exploration of advanced techniques. May include multiple color printing processes, engraving, and collagraph. Work created will be matted.

Prerequisites: ARTS 274 or ARTS 275.

Fees: Yes.

ARTS 372 Printmaking Workshop II3 Credits

Exploration of printmaking media. Investigation of a printmaker of choice to develop critical thinking about personal artistic skills. Artwork created will be matted, shown in a public space, and documented digitally.

Prerequisites: ARTS 371.

Fees: Yes.

ARTS 375 Printmaking: Advanced Screen Printing3 Credits

Continued development and refinement of the techniques and concepts of fine art screen printing, including in-depth exploration of color, size, scale, and complexity of multiple layer imagery. Emphasis will be put on the development of creative thinking, developing personal artistic concepts, and portfolio development.

Prerequisites: ARTS 275.

Terms Typically Offered: Fall.

Fees: Yes.

ARTS 376 Printmaking: Advanced Intaglio and Relief3 Credits

Advanced intaglio and relief techniques, history, and concepts will be explored. These will include monoprinting, mezzotint, and various digital technologies and techniques such as CNC (computer navigated control) routing, and kento registration techniques. Research projects into other printmaking techniques will be done on individual basis. Emphasis will be on demonstration of technical development, conceptual growth, craftsmanship, and studio participation.

Prerequisites: ARTS 274.

Terms Typically Offered: Fall.

Fees: Yes.

ARTS 384 Ceramic Sculpture Workshop I3 Credits

Creating in clay using various techniques and processes. Explorations with clay includes elements of the figure, representational and abstract, as well as 3D forms as pure sculpture. Artwork based and finished for professional exhibition. Independent work via student/professor contract.

Prerequisites: ARTS 241.

Fees: Yes.

ARTS 385 Summer Institute in Marble, Colorado3 Credits

Summer symposium at Marble/Marble Carving Symposium. Carve Colorado Yule Marble from the same quarries used in the Lincoln Memorial, the Tomb of the Unknown Soldier and other projects. A fee for the summer institute is in addition to Colorado Mesa University tuition and fees.

Prerequisites: ARTT 270.

ARTS 387 Bronze Commissions: Workshop I3 Credits

Special bronze commissions and projects as a liaison project with schools or the community. Direct experience at creating art from inception to mounted sculpture. Presentations to respective clients, budgets, armatures, sculpting, molds, wax, investing, and finishing of the bronze. Basing of the sculptures complete the process.

Prerequisites: ARTT 270.

ARTS 388 Ceramic Sculpture Workshop II3 Credits

Thematic concepts for the development of a BFA exhibition in clay explored. Student / Mentor consultation of utmost importance as the theme is developed. Independent work via student / professor contract. Art work based for professional presentation. Development of glazes including empirical formulas. Introduction to basic chemistry of the molecular composition of raw materials.

Prerequisites: ARTS 384.

Fees: Yes.

ARTS 391 Painting Workshop I3 Credits

Skills developed in painting media of choice. Exploring advanced techniques to develop individual artistic expression. Discussions of personal influences and historical context ongoing.

Prerequisites: ARTS 291 or ARTS 365.

Fees: Yes.

ARTS 392 Painting Workshop II3 Credits

Further investigation of techniques and material in individual painting medium. Personal artistic influences identified tools to aid individual artistic direction. Individual and group critiques are ongoing. End of semester artwork presented in public space and documented digitally.

Prerequisites: ARTS 391.

Fees: Yes.

ARTS 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTS 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTS 421 Metalsmithing3 Credits

Prerequisites: ARTS 321.

Fees: Yes.

ARTS 425 Advanced Studio Photography3 Credits

Further exploration of light and individual artistic vision through the use of digital photography.

Prerequisites: ARTS 325.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 431 Fibers Workshop III3 Credits

Creating of advanced fiber and fabric artwork; examination of historical precedents.

Prerequisites: ARTS 331.

Fees: Yes.

ARTS 435 Wet Alternative Processes3 Credits

Exploration of fine art print making using wet alternative photographic processes that contains a hands on element.

Prerequisites: ARTS 335.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 436 Photography Workshop II3 Credits

Advanced development of personal vision and style through the lens of a camera and creation of prints.

Prerequisites: ARTS 336.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ARTS 442 Kiln Construction3 Credits

Ceramics majors. Theory and practice of formulation of glazes utilizing minerals and oxides. Development of glazes includes empirical formula to a batch, batch to an empirical formula, and limit formulas. Basic chemistry of the molecular composition of raw materials. Background in ceramics required.

Prerequisites: Permission of instructor.

Fees: Yes.

ARTS 443 Throwing Workshop III3 Credits

Advanced problems in clay construction and design with an emphasis on the development of personal style. Develop skills to create thrown multiples in clay. Discussion of marketing and establishing a studio to create clay art.

Prerequisites: ARTS 344.

Fees: Yes.

ARTS 444 Throwing Workshop IV3 Credits

Exploration of thematic concepts for the development of a BFA exhibit in clay continued. Development of personal style on the potter's wheel including advanced alteration techniques. Independent work via student/professor contract to create body of artwork with professional presentation.

Prerequisites: ARTS 443.

Fees: Yes.

ARTS 451 Drawing Workshop III3 Credits

Senior level drawing. Develop drawings used in senior exhibitions and professional purposes. Exploration and analysis of what historical and contemporary context fits individual's style.

Prerequisites: ARTS 352.

Fees: Yes.

ARTS 452 Drawing Workshop IV3 Credits

Subject matter, form, and content are determined by the student under the guidance of the instructor. Ability to speak and write articulately about created artwork developed.

Prerequisites: ARTS 451.

Fees: Yes.

ARTS 453 Visual and Conceptual Thinking3 Credits

Advanced. Continuation of ARTS 353.

Prerequisites: ARTS 353.

ARTS 464 Figure Painting II3 Credits

Advanced level exploration of the human figure in relation to conceptually based narrative paintings. Variety of media is encouraged. Students will use the model to develop a consistent body of work towards their BFA show. Individual and group critiques ongoing as well as discussion about individual concepts and direction.

Prerequisites: ARTS 364.

Fees: Yes.

ARTS 465 Mixed Media Painting3 Credits

Advanced level bridge between 2D and 3D mediums. Focus on manipulation of various materials to give textural vitality to a conceptually based body of work leading toward the BFA show. Individual and group critiques ongoing as well as discussion of individual concepts and direction.

Prerequisites: ARTS 365.

Fees: Yes.

ARTS 470 Advanced Lithography3 Credits

Continued development and refinement of techniques and concepts of fine art lithography including polyester plate lithography, independent technical research, and creative critical thinking as applied to the development of personal conceptual artistic direction.

Prerequisites: ARTS 370.

Terms Typically Offered: Spring.

ARTS 471 Printmaking Workshop III3 Credits

Research a printmaking technique that has not been introduced. Create a print and present the method. Develop a professional portfolio of artwork for senior exhibition and professional shows. Artwork created will be matted and documented digitally.

Prerequisites: ARTS 372.

Fees: Yes.

ARTS 472 Printmaking Workshop IV3 Credits

Technical refinement and conceptual development. Refining a personal direction for the artist's imagery. Artwork created will be matted and documented digitally.

Prerequisites: ARTS 471.

Fees: Yes.

ARTS 473 Printmaking Workshop V3 Credits

Creation of a mature and cohesive series of prints that demonstrate a solution or solutions to a creative problem posed by the individual. Artwork will demonstrate technical mastery and conceptual sophistication; student will provide a mature written artist statement and high-quality photo documentation. Oral critique where the artist verbalizes the context of their artwork within the contemporary art world.

Prerequisites: ARTS 472.

Fees: Yes.

ARTS 474 Throwing Workshop V3 Credits

Exploration of the potter's wheel to develop personal style in the throwing process. Independent work via student/professor contract. Body of work created for professional presentation.

Prerequisites: ARTS 444.

Fees: Yes.

ARTS 476 Printmaking: Portfolio Development1 Credit

Development of a professional body of artwork that demonstrates technical, creative, and conceptual maturity. Students will design, implement, and assess their own creative research goals under the tutelage of the professor. Artwork will be photographed and presented in a portfolio with the intention of entering the art profession. The course may be repeated for credit.

Prerequisites: ARTS 371.

Terms Typically Offered: Fall, J-Term, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

ARTS 484 Ceramic Sculpture Workshop III3 Credits

Thematic concepts for the development of a BFA exhibit in clay continued. Independent work via student/professor contract. Artwork based for professional presentation.

Prerequisites: ARTS 384.

Fees: Yes.

ARTS 487 Bronze Commissions Workshop II3 Credits

Special bronze commissions and projects as a liaison project with schools or the community. Direct experience at creating art from inception to mounted sculpture. Presentations to respective clients, budgets, armatures, sculpting, molds, wax, investing, and finishing of the bronze. Basing of the sculptures complete the process. Continuation of a year-long project at the 400 level.

Prerequisites: ARTS 387.

ARTS 488 Ceramic Sculpture Workshop IV3 Credits

General introduction to media, techniques, and history of ceramic art to create a deeper appreciation for the creative ceramics process. Further development of thematic concepts for the development of a BFA exhibit in clay. Independent work via student/professor contract.

Prerequisites: ARTS 484.

Fees: Yes.

ARTS 491 Painting Workshop III3 Credits

Workshop III continues development of professional portfolios of artwork used for senior exhibitions and other professional shows. Artistic influences explored. Oral and written communication skills developed in preparation for professional interaction. End of semester artwork documented digitally.

Prerequisites: ARTS 392.

Fees: Yes.

ARTS 492 Painting Workshop IV1-3 Credits

Technical refinement and conceptual development emphasized. Refinement of the artist's imagery. Ability to speak and write about work developed. End of semester artwork documented digitally.

Prerequisites: ARTS 491.

Course may be taken 2 times for credit.

Fees: Yes.

ARTS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ARTS 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ARTS 498 Ceramic Sculpture Workshop V3 Credits

Further exploration of thematic concepts for the development of a BFA exhibit in clay. Independent work via student/professor contract. Artwork created for professional presentation.

Prerequisites: ARTS 488

Fees: Yes.

ARTS 499 Internship1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Athletic Training (ATRN)

ATRN 502 Research Methods II3 Credits

Examination of the methods of research in kinesiology. Topics include epidemiology, public health, and evidence based practice.

Prerequisites: KINE 501.

Terms Typically Offered: Spring.

ATRN 511 Professionalism in Athletic Training/Healthcare Ethics I1 Credit

Introduction to Athletic Training profession. Foundational athletic training skills and programmatic and professional policies, procedures, and standards of practice.

Prerequisites: Admission to the MS Athletic Training program.

Terms Typically Offered: Summer.

ATRN 512 Professionalism in Athletic Training/Healthcare Ethics II3 Credits

Survey of experience and knowledge gained in Athletic Training Program. Certification examination preparation, employment preparation, and capstone experience.

Prerequisites: ATRN 511.

Terms Typically Offered: Spring.

ATRN 513 Administration in Athletic Training3 Credits

Exploration of Athletic Training administration. Concentration on human resources, healthcare delivery models, payor systems, facility design and function, and budgets.

Prerequisites: ATRN 511.

Terms Typically Offered: Fall.

ATRN 521 Injury and Illness Diagnosis and Management I4 Credits

Evaluation techniques and care of common injuries and illnesses. Integration of anatomical structures, physiology principles, and evaluation techniques to provide a basis for clinical decision making in an injury/illness management environment. Review of the theoretical and scientific basis for, and practical use of, traditional therapeutic interventions utilized in the treatment of acute and chronic injury and illness.

Prerequisites: Admission to the MS Athletic Training program.

Terms Typically Offered: Fall.

ATRN 522 Injury and Illness Diagnosis and Management II4 Credits

Evaluation techniques and care of less common injuries and illnesses. Integration of anatomical structures, physiology principles, and evaluation techniques to provide a basis for clinical decision making in an injury/illness management environment. Review of the theoretical and scientific basis for, and practical use of, traditional therapeutic interventions utilized in the treatment of acute and chronic injury and illness.

Prerequisites: ATRN 521.

Terms Typically Offered: Spring.

ATRN 523 Advanced Therapeutic Interventions I1 Credit

Exploration of emerging and/or advanced therapeutic interventions. Review of the theoretical and scientific basis for, and practical use of, emerging and/or advanced therapeutic interventions utilized in the treatment of acute and chronic injury and illness.

Prerequisites: ATRN 522.

Terms Typically Offered: Summer.

ATRN 524 Pharmacology and Sport Performance 3 Credits

Exploration of pharmacology and sport performance in an athletic patient population. Review of the basics of pharmacology, supplements, and wellness/healthy nutrition, as well as the components of a comprehensive program to maximize sport performance.

Prerequisites: ATRN 523.

Terms Typically Offered: Spring.

ATRN 531 Clinical Education in Athletic Training I2 Credits

Exploration of athletic training clinical experiences. Concentration on development of clinical skills as a novice clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: Admission to the MS Athletic Training program.

Terms Typically Offered: Fall.

ATRN 532 Clinical Education in Athletic Training II2 Credits

Exploration of athletic training clinical experiences. Concentration on development of clinical skills as an advanced beginner clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: ATRN 531.

Terms Typically Offered: Spring.

Fees: Yes.

ATRN 533 Clinical Education in Athletic Training III3 Credits

Exploration of athletic training clinical experiences. Concentration on application of clinical skills as a competent clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: ATRN 532.

Terms Typically Offered: Fall.

ATRN 534 Clinical Education in Athletic Training IV3 Credits

Exploration of athletic training clinical experiences. Concentration on application of clinical skills as an experienced clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: ATRN 533.

Terms Typically Offered: Spring.

ATRN 587 Research 3 Credits

Aviation Technology (AVTN)

AVTN 101 Private Pilot Ground School 4 Credits

Preparation for Private Pilot Airplane, Single Engine, Land-FAA Knowledge Exam.

Fees: Yes.

AVTN 102 Private Pilot Flight 4 Credits

Preparation in flight training for the Private Pilot Airplane, Single-Engine, Land FAA Practical Test, and completing requirements for the Private Pilot Certificate.

Fees: Yes.

AVTN 105 Aviation Meteorology 4 Credits

Recognition, interpretation, and evaluation of atmospheric weather as it relates to and affects aviation.

AVTN 111 Instrument Pilot Ground School 4 Credits

Preparation for the FAA Instrument Rating Knowledge Exam.

Fees: Yes.

AVTN 112 Instrument Pilot Flight 4 Credits

Preparation in flight training for the Instrument Rating, Single Engine Airplane FAA Practical Test, and completing requirements for the Instrument Rating.

Fees: Yes.

AVTN 140 Aircraft Systems 4 Credits

Introduction to the basic mechanical systems and structural components of aircraft to supplement instruction received in flight training.

AVTN 196 Topics: 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

AVTN 201 Commercial Pilot Ground School 2 Credits

Preparation for the Commercial Pilot Airplane, Single Engine, Land FAA Knowledge Exam.

Fees: Yes.

AVTN 202 Commercial Pilot Flight I4 Credits

The first of a two-part sequence of flight training in preparation for the Commercial Pilot Certificate, Airplane, Single Engine Land FAA Practical Test. Consists of the cross country aeronautical experience required for the Commercial Certificate.

Fees: Yes.

AVTN 203 Commercial Pilot Flight II3 Credits

Preparation in flight training for the Commercial Pilot, Airplane Single Engine, Land FAA Practical Test, completing requirements for the Commercial Pilot Certificate.

Fees: Yes.

AVTN 205 Mountain Flying Ground School 1 Credit

Preparation of the unique aspects of flying in mountainous terrain and the additional knowledge and proficiency necessary for safe and efficient operation in mountain and high altitude terrain.

Fees: Yes.

AVTN 206 Crew Resource Management1 Credit

Comprehensive classroom instruction coupled with Line Oriented Flight Training (LOFT) in a Flight Training Device. Covers the knowledge, skills, and attitudes necessary to enhance safety and operate effectively as a member of an airplane/helicopter crew.

AVTN 207 Multi-Engine Ground School1 Credit

Preparation for the FAA Practical Test for Private or Commercial Pilot, Airplane Multi-Engine Land.

Fees: Yes.

AVTN 208 Multi-Engine Flight1 Credit

Preparation in flight training for the Airplane, Multi-Engine Rating and completing requirements for this rating.

Fees: Yes.

AVTN 211 Fundamentals of Instruction2 Credits

Preparation for the FAA Fundamentals of Instructing Knowledge Exam.

AVTN 212 Flight Instructor Ground School2 Credits

Preparation for the FAA Flight Instructor Airplane Knowledge Exam.

Fees: Yes.

AVTN 213 Flight Instructor Flight1 Credit

Preparation of mastery in the areas of: Fundamentals of Instructing, Technical Subject Areas, Preflight Preparation and Lesson, Grand and Airport Operations, Take Offs and Climbs, Fundamentals of Flight, Stalls, Spins, Maneuvering During Slow Flight, Basic Instrument Maneuvers, Performance Maneuvers, Ground Reference Maneuvers, Emergency Operations, Approaches, Landings, and After Landing Procedures, by passing the FAA Practical Test for Flight Instructor Airplane, Single-Engine Land.

Fees: Yes.

AVTN 218 ATC Procedures4 Credits

Preparation of IFR operations in the Air Traffic Control System, including: general procedures, terminal and IFR procedures, radar and non-radar environments, enroute procedures, and special and emergency procedures.

AVTN 245 Aviation Safety2 Credits

Knowledge and aeronautical decision making for the professional aviation environment. FAA regulations and standards will be taught in order for students to make sound judgments and decisions in the field of aviation. NTSB accident reports will be thoroughly reviewed as they are published to determine causal factors.

Terms Typically Offered: Fall, Spring.

AVTN 247 Aviation Physiology2 Credits

Human body responses in the aviation environment, including: hypoxia, fatigue, use of alcohol/medication, stress, rapid decompression, and illness. The effects of these factors on airmen's decision making, crew resource management, and the in-flight environment will be taught. Students will learn the resources available to aviators and their passengers.

Terms Typically Offered: Fall, Spring.

AVTN 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Biology (BIOL)

BIOL 101 General Human Biology-GTSC13 Credits

Scientific method, ecology, pollution, drugs, reproduction, cancer, heart disease, nutrition, and selected body structure and function relationships.

Corequisites: BIOL 101L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

BIOL 101L General Human Biology Laboratory-GTSC11 Credit

Scientific method, ecology, pollution, drugs, reproduction, cancer, heart disease, nutrition, and selected body structure and function relationships.

Corequisites: BIOL 101.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

BIOL 105 Attributes of Living Systems-GTSC13 Credits

Cell structure and function, cell energetics, biochemistry, and genetics. High school chemistry recommended.

Corequisites: BIOL 105L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

BIOL 105L Attributes of Living Systems Laboratory-GTSC11 Credit

Cell structure and function, cell energetics, biochemistry, and genetics. High school chemistry recommended.

Corequisites: BIOL 105.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

Fees: Yes.

BIOL 106 Principles of Animal Biology3 Credits

Broad morphological, physiological, and ecological features of principal phyla of animals and relationships between them.

Prerequisites: BIOL 105 or permission of instructor.

Corequisites: BIOL 106L.

BIOL 106L Principles of Animal Biology Laboratory1 Credit

Lab component required for BIOL 106.

Prerequisites: BIOL 105 or permission of instructor.

Corequisites: BIOL 106.

Fees: Yes.

BIOL 107 Principles of Plant Biology3 Credits

Reproductive biology, anatomy, physiology, phylogeny and ecology of the major groups of plants.

Prerequisites: BIOL 105 or permission of instructor.

Corequisites: BIOL 107L.

BIOL 107L Principles of Plant Biology Laboratory1 Credit

Lab component required for BIOL 107.

Prerequisites: BIOL 105 or permission of instructor.

Corequisites: BIOL 107L.

Fees: Yes.

BIOL 108 Diversity of Organisms-GTSC13 Credits

Broadly integrated survey of biological diversity with an emphasis on evolutionary relationships, ecology, and functional anatomical features of major groups.

Corequisites: BIOL 108L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education

Curriculum

Terms Typically Offered: Fall, Spring.

BIOL 108L Diversity of Organisms Laboratory-GTSC11 Credit

Broadly integrated survey of biological diversity with an emphasis on evolutionary relationships, ecology, and functional anatomical features of major groups.

Corequisites: BIOL 108.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education

Curriculum

Terms Typically Offered: Fall, Spring.

Fees: Yes.

BIOL 113 Outdoor Survival3 Credits

Skills necessary for biologists working in the field, including wilderness survival, wilderness medicine, camping/climbing skills, edible/poisonous plants, and urban survival skills.

Terms Typically Offered: Spring.

BIOL 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BIOL 208 Fundamentals of Ecology and Evolution3 Credits

Introduction to current theory and experimental work on biology of populations, species interactions, community structure, organismal and molecular evolution, genetic structure of populations, and natural selection. Lab field trips and laboratory-based learning experiences in ecology and evolution.

Prerequisites: BIOL 105/BIOL 105L, and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L or BIOL 108/BIOL 108L (may be taken concurrently).

Corequisites: BIOL 208L.

BIOL 208L Fundamentals of Ecology and Evolution Laboratory1 Credit

Lab component required for BIOL 208.

Prerequisites: BIOL 105/BIOL 105L, and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L or BIOL 108/BIOL 108L (may be taken concurrently).

Corequisites: BIOL 208.

Fees: Yes.

BIOL 209 Human Anatomy and Physiology3 Credits

Study of the form and function of several major systems of the human body. For students with an interest in pre-med, nursing, human health, and biology. A background in general biology is recommended. Three lectures and two one and one-half hour laboratories per week.

Corequisites: BIOL 209L.

BIOL 209L Human Anatomy and Physiology Laboratory1 Credit

Lab component required for BIOL 209.

Corequisites: BIOL 209.

Fees: Yes.

BIOL 210 Human Anatomy and Physiology II3 Credits

Continuation of Human Anatomy and Physiology, which covers additional body systems and disease processes. For students with an interest in pre-med, nursing, human health, and biology. Three one-hour lectures and two one and one-half hour laboratories per week.

Prerequisites: BIOL 209/BIOL 209L.

Corequisites: BIOL 210L.

BIOL 210L Human Anatomy and Physiology II Laboratory1 Credit

Lab component required for BIOL 210.

Prerequisites: BIOL 209/BIOL 209L.

Corequisites: BIOL 210.

Fees: Yes.

BIOL 211 Ecosystem Biology4 Credits

Ecological studies utilizing the concepts of population biology: energetics, dynamics, distribution, and sociology. Overnight and/or weekend field trips may be required. Four lectures and one three-hour laboratory per week.

Corequisites: BIOL 211L.

BIOL 211L Ecosystem Biology Laboratory1 Credit

Lab component required for BIOL 211.

Corequisites: BIOL 211.

Fees: Yes.

BIOL 217 Forensic Entomology2 Credits

Basic procedure and considerations in using insect evidence in crime scene investigations and the determination of post mortem interval using insects. Two-hour lecture and one two-hour lab per week.

Corequisites: BIOL 217L.

BIOL 217L Forensic Entomology Laboratory1 Credit

Lab component required for BIOL 217.

Corequisites: BIOL 217.

Fees: Yes.

BIOL 241 Pathophysiology4 Credits

Function of the human body with emphasis on interpretation of those functions in relation to disease processes.

Prerequisites: BIOL 209/BIOL 209L.

Terms Typically Offered: Fall, Spring, Summer.

BIOL 250 Introduction to Microbiology-GTSC13 Credits

Major types of microorganisms with an emphasis on bacteria. Microbial taxonomy, structure, metabolism, genetics, and aspects of infectious disease and the immune host response. Three lecture hours and two two-hour laboratories per week.

Corequisites: BIOL 250L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education

Curriculum

BIOL 250L Introduction to Microbiology Laboratory-GTSC11 Credit

Lab component required for BIOL 250.

Corequisites: BIOL 250.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education

Curriculum

Fees: Yes.

BIOL 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BIOL 301 Principles of Genetics3 Credits

Principles of genetics at the organismal, cellular, and molecular levels. Includes the unique genetic processes of prokaryotic organisms, eukaryotic organisms, and viruses.

Prerequisites: BIOL 105/BIOL 105L and MATH 113 or higher.

Corequisites: BIOL 301L.

Terms Typically Offered: Fall, Spring.

BIOL 301L Principles of Genetics Laboratory1 Credit

Principles of genetics at the organismal, cellular, and molecular levels. Includes the unique genetic processes of prokaryotic organisms, eukaryotic organisms, and viruses.

Prerequisites: BIOL 105/BIOL 105L and MATH 113 or higher.

Corequisites: BIOL 301.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

BIOL 302 Cellular Biology3 Credits

Form, function, and bioenergetics of the cell.

Prerequisites: BIOL 301/BIOL 301L and CHEM 132/CHEM 132L.

BIOL 310 Developmental Biology3 Credits

Embryonic growth and development of plants and animals. Errors in normal development, cancer, aging, and related topics.

Prerequisites: BIOL 301/BIOL 301L.

Corequisites: BIOL 310L.

Terms Typically Offered: Spring.

BIOL 310L Developmental Biology Laboratory1 Credit

Embryonic growth and development of plants and animals. Errors in normal development, cancer, aging, and related topics.

Prerequisites: BIOL 301/BIOL 301L.

Corequisites: BIOL 310.

Terms Typically Offered: Spring.

Fees: Yes.

BIOL 315 Epidemiology3 Credits

Characteristic patterns of communicable disease occurrence as related to individuals, geographic location, and time; factors affecting disease occurrence, the nature of vital statistics, sampling procedures, and study design. An independent project is required.

BIOL 316 Animal Behavior3 Credits

Mechanisms and evolution of animal behavior. Analysis of a variety of social and individual behaviors across the animal kingdom at both proximate and ultimate levels.

Prerequisites: BIOL 106/BIOL 106L or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L.

Corequisites: BIOL 316L.

Terms Typically Offered: Spring.

BIOL 316L Animal Behavior Laboratory1 Credit

Mechanisms and evolution of animal behavior. Analysis of a variety of social and individual behaviors across the animal kingdom at both proximate and ultimate levels.

Prerequisites: BIOL 106/BIOL 106L or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L.

Corequisites: BIOL 316.

Terms Typically Offered: Spring.

Fees: Yes.

BIOL 320 Plant Systematics3 Credits

Systematic botany encompassing principles of classification, nomenclature, and evaluation of current classifications of angiosperms.

Prerequisites: BIOL 105/BIOL 105L, BIOL 107/BIOL 107L or BIOL 108/BIOL 108L, and BIOL 208/BIOL 208L.

BIOL 321 Taxonomy of Grasses2 Credits

A study of the grass family and grass-like plants (sedges and rushes) dealing with the evolution, classification, and identification of these plants. Two lectures and two two-hour laboratories per week.

Prerequisites: BIOL 107/BIOL 107L or BIOL 108/BIOL 108L, or permission of instructor.

Corequisites: BIOL 321L.

BIOL 321L Taxonomy of Grasses Laboratory2 Credits

Lab component required for BIOL 321.

Prerequisites: BIOL 107/BIOL 107L or BIOL 108/BIOL 108L, or permission of instructor.

Corequisites: BIOL 321.

Fees: Yes.

BIOL 322 Plant Identification2 Credits

Identification of the local flora. Basic plant anatomy and morphology.

Includes evolutionary relationships of major plant groups as well as environmental, ecological, and historical constraints on plant distribution.

Prerequisites: BIOL 107/BIOL 107L or BIOL 108/BIOL 108L.

Corequisites: BIOL 322L.

BIOL 322L Plant Identification Laboratory2 Credits

Lab component required for BIOL 322.

Prerequisites: BIOL 107/BIOL 107L or BIOL 108/BIOL 108L.

Corequisites: BIOL 322.

Fees: Yes.

BIOL 331 Insect Biology3 Credits

Insect taxonomy, evolution, ecology, and physiology. Insect collection required. Three lectures and two two-hour laboratories per week.

Prerequisites: BIOL 106/BIOL 106L or BIOL 108/BIOL 108L.

Corequisites: BIOL 331L.

BIOL 331L Insect Biology Laboratory2 Credits

Lab component required for BIOL 331.

Prerequisites: BIOL 106/BIOL 106L or BIOL 108/BIOL 108L.

Corequisites: BIOL 331.

Fees: Yes.

BIOL 333 Marine Biology3 Credits

Study of the principles that govern biological systems in the ocean with an emphasis on the natural history, ecology, and evolution of marine organisms. Three one-hour lectures per week.

Prerequisites: BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L, or permission of instructor.

BIOL 335 Invertebrate Zoology3 Credits

Study of the evolution, morphology, life history, ecology and classification of invertebrates with a focus on non-insect invertebrates. Three one-hour lectures and one two-hour lab per week.

Prerequisites: BIOL 106/BIOL 106L, or permission of instructor.

Corequisites: BIOL 335L.

BIOL 335L Invertebrate Zoology Laboratory1 Credit

Lab component required for BIOL 335.

Prerequisites: BIOL 106/BIOL 106L, or permission of instructor.

Corequisites: BIOL 335.

Fees: Yes.

BIOL 336 Fish Biology3 Credits

Study of the anatomy and physiology of fish. Topics include ecology, fish diseases, and marine and freshwater fishery techniques. Field trips may be offered.

Prerequisites: BIOL 106/BIOL 106L or permission of instructor.

Corequisites: BIOL 336L.

BIOL 336L Fish Biology Laboratory1 Credit

Lab component required for BIOL 336.

Prerequisites: BIOL 106/BIOL 106L or permission of instructor.

Corequisites: BIOL 336.

Fees: Yes.

BIOL 338 Small Mammal Biology3 Credits

Introduction to the life history and taxonomic classification of small mammals. Focus includes the unique constraints and physiological challenges imposed by small body size (less than 5kg).

Prerequisites: Junior or Senior Standing.

Terms Typically Offered: Fall, Summer.

BIOL 343 Immunology3 Credits

Immune system of animals with emphasis on human immune response. Includes the immune organs and both cellular and humoral responses. An independent research project is required.

Prerequisites: BIOL 302, or BIOL 301/BIOL 301L.

BIOL 344 Forensic Molecular Biology3 Credits

Molecular biology and genetics used in forensic investigations, including the genetic basis of diversity and DNA typing techniques.

Prerequisites: BIOL 105/BIOL 105L and CHEM 131/CHEM 131L.

Corequisites: BIOL 344L.

BIOL 344L Forensic Molecular Biology Laboratory1 Credit

Lab component required for BIOL 344.

Prerequisites: BIOL 105/BIOL 105L and CHEM 131/CHEM 131L.

Corequisites: BIOL 344.

Fees: Yes.

BIOL 350 Microbiology3 Credits

Growth, morphology, metabolism, genetics and ecology of microorganisms. Includes aspects of industrial microbiology, clinical microbiology, and genetic engineering. Three lectures and one three-hour laboratory per week.

Prerequisites: BIOL 105/BIOL 105L, and CHEM 121/CHEM 121L or CHEM 131/CHEM 131L.

Corequisites: BIOL 350L.

BIOL 350L Microbiology Laboratory1 Credit

Lab component required for BIOL 350.

Prerequisites: BIOL 105/BIOL 105L, and CHEM 121/CHEM 121L or CHEM 131/CHEM 131L.

Corequisites: BIOL 350.

Fees: Yes.

BIOL 351 Ecological Physiology3 Credits

Diversity of form and function among vertebrates. Emphasizes the evolution of physiological processes to ecological challenges at the organismal level.

Prerequisites: BIOL 106 or BIOL 108.

Corequisites: BIOL 351L.

Terms Typically Offered: Fall.

BIOL 351L Ecological Physiology Laboratory1 Credit

Diversity of form and function among vertebrates. Emphasizes the evolution of physiological processes to ecological challenges at the organismal level.

Prerequisites: BIOL 106 or BIOL 108.

Corequisites: BIOL 351.

Terms Typically Offered: Fall.

Fees: Yes.

BIOL 352 Human Physiology3 Credits

In-depth study of human function. Physiology of major human body systems will be studied at the cellular, tissue, and systemic levels, emphasizing homeostatic mechanisms and integrative function.

Prerequisites: BIOL 105 or BIOL 209.

Corequisites: BIOL 352L.

Terms Typically Offered: Spring.

BIOL 352L Human Physiology Laboratory1 Credit

In-depth study of human function. Physiology of major human body systems will be studied at the cellular, tissue, and systemic levels, emphasizing homeostatic mechanisms and integrative function.

Prerequisites: BIOL 105 or BIOL 209.

Corequisites: BIOL 352.

Terms Typically Offered: Spring.

Fees: Yes.

BIOL 371L Laboratory Investigations in Cellular and Molecular Biology3 Credits

Laboratory exercises and experiments that highlight important topics in cellular and molecular biology. The mechanics of laboratory science are introduced with an emphasis on modern techniques, hypothesis development, data analysis and scientific communication. Two three-hour laboratories per week.

Prerequisites: BIOL 301/BIOL 301L and CHEM 132/CHEM 132L or permission of instructor.

Fees: Yes.

BIOL 385 Nature and Philosophy of Science3 Credits

Central concepts on the nature of scientific knowledge including philosophical tenets that distinguish science from technology as well as distinguish science from pseudoscience. May not be used in the Additional Biology Courses categories for the Biology Concentration.

BIOL 387 Structured Research1-4 Credits

Independent research beyond the scope of the published curriculum. Designed for advanced sophomore and junior level students to participate in research activities under the direction of a specific faculty member.

Prerequisites: Sophomore or junior standing, or permission of instructor. Course may be taken multiple times up to maximum of 6 credit hours.

Fees: Yes.

BIOL 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

BIOL 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BIOL 403 Evolution3 Credits

Organismal and molecular evolution emphasizing its importance as the unifying theory in biology. Evolution of natural selection on genetic structure of populations.

Prerequisites: BIOL 301/BIOL 301L, with BIOL 208/BIOL 208L strongly recommended.

BIOL 405 Advanced Ecological Methods3 Credits

Examination of quantitative methods in population, community, and ecosystems ecology. Extensive writing, computer work and field trips are required. Three lectures and two two-hour laboratories per week.

Prerequisites: BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; STAT 301 is recommended.

Corequisites: BIOL 405L.

BIOL 405L Advanced Ecological Methods Laboratory2 Credits

Lab component required for BIOL 405.

Prerequisites: BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; STAT 301 is recommended.

Corequisites: BIOL 405.

Fees: Yes.

BIOL 406 Plant-Animal Interactions3 Credits

Ecological, evolutionary, and applied approaches to the studies of herbivory, ant-plant interactions, pollination, and seed dispersal.

Prerequisites: BIOL 105/BIOL 105L; BIOL 106/BIOL 106L, BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L; BIOL 331/BIOL 331L is recommended.

BIOL 407 Tropical Field Biology3-5 Credits

Field research techniques, ecology and natural history in lowland and montane tropical rainforests of Ecuador. Ten nine-hour labs and fifteen two-hour lectures conducted at biological field stations in Ecuador.

Prerequisites: BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L; BIOL 331/BIOL 331L is recommended.

BIOL 408 Desert Ecology3 Credits

Overview of desert ecology in the surrounding area and in the United States. Covers ecology of U.S. deserts including specific plant, animal, and human adaptations. Discussion on world deserts. Field trips may be offered.

Prerequisites: BIOL 208/BIOL 208L, and junior or senior standing or permission of instructor.

BIOL 409 Gross and Developmental Human Anatomy2 Credits

Gross anatomy, embryology, radiological and cross-sectional anatomy of the human body via lectures, demonstrations, and dissections of the human cadaver. Emphasis on thorax, abdomen, and extremities. Two lectures and two 2-hour laboratories per week.

Prerequisites: BIOL 209/BIOL 209L, or permission of instructor.

Corequisites: BIOL 409L.

BIOL 409L Gross and Developmental Human Anatomy Laboratory2 Credits

Lab component required for BIOL 409.

Prerequisites: BIOL 209/BIOL 209L, or permission of instructor.

Corequisites: BIOL 409.

Fees: Yes.

BIOL 410 Human Osteology3 Credits

Study of the human skeleton, including osteology and bone detail, biological variation, animal skeletal comparisons, pathology, forensics, and proper handling of human skeletal material. Laboratory emphasizes analysis and identification of human skeletal material. Three lectures and one two-hour laboratory per week.

Prerequisites: BIOL 209/BIOL 209L.

Corequisites: BIOL 410L.

BIOL 410L Human Osteology Laboratory1 Credit

Lab component required for BIOL 410.

Prerequisites: BIOL 209/BIOL 209L.

Corequisites: BIOL 410.

Fees: Yes.

BIOL 411 Mammalogy3 Credits

Evolution, classification, life histories, and ecology of mammals.

Prerequisites: BIOL 106/BIOL 106L or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L.

Corequisites: BIOL 411L.

Terms Typically Offered: Spring.

BIOL 411L Mammalogy Laboratory1 Credit

Evolution, classification, life histories, and ecology of mammals.

Prerequisites: BIOL 106/BIOL 106L or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L.

Corequisites: BIOL 411.

Terms Typically Offered: Spring.

Fees: Yes.

BIOL 412 Ornithology3 Credits

Classification and life history of birds, including field identification.

Overnight and/or weekend field trips may be required. Three lectures and one two-hour laboratory or three-hour field trip per week.

Prerequisites: BIOL 208/BIOL 208L, and upper division standing or permission of instructor.

Corequisites: BIOL 412L.

BIOL 412L Ornithology Laboratory1 Credit

Lab component required for BIOL 412.

Prerequisites: BIOL 208/BIOL 208L, and upper division standing or permission of instructor.

Corequisites: BIOL 412.

Fees: Yes.

BIOL 413 Herpetology3 Credits

Classification, evolution, morphology and ecology of amphibians and reptiles. Overnight or weekend field trips may be required. Three lectures and one two-hour laboratory per week.

Prerequisites: BIOL 208/BIOL 208L, and upper division standing or permission of instructor.

Corequisites: BIOL 413L.

BIOL 413L Herpetology Laboratory1 Credit

Lab component required for BIOL 413.

Prerequisites: BIOL 208/BIOL 208L, and upper division standing or permission of instructor.

Corequisites: BIOL 413.

Fees: Yes.

BIOL 414 Freshwater Ecology3 Credits

Classification, life history, and ecology of aquatic animals. Overnight and/or weekend field trips may be required. Three lectures and one two-hour laboratory or three-hour field trip per week.

Prerequisites: Upper division standing or permission of instructor.

Corequisites: BIOL 414L.

BIOL 414L Freshwater Ecology Laboratory1 Credit

Lab component required for BIOL 414.

Prerequisites: Upper division standing or permission of instructor.

Corequisites: BIOL 414.

Fees: Yes.

BIOL 415 Tropical Ecosystems2 Credits

Ecology of rainforests, grasslands, and desert ecosystems of the world.

Prerequisites: BIOL 105/BIOL 105L, and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L, and BIOL 208/BIOL 208L, or permission of instructor.

BIOL 418 Wildlife Management3 Credits

Examination of wildlife biology and management. Topics covered include managing habitat, mammals, birds, fish, and other small animals. Three one-hour lectures per week.

Prerequisites: BIOL 105/BIOL 105L and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L, and BIOL 208/BIOL 208L or permission of instructor.

Corequisites: BIOL 418L.

BIOL 418L Wildlife Field Techniques2 Credits

Lab component required for BIOL 418.

Prerequisites: BIOL 105/BIOL 105L and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L, and BIOL 208/BIOL 208L or permission of instructor.

Corequisites: BIOL 418

Fees: Yes.

BIOL 419 Fisheries Management3 Credits

Principles and practices of fisheries science and management. Topics addressed include population dynamics, sport fish management and harvest, native species conservation and management, habitat management, policies and regulations, and socioeconomics.

Prerequisites: Junior or senior standing.

Corequisites: BIOL 419L.

Terms Typically Offered: Spring.

BIOL 419L Fisheries Management Laboratory1 Credit

Principles and practices of fisheries science and management. Topics addressed include population dynamics, sport fish management and harvest, native species conservation and management, habitat management, policies and regulations, and socioeconomics.

Prerequisites: Junior or senior standing.

Corequisites: BIOL 419.

Terms Typically Offered: Spring.

BIOL 420 Conservation Biology3 Credits

Study of the biodiversity conservation including ethics, economics, threats, extinction, protected areas and restoration ecology.

Prerequisites: BIOL 208.

Terms Typically Offered: Fall.

BIOL 421 Plant Physiology3 Credits

Plant-water relationships, plant mineral nutrition, photosynthesis, plant growth and development at the molecular and cellular level to account for plant growth at the organismal level. Three lectures and one two-hour laboratory per week.

Prerequisites: BIOL 107/BIOL 107L, CHEM 121/CHEM 121L or CHEM 131/CHEM 131L, or permission of instructor.

Corequisites: BIOL 421L.

BIOL 421L Plant Physiology Laboratory1 Credit

Lab component required for BIOL 421.

Prerequisites: BIOL 107/BIOL 107L, CHEM 121/CHEM 121L or CHEM 131/CHEM 131L, or permission of instructor.

Corequisites: BIOL 421.

Fees: Yes.

BIOL 423 Plant Anatomy3 Credits

Form, variability, and structure of the tissues comprising the body of the higher plant. Three lectures and two two-hour laboratories per week.

Prerequisites: BIOL 107/BIOL 107L or permission of instructor.

Corequisites: BIOL 423L.

BIOL 423L Plant Anatomy Laboratory2 Credits

Lab component required for BIOL 432.

Prerequisites: BIOL 107/BIOL 107L or permission of instructor.

Corequisites: BIOL 423.

Fees: Yes.

BIOL 425 Molecular Genetics3 Credits

Nature and expression of genetic information at the molecular level in prokaryotic and eukaryotic organisms.

Prerequisites: BIOL 301/BIOL 301L.

BIOL 431 Animal Parasitology3 Credits

Common and important parasites of domestic animals and man. Ecology, epidemiology, diagnosis, and control are discussed with examples from the Protozoa, Trematoda, Cestoda, Nematoda, and Arthropoda. An independent research project is required. Three lectures and one two-hour laboratory per week.

Corequisites: BIOL 431L.

BIOL 431L Animal Parasitology Laboratory1 Credit

Lab component required for BIOL 431.

Corequisites: BIOL 431.

Fees: Yes.

BIOL 433 Marine Invertebrate Communities3 Credits

Techniques of collection and laboratory examination of marine invertebrates from intertidal and subtidal habitats. Seven eight-hour labs and seven two-hour lectures will be conducted at a marine biological research station.

Prerequisites: BIOL 106/BIOL 106L, or permission of instructor.

BIOL 441 Endocrinology3 Credits

Anatomy and physiology of the endocrine system of vertebrates.

Prerequisites: BIOL 105/BIOL 105L, CHEM 132/CHEM 132L, and junior or senior standing.

BIOL 442 Pharmacology3 Credits

Principles underlying absorption, distribution, metabolism, and excretion of drugs with emphasis on mechanisms of action and physiological responses.

Prerequisites: BIOL 209/BIOL 209L, one year of chemistry, and junior or senior standing.

BIOL 450 Mycology3 Credits

Fungi, with emphasis on comparative morphology and development, classification, physiology, genetics, and ecological relationships. Importance of fungi in industry, agriculture, and medicine. Three lectures and two two-hour laboratories per week.

Prerequisites: BIOL 107/BIOL 107L or permission of instructor.

Corequisites: BIOL 450L.

BIOL 450L Mycology Laboratory2 Credits

Lab component required for BIOL 450.

Prerequisites: BIOL 107/BIOL 107L or permission of instructor.

Corequisites: BIOL 450.

Fees: Yes.

BIOL 482 Senior Research2 Credits

Designed to introduce students to appropriate procedures for conducting literature reviews, designing experiments, collecting and analyzing data, and preparing written and oral presentations of such experiments. Two lectures per week or equivalent.

Prerequisites: Senior standing, 2.80 GPA, and permission of instructor.

BIOL 483 Senior Thesis2 Credits

Students prepare an in-depth thesis elaborating on a major conceptual issue(s) in biology. The purpose of the thesis is to ascertain the student's ability to collect a broad array of information and integrate this into a logical conceptual framework that traverses organizational levels of living systems. The thesis topic must be approved by the instructor.

Prerequisites: Senior standing and permission of instructor.

BIOL 487 Advanced Research1-3 Credits

Provides students with an individualized research experience on a topic approved and directed by a specific faculty member. A detailed report in the form of a scientific journal article must be provided to the instructor.

Prerequisites: BIOL 482 or permission of instructor; BIOL 387 is highly recommended.

Course may be taken multiple times up to maximum of 6 credit hours.

Fees: Yes.

BIOL 493 Lab Teaching Practicum1 Credit

Assist in laboratory teaching to support instruction and enhance student learning.

Prerequisites: Junior or senior standing or permission of instructor. Must have taken the course to be supported or have sufficient experience in other related courses.

Course may be taken multiple times up to maximum of 3 credit hours.

BIOL 494 Seminar1 Credit

Current problems, topics, and research procedures in biological sciences and medicine. Topics announced each semester.

Prerequisites: Sophomore standing and permission of instructor.

Course may be taken 5 times for credit.

BIOL 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

BIOL 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BIOL 499 Internship1-10 Credits

Work experience obtained on a job where assignments are primarily biological projects. The amount of credit awarded is determined by the school based on the nature of the assignment.

Prerequisites: Biology major, senior standing with either a 2.80 GPA in major courses, completion of BIOL 482, or permission of instructor.

Course may be taken multiple times up to maximum of 15 credit hours.

BIOL 500 Advanced Human Anatomy3 Credits

Introduction to advanced concepts in gross anatomy, anatomical relationships, and spatial orientation of normal anatomic structures and common anatomic variations. Examines the forms and function of the human body and the relationship of surface and internal structures from different bodily systems.

Prerequisites: Graduate student status.

Corequisites: BIOL 500L.

Terms Typically Offered: Spring.

BIOL 500L Advanced Human Anatomy Laboratory1 Credit

Laboratory experience accompanying BIOL 500.

Prerequisites: Graduate student status.

Corequisites: BIOL 500.

Terms Typically Offered: Spring.

Fees: Yes.

BIOL 507 Tropical Field Biology5 Credits

Field research techniques, ecology and natural history in lowland and montane tropical rainforests of Ecuador. Ten nine-hour labs and fifteen two-hour lectures conducted at biological field stations in Ecuador.

Prerequisites: Undergraduate degree in biology or undergraduate degree in another field with primary or secondary teaching experience in science, and permission of instructor.

BIOL 533 Marine Invertebrate Communities3 Credits

Techniques of collection and laboratory examination of marine invertebrates from intertidal and subtidal habitats. Design and execution of a research project and a written paper are required. Seven eight-hour labs and seven two-hour lectures will be conducted at a marine biological research station.

Prerequisites: Undergraduate degree in biology or a related field and permission of instructor.

BIOL 596 Topics:1-5 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Business (BUGB)

BUGB 101 Introduction to Business3 Credits

American business system operations in the economy, business functions, and interrelations between the businessman and his environment.

Prerequisites: Can be taken for credit only by students who have completed fewer than 15 credit hours of BUGB, ACCT, HMG, MANG, MARK, OFAD, CISB, or FINA courses.

BUGB 101A Introduction to Business: Part 1 of 31 Credit

Introduction to management, supervision, motivation, supervision and the processes of recruiting personnel in the workplace.

BUGB 101B Introduction to Business: Part 2 of 31 Credit

Introduction to marketing, pricing, quality customer service, social responsibility and ethics in the workplace.

BUGB 101C Introduction to Business: Part 3 of 31 Credit

Introduction to financial statements, financial management, and budgeting in the workplace.

BUGB 105 Freshman Business Seminar3 Credits

Overview of the Colorado Mesa University Business Department for prospective majors. Operational strategies and teamwork are developed via cases and projects. Students will gain exposure to all functional business areas through readings, discussions, and presentations. Cannot be taken for credit by students who have completed more than 15 credit hours of business courses.

BUGB 141 Business Mathematics3 Credits

Fundamental review of whole numbers, decimals, and fractions.

Emphasis is placed on percentage applications to solving various business problems in the areas of buying and selling merchandise, inventory computations, interest computations on notes and savings, consumer credit and installment computation, home mortgage loans, and business depreciation computations.

BUGB 211 Business Communications3 Credits

Development of a non-defensive, supportive, communication system effectively applied to interpersonal and written transactions within the business organization.

Prerequisites: ENGL 111.

BUGB 211A Business Communications: Part 1 of 31 Credit

Introduction to business communications, planning and writing messages and reports.

BUGB 211B Business Communications: Part 2 of 31 Credit

Introduction to effective communications in business, including presentations and routine, negative and persuasive messages.

BUGB 211C Business Communications: Part 3 of 31 Credit

Introduction to the roles of personal styles, cultures and teams in business communications.

BUGB 221 Insurance3 Credits

Common types of protection offered by insurance, including fire, theft, comprehensive, life, automobile, accident, and health. Emphasis on application of insurance to individuals and small business firms.

BUGB 231 Survey of Business Law3 Credits

Application of law as it applies to individuals and businesses including foundations of the American legal system, legal entities and government regulations, property law, contracts and sales, negotiable instruments, agency and employment law, torts, labor law, international business law and the social environment of business. No credit allowed for degrees from Department of Business if credit already established in BUGB 351.

BUGB 249 Personal Finance: The Business of Life3 Credits

Development of financial and economic literacy to improve personal decision making in the areas of: personal budgeting; developing a personal financial plan including consumer credit, taxes and purchasing a home; money and interest rates; the market economy; free enterprise and competition; and the consequences of externalities, public goods and increasing costs in the service sector.

BUGB 293 Cooperative Education3-6 Credits

Practical workplace experience under the joint supervision of the employer and the internship coordinator. Designed for non-business majors working in the business environment. Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 349 Legal Environment of Business3 Credits

Legal framework of business including foundations of the American legal system, anti-trust law, property law, contracts and sales, negotiable instruments, agency relationships, torts, labor law, international business law and the social environment of business.

Prerequisites: Junior or senior standing or permission of instructor.

BUGB 351 Business Law I3 Credits

Law and legal reasoning. Court systems, constitutional law, business ethics, torts, criminal law, intellectual property, privacy, internet and cyber law. Contracts, sales, product liability, and agency and employment law.

BUGB 352 Business Law II3 Credits

Business entities (formation, financing and regulation). Securities law and corporate governance, negotiable instruments; creditors' rights and bankruptcy.; administrative, consumer and environmental law. Real and personal property; insurance; wills and trusts, and professional liability.

Prerequisites: BUGB 351 or permission of instructor.

BUGB 393 Cooperative Education3-9 Credits

Cooperative Education internships provide non-business students an opportunity to put their education to practical use in the workplace under the joint supervision of an organization-based supervisor and a Colorado Mesa University faculty coordinator. Written consent of coordinator required prior to registration.

Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

BUGB 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 401 International Business3 Credits

Current international topics in the disciplines of finance, management, and marketing. Concepts, analytical tools, and models are introduced to help explain the diversity and complexity of the international business environment.

Prerequisites: Senior standing.

BUGB 405 Big Questions in Business3 Credits

Application of the requisite business skill of critical thinking as it pertains to major issues in business.

Prerequisites: Senior standing.

BUGB 435 Emerging Markets3 Credits

Traditional challenges to global product development and marketing in the world's emerging economies. Commonalities of differing regions and economic systems. Cultural and economic differences. A macro look at emerging economies. Micro applications of new emerging world markets.

Prerequisites: Business Foundation Courses.

BUGB 440 Business Ethics3 Credits

Examination of the nature and role of ethics in the business environment.

BUGB 493 Cooperative Education3-12 Credits

See description of BUGB 393.

Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

BUGB 496 Topics1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 500 Advanced Business Law and Ethics3 Credits

Emphasizes the regulations, statutes and cases that impact business on a daily basis. Topics covered include contract law, negotiations, labor law, the Uniform Commercial Code, and the law of business organizations to include limited liability companies.

BUGB 510 Global Business3 Credits

Explores international management concepts and procedures and their importance to modern managers. Operating in multi-national, multi-cultural managerial environment, the modern manager must understand business and management from a global perspective. Emphasis is placed on comparing and contrasting management practices in different nation-states and how this might affect decisions concerning risk, investment, human resources, finances, operations, manufacturing and production in a multi-national business.

BUGB 520 Seminar in Current Business Topics1-6 Credits

Develops topics of current interest in the business world. Areas included are effective communication strategies, ethics, and the global dimension of business.

Course may be taken 4 times for credit.

BUGB 530 Research Design3 Credits

Examines the design of research projects. Topics will include selection of the problem, secondary data, historical research, descriptive research, experimental research, the tools of research, and interpretation of data.

Prerequisites: Permission of instructor and permission of MBA Director.

BUGB 575 Healthcare Systems3 Credits

Examination of healthcare systems, their history, and their evolution. Comparison of U.S. healthcare systems to those of other countries and exploration of the concept of population health and the American consumer.

Prerequisites: Enrolled in MBA Healthcare Administration Track.

Terms Typically Offered: Spring, Summer.

BUGB 576 Healthcare by the Numbers3 Credits

Practical knowledge of healthcare finance, budgeting, and reimbursement models for non-financial healthcare managers. Application of this information in executive decision-making.

Prerequisites: Enrolled in MBA Healthcare Administration Track.

Terms Typically Offered: Fall, Summer.

BUGB 577 Managing Qualitative Issues in Healthcare Organizations3 Credits

Management of qualitative issues in healthcare organizations. Topics include: past and future trends in providers' programs and information systems; elements of ethical compliance and governing processes; quality improvement through support of compliance processes and procedures; risk identification and mitigation strategies; and application of the SWOT (Strength-Weaknesses-Opportunities-and-Threats) approach to review quality and risk issues.

Prerequisites: Enrolled in MBA Healthcare Administration Track.

Terms Typically Offered: Fall, Spring.

BUGB 590 MBA Thesis I3 Credits

Prerequisites: Completion of approved research design and methods course and permission of MBA Director.

BUGB 592 MBA Thesis II3 Credits**BUGB 593 Capstone3 Credits**

Development of a comprehensive project that demonstrates the ability to identify, scope, and research a business-related issue and provide plausible recommendations.

Prerequisites: Permission of the MBA Coordinator.

Terms Typically Offered: Spring.

BUGB 595 Research Practicum3 Credits

Application of classroom theory and research methods to on-the-job experiences.

Prerequisites: BUGB 530 and permission of the MBA Director.

Course may be taken multiple times up to maximum of 6 credit hours.

BUGB 596 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 599 Internship3 Credits

Intern within an organization engaged in various strategic management functions.

Prerequisites: MBA major; written permission of MBA advisor and MBA Coordinator prior to registration.

Terms Typically Offered: Fall, Spring, Summer.

Chemistry (CHEM)

CHEM 100 Chemistry and Society-GTSC23 Credits

Introduction to selected topics in chemistry with particular attention to chemistry in society. Minimal use of elementary mathematics is required.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

CHEM 111 Introduction to Concepts of General Chemistry3 Credits

Introduction to concepts of General Chemistry. Designed as a preparatory course for CHEM 131. Topics include dimensional analysis, review of relevant algebra skills, basic atomic structure, molecular structure and shape, nomenclature, and stoichiometry.

Essential Learning Categories: Natural Sciences

Terms Typically Offered: Fall, Spring.

CHEM 121 Principles of Chemistry-GTSC14 Credits

Introduction to fundamental principles of chemistry. Designed for students planning a non-science major. Topics include atomic structure, bonding, periodic table, gas laws, mass relationships, solution theory, oxidation-reduction, electrochemistry, and ionic equilibrium. Four lectures and one three-hour lab per week.

Prerequisites: Mastery of high school algebra.

Corequisites: CHEM 121L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

CHEM 121L Principles of Chemistry Laboratory-GTSC11 Credit

Lab component required for CHEM 121.

Prerequisites: Mastery of high school algebra.

Corequisites: CHEM 121

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

CHEM 122 Principles of Organic Chemistry-GTSC14 Credits

Introduction to the chemical and physical properties of selected classes of organic compounds. Four lectures and one three-hour laboratory per week.

Prerequisites: CHEM 121/CHEM 121L or CHEM 131/CHEM 131L or one year of high school chemistry and permission of instructor.

Corequisites: CHEM 122L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

CHEM 122L Principles of Organic Chemistry Laboratory-GTSC11 Credit

Lab component required for CHEM 122.

Prerequisites: CHEM 121/CHEM 121L or CHEM 131/CHEM 131L or one year of high school chemistry and permission of instructor.

Corequisites: CHEM 122.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

CHEM 123 Introduction to Environmental Chemistry4 Credits

Application of basic chemistry principles to the environment. Topics include aquatic and atmospheric chemistry, biogeochemical cycling of the elements required for life and structural organic chemistry as it applies to the physical and biological properties of persistent organic pollutants.

Prerequisites: CHEM 131/CHEM 131L.

Terms Typically Offered: Spring.

CHEM 131 General Chemistry I-GTSC14 Credits

Fundamental principles of chemistry. Designed for students planning a major in science. Topics include dimensional analysis, atomic and molecular structure, stoichiometry, simple chemical reactions, thermochemistry, and gases.

Prerequisites: One year of high school chemistry, mastery of algebra, and a passing score on the chemistry assessment exam; Students without an appropriate chemistry assessment exam score should take CHEM 111; CHEM 111 or CHEM 121 may be substituted for an appropriate assessment score.

Corequisites: CHEM 131L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

CHEM 131L General Chemistry Laboratory I-GTSC11 Credit

Fundamental principles of chemistry. Designed for students planning a major in science. Topics include dimensional analysis, atomic and molecular structure, stoichiometry, simple chemical reactions, thermochemistry, and gases.

Prerequisites: One year of high school chemistry, mastery of algebra, and a passing score on the chemistry assessment exam; Students without an appropriate chemistry assessment exam score should take CHEM 111; CHEM 111 or CHEM 121 may be substituted for an appropriate assessment score.

Corequisites: CHEM 131.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CHEM 132 General Chemistry II-GTSC14 Credits

Continuation of the material in CHEM 131. Topics include states of matter, solutions, kinetics, equilibrium, thermodynamics, and electrochemistry.

Prerequisites: CHEM 131/CHEM 131L or CHEM 151/CHEM 151L.

Corequisites: CHEM 132L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

CHEM 132L General Chemistry Laboratory II-GTSC11 Credit

Laboratory course to accompany CHEM 132. Designed for students planning a major in science. Freshman-level chemistry laboratory techniques will continue to be introduced. Experimental topics include: identification of chemical unknowns by qualitative analysis, colligative properties, acid-base titration, reaction kinetics, equilibrium constant determinations, and electrochemistry. Four lectures and one three-hour laboratory per week.

Prerequisites: CHEM 131/CHEM 131L or CHEM 151/CHEM 151L.

Corequisites: CHEM 132.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

CHEM 151 Engineering Chemistry-GTSC14 Credits

General chemistry for engineering majors. Topics include stoichiometry, thermodynamics, states of matter, acids and bases, oxidation-reduction, equilibrium, and kinetics. Examples and problems chosen to illustrate the application of chemistry to engineering.

Prerequisites: MATH 113 or higher or concurrently enrolled in MATH 119, MATH 119B, MATH 135, or MATH 151; CHEM 111 or a passing score on the chemistry placement exam.

Corequisites: CHEM 151L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

CHEM 151L Engineering Chemistry Laboratory-GTSC11 Credit

Laboratory course to accompany CHEM 151. Freshman-level chemistry laboratory techniques will be introduced. Experimental topics include basic measurement techniques, stoichiometry, chemical reaction observation, titrations, and reaction kinetics.

Prerequisites: MATH 113 or concurrently enrolled in MATH 119, MATH 119B, MATH 135, or MATH 151; CHEM 111 or passing score on the chemistry assessment exam.

Corequisites: CHEM 151.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CHEM 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CHEM 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CHEM 300 Environmental Chemistry4 Credits

Aquatic and atmospheric chemistry. Basic chemical, physical and biological properties of organic pollutants. Topics include smog formation, stratospheric ozone depletion, greenhouse gases, acid mine waste formation, biogeochemistry, and bioaccumulation of halogenated organics.

Prerequisites: CHEM 122/CHEM 122L or CHEM 132/CHEM 132L.

CHEM 301 Analytical Chemistry3 Credits

Classical and instrumental methods of quantitative chemical analysis. Includes statistical treatment of experimental data, method characterization and validation, equilibrium, titrations, electrochemistry, spectroscopy, mass spectrometry, and chromatography.

Prerequisites: CHEM 132/CHEM 132L.

Corequisites: CHEM 301L.

CHEM 301L Analytical Chemistry Laboratory1 Credit

Lab component required for CHEM 301.

Prerequisites: CHEM 132/CHEM 132L.

Corequisites: CHEM 301.

Fees: Yes.

CHEM 311 Organic Chemistry I4 Credits

This course is the first semester of a two-semester introduction to basic organic chemistry. The nomenclature, structure, properties, and reactions of important classes of organic compounds are examined. The relationship of structure and bonding in organic compounds to reactivity is emphasized. Reactions are examined from mechanistic and synthetic perspectives.

Prerequisites: CHEM 132/CHEM 132L.

Corequisites: CHEM 311L.

CHEM 311L Organic Chemistry I Laboratory1 Credit

This lab is the first semester of a two-semester sequence. It introduces common organic lab techniques (including chromatography, extraction, recrystallization, and distillation) used for separating and analyzing organic compounds.

Prerequisites: CHEM 132/CHEM 132L.

Corequisites: CHEM 311.

Fees: Yes.

CHEM 312 Organic Chemistry II4 Credits

This course is the second semester of a two-semester introduction to basic organic chemistry. The nomenclature, structure, properties, and reactions of important classes of organic compounds are examined. The relationship of structure and bonding in organic compounds to reactivity is emphasized. Reactions are examined from mechanistic and synthetic perspectives. Spectroscopic analysis of organic compounds is also introduced.

Prerequisites: CHEM 132/CHEM 132L or permission of instructor.

Corequisites: CHEM 312L.

CHEM 312L Organic Chemistry II Laboratory1 Credit

This lab is the second semester of a two-semester sequence. Common organic lab techniques, including spectroscopy, are used to carry out and analyze organic reactions.

Prerequisites: CHEM 132/CHEM 132L or permission of instructor.

Corequisites: CHEM 312.

Fees: Yes.

CHEM 315 Biochemistry I3 Credits

Classical biochemistry concerned with the application of chemical principles to biological systems. Topics covered include: organic reactions in living cells, thermodynamics, water, acids and bases, and structural-functional relationships of carbohydrate, lipid, protein, and nucleic acid monomers and polymers.

Prerequisites: CHEM 312/CHEM 312L.

Terms Typically Offered: Fall.

CHEM 316 Biochemistry II3 Credits

Continuation of fundamental biochemical principles, focused upon metabolism. Topics include: intersection of reciprocal regulation of catabolism and anabolism, citric acid cycle, oxidative phosphorylation, and intersections of carbohydrate, amino acid, nucleotide, and lipid metabolism.

Prerequisites: CHEM 315.

Terms Typically Offered: Spring.

CHEM 317L Biochemistry Laboratory1 Credit

Laboratory investigation of fundamental applications of biochemistry. Techniques focus upon industrially-relevant purification and characterization of functional biomolecules and biomacromolecules.

Prerequisites: CHEM 315 (may be taken concurrently); CHEM 312/CHEM 312L; and BIOL 105/BIOL 105L.

Terms Typically Offered: Fall.

CHEM 321 Physical Chemistry I3 Credits

Principles of chemical thermodynamics and kinetics. Includes study of the kinetic theory of matter, first and second laws of thermodynamics, state functions, thermochemistry, entropy, free energy, chemical potential, phase transitions, chemical equilibria, and the rates and mechanisms of chemical reactions.

Prerequisites: CHEM 132/CHEM 132L or CHEM 151/CHEM 151L; and MATH 152; and PHYS 111/PHYS 111L or PHYS 131/PHYS 131L.

CHEM 322 Physical Chemistry II3 Credits

An introduction to the quantum theory of atoms, molecules, and chemical bonding for chemists. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also introduces the principles of statistical mechanics with application to molecules.

Prerequisites: CHEM 132/CHEM 132L or CHEM 151/CHEM 151L; and MATH 253 (may be taken concurrently); and PHYS 111/PHYS 111L or PHYS 131/PHYS 131L.

CHEM 341 Advanced Laboratory I2 Credits

Experiments from analytical, inorganic, organic, physical, and biological chemistry designed to show the application of theory to chemical problems. In addition to a list of possible core experiments, each student chooses other experiments according to individual interests. Two three-hour laboratories per week.

Prerequisites: CHEM 301/CHEM 301L; CHEM 312/CHEM 312L; and CHEM 321.

Corequisites: CHEM 442.

Fees: Yes.

CHEM 351 Inorganic Chemistry I3 Credits

Study of periodic trends and bonding throughout the periodic table. Includes periodic properties, advanced electron-dot diagrams, VSEPR, symmetry, group theory, molecular orbital diagrams, electron counting, and basic nomenclature.

Prerequisites: CHEM 312 (may be taken concurrently).

CHEM 352 Inorganic Chemistry II3 Credits

Application of periodic trends and high level bonding concepts to main group, solid state, organometallic, and advanced coordination chemistries. Includes acid-base chemistry, donor-acceptor chemistry, crystalline solids, ligand field stabilization energy, Jahn-Teller Effects, pi-bonding ligands, reaction pathways at transition metal centers, and catalysts.

Prerequisites: CHEM 351.

CHEM 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CHEM 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CHEM 397 Structured Research1-3 Credits

Chemical research guided by a faculty member. Sophomore through senior levels.

Prerequisites: Permission of instructor.

Course may be taken multiple times up to maximum of 4 credit hours.

CHEM 421 Advanced Organic Chemistry I3 Credits

Selected topics in organic chemistry are discussed in detail.

Prerequisites: CHEM 312 and CHEM 322.

CHEM 422 Advanced Organic Chemistry II3 Credits

Similar in content to CHEM 421, but without overlap in topics. CHEM 421 is not a prerequisite for CHEM 422.

Prerequisites: CHEM 312 and CHEM 322.

CHEM 431 Instrumental Analysis3 Credits

Modern instrumental methods of analysis. Topics include signals and noise, atomic spectroscopy, molecular spectroscopy, electroanalytical chemistry and chromatographic separation methods. Three lectures and one 3-hour laboratory per week.

Prerequisites: CHEM 301/CHEM 301L.

Corequisites: CHEM 431L.

CHEM 431L Instrumental Analysis Laboratory1 Credit

Lab component required for CHEM 431.

Prerequisites: CHEM 301/CHEM 301L.

Corequisites: CHEM 431.

Fees: Yes.

CHEM 442 Communicating in the World of Chemistry1 Credit

Study and application of communication skills necessary for careers in chemistry-related fields. Includes laboratory notebooks, chemical publications, cover letters, resumes, and formal oral presentations.

Corequisites: CHEM 341.

CHEM 487 Formal Research1-3 Credits

Chemical research guided by a faculty member. Results presented as a formal scientific paper in a format suitable for publication. Topics include laboratory notebooks, independent research, and formal reporting of research.

Course may be taken multiple times up to maximum of 4 credit hours.

CHEM 494 Seminar1 Credit

Student, faculty, and other speakers present a variety of topics in chemistry and related fields.

Prerequisites: Chemistry major with senior standing or permission of instructor.

CHEM 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CHEM 496 Topics3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CHEM 497 Structured Research1-3 Credits

Chemical research guided by a faculty member. Senior level.

Prerequisites: Permission of instructor.

Course may be taken multiple times up to maximum of 4 credit hours.

CHEM 596 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Civil Engineering (CIVE)

CIVE 127 Engineering Drawing for Civil Engineering3 Credits

Exploration of linetypes, symbols, and drawing and dimensioning standards by generating drawings using drafting instruments and computer-aided-drafting (CAD). Drawings start with basic sketching on the board and continue through 3-D solid modeling on CAD. Print reading includes interpretation of site, foundation, floor, and roof plans, as well as elevations and sections.

Terms Typically Offered: Fall.

CIVE 212 Introduction to Geomatics3 Credits

Introduction to basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology.

Prerequisites: MATH 151 or MATH 135.

Terms Typically Offered: Fall.

CIVE 313 Theoretical Fluid Mechanics3 Credits

Basic principles of fluid mechanics. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits.

Prerequisites: ENGR 261.

CIVE 397 Structured Research1-3 Credits

Computer Aided Drafting (CADT)

CADT 101 Introduction to Computers1 Credit

Introduction to hardware and software including operating systems, word processing, spreadsheets, desktop publishing and presentation software.

CADT 105 Print Reading - Residential, Commercial, Industrial3 Credits

Reading and interpreting blueprints for residential, commercial, and industrial construction, including site plans. How to do a project take-off and project site layout.

CADT 106 Computer Aided Design3 Credits

Basic principles of computer aided design through the development of practical drawing problems using a computer. One one-hour lecture and two one and one-half laboratories per week.

Fees: Yes.

CADT 107 Advanced Computer Aided Design3 Credits

Advanced work in computer aided drafting principles including 2-D, 3-D, shading, etc. One one-hour lecture and two one and one-half hour laboratories per week.

Prerequisites: CADT 106, or permission of instructor.

Fees: Yes.

CADT 108 CAD - Mechanical3 Credits

Offers the student basic principles of computer aided drafting through the development of practical drawing problems using CAD software on the computer. One one-hour lecture and two one and one-half laboratories per week.

Fees: Yes.

CADT 109 CAD-Mechanical Engineering3 Credits

Advanced work in computer aided drafting principles including 2-D and 3-D shading, solid based modeling and parametric modeling. One one-hour lecture and two one and one-half hour laboratories per week.

Fees: Yes.

CADT 110 CAD Application4 Credits

This course offers the student an opportunity to apply skills and knowledge gained in earlier courses. The student will work on computer aided drawings relating to their career field of interest and advice of faculty. Internship or cooperative education may be substituted with approval of advisor. Two one-hour lectures and two one and one-half hour laboratories per week.

Prerequisites: CADT 107 and CADT 109.

Fees: Yes.

CADT 130 CAD-Civil3 Credits

Civil drafting will explore the aspects of current day mapping and topography, instruments, conventions and practices, contours, traverses, profiles, surveying, and photogrammetry through CAD drawings. Students will be introduced to GIS, graphical interface systems. One one-hour lecture and two one and one-half hour laboratories per week.

Fees: Yes.

CADT 135 CAD Civil I/3 Credits

Exploration of advanced aspects of current day mapping and topography. An in-depth instruction on road plan and profiles, cut and fill techniques and further instruction using skills from CADT 130.

Prerequisites: CADT 130.

Fees: Yes.

CADT 140 Architectural Theory and Structural Materials3 Credits

Elementary design strategies, theories and methods for architectural documents. Students will use appropriate computer software to meet professional standards, apply properties of architectural components and materials to develop buildable assemblies, and analyze an architectural process drawing for compliance. Codes, standards, and testing will be emphasized, including an introduction to mechanical, electrical, plumbing and systems requirements.

Fees: Yes.

CADT 141 Structural Materials3 Credits

This course will identify the properties and applications of the materials of industry. Codes, standards and testing will be emphasized in the fields of architecture. There will be an introduction to mechanical, electrical, plumbing and systems requirement.

Corequisites: CADT 140 and CADT 142.

CADT 142 CAD - Residential Architecture3 Credits

Residential Architectural CAD will provide the student with a realistic residential project that will begin with schematic design and take him/her through to construction documents. Construction documents will include: site plan, floor plan, exterior elevations, foundation plan, floor framing plan, roof framing plan, building section, and a variety of construction details. One one-hour lecture and two one and one-half hour laboratories per week.

Fees: Yes.

CADT 143 CAD-Commercial Architecture3 Credits

Commercial Architectural CAD will emphasize the creation of commercial project plans that will begin with schematic design and continue through to construction documents. Construction documents will include site plan, foundation floor slab plan, roof framing plan, building section and a variety of construction details. One one-hour lecture and two one and one-half hour laboratories per week.

Fees: Yes.

CADT 150 Advanced Images - Introduction to Animation4 Credits

Advanced work in computer aided drafting principles including 3-D renderings and animation techniques. One one-hour lecture and two one and one-half hour laboratories per week.

Fees: Yes.

CADT 195 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CADT 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CADT 210 Project3 Credits

Exploration of computer aided drawings relating to Building Information Modeling. Teaches the concepts and principles of creating 3D parametric models of mechanical, electrical and plumbing systems from engineering design through construction documentation.

Fees: Yes.

CADT 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Computer Information Systems (CISB)

CISB 101 Business Information Technology3 Credits

Introduction to computing and software, including computing systems in a business environment and applicable software.

CISB 205 Advanced Business Software3 Credits

Use of electronic spreadsheets and database management software. Lectures, demonstrations, and hands-on projects. Developing customized applications with macros in spreadsheets. Creating tables, reports, forms, and queries to creating appropriate relationships and developing customized database software applications.

CISB 206 Introduction to Business Application Programming3 Credits

Beginning programming with emphasis on solving problems in the context of business applications.

CISB 210 Fundamentals of Information Systems3 Credits

Exploration of information systems in a business environment. Use of information systems to improve business processes and organizational goals. Introduction to hardware, software, ethical issues, career opportunities, and organizational uses of information systems.

CISB 211 Introduction to Cybersecurity3 Credits

Introduction to cybersecurity in a business environment. Topics include policy and governance, frameworks, risk and asset management, data loss prevention, access control management, and cybersecurity incident response.

Terms Typically Offered: Fall.

CISB 221 Introduction to Digital Forensics3 Credits

Introduction to computer and digital forensics. Topics include network, hardware, and operating principles of computers and mobile devices, as they pertain to digital forensics and cybersecurity investigations. Special application on applying digital forensics principles to real world case studies.

Terms Typically Offered: Spring.

CISB 241 Introduction to Business Analysis3 Credits

Introduction to descriptive, predictive, and inferential analysis techniques with business applications. Topics include summarizing data graphically and numerically; elementary probability; discrete and continuous probability distributions; sampling distributions; intervals and tests for one and two samples; correlation and regression; chi-squared tests; and one-way analysis of variance. Appropriate business and statistical software will be used.

Prerequisites: MATH 113 or higher.

Equivalent Course(s): STAT 241

Terms Typically Offered: Fall, Spring.

CISB 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CISB 305 Solving Problems Using Spreadsheets3 Credits

Critical analysis and problem solving using tools in spreadsheets. Decision support utilizing spreadsheet tools covered by hands-on cases, book tutorials and lecture materials. Structured problems, semi-structured problems and what-if scenarios explored.

CISB 306 Solving Problems Using Databases3 Credits

For students who have minimal background in databases. Assists in understanding the importance of data management in organizations through hands-on experience in solving business problems using relational database management software.

CISB 309 Enterprise Systems3 Credits

Theoretical and practical issues of enterprise systems within organizations. Demonstrates how enterprise systems integrate information and organizational processes across functional areas with a unified system comprised of a single database and shared reporting tools.

Prerequisites: CISB 210.

CISB 311 Fundamentals of Cloud Security3 Credits

Introduction to cloud-based cybersecurity and related concepts. Topics include architectural concepts and design requirements, cloud data security, cloud platform and infrastructure security, cloud application security, and cloud computing legal compliance. Special application on applying learned principles to real world case studies.

Prerequisites: CISB 211.

Terms Typically Offered: Fall.

CISB 315 Information Systems Infrastructure3 Credits

Information systems infrastructure, computer architecture and communications networks in an organizational context.

Prerequisites: CISB 210.

CISB 331 Advanced Business Programming3 Credits

Procedural and object-oriented software engineering methodologies using modern business languages. Emphasis on data definition and measurement, record and file processing, report generation and other traditional business information systems applications using modern methods of top-down, structured design. Other concepts include developing screen editors, abstract data types, and data structures including sequential, random and indexed files.

Prerequisites: CISB 206 or CSCI 110.

CISB 341 Quantitative Decision Making3 Credits

Application of inferential statistics to realistic business situations; use of quantitative tools to enhance business decision-making ability. Descriptive statistics for data summarization, probability theory, distributions, estimation, and index numbers with emphasis on hypothesis testing, analysis of variance, regression/correlation, time series, and introduction to operations research and linear programming.

Prerequisites: MATH 113 or higher, and CISB 241 or STAT 241.

CISB 342 Data Mining and Visualization3 Credits

Application of data mining and visualization tools to business related data sets. Using a blend of data mining and visualization techniques, hands-on experience will be gained in discovering how data can inform the business decision-making process.

Prerequisites: CISB 205, CISB 241 or STAT 241, and CISB 341.

Terms Typically Offered: Fall.

CISB 343 Big Data Analytics3 Credits

Analysis of large data sets for emergent patterns using modern software tools. Topics can include: NoSQL, cloud computing, and text mining tools.

Prerequisites: CISB 205, CISB 241 or STAT 241, and CISB 341.

Terms Typically Offered: Fall.

CISB 393 Cooperative Education3-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CISB 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CISB 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CISB 410 Project Management3 Credits

Processes, techniques and tools of project management. Evaluating, initiating, planning, staffing, executing, controlling, and closing projects using project management software.

Prerequisites: CISB 210 is a prerequisite or corequisite if the student has reached junior status.

CISB 442 Systems Analysis and Design3 Credits

Analysis and logical design of information systems. Practice in project management during team-oriented analysis and design of a departmental level system.

Prerequisites: CISB 210, CISB 309, CISB 315 (may be taken concurrently), CISB 410, and CISB 206 or CSCI 110 or CSCI 111, or permission of instructor.

CISB 451 Database Administration3 Credits

Continuation of CISB 442 Systems Analysis and Design. Covers development and implementation of conceptual and detailed physical system design using proper database tools and methods.

Prerequisites: CISB 205, CISB 442, and ACCT 202.

CISB 460 Electronic Commerce Systems3 Credits

Comprehensive examination of electronic commerce, how it is conducted and managed, and its opportunities, limitations, issues and risks.

Coverage of technological infrastructure that supports e-commerce systems, plus the implications of such systems in the business environment. Exercises include exploration of e-commerce web sites and features, plus discussion and demonstration of state-of-the art e-commerce tools.

Prerequisites: CISB 210 or permission of instructor.

CISB 470 Management of Information Systems3 Credits

Reviews the development of analyzing information use by organizations with different types of information systems. The conceptual foundations of information systems and the development, operation, management, uses, parties, control, structure, and impact of these systems will be addressed. Analysis and design of information systems is stressed through case study projects, emphasizing the role of computing in information systems and design of computer-based systems, expert systems, decision support systems and executive information systems.

Prerequisites: Junior or senior status.

CISB 471 Advanced Information Systems3 Credits

Capstone course for the BS in CISB and the BAS in CISB. Integrates management information needs, decision-making criteria, and design of interactive user interfaces. Design and development of computerized management control systems for major functional modules of an organization will be investigated using database management systems, distributed processing, and structured systems development.

Prerequisites: CISB 210, CISB 331, CISB 410, CISB 442, CISB 451, and CISB 470.

Terms Typically Offered: Spring.

CISB 491 Directed Readings in Computer Information Systems1-3 Credits

Study of a leading edge topic within Computer Information Systems under direction of CIS faculty. Prior to registering, the student must meet with the CIS instructor to determine a topic and a method for reporting.

For each credit hour registered, the student will read and report on at least 200 pages of scholarly readings.

Prerequisites: CIS major, junior or senior status, and permission of instructor.

CISB 493 Cooperative Education3-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CISB 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CISB 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CISB 500 Management of Information Systems3 Credits

Reviews the development of an overall framework for analyzing the use of information by organizations along with examples of different types of information systems. The conceptual foundations of information systems and the development, operation, management, uses, parties, control, structure, and impact of these systems will be addressed. The analysis and design of information systems is stressed through case study and projects, emphasizing the role of computing in information systems and design of computer-based systems, expert systems, decision support systems and executive information systems.

CISB 501 Business Analytics3 Credits

Examination of quantitative decision making for managers. Descriptive and predictive analytical tools in a management context will be covered along with current topics in data science and data analytics.

Terms Typically Offered: Fall.

CISB 505 Advanced Project Management3 Credits

Processes, techniques and tools of project management. Evaluating, initiating, planning, staffing, executing, controlling, and closing projects using project management software. Projects, writing, and presentation to demonstrate mastery at the graduate level.

Prerequisites: CISB 210 and permission of instructor.

CISB 560 Electronic Commerce Systems3 Credits

A comprehensive examination of the modern paradigm of electronic commerce, how it is conducted and managed, and its major opportunities, limitations, issues, and risks. Coverage of technological infrastructures that support e-commerce systems, plus the implications of such systems in the business environment. Exercises will include exploration of e-commerce web sites and features, plus discussion and demonstration of state-of-the-art e-commerce tools.

Prerequisites: Graduate status at Colorado Mesa University.

Computer Science (CSCI)

CSCI 100 Computers In Our Society3 Credits

Impact of computers on society and individuals; purpose and use of software integrated systems. Intended for students in disciplines outside the natural sciences and mathematics.

Essential Learning Categories: Social and Behavioral Sciences

Terms Typically Offered: Fall, Spring.

CSCI 104 Intro to Computer Hardware1 Credit

Computer hardware introduction. Includes purchase, maintenance and repair of computer hardware (desktops, laptops, servers and mobile devices, wired and wireless network hardware) in individual and corporate settings.

CSCI 106 Web Page Design I3 Credits

Aspects of Web page design such as HTML, Web servers, Web graphics/sound/video, and programs that automate the design of Web sites and scripts. Students will progressively develop their own sites throughout the term using software tools and concepts presented in the class.

Prerequisites: Familiarity with Windows.

CSCI 110 Beginning Programming3 Credits

Introduction to computer programming. Includes syntax and semantics for sequential, selection, and repetition structures, program design and modularization, simple and structured data types, and file I/O. Designed for students with no programming experience or majors outside of Computer Science.

Prerequisites: MATH 110 or higher (may be taken concurrently).

Terms Typically Offered: Fall, Spring.

CSCI 110L Beginning Programming Laboratory1 Credit

Optional laboratory course to be taken as a co-requisite to CSCI 110 to enhance knowledge of computer programming. Includes syntax and semantics for sequential, selection, and repetition structures, program design and modularization, simple and structured data types, and file I/O. Designed for students with no programming experience or majors outside of Computer Science.

Prerequisites: MATH 110 or higher (may be taken concurrently).

Corequisites: CSCI 110.

Terms Typically Offered: Fall, Spring.

CSCI 111 CS1: Foundations of Computer Science4 Credits

Introduction to problem solving techniques with emphasis on modularity, abstraction, analysis, and correctness of algorithm design. Using C/C++ language as a tool. Topics covered include data types, version control, Makefile, control structures, I/O, pointers, dynamic memory, functions, unit testing, debugging, structs.

Prerequisites: CSCI 110 or MATH 113 or MATH 119A.

Terms Typically Offered: Fall, Spring.

CSCI 112 CS2: Data Structures4 Credits

Continuation of CSCI 111 using C++. Emphasis on algorithm design analysis, procedural abstraction, data abstraction, data structures, and quality programming style. Topics include the distinction between dynamic and static variables; various implementations of elementary stacks, queues, trees, and lists; comparison of recursive and iterative algorithms; program correctness; version control; and hierarchical design principles.

Prerequisites: CSCI 111 or CSCI 130.

Terms Typically Offered: Fall, Spring.

CSCI 130 Introduction to Engineering Computer Science4 Credits

Introduction to fundamental programming concepts for engineers using a systems language and a scripting language. Programming concepts include flow control, data types and pointers. Applications include signal processing and numerical methods.

Prerequisites: MATH 135 (may be taken concurrently) or MATH 151 (may be taken concurrently).

CSCI 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 206 Web Page Design II3 Credits

A continuation of CSCI 106. Students will learn a scripting language and how to incorporate scripts in web page design.

Prerequisites: CSCI 106 or permission of instructor.

CSCI 241 Computer Architecture and Assembly Language4 Credits

Architecture of a representative processor and its assembly language, introduction to hardware description language, register transfers and sequence control, realization of fetch, address, branch and execute cycles, start, stop and reset the computer, interrupt and memory mapped input-output, peripherals and interfacing.

Prerequisites: CSCI 112.

CSCI 250 CS3: Introduction to Algorithms3 Credits

Complexity analysis and program performance. Abstract data types such as lists, trees, stacks and queues; sorting; searching and hashing; classic algorithmic strategies, including brute force, greedy, divide and conquer; space-time tradeoff; limitations of algorithm power; and optimization strategies.

Prerequisites: CSCI 112; and MATH 151 (may be taken concurrently).

Terms Typically Offered: Fall, Spring.

CSCI 260 Introduction to Database3 Credits

Introduction to using databases. The focus of this course will be on the creation, retrieval, update, and deletion of data from databases using a variety of database management systems and programming languages.

Prerequisites: CSCI 110, CSCI 111, or CSCI 130.

Terms Typically Offered: Fall, Spring.

CSCI 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 306 Web Page Design III3 Credits

Continuation of CSCI 206. Students will consider web site management issues, server-side scripting, security, and database interactions.

Prerequisites: CSCI 206 or permission of instructor.

CSCI 310 Advanced Programming1-3 Credits

Exploration of higher-level programming languages and advanced concepts for CSCI majors. Specifics will vary with the language covered.

Prerequisites: CSCI 250 and MATH 151.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

CSCI 321 Assembly Language Programming3 Credits

Introduction to assembler, creating and executing assembly language program, organization of machine under study, data definition, addressing techniques, data movement instruction, branching instructions, flag and PSW registers, arithmetic instructions, macros and their implementation, hardware and software interrupts, storing instructions, typical applications.

Prerequisites: CSCI 241.

CSCI 322 Embedded Systems3 Credits

Introduction to design of embedded systems. Topics include: basic computer electronics, embedded digital communications, and embedded software design.

Prerequisites: CSCI 321.

CSCI 330 Programming Languages3 Credits

Principles and concepts which characterize various classes of high-level, computer programming languages are covered. Topics will include syntax and semantic issues, data types/classes, control structures, binding, and storage allocation.

Prerequisites: CSCI 250.

CSCI 333 UNIX Operating Systems3 Credits

Introduction to systems programming with UNIX. Topics covered include elementary and advanced user commands, file handling, process control, library routines, device drivers, shell programming, and UNIX utilities.

Prerequisites: CSCI 112 or knowledge of C++/C.

CSCI 337 User Interface Design3 Credits

Examination of user interface design (UID) principles. They include rules of perception, systems analysis, user analysis, good design principles, and testing and evaluation of designs. Using an appropriate Rapid Application Development tool, students will design a major project emphasizing UID concepts.

Prerequisites: CSCI 250 or CSCI 260.

CSCI 345 Video Game Design3 Credits

Exploration of game engine and development theory. Emphasis is on rendering, physics simulation, artificial intelligence, and optimization techniques used in the modern game construction. Students will develop at least three games during the semester.

Prerequisites: CSCI 112.

CSCI 360 Robotic Perception and Planning3 Credits

Examination of autonomous robotic system preceptors (sensors), actuators, and planner (control system) design architecture. Analysis of a variety of robotic control architectures and signal data analysis leading to design and build of small autonomous robots to meet challenging work environments and goals. Proficient industrial machine control language programmers and control system design professionals developed. Field related ethics explored.

Prerequisites: CSCI 111 or CSCI 130.

Terms Typically Offered: Spring.

CSCI 365 Data Mining3 Credits

Exploration of fundamental tools and techniques for data analysis. Transforming data into information with various programming languages. Instruction in modern techniques for data analytics, future research directions.

Prerequisites: CSCI 112; and STAT 200 or STAT 215.

Terms Typically Offered: Fall.

CSCI 370 Computer Security3 Credits

Networked-computer security, suitable for both CS and CIS majors. Topics include security framework, access control and site security, firewalls, attack methods, elements of cryptography and cryptographic systems, incidence response, security in e-commerce and e-mail, management and policy decisions for security.

Prerequisites: CSCI 250 or CISB 311.

Terms Typically Offered: Fall.

CSCI 375 Object Oriented Programming and Design Patterns3 Credits

Advanced programming techniques using the object-oriented paradigm, with emphasis on abstractness of design, encapsulation, inheritance, and polymorphism. Additional topics include design tools and methodologies for determining classes, responsibilities, collaborations, and hierarchies. Software engineering concepts such as design patterns, tools such as version control, and unit testing object-oriented programs are also introduced.

Prerequisites: CSCI 250.

Terms Typically Offered: Fall, Spring.

CSCI 380 Operations Research3 Credits

Methods of linear and dynamic programming, inventory and replacement models, queuing theory, game theory, PERT, CPM, and simulation.

Prerequisites: MATH 152, STAT 200, and CSCI 111.

CSCI 393 Internship1-3 Credits

The internship course provides the student with the opportunity to apply classroom theory to on-the-job experiences. During the internship course, the student will work at approved professional positions related to the computer science field. The student will be required to write and fulfill course objectives with the approval of the internship coordinator.

Prerequisites: Junior standing, written permission of internship coordinator.

Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CSCI 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 405 Mobile Application Development3 Credits

Application development on mobile platforms, such as smartphones and tablets. Topics include understanding hardware, application API's, marketplaces, and programming languages for these platforms.

Prerequisites: CSCI 250, CSCI 337 or CSCI 206, or permission of instructor.

CSCI 420 Software Security3 Credits

Exploration of various common security flaws in software and systems written in C/C++ programming languages. Topics include Linux commands, Bash and Python scripting, Buffer overflow, exploits and CTFs exercises. Students will learn to find flaws and write exploit code to take advantages of the vulnerabilities as well as various mitigation techniques.

Prerequisites: CSCI 241 and CSCI 370.

Terms Typically Offered: Spring.

CSCI 425 Python Machine Learning3 Credits

Introduction to machine learning with an applied approach. Students are introduced to essential data science tools and frameworks. Traditional classification, regression and clustering machine learning algorithms such as decision trees, support vector machines, k-means, ensemble, boosting and bagging techniques are introduced using real-world datasets, applications, and deployment.

Prerequisites: CSCI 365.

Terms Typically Offered: Spring.

CSCI 445 Computer Graphics3 Credits

Introduction to the use of the computer to produce images: two and three dimensional graphics, algorithms and data structures for hidden lines and surfaces, shading, and reflections.

Prerequisites: MATH 152 and CSCI 250.

CSCI 450 Compiler Structure3 Credits

Structures and techniques used in compiler writing are discussed with emphasis on scanners, symbol tables, parsers and code generation. The front end of a recursive descent parser is written for the semester project. Error analysis and code optimization are discussed as time permits.

Prerequisites: CSCI 241.

Corequisites: CSCI 330.

CSCI 460 Database Design3 Credits

Design and implementation of relational databases. Approaches and methods of design and normalization, SQL, integrity, and security will be discussed.

Prerequisites: CSCI 250.

CSCI 465 Network/Application Security3 Credits

Exploration of advanced topics in network and web-based application security such as network vulnerability management, network monitoring, intrusion detection and prevention, government and industry security compliances, wireless security, most common web application security flaws, browser and database security principles, and authentication and authorization in web applications.

Prerequisites: CSCI 420.

CSCI 470 Operating Systems Design3 Credits

Aspects of computer operating system design and implementation including memory management, processor management, device management, information management and performance evaluation methods. Some knowledge of C is required.

Prerequisites: CSCI 250 and CSCI 241.

CSCI 480 Algorithms: Design and Analysis3 Credits

Theoretical and applied techniques to reason about and prove properties of algorithms. Topics include: algorithm correctness and running time, how data structures can provide space-efficient ways to quickly answer queries about data, and how data structures can be used to build efficient algorithms. The notion of computability is explored in depth, and related problems are discussed.

Prerequisites: CSCI 250; and MATH 152 or MATH 369 (MATH 369 is highly recommended).

Terms Typically Offered: Fall.

CSCI 482 Theory of Computation3 Credits

Computability and automata theory introduced. Regular expressions, finite and pushdown automata, Turing machines, grammars and their relationship to automata, Church-Turing hypothesis, incomputable and undecidable functions and equivalence of computability models are covered.

Prerequisites: MATH 369 and CSCI 250.

CSCI 484 Computer Networks3 Credits

Survey of computer networks, including hardware technology for local and long haul networks, circuit and packet switching, interface between computer and network hardware, network architectures and protocols, routing, congestion and flow problems, queuing theory, and reliability issues.

Prerequisites: CSCI 112.

Terms Typically Offered: Fall, Spring.

CSCI 486 Artificial Intelligence3 Credits

Introduction to artificial intelligence programming with study of topics such as knowledge representation, expert systems, solution space search, non-deterministic algorithms (neural nets, genetic algorithms), etc. Programs will be written in a selected AI programming language such as Lisp or Prolog.

Prerequisites: CSCI 250; and MATH 151 or MATH 135.

CSCI 490 Software Engineering3 Credits

Exploration of the philosophy of software engineering. Software project planning, requirement analysis, software system design and strategies, software design tools, program and system testing, system maintenance, and economics are examined.

Prerequisites: CSCI 260 and CSCI 375.

Terms Typically Offered: Fall, Spring.

CSCI 494 Seminar1-3 Credits

Discussions of specialized topics by students, faculty, or visiting professors. One or two one-hour meetings per week.

Course may be taken 10 times for credit.

CSCI 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CSCI 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Construction Management (CONM)

CONM 181 Principles of Construction Management3 Credits

Construction industry practice emphasizing business organization and management techniques. Includes principles of management, organizational environments, decision-making, design, technology, leadership, and basic construction management with terminology, estimating and scheduling. This course replaces MANG 201 requirements for Construction Management majors only. It does not substitute for MANG 201 in any other way.

CONM 234 Graphic Communication for Construction Management3 Credits

Integrated approaches for developing plan reading skills and creation of visual communications, including 3D digital model and pictorial development using current industry software.

CONM 264 Mechanical/Industrial Systems3 Credits

Analysis and design understanding of specialty mechanical and industrial processes. Includes fundamentals of thermodynamics, fluids, control interface issues, system testing and commissioning. Emphasis on fundamental theory followed by proof of concepts through practicum. Lecture, lab and field exercises.

Prerequisites: MATH 113, CONC 101, and CONM 181.

CONM 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CONM 316 Construction Materials and Methods3 Credits

Materials and methods utilized in design and construction of vertical and horizontal projects. Course addresses proper construction methods and governing trade association standards. Sustainability and ethics relating to specification, ordering, and installation of construction materials incorporated.

Prerequisites: CONC 101 and CONC 208.

CONM 341 Estimating and Bidding for Vertical Construction3 Credits

Application of industry recognized methods of construction estimating and bidding for contract procurement. Emphasis is on commercial building construction.

Prerequisites: CONC 228.

Terms Typically Offered: Fall.

CONM 342 Estimating and Bidding for Horizontal Construction3 Credits

Application of industry recognized methods of construction estimating and bidding for contract procurement. Emphasis is on infrastructure, road, and bridge construction.

Prerequisites: CONC 228.

Terms Typically Offered: Fall.

CONM 361 Advanced MEP Systems3 Credits

Electrical, heating, ventilation, air conditioning, plumbing, and fire suppression. Emphasis on design, operation, and interaction. Principles of codes, design, methods and materials as applicable to the construction industry included. Building system controls for smart buildings integrated in each component.

Prerequisites: CONC 161.

CONM 362 Structure Analysis - Statics/Materials Strength3 Credits

Behavior of structural components and systems plus a broad overview of structural engineering analysis/design process. Principles of statics and strength of materials including properties of materials, forces, equilibrium, stresses and strains studied. Emphasis on understanding behavior of structural components associated with construction processes.

Prerequisites: MATH 130 and PHYS 111/PHYS 111L.

CONM 370 Managing the Regulatory Environment3 Credits

Exploration of regulatory requirements by local, state, and federal agencies in the planning and execution of construction projects.

Prerequisites: CONC 101 and junior standing.

Terms Typically Offered: Fall.

CONM 375 Sustainability in the Built Environment3 Credits

Introduction to high-performance green building techniques, sustainable practices, and lean construction for life cycle analysis of embodied energy and materials data for the built environment.

Prerequisites: Junior standing.

Terms Typically Offered: Fall.

CONM 380 Construction Project Management3 Credits

Exploration of the professional practices performed by the project team for successful job site management, including the relationship of project participants and methods of communication, evaluation of project objectives in decision making, relationship of different project contract delivery methods, and how to develop, understand, and use contracts for job site management.

Prerequisites: CONM 341 or CONM 342.

Terms Typically Offered: Spring.

CONM 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CONM 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CONM 462 Soil and Foundation Construction3 Credits

Properties of subsurface materials and principles of subsurface construction. Topics include soil classification and testing, soil mechanics, earthmoving operations and foundation systems from a contractor's perspective. Techniques of subsurface investigations and subsequent interpretation of soil reports studied to understand foundation construction methods and related field problems.

Prerequisites: CONM 362.

Corequisites: CONM 462L.

CONM 462L Soil and Foundation Construction Laboratory1 Credit

Properties of subsurface materials and principles of subsurface construction. Topics include soil classification and testing, soil mechanics, earthmoving operations and foundation systems from a contractor's perspective. Techniques of subsurface investigations and subsequent interpretation of soil reports studied to understand foundation construction methods and related field problems.

Prerequisites: CONM 362.

Corequisites: CONM 462.

Terms Typically Offered: Spring.

CONM 472 Construction Planning and Scheduling3 Credits

Planning, scheduling and controlling construction operations. Emphasis on the planning phase of construction projects, logic diagrams, network-based scheduling techniques, and computer-assisted scheduling. Application of industry-recognized scheduling methodology to construction projects. Emphasis on communicating project schedules in written and oral presentations.

Prerequisites: CONC 228.

CONM 475 Construction Company and Financial Management3 Credits

Exploration of concepts in starting, owning, and operating a construction company. The student engages in identifying the purpose, vision, values, short-term and long-term objectives, and execution plans of company. Accounting methods and systems are studied. Analysis of financial statements in developing budgets, projecting cash needs, and forecasting impacts of business decisions on profit.

Prerequisites: CONM 380 and FINA 301.

CONM 485 Construction Management Issues3 Credits

Issues facing the professional constructor. Integration of project management includes field study, research, case readings, problem solving, and project deliverables.

Prerequisites: Senior status and permission of instructor.

CONM 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CONM 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CONM 499 Construction Internship1-6 Credits

University/construction industry partnership to provide real-life working experiences. The internship program's primary purpose is to prepare the construction management student with leadership responsibilities in a technologically oriented, diverse, dynamic and global construction environment.

Prerequisites: CONM 380, and permission of instructor.

Course may be taken multiple times up to maximum of 15 credit hours.

Construction Technology (CONC)

CONC 101 Construction Safety and Regulations3 Credits

Construction safety and its effect on productivity and employee morale. Application of basic principles of accident prevention. Complying with the various federal, state, and local laws governing safety (OSHA), hazardous chemicals, and drugs in the work place.

CONC 104 Architectural/Civil Print Reading2 Credits

Reading and hand-drafting prints as used in industry, application of that information to various architectural and civil industries.

CONC 116 Building Materials3 Credits

Introduction to building materials and methods commonly used in the construction industry. Includes an overview of foundation systems, concrete, steel, and wood products.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CONC 117 Building Materials Testing3 Credits

Introduction to the properties and testing of materials used in today's construction projects. This includes wood products, metal, soil, aggregates, concrete, and asphalt.

Prerequisites: CONC 116 or permission of instructor.

Fees: Yes.

CONC 161 Building Mechanical/Electrical3 Credits

Introduction to basic electrical, plumbing, heating, ventilation, and air conditioning systems found in residential and commercial buildings. Basic theory and design concepts included.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CONC 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CONC 208 Construction Equipment3 Credits

Basic understanding of general equipment and methods employed in different sectors of the construction industry. Areas covered are factors affecting the selection of equipment, rental versus ownership of equipment, estimating earthwork quantities, figuring equipment production, equipment management, and quality control of projects.

CONC 218 Surveying3 Credits

The fundamentals of modern plane surveying techniques and basic surveying instruments. Emphasis on construction-related aspects of surveying and the development of skills in using surveying field information.

Prerequisites: MATH 107 or MATH 113.

Fees: Yes.

CONC 228 Estimating and Cost Control3 Credits

The estimation process, the role of the estimator, types of estimation, CSI Divisions, bid/contract documents, change order pricing, value engineering, design build projects, and estimate compilation and cost controls.

Prerequisites: CADT 105, CONC 116, CONC 161, CONC 208 or permission of instructor.

CONC 234 Commercial/Industrial Plans2 Credits

Introduction to the commercial/industrial construction industry. Processes, practices, and materials typically used in commercial/industrial construction will be studied.

CONC 245 Project Management3 Credits

Principles of project planning, scheduling, estimation and management. Emphasis on the basic skills required to supervise personnel including oral communication, problem identification, problem solving and decision-making. The course will also cover how to control productivity on the project.

Prerequisites: CONC 228 or permission of instructor.

CONC 251 Construction Prep: Codes, Permits3 Credits

Legal aspects including liens, contracts, bids, specifications, building permits and licensing, inspections and the Uniform Building Code. Introduces intra-trade coordination, remodeling and additions, construction practices, construction management and supervision.

CONC 265 Planning and Scheduling for the Construction Supervisor3 Credits

Planning the sequence, duration and relationship of activities for a construction process. Communicate the plan to contractual parties and to use the plan as reference point for examining project changes. Includes planning for safety, organization, manpower, problem solving, and site layout.

Prerequisites: Permission of instructor.

Fees: Yes.

CONC 270 Practical Applications4 Credits

Supplemental coursework with practical work experience related to educational program. Students will work under the immediate supervision of experienced personnel at the business location. Students will work on construction sites or projects related to their career field of interest with advice of faculty.

Prerequisites: Permission of Instructor.

CONC 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Criminal Justice (CRMJ)

CRMJ 110 Orientation to Criminal Justice Inquiry1 Credit

Foundations of criminal justice. Educational and career planning. Incorporation of APA writing skills for upper-division criminal justice courses.

Prerequisites: Must be a declared criminal justice pre-major.

Corequisites: CRMJ 201.

Terms Typically Offered: Fall, Spring.

CRMJ 196 Topics:1 Credit

Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 201 Introduction to Criminal Justice3 Credits

Philosophy, history, and development of the American criminal justice system. Survey of the role of law enforcement agencies, the courts, jails, prisons, probation, and parole in both juvenile and adult systems.

Corequisites: CRMJ 110.

Terms Typically Offered: Fall, Spring.

CRMJ 280 Crime Scene Processing2 Credits

Hands-on experience in the documentation, recognition, collection and preservation of evidence. Evidence development techniques used in the field will also be discussed. The course includes an introduction to crime scene photography. Students will be oriented in professional values, concepts, and ethics as well as exposed to current trends in the forensic science community.

Prerequisites: ENGL 111 or higher and MATH 110 or higher.

Corequisites: CRMJ 280L.

Terms Typically Offered: Fall.

CRMJ 280L Crime Scene Processing Laboratory1 Credit

Hands-on experience in the documentation, recognition, collection and preservation of evidence. Evidence development techniques used in the field will also be discussed. An introduction to crime scene photography. Students will be oriented in professional values, concepts, and ethics as well as exposed to current trends in the forensic science community.

Prerequisites: ENGL 111 or higher and MATH 110 or higher.

Corequisites: CRMJ 280.

Terms Typically Offered: Fall.

Fees: Yes.

CRMJ 296 Topics1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 301 Criminal Procedure3 Credits

Analysis of landmark U.S. Supreme Court cases and their impact on operating procedures of law enforcement and the courts. Focuses on Fourth, Fifth, and Sixth Amendments to the U.S. Constitution.

Prerequisites: CRMJ 110, CRMJ 201, CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 302 Ethics in Criminal Justice3 Credits

Examination of ethics in the criminal justice system from investigation, arrest, prosecution, defense, and corrections.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 310 The Police Process3 Credits

Basic features of policing in the United States. Police work, police organizations, police officers, and the critical problems facing policing today are examined in social and political context.

Prerequisites: CRMJ 201.

CRMJ 311 Victimology3 Credits

Study of crime victims, their numbers, common characteristics, and roles they play in their own victimization. Legal, psychological, and social perspectives explored. Various theoretical explanations regarding both first-time and repeat victimizations discussed.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 315 Research Methods in Criminal Justice3 Credits

Research methods and their application to Criminal Justice.

Prerequisites: CRMJ 310, CRMJ 320, CRMJ 328, MATH 110 or higher, and STAT 215.

CRMJ 320 Corrections3 Credits

The role of corrections in the criminal justice system: history, guiding philosophies and theories, treatment approaches, custody issues, and supervision of offenders on probation and parole.

Prerequisites: CRMJ 201 or permission of instructor.

CRMJ 325 Juvenile Justice and Delinquency3 Credits

Juvenile delinquency and juvenile justice in the United States.

Comparative component involved. Focus on the nature and extent of delinquency, causes of delinquency, theoretical explanations, patterns of delinquency, and social reaction to delinquency.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 328 American Court Systems3 Credits

The American court system; local, state, and national, including consideration of the impact of prosecutors, defense personnel, judges, and other factors on court decisions and the criminal justice system.

Prerequisites: CRMJ 201 or POLS 101.

Equivalent Course(s): POLS 328

CRMJ 330 Intimate Partner Violence3 Credits

Exploration of intimate partner violence including contributing individual, structural, and cultural factors, as well as various offender patterns and typologies. Examines why victims stay in abusive relationships, the consequences of intimate partner violence, and various system responses.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Spring.

CRMJ 335 Community Policing3 Credits

Contemporary policing philosophy used and accepted by most policing organizations, domestic and foreign. Concept of community policing, history of the movement as well as the various issues in its adoption and implementation. Philosophy of community policing affecting both policing organizations and the community. Impact of community policing on crime, fear of crime, and the community in which utilized.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 340 Community Corrections3 Credits

Applied and practical approach to community corrections. Assessment, supervision, reintegration, and community partnerships emphasized. Special needs populations, unique issues and challenges, and insights into day-to-day experiences of various community corrections practitioners examined.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 345 Mental Illness and Crime3 Credits

Exploration of the role and impact of mental illness in various aspects of the criminal justice system. Context, treatment, and impact of mental health and illness in relation to crime will be considered.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Spring.

CRMJ 360 Crime and Deviance3 Credits

Relationship between crime, deviance, and social control. Differences in definitions of criminal and deviant behaviors explored. Various criminological and sociological theories of deviance analyzed. Focus on relation to crime and social control. Societal response to deviance critically examined.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 370 Criminology3 Credits

Major paradigms in the field of criminology and major contributions to the field in the U.S. and abroad. Emphasis on socio-historical development and philosophical movements that shaped criminological theory and its implications for criminal justice.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 375 Women and Crime3 Credits

Nature of criminality pertaining to women. How and why women are treated differently than males in the criminal justice system. Analysis of why women make up a small but growing portion of criminal offenders. Explores the ramifications of criminal activity on women. Possible solutions and alternatives to the unique issues of female offenders.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 380 Crisis Intervention in Criminal Justice3 Credits

Examination of crisis typologies encountered throughout the criminal justice system. The methods and techniques employed by criminal justice professionals to respond to, contain, and de-escalate various forms of chaos, mayhem, and disorder are also examined.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Spring, Summer.

CRMJ 395 Independent Study1-3 Credits

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Course may be taken multiple times up to maximum of 6 credit hours.

CRMJ 396 Topics1-3 Credits

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 405 Civil Liability for Law Enforcement and Corrections3 Credits

Overview of civil liability of law enforcement and correctional officers. Torts and civil rights remedies, the doctrine of respondent superior, and chain of liability. Specific issues of use of force, failure to protect, searches and segregation, inadequate medical care, and negligence examined.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 410 Criminal Investigations3 Credits

Analysis of the investigative process and techniques employed in a contemporary criminal investigation. Considers theory and methodology of criminal investigation, and legal dynamics relative to achieving the major goals of an investigation. Use of practical and interactive experiences involves students in the investigative process by utilizing field exercises such as evidence collection and preservation, simulations related to crime scenes, surveillance activities, victim/suspect interviews and interrogations, and sound case preparation.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 412 Constitutional Law3 Credits

An analysis of American constitutional theory as articulated by the U. S. Supreme Court. Specific topics include the nature of judicial review, the powers of the President and Congress, federalism, the regulation of commerce and the development of substantive due process.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Equivalent Course(s): POLS 412

CRMJ 413 Violent and Serial Offenders3 Credits

Exploration of various violent and serial behaviors in different contexts. Identify violent behaviors and apply them to theory and contemporary research. Develop strategies to intervene when behaviors form in society. Focal areas include sexual predation, mass violence, serial crimes, and violent online offenders.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Spring.

CRMJ 415 Counter-Terrorism and Law Enforcement3 Credits

Emergence of modern terrorism and efforts to combat it. Strategies and systems involved in protecting against and responding to threats. Survey of major policies, practices, concepts, and challenges confronting practitioners in the complex field of counterterrorism and homeland security. Exploration of various issues facing law enforcement agencies in counterterrorism efforts.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 420 Criminal Law3 Credits

Philosophy, history and current state of criminal law with emphasis on analysis and application of Colorado Statutes and the American Law Institute Model Penal Code.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 425 Trial, Evidence and Legal Advocacy3 Credits

Development of written and oral advocacy skills through critical examination of legal issues, focusing on the interpretation of statutory laws and analysis of relevant case law to formulate sound, persuasive argument throughout the adversarial process. Considers trial procedure and the law of evidence.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 435 White-Collar Crimes3 Credits

Examination of white-collar crime in the United States. Topics include crimes against consumers, corporate and securities fraud, environmental crime, medical crime, computer fraud, and public corruption are discussed. Individual, corporate, and governmental crimes and their societal impacts are explored. Investigative, prosecutorial, and preventative measures are also examined.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Fall, Summer.

CRMJ 440 Capital Punishment3 Credits

Examination of the issues related to the death penalty in the United States, including the history of capital punishment, important Supreme Court decisions, the process of capital punishment, the comparative costs of incarceration and execution, miscarriages of justice in capital cases, and how the criminal justice system responds to these issues.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328, or permission of instructor.

CRMJ 445 Media and Crime3 Credits

Exploration of the impact of media on our perceptions of the "reality" of crime and criminals. Also includes exploration of the portrayal of various areas of the criminal justice system and the employees therein.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Spring.

CRMJ 465 Contemporary Issues in Criminal Justice3 Credits

Focused analysis of specific contemporary issues in criminal justice. Topics vary according to current events and instructor expertise.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 470 Restorative Justice3 Credits

Examination of the realm of restorative justice, which aims to repair the harm caused by crime. Fundamental principles and practices, as well as the roles of key stakeholders will be covered.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Terms Typically Offered: Spring, Summer.

CRMJ 480 Inside-Out Prison Exchange3 Credits

Examination of issues involving crime and justice, the criminal justice system, corrections, and imprisonment through facilitated dialogue between students and current prisoners.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328, and permission of instructor.

CRMJ 490 Comparative Criminal Justice3 Credits

Capstone course. Includes survey of selected international criminal justice systems, including police, courts, and correctional components. International perspectives of policing, courts, and corrections examined to determine variations across countries. Topics of transnational crime, terrorism, and juvenile justice explored from a global perspective to determine if the United States significantly differs in methodology, intensity, and focus of public policy. Special emphasis placed on geographical, historical, and cultural perspectives that make the systems unique and/or similar to those in the United States.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 495 Independent Study1-3 Credits

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Course may be taken multiple times up to maximum of 6 credit hours.

CRMJ 496 Topics1-3 Credits

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 499 Internship1-15 Credits

Opportunities to apply theoretical principles in a structured organizational or work environment. Prior instructor and site approval required at least one semester in advance. Required clock hours dependent upon credit hours.

Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 511 Foundational Seminar3 Credits

Introduction to graduate level studies, program expectations, and ethical considerations for research in criminal justice.

Terms Typically Offered: Fall, Spring.

CRMJ 512 Public Policy Analysis3 Credits

Overview of public policy theories, formulation, and administration in the context of applied federal, state, and local criminal justice governance and policy decision-making. The relationship between politics and administration is examined with reference to the classical policy/administration dichotomy, stages of the policy process, and citizen engagement.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 513 Ethics in Criminal Justice Leadership3 Credits

Exploration of ethical leadership as a process of influence within and across criminal justice organizations. Examines how leaders can effectively address conflicts when formulating and implementing policies and programs.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 514 Research Methods and Data Analysis3 Credits

Methods of scientific inquiry applied to criminal justice issues. Includes formulation of research questions, logic of inquiry, research design, measurement, and introduction to social statistics and applications to criminal justice data analysis.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 515 Advanced Criminological Theory3 Credits

Major paradigms in the field of Criminology. Emphasis on biosocial roots of crime, control theories, labeling theories, and conflict theories and their implications for Criminal Justice.

Terms Typically Offered: Fall, Spring.

CRMJ 516 Leadership in Criminal Justice3 Credits

Examination of leadership theories from classic to contemporary. The concepts of leadership, power, authority, and management will be contrasted. The leader-follower dynamic is explored. Students will build the confidence and skills needed to become leaders in the field through the development and defense of a model of leadership.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 520 Budgeting and Finance in Criminal Justice3 Credits

Introduction to the theory and practice of budgeting at all levels of government. Budget terminology, methodologies, preparation, implementation, evaluation, accounting and financial reporting systems, revenue sources, and capital improvement budgeting are examined.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 521 Evidence-Based Practices in Criminal Justice3 Credits

Examination of program development and evaluation using evidence-based practices in a criminal justice context.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 522 Strategic Planning for Criminal Justice Agencies3 Credits

Examination and analysis of the strategic planning process, goal setting, and strategic management in criminal justice organizations and how external environments and internal dynamics impact planning procedures.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 523 Police Management and Administration3 Credits

Examination of law enforcement management, administration, and organizational behavior. Topics examined include power dynamics, human motivation, teamwork, conflict management, interpersonal communication, decision-making, and managing organizational change.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 524 Legal Issues in Criminal Justice3 Credits

Examination of legal issues as they impact Criminal Justice. Emphasis on how policy is derived and affected by legal decisions. Topics vary based upon contemporary concerns and expertise of instructor.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 525 Critical Issues in Corrections3 Credits

Historical development of institutions for confinement and analysis of present trends in correctional practice. Reviews characteristics of various correctional policies and prison life. Special emphasis on current trends and controversies.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 526 Contemporary Issues in Criminal Justice3 Credits

Focused analysis of contemporary issues in Criminal Justice. Topics vary according to current events and instructor expertise.

Terms Typically Offered: Fall, Spring, Summer.

CRMJ 593 Master's Culminating Experience3 Credits

Comprehensive and synthesized final project. Students complete final project under the supervision of a faculty mentor.

Prerequisites: CRMJ 511, CRMJ 512, CRMJ 513, CRMJ 514, CRMJ 515, and CRMJ 516.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken 5 times for credit.

Criminal Justice-POST (CRJW)

CRJW 101 Basic Police Academy I4 Credits

Introduction to basic concepts required to meet Colorado POST standards and state police certification requirements. Skills associated with entry-level duties of a peace officer, including report writing, information gathering and overview of state laws and Constitutional Rights.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 102 Basic Police Academy II5 Credits

Exploration of Colorado Revised Statutes, Constitutional Law and interview techniques required for state certification of an entry-level peace officer. Skills associated with observation, officer safety and ethics. Emphasis will be on simulating actual situations utilizing a lecture and laboratory mode of learning.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 103 Basic Police Academy III7 Credits

Approaches to more complex situations an entry-level police officer might encounter including leadership, ethics, verbal de-escalation and application of Colorado laws. Skills associated with officer safety, report preparation and teamwork. Emphasis will be on simulating actual situations utilizing a lecture and laboratory mode of learning.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 104 Basic Police Academy IV6 Credits

Exploration of investigative and interrogation techniques, courtroom testimony and judicial procedures, and responding to emergency situations. Skills associated with building clearing, crowd management, and crime scene documentation Conforms to POST standards and state certification requirements.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 106 Arrest Control3 Credits

Skills, knowledge, and abilities necessary to effectively maintain control of a suspect when making an arrest. Emphasizes the continuum of force and de-escalation of force.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 107 Law Enforcement Driving2 Credits

Skills, knowledge, and abilities required for operation of a law enforcement vehicle. Emphasizes defensive driving. Enables students to demonstrate skills by driving a vehicle under simulated conditions.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 108 Firearms3 Credits

Skills, knowledge, and abilities necessary to safely use police firearms. Students will demonstrate skills by firing weapons on a firing range. The student will demonstrate basic safety techniques and will explain the firearms role within the continuum of force.

Prerequisites: Permission of Academy Director.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

CRJW 210 Emergency Dispatching4 Credits

Introduction to the basic fundamentals of emergency dispatching, to include basic principles of emergency communications operations and technology, call management and classification, legal aspects of dispatching, and stress management. Extensive practical training in police and fire emergency dispatching scenarios.

Prerequisites: ENGL 111, MATH 107 or higher, CRMJ 201, and permission of instructor.

CRJW 296 Topics1-8 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Culinary Arts (CUAR)

CUAR 100 Culinary Program Fundamentals3 Credits

Introduction to the fundamentals of the culinary arts industry. Training will include: program overviews, culinary math skills, culinary vocabulary, lab requirements, basic knife skills, equipment identification and proper usage, professionalism, food service history, kitchen organization, basic principles of cooking, food science, study skills, proper food storage techniques, recipes, and cost management.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 101 Food Safety & Sanitation2 Credits

Exploration of the basic rules of sanitation, food-borne illnesses, safe food temperatures, and safe food handling techniques.

Terms Typically Offered: Fall.

CUAR 115 Introduction to Sustainable Cuisine3 Credits

Impact of human food production systems on environment and society. Focus on meeting present food needs without compromising future generations. Topics include connections among agriculture, food production, ecology, ethics, nutrition, health, cuisine and foodservice operations.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 125 Introduction to Foods3 Credits

Exploration of fundamental principles and practices of a commercial kitchen, including the preparation of stocks, sauces, soups, salads and dressings, sandwiches, and hors d'oeuvre.

Prerequisites: CUAR 100 and CUAR 101 (both may be taken concurrently).

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 129 Center of the Plate3 Credits

Basic methods for preparation and cooking of a variety of complete meals in a commercial kitchen.

Prerequisites: CUAR 100 and CUAR 101 (both may be taken concurrently).

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 145 Introduction to Baking3 Credits

Exploration of basic baking principles, the characteristics and functions of ingredients, and production techniques for a variety of baked goods in a commercial kitchen.

Prerequisites: CUAR 100 and CUAR 101 (both may be taken concurrently).

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 150 Baking: Decorating and Presentation3 Credits

Introduction to techniques and equipment used in the modern bakery to produce, decorate and present pastries and desserts using a variety of products.

Prerequisites: CUAR 145.

Terms Typically Offered: Spring.

Fees: Yes.

CUAR 151 Intermediate Bread Preparation3 Credits

Examination of techniques and equipment used in the modern bakery to craft traditional and artisanal yeast breads using a variety of commercial and pre-ferment/wild yeast leavening methods and production techniques.

Prerequisites: CUAR 145.

Terms Typically Offered: Spring.

Fees: Yes.

CUAR 152 Individual Fancy Desserts Production3 Credits

Preparation and decoration of individual dessert items using production techniques and equipment used in commercial bakeries to craft traditional and modern pastries, tarts, petite fours and cookies.

Prerequisites: CUAR 145.

Terms Typically Offered: Spring.

Fees: Yes.

CUAR 153 Confectionaries and Petit Fours3 Credits

Introduction to the art of advanced pastry skills utilized to craft specialty items such as chocolates, candies and confections, marzipan and pastillage sculpture, and petit fours.

Prerequisites: CUAR 145.

Terms Typically Offered: Fall.

Fees: Yes.

CUAR 156 Nutrition for the Hospitality Professional3 Credits

Fundamentals of nutrition as they apply to the food service industry.

Fees: Yes.

CUAR 160 Cake Decorating4 Credits

Variety of cake decorating techniques, including flowers, leaves, borders, and attractive arrangements. Preparation of and work with gumpaste, rolled fondant and airbrushing techniques.

Prerequisites: CUAR 145.

Terms Typically Offered: Fall.

Fees: Yes.

CUAR 163 Advanced Wedding Cakes3 Credits

Refinement of skills in the creation of wedding cakes and other tiered cakes for special events.

Prerequisites: CUAR 145 and CUAR 160.

Terms Typically Offered: Spring.

Fees: Yes.

CUAR 179 Wines, Spirits and Beers3 Credits

Explores production, marketing and service of wines, spirits and beers from around the world. Includes local and regional craft wine, spirit and beer production. Covers profitability, marketing, federal and local laws, identification of equipment, glassware, and staffing. Service Safe Alcohol certification exam administered.

Fees: Yes.

CUAR 190 Dining Room Management3 Credits

Exploration of management techniques, organization, and service-related skills common to dining room operations.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

CUAR 220 Fundamentals of Healthy Cooking3 Credits

Application of theory and production techniques required to prepare and serve foods that emphasize the importance of a healthy diet, promote beneficial eating habits, and encourage the personal enjoyment of cooking and eating.

CUAR 236 Advanced Baking3 Credits

Refinement of skills in the creation of breads and pastries, dessert garnishes and accompanying sauces, and specialty dessert products.

Prerequisites: CUAR 145.

Terms Typically Offered: Spring.

Fees: Yes.

CUAR 238 American Regional Cuisine3 Credits

Development of advanced cooking skills involving foods representative of major American regions. Emphasis is placed on defining regions based on geography, history, culture, and foodways.

Prerequisites: CUAR 125.

Terms Typically Offered: Fall, Spring.

CUAR 245 International Cuisine3 Credits

Development of advanced cooking skills involving the preparation of a variety of international cuisines. Emphasis is placed on identifying ingredients, preparation methods, customs, and styles of service that define various world cuisines.

Prerequisites: CUAR 125 and CUAR 129.

Terms Typically Offered: Fall.

Fees: Yes.

CUAR 251 Advanced Garde Manger and Hors D'Oeuvres3 Credits

Development of advanced skills in traditional cold kitchen preparations including sausages, pates, cured and smoked products, cheese, pickles, and condiments.

Prerequisites: CUAR 125 and CUAR 129.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 255 Supervision in the Hospitality Industry3 Credits

Skills necessary for creating a goal-oriented environment utilizing management principles in the hospitality industry.

CUAR 261 Cost Controls3 Credits

Explores the costs usually found in the food service industry and the techniques used to control them.

CUAR 262 Purchasing for the Hospitality Industry3 Credits

Exploration of the purchasing, selection, and procurement of food and supplies in the hospitality industry.

Prerequisites: CUAR 100 and CUAR 101.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

CUAR 269 Dietary Baking3 Credits

Examination of techniques and equipment used to produce high quality bakery products that address the issue of common food allergens and intolerances.

Prerequisites: CUAR 145 and CUAR 156.

Terms Typically Offered: Fall.

Fees: Yes.

CUAR 271 Techniques of Culinary Competition - Hot Food3 Credits

Fundamental principles and technical skills, required to engage in hot food culinary competition. Precision in the areas of knife skills, mise en place, recipe development, perfect execution of culinary technique, and exploration of in-depth organizational processes.

CUAR 271A Advanced Techniques of Culinary Competition - Hot Food3 Credits

Fundamental principles and technical skills required to engage in hot food culinary competition. Precision in knife skills, mise en place, recipe development, perfect execution of culinary technique, and exploration of in-depth organizational processes. Advanced technique of culinary competition designed for culinary teams advancing to the next level of competition.

Prerequisites: CUAR 271.

CUAR 272 Techniques of Culinary Competition - Cold Food3 Credits

Fundamental principles and technical skills required to engage in cold food culinary competition. Expose students to theories and principles of cold food show platters, elementary glazing techniques, hot food shown cold and other cold food competition concepts.

CUAR 272A Advanced Techniques of Culinary Competition - Cold Food3 Credits

Fundamental principles and technical skills required to engage in cold food culinary competition. Precision in knife skills, mise en place, recipe development, perfect execution of culinary techniques, and exploration of in-depth organizational processes. Advanced techniques of culinary competition for culinary teams advancing to the next level of competition.

Prerequisites: CUAR 272.

CUAR 281 Internship1-6 Credits

Places students in an actual work situation where they participate in the operation of a foodservice establishment.

Course may be taken multiple times up to maximum of 10 credit hours.

CUAR 293 Restaurant Operations Practicum4 Credits

Rotation through a variety of positions in a working professional restaurant. Responsibilities include serving guests and preparing food while maintaining established standards and levels of service.

Prerequisites: CUAR 145, CUAR 179, CUAR 190, CUAR 238, CUAR 245, CUAR 251, and CUAR 262.

Terms Typically Offered: Fall, Spring, Summer.

CUAR 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

CUAR 296 Topics:1-5 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Fees: Yes.

CUAR 297 Practicum1-2 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Dance (DANC)

DANC 115 Dance Appreciation-GTAH13 Credits

Exploration of the roots and trends of the art of dance from the primitive to the contemporary. Introduction of esthetic guidelines for looking at dance as it relates to America and the world.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

DANC 140 Dance Company2 Credits

Experience in rehearsal, performance, collaborative creative practice, and community engagement. For first year students.

Terms Typically Offered: Spring.

DANC 154 Dance Team1 Credit

Participation on the Mavettes Dance Team at the freshman standing level. Audition or permission of instructor required. Only one credit hour of DANC 154 counts as a KINA activity credit.

DANC 156 Dance Performance1 Credit

Student participation in the production of a dance supervised by faculty or guest artist. Students must audition.

Corequisites: one technique class.

Course may be taken 2 times for credit.

DANC 160 Beginning Ballet1 Credit

Includes alignment, balance, endurance, flexibility, and strength in elementary technical proficiency.

DANC 169 Beginning Modern Dance1 Credit

Includes alignment, balance, endurance, flexibility, and strength in elementary technical proficiency.

DANC 174 Beginning Jazz Dance1 Credit

Including terminology, theory, history & critical analysis of the Art Form.

DANC 177 Beginning Tap Dance1 Credit

Including terminology, theory, history & critical analysis of the Art Form.

DANC 180 Beginning Hip Hop Dance1 Credit

Fundamentals of Hip Hop, including alignment, balance, endurance, flexibility, and strength, in elementary technical proficiency.

Course may be taken 2 times for credit.

DANC 181 Ballet I2 Credits

Beginning ballet technique for students intending to progress to an intermediate level.

Course may be taken 2 times for credit.

DANC 182 Jazz I2 Credits

Beginning jazz technique for students intending to progress to an intermediate level.

Course may be taken 2 times for credit.

DANC 183 Contemporary Modern I2 Credits

Study of various styles of modern dance at the beginner level.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 184 Tap I2 Credits

Beginning tap technique for students intending to progress to an intermediate level.

Course may be taken 2 times for credit.

DANC 185 Hip-Hop I2 Credits

Study of hip-hop dance and the styles explored within the elements of hip-hop dance at the beginner level.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

DANC 220 Moving Anatomy and Wellness3 Credits

Introduction to principles of embodied wellness, experiential and functional anatomy, and somatic conditioning practices.

Terms Typically Offered: Fall, Spring.

DANC 225 The Healthy Dancer3 Credits

Exploration into conditioning, nutrition, injury prevention, basic anatomy and motivational techniques unique to the dance student.

DANC 230 Contemporary Modern IIA2 Credits

Study of various styles of modern dance at the advanced beginner level.

Prerequisites: DANC 183.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 231 Contemporary Modern IIB2 Credits

Continued study of various styles of modern dance at the advanced beginning level.

Prerequisites: DANC 183.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 232 Jazz IIA2 Credits

Intermediate jazz dance technique.

Prerequisites: DANC 174, or permission of instructor.

Course may be taken 2 times for credit.

DANC 233 Jazz IIB2 Credits

Intermediate jazz dance technique.

Prerequisites: DANC 232 or permission of instructor.

Course may be taken 2 times for credit.

DANC 234 Ballet IIA2 Credits

Intermediate ballet technique.

Prerequisites: DANC 160, or permission of instructor.

Course may be taken 2 times for credit.

DANC 235 Ballet IIB2 Credits

Intermediate ballet technique.

Prerequisites: DANC 234 or permission of instructor.

Course may be taken 2 times for credit.

DANC 236 Tap IIA2 Credits

Intermediate tap dance technique.

Prerequisites: DANC 177 or permission of instructor.

Course may be taken 2 times for credit.

DANC 237 Tap IIB2 Credits

Intermediate tap dance technique.

Prerequisites: DANC 236 or permission of instructor.

Course may be taken 2 times for credit.

DANC 240 Dance Company2 Credits

Experience in rehearsal, performance, collaborative creative practice, and community engagement. For second year students.

Terms Typically Offered: Spring.

DANC 250 Dance Improvisation2 Credits

Introduction to and application of basic theories of dance improvisation.

DANC 254 Dance Team1 Credit

Participation on the Mavettes Dance Team at the sophomore standing level.

DANC 256 Dance Performance1 Credit

Student participation in the production of a dance supervised by faculty or guest artist. Students must audition.

Corequisites: one technique class.

Course may be taken 2 times for credit.

DANC 260 Movement Analysis and Improvisation3 Credits

Introduction to the functional and expressive elements of human movement with a specific emphasis on Laban Movement Analysis, improvisation, and creative practice.

Terms Typically Offered: Fall, Spring.

DANC 285 Hip-Hop II2 Credits

Study of hip-hop dance and the styles demonstrated within the elements of hip-hop dance at the intermediate level.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 290 Choreography Practicum I1 Credit

Student practice in choreography and producing an original dancework. May be repeated once for credit.

Course may be taken 2 times for credit.

DANC 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

DANC 310 Dance Pedagogy3 Credits

Theory and application of methods of teaching dance techniques.

Prerequisites: 4 semester hours of dance technique (ballet, jazz, modern and/or tap).

DANC 315 History and Philosophy of Dance3 Credits

Study of the history and development of concert and theatrical dance, emphasizing 20th and 21st century dance.

Prerequisites: ENGL 112.

Terms Typically Offered: Fall, Spring.

DANC 316 History and Philosophy of Dance II3 Credits

Cultural, historic, and aesthetic exploration of dance in the 20th Century.

Prerequisites: DANC 315.

DANC 330 Contemporary Modern IIIA2 Credits

Study of various styles of modern dance at the intermediate level.

Prerequisites: DANC 230 or DANC 231.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 331 Contemporary Modern IIIB2 Credits

Continued study of various styles of modern dance at the intermediate level.

Prerequisites: DANC 230 or DANC 231.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 332 Jazz IIIA2 Credits

Intermediate to advanced jazz dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 333 Jazz IIIB2 Credits

Intermediate to advanced jazz dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 334 Ballet IIIA2 Credits

Intermediate to advanced ballet technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 335 Ballet IIIB2 Credits

Intermediate to advanced ballet technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 336 Tap IIIA2 Credits

Intermediate to advanced tap dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 337 Tap IIIB2 Credits

Intermediate to advanced tap dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 340 Dance Company2 Credits

Experience in rehearsal, performance, collaborative creative practice, and community engagement. For third year students.

Terms Typically Offered: Spring.

DANC 354 Dance Team1 Credit

Participation on the Mavettes Dance Team at the junior standing level.

DANC 355 Choreography and Creative Practice3 Credits

Investigation and application of theories of choreography and creative practice, including critical analysis of the art form.

Prerequisites: DANC 260.

Terms Typically Offered: Fall, Spring.

DANC 356 Dance Performance1 Credit

Student participation in the production of a dance work supervised by faculty or guest artist.

Prerequisites: by audition, DANC 256, or permission of instructor.

Corequisites: one technique class.

Course may be taken 2 times for credit.

DANC 385 Hip-Hop III2 Credits

Study of hip-hop dance and the styles demonstrated within the elements of hip-hop dance at the advanced level.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 390 Choreography Practicum III1 Credit

Student practice in choreography and producing an original dance work. May be repeated once for credit.

Prerequisites: DANC 290 or permission of instructor.

Course may be taken 2 times for credit.

DANC 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

DANC 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

DANC 430 Contemporary Modern IVA2 Credits

Study of various styles of modern dance at the advanced level.

Prerequisites: DANC 330 or DANC 331.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 431 Contemporary Modern IVB2 Credits

Continued study of various styles of modern dance at the advanced level.

Prerequisites: DANC 330 or DANC 331.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

DANC 432 Jazz IVA2 Credits

Advanced jazz dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 433 Jazz IVB2 Credits

Intermediate to advanced jazz dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 434 Ballet IVA2 Credits

Intermediate to advanced ballet technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 435 Ballet IVB2 Credits

Advanced ballet technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 436 Tap IVA2 Credits

Intermediate to advanced tap dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 437 Tap IVB2 Credits

Advanced tap dance technique.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

DANC 440 Dance Company2 Credits

Experience in rehearsal, performance, collaborative creative practice, and community engagement. For fourth year students.

Terms Typically Offered: Spring.

DANC 454 Dance Team1 Credit

Participation on the Mavettes Dance Team at the senior standing level.

DANC 456 Dance Performance1 Credit

Student participation in the production of a dance work supervised by faculty or guest artist.

Prerequisites: by audition, DANC 356, or permission of instructor.

Corequisites: one technique class.

Course may be taken 2 times for credit.

DANC 490 Choreography Practicum III1 Credit

Student practice in choreography and producing an original dance work.

Prerequisites: DANC 390 or permission of instructor.

Course may be taken 2 times for credit.

DANC 494 Senior Dance Capstone3 Credits

Exploration of and preparation for dance professions/careers for upper division dance students.

DANC 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

DANC 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

DANC 499 Internship1-9 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Digital Filmmaking (FILM)

FILM 110 Film Expression3 Credits

Critical examination of the nature and structure of motion picture expression. Concentrates on directors', editors', and cinematographers' use of various storytelling and visual techniques.

FILM 115 Cinema Design Tools3 Credits

Exploration of Digital SLR camera use, raster photo-editing software, and vector drawing software for narrative video production.

Fees: Yes.

FILM 120 Film Script Analysis3 Credits

Study of film scripts by critically focusing on story techniques and analytical methods of summarizing, describing, interpreting, discussing and evaluating story narrative.

FILM 125 Production Drawing & Design3 Credits

Foundational methods of digital drawing to create characters and scenery for filmmaking concept art and previsualization.

Fees: Yes.

FILM 130 Short-Form Screenwriting3 Credits

Project- and activity-based introduction in screenwriting. Write, rewrite, and polish short-form scripts through collaboration. Build a portfolio to use in student productions.

Fees: Yes.

FILM 135 Cinema Editing Aesthetics3 Credits

Foundations of video editing theory. Find a personal editorial voice by uncovering the building blocks, personal decisions, and practices that make up the craft of narrative editing.

FILM 139 Professional Documentary Production3 Credits

Proposing, researching, writing, and shooting original documentary projects. Students will be introduced to basic digital single-lens reflex camera cinematography theory and techniques.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 140 Commercial & Corporate Production3 Credits

Introduction to basic digital single-lens reflex camera cinematography theory and techniques through commercial and corporate collaborative production.

Fees: Yes.

FILM 141 Film Production Assistant I1 Credit

Foundational film production assistant skills. Assist in all phases of on-location production of second-year student films. Students may assist at nights and weekends.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 142 Film Production Assistant II1 Credit

Development of production coordinator leadership skills. In addition, assisting in all phases of on-location production of second-year student films. Students may assist at nights and weekends.

Prerequisites: FILM 141.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 143 Cinema Lighting3 Credits

Theoretical examination of cinematic lighting techniques for interior, exterior, and location settings. Analyze cinematic lighting examples to plan, design, and implement their re-creation.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 144 Sound Design for Film3 Credits

Principles and applications of basic audio recording, location mixing principles, Foley, and sound effects, which enhance soundtracks for media productions.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 145 Commercial & Corporate Video Editing3 Credits

Basic editing, manipulating and delivery of narrative video. Explore non-linear editing techniques including media management, editing tools, titles, motion control, and transitions.

Fees: Yes.

FILM 150 Episodic Screenwriting3 Credits

Practical experience of writing realizable television and web series scripts. Emphasis on workshopping a pilot episode and creating the ancillary materials required to produce and market it.

Prerequisites: FILM 130.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 155 Commercial Audio Design3 Credits

Principles and application of basic audio recording and mixing principles by enhancing soundtracks for media productions.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 160 Cinema Previsualization3 Credits

Preproduction development in a digital environment. Includes traditional storyboarding and modern techniques using 3D or photo manipulation software.

Fees: Yes.

FILM 165 Cinema Production Design3 Credits

Determination of emotional content of artistic choices in set design, locations, props, wardrobe and makeup through script and character analysis techniques, the research and previsualization process, and color theory.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 170 Short-Form Production3 Credits

Basic techniques and tools of short-form video production. Use of narrative visual storytelling components and expressive visual elements.

Prerequisites: FILM 130.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 175 Short-Form Video Editing3 Credits

Intermediate short-form video editing. Refine workflows and production pipelines, advanced audio integration, transitions, and motion graphics.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 200 Directing Film Actors1 Credit

Processes and techniques of directing film actors. Focus on script interpretation, working with actors, rehearsal, blocking for the camera, preparation for shooting, camera motivation, and dynamics.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 209 Production Budget and Scheduling3 Credits

Planning, scheduling, and budgeting for film production. Predict, calculate, and estimate insurance requirements, unions, and guilds. Use basic accounting practices to complete a budget and schedule.

Terms Typically Offered: Spring.

FILM 210 Cinema Production Management3 Credits

Processes and techniques of film and television producing. Predict, calculate, and estimate for insurance requirements, unions and guilds. Use basic accounting practices to complete a budget and schedule.

Terms Typically Offered: Fall.

FILM 220 Cinema Audio Design3 Credits

Advanced cinematic audio recording techniques. Practice location recording, Foley, looping/ADR, sound effects layering, synchronization techniques, and surround sound mixing.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 225 Cinema Capstone I3 Credits

First part of a two-semester sequence for the Cinema Capstone. Collaborate with Production Design students during a production's preproduction. Create a production's marketing plan.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 226 Technical Capstone I3 Credits

First part of a two-semester sequence for the Technical Capstone. Collaborate with Writing/Directing students in the preproduction process. Help create a production marketing plan.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 230 Episodic Production3 Credits

Continuation of collaborative development of advanced learn-by-doing productions. Develop and demonstrate the skills necessary to make effective and successful TV or web series.

Prerequisites: FILM 150.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 240 Digital Cinematic Effects3 Credits

Digital cinematic effects development in the post-production environment. Analyze style and emotional aesthetic and learn to support story by synthesizing video elements.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 250 Episodic Video Editing3 Credits

Further exploration of advanced digital editing techniques. Edit a final episodic narrative production. Master collaborative workflows, advanced audio production, and special effects.

Terms Typically Offered: Fall.

Fees: Yes.

FILM 260 Freelancing for Creatives3 Credits

Examination of self-employment. Explore networking, financing, basic business law, insurance, intellectual property rights, government regulations, time management, record keeping, taxes, and work-life balance.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 265 Producing Indie Films3 Credits

Basic principles to produce independent films. Create a business plan that includes marketing, financing, and distribution and measuring, analyzing, and assessing the industry, box office, markets, and risk factors.

Prerequisites: FILM 209.

Terms Typically Offered: Fall.

FILM 270 Cinema Capstone II4 Credits

Second part of a two-semester sequence for the Cinema Capstone. Collaborate with Production Design students during shooting, post, and presentation of either a narrative, corporate, or series production.

Prerequisites: FILM 225.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 271 Technical Capstone II3 Credits

Second part of a two-semester sequence for the Technical Capstone. Collaborate with Writing/Directing students on either a short-form narrative, corporate, or series production.

Prerequisites: FILM 226.

Terms Typically Offered: Spring.

Fees: Yes.

FILM 299 Internship1-2 Credits

Application of classroom theory to on-the-job experiences. Work at approved professional positions related to film and TV production.

Terms Typically Offered: Spring, Summer.

Early Childhood Teaching - Special Ed (ECSE)

ECSE 320 Learner Development and Individual Differences3 Credits

Exploration of child development and individual differences to respond to the unique and individualized needs of young children with exceptionalities.

Prerequisites: Admission to the Teacher Education Program.

Terms Typically Offered: Fall.

ECSE 410 Building Family and Community Partnerships1 Credit

Introduction to the concept of family systems, the impact of children with diverse needs upon the family system, and the role of the educator in partnering with families and the community.

Prerequisites: Admission into the Teacher Education program.

ECSE 430 Instructional Strategies for Inclusion and Intervention, Birth-8 Years3 Credits

Exploration of evidence-based instructional strategies, focused on communication and sensory processing, to advance learning of young children with exceptionalities.

Prerequisites: EDUC 340, EDUC 374, and ECSE 320.

ECSE 435 Assessment and Evaluation of the Young Child, Birth-8 Years3 Credits

Exploration and application of technically sound formal and informal assessments that minimize bias, and measurement principles and practices to evaluate and guide educational decisions through collaboration with colleagues and families.

Prerequisites: EDUC 340 and ECSE 320.

ECSE 450 Individual Behavior Support and Guidance with Young Learners3 Credits

Exploration of behavioral theories and their application to individual and classroom management of young learners with an emphasis on the principles of applied behavior analysis.

Prerequisites: EDUC 340, EDUC 374, and ECSE 320 .

ECSE 493 Senior Capstone3 Credits

Teaching experience in an inclusive classroom, with opportunities to apply standards-based education, theories, and philosophies acquired in professional education coursework. Provides support in teaching and learning of early childhood students, ages birth - prekindergarten.

Prerequisites: EDEC 256, EDUC 301, EDUC 311, ECSE 320, EDUC 340, and EDUC 343.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken 2 times for credit.

ECSE 499 Teaching Internship and Colloquia: Early Childhood Ages 3 - 5/ Pre-K6 Credits

Participation in full-time supervised teaching experience for eight weeks in an inclusive classroom designed to allow the intern the opportunity to apply standards-based education, theories, and philosophies acquired in professional education coursework. Provides support in teaching and learning of Pre-K students, ages 3 - 5.

Prerequisites: All program and degree requirements and courses must be successfully completed.

Economics (ECON)**ECON 201 Principles of Macroeconomics-GTSS13 Credits**

Introduction to basic methods of economic analysis and modelling, knowledge of the "language" of economics, and comprehension of the basic principles of supply and demand, inflation, unemployment, economic growth, fiscal policy, monetary policy, and applications to modern economic thought and practice. These economic principles will become apparent in current events, and will be used to interpret/critique real world arguments.

Prerequisites: Sophomore Standing.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ECON 202 Principles of Microeconomics-GTSS13 Credits

Introduction to basic principles of supply and demand, elasticity of demand, marginal analysis, market structure, pricing and efficiency, consumer, producer, and worker behaviors, and market failures. These economic principles will become apparent in current events, specifically in the areas of taxation, the labor market, externalities, and public goods, and will be used to interpret/critique real world arguments.

Prerequisites: ECON 201.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ECON 301 Labor Economics3 Credits

Survey of market wage and employment determination, wage differentials and discrimination, the value of human capital, and the role of government and unions in the labor market. Counts as management course for BBA candidates.

Prerequisites: ECON 201 and ECON 202.

ECON 310 Money and Banking3 Credits

Monetary, credit, and banking systems in the United States. Counts as management course for BBA candidates.

Prerequisites: ECON 201, ECON 202, or equivalent.

ECON 312 Economic History of the United States3 Credits

Economic development of the United States and the nation's economic institutions from the colonial period to the present.

Prerequisites: ECON 201, ECON 202 or HIST 131, HIST 132, or permission of instructor.

ECON 320 History of Economic Ideas3 Credits

Development of economic analysis, thought, theories, and doctrines from the ancient world to recent times.

Prerequisites: ECON 201, ECON 202, or equivalent.

ECON 342 Intermediate Macroeconomic Theory3 Credits

Factors determining the level and rate of growth of GDP, the inflation rate, and the employment rate. Policies that have been (or may be) used to influence these variables, and empirical evidences on the relationships among variables are also studied.

Prerequisites: ECON 201, ECON 202, or equivalent, or permission of instructor.

ECON 343 Intermediate Microeconomic Theory3 Credits

Problems of resource scarcity in a market economy. Emphasis is placed on an analysis of resource allocation under different forms of competition. Covers theory of the firm, theories of market structure, efficiency, equity, and the application of public policy.

Prerequisites: ECON 201, ECON 202, or equivalent, or permission of instructor.

ECON 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ECON 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ECON 401 Economic Organization and Public Policy3 Credits

Political economy of economic organization and public policy including analysis of the structure/conduct dimensions of industry and government institutions and their effects on resource allocation, income distribution, and economic performance. Antitrust, regulation, and other policies are treated concurrently. Counts as a management course for BBA candidates.

Prerequisites: ECON 201, ECON 202 or equivalent.

ECON 410 Public Sector Economics3 Credits

Political economy of government finance including analysis of the effects of government revenue and expenditure policies on resource allocation, income distribution, and economic performance. Counts as a management course for BBA candidates.

Prerequisites: ECON 201, ECON 202, or equivalent.

ECON 415 Econometrics3 Credits

Application of advanced statistical methods to economic and business problems. Includes multiple regression analysis. Sophisticated cross sectional models such as instrumental variable, probit, and tobit.

Time series topics such as forecasting, autoregressive models, vector autoregressions, cointegration, and some panel methods.

Prerequisites: CISB 341 and ECON 201.

ECON 420 International Economics3 Credits

International trade theory and policy such as balance of payments analysis, international investment flows, and the position of the dollar in foreign exchange transactions.

Prerequisites: ECON 201, ECON 202, or equivalent.

ECON 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ECON 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ECON 505 Advanced Econometrics3 Credits

Application of advanced statistical methods to economic and business problems. Includes multiple regression analysis. Sophisticated cross sectional models such as instrumental variable, probit, and tobit.

Time series topics such as forecasting, autoregressive models, vector autoregressions, cointegration, and some panel methods. Demonstration of mastery of material through graduate level projects, writing, and presentations.

Prerequisites: CISB 341 and ECON 201.

ECON 530 Managerial Economics3 Credits

The focus of this course is the application of economic theory and its tools to everyday business activities. Topics to be covered include the analytical tools of economics, macro and micro economic theory, and factors that influence demand.

Education (EDUC)

EDUC 100 Introduction to Libraries3 Credits

Provides a general overview of libraries and their roles in schools and the community. The evolving role of libraries will be explored in the context of professional/school settings, different types of libraries, and the evolution of information, access, and distribution in a digital age.

EDUC 101 Information Literacy3 Credits

A theoretical approach to the flow of information and a practical introduction to the skills necessary to navigate information systems. Print and electronic resources; legal, economic, social and public aspects of information resources; strategies for critical evaluation of information resources; library services and resources.

EDUC 115 What It Means To Be An Educator1 Credit

Overview of the teacher education program, profession and what it means to be an educator. Introduction to social, legal, historical, political, theoretical, and philosophical foundations of education. Course time will include school and educational services visitations. Please note: Students must earn a grade of A or B in this class if they desire to be admitted to the Teacher Education program.

Prerequisites: ENGL 111.

EDUC 150 American Education: Past, Present, and Future3 Credits

An honors course that includes an historical view of public and private education; current challenges; demographic, sociological, technological, and economic trends and their effects on education; educational reform; comparative education systems; and future directions for public and private schooling in America.

EDUC 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 215 Teaching as a Profession1 Credit

Overview of the teacher education program and profession. Introduction to schools, curriculum and instruction, accountability, learning environments, developing professionalism, and theoretical and philosophical foundations of education. Course time will include school and educational services visitations. This is an on-campus course that is web-enhanced, meaning we meet face-to-face each week AND we have a web-based course site (D2L) to support the classroom environment. Please note: Students must earn a grade of A or B in this class if they desire to be admitted to the Teacher Education program.

Prerequisites: EDUC 115.

EDUC 301 Emergent Literacy for Early Childhood3 Credits

Exploration of principles, methods, and materials for teaching young children language and literacy through a play-based integrated curriculum from birth to kindergarten. Survey of current research in emergent language and literacy including language development and acquisition, family and community roles, teaching and learning strategies, literature in the curriculum and ongoing assessment. Includes a minimum of 20 hours of field experience.

Prerequisites: EDUC 340 and Admission to Teacher Education Program.

EDUC 311 Creative and Physical Expressions for Children3 Credits

Facilitation of children's creative and physical expression and problem solving in music, art, drama, games, movement, and dance.

Prerequisites: Admission to the Teacher Education Program.

EDUC 340 Pedagogical and Assessment Knowledge for Teachers: Early Childhood, Birth - 8 years3 Credits

Exploration of age/grade level teaching strategies, motivation principles, informal and formal assessments, planning strategies, and classroom management techniques. Includes a minimum of 20 hours of field experience.

Prerequisites: Admission to the Teacher Education Program or permission of instructor.

EDUC 341 Pedagogy and Assessment: K-6/Elementary3 Credits

Exploration of age/grade level teaching strategies, motivation principles, informal and formal assessments, planning strategies, and classroom management techniques. Includes a minimum of 20 hours of field experience.

Prerequisites: Admission to the Teacher Education Program.

Corequisites: EDUC 343.

EDUC 342 Pedagogy and Assessment: Secondary and K-123 Credits

Exploration of age/grade level teaching strategies, motivation principles, informal and formal assessments, planning strategies, and classroom management techniques. Includes a minimum of 20 hours of field experience.

Prerequisites: Admission to the Teacher Education Program.

Corequisites: EDUC 343.

EDUC 343 Teaching to Diversity3 Credits

Study of differences in student development and approaches to learning. Addresses ethnic, linguistic, gender, sexuality, socioeconomic, ability/disability, and community diversity. Includes a minimum of 20 hours of field experience.

Prerequisites: Admission to the Teacher Education Program.

Corequisites: EDUC 340 or EDUC 341 or EDUC 342.

EDUC 374 Exceptional and English Language Learners in the Inclusive Classroom3 Credits

Study of exceptionalities and English Language Learner (ELL) characteristics. The use of strategies for identifying, adapting, accommodating, and/or modifying the learning environment to meet the various needs. Includes intellectually challenged, learning disabled, social/emotional disorders, physically disabled, gifted, and English language learners.

Prerequisites: EDUC 343 with a grade of "B" or higher or may be taken concurrently with EDUC 340.

Terms Typically Offered: Fall.

EDUC 378 Technology for K-12 Educators1 Credit

Digital technology's role in the teaching/learning process. Engaging technology in the classroom. Topics include New Literacies, Web 2.0 tools, e-books, interactive presentation tools, et al.

Prerequisites: Admission to Teacher Education Program.

EDUC 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EDUC 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 440 Methods of Teaching Language and Literacy: EC3 Credits

Survey of current research in early/emergent language and literacy, including language development and acquisition, family and community roles, teaching and learning strategies, literature in the curriculum, and ongoing assessment in instruction. Includes a minimum of 40 hours of field experience.

Prerequisites: Admission to the Teacher Education Program; EDUC 340 or EDUC 341.

Terms Typically Offered: Fall, Spring.

EDUC 441 Methods of Teaching Language and Literacy: Elementary3 Credits

Exploration of student literacy development in multiple literacies, with a focus in fluency and comprehension. Study and application of instructional strategies for the reading/writing processes, vocabulary development, spelling development, comprehension strategies, reading and writing workshops, literacy assessment, and integration across the content areas. Field placements will be in a lab school environment for two mornings of school per week. Includes a minimum of 80 hours field experience.

Prerequisites: Admission to the Teacher Education Program, EDUC 340 and/or EDUC 341 and EDUC 343.

EDUC 442 Integrating Literacy Across the Curriculum: Secondary and K-12 Art3 Credits

Exploration of multiple forms of student literacies. Study and application of instructional strategies for various literary genres across the middle school and high school curriculum with a focus in philosophical and theoretical perspectives from multicultural texts. Candidates develop a fully integrated unit to implement in field study. Includes a minimum of 60 hours of field experience.

Prerequisites: Admission to the Teacher Education Program, EDUC 342, and EDUC 343.

Terms Typically Offered: Fall, Spring.

EDUC 451 Methods of Teaching Mathematics: Early Childhood/Elementary3 Credits

Prepares students to teach mathematics to elementary age students. Focus on major concepts, procedures, and reasoning processes that define number systems and number sense, geometry, measurement, statistics and probability, and algebra. Theoretical and practical approaches support learning about standards, content, delivery, and assessment. Field placements will be in a lab school environment for three afternoons of school per week. Includes a minimum of 60 hours of field experience.

Prerequisites: Admission to the Teacher Education Program, EDUC 340 and/or EDUC 341, EDUC 343, MATH 105, MATH 205, and MATH 301.

Corequisites: EDUC 471.

EDUC 461 Methods of Teaching Science and Social Studies: Early Childhood/Elementary3 Credits

Study and application of content standards in science, health, civics, geography, history, and economics for elementary age students. Develops teaching proficiency and an understanding of integration of these subjects across the content areas. Field experiences are incorporated into the math/literacy block during three school days per week.

Prerequisites: Admission to the Teacher Education Program, EDUC 340 and/or EDUC 341, EDUC 343.

Corequisites: EDUC 471.

EDUC 471 Educational Assessment for the K-12 Educator1 Credit

Current principles of assessment in the K-12 classroom. Includes selecting, developing, and evaluating a variety of assessment methods/types in the various content areas. Discuss how to analyze, interpret, and communicate assessment results with administrators, families, and students for the purposes of making instruction/curricular decisions.

Prerequisites: EDUC 341 or EDUC 342, and EDUC 343.

Corequisites: EDUC 441, EDUC 451, EDUC 461, or permission of instructor.

EDUC 475 Classroom Management for K-12 Educators1 Credit

Effective classroom management. Establish productive classroom climate. Applications of management techniques to help students become responsible for their behaviors and choices. Student motivation, positive student-teacher relationships, effective partnerships between parents and school. Includes strategies to minimize and prevent classroom and behavior management problems as well as time management techniques.

Prerequisites: EDUC 342 or EDUC 440.

Terms Typically Offered: Fall, Spring.

EDUC 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EDUC 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 497 Content Methodology Practicum3 Credits

Theory and practice of differentiated instruction, lesson study design and implementation, and basic concepts of Understanding by Design. Introduction to comprehensive school reform and curriculum design, as well as a focus on the improvement of teaching methodology across the curriculum. Includes a minimum of 80 hours of field experience.

Prerequisites: Admission to the Teacher Education Program, EDUC 342 and EDUC 343, and completion of all content area courses.

Corequisites: EDUC 442 and EDUC 497A/EDUC 497B/EDUC 497C/EDUC 497D/or EDUC 497E as required by degree.

Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 497A Methods of Teaching Secondary English2 Credits

Theory and practice of teaching English language arts in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in reading comprehension, language, linguistics, comprehension, and rhetoric. Lesson preparation and presentation required.

Prerequisites: Admission to Teacher Education Program.

Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.

Terms Typically Offered: Fall.

EDUC 497B Methods of Teaching Secondary Social Sciences2 Credits

Theory and practice of teaching history and the social sciences in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in United States history, world history, government, civics, political science, geography, economics, and behavioral science. Lesson preparation and presentation required.

Prerequisites: Admission to Teacher Education Program.

Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.

Terms Typically Offered: Fall.

EDUC 497C Methods of Teaching Secondary Mathematics2 Credits

Theory and practice of teaching mathematics in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in arithmetic, basic algebra, functions, graphing, probability, statistics, and integrated math. Lesson preparation and presentation required.

Prerequisites: Admission to the Teacher Education Program.

Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.

Terms Typically Offered: Fall.

EDUC 497D Methods of Teaching Secondary Science2 Credits

Theory and practice of teaching science in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in: scientific methodology, techniques, and history; physical, life, and earth sciences; and science and technology. Lesson preparation and presentation required.

Prerequisites: Admission to Teacher Education Program.

Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.

Terms Typically Offered: Fall.

EDUC 497E Methods of Teaching Secondary Spanish2 Credits

Theory and practice of teaching Spanish in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in: interpretive listening, structure of the language and grammatical accuracy, interpretive reading, and cultural perspectives. Lesson preparation and presentation required.

Prerequisites: Admission to Teacher Education Program.

Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.

Terms Typically Offered: Fall.

EDUC 499A Teaching Internship and Colloquia: K-26 Credits

Full-time supervised teaching experience for eight weeks in an inclusive classroom designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Provides support in teaching and learning of K-2 students.

Prerequisites: All program and degree requirements must be successfully completed.

EDUC 499B Teaching Internship and Colloquia: 3-66 Credits

Available for students who are pursuing ECE/ELED licensure and standards-based education: an eight-week experience. Colloquiums are included and required.

Prerequisites: Formal admission to the Teacher Education Program; EDUC 340 and/or EDUC 341, EDUC 343, EDUC 440 and/or EDUC 441, EDUC 451; all other course work for bachelor's degree completed; 2.75 cumulative GPA as well as 2.75 GPA in major and 2.75 GPA in EDUC classes.

EDUC 499C Teaching Internship and Colloquia: Elementary12 Credits

Full-time (40 hrs min/week) supervised teaching experience designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Three required colloquia on Thursday evenings are included during this 15-week experience. Students must begin internship a minimum of one week prior to the beginning of the district school semester, regardless of the Colorado Mesa University start date.

Prerequisites: Formal admission to the Teacher Education Program; EDUC 341, EDUC 343, EDUC 441, EDUC 451, EDUC 461 and all other course work for bachelor's degree completed; as well as 2.8 GPA in major and 2.8 GPA in EDUC classes.

EDUC 499D Teaching Internship and Colloquia: Elementary for K-126 Credits

Full-time (40 hrs min/week) supervised teaching experience designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Required colloquia on Thursday evenings are included during this eight-week experience.

Prerequisites: Formal admission to the Teacher Education Program; EDUC 342, EDUC 343, EDUC 441 (except Music and Kinesiology majors); appropriate content area methods course/s; all other coursework for bachelor's degree completed; 2.8 cumulative GPA as well as 2.8 GPA in major and 2.8 GPA in EDUC classes.

Corequisites: EDUC 499H.

EDUC 499G Teaching Internship and Colloquia: Secondary12 Credits

Full-time (40 hours min/week) supervised teaching experience designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Three required colloquia on Thursday evenings are included during this 15-week experience. Students must begin internship a minimum of one week prior to the beginning of the district school semester, regardless of the Colorado Mesa University start date.

Prerequisites: Formal admission to the Teacher Education Program; EDUC 342, EDUC 343, EDUC 442, EDUC 497, and EDUC 497A, EDUC 497B, EDUC 497C, EDUC 497D, or EDUC 497E as appropriate for content area major; all other course work for bachelor's degree completed; 2.8 cumulative GPA, as well as 2.8 GPA in major and in 2.8 GPA in EDUC classes.

EDUC 499H Teaching Internship and Colloquia: Secondary for K-126 Credits

Supervised teaching experience at the secondary level for students who are pursuing K-12 licensure and standards-based education. Several colloquia are included in the eight-week experience.

Prerequisites: Formal admission to the Teacher Education Program; EDUC 342, EDUC 343, EDUC 442 (except Music and Kinesiology majors); appropriate content area methods course/s; all other course work for bachelor's degree completed; 2.75 cumulative GPA as well as 2.75 GPA in major and 2.75 GPA in EDUC classes.

EDUC 500 Culture and Pedagogy3 Credits

This course centers on Pedagogy that explores the relationships between culture and learning as well as teacher ideology and belief systems. Examines critical pedagogy, pedagogies of resistance, and teaching for social justice.

Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 501 Educational Technology2 Credits

Historical and conceptual analyses of ways to design, organize, and integrate curricula across subject areas. Review of various instructional design models and fundamental design principles that guide the development of instructional materials. Students will create multimedia materials for incorporation into a final product. Critique of curriculum discourse, process, and product. Teachers' roles in site-based curriculum and staff development.

EDUC 502 Theory, Design & Assessment of Curriculum3 Credits

Introduction to instructional design; production and evaluation of computer-based instructional materials and software; selection, evaluation, and use of instructional media.

EDUC 503 Introduction to Educational Research and Design3 Credits

An analysis of differing orientations to evaluation and research. Emphasis on assumptions, attitudes, and expectation of what constitutes scientific knowledge and explanation; relationship of research orientation, methods of inquiry theory, and practice in both qualitative and quantitative research strategies.

Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 504 Methods of Teaching English as a Second Language3 Credits

Theory and practice of teaching English as a second language; techniques for teaching pronunciation, reading and writing in the context of communicative competence; analysis of resources available for ESL.

EDUC 510 ESL Strategies/Content Areas3 Credits

Strategies for assessing and teaching linguistically-diverse students in the content areas. Topics include role-playing, language dynamics, measurement, relevant research, and classroom practice.

EDUC 521 Educational Foundations, Student Development, and Ethics3 Credits

Introduction to the history of education in the United States through exploration of the ideologies and theoretical frameworks. The course provides students with a foundation in the concepts, theories and principles that support student development, behavior and learning in educational settings. Emphasis is placed on developing professional responsibilities and ethical conduct that supports a learning environment.

Prerequisites: Acceptance into the ITL graduate program.

Terms Typically Offered: Spring, Summer.

EDUC 535 Internship in ESOL: K-63 Credits

This practicum applies theory and research to the analysis and synthesis of field experiences in ESOL. The practicum will be integrated into a concluding research project that structures students' reflections about their growth and vision as a leader. Through exploration of research and practicum methodology students will frame their capstone project proposals leading to final analysis and presentation following.

Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 541 Exceptional Learners3 Credits

Study of exceptionality and special education, legislation, individualized education programs (IEP), planning and delivering services, multicultural and bilingual aspects of special education, classifications (impairments), exceptionality and the family. 20-hour field experience required.

EDUC 543 Inclusion Methods/Strategies3 Credits

Collaboration, community and families, legal aspects of placement, classroom management, and methods and strategies used in inclusive classrooms. Each student is required to complete a minimum of 20 field experience hours.

EDUC 545 Internship in ESOL: 7-123 Credits

This practicum applies theory and research to the analysis and synthesis of field experiences in ESOL. The practicum will be integrated into a concluding research project that structures students' reflections about their growth and vision as a leader. Through exploration of research and practicum methodology students will frame their capstone project proposals leading to final analysis and presentation following.

Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 554 Theories of Second Language Acquisition3 Credits

Research on second language acquisition, differences between first and second language acquisition, application of theories to classroom practice.

EDUC 555 Multicultural Narratives/K-123 Credits

Survey of multicultural literature suitable for the K-12 classroom. Cultural awareness, diversity, developmentally-appropriate materials, book and media selection for bilingual and English-language learners in grades K-12.

EDUC 556 Assessment in English as a Second Language3 Credits

Assessment of linguistically-diverse students, developing instructional plans for linguistically-diverse students, measurement, relevant research, classroom practice, legal and social responsibilities.

EDUC 562 Curriculum, Instruction, and Assessment6 Credits

Examination of the science of learning and the impact that compatible instruction has on learning, instruction, and classroom management. Students in the course analyze how learning theories, practices, and research-based strategies can support the development of effective curriculum, instruction, and assessment to promote student success.

Prerequisites: Acceptance into the ITL graduate program.

Terms Typically Offered: Summer.

EDUC 570 Classroom Management1 Credit

Applications of advanced classroom management techniques to help students become responsible for their behaviors and choices. Includes student motivation, positive student-teach relationships, and effective partnerships between parents and school. Includes strategies to minimize and prevent classroom and behavior management problems, as well as time management techniques.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 578 Elementary Reading and Language Arts Theory and Methodology K-63 Credits

Advanced exploration in designing, developing, implementing and assessing well-aligned, well-differentiated, discipline specific curricula, instruction, assessments and accommodations related to developmental, gender, bilingual, special education unique to K-6 Literacy Education. Field placements will be in a lab school environment for three days of school per week. Includes a minimum of 80 hours of field experience.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580 Secondary Instructional Methods Across the Curriculum3 Credits

Advanced theory and practice of differentiated instruction, lesson study design and implementation. Advanced curriculum design, teaching methodology across the curriculum.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580A Secondary Instructional Methods for English Language Arts2 Credits

Advanced theory and practice of teaching English language arts in middle and high schools. Current strategies programs, materials, and media for the development of curriculum in reading comprehension, language, linguistics, and rhetoric.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580B Secondary Instructional Methods for Social Studies2 Credits

Advanced theory and practice of teaching history and the social sciences in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in United States history, world history, government, civics, political science, geography, economics, and behavioral science.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580C Secondary Instructional Methods for Mathematics2 Credits

Advanced theory and practice of teaching mathematics in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in arithmetic, basic algebra, functions, graphing, probability, statistics, and integrated math.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580D Secondary Instructional Methods for Science2 Credits

Advanced theory and practice of teaching science in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in: scientific methodology, techniques, and history; physical, life, and earth sciences; and science and technology.
Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580E Secondary Instructional Methods for Spanish2 Credits

Advanced theory and practice of teaching Spanish in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in: interpretive listening, structure of the language and grammatical accuracy, interpretive reading, and cultural perspectives.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 580F Secondary Instructional Methods for Physical Education3 Credits

Advanced theory and practice of instructional strategies on a practical application level for prospective secondary physical education teachers preparing for entry into student teaching. Current strategies, programs, materials, and media for the development of curriculum in physical education in secondary classrooms.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 584 Secondary Literacy Methods Across the Curriculum3 Credits

Advanced exploration of multiple forms of student literacies. Study and application of reading and comprehension strategies for literacy instruction in middle school and high school content areas. Candidates develop a fully integrated unit to implement in field study. This course includes a minimum of 200 field hours.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 585 Elementary Integrated Science, Social Studies, and Art Theory and Methodology K-63 Credits

Advanced study and application of content standards in science, art, civics, geography, history, and economics for elementary age students. Develops teaching proficiency and an understanding of integration of these subjects across the content areas. Field placements will be in a lab school environment for three days of school per week. Includes a minimum of 40 hours of field experience.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 586 Accommodating Diverse and Exceptional Needs3 Credits

Designing, developing, implementing and assessing the effectiveness of instruction differentiated for relevant student diversity and exceptionalities; teaming with specialists; current state and federal guidelines and mandates.

Terms Typically Offered: Summer.

EDUC 588 Elementary Mathematics Theory and Methodology K-63 Credits

Advanced exploration in designing, developing, implementing, and assessing well-aligned, well-differentiated, discipline-specific curriculum, instruction, assessments and accommodations unique to K-6 Math Education. Field placements will be in a lab school environment for three days of school per week. Includes a minimum of 80 hours of field experience.

Prerequisites: EDUC 521, EDUC 562, and EDUC 586.

Terms Typically Offered: Fall.

EDUC 595 Topics in Teaching0.5-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EDUC 596 Topics in the Content Areas0.5-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 599A ITL 3: Directed Teaching: Elementary Education9 Credits

Continued, full-time, mentored elementary school placement to develop independent professional competence in instructional design, implementation and assessment. Students will document having had a positive effect on student learning across 15 weeks of full-time, independent teaching from January to May. Two colloquia are an integral part of the experience requirement.

Prerequisites: EDUC 521, EDUC 562, EDUC 578, EDUC 585, EDUC 586, and EDUC 588.

Terms Typically Offered: Spring.

EDUC 599B ITL 3: Directed Teaching: Secondary Education9 Credits

Continued, full-time, mentored secondary school placement to develop independent professional competence in instructional design, implementation and assessment. Students will document having had a positive effect on student learning, across 15 weeks of full-time, independent teaching from January to May. Two colloquia are an integral part of the experience requirement.

Prerequisites: EDUC 521, EDUC 562, EDUC 570, EDUC 580, EDUC 584, EDUC 586, and one of the following: EDUC 580A, EDUC 580B, EDUC 580C, EDUC 580D, or EDUC 580E.

Terms Typically Offered: Spring.

EDUC 599C ITL 3: Directed Teaching, Physical Education9 Credits

Continued, full-time, mentored Physical Education placement to develop independent professional competence in instructional design, implementation, and assessment. Students will document having had a positive effect on student learning, across 16 weeks of full-time independent teaching from January to May, consisting of one 8-week elementary placement and one 8-week secondary placement. One colloquium is an integral part of the experience requirement.

Prerequisites: EDUC 521, EDUC 562, EDUC 580, EDUC 580F, EDUC 584, and EDUC 586.

Terms Typically Offered: Spring.

EDUC 600 Master's in Education Capstone1 Credit

Synthesis of graduate work that demonstrates a critical connection between theory and practice. Students take a scholarly approach to researching a topic, reviewing literature, and making connections to educational practice. The Capstone project culminates in formal written work and an oral presentation.

Prerequisites: EDUC 503.

Terms Typically Offered: Fall, Spring, Summer.

Education - Career/Tech (EDUT)

EDUT 250 Career and Technical Education in Colorado1 Credit

Explores common elements of Career and Technical Education philosophy and current practices. It details the philosophy of Career and Technical Education (CTE), the federal Carl D. Perkins legislation and related guidelines for CTE, the Colorado Technical Act, national and state regulatory agencies, the CCCS program approval process, enrollment management and advising strategies, relevant local and national issues, and quality assurance principles.

EDUT 251 Secondary CTE Capstone3 Credits

This capstone course in the secondary CTE credentialing sequence offers an in-depth analysis of secondary career and technical student organizations and competitions, the Colorado Technical Act, working with exceptional students, creating and effectively deploying program advisory committees, and an overview of educational and political systems in Colorado. The final project is an analysis of the efficiency with which one's employing school district funds, operates and assesses CTE programs.

EDUT 260 Adult Learning and Teaching3 Credits

Examines the philosophy of community colleges and/or secondary schools and the roles and responsibilities of the faculty member within the college/school community. Introduces basic instructional theories and applications, with particular emphasis on adult learners. Includes syllabus development, learning goals and outcomes, and lesson plans. Emphasizes teaching to a diverse student body, classroom management, assessment and instructional technology.

EDUT 288 Practicum III Credit

Provides students with the opportunity to supplement coursework with practical work experience related to their educational program. Students work under the immediate supervision of experienced personnel at the education facility and with the direct guidance of the instructor.

EDUT 289 Capstone1 Credit

Focuses on a demonstrated culmination of learning within a given program of study.

Education - Leadership (EDTL)

EDTL 513 Information Based Educational Practice and Statistics3 Credits

Exploration of standards-based educational practice. Analysis and interpretation of data as they inform educational practice. Data Driven Dialogues implemented as catalysts for educational change. Development of skills necessary to observe, analyze, and evaluate data from a multiple measures perspective. Foundational uses of educational statistics applied.

Education - Special Ed (EDSE)

EDSE 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDSE 500 Foundation of Special Education Including Law3 Credits

Knowledge and skills needed in special education. An evolving discipline based on philosophies, evidence-based principles and theories, relevant laws and policies, diverse and historical viewpoints, and societal influences on the education and treatment of individuals with exceptional needs.

EDSE 501 Instructional Strategies in Special Education3 Credits

Overview of methodologies used in the instruction of students with special learning needs. Explores the purpose of an Individualized Education Program and its use as a guide in the development of a learning plan based on the student's learning characteristics including strengths, needs, and the impact of disability on his/her learning in the general education classroom.

EDSE 502 Behavioral Interventions for the Learner with Special Needs3 Credits

Focuses on research-based assessment and intervention strategies for working with students who present challenging behavior in the classroom.

EDSE 503 Methods of Teaching Students with Mild Disabilities Reading and Math3 Credits

Provides an understanding of the nature of reading and arithmetic and of challenges faced by children and adolescents with a wide array of exceptionalities. Major approaches to teaching and learning in reading and math. Development of diagnostic-prescriptive approaches.

EDSE 506 Educating Students with Low Incidence Disabilities in Inclusive Environments3 Credits

Examines types of low-incidence disabilities, including mental retardation, autism, physical disabilities, traumatic brain injury, deafness, blindness, multiple disabilities, and other health impairments, that affect academic and job performance. Current methods for teaching individuals with low-incidence disabilities.

EDSE 510 The Learner Who is Twice Exceptional, Including Gifted and Talented3 Credits

Provides tools to identify twice exceptional students and selection appropriate strategies so that gifted students with disabilities can learn at appropriate levels.

EDSE 515 Internship K-6 Elementary Practicum in Special Education3 Credits

Provides support in teaching and learning of elementary students. Integrated field supervision to achieve professional competencies.

EDSE 520 Internship 6-12 Secondary Practicum in Special Education3 Credits

Provides support in teaching and learning of secondary students. Integrated field supervision to achieve professional competencies.

EDSE 596 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Education - Early Child (EDEC)

EDEC 100A Parent Education and Infants1 Credit

Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children 1 to 18 months old. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken 2 times for credit.

EDEC 100B Parent Education and Toddlers1 Credit

Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children 18 to 36 months old. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken 2 times for credit.

EDEC 100C Parent Education and Early Preschool1 Credit

Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children 3 to 4 years old. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken 2 times for credit.

EDEC 100D Parent Education and School Readiness1 Credit

Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children entering Kindergarten. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken 2 times for credit.

EDEC 101 Introduction to Early Childhood3 Credits

Includes the eight key areas of professional knowledge: Child Growth and Development; Health, Nutrition, and Safety; Developmentally Appropriate Practices; Guidance; Family and Community Relationships; Diversity; Professionalism; Administration and Supervision. Overview of history and philosophy. Focuses on ages birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Fees: Yes.

EDEC 102 Introduction to Early Childhood Professions Lab Experiences3 Credits

Field experience. Demonstrate knowledge of child growth and development, guidance techniques, planning and implementation of curriculum, assessment techniques and application of laws and standards. Supervised placement provides opportunity to observe, to practice appropriate interactions and to develop effective guidance and nurturing techniques. Addresses ages birth through 8. Assignments include a required field experience of 60 hours.

Prerequisites: EDEC 101.

EDEC 103 Guidance Strategies3 Credits

Explores guidance theories and techniques, real world applications, goals, and factors influencing expectations, classroom management issues. Techniques for prosocial skills, violence prevention, anger management and providing families with community resources discussed. Focus on birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 113 Infant and Toddler Theory and Practice3 Credits

Introduction to children from birth through age 3. Includes the eight key areas of professional knowledge: Child Growth and Development; Health, Nutrition and Safety; Developmentally Appropriate Practices; Guidance; Family and Community Relationships; Diversity; Professionalism; Administration and Supervision. Overview of history and philosophy of early childhood education. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 114 Introduction to Infant/Toddler Lab Techniques3 Credits

Field experience. Demonstrate knowledge of child growth and development, guidance techniques, planning and implementation of curriculum, assessment techniques, and application of laws and standards. Supervised placement provides opportunity to observe, to practice appropriate interactions and to develop effective guidance and nurturing techniques. Addresses ages birth through age 3 years. Assignments include a required field experience of 60 hours.

Prerequisites: EDEC 101 or EDEC 113.

EDEC 122 Ethics in Early Childhood Education1 Credit

Practical approach to recognizing, understanding, and resolving issues confronting professionals in education and business. Emphasizes historical development of ethics. Application of critical thinking and decision-making skills to ethical dilemmas in classroom, business, community and governmental settings. Exploration of methods of resolution through ethical reasoning and the National Association for the Education of Young Children (NAEYC) professional codes. Emphasizes logical analysis, critical thinking, and responsible ethical decision making.

EDEC 125 Science/Math and the Young Child3 Credits

Examination of theories of cognitive development as a framework for conceptualizing the way young children acquire scientific and mathematical skills, concepts, and abilities. Enables students to research and develop appropriate individual and group scientific/mathematical activities for young children. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Terms Typically Offered: Fall, Spring, Summer.

EDEC 126 Art and the Young Child2 Credits

Preparation to plan and implement a comprehensive and developmentally-appropriate art program for young children. Investigates the development of self-taught art techniques in young children. Assignments require 2 hours of field experience and may include observation/participation in an early childhood setting.

Terms Typically Offered: Fall, Spring, Summer.

EDEC 127 Music/Movement for the Young Children1 Credit

Focus on incorporating music and movement into the early childhood curriculum. Through active participation with hands-on experiences, students work with the concepts of age and developmental appropriateness when designing fun activities with both subjects. Assignments require 1 hour of field experience and may include observation/participation in an early childhood setting.

Terms Typically Offered: Fall, Spring, Summer.

EDEC 195 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EDEC 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDEC 200 Observation and Assessment in Early Childhood Education2 Credits

Developmentally appropriate observation and assessment strategies to document child development, play, and learning to support families and professionals in promoting children's success; and to document quality indicators in early childhood programs. A variety of formal and authentic assessment methods are explored in this course. This course addresses children ages birth to eight years.

Terms Typically Offered: Fall, Spring.

EDEC 201 Observation and Assessment in Early Childhood Techniques1 Credit

Supervised placement in licensed early childhood setting. Formal and authentic assessment methods are explored within early care and education settings, including practicing developmentally appropriate observation and assessment techniques to document child development, play, and learning to help families and professionals promote children's success. Program evaluation assessment tools are covered. This course addresses children ages birth to eight years.

Terms Typically Offered: Fall, Spring.

EDEC 205 Nutrition, Health, Safety3 Credits

Focus on nutrition, health, and safety as key factors for optimal growth and development of young children. Includes nutrient knowledge, menu planning, food program participation, health practices, management and safety, appropriate activities, and communication with families. Addresses birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 230 Curriculum and Development: Infant/Toddler3 Credits

Curriculum for the age group birth to 3 years. Emphasis on maintaining healthy, safe environmental activities developmentally appropriate to stimulate language, social emotional, cognitive, and physical development. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 237 Theories and Techniques of Social and Emotional Growth3 Credits

Incorporates student specific techniques and strategies for guiding and enhancing social and emotional growth in children 0-8 years. Introduces and compares the theories underlying quality interactions and patterns of social and emotional progression.

EDEC 238 Early Childhood Development 0-8 Years3 Credits

Theories, current research and developmental ages and stages of children, conception to 8 years. Emphasizes physical, cognitive, language, social and emotional domains, concept of the whole child and how adults can provide a supportive environment. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 240 Curriculum and Development: Early Childhood3 Credits

Methods of creating and implementing curriculum based on understanding of developmentally appropriate practice for children, birth to age 8. Application of the teaching/learning process, and of managing the learning environment, will draw from research and practical application. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Prerequisites: EDEC 101 or permission of instructor.

EDEC 241 Early Childhood Administration: Human Relations3 Credits

Roles and relationships among children, families, early childhood professionals, and community resources. Exploration of family structures, communication skills, roles of support organizations, team building, evaluation tools, self-reflection, and advocacy. Assignments require 3 hours field experience and may include observation/participation in an early childhood setting.

EDEC 250 Exceptionalities in Early Education3 Credits

Presents an overview of critical elements related to educating young children who may have learning challenges and/or be advanced in the early childhood setting. Topics include the following: typical and atypical development, legal requirements, research based practices related to inclusion, teaming and collaboration, and accommodations and adaptations. Student will learn how different cognitive/social/physical abilities impact a young child's learning process. Includes conception to age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Prerequisites: EDEC 101 or permission of instructor.

EDEC 256 Working with Parents, Families, and Community Systems3 Credits

Exploration of personal attitudes regarding families, family values systems, and how personal attitudes affect parent-professional partnerships in the early childhood education program. This course covers communication, problem-solving, and conflict resolution strategies with respect to children ages birth through 8 years. Effective activities and resources to support family involvement in the classroom will be created.

EDEC 264 Administration in Early Education3 Credits

Overview of management concepts applicable in a variety of early education settings. Focuses on management of programs and personnel, program and staff development, fiscal administration, and evaluation. Assignments require 3 hours field experience and may include observation/participation in an early childhood setting.

EDEC 290 Early Literacy for the Young Child2 Credits

In-depth view of early literacy development in a changing, diverse society. Intended for the prospective early childhood teacher. Includes research about the language and literacy of young children. Explores how learners develop the ability to communicate and interact from birth to age 8. Assignments require 3 hours field experience and may include observation/participation in an early childhood setting.

EDEC 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EDEC 297 Practicum1-2 Credits

Supervised experience working with children and families in early care and education settings. Accepted by the State Department of Child Care Services for licensing purposes. Scheduling is flexible.

Prerequisites: Permission of instructor.

Course may be taken multiple times up to maximum of 15 credit hours.

EDEC 299 Student Teaching in Early Education3 Credits

Supervised teaching experience. Allows the student teacher the opportunity to apply developmentally appropriate, standards-based practices, theories and philosophies acquired in prior coursework. Provides incremental responsibility for teaching, supervision, and guidance of young children birth to 8 years. 300 field experience hours in an approved child care facility or school.

Prerequisites: EDEC 101, EDEC 122, EDEC 240, EDEC 250, and permission of instructor.

Course may be taken multiple times up to maximum of 6 credit hours.

Educational Leadership (EDLD)

EDLD 506 Leadership and Organizational Change3 Credits

Knowledge and skills for creating effective schools. Strategies for linking policy and law to instructional change. Social and political assumptions underlying current efforts towards curriculum and instructional reform in elementary and secondary schools. Study of planning and evaluation in schools and school districts including strategic planning, effectiveness and curriculum audits, facility planning, and program planning and evaluation.

Prerequisites: Current teaching certificate; Acceptance into EDLD Master's or certificate program or the ECTL Master's program.

Terms Typically Offered: Summer.

EDLD 515 Dynamic School Leadership in a Democratic Society:**Introduction to School Administration3 Credits**

Study of educational leadership, administration, and management with reference to current practice at the school level. Attention to administrative theory and practice, philosophy, and organizational development. Through examination of leadership and organizational models, students analyze their district using political, structural, and cultural frames. Leadership in democratic society is explored, specifically related to a pluralistic society and a culturally responsive education.

Prerequisites: Current teaching certificate; Acceptance into EDLD Master's or certificate program or ECTL Master's program.

Terms Typically Offered: Summer.

EDLD 520A Principalship I2 Credits

This introductory course will engage students in developing a comprehensive understanding of the role of the principal as instructional leader and change agent in today's PK-12 schools. Students will be introduced to the skill set needed to be an effective instructional leader and the knowledge base outlined in the Colorado Standards for the licensure of school principals. The historical role of the school principal will be compared and contrasted with the current demands of the modern school principal.

Prerequisites: Current teaching certificate, acceptance into EDLD program.

EDLD 520B Principalship II2 Credits

This introductory course will engage students in developing a comprehensive understanding of the role of the principal as instructional leader and change agent in today's PK-12 schools. Students will be introduced to the skill set needed to be an effective instructional leader and the knowledge base outlined in the Colorado Standards for the licensure of school principals. The historical role of the school principal will be compared and contrasted with the current demands of the modern school principal.

Prerequisites: EDLD 520A, current teaching certificate, and acceptance into EDLD program.

EDLD 532 School Finance and Legal Aspects of School Administration3 Credits

Study of the relationship between politics, policy and governance of schools, including political systems, inter-governmental relations, power and conflict, and policy development regarding equity, quality and efficiency. While statutory and case law serve as reference points for discussion, the primary objective is to examine the relationship between the legal issues of education and the implications for administrative leadership.

Prerequisites: Current teaching certificate, acceptance into EDLD program.

Terms Typically Offered: Spring.

EDLD 535 Internship in Educational Leadership I1 Credit

Gain knowledge and experience in varied aspects of school administration. Engagement in activities designed to develop and demonstrate leadership competencies essential for solving school problems, improving curriculum and instructional practices, and increasing student achievement. Leadership competencies align to state and national standards.

Prerequisites: EDLD 520A, current teaching certificate, and acceptance into graduate program.

EDLD 540 School Improvement and Accountability3 Credits

Construction, administration and interpretation of educational assessments for the systematic analysis of student learning and teaching practice. Emphasis on the use and understanding of data analysis to improve teaching and learning in the classroom. Statistical analysis relating to education leadership decision-making applications. Analysis of school culture in high performing schools and problem-solving protocols related to school culture improvement.

Prerequisites: Current teaching certificate; Acceptance into the EDLD Master's or certificate program or the ECTL Master's program.

Terms Typically Offered: Fall.

EDLD 542 Instructional Supervision and Management/HR3 Credits

Study of effective human resources management, including recruitment, selection, induction, staff development, employee assistance, evaluation, contract negotiation and personnel management. The skills of conflict resolution and collaboration will be explored as well as ways to assess the learning organization needs.

Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDLD 545 Internship in Educational Leadership II1 Credit

Gain knowledge and experience in varied aspects of school administration. Engagement in activities designed to develop and demonstrate leadership competencies essential for solving school problems, improving curriculum and instructional practices, and increasing student achievement. Leadership competencies align to state and national standards.

Prerequisites: EDLD 520A, current teaching certificate, and acceptance into graduate program.

EDLD 595 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Electric Lineworker (ELCL)

ELCL 125 Job Training and Safety4 Credits

Job training and safety skills, including CDL, basic use and care of personal protective equipment and climbing equipment, daily job briefings, daily inspection of motorized equipment, and knot tying.

Terms Typically Offered: Fall.

Fees: Yes.

ELCL 131 Electrical Distribution Theory I4 Credits

Pole setting techniques, framing methods and specifications, climbing, sagging and splicing of conductors, energizing and de-energizing of lines, and installation of protective grounds.

ELCL 131L Electric Distribution Lab4 Credits

Examination of the National Electric Safety Code, equipment operation, material records, knot tying, installation of protective grounds, pole climbing, replace insulators, replacing crossarms, conductor ties, and overhead line construction.

Fees: Yes.

ELCL 132 Electrical Distribution Theory II4 Credits

Installation and operation of protective equipment, transformer hookups, voltage regulation, hotstick maintenance, troubleshooting, and gloving from the pole. Four hours lecture, three hours laboratory per week.

Prerequisites: ELCL 131.

Corequisites: ELCL 132L.

ELCL 132L Electrical Distribution Theory II Laboratory4 Credits

Installation and operation of protective equipment, transformer hookups, voltage regulation, hotstick maintenance, troubleshooting, and gloving from the pole and underground distribution.

Prerequisites: ELCL 131.

Corequisites: ELCL 132.

Terms Typically Offered: Spring.

Fees: Yes.

ELCL 137 Advanced Electrical Distribution2 Credits

Meter safety, connector installation, street lighting, rubber cover up, and public relations. Two hours lecture, eight hours laboratory per week.

Corequisites: ELCL 137L.

ELCL 137L Advanced Electrical Distribution Laboratory4 Credits

Examination of meter safety, connector installation, street lighting, rubber cover up, and public relations.

Prerequisites: ELCL 125.

Corequisites: ELCL 137.

Terms Typically Offered: Spring.

Fees: Yes.

ELCL 140 Underground Procedures4 Credits

Examination of safety practices, terminology, fault finding, cable locating, switching procedure, installation of terminal devices, splicing, and transformer application.

Corequisites: ELCL 132L.

Terms Typically Offered: Spring.

ELCL 145 Hot Line Procedures1 Credit

Two weeks of training by outside specialists covering current hotline maintenance and underground installation methods. Eight hours lecture, twenty-four hours laboratory per week.

Corequisites: ELCL 145L.

ELCL 145L Hot Line Procedures Laboratory2 Credits

Lab component required for ELCL 145.

Corequisites: ELCL 145.

Fees: Yes.

ELCL 195 Independent Study1 or 2 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ELCL 196 Topics1 or 2 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ELCL 199 Internship6 Credits

Opportunity for an individual to be employed for training by a utility company while maintaining his/her status as a Colorado Mesa University student. Provides excellent on-the-job training benefits. Students usually selected for this course by formal interview.

Prerequisites: Permission of instructor. Eighteen hours per week, two semesters after completion of regular program.

Course may be taken multiple times up to maximum of 6 credit hours.

Electrical/Computer Engineering (EECE)

EECE 225 Introduction to Circuits and Electronics3 Credits

Analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers.

Prerequisites: PHYS 132/PHYS 132L; and MATH 236 (can be taken concurrently).

Corequisites: EECE 225L.

Terms Typically Offered: Fall.

EECE 225L Introduction to Circuits and Electronics Laboratory1 Credit

Lab component required for EECE 225. Introduces analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting.

Prerequisites: PHYS 132/PHYS 132L; and MATH 236 (can be taken concurrently).

Corequisites: EECE 225.

Terms Typically Offered: Fall.

Fees: Yes.

EECE 226 Circuits as Systems3 Credits

Continued analysis of basic circuits, Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.

Prerequisites: EECE 225 and MATH 236.

Corequisites: EECE 226L.

Terms Typically Offered: Spring.

EECE 226L Circuits as Systems Design Laboratory1 Credit

Lab component required for EECE 226. Emphasizes design and testing of analog electronic circuits in a practical laboratory setting.

Prerequisites: EECE 225 and MATH 236.

Corequisites: EECE 226.

Terms Typically Offered: Spring.

Fees: Yes.

EECE 235 Digital Logic3 Credits

Design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs).

Prerequisites: CSCI 130.

Terms Typically Offered: Spring.

EECE 237 Embedded Software Engineering3 Credits

Introduction to the design of digital systems. Covers system software-hardware integration as well as hardware and software building blocks. Skills associated with software development and debugging will be developed. Uses modern electronic system design platforms, embedded and mobile computing platforms, and various programming languages.

Prerequisites: CSCI 130 or CSCI 111; and EECE 235 (may be taken concurrently).

Terms Typically Offered: Fall.

Fees: Yes.

EECE 244 Applications of Embedded Systems3 Credits

Introduction to concepts relating to embedded systems and computer architecture through programming a microcontroller. Application of digital and analog electronics concepts to engineer hardware, firmware, and appropriate solutions.

Prerequisites: CSCI 111 or CSCI 130; and EECE 225/EECE 225L or ENGR 317/ENGR 317L.

Terms Typically Offered: Spring.

Fees: Yes.

EECE 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EECE 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Electrical Construction (ELCE)

ELCE 102 Electrical Blueprint Reading4 Credits

Development of skills needed to interpret electrical drawings properly. Critical for anyone involved in the design, construction, or maintenance of electrical systems.

Fees: Yes.

ELCE 110 House Wiring4 Credits

Approaches to residential building wiring in conformance with the current National Electrical Code and local codes using non-metallic cable.

Fees: Yes.

ELCE 120 Commercial Wiring4 Credits

Approaches to commercial and industrial building wiring in conformance with the current National Electrical Code and local codes using electric metallic tubing and other raceways.

Fees: Yes.

ELCE 124 Electrical Safety1 Credit

Exploration of OSHA's electrical safety-related work practices, and how they are applied to the work environment.

ELCE 130 National Electrical Code I4 Credits

Exploration of the National Electrical Code and local code requirements for electrical installations. Chapters one through four of the National Electrical Code are covered.

ELCE 135 National Electrical Code II4 Credits

Further development of material from ELCE 130 and covering chapters five through nine of the National Electrical Code, including hazardous locations, special occupancies, conditions, and equipment.

Prerequisites: ELCE 130.

Terms Typically Offered: Fall.

ELCE 144 Grounding and Bonding1 Credit

Exploration of technology and techniques available for code and standards-compliant grounding and bonding systems, focusing on grounding and bonding requirements as they relate to Article 250 and other articles of the NEC code.

Fees: Yes.

ELCE 150 DC Circuit Fundamentals4 Credits

Introduction to the principles of DC electricity and magnetism with emphasis on Ohm's, Kirchoff's, and Watt's laws to analyze circuit voltage, current, and power. Addresses common measuring instruments and safety.

Prerequisites: MATH 107 or higher (may be taken concurrently).

Terms Typically Offered: Fall.

Fees: Yes.

ELCE 155 AC Circuit Fundamentals4 Credits

Exploration of AC circuits including: resistance, current, voltage, computations of series and parallel circuits, circuit analysis, magnetism, inductive and capacitive circuits and troubleshooting with basic test equipment.

Prerequisites: ELCE 150.

Terms Typically Offered: Fall.

Fees: Yes.

ELCE 167 Electrical Maintenance4 Credits

Introduction to common electrical repairs, electrical systems, tools and test equipment. Includes replacing or repairing devices, such as receptacles, light fixtures and ballasts, circuit breakers, fuses, and switches. Addresses electrical safety and code applications.

Fees: Yes.

ELCE 220 Industrial Controls4 Credits

Application of electrical and electromechanical sensing/control devices including heating, ventilating, and air conditioning applications, motor control, conveyor drives, and other industrial applications. Students design control systems to meet assigned conditions, use principles of relay logic to prepare correct ladder diagrams and wire up, test, and troubleshoot their systems. Course stresses accuracy, safety, and National Electric Code requirements.

Fees: Yes.

ELCE 222 Instrumentation and Process4 Credits

Investigation of theory of industrial instrumentation measurement through process control. Includes theory and measurement methods for temperature, pressure, level, and flow. Incorporates hands-on training equipment to measure temperature and pressure, and perform calibration of a pressure differential transmitter. Test equipment is used to simulate a two-wire transmitter and source a current signal for calibration of an I/P transducer.

Fees: Yes.

ELCE 225 Introduction to PLCs4 Credits

Development of the ability to read, interpret, and analyze electrical ladder drawings. Acquaints the student with the basic electromechanical components commonly used in electrical control circuits, as well as solid-state relays and the role of programmable controllers.

Fees: Yes.

ELCE 229 AC/DC Variable Speed Drive2 Credits

Introduction to variable speed drive technology that offers a cost-effective method to match driver speed to load demands. Represents a state-of-the-art opportunity to reduce operating costs and improve overall productivity. Focuses on variable speed drive technology including operation, set-up, troubleshooting, maintenance, proper selection, and application for drives, as well as basic drive overview and comparison.

Fees: Yes.

ELCE 263 Specific Wiring for Structured Cabling Systems2 Credits

Development of ability to wire for specifications and for structured cabling systems. Examines the job layout, products used, and execution of the project.

Fees: Yes.

ELCE 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Emergency Management (EMDP)

EMDP 211 Introduction to Emergency Management3 Credits

Introduction to the complex and evolving field of emergency management. Development of understanding of key stakeholders, principles, and activities involved in an "all-hazards, all-phases" approach to dealing with disasters.

Terms Typically Offered: Fall.

EMDP 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EMDP 321 Hazard Preparedness and Mitigation3 Credits

Examination of methods and application of practices in preparing for and mitigating against hazards. Includes developing an understanding of risk and vulnerability, and their relationship with public policy and implementation actions relevant to hazard preparedness and mitigation.

Prerequisites: EMDP 211.

EMDP 331 Disaster Response and Recovery3 Credits

Examination of practices and principles that promote effective disaster response and recovery operations. Review of popular myths and realities regarding human behavior in catastrophic events in addition to divergent approaches for disaster management. Includes developing an understanding of the Incident Command System, National Incident Management System, and emergency operations centers.

Prerequisites: EMDP 211.

EMDP 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Emergency Medical Tech (EMTS)

EMTS 101 Emergency Medical Technician - Basic I3 Credits

Policies, rules and regulations of emergency medical services. Basic anatomy and physiology. Initial and focused assessment of patient in the field.

Corequisites: EMTS 102 and EMTS 103.

Fees: Yes.

EMTS 102 Emergency Medical Technician - Basic II3 Credits

Management of respiratory, cardiac, CNS, endocrine, behavioral, drug, alcohol, allergy and anaphylaxis emergencies. Airway management, CPR, AED and basic pharmacology.

Corequisites: EMTS 101 and EMTS 103.

Fees: Yes.

EMTS 103 Emergency Medical Technician - Basic III4 Credits

Management of MOI, head, spinal, abdominal, chest and extremity trauma. Basic management of pediatric, gynecologic, and geriatric emergencies. EMT safety, environmental emergencies, hazmat, triage, and incident command. Preparation for national registry written and practical examination.

Corequisites: EMTS 101 and EMTS 102.

Fees: Yes.

EMTS 115 Emergency Medical Responder3 Credits

This course covers the knowledge and skills to provide emergency care for most medical emergencies. Emergency Medical Responders provide immediate care as part of the EMS system while awaiting additional EMS response and transportation. This course meets the requirements to become nationally certified as an NREMR - National Registered Emergency Medical Responder.

Fees: Yes.

EMTS 130 Emergency Medical Technician - Basic IV Therapy2 Credits

Focuses on cognitive and skill practice as required by Colorado Prehospital Care program for EMT-Basic level IV approval. Examines criteria, procedures and techniques for IV therapy, discusses fluid and electrolyte balance and principles and treatment for shock.

Fees: Yes.

EMTS 190 Emergency Medical Technician - Basic EKG Interpretation2 Credits

Interpretation of EKG strips, anatomy and physiology of the heart, using three-lead monitoring as a guide. Introduction to twelve-lead EKG.

EMTS 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EMTS 225 Fundamentals of Paramedic Practice3 Credits

First course of the National Standard Paramedic Curriculum as approved by the Colorado State Department of Health and Environment.

Corequisites: EMTS 225L.

EMTS 225L Fundamentals of Paramedic Practice Laboratory2 Credits

Hands-on application of patient assessment, IV therapy and EKG interpretation. Practical application and mastery of anatomy and physiology principles within a pre-hospital setting will be developed.

Prerequisites: Permission of instructor.

Corequisites: EMTS 225.

Fees: Yes.

EMTS 227 Paramedic Special Considerations3 Credits

Focuses on a comprehensive study of Advanced Life Support Practice.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 227L.

EMTS 227L Paramedic Special Considerations Laboratory2 Credits

Hands-on application of skills in pediatric assessment, delivery and management of the newborn, the mother, and geriatric patients. Management of live scenarios simulating patients with special considerations and needs will enhance the development of practical patient care skills and improve patient outcomes. Certification in PEPP and PALS will be completed.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 227.

Fees: Yes.

EMTS 229 Paramedic Pharmacology3 Credits

Focuses on a comprehensive study of emergency pharmacology and medications used to treat common illnesses.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 229L.

EMTS 229L Paramedic Pharmacology Laboratory2 Credits

Hands-on administration of medications with an advanced level of understanding of their effects to the human body. The principles of pharmacokinetics and pharmacodynamics are investigated.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 229.

Fees: Yes.

EMTS 231 Paramedic Cardiology5 Credits

Cardiology topics as presented in the National Standard Curriculum for paramedics.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 231L.

EMTS 231L Paramedic Cardiology Laboratory1 Credit

Hands-on application of principles of cardiac care for the pre-hospital and in-hospital environment. Students will earn their ACLS certification.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 231.

Fees: Yes.

EMTS 233 Paramedic Medical Emergencies4 Credits

A comprehensive study of adult medical emergencies.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 233L.

EMTS 233L Paramedic Medical Emergencies Laboratory1 Credit

Hands-on application of the principles of endocrine emergencies, BG analysis, respiratory emergencies, and other medical emergencies for the pre-hospital and in-hospital environment. Students will receive AMLS certification.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 233.

Fees: Yes.

EMTS 235 Paramedic Trauma Emergencies4 Credits

A comprehensive study of adult and pediatric trauma emergencies.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 235L.

EMTS 235L Paramedic Trauma Emergencies Laboratory1 Credit

Hands-on application of the principles to manage and assess the trauma patient in pre-hospital emergencies. Approaches on how to handle the patient with blast injuries and disaster management of multiple patients will be developed. Specific scenarios with various acute trauma emergencies will be developed to assist the student with patient assessment skills.

Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.

Corequisites: EMTS 235.

Fees: Yes.

EMTS 237 Paramedic Internship Preparation2 Credits

Reviews concepts and techniques used in the prehospital setting.

Prerequisites: EMTS 225/EMTS 225L, EMTS 227/EMTS 227L, EMTS 229/EMTS 229L, EMTS 231/EMTS 231L, EMTS 233/EMTS 233L, and EMTS 235/EMTS 235L.

EMTS 280 Paramedic Internship I6 Credits

The preceptor/internship program for paramedic students.

Prerequisites: EMTS 237.

Fees: Yes.

EMTS 281 Paramedic Internship II6 Credits

Continuation of EMTS 280, preceptor program for paramedic students.

Prerequisites: EMTS 280.

Fees: Yes.

Energy Management (EMGT)

EMGT 101 Energy Management Fundamentals3 Credits

Introduction to basic concepts of energy management.

EMGT 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EMGT 201 Land Management Fundamentals3 Credits

Introduction to basic concepts of land management and practices.

EMGT 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EMGT 340 Energy Industry Fundamentals3 Credits

Provides energy literacy through a survey of the sources, distribution and uses of energy, including the evolution of energy from wood fires to coal to oil to the current mix of coal, oil, natural gas, nuclear, hydroelectric, wind, geothermal, biomass, solar and ocean currents and tides. Future energy policy, sources, uses and case studies will be discussed as well as alternative energy sources.

Prerequisites: GEOL 111/GEOL 111L, and CHEM 121/CHEM 121L.

EMGT 350 Energy Development, Transportation, and Markets3 Credits

Overview of the energy industry domestic and worldwide. Basic energy industry drilling and production terminology, concepts and terms introduced and utilized throughout the course. Issues surrounding business models, upstream, midstream and downstream discussed in detail.

Prerequisites: GEOL 111/GEOL 111L, and FINA 301.

EMGT 355 Landman Geo-Petro-Engineering3 Credits

Petroleum engineering fundamentals. Properties of reservoir rock, single phase fluid flow through porous media, surface forces, fluid saturation, and completion technology. Evaluation of petroleum reservoir field data.

Prerequisites: EMGT 101 and EMGT 201.

EMGT 360 Real Property, Oil and Gas Law3 Credits

The body of case law surrounding oil and gas leases and leasehold interests, mineral titles, concurrent ownership and split estates, and governmental regulation of mineral development, including pooling and unitization of oil and gas leases.

Prerequisites: EMGT 340.

EMGT 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EMGT 410 Energy Regulation and Compliance3 Credits

The body of law surrounding governmental regulation of mineral development, including environmental liability, diligent and prudent operations, contractual risk allocation, and regulatory case studies.

Prerequisites: EMGT 340.

EMGT 440 Energy Land Practices I3 Credits

Overview of the supply and demand for energy. The physical path of energy from source to user, transportation issues pertaining to energy, energy pricing methodologies, energy markets, and risk control through the use of derivatives in the energy industry.

Prerequisites: EMGT 340 and FINA 301.

EMGT 450 Energy Land Practices II3 Credits

Imparts mastery of the fundamental concepts and terminology related to real property law. Application of concepts to situations occurring in the energy environment as land is found, purchased and developed for use.

Prerequisites: EMGT 340.

EMGT 494 Energy Senior Seminar3 Credits

Legal, economic, environmental, and national security issues surrounding the energy industry. Alternative energy sources and other current issues in energy management.

Prerequisites: EMGT 340.

EMGT 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

EMGT 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

EMGT 499 Internship1-9 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Engineering (ENGR)

ENGR 101 Introduction to Engineering1 Credit

Exploration of engineering as a field. Includes general characteristics of the profession, training required for various engineering degrees, industries in which engineers practice, and tools for academic and professional success in engineering, including the basics of report generation and the licensure process. Ethics and societal issues related to engineering will also be introduced.

Terms Typically Offered: Fall.

ENGR 125 Computer-Aided Design and Fabrication3 Credits

Introduces engineering design graphics. Includes learning a contemporary computer-aided design (CAD) software application and relevant engineering graphics concepts, such as orthographic projection, sections, engineering drawing practices, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Entails a final design project using rapid prototyping.

ENGR 140 First-Year Engineering Project3 Credits

Introduction to the application of mathematic and scientific skills in interdisciplinary engineering projects. Includes elements of teamwork, project management, engineering design and prototyping, and project documentation.

Prerequisites: MATH 119; or MATH 119A and MATH 119B.

Terms Typically Offered: Spring.

ENGR 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENGR 224 Materials Science2 Credits

Structure, properties, and processing of metallic, polymeric, ceramic, and composite materials. Perfect and imperfect solids; phase equilibria; transformation kinetics; mechanical behavior; material degradation.

Includes both materials science and materials engineering components.

Prerequisites: CHEM 151/CHEM 151L or CHEM 131/CHEM 131L; and PHYS 131/PHYS 131L.

Corequisites: ENGR 224L.

Terms Typically Offered: Fall, Spring.

ENGR 224L Materials Science Laboratory1 Credit

Hands-on application of topics learned in lecture. Includes mechanical testing, determination of material properties, thermal processing, and technical reporting. Lab component for ENGR 224.

Prerequisites: CHEM 151/CHEM 151L or CHEM 131/CHEM 131L; and PHYS 131/PHYS 131L.

Corequisites: ENGR 224.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

ENGR 225 Introduction to Manufacturing3 Credits

Principles, processes, and problems associated with the conversion of engineered materials into useful goods. Fundamentals of geometric specification, casting, machining, plastic deformation, bulk deformation, joining processes, and processes for plastics, ceramics, and composites.

Prerequisites: ENGR 224.

Terms Typically Offered: Fall.

Fees: Yes.

ENGR 261 Statics and Structures3 Credits

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, deformation and stress, distributed force systems, friction. Lectures and homework assignments involve computer work and hands-on laboratory work documented by written reports.

Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.

ENGR 263 Mechanics of Solids3 Credits

Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations, and columns. Lectures and homework assignments involve computer work and hands-on laboratory work documented by written reports.

Prerequisites: ENGR 261.

ENGR 305 Engineering Economics & Ethics2 Credits

Applications of economics and ethics for mechanical engineers. Topics include cost concepts and design economics, money-time relationships, and comparison of alternatives. Engineering ethics includes personal vs. professional ethics, ethical problem-solving techniques, rights and responsibilities of engineers, and whistle-blowing.

Prerequisites: ENGR 101, ENGR 140; and MATH 135 or MATH 151.

Terms Typically Offered: Fall.

ENGR 312 Engineering Thermodynamics3 Credits

An introductory course in thermodynamics, the science of heat energy conversion. Develops understanding of energy, heat, work, efficiency, and ideal thermodynamic cycles. Teaches first and second laws of the thermodynamics and perfect gas law.

Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.

ENGR 317 Fundamentals of Circuits and Electronics2 Credits

Introduction to resistive circuits, capacitors, inductors, transient analysis, sine waves, AC circuit analysis, resonance, and transformers.

Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.

Corequisites: ENGR 317L.

ENGR 317L Fundamentals of Circuits and Electronics Laboratory1 Credit

Lab component required for ENGR 317.

Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.

Corequisites: ENGR 317.

Fees: Yes.

ENGR 321 Fluid Mechanics3 Credits

Covers fluid properties, laws of fluid statics and fluid dynamics, measurement of flow, viscous flow, laminar and turbulent flow, flow in ducts, forces due to fluid motion, and fluid machinery.

Prerequisites: MATH 152 or MATH 136; PHYS 131/PHYS 131L, and ENGR 261.

Terms Typically Offered: Fall.

ENGR 325 Component Design3 Credits

Knowledge and skills developed in preceding courses are extended and applied to design and selection of machine elements and machines.

Attention is given to functional requirements, methods of manufacture, choice of materials and economic factors.

Prerequisites: ENGR 224 and ENGR 263.

ENGR 329 Bicycle Design and Frame-Building3 Credits

Engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Material properties and selection. Discussion of relevant standards covering bicycle frame and fork testing. Fabrication skills necessary to construct a custom bicycle frame will be developed.

Prerequisites: ENGR 125 and ENGR 263.

Terms Typically Offered: Spring.

ENGR 333 Lean Principles3 Credits

Overview of the structure and tools of the Lean production system. Students will learn how Lean can be applied to various industries and even outside of the factory, in settings such as health care, finance, IT, and engineering.

Prerequisites: ENGR 225.

Terms Typically Offered: Spring.

ENGR 336 Heat and Power3 Credits

Discussion of major modes of heat transfer. Includes steady and transient conduction, internal and external convection, and radiation with emphasis on industrial applications. Heat exchanger and boiler analysis and related codes and standards discussed.

Prerequisites: ENGR 312 and ENGR 321.

Fees: Yes.

ENGR 343 Dynamics3 Credits

Kinematics of particles and rigid bodies. Kinetics of particles and rigid bodies in plane motion, including Newton's second law, work and energy, impulse and momentum.

Prerequisites: ENGR 261.

ENGR 345 Engineering Integration I3 Credits

First course in a design sequence integrating concepts from the mechanical engineering technology curriculum. Emphasis on laboratory experience and the design, analysis, and testing of mechanical systems. Team project work on "design-and-build" projects will require manufacture of mechanical systems and/or electronic circuits.

Prerequisites: ENGR 224, ENGR 263, MAMT 106, and CSCI 130.

Fees: Yes.

ENGR 353 Exploring Entrepreneur Opportunities3 Credits

Introduction to innovation and opportunity recognition, including development of business ideas, business model validation and business feasibility analysis.

Equivalent Course(s): ENTR 343

ENGR 385 Engineering Integration II3 Credits

Second course in a design sequence integrating concepts from the mechanical engineering technology curriculum. Emphasis on laboratory experience and the design, analysis, and testing of mechanical systems. Team project work on "design-and-build" projects will require manufacture of mechanical systems and/or electronic circuits.

Prerequisites: ENGR 345.

Fees: Yes.

ENGR 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ENGR 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENGR 397 Structured Research1-3 Credits**ENGR 399 Internship1-12 Credits**

Course may be taken multiple times up to maximum of 15 credit hours.

ENGR 401 Professionalism Seminar1 Credit

Preparation for a career in the engineering profession. Includes professionalism, ethics, competitive job application materials, jobs and internships, and current engineering issues.

Prerequisites: Junior standing or higher.

Terms Typically Offered: Fall.

ENGR 425 Advanced Manufacturing3 Credits

Use of cutting edge materials and emerging capabilities that utilize the coordination of information, automation, computation, software, sensing, and networking. Includes discussion of product data management, flexible manufacturing, manufacturability, and product life-cycle management.

Prerequisites: ENGR 225, ENGR 305, and STAT 305.

Terms Typically Offered: Spring.

Fees: Yes.

ENGR 427 Engineering Measurements2 Credits

Methods of experimentation and data analysis. Specific skills used in planning an experiment, applying sound procedures, keeping proper records, and communicating results orally, with posters and in written reports developed.

Prerequisites: ENGL 325, ENGR 263, ENGR 317, and STAT 305.

Fees: Yes.

ENGR 435 Industrial Controls3 Credits

Fundamentals of control of manufacturing processes. Applications of relay logic, input/output devices, and programmable logic controllers (PLC). Design of complete control circuits, selection of components, and cost estimation. PLC programming for discrete event control and for analog applications.

Prerequisites: ENGR 317.

ENGR 436 Fluid & Electric Power Systems3 Credits

A mechanical approach to industrial power systems. Applications emphasize the selection and function of hardware and interfacing of hydraulic, pneumatic and electric systems with mechanical, fluidic and electrical/electronic controls. Topics covered include transformers, motors, generators, motor controls, and protective devices.

Prerequisites: ENGR 321 and ENGR 435.

ENGR 445 MET Design Project I3 Credits

First of a two-course comprehensive group capstone design experience, focusing on the design proposal. This sequence applies material from prior course work, along with concepts of project management, problem definition; determining design requirements, design optimization, engineering analysis, proof-of-concept prototype, and CAD drawings.

Prerequisites: ENGR 140, ENGR 225, ENGR 312, ENGR 317, ENGR 317L, ENGR 321, ENGR 325, ENGR 385, MAMT 102, and ENGL 325.

Terms Typically Offered: Fall.

ENGR 446 Writing for Design Projects1 Credit

Communication of engineering designs to technical and non-technical audiences. Development of skills to document a problem and describe a design and its evaluation against design criteria. Design reports are created to describe senior design projects. Other course elements include composing technical and non-technical documents that meet the needs of particular audiences, as well as clear, concise, and correct writing.

Corequisites: ENGR 485.

Terms Typically Offered: Spring.

ENGR 455 Fluid Power Systems3 Credits

Coverage of the fundamentals of hydraulic and pneumatic systems and their components, fluid power circuit design, analysis, and troubleshooting for industrial applications, introduction to electro-pneumatics.

Prerequisites: ENGR 321.

Fees: Yes.

ENGR 460 Energy Systems3 Credits

Discussion of conventional, alternative and renewable energy systems, such as wind, solar, clean coal, and geothermal. Challenging energy problems relevant to the industry presented and analyzed.

Prerequisites: ENGR 312 and ENGR 321.

Fees: Yes.

ENGR 465 Electric Power Systems3 Credits

Basic understanding of electric power systems; generation, transmission, distribution and consumption. Review of AC circuit analysis in single and three phase systems using time domain and phasor representation.

Includes magnetic circuits, transformers and renewable energy generation from photovoltaic cells. Introduces electromechanical energy conversion from experiments with induction and synchronous motors/generators, and includes photovoltaic panels.

Prerequisites: ENGR 317.

Fees: Yes.

ENGR 481 Thermal-Fluid Systems Analysis Using CFD3 Credits

Presentation of advanced computer simulation tools for analysis of thermal-fluid problems (fluid mechanics, thermodynamics, and heat transfer). Fundamentals of CFD (computational fluid dynamics) such as grid generation, solution techniques and convergence, modeling and simulation, and analysis of results for representative industrial problems discussed.

Prerequisites: CSCI 130 and ENGR 336.

ENGR 485 MET Design Project II3 Credits

Second part of a two-course capstone design experience. Refinement of prototype, design optimization, fabrication, testing and evaluation. Students orally present the final design, prepare a written report and operation manual for the product.

Prerequisites: ENGR 445.

ENGR 495 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ENGR 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENGR 497 Structured Research1-3 Credits

Engineering research under the direct guidance of a faculty member. Designed for junior and senior level students.

Prerequisites: Permission of instructor.

English (ENGL)

ENGL 111 English Composition I-GTC013 Credits

Introduction to writing as a process with an emphasis on achieving rhetorical purpose.

Prerequisites: Students who do not meet placement criteria will be assigned to ENGC 090 and must pass that class with a "C" or higher to enroll in ENGL 111.

Essential Learning Categories: English

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ENGL 112 English Composition II-GTC023 Credits

The practice of academic writing that extends one's own thinking in response to the ideas of others.

Prerequisites: ENGL 111 with a grade of "C" or higher to fulfill English Competency requirement under Essential Learning.

Essential Learning Categories: English

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ENGL 131 Western World Literature I-GTAH23 Credits

Study of literary works from the Classical, Medieval, and Renaissance periods.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall.

ENGL 132 Western World Literature II-GTAH23 Credits

Study of literary works from the late Renaissance, Neoclassic, Romantic, and Modern periods.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Spring.

ENGL 150 Introduction to Literature-GTAH23 Credits

Study of major genres of literature.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ENGL 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 210 Introduction to Literary Studies3 Credits

Introduction to the theory and practice of studying literature.

Prerequisites: ENGL 111.

Terms Typically Offered: Fall, Spring.

ENGL 219 Introduction to Professional Writing-GTC033 Credits

Study of technical writing, public information and public relations writing, and free-lance nonfiction writing.

Prerequisites: ENGL 112.

Essential Learning Categories: English

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall.

ENGL 222 Mythology-GTAH23 Credits

Basic myths of the Greeks and Romans and the cultures that produced them, and/or the Northern and Medieval myths of Europe, their backgrounds in classical culture, and native folklore.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ENGL 240 Children's Literature3 Credits

Survey of literature for children from birth to age 12, focusing on ways of reading texts.

Terms Typically Offered: Fall, Spring.

ENGL 245 Imaginative Writing3 Credits

Introduction to the theory and practice of teaching young people to write imaginatively.

Prerequisites: ENGL 111.

Terms Typically Offered: Fall, Spring.

ENGL 250 Introduction to Creative Writing3 Credits

An introduction to the theory and practice of producing original works of poetry, fiction, and non-fiction prose.

Prerequisites: ENGL 111.

Terms Typically Offered: Fall, Spring.

ENGL 254 Survey of English Literature I-GTAH23 Credits

English literature from its beginnings through the Enlightenment.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ENGL 255 Survey of English Literature II-GTAH23 Credits

English literature from the Romantics to the present day.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ENGL 261 Survey of American Literature I-GTAH23 Credits

American literature from the beginnings to the late 19th Century.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ENGL 262 Survey of American Literature II-GTAH23 Credits

American literature from the late 19th Century to the present.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

ENGL 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 301 Classical Greek and Latin Literature3 Credits

Readings in English of Greek and Roman authors and major classical genres.

Prerequisites: ENGL 112.

ENGL 311 English Medieval Literature3 Credits

Major works of Old and Middle English literature.

Prerequisites: ENGL 112.

ENGL 313 English Renaissance Literature3 Credits

Major works of the 16th and 17th Centuries, including the Metaphysical and Caroline poets and John Milton.

Prerequisites: ENGL 112.

ENGL 314 American Literature to 18303 Credits

An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.

Prerequisites: ENGL 112.

ENGL 315 American Literature 1830-18703 Credits

An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.

Prerequisites: ENGL 112.

ENGL 316 American Literature 1870-19003 Credits

An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.

Prerequisites: ENGL 112.

ENGL 320 Report and Proposal Writing3 Credits

Introduction to the theory and practice of preparing and analyzing reports and proposals intended for businesses, governmental agencies, private and corporate foundations.

Prerequisites: ENGL 112.

ENGL 325 Writing for Engineers3 Credits

Development of a set of communication tools by learning how to compose, design, and edit technical documents for the engineering professions. Topics include technical documentation (lab reports, designing of reports, proposals), professional correspondence (emails, memo reports, and team meetings), and verbal and graphical communication of technical data.

ENGL 330 Women in World Thought and Literature3 Credits

Readings in world literature by and about women; interdisciplinary study of feminist theories and women's contributions to world thought.

Prerequisites: ENGL 112.

ENGL 335 The Bible as Literature3 Credits

A survey of Biblical literature in literary and historical contexts. Includes the Hebrew Bible/Old Testament, the New Testament, and non-canonical Biblical literature.

Prerequisites: ENGL 112.

ENGL 343 Language Systems and Linguistic Diversity3 Credits

Introduction to the nature of language, first and second language acquisition, and issues relevant to linguistic diversity and multicultural literacies.

Prerequisites: ENGL 112.

ENGL 355 Shakespeare3 Credits

Early and mature plays, including genres of comedy, history, tragedy, and romance, emphasizing close textual reading in conjunction with cultural and intellectual contexts.

Prerequisites: ENGL 112.

ENGL 365 Literature for Young Adults3 Credits

Advanced study of major works for youth and adolescents throughout history, with an emphasis on contemporary authors.

Prerequisites: ENGL 112.

ENGL 370 Major Author3 Credits

In-depth study of one or two important writers, with attention to the writer's distinctive style and subject matter, the range of the writer's career, and the influence of the writer's work.

Prerequisites: ENGL 112.

Course may be taken 10 times for credit.

ENGL 380 Memoir and Creative Non-Fiction3 Credits

Theory and practice of the memoir and the personal essay. Emphasis on narrative craft, experiential expression, research, and interviewing.

Prerequisites: ENGL 250.

ENGL 381 Creative Writing: Fiction3 Credits

Theory and practice of producing original works of fiction.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 382 Creative Writing: Crafting Fiction3 Credits

In-depth focus on a specialized aspect of fiction writing.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 383 Creative Writing: Poetry3 Credits

Theory and practice of producing original works of poetry.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 384 The Art of the Essay3 Credits

Theory and practice of objective non-fiction, including expository and persuasive writing. Emphasis on style, structure, and audience.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 385 Technical and Professional Writing3 Credits

Practice in writing and editing of workplace documents, including correspondence, reports and proposals.

Prerequisites: ENGL 112.

ENGL 386 Roots of Modern Rhetoric3 Credits

A survey of the history of rhetoric from classical Greece to the present with emphasis on the Greco-Roman tradition.

Prerequisites: ENGL 112.

ENGL 387 Literary Editing and Publishing3 Credits

Practical experience in literary editing and publishing one of Colorado Mesa University's journals.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 388 Creative Writing: Crafting Poetry3 Credits

In-depth focus on a specialized aspect of poetry writing.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 389 Screenwriting3 Credits

Theory and practice of producing original screenplays.

Prerequisites: ENGL 250 or ENGL 390.

Terms Typically Offered: Fall.

ENGL 390 Introduction to Film Studies3 Credits

Introduction to film narrative, cinematography, and theory.

Prerequisites: ENGL 112.

ENGL 392 Introduction to Copy Editing3 Credits

Approaches to editing principles in a variety of genres and settings.

Exploration of information associated with editing, including an emphasis on technical terms, levels of editing, and ethical issues.

Prerequisites: ENGL 112.

Terms Typically Offered: Spring.

ENGL 394 Technical and Professional Writing Topics3 Credits

Topics at the discretion of the instructor, or to meet the needs of the department. Topics may include: grant writing for industry; professional editing; desktop publishing for professional writing; writing for online presentation; individual and team writing.

Prerequisites: ENGL 112.

ENGL 395 Independent Study1-4 Credits

Prerequisites: ENGL 112.

Course may be taken multiple times up to maximum of 6 credit hours.

ENGL 396 Topics1-3 Credits

Prerequisites: ENGL 112.

Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 397 Practicum3 Credits

Experience in a Basic Writing classroom helping the instructor with all phases of writing instruction.

Prerequisites: ENGL 250 or permission of instructor.

ENGL 398 Practicum in Editing and Publishing1-3 Credits

Experience in editing and publishing one of Colorado Mesa University's journals. Credit hours contracted through advising instructor.

Prerequisites: ENGL 112.

Course may be taken multiple times up to maximum of 9 credit hours.

ENGL 401 Studies in American Literature I3 Credits

Analysis of American literary works before 1865. Specific course content varies and may focus on genre, author, movement, theme, period, or theory.

Prerequisites: ENGL 112.

Terms Typically Offered: Fall.

ENGL 402 Studies in American Literature II3 Credits

Analysis of American literary works after 1865. Specific course content varies and may focus on genre, author, movement, theme, period, or theory.

Prerequisites: ENGL 112.

Terms Typically Offered: Spring.

ENGL 403 Studies in British and Commonwealth Literature I3 Credits

Analysis of British and Commonwealth literary works before 1800.

Specific course content varies and may focus on genre, author, movement, theme, period, or theory.

Prerequisites: ENGL 112.

Terms Typically Offered: Fall.

ENGL 404 Studies in British and Commonwealth Literature II3 Credits

Analysis of British and Commonwealth literary works after 1800. Specific course content varies and may focus on genre, author, movement, theme, period, or theory.

Prerequisites: ENGL 112.

Terms Typically Offered: Spring.

ENGL 415 American Folklore3 Credits

Explores folk expressions of values, beliefs, traditions, attitudes, and worldviews.

Prerequisites: ENGL 112.

ENGL 421 Introduction to Literary Theory and Criticism3 Credits

Development and theory of literary criticism.

Prerequisites: ENGL 210.

ENGL 423 Genre Studies3 Credits

History and development of an individual literary genre.

Prerequisites: ENGL 112.

ENGL 425 Scientific Writing3 Credits

Theoretical and practical studies of writing in the sciences (science, medicine, and environmental writing). Addresses writing for both popular and professional audiences. Coverage of both print and online instructional materials. Safety, ethical and liability issues.

Prerequisites: ENGL 112 or 45 credit hours.

ENGL 427 Writing for Industry3 Credits

Theoretical and practical studies of writing for industrial fields. Addresses writing for both popular and professional audiences. Covers both print and online instructional materials. Safety, ethical, and liability issues.

Prerequisites: ENGL 112 or 45 credit hours.

ENGL 435 American Literature 1900-1945 3 Credits

An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.

Prerequisites: ENGL 112.

ENGL 436 American Literature 1945-Present 3 Credits

An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.

Prerequisites: ENGL 112.

ENGL 438 Ethnic Experiences in U.S. Literature 3 Credits

Survey of literary works written throughout United States history by African-American, Hispanic-American, Native American and Asian American authors, as well as by authors from other under represented cultural communities.

Prerequisites: ENGL 112.

ENGL 440 History of the English Language 3 Credits

Historical development of the English language; its internal formation as shaped by external political, social, and intellectual forces.

Prerequisites: ENGL 112 and junior standing, or permission of instructor.

ENGL 444 Studies in Identity 3 Credits

Analysis of identity construction in literary and cultural texts.

Prerequisites: ENGL 112.

Terms Typically Offered: Fall.

ENGL 451 Understanding and Using English Grammar 3 Credits

The art of using English grammar effectively for written and spoken communication.

Prerequisites: ENGL 112 and junior standing, or permission of the instructor.

ENGL 470 18th Century British Literature 3 Credits

Conceptual framework of the Enlightenment in England's representative writers.

Prerequisites: ENGL 112.

ENGL 471 British Romanticism 3 Credits

Exploration of the poetry, prose, and drama of the Romantic period in Britain. Text and authors are chosen by the instructor to provide a thorough study of selected historical, philosophical and literary aspects of the period.

Prerequisites: ENGL 112.

ENGL 475 Victorian Literature 3 Credits

Representative works of post-Romantic British literature.

Prerequisites: ENGL 112.

ENGL 478 20th Century British Literature 3 Credits

Major works from 20th Century British writers.

Prerequisites: ENGL 112.

ENGL 491 Composition Theory and Practice 3 Credits

Theory and practice of composing as it applies to teaching English in the junior and senior high schools; historical context, contemporary theory, and current pedagogy in the field of composition studies.

Prerequisites: Senior standing in teacher certification program or permission of instructor.

ENGL 492 Seminar in Writing 3 Credits

Capstone course focusing on genre choice (novel, short story, poetry, memoir, creative non-fiction, screenplay, playwriting). Research into professional and publishing considerations. Development of a creative portfolio.

Prerequisites: ENGL 210, ENGL 250, and junior standing, or permission of instructor.

ENGL 494 Seminar in Literature 3 Credits

Analysis of an important literary work or works, requiring students to interpret, criticize, and present research.

Prerequisites: ENGL 210 and senior standing, or permission of instructor. Course may be taken 4 times for credit.

ENGL 495 Independent Study 1-4 Credits

Prerequisites: ENGL 112.

Course may be taken multiple times up to maximum of 6 credit hours.

ENGL 496 Topics 1-3 Credits

Prerequisites: ENGL 112.

Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 497 Internship in Business, Technical, and Professional Communication 3 Credits

An opportunity to write, edit, and design business and technical documents in a professional setting. Projects may include reports, proposals, grants, manuals, brochures and newsletters.

Prerequisites: Senior standing or permission of instructor.

ENGL 499 Internship 1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 521 Seminar in Literary Theory 3 Credits

Study of the content and application of literary theoretical frameworks.

ENGL 543 Language Systems and Linguistic Diversity 3 Credits

Advanced study in the nature of language, first and second language acquisition, and issues relevant to linguistic diversity and multicultural literacies. Discussions will focus on education within and across home, community, and school contexts, including a focus on home-school-community relationships.

Prerequisites: Bachelor's degree.

ENGL 550 Studies in Creative Writing 3 Credits

Studies in the history, development, theory, and practice of creative writing with an emphasis on understanding genre.

ENGL 554 Topics in British and Commonwealth Literature 3 Credits

Analysis of an important British or Commonwealth literary work or works requiring students to interpret, criticize, and present research.

ENGL 561 Topics in American Literature 3 Credits

Analysis of an important American literary work or works requiring students to interpret, criticize, and present research.

ENGL 586 Seminar in Rhetoric and Composition 3 Credits

Theory and practice of rhetoric and composition including historical contexts, contemporary theories and current pedagogy.

ENGL 596 Topics 1-3 Credits

Prerequisites: Bachelor's degree.

Course may be taken multiple times up to maximum of 15 credit hours.

English-Basic Writing (ENGC)

ENGC 090 College Preparatory Reading and Composition3 Credits

Development of proficiency in reading and writing for college. Emphasis on applying analytic and critical reading skills in a variety of texts and an introduction to the writing process. Prepares students for college-level essential learning courses.

ENGC 092 Writing Studio1 Credit

This course is designed to offer supplemental support for students in ENGL 111 and writing intensive courses across the disciplines. This is a corequisite with ENGL 111 or social science 100 discipline strands for students with Accuplacer scores requiring enrollment.

ENGC 094 Reading & Writing Essentials2 Credits

Introduction to critical thinking as students explore reading and writing for specific purposes and audiences. Students develop skills required for college-level writing while applying strategies for improving comprehension, developing vocabulary, and increasing speed for reading college textbooks. Successful completion of this course will prepare students for college-level general education courses with a corequisite reading/writing studio.

Corequisites: ENGC 090.

ENGC 096 Topics:1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Entrepreneurship (ENTR)

ENTR 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 300 Small Business and Entrepreneurship3 Credits

Aspects of management uniquely important to small business firms; the economic and social environment in which they function.

ENTR 340 Applied Financial Management for Emerging Businesses3 Credits

Overview of basic accounting and finance concepts for non-business majors owning or employed by small business/entrepreneurial ventures.

ENTR 343 Exploring Entrepreneur Opportunities3 Credits

Introduction to innovation and opportunity recognition, including development of business ideas, business model validation and business feasibility analysis.

Equivalent Course(s): ENGR 353

ENTR 350 The Entrepreneurial Mindset3 Credits

Application of entrepreneurial perspectives in diverse business environments and roles. New perspectives and latest developments in entrepreneurship, ethnic and immigrant ventures, entrepreneurial leadership, innovation, and self-awareness. Entrepreneurship as a source of socioeconomic and institutional change in a global setting.

Prerequisites: ENTR 300 or permission of instructor.

ENTR 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ENTR 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 401 Entrepreneurial Finance3 Credits

Overview of financial management for the entrepreneurial venture, freelancer, or small business. Exposure to financial options from bootstrapping to venture capital. Development of skills using Quickbooks and Excel as tools for personal finance, business startup, and small business management.

Prerequisites: FINA 301.

ENTR 450 Entrepreneurship3 Credits

Analysis of managerial problems of small business, preparing a business plan, case studies, and individual reports of local small business enterprises. Understanding of elementary accounting, finance, and business law required.

Prerequisites: ACCT 201, MANG 201, MARK 231, FINA 301, and students choose either MARK 350 or CISB 341.

ENTR 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 499 Internship1-9 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 550 Entrepreneurship3 Credits

Takes the student through activities that an entrepreneur would encounter in the small business start-up process. Topics will center around marketing, managerial, legal, financial and informational needs of the new venture. The use of cases, real life projects and Internet resources will be used extensively during the course.

Environmental Science (ENVS)

ENVS 101 Introduction to Environmental Science-GTSC23 Credits

Impact of resource use and pollution on the earth's environment and biota. Scientific approach to solving environmental problems and the impacts of values upon global environmental decisions examined. General environmental awareness and literacy emphasized.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

ENVS 104 Environmental Science: Global Sustainability3 Credits

Examination of local to global environmental issues. Includes human population dynamics and impact of agriculture on the environment, ecosystem function, energy use and sustainable development, air, water and soil pollution, climate change, and environmental policy. Critical evaluation of readings from historical and modern environmental topics supplement lectures.

Prerequisites: Declared ENVS major or minor.

Terms Typically Offered: Fall, Spring.

ENVS 105 Readings in Environmental Science1 Credit

Critical readings in environmental science. Majors in Environmental Science and Technology only. ENVS 101 and 105 together are a substitute for ENVS 104.

Prerequisites: ENVS 101.

ENVS 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 204 Introduction to Ecosystem Management3 Credits

Scientific management of natural resources in a changing environment. Problem solving emphasized in a case study approach to ecosystem management. Theories of ecology, economics, fisheries and wildlife management, biology, and sociology to solve problems using realistic and complex landscape scenarios.

Prerequisites: ENVS 104 or permission of instructor.

Corequisites: ENVS 204L.

ENVS 204L Introduction to Ecosystem Management Laboratory1 Credit

Lab component required for ENVS 204.

Prerequisites: ENVS 104 or permission of instructor.

Corequisites: ENVS 204.

Fees: Yes.

ENVS 212 Environmental Health and Safety2 Credits

Examination of environmental health and safety issues associated with hazardous materials. Includes basic toxicology, threat assessment, and control strategies. Meets 40-hour OSHA training requirement for hazardous waste operations.

Prerequisites: ENVS 221.

ENVS 221 Science and Technology of Pollution Control3 Credits

Introduction to scientific, engineering, and technical elements of pollution control. Includes pollutant characteristics, investigation and cleanup of contaminated sites, waste treatment (air emissions, wastewater discharges, hazardous waste), waste minimization, life cycle analysis, and industrial ecology. Lab focuses on site investigation skills, design and operation of selected treatment technologies, and waste minimization audits.

Prerequisites: ENVS 104; mastery of high school algebra; CHEM 121 or CHEM 131 recommended.

Corequisites: ENVS 221L.

ENVS 221L Science and Technology of Pollution Control Laboratory1 Credit

Lab component for ENVS 221.

Prerequisites: ENVS 101 or ENVS 104; mastery of high school algebra; CHEM 121 or CHEM 131 recommended.

Corequisites: ENVS 221.

Fees: Yes.

ENVS 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 301 Environmental Project Management2 Credits

Basic practices of effective project management, including proposal preparation, planning, scheduling, cost estimating, cost and progress tracking, and team building.

Prerequisites: Any one of the following: ENVS 204, ENVS 221, ENVS 331, ENVS 340.

ENVS 304 Environmental Science for Outdoor Recreation3 Credits

Introduction to major western ecosystems, their historical and current management, and relevant environmental problems. Examines the effects of outdoor recreation on ecosystems. Topics include the effects of climate change on both ecosystems and outdoor recreation.

Prerequisites: ENVS 101.

Terms Typically Offered: Spring.

ENVS 312 Soil Science and Sustainability3 Credits

Physical, chemical and biological properties of soils. Function of soils emphasized. Application of soil science to sustainable use of soils in natural and agricultural settings.

Prerequisites: CHEM 121 or higher and ENVS 204/ENVS 204L, or permission of instructor.

Corequisites: ENVS 312L.

ENVS 312L Soil Science and Sustainability Laboratory1 Credit

Lab component required for ENVS 312.

Prerequisites: CHEM 121 or higher and ENVS 204/ENVS 204L, or permission of instructor.

Corequisites: ENVS 312.

Fees: Yes.

ENVS 315 Mined Land Rehabilitation2 Credits

Principles and practices of mined land reclamation. Topics include mining techniques, disturbances caused by mining, regulations, closure of mine features, soil preparation, revegetation, and monitoring.

Prerequisites: ENVS 455 or ENVS 312/ENVS 312L (may be taken concurrently).

Fees: Yes.

ENVS 321 Environmental Risk Analysis3 Credits

Assessment, management, and control of risk from toxic substances in the environment. Topics include basic elements of toxicity testing and epidemiology, chemical fate in the environment, exposure assessment, uncertainty in risk estimates, approaches to risk management, and risk communication.

Prerequisites: ENVS 221/ENVS 221L, and MATH 113.

ENVS 331 Water Quality3 Credits

Physical, chemical, and biological properties of aquatic systems. Includes movement of water in the watershed, stream classification and stability, lake circulation, aquatic ecology, chemistry and biology of natural and polluted waters, water quality monitoring, regulation and protection of surface water, and watershed assessment and management. Lab focuses on practical skills and field measurements culminating in assessment of a local watershed.

Prerequisites: CHEM 121 or higher; and STAT 200.

Corequisites: ENVS 331L.

Terms Typically Offered: Fall.

ENVS 331L Water Quality Laboratory1 Credit

Physical, chemical, and biological properties of aquatic systems. Includes movement of water in the watershed, stream classification and stability, lake circulation, aquatic ecology, chemistry and biology of natural and polluted waters, water quality monitoring, regulation and protection of surface water, and watershed assessment and management. Lab focuses on practical skills and field measurements culminating in an assessment of a local watershed. Lab component required for ENVS 331.

Prerequisites: CHEM 121 or higher; and STAT 200.

Corequisites: ENVS 331.

Terms Typically Offered: Fall.

Fees: Yes.

ENVS 337 Stream Biomonitoring3 Credits

Examination of the structure and organization of macroinvertebrate assemblages in streams and rivers. Topics include sample collection, sample preservation, sample identification, and analysis using the State of Colorado Multimetric Index for assessing water quality.

Prerequisites: ENVS 204/ENVS 204L or BIOL 105/BIOL 105L.

Corequisites: ENVS 337L.

Terms Typically Offered: Fall.

ENVS 337L Stream Biomonitoring Laboratory1 Credit

Examination of the structure and organization of macroinvertebrate assemblages in streams and rivers. Topics include sample collection, sample preservation, sample identification, and analysis using the State of Colorado Multimetric Index for assessing water quality.

Prerequisites: ENVS 204/ENVS 204L or BIOL 105/BIOL 105L.

Corequisites: ENVS 337.

Terms Typically Offered: Fall.

ENVS 340 Applied Atmospheric Science3 Credits

Examination of the atmosphere and air pollution. Includes physical and chemical properties of the atmosphere, meteorology, air pollutant sources and effects, monitoring, pollutant dispersion, emission inventory, management of emissions, and regulation of air quality.

Prerequisites: CHEM 121 or CHEM 131.

ENVS 350 Ecology and Management of Shrublands and Grasslands3 Credits

Examination of ecological principles in determining the structure, function, and management of North American grasslands and shrublands. Three one-hour lectures and one three-hour lab per week. Two Saturday labs may be required.

Prerequisites: STAT 200 and ENVS 204/ENVS 204L.

Corequisites: ENVS 350L.

ENVS 350L Ecology and Management of Shrublands and Grasslands Laboratory1 Credit

Lab component required for ENVS 350.

Prerequisites: STAT 200 and ENVS 204/ENVS 204L.

Corequisites: ENVS 350.

Fees: Yes.

ENVS 354 Forest Ecology and Management3 Credits

Examination of the structure and function of trees and forests. Topics include forest stand development, carbon cycling, nutrient cycling, forest disturbances, and basic practices of sustainable forest management.

Prerequisites: ENVS 204/ENVS 204L.

ENVS 360 Fire Ecology3 Credits

Examination of the ecological effects of fire on forests, shrublands, and grasslands. Includes fire effects on plants, animals, soil, and water, as well as using fire as a restoration tool.

Prerequisites: STAT 200 and ENVS 204/ENVS 204L.

Corequisites: ENVS 360L.

ENVS 360L Fire Ecology Laboratory1 Credit

Field experience examining the ecological effects of fire on forests, shrublands, and grasslands of the Colorado Plateau. Includes field and lab studies that test the effects of fire on plants, animals, soil, and water. One 3-hour lab per week. May require 2 Saturday labs.

Prerequisites: STAT 200 and ENVS 204/ENVS 204L.

Corequisites: ENVS 360.

Fees: Yes.

ENVS 370 Renewable Energy3 Credits

Introduction to renewable energy resources from a technical perspective with an emphasis on sustainability. Includes concepts of energy and power, units of measure, sources and forms of energy, uses of energy, energy efficiency, electricity, solar thermal and photovoltaics, bioenergy, hydropower, tidal power, wave power, wind power, geothermal, hydrogen, efficient building design, and integration of renewables with current energy supplies.

Prerequisites: MATH 113 or higher.

Equivalent Course(s): GEOL 370

Terms Typically Offered: Fall.

ENVS 373 Climate Change Adaptation3 Credits

Climate change vulnerability and adaptation strategies in natural resource management. Includes the scientific basis of climate change and assessing the exposure, sensitivity, and adaptive capacity of species and ecosystems to climate change.

Prerequisites: ENVS 204.

Terms Typically Offered: Spring.

ENVS 374 Sustainable Building3 Credits

Principles and practices of "green" building. Topics include philosophy of sustainable design, site development, passive heating and cooling, innovative structural systems and materials, energy supply and conservation, water and waste water management, indoor air quality, and case studies.

ENVS 376 Ecological Design and Technology3 Credits

Examination of ecosystem-based technology to benefit both humans and the environment. Topics covered include the philosophy of ecological design and technology, relevant ecological principles, and ecological technologies including treatment wetlands, anaerobic digesters, algal flow ways, ecological treatment systems, rain gardens, green walls, and green roofs.

Prerequisites: CHEM 121/CHEM 121L, ENVS 204, and MATH 113.

Terms Typically Offered: Fall.

ENVS 377 Systems Thinking in Environmental Science3 Credits

Exploration of systems thinking as an approach to environmental issues. Topics covered include the meaning of systems and systems thinking, examining systems using the "triple P" framework (people, planet, profit), drawing system diagrams, conducting life cycle assessment and eMergy analysis to quantify environmental impacts, and modeling systems.

Prerequisites: ENVS 204 and MATH 113.

Terms Typically Offered: Spring.

Fees: Yes.

ENVS 378 Permaculture Design3 Credits

Practical application of ecology to design of sustainable human and agricultural systems. Topics include permaculture principles, design strategies, sustainable agriculture, natural building, cooperative economics, and neighborhood design. Students work in teams to complete a design project for a local site.

Corequisites: ENVS 378L.

Terms Typically Offered: Fall, Summer.

ENVS 378L Permaculture Design Laboratory1 Credit

Practical application of ecology to design of sustainable human and agricultural systems. Topics include permaculture principles, design strategies, sustainable agriculture, natural building, cooperative economics, and neighborhood design. Students work in teams to complete a design project for a local site.

Corequisites: ENVS 378.

Terms Typically Offered: Fall, Summer.

ENVS 394 Natural Resources of the West1 Credit

Seminars covering topics related to natural resources including water, soil, land, mineral and energy resources in the western United States. Guest speakers are invited from the academic community, industry or government agencies to give formal oral presentations following by informal discussion with students and faculty.

Equivalent Course(s): GEOL 394

Course may be taken multiple times up to maximum of 4 credit hours.

ENVS 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ENVS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Fees: Yes.

ENVS 396L Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 410 Environmental Regulatory Compliance3 Credits

Examination of regulatory requirements pertaining to air pollution, water pollution, hazardous materials, and radioactive materials. Additional topics include enforcement, compliance management systems, compliance auditing, and innovative approaches to regulation.

Prerequisites: ENVS 221, and junior or senior standing.

ENVS 413 Environmental Fate and Transport of Contaminants3 Credits

Physical, chemical, and biological factors influencing the persistence and migration of chemicals in the environment. Includes consideration of air, surface water, soil, and ground water. Emphasis on quantitative problem solving.

Prerequisites: CHEM 121 or CHEM 132; and MATH 119, MATH 146, or MATH 151.

ENVS 420 Pollution Investigation & Monitoring3 Credits

Survey of field sampling and analytical methods for study of environmental systems. Topics include sampling design, regulatory issues, quality assurance, quality control, data interpretation, and reporting. Three one-hour lectures and one three-hour laboratory per week.

Prerequisites: CHEM 121 or CHEM 131, and STAT 200; ENVS 221/ENVS 221L recommended.

Corequisites: ENVS 420L.

ENVS 420L Pollution Investigation & Monitoring Laboratory1 Credit

Examination of strategies and techniques for investigating contaminated sites and monitoring environmental pollutants. Topics include Phase I assessments, development and implementation of sampling and monitoring plans, quality assurance, methods of analysis, and data interpretation and presentation.

Prerequisites: CHEM 121 or CHEM 131, and STAT 200; ENVS 221/ENVS 221L recommended.

Corequisites: ENVS 420.

Fees: Yes.

ENVS 431 Water and Wastewater Treatment3 Credits

Examination of water and wastewater treatment processes including physical, chemical, and biological treatment technologies. Emphasis on unit process design and modeling.

Prerequisites: ENVS 331.

ENVS 433 Restoration of Aquatic Systems3 Credits

Principles and practices of restoring the functions and values of streams, ponds, and wetlands. Addresses physical, chemical, and biological aspects of these aquatic systems.

Prerequisites: ENVS 331/ENVS 331L.

ENVS 455 Restoration Ecology3 Credits

Examination of principles and techniques for restoration of community characteristics and ecosystem functions to disturbed lands. Lecture and lab emphasize practical application of ecological principles to restoration culminating in an independent project of designing a restoration project for a local area.

Prerequisites: ENVS 204 and ENVS 312, or permission of instructor.

Corequisites: ENVS 455L.

ENVS 455L Restoration Ecology Laboratory1 Credit

Lab component required for ENVS 455.

Prerequisites: ENVS 204 and ENVS 312, or permission of instructor.

Corequisites: ENVS 455.

Fees: Yes.

ENVS 460 Fire Management3 Credits

Examination of principles and current topics in fire management, including fire behavior, prescribed fire/smoke management, fuels/fuels management, wildfire control, fire in the wildland-urban interface, and fire policy.

Prerequisites: ENVS 360/ENVS 360L, STAT 200, one semester of biology.

Corequisites: ENVS 460L.

ENVS 460L Fire Management Laboratory1 Credit

Field, lab, and computer modeling experience in predicting fire behavior, planning prescribed burns, managing hazardous fuels, and assessing wildfire risk in the wildland-urban interface.

Prerequisites: ENVS 360/ENVS 360L, STAT 200, one semester of biology.

Corequisites: ENVS 460.

Fees: Yes.

ENVS 475 Experimental Design and Statistical Analysis in Environmental Science3 Credits

Examination of principles and techniques for designing experiments and analyzing data in environmental sciences. Emphasis on practical application of analysis techniques using environmental data with computer applications.

Prerequisites: ENVS 204 or ENVS 221, STAT 200, and 6 upper division credits; or permission of instructor.

ENVS 492 Capstone in Environmental Science and Technology3 Credits

Small-group environmental projects for outside organizations.

Preparation of project proposals, project planning and implementation, project reports, and oral presentations to clients. Exit exams for the Environmental Science and Technology major are administered as part of this course.

Prerequisites: Senior standing.

Terms Typically Offered: Fall, Spring.

ENVS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

ENVS 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 497 Structured Research1-3 Credits

Research in environmental science under the direct guidance of a faculty member. Designed for junior and senior level students.

Prerequisites: Permission of instructor.

Course may be taken multiple times up to maximum of 6 credit hours.

ENVS 499 Internship1-4 Credits

Work experience for a non-academic organization on environmental projects. Requires 45 contact hours per credit hour, a final report, and oral presentation. Available as an elective for Environmental Science & Technology majors.

Prerequisites: Junior or senior standing in the Environmental Science & Technology program or permission of instructor.

Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 596 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Essential Learning (ESSL)

ESSL 200 Essential Speech1 Credit

Development of confidence and competence in speaking through cross-curricular topics generated from individual Maverick Milestone coursework.

Prerequisites: ENGL 112, MATH 110 or higher, and at least 45 credit hours completed.

Corequisites: ESSL 290.

Terms Typically Offered: Fall, Spring, Summer.

ESSL 290 Maverick Milestone3 Credits

Interdisciplinary, thematically-oriented transition from the Essential Learning program to specialized programs. Develop the ability to solve problems and approach ideas using more than one set of intellectual tools. Taken before the student completes 75 credit hours.

Prerequisites: ENGL 112, MATH 110 or higher, at least 45 credit hours completed.

Corequisites: ESSL 200.

Finance (FINA)

FINA 300 Personal Finance1 Credit

Development of financial and economic literacy to improve personal decision making in the areas of: personal budgeting; developing a personal financial plan including consumer credit, taxes and purchasing a car and/or home; money and interest rates; investing and retirement.

Terms Typically Offered: Fall, Spring.

FINA 301 Managerial Finance3 Credits

Acquisition, allocation, and management of funds within the business enterprise. Financial goals, funds flow, valuation, capital budgeting, and financing strategies.

Prerequisites: ACCT 201, and CISB 241 or STAT 241.

FINA 310 Risk Management3 Credits

Identification of risk, risk analysis, risk evaluation and methods of resolving risk issues in a business environment. Insurance as a risk management tool discussed.

Prerequisites: Permission of instructor.

FINA 320 Fundamentals of Investments3 Credits

Introduction to the theory and practices of investment valuation and management. Topics include risk and return, investor objectives and strategies, the types and characteristics of investment instruments, the process of buying and selling securities, investment valuation and yields, and portfolio management.

Prerequisites: FINA 301.

FINA 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FINA 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FINA 412 Life and Health Insurance Licensure and Financial Planning3 Credits

Analysis of personal and business life and health insurance policies. Focus includes coverage need determination, underwriting, marketing, financial, ratemaking, reserving and other insurance considerations.

Prerequisites: Permission of instructor.

FINA 415 Property and Liability Insurance Licensure3 Credits

Analysis of personal and business property and liability insurance policies. Focus includes coverage need determination, underwriting, marketing, financial, ratemaking, reserving, and other insurance considerations.

Prerequisites: Permission of instructor.

FINA 420 Security Analysis and Portfolio Management3 Credits

Extension of the theory and practices of investment valuation and management. Topics include risk and return, market efficiency, economic and industry analysis, fundamental and technical analysis, bond analysis and management strategies, portfolio management and performance evaluation, and the characteristics and uses of options, rights, warrants, convertibles, and futures.

Prerequisites: FINA 301 and FINA 320.

FINA 425 Portfolio Management2 Credits

Extension of the theory and practices of investment valuation and management. Topics include asset allocation and security analysis; risk and return; market efficiency; economic and industry analysis; fundamental and technical analysis; equity and bond analysis management strategies; and portfolio performance evaluation.

Prerequisites: FINA 301 and FINA 320.

Terms Typically Offered: Fall.

FINA 426 Advanced Portfolio Management2 Credits

In-depth security analysis of investment portfolio valuation and management of investment types (stocks and bonds). Topics include investor policy statements; risk and return; market forces analysis; fundamental and technical analysis; equity and bond portfolio management strategies; portfolio performance evaluation and reports; and the concept and uses of derivatives (options and futures).

Prerequisites: FINA 301, FINA 320, and FINA 425.

Terms Typically Offered: Spring.

FINA 431 International Financial Management3 Credits

The theory and practices of financial management in an international product and capital marketplace. Topics include the international flow of funds, exchange rate determinants and risk hedging, international arbitrage and interest rate parity, purchasing power parity and the international Fisher effect, instruments of international trade financing, multinational capital budgeting, multinational costs of capital, and multinational capital structure.

Prerequisites: FINA 301.

FINA 451 Financial Management: Theory and Applications3 Credits

Extension of the theory and practices of financial management using a case analysis approach. Topics include financial statement analysis, financial planning and forecasting, risk and return, capital budgeting, lease financing, cost of capital, capital structure, dividend policy, and risk management.

Prerequisites: FINA 301; senior standing or permission of instructor.

FINA 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FINA 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FINA 500 Financial Strategy3 Credits

Introduction and development of analysis of the financial aspects of a corporation using both theory and application. Topics include capital markets, global economic factors that affect the corporation, capital asset pricing model, portfolio analysis, and capital structure policy.

Fine Arts (FINE)

FINE 101 The Living Arts-GTAH13 Credits

Interdisciplinary survey of human creative efforts as they relate to each other. Art, drama, and music are compared with similarities stressed.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

FINE 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FINE 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FINE 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FINE 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FINE 499 Internship8 or 15 Credits

Part or full-time work in various aspects of arts management. Sites may include galleries, musical, theatrical or other performing organizations, arts centers, or other situations that meet the instructor's approval. Half-time equals eight semester hours credit; full-time equals 15 semester hours credit.

Prerequisites: Junior standing in visual or performing arts. May also require selected courses in business, social science, etc. as appropriate to the internship sought.

Course may be taken multiple times up to maximum of 15 credit hours.

Fire Science Technology (FSTR)

FSTR 100 Fire Fighter I9 Credits

Preparation to meet the requirements necessary to perform at the first level of progression, as identified in National Fire Protection Association (NFPA) 1001 Firefighter Professional Qualifications.

Terms Typically Offered: Fall.

FSTR 101 Fire Fighter II3 Credits

Exploration of advanced skills and proficiency in firefighting beyond the Firefighter I level. Further develops strategies and tactics in incident command, operations and leadership.

Prerequisites: FSTR 100 and FSTR 107.

Terms Typically Offered: Spring.

FSTR 102 Principles of Emergency Service Suppression3 Credits

Introduction to fire protection; career opportunities in fire protection and related fields; philosophy and history of fire protection/service; fire loss analysis; organization and function of public and private fire protection services; laws and regulations affecting the fire service; and basic fire chemistry and physics.

Terms Typically Offered: Fall.

FSTR 103 Fire Behavior and Combustion3 Credits

Exploration of the theories and fundamentals of how fires start and spread and how they are controlled. Prepares the student to comprehend fire behavior, fire suppression and the processes of combustion.

Terms Typically Offered: Fall.

Fees: Yes.

FSTR 105 Building Construction for Fire Protection3 Credits

Components of building construction that relate to fire and life safety. The focus of this course is on firefighter safety. The elements of consideration and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies.

Terms Typically Offered: Fall.

FSTR 106 Fire Prevention3 Credits

Examination of fundamental information regarding the history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built-in fire protection systems, fire investigation, and fire and life-safety education.

Terms Typically Offered: Spring.

Fees: Yes.

FSTR 107 Hazardous Materials Operations Level I3 Credits

Introduction to hazardous materials incidents, recognizing and identifying hazardous materials, planning response, implementing response procedures, decision making, and continued evaluation at the awareness and operation level.

Corequisites: FSTR 100.

Terms Typically Offered: Fall.

FSTR 109 Occupational Safety and Health for Fire3 Credits

Introduction to the basic concepts of occupational health and safety as it relates to emergency service organizations. Topics include risk evaluation and control procedures for fire stations, training sites, emergency vehicles, and emergency situations involving fire, EMS, hazardous materials, and technical rescue.

Terms Typically Offered: Fall.

FSTR 151 Driver-Operator3 Credits

Basic knowledge and skills to safely operate a fire apparatus according to the NFPA professional standard. The course enables students to display and demonstrate knowledge of fire apparatus, operation of apparatus, pumps and pumping, hydraulics calculations, maintenance, and testing.

Terms Typically Offered: Spring.

Fees: Yes.

FSTR 201 Instructional Methodology3 Credits

Roles and responsibilities of the fire service instructor. Includes oral communication skills, concepts of learning, planning and development of lesson plans and instructional materials and delivery methods, testing and evaluations, records and reports, and demonstration of instructional abilities. This course prepares the student for Fire Instructor I State Certification.

Prerequisites: FSTR 100, FSTR 102, and FSTR 107.

Terms Typically Offered: Fall, Spring.

FSTR 202 Strategy and Tactics3 Credits

In-depth analysis of the principles of fire control through utilization of personnel, equipment, and extinguishing agents on the fire ground. Explores the main functions within the ICS system and how they interrelate during an incident.

Terms Typically Offered: Spring.

Fees: Yes.

FSTR 203 Fire Hydraulics and Water Supply3 Credits

Foundation of theoretical knowledge in order to understand the principles of the use of water in fire protection and to apply hydraulic principles to analyze and to solve water supply problems.

Prerequisites: FSTR 105 and MATH 107.

Terms Typically Offered: Fall, Spring.

FSTR 204 Principles of Code Enforcement 3 Credits

Fundamental knowledge of the role of code enforcement in a comprehensive fire prevention program.

Prerequisites: FSTR 102 and FSTR 105.

Corequisites: FSTR 106 and FSTR 209.

Terms Typically Offered: Spring.

FSTR 205 Fire Investigation 3 Credits

Fundamentals and technical knowledge needed for proper fire scene interpretations, including recognizing and conducting origin and cause, preservation of evidence and documentation, scene security, motives of the fire setter, and types of fire causes.

Prerequisites: FSTR 102.

Terms Typically Offered: Fall, Spring.

FSTR 206 Fire Officer Supervision and Leadership 3 Credits

Training to develop a better understanding of the roles and responsibilities of Company Officers (COs) in preparing their company for incident operations. This course is designed to clarify the transition from firefighter to CO and the new roles relating to leadership and safety.

Prerequisites: FSTR 102 and FSTR 202.

Terms Typically Offered: Spring.

FSTR 209 Fire Protection Systems 3 Credits

Features of design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection and portable fire extinguishers.

Terms Typically Offered: Spring.

Fees: Yes.

FSTR 252 Fire Investigation II 3 Credits

Advanced technical knowledge on rule of law, fire scene analysis, fire behavior, evidence collection and preservation, scene documentation, case preparation, and testifying.

Prerequisites: FSTR 100, FSTR 102, FSTR 103, and FSTR 205.

Terms Typically Offered: Fall, Spring.

Foreign Language-American Sign Language (FLSL)

FLSL 111 American Sign Language 3 Credits

Basic receptive and expressive skill acquisition in American Sign Language (ASL) and other signing modes. Includes approximately 400 vocabulary items; the manual alphanumeric system; interrogatives; subject, object, possessive pronouns; simple present, past, and future verb tense formation.

Terms Typically Offered: Fall.

FLSL 112 American Sign Language II 3 Credits

Receptive and expressive skill practice in American Sign Language (ASL) and other signing modes. Includes approximately 800 vocabulary terms; classifiers; numeral incorporation; fingerspelling, loan signs, directional verbs; body and facial language.

Prerequisites: FLSL 111.

Terms Typically Offered: Spring.

FLSL 296 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Foreign Language-French (FLAF)

FLAF 111 First-Year French 3 Credits

Basic competency in understanding, speaking, reading, and writing French. Beginning familiarity with French culture.

Terms Typically Offered: Fall.

FLAF 112 First-Year French II 3 Credits

Continued work on basic competency in understanding, speaking, reading, and writing French. Increasing familiarity with French culture.

Prerequisites: FLAF 111.

Terms Typically Offered: Spring.

FLAF 290 Special Studies In French 1-3 Credits

Study beyond the scope of the existing curriculum.

FLAF 295 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Foreign Language-German (FLAG)

FLAG 111 First-Year German 3 Credits

Introduction to the German language.

FLAG 112 First-Year German II 3 Credits

Introduction to the German language.

FLAG 211 Second-Year German 3 Credits

Grammar review, vocabulary distinction, and readings in the German language.

Prerequisites: Two years of high school German, FLAG 111 and FLAG 112, or permission of instructor.

FLAG 212 Second-Year German II 3 Credits

Grammar review, vocabulary distinction, and readings in the German language.

Prerequisites: Two years of high school German, FLAG 111 and FLAG 112, or permission of instructor.

FLAG 290 Special Studies In German 1-3 Credits

Study beyond the scope of the existing curriculum.

Foreign Language-Greek (FLGK)

FLGK 111 Introductory Greek 3 Credits

An introduction to the fundamentals of reading ancient Greek. Emphasizes basic vocabulary and grammar. Explores aspects of Greek literature and culture. Provides a foundation for the study of ancient Greece. Develops a practical understanding of English.

Terms Typically Offered: Fall.

FLGK 112 Introductory Greek II 3 Credits

Continuation of the fundamentals of reading ancient Greek. Emphasizes basic vocabulary and grammar. Explores basic vocabulary and grammar. Explores aspects of Greek literature and culture. Provides a foundation for the study of ancient Greece. Develops a practical understanding of English.

Prerequisites: FLGK 111.

Terms Typically Offered: Spring.

FLGK 395 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Foreign Language-Italian (FLAI)

FLAI 111 First-Year Italian 3 Credits

Introduction to Italian. Basic competency in understanding, speaking, reading, and writing Italian.

Terms Typically Offered: Fall.

FLAI 112 First-Year Italian I3 Credits

Continued work on basic competency in Italian. Increasing familiarity with Italian culture.

Prerequisites: FLAI 111.

Terms Typically Offered: Spring.

Foreign Language-Japanese (FLAJ)**FLAJ 111 Beginning Japanese I3 Credits**

Basic competency in understanding, speaking, reading, and writing Japanese. Beginning familiarity with Japanese culture.

Terms Typically Offered: Fall.

FLAJ 112 Beginning Japanese I3 Credits

Continued work on basic competency in understanding, speaking, reading, and writing Japanese. Increasing familiarity with Japanese culture.

Prerequisites: FLAJ 111.

Terms Typically Offered: Spring.

Foreign Language-Latin (FLLT)**FLLT 111 Introductory Latin I3 Credits**

Introduction to reading classical Latin. Emphasizes basic vocabulary and grammar. Explores aspects of Latin literature and Roman culture. Provides a foundation for the study of ancient Rome. Develops a practical understanding of English.

Terms Typically Offered: Fall.

FLLT 112 Introductory Latin I3 Credits

Continued practice reading classical Latin. Emphasizes basic vocabulary and grammar. Explores aspects of Latin literature and Roman culture. Provides a foundation for the study of ancient Rome. Develops a practical understanding of English.

Prerequisites: FLLT 111.

Terms Typically Offered: Spring.

FLLT 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Foreign Language-Mandarin Chinese (FLAM)**FLAM 111 First-Year Mandarin Chinese I3 Credits**

Introduction to Mandarin Chinese. Basic competency in understanding, speaking, reading, and writing Mandarin Chinese.

Terms Typically Offered: Fall.

FLAM 112 First-Year Mandarin Chinese I3 Credits

Continued work on basic competency in Mandarin Chinese. Increasing familiarity with Chinese culture.

Prerequisites: FLAM 111.

Terms Typically Offered: Spring.

Foreign Language-Other (FLAV)**FLAV 196 Topics:1-3 Credits**

Course may be taken multiple times up to maximum of 15 credit hours.

FLAV 290 Special Studies in Foreign Languages1-6 Credits

These courses are currently offered through Outreach: Ancient Greek, Latin, Advanced French, German, Spanish and other Classical and Modern Languages as permitted by interest and instructor availability.

FLAV 290A Ancient Greek Begin I3 Credits**FLAV 290B Ancient Greek Begin I3 Credits****FLAV 290C Mandarin Beginning I3 Credits****FLAV 290D Mandarin Beginning I3 Credits****FLAV 290E Japanese Beginning I3 Credits****FLAV 290F Beginning Japanese I3 Credits****FLAV 290G Intermediate Japanese I3 Credits****FLAV 290H Intermediate Japanese I3 Credits****FLAV 290I Hebrew Beginning I3 Credits****FLAV 290J Hebrew Beginning I3 Credits****FLAV 290K Italian Beginning I3 Credits****FLAV 290M Italian Beginning I3 Credits****FLAV 290N Latin Beginning I3 Credits****FLAV 290P Latin Beginning I3 Credits****FLAV 290S Russian Beginning I3 Credits****FLAV 290T Russian Beginning I3 Credits****FLAV 295 Independent Study1-3 Credits**

Course may be taken multiple times up to maximum of 6 credit hours.

FLAV 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FLAV 390 Special Studies in Foreign Languages1-3 Credits

These courses are currently offered through Outreach: Ancient Greek, Latin, Advanced French, German, Spanish and other Classical and Modern Languages as permitted by interest and instructor availability.

FLAV 390G French Intermediate I3 Credits**FLAV 390H French Intermediate I3 Credits****FLAV 390S Russian Intermediate I3 Credits****FLAV 390T Russian Intermediate I3 Credits****FLAV 390U French Advanced3 Credits****FLAV 390V German Advanced3 Credits****FLAV 390W Spanish Advanced3 Credits****FLAV 395 Independent Study1-3 Credits**

Course may be taken multiple times up to maximum of 6 credit hours.

FLAV 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FLAV 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FLAV 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Foreign Language-Russian (FLAR)**FLAR 111 First-Year Russian I3 Credits**

Introduction to Russian. Basic competency in understanding, speaking, reading, and writing Russian.

Terms Typically Offered: Fall.

FLAR 112 First-Year Russian II3 Credits

Continued work on basic competency in Russian. Increasing familiarity with Russian culture.

Prerequisites: FLAR 111.

Terms Typically Offered: Spring.

Foreign Language-Spanish (FLAS)

FLAS 111 First-Year Spanish I3 Credits

Basic Spanish language skills. Introduction to greetings, classroom, and family vocabularies in the present and present progressive tenses. Hispanic cultural and social interactions.

Terms Typically Offered: Fall, Spring, Summer.

FLAS 112 First-Year Spanish II3 Credits

Continuation of basic Spanish language skills. Introduction of specialized vocabularies and past tenses (preterit vs. imperfect). Continuation of Hispanic cultural and social interactions.

Prerequisites: FLAS 111.

Terms Typically Offered: Fall, Spring, Summer.

FLAS 211 Second-Year Spanish I3 Credits

Continuation of basic Spanish language skills. Introduces subjunctive mood, future and conditionals, and other language constructions.

Prerequisites: FLAS 112.

Essential Learning Categories: Humanities

Terms Typically Offered: Fall, Spring.

FLAS 212 Second-Year Spanish II3 Credits

Review of Spanish grammar. Practice in writing, speaking, listening comprehension, and reading.

Prerequisites: FLAS 211.

Terms Typically Offered: Spring.

FLAS 213 Spanish Conversation and Grammar3 Credits

Conversational practice in Spanish over a wide range of topics, with focus on conversational skills at the intermediate level. Review of Spanish grammar.

Prerequisites: FLAS 211.

Essential Learning Categories: Humanities

Terms Typically Offered: Fall, Spring.

FLAS 290 Special Studies in Spanish1-3 Credits**FLAS 295 Independent Study1-3 Credits**

Course may be taken multiple times up to maximum of 6 credit hours.

FLAS 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FLAS 300 Spanish Composition and Grammar3 Credits

Writing practice in Spanish over a wide range of topics (including written accents and other spelling conventions), with focus on writing skills at the intermediate level. Review of Spanish grammar.

Prerequisites: FLAS 213 (can be taken concurrently).

FLAS 301 Advanced Spanish Grammar3 Credits

Level of instruction that assumes a previous formal contact with Spanish. It is not only devoted to increase awareness of grammatical accuracy but also develops the form and structure of language, always oriented towards a practical use of Spanish.

Prerequisites: FLAS 212 or permission of instructor.

FLAS 302 Advanced Spanish Composition3 Credits

Writing of well-structured and clearly-planned compositions of varying lengths and styles. Provides the opportunity for students to do research and prepares them for the writing of regular term papers in Spanish.

Prerequisites: FLAS 301 or permission of instructor.

FLAS 303 Advanced Spanish Conversation3 Credits

Conversational practice in Spanish over a wide range of topics. Strategies in organization of oral discourse, and improvisation with special attention to advanced expression, grammaticality, and specific characteristics of spoken language.

Prerequisites: FLAS 301 and FLAS 302.

FLAS 304 Advanced Oral Production and Composition3 Credits

Introduction to writing well-structured and clearly planned compositions of varying lengths and styles. Preparation, organization, and delivery of a speech in Spanish. Provides the opportunity for students to conduct research and prepares them for the writing of term papers and oral presentations in Spanish. Special attention given to advanced expression and grammar.

Prerequisites: FLAS 300.

FLAS 305 Advanced Spanish Grammar and Spanish English Contrasts3 Credits

Development of grammatical awareness and accuracy, oriented towards a practical use of Spanish. Includes comparison and contrast of English and Spanish grammar.

Prerequisites: FLAS 300.

FLAS 311 History and Culture of Spain3 Credits

Introduction to Spanish culture and history, including the physical characteristics of the Iberian Peninsula, the earliest Pre-Roman inhabitants, the Roman conquest to the Germanic invasions, the Islamic empire, the Christian "Reconquest", the Spanish empire, its decline and end, the industrial revolution, the modernization, the II Republic, Civil War, Franco's dictatorship and Spain's conversion into the democratic monarchy of today.

Prerequisites: FLAS 304 or FLAS 305.

Terms Typically Offered: Fall.

FLAS 312 History and Culture of Latin America3 Credits

Exploration of Latin American culture, including origins of pre-Columbian cultures of Meso-America, the Caribbean and South-America; Spanish invasion and colonial culture; new racial and ethnic groups; independence and new republics; neo-colonialism in the western hemisphere; post-Cuban Revolutionary influence; influence of U.S. during the "cold war"; economic and commercial interdependence; immigration of Latinos to the U.S.; and current events.

Prerequisites: FLAS 304 or FLAS 305.

Terms Typically Offered: Spring.

FLAS 321 Introduction to the Literature of Spain3 Credits

Introduction to the literature of Spain from the Middle Ages through the twenty-first century. Includes excerpts from major works in poetry, narrative, and theater.

Prerequisites: FLAS 301, FLAS 302, and FLAS 303, or permission of instructor.

FLAS 322 Introduction to the Literature of Latin America3 Credits

Introduction to the literature of Latin America from Columbus through the twenty-first century. Includes indigenous traditions and excerpts from major works in poetry, narrative, and theater.

Prerequisites: FLAS 301, FLAS 302, and FLAS 303, or permission of instructor.

FLAS 323 Introduction to Hispanic Literature I3 Credits

Exploration of Peninsular and Latin-American literature from their earliest manifestations through the 18th century. Introduction to literary analysis and criticism.

Prerequisites: FLAS 304 or FLAS 305.

Terms Typically Offered: Fall.

FLAS 324 Introduction to Hispanic Literature II3 Credits

Exploration of Peninsular and Latin-American literature from early 19th century works through contemporary literature. Introduction to literary analysis and criticism.

Prerequisites: FLAS 304 or FLAS 305.

Terms Typically Offered: Spring.

FLAS 341 Introduction to Hispanic Linguistics3 Credits

Introduction to human language with Spanish as the primary source for description and analysis. Explores Phonology, Word formation, Language Acquisition, Language and Society. Students will be equipped with the skills necessary to apply linguistic concepts to actual Spanish language data.

Prerequisites: FLAS 305.

Terms Typically Offered: Fall.

FLAS 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FLAS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FLAS 421 Hispanic Poetry3 Credits

Exploration of peninsular and/or Latin-American poetry, poets, and poetic forms. May include poetry written by Hispanic authors in the United States.

Prerequisites: FLAS 301, FLAS 302, and FLAS 303.

FLAS 422 Hispanic Prose3 Credits

Exploration of peninsular and/or Latin-American prose, including the novel, short story, and/or essay. May include prose written by Hispanic authors in the United States.

Prerequisites: FLAS 301, FLAS 302, FLAS 303, and FLAS 341.

FLAS 423 Hispanic Drama and Film3 Credits

Exploration of dramatic texts and/or cinema from throughout the Spanish speaking world. May include plays and films by Hispanic authors in the United States.

Prerequisites: FLAS 301, FLAS 302, FLAS 303, and FLAS 341, or permission of instructor.

FLAS 424 Advanced Hispanic Literature3 Credits

Exploration of important Hispanic literary movements through a more in-depth study of genres, including prose, poetry, film, and drama. Topics vary.

Prerequisites: FLAS 323 or FLAS 324.

FLAS 431 Spanish for Medical and Social Services3 Credits

Acquisition and refinement of superior linguistic and cross-cultural Spanish/English skills used in health care and social services.

Prerequisites: One of the following: FLAS 311, FLAS 312, FLAS 323, FLAS 324, or FLAS 341.

Terms Typically Offered: Fall.

FLAS 433 Spanish for the Professions3 Credits

Exploration of linguistic and cultural aspects of professional practices in a Hispanic context. Developing skills necessary for professional communication.

Prerequisites: FLAS 341 or FLAS 323 or FLAS 324 or FLAS 311 or FLAS 312.

FLAS 434 Introduction to Translation3 Credits

Fundamentals of translation. Insights and practice in translation. Focus is on the Spanish-English language pair.

Prerequisites: FLAS 323 or FLAS 324 or FLAS 311 or FLAS 312 or FLAS 341.

FLAS 435 Introduction to Interpreting3 Credits

Fundamentals of interpreting. Enhancement of linguistic and cross-cultural skills dealing with Spanish-English interpreting.

Prerequisites: FLAS 311 or FLAS 312 or FLAS 323 or FLAS 324 or FLAS 341.

FLAS 441 Applied Phonetics and Phonology3 Credits

Theory and Practice of Spanish Phonetics and Phonology. Focused on dealing with pronunciation issues and recognition of variation in the Hispanic world. Includes recognition of speaker origin, and Spanish and English in contrast.

Prerequisites: FLAS 341.

FLAS 442 Methodology of Teaching Foreign Languages3 Credits

Examination of current trends, methods, and techniques in foreign language pedagogy.

Prerequisites: FLAS 301, FLAS 302, FLAS 303, FLAS 341, and FLAS 441, or permission of instructor.

FLAS 444 Using Technology, Literature and Culture in the Spanish Language Classroom3 Credits

Examination of current trends and techniques in the use of literature, technology and culture for teaching Spanish.

Prerequisites: FLAS 311, FLAS 312, FLAS 321, FLAS 322, and FLAS 341, or permission of instructor.

FLAS 446 Spanish Language Variation3 Credits

Exploration of variation and change in the Spanish-speaking world. A special look at language contact phenomena, with particular focus on Spanish/English contact situations.

Prerequisites: One of the following: FLAS 305, FLAS 311, FLAS 312, FLAS 323, FLAS 324, FLAS 341, or FLAS 441.

Terms Typically Offered: Spring.

FLAS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

FLAS 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FLAS 498 Spanish Senior Practicum3 Credits

Faculty-coordinated internship consisting of work-oriented instruction in Spanish involving classroom or laboratory experiences and/or research.

Prerequisites: Completion of six credit hours of FLAS at the 400-level.

FLAS 499 Internship1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Forensic Anthropology (FOAN)

FOAN 475 Human Remains Detection and Recovery for Medico-Legal Investigations3 Credits

Archaeological techniques applied to detection and recovery of recent human remains. Includes practical experience of approximately 6 hours on an announced date.

Prerequisites: BIOL 410, or experience in law enforcement or a coroner's office and permission of instructor.

Geographic Information Systems Technology (GIST)

GIST 305 Cartography for GIS1 Credit

Introduction to maps as tools for communication and analysis of locationally-related information.

GIST 321 Introduction to Remote Sensing2 Credits

Fundamentals of remotely sensed data, with emphasis on processing and interpretation of Landsat satellite imagery. Two one-hour lectures and one two-hour laboratory per week.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 321L.

GIST 321L Introduction to Remote Sensing Laboratory1 Credit

Lab component required for GIST 321.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 321.

Fees: Yes.

GIST 332 Introduction to Geographic Information Systems2 Credits

Fundamentals of GIS and digital mapping, including basic GIS skills and an introduction to geospatial databases and analyses. Two one-hour lectures and one two-hour laboratory per week.

Prerequisites: GIST 305 or GEOG 131.

Corequisites: GIST 332L.

GIST 332L Introduction to Geographic Information Systems Laboratory1 Credit

Lab component required for GIST 332.

Prerequisites: GIST 305 or GEOG 131.

Corequisites: GIST 332.

Fees: Yes.

GIST 375 Global Positioning Systems for GIS2 Credits

GPS techniques and applications as they relate to GIS data collection.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 375L.

GIST 375L Global Positioning Systems for GIS Laboratory1 Credit

Lab component required for GIST 375.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 375.

Fees: Yes.

GIST 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GIST 396L Topics Lab:1-2 Credits

Course may be taken 10 times for credit.

GIST 422 GIS Data Management and Editing2 Credits

Further exploration of GIS, involving creating, editing, and managing geospatial data and working with different types of GIS software. Two one-hour lectures and one two-hour laboratory per week.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 422L.

GIST 422L GIS Data Management and Editing Laboratory1 Credit

Lab component required for GIST 422.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 422.

GIST 432 Spatial Analysis and Modeling in GIS2 Credits

Exploration of GIS techniques and analysis with emphasis on raster-based GIS technology, processing, and geospatial analysis. Two one-hour lectures and one two-hour laboratory per week.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 432L.

GIST 432L Spatial Analysis and Modeling in GIS Laboratory1 Credit

Lab component required for GIST 432.

Prerequisites: GIST 332/GIST 332L.

Corequisites: GIST 432.

Fees: Yes.

Geography (GEOG)

GEOG 102 Human Geography-GTSS23 Credits

Introduction to spatial dimensions of the human world. Demography, human settlements and land use, political and economic systems, ethnicity, religion, and language examined from a spatial perspective.

Essential Learning Categories: Social and Behavioral Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

GEOG 103 World Regional Geography-GTSS23 Credits

Survey of world geography by major world regions, including an analysis of the physical elements, the inhabitants, and human occupancy patterns and an evaluation of the potential of each region for sustaining human populations.

Essential Learning Categories: Social and Behavioral Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

GEOG 131 Introduction to Cartography3 Credits

Introduction to maps as tools for communication and analysis of locationally related information, including an introduction to concepts in Geographic Information Systems (GIS) and Global Positioning Systems (GPS).

Prerequisites: MATH 107 or higher.

Terms Typically Offered: Fall, Spring.

GEOG 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 326 Colorado Archaeology: A Geographical Perspective3 Credits

Survey of Colorado prehistory using a geographic perspective, including adjacent portions of the Great Plains, Intermountain West, and Great Basin. The focus is on regional sequences in their environment settings and major research questions from the Paleoindian to Protohistoric and Historic Euroamerican periods.

Prerequisites: ANTH 202 or ANTH 220.

Equivalent Course(s): ANTH 326

Terms Typically Offered: Spring.

GEOG 341 GIS for Social Scientists2 Credits

Applications of GIS for social science analyses, including use of open-source data (such as US Census data); collecting new data, creating and converting data to GIS formats, and the practical use of physical and/or environmental GIS data in social science applications.

Prerequisites: GEOG 131 and GIST 332/GIST 332L.

Corequisites: GEOG 341L.

Terms Typically Offered: Spring.

GEOG 341L GIS for Social Scientists Lab1 Credit

Applications of GIS for social science analyses, including use of open-source data (such as US Census data); collecting new data, creating and converting data to GIS formats, and the practical use of physical and/or environmental GIS data in social science applications.

Prerequisites: GEOG 131 and GIST 332/GIST 332L.

Corequisites: GEOG 341.

Terms Typically Offered: Spring.

GEOG 354 Political Geography 3 Credits

Exploration of ways in which physical landscapes shape political attitudes, ideas, and institutions. Emphasis on key concepts of place, mapping, borders, territory, nationalism, and ecological and social impact of natural settings.

Equivalent Course(s): POLS 354

Terms Typically Offered: Fall.

GEOG 396 Topics: 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 399 Internship 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 496 Topics: 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 496L Topics: 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 499 Internship 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Geology (GEOL)

GEOL 100 Survey of Earth Science-GTSC23 Credits

Physical makeup of the earth, its history, and geology. One field trip is required. Intended for students with majors other than one of the sciences.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

GEOL 103 Weather and Climate-GTSC23 Credits

Non-mathematical introduction to elements of local and global weather: the atmosphere, cloud formation, precipitation, seasons, optical phenomena and violent storms. Students practice making 24-hour weather forecasts.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 104 Oceanography-GT-SC23 Credits

Non-mathematical introduction to the scientific study of the ocean. While the course focuses on the hydrosphere subsystem of the Earth System, the atmosphere, cryosphere, lithosphere and biosphere interrelationship with the hydrosphere are also examined.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 105 Geology of Colorado-GTSC23 Credits

Introduction to minerals, rocks, geologic time scale and basic geologic terms, followed by geology of Colorado taught with the aid of movies and slides. A one-day field trip is required.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

GEOL 106 Introduction to Dinosaurs-GT-SC23 Credits

Introduction to the study of dinosaurs, from geological, biological and historical perspectives. Intended for students interested in how different areas of science can be applied to a subject of strong human interest. Includes two full-day field trips to local dinosaur quarries and museums.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

GEOL 107 Natural Hazards and Environmental Geology-GTSC23 Credits

Introduction to geologic aspects of our environment. Includes studies of natural hazards, global climate change, geologic resources and emphasizes human interactions with the environment.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 108 Water, People, and Environment - GTSC23 Credits

General introduction to the essential nature of water on Earth. Provides students with a comprehensive foundation in the water cycle, human use of water, water and the environment, the politics of water, and the critical issues surrounding water as a resource. Overview of global water issues as well as a focus on water in the American West, including the sources and uses of water, its importance as a resource, the critical issues of water conservation and scarcity, and the legal, political, economic and physical infrastructure that controls water in the American West.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 111 Principles of Physical Geology-GTSC13 Credits

Materials that make up the earth and surface and interior processes that interact to produce the present features of the earth. Laboratory: minerals, rocks, topographic maps, earth quakes, and landforms. Three lectures and one two-hour laboratory per week.

Corequisites: GEOL 111L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 111L Principles of Physical Geology Laboratory-GTSC11 Credit

Lab component required for GEOL 111.

Corequisites: GEOL 111.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

GEOL 112 Principles of Historical Geology-GTSC13 Credits

Origin of the earth and life, changes recorded in rocks and fossils using the geologic time scale and techniques of dating to place events in sequence. Laboratory: topographic and geologic maps, hand samples of rocks, reconstruction exercises, and fossils to interpret regional and general geologic history. One all-day field trip is required. Four lectures and one two-hour laboratory per week.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L or permission of instructor.

Corequisites: GEOL 112L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 112L Principles of Historical Geology Laboratory-GTSC11 Credit

Lab component required for GEOL 112.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L or permission of instructor.

Corequisites: GEOL 112.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

GEOL 113 Field-Based Introduction to Physical Geology-GTSC13 Credits

Introduction to minerals, rocks, Earth structures, mountain building processes, and other elements of physical geology for science and non-science majors. A majority of class time will be spent in the field (including one Saturday) observing and mapping geological features of Western Colorado. There will be some indoor lectures and laboratory work. This course is recommended for prospective K-12 teachers.

Corequisites: GEOL 113L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 113L Field-Based Introduction to Physical Geology Laboratory-GTSC11 Credit

Lab component required for GEOL 113.

Corequisites: GEOL 113.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

GEOL 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 202 Introduction to Field Studies3 Credits

Mapping of several small areas using GPS, aerial photographs, and pace and compass methods. Profiles, cross-sections, and maps are prepared. Some unscheduled time is required to do mapping projects.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L; and GEOL 112/GEOL 112L (may be taken concurrently).

Fees: Yes.

GEOL 204 Computer Applications in Geology3 Credits

Quantitative methods of geologic data analysis with the data manipulated on the computer. Methodical approach with limited theoretical emphasis; statistical concepts; special programs for graphical presentation and analysis. Three lectures per week and computer laboratory time to complete exercises are required.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and GEOL 112/GEOL 112L, and STAT 200 (recommended but not required) or permission of instructor.

Fees: Yes.

GEOL 250 Environmental Geology3 Credits

Geologic aspects of environmental problems involving natural processes and anthropogenic activities. Studies include landslides, earthquakes, flooding, coastal erosion, and land subsidence as well as environmental impacts of mineral resource extraction, soil erosion, fossil fuel consumption, and climate change.

Prerequisites: GEOL 100 or GEOL 104 or GEOL 105 or GEOL 111 or GEOL 113.

Fees: Yes.

GEOL 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 301 Structural Geology3 Credits

Stress and strain in rock bodies. Description and occurrence of both brittle and ductile rock structures. Laboratory: stereographic and graphical solution of structural problems, the study of maps and cross sections, and some field problems. Three lectures and one two-hour laboratory per week. Four one-day field trips are taken.

Prerequisites: GEOL 202, GEOL 204, and MATH 130.

Corequisites: GEOL 301L.

GEOL 301L Structural Geology Laboratory1 Credit

Lab component required for GEOL 301.

Prerequisites: GEOL 202, GEOL 204, and MATH 130.

Corequisites: GEOL 301.

Fees: Yes.

GEOL 325 Introduction to Engineering Geology3 Credits

Geologic principles applied to construction problems; case histories of major projects. Field trips and term project required.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L or permission of instructor.

Fees: Yes.

GEOL 331 Crystallography and Mineralogy3 Credits

Morphology and classification of crystals; chemistry and genesis of minerals. Laboratory: identification of crystal systems and class, hand specimen identification of minerals, some X-ray diffraction work. Three lectures and one two-hour laboratory per week.

Prerequisites: GEOL 202, GEOL 204, and CHEM 131 or permission of instructor.

Corequisites: GEOL 331L.

GEOL 331L Crystallography and Mineralogy Laboratory1 Credit

Lab component required for GEOL 331.

Prerequisites: GEOL 202, GEOL 204, and CHEM 131 or permission of instructor.

Corequisites: GEOL 331.

Fees: Yes.

GEOL 333 Geology of the Canyon Country1 Credit

Three two-hour evening lectures with films and slides used to preview geology of the Colorado Plateau. A five-day field trip to the selected sites is conducted during spring break.

Prerequisites: GEOL 100, GEOL 105 or GEOL 112.

Fees: Yes.

GEOL 340 Igneous and Metamorphic Petrology3 Credits

Origin, composition and classification of igneous and metamorphic rocks. Laboratory: identification of igneous and metamorphic rocks in hand specimens. Three lectures and one two-hour laboratory per week.

Prerequisites: GEOL 331.

Corequisites: GEOL 340L.

GEOL 340L Igneous and Metamorphic Petrology Laboratory1 Credit

Lab component required for GEOL 340.

Prerequisites: GEOL 331.

Corequisites: GEOL 340.

Fees: Yes.

GEOL 351 Applied Geochemistry3 Credits

Geochemistry and its relationship to weathering and soils, geochemical surveys and prospecting techniques, reactions of contaminants with earth materials, and methods of reducing environmental degradation.

Prerequisites: CHEM 121/CHEM 121L, CHEM 122/CHEM 122L, and GEOL 111/GEOL 111L or GEOL 113/GEOL 113L.

GEOL 355 Basic Hydrology3 Credits

Introduction to physical hydrologic processes including precipitation, evapotranspiration, infiltration, runoff and subsurface flow. Examination of hydrologic modeling, problem solving, and monitoring techniques as well as water resource management issues at both local and global scales.

Prerequisites: MATH 113, or MATH 151 or permission of instructor.

GEOL 359 Survey of Energy-Related Natural Resources3 Credits

Origin, location, and economics of non-metallic geologic commodities, including phosphates, evaporites, oil, gas, coal, and sedimentary uranium deposits. Students give oral and written reports on two localities.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L; CHEM 131/CHEM 131L, or permission of instructor.

GEOL 361 Survey of Mineral-Related Natural Resources3 Credits

The genesis, description, and exploitation of metallic and non-metallic natural resources consumed by modern society, such as base-metals, precious metals and gems, aggregates and construction materials, fertilizers, and chemical-industrial commodities. Environmental, economic, and socio-political issues associated with utilization of these resources will also be addressed. At least one field trip to a local resource area will be arranged. Three lectures per week.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and CHEM 131/CHEM 131L, or permission of instructor.

GEOL 370 Renewable Energy3 Credits

Introduction to renewable energy resources from a technical perspective with an emphasis on sustainability. Includes concepts of energy and power, units of measure, sources and forms of energy, uses of energy, energy efficiency, electricity, solar thermal and photovoltaics, bioenergy, hydropower, tidal power, wave power, wind power, geothermal, hydrogen, efficient building design, and integration of renewables with current energy supplies.

Prerequisites: MATH 113 or higher.

Equivalent Course(s): ENVS 370

Terms Typically Offered: Fall.

GEOL 393 Co-operative Education3-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 394 Natural Resources of the West1 Credit

Seminars covering topics related to natural resources including water, soil, land, mineral and energy resources in the western United States. Guest speakers are invited from the academic community, industry or government agencies to give formal oral presentations followed by informal discussion with students and faculty.

Equivalent Course(s): ENVS 394

Course may be taken multiple times up to maximum of 4 credit hours.

GEOL 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

GEOL 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Fees: Yes.

GEOL 402 Applications of Geomorphology3 Credits

Knowledge of landform genesis and shaping processes is applied to solve modern problems with emphasis on local soils, slopes, rivers, erosional surfaces, and structural framework. Laboratory and field studies used to explore frost, running water, slope movement, ground water, wind, and glaciers which have affected the local environment. Practical techniques of measurement and interpretation, including statistical and computer techniques, used to produce models of landscape development. A term project must be completed. Two major field trips are required. Four lectures and one two-hour laboratory per week.

Prerequisites: GEOL 202 and GEOL 204 and permission of instructor.

Corequisites: GEOL 402L.

GEOL 402L Applications of Geomorphology Laboratory1 Credit

Lab component required for GEOL 402.

Prerequisites: GEOL 202 and GEOL 204 and permission of instructor.

Corequisites: GEOL 402.

Fees: Yes.

GEOL 404 Geophysics3 Credits

Exploration for mineral and petroleum and preliminary investigation of sites for engineering and environmental projects with emphasis on refraction and reflection seismic, gravity, magnetic, electrical, electromagnetic ground-penetrating radar, and radioactive methods.

Prerequisites: GEOL 202; GEOL 204; GEOL 112/GEOL 112L; and either PHYS 111/PHYS 111L or PHYS 131/PHYS 131L; PHYS 112/PHYS 112L and MATH 151 are recommended but not required.

Corequisites: GEOL 404L.

Terms Typically Offered: Spring.

GEOL 404L Geophysics Laboratory1 Credit

Exploration for mineral and petroleum and preliminary investigation of sites for engineering and environmental projects with emphasis on refraction and reflection seismic, gravity, magnetic, electrical, electromagnetic ground-penetrating radar and radioactive methods.

Prerequisites: GEOL 202; GEOL 204; GEOL 112/GEOL 112L; and either PHYS 111/PHYS 111L or PHYS 131/PHYS 131L; PHYS 112/PHYS 112L and MATH 151 are recommended but not required.

Corequisites: GEOL 404.

Terms Typically Offered: Spring.

Fees: Yes.

GEOL 405 Solid Earth Geophysics3 Credits

Classical physics applied to the study of the earth with emphasis on the origin of the earth, its gravitational, geomagnetic, and geothermal characteristics, seismicity, the dynamics of the earth's crust, plate tectonics, and continental drift. One field trip required.

Prerequisites: GEOL 404 or permission of instructor.

GEOL 411 Paleontology3 Credits

Taxonomy, morphology, ecology, and geologic range of most groups of invertebrate fossils. Laboratory: field identifications of guide fossils. A one-day field trip is required. Two lectures and one two-hour laboratory per week.

Prerequisites: Beginning Biology course or permission of instructor.

Corequisites: GEOL 411L.

GEOL 411L Paleontology Laboratory1 Credit

Lab component required for GEOL 411.

Prerequisites: Beginning Biology course or permission of instructor.

Corequisites: GEOL 411.

Fees: Yes.

GEOL 414 Hydrology and River Dynamics3 Credits

Exploration and analysis of the hydrologic cycle and river forms and processes in the context of watershed science.

Prerequisites: MATH 113 or MATH 151.

Corequisites: GEOL 414L.

Terms Typically Offered: Fall, Spring.

GEOL 414L Hydrology and River Dynamics Laboratory1 Credit

Exploration and analysis of the hydrologic cycle and river forms and processes in the context of watershed science. Lab component required for GEOL 414.

Prerequisites: MATH 113 or MATH 151.

Corequisites: GEOL 414.

Terms Typically Offered: Fall, Spring.

GEOL 415 Introduction to Ground Water3 Credits

Relationships of ground water to other water sources, hydrologic cycle, water balance, hydrologic characteristics of rocks, hydraulics and equations defining flow, ground water quality, and contamination, exploration and measurement techniques (including geophysical procedures), state and federal regulations, and computer modeling. Laboratory: Acquisition, analysis, and interpretation of ground water data. Three lectures and one two hour laboratory per week.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and MATH 151, and at least high school level biology, chemistry and physics.

Corequisites: GEOL 415L.

GEOL 415L Introduction to Ground Water Laboratory1 Credit

Lab component required for GEOL 415. Three lectures and one two-hour laboratory per week.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and MATH 151, and at least high school level biology, chemistry and physics.

Corequisites: GEOL 415.

Fees: Yes.

GEOL 443 Field-Based Depositional Systems3 Credits

Analysis of depositional systems with a strong field component. Lectures followed by weekly field trips will show students local examples of all common depositional systems.

Prerequisites: GEOL 202.

Corequisites: GEOL 443L.

GEOL 443L Field-Based Depositional Systems Laboratory1 Credit

Lab component required for GEOL 443.

Prerequisites: GEOL 202.

Corequisites: GEOL 443.

Fees: Yes.

GEOL 444 Sedimentology and Stratigraphy3 Credits

Physical, chemical, and biological characteristics of sedimentary rocks, with emphasis on depositional processes and environments, diagenesis, stratigraphic sequences, and correlation. Laboratory emphasis is on description and classification of sedimentary rocks, analysis of depositional environments, and stratigraphic problems. One weekend field trip is required.

Prerequisites: GEOL 202, GEOL 204, GEOL 331/GEOL 331L, and CHEM 131/CHEM 131L.

Corequisites: GEOL 444L.

GEOL 444L Sedimentology and Stratigraphy Laboratory1 Credit

Lab component required for GEOL 444.

Prerequisites: GEOL 202, GEOL 204, GEOL 331/GEOL 331L, and CHEM 131/CHEM 131L.

Corequisites: GEOL 444.

Fees: Yes.

GEOL 445 Geospatial Database and Design2 Credits

Creating, editing, and managing geodatabases and working with topology for implementation with GIS. Term project is required. Two lectures and one two-hour lab per week.

Prerequisites: GIST 432/GIST 432L.

GEOL 455 River Dynamics3 Credits

Introduction to river forms and processes, including basic open-channel hydraulics, sediment transport, fluvial geomorphology and human interactions with river systems. Lab covers field, lab, and computer techniques to understand and model river forms and processes, including human interactions with river systems.

Prerequisites: GEOL 355 or permission of instructor.

Corequisites: GEOL 455L.

GEOL 455L River Dynamics Laboratory1 Credit

Lab component required for GEOL 455.

Prerequisites: GEOL 355 or permission of instructor.

Corequisites: GEOL 455.

Fees: Yes.

GEOL 463 Subsurface Methods3 Credits

Concepts and methods of subsurface data analysis and models applied to sedimentary rocks that commonly form subsurface reservoirs and aquifers. Analysis of multiple geoscience data types (e.g., cores, well logs, seismic, statistical data) to construct 2D and 3D subsurface displays and models to evaluate and interpret geological, geophysical characteristics, and petrophysical properties.

Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L.

Terms Typically Offered: Spring.

GEOL 465 Climate Change Science3 Credits

Analysis of scientific data and evidence that are the basis of climate change science. Students will review geosystem cycles, processes, timescales, and rates as related to global climate within the atmosphere, biosphere, cryosphere, geosphere, and hydrosphere. Skills associated with leading group discussions and scientific critical thinking will be developed.

Terms Typically Offered: Fall.

GEOL 480 Summer Field Camp6 Credits

This course involves basic training in field geology. Students will perform a variety of geologic mapping exercises using topographic maps and air photos. Students will gain an appreciation of geologic maps - how they are made, the uncertainties and unknowns in mapping, and how mappers deal with them. Most mapping exercises are in deformed sedimentary strata and Quaternary surficial deposits. Some field exercises will involve collection and interpretation of hydrological data. The course is a six full weeks in duration, beginning immediately after conclusion of Spring Semester. Students should not expect to have weekends or holidays off. Students will also be camping out at least half the time or more during this course.

Prerequisites: GEOL 202, GEOL 301/GEOL 301L. GEOL 402/GEOL 402L, and GEOL 444/GEOL 444L are recommended.

Fees: Yes.

GEOL 490 Seminar3 Credits

Design, implementation, and completion of independent research project including proposal and report writing, and oral presentations. Critiques of geologic literature, data compilation, and periodic oral presentations are also required.

Prerequisites: Upper division standing.

GEOL 493 Co-operative Education3-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

GEOL 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 496L Topics Lab1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 497 Structured Research1-3 Credits

Geological research under the direct guidance of a faculty member.

Designed for junior and senior level students.

Prerequisites: Permission of instructor.

Course may be taken multiple times up to maximum of 9 credit hours.

GEOL 499 Internship1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Gerontology (GRNT)

GRNT 110 Introduction to Gerontology3 Credits

Introduction to the field of gerontology and to the issues of aging and older adults. Students will gain an understanding of the physical, psychological, social, and environmental forces that may influence older individuals.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 125 Community Resources for Older Adults3 Credits

Introduction to the supports and resources available in the community for older adults. Explores the needs of older persons in the community and evaluates the continuum of long term care available resources, service gaps, program models, and funding mechanisms.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 131 Hospice Care1 Credit

Introduction to hospice and hospice care, including the hospice philosophy, palliative care, pain and symptom management, death and the dying process, grief and bereavement. Also addresses hospice eligibility, ethics and confidentiality, interdisciplinary team roles, communication, advanced directives, care-giving issues, self-care, and alternative therapies.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 165 Activity Director Training2 Credits

Preparation to manage an activity department; do assessments and documentation; design, schedule, and implement appropriate activity programs; foster healthy resident and family dynamics; facilitate resident council meetings; manage personnel and resources.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 175 The Aging Mind3 Credits

Exploration of biological processes and issues related to the aging mind of older adults. The course will focus on normal and pathological changes the brain undergoes as a result of the aging process, and how these changes impact behavior and function. Topics will include neurological mechanisms of memory loss as well as modifiable risk factors.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 176 Cognitive Activity Design2 Credits

Exploration of the challenges of applying emerging, evidence-based research in memory and aging to address real-life cognitive challenges. Includes design and demonstration of innovative cognitive activities that are supported by recent brain science findings.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 177 Arts and Cognitive Activity Design1 Credit

Connection between the arts and brain health research to create art-related cognitive activities for older persons. Includes design and demonstration of creative arts as a sustainable cognitive activity for older persons. Explores why creative arts activities have a positive impact on an older person's brain and how their design is supported by recent brain science findings.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 181 Exploring the Field of Aging2 Credits

Introduction to the range of emerging professional opportunities in the field of aging. Explores and prioritizes potential career pathways. Includes career and labor market research; assessment of passions, interests, experiences and transferable skills; informational interviews, site visits, and networking; career and educational/training goal setting and planning.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

GRNT 207 Ethics and Aging3 Credits

Investigation of central ethical issues pertaining to the care of elderly patients. Explores various ethical principles and frameworks and their application to various ethical issues and dilemmas that arise in caring for the elderly. Identifies ethical issues in caring for the elderly and helps develop more proficiency in ethical decision making.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 220 Law and Ethics for Health Professions2 Credits

Introduction to the study and application medical-legal concepts in medical careers. This course seeks to establish a foundation for ethical behavior and decision making in health professions.

Terms Typically Offered: Fall, Spring.

GRNT 233 Supporting End of Life3 Credits

Knowledge and skills for health care workers, caregivers, religious and spiritual counselors, social workers, fiduciaries, and family members to support the end of life process with dying persons and their families. Explores the physical, emotional, spiritual, legal, and financial aspects of dying, as well as grief and bereavement.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 234 Hospice Care1 Credit

Experiential learning in hospice and palliative care settings, with topics including the hospice philosophy, pain and symptom management, death and the dying process, as well as grief support. Also addresses hospice eligibility, ethics and confidentiality, interdisciplinary team roles, communication, advanced directives, care-giving issues, and self-care.

Prerequisites: GRNT 233.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 235 Introduction to Dementia Care3 Credits

Issues related to the care of older adults presenting behavioral and cognitive challenges, using a person-centered, person-directed approach. Introduces students to assessment, treatment and care of persons experiencing dementia, problematic mental health conditions, and the dying process.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 236 Dementia Care Practices1 Credit

Approaches to advanced behavioral and cognitive care issues, based on realistic case studies in a variety of settings. Includes assessing appropriate long term care options for memory care, problem solving, functional levels and other challenges, managing surveys, responding to deficiencies, problem solving repetitive incident reports, implementing fall prevention programs, and developing family education and support programs.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 237 End of Life Therapies/Practices1 Credit

Focus on a specific therapeutic approach appropriate for end of life care and exploration of a variety of strategies and activities designed to augment end of life through reaching palliative care goals and enhancing the quality of life for the dying person and their caregivers.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 240 Care and Service Coordination3 Credits

Overview of professional standards, responsibilities, and skills required for care managers, information and resource specialists, advocates, and service coordinators working with older adults, persons with disabilities, and their families. Includes the assessment process, care planning, resource management, service provider and financial coordination, documentation and accountability, ethics and confidentiality, advocacy, and evaluation. Introduces strength-based, person-centered, and empowerment models.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 245 Health and Aging3 Credits

Investigation of the major issues and concepts that deal with the study of the aging process. It will explore the demographic, social, and economic factors in aging as well as the effects of physical change and psychological behavior upon later life.

Terms Typically Offered: Fall, Spring.

GRNT 246 Aging and Mental Health3 Credits

Examination of mental health as it is impacted by the aging process. An in-depth look at how mental health affects an older adult's quality of life. An interdisciplinary and integrative approach looking at mental illness in the context of neurophysiological processes combined with effects of family systems, environment, personality, and social supports.

Terms Typically Offered: Fall, Spring.

GRNT 247 Applied Legal and Policy Issues in Aging3 Credits

Introduction to legal and policy issues affecting older adults and their families, as well as care providers. Focuses on how Medicare, Medicaid mental health, veteran's services and abuse protective services contribute and protect older adults as well as areas where services may be lacking.

Terms Typically Offered: Fall, Spring.

GRNT 250 Death: Cross-Cultural Perspectives3 Credits

Interdisciplinary study of the cross-cultural variations regarding human responses to death and the differing cosmological implications these suggest. Death, a cultural universal, is addressed in its diversity from both anthropological and sociological perspective.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 260 Technology for Aging Services2 Credits

Role of technology in designing and developing devices and services for the aging population. This course explores ways of improving the quality of life, improving access to care, support for family and caregivers and reducing cost of care through technology.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 270 Neurology of Memory Loss2 Credits

Introduction to basic human neuroscience, leading to a discussion of brain diseases classified as Dementia.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 280 Management of Senior Living Communities3 Credits

Overview of senior housing and care, from congregate living to skilled nursing, from historical, philosophical and managerial perspectives. A focus will be on the role of health care delivery within seniors housing, with attention devoted to the determinants of quality care, various models of care, and the critical role of quality management.

Terms Typically Offered: Fall, Spring.

GRNT 294 Gerontology Professional Seminar1 Credit

Practice reviewing and modifying career and educational/training goals; reassessing the occupational outlook and labor market; building a professional network; formulating mission and vision statements and other branding tools; developing master portfolios and job-specific resumes, websites, brochures, cards, and other job tools; preparing for behavioral job interviews; and creating Degree and Certificate presentations in ePortfolios that assess learning outcomes.

Terms Typically Offered: Fall, Spring, Summer.

GRNT 299 Internship3 Credits

Development of practical experience, skills and professional direction in achieving their career goals, working under supervision in an approved worksite through an intentional internship.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken multiple times up to maximum of 6 credit hours.

Health Sciences (HSCI)

HSCI 101 Introduction to Health Care Professions3 Credits

Explores the nature of services provided, opportunities within selected fields, and relationships of fields within health sciences.

Concepts include: medical terminology, safety and accident prevention, professionalism, legal aspects, safety, communication and math skills, and infection control.

HSCI 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HSCI 401 Health Informatics I - Data Analysis2 Credits

Reviews statistical analysis, HIPPA, confidentiality, and terminology pertinent to health informatics.

Prerequisites: Permission of instructor.

HSCI 406 Health Informatics II: Project Design & Implementation2 Credits

Explores application of knowledge and skills to selected health informatics project.

Prerequisites: Permission of instructor.

HSCI 501 Advanced Health Informatics I - Data Analysis1 Credit

Reviews statistical analysis, HIPPA, confidentiality, and terminology pertinent to health informatics at the graduate level.

Prerequisites: Permission of instructor.

HSCI 506 Advanced Health Informatics II: Project Design and Implementation2 Credits

Explores application of knowledge and skills to selected health informatics projects at the graduate level.

Prerequisites: Permission of instructor.

Heating, Ventilation, and Air Condition (HVAC)

HVAC 102 Basic Refrigeration4 Credits

Introduction to the theory of refrigeration, components, charging, recycling, and evacuation of refrigeration units.

Terms Typically Offered: Spring.

Fees: Yes.

HVAC 103 Basic Electricity3 Credits

Introduction to the basic electrical AC theory, including the study of Ohm's Law to explain the operation of electrical devices.

Terms Typically Offered: Fall.

Fees: Yes.

HVAC 106 Introduction to Service Technician Training1 Credit

Introduction to basic HVAC service from which the student will build their knowledge and understanding of this great career. Studies include class and school policies, safety for the service tech, first aid, and basic physics as it applies to heat, matter, and energy.

Terms Typically Offered: Fall.

HVAC 110 Fundamentals of Gas Heating4 Credits

Introduction to the fundamentals of gas heating. Students work in a classroom and shop environment. Topics include the basics of gas heating systems, operation of gas valves and burners, gas pipe system design, gas piping system code requirements, and basic code requirements for heating systems.

Terms Typically Offered: Fall.

Fees: Yes.

HVAC 111 Piping Skills for HVAC4 Credits

Introduction to the different types of tubing and piping materials used in HVAC applications, including, the proper tubing and piping installation methods, proper cutting and bending procedures, pipe math, and piping offsets. Common piping joints will be discussed, including swaging, flaring, soldering, brazing, cutting, and threading of steel pipe and other alternatives. Shop projects include bench projects and mock-up installations.

Terms Typically Offered: Spring.

Fees: Yes.

HVAC 113 Refrigerant Recovery Training1 Credit

Introduction to the laws regarding refrigerant recovery. The course includes hands-on use of recovery equipment. Environmental Protection Agency certification is included in this course and required nationally. Upon completion of the course, students will be prepared for successful completion of the certification exam. The student will be required to pay approximately \$40.00 to sit for the EPA exam.

Terms Typically Offered: Spring.

Fees: Yes.

HVAC 117 OSHA Ten-Hour Voluntary Compliance1 Credit

Introduction to a 10-Hour OSHA certification course for general industry. Participants will review the current OSHA standards contained in 29 CFR 1910. Participants that complete the course will receive a certificate of completion from the United States Department of Labor, Occupational Safety and Health Administration. The course is taught by instructors certified by the Occupational Safety and Health Administration.

Terms Typically Offered: Fall.

HVAC 122 Commercial Refrigeration4 Credits

Introduction to commercial ice makers, walk-in coolers, walk-in freezers, and self-contained refrigeration units.

Prerequisites: HVAC 102.

Terms Typically Offered: Fall.

Fees: Yes.

HVAC 146 Residential Duct Design2 Credits

Introduction to the importance of equipment sizing. Focus on properly performing heating and cooling load calculations on residential houses. After determining proper equipment sizing, participants will demonstrate how to design the duct-work system sizing for proper airflow throughout the house.

Terms Typically Offered: Fall.

Fees: Yes.

HVAC 202 Troubleshooting and Customer Service3 Credits

Introduction to field analysis of malfunctions on actual, in-house, heating, ventilation, refrigeration, and air conditioning equipment. Customer interaction and diagnosis efficiency stressed.

Prerequisites: HVAC 103, HVAC 110, HVAC 117, and HVAC 240.

Terms Typically Offered: Spring.

Fees: Yes.

HVAC 204 Direct Digital Controls4 Credits

Introduction to the field of direct digital controls in HVAC systems.

Terms Typically Offered: Fall.

HVAC 222 Heating, Ventilation, Air Conditioning, and Refrigeration Systems Troubleshooting5 Credits

Introduction to troubleshooting industrial and commercial heating, ventilating, air conditioning, and refrigeration systems.

Prerequisites: HVAC 202.

Terms Typically Offered: Fall.

Fees: Yes.

HVAC 240 Servicing Forced Air Systems4 Credits

Operation, repair, and maintenance of forced air heating systems. Introduction to the different types of furnaces, code requirements, common controls, and mechanical problems. This course also explores the A.G.A. (American Gas Association) approved method of testing furnace heat exchangers. Customer relations and workplace behavior are discussed.

Terms Typically Offered: Fall.

Fees: Yes.

HVAC 261 Air Conditioning Systems Service and Repair4 Credits

Introduction to the service and repair of HVAC systems. Troubleshooting techniques and equipment repair will be practiced.

Terms Typically Offered: Spring.

Fees: Yes.

History (HIST)

HIST 101 Western Civilization I-GTHI13 Credits

Political, social, economic, and cultural history of western cultures from ancient times through the Reformation.

Essential Learning Categories: History, Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

HIST 102 Western Civilization II-GTHI13 Credits

Political, social, economic, and cultural history of western cultures from Reformation through modern times.

Essential Learning Categories: History, Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

HIST 131 United States History I-GTHI13 Credits

History of the United States from prehistory through the Civil War.

Essential Learning Categories: History, Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

HIST 132 United States History II-GTHI13 Credits

History of the United States from Reconstruction through modern times.

Essential Learning Categories: History, Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

HIST 202 Introduction to Historical Research3 Credits

An introduction to the methods and areas of historical research, with the intent of preparing students for research requirements of upper-division history courses.

Prerequisites: 6 hours selected from HIST 101, HIST 102, HIST 131, and HIST 132.

Terms Typically Offered: Fall.

HIST 225 History of Colorado3 Credits

History of Colorado from pre-historic to modern times.

Essential Learning Categories: History, Humanities

Terms Typically Offered: Fall, Spring.

HIST 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HIST 300 History of England to 16603 Credits

Examines the political, social, and cultural developments of England from the ancient period to the end of the English Civil Wars, with particular attention to England's contributions to the Western heritage.

Prerequisites: HIST 101.

HIST 301 History of Modern Britain3 Credits

Examines the political, social, and cultural history of Great Britain from the Restoration of the monarchy in 1660 to the modern era.

Prerequisites: HIST 102.

HIST 302 History of Modern France3 Credits

France from the Revolution of 1789 to the present.

Prerequisites: HIST 102 or permission of instructor.

HIST 303 History of Modern Germany3 Credits

Origins and development of the modern Germany nation-state from 1860 to the present.

Prerequisites: HIST 102 or permission of instructor.

HIST 305 The Old South3 Credits

The uniqueness of the Antebellum South, the growth of Southern nationalism, and the politics of the Late National period.

Prerequisites: HIST 131.

HIST 310 Latin American Civilization3 Credits

Historical development of Latin America from pre-Columbian times to the present.

Prerequisites: HIST 102 or permission of the instructor.

HIST 311 The World Wars3 Credits

History of the First and Second World Wars and interwar years, including their causes and consequences. Focuses on key themes including military operations and strategy, the social, economic, and cultural impact of modern warfare, imperialism, and colonialism.

Prerequisites: HIST 132.

Terms Typically Offered: Fall, Spring.

HIST 314 African American History3 Credits

History of the Black diaspora in colonial North America and the United States. Emphasis on African American cultures and politics from slavery to the present.

Prerequisites: HIST 131 or HIST 132.

Terms Typically Offered: Fall, Spring.

HIST 315 American Indian History3 Credits

American Indian history from pre-Columbian America to the present with an emphasis on federal Indian policy. Case studies will also address the adaptation of Indian people to changing social and economic conditions.

Prerequisites: HIST 131 and HIST 132.

HIST 316 American Slavery3 Credits

Exploration of the development of race slavery and an examination of slave life in colonial North America and the United States from Colonization through reconstruction.

Prerequisites: HIST 131.

HIST 319 History of the United States-Mexico Borderlands3 Credits

History of the U.S.-Mexico Borderlands region, beginning with Mexico's independence from Spain in 1821 and continuing through the present day. Analyses use the perspectives of race, citizenship, immigration, war, and nation-building.

Prerequisites: HIST 131 or HIST 132.

Terms Typically Offered: Fall, Spring.

HIST 320 The American West3 Credits

The American West from pre-Columbian times through the Twentieth Century with special emphasis on the diverse cultures and ecological factors that have defined the region.

Prerequisites: HIST 131, HIST 132, or permission of instructor.

HIST 330 History of 19th Century Europe3 Credits

Political, social, intellectual, and diplomatic forces operating in Europe between the French Revolution and World War I.

Prerequisites: HIST 101 and HIST 102.

HIST 331 The 20th Century3 Credits

Investigation of the development of our modern world since World War I with emphasis on Europe and its role in that process.

Prerequisites: HIST 101, HIST 102 or permission of instructor.

HIST 332 History of Modern Warfare3 Credits

War, its causes, consequences, and impact on history from the 18th century to the present.

Prerequisites: HIST 101 and HIST 102.

HIST 333 The International History of the Cold War3 Credits

Exploration of the international ramifications of the Cold War, from the end of World War II to the collapse of the Soviet Union.

Prerequisites: HIST 102 and HIST 132.

HIST 334 History of the British Empire3 Credits

Explores the origins, development, and decline of the British Empire from 1550 to 2000, with particular attention on the effects of empire on native peoples and the consequences of empire for Great Britain.

Prerequisites: HIST 102.

HIST 340 History Of the Middle East3 Credits

History of the Middle East and North Africa from the period of pre-Islamic Arabia through modern times, including the Umayyad, Abbasid, and Ottoman empires.

Prerequisites: HIST 101 and HIST 102.

HIST 342 The Early American Republic3 Credits

The social, cultural, intellectual and political developments in America from 1783-1850.

Prerequisites: HIST 131.

HIST 344 The Age of Industry in America3 Credits

The social, intellectual, and political events in the United States from the end of the Civil War to the beginning of the Great Depression.

Prerequisites: HIST 131, HIST 132, or permission of instructor.

HIST 345 History of Immigration, Race, and Ethnicity in America3 Credits

Exploration of the historical study of immigration, race, and ethnicity in the United States. Various approaches and unique methodologies in the study of these topics from early American history to the present. Investigation of the ways in which economic and racial considerations shaped Americans' debates about "fitness" for citizenship, freedom, and independence.

Prerequisites: HIST 131 or HIST 132.

HIST 346 The United States in the 1950's and 1960's3 Credits

The social, intellectual, and political Events in the U.S. form the end of WWII through the 1960s.

Prerequisites: HIST 131, HIST 132, or permission of instructor.

HIST 347 Global America: 1970-20003 Credits

The political and social implications of America as the dominant global power, from 1970 to the present.

Prerequisites: HIST 132.

HIST 348 The History of Food in America3 Credits

Investigation of the social and cultural history of America's relationship with food. Begins with the foundational foods of the new world and concludes with contemporary food issues.

Prerequisites: HIST 131 or HIST 132.

Terms Typically Offered: Fall, Spring.

HIST 350 Renaissance and Reformation3 Credits

Examines the political and social context of the Renaissance and Reformation.

Prerequisites: HIST 101.

HIST 355 Ancient and Medieval Cities3 Credits

The development (physical, social, political) of cities in the ancient and medieval periods and their role in early western civilization.

Prerequisites: HIST 101.

HIST 360 Medieval Europe3 Credits

Examines the political, social, and religious institutions of Medieval Europe (300-1475).

Prerequisites: HIST 101.

HIST 370 Early United States Women's History3 Credits

Historical survey of cultural, economic, and political contributions of American women from colonization to Reconstruction.

Prerequisites: HIST 131.

HIST 371 20th Century United States Women's History3 Credits

Historical survey of cultural, economic, and political contributions of American women from Reconstruction to the present.

Prerequisites: HIST 131 and HIST 132.

HIST 375 American Sport History3 Credits

An examination of American society from the Colonial era to the present through the lens of sport.

Prerequisites: HIST 131 or HIST 132. Both courses are recommended.

HIST 394 Junior Seminar in Historiography3 Credits

Examines the role of historiography in the historical discipline, with the intent of preparing students to undertake an historical research project. Topic varies by semester, depending upon specialty of instructor.

Prerequisites: HIST 101, HIST 102, HIST 132, and HIST 202.

HIST 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HIST 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HIST 399 Internship1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HIST 400 The Soviet Union and Eastern Europe3 Credits

Imperial Russia, the Soviet Union, and Eastern Europe from 1900 to the present.

Prerequisites: HIST 101, HIST 102 or permission of instructor.

HIST 403 East Asia and the Modern World3 Credits

China, Japan, Korea, and Vietnam since 1840.

Prerequisites: HIST 101 and HIST 102, or permission of instructor.

HIST 404 Senior Seminar in Historical Research3 Credits

History-specific research with emphasis on utilization of primary documents and practice in conducting research and reporting results.

Prerequisites: HIST 202 and twelve hours of upper division History or permission of instructor.

HIST 405 Introduction to Public History3 Credits

Exploration of non-academic historical skills employed in museum work, archival management, and positions with historical societies and historic preservation agencies. Career opportunities will be examined.

Prerequisites: HIST 131, HIST 132, or permission of instructor.

HIST 406 History of the African Continent3 Credits

The development of African cultures from the ancient to modern periods, with particular attention to interaction with non-African cultures.

Prerequisites: HIST 101 and HIST 102, or permission of instructor.

HIST 409 Material Culture Studies3 Credits

Introduction to the field of material culture studies and engagement in hands-on work with a variety of historical artifacts.

Prerequisites: HIST 131 and HIST 132, or permission of the instructor.

HIST 410 Environmental History of the United States3 Credits

The evolution of public attitudes and governmental policies and practices relative to the wilderness, natural resource development, and the natural environment from colonial times to the present.

Prerequisites: HIST 131, HIST 132, or permission of instructor.

HIST 415 Colonial America3 Credits

Examines the development of colonial society in North America and the tensions that arose between Native American, European, and African people and cultures.

Prerequisites: HIST 131.

HIST 416 The American Revolution3 Credits

An overview of and perspectives on the causes and outcomes of the American Revolution.

Prerequisites: HIST 131.

HIST 420 Civil War3 Credits

The causes and outcomes of the American Civil War.

Prerequisites: HIST 131, or permission of instructor.

HIST 425 History of Sexuality3 Credits

Historical discussions on sexuality from the New World to present.

Analysis of gender, race, ethnicity, class, and region in historical context.

Prerequisites: HIST 132.

HIST 430 The Ancient Mediterranean World3 Credits

The Mediterranean world from pre-classical times to the fall of the Roman Empire.

Prerequisites: HIST 101.

HIST 435 Classical Archaeology3 Credits

Examines the archaeological evidence for some of the ancient Mediterranean civilizations and how the historian uses archaeology to better understand the ancient world.

Prerequisites: HIST 101.

HIST 440 Early and Medieval Christianity3 Credits

Examines the historical development of Christianity through the middle ages, focusing on the social (marriage and family) and political (kingship) consequences of Christianity.

Prerequisites: HIST 101.

HIST 445 The Holocaust3 Credits

Exploration of the origins, implementation, and cultural representations of Nazi Germany's "Final Solution."

Prerequisites: HIST 102.

HIST 450 European History and Film3 Credits

Examines the medium of film and how it shapes perceptions of European history. Focuses on the treatment of film as historical text. Postulates whether filmmakers are historians.

Prerequisites: HIST 101 and HIST 102.

HIST 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HIST 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HIST 499 History Internship1-4 Credits

Experience with historical work in settings outside the university community, including museums, archives, and local, state, and federal agencies. Internship must be arranged during the semester prior to the field experience.

Prerequisites: Nine upper division hours in history, junior status, and permission of instructor.

HIST 501 Early American History: Foundation - Civil War3 Credits

Graduate level seminar covering the first half of American history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in early American history.

Prerequisites: Admission into Social Sciences Graduate Certificate Program.

HIST 502 Late American History: Civil War - Modern U.S.3 Credits

Graduate level seminar covering the second half of American history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in modern American history.

Prerequisites: Admission into Social Sciences Graduate Certificate Program.

HIST 510 Early European History: Ancient - Reformation3 Credits

Graduate level seminar covering the first half of European history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in early European history.

Prerequisites: Admission into Social Sciences Graduate Certificate Program.

HIST 511 Modern European History: Reformation - 20th Century3 Credits

Graduate level seminar covering the second half of European history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in modern European history.

Prerequisites: Admission into Social Sciences Graduate Certificate Program.

Honors (HNRS)

HNRS 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HNRS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HNRS 496 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HNRS 498 Honors Thesis3 Credits

Course may be taken multiple times up to maximum of 9 credit hours.

Hospitality Management (HMGT)

HMGT 101 Travel Industry I3 Credits

Introduction to tourism and its relationship to the business world.

Includes an overview of all sectors of business and the components of the travel, tourism, and hospitality industry. Travel methods, destination resorts, and other businesses which serve the traveler are evaluated. A requirement for all Hospitality Management students.

Terms Typically Offered: Fall.

HMGT 102 Travel Industry II3 Credits

Evaluation of job opportunities in the travel, recreation, and hospitality fields. Travel trends, feasibility studies, and marketing techniques are analyzed. Students are provided an opportunity to make preparations and acquire skill instructions for work in the student's career objective. Field trips and visiting lecturers are included.

Prerequisites: HMGT 101 or permission of instructor.

HMGT 103 Travel and Tourism Marketing Techniques3 Credits

Interpretation of marketing problems, strategies, and techniques of industries engaged in serving the traveler, methods of identifying potential markets, preferences, and likely responses to promotional programs of private and governmental travel entities. Required of all Hospitality Management students. MARK 231 recommended for baccalaureate students.

Prerequisites: HMGT 101 or permission of instructor.

HMGT 199 Employment Concepts1 Credit

Introduction of the concepts of employment in conjunction with the internship experience. It will provide students with an opportunity to share their concerns with the instructor and other students, allow employers to discuss the internship with students and assist the student in developing his or her career goals. The student will enroll in this course the spring semester immediately preceding the summer they intend to do their HMGT 299 Internship.

Prerequisites: HMGT 101.

Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 200 Management and Supervisory Skills for the Hospitality Industry3 Credits

Evaluates the supervisory and management processes through a comprehensive overview of how these processes relate to specific hospitality industry applications.

Prerequisites: HMGT 101 or permission of instructor.

HMGT 201 Management in the Travel Industry I3 Credits

An opportunity to explore operating techniques and problems of the major industries involved in tourism, travel, and hospitality through the eyes of the operating manager. Specific skills used within various industries are developed.

Prerequisites: HMGT 200 or permission of instructor.

HMGT 211 Travel Destinations3 Credits

For the individual who plans to work, study, or travel internationally including the professional who is, or plans to be, part of the travel industry. Life styles and current local aspects in foreign destinations are considered and guest lecturers are included. Open to all students but strongly recommended for Hospitality Management students.

HMGT 215 Computerized Reservations3 Credits

An introductory course providing an overview of operation of a computerized reservations system.

Prerequisites: HMGT 101 and HMGT 200.

HMGT 217 Hotel Operations3 Credits

Introductory course providing an overview of the operation of a hotel front office. This will include the use of the personal computer and state-of-the-art software for reservations, check-in, check-out, and creating the daily report.

Prerequisites: HMGT 101.

HMGT 218 Housekeeping Operations3 Credits

Comprehensive overview of managing housekeeping operations in the lodging industry including practical applications to industry segments and impact on capital expenditures.

Prerequisites: HMGT 101 or permission of instructor.

HMGT 241 Food and Beverage Operations3 Credits

Comprehensive overview of management processes in food and beverage operations including site visits and industry guest lecturers.

Prerequisites: HMGT 101 or permission of instructor.

HMGT 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HMGT 299 Internship1-12 Credits

Classroom studies combined with salaried work in an experience which relates to the student's career goal. Only for, and required of, Hospitality Management students. Credit not available through competency or challenge.

Prerequisites: HMGT 200, GPA of 2.00 or higher, or permission of instructor.

Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 310 Travel and Tourism Marketing Techniques3 Credits

Interpretation of marketing problems, strategies, and techniques of industries engaged in serving the traveler. Study will include advanced methods of identifying potential markets, preferences and likely responses to promotional programs of private and public travel entities. Required of all Hospitality Management majors.

Prerequisites: HMGT 101, MARK 231 or permission of instructor.

HMGT 311 Experiential Travel3 Credits

Intensive course structured around faculty-led, short-term travel to selected destinations. Topics include economic, socio-cultural, environmental, legal-political, and technological influences on travel and tourism in business sectors.

Prerequisites: Junior standing.

Terms Typically Offered: Spring, Summer.

HMGT 350 Private and Commercial Recreation Systems3 Credits

Profit-based recreation industry, including managing the recreation enterprise, economic feasibility studies, small business entrepreneurship, market characteristics, professional opportunities, and trade association research and publications.

Prerequisites: HMGT 101 and MANG 201.

HMGT 351 Community Tourism Systems3 Credits

Community as a tourist destination area with concentration on identification of linkages between tourism industries and local economies, and the process of developing and managing park and recreation resources to serve the tourist.

Prerequisites: HMGT 101, HMGT 200, and MANG 201.

HMGT 352 Public Recreation Systems3 Credits

National and state outdoor recreation resource management systems including a variety of administrative tools applicable to operation and maintenance as well as comprehensive discussion of legislation, land use policy, forest recreation planning, and governmental designation programs.

Prerequisites: HMGT 101, HMGT 200, and MANG 201.

HMGT 370 Managing Quality Service3 Credits

Introduction of quality service management necessary for the overall management process to be successful. This course emphasizes a sound set of principles for service management with application to operations, marketing, and human resources. Practical applications, case studies and a service audit project are included.

Prerequisites: Junior standing.

Terms Typically Offered: Spring.

HMGT 371 Events Management3 Credits

Overview of the meetings and events industry including career opportunities. An applied approach is utilized in the planning, proposal and execution phases of event planning to support the academic course materials.

Prerequisites: HMGT 101 and HMGT 200.

Terms Typically Offered: Fall.

HMGT 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HMGT 400 Hospitality Security and Safety3 Credits

Individualized security programs. Security and safety equipment and procedures. Guest protection, asset protection, risk management, loss prevention, and OSHA regulations for lodging properties.

Prerequisites: BUGB 349.

HMGT 410 Hospitality Facilities Management3 Credits

Hotel or restaurant physical plant management. Interface with engineering and maintenance departments.

Prerequisites: HMGT 101 and HMGT 200, or permission of instructor.

HMGT 450 Strategic Hospitality Sales and Marketing3 Credits

Strategic and operating sales and marketing plans for hospitality properties. Includes development of a sales and marketing plan as a semester project.

Prerequisites: MARK 231 or permission of instructor.

HMG 470 Hospitality Management Strategies 3 Credits

Comprehensive overview of major hospitality industry management segments. Includes management strategies adapting to the rapidly changing hospitality industry environment.

Prerequisites: HMG 101, HMG 200, HMG 410, HMG 450, or permission of instructor.

HMG 495 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HMG 496 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HMG 499 Internship 1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Human Resource Management (HRMA)

HRMA 371 Human Resource Management 3 Credits

Principles and applications of basic human resource management (HRM). Survey of the HRM functions in organizations. Topics include staffing, training and development, compensation, safety and health, employee and labor relations, and employee performance management.

Prerequisites: MANG 201, junior or senior standing.

Terms Typically Offered: Fall, Spring, Summer.

HRMA 372 Employee Recruitment and Selection 3 Credits

Effective analysis and forecasting of organizational staffing requirements. Assessment, recruitment, and selection of candidates, as well as effective retention of employees in today's complex organizations. Legal aspects of staffing process emphasized.

Prerequisites: HRMA 371.

Terms Typically Offered: Fall, Summer.

HRMA 373 Human Resource Management, Leadership, Ethics, and Social Responsibility 3 Credits

Review of literature related to Human Resource Management (HRM) and leadership, ethics, and corporate social responsibility. Review articles and books related to the responsibility of HRM leaders and their significant influence on organizational practices, leadership, ethical behavior, and corporate social responsibility.

Prerequisites: HRMA 371 or permission of instructor.

Equivalent Course(s): MANG 370

HRMA 474 Training and Development 3 Credits

Functions of training and development as applied in both large and small business environments. The role of training and development in the current business environment is considered with regard to learning theory, learning objectives, instructional methods, and needs assessment. Focus will be placed on evaluation of training effectiveness and emerging concepts in workplace education.

Prerequisites: HRMA 371.

Terms Typically Offered: Fall, Spring.

HRMA 475 Compensation and Reward Systems 3 Credits

Designing strategic compensation systems. Seniority, merit, incentive pay, person-focused pay. Job evaluation, internal and external equity. Benefits administration. International, executive, and flexible workforce compensation systems. Diversity and ethical considerations.

Prerequisites: HRMA 371.

Terms Typically Offered: Spring.

HRMA 478 Advanced Human Resource Management 3 Credits

Capstone course for Human Resource Management concentration. Application of human resource practices.

Prerequisites: HRMA 371, HRMA 372, HRMA 474, HRMA 475, and senior standing.

Terms Typically Offered: Spring.

HRMA 495 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HRMA 520 Human Resource Management 3 Credits

In-depth study of the effective use and adaptation to the human resources of an organization through the management of people-related activities. The focus is on the core responsibilities and activities of the HR manager. Includes a detailed review of current statutes and regulations affecting the HR field.

Terms Typically Offered: Spring.

Humanities (HUMA)

HUMA 196 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 201 Field Studies in Humanities 1-3 Credits

Study/travel tours of varying lengths in the United States and foreign countries to acquaint students in some depth with particular aspects of world culture (language, the arts, literature, etc.) both contemporary and historical.

HUMA 296 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 300 History and Development of Books 3 Credits

History and development of the book from the development of the alphabet to the present in the context of changing technologies and various social, cultural, and economic influences.

Prerequisites: Junior or senior standing, or permission of instructor.

HUMA 301 Field Studies in Humanities 1-3 Credits

Prerequisites: Junior or above standing.

HUMA 395 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HUMA 396 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 495 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

HUMA 496 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 499 Internship 8 Credits

See faculty advisor for details.

Course may be taken multiple times up to maximum of 15 credit hours.

Innovation (INOV)

INOV 310 The Process of Innovation 3 Credits

Introduction to the process and key components of innovation. Topics include investigation of major innovations throughout history and how to hone design thinking to improve analytical, critical thinking, creativity and problem solving skills. Students will become certified to operate equipment at the Mav Innovation Center; the Business Incubator Center Makerspace; and co-working spaces across Grand Junction.

Terms Typically Offered: Fall, Spring.

INOV 320 Innovation Launch3 Credits

Introduction to the process of turning an idea into a successful business – ideation through commercialization. Students create blueprints for ideas and strategies that become the foundation for a successful business.

Terms Typically Offered: Fall, Spring.

INOV 399 Internship1-9 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

INOV 450 Innovation Garage3 Credits

Research, data analysis, prototype building, and creation of technical report findings in teams. Students will use equipment at the Mav Innovation Center; the Business Incubator Center Makerspace; and co-working spaces across Grand Junction. Commercialization of an innovation is expected. Teams generally work with Mav Innovation Center Sponsor companies.

Terms Typically Offered: Fall, Spring.

INOV 499 Internship1-9 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

International Studies (INTS)

INTS 101 Introduction to International Studies3 Credits

Introduction to concepts, paradigms, and theories used to describe and explain international studies. Attention given to the interdisciplinary nature of academic disciplines, peoples in cultural context, environments, education systems, world resources, and social and economic institutions.

Terms Typically Offered: Spring.

INTS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Kinesiology-Academic (KINE)

KINE 100 Health and Wellness1 Credit

Information concerning the benefits, positive effects, assessment, and implementation of healthy life styles.

Terms Typically Offered: Fall, Spring, Summer.

KINE 195 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

KINE 200 Foundations of Kinesiology3 Credits

Orientation to the history and philosophy of kinesiology and the development of various sub-disciplines. Introduction to career pathways.

Terms Typically Offered: Fall, Spring, Summer.

KINE 203 Human Nutrition3 Credits

Introduction to the science of the effects of food on the body and the body's need for and utilization of essential nutrients.

Terms Typically Offered: Fall, Spring.

KINE 205 Introduction to Sport Management3 Credits

Survey and introduction to the field of sport management.

Terms Typically Offered: Fall, Spring.

KINE 211 Methods of Lifetime, Individual, and Dual Activities3 Credits

Instructional content (scope and sequence) and teaching methodology related to various individual, dual, and lifetime activities appropriate for K-12 physical education.

Terms Typically Offered: Fall.

KINE 213 Applications of Physical Fitness and Exercise Prescription3 Credits

Exercise program design and prescription to meet individual needs, including assessment of existing exercise programs and evaluation of their effectiveness. Major components of cardio-respiratory endurance, muscular strength, muscular endurance, flexibility, and body composition discussed in detail.

Prerequisites: KINE 100; KINE 200 (may be taken concurrently).

Terms Typically Offered: Fall, Spring.

KINE 214 Methods of Team Activities3 Credits

Instructional content (scope and sequence) and teaching methodology related to various team activities appropriate for K-12 physical education.

Terms Typically Offered: Spring.

KINE 250 Lifeguard Training3 Credits

Knowledge and skills required towards certification in lifeguard training.

KINE 251 Water Safety Instructor Course3 Credits

Instructional content (scope and sequence) and teaching methodology related to various aquatic activities.

Terms Typically Offered: Spring.

KINE 256 Methods of Creative Play, Dance, Gymnastics, and Literacy3 Credits

Instructional content (scope and sequence) and teaching methodology related to creative play, dance, gymnastics and literacy activities.

Prerequisites: KINE 211 or KINE 214.

KINE 260 School Health Education3 Credits

School health issues. Emphasis on development of proper health attitudes and practices, teaching methodology, and application of health knowledge and practice in school and public health situations.

Prerequisites: KINE 100.

Terms Typically Offered: Fall, Spring.

KINE 265 Emergency Care3 Credits

Knowledge and skills required to meet the needs of emergency care situations. Course leads to obtaining valid First Aid and CPR/AED for the Health Care Provider cards as well as experience associated with care and prevention of common injuries experienced by the physically active.

Terms Typically Offered: Fall, Spring.

KINE 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

KINE 297 Practicum1-2 Credits

Work-oriented instruction involving the implementation of classroom or laboratory experience under the direct supervision of a faculty member. Course may be taken 5 times for credit.

KINE 301 Health and Fitness Assessment3 Credits

Health and fitness testing and evaluation for children, athletes, and adults of all ages and abilities. Statistical techniques for exercise testing analyses.

Prerequisites: KINE 213.

KINE 303 Physiology of Exercise3 Credits

The effects of various types of exercise upon human body structure and function. Three one-hour lectures and one two hour laboratory per week.

Prerequisites: KINE 213 and BIOL 209/BIOL 209L.

Corequisites: KINE 303L.

KINE 303L Physiology of Exercise Laboratory1 Credit

Lab component required for KINE 303.

Prerequisites: KINE 213 and BIOL 209/BIOL 209L.

Corequisites: KINE 303.

KINE 307 Philosophy and Psychology of Coaching3 Credits

Fundamental philosophical and psychological principles related to coaching competitive athletic teams.

KINE 308 Philosophy and Psychology of Officiating3 Credits

Exploration of athletic officiating through a philosophical and psychological perspective. Identification of professional requirements to enter the officiating field.

Terms Typically Offered: Spring.

KINE 309 Anatomical Kinesiology3 Credits

Analysis of joint movement and muscular involvement during physical activity.

Prerequisites: BIOL 209/BIOL 209L.

KINE 310 Methods of Exercise Instruction3 Credits

Practical experience in teaching safe and effective exercise for multiple populations.

Prerequisites: KINE 213 and KINE 309.

KINE 320 Methods of Teaching Physical Education in Elementary Schools3 Credits

Exploration of the physical education content and teaching methods appropriate for elementary school education.

Prerequisites: EDUC 115, EDUC 215, and KINE 256.

KINE 321 Physical Activity and Health in the Classroom3 Credits

Integration of health and physical activity concepts in the gym and classroom. For education majors.

KINE 330 Prevention and Evaluation of Injuries to the Physically Active3 Credits

Procedures and techniques involved in preventing and evaluating common injuries associated with physically active individuals.

Terms Typically Offered: Fall, Spring, Summer.

KINE 333 Community Health3 Credits

Introduction to the areas of epidemiology, disease prevention and control, environmental health, health care, injury prevention, and safety education.

KINE 334 Sport Management3 Credits

Theoretical and applied knowledge in management principles and techniques. Focus on the theory and practical applications of planning, leading, organizing and evaluating.

Prerequisites: KINE 200, KINE 205, and MANG 201.

Terms Typically Offered: Fall, Spring.

KINE 335 Sport in Society3 Credits

Sociology of sport, covering the cultural traditions, social values, and psychosocial experiences of sport from antiquity to today.

Prerequisites: KINE 205.

Terms Typically Offered: Fall, Spring, Summer.

KINE 340 Sport Operations3 Credits

Theoretical background and practical applications designed to provide a framework for the management of resources associated with the planning, implementation and evaluation of festivals and special events.

KINE 342 Sport Law and Recreation Risk Management3 Credits

Legal duties, responsibilities, rights, and risk management techniques involved in sport and recreation.

Prerequisites: Junior status.

Terms Typically Offered: Fall, Spring.

KINE 345 Survey of Economics and Finance in Sport3 Credits

Economic, financial, and managerial accounting concepts for sport.

Prerequisites: ECON 201 and KINE 205.

Terms Typically Offered: Fall, Spring.

KINE 350 Leadership and Ethics in Sport3 Credits

This course is designed to give individuals an understanding of the various aspects of leadership as well as a survey course of the development and application of moral and ethical values in sport administration settings.

KINE 360 Motor Learning3 Credits

Foundations of motor learning and the relation of motor performance to other aspects of behavior.

KINE 370 Biomechanics3 Credits

Application of mechanical principles and anatomical structure to human movement using quantitative analysis methods.

Prerequisites: BIOL 209/BIOL 209L and KINE 309.

Corequisites: KINE 370L.

KINE 370L Biomechanics Laboratory1 Credit

Lab component required for KINE 370.

Prerequisites: BIOL 209/BIOL 209L and KINE 309.

Corequisites: KINE 370.

KINE 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

KINE 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

KINE 397 Practicum1-2 Credits

Course may be taken 5 times for credit.

KINE 399 Internship1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

KINE 401 Organization, Management, and Legal Liabilities for Youth Fitness Programs3 Credits

Approaches to organizational structures, administrative techniques, and long-term athletic development in youth fitness programs. Use of technology to measure fitness, legal and safety issues, and guiding youth to create their own fitness plans. Students will apply information from the course in K-12 teaching situations.

Terms Typically Offered: Fall, Spring, Summer.

KINE 402 Sport Marketing3 Credits

Application of the principles of promotion and marketing to the sport and fitness industry including the areas of professional sports, corporate fitness, college/high school athletics, clubs and resorts, and others.

Prerequisites: KINE 205, MARK 231.

Terms Typically Offered: Fall, Spring, Summer.

KINE 403 Advanced Strength and Conditioning3 Credits

Emphasis on strength and conditioning program design and considerations based on activity and sport type.

Prerequisites: KINA 128 or KINA 180-KINA 193, and KINE 303/KINE 303L.

KINE 404 Clinical Exercise Physiology and Advanced Exercise Prescription3 Credits

Emphasis on clinical risk stratification for conducting health and fitness assessments and exercise program design for healthy individuals and individuals with medically controlled disease.

Prerequisites: KINE 303/KINE 303L.

KINE 405 Sports Nutrition3 Credits

In-depth study of macronutrient metabolism as it relates to sport.

Practical consideration in the use or non-use of carbohydrate supplements, vitamins, and/or other ergogenic aids. Three one-hour lectures per week.

Prerequisites: KINE 203 and KINE 303/KINE 303L.

KINE 406 Governance and Communication in Sport3 Credits

The laws and rules governing various sport organizations from interscholastic to professional sport as well as the major means of sport communication.

KINE 408 Methods of Teaching Physical Education in Secondary Schools3 Credits

Instructional strategies on a practical application level for prospective secondary physical education teachers preparatory to entry into student teaching. Field experiences are required to supplement lectures and discussions.

Prerequisites: EDUC 215, KINE 214, and KINE 301.

Terms Typically Offered: Fall.

KINE 411 Worksite Health Promotion3 Credits

Covers worksite health promotion: its description, planning, implementation, marketing, and evaluation.

Prerequisites: KINE 213.

KINE 415 Physical Activity and Aging3 Credits

The study of the dynamic relationship between physical activity and the aging process. Course focuses on the impact of physical activity on the physiological, psychological, and social well-being of older adults.

Prerequisites: KINE 303/KINE 303L.

KINE 417 Health Behavior Change3 Credits

Introduction to the areas of psychosocial, cultural, and situational factors that influence the voluntary behavior change process. Review of the theories related to health behavior.

Terms Typically Offered: Spring.

KINE 420 Therapeutic Interventions3 Credits

Review of the theoretical underpinnings, scientific basis, and practical use of contemporary therapeutic techniques for the treatment of acute and chronic musculoskeletal injuries.

Terms Typically Offered: Fall, Spring.

KINE 430 Medical Conditions and Pharmacology in the Physically Active3 Credits

Overview of the effects of selected, pre-existing, medical conditions and pharmacological agents on physical activity.

Terms Typically Offered: Fall, Spring, Summer.

KINE 480 Inclusive Physical Activity3 Credits

Study of physical activities, modifications, and adaptations for individuals with disabilities.

KINE 487 Structured Research1-3 Credits

Capstone research experience with a formal manuscript and presentation. Topic, methods, and writing are to be guided and approved by a faculty member.

Prerequisites: KINE 303, senior standing, and permission of instructor.

Course may be taken multiple times up to maximum of 6 credit hours.

KINE 494 Kinesiology Senior Seminar1 Credit

Discussion and research of current issues in kinesiology and exercise physiology.

Prerequisites: Senior status.

KINE 494A Sport Management Senior Seminar1 Credit

Discussion and research of current issues in sport management.

KINE 495 Independent Study1-5 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

KINE 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

KINE 497 Pre-Internship in Physical Education3 Credits

Standards-based education and teaching practices in a K-12 physical education setting.

Prerequisites: KINE 320, KINE 408, and senior standing.

Terms Typically Offered: Fall, Spring.

KINE 499 Internship3-12 Credits

Work experience obtained on a job where assignments are related to the student's specific concentration area within the Kinesiology degree.

Prerequisites: Kinesiology major and senior standing.

Course may be taken multiple times up to maximum of 15 credit hours.

KINE 500 Facility and Equipment Management in Sport and Fitness3 Credits

Provides an in-depth study of the facilities and equipment used in a variety of sport and fitness settings, from public to private organizations, educational settings, athletics (interscholastic, intercollegiate, and professional sports) as well as commercial and corporate fitness centers. The focus is on designing, planning, funding, and maintaining a facility as well as the equipment necessary for its successful operation.

KINE 501 Research Methods3 Credits

Examination of the methods of research in kinesiology. Topics will include selection of the problem, hypothesis testing, historical research, descriptive research, experimental research, tools of research, and data interpretation.

Terms Typically Offered: Fall.

KINE 502 Sport Marketing3 Credits

Overview of marketing in sport. Emphasis on enabling the marketing manager to create strategies that "fit" products and services to an athletic department or sport organization's distinctive competencies and target market. Development of decision-making skills in marketing and overview of the marketing management process. Case studies in sport marketing address and exemplify issues in creating and implementing the marketing strategy.

Terms Typically Offered: Spring.

KINE 510 Event and Program Management in Sport and Fitness3 Credits

Duties and responsibilities of sport and fitness managers in creating policies, conducting events, and developing programs for sport or fitness organizations. Includes extensive examination of the topics and issues involved in the planning, funding, promotion, implementation, and evaluation of events and programs.

KINE 520 Management Policies and Regulations in Sport and Fitness3 Credits

Study of managerial policies and regulations to specific sport and fitness organizations to include educational, athletic, commercial and corporate entities. Topics will include the following: human resource management; labor relations; policy issues; sponsorship; budgeting; federal, state, and local statutes; CHSAA and NCAA rules and guidelines; and professional organization policies. Specific attention will be given to compliance strategies.

KINE 530 Advanced Coaching for Basketball1 Credit

Examination of the trends, techniques, methods and philosophies in coaching basketball at skilled levels. Specific attention is given to video analysis and game management.

KINE 534 Advanced Injury Management for Coaches1 Credit

Specialized procedures and techniques involved in the prevention and management of common athletic injuries.

KINE 535 Sport in Society3 Credits

Exploration of role and impact of sports in our society from a social view. The course will discuss various sociological constructs as they impact all levels of sport participation, including amateur and professional team sports, and the challenges of these constructs in managing sport organizations.

Terms Typically Offered: Fall.

KINE 542 Sport Law and Ethics3 Credits

Focus on legal issues pertaining to amateur and professional sports. Tort law, negligence, contract, antitrust, labor, facility, exculpatory, and licensing law will be analyzed in the context of sports-related cases. This course examines moral and ethical issues within sport environments, including major social criticisms and constructs of sport, analysis of relevant ethical theories, and synthesizing ethical reasoning knowledge and skills.

Terms Typically Offered: Fall.

KINE 545 Sport Finance3 Credits

Study of the basic financial considerations for an effective sports management professional, including the financial challenges facing the profession, sources of funding, budgeting and financial statements, the concept of economic impact analysis, and the pros and cons of using public-sector funds.

Terms Typically Offered: Fall.

KINE 550 Contemporary Issues in Sport Management3 Credits

Overview of sport through the examination of problems and issues faced by contemporary sport managers. The subject matter will focus on current events, topics, and implications surrounding the justification for sport programs.

Terms Typically Offered: Fall.

KINE 587 Research3 Credits**KINE 590 Thesis I3 Credits**

Controlled learning experience supervised by faculty and guided by a contract that specifies student learning outcomes and assignments. Prior to registering, the student must meet with a Sport Management faculty member to approve a topic.

Prerequisites: KINE 501.

Terms Typically Offered: Spring.

KINE 591 Directed Readings3 Credits**KINE 592 Thesis II3 Credits**

Continuation of controlled learning experience supervised by faculty and guided by a contract that specifies student learning outcomes and assignments. Prior to registering, the student must meet with a Sport Management faculty member to approve a topic.

Prerequisites: KINE 590.

Terms Typically Offered: Summer.

KINE 595 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

KINE 599 Internship1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Kinesiology-Activity (KINA)

KINA 101 Beginning Swimming1 Credit

Introduction to the basic swimming strokes and knowledge needed to prevent aquatic emergencies. Prepare students to acquire proper competitive swimming skills.

Terms Typically Offered: Fall, Spring.

KINA 102 Intermediate Swimming1 Credit

Continued development of swimming and water safety skills. Enhance swimming fitness and overall conditioning.

Terms Typically Offered: Fall, Spring.

KINA 103 Springboard Diving1 Credit

Instruction of the basic techniques and mechanics of springboard diving. Develop proper competitive diving skills.

Terms Typically Offered: Fall, Spring.

KINA 104 Water Polo1 Credit

Introduction to the basic skills and rules of water polo. Progression of skills leading into full scrimmages.

Terms Typically Offered: Fall, Spring.

KINA 105 Water Aerobics1 Credit

Conditioning program in the pool that emphasizes muscle tone, strength, flexibility, balance, coordination, and cardiovascular endurance.

Terms Typically Offered: Fall, Spring.

KINA 106 Beginning Scuba1 Credit

Introduction to snorkeling techniques, scuba gear preparation, equipment maintenance, and 20 basic scuba skills. Designed to prepare students for a certification by helping them become safe, comfortable, and confident divers.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

KINA 107 Advanced Scuba1 Credit

Advanced scuba skills and dives to expand safety, confidence, and enjoyment of scuba diving. Designed for certified scuba divers.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

KINA 108 Canoeing1 Credit

Introduction to the basic skills and safety of canoeing. Students will learn how to use the equipment involved, as well as how to scout the river.

Terms Typically Offered: Fall, Summer.

KINA 111 Rock Climbing1 Credit

Introduction to the sport of rock climbing. Students will learn how to use equipment, tie knots, belay, communicate, basic climbing movements, and proper progression.

Terms Typically Offered: Fall, Spring.

KINA 112 Hiking1 Credit

Introduction to hiking. Students will learn how to read a map, be safe while hiking, and properly prepare for a hike.

Terms Typically Offered: Fall, Spring.

KINA 115 Beginning Golf1 Credit

Introduction to the fundamentals, rules, and regulations of golf. Students will learn skills such as putting, chipping, and driving the ball, as well as proper golf etiquette.

Terms Typically Offered: Fall, Spring.

KINA 115A Disc Golf and Ultimate Frisbee1 Credit

Introduction to the fundamental knowledge and skills of disc golf and ultimate frisbee. Students will learn the fundamental skills of throwing and catching, as well as the rules and strategies of the game.

Terms Typically Offered: Fall, Spring.

KINA 116 Intermediate Golf1 Credit

Development of the student's golf skills. Designed to refine the skills and strategies to ensure students can compete at an intermediate level.

Terms Typically Offered: Fall, Spring.

KINA 117 Badminton1 Credit

Introduction to the fundamental knowledge and skills of badminton. Students will enhance their skills related to the various serves and shots including drop, lob, clear, and smash shots. Instruction will include an emphasis on the fundamental strategies and rules used in both singles and doubles play.

Terms Typically Offered: Fall, Spring.

KINA 118 Karate1 Credit

Introduction to the history, culture, and practice of Okinawan Karate. Students will learn the basic terminology, warm-up procedure, and moving drills associated with the art of Karate.

Terms Typically Offered: Fall, Spring.

KINA 119 Archery1 Credit

Introduction to the basic skills of archery. Students will learn about the safety, rules, equipment, and regulations associated with archery.

Terms Typically Offered: Fall, Spring.

KINA 121 Beginning Tennis1 Credit

Introduction to the basic skills of tennis. Topics include forehand, backhand, serve, and volley. Students will learn strategies, history, rules, and etiquette of tennis.

Terms Typically Offered: Fall, Spring.

KINA 121A Pickleball1 Credit

Introduction to the fundamental knowledge and skills of pickleball. Students will enhance their skills related to the various serves and shots including drop, lob, clear, and smash shots. Instruction will also emphasize the fundamental strategies and rules used in both singles and doubles play.

Terms Typically Offered: Fall, Spring.

KINA 122 Intermediate Tennis1 Credit

Development and refinement of the fundamentals of tennis. Students will learn advanced strokes and strategies that can be used to compete at an intermediate level.

Terms Typically Offered: Fall, Spring.

KINA 123A Racquet Sports1 Credit

Combination of racquetball, pickleball, and badminton. Introduction to rules, shots and strategies for each game.

Terms Typically Offered: Fall, Spring.

KINA 126 Fitness Walking1 Credit

Individualized approach to fitness walking. Students will gain knowledge about fitness principles and practices, as well as improve one's individual fitness levels.

Terms Typically Offered: Fall, Spring, Summer.

KINA 127 Physical Conditioning1 Credit

Introduction to basic skills in physical conditioning and new fitness concepts. Students will gain knowledge on developing and executing an exercise program that combines strength training and cardiovascular endurance training.

Terms Typically Offered: Fall, Spring.

KINA 128 Intermediate Weight Training1 Credit

Proper guidelines, principles, and techniques of weight lifting. Development of muscular strength, endurance, and power at an advanced level. Introduces Olympic lifting techniques. Continues development of individual weight training programs and advanced evaluation techniques.

Terms Typically Offered: Fall, Spring.

KINA 129 Weight Training1 Credit

Introduction to weight training principles and application with an individualized approach. Students will learn to design and implement a weight training program tailored to their own fitness goals.

Terms Typically Offered: Fall, Spring.

KINA 131A Aerobics1 Credit

Aerobics to strengthen the cardiovascular system using low- or high-impact movements. Topics include workouts on the floor, bench, stability ball, and circuits.

Terms Typically Offered: Fall, Spring.

KINA 133 Downhill Skiing1 Credit

Introduction to the knowledge, techniques, equipment, and safety necessary for participating in downhill skiing. Students will learn about the safety, practice, and etiquette associated with the snow sport.

Terms Typically Offered: Spring.

KINA 134 Snowboarding1 Credit

Introduction to the knowledge, techniques, equipment, and safety necessary for participating in snowboarding. Students will learn about the safety, practice, and etiquette associated with the snow sport.

Terms Typically Offered: Spring.

KINA 136A Barre1 Credit

Introduction to the practice of Barre. Students will learn low-impact exercises designed to develop whole body strength, awareness, and control, for various fitness levels. Focus on increasing overall strength, muscle balance, coordination and flexibility.

Terms Typically Offered: Fall, Spring.

KINA 137 Fencing1 Credit

Introduction to the basic skills and rules involved in fencing. Students will develop strategies for both attacking and defending using all three weapons (foil, saber, epee) of fencing.

Terms Typically Offered: Fall, Spring.

KINA 137A Intermediate Fencing1 Credit

Development of basic fencing skills and strategies. Footwork and handwork skills will be developed to ensure students can compete at an intermediate level.

Terms Typically Offered: Fall, Spring.

KINA 138 Step Aerobics1 Credit

Basic aerobic step patterns with the freedom of creativity. Students will learn choreographic terminology, as well as improve their cardiovascular fitness through aerobic step training.

Terms Typically Offered: Fall, Spring.

KINA 140 Snowshoeing1 Credit

Introduction to snowshoeing. Topics include on- and off-trail techniques for various terrains, recognition and treatment of cold injuries, risk management, and trip planning.

Terms Typically Offered: Spring.

KINA 142 Self-Defense1 Credit

Fundamental applications of Jujitsu, boxing, karate, wrestling, and Kung Fu. Students will learn the proper maneuvers for a variety of potential real-life combative situations.

Terms Typically Offered: Fall, Spring.

KINA 144 Pilates1 Credit

Introduction to the practice of Pilates. Students will learn low-impact mat exercises designed to develop whole body awareness and control for various fitness levels. Focus is on increasing core strength and stabilization, muscle balance, tone, coordination, and flexibility.

Terms Typically Offered: Fall, Spring.

KINA 146 Indoor Cycling1 Credit

Basic concepts associated with indoor cycling. Emphasis on building cardiorespiratory endurance through structured, individually-paced indoor cycling workouts.

Terms Typically Offered: Fall, Spring.

KINA 151 Adaptive Physical Activity1 Credit

Adaptive physical activity for students with a variety of disabilities, including both temporary and permanent injuries. Focus is on an individualized program that could include training and activity in muscle strength and endurance, flexibility, motor skills, swim skills, and/or cardiovascular endurance.

Terms Typically Offered: Fall, Spring.

KINA 152 Softball1 Credit

Introduction to the fundamental skills of softball. Topics include the rules and regulations of the game and how to play each position on the field.

Terms Typically Offered: Fall, Spring.

KINA 156 Soccer1 Credit

Introduction to the basic skills and techniques of soccer. Topics include rules, strategies, and the etiquette involved in a game situation.

Terms Typically Offered: Fall, Spring.

KINA 157 Adaptive Physical Activity III1 Credit

Activity course for students with temporary and permanent disabilities. This course continues with the development of individualized training and activities that improve one's muscular strength, muscular endurance, flexibility, motor skills, swimming skills, and/or cardiovascular endurance.

Terms Typically Offered: Fall, Spring.

KINA 160A Nordic Skiing1 Credit

Introduction to Nordic skiing techniques for groomed tracks and ungroomed snow conditions. Emphasizes speed control, efficient body movement, and safety. Covers basic winter survival techniques, proper clothing, and trail etiquette.

Terms Typically Offered: Fall, Spring.

KINA 161 Two-Person Outdoor Volleyball1 Credit

Exploration of the game of sand volleyball as a lifetime activity. Students build on their basic understanding of volleyball skills and game strategies.

Terms Typically Offered: Fall, Spring.

KINA 162 Volleyball1 Credit

Introduction course of the fundamentals of volleyball including passing, serving, setting, and spiking. Students will learn rules and court strategies involved in the game and be able to demonstrate their skills in game-play.

Terms Typically Offered: Fall, Spring.

KINA 163 Intermediate Volleyball1 Credit

Enhancement of basic skills of volleyball learned as a beginner volleyball player. Advanced techniques taught such as, blocking, setting, and hitting. Different strategies of offense and serving will be emphasized.

Terms Typically Offered: Fall, Spring.

KINA 164 Beginning Basketball1 Credit

Introduction to the fundamental skills of basketball. Acquaints the student with the knowledge and skills necessary to participate in the game of basketball while acquiring the necessary physical fitness to play the sport.

Terms Typically Offered: Fall, Spring.

KINA 165 Intermediate Basketball1 Credit

Development of basketball skills and knowledge at an intermediate level. This course covers the implementation of set plays and skills through drills and game play.

Terms Typically Offered: Fall, Spring.

KINA 166 Flag Football1 Credit

Introduction to the fundamental skills, rules, and strategies of flag football. Students will learn the safety and etiquette of the game.

Terms Typically Offered: Fall, Spring.

KINA 166A Touch Rugby1 Credit

Introduction to the basic skills of touch rugby. This course emphasizes ball handling and attacking strategies. Students will learn the rules and the history of the game.

Terms Typically Offered: Fall, Spring.

KINA 167 Tai Chi1 Credit

Introduction to the ancient Chinese traditional martial art of Tai Chi as an effective way to reduce stress levels, improve health, and increase the ability to focus. Students will develop a relaxed sequence of moves that emphasize proper alignments and release muscular tension, aiding in preventing and recovering from injuries.

Terms Typically Offered: Fall, Spring.

KINA 168 Introduction to Yoga1 Credit

Fundamental poses for the practice of yoga, stress reduction techniques, and strength and flexibility development.

Terms Typically Offered: Fall, Spring.

KINA 169 Hatha Yoga & Relaxation1 Credit

Participation in the practice of Hatha yoga, including the integration of mind-body, stress reduction techniques, strength and flexibility enhancement.

Terms Typically Offered: Fall, Spring.

KINA 169A Flow Yoga1 Credit

Participation in the practice of Vinyasa yoga with an emphasis on synchronizing breath and movement to enhance strength and focus.

Terms Typically Offered: Fall, Spring.

KINA 170 Zumba1 Credit

Introduction to Zumba, Latin dance styles, through a variety of choreographed songs. Topics include basic information about aerobic training, how to perform basic Latin steps, and how to design a choreographed Latin-based dance routine.

Terms Typically Offered: Fall, Spring.

KINA 171 Adaptive Skiing/Snowboarding1 Credit

Adaptive snowsports for students with all types of disabilities. Students will develop knowledge, techniques, and an understanding of the safety involved in skiing/snowboarding. Specialized equipment will be available and customized depending on abilities.

Terms Typically Offered: Spring.

Fees: Yes.

KINA 174 Social Dance1 Credit

Introduction to partner dancing in common styles of social dance. Styles for each course will be specific to instructor expertise.

Terms Typically Offered: Fall, Spring.

KINA 175 Snorkeling/Free Diving1 Credit

Introduction to snorkeling and free diving. Topics include how to handle the equipment and the physics involved in free diving. Takes basic snorkelers to an advanced level of knowledge, skills, and safety.

Terms Typically Offered: Fall, Spring.

KINA 180V Varsity Sport Participation1 Credit

Participation in a varsity sport for credit. Course focuses on countable athletic-related activities, rules associated with sport, and maintenance of physical health.

Terms Typically Offered: Fall, Spring.

KINA 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

KINA 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Land Surveying (SURV)

SURV 100 Introduction to Surveying/Field Work3 Credits

Introduction to the common surveying units, the theory of significant figures, the basic theory of errors, and the use of surveying field notes. Topics also include the instrumentation and methodologies of measuring the common surveying units, such as differences in elevation, distances, angles, bearings, and azimuths.

Prerequisites: MATH 113 or higher.

Corequisites: SURV 102.

Terms Typically Offered: Fall, Spring, Summer.

SURV 102 Surveying Calculations I4 Credits

Fundamental mathematical calculations and theories associated with measuring techniques taught in SURV 100 in order to calculate the horizontal and vertical relationship between points, lines, and areas based on plane geometry.

Prerequisites: MATH 113 or higher.

Corequisites: SURV 100.

Terms Typically Offered: Fall, Spring.

SURV 195 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SURV 200 Advanced Surveying Field Work3 Credits

Use of total station and robotic equipment, global positioning system (GPS) equipment, methods of construction staking, overall concepts of GPS, mapping surveys, mapping in general, photogrammetry, and an introduction to GIS.

Prerequisites: SURV 100 and SURV 102.

Corequisites: SURV 205.

Terms Typically Offered: Fall, Spring, Summer.

SURV 203 Legal Aspects of Surveying3 Credits

Introduction to the concepts of boundary control and legal principles. Topics include rights in land, Public Land System of Surveys, metes and bounds surveys, proportionate measurement, junior/senior title rights, retracement of original surveys, deed first/survey first, common and case law, ranking/prioritizing evidence, controlling monuments and corners, errors in legal descriptions and plats, record research, and case studies.

Corequisites: SURV 204.

Terms Typically Offered: Fall, Spring.

SURV 204 Real Property Descriptions2 Credits

Reading, writing, and interpreting property descriptions to be consistent with boundary law principles. Several areas of boundary law are reviewed, with an emphasis on the written legal documents that describe those properties.

Corequisites: SURV 203.

Terms Typically Offered: Fall, Spring.

SURV 205 Advanced Surveying Computations/Calculations4 Credits

Review of horizontal curve concepts and calculations followed by advanced skills development. Topics include vertical curve calculations, volume calculations, an introduction to the concepts of least squares adjustments, an overview of astronomical observations, an introduction of control surveys and geodetic reductions, and an introduction of state plane coordinates and other map projections.

Prerequisites: SURV 100 and SURV 102.

Corequisites: SURV 200.

Terms Typically Offered: Fall, Spring.

SURV 206 Property Law - Boundary Evidence3 Credits

Select topics of evidence and procedures for boundary location. Presents an introduction to the Public Land Survey System (Rectangular Survey System) of surveys used in the United States. Reviews Colorado Revised Statutes related to surveying and the Architects, Engineers, and Surveyor's Board Rules (AES Board Rules).

Prerequisites: SURV 203 and SURV 204.

Terms Typically Offered: Fall, Spring.

SURV 207 Surveying Ethics: An Overview of Ethical Expectations2 Credits

Overview of the ethical standards of the Professional Land Surveyor and insight into the numerous ethical choices faced by the Professional Land Surveyor.

Terms Typically Offered: Fall, Spring, Summer.

SURV 298 Internship/Capstone Project4 Credits

Demonstrated proficiency in the required surveying-specific knowledge to pass the Colorado exams through an internship and delivery of a capstone project on a mutually agreed upon topic.

Prerequisites: SURV 100, SURV 102, SURV 200, SURV 203, SURV 204, SURV 205, SURV 206, SURV 207, STAT 200, MATH 130, and one of the following: MATH 141, MATH 121, MATH 135, MATH 146, or MATH 151.

Terms Typically Offered: Fall, Spring, Summer.

Machining/Manufacturing (MAMT)

MAMT 101 Introduction to Manufacturing2 Credits

The course is designed to give the student a broad overview of the world of manufacturing. The course will include people, materials, machines, design, organization, waste, quality, and other subjects which effect society and production of a product.

MAMT 102 Machining Fundamentals1 Credit

Concentrated unit dealing with speeds and feeds of machines, materials, tooling, tapping, boring, and manufacturing processes.

Fees: Yes.

MAMT 105 Print Reading and Sketching2 Credits

Reading of blueprints and process sheets as used in industry, application of that information to various manufacturing processes.

MAMT 106 Geometric Tolerancing2 Credits

Identification, interpretation, and application of the blueprint symbols (referred to as Geometric Tolerancing symbols) in machining and inspection operations.

MAMT 110 Gauging and Measuring Tools1 Credit

Uses and techniques of inspection including micrometers, Vernier scales, instruments, hole gauges in surface plate work, finish of parts and overall inspection techniques.

Prerequisites: MAMT 106 or permission of instructor.

MAMT 115 Introduction to Machine Shop3 Credits

Safety procedures: using bench tools, layout tools, power saws, and taps; sharpening general purpose drills, grinding lathe bits; and identifying and operating basic machines such as the bench grinder, drill press, band saw, and others. One hour lecture and three hours laboratory per week.

Fees: Yes.

MAMT 120 Machine Technology I4 Credits

Operation of engine lathes, milling machines and surface grinders. One hour lecture and five hours laboratory per week.

Prerequisites: Permission of instructor.

Fees: Yes.

MAMT 125 Machine Technology II4 Credits

Further development of skills acquired in MAMT 120. Emphasis will be placed on technical aspects of tooling and machining tolerances. One hour lecture and five hours laboratory per week.

Fees: Yes.

MAMT 135 Job Shop Machining I3 Credits

Production of machined parts from a shop blueprint, writing process sheets, and estimating machine time. Machining of parts may involve one or more machine operations. Machine time, paperwork, inspection, and accuracy will be emphasized. One hour lecture and three hours laboratory per week.

Prerequisites: Permission of instructor.

Fees: Yes.

MAMT 145 Machine Maintenance2 Credits

Maintaining, lubricating, and repairing machinery including making gib adjustments, selecting and using proper lubricants and selecting or manufacturing parts of making repairs with emphasis on workmanship and inspection. One hour lecture, one and one-half hours laboratory per week.

Prerequisites: Permission of instructor.

Fees: Yes.

MAMT 148 CNC Applications3 Credits

Introduction to Computer Numerical Control (CNC) programming basics, CAM software, and tooling used in today's manufacturing CNC milling machines and CNC lathes.

Prerequisites: MAMT 115.

Terms Typically Offered: Fall, Spring.

MAMT 150 Introduction to Numerical Control1 Credit

Numerical control/computerized numerical control machining, its advantages and how it operates. The course is designed as an informational unit for customized pre-employment training.

MAMT 170 Practical Applications3 Credits

Students will gain a working knowledge in manufacturing through Co-op, internship, work experience or required lab work in industrial study if outside work cannot be acquired.

Prerequisites: Permission of instructor.

MAMT 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MAMT 207 Introduction to Statistical Process Control2 Credits

Introduction to the philosophical and economic bases for statistical process control and its use; mathematical and nonmathematical SPC techniques with emphasis on application.

MAMT 230 Machine Technology III4 Credits

Exploration of advanced machine operations including O.D. grinding, cutter tool grinding, gear cutting, indexing, and rotary table work with an emphasis on workmanship, accuracy, and inspection.

MAMT 240 Job Shop Machining II3 Credits

Comprehensive capstone course utilizing all the machine tools in the machining laboratory. Further development of writing process sheets, estimating machine time, and performing final inspections on finished projects. Development of prototypes and reverse-engineering concepts using CNC machine tools and 3D printers. Final design presentation and written report.

MAMT 250 Process Systems Technology2 Credits

Advanced concepts of the philosophical and economic bases for statistical process control and its uses; mathematical and non-mathematical SPC techniques with emphasis of application.

Corequisites: MAMT 250L.

MAMT 250L Process Systems Technology Laboratory2 Credits

Advanced concepts of the philosophical and economic bases for statistical process control and its uses; mathematical and non-mathematical SPC techniques with emphasis of application.

Corequisites: MAMT 250.

MAMT 251 CNC Machining I3 Credits

Exploration of computerized numerical control machining operations, including control of functions, programming format, CNC machining setup and operation.

MAMT 255 CNC Machining II3 Credits

Further development of concepts introduced in MAMT 251. Emphasis of advanced operations of CNC machine tools.

MAMT 260 Properties of Materials3 Credits

Exploration of the processes of smelting and refining various types of metals. Discussions and demonstrations on heat-treatment, hardness testing and molecular manipulation of metals.

MAMT 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MAMT 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Management (MANG)

MANG 121 Human Relations In Business3 Credits

Human side of organizations: morale, motivation, human needs, minorities as working partners, leadership styles, organizational environment, and other human forces having an impact on business structures.

MANG 201 Principles of Management3 Credits

Management as the process of achieving organizational goals or objectives by and through others. Emphasizes functions performed by managers and how they are influenced by forces both within and outside the organization. Managers' use of resources will be investigated.

Terms Typically Offered: Fall, Spring, Summer.

MANG 201A Principles of Management : Part 1 of 31 Credit

Introduction to the activities of management and decision making in the global environment, with an emphasis on leadership and managing change and innovation.

MANG 201B Principles of Management: Part 2 of 31 Credit

Introduction to management planning, goal setting, organizing, human resources, teams, and organizational behavior.

MANG 201C Principles of Management: Part 3 of 31 Credit

Introduction to management control, quality, the role of information technology, and electronic business.

MANG 221 Supervisory Concepts and Practices3 Credits

For practicing or potential supervisors and managers who hold or will hold first-line to middle-level management positions. Focuses on the management functions of planning, organizing, staffing, directing, and controlling and their relation to the daily job of the supervisor.

MANG 242 Intro to The Point: Experiential Management I3 Credits

Introduction to experiential management through operation of The Point, CMU's student run bar and pub. The class offers hands on experience applying the principles of developing/operating a functioning business. Students assist in tracking and analyzing records of a student-run business. Class combines application theory and practical experience to effect positive change. All students must work paid shifts in the business.

Terms Typically Offered: Fall, Spring.

MANG 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MANG 299 Internship3-6 Credits

Practical workplace experience under the joint supervision of the employer and the internship coordinator. Designed for business majors working in the business environment.

Prerequisites: ACCT 201 and BUGB 211.

Course may be taken multiple times up to maximum of 6 credit hours.

MANG 301 Organizational Behavior3 Credits

Human behavior, its causes and effects in organizational settings. Description of and development of an understanding of human behavior in such settings.

Prerequisites: MANG 201 or permission of instructor.

MANG 370 Leadership3 Credits

Review of current leadership literature with an emphasis in application and skill building.

Prerequisites: MANG 201.

Terms Typically Offered: Fall, Spring.

MANG 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MANG 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MANG 401 Strategic Consulting3 Credits

Students are placed in the role of consultant for an area business furnishing management assistance to the small business community. Businesses benefit from the insight of student recommendations. Provides students practical training, supplementing academic theory by handling problems in a real business environment.

Prerequisites: Permission of instructor.

MANG 402 Advanced Problems in Small Business Operations II6 Credits

Continuation of MANG 401.

Prerequisites: Permission of instructor. (Not necessary to complete MANG 401 before MANG 402.)

MANG 410 Effective Workplace Communication3 Credits

Application of communication methods including: personal selling, negotiation, interviewing, and individual and group presentations. Emphasis placed upon application of effective practices used in communicating in today's business world.

Prerequisites: Junior or senior standing, or permission of instructor.

MANG 421 Credit and Collection Management3 Credits

Consumer and commercial credit in relationship to the management of credit by business firms, legal aspects of credit extension, and current legislation. Information on credit operations of business for both students of business and practicing businessmen.

Prerequisites: ACCT 202, MANG 201 or permission of instructor.

MANG 442 Experiential Management: Student Run Business3 Credits

Principles of developing/operating a functioning business. Track and analyze records of a student-run business. Analyze data, apply theory and practical experience to effect positive change. Work with CMU administration and government regulators to assure rules and regulations followed.

Prerequisites: Permission of instructor.

MANG 451 Career Research and Development3 Credits

Principles and techniques involved in a job search with emphasis on conducting career research, identification of goals, preparing a job campaign, and elements of a job interview. Preparation of a job kit including a prospect list, resume, cover letter, advertisements, prospect letters, and sales and follow-up letters which can be used in a job search.

Prerequisites: Senior standing or permission of instructor.

MANG 471 Operations Management3 Credits

The use of resources in producing goods and services; concepts of planning, scheduling, and controlling productive activities and physical resources.

Prerequisites: FINA 301 and senior standing.

MANG 491 Business Strategy3 Credits

Duties and responsibilities of decision makers in analyzing the organization, its operating environment and the subsequent development of objectives, policies, and long term planning for organizations. Includes complex cases taken from actual experiences in situations involving analysis, planning, and decision making.

Prerequisites: ACCT 201, ACCT 202, BUGB 231, FINA 301, MANG 201, MARK 231, and senior standing.

Terms Typically Offered: Fall, Spring.

MANG 495 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MANG 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MANG 499 Internship1-9 Credits

Provides BBA students with an opportunity to learn more about management functions and activities through exposure to an actual business or agency environment. Observation and participation in management activities enable students to relate classroom theory to on-the-job experiences.

Prerequisites: BBA major, second semester junior or senior, written permission of instructor prior to registration. Course may be taken multiple times up to maximum of 15 credit hours.

MANG 500 Advanced Management Theory3 Credits

Designed to advance the student's understanding of management theories and the application of these theories to the business world. Contemporary issues will be discussed.

MANG 501 Operations Management3 Credits

Competitive strategies and strategic impact of the transformation process in a global economy. Operations management issues including quality, inventory management, management of technology, manufacturing planning and control, just-in-time manufacturing and optimized production technology. Impact of business system on productivity and profits.

MANG 510 Leading Organizations3 Credits

Designed to encourage the application of diverse conceptual and theoretical perspectives to the analysis and control of behavior in organizations. Practice in diagnosing organizational problems is gained by combining the use of theories, texts, readings, cases and exercise. The course focuses on problems related to perception, motivation, leadership, cultural diversity, interpersonal and group conflict, stress, work-family conflict, influence, decision-making, ethics, international management issues and change.

MANG 540 Advanced Quantitative Methods3 Credits

Analytical models to support decision making. Topics include linear optimization, sensitivity analysis, linear regression, decision making under uncertainty, decision making under risk, project management, transportation and assignment methods, and forecasting.

MANG 590 Business Strategy3 Credits

The capstone course in the MBA program. The purpose of this course is to develop an understanding of strategic management and the "how" and "why" of strategic decisions. Emphasis is also placed on how the manager goes about translating strategy into action and achieves integration in the organization. Integration involves the functional areas of management and how to balance the trade-offs from the perspective of strategic decision making at the top management level.

Prerequisites: Permission of instructor.

Marketing (MARK)

MARK 231 Principles of Marketing3 Credits

Use and development of marketing strategy and the effects of buyer motivation. Major functions of marketing, buying, selling, distribution, pricing, advertising, and storage are studied. A contrast is made between the two marketing institutions: wholesaling and retailing.

MARK 325 Consumer Behavior3 Credits

Overview of the processes involved when individuals or groups select, purchase, use or dispose of products and services to satisfy needs and desires.

Prerequisites: MARK 231.

MARK 332 Promotion3 Credits

Overview of the many ways in which goods, services, and ideas can be promoted to consumers and businesses through advertising, public relations, and publicity.

Prerequisites: MARK 231.

MARK 335 Sales and Sales Management3 Credits

The salesperson as a counselor whose role is to help buyers make better decisions. Professional salesmanship is recognized as an integral function in modern society, with basic sales techniques studied and practiced in sales presentations. The course is taught from a management perspective.

Prerequisites: MARK 231.

MARK 340 Creating Marketing Materials3 Credits

Overview and process development for creating marketing materials for all supply chain stakeholders. Development and analysis of multi-faceted levels of business marketing.

Prerequisites: MARK 231.

MARK 350 Marketing Research3 Credits

Marketing research theory and techniques designed to educate the student in the use of the scientific method, development of analytical ability, presentation of basic marketing research tools, and proficiency in the art of writing research reports. Includes cases and actual research projects.

Prerequisites: CISB 241 or STAT 241; and MARK 231.

Terms Typically Offered: Fall, Spring.

MARK 360 Services Marketing3 Credits

Application of marketing concepts and strategies for addressing marketing problems and opportunities in the service sector (Finance, Hospitality, and Healthcare).

Prerequisites: MARK 231, MARK 350, or permission of instructor. Course will utilize case problems and an actual research project.

MARK 375 Digital Marketing3 Credits

Examination of digital marketing strategy through various digital channels and platforms. The course provides students with knowledge on how to develop an integrated digital marketing strategy, including formulation, implementation, and evaluation.

Prerequisites: MARK 231.

Terms Typically Offered: Fall, Spring.

MARK 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MARK 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MARK 402 Sport Marketing3 Credits

The application of the principles of promotion and marketing to the sport and fitness industry including the areas of professional sports, corporate fitness, college/high school athletics, clubs and resorts, and others.

Prerequisites: MARK 231.

MARK 432 Advanced Marketing3 Credits

In-depth complex marketing problems confronting modern businesses. Development of marketing strategy to allow a firm to progress toward its corporate objectives.

Prerequisites: CISB 241 or STAT 241; and MARK 231.

Terms Typically Offered: Fall, Spring.

MARK 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MARK 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MARK 500 Marketing Strategy3 Credits

Examines the state-of-the-art in marketing strategy from both a practical and theoretical perspective. Focusing on integrating a broad range of marketing concepts, the emphasis is on setting realistic marketing objectives, understanding marketing research concepts, demographic market segmentation, and current marketing topics.

Mass Communications (MASS)

MASS 110 Mass Media: Impact and History-GTAH23 Credits

Investigation of the role played by media in everyday life and media's social, economic, and historical influence on society.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

MASS 140 Media Theory Introduction3 Credits

Introduction to theories of Mass Communication. Exploration of theory constructs, audience research, effects of emerging media and technologies, and message content.

Prerequisites: MASS 110.

Terms Typically Offered: Fall, Spring.

MASS 144 Multimedia Storytelling3 Credits

Journalism-based techniques and methods for modern storytelling of accurately written information through the use of the internet, video, and audio.

Prerequisites: MASS 110.

Terms Typically Offered: Fall, Spring.

MASS 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MASS 213 Introduction to Media Writing and Reporting3 Credits

Fundamentals of news gathering and reporting through a variety of media. Exploration of ethical and legal aspects of journalistic endeavors.

Prerequisites: MASS 140.

Terms Typically Offered: Fall, Spring.

MASS 251 Mass Media: Advertising and Promotions3 Credits

Principles of media advertising and promotions. Considers research, analysis, strategy, advertising barriers, design, and perspective.

Terms Typically Offered: Fall.

MASS 261 Audio Announcing and Production3 Credits

Exploration of the art and science of announcing for media and the importance and use of the spoken word in persuasive messages.

Creation and execution of programs and formats for audio source distribution both traditional and emerging.

Prerequisites: MASS 140.

Terms Typically Offered: Fall.

MASS 271 Video Production3 Credits

Fundamentals of electronic field production and non-linear editing with hands-on experience with broadcast-quality equipment. Creation and execution of productions involving videography, scripting, graphic layout, and editing.

Terms Typically Offered: Fall, Spring.

MASS 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MASS 310 Media Law and Ethics3 Credits

Ethical principles and laws affecting media. Includes study and application of ethics and laws involved in print, broadcasting, and emerging media.

Prerequisites: MASS 213.

Terms Typically Offered: Fall, Spring.

MASS 313 Broadcast Journalism Reporting3 Credits

Introduction to broadcast writing styles and history. Specific applications for radio, television, and internet. Emphasis on formatting, newsgathering, interviewing, and researching.

Prerequisites: MASS 213.

Terms Typically Offered: Spring.

MASS 315A Specialized Writing for Media: Science3 Credits

Specialized writing about science for various media platforms.

Prerequisites: MASS 213.

MASS 315B Specialized Writing for Media: Sports3 Credits

Specialized writing about sports for various media platforms.

Prerequisites: MASS 213.

MASS 315C Specialized Writing for Media: Health3 Credits

Specialized writing about health for various media platforms.

Prerequisites: MASS 213.

MASS 315D Specialized Writing for Media: Crime3 Credits

Specialized writing about crime for various media platforms.

Prerequisites: MASS 213.

MASS 315E Specialized Writing for Media: Arts Journalism3 Credits

Specialized writing about the arts for various media platforms. Subjects include: theory and creation of art critiques, fluency in a broad range of arts journalism contexts, and the law and ethics of arts journalism.

Prerequisites: MASS 213.

Terms Typically Offered: Fall.

MASS 317 Writing Opinion for Impact3 Credits

Persuasive and insightful writing. Subjects include public issues, supporting beliefs, analysis, and documentation for targeted audiences through broadcast, print, and internet/web.

Prerequisites: MASS 213.

Terms Typically Offered: Fall.

MASS 342 Photojournalism I3 Credits

Fundamentals of camera techniques, qualities of print and digital images, history and ethics of photojournalism, uses of software in image acquisition and use, and development of esthetic values.

Terms Typically Offered: Fall.

MASS 350 Public Relations Concepts3 Credits

Historical and theoretical approach to contemporary public relations with emphasis on the persuasion process and ethics, propaganda, and advertising techniques in mass media.

Prerequisites: MASS 213.

MASS 352 Print Design and Production for Editors3 Credits

Various essential processes and duties editors face in preparing articles, graphics, and photos for print publication - including digital design and pre-press, typography, press-ready PDFs, CMYK offset printing, writing headlines and cutlines, and meeting all expectations in the printed final product. Adobe InDesign also is introduced and utilized.

Prerequisites: MASS 213.

MASS 357 Documentary and News Producing3 Credits

Creation of multimedia content for students to develop their skills as producers, researchers, interviewers, writers, and videographers, as well as on-camera and voice talent. The focus of study will be on analyzing and practicing the aesthetic and technical elements of documentary and news content in order to create original stories for broadcast, print, and web.

Prerequisites: MASS 271.

Terms Typically Offered: Spring.

MASS 372 TV Studio Production3 Credits

Combination of multi-camera studio and electronic field productions. Includes videography, live-editing, non-linear editing, graphic creation, audio manipulation, and script writing, culminating in broadcast-quality programming.

Terms Typically Offered: Fall.

MASS 387 Structured Research1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MASS 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MASS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MASS 397 Practicum1 Credit

Practical experience with student media outlets under faculty advisor supervision or with CMU Sports Information. Practicum coordinator must be consulted in first week of term.

Prerequisites: MASS 140 and MASS 144 or permission of instructor. Course may be taken multiple times up to maximum of 10 credit hours.

MASS 415 Advanced Media Writing and Reporting3 Credits

In-depth journalism writing and reporting course. Focuses on the development of long-form journalism pieces, including magazine features, public affairs reporting, news analysis, and news investigations using public records and interviews. Emphasis on fair and accurate reporting and writing under deadline, with critical attention paid to law and ethics.

Prerequisites: MASS 213.

Terms Typically Offered: Spring.

MASS 417 Writing for Public Relations and Advertising3 Credits

Copywriting function in public relations and advertising for organizations and agencies.

Prerequisites: MASS 213.

Terms Typically Offered: Spring.

MASS 441 Emerging Media3 Credits

Experimentation with tools, techniques, and concepts of social and new media resulting in the creation of online content.

Terms Typically Offered: Fall, Spring.

MASS 442 Photojournalism II3 Credits

Advanced skills to capture and edit images to high aesthetic values, professionalism, news photography, photo illustration, creation of image portfolios for public display or potential employers, and use of image management software.

Prerequisites: MASS 342.

Terms Typically Offered: Spring.

MASS 450 Public Relations Campaigns3 Credits

Survey of campaigns and case histories representing the scope of public relations (PR), research methodology, and audience targeting. Practical application of PR theory.

Prerequisites: MASS 213.

Terms Typically Offered: Spring.

MASS 452 Designing for Brand and Message3 Credits

Publication of attractive and effective content. Includes designing print materials, such as company newsletters, logos, brochures, magazines, as well as electronic publishing.

Terms Typically Offered: Spring.

MASS 471 Advanced Video Production3 Credits

Aesthetic values of electronic field productions and post-production projects. Builds upon concepts and skills acquired in MASS 271 to create and execute high quality video and creative productions for air and/or web use.

Prerequisites: MASS 271.

Terms Typically Offered: Spring.

MASS 494 Seminar: Advanced Theory and Research3 Credits

Capstone course. Examination and exploration of mass communication theories. Focus on research and its importance to media disciplines and industries.

Prerequisites: MASS 213.

Terms Typically Offered: Fall, Spring.

MASS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MASS 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MASS 497 Practicum1 Credit

Practical experience with student media outlets under faculty advisor supervision or with CMU Sports Information. Practicum coordinator must be consulted in first week of term.

Prerequisites: MASS 397 or permission of instructor.

Course may be taken 10 times for credit.

MASS 498 Senior Project Portfolio1 Credit

Identification and preparation of projects that highlight mass communication skills, abilities, talents, and applications.

Prerequisites: MASS 213 and MASS 397.

Terms Typically Offered: Fall, Spring.

MASS 499 Internship1-12 Credits

Work in media industry positions.

Prerequisites: MASS 213, MASS 310, and at least junior standing with at least half of major requirements completed.

Course may be taken multiple times up to maximum of 15 credit hours.

Math - Foundations (MATC)

MATC 090 Foundations of Math2 Credits

Development of mathematical thinking skills, basic algebraic skills, as well as everyday life math skills. Mathematical literacy concepts and skills are developed through practical applications. Technology and calculator usage are integrated into the course.

Terms Typically Offered: Fall, Spring, Summer.

MATC 092 Foundations of Algebra4 Credits

Foundations of algebra with a review of basic arithmetic. Includes decimals, fractions, percentages, ratios, proportions, signed numbers, algebraic expressions, factoring, exponents and radicals, linear equations, functions and graphs. Also includes properties of real and complex numbers, laws of exponents and radicals, factoring polynomials, solving linear and quadratic equations and inequalities, rational expressions, complex fractions, functions, and relations.

Prerequisites: Appropriate math placement test score.

Terms Typically Offered: Fall, Spring, Summer.

MATC 096 Topics:1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Mathematics (MATH)

MATH 101 Review in Mathematics1 Credit

Review of mathematical concepts and computations. Content will vary, but topics will be chosen in each case to prepare students for a specific subsequent course.

Terms Typically Offered: Fall.

MATH 105 Elements of Mathematics I3 Credits

Mathematics for the prospective elementary teacher with an emphasis on mathematical reasoning and processes. Topics include problem solving, set theory, number theory, numeration systems, the integers, and rational numbers.

Prerequisites: Appropriate mathematics placement test score and interview, and permission of instructor.

Terms Typically Offered: Fall, Spring.

MATH 107 Career Math3 Credits

Covers material designed for career technical or general studies students who need to study particular mathematical topics. Topics include measurement, algebra, geometry, trigonometry, graphs, and/or finance. These are presented on an introductory level and the emphasis is on applications.

MATH 108 Technical Mathematics4 Credits

Covers material designed for career technical or general studies students who need to study particular mathematical topics. Topics may include measurement, algebra, geometry, trigonometry, graphs, and/or finance. These are presented on an introductory level and the emphasis is on applications.

MATH 110 Mathematical Investigations-GTMA13 Credits

Investigations into mathematical concepts approached through the lens of real-world applications and projects. Specific content includes problem solving, mathematical models, financial mathematics, set theory, logic, probability, descriptive statistics, and the appropriate use of technology.

Prerequisites: MATC 090 or equivalent or appropriate mathematics placement test score.

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

MATH 113 College Algebra-GTMA14 Credits

Approach to algebra with an emphasis on functions, modeling, and applications. Topics include properties and graphs of linear, polynomial, rational, exponential, logarithmic, and inverse functions; solving equations, inequalities and systems of linear equations; interpreting data and graphs. Technology tools will be utilized in addition to analytical methods.

Prerequisites: MATC 092 or equivalent, or appropriate mathematics placement test score.

Equivalent Course(s): MATH 113R

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

MATH 113R College Algebra with Review5 Credits

Approach to algebra with an emphasis on functions, modeling, and applications. Topics include properties and graphs of linear, polynomial, rational, exponential, logarithmic, and inverse functions; solving equations, inequalities and systems of linear equations; interpreting data and graphs. Technology tools will be utilized in addition to analytical methods. Review and practice of necessary skills and concepts will be incorporated throughout.

Prerequisites: Appropriate mathematics placement test score and GPA, or MATC 092.

Equivalent Course(s): MATH 113

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed

Terms Typically Offered: Fall, Spring.

MATH 119 Precalculus Mathematics-GTMA15 Credits

In-depth treatment of the mathematics essential to Calculus. Topics include linear, polynomial, rational, exponential, logarithmic, inverse, and trigonometric functions.

Prerequisites: Appropriate mathematics placement test score.

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

MATH 119A Algebra for Calculus4 Credits

In-depth treatment of the algebra essential to Calculus. Topics include the algebraic and graphical properties of linear, polynomial, rational, exponential, logarithmic, and inverse functions. This course is the first course in a two-semester sequence (MATH 119A/MATH 119B) equivalent to MATH 119.

Prerequisites: Appropriate mathematics placement test score.

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed

Terms Typically Offered: Fall, Spring, Summer.

MATH 119B Trigonometry for Calculus3 Credits

In-depth treatment of the trigonometry essential to Calculus, incorporating a selection of algebraic concepts. This is the second course in a two-semester sequence (MATH 119A/MATH 119B) equivalent to MATH 119.

Prerequisites: MATH 119A.

Terms Typically Offered: Fall, Spring, Summer.

MATH 121 Calculus for Business3 Credits

An introduction to calculus with an emphasis on applications to business and economics. Topics include linear and quadratic functions, limits, continuity, differentiation, integration, the logarithmic and exponential functions, and applications. Computer algebra systems will be used where applicable. Current college algebra skills and graphic calculator are required.

Prerequisites: MATH 113 or equivalent, or appropriate mathematics placement test score.

MATH 130 Trigonometry3 Credits

College-level treatment of trigonometry. Topics include the Cartesian plane, functions, inverse functions, the circular function, trigonometric functions, graphs of trigonometric functions, trigonometric identities, solving trigonometric equations, inverse trigonometric functions, triangle solution techniques, and vectors.

Prerequisites: MATH 113 or appropriate mathematics placement test score.

Terms Typically Offered: Fall, Spring.

MATH 131 Applied Calculus4 Credits

Introduction to fundamental concepts and techniques of calculus with an emphasis on modeling and applications. Topics include algebraic, periodic, exponential, and logarithmic functions and their graphs; notions of limits, continuity, rates of change, and accumulated change; differentiation; and integration.

Prerequisites: MATH 113 or appropriate placement test score.

Terms Typically Offered: Spring.

MATH 135 Engineering Calculus I4 Credits

Introduction to differentiation and integration of functions of a single variable. Emphasis on computational aspects. Includes functions, limits, continuity, differentiation, related rates, optimization, graphing, integration, and volumes.

Prerequisites: MATH 119, or MATH 119A and MATH 119B, or appropriate mathematics placement score.

Terms Typically Offered: Fall, Spring, Summer.

MATH 136 Engineering Calculus II4 Credits

Continuation of MATH 135 Engineering Calculus I. Emphasis on computational aspects. Includes techniques of integration; trigonometric and hyperbolic functions; inverse, logarithmic, and exponential functions; sequences and series; polar coordinates; and parametric equations.

Prerequisites: MATH 135 or MATH 151.

Terms Typically Offered: Fall, Spring.

MATH 141 Analytical Geometry3 Credits

A college-level treatment of analytic geometry. Topics include Cartesian coordinate systems, distance, parallel and perpendicular lines and planes, the locus of a condition, generalizations of lines, planes and parabolas, polar coordinates and vectors in two and three dimensions.

Prerequisites: MATH 130 or permission of instructor.

MATH 146 Calculus for Biological Sciences5 Credits

An introduction to calculus with an emphasis on applications to biology. Topics include functions, properties and graphs of polynomials, rational functions, the trigonometric, inverse, exponential and logarithmic functions, limits, continuity, differentiation, related rates, min-max problems, integration and applications of biology.

Prerequisites: MATH 113 or permission of instructor.

MATH 147 Introduction to Computer Algebra Systems1 Credit

Introduction to computer algebra using an appropriate computer algebra system (CAS) such as Maple, Mathematica, Derive, etc. Topics will include the syntax and simple programming of the CAS used. Assignments and projects will emphasize applications in Calculus.

Prerequisites: MATH 119.

Corequisites: MATH 151.

MATH 149 Honors Mathematics-GTMA13 Credits

An in-depth exploration of mathematical concepts, with an emphasis on the process of mathematical discovery. Topics are left to the discretion of the instructor, and typically include an introduction to more advanced topics such as group theory or graph theory. This course fulfills the essential learning requirement for students in the Honors Program.

Prerequisites: Permission of instructor.

MATH 150 Topics and Careers in Mathematics1 Credit

Introduction to the nature of mathematical thinking. Advanced topics and applications of mathematics and statistics will be presented at an introductory level. Career options will be investigated.

Prerequisites: MATH 151 or MATH 135 or MATH 131 (any of these courses may be taken concurrently with MATH 150).

Terms Typically Offered: Fall, Spring.

MATH 151 Calculus I-GT-MA15 Credits

Introduction to differentiation and integration of functions of a single variable. Topics include functions, limits, continuity, differentiation, related rates, optimization, graphing, integration, and volumes.

Prerequisites: MATH 119, or MATH 119A and MATH 119B, or appropriate mathematics placement test score.

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

MATH 152 Calculus II5 Credits

Continuation of MATH 151 Calculus I. Topics include techniques of integration; trigonometric and hyperbolic functions; inverse, logarithmic, and exponential functions; sequences and series; polar coordinates; and parametric equations.

Prerequisites: MATH 151.

Terms Typically Offered: Fall, Spring.

MATH 196 Topics1-5 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MATH 205 Elements of Mathematics II-GTMA13 Credits

Continuation of MATH 105 designed for the prospective elementary teacher. Topics include algebraic methods, measurement, decimal numbers, statistics, geometry, and the metric system.

Prerequisites: MATH 105.

Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

MATH 215 Technology for Mathematics Educators3 Credits

Introduction to technology resources appropriate for mathematics educators. Focus is on using spreadsheets to program problem-solving algorithms, mathematical models, and data manipulation. Additional technologies and topics include interactive geometry software, interactive applets, simple webpage design, block-based languages, and educational simulations and games.

Prerequisites: MATH 113 and MATH 205.

Terms Typically Offered: Spring.

MATH 225 Computational Linear Algebra3 Credits

Computational approach to systems of equations, vector spaces, matrices, matrix transformations, subspaces of \mathbb{R}^n , eigenvalues, as well as their applications. Software for linear algebra computations is introduced and utilized.

Prerequisites: MATH 151 or MATH 135 or MATH 131.

Terms Typically Offered: Spring.

MATH 236 Differential Equations and Linear Algebra4 Credits

Introduction to ordinary differential equations and linear algebra. Topics covered include ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, and systems of linear differential equations.

Prerequisites: MATH 152 or MATH 136.

Terms Typically Offered: Fall, Spring.

MATH 240 Introduction to Advanced Mathematics4 Credits

Introduction to writing mathematical proofs that provides students with a transition from computation-based lower-level courses to proof-based upper-level courses. Topics include introductory logic, set theory, relations, functions, induction, equivalence relations, and partitions. Emphasis is on constructing and analyzing rigorous mathematical proofs.

Prerequisites: MATH 152.

Terms Typically Offered: Fall, Spring.

MATH 253 Calculus III4 Credits

Introduction to multivariable calculus. Topics include three-dimensional space, vectors, functions of several variables, partial derivatives, directional derivatives, multiple integrals, vector fields, and the integral theorems of vector calculus.

Prerequisites: MATH 136 or MATH 152.

Terms Typically Offered: Fall, Spring.

MATH 260 Differential Equations3 Credits

Techniques of solving first and second order differential equations, linear differential equations, and non-homogeneous differential equations, including variation of parameters, series solutions, and Laplace transform methods.

Prerequisites: MATH 152 or MATH 136.

Terms Typically Offered: Spring.

MATH 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MATH 301 Mathematics for Elementary Teachers3 Credits

Selection of mathematics topics addressing content and standards for elementary education including problem solving, probability, mathematical standards and current research, technology, and additional review topics. Strong emphasis on written and oral communication.

Prerequisites: MATH 205 and formal acceptance into the Teacher Education Program.

Terms Typically Offered: Fall, Spring.

MATH 305 Discovering Geometry3 Credits

Development of Euclidean Geometry through exploration and inductive reasoning. Basic concepts of proofs are introduced. Topics include angles and shapes; constructions; perimeter, area, and volume; congruence and similarity conditions; symmetry and tessellations; and applications of technology. Intended for students seeking elementary teacher licensure.

Prerequisites: MATH 301.

Terms Typically Offered: Fall.

MATH 310 Number Theory3 Credits

Classical number theory including the fundamental theorem of arithmetic, congruences, and linear diophantine equations.

Prerequisites: MATH 240.

MATH 325 Linear Algebra3 Credits

Proof-based treatment of linear algebra. Topics include vector spaces, linear transformations, eigenvalues, and orthogonality.

Prerequisites: MATH 225 and MATH 240.

Terms Typically Offered: Fall.

MATH 340 Ethnomathematics3 Credits

Study of mathematics within cultures, especially small-scale indigenous cultures. Through the lens of culture, students can compare/contrast mathematics systems, their logical structures, and their modes of expression.

Prerequisites: MATH 240 or MATH 301 or permission of instructor.

MATH 352 Advanced Calculus3 Credits

Proof-based treatment of calculus of one real variable, with focus on axiomatic development. Topics include completeness of the real numbers, limits, continuity, derivatives, integrals, and the Fundamental Theorem of Calculus.

Prerequisites: MATH 240.

Terms Typically Offered: Spring.

MATH 360 Methods of Applied Mathematics3 Credits

Introduction to methods of applied analysis and mathematical physics. Topics include vector calculus, Sturm-Liouville problems, Fourier series, partial differential equations, series solutions of ordinary differential equations, and special functions.

Prerequisites: MATH 253, and MATH 236 or MATH 260.

Terms Typically Offered: Fall.

MATH 361 Numerical Analysis4 Credits

Introduction to the study of accuracy and efficiency of algorithms and numerical computation. Topics include computer representation of numbers, finite precision arithmetic, truncating errors, iteration processes, numerical solutions of algebraic and transcendental equations, systems of linear equations, Taylor polynomial approximation, interpolation, finite differences, numerical integration, and error analysis.

Prerequisites: MATH 152 or MATH 136.

Terms Typically Offered: Fall.

MATH 362 Fourier Analysis3 Credits

Introduction to continuous and discrete Fourier analysis. Topics include representation of signals as vectors, matrices, and functions; orthogonal expansions; Fourier series and frequency analysis; thresholding and compression; Fourier and inverse Fourier transforms; discrete and inverse discrete Fourier transforms; and cosine transforms.

Prerequisites: MATH 152 or MATH 136.

Terms Typically Offered: Fall.

MATH 365 Mathematical Modeling3 Credits

Bridge between calculus and the application of mathematics. Investigation of meaningful and practical problems encompassing the disciplines of mathematical sciences, operations research, engineering, management sciences and life sciences.

Prerequisites: MATH 136 or MATH 152, and one of the following: MATH 225, MATH 236, MATH 240, MATH 253, MATH 260, or STAT 200.

Terms Typically Offered: Spring.

MATH 366 Methods of Applied Mathematics II3 Credits

Treatment of numerical methods used to solve problems in applied mathematics. Topics include iteration; interpolation and cubic splines; numerical integration and differentiation; numerical linear algebra; and numerical solutions of ordinary and partial differential equations.

Prerequisites: MATH 360; and CSCI 110/CSCI 110L or CSCI 111 or CSCI 130 or CSCI 310.

Terms Typically Offered: Spring.

MATH 369 Discrete Structures I3 Credits

Elementary logic, induction, recursion, recurrence relations, sets, combinatorics, relations, functions, graphs, trees, and elementary abstract structures.

Prerequisites: MATH 152 or MATH 136; and CSCI 110/CSCI 110L or CSCI 111 or CSCI 130.

MATH 370 Discrete Structures II3 Credits

Applications of logic, Boolean algebra and computer logic, abstract structures, coding theory, finite-state machines, and computability.

Prerequisites: MATH 369 or both MATH 240 and CSCI 111.

MATH 380 History of Mathematics 3 Credits

History of mathematics from antiquity to the present with emphasis upon the development of mathematics concepts and the people involved.

Prerequisites: MATH 152.

MATH 386 Geometries 4 Credits

A study of Euclidean and non-Euclidean geometries. This course examines the differences in their axiom systems and their models, and how notions in Euclidean geometry are interpreted in non-Euclidean systems.

Prerequisites: MATH 240.

MATH 389 Explorations in Mathematics for Elementary Educators 2 Credits

Exploration of diverse topics and fields of mathematics to broaden the perspectives of future elementary educators. Exposure to and a deeper understanding of a wide variety of topics will be established through directed readings, explorations, and discussions.

Prerequisites: MATH 301.

Terms Typically Offered: Spring.

MATH 394 Mathematics Colloquium 1 Credit

A weekly series of talks on a wide range of contemporary mathematics will be given by local faculty and others. Students must provide written commentary on these talks.

Prerequisites: Permission of instructor.

MATH 395 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MATH 396 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MATH 397 Structured Research 1-4 Credits

Mathematical research under the direct guidance of a faculty member. Designed for junior and senior level students.

Prerequisites: Permission of instructor.

Course may be taken multiple times up to maximum of 12 credit hours.

MATH 420 Introduction to Topology 3 Credits

Introduction to point set topology. Topics include topological spaces, metric spaces, connectedness, compactness, the separation axioms, and the Tychonoff theorem.

Prerequisites: MATH 310 or MATH 325 or MATH 352.

MATH 430 Mathematical Logic 3 Credits

Introduction to the classical areas of mathematical logic (model theory, proof theory, the theory of computation, complexity theory, and set theory) and the relationships these sub-disciplines have with each other and with the foundations of mathematics, computational science, computer science, and the philosophy of mathematics.

Prerequisites: MATH 240 or MATH 369.

Terms Typically Offered: Fall.

MATH 450 Complex Variables 3 Credits

Algebra of complex numbers, analyticity, differentiation and integration of complex functions, Cauchy's integral formulae, and series.

Prerequisites: MATH 240.

MATH 452 Intro to Real Analysis I 3 Credits

Introduction to real analysis from a general metric space perspective. Topics may include point set topology, completeness, compactness, connected sets, sequences, limits of functions, continuity, differentiation, integration, and sequences of functions.

Prerequisites: MATH 352.

Terms Typically Offered: Fall.

MATH 453 Intro to Real Analysis II 3 Credits

Selected topics in advanced real analysis chosen by instructor.

Prerequisites: MATH 452.

MATH 460 Advanced Linear Algebra 3 Credits

Characteristics and minimal polynomial, Cayley-Hamilton Theorem, invariant subspaces, bilinear forms, primary decomposition theorem, dual vector spaces.

Prerequisites: MATH 325.

MATH 466 Methods of Applied Mathematics III 3 Credits

Exploration of advanced methods of applied mathematics, with an emphasis on extending basic methods and concepts, including modeling applied problems, determining analytical solutions, and implementing numerical methods. Specific content may vary but will typically include contemporary techniques in applied mathematics.

Prerequisites: MATH 366.

Terms Typically Offered: Fall.

MATH 484 Senior Seminar I 2 Credits

An introduction to conducting mathematical research with discussion of various research topics, including how to read and analyze articles in mathematics. Presentations and papers will be required.

Prerequisites: MATH 452 or MATH 490 or MATH 366 or STAT 350.

MATH 490 Abstract Algebra I 3 Credits

Introduction to the theory of algebraic structures. Topics include groups, subgroups, cyclic groups, groups of permutations, homomorphisms, isomorphisms, the order of group elements, cosets, quotient structures, isomorphism theorems and an introduction to rings and fields.

Prerequisites: MATH 310.

MATH 491 Abstract Algebra II 3 Credits

A continuation of MATH 490 Abstract Algebra I. Topics include properties of rings, subrings, ideals, quotient structures; ring homomorphisms and isomorphisms, integral domains, polynomial rings, properties of fields, subfields, field extensions, finite fields and Galois Theory.

Prerequisites: MATH 490.

MATH 492 Senior Capstone 3 Credits

Exploration and communication of mathematical ideas and problems relevant to individual mathematics concentrations by integrating and extending material covered in mathematics coursework. Investigations may also include placing mathematics in historical, applied, professional, and social contexts.

Prerequisites: Senior standing.

Terms Typically Offered: Fall.

MATH 495 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MATH 496 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MATH 500 Introduction to Graduate Studies in Applied Mathematics 3 Credits

Introduction to methods and concepts of applied mathematics, including differentiation and integration of single and multivariate functions, vector calculus methods, matrix-vector computations, vector space concepts, and mathematical proofs.

Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 510 Applied Probability and Statistics3 Credits

Develop a comprehension of, and an ability to perform, statistical methods that are most common in educational research. Emphases on statistical concepts that will further prepare teachers to teach introductory-level college statistics and critically examine and comprehend the data analysis in educational literature. Graphing calculators and computer software may be used to analyze and display data.

Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 520 Applied Numerical Methods3 Credits

Exploration of fundamental algorithms and analysis of numerical methods commonly used by scientists, engineers, and mathematicians to approximately solve mathematical problems that are analytically impossible or intractable.

Prerequisites: MATH 500.

MATH 530 Applied Mathematical Modeling3 Credits

Investigation of applications of mathematics in the natural and social sciences, involving continuous, discrete, and probabilistic models. Survey of historical applications of mathematics in fields including chemistry, engineering, finance, ecology, and management; and creation of new models to address current questions in these fields. Involves model creation and model selection, analytical and computational methods of solving a model, and presentation of original work in a seminar setting.

Prerequisites: MATH 500.

MATH 540 Applied Audio and Image Processing3 Credits

Investigation of the mathematics behind the processing of sound waves and digital images. Both theory and computer-based applications will be explored, using methods of calculus, matrix-vector algebra, and inner product spaces.

Prerequisites: MATH 500.

MATH 550 Mathematical Logic and Foundations in Mathematics3 Credits

Study of logical systems, formal languages, satisfaction, deduction, correctness, completeness, applications to algebraic structures and orderings, construction of ordinal and cardinal numbers within axiomatic set theory, models of computation, undecidability, computational complexity, intractability, and introduction to themes within the philosophy of mathematics.

Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 560 Applied Number Theory3 Credits

Applied treatment of number theory including prime numbers, congruences, quadratic residues and primitive roots.

Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 570 Applied Cryptography3 Credits

Exploration of cryptography. Topics include number theory, classical ciphers, integer factorization, primality testing, public-key ciphers, digital signatures schemes, commitment schemes, elliptic curve methods, and applications to e-commerce. Additional topics upon student interest.

Prerequisites: MATH 560.

MATH 596 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Medical Lab Technician (MLTP)

MLTP 101 Phlebotomy3 Credits

Orientation to the clinical lab areas and workflow. Emphasis on venipuncture and dermal collections. Skills necessary for limiting pre-analytic errors with sample collections and processing. Knowledge of POC testing, patient collection instructions, send out testing and informatics. Review of regulatory, ethical and legal issues, healthcare delivery system, certification and licensure, organ systems, basic medical terminology, infection prevention, and professionalism.

Corequisites: MLTP 102.

Fees: Yes.

MLTP 102 Applied Phlebotomy2 Credits

Clinical laboratory experience at an affiliated site. Application of knowledge and skills to venipuncture and dermal collections, sample processing, POC testing, patient collection instructions, send-out testing, informatics, OSHA practices and phlebotomist professionalism are included.

Corequisites: MLTP 101.

MLTP 105 Introduction to Medical Laboratory Technology3 Credits

Introduction to medical laboratory fundamentals. Medical laboratory organization, professional roles, ethics, regulatory agencies, safety, systems of measurement, basic equipment, quality assessment, computer applications, and automation topics included. Basic skills in laboratory math, medical terminology, and specimen collection and processing will be developed.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Fall.

MLTP 132 Clinical Hematology and Coagulation3 Credits

Introduction to the theory and practical application of hematology and hemostasis as it relates to the medical laboratory. Bone marrow, blood cell formation, hemoglobin structure and synthesis, cell function and morphology, and coagulation are explored. Correlation of test results with normal results, blood cell disorders and clotting abnormalities emphasized. Laboratory techniques, instrumentation, and quality assurance in the hematology/hemostasis lab.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 132L.

Terms Typically Offered: Spring.

MLTP 132L Clinical Hematology and Coagulation Lab1 Credit

Introduction to the theory and practical application of hematology and hemostasis as it relates to the medical laboratory. Bone marrow, blood cell formation, hemoglobin structure and synthesis, cell function and morphology, and coagulation are explored. Correlation of test results with normal results, blood cell disorders and clotting abnormalities emphasized. Laboratory techniques, instrumentation, and quality assurance in the hematology/hemostasis lab.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 132.

Terms Typically Offered: Spring.

Fees: Yes.

MLTP 138 Clinical Immunology2 Credits

Fundamentals and procedures of the immune defenses as it relates to medical laboratory testing. Innate and adaptive immune responses, deficiencies, autoimmunity, hypersensitivity and tissue transplantation. Exploration of serologic techniques and instrumentation in the detection and diagnoses of viral illness, immune related diseases and its applications in immunohematology. Introduction to theories and principles of molecular testing methods.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 138L.

Terms Typically Offered: Fall.

MLTP 138L Clinical Immunology Lab1 Credit

Fundamentals and procedures of the immune defenses as it relates to medical laboratory testing. Innate and adaptive immune responses, deficiencies, autoimmunity, hypersensitivity and tissue transplantation. Exploration of serologic techniques and instrumentation in the detection and diagnoses of viral illness, immune related diseases and its applications in immunohematology. Introduction to theories and principles of molecular testing methods.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 138.

Terms Typically Offered: Fall.

Fees: Yes.

MLTP 141 Clinical Immunohematology2 Credits

Theoretical principles and procedures in immunohematology and application in the medical laboratory. Blood banking procedures and potential problems in blood bank testing relative to antibody identification, compatibility testing, transfusion reactions, and maternal/neonatal screening for hemolytic disease of the newborn.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 141L.

Terms Typically Offered: Spring.

MLTP 141L Clinical Immunohematology Lab1 Credit

Theoretical principles and procedures in immunohematology and application in the medical laboratory. Blood banking procedures and potential problems in blood bank testing relative to antibody identification, compatibility testing, transfusion reactions, and maternal/neonatal screening for hemolytic disease of the newborn.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 141.

Terms Typically Offered: Spring.

Fees: Yes.

MLTP 142 Clinical Microscopy2 Credits

Introduction to microscopy in the medical laboratory. Emphasis on kidney function and urine formation: examination of the physical, chemical, and microscopic components of urine. Body fluid analysis of feces, seminal, vaginal, amniotic, cerebrospinal, serous, and synovial fluids. Critical analysis and problem solving with regards to pre-analytic, analytic, and post-analytic variables in sample testing.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 142L.

Terms Typically Offered: Fall.

MLTP 142L Clinical Microscopy Lab1 Credit

Introduction to microscopy in the medical laboratory. Emphasis on kidney function and urine formation: examination of the physical, chemical, and microscopic components of urine. Body fluid analysis of feces, seminal, vaginal, amniotic, cerebrospinal, serous, and synovial fluids. Critical analysis and problem solving with regards to pre-analytic, analytic, and post-analytic variables in sample testing.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 142.

Terms Typically Offered: Fall.

Fees: Yes.

MLTP 180 Applied Immunohematology3 Credits

Clinical laboratory experience in the principles and procedures of immunohematology at an affiliated site. Online-supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices, and medical laboratory technician professionalism are included.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Fall.

MLTP 182 Applied Hematology and Body Fluids3 Credits

Clinical laboratory experience in principles and procedures of hematology, hemostasis, urinalysis, and body fluids at affiliated site. Online-supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis on application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices, and medical laboratory technician professionalism are included.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Fall.

MLTP 195 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MLTP 231 Clinical Microbiology I3 Credits

Study of normal flora and pathogenic microorganisms. Methods for recovery, identification of pathogens, culture techniques, procedures, antibiotic testing, automation, and interpretation of clinical data. Emphasis on clinical specimens, testing algorithms and data correlation including diagnostics, public health, safety, and quality control.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 231L.

Terms Typically Offered: Fall.

MLTP 231L Clinical Microbiology I Lab1 Credit

Study of normal flora and pathogenic microorganisms. Methods for recovery, identification of pathogens, culture techniques, procedures, antibiotic testing, automation, and interpretation of clinical data. Emphasis on clinical specimens, testing algorithms and data correlation including diagnostics, public health, safety, and quality control.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 231.

Terms Typically Offered: Fall.

Fees: Yes.

MLTP 232 Clinical Microbiology II3 Credits

Basic identification and classification of pathogenic bacteria with unusual growth requirements, fungi, parasites, and viruses. Sample collection, processing, isolation methods, immunologic diagnosis, and treatment. Bioterrorism topics also explored.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Spring.

MLTP 242 Clinical Chemistry3 Credits

Application of human pathophysiology and relation to laboratory testing. Cardiovascular disease, kidney function, acid-base metabolism, liver, bone, carbohydrate disorders, endocrine, malignancy, and exogenous substances. Exploration of measurement methodologies, instrumentation, reagents and reactions, standards, and control usage in quality assurance. Critical analysis and problem solving with regards to pre-analytic, analytic, and post-analytic variables in sample testing.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 242L.

Terms Typically Offered: Spring.

MLTP 242L Clinical Chemistry Lab1 Credit

Application of human pathophysiology and relation to laboratory testing. Cardiovascular disease, kidney function, acid-base metabolism, liver, bone, carbohydrate disorders, endocrine, malignancy, and exogenous substances. Exploration of measurement methodologies, instrumentation, reagents and reactions, standards, and control usage in quality assurance. Critical analysis and problem solving with regards to pre-analytic, analytic, and post-analytic variables in sample testing.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Corequisites: MLTP 242.

Terms Typically Offered: Spring.

Fees: Yes.

MLTP 250 Applied Chemistry and Serology3 Credits

Clinical laboratory experience in the principles and procedures of chemistry and serology at an affiliated site. Online-supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices, and medical laboratory technician professionalism are included.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Fall.

MLTP 252 Applied Microbiology3 Credits

Clinical laboratory experience in the principles and procedures of clinical microbiology at an affiliated site. Online-supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices, and medical laboratory technician professionalism are included.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Fall.

MLTP 253 Certification Exam Review1 Credit

Review of key principles and content in preparation for national certification examination.

Prerequisites: Acceptance into the Medical Laboratory Technician Program.

Terms Typically Offered: Fall.

Fees: Yes.

Medical Office Assistant (MOAP)

MOAP 110 Medical Office Administration4 Credits

Administrative functions specifically used in medical offices, including office building management, supply and equipment maintenance and management, patient registration, appointments, and maintenance of patient health records. Students will also learn how to be a medical scribe, support meaningful use of the electronic patient record, and the fundamentals of computing and using computer applications.

Terms Typically Offered: Fall, Spring.

MOAP 111 Introduction to Medical Assisting3 Credits

Description and career opportunities. Professionalism and effective communication. Overview of health care, types of organizations and health care team. Legal considerations in the medical office, patient rights and the Health Information Portability and Accountability Act (HIPAA), and principles of law and ethics in health care.

Terms Typically Offered: Fall, Spring.

MOAP 130 Medical Office Administration Insurance Billing and Coding3 Credits

Introduction to outpatient coding with topics including identifying medical procedures and services performed (CPT codes), correlating the diagnosis, symptom, complaint or condition (ICD-9 codes), and establishing the medical necessity required for third-party reimbursement.

Terms Typically Offered: Fall, Spring.

MOAP 133 Basic Medical Sciences I4 Credits

Organization and function of the human body. Introductory anatomy, physiology, and pathophysiology of integumentary, musculoskeletal, cardiovascular, blood, lymphatic and immune, urinary, and respiratory systems. Health problems, illnesses, diagnostic tests, drug therapy, and treatment common in the ambulatory patient care setting.

Terms Typically Offered: Fall, Spring.

MOAP 135 Basic Medical Sciences II4 Credits

Organization and function of male and female reproductive systems, musculoskeletal system, and eyes, ears, nose, and throat. Implications in pediatrics, geriatrics, and nutrition are reviewed. Health problems, illnesses, diagnostic tests, drug therapy, and treatment common in the ambulatory patient care setting.

Terms Typically Offered: Fall, Spring, Summer.

MOAP 136 Introduction to Clinical Skills2 Credits

Principles and procedures of clinical skills. Collection of patient history and data, vital signs, height, weight, and appropriate documentation. Methods of assisting clinicians with physical examinations, procedures, and treatments in the medical office. Infection control and medical asepsis.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

MOAP 138 Medical Assisting Laboratory Skills4 Credits

Laboratory skills and techniques for collection, handling, examination, and testing of laboratory specimens often encountered in the ambulatory care setting. Emphasizes hands-on experience.

Prerequisites: MOAP 111 and MOAP 136.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

MOAP 140 Medical Assisting Clinical Skills4 Credits

Principles and procedures of medical assisting clinical skills. Methods of assisting clinicians with specialty physical examinations, diagnostic testing, procedures, treatments, and minor surgical procedures in the medical office. Principles of medication administration with an emphasis on oral and parenteral routes of drug administration.

Prerequisites: MOAP 111 and MOAP 136.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

MOAP 147 Medical Terminology4 Credits

Basic medical terminology as applied to major systems of the body and related diseases. Includes special applications and related to medical practice with emphasis on spelling.

Terms Typically Offered: Fall, Spring, Summer.

MOAP 150 Pharmacology for Medical Assistants3 Credits

Overview of pharmacology. Drug action and uses, names, classifications, effects, interactions, regulation and safety. Vaccine and immunization schedules and administration. Information regarding the measurement of medications, dosage calculations, routes of administration, and commonly prescribed drugs in the medical office is provided.

Prerequisites: MOAP 111.

Terms Typically Offered: Fall, Spring.

MOAP 183 Medical Assistant Internship5 Credits

Supervised placement in contracted facility for guided experience in application of knowledge and skills acquired in the classroom. Business and clinical procedures. Positions are non-paid due to accreditation requirements. Permission of program coordinator required to begin internship.

Terms Typically Offered: Fall, Spring, Summer.

MOAP 189 Review for Medical Assistant National Exam1 Credit

Preparation and practice for a national registration examination.

Prerequisites: Permission of Program Director.

Terms Typically Offered: Fall, Spring, Summer.

MOAP 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Multimedia Animation (MGDA)

MGDA 105 Creative Development3 Credits

Hands-on strategies for developing, stimulating, and maintaining creativity to accomplish professional and personal goals.

MGDA 120 Digital Design Tools3 Credits

Concentrates on the capabilities of digital cameras, raster photo-editing software, vector drawing software, and digital painting software for use in 3D animation. Explores how these image tools, combined with basic techniques, can be applied to create digital images, graphics, and videos.

MGDA 149 Digital Drawing3 Credits

Explore foundational skills necessary to create characters for use in computer-based 3D animation courses. Learn to draw human and non-human forms first using pencil and paper, then apply those skills with computer graphic design software. Character development, anatomy, dynamic movement and action, and scenery emphasized.

MGDA 150 Previsualization3 Credits

Introduces steps followed by professional media content producers and 3D animators/VR designers for producing preproduction material in a digital environment. Previsualization techniques include scriptwriting for 3D and VR experiences; plus traditional storyboarding, and virtual reality camera/actor layout blocking methods.

MGDA 153 Beginning 3D Animation3 Credits

Encompasses all major aspects of creating 3D characters using animation software. Use of developed characters to learn how to animate for personality.

MGDA 163 Audio Design3 Credits

Explores how audio recording principles enhance multimedia and 3D animated productions.

MGDA 164 Digital Video Editing3 Credits

Introduction to digital non-linear video editing as a 3D Animation tool. Edit, manipulate and compress/export video. Assembly techniques including media management, editing tools, titles, and motion control; transitions and filters, and special effects are explored.

MGDA 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MGDA 225 3D Character Design3 Credits

Explores advanced aspects of creating 3D characters on the computer, with an emphasis on digital sculpture techniques. Also examine facial animation, lip synchronization, scene design, and lighting setups.

MGDA 229 Animation History3 Credits

Overview of the advent and evolution of animation from its earliest origins through the 1990s. Examine important individuals and studios in the animation field. View, analyze, and peer critique animation examples. Social, cultural, artistic movements, and influences on contemporary animation styles and animation techniques are analyzed.

MGDA 250 3D Character Rigging3 Credits

Explore advanced character rigging features for 3D models. Understand adding controls to work with joints, forward kinematic (FK) and inverse kinematic (IK) blending, facial control using phonemes, eye movement, muscle systems, and skinning.

MGDA 265 Digital Compositing3 Credits

Provides fundamental techniques for creating motion graphics, green screen composites, advanced motion tracking data, modifying 3D animation multipass renders, and integration with 3D software.

MGDA 268 Freelancing for Creatives3 Credits

Introduction to freelancing opportunities for people in creative fields. Provides an overview about getting started, networking, financing, law, insurance, intellectual property rights, government regulations, time management, record keeping, taxes, self-promotion, and work-life balance.

MGDA 270 Advanced 3D Animation3 Credits

Investigate advanced 3D animation concepts that include workflow, advanced scene design, lighting, cameras, keyframing, textures, and rendering.

MGDA 285 3D Animation Capstone3 Credits

Develop and produce a short-form 3D animated movie using a production workflow and producing techniques. Explore the production process from conceptualization through finalization.

MGDA 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Music/Academic (MUSA)

MUSA 101 Concert Attendance0 Credits

Exploration of repertoire, current trends in music, and career development through attendance at concerts and a weekly music forum.

Terms Typically Offered: Fall, Spring.

Course may be taken 8 times for credit.

MUSA 111 Music Technology1 Credit

Introduction to music software programs that are widely accepted in the field of music.

Prerequisites: Music major or consent of instructor.

Terms Typically Offered: Fall, Spring.

MUSA 113 Fundamentals of Theory3 Credits

Study of the fundamentals of music theory for music majors and music theater majors in preparation to begin the music theory sequence. Covers harmonic principles of music, including major and minor scales, intervals, triads, and chords.

Terms Typically Offered: Fall.

MUSA 114 Theory I-Introduction3 Credits

Harmonic principles of the "common-practice" period including scales, intervals, triads and 7th chords. Introduction to part writing and voice leading.

Prerequisites: Satisfactory score on theory placement examination.

Corequisites: MUSA 116.

Terms Typically Offered: Fall, Spring.

MUSA 115 Theory II-Diatonic Concepts3 Credits

Continuation of MUSA 114, extending to all types of diatonic 7th chords, and their usages. Includes advanced rules of tonal harmonization.

Prerequisites: MUSA 114.

Corequisites: MUSA 117.

Terms Typically Offered: Fall, Spring.

MUSA 116 Ear Training and Sightsinging I2 Credits

Development of skills of reading rhythms, sightsinging, and listening. Emphasis on beginning melodic, harmonic, and rhythmic dictation.

Corequisites: MUSA 114.

Terms Typically Offered: Fall, Spring.

MUSA 117 Ear Training and Sightsinging II2 Credits

Further development of skills in sightsinging, rhythmic recognition, advanced listening abilities, including dictation of melodic and harmonic intervals, chord progressions, and two, three, and four-part chorales.

Prerequisites: MUSA 116.

Corequisites: MUSA 115.

Terms Typically Offered: Fall, Spring.

MUSA 120 Class Piano for Non Majors I2 Credits

Introductory piano proficiency (rudimentary note reading, music vocabulary, technique, aural skills, theory, and creative application of musical skills). Open to all students (no prerequisites or corequisites), but recommended specifically for students who have little or no training in piano and are not music (or music theater) majors or minors.

Terms Typically Offered: Fall.

MUSA 121 Class Piano for Non Majors II2 Credits

Beginning piano proficiency (note reading, scales, triads, chord symbols, and creative application of musical skills). Open to all students (no prerequisites or corequisites), but recommended specifically for students who have little or no training in piano and are not music (or music theater) majors or minors.

Terms Typically Offered: Spring.

MUSA 122 Class Guitar2 Credits

Introduction to guitar for all students, including performance in various styles, reading notation, and technical skills.

Terms Typically Offered: Fall.

MUSA 129 Singer's Diction I: English and Italian1 Credit

Study of the International Phonetic Alphabet (IPA) and its use in the pronunciation of lyric diction for English and Italian.

Terms Typically Offered: Fall.

MUSA 130 Class Piano I2 Credits

Introduction of basic keyboard skills, including scales, chords, transposition, harmonization, choir warmups, improvisation, and sightreading. Recommended for music majors, music minors and music theatre majors needing piano proficiency skills required by their program of study. Students move at their own pace completing specified sequenced skills.

Terms Typically Offered: Fall, Spring.

MUSA 131 Class Piano II2 Credits

Continuation of keyboard skills learned in MUSA 130, including experience with arpeggios, chord inversions, different accompaniment styles and ensemble experiences. Students move at their own pace completing specified sequence skills.

Prerequisites: MUSA 130.

Terms Typically Offered: Spring.

MUSA 137 Class Voice1 Credit

Fundamentals of singing, interpretation, phonetics, language (diction for singers), and solo repertoire for beginning voice students.

Terms Typically Offered: Fall.

MUSA 214 Theory III - Chromatic Concepts3 Credits

Full use of chromaticism through secondary dominants, altered chords, Neapolitan and augmented sixth chords, and modulation techniques. Continues into 20th Century including the use of advanced chromaticism. Includes advanced development of ear training and sightsinging.

Prerequisites: MUSA 115 and MUSA 117.

Terms Typically Offered: Fall, Spring.

MUSA 215 Theory IV - Twentieth Century Form and Analysis3 Credits

Final components of Common Practice Period harmony, including augmented sixth and common-tone diminished seventh chords, then progressing into musical form. Study of 20th century techniques, including Impressionism, Expressionism, Neo-Classicism, Neo-Romanticism, Serialism and other atonal techniques. Jazz Theory will also be covered.

Prerequisites: MUSA 214.

Terms Typically Offered: Fall, Spring.

MUSA 220 Music Appreciation-GTAH13 Credits

Overview of the basic elements of music and of Western music history. Emphasis on listening to a variety of music with intellect and emotion, and above all, purposeful attention. Examples come mainly from the Western "classical" tradition, jazz, and popular music.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

MUSA 229 Singer's Diction II: German and French1 Credit

Study of the International Phonetic Alphabet (IPA) and its use in the pronunciation of lyric diction for German and French.

Prerequisites: MUSA 129.

Terms Typically Offered: Spring.

MUSA 230 Class Piano III2 Credits

Continuation of concepts covered in MUSA 130 and MUSA 131, including minor scales, chords, transposition, playing from lead sheets, improvisation, basic jazz keyboarding skills, and sightreading.

Prerequisites: MUSA 130 and MUSA 131.

Terms Typically Offered: Fall.

MUSA 231 Class Piano IV2 Credits

Culmination of concepts covered in MUSA 130, MUSA 131, and MUSA 230. Emphasis on jazz keyboarding skills, reading from open vocal score or instrumental score with transposing parts, and creating and playing accompaniments for simple pieces.

Prerequisites: MUSA 230.

Terms Typically Offered: Spring.

MUSA 232 String Techniques and Materials2 Credits

Study of violin, viola, cello, and string bass with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.

Terms Typically Offered: Fall.

MUSA 233 Woodwind Techniques and Materials2 Credits

Study of woodwind instruments with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.

Terms Typically Offered: Fall.

MUSA 234 Brass Techniques and Materials2 Credits

Study of brass instruments with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.

Terms Typically Offered: Spring.

MUSA 235 Percussion Techniques and Materials2 Credits

Study of percussion with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.

Terms Typically Offered: Spring.

MUSA 240 Introduction to Music Education2 Credits

Survey of the history and pedagogical methods used in the profession. Includes in-class observations of effective music teachers to determine successful classroom management systems and methods of instruction. Students develop their personal philosophies of music education while exploring the career possibilities in music education.

Terms Typically Offered: Fall.

MUSA 250 Beginning Conducting2 Credits

Development of basic techniques necessary for musical leadership. Students are expected to master fundamental patterns, fermatas, dynamics, etc. Includes observation of professional conductors.

Terms Typically Offered: Spring.

MUSA 258 Introduction to Improvisation1 Credit

Exploration of theory, philosophy, and application of basic improvisational techniques for musicians. Improvisation on the basic elements of music such as rhythm, melody, harmony, and timbre.

Terms Typically Offered: Fall.

MUSA 262 Commercial Arranging1 Credit

Approaches to arranging music for commercial music styles, including lead sheets, pop chord symbols, lyrics, transposition, rhythm section parts, and chord voicings.

Prerequisites: MUSA 111 and MUSA 115.

Terms Typically Offered: Spring.

MUSA 266 History of Popular Music-GTAH13 Credits

Introduction to musical and cultural roots of popular music. Focus is to engage listening skills at a higher level, identify elements of popular music, evaluate the intent of lyrics, differentiate between styles of popular music, and examine the social impact popular music has on society, and vice versa.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

MUSA 267 Jazz History and Literature-GTAH13 Credits

Survey of prominent artists, innovators, and stylistic trends in jazz from its origins to the contemporary.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

MUSA 268 Beginning Jazz Improvisation1 Credit

Materials and techniques for improvisation, including chord and scale construction, modality, harmonic patterns, linear concepts, with emphasis on technique, style and idiomatic usage.

Prerequisites: MUSA 115.

Terms Typically Offered: Fall.

MUSA 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MUSA 302 Keyboard Literature I3 Credits

Survey of keyboard literature from Elizabethan music through Mendelssohn.

Prerequisites: MUSA 231 or MUSL 230.

Terms Typically Offered: Fall.

MUSA 303 Symphonic Literature3 Credits

Survey of symphonic music from early instrumental to present-day compositions. Emphasis on composers' styles, orchestras, and conductors. Chamber orchestra music also included.

Terms Typically Offered: Spring.

MUSA 304 Keyboard Literature II3 Credits

Survey of keyboard literature from Chopin to the present day.

Prerequisites: MUSA 231 or MUSL 230.

Terms Typically Offered: Fall, Spring.

MUSA 310 Accompanying Techniques2 Credits

Development of accompanying proficiency, including listening skills, form, and analysis of the music to be performed; rehearsing techniques; and accompanying repertoire for vocal, instrumental, and ensemble playing.

Prerequisites: MUSA 214.

Terms Typically Offered: Spring.

MUSA 311 Advanced Music Technology2 Credits

Application of advanced technological tools in music including recording, editing, production, and sound reinforcement.

Prerequisites: MUSA 111.

Terms Typically Offered: Fall.

MUSA 312 Electronic Music2 Credits

Techniques for the creation of electronic music in contemporary composition and live performance.

Prerequisites: MUSA 111.

Terms Typically Offered: Fall.

MUSA 317 Applied Orchestration and Arranging2 Credits

Choral and instrumental arranging; instrumentation, scoring, and analysis of harmonic styles of various composers. Arrangement of works for various combinations of instruments.

Prerequisites: MUSA 214.

Terms Typically Offered: Fall.

MUSA 318 Vocal Literature3 Credits

Study of the changing patterns, styles, and fashions of the secular art-song from medieval Europe to Europe and America of the day.

Prerequisites: MUSA 137 or previous enrollment in private vocal studies.

Terms Typically Offered: Fall, Spring.

MUSA 319 Choral Literature3 Credits

Historical, analytical, and interpretive study of choral literature spanning the Renaissance through the 20th Century. Important course for those planning to direct choirs.

Prerequisites: Previous or concurrent enrollment in a Colorado Mesa University choir.

Terms Typically Offered: Fall, Spring.

MUSA 326 Music History and Literature I3 Credits

Literature and styles of the master composers of music through the Medieval, Renaissance, and Baroque periods.

Prerequisites: MUSA 214.

Terms Typically Offered: Fall.

MUSA 327 Music History and Literature II3 Credits

Literature and styles of the master composers of music through the classic, romantic, and modern ages.

Prerequisites: MUSA 214.

Terms Typically Offered: Spring.

MUSA 340 Teaching Elementary and General Music: Methods, Principles, and Materials3 Credits

For Music Education Majors: The course is designed for standards-based curriculum for elementary and general music classes. Weekly laboratory experiences focus on course content dealing with teaching competencies in elementary and general music. Also addresses how to teach literacy in the music classroom. Includes 30 hours of field experience.

Prerequisites: MUSA 240.

Terms Typically Offered: Fall.

MUSA 350A Advanced Conducting: Choral2 Credits

Development of advanced techniques, such as score study, interpretive conducting, gestural vocabulary, and ensemble rehearsal techniques.

Prerequisites: MUSA 250.

Terms Typically Offered: Fall.

MUSA 350B Advanced Conducting: Instrumental2 Credits

Development of advanced techniques, score study, interpretive conducting, gestural vocabulary, ensemble rehearsal techniques, and rehearsal observations.

Prerequisites: MUSA 250.

Terms Typically Offered: Fall.

MUSA 363 Music Industry and Marketing2 Credits

Exploration of business aspects of the music industry, with an emphasis on careers and music marketing.

Terms Typically Offered: Fall.

MUSA 365 Entrepreneurship for Creatives2 Credits

Preparation for aspiring creatives in a variety of disciplines to build a career through entrepreneurial activities including business model development, project management strategy development, budgeting, and promotion, leading to a startup endeavor in the creative sector.

Terms Typically Offered: Spring.

MUSA 367 Arts Management2 Credits

Introduction to the field of arts management, exploring principles of arts administration and trends and issues for non-profit social ventures as well as for-profit entities in a wide variety of arts disciplines.

Terms Typically Offered: Fall.

MUSA 368 Advanced Jazz Improvisation2 Credits

Expansion upon the fundamental concepts presented in Beginning Jazz Improvisation. Topics addressed include chromaticism, harmony and scales in minor keys, diminished seventh chords and scales, rhythm changes, tritone substitutions, modal jazz, and improvisational patterns as applied to a variety of jazz standards.

Prerequisites: MUSA 214 and MUSA 268.

Terms Typically Offered: Spring.

MUSA 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MUSA 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MUSA 410 Vocal Pedagogy3 Credits

Physiology of the human vocal mechanism, various teaching styles, vocal problems related to various age groups, and vocal repertoire pertinent to all age groups and levels of development.

Prerequisites: MUSA 137 or MUSL 137.

Terms Typically Offered: Spring.

MUSA 411 Piano Pedagogy3 Credits

Introduction to the field of piano teaching and pedagogical theories, with application to piano teaching. Survey of methods and literature. Instructional techniques for group and individual lesson settings.

Prerequisites: MUSA 231 or MUSL 230.

Terms Typically Offered: Fall.

MUSA 426 The Music of World Cultures2 Credits

Exploration of the methods and philosophies of ethnomusicology—the study of music making with perspectives from anthropology, sociology, history, linguistics, and cultural studies. The course includes study of music from a variety of worldwide cultures.

Prerequisites: MUSA 214.

Terms Typically Offered: Spring.

MUSA 440 Teaching Vocal Music K-12: Methods, Principles, and Materials3 Credits

Standards-based instruction of ensemble classes at the secondary level. Training in concepts, methodology, and materials necessary to teach standards-based vocal music in public/private schools.

Prerequisites: MUSA 137 or MUSL 137 or MUSP 156 or MUSP 157 or MUSP 158 or MUSP 159.

Terms Typically Offered: Spring.

MUSA 441 Teaching Instrumental Music K-12: Methods, Principles and Materials3 Credits

Standards-based music curriculum for teaching instrumental music in the public schools. Includes developing teaching competencies, administration of the music program, and methods, materials, equipment and technology needed for the instrumental music program.

Prerequisites: MUSA 240.

Terms Typically Offered: Spring.

MUSA 442A Teaching Special Ensembles: Choral2 Credits

Practical knowledge and methodology in the teaching of Show/Jazz Choirs and Marching/Jazz Bands. Students will learn the skills necessary to direct these ensembles. Includes 30 hours of field experience.

Prerequisites: MUSA 215, MUSA 240, and MUSA 250; and MUSA 350A or MUSA 350B (MUSA 350A or MUSA 350B may be taken concurrently).

Terms Typically Offered: Fall, Spring.

MUSA 442B Teaching Special Ensembles: Instrumental2 Credits

Practical knowledge and methodology in the teaching of (A) Show/Jazz Choirs and (B) Marching/Jazz Bands. Students will learn the skills necessary to direct these ensembles. Includes 30 hours of field experience.

Prerequisites: MUSA 215, MUSA 240 and MUSA 250.

Corequisites: MUSA 350A or MUSA 350B if not completed.

MUSA 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MUSA 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MUSA 499 Internship1-4 Credits

Work experience obtained on a job in the music industry.

Prerequisites: Senior status, MUSA 363, and permission of instructor.

Course may be taken multiple times up to maximum of 15 credit hours.

MUSA 596 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Music/Lessons (MUSL)

MUSL 130 Piano1 or 2 Credits

Development of individual music performance skills in piano through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 131 Guitar1 or 2 Credits

Development of individual music performance skills in guitar through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 132 Strings1 or 2 Credits

Development of individual music performance skills in strings through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 133 Woodwinds1 or 2 Credits

Development of individual music performance skills in woodwinds through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 134 Brass1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 135 Percussion1 or 2 Credits

Development of individual music performance skills in percussion through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 136 Electronic Instruments1 or 2 Credits

Development of individual music performance skills in electronic instruments through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 137 Voice1 or 2 Credits

Development of individual music performance skills in voice through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 138 Composition1 or 2 Credits

Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 139 Jazz/Commercial1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. An instructional fee is required. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 230 Piano1 or 2 Credits

Development of individual music performance skills in piano through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 231 Guitar1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 232 Strings1 or 2 Credits

Development of individual music performance skills in strings through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 233 Woodwinds1 or 2 Credits

Development of individual music performance skills in woodwinds through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 234 Brass1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 235 Percussion1 or 2 Credits

Development of individual music performance skills in percussion through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 236 Electronic Instruments1 or 2 Credits

Development of individual music performance skills in electronic instruments through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 237 Voice1 or 2 Credits

Development of individual music performance skills in voice through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 238 Composition1 or 2 Credits

Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 239 Jazz/Commercial1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. An instructional fee is required. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 330 Piano1 or 2 Credits

Development of individual music performance skills in piano through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 331 Guitar1-2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 332 Strings1 or 2 Credits

Development of individual music performance skills in strings through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 333 Woodwinds1 or 2 Credits

Development of individual music performance skills in woodwinds through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 334 Brass1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 335 Percussion1 or 2 Credits

Development of individual music performance skills through weekly lessons in percussion. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 336 Electronic Instruments1 or 2 Credits

Development of individual music performance skills in electronic instruments through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 337 Voice1 or 2 Credits

Development of individual music performance skills in voice through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 338 Composition1 or 2 Credits

Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 339 Jazz/Commercial1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. An instructional fee is required. For third-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 340 Instrumental Pedagogy and Literature1 Credit

Private one-on-one instruction of instrumental pedagogy and literature for woodwinds, brass, and strings music performance major students. The student will develop skills and knowledge of pedagogy of his/her primary instrument for future studio teaching. The student will also explore a survey of repertory for the instrument, including solo, chamber, band, and/or orchestra literature.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 350 Conducting1 or 2 Credits

Development of individual music performance skills in conducting through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSL 430 Piano1 or 2 Credits

Development of individual music performance skills in piano through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 431 Guitar1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 432 Strings1 or 2 Credits

Development of individual music performance skills in strings through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 433 Woodwinds1 or 2 Credits

Development of individual music performance skills in woodwinds through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 434 Brass1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 435 Percussion1 or 2 Credits

Development of individual music performance skills in percussion through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 436 Electronic Instruments1 or 2 Credits

Development of individual music performance skills in electronic instruments through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 437 Voice1 or 2 Credits

Development of individual music performance skills in voice through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 438 Composition1 or 2 Credits

Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 439 Jazz/Commercial1 or 2 Credits

Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. An instructional fee is required. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

MUSL 450 Conducting1 or 2 Credits

Development of individual music performance skills in conducting through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required. For fourth year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

Fees: Yes.

Music/Performing (MUSP)

MUSP 140 Wind Symphony1 Credit

Symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 141 Symphony Orchestra1 Credit

Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 144 Jazz Ensemble1 Credit

Performance of a variety of styles related to the jazz idiom in large and small ensembles. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 145 Chamber Ensembles1 Credit

Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For first-year students.

Prerequisites: Membership approval by the director.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 147 Marching Band1 Credit

Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Only MUSP 147 counts as a KINA activity credit. For first-year students.

Prerequisites: Audition or consent of instructor required.

Terms Typically Offered: Fall.

MUSP 156 Vocal Arts Ensemble1 Credit

CMU's flagship choral ensemble. Mid-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For first-year students.

Prerequisites: Successful audition with director.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSP 157 Tenor/Bass Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSP 158 Soprano/Alto Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with instructor. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

Fees: Yes.

MUSP 159 Vocal Chords1 Credit

Exploration of wide range of vocal literature. Performances given, both on and off campus. For first-year students.

Prerequisites: Permission of instructor via audition.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 162 Commercial Ensemble1 Credit

Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For first-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 240 Wind Symphony1 Credit

Symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 241 Symphony Orchestra1 Credit

Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 244 Jazz Ensemble1 Credit

Performance of a variety of styles related to the jazz idiom in large and small ensembles. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 245 Chamber Ensembles1 Credit

Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For second-year students.

Prerequisites: Membership approval by the director.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 247 Marching Band1 Credit

Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Only MUSP 147 counts as a KINA activity credit. For second-year students.

Prerequisites: Audition or consent of instructor required.

Terms Typically Offered: Fall.

MUSP 256 Vocal Arts Ensemble1 Credit

CMU's flagship choral ensemble. Mid-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For second-year students.

Prerequisites: Successful audition with director.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 257 Tenor/Bass Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For second-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 2 times for credit.

MUSP 258 Soprano/Alto Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with the instructor. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 259 Vocal Chords1 Credit

Exploration of wide range of vocal literature. Performances given, both on and off campus. For second-year students.

Prerequisites: Permission of instructor via audition.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 262 Commercial Ensemble1 Credit

Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 320 Junior Recital1 Credit

Preparation and successful completion of junior-level recital/presentation in the student's concentration. Recital/presentation must be approved by the music faculty and given during the semester in which the student is registered for this course. Recital must include scholarly program notes covering historical aspects, analytical issues, and/or performance considerations of the recital repertory.

Terms Typically Offered: Fall, Spring.

MUSP 340 Wind Symphony1 Credit

Symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 341 Symphony Orchestra1 Credit

Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 344 Jazz Ensemble1 Credit

Performance of a variety of styles related to the jazz idiom in large and small ensembles. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 345 Chamber Ensembles1 Credit

Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For third-year students.

Prerequisites: Membership approval by the director.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 347 Marching Band1 Credit

Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Only MUSP 147 counts as a KINA activity credit. For third-year students.

Prerequisites: Audition or consent of instructor required.
Terms Typically Offered: Fall.

MUSP 356 Vocal Arts Ensemble1 Credit

CMU's flagship choral ensemble. Medium-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For third-year students.

Prerequisites: Successful audition with director.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 357 Tenor/Bass Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 358 Soprano/Alto Choir1 Credit

Campus-wide choir open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with instructor. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 359 Vocal Chords1 Credit

Exploration of wide range of vocal literature. Performances given, both on and off campus. For third-year students.

Prerequisites: Permission of instructor via audition.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 362 Commercial Ensemble1 Credit

Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 365 Vocal Performance Workshop1 Credit

Development of vocal performance skills for majors and minors within a musical and theatrical workshop. Performance repertoire selected for class study. Stage movement, stage presence, character study, audition techniques, resume construction, and mock auditions incorporated.

Terms Typically Offered: Fall.
Course may be taken 2 times for credit.

MUSP 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MUSP 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

MUSP 420 Senior Recital/Presentation1 Credit

Preparation and completion of senior-level recital/presentation, given during the semester of this course. Recital must include scholarly program notes covering historical aspects, analytical issues, and/or performance considerations of the recital repertory. Liberal Arts or Elective Studies in Business students may elect to give a faculty-approved "capstone presentation" (e.g., lecture/recital; lecture/demonstration; or other presentation of creative work).

Terms Typically Offered: Fall, Spring.

MUSP 440 Wind Symphony1 Credit

Symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 441 Symphony Orchestra1 Credit

Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 444 Jazz Ensemble1 Credit

Performance of a variety of styles related to the jazz idiom in large and small ensembles. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 445 Chamber Ensembles1 Credit

Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For fourth-year students.

Prerequisites: Membership approval by the director.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 447 Marching Band1 Credit

Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Only MUSP 147 counts as a KINA activity credit. For fourth-year students.

Prerequisites: Audition or consent of instructor required.

Terms Typically Offered: Fall.

Course may be taken 4 times for credit.

MUSP 456 Vocal Arts Ensemble1 Credit

CMU's flagship choral ensemble. Medium-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For fourth-year students.

Prerequisites: Successful audition with director.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 457 Tenor/Bass Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 458 Soprano/Alto Choir1 Credit

Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with instructor. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 459 Vocal Chords1 Credit

Exploration of wide range of vocal literature. Performances given, both on and off campus. For fourth-year students.

Prerequisites: Permission of instructor via audition.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 462 Commercial Ensemble1 Credit

Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For fourth-year students.

Terms Typically Offered: Fall, Spring.

Course may be taken 4 times for credit.

MUSP 465 Opera Scenes1 Credit

Continuation of artistic and technical skills introduced in MUSP 365. Focus on operatic production of staged, public performance of either selected opera scenes or a one or two-act opera.

Prerequisites: Completion of Sophomore Review or instructor approval.

Corequisites: MUSL 437 or permission of instructor.

Course may be taken 4 times for credit.

MUSP 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

MUSP 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Nurse Aide Training (NURA)

NURA 101 Nurse Aide Healthcare Skills4 Credits

Fundamental skills of the nurse aide. Basic nursing skills, communication skills, restorative services, personal care skills, safety and emergency care covered. Includes knowledge and/or principles of asepsis, OSHA and HIPAA regulations. Ethical behaviors, cultural sensitivity, principles of mental health, patient/resident rights addressed.

Fees: Yes.

NURA 170 Nurse Aide Clinical Experience1 Credit

Applies knowledge and skill gained in NURA 101 to patient care. Independent functioning within the nurse aide scope of practice in applying knowledge and skills gained in Nurse Aide Healthcare Skills. Enhanced communication, cultural competency, end of life care, critical thinking and organizational skills emphasized.

Prerequisites: NURA 101.

NURA 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Nursing (NURS)

NURS 101 Pharmacology Calculations1 Credit

Course introduces the concepts and techniques of dosage calculations and medication administration by a variety of routes. Application of basic math concepts to complex conversion of dosages between and among various systems of weights and volumes, and application of critical thinking skills to the calculation and administration of medications by oral and parenteral (including intravenous) routes of administration.

Prerequisites: Admission into the Practical Nursing certificate program.

Corequisites: NURS 106/NURS 106L, NURS 107/NURS 107L and NURS 112.

Fees: Yes.

NURS 106 Adult Concepts I3 Credits

Application of nursing concepts, skills, critical thinking, and assessment in caring for a variety of clients in various health care settings.

Prerequisites: Admission into the Practical Nursing certificate program.

Corequisites: NURS 101, NURS 106L, NURS 107/NURS 107L, and NURS 112.

Fees: Yes.

NURS 106L Adult Concepts I Laboratory2 Credits

Lab component required for NURS 106.

Prerequisites: Admission into the Practical Nursing certificate program.

Corequisites: NURS 101, NURS 106, NURS 107/NURS 107L, and NURS 112.

Fees: Yes.

NURS 107 Foundations of Nursing3 Credits

Exploration of basic nursing concepts and skills to develop critical thinking while utilizing the nursing process.

Prerequisites: Admission into the Practical Nursing certificate program.

Corequisites: NURS 101, NURS 106/NURS 106L, NURS 107L, and NURS 112.

Fees: Yes.

NURS 107L Foundations of Nursing Laboratory3 Credits

Application of basic nursing and IV certification skills through training, practice, and checkoffs of essential skills needed for safe practice.

Prerequisites: Admission into the Practical Nursing certificate program.

Corequisites: NURS 101, NURS 106/NURS 106L, NURS 107, and NURS 112.

Fees: Yes.

NURS 109 Introduction to Mental Health2 Credits

Introduction to complex concepts and behaviors of nursing roles within the cohort of the nursing process, holistic care, and mental health care.

Emphasizes theoretical and practical aspects of the mental health nursing skills required to meet the needs of clients in a variety of settings.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109L, NURS 117/NURS 117L, NURS 156, and NURS 172/NURS 172L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 109L Introduction to Mental Health Laboratory1 Credit

Lab component required for NURS 109.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109, NURS 117/NURS 117L, NURS 156, and NURS 172/NURS 172L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 112 Basic Concepts of Pharmacology2 Credits

Introduction to basic concepts of pharmacology related to the actions, therapeutic and adverse effects, interactions of drugs, drug classifications, and the basic pharmacology of commonly used medications. Emphasis is placed on nursing considerations and client education.

Prerequisites: Admission into the Practical Nursing certificate program.

Corequisites: NURS 101, NURS 106/NURS 106L, and NURS 107/NURS 107L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 117 Obstetrics and Pediatrics4 Credits

Exploration of fundamental content in the nursing care of the childbearing family, which focuses on pregnancy, physiologic and psychological changes experienced, and care of the normal newborn. Includes the individual needs of the child from infancy through adolescence focusing on developmental stages, as well as childhood diseases and illness within each stage.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109/NURS 109L, NURS 117L, NURS 156, and NURS 172/NURS 172L.

Fees: Yes.

NURS 117L Obstetrics and Pediatrics Laboratory2 Credits

Application of concepts related to pregnancy, newborns, and children from infancy to adolescence utilizing critical thinking, nursing process, and assessment in caring for this population within the various health care settings.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109/NURS 109L, NURS 117, NURS 156, and NURS 172/NURS 172L.

Fees: Yes.

NURS 156 Socialization into Practical Nursing2 Credits

Examination of legal and ethical responsibilities of the practical nurse. Emphasis is given to the Colorado Nurse Practice Act, portfolio building, and preparing for the NCLEX PN exam. Job seeking skills are discussed.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109/NURS 109L, NURS 117/NURS 117L, and NURS 172/NURS 172L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 172 Adult Concepts II3 Credits

Application of clinical practicum to apply nursing theory in medical surgical nursing using the nursing process to assist clients with more complex health care needs.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109/NURS 109L, NURS 117/NURS 117L, NURS 156, and NURS 172L.

Fees: Yes.

NURS 172L Adult Concepts II Lab3 Credits

Lab component required for NURS 172.

Prerequisites: NURS 101, NURS 106/NURS 106L, NURS 107/NURS 107L, and NURS 112.

Corequisites: NURS 109/NURS 109L, NURS 117/NURS 117L, NURS 156, and NURS 172.

Fees: Yes.

NURS 200 LPN to RN Role Transition1 Credit

Prepares the advanced placement student to enter the Nursing Program through orientation to the program, review of the nursing process and exploration of the role change from practical to professional nursing. Introduction to selected concepts related to the role of the Associate Degree nurse as a provider of care, teacher, manager, client advocate and member of the profession. Emphasis placed on critical thinking in providing and managing comprehensive care in a variety of health care settings with clients across the lifespan. Course is designed to assist the Licensed Practical Nurse with the transition into the practice of professional nursing.

Prerequisites: All essential learning education and program prerequisites.

NURS 206 Advanced Concepts of Medical-Surgical Nursing I3 Credits

Role of the registered professional nurse as care provider, teacher, manager, professional and advocate in meeting the nursing care needs of adults across the life span experiencing illness to wellness. The clinical lab provides opportunity for the student to utilize the nursing process and integrate previous learning to assist the patient and family in achieving optimal functioning in the various health care settings.

Corequisites: NURS 206L and NURS 288.

NURS 206L Advanced Concepts of Medical-Surgical Nursing Laboratory2 Credits

Lab component required for NURS 206.

Corequisites: NURS 206 and NURS 288.

NURS 210 Nursing Care of Complex Obstetrical and Pediatric Clients3 Credits

[AAS Program only] Prepares the professional nurse to comprehend and apply advanced concepts in care of the high-risk child bearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the perinatal experience and altered functioning, special needs, and disease processes manifested in children. The nursing process is used as a framework to attain optimal levels of maternal-newborn and pediatric health and wellness. Legal and ethical accountability are integrated throughout the course. Critical thinking skills are utilized throughout.

Prerequisites: All general education and prerequisites, NURS 288 and NURS 200.

Corequisites: NURS 210L

NURS 210L Nursing Care of Complex Obstetrical and Pediatric Clients Laboratory1 Credit

Prepares the professional nurse to comprehend and apply advanced concepts in the care of the high-risk child bearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the prenatal experience and altered functioning, special needs and disease process manifested in children. The nursing process is used as a framework to attain optimal levels of maternal-newborn and pediatric health and wellness. Legal and ethical accountability and critical thinking skills are integrated throughout the course. Theoretical content is applied in acute care and community clinical settings.

Prerequisites: NURS 200, NURS 206/NURS 206L, NURS 211/NURS 211L, NURS 286, and NURS 288.

Corequisites: NURS 210, NURS 216/NURS 216L, and NURS 289.

NURS 211 Nursing Care of the Psychiatric Client3 Credits

Develops concepts of psychosocial integrity and emphasizes the function and responsibility of nursing in promoting and maintaining mental health of individuals and families. This course emphasizes communication and caring through the application of the therapeutic relationship and nursing process in the care and treatment of common clinical conditions/disorders. In the clinical lab students will develop proficiency in working with psychiatric clients in various settings in the community.

Prerequisites: NURS 200 and NURS 288.

Corequisites: NURS 211L.

NURS 211L Nursing Care of the Psychiatric Client Laboratory1 Credit

Lab component required for NURS 211.

Prerequisites: NURS 200, NURS 206/NURS 206L, NURS 286, and NURS 288.

Corequisites: NURS 211 and NURS 217.

NURS 216 Advanced Concepts of Medical Surgical Nursing II2 Credits

[AAS Program only] Continues to focus on the role of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the complex medical and surgical health care needs of adult clients. Utilizing the nursing process, the student is expected to integrate previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings.

Prerequisites: All essential learning and prerequisites, NURS 206/NURS 206L, NURS 288, and NURS 200.

Corequisites: NURS 216L.

NURS 216L Advanced Concepts of Medical Surgical Nursing II Laboratory3 Credits

Continues to focus on the role of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the complex medical and surgical health care needs of adult clients. Utilizing the nursing process, the student is expected to integrate previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings. In addition to inpatient acute care patient units the student will rotate through the critical care areas of the health care facility.

Prerequisites: NURS 200, NURS 206/NURS 206L, NURS 211/NURS 211L, NURS 217, NURS 286, and NURS 288.

Corequisites: NURS 210/NURS 210L, NURS 216, and NURS 289.

NURS 217 Leadership for Professional Nursing Practice2 Credits

[AAS Program only] Socializes the student into the graduate registered nurse role. The focus is on the exploration and analysis of contemporary nursing practice, current trends and issues impacting nursing care delivery. Advanced leadership and management concepts are discussed as part of the nursing role.

Prerequisites: All essential learning and prerequisites, and NURS 200.

NURS 244 Introduction to Adult Concepts of Health2 Credits

Introduction of nursing concepts, skills, and assessment in caring for adult clients in various health care settings.

Prerequisites: Admission into the Associate of Applied Sciences in Nursing program.

Corequisites: NURS 244L, NURS 246, and NURS 247/NURS 247L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 244L Introduction to Adult Concepts of Health Laboratory2 Credits

Introduction of nursing concepts, skills, and assessment in caring for adult clients in various health care settings.

Prerequisites: Admission into the Associate of Applied Sciences in Nursing program.

Corequisites: NURS 244, NURS 246, and NURS 247/NURS 247L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 246 Pharmacological Concepts I3 Credits

Introduction to basic pharmacology concepts, which include interactions, classification, adverse effects, drug dosages and math calculations.

Prerequisites: Admission into the Associate of Applied Science in Nursing program.

Corequisites: NURS 244/NURS 244L, and NURS 247/NURS 247L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 247 Fundamentals of Nursing3 Credits

Exploration of nursing concepts and skills utilized in the nursing process to develop critical thinking. Application of essential nursing skills including IV skills for safe practice.

Prerequisites: Admission into the Associate of Applied Science in Nursing program.

Corequisites: NURS 244/NURS 244L, NURS 246, and NURS 247L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 247L Fundamentals of Nursing Laboratory2 Credits

Lab component required for NURS 247.

Prerequisites: Admission into the Associate of Applied Sciences in Nursing program.

Corequisites: NURS 244/NURS 244L, NURS 246, and NURS 247.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 248 Adult Concepts of Health I3 Credits

Exploration of the role of the registered nurse as a care provider, teacher, manager, professional, and advocate. Explores disease processes in adults.

Prerequisites: NURS 244/NURS 244L, NURS 246, and NURS 247/NURS 247L.

Corequisites: NURS 248L, NURS 249, and NURS 250/NURS 250L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 248L Adult Concepts of Health I Laboratory3 Credits

Exploration of the role of the registered nurse as a care provider, teacher, manager, professional, and advocate. Explores disease processes in adults.

Prerequisites: NURS 244/NURS 244L, NURS 246, and NURS 247/NURS 247L.

Corequisites: NURS 248, NURS 249, and NURS 250/NURS 250L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 249 Pharmacological Concepts II3 Credits

Integration of concepts in pharmacology with a focus on high risk medications, drug calculations, and teaching.

Prerequisites: NURS 244/NURS 244L, NURS 246, and NURS 247/NURS 247L.

Corequisites: NURS 248/NURS 248L, and NURS 250/NURS 250L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 250 Health Assessment for Nurses3 Credits

Acquisition of knowledge and skills necessary for completing health assessment across the life span.

Prerequisites: NURS 244/NURS 244L, NURS 246, and NURS 247/NURS 247L.

Corequisites: NURS 248/NURS 248L, NURS 249, and NURS 250L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 250L Health Assessment for Nurses Laboratory1 Credit

Acquisition of knowledge and skills necessary for completing health assessment across the life span.

Prerequisites: NURS 244/NURS 244L, NURS 246, and NURS 247/NURS 247L.

Corequisites: NURS 248/NURS 248L, NURS 249, and NURS 250.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 251 Adult Concepts of Health II3 Credits

Continuation of study to meet the needs of higher level acuity patients and evaluating optimal healthcare outcomes. Students incorporate evidence-based care and apply clinical reasoning while developing additional practice and skills in organizing and prioritizing patient care more effectively.

Prerequisites: NURS 248/NURS 248L, NURS 249, and NURS 250/NURS 250L.

Corequisites: NURS 251L, and NURS 253/NURS 253L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 251L Adult Concepts of Health II Laboratory3 Credits

Continuation of study to meet the needs of higher level acuity patients and evaluating optimal healthcare outcomes. Students incorporate evidence-based care and apply clinical reasoning while developing additional practice and skills in organizing and prioritizing patient care more effectively.

Prerequisites: NURS 248/NURS 248L, NURS 249, and NURS 250/NURS 250L.

Corequisites: NURS 251, and NURS 253/NURS 253L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 252 Mental Health Concepts in Nursing2 Credits

Exploration of psychosocial concepts with a focus on maintaining mental health of the community, individual, and family.

Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.

Corequisites: NURS 252L, NURS 255, NURS 255L, NURS 256, and NURS 256L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 252L Mental Health Concepts in Nursing Laboratory2 Credits

Exploration of psychosocial concepts with a focus on maintaining mental health of the community, individual, and family.

Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.

Corequisites: NURS 252, NURS 255, NURS 255L, NURS 256, and NURS 256L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 253 Family Nursing Obstetrics and Pediatrics4 Credits

Exploration of family health with particular focus on pregnant women and the developmental health of infants, children, and adolescents.

Prerequisites: NURS 248/NURS 248L, NURS 249, and NURS 250/NURS 250L.

Corequisites: NURS 251/NURS 251L, and NURS 253L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 253L Family Nursing Obstetrics and Pediatrics Laboratory2 Credits

Exploration of family health with particular focus on pregnant women and the developmental health of infants, children, and adolescents.

Prerequisites: NURS 248/NURS 248L, NURS 249, and NURS 250/NURS 250L.

Corequisites: NURS 251/NURS 251L, and NURS 253.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 255 Adult Concepts of Health III3 Credits

Exploration of critical care needs of adult patients. Previous knowledge is integrated throughout to assist with optimal functioning in various complex health care situations.

Prerequisites: NURS 251/NURS 251L and NURS 253/NURS 253L.

Corequisites: NURS 252/NURS 252L, NURS 255L, and NURS 256/NURS 256L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 255L Adult Concepts of Health III Laboratory3 Credits

Exploration of critical care needs of adult patients. Previous knowledge is integrated throughout to assist with optimal functioning in various complex health care situations.

Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.

Corequisites: NURS 252, NURS 252L, NURS 255, NURS 256, and NURS 256L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 256 Capstone1 Credit

Exploration of the physiological and psychosocial factors that contribute to altered health states and their impact on patients and their families.

Emphasis is on the application of the nursing process and refinement of clinical skills. Students gain experience in working with patients in acute care settings as well as working with the families of acutely ill individuals.

Prerequisites: NURS 251/NURS 251L, and NURS 253/NURS 253L.

Corequisites: NURS 252/NURS 252L, NURS 255/NURS 255L, and NURS 256L.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 256L Capstone Laboratory2 Credits

Exploration of the physiological and psychosocial factors that contribute to altered health states and their impact on patients and their families.

Emphasis is on the application of the nursing process and refinement of clinical skills. Students gain experience in working with patients in acute care settings as well as working with the families of acutely ill individuals.

Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.

Corequisites: NURS 252, NURS 252L, NURS 255, NURS 255L, and NURS 256.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 286 Advanced Pharmacology for Nurses2 Credits

Focuses on advanced concepts of pharmacology within nursing with an emphasis on nursing process, drug doses, calculations and relevant assessments and patient teaching.

Prerequisites: LPN license.

Corequisites: NURS 200, NURS 206/NURS 206L, and NURS 288.

NURS 288 Health and Physical Assessment for Nursing2 Credits

[AAS Program only] Development of the knowledge necessary for completing health assessment across the life span. History taking, physical assessment skills, and principles of health promotion are utilized to develop appropriate interventions designed to assist clients with health promotion and life style changes.

Prerequisites: All essential learning and prerequisites.

Corequisites: NURS 206 and NURS 200.

NURS 289 Capstone: Comprehensive Nursing Internship2 Credits

Facilitates transition from student to graduate nurse through application of nursing principles and skills in an area of health care delivery. Critical thinking, life long learning, nursing process, caring, collaboration, and health teaching and promotion are emphasized.

Prerequisites: All prerequisites for the AAS program, NURS 200, NURS 206/NURS 206L, NURS 211/NURS 211L, NURS 217, NURS 286, NURS 288.

Corequisites: NURS 210/NURS 210L and NURS 216/NURS 216L.

NURS 300 Developing the Baccalaureate Role3 Credits

Introduction to baccalaureate role development for the professional nurse in current issues, nursing theory and philosophy, leadership and management skills, and legal and ethical behaviors in the practice setting. Skills associated with the impact of change to promote patient safety and collaboration in nursing and healthcare will be explored.

Prerequisites: Admission to the RN-BSN Program.

Terms Typically Offered: Fall, Spring, Summer.

NURS 318 Health Assessment and Promotion3 Credits

Development of the knowledge necessary for completing health assessment across the life span. History taking, physical assessment skills, and principles of health promotion are utilized to develop appropriate interventions designed to assist clients with health promotion and prevention over the life span.

Prerequisites: Admission to the LPN-BSN program.

Corequisites: NURS 318L, NURS 329/NURS 329L, NURS 333, and NURS 400.

Fees: Yes.

NURS 318L Health Assessment and Promotion Laboratory1 Credit

Application of techniques necessary for completing health assessments across the life span. Includes history taking, physical assessment skills, and principles of health promotion. Apply information to develop appropriate interventions designed to assist clients with health promotion and life style changes.

Prerequisites: Admission to the LPN-BSN Program.

Corequisites: NURS 318, NURS 329/NURS 329L, NURS 333, and NURS 400.

Fees: Yes.

NURS 320 Health Assessment and Promotion for the Nurse3 Credits

Apply knowledge necessary for completing a child, adult, and geriatric client health assessment. Use history taking and physical assessment skills to develop appropriate interventions designed to assist clients with health promotion and lifestyle changes. Apply principles of health promotion through the life span in a variety of settings.

Prerequisites: Admission to the RN-BSN Program or practicing RN with current license and permission of instructor.

Corequisites: NURS 320L.

NURS 320L Health Assessment and Promotion for the Nurse Laboratory1 Credit

Application of knowledge necessary for completing a child, adult, and geriatric client health assessment. Use of history-taking and physical assessment skills to develop appropriate interventions designed to assist clients with health promotion and lifestyle changes. Application of principles of health promotion through the lifespan in a variety of settings.

Prerequisites: Admission into RN-BSN program or practicing RN with current license and permission of instructor.

Corequisites: NURS 320.

NURS 329 Advanced Adult Health I4 Credits

Exploration of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the nursing care needs of adults across the life span.

Prerequisites: Admission into the LPN-BSN Program.

Corequisites: NURS 318/NURS 318L, NURS 329L, NURS 333, and NURS 400.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 329L Advanced Adult Health I Laboratory3 Credits

Lab component required for NURS 329.

Prerequisites: Admission to the LPN-BSN program.

Corequisites: NURS 318/NURS 318L, NURS 329, NURS 333, and NURS 400.

Fees: Yes.

NURS 333 Basic Concepts of Pharmacology II2 Credits

Exploration of advanced concepts of pharmacology within nursing with an emphasis on nursing process, drug doses, calculations, relevant assessments, and patient teaching.

Prerequisites: Admission into the LPN-BSN program.

Corequisites: NURS 318/NURS 318L, NURS 329/NURS 329L, and NURS 400.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 350 Health Assessment Across the Lifespan3 Credits

Introduction to the basic skills of history taking and physical assessment of individuals through the lifespan. Emphasis on knowledge and skills necessary for conducting a systematic or focused health assessment and determining areas in which to implement health promotion activities.

Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.

Corequisites: NURS 350L, NURS 353/NURS 353L, NURS 370, and NURS 372.

Fees: Yes.

NURS 350L Health Assessment Across the Lifespan Laboratory1 Credit

Application of knowledge and clinical skills in obtaining a health history and performing a physical examination of individuals across the lifespan. Focus is on the practice and refinement of psychomotor, communication, and critical thinking skills with an emphasis on privacy, confidentiality, and safety.

Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.

Corequisites: NURS 350, NURS 353/NURS 353L, NURS 370, and NURS 372.

Fees: Yes.

NURS 353 Foundation of Nursing Practice4 Credits

Introduction to the fundamentals of nursing practice and the knowledge required to implement patient-centered care through the lifespan in a variety of settings. Focus is on safety, basic nursing care, assessment, communication, documentation, and quality care.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 350/NURS 350L, NURS 353L, NURS 370, and NURS 372.

Fees: Yes.

NURS 353L Foundations of Nursing Practice Laboratory3 Credits

Application of fundamental concepts and evidenced-based nursing skills in settings that provide safe learning opportunities. Sites include clinical labs, simulation labs, and an array of local healthcare facilities.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 350/NURS 350L, NURS 353, NURS 370, and NURS 372.

Fees: Yes.

NURS 370 Pharmacology for Nurses I3 Credits

Introduction to drug therapy including specific drug classifications, terminology, theories and techniques of safe administration. Focus on nursing considerations, utilizing the nursing process, and becoming proficient at medication calculations. Major content includes the basic concepts of pharmacology, commonly prescribed drugs, drug effects on body tissues, responses to drug therapy, and principles of therapy in various circumstances and populations.

Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.

Corequisites: NURS 350/NURS 350L, NURS 353/NURS 353L, and NURS 372.

Fees: Yes.

NURS 372 Professional Development I: Nursing Theory, Roles and Ethics2 Credits

Introduction to knowledge, skills, and attitudes related to nursing practice. Emphasis on history of professional nursing, nursing theory, legal, ethical, and safety issues. Exploration of principles of communication, time management, and critical thinking as they relate to the professional nurse.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 350/NURS 350L, NURS 353/NURS 353L, and NURS 370.

Fees: Yes.

NURS 373 Acute and Chronic Illness I 4 Credits

Application of the nursing process in care of individuals and families experiencing deviations from usual levels of wellness. Exploration of pathophysiology of moderate intensity and relative stability. Emphasis on identification of coping mechanisms of individuals and families to assist in health recovery, health promotion, and the adoption of strategies for illness prevention.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 373L, NURS 388/NURS 388L, and NURS 394.

Fees: Yes.

NURS 373L Acute and Chronic Illness I Clinical 4 Credits

Application of nursing process in care of individuals and families in acute and chronic health care settings. Emphasis on patient safety, health promotion, multi-disciplinary health care and the uniqueness of individual response to disease. Development of essential skills of assessment, problem identification, goal setting, application of interventions, evaluation of outcomes, cultural sensitivity, and critical thinking skills.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 373, NURS 388/NURS 388L, and NURS 394.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 388 Mental Health Nursing 3 Credits

Introduction to patient-centered, culturally sensitive approach to needs of individuals, families, and groups experiencing alterations in mental health across the lifespan. Emphasis on theoretical knowledge and evidence-based practice to promote, maintain and restore mental and emotional health. Exploration of use of self as a therapeutic tool, principles of therapeutic relationships and communication and a knowledge-base of psychopathology.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 373/NURS 373L, and NURS 388L and NURS 394.

Fees: Yes.

NURS 388L Mental Health Nursing Clinical 2 Credits

Application of theory in care of clients with a wide-range of psychiatric and/or mental health disorders across the lifespan. Emphasis on the nurse's role in various treatment settings and current treatment modalities. Development of proficiency in mental health practice with diverse populations. Emphasis on therapeutic use of self with individuals and groups in a variety of community-based settings.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 373/NURS 373L, and NURS 388 and NURS 394.

Fees: Yes.

NURS 394 Nursing Research: An Evidence-Based Practice 2 Credits

Exploration of nursing research and evidence-based practice in the process of scholarly inquiry in health care. Examination of research methodologies and related theories to facilitate development of a literature review and an evidence-based practice proposal to investigate nursing questions and outcomes. Emphasis on research as a basis for assessment of outcomes of health promotion and health care interventions.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 373/NURS 373L and NURS 388/NURS 388L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 395 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

NURS 396 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

NURS 400 Nursing Research 3 Credits

Exploration of evidence-based practices related to outcomes within the health care setting. Research questions relevant to clinical practice are developed and pursued.

Prerequisites: Admission to the LPN-BSN program.

Corequisites: NURS 318/NURS 318L, NURS 329/NURS 329L, and NURS 333.

Fees: Yes.

NURS 408 Health Information Systems 3 Credits

Explores the use of information systems in health care and nursing practice. Examines current trends and issues in using, designing, and implementing health care information systems, healthcare information management, decision support and knowledge management applications in the context of challenges facing healthcare organizations today. Explores legal and ethical issues as related to the protection of the privacy, confidentiality, and security of information in health care environments, utility of wide array of personal health information management and social networking tools in communicating health-related information.

Prerequisites: RN degree at the associate or diploma level; permission of instructor; application in to HITS program.

NURS 409 Quality Assessment and Improvement in Health Care Settings 3 Credits

Review of outcomes-based quality assessment and improvement methods. Focuses on techniques of measuring quality of care, customer satisfaction, and safety. Implementation of quality management programs, and creating a culture supporting adherence to best practices and standards.

Prerequisites: Permission of instructor.

NURS 410 Population Health Nursing 3 Credits

Exploration of theoretical basis for community and population health and the role of the nurse. Exploration of microsystems, applications of transitions of care, financing concepts in the community setting, and analysis of the health of populations. Emphasis on health promotion, disease prevention, using epidemiology, environmental health, health policy, aggregates, systems, populations, community assessment, and community interventions.

Prerequisites: NURS 320/NURS 320L.

Corequisites: NURS 410L.

NURS 410L Population Health Nursing Laboratory 1 Credit

Application of theory in practice with diverse populations and aggregates in the community to achieve an optimum level of wellness. Emphasis on health disparities, cultural diversity, social justice, and health laws and policies related to population vulnerability throughout the life course. Exploration of the continuum of outpatient care in home health and collaboration with community services.

Prerequisites: NURS 320/NURS 320L.

Corequisites: NURS 410.

Terms Typically Offered: Fall, Spring.

NURS 415 Business of Health Care 2 Credits

Appraisal of financial indicators on impact of health outcomes explored in the context of the professional's ability to provide quality care to a diverse patient population.

Prerequisites: NURS 403/NURS 403L, NURS 406/NURS 406L, and NURS 407.

Corequisites: NURS 411/NURS 411L, NURS 412L, and NURS 416.

NURS 417 Forensic Science: The Human Interface² Credits

Introduces the principles of forensic science as they relate to care of individuals experiencing events which require intervention from both the legal and health care systems. Integrates concepts from health care, psychology, sociology, criminology used to clinically investigate crimes against humans. Focuses on the unique knowledge and attributes that health care professionals contribute to multidisciplinary forensic investigation. Addresses various aspects of forensic investigation including role of the forensic scientist in working with the victim and the perpetrator, wound identification and collection of evidence. Specific areas of domestic violence, sexual assault, elder abuse, gang behavior, death investigation, victims' advocacy and courtroom dynamics are included. Students will experience forensic investigation in clinical areas.
Prerequisites: Acceptance into the B.S.N. program, or permission of instructor.

NURS 418 Gerontological Nursing and Chronic Illness³ Credits

Evaluation of nursing leadership and trends central to individualized care of the older adult that affect nursing care. A scientifically sound, holistic process to provide culturally sensitive care for the geriatric population will be explored.

Prerequisites: Admission to the RN-BSN Program.

Terms Typically Offered: Fall, Spring, Summer.

NURS 420 Global Health³ Credits

This is a multidimensional course for nursing students who want to broaden their understanding of health care in the global community. The course involves pre-trip seminars, travel to a country of focus and post-trip sessions. Attendance is required at all sessions. Level Two nursing preparation recommended. The pre-trip seminars are conducted by the lead faculty and guest speakers. Students will prepare and present on topics during the seminars and will have opportunities to develop leadership skills. Within the focus country, students will travel as a group, meeting local health care professionals, student nurses, and nursing faculty. Students will volunteer alongside local providers, delivering care within their scope of practice and the boundaries delineated by the Ministry of Health. Opportunities to develop critical thinking skills, the nursing process and culturally sensitive care will be part of the pre-trip and in-country experiences. A post-trip seminar and a presentation to the community are also mandatory.

NURS 421 Population Health³ Credits

Approaches to care and finance in the community care setting. Application of population risk reduction used to develop nursing interventions for high risk aggregates.

Prerequisites: NURS 318/NURS 318L, NURS 329/NURS 329L, NURS 333, and NURS 400.

Corequisites: NURS 421L, and NURS 427/NURS 427L.

Terms Typically Offered: Summer.

Fees: Yes.

NURS 421L Population Health Laboratory² Credits

Lab component required for NURS 421.

Prerequisites: NURS 318/NURS 318L, NURS 329/NURS 329L, NURS 333, and NURS 400.

Corequisites: NURS 421, and NURS 427/NURS 427L.

Fees: Yes.

NURS 426 Nursing Research and Evidence-Based Practice³ Credits

Emphasis on nursing research and evidence-based practice in the process of scholarly inquiry in health care. Examination of research methodologies and related theories to facilitate development of a research proposal to investigate health care questions and outcomes.

Prerequisites: MATH 110 or higher and STAT 200.

Terms Typically Offered: Fall, Spring.

NURS 427 Mental Health³ Credits

Exploration of psychosocial integrity with emphasis on the function and responsibility of nursing in promoting and maintaining mental health of individuals and families. This course emphasizes communication and caring through the application of the therapeutic relationship and nursing process in the care and treatment of common clinical conditions/disorders.

Prerequisites: NURS 318/NURS 318L, NURS 329/NURS 329L, NURS 333, and NURS 400.

Corequisites: NURS 421/NURS 421L, and NURS 427L.

Fees: Yes.

NURS 427L Mental Health Laboratory¹ Credit

Approaches to psychosocial integrity with emphasis on the function and responsibility of nursing in promoting and maintaining mental health of individuals and families. Students will develop proficiency in working with psychiatric clients in various settings in the community.

Prerequisites: NURS 318/NURS 318L, NURS 329/NURS 329L, NURS 333, and NURS 400.

Corequisites: NURS 421/NURS 421L, and NURS 427.

Fees: Yes.

NURS 429 Adult Health II³ Credits

Exploration of the role of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the complex medical and surgical health care needs of critically ill adult clients. Students are expected to integrate previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings.

Prerequisites: NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429L, NURS 431/NURS 431L, NURS 449/NURS 449L, and NURS 470L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 429L Adult Health II Laboratory³ Credits

Integration of previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings. In addition to inpatient acute care units, the student will rotate through the critical care areas of the health care facility.

Prerequisites: NURS 400, NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429, NURS 431/NURS 431L, NURS 449/NURS 449L, and NURS 470L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 430 Leadership for the RN³ Credits

Exploration of nurses functioning in leadership and management capacity at the baccalaureate level. Application of components of leadership to the delivery of care and the role of the nurse in shaping the future of health care. Examination of trends and issues impacting nursing and the future of health care delivery systems.

Prerequisites: Admission to the RN-BSN Program and NURS 426.

Corequisites: NURS 430L.

Terms Typically Offered: Fall, Spring, Summer.

NURS 430L Leadership for the RN Laboratory1 Credit

Application of theory into practice while functioning in a leadership and management capacity. Clarification of short and long-term career goals and plans for other aspects of entry into practice. Development and evaluation of individual learning objectives throughout the practice experience. Application of theory in the role of a mentor in a practice setting.

Prerequisites: Admission to the RN-BSN program and NURS 426.

Corequisites: NURS 430.

Terms Typically Offered: Fall, Spring, Summer.

NURS 431 High Risk Obstetrics and Pediatrics3 Credits

Exploration of advanced concepts in the care of the high-risk child-bearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the prenatal experience and altered functioning.

Prerequisites: NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429/NURS 429L, NURS 431L, NURS 449/NURS 449L, and NURS 470L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 431L High Risk Obstetrics and Pediatrics Laboratory2 Credits

Application of advanced concepts in the care of the high-risk child-bearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the prenatal experience and altered functioning.

Prerequisites: NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429/NURS 429L, NURS 431, NURS 449/NURS 449L, and NURS 470L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 432 Capstone Leadership for the RN4 Credits

Contributions of the registered nurse to quality healthcare through lifelong learning and professional development impacts quality of patient care and safety. The course will provide structure to develop and implement a formal professional plan to exhibit competency as a Baccalaureate prepared nurse in an ever-changing practice environment.

Prerequisites: NURS 300, NURS 320/NURS 320L, NURS 408, NURS 409, NURS 410/NURS 410L, NURS 418, and NURS 426, NURS 430/ NURS 430L.

Terms Typically Offered: Fall, Spring, Summer.

NURS 449 Leadership2 Credits

Exploration of leadership and management theory utilized in development of characteristics of a nurse leader. The role of the professional nurse as a change agent in shaping health care for the future is explored.

Prerequisites: NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429/NURS 429L, NURS 431/NURS 431L, NURS 449L, and NURS 470L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 449L Leadership Laboratory1 Credit

Application of leadership and management theory utilized in development of characteristics of a nurse leader. The focus is on the exploration and analysis of contemporary nursing practice and current evidence-based practice as the basis for nursing care in the clinical setting.

Prerequisites: NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429/NURS 429L, NURS 431/NURS 431L, NURS 449, and NURS 470L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 450 Intensive Care Areas Specialty Practice Preparedness3 Credits

Overview of the dynamics of the collaborative and independent nature of nursing practice within critical care, perioperative, and emergency nursing. Commonalities of practice areas will be explored within the context of the nursing process. Includes recognizing and analyzing pertinent diagnostic data and physical and psychosocial assessment data; identifying common patient health problems and interventions; and determining patient outcomes. Prerequisite to the in-depth specialty practice courses.

NURS 457 Obstetrical Nursing2 Credits

Introduction to nursing care of the childbearing family. Emphasis is on growth and developmentally appropriate management of the health needs of the mother and neonate. Exploration of psychological, psychosocial, and pathophysiological changes of the population. Application of nursing process to gather and analyze data and formulate interventions for the obstetrical patient and neonate within culturally diverse families.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 458, NURS 459L, NURS 472, and NURS 473/ NURS 473L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 458 Pediatric Nursing2 Credits

Introduction to nursing care of the child. Emphasis is on growth and developmentally appropriate management of the health and illness related needs of the child within the family. Exploration of physiological, psychosocial, and pathophysiological changes of the population. Application of nursing process to gather and analyze data and formulate interventions for children within culturally and socially diverse families.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 457, NURS 459L, NURS 472, and NURS 473/ NURS 473L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 459L Obstetrical and Pediatric Nursing Clinical3 Credits

Application of the nursing care of the childbearing family. Emphasis on growth and development and management of the health and illness needs of the mother, newborn, and child within the family. Exploration of nursing care in labor and delivery, post-partum, newborn, and pediatrics will incorporate physiological, psycho-social, and pathophysiological changes of the population.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 457, NURS 458, NURS 472, and NURS 473/ NURS 473L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 470L Capstone Laboratory2 Credits

Application of nursing principles and skills in an area of health care delivery. Critical thinking, lifelong learning, nursing process, caring, collaboration, and health teaching and promotion are emphasized.

Prerequisites: NURS 421/NURS 421L, and NURS 427/NURS 427L.

Corequisites: NURS 429/NURS 429L, NURS 431/NURS 431L, and NURS 449/NURS 449L.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 472 Professional Development II: Health Informatics 2 Credits

Exploration of information systems in health care and nursing practice. Exploration of current trends and issues in using, designing, and implementing health care information systems, healthcare information management, decision support, and knowledge management applications. Introduction of legal and ethical issues, management, and social networking tools in communicating health-related information.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 457, NURS 458, NURS 459L, and NURS 473/ NURS 473L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 473 Acute and Chronic Illness II 4 Credits

Application of critical thinking skills and the nursing process in caring for individuals in the acute care setting. Emphasis on disease pathophysiology, patient teaching, and continuity of care upon discharge. Exploration of coping mechanisms, adaptation, and implementation of health care strategies in acute illness.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 457, NURS 458, NURS 459L, NURS 472, NURS 473L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 473L Acute and Chronic Illness II Clinical 3 Credits

Application of theory to complete comprehensive assessments and plan care for patients in acute and critical care. Exploration of health problems in critical care, emergency, medical-surgical units, invasive procedure labs, renal dialysis, specialized healthcare teams, and other acute care clinical areas. Introduction of the high fidelity simulation lab.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 457, NURS 458, NURS 459L, NURS 472, NURS 473.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 480 Basic Concepts in Palliative Care 2 Credits

Provides basic theory about the practice of hospice and palliative care with focus on the consequences of progressive, predictable disease, providing attention to the whole person and family, and using scientific practice in developing treatment for pain and symptoms. Explores assessment, advanced communication skills, responses to loss, advance care planning, symptom management, and cultural and ethical issues.

Prerequisites: Prior RN degree and licensure, and current enrollment in the BSN program.

NURS 482 Professional Development III: The Professional Nurse 2 Credits

Exploration of transitioning into professional nursing practice. Emphasis on scope of practice, delegation, professional development, and licensure. Exploration of health care systems as they relate to quality improvement, patient outcomes, finance, and policy development.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 487/ NURS 487L, NURS 490/ NURS 490L, NURS 492, and NURS 493/ NURS 493L.

Fees: Yes.

NURS 487 Community and Population Nursing 3 Credits

Exploration of theoretical basis for community and population health and the role of the nurse. Exploration of microsystems, applications of transitions of care, financing concepts in the community setting, and analysis of the health of populations. Emphasis on health promotion, disease prevention, using epidemiology, environmental health, health policy, aggregates, systems, populations, community assessment, and community interventions.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 482, NURS 487L, NURS 490/ NURS 490L, NURS 492, and NURS 493/ NURS 493L.

Fees: Yes.

NURS 487L Community and Population Nursing Clinical 2 Credits

Application of theory in practice with diverse populations and aggregates in the community to achieve an optimum level of wellness. Emphasis on health disparities, cultural diversity, social justice, and health laws and policies related to population vulnerability throughout the lifespan. Exploration of the continuum of outpatient care in home health and collaboration with community services.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 482, NURS 487, NURS 490/ NURS 490L, NURS 492, and NURS 493/ NURS 493L.

Fees: Yes.

NURS 490 Nursing Leadership and Management 3 Credits

Exploration of leadership and management theories for application and entry into practice. Examination of nurse leaders and managers as change agents, personal leadership styles, trends and issues, and leadership strategies in local, state, and/or national practice settings for culturally diverse populations.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 482, NURS 487/ NURS 487L, NURS 490L, NURS 492, and NURS 493/ NURS 493L.

Fees: Yes.

NURS 490L Nursing Leadership and Management Clinical 1 Credit

Exploration of leadership and management theories for application and entry into practice. Examination of nurse leaders and managers as change agents, personal leadership styles, trends and issues, and leadership strategies in local, state, and/or national practice settings for culturally diverse populations.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 482, NURS 487/ NURS 487L, NURS 490, NURS 492, and NURS 493/ NURS 493L.

Fees: Yes.

NURS 492 Pharmacology for Nurses II 2 Credits

Application of concepts of clinical pharmacology including preparation for the NCLEX exam. Emphasis on major drug classifications, nursing considerations, and patient education. Exploration of ethical, legal, and economic factors.

Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.

Corequisites: NURS 482, NURS 487/ NURS 487L, NURS 490/ NURS 490L, and NURS 493/ NURS 493L.

Fees: Yes.

NURS 493 Senior Capstone1 Credit

Experiential learning under the direction of nurse preceptors and nursing faculty in a variety of practice settings. Emphasis is placed on the development of personal and professional strategies necessary to transition from the role of student to graduate nurse.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 482, NURS 487/NURS 487L, NURS 490/NURS 490L, NURS 492, and NURS 493L.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

NURS 493A Senior Capstone and Senior Capstone Clinical I2 Credits

Synthesis of theoretical nursing concepts through the use of case studies, application exercises, and simulation activities.

Prerequisites: Acceptance into CMU nursing program; AHA CPR certification.

Terms Typically Offered: Fall.

Fees: Yes.

NURS 493B Senior Capstone and Senior Capstone Clinical II2 Credits

Synthesis of knowledge and skills learned in the Baccalaureate program. Refinement of nursing practice skills in a safe learning environment using guided clinical experiences.

Prerequisites: Acceptance into CMU nursing program; AHA CPR certification.

Corequisites: NURS 482, NURS 487/NURS 487L, NURS 490/NURS 490L, NURS 492 and NURS 493A.

Terms Typically Offered: Spring.

Fees: Yes.

NURS 493L Senior Capstone Clinical3 Credits

Experiential learning under the direction of nurse preceptors and nursing faculty in a variety of practice settings. Emphasis is placed on the development of personal and professional strategies necessary to transition from the role of student to graduate nurse.

Prerequisites: Admission to the BSN program.

Corequisites: NURS 482, NURS 487/NURS 487L, NURS 490/NURS 490L, NURS 492, and NURS 493.

Fees: Yes.

NURS 495 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

NURS 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

NURS 499 Internship1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

NURS 500 Theoretical Foundations3 Credits

Exploration of the critical components of nursing knowledge, including concepts, philosophies, theories, and conceptual models. Evaluates the variety of ways to organize nursing knowledge. Explores the application of nursing theory and nursing knowledge in the healthcare environment.

Prerequisites: Admission to the MSN or DNP program.

NURS 501 Evidence-Based Practice3 Credits

Introduction to advanced research concepts and their relationship to evidence-based practice. Explores application of research, ethics, designs, and methods. Incorporates integration of clinical practice standards and guidelines for the purpose of promoting healthcare quality and safety.

Prerequisites: Admission to the Master of Science in Nursing or the Doctor of Nursing Practice degree programs.

Terms Typically Offered: Fall.

NURS 502 Technology for the Nurse Educator3 Credits

Exploration of educational technologies used to advance health education to build safe, quality learning communities. Legal and ethical issues related to challenges and opportunity for technology use, computer-literacy, information-literacy and informatics will be examined for teaching in a variety of health care organizations.

Prerequisites: Admission to the MSN program.

NURS 503 Organizational Leadership3 Credits

Utilizes leadership and management theory and application to develop skills or the understanding and implementation of change. Components of the course include leadership theory and models, change theory and models, project management and systems theory, financial management, organizational culture, and continuous process improvement.

Prerequisites: Admission to the MSN or DNP program.

NURS 504 Advanced Health Policy and Ethics2 Credits

Analysis of health policies to prepare for advanced nursing leadership roles. Health care policy, cultural, sociopolitical, and legal statutes will be explored on the local, national, and/or global level. Policy influences on ethical health care dilemmas will be evaluated.

Prerequisites: Admission to the MSN or DNP program.

NURS 505 Advanced Quality Improvement and Leadership3 Credits

Approaches to outcomes-based quality assessment and improvement. Focuses on leading techniques of measuring quality of care, customer satisfaction, and safety. Implementation of quality management programs, and creating a culture of supporting adherence to best practices and standards.

Prerequisites: Admission to the MSN or DNP program.

NURS 525 Advanced Pathophysiology3 Credits

Exploration of physiologic and pathophysiologic processes underlying health and disease across the lifespan. Includes cellular, genetic, and environmental factors that impact human health and illness.

Prerequisites: Admission to the MSN or DNP program.

NURS 526 Advanced Pharmacology for Nursing3 Credits

Pharmacology decision making and advanced management required for medication therapeutics. Assessment of advanced and in-depth evaluation of pharmacotherapeutics, pharmacokinetics, pharmacodynamics, contraindications and precautions, adverse effects, and drug interactions. Emphasis is on nurses' pharmacologic management of maximizing therapeutic effect, minimizing adverse effects, and patient and family education.

Prerequisites: NURS 525.

NURS 527 Advanced Health Assessment2 Credits

Demonstration of a focused and comprehensive health assessment of clients across the lifespan. Includes diverse populations, biological, psychological, sociological, spiritual, and cultural aspects.

Prerequisites: NURS 525.

Corequisites: NURS 577.

NURS 530 Chronic Illness Management3 Credits

Provides a framework for competency in chronic illness and disease which now accounts for a large percentage of the nation's health care costs. Introduction to the prevalence of chronic disease and its impact on the individual, family, community, and society is explored. Explores nursing's role in prevention and intervention of specific medical diseases, and psychosocial aspects of chronic illness and disability.

Prerequisites: Bachelor of Science in Nursing Degree.

NURS 535 Health Promotion and Disease Prevention² Credits

Theories and principles involved in planning, implementing, and evaluating interventions for health promotion and disease prevention across the lifespan. Focus is on behavior change at the individual and aggregate levels, while considering cultural variations of patient populations and ethical decision-making for nursing professionals. Factors underlying development of chronic illnesses are explored.

Prerequisites: Admission to the MSN or DNP program.

NURS 536 Leading Through Quality, Policy, and Ethics³ Credits

Survey of leadership theories and skills, quality improvement principles, health policies, and ethical and legal issues to prepare for advanced nursing roles on the local, national, and/or global level using evidence-based practice for contemporary social change and complex health care delivery systems.

Prerequisites: Admission to the MSN or DNP program.

Terms Typically Offered: Summer.

NURS 540 Teaching Strategies for the Nurse Educator³ Credits

Exploration of strategies to promote proficiency in teaching and learning. Teaching and learning theories, principles, and the application of teaching strategies that promote a positive learning environment will be explored for a variety of settings.

Prerequisites: Admission to the MSN Program.

NURS 545 Curriculum Design/Evaluation³ Credits

Approaches to curricular design and evaluation within nursing education. Program and course development for online, hybrid, and face-to-face courses, assessment and evaluation concepts, and basic legal and ethical issues for nursing education will be explored.

Prerequisites: Acceptance into the Master of Science of Nursing-Nurse Educator program.

Corequisites: NURS 545L.

NURS 545L Curriculum Design/Evaluation Laboratory¹ Credit

Approaches to curricular design and evaluation within nursing education. Program and course development for online, hybrid, and face-to-face courses, assessment and evaluation concepts, and basic legal and ethical issues for nursing education will be explored.

Prerequisites: Acceptance to the Master of Science in Nursing program.

Corequisites: NURS 545.

Terms Typically Offered: Fall.

NURS 560 Nurse Educator Practicum³ Credits

Application of nursing teaching theory in a variety of teaching settings. Integrates knowledge from previous courses and includes opportunities to participate in all aspects of the educator role.

Prerequisites: NURS 502, NURS 540, and NURS 545/NURS 545L.

Corequisites: NURS 565.

NURS 565 Role Development: Nurse Educator³ Credits

Exploration of the role and responsibilities of a nurse educator in a variety of settings will be discovered. Concepts and issues specific to nurse educators will be examined, while concluding this course through a comprehensive literature review on a topic of choice related to a nurse educator role.

Prerequisites: NURS 545/NURS 545L.

Corequisites: NURS 560.

Terms Typically Offered: Spring.

NURS 575 Capstone Project³ Credits

Development of capstone project demonstrates synthesis of graduate work and establishes groundwork for future scholarship. Capstone project reflects the student's clinical practice setting with a selected population group. Culminates in a formal paper and presentation in an academic setting.

Prerequisites: NURS 500, NURS 501, NURS 502, NURS 503, NURS 504, NURS 505, NURS 525, NURS 526, and NURS 527.

NURS 577 Clinical Practicum: Advanced Health Assessment¹ Credit

Application of didactic content related to advanced health assessment of individuals across the lifespan.

Prerequisites: NURS 525.

Corequisites: NURS 527.

Terms Typically Offered: Spring.

NURS 580 Thesis³ Credits

Development of thesis. Synthesis of graduate work. Establishes groundwork for future scholarship. Topic chosen for thesis should reflect the student's nursing practice setting with a selected population group. Thesis project involves original research. Culminates in dissemination of findings in a formal paper to be submitted for publication.

Prerequisites: NURS 500, NURS 501, NURS 502, NURS 503, NURS 504, NURS 505, NURS 525, NURS 526, and NURS 527.

NURS 586 Clinical Procedures and Diagnostic Testing I¹ Credit

Exploration of common clinical procedures and diagnostic tests performed by primary care nurse practitioners.

Prerequisites: NURS 525, NURS 526, NURS 527 and NURS 577.

Terms Typically Offered: Summer.

NURS 588 Clinical Procedures and Diagnostic Testing II¹ Credit

Exploration of common clinical procedures and diagnostic tests performed by primary care nurse practitioners.

Prerequisites: NURS 525, NURS 526, NURS 527 and NURS 577.

Terms Typically Offered: Summer.

NURS 595 Independent Study¹⁻³ Credits

Course may be taken multiple times up to maximum of 6 credit hours.

NURS 596 Topics:¹⁻³ Credits

Course may be taken multiple times up to maximum of 15 credit hours.

NURS 600 Advanced Practice Nursing Issues² Credits

Roles and responsibilities of the nurse practitioner in augmenting client health and health services. Examines the history of nurse practitioners, client relations, and legal and ethical considerations. Interdisciplinary teams, health policy formation and political strategies considered. Professional involvement and practice, leadership, collaboration and teamwork in various settings examined.

Prerequisites: Bachelor of Science in Nursing Degree, Master of Science in Nursing Degree, or completion of 500-level coursework.

NURS 601 Primary Care of the Infant, Child, and Adolescent³ Credits

Focuses on primary care of the child and adolescent, beginning with the newborn. Growth, nutrition, well client care and guidance, assessment, diagnosis and management of acute and chronic conditions in the client population. Culture and ethnic considerations, child development, family, environment theories and concepts integrated throughout the didactic and clinical components.

Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.

Corequisites: NURS 610.

NURS 602 Primary Care of the Adult3 Credits

Exploration of the role of the primary care nurse practitioner in adult health. Emphasis on clinical presentation, physical examination, diagnostic testing, differential diagnosis, and management of acute and chronic conditions affecting adult populations. Application of clinical practice guidelines, inter-disciplinary care, health promotion, and disease prevention in adult patients in the primary care setting.

Prerequisites: Admission to the MSN or DNP program..

Corequisites: NURS 620.

NURS 603 Primary Care of the Older Person3 Credits

Focus on the primary care nurse practitioner's role in older adult health. Emphasis on clinical presentation, physical examination, diagnostic testing, differential diagnosis, and management of acute and chronic conditions affecting older adult populations. Explores the application of clinical practice guidelines, inter-disciplinary care, health promotion, and disease prevention in older adults in primary care settings.

Prerequisites: Admission to the MSN or DNP program.

Corequisites: NURS 630.

NURS 604 Primary Care of Rural and Underserved Populations: Capstone1 Credit

Synthesis of primary care in the unique role of an advanced practice nurse. Emphasis on rural populations and nursing's ethical code for care of underserved populations.

Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.

Corequisites: NURS 640.

NURS 605 Mental and Behavioral Health2 Credits

Exploration of mental and behavioral health disorders seen and managed in the primary care setting. Review of clinical presentations, diagnostic reasoning, and therapeutic management options for individuals with mental and behavioral health conditions seen in primary care settings.

Prerequisites: Admission to the MSN or DNP program.

Corequisites: NURS 615.

Terms Typically Offered: Fall.

NURS 610 Clinical Practicum: Infant, Child, and Adolescent2 Credits

Application of theoretical concepts of primary care in care of infants, children, and adolescents. Integration of health assessment, pathophysiology, pharmacology, health promotion and disease prevention, and chronic and acute illness management in clinical practice as an advanced practice nurse.

Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.

Corequisites: NURS 601.

NURS 615 Clinical Practicum: Mental and Behavioral Health1 Credit

Application of clinical assessment, diagnostic reasoning, and therapeutic management of mental and behavioral health disorders seen and managed in the primary care setting.

Prerequisites: Admission to the MSN or DNP program.

Corequisites: NURS 605.

Terms Typically Offered: Fall.

NURS 620 Clinical Practicum: Adult3 Credits

Application of theoretical concepts of primary care of families with a concentration on adult patients and the environments where adult primary care is rendered. Students are supervised by community-based clinical preceptors and course faculty in the assessment, diagnostic and laboratory evaluation, and management of families across the continuum of health and illness.

Prerequisites: Admission to the MSN or DNP program.

Corequisites: NURS 602.

NURS 625 Statistics for Health Sciences3 Credits

Exploration of commonly used statistical methods and procedures used for health science research and practice. Students develop data sets and perform a variety of statistical tests using statistical software packages.

Prerequisites: NURS 500, NURS 501, NURS 502, NURS 503, NURS 504, NURS 505, NURS 525, NURS 526, and NURS 527.

NURS 626 Clinical Epidemiology3 Credits

Exploration of epidemiological concepts as applied to public health. Translating evidence and evaluating the impact of policies and programs in public health investigation. Includes dynamic behavior of disease, usage of rates, ratios and proportions, study designs for application of epidemiology in health services, screening, genetics, and environmental policy.

Prerequisites: NURS 525, NURS 526, NURS 527, NURS 602, and NURS 620.

NURS 627 Health Information Systems in Advanced Nursing Practice2 Credits

Exploration of information systems in health care and advanced nursing practice. Trends and issues in using, designing, implementing, and managing health care information systems as a disciplinary science for advanced nursing practice will be examined.

Prerequisites: Admission to the DNP Program.

Terms Typically Offered: Summer.

NURS 630 Clinical Practicum: Older Person2 Credits

Application of theoretical concepts of primary care for older adults. Integration of health assessment, pathophysiology, pharmacology, health promotion and disease prevention, and chronic and acute illness management in the care of older persons as an advanced practice registered nurse.

Prerequisites: Admission to the MSN or DNP program.

Corequisites: NURS 603.

NURS 640 Clinical Practicum Capstone: Primary Care of Rural and Underserved Populations3 Credits

Application of theoretical concepts of primary care across the lifespan with particular emphasis on rural and/or underserved populations. Explores unique aspects of the advanced practice nursing role as a primary care provider in rural and underserved populations in health care.

Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.

Corequisites: NURS 604

NURS 650 Clinical Preceptorship I3 Credits

Integration of preceding clinical and didactic course knowledge and skills. Experience in the role of advanced nursing practice with an approved preceptor/mentor.

Prerequisites: Acceptance to the DNP program and NURS 660.

NURS 652 Clinical Preceptorship II3 Credits

Synthesis of preceding clinical and didactic course knowledge and skills. Experience in the role of advanced nursing practice with an approved preceptor/mentor.

Prerequisites: NURS 650.

Terms Typically Offered: Fall, Spring.

NURS 660 Doctor of Nursing Practice Scholarly Project: Identification2 Credits

Concepts of leadership and autonomy for the Doctor of Nursing Practice. Needs assessment for identification of a gap in clinical practice and project problem are formalized. Professional practice and collaboration are demonstrated.

Prerequisites: NURS 600, NURS 602, NURS 604, NURS 620, NURS 625, NURS 626, and NURS 640.

NURS 697 Clinical Practicum: Advanced Healthcare Leadership1-9 Credits

Application of theory and research methods to the clinical leadership experiences.

Terms Typically Offered: Summer.

Course may be taken multiple times up to maximum of 9 credit hours.

NURS 700 Translational Evidence-Based Practice2 Credits

Strategies to incorporate research findings into the clinical setting. Critical appraisal of the evidence in guiding patients or systems in improvement or implementation. Translation of evidence-based methods to establish the association between observed outcomes and intervention. Criteria for causal inferences, legal and ethical issues, associations between risk factors and disease outcomes will be explored.

Prerequisites: Admission to the MSN or DNP program.

NURS 725 Doctor of Nursing Practice Scholarly Project: Development2 Credits

Synthesis of available knowledge and literature in development and refinement of the scholarly project purpose. Nature and significance of the problem are constructed in a logical sequence to support the purpose.

Prerequisites: NURS 660.

Terms Typically Offered: Fall.

NURS 750 Doctor of Nursing Practice Scholarly Project: Design and Defend3 Credits

Final development of scholarly project proposal that demonstrates synthesis of doctoral work. Emphasis on evidence-based practice models and methods, culminating with a proposal defense to improve practice or patient outcomes.

Prerequisites: NURS 725.

NURS 760 Doctor of Nursing Practice Scholarly Project: Implementation and Evaluation3 Credits

Culmination of scholarly project, including translation of evidence to address a gap in practice or to inform clinical practice at an individual or aggregate level. Implementation and evaluation of improvements in practice and outcomes of care. Project follows a systematic process and lays the groundwork for future scholarship.

Prerequisites: NURS 750.

NURS 795 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Occupational Therapy (OCCU)

OCCU 510 Scholarship and Research2 Credits

Foundational basis to inspire ethical decision making and the scholarship of research in health care. Exploration of the relationship between theory, research, and practice, with application to the research process, collecting and analyzing quantitative and qualitative data, as well as developing skills for scholarly writing.

Prerequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 515, OCCU 516, and OCCU 550.

Corequisites: OCCU 520, OCCU 522, and OCCU 523.

Terms Typically Offered: Summer.

OCCU 511 Lifespan and Occupational Performance2 Credits

Exploration of the concept of occupation across the lifespan, from prenatal development to death. The role of occupation as central to health is explored as influenced by culture, disability, ethnicity, illness, and geographic location.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 512, OCCU 513, OCCU 514, OCCU 515, OCCU 516, and OCCU 550.

Terms Typically Offered: Spring.

OCCU 512 Professional Skills and Occupation-Based Practice I2 Credits

Analysis of occupation from an in-depth look at its various forms as defined in the Occupational Therapy Practice Framework, including activity demands for all ages. Students learn to compare, contrast, and choose occupation-based activities based upon activity demands, culture, social, personal, and temporal contexts across the lifespan for diverse populations. Introduction of formal and informal assessments to inform practice.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 511, OCCU 513, OCCU 514, OCCU 515, OCCU 516, and OCCU 550.

Terms Typically Offered: Spring.

Fees: Yes.

OCCU 513 Functional Anatomy and Movement3 Credits

Integrated, theoretical, and functional approaches to studying anatomy and movement across the lifespan. Includes the principles of movement, body alignment, joint structure, muscle actions, and motor planning as the basis to assess typical and atypical movement during life tasks.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 511, OCCU 512, OCCU 514, OCCU 515, OCCU 516, and OCCU 550.

Terms Typically Offered: Spring.

Fees: Yes.

OCCU 514 Wellness and Occupational Performance2 Credits

Examination of the relationship between occupation and wellness within a range of community settings.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 515, OCCU 516, and OCCU 550.

Terms Typically Offered: Spring.

Fees: Yes.

OCCU 515 Occupation-Based Practice and Theory for Older Adults4 Credits

In-depth analysis of occupation-based practice and theory, focused on older adults living with physical, mental, and/or emotional conditions. Topics include: applied occupational therapy skills, application of safety regulations, teaching clients wheelchair and bed mobility, and using evidence-based research to support occupational therapy interventions focused on client-centered occupational participation.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 516, OCCU 550.

Terms Typically Offered: Spring.

OCCU 516 History and Theoretical Foundations of Occupational Therapy1 Credit

Introduction to the history of the occupational therapy profession, occupational science, and theories. Skills associated with analysis, critical reasoning, and theory development associated with the occupational therapy process.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 515, and OCCU 550.

Terms Typically Offered: Spring.

OCCU 520 Brain, Behavior and Occupation2 Credits

Foundational neuroscience preparation, including nervous system development and plasticity in typical development as well as in response to trauma and disease. Topics include the neuronal pathways underlying function with emphasis on sensation, movement, cognition and pain. By analyzing differences in central and peripheral nervous system functions, students learn to articulate how occupational performance affects, and is affected by, neurological processing.

Prerequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 515, OCCU 516, and OCCU 550.

Corequisites: OCCU 510, OCCU 522, and OCCU 523.

Terms Typically Offered: Summer.

OCCU 522 Professional Skills and Occupation-Based Practice II2 Credits

Investigation of occupation and activities using the Occupational Therapy Practice Framework (OTPF), focusing on adults living with acute or chronic health conditions. Acquisition of skills to administer and interpret evaluations used in practice. Prepares the student to compare, contrast, and choose occupation-based activities based upon activity demands, culture, social, personal, and temporal contexts for diverse populations.

Prerequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 515, OCCU 516, and OCCU 550.

Corequisites: OCCU 510, OCCU 520, and OCCU 523.

Terms Typically Offered: Summer.

Fees: Yes.

OCCU 523 Occupation-Based Practice and Theory for Adults4 Credits

In-depth analysis of occupation-based practice and theory focused on adults living with acute or chronic illness and other occupational performance issues.

Prerequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 515, OCCU 516, OCCU 550.

Corequisites: OCCU 510, OCCU 520, and OCCU 522.

Terms Typically Offered: Summer.

OCCU 530 Scholarship and Evidence-Based Practice I2 Credits

Development of skills to explore and use evidence to support practice. Continued exploration of the evidence-based literature requiring analysis, interpretation, and synthesis of data, inclusive of quantitative and qualitative research, systematic and scoping reviews, critical appraisal of research, and case studies.

Prerequisites: OCCU 510, OCCU 520, OCCU 522, and OCCU 523.

Corequisites: OCCU 531, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Terms Typically Offered: Fall.

OCCU 531 Occupation-Based Practice and Theory for Children and Adolescents4 Credits

In-depth analysis of occupation-based practice & theory focused on infants, children, and adolescents living with developmental or acquired health conditions and their caregivers. Topics include the occupational therapy process for a variety of settings and how client-centered occupational therapy influences physical, mental, and emotional health.

Prerequisites: OCCU 510, OCCU 520, OCCU 522, and OCCU 523.

Corequisites: OCCU 530, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Terms Typically Offered: Fall.

Fees: Yes.

OCCU 532 Assistive Technology and Occupation2 Credits

Exploration of assistive technology and adapted equipment to improve quality of life and participation in everyday occupations and daily life tasks. This course will cover topics related to: assessment, design, fabrication, application, and training in assistive technologies and devices to improve occupational performance.

Prerequisites: OCCU 510, OCCU 520, OCCU 522, and OCCU 523.

Corequisites: OCCU 530, OCCU 531, OCCU 533, OCCU 534, and OCCU 552.

Terms Typically Offered: Fall.

Fees: Yes.

OCCU 533 Telehealth, Occupation and Modalities2 Credits

Investigation and analysis of the appropriate application of telehealth, as well as the safe and effective use of physical agent modalities (PAMs) to support function and occupational engagement. Topics include the use of telehealth for urban and rural populations and clinical decision making for use of modalities in practice to support occupational engagement.

Prerequisites: OCCU 510, OCCU 520, OCCU 522, and OCCU 523.

Corequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 534, and OCCU 552.

Terms Typically Offered: Fall.

Fees: Yes.

OCCU 534 Occupational Therapy and Mental Health Practice1 Credit

Approaches to provisions of occupational therapy services in mental and behavioral health settings, educational settings, work, and community. Practice models, assessments, and intervention planning skills will be developed.

Prerequisites: OCCU 510, OCCU 520, OCCU 522, and OCCU 523.

Corequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, and OCCU 552.

Terms Typically Offered: Fall.

OCCU 540 Scholarship and Evidence-Based Practice II2 Credits

Application of research concepts leading to a research protocol and proposal for submission to an Institutional Review Board. Skills include methods of data collection and analysis, as well as preparation of a scholarly report.

Prerequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Corequisites: OCCU 541, OCCU 542, OCCU 543, OCCU 553, and OCCU 593.

Terms Typically Offered: Spring.

OCCU 541 Leadership and Ethics in Occupational Therapy2 Credits

Preparation in leadership skills for assuming roles requiring ethical prioritizing and professional decision making. Topics include: policy development, advocacy, business aspects of practice, legislation affecting practice, marketing the delivery of services, quality management and improvement as well as ethical decision making, and supervision of personnel.

Prerequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Corequisites: OCCU 540, OCCU 542, OCCU 543, OCCU 553, and OCCU 593.

Terms Typically Offered: Spring.

OCCU 542 Occupation-Based Practice and Theory for Populations4 Credits

In-depth investigation of occupation and activities utilizing the Occupational Therapy Practice Framework (OTPF) for populations experiencing chronic health problems due to complex socio-cultural-economic-political factors (e.g., homelessness; drug addiction; diabetes). Skills developed include creation and application of occupation-based activities to improve quality of life and occupational engagement.

Prerequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Corequisites: OCCU 540, OCCU 541, OCCU 543, OCCU 553, and OCCU 593.

Terms Typically Offered: Spring.

OCCU 543 Professional Development Preparation2 Credits

Preparation in the attitudes and skills necessary for practice. Students will gain competency in the occupational therapy process by evaluating written and actual standardized patients/clients representing clinical populations.

Prerequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Corequisites: OCCU 540, OCCU 541, OCCU 542, OCCU 553, and OCCU 593.

Terms Typically Offered: Spring.

OCCU 550 Fieldwork Level IA and Seminar1 Credit

Participation in traditional and emerging practice areas in wellness communities for older adults. Includes behavioral health, followed by discussion of health and wellness in older adult communities. Hands-on experience interacting with groups of at-risk individuals during activities, with a focus on health promotion and occupational engagement.

Prerequisites: Admission into the Master of Science in Occupational Therapy program.

Corequisites: OCCU 511, OCCU 512, OCCU 513, OCCU 514, OCCU 515, and OCCU 516.

Terms Typically Offered: Spring.

Fees: Yes.

OCCU 552 Fieldwork Level IC and Seminar2 Credits

Participation in traditional and emerging practice areas, inclusive of behavioral health, where occupation is the focus of intervention for infants, children, and adolescents with congenital or acquired disability. Exploration of factors influencing occupational performance and behavioral health via supervised hands-on experience and practice of professional skills.

Prerequisites: OCCU 520, OCCU 522, and OCCU 523.

Corequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, and OCCU 534.

Terms Typically Offered: Fall.

Fees: Yes.

OCCU 553 Fieldwork Level ID and Seminar with Inter-Professional Education2 Credits

Didactic and experiential course providing opportunities in analyzing diverse cases from multiple inter-professional perspectives to prepare the student for professional life. The student will experience a variety of professional perspectives including, but not limited to, special education, nursing, physical therapy, speech therapy, athletic training, physicians, and physician assistants. Emphasis on professional behavior preparation in the skills and attitudes for practice.

Prerequisites: OCCU 530, OCCU 531, OCCU 532, OCCU 533, OCCU 534, and OCCU 552.

Corequisites: OCCU 540, OCCU 541, OCCU 542, OCCU 543, and OCCU 593.

Terms Typically Offered: Spring.

Fees: Yes.

OCCU 554 Fieldwork Level IIA12 Credits

Fieldwork experience under the mentored supervision of a licensed occupational therapist. Includes an in-depth experience in delivering occupational therapy services to clients throughout the occupational therapy process. Students are expected to assume increasing responsibilities related to client care.

Prerequisites: OCCU 540, OCCU 541, OCCU 542, OCCU 543, and OCCU 553.

Terms Typically Offered: Summer.

OCCU 555 Fieldwork Level IIB12 Credits

Mentored experience in the evaluation and treatment of individuals from a different age group, health condition and setting other than the Level IIA Fieldwork. Conducted under the supervision of a licensed occupational therapist.

Prerequisites: OCCU 554.

Corequisites: OCCU 594.

Terms Typically Offered: Fall.

OCCU 593 Occupational Therapy Culminating Experience1 Credit

Culminating experience to demonstrate synthesis of knowledge gained from a graduate-level research project. Research findings will be disseminated to peers, stakeholders, and wider audiences through poster presentations and submission of a manuscript to a scholarly journal. Emphasis on contributing to the growth and dissemination of research and knowledge in the occupational therapy profession.

Prerequisites: Admission into the Master of Science in Occupational Therapy program, OCCU 530, OCCU 531, OCCU 532, OCCU 533, and OCCU 552.

Corequisites: OCCU 540, OCCU 541, OCCU 542, OCCU 543, and OCCU 553.

Terms Typically Offered: Spring.

OCCU 594 Fieldwork Seminar1 Credit

Consultation with AFWC on culminating project ensuring synthesis and integration of MSOT curriculum and assessment of practical knowledge. Completion of Fieldwork Level IIA.

Prerequisites: OCCU 554.

Corequisites: OCCU 555.

Terms Typically Offered: Fall.

OCCU 596 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Outdoor Recreation Industry Studies (OREC)

OREC 100 Leave No Trace1 Credit

Exploration of Leave No Trace principles and the history, goals and objectives of the Leave No Trace mission. Includes controversial ideas cornering wildland ethics and impacts of recreational use on wildlands and ecosystems, as well as a Leave No Trace Trainer certification and the ability to lead Leave No Trace Awareness workshops.

Terms Typically Offered: Fall, Spring.

OREC 104 Orienteering1 Credit

Introduction to the science of orienteering. Emphasis on acquiring a respect for the environment by route finding in a "low-impact" manner and gaining the knowledge to comfortably navigate from a map.

Corequisites: OREC 105.

Terms Typically Offered: Fall, Spring.

OREC 105 Backpacking1 Credit

Introduction to the basics of backpacking. Foundational technical skills required to successfully and safely perform an overnight backpacking trip in a wilderness setting. Focuses on technical specifications and proper use of equipment, how to properly load and carry a backpack, campsite selection, camp cooking, water treatment and Leave No Trace etiquette.

Corequisites: OREC 104.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

OREC 108 Stand Up Paddle Boarding1 Credit

Foundational skills required to develop and refine effective Stand Up Paddle Board (SUP) navigation in moving flatwater and lake settings. Focuses on the knowledge of SUP equipment, proper safety precautions, SUP movement, basic hydrology, flatwater self-rescue skills, and overall water and SUP safety.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

OREC 109 Kayaking1 Credit

Introduction to basic kayak and water reading skills. Students will learn kayaking safety, hazard evaluation, terminology, whitewater river reading skills, and paddling strokes.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

OREC 110 River Rafting1 Credit

Introduction to whitewater rafting skills and knowledge. Students will learn about river trip planning, safety procedures, equipment, logistics, and minimizing environmental impact.

Terms Typically Offered: Fall, Summer.

Fees: Yes.

OREC 112 Rock Climbing III1 Credit

Foundational technical skills required to move into outdoor climbing locations. Focus on teaching an in depth and standardized understanding of the skills essential to progressing into both sport and traditional lead climbing, anchor building, and overall climbing site safety.

Prerequisites: KINA 111.

Terms Typically Offered: Fall, Spring.

OREC 135 Backcountry Winter Travel1 Credit

Foundational and technical skills required to travel in the backcountry in winter conditions. Will utilize a variety of travel methods including skis, split boards, snowshoes, and cross country skis. Focus is on proper gear use, travel in extreme cold conditions, proper terrain choices, and winter safety and survival techniques.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

OREC 205 Foundations of Outdoor Recreation Industry Studies3 Credits

Exploration of the outdoor recreation industry, including the history, ethics, and principles of this sector. Covers legislation, policy, economics, and theory, and addresses the industry accords of economic development; education and workforce; health and wellness; diversity, equity, and inclusion; and conservation and stewardship. Examines different sectors of the outdoor recreation industry, including outlining job opportunities and industry potential.

Terms Typically Offered: Fall, Spring.

OREC 305 Outdoor Industry Business3 Credits

Examination of leadership, ethics, and organizational culture in outdoor industry businesses, including law and finance, brand management and strategic marketing, innovation and entrepreneurship, product design and service development, liability and risk management and corporate social responsibility. Explores the quantitative and analytical techniques used in product and service-based businesses, including planning and management.

Prerequisites: OREC 205.

Terms Typically Offered: Fall, Spring.

OREC 311 Avalanche Rescue Techniques and Theory3 Credits

Theoretical background and essential skills for responding to emergencies and rescues in avalanche terrain, including stability analysis, terrain evaluation, travel techniques and decision-making tools. Advanced search and rescue techniques will be taught.

Prerequisites: OREC 135.

Terms Typically Offered: Spring.

Fees: Yes.

OREC 312 Swiftwater Rescue Techniques and Theory3 Credits

Theoretical background and essential skills for responding to emergencies and rescues in a moving water environment. Explores swiftwater rescue professional avenues and the evidence basis for modern rescue techniques. Technical rescue skills and wilderness medical consideration are integrated in scenarios where students are challenged to work on individual skills while simultaneously demanding coordinated teamwork.

Prerequisites: OREC 108, OREC 109, or OREC 110.

Terms Typically Offered: Fall.

Fees: Yes.

OREC 313 Rock Climbing Instructor and Rope Rescue3 Credits

In-depth and standardized understanding of the skills essential to teaching climbing in an outdoor setting and intensive training in rope rescue fundamentals. Prepares students to set-up and manage groups of climbers on technical terrain with non-technical access. Includes the setup of top rope anchors, belay instruction and management, and site evaluation. Reviews current research and the evidence basis for techniques.

Prerequisites: OREC 112.

Terms Typically Offered: Fall.

OREC 315 Professional Outdoor Guide3 Credits

Exploration of minimal impact recreation practices, expedition nutrition and backcountry cooking, technical rescue skills, wilderness safety, and comprehensive and practical training for leaders in remote areas. Topics include the essential principles and skills required to assess and manage a group of people in isolated and extreme environments.

Prerequisites: OREC 104, OREC 105, and OREC 112.

Terms Typically Offered: Spring.

OREC 335 Public Lands Management3 Credits

Exploration of the field of public lands and resource management. Examines the role of federal, state, tribal, and local governments, businesses, non-governmental organizations, recreation users, and wildlife in public lands. Examines histories, current issues, and cultural trends in public lands agencies, as well as policies that govern land management.

Prerequisites: OREC 205.

Terms Typically Offered: Spring.

OREC 350 Community Health and the Outdoor Recreation Industry3 Credits

Principles that promote outdoor recreation as essential to community, corporate, and individual health. Addresses equitable access to community outdoor resources; examines data on nature's health benefits; investigates cross-sector partnerships and funding to create a healthy workforce and community.

Prerequisites: OREC 205.

Terms Typically Offered: Fall, Spring.

OREC 405 Outdoor Recreation Leadership, Programming, Education, and Assessment3 Credits

Practical skills of teaching, facilitation, education, sequencing and assessment of outdoor and adventure activities. Explores leadership as an essential component in the transformation of a group into a high functioning team all focused on a shared goal and outcome.

Prerequisites: OREC 205 and two of the following: OREC 311, OREC 312, OREC 313, or OREC 315.

Terms Typically Offered: Fall, Spring.

OREC 499 Internship3-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Pharmacy Technician (PHTE)

PHTE 111 Introduction to Pharmacy3 Credits

Introduction to the practice of pharmacy and the work that pharmacy technicians perform. Provides an overview of careers within the field; educational, certification and accreditation requirements; ethical and legal responsibilities; pharmacology; as well as a variety of issues that touch on attitudes, values and beliefs of successful pharmacy technicians.

Terms Typically Offered: Fall.

PHTE 112 Pharmacy Law and Ethics2 Credits

Introduction to the laws, regulations, and agencies that pertain to pharmacy practice and the role that technicians play to ensure compliance. Establishes a foundation of ethical behavior and decision-making and discusses the consequences of violating laws and ethical principles.

Terms Typically Offered: Fall.

PHTE 114 Computer Skills for Pharmacy Technicians1 Credit

Introduction to basic pharmacy and computer terminology and applications of a pharmacy management system. Focuses on the practice of pharmacy and the multiple operations that contribute to safe and effective patient care and discusses the roles and responsibilities of pharmacists and pharmacy technicians in computer-based systems.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

PHTE 115 Pharmacology I3 Credits

Fundamentals of pharmacology, the pharmacokinetic phases, and the basic concepts of normal body function. Examines diseases which impact the various body systems and the drugs used to treat such diseases emphasizing disease states and drug therapy.

Terms Typically Offered: Fall.

PHTE 116 Institutional Pharmacy3 Credits

Exploration of the role of pharmacy technicians and the practice of pharmacy in the institutional setting. This course covers institutional and pharmacy organization, terminology, medication distribution systems, packaging, and preparation of intravenous admixtures.

Terms Typically Offered: Fall.

Fees: Yes.

PHTE 118 Pharmacology II3 Credits

Examination of disease states, which impact the various body systems, and the drugs used to treat such diseases. Emphasizes disease state management and drug therapy. Serves as the second part of the two-part presentation of the basic concepts of pharmacology.

Prerequisites: PHTE 115.

Terms Typically Offered: Spring.

PHTE 119 Community Pharmacy3 Credits

Tasks and responsibilities involved in the practice of pharmacy in a community setting. Emphasizes chain and independent community pharmacy practice and other related practice settings, such as consultant pharmacy, mail order pharmacy, and nuclear pharmacy.

Terms Typically Offered: Spring.

Fees: Yes.

PHTE 170 Pharmacy Clinical I3 Credits

Hands-on experience in a pharmacy setting. Students must be supervised by a licensed pharmacist or qualified designee and are expected to participate in activities delineated in the Clinical Site Manual, such as dispensing, compounding, inventory handling and control, drug distribution, and/or preparation of intravenous products.

Prerequisites: PHTE 111, PHTE 112, PHTE 115, PHTE 116, and PHTE 235.

Corequisites: PHTE 114, PHTE 118 and PHTE 119.

Terms Typically Offered: Fall, Spring, Summer.

PHTE 171 Pharmacy Clinical II2 Credits

Hands-on experience in a pharmacy setting. Supervision by a licensed pharmacist or qualified designee required and are expected to participate in activities delineated in the Clinical Site Manual, such as dispensing, inventory handling and control, drug distribution, processing of third-party claims, and communication with patients.

Prerequisites: PHTE 111, PHTE 112, PHTE 114, PHTE 115, PHTE 116, PHTE 118, PHTE 119, PHTE 235, PHTE 250, and PHTE 255.

Terms Typically Offered: Fall, Spring, Summer.

PHTE 189 Review for PTCB National Exam1 Credit

Preparation and practice for national certification exam.

Terms Typically Offered: Spring.

PHTE 235 Calculations and Compounding Techniques4 Credits

Development of the necessary skills required to perform calculations essential to the duties of pharmacy technicians in a variety of contemporary settings. Applies these skills in hands-on compounding of pharmaceutical products emphasizing the importance of accuracy, quality, and infection control.

Terms Typically Offered: Fall.

Fees: Yes.

PHTE 250 Sterile Compounding and Aseptic Technique2 Credits

Overview of methods and regulation of sterile products as well as instruction and training for the mastery of aseptic technique and the successful production of sterile preparations. Prepares students for passing process validation checklists and provides comprehensive coverage of all procedures and techniques related to the skill sets necessary for sterile compounding.

Prerequisites: PHTE 111, PHTE 112, PHTE 114, PHTE 115, PHTE 116, PHTE 118, PHTE 119, and PHTE 235.

Terms Typically Offered: Fall.

Fees: Yes.

PHTE 255 Advanced Practice and Nontraditional Roles 2 Credits

Comparison of nontraditional roles and responsibilities for pharmacy technicians and compares career opportunities for pharmacy professionals as pharmacy practice expands into many new areas.

Prerequisites: PHTE 111, PHTE 112, PHTE 114, PHTE 115, PHTE 116, PHTE 118, PHTE 119, and PHTE 235.

Terms Typically Offered: Fall.

Fees: Yes.

Philosophy (PHIL)

PHIL 105 Critical Thinking-GTAH33 Credits

Introduction to the basic skill of critical reading, writing, and thinking needed for the intelligent, responsible, and ethical construction of one's worldview, conduct of one's life, and execution of one's civic duties.

Topics include: argument identification, analysis, and construction; avoidance of common fallacies of reasoning; common deceptive and manipulative uses of language; writing clear and convincing argumentative essays.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHIL 110 Introduction to Philosophy-GTAH33 Credits

Orientation to the discipline's concerns, branches, major schools of thought, and its relationship to other disciplines; a selection of readings from philosophers of all historical periods concerning major philosophical issues; practice in the process of philosophical reasoning, the critical analysis of philosophical writings, and the most basic rules of logic.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHIL 120 Ethics-GTAH33 Credits

Introduction to theoretical and applied ethics. Major moral philosophers and moral theories surveyed. A general approach to moral reasoning developed. Development applied to discussion of recent writings on issues such as: euthanasia, abortion, war, capital punishment, or affirmative action.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Spring.

PHIL 130 Philosophy of Religion-GTAH33 Credits

Exploration of fundamental issues regarding religion and examination of the principles of inquiry involved in dealing with such issues philosophically. Issues include the concept of God, arguments for the existence of God, the relationship between faith and reason, the validity of religious experience, and pluralism in world religions.

Essential Learning Categories: Humanities

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall.

PHIL 275 Introduction To Logic 3 Credits

Forms of reasoning, valid versus fallacious inferences, strong versus weak arguments. Designed to increase the ability to reason clearly and correctly, as well as to follow and critically evaluate the reasoning of others.

Terms Typically Offered: Fall.

PHIL 296 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PHIL 340 The Examined Life 3 Credits

Introduction to practical philosophy. The application of philosophy to one's life in order to work toward the Socratic goal of living well. Topics covered include: Socratic thought, wisdom, Epicureanism, Stoicism, mindfulness, limiting beliefs, acceptance of reality, the self, creativity.

PHIL 350 The Roots of Western Thought 3 Credits

Examination of the development of Western philosophical thought from its inception with the ancient Hellenes, through the Hellenistic and Medieval periods. Philosophical methods and problems will be discussed, including (but not limited to): ontology, metaphysics, political and social thought, death and the afterlife, the influence of philosophy on Christianity, the nature of the universe, human nature, the development of science and logic. Philosophers covered will include: The Presocratics, Socrates, Plato, Aristotle, Augustine, Aquinas, and others.

PHIL 395 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PHIL 396 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PHIL 410 Major Thinker 3 Credits

In-depth study of one or two important philosophers. Attention paid to their historical, cultural, scientific, and philosophical contexts.

Examination of relevant portions of the philosophers' works, arguments, objections, and responses. Additional emphasis on the place of the thinkers in the "great conversation" that is philosophy via related primary and secondary texts.

Course may be taken 4 times for credit.

PHIL 420 Major Works 3 Credits

In-depth study of the major and classic philosophical works of a philosopher or philosophical school. Emphasis on the historical, cultural, scientific, and philosophic contexts of the works. Examination of texts as they are situated in the philosopher's or school's opus, along with important influential writings preceding and following works influenced by these texts.

Course may be taken 4 times for credit.

PHIL 430 Major Issues 3 Credits

In-depth study of major and classic philosophical issues, with attention to their historical development, major contributors, and seminal texts. Exploration of the important works surrounding the issue and important objections and responses, with a view to developing individual positions. Course may be taken 4 times for credit.

PHIL 495 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PHIL 496 Topics 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Physical Therapy (PHYT)

PHYT 500 Anatomy 3 Credits

Introduction to advanced concepts in gross anatomy, anatomical relationships, and spatial orientation of normal anatomic structures and common anatomic variations.

Prerequisites: Admission into the Doctor of Physical Therapy program.

Corequisites: PHYT 500L.

Terms Typically Offered: Fall.

Fees: Yes.

PHYT 500L Anatomy Laboratory1 Credit

Introduction to advanced concepts in gross anatomy, anatomical relationships, and spatial orientation of normal anatomic structures and common anatomic variations. Laboratory experience accompanying PHYT 500.

Prerequisites: Admission into the Doctor of Physical Therapy program.

Corequisites: PHYT 500.

Terms Typically Offered: Fall.

PHYT 501 Histology1 Credit

Exploration of the basic cytology and histology of the human organism.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Terms Typically Offered: Fall.

PHYT 502 Physiology3 Credits

In-depth study of the normal functions and systems of the human body. Living processes are discussed at all hierarchical levels, molecular through organismic.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Terms Typically Offered: Fall.

PHYT 503 Kinesiology-Biomechanics I3 Credits

Analysis of normal human movement with detailed assessment of joint kinematics and kinetics.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Corequisites: PHYT 503L.

Terms Typically Offered: Fall.

Fees: Yes.

PHYT 503L Kinesiology-Biomechanics I Laboratory1 Credit

Analysis of normal human movement with detailed assessment of joint kinematics and kinetics. Laboratory experience accompanying PHYT 503.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Corequisites: PHYT 503.

Terms Typically Offered: Fall.

PHYT 504 Kinesiology-Biomechanics II3 Credits

Continuation of kinesiology with analysis of normal human movement and detailed assessment of joint kinematics and kinetics.

Prerequisites: PHYT 500/PHYT 500L and PHYT 503/PHYT 503L.

Corequisites: PHYT 504L.

Terms Typically Offered: Spring.

PHYT 504L Kinesiology-Biomechanics II Laboratory1 Credit

Continuation of kinesiology with analysis of normal human movement and detailed assessment of joint kinematics and kinetics. Laboratory experience accompanying PHYT 504.

Prerequisites: PHYT 500/PHYT 500L and PHYT 503/PHYT 503L.

Corequisites: PHYT 504.

Terms Typically Offered: Spring.

PHYT 505 Essential Skills and Laboratory3 Credits

Introduction to patient management, basic physical therapy procedures, and examination measures commonly used in physical therapy practice.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Terms Typically Offered: Fall.

Fees: Yes.

PHYT 506 Professional Practice Considerations I1 Credit

Exploration of professional ethics, values and responsibilities associated with physical therapy practice. Best practices for effectively educating others will also be introduced.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Terms Typically Offered: Fall.

PHYT 507 Professional Practice Considerations II2 Credits

Introduction to clinical reasoning and decision making, the ICF (International Classification of Functioning) model, the elements of patient/client management, documentation, and how to respond to emergencies in one's practice environment.

Prerequisites: PHYT 506.

Terms Typically Offered: Spring.

PHYT 509 Musculoskeletal Conditions I and Laboratory3 Credits

Examination, evaluation, and intervention strategies for common musculoskeletal disorders affecting the spine.

Prerequisites: PHYT 500/PHYT 500L and PHYT 503/PHYT 503L.

Corequisites: PHYT 504 and PHYT 504L.

Terms Typically Offered: Spring.

PHYT 510 Musculoskeletal Conditions II and Laboratory3 Credits

Examination, evaluation, and intervention strategies for common musculoskeletal disorders affecting the lower extremity.

Prerequisites: PHYT 509.

Terms Typically Offered: Summer.

PHYT 511 Musculoskeletal Conditions III and Laboratory3 Credits

Examination, evaluation, and intervention strategies for common musculoskeletal disorders affecting the upper extremity.

Prerequisites: PHYT 509.

Terms Typically Offered: Summer.

PHYT 512 Research I: Evidence-Based Practice3 Credits

Introduction to research methods with practical application concerning how to best integrate evidence into clinical practice.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Terms Typically Offered: Spring.

PHYT 513 Research II: Applied Statistics3 Credits

Analysis of common research designs and statistics used in the contemporary physical therapy literature.

Prerequisites: PHYT 512.

Terms Typically Offered: Summer.

PHYT 514 Diagnostic Imaging2 Credits

Introduction to the fundamentals of musculoskeletal imaging.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Terms Typically Offered: Spring.

PHYT 515 Therapeutic Modalities2 Credits

Exploration of the electrophysiologic agents used to treat patients in clinical practice.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Corequisites: PHYT 515L.

Terms Typically Offered: Spring.

Fees: Yes.

PHYT 515L Therapeutic Modalities Laboratory1 Credit

Exploration of the electrophysiologic agents used to treat patients in clinical practice. Laboratory experience accompanying PHYT 515.

Prerequisites: Admission to the Doctor of Physical Therapy program.

Corequisites: PHYT 515.

Terms Typically Offered: Spring.

PHYT 516 Pharmacology for Physical Therapy2 Credits

Exploration of the primary drug classes and the physiologic basis of their action.

Prerequisites: PHYT 502.

Terms Typically Offered: Summer.

PHYT 517 Neuroscience3 Credits

Orientation to the elements of the nervous system and how those elements interact to produce behavior.

Prerequisites: PHYT 501 and PHYT 502.

Terms Typically Offered: Summer.

PHYT 593 Capstone I2 Credits

Application of evidence-based principles to develop a clinical question dealing with diagnosis or intervention. Once identified, students will initiate a literature review to gather evidence to answer the clinical question.

Prerequisites: PHYT 513.

Terms Typically Offered: Fall.

PHYT 599 Clinical Education I3 Credits

Participation in full-time physical therapy practice under the direction of a licensed physical therapist at an assigned health care facility. Concentration on development of clinical skills as a novice clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: PHYT 600/PHYT 600L, PHYT 601, PHYT 604, PHYT 605, PHYT 606, and PHYT 607 as well as successful completion of the Matriculation Exam.

Terms Typically Offered: Spring.

PHYT 600 Exercise Physiology2 Credits

Exploration of the effects of various types of exercise upon human body structure and function in healthy persons and those with select health conditions.

Prerequisites: PHYT 502.

Corequisites: PHYT 600L.

Terms Typically Offered: Fall.

PHYT 600L Exercise Physiology Laboratory1 Credit

Exploration of the effects of various types of exercise upon human body structure and function in healthy persons and those with select health conditions. Laboratory experience accompanying PHYT 600.

Prerequisites: PHYT 502.

Corequisites: PHYT 600.

Terms Typically Offered: Fall.

PHYT 601 Neuromuscular Conditions I and Laboratory3 Credits

Examination, evaluation, and intervention strategies of neurologic disorders affecting adults.

Prerequisites: PHYT 517.

Terms Typically Offered: Fall, Spring.

PHYT 602 Neuromuscular Conditions II and Laboratory3 Credits

Continuation of the Neuromuscular course series. Focus is on examination, evaluation and intervention strategies of neurologic disorders affecting adults.

Prerequisites: PHYT 601.

Terms Typically Offered: Spring.

PHYT 603 Neuromuscular Conditions III and Laboratory3 Credits

Continuation of the Neuromuscular course series. Focus is on providing physical therapy services for patients with neuromuscular diseases and injury as well as incorporating the use of assistive technology and specialized techniques during rehabilitation.

Prerequisites: PHYT 602.

Terms Typically Offered: Summer.

PHYT 604 Medical and Surgical Conditions3 Credits

Overview of the principles of pathology as it applies to the various systems, diagnoses, and conditions that patients exhibit.

Prerequisites: PHYT 517.

Terms Typically Offered: Fall.

PHYT 605 Lifespan I: Pediatrics and Laboratory3 Credits

Provides foundational knowledge, skills, and abilities related to care of the pediatric patient/client.

Prerequisites: PHYT 504/PHYT 504L and PHYT 517.

Terms Typically Offered: Fall.

PHYT 606 Lifespan II: Geriatrics2 Credits

Foundational knowledge, skills, and abilities related to care of the geriatric patient/client.

Prerequisites: PHYT 504/PHYT 504L.

Terms Typically Offered: Fall.

PHYT 607 Therapeutic Exercise and Laboratory3 Credits

In-depth exploration of the theory and practical application of therapeutic exercise for patients with impairments categorized by body region.

Prerequisites: PHYT 504/PHYT 504L.

Terms Typically Offered: Fall.

PHYT 608 Professional Practice Considerations III2 Credits

Exploration of administration, management, finance, and law as it relates to physical therapy practice.

Prerequisites: PHYT 507.

Terms Typically Offered: Spring.

PHYT 609 Professional Practice Considerations IV2 Credits

Exploration of communication and teaching/learning in physical therapy as well as a detailed analysis of the psychosocial aspects of health and disability.

Prerequisites: PHYT 608.

Terms Typically Offered: Summer.

PHYT 610 Cardiovascular and Pulmonary Conditions and Laboratory3 Credits

Examination, evaluation, and intervention for the patient/client with cardiovascular and/or pulmonary impairment.

Prerequisites: PHYT 600/PHYT 600L.

Terms Typically Offered: Spring.

PHYT 611 Differential Diagnosis and Laboratory3 Credits

Exposure to a systematic clinical process to differentially diagnose and triage conditions that may present in a clinical encounter across physical therapy practice settings.

Prerequisites: PHYT 604.

Terms Typically Offered: Summer.

PHYT 612 Prosthetics-Orthotics and Laboratory3 Credits

Comprehensive review of normal and pathologic gait, limb prostheses, the pre-prosthetic and prosthetic training phases of rehabilitation for patients with amputations as well as an introduction to limb orthotics.

Prerequisites: PHYT 599.

Terms Typically Offered: Summer.

PHYT 693 Capstone II2 Credits

Continuation and refinement of the literature review initiated in PHYT 593. The previously identified clinical question will be answered using the format of a Critically Appraised Topic (CAT). Results will be presented to Physical Therapy faculty and students.

Prerequisites: PHYT 593.

Terms Typically Offered: Spring.

PHYT 694 Interprofessional Education Seminar1 Credit

Exploration and engagement with other students from professional programs with the intent of cultivating collaborative practice in an effort to provide patient-centered care.

Prerequisites: PHYT 599.

Terms Typically Offered: Summer.

PHYT 699 Clinical Education II4 Credits

Participation in full-time physical therapy practice under the direction of a licensed physical therapist at an assigned health care facility. Concentration of development of clinical skills as an intermediate clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: PHYT 599.

Corequisites: PHYT 799.

Terms Typically Offered: Fall.

PHYT 793 Clinical Education IV6 Credits

Participation in full-time physical therapy practice under the direction of a licensed physical therapist at an assigned health care facility. Concentration of development of clinical skills as a competent entry-level clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: PHYT 799.

Terms Typically Offered: Spring.

PHYT 799 Clinical Education III4 Credits

Participation in full-time physical therapy practice under the direction of a licensed physical therapist at an assigned health care facility. Concentration of development of clinical skills as an advanced clinician with focus on patient-centered care, evidence-based practice, and critical thinking.

Prerequisites: PHYT 599.

Corequisites: PHYT 699.

Terms Typically Offered: Fall.

Physician Assistant (PHAS)

PHAS 501 Biomedical Science4 Credits

Exploration of the physiologic and pathophysiologic process influencing the human organism. Explores basic principles of cell biology, histology, embryology, immunology, genetics, and infectious process. Focuses on pathophysiology related to the molecular, organ, and system level mechanisms of disease progression and manifestation.

Corequisites: BIOL 500/BIOL 500L, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, PHAS 530, and PHAS 541.

Terms Typically Offered: Spring.

PHAS 502 Clinical Pharmacology3 Credits

Introduction to foundational concepts of pharmacotherapeutics, pharmacodynamics, pharmacokinetics, drug nomenclature, drug interactions, drug classifications, adverse effects, drug contraindications, and precautions. Prescriptive writing, prescriptive authority, and prescriptive medical-legal regulations will be explored.

Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 510, PHAS 520/PHAS 520L, PHAS 530, and PHAS 541.

Terms Typically Offered: Spring.

PHAS 503 Health Promotion and Disease Prevention2 Credits

Theories and concepts involved in the planning and implementation of appropriate individual and community interventions to promote health and prevent disease in patients across the lifespan. Focuses on concepts of nutrition, exercise, and behavioral interventions important in health promotion.

Prerequisites: PHAS 511, PHAS 521, and PHAS 531.

Corequisites: PHAS 512, PHAS 522, and PHAS 532.

Terms Typically Offered: Fall.

PHAS 510 Foundation to Clinical Medicine2 Credits

Introduction to concepts of holistic, relationship-centered medical principles needed for the clinical medicine series. Introduces principles of epidemiology and public health, government health care regulations, including HIPPA, OSHA, and meaningful use of electronic medical records. Focuses on common screening and diagnostic laboratory studies, as well as foundational skills in radiological imaging.

Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 520/PHAS 520L, PHAS 530, and PHAS 541.

Terms Typically Offered: Spring.

PHAS 511 Clinical Medicine I13 Credits

Application of a systematic organ-system approach to common medical issues encountered in primary care. Focuses on the etiology, epidemiology, clinical presentation, patient assessment, laboratory and diagnostic studies, pathology, diagnosis and therapeutic interventions, and disease management specific to the following modules: Infectious Disease, Behavioral Medicine, Hematology and Oncology, Endocrinology, Otolaryngology, and Gastroenterology.

Prerequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 530.

Corequisites: PHAS 521 and PHAS 531.

Terms Typically Offered: Summer.

PHAS 512 Clinical Medicine II13 Credits

Continuation of the clinical medicine course series, with an organ-system approach to common medical issues encountered in primary care. Focus is on the etiology, epidemiology, clinical presentation, patient assessment, laboratory and diagnostic studies, pathology, diagnosis, and therapeutic interventions, and disease management specific to the following modules: Dermatology, Cardiovascular, Pulmonary, Genitourinary, Renal, Neurology, Geriatrics, and Rehabilitative care.

Prerequisites: PHAS 511, PHAS 521, and PHAS 531.

Corequisites: PHAS 503, PHAS 522, and PHAS 532.

Terms Typically Offered: Fall.

PHAS 513 Clinical Medicine III13 Credits

Continuation of the clinical medicine series, systematic organ-system approach to common medical issues encountered in primary care. Focus is on the etiology, epidemiology, clinical presentation, patient assessment, laboratory and diagnostic studies, pathology, diagnosis and therapeutic interventions, and disease management specific to the following modules: Women's Health, Orthopedics, Rheumatology, Pediatric populations, Surgery and Emergency Medicine.

Prerequisites: PHAS 503, PHAS 512, PHAS 522, and PHAS 532.

Corequisites: PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Spring.

PHAS 520 History and Physical Exam2 Credits

Introduction to principles and skills of inspection, auscultation, percussion, palpation, and diagnostic equipment needed to complete an accurate and thorough exam. Foundational concepts of necessary skills to elicit both a comprehensive and problem specific medical history. Content focused on documenting normal adult exam findings builds the foundation for recognition of abnormal findings in the clinical medicine course series and clinical skills labs.

Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520L, PHAS 530, and PHAS 541.

Terms Typically Offered: Spring.

PHAS 520L History and Physical Exam Lab1 Credit

Introduction to principles and skills of inspection, auscultation, percussion, palpation, and diagnostic equipment needed to complete an accurate and thorough exam. Foundational concepts of necessary skills to elicit both a comprehensive and problem specific medical history. Content focused on documenting normal adult exam findings builds the foundation for recognition of abnormal findings in the clinical medicine course series and clinical skills labs.

Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520, PHAS 530, and PHAS 541.

Terms Typically Offered: Spring.

Fees: Yes.

PHAS 521 Patient Assessment, Diagnostics and Clinical Skills Lab I2 Credits

Application of skills necessary for eliciting a problem-focused patient history, diagnostic skills, and clinical procedures necessary for clinical practice. Focuses on the exam and procedural skills related to topics specific to Infectious Disease, Behavioral Medicine, Hematology and Oncology, Endocrinology, Otolaryngology, and Gastroenterology.

Prerequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 530.

Corequisites: PHAS 511 and PHAS 531.

Terms Typically Offered: Summer.

Fees: Yes.

PHAS 522 Patient Assessment, Diagnostics and Clinical Skills Lab II2 Credits

Continuation of skills necessary for eliciting a problem focused patient history, diagnostic skills, and clinical procedures necessary for clinical practice. Focuses on the exam and procedural skills related to topics specific to Dermatology, Cardiovascular, Pulmonary, Genitourinary, Neurology, and Geriatrics.

Prerequisites: PHAS 511, PHAS 521, and PHAS 531.

Corequisites: PHAS 503, PHAS 512, and PHAS 532.

Terms Typically Offered: Fall.

Fees: Yes.

PHAS 523 Patient Assessment, Diagnostics and Clinical Skills Lab III2 Credits

Continuation of patient assessment and diagnostic skills, focusing on the exam and procedural skills related to topics specific to Pediatric Populations, Women's Health, Orthopedics, Rheumatology, Surgery, and Emergency Medicine.

Prerequisites: PHAS 503, PHAS 512, PHAS 522, and PHAS 532.

Corequisites: PHAS 513, PHAS 533, and PHAS 570.

Terms Typically Offered: Spring.

Fees: Yes.

PHAS 530 Introduction to Research and Evidence-Based Medicine2 Credits

Introduction to critically evaluating the medical literature and applying these principles to patient-centered care. Emphasis on research design, biostatistics, searching and evaluating medical literature, and application of evidence into the medical practice setting to improve patient-centered care.

Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 541.

Terms Typically Offered: Spring.

PHAS 531 Clinical Reasoning I2 Credits

Development of clinical problem-solving and decision-making skills introduced in PHAS 530. Application of critical reasoning skills in case-based, small group collaboration to cover clinical medicine topics related to acute care. Emphasis on developing a differential diagnosis, patient assessment, treatment plans, and effective communication. Focus on skills of case presentations, utilizing point-of-care evidence, medical documentation, and informed consent.

Prerequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 530.

Corequisites: PHAS 511 and PHAS 521.

Terms Typically Offered: Summer.

PHAS 532 Clinical Reasoning II2 Credits

Continuation of clinical problem-solving and decision-making skills introduced in PHAS 531. Application of critical reasoning skills in case-based, small group collaboration to cover clinical medicine topics related to chronic longitudinal care. Emphasis on enhancing interpersonal skills and application of evidence-based resources. Focus on the Physician Assistant professional role in team-based care.

Prerequisites: PHAS 511, PHAS 521, and PHAS 531.

Corequisites: PHAS 503, PHAS 512, and PHAS 522.

Terms Typically Offered: Fall.

PHAS 533 Clinical Reasoning III2 Credits

Continuation of problem-solving and decision-making skill development as part of the clinical reasoning series. Application of critical reasoning skills in case-based, small group collaboration to cover clinical medicine topics related to emergent and urgent care. Emphasis on the management of the medically complex patient, focusing on referrals, supporting clinical rationale, interprofessional teams, and scope of practice.

Prerequisites: PHAS 503, PHAS 512, PHAS 522, and PHAS 532.

Corequisites: PHAS 513, PHAS 523, and PHAS 570.

Terms Typically Offered: Spring.

PHAS 541 PA Professionalism I2 Credits

Focus on the integrative principles of professionalism, team-based patient-centered care, medical ethics, Physician Assistant practice issues, history of the profession, community service and the business of health care delivery. Explore racial, ethnic, and socioeconomic health disparities and their impact on health outcomes and health systems.

Prerequisites: Admission to the MPAS program.

Terms Typically Offered: Spring.

PHAS 542 PA Professionalism II2 Credits

Continuation of the integrative principles of professionalism, practice issues and the business of health care delivery. Explore billing and coding, medical liability, quality improvement, error prevention and patient safety. Focus on professional organizations and the process of licensure, certification, credentialing, and contracts. Varying healthcare delivery systems and health policy will be explored.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Summer.

PHAS 543 PA Professional Capstone1 Credit

Synthesis of knowledge and skills in a scholarly project with direct application to quality improvement, health promotion, or community-based care. A written scholarly research paper is completed and a presentation is given relating findings to community health or clinical practice.

Prerequisites: PHAS 542.

Terms Typically Offered: Fall.

PHAS 570 Clinical Year Seminar1 Credit

Focus on readiness for supervised clinical practice experiences. Clinical knowledge and skills, critical thinking, and professionalism are evaluated. Explore program policies, student self-care, coping with illness, injury and stress, electronic medical records, integrity, work ethic and professional expectations.

Prerequisites: PHAS 503, PHAS 512, PHAS 522, and PHAS 532.

Corequisites: PHAS 513, PHAS 523, and PHAS 533.

Terms Typically Offered: Spring.

Fees: Yes.

PHAS 571 Family Medicine Rotation4 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the clinical practice of primary care. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge, emphasizing care of patients of all ages.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 572 Behavioral Medicine and Mental Health Rotation2 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions of mental health disorders. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in the discipline specific principles inherent in patient care in a mental health setting.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 573 Internal Medicine Rotation4 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the longitudinal care of patients with chronic health problems. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge, with exposure to geriatric populations and healthy aging.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 574 Women's Health Rotation2 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease in a women's health setting. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in obstetrical, gynecologic, and women's preventive care.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 575 Pediatric Medicine Rotation2 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to pediatric clinical practice. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge specific to care for the pediatric patient.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 576 Surgery Rotation4 Credits

Emphasis on evaluation and care of patients with commonly encountered conditions requiring surgical management. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge specific to the provision of care in the surgical setting.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 577 Emergency Medicine Rotation4 Credits

Emphasis on the pathophysiology, diagnosis, and management of disease and conditions in the emergency department setting. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge of emergent medical conditions in the emergency department.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 578 Inpatient Medicine Rotation4 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to providing care in an inpatient setting. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge specific to medical or surgical inpatient care.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 579 Elective Rotation I4 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the clinical practice of student's selected area of interest. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in student's selected clinical rotation.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 580 Elective Rotation II4 Credits

Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the clinical practice of student's selected area of interest. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in student's selected clinical rotation.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Fall, Spring, Summer.

PHAS 581 Summative Seminar1 Credit

Summative evaluation for student demonstration of the knowledge, clinical skills, and professional competencies necessary to practice as an entry-level physician assistant. Preparation for the Physician Assistant National Certifying Exam (PANCE) is discussed.

Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.

Terms Typically Offered: Spring.

Fees: Yes.

PHAS 595 Independent Study1-3 Credits

Independent study if student needs additional instruction in a core content area.

Terms Typically Offered: Fall, Spring, Summer.

Physics (PHYS)

PHYS 100 Concepts of Physics-GTSC23 Credits

Introduction to physics. Emphasis on basic conceptual aspects described in everyday language. Elementary mathematics introduced when necessary. Survey of topics such as Newtonian mechanics, heat and energy, electricity and magnetism, light, relativity, and quantum theory. The course is designed for majors outside of the sciences.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 101 Elementary Astronomy-GTSC23 Credits

Introduction to astronomy. Survey of topics such as observational astronomy, the solar system, stellar astronomy, galaxies and cosmology. Emphasis on basic conceptual aspects of astronomy. Minimal use of elementary mathematics such as basic arithmetic, fractions, square roots, and powers. The course is designed for students in all majors.

Essential Learning Categories: Natural Sciences

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 103 General Astronomy-GTSC13 Credits

Introductory survey of astronomy, including apparent motions of objects in the sky, light, telescopes, solar system objects, exoplanets, the sun, stars, galaxies, and cosmology. Basic math skills (arithmetic, powers, scientific notation, unit conversions) will be used frequently. This course is designed for students in all majors.

Corequisites: PHYS 103L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 103L General Astronomy Laboratory-GTSC11 Credit

Basics of night sky observing, telescopes and their use. Emphasis on astronomical image acquisition and analysis to a variety of applications, including: asteroid tracking, exoplanet detection, observing motions of orbiting moons and stars to determine properties of planets and stars. This course is designed for students in all majors. Lab component required for PHYS 103.

Corequisites: PHYS 103.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 111 General Physics-GTSC14 Credits

Algebra-based introduction to classical mechanics and thermodynamics. Includes mechanics, energy and momentum conservation, thermodynamics and statistical mechanics. Extensive use of high school level algebra and trigonometry.

Corequisites: PHYS 111L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 111L General Physics Laboratory-GTSC11 Credit

Algebra-based introduction to classical mechanics and thermodynamics. Includes mechanics, energy and momentum conservation, thermodynamics and statistical mechanics. Extensive use of high school level algebra and trigonometry.

Corequisites: PHYS 111.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 112 General Physics II-GTSC14 Credits

Algebra-based introduction to classical electromagnetism, optics, and modern physics. Detailed coverage of electrostatics, electric circuits, magnetism, electromagnetic waves, geometrical optics, and wave optics. Topics from modern and atomic physics. Extensive use of algebra and trigonometry.

Prerequisites: PHYS 111/PHYS 111L, or PHYS 131/PHYS 131L.

Corequisites: PHYS 112L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 112L General Physics II Laboratory-GTSC11 Credit

Algebra-based introduction to classical electromagnetism, optics, and modern physics. Detailed coverage of electrostatics, electric circuits, magnetism, electromagnetic waves, geometrical optics, and wave optics. Topics from modern and atomic physics. Extensive use of algebra and trigonometry.

Prerequisites: PHYS 111/PHYS 111L, or PHYS 131/PHYS 131L.

Corequisites: PHYS 112.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 131 Fundamental Mechanics-GTSC14 Credits

Calculus-based introduction to classical mechanics. Detailed coverage of the kinematics and dynamics of linear and rotational motion using Newton's Laws, momentum and energy conservation. The mathematics of calculus and vectors is used throughout.

Prerequisites: MATH 151 or MATH 135 (either may be taken concurrently).

Corequisites: PHYS 131L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 131L Fundamental Mechanics Laboratory-GTSC11 Credit

Calculus-based introduction to classical mechanics. Detailed coverage of the kinematics and dynamics of linear and rotational motion using Newton's Laws, momentum and energy conservation. The mathematics of calculus and vectors is used throughout.

Prerequisites: MATH 151 or MATH 135 (either may be taken concurrently).

Corequisites: PHYS 131.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 132 Electromagnetism and Optics-GTSC14 Credits

Calculus-based introduction to classical electromagnetism and optics. Detailed coverage of electrostatics, electric circuits, magnetism, electromagnetic waves, geometrical optics, and wave optics. The mathematics of calculus and vectors is used throughout.

Prerequisites: PHYS 131/PHYS 131L, and MATH 152 or MATH 136 (either may be taken concurrently).

Corequisites: PHYS 132L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 132L Electromagnetism and Optics Laboratory-GTSC11 Credit

Calculus-based introduction to classical electromagnetism and optics. Detailed coverage of electrostatics, electric circuits, magnetism, electromagnetic waves, geometrical optics, and wave optics. The mathematics of calculus and vectors is used throughout.

Prerequisites: PHYS 131/PHYS 131L, and MATH 152 or MATH 136 (either may be taken concurrently).

Corequisites: PHYS 132.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

PHYS 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PHYS 230 Intermediate Dynamics3 Credits

Intermediate treatment of the dynamics of physical systems not covered in Fundamental Mechanics sequence. Includes fluid dynamics, classical waves and vibrations, thermodynamics, and relativistic kinematics and dynamics.

Prerequisites: PHYS 132/PHYS 132L, and MATH 253 (may be taken concurrently).

PHYS 231 Modern Physics3 Credits

Quantum theory in the examination of blackbody radiation, the photoelectric effect, and energy quantization of atoms. The Schrodinger wave equation used to analyze simple quantum systems. Applications drawn from atomic and molecular physics, solid-state physics, nuclear and high-energy physics, and astrophysics.

Prerequisites: PHYS 132/PHYS 132L, and MATH 253 (may be taken concurrently).

PHYS 251 Electronics for Scientists3 Credits

This laboratory-based course is an introduction to electric circuits and electronic instrumentation for scientists. The course will emphasize a practical approach, with students learning about electronic devices and how they work by building working circuits. Topics explored include passive circuits with resistors and capacitors, including applications in electric filtering; diodes; transistors; op-amps; timing circuits; feedback and amplification; and digital circuits.

Prerequisites: PHYS 132 or PHYS 112.

PHYS 252 Intermediate Laboratory3 Credits

Students will perform experiments in optics, acoustics, and modern physics. Experiments will include measuring the speed of light, measuring the wavelength of atomic discharge lines, X-ray diffraction, and measuring h/e among others. Emphasis will be on experimental design, use of modern instrumentation, preparation of lab reports, and data analysis.

Prerequisites: PHYS 231 (may be taken concurrently).

PHYS 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PHYS 300 New Directions in Science3 Credits

A survey of recent developments in science. This course is open to qualified students in liberal arts as well as the sciences. Faculty from various disciplines will participate. Topics will be drawn from astronomy, biology, chemistry, geology, physics, engineering, and applied mathematics.

Prerequisites: Permission of instructor.

PHYS 301 Introduction to Space Science3 Credits

The history and technology of space and space exploration. Designed for all non-science majors, particularly prospective K-12 teachers. Topics include: the solar system, space environments, space travel, satellite communication and design.

Prerequisites: Junior or senior status, or permission of instructor.

PHYS 311 Electromagnetic Theory I3 Credits

Mature study of electromagnetic fields. Electrostatics and magnetostatics presented. Special techniques, including multipole expansion of fields, analyzed. Electrodynamics introduced leading to Maxwell's equations.

Prerequisites: MATH 253; and PHYS 230 or PHYS 231.

Terms Typically Offered: Fall.

PHYS 312 Electromagnetic Theory II3 Credits

A continuation of PHYS 311. Electromagnetic waves were studied. Wave propagation in conducting and nonconducting media is examined, along with dispersion phenomena. Waveguides are examined. Electromagnetic field radiation is studied, both for point charges and for arbitrary charge distributions. The course concludes with a reformulation of electromagnetism in the language of special relativity.

Prerequisites: PHYS 311.

PHYS 321 Quantum Theory I3 Credits

Foundations and applications of quantum physics. Fundamental descriptions of quantum states, measurements, and time evolution for general quantum systems. Applications to particles in one or more spatial dimensions, harmonic oscillators, angular momentum, and the hydrogen atom. May also include spin-1/2 particles, photons, multiple quantum systems, and quantum paradoxes. Introduces linear algebra and solving differential equations for quantum physics.

Prerequisites: PHYS 231; and MATH 260 or MATH 236.

Terms Typically Offered: Spring.

PHYS 331 Advanced Laboratory I3 Credits

A course in experiment design and technique. Laboratory investigations provide experience in instrumental methods, planning of laboratory experiments, data analysis, preparation of reports according to professional standards, and training in the use of computers for data acquisition and processing. The experiments to be performed are selected from electromagnetism, atomic, nuclear, and solid-state physics.
Prerequisites: PHYS 252.

PHYS 342 Advanced Dynamics3 Credits

In-depth survey of classical mechanics, includes advanced treatment of Newtonian dynamics, conservation laws, gravitation, and the Lagrangian and Hamiltonian formulations of dynamics. Topics may include central force motion, systems of particles, non-inertial reference frames, rigid bodies, oscillating systems, couple oscillations, and waves on a string.
Prerequisites: PHYS 230, and MATH 260 or MATH 236.

PHYS 352 History and Philosophy of Physics3 Credits

Material varies from year-to-year. The course addresses problems in the interpretation and development of physics. Case studies of crucial experiments are analyzed. The interaction of physics with other philosophical and cultural pursuits is discussed.
Prerequisites: One year of physics or permission of instructor.

PHYS 362 Statistical and Thermal Physics3 Credits

Study of the physics of bulk matter. Fundamental principles of quantum mechanics, statistical methods employed to explain macroscopic laws of thermodynamics to make detailed predictions about the large-scale behavior of solids, liquids, and gases. Applications include specific heat of solids, thermal radiation, magnetic susceptibilities, stellar equilibrium, and chemical reactions.

Prerequisites: CHEM 321 or PHYS 230; and MATH 253.

Terms Typically Offered: Spring.

PHYS 372 General Relativity3 Credits

Introduction to Einstein's theory of general relativity. Newtonian gravitation and Einstein's theory of special relativity reviewed. Topics may include spherically symmetric stars, static and rotating black holes, FRW cosmologies, gravitational waves, and wormholes.

Prerequisites: PHYS 230 and MATH 236 or MATH 260.

Terms Typically Offered: Fall, Spring.

PHYS 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PHYS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PHYS 422 Quantum Theory II3 Credits

Continuation of PHYS 321. Central forces, complete derivation of hydrogen atom energy levels and eigenstates. Perturbation theory and other approximately techniques. Other selected topics include: multiple quantum systems, scattering, quantum foundations.

Prerequisites: PHYS 321.

PHYS 441 Solid State Physics3 Credits

The structure and properties of solids. This course is a study of the crystalline state of matter, including crystal classifications, vibrational specific heats, electronic structures and conductivities, cohesive energies, magnetic susceptibility, and optical properties.

Prerequisites: PHYS 321.

PHYS 471 Computational Physics I3 Credits

Application of computational techniques to solving and visualizing physical problems. Numerical integration, differentiation, and matrix methods covered. Techniques of solving various regular and partial differential equations studied. Prior programming experience is not required.

Prerequisites: MATH 260 or MATH 236; and PHYS 132.

Terms Typically Offered: Fall.

PHYS 472 Computational Physics II3 Credits

A continuation of PHYS 471. Advanced topics in solving partial differential equations and simulating physical systems using modern parallel computing covered. MPI, Open MP, and their applications to physical phenomenon on Linux workstations covered. Introduction to translating analytical problems to parallel computational problems

Prerequisites: PHYS 471.

PHYS 473 Modern Optics3 Credits

Modern principles and applications of optics. Optical models including ray and wave optics presented. Laws of reflection and refraction studied within the context of both ray and wave optics. Reflectivity and transmissivity analyzed. Superposition and wave interference discussed. Diffraction theory used in a number of applications. Concludes with an introduction to lasers and quantum optics.

Prerequisites: PHYS 311.

PHYS 482 Senior Research1 Credit

An individual research project, supervised by a faculty advisor. The project may be selected from experimental or theoretical topics. The research concludes with a formal report written in accordance with The American Institute of Physics Style Manual. This course is normally taken twice in the senior year.

Course may be taken 2 times for credit.

PHYS 487 Structured Research1-3 Credits

Physics research under the direct guidance of a faculty member. Designed for advanced junior and senior level students.

Prerequisites: Permission of instructor.

PHYS 494 Physics Seminar1 Credit

A forum for topical physics. In this seminar, faculty and students of physics participate in both informal discussions and formal oral presentations of selected topics of scientific interest, including significant current advances and crucial historical developments.

Prerequisites: Upper division standing and permission of instructor. Course may be taken 4 times for credit.

PHYS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PHYS 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PHYS 596 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Political Science (POLS)

POLS 101 American Government-GTSS13 Credits

Structures and functions of the American political system, including the constitutional development of federalism and separation of powers. Citizen participation and influence in politics, the congress, presidency and the supreme court, and public policy including civil rights and liberties will also be covered.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

POLS 151 Introduction to Political Ideas3 Credits

Introduction to the major theories of human political organization and ideas that frame those approaches. Emphasis on theories of democracy, authoritarianism, liberalism, conservatism and contemporary ideologies of liberation (feminism, environmentalism and race).

Essential Learning Categories: Social and Behavioral Sciences
Terms Typically Offered: Fall, Spring.

POLS 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

POLS 201 Introduction to Political Inquiry2 Credits

Introduction to major tools of investigation in the study of politics. Examination of modern scientific research design and methods. Additional emphasis on discipline-specific skills in critical thinking, information literacy, writing and citation mechanics, and oral communication.

Terms Typically Offered: Fall.

POLS 236 State and Local Government3 Credits

Theories of state formation and constitutional development, city charters, county government, and intergovernmental relations, with emphasis on Colorado.

Terms Typically Offered: Fall, Spring.

POLS 261 Comparative Politics-GTSS13 Credits

Introduction to conceptual models and approaches utilized in the comparative study of nations and their politics. Application of these theories to selected democratic, communist, and developing political systems.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

POLS 270 World Politics3 Credits

Introduction to structures, processes, and behaviors shaping world politics. Emphasis on states and their interactions as well as non-state actors and cultural, economic, and environmental forces shaping an emerging world community.

Essential Learning Categories: Social and Behavioral Sciences
Terms Typically Offered: Fall, Spring.

POLS 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

POLS 324 United States Congress3 Credits

Study of the United States Congress. Attention will be given to the development of Congress, congressional operations, and the election of members of Congress.

Prerequisites: POLS 101.

Terms Typically Offered: Spring.

POLS 325 The American Presidency3 Credits

A study of the American chief executive, emphasizing the historical development of the office, the various functions of the modern chief executive and a brief comparison with the executive officer of other national states.

POLS 328 The American Court System3 Credits

The American court system; local, state, and national, including consideration of the impact of prosecutors, defense personnel, judges, and other factors on court decisions and the criminal justice system.

Prerequisites: POLS 101 or CRMJ 201.

Equivalent Course(s): CRMJ 328

POLS 333 Rural Politics and Civic Engagement3 Credits

Collaboration with classmates and external community stakeholders to analyze a local rural issue, write a report, and propose solutions. Exploration of the various theories and issues of rural politics in the United States.

Terms Typically Offered: Fall.

POLS 342 Public Administration3 Credits

Historical development of public administration including organizational structure and theory, management, personnel administration, fiscal administration, and administrative responsibility.

POLS 351 Public and Elite Political Behavior3 Credits

Behavior of elected officials and the public in American politics. Achievement of power and how actions are evaluated via public opinion and voting. Role of media in American politics explored.

Prerequisites: POLS 101.

POLS 352 Religion and Politics3 Credits

The interactions of religion and politics in the United States, several liberal democracies and within international relations.

POLS 353 Politics of Human and Natural Resources3 Credits

Study of politics and public policy surrounding natural resource allocation, preservation, development and consumption by human social systems. Emphasis on challenges of public policy formation and implementation in areas of land, water, energy, minerals, food and habitat at domestic and global levels.

POLS 354 Political Geography3 Credits

Exploration of ways in which physical landscapes shape political attitudes, ideas, and institutions. Emphasis on key concepts of place, mapping, borders, territory, nationalism, and ecological and social impact of natural settings.

Equivalent Course(s): GEOG 354

Terms Typically Offered: Fall.

POLS 356 Indigenous Politics3 Credits

Study of interactions between the state and various indigenous peoples around the world. Internal political structure and practice of selected indigenous groups and the role of indigenous nations in global politics.

POLS 366 Government and Politics of Asia3 Credits

Study of political systems of China, Japan, Korea, India, and Indonesia. Emphasizes political development, sources, processes, and evaluation of policy making, and contemporary challenges facing these countries.

POLS 372 Peace and Conflict Studies3 Credits

Interdisciplinary study of nature and causes of conflict, conflict resolution, and foundations of justice and peace. Analyzes historical and contemporary conflicts, both civil and international, and examines how evidence and theory are used to understand peace and conflict.

POLS 373 Global Politics of Women and Gender3 Credits

Analysis of women and gender in global security and the global political economy. Topics include violence and war, transnational activism, migration, development, human rights, sex work, and domestic work. Examines contemporary case studies, how evidence and theory are used to explain the gendered nature of global security and economic systems.

POLS 386 Study Away: Off-Campus Learning Experience3 Credits

Exploration of cultural values, political structures, and political behaviors in an off-campus setting. Locations and site-specific activities will vary. Supplementation of student knowledge of political theories and institutions through direct experience and field instruction. Encouragement towards being a global citizen and an ambassador of one's own culture.

Terms Typically Offered: Summer.

POLS 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

POLS 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

POLS 399 Internship1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

POLS 412 Constitutional Law3 Credits

An analysis of American constitutional theory as articulated by the U. S. Supreme Court. Specific topics include the nature of judicial review, the powers of the President and Congress, federalism, the regulation of commerce and the development of substantive due process.

Prerequisites: POLS 101 or permission of instructor.

Equivalent Course(s): CRMJ 412

POLS 452 Political Theory: Classical and Medieval3 Credits**POLS 453 Political Theory: Modern3 Credits**

Study of the development of political theory in the Western tradition. Emphasizes the teaching of main thinkers: Socrates, Plato, Aristotle, Augustine, Aquinas, More, Machiavelli, Hobbes, Locke, Rousseau, Mill, and Marx. Develops ideas in relation to historical and cultural contexts, textual consistency, and the evolving tradition of political discourse in Western civilization.

POLS 462 Public Policy: Theory and Practice3 Credits

Overview of theory and practice of public policy making and implementation. Examination of participants and stages of public policy making. Analysis of success/failure of controversial public policies. Topics may include healthcare policy, drug policy and welfare.

POLS 471 International Organizations and Law3 Credits

Analysis of management of world politics and economics by networks of states, international and regional organizations, and non-state participants. Includes human and environmental security, human rights, global health, organized crime, global political economy, and development. Examines successful and unsuccessful problem management in a globalized world.

Prerequisites: POLS 270.

Terms Typically Offered: Spring.

POLS 472 International Political Economy3 Credits

Analysis of origins, evolution, and trajectory of global political economy. Includes international regulation, trade, finance, and monetary systems, as well as development, foreign aid, migration, organized crime, and resource extraction. Explores theory and evidence used to explain global economic developments.

Prerequisites: POLS 270.

POLS 475 American Foreign and National Security Policy3 Credits

American foreign and national security policy with emphasis on 1945 to the present and beyond. Foreign and domestic factors shaping policy, the mechanisms and dynamics of policy making, the role of perception and motives underlying decision and action, and case studies of historical crises and contemporary debates are examined.

POLS 482 International Relations Theory3 Credits

Study of the major theoretical approaches to international relations and global politics. Special emphasis placed on foundational concepts such as the state, sovereignty, governance, borders, and emerging issues of identity, non-state participants, and human security.

Prerequisites: POLS 270.

POLS 484 Environmental Political Theory3 Credits

Study of major philosophies and their treatment of the environment.

Special emphasis on indigenous and alternative ecological perspectives, extension of rights and agency to non-human entities, and the diversity of theories guiding the modern environmental movement.

Terms Typically Offered: Fall.

POLS 488 Environmental Politics and Policy3 Credits

An introduction to the political issues and problems associated with patterns of socio-economic growth and its environmental impact at both domestic and global levels of analysis.

POLS 493 Senior Capstone1 Credit

Capstone experience for political science program. Cumulative seminar on political science with emphasis on application of knowledge acquired throughout the degree program. Preparation for transition into political work, graduate school or law school.

Prerequisites: POLS 201 and senior standing.

Terms Typically Offered: Fall.

POLS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

POLS 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

POLS 499 Internship1-15 Credits

May be performed in areas relating to Political Science, such as civic, political, or legal. Internships will be conducted in Mesa County, the Denver legislature, or in Washington, D.C.

Prerequisites: Junior or senior standing.

Course may be taken multiple times up to maximum of 15 credit hours.

POLS 501 Theories of Political Science3 Credits

Graduate-level introduction to theoretical approaches in political science. Topics will include basic issues in the philosophy of social science, as well as theoretical frameworks that cut across the sub-fields of the discipline: rational choice, social constructivism, institutionalism, Marxism, feminism, and post-structuralism. Approaches unique to the three major subfields of comparative politics, international relations, and political philosophy will also be covered.

Prerequisites: Admission into Social Studies Graduate Certificate Program.

POLS 505 American Government3 Credits

Graduate-level introduction to the foundations of American government. The course will cover major readings and theories in American government. Topics include American political development, institutions (Congress, presidency, judiciary), political behavior (public opinion, voting and elections, political parties and interest groups), and public policy.

Prerequisites: Admission into Social Sciences Graduate Certificate Program.

Process Technology (PROS)

PROS 100 Introduction to Process Technology3 Credits

Provides an overview or introduction into the field of Process Operations within the process industry. The course will introduce the roles and responsibilities of process technicians, the environment in which they work, and the equipment and systems in which they operate.

PROS 117 Electronics I3 Credits

Fundamentals of practical and theoretical DC and AC circuits. Application of basic entry skills and analysis/verification of theoretical results. Introduces the basic skills required by many careers in electronics and related fields. Operations and applications of basic DC and AC circuits consisting of resistors, capacitors, inductors, transformers and diodes, and introducing basic digital concepts. Emphasis on common test instruments in troubleshooting, working on real-world and applicable projects. Lecture/lab format.

PROS 118 Electronics II3 Credits

Advanced DC, AC and digital circuitry. Analysis and verification of theoretical results with practical applications. Builds on PROS 117 Electronics I and covers advanced concepts of DC and AC circuits. Includes expanded treatment of power supplies, dual-supply rectifier circuits, and Zener diode, voltage regulators. Includes digital concepts. Emphasis on common test instruments in troubleshooting, working on real-world projects. Lecture/lab format.

Prerequisites: PROS 117.

PROS 120 Process Technology I: Equipment4 Credits

Provides an overview or introduction into the field of equipment within the process industry. This course will introduce many process industry-related equipment concepts including purpose, components, operation, and the Process Technician's role for operating and troubleshooting the equipment.

PROS 195 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PROS 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PROS 220 Process Technology III: Operations4 Credits

Provides an introduction to the field of operations within the process industry. Students will use existing knowledge of equipment, systems, and instrumentation to understand the operation of an entire unit. Students study concepts related to commissioning, normal startup, normal operations, normal shutdown, turnarounds, and abnormal situations, as well as the Process Technician's role in performing the tasks associated with these concepts within an operating unit.

PROS 230 Quality in Process Technology3 Credits

Provides an introduction to the field of Quality within the Process Industry. This course will introduce many process industry-related quality concepts including operating consistency, continuous improvement, plant economics, team skills and statistical process control (SPC).

PROS 290 Certification:1 Credit

Capstone certification preparation specifically addressing each emphasis and associated certifications. Addresses Certified Electronics Technician (CET) program and other certifications.

PROS 292 Capstone4 Credits

Knowledge to articulate the tactical planning functions performed within field projects. Access and apply the various tactical planning tools and data elements to supporting documentation including troubleshooting. Economic principles in costing, value, capital investment, profitability and inventory.

Psychology (PSYC)

PSYC 150 General Psychology-GTSS33 Credits

Introduction to psychological principles, theories, and research methods applied to the study of behavior and mental processes. Encourages application of psychological knowledge, science, and theories to enhance human life.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

PSYC 201 Orientation to the Psychology Major3 Credits

Foundations for further study in psychology. Content includes CMU major requirements, career planning, applying to graduate school, and self-management skills. Emphasis on research writing using APA Style.

Prerequisites: Declared psychology major, PSYC 150 and ENGL 112.

Terms Typically Offered: Fall, Spring.

PSYC 202 APA Style of Writing for Psychology Minors1 Credit

Research writing in psychology using APA style. Not intended for psychology majors.

Prerequisites: PSYC 150, ENGL 112, and declared minor in psychology.

Terms Typically Offered: Fall, Spring.

PSYC 216 Research Methods in Psychology4 Credits

Fundamentals of psychological research techniques used in the study of behavior and mental processes. Discourse on experimental and correlational design, participant recruitment, ethical practices, and management/analysis of data. Development of skills associated with professional writing, data analysis, collaboration, and presentation of research.

Prerequisites: PSYC 150, STAT 215, and PSYC 201.

Terms Typically Offered: Fall, Spring.

PSYC 233 Human Growth and Development-GTSS33 Credits

Exploration of major topics, theories, and methodological approaches in the study of human lifespan development. Focuses on physical, cognitive, emotional, and social development in infancy, early and middle childhood, adolescence, emerging and middle adulthood, and late adulthood. Development of skills associated with recognizing changes throughout the lifespan and understanding how psychology relates to everyday life.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring, Summer.

PSYC 296 Topics1-4 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PSYC 300 Health Psychology3 Credits

Health and psychology are intertwined in a variety of ways. This course examines what it means to be healthy and look at the connection between behavior and both physical health and illness and mental health and illness.

Prerequisites: PSYC 150 or PSYC 233.

PSYC 310 Child Psychology3 Credits

A study of the principles of human development and psychology from conception to puberty.

Prerequisites: PSYC 150.

PSYC 314 Psychology Of Learning3 Credits

Classic and modern explanations of the phenomena of learning in both lower animals and humans. Classical and operant conditioning covered in detail.

Prerequisites: Junior or senior status and PSYC 150.

PSYC 320 Social Psychology3 Credits

Social influences upon behavior with consideration given to topics such as: social perception, attitude formation and change, communication, and leadership.

Prerequisites: PSYC 150.

PSYC 330 Psychology of Adolescents and Emerging Adulthood3 Credits

Study of principles of human development (biological, cognitive, and social/emotional) from puberty through emerging adulthood.

Prerequisites: PSYC 150.

PSYC 335 Psychology of Women3 Credits

A brief account of the role of women in mythology and history will be followed by coverage of women's heritage in psychology. Then gender specific aspects of physical, psychological and social development will be covered. Current areas of interest will be included, e.g., communication, work related issues, relationships.

Prerequisites: PSYC 150.

PSYC 340 Abnormal Psychology3 Credits

Concepts related to psychopathology and personality disorders including functional causation, general psychological theory, and behavior deviation patterns.

Prerequisites: PSYC 150 or permission of instructor.

PSYC 345 Abnormal Child Psychology3 Credits

Child and adolescent disorders within the context of a developmental framework. This course will encourage the developmental consideration that influence diagnosis, behavioral manifestation, and treatment of childhood disorders as well as the contextual influences on development, maintenance, and treatment of childhood disorders.

Prerequisites: PSYC 233 or PSYC 310.

Terms Typically Offered: Fall, Spring.

PSYC 350 Psychology Of Adulthood3 Credits

Study of principles of human development (biological, cognitive, and social/emotional) from the latter part of young adulthood through late adulthood.

Prerequisites: PSYC 150.

PSYC 370 Cross-Cultural Psychology3 Credits

Survey of theory and methods in cross-cultural psychology.

Prerequisites: PSYC 150.

PSYC 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PSYC 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PSYC 400 Psychological Testing3 Credits

Theory, problems, methods, and content of psychological measurement, including concepts of the purpose of testing, test administration and scoring, standardization, reliability, validity test evaluation, and a survey of the major tests used in educational and psychological testing.

Prerequisites: PSYC 150 and STAT 215.

PSYC 401 Sport Psychology3 Credits

Introduction to theories and research in Sport Psychology. Includes aggression and violence in sport, psychological characteristics of participants, sexual identity and motivation.

Prerequisites: PSYC 150.

PSYC 408 Foundations of School Counseling3 Credits

Examination of conceptual foundation of the counseling and school counseling professions including history, philosophy, principles and trends. Includes functions of counselors, administrators, teachers and parents in meeting students' needs in a K-12 education setting.

Prerequisites: PSYC 233 or PSYC 310.

Terms Typically Offered: Fall.

PSYC 410 Drugs and Human Behavior3 Credits

Study of pharmacological effects and behavioral consequences of self-administered depressants, stimulants, and euphoricants, of marijuana, alcohol and tobacco, and of medicines. Prevention of drug-related problems is considered briefly.

Prerequisites: Junior or senior standing.

PSYC 411 Human Sexuality3 Credits

Study of the biological, psychological, and social bases and manifestations of human sexual behavior. Includes theory, research and diversity in sexuality, the biology of sex, gender development, sexual diseases, deviancy and coercion.

Prerequisites: PSYC 216.

Terms Typically Offered: Fall, Spring.

PSYC 412 Industrial and Organizational Psychology3 Credits

Psychological principles applied to formal, productive organizations such as businesses, governments, and schools. Personnel selection, placement, training, evaluation, motivation to work, job satisfaction, and morale are examined. Counts as a management course for BBA candidates.

Prerequisites: PSYC 150 or permission of instructor.

PSYC 414 History of Psychology3 Credits

Systems and theories of modern psychology and the development of scientific psychology since 1879.

Prerequisites: PSYC 150, and good standing as a junior or above psychology major, or permission of instructor.

PSYC 416 Memory And Cognition3 Credits

Study of the mental processes that underlie our abilities to recognize stimuli, think, remember, learn language, and solve problems. Current research in each of these areas will be discussed. Includes a research paper written in APA style.

Prerequisites: PSYC 150.

PSYC 420 Personality3 Credits

Examination of personality psychology from the time of Freud through the present. Theories and various approaches to understanding the development and functioning of both the general and the unique in personality are emphasized.

Prerequisites: PSYC 216; PSYC 400 is recommended.

Terms Typically Offered: Fall, Spring, Summer.

PSYC 422 Sensation and Perception3 Credits

Introduction to the scientific study of human sensation and perception. Includes a detailed study of the major senses (vision, audition, touch, smell, taste). Covers the physical basis for perceptual information (e.g., light, odor), and the biological, psychological, and computational processes by which the brain converts such information to perceptions.

Prerequisites: PSYC 150.

Terms Typically Offered: Spring.

PSYC 425 Forensic Psychology3 Credits

Introduction to the production and application of psychological knowledge to the civil and criminal justice systems.

Prerequisites: Junior or senior standing.

PSYC 430 Biopsychology3 Credits

The biological bases of the behaviors of the organism, emphasizing the structure and function of the nervous system. The role of biological factors in such behaviors as sleep, sexual behavior, drug addiction, emotion, etc. will be examined.

Prerequisites: Junior or senior standing and PSYC 216.

Terms Typically Offered: Fall, Spring.

PSYC 435 Applied Social Psychology3 Credits

Survey of theories and research in social psychology. Advanced topics in social psychology through readings and discussion on historical and current perspectives. May include self, person perception, attitudes, attributions, close relationships, social influence, and group conflict.

Prerequisites: PSYC 150 and upper division standing.

PSYC 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

PSYC 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PSYC 499 Internship1-12 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Psychology - Counseling (PSYP)

PSYP 305 Suicide Intervention Training1 Credit

Provides a clear and direct method to intervene with those at risk of suicide. Students learn to identify risk factors, develop safety plans, practice skills to intervene, and develop an understanding of resources available. This is a two day (16 hour) suicide intervention workshop.

PSYP 306 Applied Ethics in Mental Health and Counseling1 Credit

Application of professional ethical principles and codes to mental health and health service settings.

PSYP 320 Career Development3 Credits

Theories of, and factors influencing, career development such as assessment, career maturity, decision making, problem solving, and planning. Current developments in adult career and life development will be discussed including life stages, transitions, midlife crisis, stress, and adjustments necessary for career development effectiveness.

Prerequisites: PSYC 201 or permission of instructor.

PSYP 322 Multicultural Service Learning3 Credits

Exploration of multiculturalism through ethnography and community service field work.

Prerequisites: PSYC 201.

PSYP 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PSYP 410 Introduction to Marriage and Family Counseling3 Credits

Key theories and approaches for diverse problem areas in Marriage and Family Counseling, including domestic violence and substance abuse. Explore career options and training for counselors.

Prerequisites: PSYC 150 or SOCO 144.

PSYP 420 Counseling Processes and Techniques3 Credits

Counseling principles and practices which facilitate interpersonal communication and effective personal and social development. Counseling skills in attending behavior, listening, problem exploration, responding, understanding, and modes of action are examined, discussed and applied in classroom counseling situations.

Prerequisites: PSYP 320 and PSYC 340 or permission of instructor.

PSYP 422 Psychological Interviewing3 Credits

Psychological interviewing techniques, methods, and interpretation will be examined using the DSM-V. Interview types will include counseling, intake, assessment, and diagnosis.

Prerequisites: PSYC 201, PSYC 340 and PSYC 400.

PSYP 424 Group Processes3 Credits

Dynamics, procedures, and processes of the group. Focus will be on understanding self and learning how to help others develop self-understanding as well as personal and social skill.

Prerequisites: PSYP 420.

PSYP 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PSYP 497 Practicum I4 Credits

Interpersonal training and counseling practice under professional supervision. A typed paper/journal must be submitted for approval and course credit.

Prerequisites: Senior standing and permission of instructor. Practicum must be arranged for the semester prior to enrollment.

PSYP 499 Practicum II4 Credits

Counseling experience in external field locations according to needs and career goals of the student. A typed paper/journal must be submitted for approval and course credit.

Prerequisites: Permission of instructor. Internship must be arranged for the semester prior to enrollment.

Public Administration (PADM)

PADM 314 Public Organization Theory3 Credits

Examination of the historical development of organizational theory. Focuses on various theoretical approaches to the study of organizational structure and human behavior in public sector organizations.

PADM 315 Public Management3 Credits

Exploration of the concepts and skills essential to successful management in public organizations. Focuses on the management functions critical for success of the organization and how these functions are affected by operating in the public sector.

PADM 350 Ethics in Public Administration3 Credits

Philosophical and practical issues related to ethical decision making in the public sector. Emphasis on the analysis of ethical problems and the development of analytical skills and values framework to act ethically in public service roles.

PADM 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

PADM 442 Public Budgeting3 Credits

Examines the principles and practices of resource allocation and the role of the budget in policy development and implementation focusing primarily on state and local government. Focuses on the relationship of the budget to strategic planning, policy implementation and performance measures.

PADM 446 Public Personnel Management3 Credits

Examination of the major issues and components of public personnel systems. Special focus will be placed on the role of the first line government supervisor or middle manager in all facets of personnel administration.

PADM 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Radiologic Sciences (RADS)

RADS 320 Introduction to Radiologic Technology and Patient Care3 Credits

Introduction to radiologic technology with emphasis on the education program, the profession, and the healthcare delivery system. Fundamentals of patient care including ethics, professional conduct, communication, radiation protection, and patient management. Study of medical terminology is included.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 320L.

RADS 320L Introduction to Radiologic Technology and Patient Care Laboratory1 Credit

Lab component required for RADS 320.

Corequisites: RADS 320.

RADS 321 Radiographic Anatomy and Positioning I2 Credits

Exploration of every phase of radiography in an integrated coverage of the appendicular skeletal system, abdomen, thoracic, viscera, and body systems. Radiographic anatomy, positioning, and procedures are discussed and applied in the energized laboratory.

Corequisites: RADS 321L.

RADS 321L Radiographic Anatomy and Positioning I Laboratory1 Credit

Lab component required for RADS 321.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 321.

RADS 322 Principles of Radiographic Exposure2 Credits

Exploration of fundamental factors that govern and influence the radiographic image, including equipment, accessory devices, and exposure mathematics. Technical and prime exposure factors are discussed and applied in the energized laboratory.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 322L.

RADS 322L Principles of Radiographic Exposure Laboratory1 Credit

Lab component required for RADS 322.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 322.

RADS 323 Digital Imaging2 Credits

Exploration of components, principles, and operation of digital imaging systems found in diagnostic radiology. Factors affecting image acquisition, display, archiving, and retrieval are discussed.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 329 Radiographic Clinical Experience I1 Credit

Introduction to the radiographic clinical education experience in the clinical education site. Designed to provide patient care and assessment, competent performance of radiologic imaging, and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 331 Radiographic Anatomy and Positioning II2 Credits

Continuation of RADS 321 with instruction in every phase of radiography of the spinal column, digestive system, urinary system, cranium, and facial bones. Radiographic anatomy, positioning, and procedures are discussed and applied in the energized laboratory.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 331L.

RADS 331L Radiographic Anatomy and Positioning II Laboratory1 Credit

Lab component required for RADS 331.

Prerequisites: Acceptance into the Bachelor of Science in Radiologic Sciences program.

Corequisites: RADS 331.

RADS 332 Specialized Imaging2 Credits

Introduction to medical imaging modalities and treatment, including equipment, dose differences, types of radiation, patient preparations, indications, and contraindications. Educational and certification requirements are included. Mobile and trauma radiography also are discussed. The course includes an introduction to sectional anatomy of head/brain, chest, mediastinum, abdomen, pelvis, and musculoskeletal system.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 333 Imaging Equipment and Quality Assurance2 Credits

Introduction to radiographic, fluoroscopic, and mobile equipment requirements and design. Applied practice of equipment maintenance, quality control, and testing performed in lab.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 333L.

RADS 333L Imaging Equipment and Quality Assurance Laboratory1 Credit

Lab component required for RADS 333.

Prerequisites: Acceptance into the Radiologic Sciences program.

Corequisites: RADS 333.

RADS 334 Image Analysis I2 Credits

Principles of analyzing radiographic images of the appendicular skeleton, chest, and abdomen. The importance of optimal imaging standards, as well as discussion of a problem-solving technique for image evaluation and the factors that can affect image quality are also addressed. Actual images will be included for analysis.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 335 Radiation Biology and Protection2 Credits

Principles of radiation interaction in cells and factors affecting cell response to radiation. The course also addresses acute and chronic effects of radiation, dose equivalent limits, and regulatory involvement. Responsibility by the radiographer to patients, personnel, the public, and self are also discussed.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 339 Radiographic Clinical Experience II4 Credits

Exploration of additional concepts correlating skills with academic courses in radiographic clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging, and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 354 Image Analysis II2 Credits

Principles of analyzing radiographic images of the axial skeleton (including the spine, sternum, ribs, and cranium), facial bones, paranasal sinuses, and the digestive system. The importance of optimal imaging standards, as well as discussion of a problem-solving technique for image evaluation and the factors that can affect image quality are also addressed. Actual images will be included for analysis.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 449 Radiographic Clinical Experience III6 Credits

Further exploration of clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 451 Imaging Pathology3 Credits

Introduction to concepts related to the disease process with emphasis on the radiographic appearance of disease.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 452 Sectional Anatomy3 Credits

Exploration of the location and identification of structures in multiple anatomical planes. Function, orientation, imaging, and pathology will be discussed.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 453 Advanced Patient Care3 Credits

Development of patient care knowledge and skills required for advanced medical imaging procedures. Focus is on legal and ethical considerations, drug administration, patient monitoring, emergency care, and sterile technique.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 459 Radiographic Clinical Experience IV5 Credits

Further exploration of clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 460 Principles of Magnetic Resonance Imaging2 Credits

Introduction to the operation of a magnetic resonance imaging (MRI) scanner. Includes magnetic resonance imaging instrumentation, safety, physics, and contrast media. Does not include clinical experience.

Prerequisites: Acceptance into the Bachelor of Applied Science program or Radiologic Sciences MRI Certificate Program; registered radiologic technologist with minimum associate degree.

RADS 461 Principles of Computed Tomography2 Credits

Introduction to the operation of computed tomography equipment. Includes instrumentation, image display, radiation safety, and contrast media. Does not include clinical experience.

Prerequisites: Acceptance into the Radiologic Sciences program, or CT Certificate program.

RADS 462 Leadership and Management3 Credits

Identification of skills necessary to work within an effective interdisciplinary health care team. Includes principles of leadership, quality management, and health care law.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 463 Information Literacy in Radiologic Sciences3 Credits

Development of life-long learning skills necessary to function competently in the continually changing medical imaging environment. Content includes intellectual inquiry, information literacy, and scholarly research methods.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 464 Senior Capstone3 Credits

Synthesis of radiologic science concepts, principles, and procedures. Includes development of resume and interview skills.

Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 469 Radiographic Clinical Experience V5 Credits

Further exploration of clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.

Prerequisites: Acceptance into the Radiologic Sciences program.

Terms Typically Offered: Spring.

RADS 470 Applied Magnetic Resonance Imaging3 Credits

Continuation of RADS 460. Development of knowledge and cognitive skills underlying the intelligent performance of tasks typically required of technologists who perform magnetic resonance imaging procedures. Includes patient care, image production, procedures, artifacts, and quality control. Does not include clinical experience.

Prerequisites: RADS 460.

RADS 471 Applied Computed Tomography3 Credits

Continuation of RADS 461. Development of knowledge and cognitive skills underlying the intelligent performance of tasks typically required of technologists who perform computed tomography procedures. Includes patient care and safety, imaging procedures, and image assessment. Does not include clinical experience.

Prerequisites: RADS 461.

RADS 480 Clinical Specialization I4 Credits

Demonstration of clinical competency in Radiologic Science imaging modality. Practical experience gained and demonstrations of competency in positioning, machine control, patient care and image quality in chosen modality.

Prerequisites: RADS 460 or RADS 461 (may be taken concurrently).

RADS 490 Clinical Specialization II4 Credits

Continuation of RADS 480. Demonstration of clinical competency in Radiologic Science imaging modality. Practical experience gained and demonstrations of competency in positioning, machine control, patient care and image quality in chosen modality.

Prerequisites: RADS 470 or RADS 471 (may be taken concurrently); and RADS 480.

RADS 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Reading (READ)

READ 092 College Reading Studio1 Credit

This course is designed to offer supplemental support for students in reading intensive courses across the disciplines. Daily mini-lessons will be provided based on Ten Steps to Advanced College Reading Skills, and will follow with individual assistance with discipline-specific vocabulary from college texts. This is a corequisite with social science 100 discipline strands for students with Accuplacer scores of 62-79.

Course may be taken 3 times for credit.

READ 096 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Real Estate (REAL)

REAL 350 Real Estate Fundamentals3 Credits

Overview of basic components of the real estate industry. Includes industry terminology and basic real estate concepts and principles.

Terms Typically Offered: Fall, Spring.

REAL 410 Real Estate Finance and Development3 Credits

Exploration of the process of land development, land packaging and land banking. Analyzes and evaluates real estate financing transactions and opportunities.

Prerequisites: REAL 350.

Terms Typically Offered: Fall, Spring.

REAL 415 Real Estate Valuation and Investment3 Credits

Examination of real estate appraisals using the current industry practices. Calculate and analyze real estate investment opportunities and strategies using current industry investment analysis tools.

Prerequisites: REAL 350.

Terms Typically Offered: Fall, Spring.

Social Science (SOC)

SOCI 101 Introduction to Lesbian, Gay, Bisexual, and Transgender Studies-GTSS33 Credits

Introduction to lesbian, gay, bisexual, and transgender studies. Exploration of LGBT studies as an academic field and consideration of the experience of being lesbian, gay, bisexual, or transgender.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

SOCI 102 Introduction to Women's and Gender Studies3 Credits

Introduction to major themes, methods, and works in women and gender studies. Overview of the contributions that women's history, queer studies, and feminist theory have made to a variety of academic disciplines.

Essential Learning Categories: Social and Behavioral Sciences

Terms Typically Offered: Fall, Spring.

SOCI 120 Technology and Society-GTSS33 Credits

Overview of technological innovations and human societies throughout modern history. Emphasizes impacts of technology within a social, political, economic, and environmental context.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

SOCI 196 Topics1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 270 Introduction to Pre-Law Studies2 Credits

Exploration of the path to law school. Dispels myths about the practice of law and law school acceptance. Understanding of skills needed to succeed in law school. Career outlook and resources available to applicants. Open to all majors.

Terms Typically Offered: Fall.

SOCI 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 390 GRE Preparation1 Credit

Introduction to the GRE, including the verbal, quantitative, and writing sections. Includes study tips, practice questions, and critical reading and writing techniques for students to improve their performance on the exam.

SOCI 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SOCI 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 397 Structured Research1-3 Credits

Course may be taken multiple times up to maximum of 9 credit hours.

SOCI 401 LSAT Preparation3 Credits

Preparation for the Law School Admissions Test (LSAT).

SOCI 410 Death, Dying & Bereavement3 Credits

Provides an in-depth overview of the issues surrounding death, dying and bereavement. The social and psychological processes of death using interdisciplinary readings from psychology, sociology, anthropology, history, medicine and philosophy.

SOCI 470 Pre-Law in Practice3 Credits

Prepare for law school. Information about types of law, career outlook, making connections, and selecting the right school. Building skills needed for law school. Understanding what is expected, how to apply. Hear from attorneys in the community. Open to all majors.

Prerequisites: Junior or senior standing.

SOCI 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SOCI 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 497 Structured Research1-3 Credits

Social or behavioral science research under the directed guidance of a faculty member. Designed for junior and senior level students.

Course may be taken multiple times up to maximum of 9 credit hours.

SOCI 499 Internship1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Social Work (SOWK)

SOWK 150 Introduction to Social Work3 Credits

Introduction to the profession of social work and its historical development; overview of the knowledge, values, skills, practice settings, and groups served by social workers.

Terms Typically Offered: Fall, Spring.

SOWK 210 Social Work for Diverse Populations3 Credits

Knowledge and skills necessary for social work practice with diverse populations. Explores issues of stereotypes, prejudice, discrimination, and oppression. Examines cultural diversity in U.S. society and how to increase self-awareness related to worldviews and beliefs about diversity issues. Emphasis on empowerment of individuals and groups and on multicultural competence.

Terms Typically Offered: Fall, Spring.

SOWK 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOWK 301 Child Welfare3 Credits

Signs and symptoms of abuse and neglect of children. Family dynamics in abuse and neglect, and programs of prevention and intervention. Explores foster care, adoptions, delinquency problems, poverty and homelessness, and related issues in child welfare. Examines the crime of human trafficking.

Prerequisites: SOWK 150.

SOWK 308 Medical Social Work3 Credits

Explores interface of social work and patients' rights, medical decision-making, case management, process of diagnosis and treatment, palliative and end-of-life care, and the concept of health care consumer. Focus on the current health care system in the United State, the interface of health care and populations-at-risk, and role of the social worker in medical settings.

Prerequisites: SOWK 150.

SOWK 311 Ethical Issues in Social Work3 Credits

Analysis of specific ethical dilemmas from personal, professional and policy perspectives. Focus on ethical issues common to the social work profession and on the NASW Code of Ethics. Utilize code of ethics as guide to decision making. Explore relationship between professional ethical issues and the development of social policy.

Prerequisites: SOWK 150 and SOWK 210.

SOWK 320 Social Work Practices in Mental Health3 Credits

Practice models and methods of intervention for effective social work practice in mental health care. Includes the promotion of mental health, the prevention of mental illnesses, and delivery of psychosocial treatment and rehabilitation services.

Prerequisites: SOWK 150, SOWK 210, SOWK 311, and SOWK 365.

SOWK 344 School Social Work3 Credits

Overview of social work practice in an educational setting. Cooperative work with school personnel in the identification, prevention and treatment of social, emotional and behavioral problems of children and intervention techniques with parents.

Prerequisites: SOWK 150.

SOWK 350 Legal Aspects of Social Work3 Credits

Exploration of the roles of the social worker in the legal field. Legal terms, procedures, state and federal court systems studied. The legal aspects of protective services for children and adults, the child support laws and the juvenile justice system examined.

Prerequisites: SOWK 150.

SOWK 365 Social Work Intervention Methods I3 Credits

Knowledge, values, and skills for multilevel (micro, mezzo, macro) general practices. Focuses on engaging clients in the helping process, interviewing skills, assessment tools, social histories, goal writing, termination and evaluation. Addresses professional ethics and values and applying systems and ecological frameworks to practice situations. Examines strengths-based assessments, the phases of the helping relationship, and the dynamics of change in interpersonal helping relationships, within a framework of social justice and diversity.

Prerequisites: SOWK 150, SOWK 210, and SOWK 320. This course is only open to social majors who have been formally accepted into the BSW program.

SOWK 375 Social Work Intervention Methods II3 Credits

Examines generalist social work roles and techniques in group work practice. Building on interviewing and engagement skills presented in Intervention Methods I. Focuses on assessment, planning, and intervention with treatment and task groups. Emphasizes basic theory about groups and group process, demonstrates skills necessary for effective practice, explores leadership, group cohesion, and group dynamics. Uses of task and treatment groups in a broad range of settings with diverse client groups.

Prerequisites: SOWK 150, SOWK 210, SOWK 320, and SOWK 365. This course is only open to social work majors who have been formally accepted into the BSW program.

SOWK 377 Spirituality and Social Work3 Credits

Overview of the knowledge, values, and skills to provide spiritually sensitive social work practice. Prepare generalist social work practitioners to work with clients and their families from a holistic framework (bio, psycho, social, cultural, spiritual) and with diversity and respect. Use of interview techniques, spirituality assessments, and strengths-based approaches.

Prerequisites: SOWK 150.

SOWK 381 Gerontology and Social Work3 Credits

Overview of health aspects of aging in the United States. Explores theories of aging, social and health issues, family and caregiving dynamics, and end of life concerns. Prepares generalist social work practitioners to work with older clients and their families and with service delivery systems addressing the needs of this population.

Prerequisites: SOWK 150.

SOWK 385 SW Intervention Methods III3 Credits

Emphasizes study of skills from a problem-solving strengths and empowerment perspective with organizations and community systems. Viewed as an integral component of a model for bringing about social change, especially at the mezzo and macro levels. Attention paid to developing processes of building constituencies, mobilizing resources, networking, political participation, leadership development, and grassroots development. Introductory overview of strategies, tactics, and techniques of social change. Explores basic skills necessary to write effective grant proposals.

Prerequisites: SOWK 150, SOWK 210, SOWK 311, SOWK 320, SOWK 365, SOWK 375, and SOWK 387. This course is only open to social work majors who have been formally accepted into the BSW program.

SOWK 387 Social Work Research Methods3 Credits

Provides an overview of the principles and methods of basic social work research. Explores qualitative and quantitative research methods and how to critically consume research studies and use research findings to strengthen social work practice. Explore how quality research can assist in making important decisions about the design and implementation of projects, programs, and policies that address the social needs of diverse groups. Create research instruments for numerous purposes (e.g. intake, assessment, client satisfaction, facilitating group services, etc.)

Prerequisites: SOWK 150, SOWK 210, SOWK 311, and SOWK 365. This course is only open to social work majors who have been formally accepted into the BSW program.

SOWK 394 Social Work Practicum Seminar I1 Credit

Discussion of practicum-related issues, professional development, and exploration of learning objectives in field practicum experiences. Requires regular reporting of field activities.

Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, and SOWK 387. This course is only open to social work majors who have been formally accepted into the BSW program.

Corequisites: SOWK 397.

SOWK 396 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOWK 397 Social Work Practicum I 5 Credits

Involves 225 clock hours per semester. Opportunities to apply theories, techniques, and concepts through observation and participation in supervised activities. Assists in the understanding and achievement of learning objectives in field practicum experiences.

Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, and SOWK 387. This course is open only to social work majors who have been formally accepted into the BSW program.

Corequisites: SOWK 394.

SOWK 460 Social Welfare Policy 3 Credits

Nature and development of American social policy. Includes history of current structures of social welfare services, the role of policy in service delivery and analysis of current social policy issues including gender policy, homelessness, health care policy, domestic poverty, and child welfare policy. Provides an overview of social policy and legislation and the processes of influencing public policy. It links policy with social work practice.

Prerequisites: SOWK 150, SOWK 210, SOWK 311, SOWK 320, SOWK 365, SOWK 375, SOWK 385, and SOWK 387.

SOWK 491 Directed Readings 1-5 Credits

Student and/or faculty initiated special projects/independent study that explores some aspect of social work theory or practice such as: intervention methods, policy, research, populations-at-risk, values and ethics, aging, spirituality, child welfare, addictions, mental health, social and economic justice, and diversity

Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 387, senior standing, instructor permission, and a plan for study.

SOWK 494 Social Work Practicum Seminar I 1 Credit

Discussion of practicum-related issues, professional development, and exploration of learning objectives in field practicum experiences. Requires regular reporting of field activities.

Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, SOWK 387, SOWK 397, SOWK 394, and SOWK 460.

Corequisites: SOWK 497.

SOWK 495 Independent Study 1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SOWK 497 Social Work Practicum II 5 Credits

Involves 225 clock hours per semester. Provides students with opportunities to apply theories, techniques, and concepts through observation and participation in supervised activities. Assists students in the understanding and achievement of learning objectives in their field practicum experiences.

Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, SOWK 387, SOWK 397, SOWK 394. This course is only open to social work majors who have been formally accepted into the BSW program.

Corequisites: SOWK 494.

SOWK 510 History and Philosophy of Social Work 3 Credits

Introduction to the social work profession and its historical development. Explores practice setting and vulnerable populations served by social workers. Provides an overview of the knowledge, values, skills, and practice behaviors required for social workers.

Terms Typically Offered: Fall.

SOWK 511 Human Behavior and Social Environment 3 Credits

Social work perspective on human development across the life cycle. Focuses on the biological, psychological, social, cultural and spiritual aspects of human functioning across a lifetime.

Terms Typically Offered: Fall.

SOWK 512 Social Justice in Social Work Practice 3 Credits

Focus on power and privilege dynamics to increase students' awareness, knowledge, and critical skills related to diversity, human rights, social and economic justice, and anti-racist practices.

Terms Typically Offered: Spring.

SOWK 513 Social Work Theory and Practice with Individuals and Families 3 Credits

Knowledge, values, and skill development across micro (individual) and mezzo (group) areas of practice. Focuses on developing clinical skills to engage clients and families in the planned change process including engagement, assessment, intervention, termination and evaluation of services.

Terms Typically Offered: Fall.

SOWK 514 Social Work Theory and Practice with Groups, Organizations, and Communities 3 Credits

Knowledge, values, and skill development in group work, organizations, and in communities. Focuses on developing skills to identify and engage constituencies, mobilize resources, network, engage in political participation, and develop grassroots organization.

Terms Typically Offered: Spring.

SOWK 515 Social Work Policy and Practice 3 Credits

Examination of social welfare policy from historical, political, economic, social, and cultural perspectives. Skill development for political advocacy and the process of policy formulation/development, implementation, and evaluation/analysis at the local, state, and federal levels of government.

Terms Typically Offered: Spring.

SOWK 516 Psychopathology for Social Work Practice 3 Credits

Introduction to psychological dysfunction associated with distress or impaired functioning that is not typical, or expected, based on cultural and societal norms. Content is organized in accordance with the Diagnostic and Statistical Manual of Mental Disorders (DSM-5).

Terms Typically Offered: Spring.

SOWK 521 Advanced Ethical, Legal, and Professional Issues in Social Work Practice 3 Credits

Discussion of values, professional ethics, guidelines for making ethical decisions, ethical dilemmas in professional practice, professional relationships, and laws that impact social work.

Terms Typically Offered: Spring.

SOWK 522 Clinical Supervision and Leadership in Social Work Practice 3 Credits

Exploration of various leadership traits, theories, conflict management, laws, and the role of diversity in supervision and leadership. Examines various contexts of practice and the influence of politics, economics, technology, and sociocultural factors on leadership and supervision.

Terms Typically Offered: Spring.

SOWK 523 Advanced Social Work Practice with Individuals and Families 3 Credits

Theory and practice of clinical social work, emphasizing social justice frameworks and life course perspectives. Emphasizes specialized, strengths-based approaches to all phases of social work practice.

Terms Typically Offered: Fall.

SOWK 524 Advanced Social Work Practice with Groups, Organizations, and Communities 3 Credits

Advanced theories, approaches, and skills in social work practice to address complex social issues with disenfranchised groups. This course will engage in effective change in the macro-level social systems environment (e.g., groups, organizations, institutions, communities, and society at large).

Terms Typically Offered: Fall.

SOWK 525 Social Work Research and Program Evaluation 3 Credits

Evaluation of social work research across micro and macro-level perspectives. Students will identify issues related to the design, monitoring, and assessment of social work programs and interventions, using both quantitative and qualitative methods.

Terms Typically Offered: Spring.

SOWK 526 Advanced Psychopathology for Social Work Practice 3 Credits

Advanced, comprehensive overview of psychopathology from a historical and current scientific perspective. Focus on conceptualization of issues, systems of classification and diagnosis, research design methods, clinical symptomatology, differential diagnosis, testing, and etiology of psychopathology across a lifetime.

Terms Typically Offered: Fall.

SOWK 551 Trauma Informed Practice 3 Credits

Exploration of the nature and meaning of trauma, assessing and identifying trauma, and effective practices for treating trauma. Focus on clinical assessments for trauma, understanding diagnosis and trauma, and relational processes as they apply to assessment, case conceptualization, treatment, and theological understandings of trauma therapy and interventions.

Terms Typically Offered: Summer.

SOWK 552 Restorative Justice and Social Work 3 Credits

Examination of conceptual framework, strategies, and benefits of restorative approaches to social worker roles and responsibilities. Develop historical and theoretical understanding of restorative approaches, build restorative-based skills, and apply restorative approaches to a variety of client population systems, settings, and needs.

Terms Typically Offered: Summer.

SOWK 553 Substance Abuse: Assessment, Interventions, and Treatment 3 Credits

Development of knowledge, assessment, and intervention skills utilized to work with individuals experiencing problems with the use of psychoactive substances.

Terms Typically Offered: Summer.

SOWK 554 Crisis Intervention and Social Work 3 Credits

Advanced clinical practice to increase knowledge and skills for working in crisis situations. Apply crisis interventions and theories to various issues such as suicide, sexual assault, domestic violence, substance abuse, grief and loss, mental health, and violent behaviors. A bio-psycho-social and cultural emphasis will be applied to the various problem covered.

Terms Typically Offered: Summer.

SOWK 555 Global Relations and International Social Work 3 Credits

Exploration and critique of how political, economic, cultural, religious, and environmental factors impact social welfare policies, social work practice, and social development globally.

Terms Typically Offered: Summer.

SOWK 594A Field Education: Foundation Seminar I 1 Credit

Integration of foundational social work knowledge, values, and skills into competent practice.

Corequisites: SOWK 597A.

Terms Typically Offered: Fall.

SOWK 594B Field Education: Foundation Seminar II 1 Credit

Integration of foundational social work knowledge, values, and skills into competent practice. Continuation of SOWK 594A.

Corequisites: SOWK 597B.

Terms Typically Offered: Spring.

SOWK 594C Field Education: Advanced Seminar I 1 Credit

Integration of advanced social work knowledge, values, and skills into competent practice.

Corequisites: SOWK 599A.

Terms Typically Offered: Fall.

SOWK 594D Field Education: Advanced Seminar II 1 Credit

Integration of advanced social work knowledge, values, and skills into competent practice. Continuation of SOWK 594C.

Corequisites: SOWK 599B.

Terms Typically Offered: Spring.

SOWK 596 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOWK 597A Field Education: Social Work Practicum I 5 Credits

Integrative experience of theory and practice at the foundational level. Provides students with opportunities to apply theories, techniques, and concepts through observation and supervised participation in practice. Field education is the signature pedagogy of social work.

Corequisites: SOWK 594A.

Terms Typically Offered: Fall.

SOWK 597B Field Education: Social Work Practicum II 5 Credits

Integrative experience of theory and practice at the foundational level. Provides students with opportunities to apply theories, techniques, and concepts through observation and supervised participation in practice. Field education is the signature pedagogy of social work. Continuation of SOWK 597A.

Corequisites: SOWK 594B.

Terms Typically Offered: Spring.

SOWK 599A Field Education: Social Work Internship I 6 Credits

Integrative experience of theory and practice at the advanced level. Provides students with opportunities to apply theories, techniques, and concepts through observation, co-facilitation, and independent practice. Field education is the signature pedagogy of social work.

Corequisites: SOWK 594C.

Terms Typically Offered: Fall.

SOWK 599B Field Education: Social Work Internship II 6 Credits

Integrative experience of theory and practice at the advanced level. Provides students with opportunities to apply theories, techniques, and concepts through observation, co-facilitation, and independent practice. Field education is the signature pedagogy of social work. Continuation of SOWK 599A.

Corequisites: SOWK 594D.

Terms Typically Offered: Spring.

Sociology (SOCO)

SOCO 144 Marriage and Families-GTSS33 Credits

Survey of patterns of marriage and family life in social context, with an emphasis on sociological explanations of family patterns and relevant policy implications.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

SOCO 202 Introduction to Sociological Inquiry3 Credits

Orientation to the sociological major with a focus on introductory methods of sociological research. Preparation for writing and research requirements of upper-division sociology courses. Exploration of possible careers and marketing of skills after graduation.

Prerequisites: SOCO 260 or SOCO 264.

SOCO 260 General Sociology-GTSS33 Credits

An overview of sociological concepts, terminology, basic principles, and important theories; introduction to substantive areas of the field.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

SOCO 264 Social Problems-GTSS33 Credits

Analysis of contemporary social problems from a sociological perspective, including the social construction of problems, theoretical explanations, and policy implications. Specific problems covered will vary but may include topics such as inequality along with problems in social institutions such as the economy, education, and the family.

Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

SOCO 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 300 Political Sociology3 Credits

The interactions and interrelationships between social and political forces. Topics covered include state and society, the social bases of power, ideology, and the media.

Prerequisites: SOCO 260, or POLS 101, or permission of instructor.

SOCO 303 Sociological Research Methods3 Credits

Methods of sociological research, including practical application of quantitative methods to social science data, culminating in an individual research project.

Prerequisites: SOCO 202 and STAT 215.

SOCO 305 Environmental Sociology3 Credits

Overview of the interrelations among the physical environment, population, and technology; the origin and basis of environmental social movement organizations; the social construction of environmental issues.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Spring.

SOCO 310 Sociology of Religion3 Credits

Examination of religious beliefs, practices, and organizations from a sociological perspective. Consideration also given to the intersection of religion with race, class, gender, and sexuality.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Spring.

SOCO 312 Social Movements and Political Activism3 Credits

Sociological study of historical and contemporary social movements and political activism. Overview of the literature on social movement development, organization, participation, and outcomes.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Spring.

SOCO 314 Population3 Credits

Basic concepts of population studies in international context. Demographic trends including fertility, mortality and migration, as well as the causes and consequences of those trends.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Fall.

SOCO 316 Social Inequality3 Credits

Causes and effects of inequality, especially social class, with consideration of race and gender.

Prerequisites: SOCO 260, or SOCO 264, or permission of instructor.

SOCO 318 Sociology of Health & Illness3 Credits

Exploration of sociological perspectives relating to the definitions and experiences of health and illness. Overview of the literature on social inequalities in health and illness, cultural constructions of illness, social experiences of illness, and local and global health care systems.

Prerequisites: SOCO 260.

SOCO 320 Life Course and Aging3 Credits

Investigation of development and aging as lifelong processes situated in social context. Exploration and application of a social scientific framework for understanding the interplay between human lives and social change.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Fall.

SOCO 323 Self and Society3 Credits

Investigation of microsociology, which examines the nature of everyday social interactions, relationships, and groups. Consideration also given to interdisciplinary perspectives that shed light on human social behavior.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Spring.

SOCO 325 Race and Ethnic Relations3 Credits

Sociological analysis of race and ethnic relations in the United States, both historically and today.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Fall.

SOCO 340 Sociology of Gender3 Credits

Investigation of sociological perspectives on gender, with an emphasis on the social construction of gender, gender inequality in social institutions, and patterns of gendered social relations.

Prerequisites: SOCO 260 or SOCO 264.

Terms Typically Offered: Spring.

SOCO 345 Sociology of Sexuality3 Credits

Exploration of sexuality from a sociological perspective. Analysis of the intersections of race, class, and gender as well as social institutions as they apply to understanding sexuality.

Prerequisites: SOCO 260.

Terms Typically Offered: Spring.

SOCO 351 21st Century Families3 Credits

Sociological investigation of changing family structures and intimate relationships, with an emphasis on contemporary constructions of family, diverse family forms, the role of gender in family life, and problems faced by contemporary families.

Prerequisites: SOCO 260.

Terms Typically Offered: Fall.

SOCO 370 Roots of Sociological Thought3 Credits

Introduction to the origins of sociology and the early development of sociological thought. Emphasis on the relevance of classical perspectives to an understanding and critical evaluation of society today.

Prerequisites: SOCO 202 and SOCO 260.

Terms Typically Offered: Fall.

SOCO 375 Contemporary Sociological Perspectives3 Credits

Overview of sociological theory from the early 20th century to the present. Emphasis on applying contemporary theories to understanding and critiquing issues in society today.

Prerequisites: SOCO 202 and SOCO 260.

Terms Typically Offered: Spring.

SOCO 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SOCO 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 399 Internship1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 420 Field Studies6 Credits**SOCO 493 Senior Capstone3 Credits**

Sociological analysis of contemporary issues in society. Specific topics vary according to current events and instructor expertise.

Prerequisites: SOCO 202 and Senior Standing.

Terms Typically Offered: Spring.

SOCO 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SOCO 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 499 Internship1-3 Credits

Work experience relevant to sociology in a wide variety of potential settings outside the university community.

Terms Typically Offered: Fall, Spring.

Course may be taken multiple times up to maximum of 15 credit hours.

Speech (SPCH)

SPCH 101 Interpersonal Communications3 Credits

Exploration of multiple aspects of human behavior, including the communication process, perception, verbal and nonverbal communication, diversity and adapting to others, conflict, culture, and relationships in personal/professional contexts.

Essential Learning Categories: Social and Behavioral Sciences

Terms Typically Offered: Fall, Spring, Summer.

SPCH 102 Speechmaking3 Credits

Preparation, organization, and delivery of a variety of speeches.

Essential Learning Categories: Humanities

Terms Typically Offered: Fall, Spring, Summer.

SPCH 112 Acting III: Voice and Diction3 Credits

The use of the speaking voice emphasizing voice placement, speech sounds, breath control, projection, and the phonetic alphabet.

Recommended for theatre majors, teachers, prelaw, ministers and business majors.

SPCH 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SPCH 203 Persuasion3 Credits

Open discussions on the ethics, process, and application of everyday use of persuasion; how it applies to advertisements, politics, and friendships; preparation for debate.

Terms Typically Offered: Fall, Spring.

SPCH 241 Oral Interpretation3 Credits

The reading aloud of prose, poetry, and essays with the intention of conveying the author's ideas to a listening audience.

SPCH 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SPCH 303 Nonverbal Communication3 Credits

The opportunity to observe, record and interpret the nonverbal dimensions of communication behavior and the opportunity to enhance awareness and skill in nonverbal communication behavior in mass media, law, theatre, group dynamics, etc.

SPCH 304 Communication and Conflict3 Credits

The nature of conflict, conflict structure, conflict styles, and the use of power in conflicts. Application of theories to analyze and set goals to plan strategies and tactics. Study of intervention principles and practices.

Terms Typically Offered: Fall.

SPCH 305 Intercultural Communication3 Credits

Research and practical application to facilitate constructive communication and relationships with individuals and groups from diverse cultures, backgrounds, and identities.

Terms Typically Offered: Fall.

SPCH 306 Communication and Leadership3 Credits

Study of communication theories and styles to determine the influence over behaviors, thoughts, and feelings in leader-follower interactions.

Terms Typically Offered: Fall.

SPCH 307 Professional Presentations3 Credits

Exploration and practical development of high-energy presentation skills tailored to students' chosen career paths.

Prerequisites: SPCH 102 or ESSL 200.

Terms Typically Offered: Fall, Spring.

SPCH 308 Argumentation and Debate3 Credits

Research and development of various types of debate such as student congress, mock trial, value debate, etc., using national and international topics of current interest.

Prerequisites: ESSL 200 or SPCH 102.

Terms Typically Offered: Spring.

SPCH 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SPCH 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

SPCH 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

SPCH 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Statistics (STAT)

STAT 200 Probability and Statistics-GTMA13 Credits

Introduction to descriptive and inferential statistical methods. Topics include: types of random variables, graphical and numeric summaries of data, elementary probability, discrete and continuous probability distributions, sampling distributions, confidence intervals and hypothesis testing for one and two samples, correlation and regression, chi-squared tests, and one-way analysis of variance.

Prerequisites: MATH 110 or MATH 113.

Terms Typically Offered: Fall, Spring.

STAT 215 Statistics for Social and Behavioral Sciences4 Credits

Introduction to descriptive and inferential statistical methods, with specific applications for social and behavioral sciences. Topics include types of random variables; graphical and numeric data summaries; elementary probability; discrete and continuous probability distributions; sampling distributions; confidence intervals and hypothesis testing; correlation and regression; chi-squared tests; and one-way analysis of variance. Includes proficiency in software commonly used in the social sciences.

Prerequisites: MATH 110 or higher; and one of the following: ANTH 202, PSYC 150, SOCO 260, CRMJ 201, or POLS 101.

Terms Typically Offered: Fall, Spring.

STAT 241 Introduction to Business Analysis3 Credits

Introduction to descriptive, predictive, and inferential analysis techniques with business applications. Topics include summarizing data graphically and numerically; elementary probability; discrete and continuous probability distributions; sampling distributions; intervals and tests for one and two samples; correlation and regression; chi-squared tests; and one-way analysis of variance. Appropriate business and statistical software will be used.

Prerequisites: MATH 113 or higher.

Equivalent Course(s): CISB 241

Terms Typically Offered: Fall, Spring.

STAT 301 Computational Statistics3 Credits

Introduction to computational methods within statistical software, with a primary focus on R, SPSS, and Excel. Topics include inference on population means and variances, sampling from probability distributions, linear regression and correlation, analysis of variance, power of statistical tests, nonparametric methods, categorical data techniques, and graphics.

Prerequisites: STAT 200 or STAT 215 or STAT 241 or CISB 241.

Terms Typically Offered: Fall, Spring.

STAT 305 Statistics and Quality Control for Engineering3 Credits

Introduction to descriptive and inferential statistics, and principles of quality management. Includes descriptive statistics, probability distributions, hypothesis testing, regression analysis, control charts, total quality management, quality improvement process, process capability, gauge repeatability and reproducibility, six-sigma, risk assessment, quality audit and ISO 9000.

Prerequisites: MATH 135 or MATH 151, and CSCI 130.

STAT 312 Correlation and Regression3 Credits

Graphical, numerical, and theoretical least-squares analysis for simple and multiple regression and correlation, including inference methods, diagnostics and remedial measures, simultaneous inference methods, the matrix approach to regression and correlation analysis, and stepwise regression procedures. Use of statistical software.

Prerequisites: STAT 301.

Terms Typically Offered: Spring.

STAT 313 Sampling Techniques3 Credits

Methodology of simple random sampling, stratified, systematic cluster, and two-stage sampling. Estimation of sample size determination, and minimized costs of sampling are discussed. Use of resampling statistical software.

Prerequisites: STAT 200 or STAT 215 or STAT 241 or CISB 241.

Terms Typically Offered: Spring.

STAT 350 Mathematical Statistics I3 Credits

Calculus based mathematical development of discrete and continuous random variables. Topics include probability axioms and rules, Bayes' Theorem, discrete and continuous distributions, expectation, variance, moment generating functions, marginal and conditional distributions, bivariate distributions, transformations, sampling distributions and the central limit theorem.

Prerequisites: STAT 200 and MATH 253 (may be taken concurrently).

STAT 351 Mathematical Statistics II3 Credits

This course is a continuation of STAT 350 Mathematical Statistics I. This course is a calculus-based theoretical study of point estimators by method of moments and maximum likelihood, confidence intervals, hypothesis testing, simple linear regression, analysis of variance, and nonparametric methods. Additional topics may include experimental design, quality control, multiple linear regression, and survival analysis.

Prerequisites: STAT 350.

STAT 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

STAT 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

STAT 425 Design and Analysis of Experiments3 Credits

Design and analysis of single and multiple factor experiments, fixed, mixed and random effects designs including multiple comparison procedures, transformations, fixed, mixed and random effects designs, completely randomized designs, randomized block designs, Latin square designs, and nested designs.

Prerequisites: STAT 301; and MATH 151 or MATH 135 or MATH 131 or MATH 121.

Terms Typically Offered: Fall.

STAT 430 Categorical Data Analysis3 Credits

Study of appropriate methods for the collection and analysis of qualitative data. Topics include inference for contingency tables, chi-square and nonparametric tests, logistic regression, modelling for multinomial responses, and generalized linear models.

Prerequisites: STAT 301.

Terms Typically Offered: Fall, Spring.

STAT 435 Introduction to Time Series3 Credits

Statistical methods for analyzing time series. Topics include stationarity, autocorrelation, ARIMA models, spectral analysis, filtering, forecasting, and GARCH models.

Prerequisites: STAT 301.

Terms Typically Offered: Fall, Spring.

STAT 460 Actuarial Exams Preparation3 Credits

Preparation for the Probability Exam (P Exam) as well as the Financial Mathematics Exam (FM Exam) from the Society of Actuaries.

Prerequisites: STAT 351.

Terms Typically Offered: Spring.

STAT 494 Seminar1 Credit

Discussions of specialized topics by students, faculty, or visiting professors. One-hour meeting per week.

Course may be taken multiple times up to maximum of 10 credit hours.

STAT 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

STAT 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Surgical Technology (SUTE)

SUTE 200 Medical Terminology in Surgical Technology2 Credits

Exploration of word roots, prefixes, and suffixes used in medicine and healthcare. Students will learn medical terminology and definitions related to major body systems and procedures associated with the surgical setting.

Prerequisites: Admission to the Surgical Technology Program, BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, BIOL 241, and PSYC 150.

Corequisites: SUTE 202/SUTE 202L, SUTE 206, SUTE 210.

Terms Typically Offered: Fall.

SUTE 202 Fundamentals in Surgical Technology4 Credits

Introduction to the scope and breadth of surgical technology. Students learn evidence-based practices to promote patient safety and to adhere to standards of practice in the surgical setting.

Prerequisites: Admission to the Surgical Technology Program, BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, BIOL 241, and PSYC 150.

Corequisites: SUTE 200, SUTE 202L, SUTE 206, SUTE 210.

Terms Typically Offered: Fall.

SUTE 202L Fundamentals in Surgical Technology Laboratory3 Credits

Approaches to surgical technology. Students will learn tasks and responsibilities of the surgical technologist including the practice of sterile technique, surgical scrub, gown and glove, patient positioning, draping, and surgical prep on patients. Students will learn the practice of standard precautions in surgery. Skills will be practiced in a clinical setting.

Prerequisites: Admission to the Surgical Technology Program; BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, BIOL 241, and PSYC 150.

Corequisites: SUTE 200, SUTE 202, SUTE 206, and SUTE 210.

Terms Typically Offered: Fall.

SUTE 206 Pharmacology for Surgical Technology3 Credits

Exploration of safe use of prescription and nonprescription drugs. Emphasis will be placed on the impact of safe drug use in promoting and maintaining health. The course will examine how drugs affect the body by changing many of its normal mechanisms, thereby contributing to potential health problems during surgery.

Prerequisites: Admission to the Surgical Technology Program, BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, BIOL 241, and PSYC 150.

Corequisites: SUTE 200, SUTE 202/SUTE 202L, SUTE 210.

Terms Typically Offered: Fall.

SUTE 210 Safety and Equipment3 Credits

Exploration of hazard prevention in the surgical setting. Students learn to prepare, plan, detect and communicate safety and security principles. Students learn tasks and responsibilities of incident-management, all-hazard preparation, and components of personal, community, and institutional disaster planning. Evidence based practice guidelines, healthcare regulations and legal considerations are discussed.

Prerequisites: Admission to the Surgical Technology Program, BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, BIOL 241, and PSYC 150.

Corequisites: SUTE 200, SUTE 202/SUTE 202L, and SUTE 206.

Terms Typically Offered: Fall.

SUTE 212 Surgical Procedures I4 Credits

Exploration of surgical specialties including, but not limited to, general surgery, obstetrics and gynecologic, genitourinary, orthopedics, and neurosurgical. This course introduces the student to specialized instrumentation and surgical modalities of each surgical specialty.

Prerequisites: SUTE 200, SUTE 202/SUTE 202L, SUTE 206, and SUTE 210.

Corequisites: SUTE 212L, SUTE 218, and SUTE 220.

Terms Typically Offered: Spring.

SUTE 212L Surgical Procedures I Laboratory3 Credits

Exploration of specific surgical specialties including general surgery, obstetrics and gynecologic, genitourinary, orthopedics, and neurosurgical.

This course introduces the student to the surgical specialties with a focus on a systems review of pathology in conjunction with specific procedures performed, specialized instrumentation, and surgical modalities of each surgical specialty.

Prerequisites: SUTE 200, SUTE 202/SUTE 202L, SUTE 206, and SUTE 210.

Corequisites: SUTE 212, SUTE 218, and SUTE 220.

Terms Typically Offered: Spring.

Fees: Yes.

SUTE 218 Specialty Surgical Procedures4 Credits

Exploration of specific surgical specialties including, but not limited to, plastics, ophthalmic, vascular, thoracic, and cardiac surgeries.

The student will focus on specific procedures performed, specialized instrumentation, and surgical modalities of each specialty.

Prerequisites: SUTE 200, SUTE 202/SUTE 202L, SUTE 206, and SUTE 210.

Corequisites: SUTE 212/SUTE 212L, and SUTE 220.

Terms Typically Offered: Spring.

SUTE 220 Surgical Clinical I2 Credits

Demonstration of basic surgical technology skills and abilities. Emphasis is placed on accrual of practice experiences necessary for national certification. Students participate in general surgical procedures through a variety of surgical cases.

Prerequisites: SUTE 200, SUTE 202/SUTE 202L, SUTE 206, and SUTE 210.

Corequisites: SUTE 212/SUTE 212L, and SUTE 218.

Terms Typically Offered: Spring.

SUTE 230 Surgical Clinical II3 Credits

Demonstration of surgical technology skills and abilities of increasing complexity. Emphasis is placed on accrual of practice experiences necessary for national certification. Students participate in complex procedures through a variety of surgical cases.

Prerequisites: SUTE 212/SUTE 212L, SUTE 218, and SUTE 220.

Corequisites: SUTE 240.

Terms Typically Offered: Summer.

SUTE 240 Surgical Clinical III4 Credits

Demonstration of the roles and responsibilities of a surgical technologist. Emphasis is placed on preparation for minimally supervised practice and completion of the national certification exam. Students function in increasingly autonomous roles through a variety of surgical cases.

Prerequisites: SUTE 212/SUTE 212L, SUTE 218, and SUTE 220.

Corequisites: SUTE 230.

Terms Typically Offered: Summer.

Fees: Yes.

Technology Integration (TECI)

TECI 111 Healthcare Data Management and Information Systems3 Credits

Introduction to the electronic health record (EHR) components and health informatics including infrastructure, privacy, security, and legal implications. Federal involvement and its impact on information technology regarding health data will be discussed. The transformation of data into meaningful information, through research, vital statistics, and epidemiology will be demonstrated. Data quality, integrity, collection, access, and retention will also be emphasized.

Fees: Yes.

TECI 118 AC Passive Circuits3 Credits

Analysis of AC circuits including resistors, capacitors, inductors, and use of standard test equipment. Three one-hour lectures and one one-and-one-half hour laboratory per week.

Corequisites: TECI 118L.

TECI 118L AC Passive Circuits Laboratory1 Credit

Lab component required for TECI 118.

Corequisites: TECI 118.

Fees: Yes.

TECI 120 A+ Certification Preparation3 Credits

Personal computer hardware, networking concepts, operational procedures, and troubleshooting for a successful entry-level computer service technician position. Provides extensive hands-on work with computer systems, PC setup and configuration, and basic maintenance and troubleshooting. Preparation for the first CompTIA A+ Exam.

Terms Typically Offered: Fall, Spring.

TECI 131 Principles of Information Assurance (Security+ Prep)3 Credits

Skills and knowledge associated with protecting information assets, determining the levels of protection and response to security incidents, and designing a consistent, reasonable information security system. Students learn to inspect and protect information assets, detect and react to threats to information assets, and examine pre- and post-incident procedures.

Terms Typically Offered: Fall.

TECI 132 Introduction to IT Hardware and System Software3 Credits

Basic hardware and software study of stand-alone or local/wide-area computers. Hands-on experience using 5x or above architecture.

TECI 142 Internet of Things3 Credits

Introduction to the Internet of Things (IoT), the aggregate collection of network-enabled devices, excluding traditional computers. Network connections include Wi-Fi connections, Bluetooth connections, and near-field communication. The IoT includes "smart" appliances, home security systems, computer peripherals, wearable technology, routers, and smart speaker devices. Topics include understanding how the IoT bridges the gap between operational and information technology systems.

Terms Typically Offered: Fall, Spring, Summer.

TECI 163 Convergent Technologies3 Credits

Introduction to telecommunications, including how data, voice, and video technologies are converging for telecommunications systems. Topics will also include wireless, ISDN, PCM, DSL, cable, IP voice, and computer networks.

Fees: Yes.

TECI 170 Introduction to Communications3 Credits

Overview of communication systems that include both central office based and premise based platforms. The switching and service components of RBOC and inter-exchange providers will be examined and discussed. Characteristics, advantages, and disadvantages of the various systems will be compared and contrasted. Architecture and design of switching infrastructures and components will also be covered.

Fees: Yes.

TECI 180 Cisco Networking I3 Credits

The first of four semester courses in Cisco's Networking Academy curriculum. Concepts covered are: OSI model, internetworking devices, IP addressing, LAN media and topologies, structured cabling, electronics. CCNA certified individual can perform the following tasks: -Install and configure Cisco Switches and routers in multi-protocol internetworks using LAN and WAN interfaces. -Provide Level 1 troubleshooting service -Improve network performance and security -Perform entry-level tasks in the planning, design, installation, operation, and troubleshooting of Ethernet and TCP/IP networks.

Fees: Yes.

TECI 185 Cisco Networking II3 Credits

The second of four semester courses in Cisco's Networking Academy curriculum. Concepts covered are: Safety; Networking; Network terminology and protocols; Network standards; LANs, MANs, SANs, WANS; OSI model; Ethernet; Token ring; FDDI; TCP/IP addressing protocol; Dynamic routing; the Network Administrator's role and function.

Prerequisites: TECI 180.

Fees: Yes.

TECI 195 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

TECI 196 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

TECI 201 Linux Configuration (OS)3 Credits

Installation of a Linux operating system (OS). Configure and manage OS using command line interface (CLI) and text editor. Topics include installation and configuration of updates, services, file system, users and groups, file and folder permissions, networking, and remote access.

Terms Typically Offered: Fall, Spring, Summer.

TECI 202 Unix/Linux Server Administration3 Credits

Knowledge and skills required to configure, administer and secure data, users and services in a UNIX or Linux server environment. Emphasis will be on command-line interface (CLI). Topics will also include system monitoring, performance tuning, troubleshooting and interoperability with Windows servers and clients.

Terms Typically Offered: Fall, Spring, Summer.

TECI 211 Windows Configuration (OS)3 Credits

Knowledge and skills necessary to address the implementation and desktop support needs of customers who are planning to deploy and support Microsoft Windows Client OS in a variety of network operating system environments.

Terms Typically Offered: Fall, Spring, Summer.

Fees: Yes.

TECI 230 Cisco Networking III3 Credits

The third of four semester courses in Cisco's Networking Academy curriculum. Concepts covered are: LAN switching; VLANs; LAN design; IGRP; Access lists; IPX/SPX; with concepts applied through design of a Threaded Case Study (TCS).

Prerequisites: TECI 180 and TECI 185.

Fees: Yes.

TECI 235 Cisco Networking IV3 Credits

The fourth of four semester courses in Cisco's Networking Academy curriculum. Concepts covered are: WANs, SANs design; PPP; ISDN; Frame relay; Master documentation skills; with concepts applied through design of a Threaded Case Study (TCS).

Prerequisites: TECI 180, TECI 185, and TECI 230.

Fees: Yes.

TECI 240 VoIP Fundamentals3 Credits

Covers the components of engineering the telephone outside plant, fundamentals of transmission, resistance design, and distribution cable design in serving a customer area.

TECI 242 Cloud Computing3 Credits

Introduction to cloud computing and how to install, configure, and manage a cloud environment. Builds on knowledge of hypervisor and virtual machine environments.

Fees: Yes.

TECI 245 Security Fundamentals3 Credits

Comprehensive overview of network security. Includes general security concepts. Communication security includes remote access, e-mail, the Web, directory and file transfer, and wireless data. Common network attacks introduced. Cryptography basics incorporated. Operational/organizational security discusses as it relates to physical security, disaster recovery, and business continuity. Computer forensics introduced.

TECI 257 Network Defense and Counter Measures (CySA+ Preparation)4 Credits

Examination of tools and technologies in the technical securing of information. Provides in-depth information about software and hardware components of Information Security and Assurance. Topics include: firewall configurations, hardening Unix and NT servers, Web and distributed systems security, and specific implementation of security modes and architectures. Curriculum maps to the Security Certified Network Professional (SCP) Network Defense and Countermeasures exam.

Prerequisites: TECI 131.

Terms Typically Offered: Fall, Spring.

TECI 260 Information Technology Hardware and System Software3 Credits

Use of an internal systems approach to building and maintaining stand-alone or local/wide area computers utilized in networking. Hands on experience using 5x or above architecture.

TECI 265 Advanced IT Hardware and System Software3 Credits

Windows Domain Management and Windows Deployment. Introduces Microsoft Deployment Toolkit (MDT) to accelerate and automate deployments of Windows 8, Windows Server 2012, Windows 7, Office 2010, and Windows Server 2008 R2. MDT provides a common console with comprehensive tools and guidance for every organizational role. Recommended process and toolset to automate large-scale desktop and server deployments.

Prerequisites: TECI 260.

Fees: Yes.

TECI 270 Cisco Cybersecurity Operations Fundamentals (CBROPS)4 Credits

Core and advanced security concepts and skills for Cisco networks.

Prerequisites: TECI 180 and TECI 185.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

TECI 292 Capstone in Technical Engineering Planning and Economics4 Credits

Knowledge to articulate the tactical planning functions performed within capacity provisioning. Access and apply the various tactical planning tools and data elements to supporting documentation. Economic principles in costing, value, capital investment, profitability and inventory.

Fees: Yes.

TECI 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Theatre (THEA)

THEA 102 Introduction to Theatre Technology: Stagecraft 3 Credits

Introduction to basic scene shop safety, organization of materials, hand and machine carpentry and basic stagecraft techniques.

Terms Typically Offered: Fall.

Fees: Yes.

THEA 103 Introduction to Theatre Technology: Costume3 Credits

Introduction to basic costume shop safety, organization and materials, hand and machine sewing.

Terms Typically Offered: Fall.

Fees: Yes.

THEA 104 Introduction to Theatre Technology: Lighting 3 Credits

Introduction to basic lighting shop safety, organization of materials, electrical repair, and basic hang and focus techniques.

Terms Typically Offered: Spring.

THEA 105 Introduction to Theatre Technology: Sound Technology3 Credits

Introduction to basic theatre sound design, protocol, and execution, including live audio technology and computer editing.

Terms Typically Offered: Spring.

THEA 114 Summer Theatre3 Credits

Professional summer theatre experience. The student is expected to participate in all phases of the theatre operation including acting, technical work, directing, box office management, etc. It is advisable for a student enrolled in summer theatre not to enroll in any other class. Five plays are presented in a seven-week period.

THEA 116 Music Theatre Workshop1 Credit

A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.

Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 117 Play Production1 Credit

A practical course in stagecraft concerned with the production of plays. The student works in all phases of production. Students will work three hours per week unless other arrangements are made with the instructor.

THEA 118 Play Production1 Credit

A practical course in stagecraft concerned with the production of plays. The student works in all phases of production. Students will work three hours per week unless other arrangements are made with the instructor.

THEA 119 Technical Performance1 Credit

Direct participation in the technical aspects of various productions. Grade will depend upon the preparatory work involved and upon the final technical production. Students must work a minimum of two productions in order to receive credit.

THEA 120 Technical Performance1 Credit

Direct participation in the technical aspects of various productions. Grade will depend upon the preparatory work involved and upon the final technical production. Students must work a minimum of two productions in order to receive credit.

THEA 128 Theatre Forums1 Credit

Specialized workshops in various aspects of theatre made possible by visiting artists and/or lecturers or by attending seminars or workshops. Papers and discussions are used for evaluation.

THEA 129 Theatre Forums1 Credit

Specialized workshops in various aspects of theatre made possible by visiting artists and/or lecturers or by attending seminars or workshops. Papers and discussions are used for evaluation.

THEA 130 Script Analysis3 Credits

Introduction to practical analysis of theatrical texts. Familiarizes students with script analysis techniques useful in production and performance studies.

Terms Typically Offered: Spring.

THEA 141 Theatre Appreciation-GTAH13 Credits

Examination of basic presentation techniques and history of theatre.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Terms Typically Offered: Fall, Spring.

THEA 142 Make-up3 Credits

Introduction to all types of make-up for the stage. Students examine straight and character make-up techniques and learn the use of crepe hair, prosthetics, and other material.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

THEA 145 Introduction to Dramatic Literature-GTAH13 Credits

Dramatic literature from classical Greeks to modern dramatists.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

THEA 147 Drama Performance1 or 2 Credits

Requires a student to appear in a major production on campus. The grade will depend upon the preparatory work on the play's character and upon the final performance.

Prerequisites: Permission of instructor.

THEA 148 Drama Performance1 or 2 Credits

Requires a student to appear in a major production on campus. The grade will depend upon the preparatory work on the play's character and upon the final performance.

Prerequisites: Permission of instructor.

THEA 150 Fundamentals of Acting3 Credits

This course will introduce non-theatre majors to the basic components of the acting process, including scene work, improvisation, and audition techniques.

THEA 153 Acting I: Beginning Acting3 Credits

Fundamentals of Acting via improvisation and scene study. Students perform in solo, duo and/or group scenes.

Prerequisites: Theatre Arts major or minor in good standing.

THEA 156 Acting II: Contemporary Scenework3 Credits

Further development in the application of Stanislavski-based theory studied in Acting I. Includes substantial scene and monologue work in addition to beat analysis. Continued investigation into the depth and breadth of the actor's art.

Prerequisites: THEA 153 or permission of instructor.

THEA 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

THEA 202 Elements of Theatrical Design3 Credits

Exposure to the elements of design in a theatrical context through lectures and projects.

Terms Typically Offered: Fall.

Fees: Yes.

THEA 213 Creative Play Activities-Drama2 Credits

Creative dramatics in a learning situation. Includes subject matter of interest to anyone in early childhood education, general education, social work, religious education, and/or recreation.

THEA 214 Summer Theatre3 Credits

See THEA 114.

THEA 216 Music Theatre Workshop1 Credit

A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.

Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 217 Play Production1 Credit

See THEA 117 or THEA 118.

Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 218 Play Production1 Credit

See THEA 117 or THEA 118.

Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 219 Technical Performance1 Credit

See THEA 119 or THEA 120.

THEA 220 Technical Performance1 Credit

See THEA 119 or THEA 120.

THEA 228 Theatre Forums1 Credit

See THEA 128 or THEA 129.

THEA 229 Theatre Forums1 Credit

See THEA 128 or THEA 129.

Course may be taken 10 times for credit.

THEA 247 Drama Performance1 or 2 Credits

Course may be taken 4 times for credit.

THEA 248 Drama Performance1 or 2 Credits

See THEA 147 or THEA 148.

Prerequisites: Permission of instructor.

THEA 253 Acting IV: Stage Movement3 Credits

Basic techniques of gesture, movement styles, and combat. Developing an awareness of the use of the body as a means of expression is emphasized.

Prerequisites: THEA 156 and SPCH 112.

THEA 255 Musical Theatre Techniques3 Credits

Exploration of solo song interpretation. Emphasis on basic mechanical, analytical, and physical skills needed to perform musical theatre. Building on an acting foundation, issues of range and vocal support as well as style and repertory will be emphasized.

Prerequisites: THEA 150 or THEA 153; MUSA 137, or one semester of private vocal study, or by permission of instructor.

THEA 256 Auditions3 Credits

Resume writing. Choice and preparation of effective audition pieces.

Prerequisites: THEA 153 and THEA 156.

THEA 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

THEA 300 Advanced Acting: Stage Combat2 Credits

This course is designed to introduce the actor to advanced study in various theatrical fighting styles including: unarmed, rapier and dagger, sword and shield, smallsword, broadsword, knife, single sword, and quarterstaff. The student will learn stage combat techniques adapted from actual historical fighting techniques and use those techniques in scenework.

Prerequisites: THEA 253.

Course may be taken 3 times for credit.

THEA 313 Rendering for Theatre3 Credits

Exploration of conventional drawing and rendering principles, techniques, and mediums (both hand and computer-aided) for theatre, through practical application.

Prerequisites: THEA 202.

Terms Typically Offered: Fall, Spring.

THEA 314 Summer Theatre3 Credits

See THEA 114.

THEA 316 Music Theatre Workshop1 Credit

A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.

Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 317 Play Production1 Credit

See THEA 117 or THEA 118.

Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 318 Play Production1 Credit

See THEA 117 or THEA 118.

Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 319 Technical Performance1 Credit

See THEA 119 or THEA 120.

THEA 320 Technical Performance1 Credit

See THEA 119 or THEA 120.

THEA 322 Stage Management3 Credits

Theory and principles of human resources management, theatre technical production, and actual stage management situations.

Terms Typically Offered: Spring.

THEA 323 Computer Aided Drafting for the Theatre3 Credits

Exploration of Vectorworks and other 3D computer aided drafting software (CAD) to create plots and drawings for theatrical scenic and lighting designs.

Prerequisites: THEA 102 and THEA 104.

THEA 325 Rigging and Special Effects3 Credits

Introduction to stage rigging, hanging lighting and scenery, weighting, safety, and flying hard and soft goods. Advanced technique of theatre technology including smoke, electrics, and other backstage effects.

Prerequisites: THEA 102 and THEA 104.

THEA 327 Multimedia Technology for the Theatre3 Credits

Application of video projection technology and integrated show control software to create original designs for live performance.

Prerequisites: THEA 102 and THEA 104.

THEA 328 Theatre Forums1 Credit

See THEA 128 or THEA 129.

THEA 329 Theatre Forums1 Credit

See THEA 128 or THEA 129.

THEA 331 Theatre History I: 400 B.C. to 16423 Credits

History of theatre as an institution and its relationship to the other arts and to the social and economic environment, from 400 B.C. to 1642 A.D.

THEA 332 Theatre History II: From 1642 to the Present3 Credits

Major world theatre events from 1642 to the present day.

THEA 333 Art, Architecture and Fashion: Prehistory to the Present3 Credits

Exploration of art, architecture, and fashion from Pre-History to the present.

Terms Typically Offered: Spring.

THEA 340 Costume Design3 Credits

Principles, practices, and techniques of Costume Design.

Prerequisites: THEA 202.

Terms Typically Offered: Spring.

THEA 341 Musical Theatre History and Literature3 Credits

In-depth study of the literature and styles of the master composers of music theatre from its beginnings through the present day. Course work is designed for the Musical Theatre major, utilizing lecture and listening lab format and a research paper on a subject of the student's choice.

THEA 342 Sound Design3 Credits

Theory and application of conceptual sound design for live theatre. Emphasis on show control software and tools used for live audio engineering.

Prerequisites: THEA 202.

Terms Typically Offered: Fall, Spring.

THEA 343 Scene Design3 Credits

Experience in the designing of scenery and props for various types of productions with emphasis on research, acquisition, drafting, perspective, and rendering techniques.

Prerequisites: THEA 202.

Terms Typically Offered: Fall.

THEA 344 Lighting Design3 Credits

Advanced training in the design and execution of lighting for the stage.

Prerequisites: THEA 202.

Terms Typically Offered: Fall.

THEA 345 World Drama3 Credits

Students will examine the richness and diversity of contemporary world theatre and drama from a global context.

THEA 347 Drama Performance1 or 2 Credits

Prerequisites: Permission of instructor.

THEA 348 Drama Performance1 or 2 Credits

See THEA 147 or THEA 148.

Prerequisites: Permission of instructor.

Course may be taken 4 times for credit.

THEA 353 Advanced Acting: Styles in Acting3 Credits

Various styles of acting used for the Classical, Elizabethan, Romantic, 19th century Melodrama and Realistic periods.

Prerequisites: THEA 256 or permission of instructor.

THEA 354 Advanced Acting: The Meisner Approach3 Credits

An examination of the Meisner Approach, the "film industry standard" technique that actors use to explore the Realistic/Naturalistic genre of plays and screenplays.

Prerequisites: THEA 256 or permission of instructor.

THEA 355 Music Theatre Repertoire3 Credits

Further development of song interpretation through scene study and ensemble performance. Emphasis on creating performances unified both dramatically and musically through show research and script analysis to develop characterization.

Prerequisites: THEA 255, DANC 174, and DANC 177, or permission of instructor.

THEA 356 Advanced Acting: Dialects3 Credits

Introduces students to the fundamentals of acting while using common stage dialects.

Prerequisites: SPCH 112 and THEA 256, or permission of instructor.

THEA 360 Advanced Costume Technology3 Credits

Introduction to advanced construction techniques, basic flat patterning and draping, and interpreting a rendering into a finished garment.

Prerequisites: THEA 103.

THEA 369 Improvisation2 Credits

Introduction to basic improvisational acting techniques, utilizing guided lectures and exercises and illustrating the role of non-script work in the development of the student actor. Students will create characters, scenes, and short original works.

Prerequisites: THEA 256.

THEA 376 World's Greatest Films3 Credits

Aesthetics and elements that qualify film as an important art form as seen through the major contributors from three important culturally diverse areas of the world: Europe, Asia and America.

THEA 380 Playwriting I3 Credits

Fundamentals of playwriting through a systematic, textual approach, the proper format of scriptwriting, and the writing of short scripts based on common thematic elements.

THEA 381 Directing I3 Credits

The fundamentals of directing culminating in the direction of a scene or short play for public viewing.

Prerequisites: Junior or senior level Acting/Directing major, or permission of instructor.

THEA 382 Directing II3 Credits

Advanced directing techniques and production of a one-act play for public viewing.

Prerequisites: THEA 381 or permission of instructor.

THEA 395 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

THEA 396 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

THEA 401 Career Preparation3 Credits

An introduction to the administrative and business aspects of the performing arts.

Prerequisites: Senior standing or permission of instructor.

THEA 403 Methods of Teaching Drama and Speech3 Credits

Teaching communication, speechmaking, debate and discussion, creative drama, oral interpretation, play selection and direction in the public schools.

Prerequisites: Junior standing in English education or speech/theatre programs.

THEA 411 American Drama3 Credits

The study of American drama and theatre trends from the first American playwright to the current trends of today.

THEA 412 Contemporary Drama3 Credits

A study of contemporary drama from the advent of Realism to the present day.

THEA 414 Summer Theatre3 Credits

See THEA 114.

THEA 416 Music Theatre Workshop1 Credit

A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.

Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 417 Play Production1 Credit

See THEA 117 or THEA 118.

Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 418 Play Production1 Credit

See THEA 117 or THEA 118.

Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 419 Technical Performance1 Credit

See THEA 119 or THEA 120.

THEA 420 Technical Performance1 Credit

See THEA 119 or THEA 120.

THEA 428 Theatre Forums1 Credit

See THEA 128 or THEA 129.

THEA 429 Theatre Forums1 Credit

See THEA 128 or THEA 129.

THEA 445 Senior Tech/Design Capstone3 Credits

Work experience in various aspects of theatre tech/design.

Prerequisites: Senior standing or permission of instructor.

THEA 446 Senior Tech/Design Capstone3 Credits

Work experience in various aspects of theatre tech/design.

Prerequisites: Senior standing or permission of instructor.

THEA 447 Drama Performance1 or 2 Credits

Prerequisites: Permission of instructor.

THEA 448 Drama Performance1 or 2 Credits

See THEA 147 or THEA 148.

Prerequisites: Permission of instructor.

THEA 453 Advanced Acting: Acting for the Camera3 Credits

The transition from stage acting techniques to camera acting techniques. Students will have the opportunity to work on camera with simplified sets and properties.

Prerequisites: THEA 256 or permission of instructor.

THEA 454 Acting V: Shakespeare3 Credits

An in-depth exploration of acting approaches to the verse drama of Shakespeare.

Prerequisites: THEA 253.

THEA 459 Advanced Acting: Chekhov Technique3 Credits

Introduction and exploration of the Michael Chekhov Acting technique.

Prerequisites: THEA 256 or permission of instructor.

THEA 490 Honors Seminar3 Credits

Advanced study of the creative process for students accepted into the Theatre Arts Honors Program. Topics will include commonalities to all creative processes and the interface between the artist, their work, and their community.

Prerequisites: Acceptance into the Theatre Arts Honors Program.

THEA 494 Performance Seminar: Acting/Directing and Musical Theatre Capstone3 Credits

Exploration of theories of audition, rehearsal and performance for upper division performance majors.

THEA 495 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

THEA 496 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

THEA 498 Honors Project/Thesis3 Credits

Development of individualized research and writing for the student accepted into the Department of Theatre Arts Honors program.

Prerequisites: Acceptance into the Theatre Arts Honors Program.

THEA 499 Internship1-9 Credits

Work in acting/directing, design/tech, music theatre and theatre management, or other situations that meet the instructor's approval.

Prerequisites: Senior standing and permission of the instructors.

Course may be taken multiple times up to maximum of 15 credit hours.

Transportation Services-Automotive (TSTA)

TSTA 245 Manual Drive Trains4 Credits

Standard repair practices for drive train components to include: clutch, transmission, transaxle, drive axle, driveline, c-v and R & R procedures.

Fees: Yes.

TSTA 247 Automatic Drive Train Service4 Credits

Standard repair practices for automatic drive trains to include: diagnosis, testing, R & R, and servicing of transaxles/rear wheel drive transmissions.

Prerequisites: TSTC 100 and TSTC 101.

Fees: Yes.

TSTA 265 Engine Control Services3 Credits

Repair and diagnosis of engine control systems, with an emphasis on scan tool diagnosis and live, hands-on repair of systems.

Prerequisites: TSTC 100, TSTC 101, and TSTC 130.

Terms Typically Offered: Fall.

Fees: Yes.

TSTA 267 Body Controls3 Credits

Theory, repair, and diagnosis of body accessories including air bags, electronic monitors, power seats, windows, and wipers.

Prerequisites: TSTC 100, TSTC 101, and TSTC 130.

Terms Typically Offered: Spring.

Fees: Yes.

TSTA 275 Alignment and Suspension Service3 Credits

Repair of suspension systems to include alignments: (2 and 4 wheels), R&R suspension components, and pre-alignment inspections.

Prerequisites: TSTC 100, TSTC 101, and TSTC 170.

Terms Typically Offered: Fall.

Fees: Yes.

TSTA 286 Hybrid and Alternative Fueled Vehicles2 Credits

Introduction to hybrid and alternative fueled vehicle technology in the transportation industry. Topics include power and transmission designs, batteries, plug-in technology, control systems, safety, associated systems, diagnostics, and repair of modern hybrid/alternative fueled vehicles.

Prerequisites: TSTC 100, TSTC 101, and TSTC 130.

Terms Typically Offered: Spring.

Fees: Yes.

TSTA 287 Engine Performance and Emissions3 Credits

Diagnosis and repair of engine performance and emissions-related failures. Emphasis on strategy based diagnostics through the use of exhaust gas analysis.

Prerequisites: TSTC 100, TSTC 101, TSTC 130, and TSTA 265.

Terms Typically Offered: Spring.

Fees: Yes.

Transportation Services -Core (TSTC)

TSTC 100 Introduction to Transportation Services2 Credits

Introduction to procedures, tool usage, basic shop safety, basic employment skills, job documentation, and equipment usage.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

TSTC 101 Vehicle Service and Inspection3 Credits

Introduction to vehicle systems, maintenance, inspection, internal combustion engine theory, systems diagnosis, fundamentals, and evaluation. Service of the vehicle systems with emphasis on inspection and observation.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

TSTC 130 Electrical I2 Credits

Introduction to electrical theory, circuits, components, testing and use of test equipment.

Fees: Yes.

TSTC 160 Electrical II2 Credits

Study of electronic control systems applied to today's modern vehicles. Emphasis on sensors, actuators, and diagnostic techniques.

Fees: Yes.

TSTC 170 Chassis Fundamentals2 Credits

Introduction to front and rear suspension systems, including: steering front end geometry, maintenance, light repair and component nomenclature.

Fees: Yes.

TSTC 171 Brakes I2 Credits

Theory, components, general repair practices and diagnosis of current brake systems.

Fees: Yes.

Transportation Services-Diesel (TSTD)

TSTD 177 Air Systems Repair and Service2 Credits

Study of air systems on the heavy duty truck. The brakes, transmission shift, seats, and rear axle shift will be covered, including service and repair of components and systems. Repair of foundation brakes will also be included.

Prerequisites: TSTC 100, TSTC 101, TSTC 171, and TSTG 175.

Terms Typically Offered: Spring.

Fees: Yes.

TSTD 265 Diesel Engine Controls3 Credits

Repair and diagnosis of engine control systems, with an emphasis on scan tool diagnosis and live, hands-on repair of systems.

Prerequisites: TSTC 100, TSTC 101, and TSTC 130.

Terms Typically Offered: Spring.

Fees: Yes.

TSTD 275 Heavy Duty Suspension2 Credits

Types of on-road suspensions, tires, repair of components, diagnosis, measurements, and adjustments to front and rear suspensions.

Prerequisites: TSTC 100, TSTC 101, and TSTC 170.

Terms Typically Offered: Fall.

Fees: Yes.

Transportation Services-General (TSTG)

TSTG 120 Industrial Safety Practices2 Credits

Overview of current OSHA and EPA general industry regulations, with an emphasis on hazardous materials, right-to-know, record keeping, and worker role in safety.

Terms Typically Offered: Fall, Spring.

TSTG 135 Starting and Charging Systems2 Credits

Electrical component repair to include: alternators, starters, wiring, and other electrical components.

Prerequisites: TSTC 100, TSTC 101, TSTC 130, and TSTC 160.

Fees: Yes.

TSTG 150 Introduction to Fluid Power3 Credits

Principles of hydraulics and pneumatic system, including the construction, application, repair, maintenance, and troubleshooting of components and systems.

Terms Typically Offered: Spring.

Fees: Yes.

TSTG 175 Brakes II2 Credits

Repair of brake systems to include: shoes, pads, cylinder reconditioning, machining rotors and drums, diagnosis, bleeding, R & R components, parking brakes and anti-lock systems.

Fees: Yes.

TSTG 195 Climate Control4 Credits

Repair, diagnosis, removal, and/or replacement of climate control components. Includes charging, recycling, and testing of heating and air conditioning systems of over the road vehicles. Theory of operation, nomenclature, identification, safety, and environmental impact factors of air conditioning. Also covers heating and ventilation systems.

Prerequisites: TSTC 100 and TSTC 101.

Terms Typically Offered: Spring.

Fees: Yes.

TSTG 215 Engine Reconditioning5 Credits

Industry standard rebuild practices for engines. Removal of engine, complete disassembly, reassembly, and running of engine is covered. Tune-up and fuel system adjustments are covered.

Prerequisites: TSTC 100 and TSTC 101.

Terms Typically Offered: Fall.

Fees: Yes.

TSTG 220 Workplace Skills3 Credits

Employment skills encompassing leadership, goal setting, personal traits, conflict resolution, quality, time management, life-long learning, written and oral communication, and customer relations.

TSTG 240 Job Shop4 Credits

Application of workplace skills in a controlled shop environment, through the use of real-life lab work projects, performed in house, when internships or co-op opportunities are not available.

Prerequisites: Sophomore Status.

Terms Typically Offered: Spring.

Fees: Yes.

TSTG 270 Practical Applications4 Credits

Designed to increase student competency through the use of internships or co-op training and real-life shop experiences in their chosen area specialty.

Prerequisites: Permission of instructor.

Fees: Yes.

TSTG 275 ABS Diagnostics2 Credits

Introduction to anti-lock brake systems to include: ABS types and operation, diagnostics, traction control, stability control, regenerative braking, and active braking systems.

Prerequisites: TSTC 100, TSTC 101, TSTC 130, TSTC 171, and TSTG 175.

Terms Typically Offered: Fall.

Fees: Yes.

TSTG 295 Independent Study1-3 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

TSTG 296 Topics1 or 2 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

University College (UNIV)

UNIV 096 Gearing Up For College1-3 Credits**UNIV 100 College Success Skills1 Credit**

Introduction to fundamental learning skills for Provisional Baccalaureate students, first semester management strategies and campus resources specific to the higher education environment. Emphasized development of basic practical competencies necessary for successful completion of entry level university courses.

Terms Typically Offered: Fall.

UNIV 101 First Year College Success2 Credits

Assistance and guidance for students in maximizing their potential for success in college by promoting their academic growth. Emphasizes test taking, reading techniques, note taking, and memory as well as the following: critical thinking, stress management, utilization of campus resources, goal setting, relationship of academic planning to career goals, career exploration and other topics.

UNIV 102 Community College Success2 Credits

Introduction to fundamental learning skills and first semester learning and management strategies, specifically for students engaged in career and technical education pathways.

UNIV 103 Community College Success II1 Credit

Continued support strategies for students in the second semester of college.

Prerequisites: UNIV 102.

UNIV 104 Beyond College Success1 Credit

Advanced college success skills to develop student independence and enhance personal and professional growth. Emphasis on self-discovery, practical application of success strategies, and implementation of an academic plan including co-curricular involvement and major/career goals.

Prerequisites: UNIV 100.

Terms Typically Offered: Fall, Spring.

UNIV 105 Competency Portfolio Development1 Credit

Required preparation of learning portfolio for assessment of academic credit. Will aid in organization and completion of portfolio for prior learning experiences; workshop credit is unrelated to final approval of portfolio for specific course credit.

UNIV 106 International Student College Success1 Credit

Assistance and guidance for international students to maximize their potential for success in college. Emphasis on the academic classroom expectations, policies, and procedures as well as on the social and emotional aspects associated with the transition to life as a college student in the United States.

Terms Typically Offered: Fall.

UNIV 151 College Learning: Strategies and Success1 Credit

Introduction to fundamental learning skills for concurrent students, which include introduction to the higher education environment, first-semester management strategies, communication skills, and basic practical competencies necessary for successful completion of career technical university courses.

Terms Typically Offered: Fall.

UNIV 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

UNIV 201 Theory and Practice of College Peer Tutoring3 Credits

General and specific training for college level peer tutoring. Readings, discussion, experiential exercises expose students to contemporary learning theories, learning enhancement techniques, and effective applications to group and individual learning situations. Supervised tutoring practicum applies theories and concepts to actual tutoring sessions.

Prerequisites: Permission of instructor; 2.5 GPA; recommendation by instructor in subject area.

UNIV 202 Sophomore Year Experience2 Credits

Exploration of career and academic interests. Emphasis on self-discovery, resume building, making connections with faculty and community members, and solidification of academic plans. Includes a follow-up opportunity to job shadow and participate in service learning.

Prerequisites: Sophomore level standing and permission of instructor.

UNIV 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Unmanned Aircraft Systems (UASP)

UASP 101 UAS Pilot Ground School3 Credits

Exploration of Unmanned Aircraft Systems (UAS). Includes history and terminology, all aspects of legal compliance, and what UAS can do. Includes programming and flying indoor UAS.

Terms Typically Offered: Fall, Spring, Summer.

UASP 110 UAS Pilot License Preparation3 Credits

Detailed study of requirements for UAS Pilot License. All topics on the FAA Remote Pilot - Small Unmanned Aircraft Systems Knowledge Test are covered in-depth. Special emphasis on chart reading and navigation.

Terms Typically Offered: Fall, Spring, Summer.

UASP 120 UAS Pilot Operations and Applications3 Credits

Development of proficiency in flying UAS. Students will learn how to prepare for and conduct a data gathering mission. All aspects of flight including sensor payloads are explored. Includes hands-on experience flying UAS.

Terms Typically Offered: Fall, Spring, Summer.

Veterinary Technology (VETT)

VETT 102 Veterinary Medical Terminology2 Credits

Introduction to the structure of veterinary medical terms with emphasis on using and combining the most common prefixes, roots and suffixes. Includes terms related to body systems, treatment and surgical procedures, clinical laboratory and diagnostic procedures, as well as industry shorthand, abbreviations and acronyms. Class structure provides accepted pronunciation of terms and relative use in the veterinary specific setting.

Terms Typically Offered: Fall, Spring.

VETT 106 Exotic Animal Handling2 Credits

Knowledge and skills required for veterinary technicians. This course focuses on exotic animal husbandry, handling, restraint, and specific problems encountered with exotic animals.

Prerequisites: VETT 280.

Corequisites: VETT 115, VETT 206/VETT 206L, VETT 223, VETT 224, VETT 241, and VETT 281.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 108 Introduction to Laboratory Procedures3 Credits

Biology, clinical appearance, and laboratory diagnosis of parasitic diseases of veterinary and zoonotic importance.

Corequisites: VETT 102, VETT 109, VETT 116 and VETT 120.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 109 Applied Companion Animal Behavior3 Credits

Exploration of companion animal behavior through: critical reviews of behavioral literature and its implications for applied techniques in behavior, demonstrations of applied techniques for modifying animal behavior, principles of companion animal body posture, everyday treatment of animals. Focuses on treatment of animals in veterinary practice, including improving handling techniques and safety.

Terms Typically Offered: Fall, Spring.

VETT 115 Surgical Nursing for Veterinary Technicians2 Credits

Background in veterinary medicine, including familiarity with instruments, surgical support equipment, and proficiency in the proper preparation of the operating room.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 206/VETT 206L, VETT 223, VETT 224, VETT 241, and VETT 281.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 116 Humane Treatment and Handling of Animals3 Credits

Introduction to animal welfare and humane treatment during handling and restraint. Also covers behavior, safety, equipment choice, and typical clinical procedures.

Corequisites: VETT 108.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 120 Office Procedures and Relations2 Credits

Presentation of common veterinary office procedures including administration, professional etiquette, client relations, career development and job searching skills. Emphasis on computer skills in relationship to current veterinary management software.

Terms Typically Offered: Fall, Spring.

VETT 134 Diagnostic Imaging2 Credits

Coverage of selected areas of diagnostic imaging with an emphasis on radiology. Topics include radiation properties, x-ray production, radiographic equipment, darkroom procedures, the radiographic image, animal positioning and radiation safety. An introduction to special imaging techniques such as computed tomography (CT scan) and ultrasound will also be included.

Prerequisites: VETT 102, VETT 108, VETT 109, VETT 116, and VETT 120.

Corequisites: VETT 172, VETT 205/VETT 205L, and VETT 280.

Terms Typically Offered: Summer.

Fees: Yes.

VETT 172 First Year Clinical Basics2 Credits

Basic animal care, examination, and handling skills essential for veterinary technicians. Focus on cats and dogs. Includes restraining animals safely and effectively, performing thorough physical examinations, obtaining accurate physiological data, obtaining a complete patient history, performing a nail trim, administering vaccines, and collecting blood sample.

Prerequisites: VETT 102, VETT 108, VETT 109, VETT 116, and VETT 120.

Corequisites: VETT 134, VETT 205/VETT 205L, and VETT 280.

Terms Typically Offered: Summer.

Fees: Yes.

VETT 196 Topics1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

VETT 205 Veterinary Anatomy and Physiology I3 Credits

Background on the anatomy and physiology of animals. Includes the structure and function of the following body systems: musculoskeletal, cardiovascular, respiratory, reproductive and urogenital. Other subjects include unique characteristics of common domestic species. Applied laboratory experiences will cover the following species: canine, feline, equine, and bovine.

Prerequisites: VETT 102, VETT 108, VETT 109, VETT 116, and VETT 120.

Corequisites: VETT 134, VETT 172, VETT 205L, and VETT 280.

Terms Typically Offered: Summer.

VETT 205L Veterinary Anatomy and Physiology I Laboratory1 Credit

Background on the anatomy and physiology of animals. Includes the structure and function of the following body systems: Musculoskeletal, cardiovascular, respiratory, reproductive and urogenital. Other subjects include unique characteristics of common domestic species. Applied laboratory experiences will cover the following species: canine, feline, equine and bovine.

Prerequisites: VETT 102, VETT 108, VETT 109, VETT 116, and VETT 120.

Corequisites: VETT 134, VETT 172, VETT 205, and VETT 280.

Terms Typically Offered: Summer.

Fees: Yes.

VETT 206 Veterinary Anatomy and Physiology II3 Credits

Continued study of anatomy and physiology of companion and farm species. The class covers relationships between body systems, metabolism and physiology. The following systems will be covered in this second portion of anatomy and physiology: Integumentary, Neurologic, Digestive, Endocrine, Immunologic, acid- base balance and fluid regulation. Applied laboratory experiences are included as well as clinical applications of anatomy.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 115, VETT 206L, VETT 223, VETT 224, VETT 241, and VETT 281.

Terms Typically Offered: Fall.

VETT 206L Veterinary Anatomy and Physiology II Laboratory1 Credit

Continued study of anatomy and physiology of companion and farm species. The class covers relationships between body systems, metabolism and physiology. The following systems will be covered in this second portion of anatomy and physiology: Integumentary, Neurologic, Digestive, Endocrine, Immunologic, acid- base balance and fluid regulation. Applied laboratory experiences are included as well as clinical applications of anatomy.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 115, VETT 206, VETT 223, VETT 224, VETT 241, and VETT 281.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 223 Introduction to Anesthesia1 Credit

Examination of basic principles in veterinary anesthesiology. Includes the role of the veterinary technician anesthetist, important concepts relating to various types of anesthesia, preparation of anesthetic equipment and machines, pre-operative patient management, and recording information during anesthesia.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 115, VETT 206/VETT 206L, VETT 224, VETT 241, and VETT 281.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 224 Pharmacology for Veterinary Technicians3 Credits

Background in pharmacology principles, including: mechanism of drug action, types of drugs, anesthetic agents, pharmacy management and calculations related to drug dosages.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 115, VETT 206/VETT 206L, VETT 223, VETT 241, and VETT 281.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 225 Anesthesiology3 Credits

Introduction to injectable and gaseous anesthesia appropriate for surgical and diagnostic procedures. Other topics include anesthesia monitoring, emergency procedures, and control of post-surgical pain.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 227, VETT 232, VETT 238, VETT 239, VETT 242, VETT 250, and VETT 275.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 227 Animal Nutrition2 Credits

Foundation in the principles of animal nutrition. The course focuses on the basic elements of nutrition, including the major categories of nutrients and their sources, digestion, and metabolism. Both large and small animal feeds and feeding will be covered. Emphasis on the relationship between nutrition and health.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 232, VETT 238, VETT 239, VETT 242, VETT 250, and VETT 275.

Terms Typically Offered: Spring.

VETT 232 Veterinary Dentistry1 Credit

Introduction to veterinary dentistry as it concerns the veterinary technician. Includes dental morphology, performing a dental exam, identifying common dental problems, equipment used to perform a professional dental cleaning, the proper steps to perform a dental cleaning, and the role of a veterinary technician in client education and preventative home care.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 227, VETT 238, VETT 239, VETT 242, VETT 250, and VETT 275.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 238 Small Animal Nursing2 Credits

Presentation of commonly encountered medical and surgical conditions of the dog and cat with emphasis on the role of the veterinary technician. This course focuses on nursing concepts and specific skills necessary for the profession. Laboratory sessions will provide a hands-on teaching experience.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 227, VETT 232, VETT 239, VETT 242, VETT 250, and VETT 275.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 239 Large Animal Nursing3 Credits

Presentation of commonly encountered medical and surgical conditions of common large animal species with emphasis on the role of the veterinary technician. This course focuses on nursing concepts and specific skills necessary for the profession. Laboratory sessions will provide a hands-on teaching experience.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 227, VETT 232, VETT 238, VETT 242, VETT 250, and VETT 275.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 241 Clinical Laboratory Procedures4 Credits

Biochemical derangements that characterize disease. Topics include proper collection and analysis of urine, blood, and cytological samples; basic principles of anatomic pathology; necropsy procedure and sample collection.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 115, VETT 206/VETT 206L, VETT 223, VETT 224, and VETT 281.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 242 Veterinary Critical Care2 Credits

Instruction in appropriate nursing assessment, monitoring, and intervention for emergencies. Considers overall anatomy, physiology, and disease or accident processes to assist in veterinary diagnoses and treatment.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 227, VETT 232, VETT 238, VETT 239, VETT 250, and VETT 275.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 243 Veterinary Diagnostic Microbiology3 Credits

Introduction to the biology, clinical appearance, and laboratory diagnosis of bacterial and viral diseases of veterinary and zoonotic importance.

Prerequisites: VETT 275.

Corequisites: VETT 282 and VETT 285.

Terms Typically Offered: Summer.

Fees: Yes.

VETT 250 Clinical Competency Evaluation1 Credit

Evaluation of clinical skills and knowledge in preparation for final cumulative clinical practice. Includes selected clinical laboratory techniques (parasitology, hematology, urinalysis, cytology, chemistry, serology, microbiology); diagnostic imaging; office procedures; surgical preparation, instrumentation and assistance; anesthesia induction, maintenance and monitoring; restraint and handling techniques; small, large and laboratory animal diagnostic and therapeutic techniques; and pharmacology calculations, labeling and drug classification.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 227, VETT 232, VETT 238, VETT 239, VETT 242, and VETT 275.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 275 Specialty Rotation2 Credits

Introduction to specialties through site visits and/or on-campus training days delivered by industry professionals and veterinary specialists. Focus on experiential learning opportunities and exposure to specialties such as: dentistry, anesthesia/analgesia, internal medicine, emergency and critical care, surgery, equine, zoology, behavior, clinical practice, nutrition, clinical pathology, dermatology, ophthalmology, and alternative veterinary medicine.

Prerequisites: VETT 109 and VETT 281.

Corequisites: VETT 225, VETT 227, VETT 232, VETT 238, VETT 239, VETT 242, and VETT 250.

Terms Typically Offered: Spring.

Fees: Yes.

VETT 280 Diagnostic Imaging Clinical1 Credit

Focus on the use of radiographic equipment, safety, positioning of animals for radiographs, developing a technique chart, and producing diagnostic radiographic and non-radiographic images.

Prerequisites: VETT 102, VETT 108, VETT 109, VETT 116, and VETT 120.

Corequisites: VETT 134, VETT 172, and VETT 205/VETT 205L.

Terms Typically Offered: Summer.

Fees: Yes.

VETT 281 Clinical I2 Credits

Opportunity to supplement coursework with practical work experience related to the educational program. Students work under the immediate supervision of experienced personnel at the business location and with the direct guidance of the instructor/coordinator.

Prerequisites: VETT 280.

Corequisites: VETT 106, VETT 115, VETT 206/VETT 206L, VETT 223, VETT 224, and VETT 241.

Terms Typically Offered: Fall.

Fees: Yes.

VETT 282 Clinical I13 Credits

Continued opportunity to supplement coursework with practical work experience related to the educational program. Students work under the immediate supervision of experienced personnel at the business location and with the direct guidance of the instructor/coordinator.

Prerequisites: VETT 275.

Corequisites: VETT 243 and VETT 285.

Terms Typically Offered: Summer.

Fees: Yes.

VETT 285 Veterinary Technician Exam Prep1 Credit

Preparation for the Veterinary Technician National Exam (VTNE). Includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE.

Prerequisites: VETT 275.

Corequisites: VETT 243 and VETT 282.

Terms Typically Offered: Summer.

VETT 296 Topics1-6 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

Viticulture and Enology (VITE)

VITE 101 Introduction to Wine3 Credits

Introduction to the world of wine and the process involved in making wine from grape to bottle. Explore the winemaking process and different wine styles.

Terms Typically Offered: Fall.

VITE 105 Agriculture Chemistry3 Credits

Introduction to the fundamental chemistry needed for the winemaking process. Areas covered are designed to focus on chemical concepts used in problem solving/calculations that a student needs for agriculture-related courses.

Terms Typically Offered: Spring.

VITE 115 Vineyard Establishment and Management3 Credits

Exploration of the key principles of establishing and managing a vineyard, including site selection, vineyard layout, cultivar selection, soil preparation, planting methods, training, and trellising. Includes canopy management, irrigation, fertilization, pest/disease control, and pesticide application.

Prerequisites: AGRS 100/AGRS 100L.

Corequisites: VITE 115L.

Terms Typically Offered: Spring.

VITE 115L Vineyard Establishment and Management Laboratory1 Credit

Exploration of the key principles of establishing and managing a vineyard, including site selection, vineyard layout, cultivar selection, soil preparation, planting methods, training, and trellising. Includes canopy management, irrigation, fertilization, pest/disease control, and pesticide application. Lab component required for VITE 115.

Prerequisites: AGRS 100/AGRS 100L.

Corequisites: VITE 115.

Terms Typically Offered: Spring.

Fees: Yes.

VITE 205 Wine Business and Marketing3 Credits

Exploration of the role of marketing in the wine industry and the process used to make effective business decisions. Includes marketing, three tier system, pricing, advertising, promotion, special events, and packaging specific to the wine industry. Includes visitation to local wineries.

Terms Typically Offered: Spring.

VITE 210 Fermentation Science3 Credits

Examination of the beneficial and spoilage microorganisms frequently encountered in the winemaking process. Topics include the growth, morphology, metabolism, and identification of these wine microorganisms.

Corequisites: VITE 210L.

Terms Typically Offered: Spring.

VITE 210L Fermentation Science Laboratory1 Credit

Examination of the beneficial and spoilage microorganisms frequently encountered in the winemaking process. Topics include the growth, morphology, metabolism, and identification of these wine microorganisms. Lab component required for VITE 210.

Corequisites: VITE 210.

Terms Typically Offered: Spring.

Fees: Yes.

VITE 250 Advanced Winemaking I4 Credits

Advanced winemaking course focusing on pre-fermentation through fermentation. Includes fruit selection, pre-harvest analyses, fruit processing, juice additions, yeast selection, inoculation, alcohol and malolactic fermentation, as well as winery hygiene and safety.

Prerequisites: VITE 101 and VITE 210/VITE 210L.

Terms Typically Offered: Fall.

Fees: Yes.

VITE 255 Viticulture Harvest and Post-Harvest Management 2 Credits

Exploration of late summer/fall vineyard operations, including late-season canopy management, pest & disease identification and control, crop estimation, ripening & maturity sampling, harvest and post-harvest management.

Prerequisites: VITE 115/VITE 115L.

Corequisites: VITE 255L.

Terms Typically Offered: Fall.

VITE 255L Viticulture Harvest and Post-Harvest Management Laboratory 1 Credit

Exploration of late summer/fall vineyard operations, including late-season canopy management, pest & disease identification and control, crop estimation, ripening & maturity sampling, harvest and post-harvest management. Lab component required for VITE 255.

Prerequisites: VITE 115/VITE 115L.

Corequisites: VITE 255.

Terms Typically Offered: Fall.

Fees: Yes.

VITE 260 Science of Winemaking 3 Credits

Introduction to winery laboratory practices, including basic chemistry principles, laboratory techniques, and commonly used analysis methods for musts and wines.

Terms Typically Offered: Spring.

Fees: Yes.

VITE 265 Wines of the World 2 Credits

Introduction to the wine producing regions of the world, including history, viticultural practices, and winemaking styles. Includes wine sensory evaluation of representative wines, basic sensory attributes, palate training and regional food, and wine pairing.

Prerequisites: Must be 18 years of age or older.

Terms Typically Offered: Fall.

Fees: Yes.

VITE 270 Sensory Analysis of Wine 3 Credits

Introduction to sensory analysis specific to wine production, with a focus on taste perception, as well as olfactory and taste transduction mechanisms. The class will focus on differences in specific wine varieties, alcohol fermentation, use of oak in winemaking, malolactic fermentation, wine styles, and individual wine component threshold identification.

Prerequisites: Must be 18 years of age or older.

Terms Typically Offered: Spring.

Fees: Yes.

VITE 280 Advanced Winemaking II 3 Credits

Advanced winemaking course focusing on post-fermentation wine stewardship techniques, including clarification, fining, stabilization, blending, wine composition, and bottling of wines produced from the fall harvest in VITE 250.

Prerequisites: VITE 250.

Terms Typically Offered: Spring.

Fees: Yes.

VITE 295 Independent Study 1-2 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

VITE 299 Winery Internship 3 Credits

Hands-on experience working at a commercial winery for the fall harvest, including grape maturity monitoring, crushing and pressing, fermentation, the handling and storage of new wines, and general cellar practices on a large scale.

Prerequisites: VITE 101 and VITE 210/VITE 210L.

Terms Typically Offered: Fall.

Welding (WELD)

WELD 110 Shielded Metal Arc Welding 4 Credits

Study and skill development of safe practices, welding theory, and principles of Shielded Metal Arc Welding (SMAW) equipment and process. SMAW fillet welds in all positions on plate.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

WELD 111 Shielded Metal Arc Welding 24 Credits

Study and skill development of safe practices, welding theory, and principles of Shielded Metal Arc Welding equipment and process. SMAW groove welds in all positions on plate. Pipe welding and stainless steel plate tests may be included.

Prerequisites: WELD 110.

Fees: Yes.

WELD 114 Oxy-Fuel Welding & Brazing 2 Credits

Study and skill development of safe practices, welding theory, and principles of Oxy-Fuel equipment and process. Oxy-Fuel groove and fillet welding and braze welding will be included.

Fees: Yes.

WELD 117 Oxy-Fuel and Plasma Arc Cutting 2 Credits

Study and skill development of safe practices, theory, and principles of cutting equipment used in fabrication. Oxy-Acetylene Cutting (OAC), Plasma Arc Cutting (PAC), and other cutting processes applied to sheet metal, plate, piping, and other materials. Other uses of power tools and hand tools to be included.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

WELD 133 Fabrication & Blueprints for Welders 4 Credits

Study and skill development of metal fabrication methods. Lecture and laboratory. Measuring tools and techniques, welding shop mathematics, blueprint reading, welding symbols, sheet metal and steel plate fabrication project layout methods applied. Basic blacksmithing techniques and ornamental iron layout included. Structural and pipe connection layout methods introduced.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

WELD 151 Introduction to Welding 3 Credits

Introduction to welding. Safe practices, theory, principles, and use of welding and cutting equipment. Oxy/Fuel, Plasma Arc Cutting, Shielded Metal Arc Welding, Gas Metal Arc Welding, Flux Cored Arc Welding with sheet metal and carbon steel plate in most positions. Gas Tungsten Arc Welding may be included.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

WELD 196 Topics: 1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

WELD 201 Gas Metal Arc Welding4 Credits

Study and skill development of safe practices, welding theory, and principles of Gas Metal Arc Welding (GMAW) equipment and process. GMAW fillet and groove welds with short circuit transfer and axial spray transfer will be included. GMAW pulse, aluminum, and stainless steel may be included.

Terms Typically Offered: Fall, Spring.

Fees: Yes.

WELD 203 Flux Cored Arc Welding4 Credits

Study and skill development of safe practices, welding theory, and principles of Flux Cored Arc Welding equipment and process. FCAW fillet and groove welds with self-shielded and gas-shielded processes will be covered.

Fees: Yes.

WELD 230 Gas Tungsten Arc Welding4 Credits

Study and skill development of Gas Tungsten Arc Welding (GTAW/TIG). Lecture and laboratory. Safe practices, theory, principles and use of GTAW equipment. GTAW with sheet metal and carbon steel plate in most positions. Also, GTAW stainless steel and aluminum sheet metal in most positions. A.W.S. testing.

Fees: Yes.

WELD 240 Pipe Welding4 Credits

Study and skill development of safe practices, welding theory, and principles of pipe welding using SMAW, GMAW, FCAW, and GTAW processes. AWS, API, and ASME weld procedures will be examined.

Prerequisites: WELD 111, WELD 203, and WELD 230.

Terms Typically Offered: Fall.

Fees: Yes.

WELD 261 Testing and Inspection3 Credits

Advanced classroom course on testing and weld inspection. Destructive and non-destructive weld testing methods applied. AWS bridge and structural codes, API cross country pipe welding codes, ASME pressure vessel and pressure piping codes. (On demand)

WELD 270 Practical Applications3 Credits

Exploration of a welding project course. Classroom discussions and directions with laboratory objectives. This class gives welding students the opportunity to apply techniques and knowledge gained from previous welding courses. With the guidance and advice of the instructor, students will fabricate a welding project of their choice.

Fees: Yes.

WELD 275 Automation4 Credits

Study and skill development of safe practices, welding theory, and principles of robotic welding and CNC plasma cutting equipment and processes. Basic programming, setup, and systems integration will be included. Other automation equipment and processes may be included.

Prerequisites: WELD 117 and WELD 201.

Fees: Yes.

WELD 295 Independent Study1-4 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

WELD 296 Topics:1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

WELD 299 Internship1-14 Credits

Course may be taken multiple times up to maximum of 6 credit hours.

Wildland Fire Management (FSWM)

FSWM 100 Introduction to Wildland Fire Basic Fire Guard School5 Credits

Instruction in the primary environmental factors that affect the start and spread of wildfire and recognition of potentially hazardous situations.

This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training classes: S-110, S-130, S-190, I-100, L-180, and FEMA IS-700.

Terms Typically Offered: Fall.

Fees: Yes.

FSWM 103 Expanded Dispatch Recorder1 Credit

The structure of an expanded dispatch organization and how to effectively perform within that organization. Students will develop a working knowledge of the purpose and process of completing the resource order and other dispatch forms and learn established dispatch procedures. This course consists of the curriculum and activities included in the National Wildfire Group Firefighting Training classes: D-110.

Fees: Yes.

FSWM 141 Introduction to Incident Information2 Credits

Cognitive material and skills needed to become type 3 information officers (IOF3). The course covers all aspects of establishing and maintaining an incident information operation, communicating with internal and external audiences to handling special situations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-203.

FSWM 142 Portable Pumps and Water Use2 Credits

Introduction to the three areas of supply, delivery, and application of water. Students will be required to demonstrate their knowledge of correct water use, basic hydraulics, and equipment care. Modules support required set up, operation, and maintenance of pump equipment. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training classes: S-211.

Fees: Yes.

FSWM 143 Wildfire Chainsaws3 Credits

Introduction to the function, maintenance, and use of internal combustion, engine-powered chainsaws and their tactical wildland fire applications. Modules support entry-level training for firefighters with little or no previous experience in chainsaw operation and provides hands-on cutting in situations similar to firelines. Course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-212.

Terms Typically Offered: Fall.

Fees: Yes.

FSWM 144 Fire Operations in the Wildland/Urban Interface2 Credits

Emphasizes the tactical decisions made by structure and wildland firefighters when confronting fire that threatens life, property, and improvements in the wildland/urban interface. Instructional units include interface awareness, size up, initial strategy and incident action plan, structure triage, structure protection tactics, incident action plan assessment and update, follow up and public relations, and firefighter safety in the interface. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-215.

Fees: Yes.

FSWM 147 Ignition Operations2 Credits

Training in the functional roles and responsibilities connected with firing operations. The course covers planning, ignition procedures and techniques, and equipment applicable to wildland and prescribed fire. This course also addresses the role of the ignition specialist or firing boss as the organization manages escalation from a non-complex to a complex situation. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-234.

Fees: Yes.

FSWM 148 Status/Check-In Recorder1 Credit

Introduces students to the tools and techniques used to perform duties of status check-in recorder (SCKN). The course provides an overview of what a student can expect if dispatched to an incident. Each student will need access to a computer that has the most current incident automation software. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training Program class S-248.

FSWM 149 Interagency Incident Business Operations1 Credit

Training needs of all positions involving interagency incident business management. Provides basic policy and direction for incident business management. Consists of curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-260.

Terms Typically Offered: Fall.

Fees: Yes.

FSWM 151 Basic Air Operations1 Credit

Covers aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-270.

FSWM 152 Helicopter Crew Member2 Credits

Proficiency in all areas of the tactical and logistical use of helicopters to achieve efficiency and standardization. Topics include: aviation safety, aircraft capabilities and limitations, aviation life support equipment, aviation mishap reporting, pre-flight checklist and briefing/debriefing, aviation transportation of hazardous materials, crash survival, helicopter operations, helicopter field exercise. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-271.

Fees: Yes.

FSWM 153 Intermediate Wildland Fire Behavior2 Credits

Prepares the prospective supervisor to undertake safe and effective fire management operations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-290.

Fees: Yes.

FSWM 154 Wildland Fire Origin & Cause Determination2 Credits

Knowledge and skills for the Wildland Fire Origin and Cause Determination Investigator (INVF). Concepts will help an INVF perform at a nationally acceptable level without regard to geographic boundaries. Course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class FI-210.

Terms Typically Offered: Fall.

FSWM 155 Initial Attack Incident Commander/Basic Incident Command System3 Credits

Required training for an ICT4 qualification. Course topics include Incident Command organization, functions and responsibilities, readiness, mobilization, size-up, planning, resource ordering, deployment, objectives, strategy, tactics, containment, administrative responsibilities, and post-incident evaluation. This course consists of the curriculum in the National Wildfire Coordinating Group Firefighting Training classes S-200 and I-200.

Terms Typically Offered: Spring.

Fees: Yes.

FSWM 156 Firefighter Type 1 and Fire Line Leadership3 Credits

Required training for Firefighter Type 1 qualification. Topics include fireline reference materials, communications, tactical decision making, leadership values and principles, transition challenges for new leaders, situational leadership, team cohesion factors, and ethical decision making. This course consists of the curriculum in the National Wildfire Coordination Group S-131 and L-280 courses.

Terms Typically Offered: Fall.

Fees: Yes.

FSWM 162 Advanced Firefighter Position Task Book3 Credits

Documentation processes for the recording of routine and special activities in the field. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program to include not less than 135 hours of documented activities.

Fees: Yes.

FSWM 196 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FSWM 200 Extended Attack Incident Commander1 Credit

Covers the training needs of the incident commander type 3 (CT3). The six instructional units cover Information Gathering, Planning, Supporting Organization, Operations, Transitioning, and Demobilization/Administrative Requirement. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-300.

FSWM 204 Medical Unit Leader1 Credit

Covers the skills and information needed to perform in the role of medical unit leader (MEDL). This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-359.

FSWM 243 Fire Engine Operator3 Credits

Performance proficiency in the duties associated with engine boss, single resource (ENGB) to include: engine crew capabilities and limitations, information sources, fire size up considerations, tactics and wildland-urban interface. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training classes: S-231.

Prerequisites: FSWM 100 and FSWM 156.

Terms Typically Offered: Fall.

Fees: Yes.

FSWM 244 Wildland Training for Structural Fire Fighters2 Credits

Preparation for the training requirements outlined in the Wildland Fire Qualification System Guide and the Positions Task Books (PTB). Course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-330.

Prerequisites: FSWM 100.

Terms Typically Offered: Fall.

FSWM 278 Supervised Work Experience1-3 Credits

Practical experience at an advanced level, demonstrating proficiency in wildland fire management tasks and assignments. Students will work under the immediate supervision of experienced field personnel with the direct guidance of the coordinator. Students will work on actual wildland fires, at stations and fire project/resource management sites related to their career fields. Includes travel to wildland fire locations.

Prerequisites: FSWM 100.

Terms Typically Offered: Fall, Summer.

FSWM 296 Topics1-3 Credits

Course may be taken multiple times up to maximum of 15 credit hours.

FSWM 299 Internship1-3 Credits

Supplemental course work with practical hands-on work experience related to wildland fire management. Students will work under the immediate supervision of an industry professional at a selected agency location. Students will work on actual wildland fires, at stations and fire project/resource management sites related to their career fields. Includes travel to wildland fire locations.

Prerequisites: FSWM 100.

Terms Typically Offered: Fall, Spring, Summer.

Course may be taken multiple times up to maximum of 6 credit hours.

GLOSSARY OF TERMS

Academic Probation

The failure of a student to meet the standards required for good standing. Undergraduate students will be placed on academic probation for one semester and must maintain a 2.00 GPA or higher to avoid academic suspension.

Academic Renewal

Following an absence from the college of at least five years, an undergraduate student may apply for “academic renewal.” If approved, none of the course credits and grades earned at Colorado Mesa University prior to the five-year minimum absence will be used for meeting graduation requirements or in determining the student’s grade point average. However, the prior courses and their grades will remain on the student’s transcript even though they will not be used in meeting graduation requirements and in calculating the student’s grade point average.

Academic Residency

A specified minimum number of credit hours that must be earned at Colorado Mesa University to receive a degree.

Academic Suspension

Denial of all registration privileges for a specified period of time (minimum one full semester) because of failure to meet minimum academic standards. Suspended students must be readmitted to the college before continuing enrollment.

Academic Term

A period of instruction. During the fall and spring, the term is a standard 15-week semester. During the summer, various length periods of instruction are offered. The term regular semester refers to fall or spring semester.

Academic Year

The traditional cycle of academic terms: fall and spring.

Accreditation

Certification that the university or program has met established standards and is recognized by appropriate accrediting agencies.

Add/Drop

A period of time when students can alter class schedules by adding or dropping classes or changing sections of a course. Add/drop deadlines are published on the [Registrar's Office Important Dates](#) website.

Admitted

Status of students who have applied and have been accepted to the university.

Associate's Degree

Degree awarded upon satisfactory completion of a prescribed, planned program of approximately 60 credit hours. This can be completed in two

years of study with an average of 15 semester hours per semester in the fall and spring terms.

Audit

A registration status which allows a student to attend and to participate in a class without benefit of a grade or academic credit. The “audit” status must be recorded in the Registrar’s Office before the withdraw deadline for the class.

Baccalaureate Degree

Bachelor’s degree: the traditional undergraduate degree. Awarded for completion of an undergraduate program of study, usually of 120 semester hours. This can be completed in four years of study with an average of 15 semester hours per semester in the fall and spring terms. Bachelor’s degrees are comprised of essential learning courses, a major, and elective courses.

Capstone

A course, project, paper, presentation, event, or exhibit that must be completed, usually in the senior year, before graduation. A capstone demonstrates in an integrated way everything that has been learned while pursuing a particular major.

College Opportunity Fund (COF)

The method of funding state tax dollar support for students enrolled in Colorado public higher education via a voucher. Implemented in fall 2005, qualifying students create an account at the College Access Network into which the voucher is deposited and, upon registration by the student at a participating institution, then is transferred to the college.

Concentration

An area of interest within a major that is defined by a group of courses. Number of hours will vary by major. Concentrations are generally associated with 4 year programs (BA, BBA, BS, etc).

Concurrent Student

A high school student who is registered for one or more university classes.

Contact Hours

The number of weekly hours student meets in a class, lab, studio, clinical, or class/lab.

Corequisite

Course(s) that must be taken concurrently with one or more additional courses. Subject matter often is similar or complementary.

Course Levels

The numbering system of courses:

Category	Numbering System
Developmental/Preparatory	099 and lower
Lower Division	100 - 199 Freshman 200 - 299 Sophomore
Upper Division	300 - 399 Junior

	400 - 499 Senior
Graduate	500 and above

Course Load

The total number of semester hours registered for in a given academic term.

Cumulative Grade Point Average

An average GPA calculated by dividing the total number of quality points/grade points obtained (credit hours X grade points) by the number of credit hours attempted during all academic sessions at Colorado Mesa University. Grades from other institutions are not included in the calculation.

Dean's List

Recognition of undergraduate students who achieve a grade point average of between 3.50 and 3.99 while enrolled for a minimum of 12 semester hours in a fall or spring semester.

Degree

A title which the university confers on a student who has satisfactorily completed a required course of study. Degree requirements are established by the university and departments, and are approved by the university's faculty, administration, and authorized by the Colorado Commission on Higher Education. The university offers degrees at three levels: associate, baccalaureate, and graduate.

Degree Category

One of three undergraduate degree categories offered at Colorado Mesa University that may differ in lower division requirements beyond essential learning. These categories include the Bachelor of Arts (BA), Bachelor of Science (BS) and Professional, Technical or Other Programs (PTO).

Discipline

A recognized subject area or field of study within which courses are structured.

Distance Learning

Courses offered for credit by an alternative means of delivery other than in-person (e.g. videoconference or online).

Double Major

Completing the requirements of more than one major within the same degree designation (e.g., a Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration). A student could earn one baccalaureate degree with multiple majors (e.g., Bachelor of Arts with a double major in Psychology and Sociology). Students must meet all the requirements for the degree and for each major.

Dual/Double Baccalaureate Degree

Completing the requirements of more than one major with different degree designations (e.g., a Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration). A student earning two baccalaureate degrees (e.g., Bachelor of Arts in History and a Bachelor of Science in Mathematics) must meet all the requirements for each degree,

each major, and additional requirements found in the [Requirements for Undergraduate Degrees](#) (p. 67) under the "Second Baccalaureate Degree".

Earned Hours

Credit hours earned for college-level courses (numbered 100 and above) with a passing grade.

Electives

Courses selected at a student's discretion. Electives may be partially restricted, such as a selection from a specified group of courses identified to fulfill a particular requirement or they may be "free" electives which may be selected from any course for which the student has proper prerequisites. Electives provide opportunities for students to pursue personal interest and to gain general knowledge.

Emphasis

An area of interest within a major that is defined by a group of courses. Number of hours will vary by major. Emphases are generally associated with 2-year programs (AA, AS, etc.).

Enrollment

Registration for course work and payment of fees constitutes official enrollment. For financial aid purposes, a undergraduate student must enroll for 12 credit hours to be classified full-time; for other purposes, the minimum may be higher. For graduate students, a six-hour load is typical for full-time classification.

Essential Learning

A university-wide requirement of basic courses that form the foundation of all undergraduate degree programs. CMU's Essential Learning requirement was formerly named General Education.

Essential Learning Capstone

The baccalaureate 4 semester credit hour graduation requirement consisting of corequisite courses Maverick Milestone (3 hours) and Essential Speech (1 hour). This interdisciplinary requirement is designed to allow students to transition between the lower division Essential Learning Core courses and their upper-division major courses. Must be completed in the time frame of 45 and 75 earned credit hours.

Essential Learning Core

Basic courses providing undergraduate students with a foundation in the arts and sciences. The Essential Learning Core consists of 31 semester credit hours across the following disciplines: English (6 hours), Mathematics (3 hours), History (3 hours), Humanities (3 hours), Social and Behavioral Sciences (6 hours), Fine Arts (3 hours), and Natural Sciences (7 hours).

Essential Speech

A 200-level, 1 semester credit hour course which provides students with the tools for verbally presenting ideas and information learned in the corequisite Maverick Milestone course. The Maverick Milestone and Essential Speech corequisite courses comprise the Essential Learning Capstone requirement for baccalaureate students. See Essential Learning.

General Education

Former designation of CMU's Essential Learning curriculum.

General Educational Development (GED) Diploma

Award granted upon passing tests that measure student learning normally acquired by completing a typical high school program of study.

Good Standing

A sliding scale of academic status achieved by students for semester hours attempted. Determines eligibility of students to continue to register for university course work.

Grade Improvement

Repeat of any course more than once for academic credit at Colorado Mesa University done so only for "grade improvement." Academic credit is awarded only once and the best grade received is the one used to compute the student's cumulative grade point average and to fulfill requirements for the degree. Some exceptions to this policy apply.

Grade Point Average (GPA)

A measure of a student's academic performance which is computed by dividing credit hours attempted into grade points earned to determine the mean average grade of all courses taken for credit. Does not include courses taken as pass/fail.

Graduate Certificates

Contain graduate level (5xx-7xx) courses. A student must be admitted as a graduate student to attempt a graduate certificate.

Graduate Student

A student who has earned a baccalaureate degree and who is pursuing a graduate certificate, master's, or doctoral degree program.

Graduation Honors

Recognition of graduating undergraduate students who meet the following academic criteria:

- With Distinction - Associate degree graduates with cumulative grade point averages of 3.50 to 3.74.
- With High Distinction - Associate degree graduates with cumulative grade point averages of 3.75 to 4.00.
- Cum Laude - Baccalaureate degree graduates with cumulative grade point averages of 3.50 to 3.74.
- Magna Cum Laude - Baccalaureate degree graduates with cumulative grade point averages of 3.75 to 3.89.
- Summa Cum Laude - Baccalaureate degree graduates with cumulative grade point averages of 3.90 to 4.00.

Higher Education Admission Requirements (HEAR)

(also referred to as the pre-collegiate curriculum)

Requirements established by the Colorado Commission on Higher Education for students graduating from high school in spring 2008 or later and seeking admission to a Colorado public four-year college or university.

Independent Study

An upper-division course designated by a special number within a discipline. Allows a student to pursue an individual project independently, for credit, under the supervision of an instructor. Requires consent of the instructor.

Leveling Courses

A set of equivalent courses for graduate students who have not completed specific undergraduate courses prior to beginning graduate study.

Lower Division Course

A course that carries a 100 - 199 or 200 - 299 number.

Major

A set of required courses from one or more departments in a subject chosen as the undergraduate student's principal field of study. Designed to provide students with the knowledge, skills, and experiences necessary to pursue a specific career and/or advanced study.

Master's Degree

A post-baccalaureate degree. All master's degree candidates must maintain a 3.00 GPA to remain in good academic standing.

Matriculation

Enrollment as an admitted, degree-seeking student.

Maverick Milestone

A 200-level interdisciplinary, topics-oriented, writing-intensive course designed to help students develop the ability to approach problems and evaluate ideas using more than one set of intellectual tools. This 3 semester credit hour course and its 1 semester credit hour corequisite Essential Speech comprise the Essential Learning Capstone requirement for baccalaureate students. See Essential Learning.

Minor

An officially-recognized secondary field of study requiring fewer units than the major. A minor must be in an approved subject area and is less comprehensive than the major.

Multiple Concentrations

Completing the requirements of more than one concentration within the same major (e.g., Bachelor of Science in Mathematics with a double concentration in Applied Mathematics and Statistics). Students must meet all the requirements for the degree, major, and each concentration.

Prerequisite

Requirement(s) that must be taken and passed before a higher level course may be taken. Sometimes, permission of the instructor or another requirement (such as graduate status) may be a prerequisite for a course. Prerequisites may include: (1) Course or courses that must be completed before a higher-level course may be taken, sometimes allowed by the instructor to be taken concurrently; (2) Courses outside the major department that must be completed before admission to the major; (3) Successful completion of high school courses (as in languages); (4)

Minimum SAT or ACT scores or sub-scores; (5) Minimum placement test scores; or (6) Acceptance into a certain program.

President's List

Recognition of undergraduate students who achieve a grade point average of 4.00 while enrolled for a minimum of 12 semester hours in a fall or spring semester.

Priority Registration

Designated period of early registration for currently enrolled students.

Professional Certificate

A Professional Certificate contains primarily upper division (3xx-4xx) courses. For a student to attempt a Professional Certificate after the student has earned a baccalaureate degree, the student must be admitted to study as a post-baccalaureate student or as a graduate student.

Program Requirements

The list of requirements a student must satisfy in order to graduate with a specified degree or certificate program. Program requirements for each program can be located via the [Programs A-Z page](#) (p. 752).

Quality Points

The number points attributed to a grade (A=4, B=3, C=2, etc.) times the number of credit hours in the course.

Registrar

Office responsible for course registration, transfer credit evaluation, maintaining academic records, and certifying degree requirements for graduation.

Student Classification

Student level based on the number of semester hours successfully completed as follows:

Semester Hours Completed	Student Status
0 - 30	Freshman
31 - 60	Sophomore
61 - 90	Junior
91 - above	Senior

Technical Certificate

Award for the completion of technical coursework designed to train students for specific skills required for employment in various vocational occupations.

Topics Courses

Courses offered from time to time that contain material of special interest within a specific discipline not considered elsewhere in the curriculum. Prerequisites vary with course material and may require consent of the instructor.

Transcript

An official document issued by the Registrar that lists the entire academic record of a student at the university.

Transfer Credit

Course work completed at another institution that is accepted for credit toward a degree at the university. Grades from these courses are not included in calculation of a student's cumulative GPA.

Undergraduate

A student working toward a technical certificate, professional certificate, associate degree, or baccalaureate degree.

Upper Level Course

A course that carries a 300 - 399 or 400 - 499 number.
