Requirements Effective Fall 2019

In order to maintain professional standards required of practicing engineers, the Department of Electrical and Computer Engineering requires a cumulative grade point average of at least 2.000 in ECE courses as a graduation requirement. It is the responsibility of any student who fails to maintain a 2.000 average to work with their advisor to correct grade point deficiencies. In addition, it is required that students retake any Electrical Engineering course at the 300-level or below in which they receive a grade below a C.

Major in Electrical Engineering, Lasers and Optical Engineering Concentration

From cancer detection to faster computing, lasers and optics improve today's world. Electrical engineering students are prepared for success in today's high-tech world through stimulating coursework and unique hands-on projects. They will learn a new way of thinking that teaches the importance of creativity and innovation in solving complex societal problems.

Lasers and Optics students will experience the benefits of a smaller department with top-tier faculty, while enjoying the perks of a large university. Electrical and computer engineering (ECE) courses and research span a range of disciplines that include:

- Biomedical Engineering
- Communications and Signal Processing
- Computer Engineering
- Controls and Robotics
- Electric Power and Energy Systems
- Electromagnetics and Remote Sensing
- Lasers and Photonics

Career Opportunities

A field of endless possibilities, electrical engineering career paths are largely dependent on personal interests. Electrical engineering alumni hold positions ranging from a designer at a start-up company to a research scientist for the U.S. Naval Research Laboratory. In addition to being one of the most lucrative college majors, for the past decade electrical engineering has ranked among the top 10 majors in demand for bachelor's, master's, and doctoral degrees, according to the National Association of Colleges and Employers. Almost every industry recruits electrical engineering graduates, such as aerospace, biomedical, energy, robotics, manufacturing, and automotive.

Program Objectives and Outcomes

The ECE program educational objectives are designed and implemented around the following three principal attributes: mastery, innovation, and leadership.

Graduates of the ECE program will be able to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies

Graduate Certificate in Computer Systems Engineering

The Graduate Certificate in Computer Systems Engineering is designed for students and professionals seeking knowledge and skills in state-of-the-art parallel hardware architectures, parallel software programming, algorithms, and networking technologies. Students stay current on rapidly advancing technology and learn to problem-solve for future challenges.

Effective Fall 2016

Additional coursework may be required due to prerequisites.

ECE 661	Advanced Topics in Embedded Systems	
Program Total Credits:		11-12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

¹ At least one ECE course is required.

Graduate Certificate in Data Engineering

The certificate program provides education on both Theoretical Foundation (TF) of Data Engineering and Applications (AP) of Data Engineering in specific engineering domains. The certificate requires completing 12 credits of coursework. At least 6 credits must be taken from courses listed under the Theoretical Foundation (TF) category. These courses provide training on the central theory and methods of Data Engineering, informed by physical and dynamical models that generally arise in engineering processes. At least 3 credits must be taken from courses listed under the Applications (AP) category. These courses provide training on applications of Data Engineering methods in specific engineering domains, by tailoring and applying data analysis to specific data acquisition techniques and models that are suitable for a particular engineering domain. The domains currently include Signal and Image Processing, Biomedical Engineering, Computer Engineering, and Systems Engineering. Lists of approved TF courses and AP courses are provided under "Program Requirements".

Requirements

Effective Spring 2021

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Theoretical Foundations (TF)		
Select a minimum of 6 credits from the following: ¹		6-9
ECE 514	Applications of Random Processes	
ECE 520	Optimization Methods-Control & Communication ¹	
or ENGR 510	Engineering Optimization: Method/Application	
ECE 652	Estimation and Filtering Theory	
ECE 656	Machine Learning and Adaptive Systems	

SYSE 571 Analytics in Systems Engineering

Applications (AP)

Select a minimum of 3 credits from the following list of courses 3-6
for specific engineering application domains:

AP: Signal and Image Processing

ECE 512 Digital Signal Processing

ECE 513 Digital Image Processing

AP: Biomedical Engineering

ECE 517/ Advanced Optical Imaging

BIOM 517

BIOM 526/ Biological Physics

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

¹ ECE 520 and ENGR 510 cannot be both taken to satisfy this requirement.

Graduate Certificate in Embedded Systems

The Graduate Certificate in Embedded Systems provides an introduction to embedded systems, including hardware design and software engineering principles. Students learn to apply electrical engineering, computer engineering, and computer science principles in real-world embedded platforms.

Effective Fall 2016

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Select three courses from the following: ¹ 11-12		
CS 545	Machine Learning	
CS 560/ECE 560	Foundations of Fine-Grain Parallelism	
CS 575	Parallel Processing	
ECE 554	Computer Architecture	
ECE 561/CS 561	Hardware/Software Design of Embedded Systems	
ECE 661	Advanced Topics in Embedded Systems	

Program Total Credits: 11-12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

¹ At least one ECE course is required.

Graduate Certificate in Power and Energy

Students pursuing the Graduate Certificate in Power and Energy gain skills to create modern solutions for the world's mounting energy needs. With the rise of electric vehicles, more ubiquitous personal technologies, and demand for renewable energy sources, the electric grid, as it stands, is not equipped to meet 21st century requirements. Much of the power and energy workforce will be retiring in the coming years; as such, the time is ripe to update your knowledge to be more competitive among the next generation of professionals and help usher in a modern, secure, energy-smart grid.

Effective Fall 2016

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Select three of the following courses: 9		
ECE 508/ ENGR 508	Introduction to Power System Markets	
ECE 509/ ENGR 509	Signal Processing for Power Systems	
ECE 565/ ENGR 565	Electrical Power Engineering	
ECE 566	Grid Integration of Wind Energy Systems	
ECE 623/ ENGR 623	Electric Power Quality	

Program Total Credits: 9

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Science in Computer Engineering, Plan A

The Master of Science in Computer Engineering, Plan A will produce professionals capable of applying in-depth knowledge, creativity, and research experience to analyze, design, develop, and improve computer systems in technically demanding careers. Students pursuing the Plan A degree will complete a research-orientated plan of study involving a thesis and coursework. Students interested in graduate work should refer to CSU's Graduate and Professional Bulletin and the Electrical and Computer Engineering Department (<http://www.engr.colostate.edu/ece/>) website.

Master of Science in Electrical Engineering, Plan A

Arthur C. Clark said, "Any sufficiently advanced technology is indistinguishable from magic." The Master of Science in Electrical Engineering, Plan A produces leaders who make the magic happen in our modern world. From electric cars to smartphones to Global Positioning Systems, our graduates turn ideas into reality.

This program creates professionals with depth and breadth of knowledge, as well as the skills and mindset to continue to evolve and grow in a constantly changing high-tech environment. Offering a highly customizable curriculum, this program specializes in the following focus areas: biomedical engineering, communications and signal processing, computer engineering, controls and robotics, electric power and energy systems, electromagnetics and remote sensing, lasers, optics, and applications.

Students pursuing the M.S. in Electrical Engineering, Plan A will complete a research-oriented plan of study involving a thesis and coursework. Interested applicants should refer to CSU's Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) and the Electrical and Computer Engineering website (<http://www.engr.colostate.edu/ece/>).

- ³ The final examination taken includes relevant questions from each course taken by the student for the degree.

Master of Engineering, Plan C, Computer Engineering Specialization

The Master of Engineering, Plan C, Computer Engineering Specialization will produce professionals with broad engineering backgrounds who are capable of applying in-depth knowledge and creativity to analyze, design, develop, and improve computer systems in technically demanding careers. Students will have flexibility to develop a plan of study in their area of interest. Students interested in graduate work should refer to CSU's Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) and the Electrical and Computer Engineering Department (<http://www.engr.colostate.edu/ece/>) website.

Master of Engineering, Plan C, Electrical Engineering Specialization

The Master of Engineering, Plan C, Electrical Engineering Specialization focuses on enhancing the expertise of working electrical engineering professionals. Engineers who want to further their careers with engineering related firms and governmental agencies should consider this degree. Students will have flexibility to develop a plan of study in their area of interest. Students interested in graduate work should refer to CSU's Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) and the Electrical and Computer Engineering Department (<http://www.engr.colostate.edu/ece/>) website.

Ph.D. in Computer Engineering

The Ph.D. in Computer Engineering creates future leaders in the thriving field of computer engineering. Under the tutelage of renowned computer engineering faculty, graduates of this program will produce significant contributions and original research to advance next generation electronics and computing.

Offering a highly customizable curriculum, this program focuses on the following areas: biomedical engineering, communications and signal processing, computer engineering, controls and robotics, electric power and energy systems, electromagnetics and remote sensing, and lasers, optics, and applications.

Students pursuing a Ph.D. in Computer Engineering will complete a research-oriented plan of study involving a dissertation and coursework. Courses

Mechanical Engineering (MECH)

MECH 103 Introduction to Mechanical Engineering Credits: 3 (3-0-0)

Course Description: Introduction to mechanical engineering, including relevant programming and computer technologies such as MATLAB and Excel.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 105 Mechanical Engineering Problem Solving Credits: 3 (3-0-0)

Course Description: Programming and engineering problem solving techniques, algorithms and processes based on first principles of physics and calculus.

Prerequisite: (MECH 103) and (MATH 159 or MATH 160) and (PH 141, may be taken concurrently).

Registration Information: Sections may be offered: Online. Credit not allowed for both MECH 102 and MECH 105.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 182A Study Abroad--Germany: Introduction to Mechanical Engineering Credits: 3 (0-0-3)

Course Description: Introduction to mechanical engineering, and relevant programming and computer technologies, including MATLAB and Excel. Exploration of global engineering in Berlin, Germany. Explore concepts through guest lectures, discussion with German engineers, and visits to German engineering companies.

Prerequisite: None.

Registration Information: Written consent of advisor. Credit not allowed for both MECH 103 and MECH 182A.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 200 Introduction to Manufacturing Processes Credits: 3 (2-2-0)

Course Description: Engineering drawings, materials, manufacturing, and safety. Hand tools, cutting, drilling, the lathe, mill and numerical control.

Prerequisite: MECH 105.

Registration Information: Mechanical Engineering and Biomedical Engineering-Mechanical Engineering dual majors only. Must register for lecture and laboratory. Credit not allowed for both MECH 200 and MECH 200A. Credit not allowed for both MECH 200 and MECH 200B.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 200A Introduction to Manufacturing Processes: Lecture Credits: 2 (2-0-0)

Course Description: Introduction to engineering drawings, materials, manufacturing processes, and shop safety. Fundamentals and principles associated with hand tools, cutting, grinding, the lathe, mill, and numerical control.

Prerequisite: MECH 105.

Registration Information: Mechanical Engineering and Biomedical Engineering-Mechanical Engineering dual majors only. Credit not allowed for both MECH 200 and MECH 200A. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 200B Introduction to Manufacturing Processes : Laboratory Credit: 1 (0-2-0)

Course Description: Applied introduction to engineering drawings, materials, manufacturing processes, and shop safety. Basic hand tools, cutting, grinding, the lathe, mill, introduction to numerical control. Experiential learning is emphasized through hands-on laboratory activities.

Prerequisite: MECH 200A, may be taken concurrently.

Registration Information: Mechanical Engineering and Biomedical Engineering-Mechanical Engineering dual majors only. Credit not allowed for both MECH 200 and MECH 200B.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 201 Engineering Design I Credits: 2 (1-2-0)

Course Description: Engineering design methods used to portray three-dimensional objects and visually communicate design information with an emphasis on computer-aided design using parametric solid modeling and geometric dimensioning and tolerancing.

Prerequisite: MECH 105.

Registration Information: Must register for lecture and laboratory. Offered as Mixed Face-to-Face.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 202 Engineering Design II Credits: 3 (2-2-0)

Course Description: Engineering design process with emphasis on teamwork, ideation, decision-making, project planning applied to a group design project.

Prerequisite: MECH 201 and MECH 200, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 231 Engineering Experimentation Credits: 3 (2-2-0)

Course Description: Measurement systems; experimental design; data acquisition and analysis techniques.

Prerequisite: (MECH 102 or MECH 105) and (PH 142).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 237 Introduction to Thermal Sciences Credits: 3 (3-0-0)

Course Description: First and second laws of thermodynamics, properties of materials, energy conversion, statistical aspects, heat transfer.

Prerequisite: PH 141 and MATH 160.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 262 Engineering Mechanics Credits: 4 (4-0-0)

Course Description: Forces, static equilibrium, mass center, moments of inertia, kinematics and kinetics of particles and rigid bodies.

Prerequisite: (MATH 161) and (PH 141).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 301A Engineering Design III: Finite Element Analysis Credit: 1 (0-2-0)

Course Description: Application of computer-aided finite element analysis (FEA) tools for the simulation and prediction of robustness and performance of mechanical components and assemblies.

Prerequisite: CIVE 360 and MECH 202, may be taken concurrently and MECH 342.

Registration Information: This is a partial semester course. Offered as Mixed Face-to-Face. Credit not allowed for both (MECH 301 and MECH 301A) or (MECH 301A and MECH 302).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 301B Engineering Design III: Computational Fluid Dynamics Credit: 1 (0-2-0)

Course Description: Application of computer-aided computational fluid dynamics (CFD) tools for the simulation and prediction of robustness and performance of mechanical components and assemblies.

Prerequisite: CIVE 360 and MECH 202, may be taken concurrently and MECH 301A, may be taken concurrently and MECH 342.

Registration Information: This is a partial semester course. Offered as Mixed Face-to-Face. Credit not allowed for (MECH 301 and MECH 301B) or (MECH 301B and MECH 302).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 303 Energy Engineering Credits: 3 (3-0-0)

Course Description: Energy generation (coal, oil, natural gas, solar, wind, geothermal, hydropower, tidal, biofuel, nuclear...), conversion, distribution, storage, efficiency.

Prerequisite: CBE 310 or ECE 341 or MECH 237 or MECH 337 or PH 361.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 307 Mechatronics and Measurement Systems Credits: 4 (3-3-0)

Course Description: Mechatronic and measurement system analysis and design; applied electronics; data acquisition; microcontroller interfacing and programming.

Prerequisite: CIVE 261 and ECE 204 and MATH 340 and MECH 231.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 324 Dynamics of Machines Credits: 4 (3-2-0)

Course Description: Analysis and synthesis of moving machinery.

Prerequisite: CIVE 261 and MATH 340, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 325 Machine Design Credits: 3 (3-0-0)

Course Description: Design of mechanical components to avoid failure during operation. Stress analysis, failure theories, and specific mechanical components in design context.

Prerequisite: CIVE 360.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 331 Introduction to Engineering Materials Credits: 4 (3-2-0)

Course Description: Characteristics of metallic, plastic, and ceramic material; basic principles which relate properties of materials to their atomic and microstructure.

Prerequisite: CHEM 111 and CHEM 112 and MECH 231.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 337 Thermodynamics Credits: 4 (3-0-1)

Course Description: First and second laws, property relationships, characteristic functions, thermodynamics solver, various thermodynamics applications.

Prerequisite: MATH 261 and PH 141.

Registration Information: Must register for lecture and recitation.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 338 Thermal/Fluid Sciences Laboratory Credit: 1 (0-3-0)

Course Description: Experimental methods in heat transfer, fluid flow, and thermodynamics.

Prerequisite: MECH 337 and MECH 342 and MECH 344, may be taken concurrently.

Registration Information: Biomedical Engineering with ME and Mechanical Engineering majors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 342 Mechanics and Thermodynamics of Flow Processes Credits: 3 (3-0-0)

Course Description: Engineering details of viscous flow with losses, measurements, compressibility, turbomachinery, convective heat transfer.

Prerequisite: MATH 340 and PH 141 and MECH 337, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 344 Heat and Mass Transfer Credits: 3 (3-0-0)

Course Description: Transport and rate processes, conduction, convection, and radiation.

Prerequisite: MECH 342.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 392 Graduate Education and Research Seminar Credit: 1 (0-0-1)

Course Description: Research in graduate school and industry as a career option for mechanical engineers.

Prerequisite: MECH 231 and MECH 237.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

MECH 407 Laser Applications in Mechanical Engineering Credits: 3 (3-0-0)

Course Description: Review of electromagnetic waves; applications of lasers and optics in engineering, e.g., position sensing, flowfield measurement, cutting and welding.

Prerequisite: PH 142.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 408 Applied Engineering Economy Credits: 3 (3-0-0)

Course Description: The basic principles and calculations of engineering economy with application to real problems, including energy and the environment.

Prerequisite: MATH 161.

Registration Information: Credit not allowed for both MECH 408 and MECH 410. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 411 Manufacturing Engineering Credits: 3 (3-0-0)

Course Description: Casting, forming, machining, and welding processes used in manufacturing operations.

Prerequisite: CIVE 360 and MECH 331.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 417 Control Systems Credits: 3 (2-2-0)

Course Description: Feedback and forward loop control design and simulation; discrete time and frequency domain methods with implementation considerations.

Prerequisite: MATH 340 and MECH 307.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 420 Aerospace Structures Credits: 3 (3-0-0)

Course Description: Analysis of aerospace structures; introduction to theory of elasticity, stress analysis of thin-walled structures in bending, torsion, and shear, and finite element methods and applications to aerospace structures.

Prerequisite: MATH 340 and MECH 325.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 424 Advanced Dynamics Credits: 3 (3-0-0)

Course Description: Kinematics and dynamics of rigid bodies. Hamilton's principle and Lagrange's equations for lumped parameter extended bodies and distributed systems.

Prerequisite: MECH 324.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 425 Mechanical Engineering Vibrations Credits: 4 (3-2-0)

Course Description: Vibrations applied to rotating machinery and structures. SDOF and MDOF systems, mode shapes, vibration measurements and control. Hands-on lab.

Prerequisite: MECH 324.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 431 Metals and Alloys Credits: 3 (3-0-0)

Course Description: Engineering metals and alloys, modification of properties by alloying, plastic deformation, and heat treatment. Fundamentals of physical metallurgy.

Prerequisite: MECH 331.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 432 Engineering of Nanomaterials Credits: 3 (3-0-0)

Course Description: Structure, properties, and processing of extremely small (10 to the minus 9 m) synthetic and natural materials.

Prerequisite: MECH 331.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 437 Internal Combustion Engines Credits: 3 (2-0-1)

Course Description: Application of thermodynamics, heat transfer, and fluid mechanics to internal combustion engines.

Prerequisite: MECH 344.

Registration Information: Must register for lecture and recitation.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 460 Aeronautics Credits: 3 (3-0-0)

Course Description: Thermodynamics and fluid mechanics principles applied to the mechanics, aerodynamics, performance, stability, and control of airplanes.

Prerequisite: MECH 342.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 463 Building Energy Systems Credits: 3 (3-0-0)

Course Description: Comfort, psychrometrics, loads, solar radiation, heating and cooling system design, transport, solar system design, economics.

Prerequisite: MECH 344.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 468 Space Propulsion and Power Engineering Credits: 3 (3-0-0)

Course Description: Orbital mechanics and space missions; chemical, nuclear, and electric rockets; nuclear heat sources; thermoelectric and photovoltaic devices.

Prerequisite: ECE 204 and MECH 337 and MECH 342.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 470 Biomedical Engineering Credits: 3 (3-0-0)

Also Offered As: BIOM 470.

Course Description: Engineering application in human/animal physiology, diagnosis of disease, treatment, rehabilitation, human genome manipulation.

Prerequisite: (MATH 155 or MATH 160) and (PH 141).

Registration Information: Credit not allowed for both MECH 470 and BIOM 470.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 477 Algorithms in Scientific Computing Credits: 3 (3-0-0)

Course Description: Numerical methods for scientific computing relevant to problems arising in mechanical and aerospace engineering, with an emphasis on applications, mathematical principles and algorithms, code development, and tool building.

Prerequisite: MATH 340 or MATH 345.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 486A Engineering Design Practicum: I Credits: 4 (1-6-0)

Course Description: Capstone engineering design project; transition experience to the mechanical engineering profession in industry and graduate education.

Prerequisite: (MECH 301 or MECH 301B, may be taken concurrently and MECH 301A) and (MECH 307 and MECH 331 and MECH 344) and (MECH 324, may be taken concurrently or MECH 325, may be taken concurrently).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 486B Engineering Design Practicum: II Credits: 4 (1-6-0)

Course Description: Capstone engineering design project; transition experience to the mechanical engineering profession in industry and graduate education.

Prerequisite: MECH 324 and MECH 325 and MECH 338 and MECH 486A.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 495 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 498A Engineering Research Practicum: I Credits: 4 (1-6-0)

Course Description: Capstone engineering research project; transition experience to graduate research and education.

Prerequisite: (MECH 301 or MECH 301A and MECH 301B, may be taken concurrently) and (MECH 307 and MECH 331 and MECH 344) and (MECH 324, may be taken concurrently or MECH 325, may be taken concurrently).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 498B Engineering Research Practicum: II Credits: 4 (1-6-0)

Course Description: Capstone engineering research project; transition experience to graduate research and education.

Prerequisite: MECH 324 and MECH 325 and MECH 338 and MECH 498A.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 502 Advanced/Additive Manufacturing Engineering Credits: 3 (3-0-0)

Course Description: Materials, controls, and mechanics applied to additive manufacturing; rapid prototyping; direct digital manufacturing.

Prerequisite: MECH 202 and MECH 331.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 505 Steam Power Plants Credits: 3 (3-0-0)

Course Description: Technology review and application of engineering sciences and economics to the analysis and design of vapor power generation systems. Vapor power cycles, steam generation, and auxiliary systems associated with power plants. Overall design of power plants as well as component design. Fossil fuel and nuclear energy systems are considered.

Prerequisite: MECH 337.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Sections may be offered: Online. Required field trips. Credit not allowed for both MECH 505 and MECH 581A3.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 507 Laser Diagnostics for Thermosciences Credits: 3 (3-0-0)

Course Description: Basics of optics, spectroscopy, and lasers. Physics and applications of laser diagnostic techniques used in thermosciences.

Prerequisite: PH 142.

Registration Information: Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 509 Design and Analysis in Engineering Research Credits: 3 (3-0-0)

Course Description: Design, model building, analysis and reporting in engineering and manufacturing research and experimentation.

Prerequisite: MATH 340 and STAT 315.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 513 Simulation Modeling and Experimentation Credits: 3 (3-0-0)

Course Description: Logic/analytic modeling in simulations. Event and transient entity-based simulation languages. Simulation design, experimentation and analysis.

Prerequisite: STAT 315.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 515 Advanced Topics in Mechanical Vibrations Credits: 3 (2-2-0)

Course Description: Structural modal analysis, rotordynamics, and torsional vibrations. Lectures are supported with practical application labs.

Prerequisite: MECH 324.

Registration Information: Junior standing. Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

MECH 520 Finite Element Analysis in Mechanical Engr Credits: 3 (3-0-0)

Course Description: Application of FEA as a tool to analyze mechanical engineering problems.

Prerequisite: (CIVE 360) and (MATH 340 or MATH 530).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 524 Principles of Dynamics Credits: 3 (3-0-0)

Course Description: Kinematics and dynamics of rigid body motion; Lagrangian and Hamiltonian formulations of mechanics; applications to engineering problems.

Prerequisite: MECH 324.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 525 Cell and Tissue Engineering Credits: 3 (3-0-0)

Also Offered As: BIOM 525.

Course Description: Cell and tissue engineering concepts and techniques with emphasis on cellular response, cell adhesion kinetics, and tissue engineering design.

Prerequisite: BC 351 or BMS 300 or BMS 500 or BZ 310 or NB 501.

Registration Information: Credit only allowed for one of the following: MECH 525, BIOM 525, and CBE 525. Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 527 Hybrid Electric Vehicle Powertrains Credits: 3 (3-0-0)

Course Description: Hybrid powertrains and modeling including vehicle dynamics, internal combustion engine, electric motor, energy storage, and control.

Prerequisite: MECH 307.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 529 Advanced Mechanical Systems Credits: 3 (3-0-0)

Course Description: Modeling, analysis, and synthesis of practical mechanical devices in which dynamic response is dominant consideration.

Prerequisite: MECH 307.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 530 Advanced Composite Materials Credits: 3 (3-0-0)

Course Description: Materials aspects of advanced composite constituents and how their combination yields synergistic results.

Prerequisite: CIVE 360 and MECH 331.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 531 Materials Engineering Credits: 3 (3-0-0)

Also Offered As: BIOM 531.

Course Description: Selection of structural engineering materials by properties, processing, and economics; materials for biomedical and biotechnology applications.

Prerequisite: MECH 331 or MECH 431.

Registration Information: Credit not allowed for both MECH 531 and BIOM 531. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 532 Materials Issues in Mechanical Design Credits: 3 (3-0-0)

Also Offered As: BIOM 532.

Course Description: Failure mechanisms from materials viewpoint with emphasis on use in design. Fracture, creep, fatigue, and corrosion.

Prerequisite: MECH 331.

Registration Information: Credit not allowed for both MECH 532 and BIOM 532. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 533 Composites Product Development Credits: 3 (2-2-0)

Course Description: Practical application of advanced fiber reinforced materials in mechanical design, including composite constituent materials selection, performance, analysis, and manufacturing.

Prerequisite: MECH 331 and CIVE 360.

Registration Information: Graduate standing. Must register for lecture and laboratory. Credit not allowed for both MECH 533 and MECH 580A6.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 534 Energy & Env. Impacts of Transportation Credits: 3 (3-0-0)

Course Description: Energy use and environmental impacts of the transportation sector. Topics include vehicle design, dynamics and efficiency; combustion and emission formation; internal combustion engines, fuel cells, batteries, and powertrains; conventional and alternative fuels; travel demand and modes; and life cycle analysis and criteria pollutant emissions.

Prerequisite: MECH 337.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Sections may be offered: Online. Credit not allowed for both MECH 534 and MECH 580A8.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 538 Mechanical Engineering Thermodynamics Credits: 3 (3-0-0)

Course Description: First and second laws of thermodynamics applied to engineering devices and systems. Introduction to exergy, equilibrium, chemical reactions, thermodynamic relations, and special topics.

Prerequisite: MECH 337.

Restriction: Must be a: Graduate.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 539 Advanced Fluid Mechanics Credits: 3 (3-0-0)

Course Description: Kinematics, Navier-Stokes equations, vorticity, viscous flows, scaling analysis, boundary layers, secondary flows, entropy generation and transport, stability and transition, turbulence.

Prerequisite: CIVE 300 or MECH 342.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 543 Biofluid Mechanics Credits: 3 (3-0-0)

Course Description: Fluid dynamic concepts for understanding fluid motion in living organs/organisms; advanced research applications.

Prerequisite: (BIOM 421 or CBE 331 or CIVE 300 or MECH 342) and (BMS 300 and PH 121 or PH 141 and BMS 300 or BMS 420).

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 544 Advanced Heat Transfer Credits: 3 (3-0-0)

Course Description: Fundamentals and engineering applications of heat transfer including conduction, convection, and radiation.

Prerequisite: MECH 344.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 551 Physical Gas Dynamics I Credits: 3 (3-0-0)

Course Description: Characteristics of real gases in reacting and nonequilibrium systems; equilibrium air; statistical mechanics, chemical thermodynamics.

Prerequisite: MECH 342.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 552 Applied Computational Fluid Dynamics Credits: 3 (3-0-0)

Course Description: Introductory theory of CFD, formulation of engineering problems for CFD analyses, mesh generation, solver settings, and postprocessing.

Prerequisite: CIVE 300 or CBE 331 or MECH 342.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 557 Turbomachinery Credits: 3 (3-0-0)

Course Description: Application of fundamental principles of thermodynamics and fluid mechanics to turbomachinery.

Prerequisite: MECH 337 and MECH 342.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 558 Combustion Credits: 3 (3-0-0)

Course Description: Combustion processes: explosions, detonations, flame propagation, ignition, generation of pollutants in moving and stationary energy conversion systems.

Prerequisite: MECH 342.

Registration Information: Sections may be offered: Online.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 564 Fundamentals of Robot Mechanics and Controls Credits: 3 (3-0-0)

Course Description: Kinematics of robots, controls for robots.

Prerequisite: MECH 417.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 567 Broad-Beam Ion Sources Credits: 3 (3-0-0)

Course Description: Physical processes in broad-beam electron-bombardment ion sources for space propulsion and ion machining applications.

Prerequisite: MATH 340.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 568 Computational Methods for Mechanical Eng. Credits: 3 (3-0-0)

Course Description: Fundamental principles which provide the foundation for the software and algorithms used in Mechanical Engineering.

Prerequisite: MATH 450 or MATH 451.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 569 Micro-Electro-Mechanical Devices Credits: 3 (3-0-0)

Also Offered As: ECE 569.

Course Description: Micro-electro-mechanical processes and applications in sensors, optics, and structures.

Prerequisite: MECH 344 with a minimum grade of C or ECE 331 with a minimum grade of C.

Registration Information: Credit not allowed for both ECE 569 and MECH 569. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 570 Bioengineering Credits: 3 (3-0-0)**Also Offered As:** BIOM 570.**Course Description:** Physiological and medical systems analysis using engineering methods including mechanics, fluid dynamics, control, electronics, and signal processing.**Prerequisite:** MECH 307 and MECH 324.**Registration Information:** Credit not allowed for both MECH 570 and BIOM 570. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 573 Structure and Function of Biomaterials Credits: 3 (3-0-0)****Also Offered As:** BIOM 573.**Course Description:** Structure-function relationships of natural biomaterials; application to analysis of biomimetic materials and biomaterials used in medical devices.**Prerequisite:** MECH 331.**Registration Information:** Credit not allowed for both MECH 573 and BIOM 573. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 574 Bio-Inspired Surfaces Credits: 3 (3-0-0)****Also Offered As:** BIOM 574.**Course Description:** Analysis of surface functionalities of various biological species; identification of design principles.**Prerequisite:** MECH 342 and CHEM 111.**Registration Information:** Sections may be offered: Online. Credit not allowed for both BIOM 574 and MECH 574.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 575 Solar and Alternative Energies Credits: 3 (3-0-0)****Course Description:** Solar radiation, flat-plate collectors, energy storage, space heating and cooling, power generation, applications, simulation.**Prerequisite:** MECH 337 and MECH 342 and MECH 344.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 576 Quantitative Systems Physiology Credits: 4 (4-0-0)****Also Offered As:** BIOM 576.**Course Description:** Quantitative, model-oriented approach to cellular and systems physiology with design examples from biomedical engineering.**Prerequisite:** BMS 300 and CHEM 113 and MATH 340 and PH 142.**Registration Information:** Credit not allowed for both BIOM 576 and MECH 576. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 577 Aerosol Physics and Technology Credits: 3 (3-0-0)****Course Description:** Aerosols and their applications in science and engineering, air pollution control, atmospheric science, and public health. Topics cover the physical and chemical principles underlying the behavior of particles suspended in air, including particle size, aerodynamics, motion of particles in a force field, particle size statistics, and optical and electrical properties.**Prerequisite:** PH 141.**Registration Information:** Senior standing. Sections may be offered: Online.**Term Offered:** Spring (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 578 Musculoskeletal Biosolid Mechanics Credits: 3 (3-0-0)****Also Offered As:** BIOM 578.**Course Description:** Application of engineering concepts to quantify the mechanical behavior of load-bearing biological tissues and orthopaedic implant performance.**Prerequisite:** CIVE 360.**Registration Information:** Graduate standing. Credit not allowed for both BIOM 578 and MECH 578.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 579 Cardiovascular Biomechanics Credits: 3 (3-0-0)****Also Offered As:** BIOM 579.**Course Description:** Bio-mechanical principles and approaches applied in cardiovascular research.**Prerequisite:** MATH 340 and PH 142.**Restriction:** Must be a: Graduate.**Registration Information:** Graduate students only. Sections may be offered: Online. Credit allowed for only one of the following: BIOM 579, BIOM 581A8, MECH 579, or MECH 581A8.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 628 Applied Fracture Mechanics Credits: 3 (3-0-0)****Course Description:** Stress distribution near cracks; energy criteria for fracture; design criteria; fracture toughness testing.**Prerequisite:** CIVE 560.**Restriction:** Must be a: Graduate, Professional.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**MECH 631 Defects in Crystals Credits: 3 (3-0-0)****Also Offered As:** MSE 631.**Course Description:** Mechanics, thermodynamics and kinetics of defects in crystalline solids including point defects, dislocations, and grain boundaries.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Sections may be offered: Online. Credit allowed for only one of the following: MECH 631, MSE 631, or MECH 681A2.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.

MECH 657 Advanced Computational Gas Dynamics Credits: 4 (3-2-0)

Course Description: Advanced computational algorithms for gas dynamics.

Prerequisite: MECH 568.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MECH 658 Advanced Combustion Theory and Modeling Credits: 3 (3-0-0)

Course Description: Asymptotic structure of flames, limit phenomena and multi-phase combustion.

Prerequisite: MECH 558.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 661 Theory/Control of Internal Combustion Engines Credits: 3 (3-0-0)

Course Description: Theory and applications of internal combustion engines. Alternative fuels, engine control, and pollution prevention.

Prerequisite: MECH 437.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 671 Orthopedic Tissue Biomechanics Credits: 3 (3-0-0)

Also Offered As: BIOM 671.

Course Description: Linear elastic, finite deformation, and viscoelastic theories applied to the mechanical behavior of orthopedic tissues (bone, tendon, cartilage).

Prerequisite: CIVE 560.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both BIOM 671 and MECH 671.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MECH 684 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

MECH 692 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695A Independent Study: Bioengineering Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695B Independent Study: Energy Conversion Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695C Independent Study: Environmental Engineering Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695D Independent Study: Heat and Mass Transfer Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695E Independent Study: Industrial and Systems Engineering Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695F Independent Study: Mechanics and Design Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MECH 695G Independent Study: Computer-Assisted Engineering Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Major in Mechanical Engineering

Is making a difference important to you? Would you enjoy the challenge of inventing sustainable energy devices, leading computer-aided product design, or biomedical research? Does creating new designs for the hybrid electric vehicle industry, or new airplanes in the fields of aeronautics and aerospace sound interesting? Would designing or doing research and development in a wide range of industrial and governmental enterprises appeal to you? Does studying thermal sciences and the integration of electronic and mechanical devices interest you? Do you like putting ideas and designs to work? Are you interested in collaborating and working in teams with others? If your answer to any of these questions is "yes," then a major in Mechanical Engineering may be for you.

Mechanical engineers are creative problem solvers who design, develop, and manufacture the machines and instrumentation that run energy, building, environmental, and transportation systems. Examples include biomedical devices, ground/air/space vehicles, robots, environmental control equipment, and power plants.

In Mechanical Engineering, students take basic science and mathematics courses while beginning their engineering studies in design and computing. A broad spectrum of classes is designed to sharpen problem-solving skills. The senior year focuses on a year-long capstone design course to help students in the transition from college to an engineering career. Students also choose technical electives from the energy, automotive, material science, manufacturing, dynamic systems, robotics and controls, simulation and modeling, and biomedical engineering areas.

Participation in labs provides an active learning environment and further develops design, modeling, and analytical skills.

Mechanical Engineering at CSU is dedicated to graduating ethical mechanical engineers who:

- Make an impact on society's global, grand engineering challenges
- Act as innovative and creative engineering designers who identify, analyze, and solve complex problems
- Function as accomplished thinkers with hands-on practical skills
- Serve as local, regional, and global collaborators and communicators
- Commit to life-long learning
- Uphold the CSU Principles of Community which encompass inclusion, integrity, respect, service, and social justice

Program Educational Objectives

Mechanical Engineering Bachelor of Science graduates will be able to accomplish the following within the first few years after graduation:

- Identify, analyze, formulate, and solve engineering problems associated with their professional position, both independently and in a team environment
- Manage multi-faceted and multi-disciplinary projects with significant legal, ethical, regulatory, social, environmental, and economic considerations using a broad systems perspective
- Communicate effectively with colleagues, professional clients, and the public
- Demonstrate commitment and progress in lifelong learning, professional development, and leadership

Student Outcomes

Graduates of the undergraduate Mechanical Engineering program will be prepared to:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Communicate effectively with a range of audiences
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Acquire and apply new knowledge as needed, using appropriate learning strategies

Potential Occupations

Graduates from the Department of Mechanical Engineering are expected to have the fundamental knowledge required for the successful practice of mechanical engineering. CSU engineering graduates are well prepared for a professional career. The Department boasts a 100% pass rate on the Fundamentals of Engineering professional examination. Participating in internships, co-curricular and volunteer activities, and cooperative

education opportunities is highly recommended to enhance practical training and development. Students who continue on to pursue a graduate education can attain more responsible positions with the possibility of rising to top professional levels.

Major in Mechanical Engineering, Aerospace Engineering Concentration

Aerospace engineering covers the design, construction and science of aircraft and spacecraft. Designed for undergraduate mechanical engineering majors, the aerospace concentration offers students a mechanical engineering degree foundation and specialized training in the aerospace discipline. Coursework will focus on aerospace

fundamentals, including fluid flow mechanics, propulsion and materials and manufacturing. The required courses will provide an introduction to the processing steps required in aerospace development, with a focus on the design, manufacturing, and life cycle costs of a specific product.

Master of Engineering, Plan C, Mechanical Engineering Specialization

The Master of Engineering, Plan C, Mechanical Engineering Specialization is an online or on-campus degree program focused on enhancing the

expertise of working professionals or continuing students who are looking to keep up with the pace of innovation within their industry and advance in their careers. Engineers who want to further their careers with industrial firms and governmental agencies or those who want to pursue a career in private practice should consider this degree. This is a coursework-only degree program with no thesis requirement.

Of the 30 minimum credits required for this program, at least 24 credits must be at the 500-level or above and earned at CSU.

Master of Science in Mechanical Engineering, Plan A

The Master of Science in Mechanical Engineering, Plan A is ideal for students who are interested in advancing their career in industry or research. The program combines valuable classroom instruction with research experiences. Students conduct research under the supervision of a faculty advisor, often the Principal Investigator (P.I.), for a government or industry sponsored project. The student's research, in conjunction with thesis credits and coursework, will culminate in an article for submission to a peer-reviewed journal and a final thesis.

Ph.D. in Mechanical Engineering

The Ph.D. in Mechanical Engineering is ideal for students looking to pursue advanced-level careers in industry, research, or academia. Students pursuing a Ph.D. in Mechanical Engineering will undertake advanced research under the mentorship of a faculty advisor (Principal Investigator), most often on a government or industry funded project as a paid research assistant. The degree plan will involve consideration of a challenging problem utilizing analytical, experimental, and/or design techniques. This research – in addition to coursework, exams, journal articles, and dissertation credits – will culminate in a final dissertation. The dissertation will contain new analytical knowledge, experimental knowledge, design knowledge, or a combination thereof. The dissertation must make an original contribution to the field.

School of Biomedical Engineering

Scott Bioengineering Building, Suite 225
 engr.colostate.edu/sbme (<http://www.engr.colostate.edu/sbme/>)
 (970) 491-7157

Professor Stuart Tobet, Director
 Professor Kevin Lear, Associate Director; and Director, Undergraduate Programs
 Associate Professor Ketul Papat, Interim Director, Undergraduate Programs

The School of Biomedical Engineering (SBME) stands on a foundation of strong faculty and research programs from four CSU colleges: the Walter Scott, Jr. College of Engineering, and the Colleges of Health and Human Sciences, Natural Sciences, and Veterinary Medicine & Biomedical Sciences. The unique structure of the School involves over 70 faculty members representing 14 departments to provide an interdisciplinary focus on improving health, fighting disease, and aiding persons with disabilities. Academic excellence across diverse fields converges into three primary areas of research: (1) regenerative and rehabilitative medicine, (2) imaging and diagnostics, and (3) medical devices and therapeutics.

At the graduate level, SBME offers a Master of Science and a Doctor of Philosophy in Bioengineering, and a Master of Engineering (online and on campus) with a specialization in Biomedical Engineering. See the Graduate and Professional Bulletin for graduate program listings. The Walter Scott, Jr. College of Engineering offers a Bachelor of Science in Biomedical Engineering with a unique five-year program where graduates receive two B.S. degrees: one in Biomedical Engineering and the other in one of three traditional engineering areas - Chemical & Biological Engineering, Electrical Engineering, or Mechanical Engineering. An undergraduate Biomedical Engineering Interdisciplinary Minor is also offered.

Biomedical engineering lies at the interface of engineering, biology, and medicine. With over 40 state-of-the-art biomedical and engineering research labs, including the world-renowned Veterinary Teaching Hospital and Animal Cancer Center, we offer hands-on experience for undergraduate and graduate students to work alongside leading researchers. CSU provides a rich environment for interdisciplinary research and day-to-day collaborations and is positioned to offer unique bioengineering degree programs due to our faculty expertise, the interdisciplinary nature of the SBME, and the highly-ranked veterinary program. Our Biomedical Engineering programs integrate biological, chemical, physical, and mathematical sciences with engineering principles and clinical studies, and our graduates are well prepared

for careers in research, education, veterinary or human medicine, and industry.

Biomedical engineers are involved in a wide variety of activities on a daily basis. Practical applications of biomedical engineering include development, design, production, research, and/or teaching in areas such as:

- Designing biomedical materials and/or medical devices and equipment (e.g., pacemakers, assistive devices, exercise equipment for astronauts, creating/improving materials to help joint replacements last longer)
- Developing or improving therapies for fighting cancer, tuberculosis, or other illnesses and diseases (e.g., nanoscaffolding for localized chemotherapy delivery, telemetric sensors to determine healing rates in bone fractures or to detect key chemicals in live tissue with high temporal and spatial resolution)
- Finding better ways to image and/or diagnose illnesses (e.g., using laser-based imaging to detect viruses, developing ways to increase electrical signals to detect threats to food safety and security, designing biosensors to diagnose cancer cells, developing software to determine toxic pesticide levels in people)

Potential Occupations

Biomedical engineering applies engineering principles to medicine and improving quality of life for humans and animals. Biomedical engineers work in a variety of settings. Some biomedical engineers spend their days in the lab, researching new devices and systems that solve medical and health care-related problems. Others might work in clinical settings, run biomedical-focused enterprises, design/manufacture new therapies or diagnostics, assist medical facilities with engineering systems, or engage in regulatory affairs or patent law. Our graduates are well prepared for careers in research, education, or industry.

Undergraduate

Undergraduate Bachelor of Science Programs in Biomedical Engineering

The Bachelor of Science program in Biomedical Engineering has four pathways, each of which provide depth in a traditional area of engineering and breadth in biomedical engineering knowledge and applications. The coursework in these four pathways is designed not only to support biomedical engineering, but also to satisfy the curricular requirements of one of four traditional engineering degrees as administered by partner engineering departments.

The four curricular pathways for the BME B.S. degree are:

- B.S. degree in Biomedical Engineering combined with a B.S. degree in Chemical and Biological Engineering
- B.S. degree in Biomedical Engineering combined with a B.S. degree in Electrical Engineering, Electrical Engineering Concentration
- B.S. degree in Biomedical Engineering combined with a B.S. degree in Electrical Engineering, Laser and Optical Concentration
- B.S. degree in Biomedical Engineering combined with a B.S. degree in Mechanical Engineering

The BME program requires 157-158 credit hours of coursework, depending on the selected pathway, nominally distributed over five years.

In the first two years, students take introductory biomedical engineering courses as well as foundational math, science, and engineering courses. The third year and fourth years solidify expertise in the traditional

engineering major while building strength in biomedical engineering, life and physical sciences courses. The following years allow students to build a more thorough understanding of biomedical engineering, and their studies culminate in a Senior Design project in the fifth year that provides hands-on experience with an interdisciplinary team of peers. This combination of practical application and traditional academic rigor support the breadth and depth of this fairly unique program, and provides excellent preparation and market value for graduates' next steps in industry, academia, or research.

The Bachelor of Science in Biomedical Engineering at Colorado State University is accredited by the Accreditation Board for Engineering and Technology (ABET). It was first accredited in 2016, and this accreditation is retroactive for all prior graduates of the B.S. in biomedical engineering program. The partner majors include electrical engineering (EE), chemical and biological engineering (CBE), and mechanical engineering (MECH) and these three degree programs are accredited by the Engineering Accreditation Commission of ABET.

The educational objectives of the biomedical engineering program are to prepare our students to:

- demonstrate high professional, social, and ethical standards while examining and addressing the global impact of technology to improve quality of life in society and environment
- apply broad and deep knowledge, practical experiences, and creativity to solving problems at the interface of engineering and the life sciences as individuals and team members
- use their multidisciplinary background to foster communication and collaboration across professional and disciplinary boundaries
- recognize and expand the scope of their knowledge, continue self-directed learning, and identify and create professional opportunities for themselves and others

Graduates in Biomedical Engineering will have:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a multidisciplinary team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
- an ability to apply principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations), and statistics;

- an ability to solve bio/biomedical engineering problems, including those associated with the interaction between living and non-living systems;
- an ability to analyze, model, design, and realize bio/biomedical engineering devices, systems, components, or processes; and
- an ability to make measurements on and interpret data from living systems

For more information on accreditation requirements, see <https://www.abet.org/accreditation/accreditation-criteria/criteria-for-accrediting-engineering-programs-2019-2020> (<https://www.abet.org/accreditation/accreditation-criteria/criteria-for-accrediting-engineering-programs-2019-2020/>).

Courses Biomedical Engineering (BIOM)

BIOM 100 Overview of Biomedical Engineering Credit: 1 (1-0-0)

Course Description: Overview of the field of biomedical engineering with an emphasis on the roles of mechanical, electrical, and chemical/biological engineering principles.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Credit allowed for only one of the following: BIOM 100, BIOM 101, BIOM 109, or BIOM 180A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 101 Introduction to Biomedical Engineering Credits: 3 (3-0-0)

Course Description: Basic principles, fundamentals in biomedical engineering including molecular, cellular and physiological principles, major areas such as biomechanics.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: BIOM 100, BIOM 101, BIOM 109, or BIOM 180A1. Credit not allowed for both BIOM 101 and BIOM 200.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 109 Principles of Biomedical Engineering Credit: 1 (1-0-0)

Course Description: Fundamental principles of biomedical engineering and commonalities with mechanical, electrical, and chemical/biological engineering. Emphasis on the application of engineering design in a biomedical context. Introduction to industrial and academic career paths.

Prerequisite: None.

Registration Information: Offered as an online course only. Only offered for high school students who are concurrently enrolled in the complementary in-person course at a participating high school. Credit allowed for only one of the following: BIOM 100, BIOM 101, BIOM 109, or BIOM 180A1.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 200 Fundamentals of Biomedical Engineering Credits: 2 (2-0-0)

Course Description: Application of engineering analysis to physiology and biomedical engineering topics.

Prerequisite: BIOM 100, may be taken concurrently and LIFE 102 and MATH 160.

Restriction: Must be a: Undergraduate.

Registration Information: Credit not allowed for both BIOM 101 and BIOM 200.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 300 Problem-Based Learning Biomedical Engr Lab Credits: 4 (1-4-1)

Course Description: Group problem-based learning approach to problems spanning all core areas of biomedical engineering.

Prerequisite: (BIOM 101 or BIOM 200 or BIOM 100 and CBE 205 and MECH 262) and (MATH 340 or MATH 345).

Registration Information: Junior standing. Must register for lecture, lab, and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BIOM 306 Bioprocess Engineering Credits: 4 (3-2-0)

Also Offered As: BTEC 306.

Course Description: Material, energy balances; fluid flow, heat exchange, mass transfer; application to operations in food, fermentation, other bioprocess industries.

Prerequisite: (CHEM 107 or CHEM 111) and (PH 121 or PH 141).

Registration Information: Must register for lecture and laboratory. Credit not allowed for both BIOM 306 and BTEC 306.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 350A Study Abroad--Ecuador: Prosthetics Credits: Var[1-2] (0-0-0)

Course Description: Design and fabricate prosthetics for under-served populations in Ecuador. Course experience will occur in Quito, Ecuador in partnership with Range of Motion Project (ROMP), a non-profit healthcare organization.

Prerequisite: None.

Registration Information: Credit not allowed for both BIOM 350A and BIOM 382A.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 421 Transport Phenomena in Biomedical Engineering Credits: 3 (3-0-0)

Course Description: Engineering models of active and passive mechanisms of momentum. Heat and mass transport in mammalian cells, tissues, and organ systems.

Prerequisite: (BMS 300) and (CBE 332 or MECH 344).

Registration Information: Credit not allowed for both BIOM 330 and BIOM 421.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 422 Quantitative Systems and Synthetic Biology Credits: 3 (3-0-0)

Course Description: In-depth analysis of the quantitative systems approach to biology and biological engineering at the molecular and cellular scales.

Prerequisite: BIOM 421 or CBE 320.

Registration Information: Credit not allowed for both BIOM 400 and BIOM 422.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 431 Biomedical Signal and Image Processing Credits: 3 (3-0-0)

Also Offered As: ECE 431.

Course Description: Principles, features and mathematical processing of biomedical signals and images including interference and noise filtering and feature enhancement.

Prerequisite: (ECE 303 with a minimum grade of C or STAT 303 with a minimum grade of C) and (ECE 311 with a minimum grade of C and PH 142 with a minimum grade of C).

Registration Information: Sections may be offered: Online. Credit not allowed for both BIOM 431 and ECE 431.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 441 Biomechanics and Biomaterials Credits: 3 (3-0-0)

Course Description: Principles of biomechanics, biofluids, and biomaterials.

Prerequisite: BMS 300, may be taken concurrently and CIVE 360 and MECH 324, may be taken concurrently and MECH 331, may be taken concurrently and MECH 342.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 470 Biomedical Engineering Credits: 3 (3-0-0)

Also Offered As: MECH 470.

Course Description: Engineering application in human/animal physiology, diagnosis of disease, treatment, rehabilitation, human genome manipulation.

Prerequisite: (PH 141) and (MATH 155 or MATH 160).

Registration Information: Credit not allowed for both BIOM 470 and MECH 470.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 476A Biomedical Clinical Practicum I Credits: 2 (0-0-2)

Course Description: Biomedical lab work or exposure to the hospital/clinical environment.

Prerequisite: (BMS 300) and (BIOM 470 or MECH 470).

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BIOM 476B Biomedical Clinical Practicum II Credits: 4 (0-0-4)

Course Description: Biomedical lab work or exposure to the hospital/clinical environment.

Prerequisite: (BMS 300) and (BIOM 470 or MECH 470).

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BIOM 486A Biomedical Design Practicum: Capstone Design I Credits: 4 (0-0-10)

Course Description:

Prerequisite: (BIOM 300) and (BIOM 421 and CBE 320 and CBE 442 or ECE 342 and BIOM 431 and ECE 311 and ECE 332 or MECH 301B, may be taken concurrently and MECH 307 and BIOM 441 and MECH 301A or BIOM 441 and MECH 301 and MECH 307).

Registration Information: Senior standing. Enrollment in biomedical engineering major.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 486B Biomedical Design Practicum: Capstone Design II Credits: 4 (0-0-10)

Course Description:

Prerequisite: (BIOM 486A) and (CBE 451 or ECE 312 or MECH 325 and MECH 344 or PH 353).

Registration Information: Senior standing. Enrollment in biomedical engineering major.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 495 Independent Study Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

This is a partial semester course. Credit allowed for only one of the following: BIOM 527A, BIOM 581B1, ECE 527A, or ECE 581B1.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 527B Biosensing: Signal and Noise in Biosensors Credit: 1 (1-0-0)****Also Offered As:** ECE 527B.**Course Description:** Quantitative treatment of concepts of noise, interference and signal including noise types and spectra, filtering, and limitations imposed by noise. Example applications to Biosensors.**Prerequisite:** (MATH 340, may be taken concurrently or MATH 345, may be taken concurrently) and (PH 142).**Registration Information:** Junior standing. This is a partial semester course. Credit allowed for only one of the following: BIOM 527B, BIOM 581B2, ECE 527B, or ECE 581B2.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 527C Biosensing: Sensor Circuit Fundamentals Credit: 1 (1-0-0)****Also Offered As:** ECE 527C.**Course Description:** Introduction to circuit concepts used in sensors, including review of basic circuit elements of resistors, capacitors, and MOS (Metal-Oxide-Semiconductor transistors) elements. Fundamentals of the application of MOS circuits for signal conditioning and amplification and how sensor's backend signal processing is carried out after the sensor signal transduction stage.**Prerequisite:** (BIOM 101 or LIFE 102) and (MATH 340, may be taken concurrently or MATH 345, may be taken concurrently) and (PH 142).**Registration Information:** Junior standing. This is a partial semester course. Credit allowed for only one of the following: BIOM 527C, BIOM 581B3, ECE 527C, or ECE 581B3.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.

BIOM 527D Biosensing: Electrochemical Sensors Credit: 1 (1-0-0)**Also Offered As:** ECE 527D.**Course Description:** Introduction to the electrochemistry, and applications of electrochemical methods, used for detection of certain classes of chemicals and molecules.**Prerequisite:** (BIOM 101 or LIFE 102) and (CHEM 111) and (MATH 255 or MATH 261) and (PH 142).**Registration Information:** Junior standing. This is a partial semester course. Credit allowed for only one of the following: BIOM 527D, BIOM 581B5, ECE 527D, or ECE 581B5.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 527E Biosensing: Affinity Sensors Credit: 1 (1-0-0)****Also Offered As:** ECE 527E.**Course Description:** Fundamentals of affinity sensor application and design, including optical and electrical approaches and technologies.**Prerequisite:** (BIOM 101 or LIFE 102) and (CHEM 111) and (MATH 340, may be taken concurrently or MATH 345, may be taken concurrently) and (PH 142).**Registration Information:** Junior standing. This is a partial semester course. Credit allowed for only one of the following: BIOM 527E, BIOM 581B4, ECE 527E, or ECE 581B4.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 527F Biosensing: Biophotonic Sensors Using Refractive Index Credit: 1 (1-0-0)****Also Offered As:** ECE 527F.**Course Description:** Operating principles of optical biosensors based on changes in refractive index, such as thin films, ring-resonators, Mach-Zehnder interferometers, and other evanescent wave sensors. Basic supporting optical concepts, including thin-film interference, optical waveguides and evanescent waves.**Prerequisite:** (BIOM 527F or ECE 527F) and (MATH 340, may be taken concurrently or MATH 345, may be taken concurrently) and (PH 142).**Registration Information:** Junior standing. This is a partial semester course. Credit allowed for only one of the following: BIOM 527F, BIOM 581B6, ECE 527F, or ECE 581B6.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 531 Materials Engineering Credits: 3 (3-0-0)****Also Offered As:** MECH 531.**Course Description:** Selection of structural engineering materials by properties, processing, and economics; materials for biomedical and biotechnology applications.**Prerequisite:** MECH 331 or MECH 431.**Registration Information:** Credit not allowed for both BIOM 531 and MECH 531. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 532 Material Issues in Mechanical Design Credits: 3 (3-0-0)****Also Offered As:** MECH 532.**Course Description:** Failure mechanisms from materials viewpoint with emphasis on use in design. Fracture, creep, fatigue and corrosion.**Prerequisite:** MECH 331.**Registration Information:** Credit not allowed for both BIOM 532 and MECH 532. Sections may be offered: Online.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 533 Biomolecular Tools for Engineers Credits: 3 (2-3-0)****Also Offered As:** CIVE 533.**Course Description:** Theoretical and practical aspects of biomolecular laboratory tools—PCR, cloning, sequencing, single-molecule optical techniques and live-cell imaging.**Prerequisite:** BMS 300 or MIP 300.**Registration Information:** Must register for lecture and laboratory. Credit not allowed for BIOM 533, CIVE 533 and ECE 533.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**BIOM 537 Biomedical Signal Processing Credits: 3 (3-0-0)****Also Offered As:** ECE 537.**Course Description:** Modeling and classification of biosignals (e.g. EEG, ECG, EMG), covering adaptive filtering, wavelets, support vector machines, neural networks, and handling problems with overfitting of noisy data.**Prerequisite:** ECE 303 or ECE 311 or MATH 340 or STAT 303.**Registration Information:** Sections may be offered: Online. Credit not allowed for both BIOM 537 and ECE 537.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 570 Bioengineering Credits: 3 (3-0-0)****Also Offered As:** MECH 570.**Course Description:** Physiological and medical systems analysis using engineering methods including mechanics, fluid dynamics, control electronics, and signal processing.**Prerequisite:** MECH 307 and MECH 324.**Registration Information:** Credit not allowed for both BIOM 570 and MECH 570. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 573 Structure and Function of Biomaterials Credits: 3 (3-0-0)****Also Offered As:** MECH 573.**Course Description:** Structure-function relationships of natural biomaterials; application to analysis of biomimetic materials and biomaterials used in medical devices.**Prerequisite:** MECH 331.**Registration Information:** Credit not allowed for both BIOM 573 and MECH 573. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.

BIOM 574 Bio-Inspired Surfaces Credits: 3 (3-0-0)

Also Offered As: MECH 574.

Course Description: Analysis of surface functionalities of various biological species; identification of design principles.

Prerequisite: MECH 342 and CHEM 111.

Registration Information: Sections may be offered: Online. Credit not allowed for both BIOM 574 and MECH 574.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 576 Quantitative Systems Physiology Credits: 4 (4-0-0)

Also Offered As: MECH 576.

Course Description: Quantitative, model-oriented approach to cellular and systems physiology with design examples from biomedical engineering.

Prerequisite: BMS 300 and CHEM 113 and MATH 340 and PH 142.

Registration Information: Credit not allowed for both BIOM 576 and MECH 576. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 578 Musculoskeletal Biosolid Mechanics Credits: 3 (3-0-0)

Also Offered As: MECH 578.

Course Description: Application of engineering concepts to quantify the mechanical behavior of load-bearing biological tissues and orthopaedic implant performance.

Prerequisite: CIVE 360.

Registration Information: Graduate standing. Credit not allowed for both BIOM 578 and MECH 578.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 579 Cardiovascular Biomechanics Credits: 3 (3-0-0)

Also Offered As: MECH 579.

Course Description: Bio-mechanical principles and approaches applied in cardiovascular research.

Prerequisite: MATH 340 and PH 142.

Restriction: Must be a: Graduate.

Registration Information: Graduate students only. Sections may be offered: Online. Credit allowed for only one of the following: BIOM 579, BIOM 581A8, MECH 579, or MECH 581A8.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 586A Biomedical Clinical Practicum Credits: 2 (1-3-0)

Course Description: Graduate-level activity, such as biomedical research or design of a new medical device, for exposure to the hospital/clinical environment.

Prerequisite: (BMS 300 or BMS 500) and (BIOM 570 or MECH 570).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BIOM 586B Biomedical Clinical Practicum Credits: 4 (1-6-0)

Course Description: Graduate-level activity, such as biomedical research or design of a new medical device, for exposure to the hospital/clinical environment.

Prerequisite: (BMS 300 or BMS 500) and (BIOM 570 or MECH 570).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BIOM 592 Seminar Credits: Var[1-3] (0-0-0)

Course Description: Student and research faculty presentations, guest and invited extramural speakers.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BIOM 671 Orthopedic Tissue Biomechanics Credits: 3 (3-0-0)

Also Offered As: MECH 671.

Course Description: Linear elastic, finite deformation, and viscoelastic theories applied to the mechanical behavior of orthopedic tissues (bone, tendon, cartilage).

Prerequisite: CIVE 560.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both BIOM 671 and MECH 671.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BIOM 684 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Maximum of 6 credits allowed in course; may not be used to satisfy degree requirements requiring bioengineering courses.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BIOM 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BIOM 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BIOM 750 Grant Proposal Writing and Reviewing Credit: 1 (1-0-0)**Course Description:** Preparation and review of applications for fellowships and grants.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Written consent of instructor.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**BIOM 784 Supervised College Teaching Credits: Var[1-6] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BIOM 786 Practicum-Laboratory Rotations Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BIOM 795 Independent Study Credits: Var[1-6] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BIOM 798 Research-Laboratory Rotations Credits: Var[1-6] (0-0-0)****Course Description:** Doctoral laboratory rotation.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BIOM 799 Dissertation Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

Major Completion Map

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry.

To qualify for graduation, students in the biomedical engineering combined with chemical and biological engineering program must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives.

Freshman

Semester 1		Critical	Recommended	AUCC	Credits
BIOM 100	Overview of Biomedical Engineering	X			1

Dual Degree Program: Biomedical Engineering combined with Electrical Engineering, Electrical Engineering Concentration

requires a cumulative grade point average of at least 2.000 in ECE courses as a graduation requirement. It is the responsibility of any student who fails to maintain a 2.000 average to work with their advisor to correct grade point deficiencies. In addition, it is required that students retake any Electrical Engineering course at the 300-level or below in which they receive a grade below a C.

Requirements Effective Fall 2020

In order to maintain professional standards required of practicing engineers, the Department of Electrical and Computer Engineering

¹ Students are required to complete three Career Development Seminars: 1) Resume Writing; 2) Mock Interview or Behavior Based Interviewing; and 3) Using LinkedIn™. Completion of the required workshops may be spread over the student's five-year program.

² CS 163 or CS 164 may be taken as a BME Broad Elective ONLY when not taken to fulfill degree requirements

Major Completion Map

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with chemical and biological engineering program must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives.

The ECE curriculum has been modified as part of the Revolutionizing Engineering Departments initiative (RED). Three threads run through the new curriculum: Foundations, Creativity and Professional Formation of Engineers. This new curriculum incorporates skills that engineers need beyond technical expertise, in areas like communication, ethics, social impact and interaction in large, diverse groups. The ECE department requires that students also complete the following three Career Development Seminars: 1) Resume Writing; 2) Mock Interviewing or Behavior Based Interviewing; and 3) Using LinkedIn™.

In order to maintain professional standards required of practicing engineers, the Department of Electrical and Computer Engineering requires a cumulative grade point average of at least 2.000 in ECE courses as a graduation requirement. It is the responsibility of any student who fails to maintain a 2.000 average to work with their advisor to correct grade point deficiencies. In addition, it is required that students retake any Electrical Engineering course at the 300-level or below in which they receive a grade below a C.

- ¹ Students are required to complete three Career Development Seminars: 1) Resume Writing; 2) Mock Interview or Behavior Based Interviewing; and 3) Using LinkedIn™. Completion of the required workshops may be spread over the student's five-year program.
- ² CS 163 or CS 164 may be taken as a BME Broad Elective ONLY when not taken to fulfill degree requirements

standards. Please see competitive major requirements or the advisor in the department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with chemical and biological engineering program must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives.

In order to maintain professional standards required of practicing engineers, the Department of Electrical and Computer Engineering requires a cumulative grade point average of at least 2.000 in ECE courses as a graduation requirement. It is the responsibility of any student who fails to maintain a 2.000 average to work with their advisor to correct grade point deficiencies. In addition, it is required that students retake any Electrical Engineering course at the 300-level or below in which they receive a grade below a C.

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic

Major Completion Map

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. The biomedical engineering combined with mechanical engineering program has additional admissions requirements and enrollment limits. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with mechanical engineering must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives.

Graduate Certificate in Biomaterials and Tissue Engineering

This certificate will provide biomedical engineering students, engineering professionals, and eligible individuals from other disciplines with specialized training in biomaterials and tissue engineering. Students will understand materials by properties, processing, and economics for biomedical and biotechnology applications. Students will gain knowledge of biomaterials used in medical devices and analyze functionalities of various biological species in tissue engineering and to identify design materials for biological engineering purposes.

Requirements Effective Fall 2020

Additional coursework may be required due to prerequisites.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Science in Bioengineering

The Master of Science in Bioengineering curriculum includes core courses in advanced mathematics and statistics, bioengineering, and biomolecular technology, as well as technical electives chosen from

numerous engineering and life science courses. The curriculum is designed to provide flexibility and support your research specialty. As an M.S. student, you may be involved in the design and regulatory approval of advanced medical technologies, as well as the manufacturing of health care products. Your research will be guided by your advisor and contribute to the knowledge base in the scientific community that will form the basis of your thesis. Funding opportunities are available for Master of Science students.

Strengths of the program include:

- Research leading to major advances in a health care field
- Nationally and internationally recognized faculty from over a dozen departments
- Coverage of regulatory issues and approval processes with animal and human subjects
- Conducting research in state-of-the-art facilities, including the nationally renowned Veterinary Teaching Hospital
- Community of innovators on the cutting edge of research in cancer, orthopaedics, cardiovascular diseases, nanotechnology, biosensors, and more

Specific requirements for the M.S. in Bioengineering

- Minimum of 30 semester credits of graduate work in approved course of study.
- Minimum of 24 semester credits earned at CSU (21 while in the graduate program).
- Minimum of 21 semester credits earned at CSU (not including thesis or independent study credits) in 500-level (or above) regular courses. The preceding list of core courses must be satisfied (15 credits). In addition, at least one life science course (500-level or above) and one engineering course (500-level or above) must be taken (6 credits minimum).
- Thesis credits (a minimum of 6 and a maximum of 12 credits).
- Final thesis defense.

Ph.D in Bioengineering

As a Ph.D. in Bioengineering student, your original research will be guided by your advisor and contribute to the knowledge base in the scientific community. You may be involved in the design and regulatory approval of advanced medical technologies, as well as the manufacturing of health care products. Funding opportunities include research or teaching assistantships and fellowships. Lab rotations, funded as graduate research assistantships, are available for top Ph.D. candidates and offer a one-year opportunity for students to rotate through research labs within the School of Biomedical Engineering to find the ideal match of research project and advisor for their dissertation research.

The Ph.D. curriculum includes core courses in advanced mathematics and statistics, biomedical engineering, and biotechnology, as well as technical electives chosen from numerous engineering and life science courses. The curriculum is designed to provide flexibility and support your research specialty. You will also be required to complete a Ph.D. qualifying process, present your research plan in a preliminary exam, and defend your completed research in a final exam/dissertation defense.

Strengths of the program include the following:

- Opportunities to develop major advances in the health care field
- Nationally and internationally recognized faculty from over a dozen departments
- Practical and academic experience with regulatory issues and approval processes with animal and human subjects
- Conducting research in state-of-the-art facilities, including the nationally renowned Veterinary Teaching Hospital
- Community of innovators on the cutting edge of research in cancer, orthopedics, cardiovascular disease, nanotechnology, biosensors, and more

- Minimum of 32 semester credits earned after admission to CSU.
- 10 credits earned after master's degree is accepted for credit with approval from the student's major advisor, the bioengineering program, and the Graduate School.
- Minimum of 12 semester credits in 500 level (and above) formerly taught courses (not including dissertation and independent study) earned at CSU (post master's degree). The preceding list of core courses must be satisfied (15 credits). In addition, at least two life science courses (500-level or above) and two engineering courses (500-level or above) must be taken (12 credits minimum) as part of their graduate study (either as a master's student or Ph.D. student).
- Successful completion of the qualifying exam.
- Successful completion of the preliminary exam.
- Successful completion of the dissertation defense.

Graduate Graduate Programs in Systems Engineering

The Master of Engineering program produces graduates who can design and manage complex multidisciplinary engineering systems with a rigorous systems engineering approach. The applied focus in courses

builds skills that can be utilized immediately in current projects and prepares students for future career opportunities.

Graduates of the Master of Science program will be capable of designing and managing complex multidisciplinary engineering systems with a rigorous systems engineering approach. The research component of the thesis- and project-based M.S. programs equips students with cutting edge skills in specific focus areas, preparing them for future career opportunities.

The Ph.D. prepares students to become leaders in systems engineering. Throughout the program, students produce significant academic contributions in terms of original research to the field, driving advancements and leading to improvements in energy efficiency, environmental impact, cybersecurity, and economic growth, among other areas of application for systems engineering.

The Doctor of Engineering in Systems Engineering degree will include core studies in systems engineering and its applications to complex systems in a working environment. Curriculum includes professional and applied/translational courses, a systems engineering practicum, and a dissertation to assist working professionals attain a higher level of value to their organizations.

Courses

SYSE 501 Foundations of Systems Engineering Credits: 3 (3-0-0)

Course Description: Functional components of systems engineering, application of systems engineering to practical problems, system life-cycle process.

Prerequisite: None.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ECE 501, ENGR 501, or SYSE 501.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 530 Overview of Systems Engineering Processes Credits: 3 (3-0-0)

Course Description: Systems engineering life-cycle process and analysis techniques. Reliability and robustness.

Prerequisite: ECE 303 or STAT 303 or STAT 315.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ECE 530, ENGR 530, or SYSE 530.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 532 Dynamics of Complex Engineering Systems Credits: 3 (3-0-0) Also Offered As: ECE 532.

Course Description: Higher-level behavior and issues that emerge from interaction between components in complex socio-technical systems.

Prerequisite: ECE 501, may be taken concurrently or ENGR 501, may be taken concurrently or SYSE 501, may be taken concurrently.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ECE 532, ENGR 532, or SYSE 532.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 534 Human Systems Integration Credits: 3 (3-0-0)

Course Description: Evaluation of human capabilities and limitations when designing and evaluating complex systems in order to enhance safety, efficiency, usability, and reduce life cycle costs.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Sections may be offered: Face-to-Face, Online, or Mixed Face-to-Face. Credit not allowed for both ENGR 581A4 and SYSE 534.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 567 Systems Engineering Architecture Credits: 3 (3-0-0)

Course Description: Observation/classification of systems architecture. Systems architecture principles and critical evaluation through design studies.

Prerequisite: None.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ECE 567, ENGR 567, or SYSE 567.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 569 Cybersecurity Awareness for Systems Engineers Credits: 3 (3-0-0)

Course Description: Cybersecurity principles, practices, technologies, design approaches, and terminology needed to incorporate cybersecurity principles into effective systems designs.

Prerequisite: ENGR 501 or SYSE 501.

Registration Information: Bachelor's degree required. Sections may be offered: Online. Credit allowed for only one of the following: ENGR 569, ENGR 580A4, or SYSE 569.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 571 Analytics in Systems Engineering Credits: 3 (3-0-0)

Course Description: Focus on the appropriate application of data mining, knowledge generation, data analytics and data algorithmics to large complex systems. Demystify "big data" for systems engineers as applied to intelligent systems.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Sections may be offered: Face-to-Face, Mixed Face-to-Face, or Online. Credit not allowed for both ENGR 571 and SYSE 571.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 573 Cost Optimization for Systems Engineers Credits: 3 (3-0-0)

Course Description: Techniques and strategies to respond to requirements, design, development and manufacturing decisions, while optimizing for cost at the organizational, program, and project level.

Prerequisite: ENGR 502 and ENGR 531.

Restriction: Must be a: Graduate.

Registration Information: Sections may be offered: Face-to-Face, Online, or Mixed Face-to-Face. Credit not allowed for both ENGR 581A3 and SYSE 573.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 596 Group Study-Systems Engineering Skills Credits:

Var[1-2] (0-0-0)

Course Description: Topics related to building specialized skills relevant for the systems engineering field.

Prerequisite: None.

Registration Information: Bachelor's degree required. Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 597 Group Study in Systems Engineering Credits: 3 (0-0-3)

Course Description: Special and contemporary topics in the field of systems engineering.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 602 Systems Requirements Engineering Credits: 3 (3-0-0)

Course Description: Introduction to the rigorous requirements process within systems engineering, including system requirements analysis, requirements decomposition, allocation, tracking, verification, and validation.

Prerequisite: (ENGR 501 or SYSE 501) and (ENGR 530 or SYSE 530).

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ENGR 602, ENGR 680A2, or SYSE 602.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 603 Introduction to Systems Test and Evaluation Credits: 3 (3-0-0)

Course Description: Test and evaluation of systems at both the component and systems levels to provide insights into how systems succeed or fail based on test methodologies.

Prerequisite: ENGR 502 and ENGR 531.

Restriction: Must be a: Graduate, Professional.

Registration Information: Bachelor's degree required. Sections may be offered: Face-to-Face, Mixed Face-to-Face, or Online. Credit allowed for only one of the following: ENGR 603, ENGR 680A3, or SYSE 603.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 667 Advanced Model-Based Systems Engineering Credits: 3 (3-0-0)

Course Description: Theory and application of formal systems architecture modeling.

Prerequisite: ENGR 501 or SYSE 501.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online. Credit not allowed for both ENGR 567 or SYSE 567.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

SYSE 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

SYSE 710 Leadership/Innovation in Systems Engineering Credits: 3 (3-0-0)

Course Description: Background in technical leadership skill sets, systems engineering skillsets, and intellectual toolkit to develop a successful applied and translational research project/practicum.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Bachelor's degree required. Sections may be offered: Online. Course is not available for credit toward the PhD in Systems Engineering. Credit not allowed for both ENGR 710 and SYSE 710.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SYSE 711 Ethics in Systems Engineering Credit: 1 (0-0-1)

Course Description: Ethical principles and their application to systems engineering.

Prerequisite: ENGR 501 or SYSE 501.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only. Credit not allowed for both ENGR 711 and SYSE 711.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Master of Science in Systems Engineering

Graduates of the Master of Science in Systems Engineering will be capable of designing and managing complex multidisciplinary engineering systems with a rigorous systems engineering approach. The research component of the thesis- and project-based M.S. programs equip students with cutting edge skills in specific focus areas, preparing them for future career opportunities.

A minimum of 72 credits are required to complete this program.

Ph.D in Systems Engineering

The Ph.D. in Systems Engineering prepares students to become leaders in systems engineering. Throughout the program, students produce significant academic contributions, in terms of original research, to the field. These contributions will drive advancements and lead to improvements in energy efficiency, environmental impact, cybersecurity, and economic growth, among other areas of application for systems engineering.

Graduate Certificate in Systems Engineering Practice

The Graduate Certificate in Systems Engineering Practice will give students an introduction to systems engineering concepts and practices

with coursework that instills the key core competencies and skills needed to practice as a systems engineer. This certificate prepares engineers or other professionals in aerospace technology, energy, biosciences, environmental resources, and other fields to lead systems engineering development from concept creation through the system lifecycle.

College Programs

The College of Health and Human Sciences (<https://www.chhs.colostate.edu/>) comprises six academic departments and two schools. It is human-centered, with a focus on educating students for people-oriented professions and on applying creative, interdisciplinary research to solve social problems. Each of its units offers professional education for careers and for lifelong learning, through a solid grounding in the natural sciences, social sciences, and humanities as well as courses specific to each field of study. The College currently includes the Departments of Construction Management, Design and Merchandising, Food Science and Human Nutrition, Health and Exercise Science, Human Development and Family Studies, and Occupational Therapy. It also includes the Schools of Education and Social Work.

Learning within the College takes place in a variety of settings on and off-campus, forging strong links between the classroom and the workplace. All of the College's programs combine classroom instruction with hands-on experience in state-of-the-art computer laboratories, research laboratories, or specialized centers and institutes that emphasize the practical application of new knowledge.

Faculty in the College of Health and Human Sciences maintain valued and useful relationships with a broad range of constituents, enhancing College visibility within the larger community, fulfilling CSU's land-grant mission. These vital connections also provide students with excellent opportunities for working internships in their fields. For all its students,

the College places a strong emphasis on experiential learning and leadership opportunities that allow students to test new skills in real-world settings. Numerous scholarships (<https://www.chhs.colostate.edu/academics/scholarships/>) are available through the College of Health and Human Sciences each spring semester.

Minor in Design Thinking

The Minor in Design Thinking provides students with an opportunity to develop creative methods and processes for solving societal problems. This human-centered approach engages users and stakeholders in interdisciplinary co-design processes and applies elementary or emerging technologies to develop prototypes that improve spaces, objects, services, problems and ideas benefitting daily experiences and overall quality of life. Students will gain an awareness of the impact of design thinking and its application – to their major, discipline, or profession.

Requirements Effective Fall 2020

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Certificate in Design Thinking

Open to all undergraduate students, the Certificate in Design Thinking will improve not only the way students learn and find solutions to problems in their current coursework, but will also help make students more employable with sought-after marketable skills. Students will gain an awareness of the impact of design thinking and its application – regardless of discipline, profession, or major.

Department of Construction Management

Office in Guggenheim Hall, Room 102
(970) 491-7353

<https://www.chhs.colostate.edu/cm> (<https://www.chhs.colostate.edu/cm/>)

The Construction Management (CM) program at CSU is one of the top-ranked programs in the nation. Since its inception in 1946, more than 5,000 students have graduated, many of them going on to become leaders in their field. The program is accredited by the American Council for Construction Education.

Construction management is the overall planning, coordination, and control of a project from inception to completion. The CM major addresses issues related to the management of multiple project sites and the applications of resource management, schedule control, cost control, design, and other requirements of the construction process. Design elements concentrate on the relationship between the built environment and the comfort of its inhabitants while safety education emphasizes the health of the individual worker.

Undergraduate Program

A major in Construction Management provides a strong foundation for professional careers in the construction industry. The curriculum integrates technology and innovative management systems with the basics of civil engineering, business and management, and the communication skills required to be successful in today's world. Coursework includes construction methods, estimating, scheduling, computer technologies, architectural principles, fundamentals of management and law, steel and concrete structures, and soils. The curriculum incorporates hands-on labs for most courses. This diverse program creates a broad range of career options for graduates.

Graduate Program

The Department of Construction Management offers graduate study leading to the Master of Science degree. The focus of the department is on professional programs that successfully combine theory and application with a strong emphasis in applied management. The master's program is an advanced curriculum designed to allow students to tailor a portion of the specialization requirements to meet individual interests and goals.

Graduate Graduate Programs in Construction Management

The Department of Construction Management offers graduate study leading to the Master of Science degree. The focus of the department is on professional programs that successfully combine theory and application with a strong emphasis in applied management. The master's program is an advanced curriculum designed to allow students to tailor a portion of the specialization requirements to meet individual interests and goals.

Each program can be individually tailored to meet the needs and interests of the student.

Courses

Construction Management (CON)

CON 101 Introduction to Construction Management Credits: 3 (3-0-0)

Course Description: Introduction to the construction industry; including methods, practices, trends, careers, and constituencies involved in the design and construction process.

Prerequisite: None.

Registration Information: Pre-Construction Management Majors and Construction Management Majors and Minors Only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 131 Graphic Communications for Construction Credits: 2 (0-4-0)

Course Description: Reading technical drawings, 2D/3D visualization, manual drafting techniques, introduction to design software applications.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 151 Construction Materials and Methods Credits: 3 (3-0-0)

Course Description: Materials and methods utilized in the construction of the built environment.

Prerequisite: None.

Registration Information: Agricultural Education, Interior Architecture and Design, Pre-Interior Architecture and Design majors, and Construction Management majors and minors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 192 Construction Management Seminar Credit: 1 (0-0-1)

Course Description: Introduction to the construction management major, career paths, industry sectors, campus resources, and tools for academic success. Information and skills necessary to succeed in the construction management major.

Prerequisite: CON 101.

Registration Information: Construction management majors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 251 Materials Testing and Processing Credits: 2 (1-2-0)

Course Description: Testing of construction materials for standards and quality. Conduct material tests, document and interpret results.

Prerequisite: CON 151 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Construction Management Majors Only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CON 253 Surveying and Construction Layout Credits: 2 (0-2-1)

Course Description: Surveying fundamentals related to construction: project layout, measurement procedures, vertical controls, line and grade, and surveying instrument operation.

Prerequisite: (CON 131 with a minimum grade of C) and (MATH 125 or MATH 160).

Registration Information: Construction management, environmental horticulture, and landscape architecture majors only. Must register for laboratory and recitation. Credit not allowed for both CON 253 and CON 261.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CON 261 Construction Surveying Credits: 3 (2-3-0)

Course Description: Surveying fundamentals related to construction: building layout, measurement procedures, vertical controls, line and grade, and surveying instrument operation.

Prerequisite: (CON 131 with a minimum grade of C or INTD 166) and (MATH 125 or MATH 160).

Registration Information: Must register for lecture and laboratory. Construction management, environmental horticulture, and landscape architecture majors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 265 Plan Reading and Quantity Survey Credits: 3 (2-2-0)

Course Description: Practice in construction document reading, interpretation and analysis for quantity surveying and material quantity organizing using industry-recognized methods including, but not limited to, a project manual-based work breakdown structure.

Prerequisite: CON 131 with a minimum grade of C and CON 151 with a minimum grade of C.

Registration Information: Construction management majors and minors only. Must register for lecture and laboratory. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 267 Construction Management Pre-Internship Credit: 1 (0-0-1)

Course Description: Skills and concepts related to successful internships within the construction management industry.

Prerequisite: CON 265 with a minimum grade of C.

Registration Information: Construction Management Majors Only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 270 Introduction to Road Construction Credits: 3 (3-0-0)

Course Description: Steps necessary to construct a paved roadway from conception, land acquisition and finance through paving operations and trafficking.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CON 317 Safety Management Credits: 2 (2-0-0)

Course Description: Construction safety management, accident prevention, and hazard control. Federal, state, and local regulation compliance.

Prerequisite: None.

Registration Information: Construction Management majors and minors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 350A Study Abroad--Construction Management: European Perspectives Credits: 3 (0-0-3)

Course Description: A study of the physical resources and the human behaviors, which inform design and construction. Exploration of infrastructure and its relationship to resources, materials, and the culture in which it exists. Review of international perspectives of the built environment of Europe, past and present trends, and what the future holds. Survey of construction over time and trends in the preservation of existing infrastructure.

Prerequisite: None.

Registration Information: Sophomore standing. This is a partial semester course. Required field trips.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CON 351 Construction Field Management Credits: 2 (1-2-0)

Course Description: Applications of materials and methods in construction; administrative and organizational planning for construction field practice.

Prerequisite: CON 251, may be taken concurrently and CON 317, may be taken concurrently.

Registration Information: Must register for lecture and laboratory. Construction management majors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CON 352 Metal Fabrication for Construction Credits: 2 (1-2-0)

Course Description: Shaping, cutting, and joining of structural and non-structural metal. Emphasis on jobsite safety, economics, and efficiency.

Prerequisite: CON 251.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CON 353 Field Management for Construction Credits: 3 (1-2-1)

Course Description: Applications of materials and methods in construction; administrative and organizational planning for construction field practice.

Prerequisite: (CON 251, may be taken concurrently) and (CON 253 or CON 261) and (CON 317, may be taken concurrently).

Registration Information: Construction management majors only.

Must register for lecture, lab, and recitation. Credit not allowed for both CON 351 and CON 353.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CON 358 Structural Systems for Construction I Credits: 3 (3-0-0)

Course Description: Behavior of structural components and systems, overview of structural engineering analysis and the design process for construction.

Prerequisite: (CON 151 with a minimum grade of C) and (MATH 125).

Registration Information: Construction management majors only. Credit not allowed for CON 358 and CON 359.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 359 Structures I Credits: 4 (4-0-0)

Course Description: Behavior of structural components and systems, overview of structural engineering analysis and the design process.

Prerequisite: (CON 151 with a minimum grade of C) and (MATH 125).

Registration Information: Construction management majors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 360 Electrical Systems in Construction Credits: 3 (2-2-0)

Course Description: Electrical terminology, theory, components, systems, and applications within the construction industry.

Prerequisite: CON 265 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory.

Construction Management Majors Only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 365 Construction Estimating Credits: 3 (2-2-0)

Course Description: Industry-recognized methods for work item analysis, quantity surveying, resource estimating, and bid development using a work breakdown structure.

Prerequisite: CON 265 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory.

Construction Management majors and minors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 366 Construction Equipment and Methods Credits: 3 (2-2-0)

Course Description: Equipment and methods used in heavy-highway, heavy-civil and utility construction. Equipment and crew productivity. Equipment ownership and operating costs. Estimating, planning and directing heavy construction operations.

Prerequisite: CON 265 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory.

Construction Management majors and minors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 367 Construction Contracts/Project Administration Credits: 3 (3-0-0)

Course Description: Construction contracts and clauses, stakeholder responsibilities, disputes, resolution methods and risk. Utilization of construction administration documents, systems and procedures to meet project requirements.

Prerequisite: CON 351, may be taken concurrently or CON 353, may be taken concurrently.

Registration Information: Construction management majors and minors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 370 Asphalt Pavement Materials and Construction Credits: 3 (2-2-0)

Course Description: Constituents of asphalt pavements; manufacture of asphalt cement, emulsions, and cutbacks; material properties and behavior.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 371 Mechanical and Plumbing Systems Credits: 3 (3-0-0)

Course Description: Heating, ventilation, air conditioning, plumbing, and fire suppression in the built environment.

Prerequisite: CON 360, may be taken concurrently or INTD 276, may be taken concurrently.

Registration Information: Interior Design and Construction Management Majors Only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 382A Study Abroad: European Perspectives Credits: 3 (0-0-3)

Course Description: A study of the physical resources and the human behaviors, which inform design and construction. Exploration of infrastructure and its relationship to resources, materials, and the culture in which it exists. Review of international perspectives of the built environment of Europe, past and present trends, and what the future holds. CON 512 Post-Award Construction Management Credits: 3 (2-0-1)

Course Description: Advanced topics related to post-award construction management issues with a focus on multiple project controls and project risk management.

Prerequisite: CON 461.

Registration Information: Must register for lecture and recitation. Credit not allowed for both CON 512 and CON 560.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 521 Sustainable Building & Infrastructure Systems Credits: 3 (2-0-1)

Course Description: Issues and state-of-the-art resources needed to construct, remodel/retrofit, operate and maintain the built environment (buildings and infrastructure). Specifically, resources will include major materials, components and technologies, as well as energy and water resources are needed in the different life-cycle phases of the building or infrastructure project.

Prerequisite: None.

Registration Information: Must register for lecture and recitation. Credit not allowed for both CON 521 and CON 576.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 561 Applied Productivity Improvement Credits: 3 (3-0-0)

Course Description: Existing and emerging tools for productivity enhancement in project and production environment.

Prerequisite: None.

Registration Information: Admission to the construction management master's program.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 565 Legal Aspects of Construction Process Credits: 3 (3-0-0)

Course Description: Common points of dispute; methods of avoiding disputes among owner, architect, engineer, and contractor.

Prerequisite: None.

Registration Information: Admission to the construction management master's program.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 568 Construction Industry Institute Practices Credits: 3 (3-0-0)

Course Description: Senior executives from the Construction Industry Institute (CII) present best practices developed by CII over the last 25 years.

Prerequisite: CON 367.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CON 569 Regulatory Impact on Construction Credits: 3 (3-0-0)

Course Description: Role government plays in the design and construction of the built environment.

Prerequisite: None.

Registration Information: Admission to the construction management master's program.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CON 571 Facility Planning and Management Credits: 3 (3-0-0)

Course Description: Planning, organizing and managing large educational and/or commercial facilities.

Prerequisite: None.

Registration Information: Admission to the construction management master's program.

Term Offered: Spring.

Grade Mode: Traditional.

Major in Construction Management

The Construction Management major at CSU is one of the top-ranked programs in the nation. Since its inception in 1946, more than 5,000 students have graduated, many of them going on to become leaders in their field. The program is accredited by the American Council for Construction Education.

Construction management is the overall planning, coordination, and control of a project from inception to completion. The Construction Management major addresses issues related to the management of multiple project sites and the applications of resource management, schedule control, cost control, design, and other requirements of the construction process. Design elements concentrate on the relationship between the built environment and the comfort of its inhabitants while safety education emphasizes the health of the individual worker.

A Construction Management major provides a strong foundation for professional careers in the construction industry. The curriculum integrates technology and innovative management systems with the basics of civil engineering, business and management, and the communication skills required to be successful in today's world. Coursework includes construction methods, estimating, scheduling, computer technologies, architectural principles, fundamentals of management and law, steel and concrete structures, and soils. The curriculum incorporates hands-on labs for most courses. This diverse program creates a broad range of career options for graduates.

The Construction Management major is controlled, and all students admitted to CSU or seeking to change their major must first be designated as pre-construction management. The entrance criteria for the Construction Management major are:

- Complete a minimum of 15 credits at CSU
- Earn a minimum 2.750 cumulative CSU GPA
- Complete CON 101 with a "B" grade or better
- Complete CO 150 with a "B" grade or better
- Complete MATH 125 with a "C" grade or better

Once a student has met the minimum requirements listed above they are eligible to apply to the Construction Management program.

During their academic career, Construction Management students are required to obtain an internship (full-time structured work experience) position with any one of a variety of construction companies and organizations. Our Phelps Placement Office assists current and graduating students, as well as alumni.

Learning Outcomes

Students will develop and demonstrate:

- Professional, analytical, and problem-solving skills related to the career requirements in construction management

- Strong professional communication skills with an emphasis on written, graphic, and verbal skills related to the career requirements in construction management
- Technical proficiency in the following construction management areas: design/engineering, management, materials, methods, estimating, scheduling, safety, surveying, and project administration

The Construction Management undergraduate program is accredited by the American Council for Construction Education (ACCE) and satisfies the requirements of ACCE's mandated Student Learning Outcomes (SLO) as listed below:

1. Create written communications appropriate to the construction discipline.
2. Create oral presentations appropriate to the construction discipline.
3. Create a construction project safety plan.
4. Create construction project cost estimates.
5. Create construction project schedules.
6. Analyze professional decisions based on ethical principles.
7. Analyze construction documents for the planning and management of construction processes.
8. Analyze the methods, materials, and equipment used to construct projects.
9. Apply construction management skills as a member of a multidisciplinary team.
10. Apply electronic-based technology to manage the construction process.
11. Apply basic surveying techniques for construction layout and control.
12. Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
13. Understand construction risk management.
14. Understand construction accounting and cost control.
15. Understand construction quality assurance and control.
16. Understand construction project control processes.
17. Understand the legal implications of the contract, common, and regulatory law to manage a construction project.
18. Understand the basic principles of sustainable construction.
19. Understand the basic principles of structural behavior.
20. Understand the basic principles of mechanical, electrical and piping systems.

Potential Occupations

The construction industry has become a highly technical industry marked by continuous and dramatic change. There is a continued demand for capable and highly trained construction management professionals who can adapt and become effective leaders in the field.

The Construction Management department prides itself on its in-house intern and job search assistance and counseling. Construction Management continues to boast one of the highest placement rates and entry-level salaries of all majors.

Services provided by the Phelps Placement Office include:

- Construction industry career fair hosted each semester
- On-campus interviews and information sessions
- Individual career counseling and assessment
- Job and internship search strategies

- Resume and business correspondence resources
- Year-round intern and job postings

Entry-level occupations include, but are not limited to: field engineer, assistant estimator, project scheduler, cost control engineer, safety engineer, project supervisor, project coordinator, quality assurance specialist, project engineer, assistant project manager, and assistant superintendent. Recruiting Industries include Commercial, Heavy Civil and Heavy Highway, Industrial and Utility, Mechanical and Electrical, Project Controls and Consulting, Residential Development, Specialty Contracting, and Transportation.

Students may consider simultaneously completing the requirements for a minor in Business Administration. Several of the courses required for the minor in Business Administration are also required for the major in Construction Management curriculum.

Requirements Effective Fall 2019

Every student pursuing the Construction Management (CM) major will start as Pre-Construction Management and must meet the following admission requirements before being fully admitted to the Construction Management major:

- Earn a minimum 2.750 cumulative CSU GPA
- Complete CON 101 , Introduction to Construction Management, with a "B" grade or better
- Complete CO 150, College Composition, with a "B" grade or better
- Complete MATH 125, Numerical Trigonometry, with a "C" grade or better

Besides CON 101, Pre-Construction Management students are not able to take CON courses until fully admitted to Construction Management.

Master of Science in Construction Management, Plan A

The Department of Construction Management (<https://www.chhs.colostate.edu/cm/>) offers graduate study leading to the Master of Science degree. The graduate program provides an environment that supports graduate students in their development of knowledge necessary to enhance professional practice and apply research to management decisions that impact organizations in an emerging global economy. The master's program is an advanced curriculum designed to allow students to tailor a portion of the requirements to meet individual interests and goals.

The Department of Construction Management at CSU is a Science, Technology, Engineering, and Mathematics (STEM) program.

Our faculty members pursue applied research opportunities by maintaining a close association with the needs of the regional, national, and global Architecture/Engineering/Construction industry. In pursuing this applied research, the faculty has identified core research areas that span research, teaching, and outreach activities and provide a common ground for interaction between faculty and students. As the demands of the industry change over time, these research areas may evolve and additional areas may be established.

Current research areas include:

- Construction Education and Workforce Development
- Construction Technology
- Infrastructure Systems
- Project Delivery and Management
- Sustainability and Resilience

The learning outcomes of this program are:

1. Students will identify research problem(s), develop research question(s), design research methodologies, collect and analyze data, and interpret research results as components of scientific research.
2. Students will develop critical thinking skills needed to conceive, develop, test, and refine scientific ideas and hypotheses.
3. Students will communicate the results of their original research in a clear and well-organized manner both in written (proposal and thesis) and verbal (thesis and oral defense) format.
4. Students will write manuscript(s) for submission to a refereed scientific journal or a conference based on their research.
5. Students will develop expertise in one or more fields of construction management at which the student can successfully function in the profession (either academia or industry).

Each construction management graduate student must complete a final project of professional quality to demonstrate their capability in their area of interest and their readiness for professional practice. The final research project is original work, involving a substantial degree of independent research and analysis. The research project results are presented as either a Thesis (Plan A) or Professional Research Paper (Plan B). Each student will work with their advisor to determine if a thesis or a professional paper is more appropriate. Each graduate student is required to submit an article to a journal or proceedings approved by the adviser prior to graduation.

The goal of the program is to provide graduate students with skills related to advance construction management problem-solving. To attain this goal, the CM department encourages students to perform applied research that is industry, institutional, or "client" based.

Master of Science in Construction Management, Plan B

The Department of Construction Management (<https://www.chhs.colostate.edu/cm/>) offers graduate study leading to the Master of Science degree. The graduate program provides an environment that supports graduate students in their development of knowledge necessary to enhance professional practice and apply research to management decisions that impact organizations in an emerging global economy. The master's program is an advanced curriculum designed to allow students to tailor a portion of the requirements to meet individual interests and goals.

The Department of Construction Management at CSU is a Science, Technology, Engineering, and Mathematics (STEM) program.

Our faculty members pursue applied research opportunities by maintaining a close association with the needs of the regional, national, and global Architecture/Engineering/Construction industry. In pursuing this applied research, the faculty has identified core research areas that span research, teaching, and outreach activities and provide a common ground for interaction between faculty and students. As the demands of the industry change over time, these research areas may evolve and additional areas may be established.

Current research areas include:

- Construction Education and Workforce Development
- Construction Technology

- Infrastructure Systems
- Project Delivery and Management
- Sustainability and Resilience

The learning outcomes of this program are:

1. Students will identify research problem(s), develop research question(s), design research methodologies, collect and analyze data, and interpret research results as components of scientific research.
2. Students will develop critical thinking skills needed to conceive, develop, test, and refine scientific ideas and hypotheses.
3. Students will communicate the results of their original research in a clear and well-organized manner both in written (proposal and professional paper) and verbal (professional paper and oral defense) format.
4. Students will write manuscript(s) for submission to a refereed scientific journal or a conference based on their research.
5. Students will develop expertise in one or more fields of construction management at which the student can successfully function in the profession (either academia or industry).

Each construction management graduate student must complete a final project of professional quality to demonstrate their capability in their area of interest and readiness for professional practice. The final research project is original work, involving a substantial degree of independent research and analysis. The research project results are presented as either a Thesis (Plan A) or Professional Research Paper (Plan B). Each student will work with their advisor to determine if a thesis or a professional paper is more appropriate. Each graduate student is required to submit an article to a journal or proceedings approved by the advisor prior to graduation.

Students who want to develop technical proficiency in a particular area or emphasis may choose Plan B. Professional research paper is not held to the same standards for replicability of the research methodology used for a thesis. Results from a professional paper may be directed toward providing a solution to a specific applied problem for a small audience. There is an expectation that the professional paper could still be published, but the outlets would likely be different than those of a thesis. A minimum of 30 upper-division credits are required for Plan B students.

The goal of the program is to provide graduate students with skills related to advance construction management problem-solving. To attain this goal, the CM department encourages students to perform applied research that is industry, institutional, or “client” based.

Minor in Construction Management

About the Minor

The Construction Management minor is designed to provide students an opportunity to study basic concepts of construction, materials, techniques, design, and managerial skills required for the construction industry. The minor has entrance criteria and consists of nine courses beginning with CON 101. The minor will take students a minimum of five semesters to complete.

How to add the Construction Management minor

Students must meet with a Construction Management advisor to declare interest in the minor and will be given an override to register for CON 101. An application must be completed to declare the minor. Once a student satisfies the entrance criteria, the minor will be added and the student will be allowed to register for additional required Construction Management courses. Students are admitted each semester in May and December.

Entrance Criteria:

- Earn a minimum 2.750 cumulative CSU GPA
- Complete CON 101 with a “B” grade or better
- Complete CO 150 with a “B” grade or better
- Complete MATH 125 with a “C” grade or better

Learn more about the Construction Management minor on the Department of Construction Management website (<https://www.chhs.colostate.edu/cm/programs-and-degrees/minor-in-construction-management/>).

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Professor Karen Hyllegard, Chair

Mission Statement

An ongoing commitment to cultivating innovative and socially responsible solutions to local and global human-centered opportunities and challenges in apparel and merchandising and interior architecture and design by:

1. Developing creative and viable solutions that positively impact the quality of life for diverse stakeholders.
2. Addressing and communicating future societal needs by analyzing historic and current needs, as well as considering national and international perspectives.
3. Incorporating a pragmatic and socially responsible approach to teaching, research, and engagement.
4. Applying technology in pursuit of creative human-centered solutions to societal needs.
5. Designing, producing, and marketing industry-relevant products and services for diverse populations.
6. Balancing ethical and profitable product and service life-cycle management.

7. Enhancing students' preparedness through experiential, collaborative, community, and industry-based learning.
8. Fostering students' intellectual curiosity, objectivity, and independence, as well as their ability to critically evaluate information and to use resources in addressing problems.
9. Advancing interdisciplinary and global perspectives.
10. Maximizing business, cultural, and socially responsible opportunities enhancing and highlighting the principles of design.

Graduate Graduate Programs in Design and Merchandising

The department offers graduate programs leading to a Master of Science degree in Design and Merchandising. Students may specialize in Apparel and Merchandising or Interior Design. For more information about program emphases and requirements, contact the department. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Design and Merchandising (<http://www.dm.chhs.colostate.edu/>).

Learning Outcomes

Design and Merchandising graduate students will:

- Demonstrate mastery of design and merchandising concepts and theories in their respective focal areas, including apparel design and production, consumer behavior, creativity, merchandising, interior design, product development, social/cultural/historical aspects of dress and design, sustainability/resilience, and textile science.
- Critically review and interpret research through a review of literature relevant to a research problem or challenge.
- Demonstrate an understanding of how to conduct and implement original research in design and merchandising as demonstrated through problem identification, literature review, study design, data collection, and data analysis/interpretation.
- Effectively communicate outcomes of design and merchandising research in diverse presentation formats (e.g., oral, written, visual).
- Be successful in procuring positions in industry or academia and/or admission to doctoral-level programs.
- Be involved in co-curricular activities.

Courses

Subjects in this department include: Apparel and Merchandising (AM), Design and Merchandising (DM), and Interior Design (INTD).

Apparel and Merchandising (AM)

AM 101 Fashion Industries Credits: 3 (3-0-0)

Course Description: Development, organization, and trends of domestic and foreign fashion industries.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

AM 110 Apparel and Merchandising Digital Technology Credits: 3 (2-2-0)

Course Description: Introduction to computer technologies used in apparel and merchandising industries.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 130 Awareness and Appreciation of Design Credits: 3 (3-0-0)

Course Description: Awareness and appreciation of design as it exists in the context of everyday life and is expressive of cultural character and human creativity. Awareness and appreciation of design comes as a natural consequence of learning how to recognize and interpret the elements from which it is created.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Arts & Humanities 3B.

AM 143 Introduction to Apparel Design Credits: 4 (2-4-0)

Course Description: Apparel and garment-pattern development, construction, quality, skill development in technical drawing and rendering.

Prerequisite: None.

Registration Information: Acceptance into Apparel Design and Production program concentration required. Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 240 Computer-Aided Apparel Design Credits: 3 (0-6-0)

Course Description: Apparel design using the computer to generate drawings for fabric, graphic logo, and apparel.

Prerequisite: AM 143.

Registration Information: Portfolio review required.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 241 Patternmaking I - Flat Pattern Credits: 3 (1-4-0)

Course Description: Application of patternmaking techniques including sloper drafting and flat pattern manipulation methods for apparel products. Design and construction of original garments using flat pattern manipulation methods to analyze garment fit.

Prerequisite: (AM 143) and (MATH 117) and (MATH 118).

Registration Information: Sophomore standing. Portfolio review required. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 243 Adobe Photoshop for Textile Design Credits: 3 (3-0-0)

Course Description: Textile design using Adobe Photoshop to generate drawings for surface and structural textile design.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

AM 244 Fashion Illustration Credits: 3 (1-4-0)

Course Description: Illustration skills using traditional media/computer aided design applications and analysis of visual communication.

Prerequisite: AM 143 and AM 110.

Registration Information: Sophomore standing. Portfolio review required. Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 250 Clothing, Adornment and Human Behavior (GT-SS3) Credits: 3 (3-0-0)

Course Description: Psychological, sociological and cultural factors influencing clothing and adornment.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Diversity & Global Awareness 3E, Human Behavior, Culture, or Social Frameworks (GT-SS3).

AM 270 Merchandising Processes Credits: 3 (3-0-0)

Course Description: Forecasting, planning, developing, and presenting merchandise lines to meet target market demands.

Prerequisite: (AM 101 with a minimum grade of C and AM 130 with a minimum grade of C) and (MATH 118 and MATH 117 or MATH 141).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 275 Product Development I Credits: 3 (3-0-0)

Course Description: Fundamental techniques and skills applied to the development of apparel and textile products.

Prerequisite: (AM 101 with a minimum grade of C and AM 110 and AM 130 with a minimum grade of C) and (MATH 117 and MATH 118 or MATH 141).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 290 Workshop Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

AM 321 Advanced Textiles Credits: 3 (3-0-0)

Course Description: Textile product serviceability; effect of fiber structure on properties and performance; new developments.

Prerequisite: DM 120.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 330 Global Sourcing of Textiles and Apparel Credits: 3 (3-0-0)

Course Description: Structure of textiles and apparel industry; global sourcing, production, distribution and consumption of textile and apparel products. Implications for sustainability in the textiles and apparel industry.

Prerequisite: (AM 270 with a minimum grade of C) and (AREC 202 with a minimum grade of C or ECON 202 with a minimum grade of C).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

AM 335 Textiles and Apparel Supply Chains Credits: 3 (3-0-0)

Course Description: Managing the flow of materials, information, and finances as they move in a process from supplier to retailers and consumers in a global environment.

Prerequisite: AM 270.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 340 Patternmaking II - Draping Credits: 3 (0-6-0)

Course Description: Apparel designing through basic draping techniques.

Prerequisite: AM 241 with a minimum grade of C.

Registration Information: Sophomore standing.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 341 Patternmaking III - Computer-Aided Design Credits: 3 (1-4-0)

Course Description: Computer-aided design (CAD) technology used in apparel sketching, pattern drafting, grading, and marker making.

Prerequisite: AM 340 with a minimum grade of C.

Registration Information: Sophomore standing. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 342 Computer-Aided Textile Design Credits: 3 (2-2-0)

Course Description: Ethnic textile design traditions and current approaches to textile production in industry and in individual design studios; computer-aided technology and multicultural research used to create repeat, knit, and woven textile designs.

Prerequisite: AM 110.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 344 Adobe Illustrator for Apparel Design Credits: 3 (0-0-3)

Course Description: Apparel design using Adobe Illustrator to generate drawings for garment technical sketching, fashion illustration, and graphic logos.

Prerequisite: AM 243, may be taken concurrently.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

AM 346 Apparel Line Concept Development and Planning Credits: 3 (2-2-0)

Course Description: Use of computer-aided design software to transfer apparel design concepts to garment pattern completion. Develop ideation sketches, fashion illustrations, technical flat drawings, and garment patterns for an original design line.

Prerequisite: AM 244 and AM 340, may be taken concurrently and AM 341, may be taken concurrently and DM 272 with a minimum grade of C.

Restriction: .

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 363 Historic Costume Credits: 3 (3-0-0)

Course Description: Influence of social, political, and economic conditions on costume of predynastic Egypt to present time.

Prerequisite: None.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 364 History of Fashion Designers/Manufacturers Credits: 3 (0-0-3)

Course Description: Fashion designers and manufacturers who established the field and their contemporaries.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

AM 366 Merchandising Promotion Credits: 3 (3-0-0)

Course Description: Activities used to influence sale of merchandise and services; to promote trends and ideas.

Prerequisite: (AM 270 or MKT 300 or MKT 305) and (DM 272).

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

AM 371 Merchandise Planning and Control Credits: 4 (3-2-0)

Course Description: Retail mathematics for negotiating merchandise acquisition, distribution, and pricing for profitability.

Prerequisite: (ACT 205 or ACT 210) and (AM 270 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 373 Apparel Design and Retail Entrepreneurship Credits: 3 (3-0-0)

Course Description: Entrepreneurship opportunities relative to apparel design, product development, and merchandising; development of understanding to initiate an apparel products and/or services business.

Prerequisite: AM 270 and ECON 202.

Registration Information: Junior standing. Required field trips. Credit not allowed for both AM 373 and DM 380A1.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

AM 375 Product Development II Credits: 3 (2-2-0)

Course Description: Product design and development for apparel and other soft goods through industry-driven projects.

Prerequisite: DM 272 with a minimum grade of C and AM 270 with a minimum grade of C and AM 275.

Registration Information: Must register for lecture and lab. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 384 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

AM 421 Textiles Product Quality Assessment Credits: 3 (2-2-0)

Course Description: Role of quality assurance in product development, production, performance, and user satisfaction with sewn products and the textile and other components of those products.

Prerequisite: DM 120.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 430 International Retailing Credits: 3 (3-0-0)

Course Description: Application of retail principles to analyze the internationalization process of retailing.

Prerequisite: AM 330 and DM 360 or MKT 360.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

AM 446 Apparel Design and Production Credits: 3 (1-4-0)

Course Description: Computer-aided design (CAD) technology used in apparel sketching, pattern drafting, grading and marker making; final portfolio preparation and review.

Prerequisite: AM 346.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 450 Social-Psychological Aspects of Clothing Credits: 3 (3-0-0)

Course Description: Psychological and social factors influencing clothing and its effect on others.

Prerequisite: AM 250 and PSY 100 or SOC 100.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 460 Historic Textiles Credits: 3 (3-0-0)

Course Description: Historic development of textiles from a global perspective, focusing on textiles produced by diverse cultures.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

AM 466 Retail Environment Design and Planning Credits: 3 (2-2-0)

Course Description: Application of design/merchandising principles to retail selling environments, including traditional store design/layout, direct mail, and websites.

Prerequisite: AM 130 and AM 270.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

AM 475 Product Development III Credits: 3 (2-2-0)

Course Description: Technology-based product innovation for positive social and environmental impacts.

Prerequisite: AM 335 and AM 375.

Registration Information: Senior standing. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

AM 479 Merchandising Policies and Strategies Credits: 3 (3-0-0)

Course Description: Examination of merchandising environment as influenced by internal and external factors contributing to production/acquisition, distribution, and retailing decisions in textiles and apparel industries.

Prerequisite: (AM 371) and (AM 330 or DM 360 or MKT 360).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

AM 495A Independent Study: Merchandising Credits: Var[1-3] (0-0-0)

Course Description:

Major in Apparel and Merchandising

The Major in Apparel and Merchandising emphasizes the study of apparel and textile design, product development and sourcing, and the promotion, distribution, and retailing of consumer goods in the global environment, while fostering awareness of cultural diversity and a commitment to social responsibility. The program encompasses the study of the cultural/historical, economic, social/psychological, and scientific aspects of the textile and apparel industry. There are three concentrations in the major: Apparel Design and Production, Merchandising, and Product Development.

Learning Outcomes

Students will demonstrate mastery of core knowledge and skills specific to their program/concentration areas. The three concentration areas include:

- **Apparel Design and Production:** core knowledge and skills include use of industry-related technology for sketching, pattern drafting, marker making, constructing; and cross-discipline knowledge and skills in conceptual design, technical production specifications communication, materials sourcing, and marketing.
- **Merchandising:** core knowledge and skills include consumer behavior and market research, retailing, assortment planning, merchandise buying, sales and customer service, advertising and promotion, and cross-discipline knowledge and skills in accounting/budgeting, purchasing, management, and marketing.
- **Product Development:** core knowledge and skills include market research, product design and development, prototypes, specification sheets, global sourcing, and supply chain management. Skills in this concentration are enhanced through industry-related technology. Students will be able to assess and synthesize multiple factors in creating/producing quality products, services, and design solutions. The factors will address human, design, industry and business, global, science, and technology sensitivities.

Students will demonstrate an understanding of professional practices, processes, and skills utilized in the areas of apparel design and production, merchandising, and product development. These practices, processes, and skills include critical and creative thinking, communication, ethics, social responsibility and sustainability, collaborative problem-solving, and interdisciplinary learning.

Students also will demonstrate professional behaviors and ethical business practices that enhance the well-being of others and contribute to the advancement of the global industry.

Students may enroll in the 12-credit internship one to two semesters prior to graduation. Student internship placement with businesses and organizations in national and international settings is designed to facilitate the depth and integration of knowledge in the study of apparel and merchandising and to enhance professional development and career opportunities. Students with a 2.500 GPA are eligible to participate in department-facilitated internships.

Students who are interested in co-curricular learning experiences have the opportunity to visit apparel and fashion companies and trade shows, network with industry professionals, participate in department-led study tours, engage in project-based learning experiences, assist with department recruiting events and new student orientations, and participate in a variety of leadership events.

Potential Occupations

Career options for Apparel Design and Production graduates include, but are not limited to: apparel and fashion designer, computer-aided design (CAD) manager, creative director, design director, fashion illustrator, fashion magazine editorial contributor, fashion stylist, pattern-maker, technical designer, and trend/fashion forecaster.

Career options for Merchandising graduates include, but are not limited to: consumer or market researcher, brand/product merchandise manager, merchandise buyer, retail analyst, retail manager, retail store/website planner, resident buying office administrator, sales representative, showroom coordinator/manager, inventory control agent, consumer or market researcher, product trend analyst, advertising and promotions coordinator/manager, public relations specialist, social media specialist, and visual merchandiser.

Career options for Product Development graduates include, but are not limited to: consumer or market researcher, product designer/developer, prototype engineer, production manager, sourcing agent, product testing specialist, quality control agent, and import/export specialist.

Concentrations

- Apparel Design and Production Concentration
- Merchandising Concentration
- Product Development Concentration

Major in Apparel and Merchandising, Apparel Design and Production Concentration

The Apparel Design and Production concentration focuses on the development of knowledge and skills necessary to engage in the design and creation of textile and apparel goods for an identified target market. This includes coursework in aesthetics and design, fashion/trend forecasting, fashion illustration, pattern development; material selection (e.g., fibers, fabrics, dyes/finishes), apparel construction techniques, computer-aided design (CAD), historic textiles and costume, and social-psychological aspects of dress.

Students applying to the Apparel Design and Production concentration are accepted first into the Apparel and Merchandising major. Full acceptance into the Apparel Design and Production concentration requires passing the portfolio review held in the spring semester and a minimum 2.500 GPA. Industry professionals in the field of apparel design and manufacturing evaluate student portfolios. Each year, the 20 to 25 students who receive the highest scores on the portfolio evaluation are accepted into the Apparel Design and Production concentration, and they become eligible to enroll in apparel design and production courses.

Major in Apparel and Merchandising, Product Development Concentration

The Product Development concentration offers unique learning opportunities in developing and innovating consumer products. This concentration teaches students necessary skills and knowledge for product development, including market potential analysis, trend forecasting, technology and material research, concept development, product line development, computer-aided design, technical package, packaging/branding strategies, pricing and costing, product line management, quality assurance, sourcing, supply chain management, and new venture start-up.

Students in this concentration gain competence to be successful industry professionals or entrepreneurs through market-driven, industry-sponsored projects, which allows them to develop further networks with the real world. Students graduating with this concentration often pursue careers in highly technical product development fields such as outdoor products or sportswear industries.

Learn more about the Product Development concentration on the Department of Design and Merchandising website (<https://www.chhs.colostate.edu/dm/programs-and-degrees/b-s-in-apparel-and-merchandising/product-development-concentration/>).

Minor in Merchandising

A minor in Merchandising provides students in other majors an opportunity to gain knowledge and skills specific to the field of merchandising. The minor may be of special interest to students majoring in areas such as art, business, and journalism and technical communication. The perspectives gleaned by selecting a Merchandising minor both enhance understanding of the student's major program and expand career opportunities available to the student.

The Apparel and Merchandising program emphasizes study in apparel and textile design, product development and sourcing, and the marketing and retailing of consumer goods. The program encompasses the global study of the cultural/historical economic, and scientific aspects of the textile and apparel industry while fostering an understanding and implementation of socially responsible business practices.

Learn more about the minor in Merchandising on the Department of Design and Merchandising website (<https://www.chhs.colostate.edu/dm/programs-and-degrees/minor-in-merchandising/>).

Requirements Effective Fall 1999

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Major in Interior Architecture and Design

The Major in Interior Architecture and Design exemplifies the definition of the professional designer as qualified by education, experience, and examination to design interior environments that enhance the function and quality of life, increase productivity, and protect the health, safety, and welfare of the public. Academic preparation is grounded in research-based problem solving and experiential education through studio instruction, service learning, and internships that encompass a variety of cultural, environmental, and historical perspectives. The program is accredited by the Council for Interior Design Accreditation (CIDA), recognizing the highest academic standards established by the profession.

Students seeking to apply to the Interior Architecture and Design major at CSU first are admitted to CSU as Pre-Interior Architecture and Design. All students who wish to be considered for admission to Interior Architecture and Design (IAD) major will be required to complete the Interior Architecture and Design Scenario practicum. Selective advancement into the major is based on the review received at the IAD Scenario, where external reviewers will assess student competencies in writing for design, sketching, problem-solving, and conceptual frameworks. A cohort of approximately 50 students is selected upon completion of the IAD Scenario. The IAD Scenario occurs annually in the spring semester. See the Department of Design and Merchandising (<https://www.chhs.colostate.edu/dm/>) for more information regarding the Interior Architecture and Design Scenario.

In order to participate in the Interior Design Scenario students must have the following:

- GPA of 2.500 or higher.
- Completion of or current enrollment in INTD 110, INTD 129 and INTD 166 or equivalent. Equivalent courses from other institutions must be approved at least two weeks prior to the Interior Design Scenario by the Interior Design transfer advisor.

The Design and Merchandising department Academic Success Coordinator will work with Pre-Interior Architecture and Design students and advise them on their current performance in relation to the possibility of their admission to Interior Architecture and Design.

Faculty in the Interior Architecture and Design program value learning as a collaborative effort inviting diversity, design research as a basis for excellence in design practice, and new models for learning to respond to new ways of working. The program guides students toward becoming dedicated professional designers who have strong communication skills, are active as team players and creative problem solvers, and who make a positive impact in the practice of interior architecture and design. Students engage in research-based problem solving, providing a solid transition from education to practice in a global community. An internship in interior architecture / interior design practice is required for graduation.

The Interior Architecture and Design graduate will learn the entirety of the design process, beginning with assessment of client needs through

design programming, development of alternative design solutions, development of conceptual and theoretical frameworks, selection of furniture and finish materials, construction documentation, core compliance, and contract administration including project management and post-occupancy evaluation methodologies. In addition, students take course work in construction/ building systems and codes, business principles in interior architecture and design, computer-aided design and drafting, building information modeling, animation, multimedia, graphic visualization, history of architecture and interiors, and sustainable practices.

The teaching facilities include design studios; display, resource, and critique spaces; and computer labs.

Learning Outcomes

- Interior Architecture and Design core skills will include but are not limited to: applications of history and culture; space and form; color and light; fixtures, equipment, and finish materials; environmental systems; building systems, and interior construction; technology; and regulations.
- Students in the Interior Architecture and Design major will be able to assess and synthesize multiple factors in creating/producing quality products, services, and design solutions. The factors will address human, design, industry and business, global, science and technology sensitivities.
- Students will be able to describe their understanding of multiple processes that are involved in the practice of interior architecture and design. These processes include but are not limited to critical and creative thinking, communication, ethics, social responsibility and sustainability, and interdisciplinary collaboration.
- Students will distinguish and demonstrate qualities of professionalism and business practices that contribute to the

industry, and advance the value of their knowledge to the interior built environments.

- Students will enroll in Internships credits at least one semester before graduation.
- Students who engage in co-curricular learning experiences will have the opportunity to network with industry professionals, engage in project-based learning experiences, assist with department recruiting events and new student orientations, and attend a variety of leadership events.

Potential Occupations

Students are prepared as entry-level interior architects/ interior designers with competency in design fundamentals, space planning and programming, code compliance, lighting, materials research, project management, and professional practices in the design of diverse interior spaces.

Graduates seek employment in interior design and architecture firms as residential, corporate, retail, health care, institutional, education, and hospitality designers. Graduates also work in lighting design, product development, marketing, research, design-related journalism, illustration, facility management, showroom management, and as manufacturers' representatives.

First year students are identified as Pre-Interior Architecture and Design (IAD0). Students who qualify for the Selective Advancement Design Scenario must have **INTD 110**, INTD 129, INTD 166 and a cumulative reported GPA of 2.500 or better to participate. Approximately 40 students are selected to advance to the Second Year and majors are changed to Interior Architecture and Design (IARD-BS). The IARD-BS major is a cohort program - after students pass the Design Scenario, semesters 3, 4, 5, 6, 7, and 8 are sequential.

All majors in the program must earn a minimum grade of C in the studio course sequence to advance to the next studio (i.e., INTD 210, INTD 276, INTD 310, INTD 376, INTD 410).

Students must complete a 12-credit internship prior to graduation. For students who are unable to participate in an internship, substitute experiences could include study abroad or elective courses or independent study (service learning) with advisor approval.

In addition to required courses in the major, students must complete a minimum of 9 credits from one of the following focus areas. These credits may be used to fulfill required courses in a certificate, minor, interdisciplinary minor, second major, or a focused group of courses approved by an advisor.

Graduate Certificate in Evidence-Based Design

This certificate features skill development, theoretical understanding, and linkage to research approaches, assessment of instruments, exposure to professionals engaged in evidence-based projects, and use of the tools and concepts learned in each course applied to evidence-based research projects in the community. Professionals in design, healthcare, education, engineering, construction, and product manufacturing are the target audience of this sequential cohort-based certificate.

Master of Science in Design and Merchandising, Plan A, Apparel and Merchandising Specialization

The M.S. in Design and Merchandising, Apparel and Merchandising Specialization, offers the opportunity for students to critically explore how apparel products are designed and developed, distributed, and merchandised as well as the ways in which consumers interact with and use those products in various historical and cultural contexts. Emphasis is placed upon fostering cultural awareness and a commitment to social responsibility. The Plan A emphasizes the development of content knowledge and research skills through the completion of an original research study, preparing graduates well for doctoral level work or for industry positions requiring critical thinking, analytical abilities, and/or depth of knowledge in the field.

Areas of graduate study and research in Apparel and Merchandising (AM) include:

- Apparel Design and Production
- Consumer Behavior
- Historic Costume and Textiles
- Merchandising
- Product Development
- Social-Psychological and Cultural Aspects of Dress and Appearance
- Textile Science

Master of Science in Design and Merchandising, Plan A, Interior Design Specialization

The M.S. in Design and Merchandising, Interior Design Specialization offers the opportunity for you to explore creativity, sustainability, and health and wellness within the context of interior design. Whether you are seeking greater depth and the research skills to engage in evidence-based design or planning to return to practice with terminal degree credentials enabling you to teach, our program can change your career. The Plan A emphasizes the development of content knowledge and research skills through the completion of an original research study, preparing graduates well for doctoral level work or for industry positions requiring critical thinking, analytical abilities, and/or depth of knowledge in the field.

Professor Susan C. Faircloth, Director

The School of Education (<https://www.chhs.colostate.edu/soe/>) is part of the College of Health and Human Sciences. Our programs advance communication and leadership skills in order to support students in becoming effective, caring, and transformational educators and leaders.

Offering a variety of degree programs and certificates at the undergraduate, masters and doctoral levels, the School of Education equips educators to teach, mentor, counsel, and lead people of all ages. Learning takes place in a variety of settings, including distance, online, on-campus, and hybrid formats.

The School of Education is committed to scholarly excellence. Partnering with the external professional community through formal partnerships and outreach, centers and institutes, faculty and students use research and engagement to impact social and educational issues. Faculty are comprised of scholars, scholar-practitioners and scholar-activists, with research topics focused on critical social and educational needs of today's organizations and institutions. Programs offer students opportunities for practical application of knowledge and skills gained through coursework, ensuring they are prepared to put these to work in real-world environments.

Center for Educator Preparation

Office in Education Building, Room 111
(970) 491-5292

www.chhs.colostate.edu/soe/center-for-educator-preparation

The Center for Educator Preparation (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>) is responsible for licensure of P-12 teachers in 16 content areas, and of K-12 public school principals.

Part of the School of Education, the educator preparation program at CSU is nationally accredited by the Council for the Accreditation of Educator Preparation and state accredited by the Colorado Department of Education and the Colorado Department of Higher Education. CEP consists of clinical practitioners, scholars, and advocates collaboratively preparing educational professionals through a Professional Development School model.

Section 207 of Title II of the Higher Education Act mandates that the Department of Education collect data on state requirements for teacher certification and licensure, as well as data on the performance of teacher preparation programs. The Title II Institutional Report for CSU is available through the **School of Education website**.

Learning Outcomes

Students will demonstrate:

- Use of innovative instructional methods to promote student success and to meet state and national standards
- Understanding of how students differ in their approaches to learning and the ability to create instructional opportunities that are adapted to diverse learners
- Mastery of the content knowledge required for teaching a subject
- Ability to impact the learning of P-12 students through course work and field experiences
- Knowledge of careers in teaching and of education governance

Potential Occupations

Examples include:

- Public or private school teacher
- Principal
- Staff developer
- School counselor
- Early childhood center director
- Post-secondary teacher
- School social worker
- School occupational therapist
- Curriculum specialist
- Human resources trainer
- Educational sales

One of the most important ways to help people and to impact our society is through involvement in schools. Teachers make lasting contributions to our nation and its many generations of learners. Teacher education programs at CSU serve the needs of individuals preparing to teach in:

- Early Childhood Education (PreK-3rd grade)
- Grades K-12: Art, Foreign Languages, Instructional Technology, Music
- Secondary (Grades 7-12): Agricultural Education, Business/Marketing Education, English, Family and Consumer Sciences, Mathematics, Science, Social Studies, Speech, Technology Education

CSU is one of the public institutions in Colorado designated to offer programs leading towards a career and technical (vocational) credential. Candidates for teacher licensure are skilled in a teaching concentration and educational methodology. These students take their professional education course work concurrently while completing their content area coursework. Candidates may complete licensure while enrolled in an undergraduate program or after completing a bachelor's degree at an accredited university.

Admission to Teacher Licensure

Students who wish to pursue an endorsement program should apply for admission to the CEP teacher preparation program. Students have three different program options - undergraduate, post-bachelor, and Master of Education. Application and admission requirements differ based on which program a student is interested in pursuing. (Note: Admission requirements are subject to change based on program and state licensing requirements and laws.)

For detailed information about application and admission requirements and deadline dates, please contact the Center for Educator Preparation Advising Office (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/advising/>). We welcome in-person visits, phone calls or email.

Student Teaching

Teacher licensure candidates apply for student teaching placement one semester before student teaching. Candidates must pass the state licensing exam (Praxis II) in their respective teaching content area by mid-April or mid-October before beginning their student teaching experience. Additionally, candidates must demonstrate acceptable professional dispositions and academic fitness. Student teaching must be completed at an approved school. Placement is contingent upon acceptance of the student by a school system. All assignments are made by CSU. This experience is full-time for a specified time period.

Requirements for Licensure

Colorado licensure requires completion of an approved teacher preparation program and the recommendation of the institution at which the program was completed. The CEP Co-Directors and Student Teaching Coordinator serve as the licensure officers for CSU. Additional requirements of the Colorado Department of Education and the Colorado Department of Higher Education include the successful completion of the state licensing exam. Successful completion of the approved teacher preparation program at CSU does not guarantee successful completion of the state licensing exam.

Students who successfully complete an approved teacher preparation program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met. CEP does not assume responsibility for the successful completion of the state licensing exam.

CSU's approved teacher preparation program requirements include completion of a baccalaureate degree, completion of the content area and professional education course work, and fulfillment meeting the Colorado Performance-Based Standards for teachers at the proficient or advanced proficient level. Additionally, all grades earned in professional education and content courses must be a C or better for licensing. The minimum scholastic average acceptable for completion of the teacher preparation program and recommendation for licensing is 2.750, computed for all course work.

CSU reserves the right to not recommend a student for licensure on the basis of unacceptable professional dispositions and academic fitness/performance.

Professional Education Coursework for Licensure

The professional education requirements listed below apply to all teaching endorsement areas except early childhood education where EDUC 400, EDUC 425, and EDUC 426, are required in place of EDUC 350, EDUC 386, EDUC 450, and EDUC 486E. Additional courses may be required by specific endorsement areas. For clarification, refer to individual coursework check sheets which can be obtained in the Education Building, room 111, and on the CEP website (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/undergraduate-teacher-licensure/>).

Candidates in all endorsement areas must complete appropriate methods courses the semester prior to enrolling in student teaching. (EDUC/EDCT 4XX - level courses)

Career and Technical Education

Individuals desiring to teach in or administer career and technical programs in the state of Colorado must qualify for a credential in addition to a teaching license. Those who plan to qualify as career and technical education teachers or directors must meet the requirements for a CTE credential established by the Community Colleges of Colorado and the Colorado Department of Education. Credentialing questions may be directed to the Department of Education, (303) 866-6628.

Professional Education Course Requirements

The professional education course requirements listed under Professional Education Coursework for Licensure apply to all teaching endorsement areas in career and technical education.

Agricultural Education

Kellie Enns, Ph.D., Program Chair

Candidates studying Agricultural Education are prepared to teach youth and adults in high schools, community colleges, junior colleges, area career and technical schools, and technical institutes. Two thousand hours in the agriculture industry are required in addition to the completion of the agriculture curriculum and professional education coursework.

For the detailed four-year curriculum, refer to the Major in Agricultural Education, or contact the Center for Educator Preparation Advising Center in the Education Building, Room 111.

Family and Consumer Sciences

Dawn Mallette, Ph.D., Program Chair

Candidates majoring in Family and Consumer Sciences with a concentration in Family and Consumer Sciences Education are prepared to be employed as teachers in middle schools, junior or senior high schools, community and junior colleges, area career and technical schools, and technical institutes.

For the detailed four-year curriculum, refer to the interdepartmental major in Family and Consumer Sciences, Family and Consumer Sciences Education concentration, under the School of Education.

Major in Family and Consumer Sciences

Family and Consumer Sciences (FCS) is an exciting field with many career opportunities. The mission of this interdepartmental major is to prepare professionals dedicated to enhancing the well-being of individuals, families, and the communities and environments in which they live and/or work.

Students graduate with an interdisciplinary perspective about the challenges encountered by families and consumers. FCS students attain skills to assist families and consumers with quality of life decisions and challenges related to interpersonal/human relationships, consumer and

financial resource management, personal development, nutrition and wellness, and balancing family and work.

This program emphasizes the management and problem-solving skills needed to be a responsible and productive individual, family member, and worker. Students take coursework in FCS, Human Development and Family Studies, Food Science and Human Nutrition, Design and Merchandising, and Health and Exercise Sciences.

Students have the option of the Family and Consumer Sciences concentration or the Family and Consumer Sciences Education concentration. Graduates are eligible to take the exam to be certified in FCS with the American Association of Family and Consumer Sciences.

Learning Goals

Students will:

- demonstrate an understanding and comprehension of the family and consumer sciences body of knowledge
- demonstrate, at a professional level, oral and written communication and problem-solving proficiency within FCS
- demonstrate synthesis and integration of the specialized FCS body of knowledge through engaged learning experiences
- choose, examine, and assess the impact of civic engagement relevant to FCS

Potential Occupations

Graduates' career opportunities include, but are not limited to:

- Cooperative extension/agent
- Consumer information specialist
- Program development
- Consultant
- Product representative
- Customer service specialist
- Writer/developer of informational or educational materials
- Governmental, community, and non-profit agency worker
- Child/youth family advocacy
- Family financial officer
- Wellness director
- Peace Corps volunteer

Teaching opportunities at the middle school, junior high, high school, or post-secondary level are available upon completion of the education concentration.

The major provides a strong foundation for graduate work. Graduate degree opportunities are available in the School of Education or specific departments related to family and consumer sciences (Design and Merchandising, Food Science and Human Nutrition, Human Development and Family Studies, Social Work, Occupational Therapy, etc.).

Concentrations

- Family and Consumer Sciences Concentration
- Family and Consumer Sciences Education Concentration

Major in Family and Consumer Sciences, Family and Consumer Sciences Concentration

The Family and Consumer Sciences concentration provides students with a focus on family and consumer well-being, growth and development of family members, and the relationship of households to their environment. This concentration is interdisciplinary, bringing together coursework in human development, family studies, nutrition and foods, consumer sciences, personal finance, apparel and textiles, design and merchandising, and health and wellness.

It is highly recommended that students participate in internships, volunteer activities, or cooperative extension opportunities to enhance their experiences and development. Graduates who seek advanced degrees often attain higher-level professional positions.

The concentration includes All-University Core Curriculum courses, subject matter courses, and elective courses to enhance personal and professional development.

Major in Family and Consumer Sciences, Family and Consumer Sciences Education Concentration

Family and Consumer Sciences (FCS) directly addresses the needs of youth, families, and consumers. Helping to shape the future, FCS teachers impact the lives of individuals, the health of families, and the welfare of society.

The mission of the Family and Consumer Sciences Education concentration is to *teach and model best educational practices to prepare emerging teachers as learners, collaborators, and leaders*. This concentration is a licensure program that prepares students to teach

family and consumer sciences subject matter in middle and high school classrooms. The program includes general education courses, subject matter courses, and teacher preparation courses.

Students apply for the licensure program in their junior year, and participate in practicum experiences working closely with classroom teachers and students in area schools. Throughout the phases of the licensure program, teacher candidates are placed in a middle school and in a high school, where they apply professional knowledge and refine their instructional skills. While student teaching, they work closely with a FCS mentor teacher(s) and a university coach.

Teacher candidates completing the program meet the requirements for the Bachelor of Science degree in FCS, a Colorado Initial Teaching License in FCS, and a FCS Career and Technical Education endorsement.

This concentration is accredited and approved by the Colorado Department of Higher Education and the Colorado Department of Education. Nationally, it is approved by the Teacher Education Accreditation Council.

Students interested in pursuing a teaching license through CSU should contact the School of Education (<https://www.chhs.colostate.edu/soe/>) and the Center for Educator Preparation (CEP). (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>)

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

Graduate Certificate in Adult Basic Education

The Graduate Certificate in Adult Basic Education provides training and personal development opportunities for teachers or aspiring teachers in adult basic education (ABE) programs (i.e. literacy, numeracy, high school equivalency, etc.) and/or English language learning programs for adult learners. With a focus on foundational skills, methods, and theories for teaching adult learners, the certificate prepares and develops educators who can create effective curricula and learning environments for their adult students.

Requirements Effective Fall 2017

Additional coursework may be required due to prerequisites.

Graduate Certificate in Campus Crisis Management

From natural disasters to student illness outbreaks, emergencies can happen every day. Being able to plan ahead, as well as respond when crises arise, can help minimize the impact on your students and your institution. Students completing the Graduate Certificate in Campus Crisis Management will have the skills to deal directly with the crisis, the stakeholders involved, and the media through an understanding of:

- Crisis management in schools and universities, including planning, prevention, response, and recovery
- Human relations skills across various educational settings
- Law in student affairs

The Graduate Certificate in Campus Crisis Management is a five course, 15 credit offering that introduces its students to many facets of campus

crisis management, including law in student affairs, human relations in education, and more. This certificate requires a completed bachelor's degree, and a 3.000 grade point average.

Graduate Certificate in Facilitating Adult Learning

The Graduate Certificate in Facilitating Adult Learning provides practical skills to effectively design and deliver instruction for adult learners within a variety of settings (higher education, workplace training, community settings, etc.). Those who teach adults have knowledge in their area of expertise but often have little background in how to teach that topic. Teaching adult learners requires a different skill set from teaching younger learners. Through this certificate, students will learn how to design and facilitate learning for adults.

Graduate Certificate in Postsecondary Access and Success Programs

The Graduate Certificate in Postsecondary Access and Success Programs is a 5-course, 15-credit offering focused on working in pre-college preparation programs and/or postsecondary academic and student support services, whose participants are students traditionally underrepresented in higher education as socio-economically disadvantaged students.

Courses provide knowledge in areas of:

- Organizational behavior
- Student development theory
- Foundations of postsecondary access and success programs
- Pre-college and postsecondary program models
- Postsecondary program practices

Master of Arts in Counseling and Career Development

The Counseling and Career Development (CCD) program prepares professional counselors following the Council for Accreditation of Counseling and Related Educational Programs standards. Graduates are able to help people of all ages develop the self-awareness, exploration, decision-making, and self-advocacy skills needed to live within a pluralistic society.

Graduates of the CCD program receive a world-class education through relevant, interpersonal, and technology-rich learning experiences. The CCD program offers three specializations: career counseling, clinical mental health counseling, and school counseling. All graduates of the CCD program complete a 48-credit-hour core curriculum, a 12-credit-hour specialization curriculum, a 100-hour clinical practicum, and a 600-hour internship in a setting appropriate for their specialization. Upon graduation, all students are licensure-eligible in the State of Colorado. Individual states control the licensure process and may have differing requirements.

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

Master of Arts in Counseling and Career Development, Plan B, Career Counseling Specialization

Career counselors partner with individuals seeking to live a life of meaning through their professional work and personal lives. They provide services in a variety of settings such as higher education, workforce centers, community agencies, and private practice.

Students who specialize as career counselors demonstrate knowledge and skills to help people develop life-career plans, with a focus on the interaction of work and other life roles. They are trained to conduct traditional career interventions such as career education, planning, management, and guidance as well.

Additionally, career counselors engage in counseling dialogues that address individuals' unique cultures, contexts, needs, desires, values, concerns, and barriers.

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

Master of Arts in Counseling and Career Development, Plan B, Clinical Mental Health Counseling Specialization

In line with the American Counseling Association and the American Mental Health Counselors Association, graduates of the Clinical Mental Health Counseling specialization are prepared to enter a distinct

profession with national standards for education, training, and clinical practice.

Clinical mental health counselors are highly skilled professionals who provide flexible, client-oriented therapy. They combine traditional psychotherapy with a practical, problem-solving approach that creates a dynamic and efficient path for change and problem resolution (ACA/AMHCA).

Clinical mental health counselors typically work from a holistic approach, providing counseling services in different health settings such as inpatient and outpatient hospitals, residential facilities, hospice care centers, or private practice.

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

Master of Arts in Counseling and Career Development, Plan B, School Counseling Specialization

Graduates of the School Counseling specialization are prepared to serve as professional school counselors in K-12 educational settings.

Professional school counselors work to meet the academic, social-emotional, and career needs of all students through individual, group, and classroom delivery modalities.

Through advocacy, collaboration, and leadership, school counseling graduates serve as systemic change agents. They strive to ensure equitable educational access by engaging in data-informed practice, reducing multi-level barriers, and promoting culturally-sensitive decision-making.

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Master of Education in Education and Human Resource Studies, Plan A, Adult Education and Training Specialization

The Adult Education and Training specialization is designed to prepare practitioners in planning and instructional responsibilities needed to teach adult learners in postsecondary, community, and corporate settings.

With coursework that is grounded in current adult learning theory and consistently connected to practice, this master's degree prepares graduates to successfully facilitate, design, and implement a wide range of training and educational programs.

Students may pursue either a research-focused Plan A course sequence or a practitioner-focused Plan B course sequence.

- Plan A requires a professional research paper.
- Plan B culminates in a capstone project in which students demonstrate the integration of their academic knowledge and professional abilities.

Master of Science in Student Affairs in Higher Education

The M.S. in Student Affairs in Higher Education (<https://sahe.colostate.edu/>) (SAHE) program is designed to prepare administrative professionals for a career in student affairs through a curriculum taught by faculty who are both scholars and practitioners.

With coursework focused on learning professional competencies needed to be successful in a wide range of settings on college and university campuses, this master's degree prepares students to succeed in an administrative capacity and increase their ability to manage, communicate effectively, and establish healthy and effective working relationships. The degree is offered in two formats: in-person on CSU's main campus and through CSU Online (<https://www.online.colostate.edu/degrees/student-affairs/>).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 504 Micronutrients Credits: 3 (0-0-3)

Course Description: Coordination of structure and function related to metabolic needs as a basis for evaluating micronutrient needs in normal or altered metabolic states.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 505 Nutrition and Physical Activity in Aging Credits: 3 (0-0-3)

Course Description: Physiological changes during aging and impacts on health and disease; focus on successful aging with emphasis on physical activity and nutrition.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 506 Nutrition and Human Performance Credits: 3 (0-0-3)

Course Description: Relationship of specific nutrients and optimal nutrition to physical efficiency and performance.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 507 Nutrition Education in the Community Credits: 3 (0-0-3)

Course Description: Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research and evaluation.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 508 International Nutrition and World Hunger Credits: 3 (0-0-3)

Course Description: Magnitude, causes, and nature of hunger and under-nurturing; programs and policies to alleviate hunger.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 509 Nutrition Counseling and Education Methods Credits: 3 (0-0-3)

Course Description: Application of learning theories and nutrition counseling with individuals and groups in the community and clinical settings.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 510 Pediatric Clinical Nutrition Credits: 3 (0-0-3)

Course Description: Physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 511 Maternal and Child Nutrition Credits: 3 (0-0-3)

Course Description: Behavioral, physiological and public health issues impacting dietary and nutritional factors that support growth and development.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics; written permission of instructor. Offered as an online course only.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 512 Nutritional Aspects of Oncology Credits: 3 (0-0-3)

Course Description: Relationships between nutrition and cancer including the role of nutrition in specific cancers, cancer prevention and patient management.

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in dietetics. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 520 Advanced Medical Nutrition Therapy Credits: 3 (3-0-0)

Course Description: Role of nutrition in etiology and treatment of selected disorders.

Prerequisite: FSHN 550 or FSHN 551.

Registration Information: FSHN 550 or FSHN 551 or admission to GP-IDEA program in Dietetics. Sections may be offered: Online.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 525 Nutrition Education Theories and Practice Credits: 2 (2-0-0)

Course Description: Examination of current theories, skills, and models used in nutrition education programs as preparation for research and practice.

Prerequisite: FSHN 350.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 530 Principles of Nutrition Science & Metabolism Credits: 3 (3-0-0)

Course Description: Science of nutrition, including the ingestion and digestion of food, the absorption, transport, and metabolism of macro and micronutrients, energy balance and bodyweight regulation, and relationships to health and risk of disease. Structure, functional roles, and metabolic regulation of carbohydrates, lipids, and proteins during conditions of fasting, feeding, and exercise. The role of vitamins and minerals in cellular and whole body homeostasis.

Prerequisite: BMS 300 or CHEM 245 or LIFE 102.

Registration Information: Graduate standing. Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 531 Diet, Nutrition, and Chronic Disease Credits: 3 (2-0-1)

Course Description: Principles related to the role of diet and nutrition in obesity, digestive health, type 2 diabetes, cardiovascular disease, and cancer with a focus on current evidence and best practices for prevention.

Prerequisite: FSHN 530.

Registration Information: Graduate standing. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 532 Emerging Issues in Nutrition Credits: 3 (2-0-1)

Course Description: Principles related to emerging areas of nutrition and their role in health promotion. Focus is on current research related to micronutrients and supplements, sports nutrition, food safety and technology, food systems, nutrition and aging, and nutrigenomics.

Prerequisite: FSHN 530.

Registration Information: Graduate standing. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 540 Nutrigenomics and Advanced Lipid Metabolism Credits: 3 (0-0-3)

Course Description: How nutrients regulate gene expressions (nutrigenetics) and how genotype influences an individual's nutrient requirements (nutrigenomics).

Prerequisite: None.

Registration Information: Admission to GP-IDEA program in Dietetics. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 550 Advanced Nutritional Science I Credits: 3 (3-0-0)

Course Description: Protein, vitamin, mineral metabolism; human studies, animal models.

Prerequisite: (BC 351 or BC 403) and (FSHN 350).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 551 Advanced Nutritional Science II Credits: 3 (3-0-0)

Course Description: Carbohydrate, lipid, energy metabolism; human studies, animal models.

Prerequisite: (BC 351 or BC 403) and (FSHN 350).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 586 Practicum-Advanced Clinical Nutrition Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Term Offered: Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FSHN 587A Internship: Clinical Dietetics Credits: Var[1-6] (0-0-0)

Course Description: Supervised practice in clinical nutrition.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Admission to Master of Science in Food Science and Nutrition, Dietetics Option, Plan B. Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FSHN 587B Internship: Community Dietetics Credits: Var[1-6] (0-0-0)

Course Description: Supervised practice in community nutrition.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Admission to Master of Science in Food Science and Nutrition, Dietetics Option, Plan B. Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FSHN 587C Internship: Food Service Management Credits: Var[1-6] (0-0-0)

Course Description: Supervised practice in food service management.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Admission to Master of Science in Food Science and Nutrition, Dietetics Option, Plan B. Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FSHN 590 Workshop Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Term Offered: Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FSHN 600 Responsible Conduct of Research Credit: 1 (1-0-0)

Course Description: Responsible conduct of research (RCR) including ethical frameworks, publication practices, human and animal research and data management. Case studies and professional codes of conduct will be used to explore conduct of ethical research in humans and animals and how to avoid and manage research misconduct.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Credit not allowed for both FSHN 580A2 and FSHN 600.

Term Offered: Spring.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FSHN 620 Community Nutrition Planning and Evaluation Credits: 3 (2-0-1)

Course Description: Community nutrition assessment; nutrition program planning and evaluation, nutrition policy analysis.

Prerequisite: FSHN 350.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FSHN 628 Advanced Nutrition Counseling Techniques Credits: 2 (2-0-0)

Course Description: Principles, strategies and techniques for interviewing, assessing and providing nutrition counseling in community settings.

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Fall.

Grade Mode: Instructor Option.

Special Course Fee: No.

FSHN 630 Integrative Exercise and Nutrition Metabolism Credits: 3 (3-0-0)**Also Offered As:** HES 630.**Course Description:** Advances in integrative human metabolism under conditions of changing energy flux.**Prerequisite:** HES 610 and FSHN 551.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Credit not allowed for both FSHN 630 and HES 630.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 640 Selected Topics in Nutritional Epidemiology Credits: 2 (2-0-0)****Course Description:** Overview of topics in nutritional epidemiology; study design, interpretation of findings, linkage of data to action.**Prerequisite:** (FSHN 350) and (STAT 301 or STAT 307 or ERHS 307).**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 650A Recent Developments in Human Nutrition: Protein, Vitamins, and Minerals Credits: 2 (2-0-0)****Course Description:** Appraisal of literature on human nutritional status.**Prerequisite:** FSHN 550.**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 650B Recent Developments in Human Nutrition: Carbohydrates, Lipids, and Energy Credits: 2 (2-0-0)****Course Description:** Appraisal of literature on human nutritional status.**Prerequisite:** FSHN 551.**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 650C Recent Developments in Human Nutrition: Genomic, Proteomics, and Metabolomics Credits: 2 (2-0-0)****Course Description:** Appraisal of literature on human nutritional status.**Prerequisite:** FSHN 551.**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 660 Women's Issues in Lifecycle Nutrition Credits: 2 (2-0-0)****Course Description:** Current nutritional issues related to selected stages of the lifecycle compared to normal adult nutritional needs.**Prerequisite:** FSHN 459.**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 661 International Nutrition Credits: 2 (2-0-0)****Course Description:** Roles of technological programs and international agencies in meeting nutritional needs.**Prerequisite:** FSHN 350.**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 675 Regulation of Energy Intake Credits: 3 (3-0-0)****Course Description:** Central and peripheral mechanisms controlling energy intake with emphasis on humans. Current theories, experimental approaches, and new research.**Prerequisite:** FSHN 350 and PSY 454.**Restriction:** Must be a: Graduate, Graduate cooperative program, Professional.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FSHN 684 Supervised College Teaching Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**FSHN 686A Practicum: Counseling Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** FSHN 520.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** Yes.**FSHN 686B Practicum: Nutrition Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**FSHN 686C Practicum: Food Services Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**FSHN 692 Seminar Credit: 1 (0-0-1)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

Food Technology (FTEC)

FTEC 110 Food-From Farm to Table Credits: 3 (2-0-1)**Course Description:** Commercial food processing, related to preservation and enhancing of food quality, safety, and value.**Prerequisite:** None.**Registration Information:** Must register for lecture and recitation.

Sections may be offered: Face-to-Face, Mixed Face-to-Face, or Online.

Terms Offered: Fall, Spring, Summer.**Grade Modes:** S/U within Student Option, Trad within Student Option.**Special Course Fee:** No.**FTEC 210 Science of Food Fermentation Credits: 3 (2-2-0)****Course Description:** Science, history, culture, gastronomy, safety, health, and nutrition aspects of fermented foods and beverages.**Prerequisite:** (CHEM 107 or CHEM 111) and (LIFE 102 or BZ 111 and BZ 110).**Registration Information:** Must register for lecture and laboratory.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**FTEC 350 Fermentation Microbiology Credits: 2 (2-0-0)****Course Description:** Integration of fermentation science, microbiology, and chemistry.**Prerequisite:** BC 351, may be taken concurrently and MIP 300.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 351 Fermentation Microbiology Laboratory Credits: 2 (0-4-0)****Course Description:** Introduction to fermentation microbiological practices with relevance to production, quality control, and food safety in the food and beverage industry.**Prerequisite:** FTEC 350, may be taken concurrently.**Restriction:** Must be a: Undergraduate.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**FTEC 360 Brewing Processes Credits: 4 (3-0-1)****Course Description:** Influence of raw material selection, malting, mashing, boiling, and fermentation on quality of beverages.**Prerequisite:** CHEM 245 and FTEC 210, may be taken concurrently.**Registration Information:** Must register for lecture and recitation.

Required field trips.

Term Offered: Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 375 Introduction to Fermentation Unit Operations Credits: 4 (3-0-1)****Course Description:** Principles related to processes and equipment design in fermented food and beverage industries. Survey of unit operations.**Prerequisite:** (FTEC 360) and (PH 121 or PH 141).**Registration Information:** Must register for lecture and recitation.

Required field trips. Credit not allowed for both FTEC 375 and FTEC 480A2.

Term Offered: Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 400 Food Safety Credits: 3 (3-0-0)****Course Description:** Safety of human food emphasizing safe production, processing, marketing, preparation, consumption, and regulations.**Prerequisite:** CHEM 107 or CHEM 111.**Term Offered:** Fall.**Grade Modes:** S/U within Student Option, Trad within Student Option.**Special Course Fee:** No.**FTEC 422 Brewing Science I Credits: 4 (3-3-0)****Course Description:** Assessment, quantification, and control of various aspects of commercial beer production.**Prerequisite:** FTEC 360.**Registration Information:** Must register for lecture and laboratory.

Required field trips. 21 years of age.

Term Offered: Fall.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**FTEC 430 Sensory Evaluation of Fermented Products Credits: 2 (1-2-0)****Course Description:** Application of sensory evaluation techniques to the study of fermented foods.**Prerequisite:** FSHN 301 or FTEC 210.**Term Offered:** Spring (odd years).**Grade Mode:** Traditional.**Special Course Fee:** Yes.**FTEC 440 Packaging Technology Credits: 2 (2-0-0)****Course Description:** Science, technology, and management of packaging.**Prerequisite:** FTEC 360.**Registration Information:** Required field trips.**Grade Mode:** Traditional.**Special Course Fee:** No.

FTEC 447 Food Chemistry Credits: 2 (2-0-0)**Also Offered As:** ANEQ 447.**Course Description:** Chemistry of food constituents as related to food quality and stability.**Prerequisite:** CHEM 241 or CHEM 245 or CHEM 345.**Registration Information:** Credit not allowed for both ANEQ 447 and FTEC 447.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 460 Brewing Science II Credits: 4 (3-3-0)****Course Description:** Applications of scientific and technical aspects of malting, brewing, fermenting, finishing, packaging, and evaluating of fermented beverages.**Prerequisite:** FTEC 422.**Registration Information:** Must register for lecture and laboratory.

Required field trips. 21 years of age.

Term Offered: Spring.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**FTEC 465 Food Production Operations Credits: 3 (3-0-0)****Course Description:** Production, operation, and management techniques used in the food industry at company, local and international levels.**Prerequisite:** FTEC 210.**Registration Information:** Required field trips.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 478 Phytochemicals and Probiotics for Health Credits: 2 (2-0-0)****Course Description:** Examination of phytochemistry and probiotic organisms important in human health.**Prerequisite:** BC 351.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 487 Internship Credits: Var[1-15] (0-0-0)****Course Description:****Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**FTEC 492 Seminar: Fermentation Science and Food Safety Credits: 2 (1-0-1)****Course Description:** Capstone seminar in fermentation science and food safety.**Prerequisite:** None.**Registration Information:** Senior standing.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 495 Independent Study Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**FTEC 496A Group Study Fermentation Science: Current Issues Credit: 1 (0-0-1)****Course Description:** Explore emerging health issues associated with fermented foods and beverages.**Prerequisite:** FSHN 350 or FTEC 360.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 496B Group Study Fermentation Science: Functional Foods in Health Credit: 1 (0-0-1)****Course Description:** Functional foods may be used to maintain overall good health and to prevent, manage, and/or treat disease. Apply nutrition science and fermentation science to learn how foods or food components are functional, their bioavailability, and the physiological effects related to human health.**Prerequisite:** FSHN 350 or FTEC 360.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 570 Food Product Development Credits: 2 (2-0-0)****Course Description:** Food product concepts, feasibility, and evaluation.**Prerequisite:** ANEQ 447 or FTEC 447.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 572 Food Biotechnology Credits: 2 (2-0-0)****Course Description:** Interrelationships among microorganisms, food processing methods, advances in biotechnology and food quality, spoilage, shelf-life and safety.**Prerequisite:** MIP 334.**Term Offered:** Spring (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 574 Current Issues in Food Safety Credits: 2 (2-0-0)****Course Description:** Current food safety issues from field to table; microbiological, consumer, processing, and agricultural issues.**Prerequisite:** None.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 576 Cereal Science Credits: 2 (2-0-0)****Course Description:** Chemistry and functionality of cereal grain components and their importance in human nutrition.**Prerequisite:** ANEQ 447 or FTEC 447.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**FTEC 578 Phytochemicals and Probiotics for Health Credits: 3 (2-0-1)****Also Offered As:** HORT 578.**Course Description:** Examination of phytochemicals and probiotic organisms important in human health.**Prerequisite:** BC 351.**Registration Information:** Senior standing. Must register for lecture and recitation. Credit not allowed for both FTEC 578 and HORT 578.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.

RRM 400 Food and Society Credits: 3 (2-0-1)

Course Description: Exploration of the influence of food, dining, and nutrition on cultural aspects of the human experience.

Prerequisite: SOC 100 or PSY 100.

Registration Information: Completion of AUCC 3D and AUCC 3E requirements. Must register for lecture and recitation.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RRM 410 Food Safety Management Credits: 2 (2-0-0)

Course Description: Management and practical applications of safe food service including sanitation, food borne illness, worker hygiene, proper food temperatures and handling, hazard analysis critical control points, local/state/federal health rules and regulations. ServSafe® Manager Certification.

Prerequisite: (CHEM 103 or CHEM 107 or CHEM 111) and (RRM 310).

Registration Information: Junior standing.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RRM 415 Catering Techniques and Culinary Arts Credits: 3 (0-6-0)

Course Description: Management of advanced techniques in culinary technique; catering of food and beverages for special functions.

Prerequisite: RRM 311.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

RRM 450 Leadership in the Hospitality Industry Credits: 3 (3-0-0)

Course Description: Exploration of leadership skills, their relationship to ethics through self-analysis, and leading change in the hospitality industry.

Prerequisite: RRM 310 and MGT 305.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RRM 460 Event and Conference Planning Credits: 3 (2-0-1)

Course Description: Overview of event planning and management.

Explores key concepts critical to the success of any event and current trends in the industry.

Prerequisite: NRRT 270 or RRM 101.

Registration Information: Junior standing. Must register for lecture and recitation. Required field trips. Credit not allowed for both RRM 460 and NRRT 460.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

RRM 487 Internship in Hospitality Management Credits: 5 (0-0-25)

Course Description: Supervised off-campus experience in food and beverage, lodging, or event planning focusing on management tasks and responsibilities.

Prerequisite: RRM 101 and RRM 310, may be taken concurrently.

Registration Information: Sophomore standing. Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

RRM 492 Seminar on Hospitality Management Credits: 3 (0-0-3)

Course Description: Applying and synthesizing service knowledge and management functions; project discussions, benchmark presentations, execution of a capstone project.

Prerequisite: MKT 305.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: Yes.

RRM 500 Understanding Food Credits: 3 (3-0-0)

Course Description: Role of food in the creation of identity, as a driver of technology, and the prominent role food plays in the media.

Prerequisite: RRM 400.

Registration Information: RRM 400 or admission to GPIdea program in Dietetics. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RRM 510 Foodservice Management Credits: 2 (1-0-1)

Course Description: Analysis of a wide variety of foodservice operations, including procurement, forecasting, operational design, and menu planning.

Prerequisite: NRRT 442 or NRRT 471.

Registration Information: Must register for lecture and recitation. This is a partial semester course. Offered as Mixed Face-to-Face only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RRM 520 Lodging Management Credits: 2 (1-0-1)

Course Description: Operating standards and practices essential to the profitability of a hotel, lodging, and accommodation enterprise.

Prerequisite: NRRT 442 or NRRT 471.

Registration Information: Must register for lecture and recitation. This is a partial-semester course. Offered as Mixed Face-to-Face only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RRM 686 Practicum-Food Service Management Credit: 1 (0-4-0)

Course Description: Food production, menu planning, nutritional analysis and food costing.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Major in Fermentation Science and Technology

Fermentation Science and Technology is a multidisciplinary major focusing on the science of fermented foods and beverages. The curriculum focuses on the science of the processes and methods involved with using microorganisms in the commercial production of fermented products. Courses in the major also emphasize the safety, culinary, and nutritional aspects of fermented foods and beverages. This major prepares students for employment in the fermented food and beverage industries in such roles as product development, processing, quality assurance and control, sensory evaluation, packaging, distribution, and plant management. Students enrolled in this major have the opportunity to participate in industry activities and professional

organizations to increase their practical understanding of fermented food and beverage production, processing methods, and specific techniques.

- Competent application of science, history, culture, safety, health, and nutrition dimensions of fermented foods and beverages.

Learning Outcomes

Students will demonstrate:

- Ability to integrate biological and chemical processes to quality and stability of fermented foods, and to critique and effectively communicate the relationships among the processing of fermented foods, nutrition, and food safety.
- Discipline-specific knowledge of the skills and competencies needed in fermentation science and technology. Examples include knowledge of food chemistry, sensory evaluation of fermented products, brewing processes, refining and packaging technology, food production management, and fermentation microbiology.
- Understanding of classification, production, financial aspects, consumption, and service of controlled beverages, including effective management of facilities and people with an emphasis on safe service training and management.

Potential Occupations

Partnerships with industry help provide field experience and internships for majors in Fermentation Science and Technology. The food industry is the largest in the world and fermentation science is a rapidly emerging area, so the future is promising. Examples of careers include fermentation scientist, food scientist, food technologist, food health inspector, food safety specialist, brewer, biotechnologist, quality control analyst, sensory analyst, food microbiologist, or entrepreneur.

Major in Hospitality Management

The Hospitality Management major combines courses in foodservice, lodging, event planning, nutrition, and business to provide students with a strong skill set for entry into hospitality management professions. Elective credits allow students to take courses in areas of interest to enhance their education. The curriculum has a strong emphasis on management skills required for success in the hospitality industry.

The Hospitality Management program maintains strong ties with the foodservice, lodging, and event planning industries locally, state-wide, and nationally to connect graduates with a wide variety of employment opportunities in the expanding commercial and non-commercial segments of hospitality management. The hospitality industry is the second largest employer in Colorado and the United States. The department oversees internships in the industry and aids in job placement upon graduation.

Learning Outcomes

Students will demonstrate:

- A conceptual understanding and systems approach to the business of hospitality management.
- The ability to make logical decisions by organizing, analyzing, and interpreting information and formulating rational solutions in a hospitality business environment.
- The knowledge and skills to successfully manage a hospitality operation, including allocating resources such as time, labor, and material inputs to achieve customer satisfaction.
- An understanding of the managerial functions of planning, organizing, directing, staffing, controlling, and budgeting in various hospitality environments.
- The behaviors of effective, ethical leaders by demonstrating the fundamental principles of leadership in a hospitality business environment.

Potential Occupations

Participation in the experiential learning laboratory, The Aspen Grille, is required and internship and practicum opportunities are highly recommended to enhance practical training and development. The hospitality industry encompasses careers in restaurants, hotels,

resorts, spas, event venues, catering, breweries and wineries, bed and breakfast inns, ski areas, business and industry dining venues, hospitals, correctional facilities, and military facilities in the United States and around the world.

Examples of career positions include, but are not limited to restaurant managers, caterers, event planners, wedding planners, banquet managers, hotel sales and marketing, hotel guest operations, hospitality real estate acquisition, hotel managers, food writing and media, brewery hospitality operations, commercial wine, and liquor sales, chefs, purchasing agents, conference coordinators, guest service agents, tourist attraction managers, spa operations managers, housekeeping managers, timeshare sales and marketing, bed & breakfast owner/managers, travel agents, school food service managers, hospitality food and equipment sales representatives, health inspectors, hospital food service managers, food importers, and country club managers.

Major in Nutrition and Food Science

Public interest regarding the importance of nutrition to health and fitness is at a high level and increasing. The Major in Nutrition and Food Science involves integration of the biological, medical, and social sciences and their application to the improvement of human nutrition and fitness, prevention of chronic disease, and improved quality of life. The major is both science- and human service-oriented.

Nutrition and Food Science graduates gain a scientific understanding of the principles of human nutrition, the role of nutrition in the prevention and management of disease, delivery of nutritional care, and the principles of nutrition assessment and food preparation. Additionally, graduates know the techniques of interviewing, counseling, information management, and effective communication.

Four concentrations are currently available in this major: Dietetics and Nutrition Management, Nutrition and Fitness, Nutritional Sciences (Pre-Health), and Food Safety and Nutrition.

Learning Outcomes

Students will demonstrate:

- Ability to identify nutrition-related public health problems, integrate information from basic nutrition sciences, critically analyze data, and develop appropriate conclusions
- Discipline-specific knowledge, skills, and competencies needed in the field of dietetics and nutrition. Examples include knowledge of medical nutrition therapy; nutrition and metabolism; program planning, monitoring, and evaluation; management in school nutrition programs and long-term care; food safety; and the role of food in the promotion of health
- Competent application of nutrition knowledge and skills in a work environment, including an ability to calculate and/or define diets for various health/disease conditions, screen individuals for nutritional risk, determine nutrient requirements across the lifespan, and calculate enteral and parental nutrition formulations; determine costs of services/ operations, interpret financial data, and prepare a budget

(See the department's website for the Dietetics and Nutrition Management concentration (<https://www.chhs.colostate.edu/fshn/programs-and-degrees/b-s-in-nutrition-and-food-science/dietetics-and-nutrition-management-concentration/>) for specific learning outcomes for the ACEND Accredited Dietetics Program).

Potential Occupations

Participation in community outreach, internships, volunteer activities, or cooperative education opportunities is highly recommended to enhance career planning, skills, and development. Graduates who go on for

advanced studies can attain more responsible leadership positions with the possibility of rising to top professional levels.

Some examples of career opportunities include, but are not limited to: dietitian or nutritionist in health care, hospitals, long-term care, schools, state or county health agencies, health clubs, corporate wellness programs, grocery stores/food chains, or private practice; community nutritionist; biomedical scientist; restaurant manager; caterer; quality assurance specialist; food scientist; food inspector; food technologist, food plant manager; food service manager in hospitals, schools, or long-term care. As of March 2020, the average salary for registered dietitians is \$51,291, and the salary range is \$39,000-67,000.

Students interested in *teaching* nutrition and/or food science content at the secondary education level should explore the interdepartmental concentration in Family and Consumer Sciences Education at the beginning of this college section. The Family and Consumer Sciences Education concentration allows students to combine their interests in nutrition, wellness/health, food science, culinary arts, and/or catering with teaching. Family and Consumer Sciences Education students take course work in the Departments of Food Science and Human Nutrition, Design and Merchandising, and Human Development and Family Studies. They also complete an education sequence that qualifies them for a secondary teaching license. The demand for secondary Family and Consumer Sciences teachers exceeds the supply in Colorado as well as nationally. Therefore, job placement is extremely high, with starting salaries in the \$34,000-\$37,000 range for a nine-month teaching position.

Students may choose from among four concentrations under the Nutrition and Food Science major.

Concentrations and Options

- Dietetics and Nutrition Management Concentration
 - Accredited Didactic Program Option
 - Childhood Nutrition Option
 - Gerontology Nutrition Option
- Food Safety and Nutrition Concentration
- Nutrition and Fitness Concentration
- Nutritional Sciences Concentration

Major in Nutrition and Food Science, Dietetics and Nutrition Management Concentration

The Dietetics and Nutrition Management concentration provides a broad background in clinical nutrition, health promotion, and food service management. The science-based curriculum includes nutritional assessment, application of food theory, and course work focusing on nutritional counseling and medical nutrition therapy. The concentration is designed to prepare students for a dietetic internship and a professional career in medical nutrition therapy or community-based nutrition programs. The Accredited Didactic Program option of the Dietetics and Nutrition Management concentration is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). This concentration is open to all students interested in becoming registered dietitians. However, students must qualify to continue in the Accredited Didactic Program option by meeting the prerequisites for the Dietetic Practice Seminar (FSHN 392) in their junior year. These prerequisites are an overall GPA of 3.000 and grades of "B" or better in FSHN 150, FSHN 300/ FSHN 301, and basic sciences (CHEM 107/CHEM 108, or CHEM 111, CHEM 112, CHEM 113; CHEM 245, CHEM 246; LIFE 102 or BZ 110, BZ 111; BMS 300, BMS 302; FSHN 150; FSHN 300, FSHN 301). Students who do not meet these requirements are encouraged to exercise their repeat/delete options in those courses which are lower than a "B" grade if they wish to be considered for the Accredited Didactic Program option. The Childhood

Nutrition option prepares students for supervisory positions in the school nutrition program. The Gerontology Nutrition option prepares students for supervisory positions in food service management for long-term care and rehabilitation, or for working with community programs providing nutrition services to older individuals.

Options

- Accredited Didactic Program Option
- Childhood Nutrition Option

Major in Nutrition and Food Science, Food Safety and Nutrition Concentration

The Food Safety and Nutrition concentration blends a strong science base with courses in food science, food safety, food microbiology, and nutrition. The curriculum prepares students for employment in the food industry or in government in such areas as quality assurance, product development, research, food inspection, sensory evaluation, and consumer education. The concentration also provides an excellent background for a graduate program. Students in the concentration are

encouraged to participate in the Food Science/Safety Interdisciplinary Minor to further their understanding of the continuum of responsibility shared through the food system in ensuring that food is safe and healthful. By adding several elective courses, students can also meet the Accreditation Council for Education in Nutrition and Dietetics (ACEND) (<https://www.eatrightpro.org/acend/>) course requirements.

Learn more about the Food Safety and Nutrition concentration on the Department of Food Science and Human Nutrition website (<https://www.chhs.colostate.edu/fshn/programs-and-degrees/b-s-in-nutrition-and-food-science/food-safety-and-nutrition-concentration/>).

Graduate Certificate in Nutrition Sciences

The Graduate Certificate in Nutrition Sciences is offered for students with a personal or professional interest in nutrition, health promotion, or disease prevention. Courses address the fundamentals of nutrition science and how it is involved in nutrient metabolism, obesity, chronic disease prevention, and other current or controversial areas in nutrition. Each course allows students to develop skills in locating credible sources of nutrition information, analyzing research, and debating contradictory information, all of which will support ongoing professional development. Online only.

Effective Fall 2017

Additional coursework may be required due to prerequisites.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Science in Food Science and Nutrition, Dietetics Option (online)

The Great Plains Interactive Distance Alliance (GPIdea) Online Master's Program

The GPIdea program offers a **fully online M.S. in Food Science and Nutrition for Registered Dietitian Nutritionists and for graduates of accredited dietetics programs who have verification of completion of didactic requirements**. The program is offered through a partnership of 8 different Universities (Colorado State University, Kansas State University,

Kansas University Medical Center, University of Nebraska, Oklahoma State, Iowa State, South Dakota State, and North Dakota State). The collaboration provides a rich offering of online courses led by expert faculty from each institution. Students earn their degrees from CSU.

Programs of study are designed to allow students the flexibility to individualize coursework and research to their specialty, interests, and career focus. The GPIdea program objectives are to:

- Develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice and business management.
- Promote health and disease management through food and nutrition programs and make a difference in the lives of others by advancing the level of practice of registered dietitian nutritionists.

It is important to note that this program is not a didactic program in dietetics and does not substitute for the completion of an accredited didactic program as the first step to becoming an RDN.

Learn more about the GPIdea program on the Department of Food Science and Human Nutrition website (<https://www.chhs.colostate.edu/fshn/programs-and-degrees/m-s-in-food-science-and-nutrition-dietetics-option-online/>).

Master of Science in Food Science and Nutrition, Food Science Specialization

The Master of Science in Food Science and Nutrition, Food Science specialization includes advanced studies oriented toward food science, food microbiology, food preservation and safety, and health properties of foods and food components. The program provides students with training for doctoral studies and professional degrees, as well as careers in government agencies and industry. A minimum of 35 credits is required for the M.S. degree.

Master of Science in Food Science and Nutrition, Nutrition Specialization

The Master of Science in Food Science and Nutrition, Nutrition specialization includes work in advanced nutrition science, supporting basic and applied sciences and the communication of nutrition principles in the community. Ultimately, this area of specialization focuses on the relationship between nutrition and health. The program provides students with training for doctoral studies in basic and applied sciences, advanced preparation for professional degrees, and careers in the industry. A minimum of 35 credits is required for the M.S. degree.

Ph.D. in Food Science and Nutrition, Food Science Specialization

The Ph.D. in Food Science and Nutrition, Food Science specialization includes advanced studies oriented toward food science, food microbiology, food preservation and safety, and health properties of foods and food components.

Most students entering this Ph.D. program will bring in 30 credits from a Master's program in a related field. The curriculum represents a total of 42 credits beyond the Master's level. If a prospective student has less than 30 credits toward the program, an individualized curriculum plan will be developed by working with a primary advisor to cover possible deficiencies.

Learn more about the Ph.D. in Food Science and Nutrition, Food Science specialization on the Department of Food Science and Human Nutrition website. (<https://www.chhs.colostate.edu/fshn/programs-and-degrees/ph-d-in-food-science-and-nutrition/>)

Ph.D. in Food Science and Nutrition, Nutrition Specialization

The Ph.D. in Food Science and Nutrition, Nutrition specialization includes work in advanced nutrition science, supporting basic and applied sciences, and the communication of nutrition principles in the

community. Ultimately, this area focuses on the relationship between nutrition and health.

Most students entering this Ph.D. program will bring in 30 credits from a master's program in a related field. The curriculum represents a total of 42 credits beyond the master's level. Minor in Nutrition

This minor provides an opportunity for a non-major to gain a significant orientation to a food, nutrition, and health-related field. The courses in the Nutrition minor have a significant number of prerequisites that should

be examined carefully before selecting the minor. Although open to any interested student, the Nutrition minor would be most easily taken by students majoring in a life science discipline such as biology or health and exercise science.

Learn more about the Minor in Nutrition on the Department of Food Science and Human Nutrition website.

Requirements Effective Fall 2004

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Graduate Graduate Programs in Health and Exercise Science

The department offers two graduate degrees: the Master of Science in Health and Exercise Science, and the Doctor of Philosophy in Human Bioenergetics. Students interested in a Master's degree in Public Health with a focus in Health and Exercise Science can refer to the School of Public Health (<http://publichealth.colostate.edu/>). Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Health and Exercise Science (<http://hes.chhs.colostate.edu>).

Master's Programs

- Master of Science in Health and Exercise Science, Plan A

Ph.D.

- Ph.D. in Human Bioenergetics

Courses Health and Exercise Science (HES)

HES 100A Beginning Physical Education: Aerobic Exercise Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

HES 100J Beginning Physical Education: Volleyball Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

HES 100M Beginning Physical Education: Basketball Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

HES 100N Beginning Physical Education: Racquetball Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

HES 1000 Beginning Physical Education: Weight Training Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

HES 102C Physical Education Activities: Special Activities Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

HES 102F Physical Education Activities: Conditioning and Fitness Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

HES 102G Physical Education Activities: Athletics Credit: 1 (0-3-0)

Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

HES 120 Introduction to Health and Exercise Science Credit: 1 (1-0-0)

Course Description: Health and Exercise Science major, career options, campus resources, tools for academic success, various health-related topics.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 145 Health and Wellness Credits: 3 (3-0-0)

Course Description: Personal health behaviors and personal choice in response to wellness.

Prerequisite: None.

Registration Information: Credit not allowed for both HES 145 and HES 143. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 207 Anatomical Kinesiology Credits: 3 (2-2-0)

Course Description: Anatomical, physiological, and mechanical fundamentals of human movement.

Prerequisite: MATH 125, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 232 Techniques of Teaching Group Exercise Credit: 1 (0-2-0)

Course Description: Learn practical skills for the instruction of various group fitness activities. Emphasis is on physiological principles related to group fitness, as well as choreography, safety, and modifications for diverse populations and current trends.

Prerequisite: HES 207.

Registration Information: Credit allowed for only one of the following: HES 232, HES 232B, or HES 332H.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 232A Techniques of Teaching Physical Activity: Weight Training Credit: 1 (0-2-0)

Course Description: Practical and theoretical aspects of teaching individual sports with special emphasis on materials, teaching techniques, and analyzing skills.

Prerequisite: None.

Registration Information: Credit not allowed for both HES 232A and HES 332F.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 240 First Aid and Emergency Care Credits: 2 (1-2-0)

Course Description: Principles, applied techniques emphasizing emergency rescue and care. Meets requirements for Red Cross Advanced First Aid and Emergency Care Credential.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 303 Biomechanics and Neurophysiology Credits: 3 (3-0-0)

Course Description: Study and elementary analysis of human motion based on anatomical, neurophysiological, and mechanical principles.

Prerequisite: HES 207.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 307 Biomechanical Principles of Human Movement Credits: 4 (3-2-0)

Course Description: Study and elementary analysis of human motion based on anatomical and mechanical principles.

Prerequisite: (HES 207 or BMS 301) and (PH 121 or PH 141).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 309 Methods of Coaching Credits: 2 (2-0-0)

Course Description: Preparation to coach in an interscholastic athletic situation.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 319 Neuromuscular Aspects of Human Movement Credits: 4 (3-2-0)

Course Description: Neuromuscular anatomy and physiology of human movement. Applied/integrated topics: aging, muscle fatigue, training, force control, and neuromuscular disease.

Prerequisite: BMS 300 and HES 207.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 340 Exercise Prescription Credits: 3 (2-2-0)

Course Description: Theory and practice of exercise prescription for healthy individuals, cardiac patients, and other special populations according to the American College of Sports Medicine (ACSM) guidelines. Includes the practice of proper lifting and spotting techniques, manipulation of training variables, and design of safe, effective, and efficient individual workout programs.

Prerequisite: BMS 300 with a minimum grade of C and FSHN 150 with a minimum grade of C and HES 145 with a minimum grade of C and HES 207 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 345 Population Health and Disease Prevention Credits: 3 (3-0-0)

Course Description: Causes of disease throughout the lifespan and interventions designed to prevent disease.

Prerequisite: HES 145.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 354 Theory of Health Behavior Credits: 3 (3-0-0)

Course Description: Health behavior (HB) theories and their application to health promotion (HP) programs. Multi-level factors that interactively impact human HBs, theoretical foundations for these factors, and the relationship between HBs & selected health outcomes. Discuss application of HB theories, and examine HP programs that have applied these theories in different settings and high risk populations.

Prerequisite: HES 145 or PSY 100.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 355 Integration of Health Behaviors Credits: 3 (3-0-0)

Course Description: Designed to guide students in applying their knowledge of health behavior change to individuals with various health challenges. Explores a variety of health topics including understanding stress and coping and managing stress, behavioral factors in chronic disease, and behavioral health.

Prerequisite: HES 340 and HES 354.

Registration Information: Completion of 60 credits.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 379 Psychology and Sport Credits: 3 (3-0-0)

Course Description: Reciprocal relationship between psychological factors and sport and exercise behavior.

Prerequisite: PSY 100.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 386 Practicum—Adult Fitness Credits: 2 (1-2-0)

Course Description: Adult fitness.

Prerequisite: HES 232 and HES 340 with a minimum grade of C.

Registration Information: Must have earned a cumulative 2.500 GPA in: BMS 300, FSHN 150, HES 145, and HES 207. Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 403 Physiology of Exercise Credits: 4 (3-2-0)

Course Description: Effects of exercise on tissues, organs, and systems of the body.

Prerequisite: BMS 300 or BMS 360.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 410 Bioethics: Concepts and Controversies Credits: 3 (2-0-1)

Course Description: Origins of bioethics and analysis of cases/controversies in contemporary bioethics.

Prerequisite: PHIL 205.

Registration Information: PHIL 205 or 7 credits of AUCC-science category 3A.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 420 Electrocardiography and Exercise Management Credits: 3 (2-2-0)

Course Description: Interpretation of 12-lead ECG tracings, administering exercise tests, and prescribing exercise program for healthy individuals and special populations.

Prerequisite: BMS 300.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 434 Physical Activity Throughout the Lifespan Credits: 3 (3-0-0)

Course Description: Impact of physical activity on biology and physiology of human development and aging processes.

Prerequisite: BMS 300 or HDFS 201.

Registration Information: Junior standing. Sections may be offered: Online. Credit not allowed for both HES 434 and HES 444.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 444 Successful Aging: Role of Physical Activity Credits: 2 (2-0-0)

Course Description: Biology and physiology of healthy aging and impact of disease and physical activity on aging processes.

Prerequisite: LIFE 102 or BZ 110.

Registration Information: Sections may be offered: Online. Credit not allowed for both HES 434 and HES 444.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 455 Health Promotion Programming Credits: 3 (3-0-0)

Course Description: Investigation of established health promotion programs with special emphasis on design, implementation, and evaluation of programming models.

Prerequisite: HES 355 and HES 386 and HES 403.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 476 Exercise and Chronic Disease Credits: 3 (3-0-0)

Course Description: Interaction of physical activity with pathophysiology and treatment of chronic diseases and conditions.

Prerequisite: BC 351 and FSHN 350 and HES 403.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 478A Sports Medicine Capstone: Seminar Credits: 3 (0-0-3)

Course Description: Integration and reflection on health and exercise science disciplinary knowledge.

Prerequisite: (HES 307 or HES 319) and (HES 340 and HES 403).

Registration Information: Senior standing.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 478B Sports Medicine Capstone: Research Credits: 3 (0-6-0)

Course Description: A capstone experience that provides an opportunity to be involved with research in health and exercise science.

Prerequisite: (HES 307 or HES 319) and (HES 340 and HES 403).

Registration Information: Senior standing. Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 478C Sports Medicine Capstone: Teaching Credits: 3 (0-6-0)

Course Description: A capstone course that provides an opportunity to be involved with instruction of a course in Health and Exercise Science.

Prerequisite: (HES 307 or HES 319) and (HES 340 and HES 403).

Registration Information: Senior Standing. Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

HES 478D Sports Medicine Capstone: Service Learning Credits: 3 (0-6-0)

Course Description: A capstone experience that provides an opportunity to be involved with a service-learning project in the community that applies knowledge of Health and Exercise Science.

Prerequisite: (HES 307 or HES 319) and (HES 340 and HES 403).

Registration Information: Senior Standing. Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 484 Supervised College Teaching Credits: Var[1-5] (0-0-0)**Course Description:****Prerequisite:** None.**Registration Information:** Maximum of 10 credits allowed in course. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**HES 486 Practicum–Wellness Program Management Credits: 3 (1-4-0)****Course Description:****Prerequisite:** HES 386.**Registration Information:** Junior standing. Integrate previous knowledge of human physiology and apply it to the physiological response to heat stress, cold stress, hyperbaric atmosphere, hypobaric atmosphere, pollution, and sleep deprivation.
Prerequisite: BMS 420 with a minimum grade of B or HES 403 with a minimum grade of B.**Restriction:** Must not be a: Freshman, Sophomore.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**HES 520 Advanced Exercise Testing and Prescription Credits: 3 (2-2-0)****Course Description:** Theory and practice of exercise testing and prescription in apparently healthy and diseased populations.**Prerequisite:** HES 403.**Registration Information:** Must register for lecture and laboratory.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.

HES 530 Clinical Biomechanics Credits: 3 (3-0-0)

Course Description: Effect of external loads on internal tissues; concern for injury, injury prevention, and rehabilitation.

Prerequisite: BMS 301 and HES 307.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 531 Muscle and Joint Mechanics Credits: 3 (3-0-0)

Course Description: Integrate muscle, tendon, and location of bone attachment into a comprehensive understanding of human movement at the single- and multi-joint level.

Prerequisite: BMS 301 and HES 307.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

HES 545 Evolutionary Basis for Health and Fitness Credits: 3 (3-0-0)

Course Description: Evolutionary basis for human health and fitness based upon dietary and exercise patterns for pre-agricultural humans.

Prerequisite: HES 403 and FSHN 350.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 556 Wellness and Health Promotion Concepts Credits: 3 (3-0-0)

Course Description: Discussion of theory and application of health promotion in various settings.

Prerequisite: None.

Registration Information: Credit not allowed for both HES 556 and PBHL 550.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 600 Research Design in Health/Exercise Science Credits: 3 (3-0-0)

Course Description: The research process including design, implementation, proposal synthesis and statistical considerations applied to health and exercise science.

Prerequisite: STAT 100 to 481 - at least 1 course.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 602 Advanced Physiology of Exercise Credits: 3 (3-0-0)

Course Description: Integrative exercise physiology covering metabolism, cardiovascular physiology, pulmonary physiology, and neuromuscular physiology in humans.

Prerequisite: HES 403.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 603 Advanced Topics in Exercise Physiology Credits: 3 (3-0-0)

Course Description: Advanced principles of theoretical and applied exercise physiology at molecular, cellular, and systemic levels.

Prerequisite: HES 403.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 610 Exercise Bioenergetics Credits: 3 (3-0-0)

Course Description: Biology of energy transfer reactions related to human locomotion and exercise performance in both healthy individuals and disease states.

Prerequisite: HES 403.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 619 Advanced Neural Control of Movement Credits: 3 (3-0-0)

Course Description: Neuroanatomical, neurophysiological, and applied topics on the control of force and human movement.

Prerequisite: BMS 300 and BMS 301 and HES 403.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

HES 620 The Science of Healthspan Credits: 3 (3-0-0)

Course Description: A multidisciplinary approach to examining important biomedical topics in healthy aging. Covers topics in the field of biomedical research on healthy aging including: lifespan, healthspan, disease, interventions for maintaining health across the lifespan, and the biology, physiology and sociology of aging, from molecular events to clinical and population function.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HES 630 Integrative Exercise and Nutrition Metabolism Credits: 3 (3-0-0)

Also Offered As: FSHN 630.

Course Description: Advances in integrative human metabolism under conditions of changing energy flux.

Prerequisite: FSHN 551 and HES 610.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both FSHN 630 and HES 630.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 645 Epidemiology of Health and Physical Activity Credits: 3 (3-0-0)

Course Description: Foundation in chronic disease epidemiology that will enable students to evaluate the current epidemiologic literature.

Prerequisite: HES 600.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 650 Health Promotion Programming Credits: 3 (3-0-0)

Course Description: Development of skills in health promotion program design, implementation and evaluation.

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 656 Comprehensive Stress Management Credits: 3 (3-0-0)

Course Description: Relationship between stress and illness emphasizing methods to impact its detrimental effects.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 684 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

HES 686A Practicum: Adult Fitness-Human Performance Clinical/ Research Laboratory Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Current CPR certification.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

HES 686B Practicum: Wellness Management Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Current CPR certification.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

HES 686C Practicum: Youth Fitness and Skill Development Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Current CPR certification.

Terms Offered: Fall, Spring, Summer.

Grade Modes: Instructor Option, Traditional.

HES 686E Practicum: Applied Health and Exercise Science Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Current CPR certification.

Terms Offered: Fall, Spring, Summer.

Grade Modes: Instructor Option, Traditional.

Special Course Fee: No.

HES 687 Internship Credits: Var[3-9] (0-0-0)

Course Description: Practical application of knowledge and skills in a professional situation.

Prerequisite: HES 686A to 686E - at least 1 course.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 692 Seminar Credit: 1 (0-0-1)

Course Description: Consideration of graduate education in health and exercise science.

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HES 693 Seminar Credit: 1 (0-0-1)

Course Description: Current topics and issues in health and exercise science.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Maximum of 2 credits allowed in course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

HES 695A Independent Study: Health Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Fall, Spring, Summer.

Major in Health and Exercise Science

Students may choose from two concentrations offered in the Major in Health and Exercise Science: Health Promotion or Sports Medicine.

Learning Outcomes

Students will demonstrate:

- Practical knowledge and skills (stress/fitness testing, leadership, administrative, teaching/communication, customer service, and professional attitude) in exercise science and health promotion through laboratory and/or practicum and internship experiences
- Ability to synthesize, integrate, apply, and communicate health and exercise science disciplinary knowledge through structured written assignments and oral presentations

- Skills and knowledge required to successfully compete for employment within the discipline or compete for graduate or professional school placement

Potential Occupations

The United States and other developed countries are struggling with an aging and increasingly unhealthy population. Understanding the role of physical activity in preventing and treating disease and maintaining optimal health at any age is critical. Graduates trained in the foundations of human movement such as anatomy, physiology, exercise prescription and health behavior change AND the ability to apply this knowledge to enhance the health, well-being and functional performance of the public, will be in high demand.

We take pride in training students in Health and Exercise Science to be strong critical thinkers who can express themselves clearly in written and oral form, view the world from multiple perspectives and are models of professional behavior and citizenship: qualities that will serve them well in any career they choose to pursue. Graduates who choose the Health Promotion concentration also acquire theoretical and hands-on training that makes them competitive for career opportunities in a wide variety of areas including, but not limited to: corporate fitness/wellness, community health/wellness, public health, health behavior change, exercise technicians, cardiac rehabilitation, personal trainers, group exercise/fitness instructors, fitness/ medical equipment sales, and recreation directors. In the Sports Medicine concentration, graduates acquire additional course work in areas such as biomechanics, neurophysiology and human nutrition. This training provides excellent preparation for graduate studies in allied health areas and a variety of medical professions.

Major in Health and Exercise Science, Health Promotion Concentration

The Health Promotion concentration provides academic content and experience in promoting positive health behaviors such as physical activity, weight management, stress management, identification of risk factors associated with chronic disease (cardiovascular rehabilitation, cancer rehabilitation, pulmonary rehabilitation) and exercise prescription. The curriculum focuses on exercise science, behavior change, health promotion program development, business administration, and practical field experiences. This concentration prepares students for careers in a wide variety of allied health fields for all ages, from youth to older adults. Graduates of this concentration pursue careers working in clinical rehabilitative settings, corporate health and wellness programs, fitness facilities, strength and conditioning, non-profit organizations, public health, adaptive recreation, firefighting, and health/wellness areas.

Students in this concentration have also been very successful in continuing their formal education with graduate school.

Cardiac Care Internship Requirements

Students enrolling in internships in cardiac care must take HES 420 prior to the internship. Students may use elective credits in the sophomore, junior, or senior year to do so. A minimum grade of B (3.000) is required in HES 420 prior to internship placement.

Code	Title	Credits
HES 420	Electrocardiography and Exercise Management	3
It is recommended, but not required, that students enrolling in cardiac care internships take the following courses using elective credit:		
BMS 420	Cardiopulmonary Physiology	3
BMS 450	Pharmacology	3

¹ MATH 155 or MATH 160 can be substituted for MATH 118, MATH 124 and MATH 125.

² CHEM 111/CHEM 112 can be substituted for CHEM 107/ CHEM 108, and should be seriously considered by students who want to go on to graduate studies.

³ Students may substitute HES 307 and HES 319 for HES 303.

⁴ Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major in Health and Exercise Science, Sports Medicine Concentration

The Sports Medicine concentration provides a strong science background and a solid grounding in the foundations of human movement. This track is dedicated to preparing students both professionally and academically for their future careers. The Sports Medicine concentration provides excellent preparation for those students seeking pre-professional preparation in medical fields, physical therapy or other allied health fields or students planning on pursuing an advanced degree (Master's and/or Ph.D.) in exercise science or a related field.

Some of the courses required for this concentration include chemistry, biology, physics, anatomy, kinesiology, exercise physiology, biomechanical principles and neuromuscular aspects of human movement, and human nutrition. This concentration provides a comprehensive understanding of health and exercise science while preparing students for post-graduate programs.

Learn more about the Sports Medicine concentration on the Department of Health and Exercise Science website.

Master of Science in Health and Exercise Science, Plan A

The Master of Science in Health and Exercise Science, Plan A offers students a health-oriented, science-based curriculum and research experience. The program is a scientifically rigorous, research focused program that prepares students for further education and/or careers in health and exercise science related fields. The program is structured to prepare students for further education that includes doctoral study, physical and occupational therapy, and medicine (e.g., physicians/physician assistant and nursing). Graduates are represented by careers in health related research and development and medical and allied health professions.

Ph.D. in Human Bioenergetics

The Ph.D. in Human Bioenergetics covers all aspects of Health and Exercise Science. While it primarily prepares students for academic and research careers, it is also amenable to careers outside academia (e.g. public health, research foundations, footwear/equipment, pharmaceutical, or nutrition industries) that require advanced training in research. The program trains professionals in basic and applied research centered around preventing age-related decline in human health and function, understanding the pathophysiology of disease and disability, as well as designing and testing novel countermeasures and maximizing functional performance in first responders, soldiers, and athletes.

Online Degree Programs

The major in Human Development and Family Studies (HDFS) is offered in two formats, both leading to a Bachelor of Science degree. We offer on-campus classes to local degree-seeking students, and we offer distance students the HDFS degree through CSU Online (<http://www.online.colostate.edu/degrees/hdfs/>). The major in Human Development and Family Studies offered through CSU Online provides a flexible, convenient, and accessible format for busy, working, or distance students. The online program of study is the same as the on-campus version, is fully accredited, and is indistinguishable on student transcripts and diplomas from the on-campus version. The Gerontology Interdisciplinary Minor and courses required to pursue a variety of certifications are also available online.

Gerontology Interdisciplinary Minor

The Gerontology Interdisciplinary Minor is housed in HDFS and is available on-campus as well as online. The Gerontology Interdisciplinary Minor offers students the opportunity to earn an undergraduate minor in

gerontology with training across multiple disciplines. The Gerontology Interdisciplinary Minor prepares students to work in a variety of fields where it is critical to understand the aging process, including the biological, psychological and social aspects of adult development and aging. Admission is ongoing throughout the year. The full program may be found under University-Wide Instructional Programs.

Graduate

Graduate Programs in Human Development and Family Studies

The Department of Human Development and Family Studies (HDFS) offers a Master of Science degree with two specializations and one doctoral program in Applied Developmental Science. The focus of the department is on the study of individual and family development across the lifespan; the development, implementation, and evaluation of intervention and prevention programs for individuals and families at risk; and the influence of social institutions such as schools and communities on development. Our graduate programs advance students' understanding of human behavior and development, as well as enable them to contribute to scholarship and professional practice.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Human Development and Family Studies (<http://www.hdfs.chhs.colostate.edu/students/>). (<http://hdfs.chhs.colostate.edu/students/masters/>)

Certificate

- Prevention Program Planning & Evaluation

Master's Programs

There are two specializations offered under the Master of Science in HDFS: Prevention Science and Marriage and Family Therapy. Curricula in both programs include core courses in individual development, family theories, current research and issues in HDFS, and research methods. A research thesis is also required.

- Master of Science in HDFS, Marriage & Family Therapy Specialization
- Master of Science in HDFS, Prevention Science Specialization

Ph.D.

The program in Applied Developmental Science builds upon coursework completed in a master's program, yet allows for more advanced, tailored, and personalized learning. Doctoral training also emphasizes mentorships with faculty in order to apply coursework to research in students' areas of specialization.

- Ph.D. in Applied Developmental Science

Courses

Human Development and Family Studies (HDFS)

HDFS 101 Individual and Family Development (GT-SS3) Credits: 3 (3-0-0)

Course Description: Principles of life-span human development in the context of the family. Theory and research on the influence of family systems on individuals.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

HDFS 201 Perspectives in Gerontology Credits: 3 (3-0-0)

Course Description: Multidisciplinary perspectives on a variety of issues in human aging; exploration of careers in gerontology; service-learning with older adults; emphasis on applied gerontology.

Prerequisite: HDFS 101 or PSY 100 or SOC 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 217 Creative Experiences for Children Credits: 3 (2-0-1)

Course Description: Theories of play and creativity provide the foundation for examining the role of art, music, and literature in early childhood development. Exploration of creative techniques appropriate for young children and how these techniques enhance the child's self-expression, creativity, and development in educational, medical, and therapeutic settings.

Prerequisite: HDFS 101 or PSY 100.

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 277 Introductory Seminar in HDFS Credit: 1 (1-0-0)

Course Description: Introduction to human development and family studies field, major and concentration requirements, resources, and career exploration. An inclusive environment to develop and practice the necessary skills to transition to the major and academic expectations of the department and college.

Prerequisite: None.

Registration Information: Human Development and Family Studies or Early Childhood Education majors only. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 286 Practicum-Professional Skills Credits: 3 (1-6-0)

Course Description: Observational and applied experience with children, adolescents, adults, or families. Exploration of professional skills and opportunities.

Prerequisite: HDFS 101.

Registration Information: Must have completed 30 credits; required background check through CBI, FBI; major in Human Development and Family Studies or Early Childhood Education only. Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 302 Marriage and Family Relationships Credits: 3 (3-0-0)

Course Description: Preparation for and adjustment to marital and family relationships throughout the life cycle.

Prerequisite: HDFS 101 or SOC 100.

Registration Information: Completion of 30 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 310 Infant and Child Development in Context Credits: 3 (3-0-0)

Course Description: Physical, cognitive, and socioemotional development from conception through middle childhood in context of family, relationships, and culture.

Prerequisite: HDFS 101 or PSY 100.

Registration Information: Completion of 30 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 311 Adolescent/Early Adult Development in Context Credits: 3 (3-0-0)

Course Description: Physical, cognitive, and socioemotional development of adolescents and young adults in context of family, relationships, and culture.

Prerequisite: HDFS 101 or PSY 100.

Registration Information: Completion of 30 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 312 Adult Development-Middle Age and Aging Credits: 3 (3-0-0)

Course Description: Developmental issues and processes pertaining to middle and later adulthood. Contexts in which adult development and aging occur are emphasized.

Prerequisite: HDFS 101 or PSY 100.

Registration Information: Completion of 30 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 315 Disability across the Lifespan and Culture Credits: 3 (3-0-0)

Course Description: Use of interdisciplinary perspective to understand individuals who have disabling conditions relevant to careers in health, educational, rehabilitation, and human service professions. Causes, outcomes, and intervention of commonly occurring disabilities and health conditions (e.g., congenital disabilities, diabetes, spinal cord injuries).

Prerequisite: HDFS 101.

Registration Information: Sophomore standing. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 317 Disabilities in Early Childhood Education Credits: 3 (3-0-0)

Course Description: Recommended practices for fostering development of young children with disabilities. Knowledge of atypical development in early childhood (birth through grade 3). Practices for assessment, intervention, adapted instruction and materials, and inclusive environments to facilitate children's attainment of educational goals.

Prerequisite: HDFS 310.

Registration Information: Sophomore standing. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 318 Infancy and Toddlerhood Credits: 3 (3-0-0)

Course Description: Physical, cognitive, language, and socio-emotional development from pre-birth through 36 months, with an emphasis on applied settings.

Prerequisite: HDFS 310 or PSY 260.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 332 Death, Dying, and Grief Credits: 3 (3-0-0)

Course Description: Developmental processes of death and dying related to the dying individuals and their families and for human service agencies.

Prerequisite: HDFS 101 or PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 334 Family and Parenthood Across the Life Cycle Credits: 3 (3-0-0)

Course Description: Parenthood as a developmental process and in the context of family relationships throughout the life cycle.

Prerequisite: HDFS 101 or PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 350 Applied Research Methods Credits: 3 (2-2-0)

Course Description: Interpret, apply, and write about research findings in human development.

Prerequisite: (HDFS 101 or PSY 100) and (STAT 201 or STAT 301).

Registration Information: Completion of 60 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 375 Lifespan Intervention and Prevention Science Credits: 3 (3-0-0)

Course Description: Intervention and prevention approaches and skills to improve the health, mental health, and well-being of families and individuals across the lifespan.

Prerequisite: HDFS 310 and HDFS 311.

Registration Information: Completion of 60 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 402 Couple and Family Studies Credits: 3 (3-0-0)

Course Description: Theory and research concerning couple and family processes; social contexts in which couples and families change over time.

Prerequisite: HDFS 334.

Registration Information: Completion of 60 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 403 Families in the Legal Environment Credits: 3 (3-0-0)

Course Description: The intersection of individuals, children, families and the legal system, including the balance between the right to privacy and government intervention, and social disparities in the legal system. Topics include: establishing the legal parent relationship, adoption, the rights of children and parents, marriage, divorce, dependency and neglect, family violence, disability and estate planning, juvenile delinquency, legalities of gender, and landlord/tenant and housing policy.

Prerequisite: None.

Registration Information: Completion of 60 credits. Sections may be offered: Online. Required field trips.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 404 Child Life Theory and Practice Credits: 3 (3-0-0)

Course Description: Theories and skills related to effective child life practice in hospitals.

Prerequisite: HDFS 310 or PSY 260.

Registration Information: Sections may be offered: Online.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 410 Promoting Early Socioemotional Development Credits: 3 (3-0-0)

Course Description: Social and emotional development in children ages 3-8: atypical and typical development, developmental theories and models, risk and protective factors, evidence-based programs, and empirically validated teaching strategies for preventing challenging behaviors and fostering adaptive social skills and emotion regulation.

Prerequisite: HDFS 310 and HDFS 334.

Registration Information: Completion of 60 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 411 Developmental Transitions in Adolescence Credits: 3 (3-0-0)

Course Description: Examination of biological, socio-emotional, cognitive, and behavioral changes during adolescence.

Prerequisite: HDFS 311 and HDFS 334.

Registration Information: Completion of 60 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 412 Mental and Physical Health in Adulthood Credits: 3 (3-0-0)

Course Description: Mental and physical health of adults, contextual factors of development, and implications for prevention, intervention, and public health planning.

Prerequisite: HDFS 312 and HDFS 375.

Registration Information: Completion of 60 credits. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

HDFS 434 Risk and Resilience Across the Lifespan Credits: 3 (3-0-0)

Course Description: Why some individuals are at high risk for poor developmental outcomes, and why certain individuals fare well despite such risks or adversities. Major in Early Childhood Education

(Effective Spring Semester 2015, the major in Early Childhood Education replaces the preparation for teacher licensure in Early Childhood Education, Birth through Grade 3. Contact the department for details.)

In collaboration with the Center for Educator Preparation (<http://cep.chhs.colostate.edu/>) within the School of Education (<http://soe.chhs.colostate.edu/>), the Department of Human Development and Family Studies provides a competitive-entry Major in Early Childhood Education requiring an application in the sophomore year for possible admission in the junior year. The degree enables students to apply for Early Childhood teacher licensure and D (<http://www.coloradoofficeofearlychildhood.com/#!director-qualifications/c15f>)irector Qualifi (<http://www.coloradoofficeofearlychildhood.com/#!director-qualifications/c15f>)ication ([http://www.coloradoofficeofearlychildhood.com/#!director-](http://www.coloradoofficeofearlychildhood.com/#!director-qualifications/c15f)

qualifications/c15f) in the state of Colorado, and qualifies students to engage in a number of early childhood professions, including teaching grades Pre K - 3rd grade in public or private schools in Colorado, teaching in Head Start and other preschool or childcare programs, establishing a business as a family or center care provider, or serving as director of a childcare center. An understanding of human development and family studies provides a strong foundation for students desiring a license to teach young children between the ages of 0 and 8. Knowledge of lifespan developmental processes and family systems prepares future teachers to work in partnership with parents and grandparents in educating children. Students aspiring to work with children between the ages of 0 and 8 can apply during their sophomore year to the major in Early Childhood Education. If accepted, students take courses in HDFS and SOE as a part of their degree requirements.

Students are encouraged to check the program of study and consult with HDFS academic advisers, as some prerequisites are required before entry into the major. The Early Childhood Education major uses a cohort model and admits a limited number of students, typically between 25-30, each year. The admission process takes place once a year in the spring semester, with the admitted candidates starting in the fall. Students in the Early Childhood Education major achieve both Early Childhood Education core learning outcomes, obtained through HDFS and SOE courses and all learning outcomes required by the Colorado Department of Education for Early Childhood Education licensure. (<http://www.cde.state.co.us/cdeprof/checklist-initialtoprofessionalteacher/>)

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

Learning Outcomes

Students will demonstrate:

- Content knowledge and understanding of theory, research, and practice relevant to optimizing the development, health, and well-being of children and families in the context of the larger social environment.
- Effective written and oral communication skills appropriate for early childhood educators interfacing with colleagues, children, and parents/guardians.
- The ability to access, critically evaluate, and apply multiple forms of information related to children and families.
- Professional and leadership skills with individuals and families, including ethical and culturally sensitive conduct.
- Knowledge and skill in teaching and assessing literacy, mathematics, social studies, science, music, art, and physical education in early childhood.

Distinctive Requirements for Degree Program:

Students seeking admission to the Early Childhood Education (ECE) Major with teacher licensure must formally apply and be accepted. The admission process into the program takes place once a year in the spring with the admitted candidates starting the program the following fall. All coursework within the Center for Educator Preparation (CEP) requires a 4 semester (or 2 year) consecutive commitment to complete, therefore EDUC subject code courses must be taken in the semester indicated. Requirements for applying to the ECE major: 1) Must have a 2.75 GPA or better, 2) Suggested to have completed 60 credits (or more) by the end of the semester in which the student is applying (typically students apply their second semester sophomore year), 3) Must have 20 hours of volunteer or work service with children ages 0-8 years (experience must have been within the last 5 years), 4) Must have 3 references. All HDFS subject code courses and EDUC subject code courses must be completed with a grade of C or higher. Students will be required to pass a criminal arrest record background check prior to participating in field placement courses. Students will complete a graduation contract with an HDFS Academic Advisor during the first two weeks of the semester in which they are graduating.

Major in Human Development and Family Studies

Human Development and Family Studies (HDFS) is an interdisciplinary major focusing on the development of individuals across the lifespan, within the context of family and culture. Students complete foundational coursework in human development (i.e., infancy and childhood, adolescence, emerging and young adulthood, middle and later adulthood/aging) and in the area of family studies. Students study theory and innovative research in the field and learn to identify diverse factors influencing cognitive, emotional, social, and physical development across the lifespan. A hallmark of the HDFS degree program is participation in a semester-long internship during which students apply knowledge and skills acquired in foundational course work and gain valuable experience in their professional field. The HDFS major offers five concentrations that enable students to specialize within their degree and prepare for a variety of career paths. In addition to selecting one of five concentrations, students have the opportunity to earn the Gerontology Interdisciplinary Minor (<http://catalog.colostate.edu/general-catalog/university-wide-programs/interdisciplinary-studies/gerontology-interdisciplinary-minor/>), work toward Director Qualifications in early childhood settings, or apply to the Major in Early Childhood Education.

Learning Outcomes

Students will demonstrate:

- Content knowledge and understanding of theory, research, and practice relevant to optimizing the development, health, and well-being of individuals and families across the lifespan in the context of the larger social environment.
- Effective written and oral communication skills appropriate to the field of human development and family studies.
- The ability to access, critically evaluate, and apply multiple forms of information related to individuals and families.
- Professional and leadership skills with individuals and families, including ethical and culturally sensitive conduct.

Potential Occupations

Graduates with a major in HDFS are prepared to work in a range of human service sector settings including youth services organizations; early childhood, elementary, adolescent, and parent education programs; health-care settings; juvenile and adult corrections and criminal justice; family and community services; and programs serving older adults, including long-term care facilities. HDFS graduates are also well prepared to pursue graduate degrees in mental health, behavioral and social sciences, education, health and medicine, policy and public health, and other professional programs. Students interested in teaching human development and family studies content at the secondary level should explore the interdepartmental Major in Family and Consumer Sciences, Education Concentration.

Some examples of career opportunities students may pursue with a bachelor's degree in HDFS include, but are not limited to: early childhood administrator and teacher, adult recreation programmer, administrator in

adult and aging facilities, career development specialist, family services specialist, human development specialist, adult education teacher, human resources coordinator, youth agency administrator, community outreach worker, women's program administrator, youth intervention and prevention program administrator, youth employment, training, and development specialist, parent educator, children-family educator, child protection worker, family assistance worker, program administrator, public relations specialist, student affairs professional, youth services worker, case manager, nonprofit agency administrator, and residential center manager.

To help guide students in career planning, there are five concentrations within the Major in Human Development and Family Studies. The HDFS program of study consists of the HDFS foundational courses, which are required for all students regardless of concentration, 15 credits selected from the list of courses within students' chosen concentration, and additional electives to reach 120 credits as required for graduation. Students must declare a minimum of one concentration and may not declare more than two concentrations in the HDFS major. The declared concentration(s) are listed on the students' transcripts and thus indicate specialized training within the HDFS degree program.

Human Development and Family Studies Concentration

The Human Development and Family Studies concentration is a general concentration available to HDFS majors who do not choose one of the more specific concentrations. This general concentration is an excellent choice for students who are interested in a lifespan or more general focus in HDFS and are not seeking the specialized training offered in the other four concentrations. Students choosing this concentration will be preparing to enter a variety of careers or graduate programs, as outlined above. The curriculum includes primarily HDFS, psychology, and social work courses as well as selected courses from other disciplines for a well-rounded and robust education in human development and family studies. By selecting this concentration, students have an opportunity to participate in a variety of experiential learning courses and internship options as they explore and prepare for their career path and additional credentialing options. Please note that the HDFS general concentration does not appear on students' transcripts.

Early Childhood Professions Concentration

The courses in the Early Childhood Professions concentration prepare students for careers in early childhood education as well as professional work with children across a variety of settings, including working with children with disabilities, in healthcare settings, and community agencies. This concentration focuses on early childhood development from birth to eight years old and therefore is an ideal choice for first and second year HDFS majors who plan to apply to the competitive on-campus Major in Early Childhood Education during their sophomore year. Additionally, this concentration is the preferred choice for students interested in early childhood education careers that do not require teacher licensure, for students who will pursue a graduate degree and licensure in childhood education, and those interested in combining the concentration with another concentration in pre-health, prevention, and intervention sciences, or leadership and entrepreneurial professions. Students interested in working with children with special needs, those seeking director qualifications in early childhood education, and those

seeking other relevant credentials would also benefit from choosing this concentration. The curriculum incorporates courses from several disciplines that focus on early child development, education, diversity, and professional skills.

Pre-Health Professions Concentration

Many students pursuing an HDFS degree plan to apply to graduate or professional programs in a variety of health professions. The Pre-Health Professions concentration prepares students for these careers and supports their goals of obtaining graduate and additional professional training. Some of the careers students in this concentration pursue are nurse, medical doctor, dentist, occupational therapist, physical therapist, optometrist, pharmacist, veterinarian, allied health practitioner, anesthesiologist assistant, child life specialist, chiropractor, dentist, medical doctor, music therapist, naturopathic or complementary medicine practitioner, physician's assistant, podiatrist, public health educator, or speech and language pathologist. The courses within this concentration include a focus on science and are designed to prepare students to work with individuals (and their families) with disabilities, mental and physical illness, or those experiencing death, dying, or grief. In addition, students in this concentration are strongly encouraged to consult with health professions advisers in the Collaborative for Student Achievement (<http://studentachievement.colostate.edu/>) for specific course (and corresponding course prerequisite) recommendations based on the credentials that they are pursuing, as the prerequisite requirements vary for graduate and professional programs.

Prevention and Intervention Sciences Concentration

The Prevention and Intervention Sciences concentration is designed for students who are preparing for careers in the helping and human services professions such as counselors, educators, student affairs professionals, public health and social service providers, as well as for students seeking a research career in human development and family studies or a related field. This concentration offers students specialized training in programming related to promoting individual, family, and community health and wellness through the lifespan. This concentration is an excellent choice for students interested in careers requiring either a bachelor's degree or additional credentials. Concentration coursework emphasizes evidence-based programs, and students will learn how to design and implement community-based prevention and intervention programs for youth, adults, and families. Students can either focus on a specific aspect of the lifespan or choose courses across the lifespan.

Leadership and Entrepreneurial Professions Concentration

The Leadership and Entrepreneurial Professions concentration guides students who are preparing for leadership positions in health and human services organizations that promote individual, family, and community well-being. Students in this concentration may intend to work in organizations as directors, managers, or owners. Coursework for this concentration includes classes in the development and practice of leadership skills, professional communication and ethics, and public policy, as well as a variety of business-oriented courses in finance, management, and marketing. This concentration is also appropriate for students preparing for careers in legal services, such as lawyers or politicians, as well as director positions and other leadership positions in the human services sector. Students in this concentration may choose to pursue additional credentials in leadership, business, and entrepreneurship.

Online Degree Program

The Major in Human Development and Family Studies (HDFS) is offered in two formats, both leading to a Bachelor of Science degree. We offer on-campus classes to local degree-seeking students, and we offer distance students the HDFS degree through CSU Online (<http://www.online.colostate.edu/>). The major in Human Development and Family Studies offered through CSU Online provides a flexible, convenient, and accessible format for busy, working, or distance students. The online program of study is the same as the on-campus version, is fully accredited, and is indistinguishable on student transcripts and diplomas from the on-campus version. The Gerontology Interdisciplinary Minor (<http://catalog.colostate.edu/general-catalog/university-wide-programs/interdisciplinary-studies/gerontology-interdisciplinary-minor/>) and courses required to pursue a variety of certifications are also available online.

Major in Human Development and Family Studies, Early Childhood Professions Concentration

The courses in the Early Childhood Professions concentration prepare students for careers in early childhood education as well as professional work with children across a variety of settings, including working with children with disabilities, in healthcare settings, and community agencies. This concentration focuses on early childhood development from birth to eight years old and therefore is an ideal choice for first and second year HDFS majors who plan to apply to the competitive on-campus Major in Early Childhood Education during their sophomore year. This concentration is also the preferred choice for students interested in the early childhood education careers that do not require teacher licensure, for students who will pursue a graduate degree and licensure in childhood education, and those interested in combining this concentration with another concentration in pre-health, prevention, and intervention sciences, or leadership and entrepreneurial professions. Students interested in working with children with special needs, those seeking director qualifications in early childhood education, and those seeking other relevant credentials would also benefit from choosing this concentration. The curriculum incorporates courses from several disciplines that focus on early child development, education, diversity, and professional skills.

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

Major in Human Development and Family Studies, Human Development and Family Studies Concentration

The Human Development and Family Studies concentration is a general concentration available to HDFS majors who do not choose one of the more specific concentrations. This general concentration is an excellent choice for students who are interested in a lifespan or more general focus in HDFS and are not seeking the specialized training offered in the other four concentrations. Students choosing this concentration will be preparing to enter a variety of careers or graduate programs, as outlined above. The curriculum includes primarily HDFS, psychology, and social

work courses as well as selected courses from other disciplines for a well-rounded and robust education in human development and family studies. By selecting this concentration, students have an opportunity to participate in a variety of experiential learning courses and internship options as they explore and prepare for their career path and additional credentialing options. Please note that the HDFS general concentration does not appear on students' transcripts.

Major in Human Development and Family Studies, Leadership and Entrepreneurial Professions Concentration

The Leadership and Entrepreneurial Professions concentration guides students who are preparing for leadership positions in health and human services organizations that promote individual, family, and community well-being. Students in this concentration may intend to work in organizations as directors, managers, or owners. Coursework for this concentration includes classes in the development and practice of leadership skills, professional communication and ethics, and public

policy, as well as a variety of business-oriented courses in finance, management, and marketing. This concentration is also appropriate for students preparing for careers in legal services, such as lawyers or politicians, as well as director positions and other leadership positions in the human services sector. Students in this concentration may choose to pursue additional credentials in leadership, business, and entrepreneurship.

Major in Human Development and Family Studies, Pre-Health Professions Concentration

Many students pursuing a degree in Human Development and Family Studies plan to apply to graduate or professional programs in a variety of health professions. The Pre-Health Professions concentration prepares students for these careers and supports their goals of obtaining graduate training. Some of the careers students in this concentration pursue are nurse, medical doctor, dentist, occupational therapist, physical therapist, optometrist, pharmacist, veterinarian, allied health practitioner, anesthesiologist assistant, child life specialist, chiropractor, dentist, medical doctor, music therapist, naturopathic or complementary medicine practitioner, physician's assistant, podiatrist, public health educator, or speech and language pathologist. The courses within this concentration

include a focus on science and are designed to prepare students to work with individuals (and their families) with disabilities, mental and physical illness, or those experiencing death, dying, or grief. In addition, students in this concentration are strongly encouraged to consult with health professions advisors in the Collaborative for Student Achievement (<http://studentachievement.colostate.edu/>) for the specific course (and corresponding course prerequisite) recommendations based on the credentials that they are pursuing, as the prerequisite requirements vary for graduate and professional programs.

Major in Human Development and Family Studies, Prevention and Intervention Sciences Concentration

The Prevention and Intervention Sciences concentration is designed for students who are preparing for careers in the helping and human services professions such as counselors, educators, student affairs professionals, public health and social service providers, as well as for students seeking a research career in human development and family studies or a related field. This concentration offers students specialized training in programming related to promoting individual, family, and community health and wellness through the lifespan. This concentration

is an excellent choice for students interested in careers requiring either a bachelor's degree or additional credentials. Concentration coursework emphasizes evidence-based programs, and students will learn how to design and implement community-based prevention and intervention programs for youth, adults, and families. Students can either focus on a specific aspect of the lifespan or choose courses across the lifespan.

Learn more about the Human Development and Family Studies major on the Department of Human Development and Family Studies website (<https://www.chhs.colostate.edu/hdfs/programs-and-degrees/b-s-in-human-development-and-family-studies/>).

Certificate in Youth Mentoring with Campus Connections

Campus Connections (CC) Youth Mentoring program is a nationally recognized, award winning, high-impact, multidisciplinary, service-learning experience offered for credit through Human Development and Family Studies at CSU. CC is a structured mentoring program that promotes undergraduate student success at CSU and after graduation, particularly for underrepresented groups of students; promotes the resilience and life success of at-risk youth; prepares clinical graduate students for diverse settings; and responds to community initiatives to better serve at-risk youth and their families.

The 9-credit undergraduate certificate in Youth Mentoring with Campus Connections enables students to develop invaluable professional skills, gain significant experience with adolescents, and evolve as leaders. Based on multiple semesters of involvement with CC, many students launch their careers working with youth in education, social services, criminal justice, and other relevant professions. The CC experience often serves as the focus of their graduate school essays and is highlighted during interviews with employers setting them apart from their peers.

Graduate Certificate in Prevention Program Planning & Evaluation

The online Graduate Certificate in Prevention Program Planning & Evaluation provides graduate students and post-baccalaureate professionals from a variety of disciplines with specialized training in prevention science, including theory, methods, design, implementation, evidence-based practice, and knowledge of evidence-based programs implemented in schools, families, and communities.

This combination of formal education and functional knowledge prepares graduate students and professionals for career advancement in a range of fields that relate to working with individuals and families in the development and evaluation of prevention programming, including working in community agencies, governmental and human services agencies, for-profit and not-for-profit research and advocacy organizations, and at different levels of the educational system, including university-based research and education.

Master of Science in Human Development and Family Studies, Plan A, Marriage and Family Therapy Specialization

The Marriage and Family Therapy specialization, which is accredited by the Commission on the Accreditation of Marriage and Family Therapy Education (<http://coamfte.org/iMIS15/coamfte/home.aspx>), provides a specific professional curriculum that prepares graduates for licensure as a marriage and family therapist. Courses focus on individual and family development, evidence-based clinical practices, social justice frameworks, and research methods. Students also complete a thesis. Training includes practica and internships with live supervision in the CSU Center for Family and Couple Therapy (<http://www.cfct.chhs.colostate.edu/>) as well as Campus Connections: Therapeutic Mentoring (<https://www.chhs.colostate.edu/cc/>) At-Risk (<https://www.chhs.colostate.edu/cc/>) Youth (<https://www.chhs.colostate.edu/cc/>), the Child Trauma and Resilience Assessment Center (<https://www.chhs.colostate.edu/ctrac/>), and other

clinical programs. Graduates of this program go on to work as therapists in private practice or in for-profit and non-profit mental health agencies. Some students enter doctoral programs upon graduation, including CSU's Ph.D. in Applied Developmental Science.

Learn more about the Master's in Human Development and Family Studies, Plan A, Marriage and Family Therapy specialization on the Department of Human Development and Family Studies website (<https://www.chhs.colostate.edu/hdfs/programs-and-degrees/m-s-in-human-development-and-family-studies/marriage-and-family-therapy-specialization/>).

Master of Science in Human Development and Family Studies, Plan A, Prevention Science Specialization

The Prevention Science specialization coursework focuses on lifespan developmental processes and normative family functioning, as well as theories of prevention science and risk and resilience. Students gain skills such as program planning and evaluation, program administration, grant writing, research design, and technical communication. Graduates of this specialization enter careers in the management of prevention and intervention programs in human services and the non-profit sector, program evaluation, policy analysis, and education.

Ph.D. in Applied Developmental Science

The Ph.D. in Applied Developmental Science emphasizes how basic research in human development can inform programs designed to prevent problems and enhance well-being across the lifespan. Students gain knowledge in lifespan human development theory, basic and applied research skills, and the translation of science into practices and programs to address a wide range of social and public health problems. Graduates from the ADS program are equipped to work in settings such as academia, for-profit and not-for-profit research and advocacy organizations, governmental and human services agencies, or community agencies that promote the health and well-being of individuals, families, and communities.

Students can enter the ADS program with a completed master's degree or with a completed bachelor's degree. Students entering with a bachelor's degree will be required to complete a master's in Human Development and Family Studies, with a specialization in Prevention Science (<http://catalog.colostate.edu/general-catalog/colleges/health-human-sciences/human-development-family-studies/plan-a-ms-human-development-family-studies-prevention-science-specialization/>) or Marriage and Family Therapy (<http://catalog.colostate.edu/general-catalog/colleges/health-human-sciences/human-development-family-studies/plan-a-ms-human-development-family-studies-marriage-therapy-specialization/>).

Requirements Effective Spring 2019

Ph.D. course requirements include a minimum of 79 credits for each of four entry routes:

Entry A: For students enrolled in the continuous Master of Science in Human Development and Family Studies (Prevention Science Specialization)/Applied Developmental Science Ph.D. at CSU, up to 43 credits of the CSU M.S. degree in Human Development and Family Studies (Prevention Science Specialization) will apply toward partial fulfillment of the required 79 credits.

Entry B: For students enrolled in the continuous Master of Science in Human Development and Family Studies (Marriage and Family Therapy Specialization)/Applied Developmental Science Ph.D. at CSU, up to 22 credits of the CSU M.S. degree in Human Development and Family Studies (Marriage and Family Therapy Specialization) will apply toward partial fulfillment of the required 79 credits

Entry C: For students who submit a previously earned Master's degree, up to 30 credits may be accepted toward partial fulfillment of the required 79 credits. All credits accepted toward partial fulfillment of the requirements below must be approved by the Director of the Applied Developmental Science Program, the Department of Human Development and Family Studies, and the Graduate School.

Entry D: For students who do not submit a Master's degree in partial fulfillment of the required 79 credits, up to 10 credits earned after the bachelor's degree may be accepted for transfer. Only courses taken at a 500-level or higher will be considered. Students will also be required to

complete a 1st year project. All credits accepted toward partial fulfillment of the requirements below must be approved by the student's graduate committee, the Department of Human Development and Family Studies, and the Graduate School.

Dr. Anita Bundy, Department Head

Known nationally and internationally for its excellence, the Department of Occupational Therapy is ranked among the top 10 programs in the nation by *U.S. News and World Report*. It is recognized by CSU as a Program of Research and Scholarly Excellence, and it has been designated as a Program of Excellence by the state of Colorado. The department offers graduate-level education to prepare students as leaders in the field of occupational therapy.

The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929; (301) 652-6611. The National Board for Certification in Occupational Therapy (NBCOT) is the credentialing agency responsible for the development and implementation of the certification process for OT practitioners.

Students interested in more information regarding prerequisite and application requirements may contact the department at (970) 491-6253 or otinfo@colostate.edu.

Graduate Graduate Programs in Occupational Therapy

The Occupational Therapy Department offers the following degree programs:

- Master of Science in Occupational Therapy, Plan A (M.S.)
- Master of Occupational Therapy, Plan C (M.O.T.)
- Post-Professional Master of Science (M.S.)
- Ph.D. in Occupation and Rehabilitation Science

Students with a bachelor's degree in a discipline outside of occupational therapy pursue the Master of Science (<https://www.chhs.colostate.edu/ot/programs-and-degrees/m-s-and-m-o-t-in-occupational-therapy-professional-masters-programs/>) or the Master of Occupational Therapy (<https://www.chhs.colostate.edu/ot/programs-and-degrees/m-s-and-m-o-t-in-occupational-therapy-professional-masters-programs/>) degree. The program focuses on preparation for a broad-based, advanced-generalist practice and provides students with the knowledge and skills necessary to support people of all ages who have special needs by addressing daily challenges related to their life roles and assisting them in maximizing their independence.

Students with a bachelor's degree in occupational therapy pursue the Post-Professional Master of Science (<https://www.chhs.colostate.edu/ot/programs-and-degrees/m-s-in-occupational-therapy-post-professional-masters-program/>) degree. Under the guidance of an advisor, students complete an individualized program of study and a thesis project that is designed to add to the profession's understanding of human performance and participation in everyday occupations and contexts.

The interdisciplinary Doctor of Philosophy (Ph.D.) degree in Occupation and Rehabilitation Science (<https://www.chhs.colostate.edu/ot/programs-and-degrees/ph-d-in-occupation-and-rehabilitation-science/>) offers graduate training in research that is dedicated to assisting people of all ages and abilities perform and participate in everyday occupations as a source of lifelong meaning, development, health, and well-being. The program was created to meet the national demand for Ph.D. trained scientists and educators in occupational therapy and related disciplines. Upon graduation, students typically pursue academic careers in research and higher education, although additional career opportunities exist in industry and government.

Please contact the Occupational Therapy Department for further details by calling (970) 491-6253 or emailing the department at otinfo@colostate.edu.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Occupational Therapy (<http://ot.chhs.colostate.edu>).

www.chhs.colostate.edu/ssw/ (<https://www.chhs.colostate.edu/ssw/>)

School Leadership:

- David MacPhee, Interim Director, School of Social Work
- Anne Williford, PhD Program Director
- Amy Martonis, Assistant Director, MSW Program Director
- Brenda Miles, BSW Program Director
- Liz Davis, Field Education Director

The School of Social Work offers a Bachelor of Social Work (BSW) (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/bachelor-of-social-work/>), Master of Social Work (MSW) (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/>) and a Ph.D. in Social Work (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/ph-d-in-social-work/>). Additionally, the school offers several graduate certificate programs (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/>) to enhance training for specialized practice contexts.

Social work professionals are community problem solvers who assess and intervene on multiple levels including: organizational settings, communities, social service agencies, groups, individuals, and families. Social workers have social justice goals of enhancing health and well-being and promoting social, economic, and environmental justice.

Employment Opportunities:

- Child Welfare
- Public Health
- Family Services
- Gerontology
- Behavioral Health
- Policy/Legislative Work
- Mental Health
- Addictions
- Medical/Health

- School Social Work
- Corrections
- Community Organization/Advocacy

The Social Work curriculum focuses on the practical application of social work principles, research, policies, and practices within human rights and social justice perspectives. Students acquire professional social work knowledge-based skills and values transferable to different settings, population groups, and problem areas. Students apply a person-in-environment lens to engage and intervene with social systems locally, nationally, and globally. Several practical experiences are required through intensive internship programs. Both the BSW and MSW programs are accredited by the Council on Social Work Education (<https://www.cswe.org/>).

Undergraduate Major

- Major in Social Work
 - Addictions Counseling Concentration

Graduate Graduate Programs in Social Work

The School of Social Work offers an M.S.W. degree and a Ph.D. in Social Work. The MSW degree is accredited by the Council on Social Work Education, with an emphasis in advanced generalist practice. The Ph.D. prepares students for academic positions or for careers in research. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the School of Social Work (<http://www.ssw.chhs.colostate.edu/>).

Major in Social Work

Social work is distinguished by a tradition of concern for people and their interactions with society. Social work professionals are community

problem solvers who intervene in organizational settings, communities, social service agencies, groups, individuals, and families with goals of enhancing well-being and promoting social and economic justice. Most social workers are employed in fields such as child welfare and family services, mental health, medical social work, school social work, corrections, community organization, or advocacy.

The Social Work curriculum focuses on the practical application of social work principles, policies, and practices within human rights and social justice perspectives. Students acquire a professional social work foundation transferable to different settings, population groups, and problem areas. Attention is devoted to understanding the social welfare system in the U.S., and working with individuals, families, and communities to effect the desired change. At the global level, human rights and economic, environmental and social needs are explored through international travel courses. Several practical experiences are required. Students work with an agency participant throughout their sophomore year, and then as seniors, participate in a social work agency internship. International placements may be available. The curriculum also includes a strong liberal arts base in social science research and statistics, arts, humanities, social science, and natural sciences.

CSU students are admitted to the School of Social Work (SSW) when they declare Social Work as a major. Two professional organizations, the National Association of Social Workers (NASW (<https://www.socialworkers.org/>)) and the Council on Social Work Accreditation (CSWE (<https://cswe.org/Home.aspx>)) guide social work practice and education. The NASW develops the Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>) for practicing social workers. The CSWE accredits bachelor's and master's social work education programs in the United States. The BSW program is accredited by CSWE.

Learning Outcomes

Graduating seniors will have demonstrated:

- Skills in conceptualizing and applying knowledge of social welfare policy and services, a systems perspective, theory, community resources, and community policy-making processes and practices.
- Knowledge and mastery of the foundation competencies as required by the CSWE for accreditation of the BSW degree.
- An understanding of the social work code of ethics including mastery of skills in maintaining client confidentiality, establishing professional boundaries, and resolving ethical dilemmas that are presented in case situations.

Potential Occupations

Social Work graduates are employed in a variety of settings including welfare agencies, schools, hospitals, clinics, institutions, community centers, public health, corrections, and group homes. Entry-level job opportunities are plentiful. Graduates should be willing to work with people of all ages and in a multitude of circumstances and settings. Opportunities to work with older adults are especially prevalent. Internships are required. Graduates of the BSW program are eligible to apply for advanced standing in graduate programs.

Some examples of career opportunities include, but are not limited to: child welfare worker, adolescent group home counselor, crisis counselor, child protection worker, adult protection worker, geriatric social worker, case manager, nursing home administrator, medical social service counselor, community outreach coordinator, youth program counselor,

home health worker, occupational social services worker, foster parent consultant, probation officer, client advocate, victim-witness program counselor, program manager, substance abuse counselor, domestic violence counselor, adoption worker, or international development.

Progression in the Major

Progression in the Major is guided by standards required by both NASW (<https://www.socialworkers.org/>) and CSWE (<https://cswe.org/Home.aspx>) to ensure compliance with accreditation standards, and that students meet nationally recognized ethical requirements for their profession.

The NASW (<https://www.socialworkers.org/>) Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>) requires that social workers act ethically in their work with clients. It also requires that social workers take action when their colleagues are not acting competently or ethically. The CSWE (<https://cswe.org/Home.aspx>) requires that social work programs describe the procedures for informing students of the program's criteria for evaluating students' academic and professional performance and that the program has policies and procedures for terminating students' enrollment in the social work program for reasons of academic and professional performance.

To meet the requirements of these professional governing bodies, the School of Social Work (SSW) has developed a Progression in the Major procedure. Progression in the Major is a time in a student's academic career when faculty and students can review each student's fitness for the profession of social work. Prior to enrolling in the 300 level practice courses (SOWK 340, SOWK 341, SOWK 343), students must apply for Progression in the Major. Approval of the Progression in the Major application is a prerequisite for enrollment in SOWK 340. Generally, students who have 60 or more credits must apply for progression in order to graduate in the following four semesters. The application for Progression in the Major will be distributed in SOWK 286A and SOWK 286B.

As a professional program, academic performance and fitness to proceed in the SSW program require a minimum grade point average, completion of required course work, and behaviors appropriate to the performance of social work. Problems in student performance may be addressed with the student at any time in the student's academic career in the SSW.

Student Expectations for Progression:

- Maintain a minimum GPA of 2.500 in SOWK course work; a grade of C or better in all SOWK coursework; 2.000 in overall university course work; 2.000 in All-University Core Curriculum (AUCC) course work.
- Demonstrate conduct that complies with the CSU Student Code of Conduct.
- Demonstrate conduct that adheres to the NASW Code of Ethics and social work values in interactions with faculty, peers, the community, organizations, and clients.
- Remain free of criminal convictions while enrolled in the SSW and CSU.
- Refrain from substance use that interferes with the performance of responsibilities to clients and agencies and/or interferes with classroom performance.
- Demonstrate behavior that prioritizes the welfare of those to whom the student has a responsibility such as clients and coworkers.
- Refrain from any behaviors that cause harm to clients, including romantic or sexual relationships.

- Demonstrate respect for all persons and appreciation for the race, age, color, religion, national origin or ancestry, sex, gender, disability, veteran status, genetic information, sexual orientation, or gender identity or expression.
- Demonstrate sound judgment, both in work with clients and in regard to oneself, such as seeking professional help for physical and emotional problems that interfere with professional functioning.
- Demonstrate honesty and integrity in work with client systems and in the classroom.

Review Process

Concerns regarding a student's application for progression will be reported to the director of the BSW program. Concerns may be identified during the Progression in the Major application review process or at any time before or after progression. Progression applications will be reviewed by the director of the BSW program. Concerns regarding any of the foregoing student expectations will be addressed by the BSW director directly with the student and the student's advisor. Major concerns regarding the student's ability to proceed in the program will be reviewed by the director of the BSW program with the administrative team of the SSW, including but not limited to the director of the SSW. A meeting will then be scheduled for review of the concerns with the student, faculty member(s) involved, the director of the BSW program and the director of SSW. Review of concerns may result in one or more of the following resolutions, through the director of SSW:

- Dismissal or resolution of the expressed concerns.
- A probationary period which includes a remediation contract with the student to address concerns that will be monitored by the BSW program director or designated faculty.
- Dismissal of the student from the Social Work major.
- A report to the CSU Office of Conflict Resolution and Student Conduct Services, in the event the concerns include possible violations of the Student Conduct Code.

Practicum and Internship

Students directly apply classroom knowledge, skills, and social work values through a six-credit supervised practicum, SOWK 286A, and SOWK 286B, in the sophomore year. In this practicum, students are matched with community agencies that require background checks before placement.

In the senior year, students fulfill a 10-credit field placement in a social work agency or program in a community setting. Field placement agencies generally require background checks also. Examples of available field placements include child and public welfare programs; hospitals, homeless and women's shelters, rehabilitation and mental health agencies, schools, adolescent residential care, geriatric centers, and correction programs. For a complete list of field placements, students may visit the Field Education page on the School of Social Work website (<https://www.chhs.colostate.edu/ssw/field/>). In their field placement and under supervision, students have the opportunity to demonstrate the required CSWE competencies.

Master of Social Work

The Master of Social Work (MSW) degree offered by CSU features a nationally recognized advanced generalist curriculum that is accredited by the Council on Social Work Education (CSWE) (<https://www.cswe.org/>). Students are prepared for roles as social work practitioners in complex, diverse, and dynamic settings and learn to promote human rights and individual, community, and global health and well-being. The School of Social Work offers different program options for completing the MSW degree.

- 1. Full Program** – This is the standard two-year program, starting every fall, with on-campus and in-person instruction. Students in this program complete three elective courses which enables them to complete one of five graduate certificate programs offered by the School of Social Work if they choose to do so.
- 2. Advanced Standing** – This option is available only to those who have earned a BSW from a program accredited by the Council on Social Work Education within the past seven years. The BSW degree must be granted prior to the beginning of advanced standing classes. Students attend one full year consisting of three semesters, beginning with the summer term. (View [s \(https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/advanced-standing-msw-program/\)](https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/advanced-standing-msw-program/) **chedule here.**)
- 3. Part-time Hybrid Learning Options** – The School of Social Work also offers a part-time hybrid program and advanced standing option that utilizes online and in-person instruction based at the cohort locations of Denver, Boulder, and Fort Collins. For additional information please visit the Distance MSW Program website (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/distance-master-of-social-work-program/>).
- 4. MSW/MPH Dual Degree** – In partnership with Colorado School of Public Health, the School of Social Work offers a dual degree MSW/MPH program. For information visit the **MSW/MPH website**.

Students who successfully complete this program will be prepared to pursue licensure in Colorado. Licensure requirements in other states and U.S. territories may differ. Students are encouraged to work with the department and the professional licensure board in the state in which they intend to pursue licensing to ensure all requirements are satisfactorily met.

The **College of Liberal Arts** aims to educate committed and active citizens and to develop in them an understanding of humans, including their history, literature, and art; their social, political, and economic systems; and their relationship to the environment. The College offers courses in the arts, humanities, and social sciences, which constitute the foundation of a liberal arts education.

College Programs

Undergraduate majors lead to one of four degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science. Descriptions of the specific departmental and interdepartmental majors and concentrations in the College of Liberal Arts are located in the following pages. Students should consider simultaneously completing the requirements of a second major or a departmental or interdisciplinary minor, either in the College of Liberal Arts or in another college. With careful planning, numerous combinations are possible within four years of study. The minimum scholastic average acceptable for graduation in any college program is a 2.000 average in all major courses in addition to the university's overall grade point average requirement of 2.000 for CSU courses.

Undergraduate Career Opportunities and Career Counseling

Graduates from the College of Liberal Arts enter a remarkable variety of careers. Degrees from the College of Liberal Arts prepare students for success in their professional, personal, and civic lives. The skills and dispositions students develop through study in the liberal arts are widely sought. In preparing themselves for future career opportunities students are encouraged to work closely with Academic Support Coordinators, departmental mentors, and career counselors. Through these conversations students will be encouraged to develop resumes, interviewing skills, and articulation of the ways in which their skills will

benefit potential employers. Students should also consider participating in internships to gain practical work experience.

Students preparing for law school can choose any major. Law schools seek above-average students with broad educational backgrounds and excellent communication, and analytical skills. Prelaw students, regardless of major, should design a course of study that develops their skills in speaking, writing and analytical capabilities. Law schools require an undergraduate degree for admission. Visit the Department of Political Science (<http://politicalscience.colostate.edu/undergraduate/prelaw/>) for more information.

Education Abroad

Because the knowledge of at least one other culture is valuable in understanding our own, students are encouraged to take a semester or longer to study outside of the United States as part of their overall program at CSU. Students interested in education abroad should plan, far in advance, by discussing opportunities with their advisor and by visiting the Office of International Programs (<http://educationabroad.colostate.edu>) in Laurel Hall.

Graduate Programs

A variety of liberal arts advanced degrees are available in the College. Academic degrees offered are Doctor of Philosophy, Master of Arts, Master of Science, Master of Fine Arts, and Master of Music. The last two are generally considered professional degrees.

The College offers three interdisciplinary master's degrees.

The Department of Anthropology and Geography (<https://anthgr.colostate.edu/graduate-programs/ma-in-anthropology/>) offers a master's degree in Anthropology with a specialization in International Development, with courses from across CSU. The Departments of English and Languages, Literatures and Cultures offer a joint master's program in foreign languages and the teaching of English as a second/foreign language. The LEAP Institute for the Arts offers a Master's in Arts Leadership and Cultural Management in collaboration with the College of Business, the College of Liberal Arts and others, that prepares students for leadership opportunities within and outside of the creative sector. Information on all three degree programs may be obtained from any participating department.

For detailed information about graduate programs, contact individual departments. See also the Graduate and Professional Bulletin.

International Studies Course Selection

Students must select a geographic option area, and from that select a minimum total of 18 credits, 15 of which must be Upper-Division (300- to 400-level), from at least three subject codes, from the following groups of courses.

- Select at least 6 credits from 1) History and Politics;
- Select at least 3 credits from 2) Thought and Cultures;
- Select at least 6 credits from 3) International Studies (course list applies to all geographic option areas);
- Select an additional minimum of 3 credits from among the three groups to bring the total to 18.

¹ Courses are to be selected with the approval of the Engineering advisor. A minimum of 7 credits must be upper-division (300- to 400-level)

² Each student is required to complete a minor in a foreign language. Contact the Department of Languages, Literatures and Cultures.

³ Students may need to obtain an override in order to register for some courses. For Engineering courses, students should see the appropriate Engineering department. For International Studies courses, students should contact the instructor.

⁴ To fulfill the International Studies Course Selection requirement, select a minimum total of 18 credits, of which at least 15 must be upper-division (300- to 400-level), from a minimum of three different subject codes. Students will choose an International Studies geographic option area, and from those course lists select: a minimum of 6 credits from 1) History and Politics; a minimum of 3 credits from 2) Thought and Culture; a minimum of 6 credits from 3) International Studies (list is same for all option areas); and an additional minimum of 3 credits of choice from lists 1, 2, or 3.

⁵ Select one course from the list of courses in category 3B of the All-University Core Curriculum (AUCC) except for L*** language courses.

⁶ Credit allowed for only one of LCHI 365, LGEN 465B, LJPN 365.

⁷ French (LFRE), German (LGER), or Spanish (LSPA) only.

⁸ French (LFRE) or German (LGER) only

⁹ To count toward the International Studies Course Selection, travel abroad must be to a country or area covered by the chosen geographic option.

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus.

Major in International Studies

College of Liberal Arts | Interdisciplinary Programs Main Office, Clark A 73

(970) 491-5818

inst.colostate.edu (<http://inst.colostate.edu>)

Andrea Duffy, Director

The International Studies major is an interdisciplinary program designed to help students understand the nature of diverse cultures and peoples. There are four concentrations: Asian Studies, European Studies, Latin American Studies, and Middle East and North African Studies. Courses are required in foreign language, geography, political science, economics, history, and international studies, with other elective courses chosen from these and many more disciplines across the college and university.

Learning Outcomes

Graduates of the International Studies major will demonstrate that they are competent and capable in:

- Writing effectively about the themes of International Studies and related fields
- Communicating cross-culturally through written and oral expression

- Thinking critically about international issues
- Applying an interdisciplinary approach to knowledge

Potential Occupations

Graduates in International Studies apply their education in a wide variety of careers, including those in international business, non-profit organizations, academics, public policy, law, government, city planning, engineering, environmental sustainability and clean energy, information systems, journalism, publishing, education, sales and marketing, management and administration, artistic production, mass media, communications, museums, entertainment, foreign service, and many other areas in need of intelligent, well-rounded, and broadly world-educated people. Some International Studies graduates enter graduate or professional schools for more specialized study in either international studies or one of many other disciplines. To enhance their career opportunities, majors are encouraged to consider participating in paid or volunteer work or internship opportunities, and to study abroad.

Concentrations

- Asian Studies Concentration
- European Studies Concentration
- Latin American Studies Concentration
- Middle East and North African Studies Concentration

Major in Interdisciplinary Liberal Arts

Interdisciplinary Liberal Arts
 Clark Building, Room A-73
 (970) 491-5421
[libartsmajor.colostate.edu \(http://libartsmajor.colostate.edu\)](http://libartsmajor.colostate.edu)

Kevin Foskin, Director

The Major in Interdisciplinary Liberal Arts is a B.A. degree program combining humanities, arts, languages, performance, media, communication, literature, and social sciences so as to foster interdisciplinary knowledge, core career competencies, personal development, professional excellence, interpersonal confidence and expertise, and a richer understanding of the complex world in which we live. Students create their own program of study, choosing courses within the College of Liberal Arts based upon their academic interests, personal curiosity, and future career goals.

To further increase depth and focus, and to enhance expertise and career opportunities, Interdisciplinary Liberal Arts students are required to complete a minor or an interdisciplinary minor from within the College of Liberal Arts.

Learning Outcomes

Students will demonstrate the following skills:

- Writing effectively about the knowledge and perspectives of their field of study, including
 - a. organization in a manner that aids the readers' comprehension as well as the writer's purpose;
 - b. use of accepted grammatical form, spelling, and punctuation;
 - c. use of language in a style that is appropriate to the writer's purpose;
 - d. effective support of claims; and
 - e. clear citation of information sources.
- Speaking effectively, including
 - a. creation of a logically constructed message;
 - b. adaptation of that message to a particular audience;

- c. use of accepted grammatical forms of standard American English dialect;
- d. use of appropriate and engaging language; and
- e. use of effective delivery skills.
- Communicating information effectively, including
 - a. understanding of data and digital humanities;
 - b. utilization of various media and visual/aural formats;
 - c. creative employment of design & information integration.
- Thinking critically about contemporary issues, particularly within various interdisciplinary perspectives and contexts, including
 - a. description of a policy, position, or artifact;
 - b. analysis of the policy, position, or artifact by identifying issues or articulating and then applying a critical framework or perspective;
 - c. clear articulation and support of conclusions based on that analysis/identification of issues; and
 - d. successful communication via 21st-century media competency and creative-skill-sets.
- Working collaboratively with others, employing
 - a. interdisciplinary critical tools and practices;
 - b. research as a foundation for evidence-based analysis; and
- Problem-solving and innovation in real-world contexts and existing realities.

Potential Occupations

Graduates in Interdisciplinary Liberal Arts apply their education in a wide variety of careers and/or academic professions, including public policy, politics, healthcare, artistic production, mass media, engineering, law, city planning, business, information systems, international business, journalism, publishing, education, sales and marketing, management and administration, government, communications, museum work, entertainment, foreign service, and many others. Many continue on to graduate or professional schools for more specialized study. To enhance their career, academic or professional opportunities, majors are encouraged to participate in paid or volunteer work or internship opportunities.

Requirements

Graduate Graduate Programs in Anthropology

The department offers graduate programs leading to a Master of Arts degree (Plan A thesis option or Plan B portfolio option). It also has a Master of Arts specialization in each of four programmatic areas: Health and Well-Being, Humans and the Environment, International Development and Globalization, and Professional Methods and Techniques. Students may develop a research project or professional program in these

programmatic areas, or in any area related to our faculty's research interests.

Health and Well-Being—studies the ways that human health and wellness are influenced by past and present sociocultural, environmental, biological, and biocultural forces, by drawing from broad and holistic perspectives on human well-being.

Humans and the Environment—investigates how past and present human activities influence the environment; the ways ecological and other processes affect human evolution and the human condition today; and the resilience of social and ecological systems.

International Development and Globalization—examines how local societies respond to global influences; the extent to which cultural meanings, beliefs, institutions, structures of inequality, and social relations between genders and among kin are changing as a result; and how processes of economic and community development can improve basic aspects of human welfare.

Professional Methods and Techniques—develops skills in a wide range of methods and techniques used by professionals in applied anthropology, federal and state natural resource agencies, and other arenas of social, historical, biological and spatial research about humans. These include qualitative research and interview protocols, quantitative analysis, GIS and remote sensing, archaeological field survey, historic archaeological methods, culture and heritage resource management, and paleoanthropological methods.

Students interested in graduate work should refer to the Graduate and Professional Bulletin, and the department's website (<http://anthropology.colostate.edu/>).

Special Course Fee: No.

ANTH 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Geography (GR)

GR 100 Introduction to Geography (GT-SS2) Credits: 3 (3-0-0)

Course Description: Major geographic themes applied to selected regions; physical environment, human-land relationships, regional analysis.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Geography (GT-SS2).

GR 102 Geography of Europe and the Americas (GT-SS2) Credits: 3 (3-0-0)

Course Description: Examines the physical and human geographies of Europe, including the former Soviet Union, and the Americas from the Southern Cone to Canada. Focus is on the content of these geographies, why they exist, and their current significance; supported by extensive map analysis.

Prerequisite: None.

Registration Information: Credit not allowed for both GR 102 and GR 180A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Diversity & Global Awareness 3E, Geography (GT-SS2).

GR 204 Sustainable Watersheds (GT-SC2) Credits: 3 (3-0-0)

Also Offered As: WR 204.

Course Description: Effects of climate, land use, and water use on the sustainability of water quantity and quality.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GR 204, GR 304, WR 204 or WR 304.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GR 210 Physical Geography Credits: 3 (3-0-0)

Also Offered As: ESS 210.

Course Description: Energy, mass budget, and human impacts on atmosphere, hydrosphere, and continental land surfaces.

Prerequisite: None.

Registration Information: Credit not allowed for both GR 210 and ESS 210.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 213 Climate Migrants Credits: 3 (3-0-0)

Course Description: Explore the various drivers of migration, emphasizing climate and others including biogeographic, political, economic, and social factors.

Prerequisite: None.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 220 Mapping, Cartography, and Spatial Thinking Credits: 3 (2-2-0)

Course Description: Spatial thinking is the science and art of making maps that play a key role in enabling geographers to visualize space and spatial patterns, as well as, convey spatial information to others. Introduction to the science of spatial thinking, including collecting spatial information and making maps, modern geographic information sciences (GIS) that have evolved from cartography, and spatial analysis techniques that are fundamental to Geography.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 303 Mountain Geography Credits: 3 (3-0-0)

Course Description: The physical and human dimensions of mountains. Examples from mountains around the world with case studies from Colorado.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: Junior standing.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 305 Geography of Global Health Credits: 3 (3-0-0)

Course Description: Study, research and practice of global health using an ecological approach that integrates health with spatial thinking.

Focuses on a common set of issues which transcends boundaries, both domestic and international, and a set of actions to address the geographic burden of disease. Key principles and concepts, history of global health transitions, common and emerging health issues.

Prerequisite: ANTH 200 or GR 100 or INST 200.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 311 GIS for Social Scientists Credits: 3 (1-4-0)

Course Description: Applications of GIS techniques useful to the social sciences. Mapping techniques and GIS toolkits are practiced in lab.

Prerequisite: GR 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 315 Quantitative Geographical Methods Credits: 3 (3-0-0)

Course Description: Methods to collect, analyze, display, and model geographic data.

Prerequisite: GR 100.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 320 Cultural Geography Credits: 3 (3-0-0)

Course Description: Geographic analysis of cultural phenomena, elements emphasizing human-land relationships and spatial patterns of agriculture, cities, language, religion.

Prerequisite: GR 100.

Registration Information: Sections may be offered: Online.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

GR 323 Remote Sensing and Image Interpretation Credits: 3 (2-2-0)

Also Offered As: NR 323.

Course Description: Remote sensing systems and applications; characteristics of photographic, scanner and radar images; imagery interpretations.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: GR 323, GR 503, NR 323, NR 503.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 330 Urban Geography Credits: 3 (3-0-0)

Course Description: Spatial distribution of urban areas and the geographic similarities and contrasts that exist between and within them.

Prerequisite: GR 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 331 Geography of Farming Systems Credits: 3 (3-0-0)

Course Description: Geographic analysis of farming systems worldwide and by region; their development over time, human-land relationships, and spatial patterns.

Prerequisite: GR 100.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 333 Glaciers and Climate Change Credits: 3 (3-0-0)

Course Description: Glacier mass balance, dynamics, past fluctuations, and glaciers' relation to climate change.

Prerequisite: GR 100 or GR 210 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150.

Registration Information: Credit allowed for only one of the following: GEOL 381A2, GR 333 and GR 381A2.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 345 Geography of Hazards Credits: 3 (3-0-0)

Course Description: Causes, effects, distributional patterns, and human adjustments to environmental hazards.

Prerequisite: GR 210.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 348 Biogeography Credits: 3 (3-0-0)

Course Description: Species distribution of plants and animals in relation to earth history and environments, evolution, and ecology.

Prerequisite: GR 000 to 99999 - at least 3 credits.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 400 History of Theory-Anthropology and Geography Credits: 3 (3-0-0)

Also Offered As: ANTH 400.

Course Description: Anthropological/Geographical theory from its beginnings with Aristotle through recent developments into the 20th century.

Prerequisite: (ANTH 100 or ANTH 200) and (ANTH 120 and ANTH 121 and ANTH 140 or GR 100).

Registration Information: Junior or senior standing. Sections may be offered: Online. Credit not allowed for both ANTH 400 and GR 400.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 410 Climate Change: Science, Policy, Implications Credits: 3 (3-0-0)

Course Description: Implications and consequences for earth systems including the cryosphere, hydrosphere, biosphere, and human systems.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: Junior standing.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 415 The Geography of Commodities Credits: 3 (3-0-0)

Course Description: Social relations, international trade, and environmental impacts surrounding the production, transportation, exchange, and consumption of commodities.

Prerequisite: GR 100.

Registration Information: Junior standing.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 420 Spatial Analysis with GIS Credits: 4 (3-2-0)

Course Description: Theory, application of geographic information systems for spatial analysis; conceptual basis of GIS, nature and use of geographic data, case studies.

Prerequisite: GR 000 to 99999 - at least 3 credits.

Registration Information: Credit not allowed for both GR 420 and NR 322.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 430 Land Change Science and Remote Sensing Credits: 3 (3-0-0)

Course Description: Local case studies and global cases of land-use/land-cover changes in rural, peri-urban, and urban areas.

Prerequisite: GR 100.

Registration Information: Junior standing.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 431 Land Change Science Lab Credit: 1 (0-3-0)

Course Description: Utilize advanced remote sensing techniques and satellite images, air photos, and ancillary data to investigate land-use and land-cover changes.

Prerequisite: GR 323 or NR 323 or GR 503 or NR 503.

Registration Information: Must have concurrent registration in GR 430.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 440 Political Geography Credits: 3 (3-0-0)

Also Offered As: POLS 440.

Course Description: Examines the meaning of political space; states and nations; competition for territory, including methods and justifications; the structure of political space focusing on states; geopolitics; and the state in an era of globalization. Concepts are illustrated by real-world situations.

Prerequisite: GR 100 or POLS 101.

Registration Information: Sophomore standing. Sections may be offered: Online or Mixed Face-to-Face. Credit not allowed for both GR 440 and POLS 440.

Grade Mode: Traditional.

Special Course Fee: No.

GR 448 Forest Biogeography and Climate Change Credits: 3 (3-0-0)

Course Description: Forest adaptation and conservation in relation to global change with a focus on climate change.

Prerequisite: ESS 211 or ESS 311 or F 311 or GR 100 or GR 210 or ESS 210 or GR 303 or GR 348 or GR 410.

Registration Information: Junior standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 482A Study Abroad--Vietnam: Land Change Science and Remote Sensing Credits: 3 (0-0-3)

Course Description: Vietnam specific local case studies of land-use/land-cover changes in rural, peri-urban, and urban areas. Integrate these local cases as examples that relate to global cases looking at the drivers of land-use/land-cover changes. The broader implications of these changes are discussed, and examples of these implications are witnessed through field visits.

Prerequisite: GR 100.

Registration Information: Sophomore standing. Credit not allowed for both GR 430 and GR 482A.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 487 Internship Credits: Var[1-9] (0-0-0)

Course Description: Academic-based work experience with selected organizations or agencies. Supervised application of principles of geography.

Prerequisite: GR 100 to 499 - at least 9 credits.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 493 Capstone Seminar Credit: 1 (0-0-1)

Course Description: Exploration of the linkages among the human and physical geography sub-fields, geographic techniques, and other natural and social sciences as well as how professional geographers approach issues.

Prerequisite: None.

Registration Information: Junior standing. Concurrent registration in one of the following AUCC Category 4A courses for the Major in Geography: GR 303, GR 410, GR 415, or GR 430.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 495 Independent Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

GR 503 Remote Sensing and Image Analysis Credits: 4 (3-3-0)

Also Offered As: NR 503.

Course Description: Interpretation and analysis of photographic, multispectral scanner, and radar data; sensor systems; applications to resource management.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: GR 323, GR 503, NR 323, or NR 503.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 548 Biogeography Credits: 3 (3-0-0)

Course Description: Species distribution of plants and animals in relation to earth history and environments, evolution, and ecology.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate Standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 592 Special Topics in Geography Credits: 3 (0-0-3)

Course Description: Recent papers from the literature will be used to foster discussion among participants.

Prerequisite: None.

Registration Information: Graduate standing.

Grade Mode: Traditional.

Special Course Fee: No.

Major in Anthropology

The mission of the Department of Anthropology and Geography is to:

- 1) offer and maintain instructional programs that provide a comprehensive overview and analyses of people and their cultures, both past and present;
- 2) conduct research in order to advance and expand knowledge of the fields of anthropology and geography;
- 3) participate actively in programs of interdisciplinary research.

The Department of Anthropology and Geography houses a faculty of cultural anthropologists, archaeologists, biological anthropologists,

and geographers whose scholarship spans the breadth of the human experience. The program prepares undergraduate students to describe, analyze, and interpret the human condition. An examination of the social, environmental, and evolutionary contexts in which the human species is embedded defines most course work in the discipline. The program is integrative, drawing from geography, biology, the humanities, and other social and natural sciences. Geography figures prominently in our program and provides an important spatial lens through which human groups are examined over time. Four programmatic areas define faculty research and scholarship with which students can engage: humans and the environment, international development and globalization, health and well-being, and professional methods and techniques. In the education of undergraduates, the department values and promotes experiential training, primary research as well as public engagement and education.

The research endeavors of the anthropology faculty are trans-disciplinary and international. They are interested in diverse topics including but not limited to contemporary culture, ethnicity, linguistics, comparative religion, virtual worlds, subsistence patterns, archaeology, human ecology, human anatomy, human evolution, biogeography, land cover/land use patterns, and the behavior of non-human primates.

Anthropology majors follow a liberal arts curriculum that provides a broad education with an emphasis on learning how to learn. The department has ten research and teaching laboratories and three summer field schools; the Ethnographic Field School, the Archaeology Field School, and the Paleontology Field School.

Undergraduate students can pursue a general anthropology degree focused on an appreciation human diversity, past and present, from a broad and holistic perspective. Students can also declare a concentration within the program. Declaring a concentration allows for a focused course of study, specializing in the particular subfield of interest. Within each concentration (Archaeology, Biological Anthropology, and Cultural Anthropology), specific categories of classes guide students in learning the major theories, methods, and applications related to the modern practice of our discipline. Along with our offerings of world class field schools, course work in archaeological, biological, and ethnographic methods and geographical techniques are encouraged in order to further gain experience and perspective. Upon graduation, students are prepared for a diverse array of jobs or advanced training in graduate school. Students come away with a respect and appreciation for the diversity of human existence.

Learning Outcomes

Students will:

- Employ anthropological theory and qualitative/quantitative research methods to describe and analyze human biological and cultural variation over time and across space.
- Describe and evaluate the inter-relationships between environments, health and well-being, and human cultural and biological evolution.
- Synthesize anthropological theory, methods, and data to formulate arguments both orally and in written format.
- Articulate anthropology to non-specialists and explain anthropological concepts across subfields and/or with other social sciences and humanities disciplines.
- Transfer knowledge gained in anthropology program to a career trajectory after graduation.

Potential Occupations

Anthropology, like many majors in the liberal arts, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Anthropology majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participating in internships and cooperative education opportunities is highly recommended to enhance students' practical training and development. Careers for graduates are available in international development, health care, education, business, natural resource management, and government. Graduates who go on for advanced studies can pursue careers in anthropology or attain advanced positions with the possibility of rising to top professional levels.

Some career opportunities for Anthropology graduates include, but are not limited to: museum curator/researcher, genealogist, international relief representative, salvage archaeologist, collections assistant,

resource specialist, classical or historical anthropologist, cultural affairs officer, diplomatic service representative, immigration or foreign service officer, linguist, educational television researcher, forensic osteologist, biographical writer, scientific/technical writer, reporter, ethnographic photographer, anthropological linguist, rural development worker, ethnic groups' special concerns advocate, intercultural educator, medical anthropologist, grant writer, psychological anthropologist, international development administrator, public relations representative, public opinion pollster, sales/marketing representative, consultant for cross-cultural relations, personnel worker, geographic information systems specialist.

Major in Anthropology, Archaeology Concentration

The Archaeology concentration focuses on the Americas, and includes prehistoric and historic archaeology. The faculty members of this sub-discipline have expertise in:

- Rocky Mountain and Plains archaeology
- Paleo-Indian studies
- Hunter-gatherer ecology
- Taphonomy
- Zooarchaeology
- Public archaeology
- Andean archaeology
- Inca and Spanish empires

- Mining communities
- Mesoamerican archaeology
- Landscape archaeology
- Geoarchaeology
- Legacies of Resilience Project (LORE-LPG)

Special resources include the Center for Mountain and Plains Archaeology, the MesoAmerican lab, the Center for Archaeogeophysics and Geoarchaeology, and the Cultural Resources section of the Center for the Ecological Study of Military Lands. The archaeology program sponsors an annual field school each summer and houses the CSU Archaeological Repository.

Major in Anthropology, Biological Anthropology Concentration

Over the past half century, Biological Anthropology has undergone tremendous change from a discipline that was defined by a descriptive, typological approach to human morphology (the study of shape) to one that includes both experimental and comparative analyses in a population-based framework.

Biological anthropologists continue to cross traditional disciplinary boundaries and interact with both the physical and natural sciences including biology, anatomy, genetics, chemistry, biometry, and endocrinology as well as the social sciences.

The expertise of existing faculty in Biological Anthropology at CSU includes:

Human skeletal biology
Forensic anthropology
Evolutionary theory
Neanderthal paleobiology and paleobiogeography
Dental anthropology

Early hominin feeding ecology
Taphonomy
Plio-Pleistocene Africa
Pleistocene Asia
Primate origins, biology, and locomotion

Two broad themes exist within biological anthropology. The first emphasizes evolutionary theory and morphological transformations, and the second is concerned with adaptations that are the product of the interaction between human biology and culture. Current faculty research addresses both of these themes.

Special resources include the Bone Lab, the Zooarchaeology Lab, the Human Osteology Lab, the 3-D Imaging and Analysis lab, and the Primate Origins lab. The biological anthropology program sponsors an annual paleontology field school each summer in Wyoming. Existing faculty also have geographic foci significant to their research. Research areas include Uzbekistan, Kazakhstan, Croatia, Kenya, and Tanzania.

Major in Anthropology, Cultural Anthropology Concentration

The Cultural Anthropology concentration focuses on contemporary experiences of culturally distinct communities encountering a rapidly globalizing political economy. Students are provided with robust training in mixed methods, community-based approaches, and applied anthropology. Topically, faculty investigate issues related to the transformation of individual experience and community relations within the context of economic development, governmental and nongovernmental policy, and environmental change. Increasingly, faculty seek to understand the way subjective and material well-being are impacted by the rapidly changing contexts of modernity. Topics of research interest include:

- Human-environment interactions
- Community and economic development

- Health and well-being
- Cultural psychiatry
- Disasters and resilience
- Gender
- Culture continuity and change

The faculty are passionate about teaching, and they strive to bring excitement and relevance to the classroom by infusing it with their practical field experiences. Cultural faculty conduct their research in India, Southeast Asia, Central Asia, Africa, the Caribbean, New Orleans, Native North America, and in virtual reality. Students concentrating in Cultural Anthropology explore issues of place and space, cultural theory, cultural content and methods.

Minor in Anthropology

Anthropology focuses on the evolution of the human condition and provides a cross-cultural view of humanity. The description and explanation of human activities in other societies and during different periods of time provides a sense of perspective for individuals operating within their own culture. A minor may be focused on one or more of the sub-disciplinary divisions such as biology, archaeology, cultural anthropology, or applied anthropology. The minor may also be distributed across the fields, similar to the requirements of the major.

To declare this minor, please visit Clark B 218.

Requirements Effective Fall 2001

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Major in Geography

The Geography major is housed in the Department of Anthropology and Geography. Through coursework and internship opportunities, majors are provided with a broad background in geographic thinking. The major emphasizes interactions between humans and the environment in an era of rapid global change. Critical study of diverse relationships between space, place, humans, built and natural environments allows students to interpret geographic features, patterns and processes.

The Geography curriculum also concentrates specifically on mountain ecosystems and human-environment interactions. Coursework takes advantage of faculty expertise in these areas of study, some of which are specific to the state of Colorado. Geography faculty use a wide range of research methods, including geographic information systems (GIS), remote sensing, spatial modeling, spatial statistics, participatory methods and ethnography to address applied research questions in Colorado, the Rocky Mountains, Patagonia, Southeast Asia, Latin America, Melanesia, and Africa. Undergraduate majors can expect to gain knowledge of and/or participate in faculty research related to:

1. Climate change implications for society and ecosystems
2. Land-use and land-cover change
3. Critical human geography
4. Critical Health geographies
5. Biogeography
6. Livelihood systems
7. Conservation
8. Cultural geography
9. Urban geography
10. Economic geography
11. Political/electoral geography
12. Geography of virtual worlds

The Geography major is built on the core values the Department of Anthropology and Geography promotes. These values emphasize

experiential training, primary research, public engagement, and education.

Learning Outcomes:

Students will demonstrate:

1. Mastery of the unifying themes of human and physical geography, as well as knowledge of the diverse conceptual and methodological approaches present in the discipline of geography.
2. The ability to identify, describe, and interpret spatial patterns and structures.
3. A critical understanding of relationships between humans and the environment, with a specific focus on mountain systems and local cultures.
4. An ability to present geographic concepts, approaches, methodologies, and applications in written, oral, cartographic, and other visual forms.
5. An understanding of the discipline's relevance to everyday life.
6. An ability to communicate effectively and respectfully, including critical thinking and discussion skills.

Potential Occupations:

Like many other majors in Liberal Arts, the Geography major provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Geography majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Careers for graduates vary depending upon your focus in Geography. Geographers often work in international development, Foreign Service, education, conservation/natural resource management, urban and regional planning, data analysis, data management, GIS analyst, marketing, and business. Graduates who go on to advanced studies can pursue academic careers in geography.

Minor in Geography

The minor in Geography examines the critical interactions among space, place, people and the built and natural environment. These perspectives are used to interpret the spatial and temporal distribution of features and processes by applying spatial techniques and information technologies such as Geographic Information Systems (GIS) and remote sensing.

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Certificate in Museum and Cultural Heritage Studies

Earning a Certificate in Museum and Cultural Heritage Studies prepares students for entry-level careers in museums, cultural heritage sites, and similar venues that promote public outreach and education, and provides a solid foundation for students who wish to pursue advanced studies in the field of museum studies. Core courses introduce students to the history of museum and cultural heritage management, administration, curation, artifact handling, collections management, interpretive planning, exhibitions, education, ethics, and working with indigenous communities.

Requirements Effective Fall 2020

Courses used to satisfy requirements outside this certificate cannot count toward completing this certificate. If using a course toward major/concentration/minor/honors requirements, the student must take a different course for this certificate.

Additional coursework may be required due to prerequisites.

Master of Arts in Anthropology

The Master of Arts in Anthropology at CSU prepares our students for entrance into a Ph.D program and for non-academic careers. The program builds on the diverse research interests of our faculty who specialize in cultural anthropology, archaeology, and biological anthropology as well as human and physical geography. The program options include writing a thesis or developing a portfolio as the principle demonstration of their preparedness for further study or professional work.

Students who are conferred an M.A. from the CSU Anthropology Department will:

1. Demonstrate an understanding of anthropological theory and method and how to apply them appropriately.
2. Be able to engage in independent research that addresses academic questions or societal challenges.
3. Demonstrate awareness of and respect for human diversity across space and time.
4. Possess the academic background and skills to enter a Ph.D program in anthropology or a job related to the discipline.

Requirements

Effective Fall 2020

Plan A

The thesis option must consist of a minimum of 30 semester credits of course work concentrated in anthropological areas relevant to the participant's professional goals. The thesis is the culmination of a research project carried out by the student under the guidance of his or her advisor. A final examination consists of a defense of the thesis, as well as other parts of the program of study.

Plan B

The non-thesis option is intended for students seeking development of an understanding of Anthropology which will allow them to move on to a PhD program in Anthropology, or be incorporated in their work. Plan B students are expected to take a more broadly distributed series of

courses and to show less specialization than that which characterizes Plan A programs of study.

Requirements for Plan B are a minimum of 35 credits of study. Students must complete a portfolio of work demonstrating both the breadth of their understanding of Anthropology and their own area of specialization, selected in consultation with the student's advisor. A final examination consists of a defense of the portfolio, as well as other parts of the program of study.

Ph.D. in Anthropology

The Ph.D. in Anthropology at CSU supports advanced coursework and research with a focus on place, space, and adaptation. Students achieve this perspective on the discipline by engaging with a curriculum infused with geographic methods and approaches. This program provides students with the skills and expertise to address research questions that 1) sit at the intersection of anthropology and geography, 2) apply geographic methods to anthropological questions, and 3) critically evaluate the impact of place and space on human/ecosystem adaptation.

Major in Art, B.F.A.

Throughout history, art has been a fundamental language of the human spirit. Visual arts express human experience through an ever-widening range of media and materials, some of which include: oils, acrylics,

pastels, charcoal, clay, plaster, steel, bronze, wood, copper, litho stones, and digital media. Visual artists create abstract works and images of objects, people, nature, topography, and events. The Department of Art and Art History offers several options of study: The B.F.A. (Bachelor of Fine Arts) degree with studio concentrations in Drawing, Electronic Arts, Fibers, Graphic Design, Metalsmithing, Painting, Photo Image Making, Pottery, Printmaking, and Sculpture; and the B.F.A. degree with a concentration in Art Education. The B.A. (Bachelor of Arts) degree with concentrations in Integrated Visual Studies and Art History are all professional degrees, leading to related art careers.

Learning Outcomes

Students will demonstrate:

- Fundamental knowledge and mastery of media and processes necessary to communicate meaning in a work of art.
- Ability to communicate clearly about their own art and the art of others.
- Knowledge about contemporary art and motivation to view and discuss current local, regional, and national exhibitions. Students well versed on contemporary art would:
 - a. regularly read reviews of exhibitions in local and national newspapers;
 - b. regularly read art periodicals;
 - c. attend multiple exhibitions; and
 - d. be knowledgeable about contemporary artists in their discipline (i.e., nationally known painters, sculptors, etc.).

Potential Occupations

Art graduates possess a number of transferable communication, analytical, and critical thinking skills appropriate for work in traditional business as well as positions in academia and roles as freelance artists, graphic designers, art educators, art historians, studio fine artists and as “creatives” in government and industry. Many employers appreciate art majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participation in internships, cooperative education, and service learning opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Depending on student interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: art appraiser, art director, art therapist, exhibit designer, art critic, jeweler, gallery director, graphic design artist, free lance artist, sculptor, woodworker, welder, foundry worker, studio photographer, technical illustrator, painter, textile designer, weaver, art educator, art historian, art curator, art librarian, art museum educator, web page designer, photo lab technician, art restorer, and master printer.

The Department of Art and Art History offers the B.F.A. (Bachelor of Fine Arts) two options of study: The B.F.A. degree with studio concentrations in Drawing, Electronic Arts, Fibers, Graphic Design, Metalsmithing, Painting, Photo Image Making, Pottery, Printmaking, and Sculpture; and the B.F.A. degree with a concentration in Art Education. Both are considered professional degrees.

The curriculum progression in the department for the B.F.A. is similar within the concentrations and some concentrations may have restrictions. Freshmen study foundation courses in form and observation, color and composition, materials and space, and global art history.

Sophomores explore various concentration courses and become familiar with the studio practices for the concentration studios housed in separate wings that feature large, well-equipped studio spaces designed for exploration of work in a specific media. Juniors and seniors focus on advanced topics in their chosen concentration by taking one upper-division course in their chosen field each semester. Additionally, at this level art education students are engaged in pedagogical course work.

Learning Outcomes

Students will demonstrate:

- Fundamental knowledge and mastery of media and processes necessary to communicate meaning in a work of art.
- Ability to communicate clearly about their own art and the art of others.
- Knowledge about and be well versed in contemporary art and demonstrate the motivation to view and discuss current local, regional, and national exhibitions.

In addition to the outcomes above, students with an art education concentration will demonstrate:

- Integrate literacy, numeracy, and other disciplines while providing appropriate accommodation and differentiation strategies in the art experiences they develop for their students.
- Effectively document, analyze, and reflect on student learning and make appropriate changes for more effective instruction.
- Proficiency in all areas of the Colorado Teacher Quality Standards.

Major in Art (B.F.A.), Art Education Concentration

The Art Education concentration embraces the artist-teacher concept, allowing students to develop a strong studio concentration while preparing to teach art at the K-12 level. The program is comprehensive, meaning students take course work to prepare them to teach at the elementary and secondary school levels. One full semester of student teaching at both the elementary and secondary levels is preceded by in-depth field work with elementary, secondary, and exceptional populations. Students can expect practicum or service-learning experiences each semester in the program. As a result, the Art Education program enjoys good working relationships with school districts in the state of Colorado and the Gregory Allcar Museum of Art on the CSU campus—all of which host our students.

Throughout the program students engage in philosophical and theoretical studies, contemporary pedagogical practices, and arts-based research to prepare for the complexities of the K-12 art studio. Additionally, community-based and museum experiences give art education students the ability to situate their role in the context of contemporary visual and material culture.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (CEP) (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>) for general information. Art Education students must maintain a 2.750 cumulative GPA for admission to the Art Education program, eligibility for student teaching placement, and licensure.

Requirements Effective Spring 2019

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

The Art Education concentration requires a 2.75 cumulative CSU GPA, and that students pass the PLACE exam. Admission to the Center for Educator Preparation (CEP) (<http://www.cep.chhs.colostate.edu/students/teacher/admissions.aspx>) is also required. Fingerprint and background check.

A minimum grade of C (2.000) or better is required in all Art and Education coursework.

Major in Art (B.F.A.), Drawing Concentration

The Drawing concentration includes a solid foundation in the basics of drawing, plus a strong emphasis on the advanced development of drawing as an art form in its own right. Initially, courses expose students to working from observation and to thinking critically about observation as an attention-orienting skill. A variety of fundamental skills, research habits, techniques, and materials are explored through basic exercises and open projects. Perception skills and visual vocabulary are introduced to students through assignments, group critiques, and discussions. Throughout the program, students are expected to acquire, develop, and refine skills and to engage in an exploration of personal expression and ideas. Drawing concentration students are expected to be highly motivated individuals dedicated to the practice of drawing as a sophisticated art, and dedicated to thinking critically about their practice.

Our program will assist them in developing their making and thinking aptitudes towards a body of work which displays an advanced level of visual challenge and aesthetics, as well as conveying a sense of content and meaning.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

A minimum grade of C (2.000) or better is required in ART 335, ART 336, ART 435, ART 436.

Major in Art (B.F.A.), Electronic Art Concentration

The Electronic Art concentration offers students the chance to create and critique within the context of digital methods and materials. Integrating digital media theories into their creative practice, students work with software and hardware to explore humanity's relationship with the digital realm. These explorations can include game theory, experimental video techniques, net.art, user interface, software creation, the creation of social tools, installation work, physical computing, and code within the context of visual arts. Electronic art students are also encouraged to

incorporate interdisciplinary, interactive, and collaborative practices in their work.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

A minimum grade of C (2.000) or better is required in ART 357, ART 358, ART 457, ART 458.

Major in Art (B.F.A.), Fibers Concentration

The Fibers concentration fosters creativity and artistic expression in a wide variety of textile media. Students develop skills in visual communication as they investigate the language of textiles and its role in contemporary art and design. Undergraduate courses provide foundations in weaving and surface-design methods—including fabric printing, painting, dyeing, and embellishment. Classes also promote creative investigation of off-loom constructions, feltmaking, mixed media, and installation.

Studio work is enriched with research in the collections of the Gregory Allicar Museum of Art and the Avenir Museum of Design and Merchandising. Students receive guidance in professional practices as they direct their talents toward careers in art, design, and education. CSU alumni exhibit their work regionally, nationally, and internationally;

teach at public and private schools, colleges, and universities; and lead workshop programs throughout the U.S. Our alumni also jury and curate exhibitions, work as designers, and write for national publications. Study abroad and internship opportunities are available. Suggested non-art electives that would enhance the major are: DM 120, AM 363, and AM 460.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

Major in Art (B.F.A.), Graphic Design Concentration

The Graphic Design concentration is closely aligned with the artistry, practices, and standards of excellence in the contemporary design professions. With an emphasis on rich processes, conceptual problem-solving, and technical proficiency, students are able to create effective expressions of visual communication in a variety of print and digital media. Experimental explorations of typography, illustration, and design systems are expected from participants of the program, as well as applications of design that address social impact and awareness. Design theory, history, and professional practices are discussed regularly with faculty. Projects and activities are designed to prepare

students for the varied challenges and opportunities for professionals in visual communications.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

Major in Art (B.F.A.), Metalsmithing Concentration

The Metalsmithing concentration offers students the opportunity to explore a range of traditional techniques and processes, while emphasizing formal and conceptual development within their own artistic practice. Class projects introduce and strengthen technical skills, and provide awareness of both historical and contemporary practice within the field.

Students are encouraged to enter regional and national juried exhibitions, to participate in workshops and conferences, and ultimately to locate and

establish a place for themselves within the field of contemporary jewelry and metalsmithing, either professionally, academically, or both.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

A minimum grade of C (2.000) or better is required in ART 345, ART 346, ART 445, ART 446.

Major in Art (B.F.A.), Painting Concentration

The Painting concentration gives students the ability to explore, develop, and gain personal understanding of the visual language and technical aspects of the painting medium. Additionally, it encourages the development of material experimentation and conceptual thinking in the upper-level courses. Students begin by working from observation, developing skills and proficiency in oils. As students gain skills and abilities with oil paints, they are encouraged to challenge the very notion of what painting is by exploring alternative tools, methods, and surfaces. Discipline and perseverance are strengthened as students develop a unique voice, conceptually and formally. In their senior year,

students work closely with the Painting faculty to develop a distinctive body of work that is sophisticated in its content and scope.

Major in Art (B.F.A.), Photo Image Making Concentration

Courses in the Photo Image Making concentration enable students to explore artistic, personally-driven aspects of the photographic medium. Projects and assignments encourage each student to explore individual directions, with equal emphasis given to intuitive and intellectual concerns. Student work is evaluated for aesthetic qualities, technical excellence, and conceptual development. The curriculum is designed to help students build a strong foundation in the fundamentals of contemporary photographic practice, while emphasizing the medium's expressive potential and underscoring its connections to the contemporary art world. Interdisciplinary and experimental work is encouraged, as are more traditional approaches and conventional processes. Facilities are available to enable offerings in a wide range of processes and techniques, from silver-based image production

and digital capture/output methods to alternative processes such as cyanotype and palladium printing. In short, information and instruction are provided for whichever image making strategies a student wishes to pursue.

Major in Art (B.F.A.), Pottery Concentration

The Pottery concentration is committed to providing a comprehensive curriculum in the range of processes and concepts present in contemporary ceramic art. The philosophy of the area encourages the concurrent development of critical, technical, and manual skills. Issues and debates in contemporary crafts, sculpture, architecture, design, and

studio pottery are presented alongside a rigorous exploration of forming and decorating processes and technology.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon

completion of two ART studio courses for transfer students and students who have changed majors. A minimum grade of C (2.000) or better is required in ART 340 ART 341, ART 440, ART 441.

Major in Art (B.F.A.), Printmaking Concentration

Printmaking courses at the undergraduate level are structured to develop a strong personal artistic vision and instill the self-confidence necessary to allow ongoing creative growth through a variety of media. A sound technical background in Lithography, Screen-Printing, Intaglio, Relief Woodcut, Post-Digital methods and encouragement of experimental hybrid techniques will provide students with the professional skills needed to cultivate a robust studio practice and explore new innovative research based on that foundation. The community workshop atmosphere of the printmaking area immerses students in group collaboration as well as personal exploration, thus preparing each student for real-world occupational applications of their research. Through sharing visual concepts and technical investigations on a regular basis, students learn how to apply newly acquired knowledge

productively and intuitively, while simultaneously developing desired skills for prospective employers. Interactive artistic dialog between highly motivated printmakers is a cornerstone to all printmaking curriculum, leading to a wide array of unique and diverse avenues of creative inquiry.

Major in Art (B.F.A.), Sculpture Concentration

The Sculpture concentration challenges students to create a vibrant fusion between technical process, conceptual expression, and professionalism. Students are encouraged to experiment and innovate while exploring content in the areas of object-making, installation, site-based work, performance, time-based art, and digital processes. Through the integration of readings, classroom discussion, presentations, and individual research, the sculpture curriculum is designed to enable students to explore concepts and content relevant both in today's contemporary society and in the art world. The synthesis of this broad spectrum of information is intended to aid students as they develop a unique personal vision for their artwork and studio practice. Refined

technical skill will be developed and is a requirement for students as they progress through the Sculpture concentration.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

A minimum grade of C (2.000) or better is required in ART 370, ART 371, ART 470, ART 471.

Major in Art, B.A.

Throughout history, art has been a fundamental language of the human spirit. Visual arts express human experience through an ever-widening range of media and materials, some of which include: oils, acrylics, pastels, charcoal, clay, plaster, steel, bronze, wood, copper, litho stones, and digital media. Visual artists create abstract works and images of objects, people, nature, topography, and events. The Department of Art and Art History offers several options of study: The B.F.A. (Bachelor of Fine Arts) degree with studio concentrations in Drawing, Electronic Arts, Fibers, Graphic Design, Metalsmithing, Painting, Photo Image Making, Pottery, Printmaking, and Sculpture; and the B.F.A. degree with a concentration in Art Education. The B.A. (Bachelor of Arts) degree with concentrations in Integrated Visual Studies and Art History are all professional degrees, leading to related art careers.

Learning Outcomes

Students will demonstrate:

- Fundamental knowledge and mastery of media and processes necessary to communicate meaning in a work of art.
- Ability to communicate clearly about their own art and the art of others.
- Knowledge about contemporary art and motivation to view and discuss current local, regional, and national exhibitions. Students well versed on contemporary art would:
 - a. regularly read reviews of exhibitions in local and national newspapers;
 - b. regularly read art periodicals;
 - c. attend multiple exhibitions; and

- d. be knowledgeable about contemporary artists in their discipline (i.e., nationally known painters, sculptors, etc.).

Potential Occupations

Art graduates possess a number of transferable communication, analytical, and critical thinking skills appropriate for work in traditional business as well as positions in academia and roles as freelance artists, graphic designers, art educators, art historians, studio fine artists and as “creatives” in government and industry. Many employers appreciate art majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participation in internships, cooperative education, and service learning opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Depending on student interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: art appraiser, art director, art therapist, exhibit designer, art critic, jeweler, gallery director, graphic design artist, free lance artist, sculptor, woodworker, welder, foundry worker, studio photographer, technical illustrator, painter, textile designer, weaver, art educator, art historian, art curator, art librarian, art museum educator, web page designer, photo lab technician, art restorer, and master printer.

The B.A. (Bachelor of Arts) in Art is a liberal arts degree with two concentrations: Art History and Integrated Visual Studies. The Art History concentration seeks to develop students' critical and analytical skills and ability to comprehend global visual arts within social, historical, cultural, and aesthetic frameworks. Students learn about the visual and material culture of societies from around the world, reflecting the global turn in the discipline. Traditional courses in Western art history are balanced against courses in the Arts of Africa, Native American Art, the Arts of the Ancient and Colonial Americas, and Pacific Art. Because of the comparative nature of Art History, students in the concentration are required to complete courses in a second field, a foreign language, and the philosophy of aesthetics. A capstone seminar introduces students to the fundamental toolbox of methodological approaches taken by professional art historians.

The Integrated Visual Studies concentration is an ideal program for students to develop skills as makers and thinkers. By making work and interpreting images from visual art, photography, film, television, and commercial imagery, students learn to analyze visual communication from a variety of aesthetic, theoretical, scientific, economic, sociological and historical viewpoints. Students take a relatively equal ratio of studio and academic classes that foster critical awareness of how society is reflected and produced through visual means in the twenty-first century. Visual Studies students have the curricular flexibility to pursue other academic interests and extracurricular activities with greater intensity, as well as to pursue explorations in the theoretical and technical aspects of art making within a studio practice.

Both concentrations begin their study with the foundation program. Freshmen study foundation courses in form and observation, color and composition, materials and space, and global art history.

Student Learning Outcomes

Art History students will demonstrate:

- Knowledge of the tools and techniques of art historical research and scholarship.
- Communication skills, original thinking, art historical interpretation, and research skills in written form, resulting in a lengthy work of original scholarship.
- Communication skills, original thinking, art historical interpretation, and research skills in oral form.
- Demonstrate general knowledge of the monuments and principal artists of all major art periods of the past, including a broad understanding of the art of the twentieth century and acquaintance with the art history of non-Western cultures.
- Adequate mastery of a foreign language to support research through the reading of primary source materials.
- Functional knowledge of the creative process.

Integrated Visual Studies students will demonstrate:

- Communication skills in written and oral form with precision, cogency, and rhetorical force.
- The ability to explain and defend creative/research effectively and rationally; advocating for their world view.
- Skills of invention and innovation—developing things and ideas that never existed before.

Major in Art (BA), Art History Concentration

The Art History concentration provides a basic preparation in art history for graduate studies, careers in research and teaching at the college level, positions in museums, libraries, or private collections, or for writing and criticism in the arts. In addition to a high degree of research experience, students will complete a second field or minor and one year of foreign language. In-depth study in a second field allows students to refine their focus.

Requirements Effective Fall 2018

A Portfolio Review is required to be submitted for review upon completion of three ART studio courses for continuing students and upon completion of two ART studio courses for transfer students and students who have changed majors.

A minimum grade of C (2.000) or better is required in all upper-division Art History coursework.

Major in Art (BA), Integrated Visual Studies Concentration

The Integrated Visual Studies concentration is an ideal program for students to develop skills as makers and thinkers. Students take a relatively equal ratio of studio and academic classes that foster critical awareness of how society is reflected and produced through visual means in the twenty-first century.

By making work and interpreting images from art, photography, film, television and commercial imagery, students learn to analyze visual communication from a variety of aesthetic, theoretical, scientific, economic, sociological, and historical viewpoints. A combination of studio and academic classes are required.

The Integrated Visual Studies concentration enables students to organize multiple approaches to visual thinking that cut across various

disciplines into a logical whole. Integrated visual studies students will have the curricular flexibility to pursue other academic interests and extracurricular activities with greater intensity, as well as to pursue explorations in the theoretical and technical aspects of art-making within a studio practice.

Master of Fine Arts (M.F.A.)

The M.F.A. program in studio art promotes a high level of artistic achievement, creative and scholarly research, and relevant professional practice. In addition to required studio courses, the program fosters student engagement with faculty and peers through required coursework in contemporary art theory, art criticism, and art history. In consultation with their advisors, students plan a sequence of elective courses that both complements and challenges their studio practice.

Graduate Graduate Programs in Communication Studies

The graduate program leads to a Master of Arts in Communication Studies. Graduate coursework, as well as a required thesis for the Plan A master's, enables students to develop expertise in one or a combination of three areas of emphasis:

1. Media and visual culture;
2. Relational and organizational communication; and/or
3. Rhetoric and civic engagement.

In each of these areas, students select course work from among the following topics:

1. Contemporary issues in media, media theories, media audiences, media texts, and media industries;
2. Communication theories, communication and diversity, interpersonal theories, and discourse and organization; or
3. Public address, rhetoric and public affairs, rhetorical theory, rhetorical criticism, rhetoric of everyday life, and feminist theory.

The Plan B master's provides a Deliberative Practices specialization with coursework in deliberative theory and practice, a practicum, and an independent study serving as the culminating report in lieu of a thesis.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Communication Studies (<http://communicationstudies.colostate.edu>).

Major in Communication Studies

Communication Studies majors receive a broad-based, liberal arts education, designed to equip them for the challenges of the 21st century, the need to adapt to a rapidly changing workplace, and the likelihood of more than one career. The major encompasses many facets of film and media studies, relational and organizational communication, and rhetoric and civic engagement. Along with courses in communication studies, the major requires courses in the arts and humanities, the social sciences, and history, and a minor or second major.

The department's goals for undergraduate majors include helping students to achieve an outstanding education in communication studies, to further their knowledge and understanding of human communication, and to provide leadership in communication activities. In so doing, we hope to help students prepare for successful careers, the duties of citizenship, and productive and rewarding lives.

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3
SPCM 100	Communication and Popular Culture (GT-AH1)	3B	3
SPCM 130	Relational and Organizational Communication (GT-SS3)	3C	3
SPCM 200	Public Speaking		3

Learning Outcomes

Students will demonstrate:

Knowledge about the history and practice of our discipline in three specific areas: rhetoric and civic engagement, film and media studies, and relational and organizational communication. Students will be able to explain the utility of theories from these areas and be able to utilize research methods to explore questions from each area of inquiry.

Skills that allow them apply their knowledge of the major as they address contemporary issues salient to their personal, professional, and civic lives. They will be skilled in both oral and written communication, being able to develop and deliver coherent, well-organized claims to specific audiences. Students will also develop critical thinking skills that allow them to analyze texts, situations, or issues using credible evidence and following a logical, systematic, and/or precise structure.

Potential Occupations

The Communication Studies major, like many liberal arts majors, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate communication studies majors for their multiple skills and their ability to adapt to a variety of tasks and work environments.

Many majors find employment in public relations/marketing, politics, sales, human relations, government, business management, convention and meeting planning, education, and computer-mediated communication. Some students move on to graduate work in communication studies and to post-graduate study in law and theology.

Career opportunities include, but are not limited to employee relations specialist, employment counselor, human resource consultant, industrial relations representative, public relations specialist, labor relations consultant, training director, vocational rehabilitation counselor, advance agent, business communicator, equal opportunity representative, foreign service officer, cooperative extension service worker, politician, lobbyist, speechwriter, press agent, literary agent, interviewer, sales representative, scriptwriter, lawyer, teacher.

Internships are available to Communication Studies majors and are highly recommended to enhance practical training and development. Graduates who seek advanced studies can attain positions with higher responsibilities and can rise to top professional levels.

Ph.D. in Communication

The Ph.D. in Communication trains scholars, teachers, and professionals to engage social, political, and professional challenges using advanced expertise in the field of communication.

The program is shaped by the three areas of expertise present in our department. These three areas examine communication and engagement from three perspectives:

- 1. Interpersonal, Intercultural, and Organizational Communication:** For many individuals, engagement with the public world grows out of their relational lives and is expressed in the organizations to which they belong and in which they work. Professors and students in this area will explore communication in relational or interpersonal systems, organizing and work contexts, and within national and global arenas. Here, the focus is on exploring how individuals respond to and participate as active members in various forms of community, paying special attention to the ways in which communicative actions can create, sustain, and disable engaged citizenship.
- 2. Film and Media Studies:** In the contemporary, globalized world, engaged citizenship often flows through media and is represented and enacted within popular culture. Professors and students in the area explore the mediation of public culture with particular attention to film, television, digital discourse, and the globalization of media institutions. Here, the focus is on the construction of critical media literacies and understandings of how our mediated forms of communication engage or disengage individuals as community members, empowering or disempowering them as political agents.
- 3. Rhetoric and Civic Engagement:** In popular conversation, “rhetoric” is often understood to mean empty speech. Communication scholars, however, trace the meaning of “rhetoric” to antiquity when thinkers such as Aristotle and Cicero placed rhetorical studies at the center of democratic engagement. Since then, rhetorical studies have explored public engagement and community building, examining the role of communication in civic life. The resurgence of rhetorical studies in the humanities is founded on a renewed sense of the importance of rhetoric to engaged citizenship in the 21st century. Professors and students in this area explore the role of public communication in creating, maintaining, and undermining civic culture.

Although these three areas of departmental emphasis are distinct, the strength of the program is the collaborative overlapping of these three areas. As a community, we have developed a cutting-edge doctoral program that takes advantage of the shared commitment to study and engage in transformative communication.

Prerequisite: ECON 304.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 444 Economics of Energy Resources Credits: 3 (3-0-0)

Also Offered As: AREC 444.

Course Description: Supply, consumption trends, and projected demand for alternative energy resources in domestic and world perspective; economics of public energy policies.

Prerequisite: ECON 306.

Registration Information: Junior standing. Sections may be offered: Online. Credit allowed for only one of the following: AREC 444, ECON 344, or ECON 444.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 460 Economic Development Credits: 3 (3-0-0)

Course Description: Economic problems of underdeveloped nations.

Prerequisite: ECON 304.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 463 Regional Economics Credits: 3 (3-0-0)

Course Description: Introduction to economic importance of location for firms, consumers, and policy makers. Basic tools, applications, and student research.

Prerequisite: ECON 306.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 474 Recent Economic Thought Credits: 3 (3-0-0)

Course Description: Nontraditional schools of economic thought, such as institutionalism and neo-Marxism, that critique neoclassical economic theory.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 484 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description: Assistance in teaching introductory economics courses.

Prerequisite: ECON 304 and ECON 306.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 487 Internship Credits: Var[1-3] (0-0-0)

Course Description: Supervised work experience integrating disciplinary learning and career exploration.

Prerequisite: ECON 202 with a minimum grade of C and ECON 204 with a minimum grade of C.

Registration Information: Written consent of instructor. Economics majors and minors only. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ECON 492 Seminar Credits: 3 (0-0-3)

Course Description: Summarizes, discusses, and applies issues and policies chosen by the instructor. Emphasis on student participation, discussion, and research.

Prerequisite: (AREC 335, may be taken concurrently or ECON 335, may be taken concurrently) and (ECON 304, may be taken concurrently and ECON 306, may be taken concurrently).

Restriction: .

Registration Information: Senior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 495 Independent Study Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a special topic in economics under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 501 Quantitative Methods for Economists Credits: 3 (3-0-0)

Course Description: Quantitative methods essential for graduate study in economics; functional forms, optimization, matrix methods, topological modeling.

Prerequisite: MATH 141 or MATH 155 or MATH 160.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 504 Applied Macroeconomics Credits: 3 (3-0-0)

Course Description: Application of macroeconomic models to economic growth, economic fluctuations, and policy analysis.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 505 History of Economic Thought Credits: 3 (3-0-0)

Course Description: History of economic thought as a foundation for studying economic theory.

Prerequisite: None.

Registration Information: Graduate standing.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 506 Applied Microeconomic Theory Credits: 3 (3-0-0)

Also Offered As: AREC 506.

Course Description: Introduction to mathematical models in modern microeconomics, including choices and demand, production and supply, and market structures and failures.

Prerequisite: ECON 306.

Registration Information: Credit not allowed for both ECON 506 and AREC 506.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 510 Labor Market Analysis Credits: 3 (3-0-0)

Course Description: Determination of wages and employment. Focus on theoretical and applied controversies.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Fall (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 515 Financial Institutions-Structure/Regulation Credits: 3 (3-0-0)

Course Description: Regulation of financial institutions in the U.S.; international banking and international financial institutions, and financial modernization.

Prerequisite: None.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 520 Public Economics I Credits: 3 (3-0-0)

Course Description: Analysis and evaluation of tax policy in terms of efficiency and equity.

Prerequisite: ECON 506 or AREC 506 or ECON 606 or AREC 606.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 530 Methodology of Economic Research Credits: 3 (3-0-0)

Also Offered As: AREC 570.

Course Description: Philosophical foundations of science and research. Concepts and skills for planning, performing, reporting, and evaluating economic research.

Prerequisite: ECON 304 and ECON 306.

Registration Information: Credit not allowed for both ECON 530 and AREC 570.

Term Offered: Fall (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 535 Applied Econometrics Credits: 3 (3-0-0)

Also Offered As: AREC 535.

Course Description: Econometric techniques applied to testing and quantification of theoretical economic relationships drawn from both microeconomics, macroeconomics.

Prerequisite: (ECON 335 or AREC 335) and (ECON 304 or ECON 306).

Registration Information: Credit not allowed for both ECON 535 and AREC 535.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 540 Environmental and Natural Resource Economics Credits: 3 (3-0-0)

Also Offered As: AREC 540.

Course Description: Theory, methods, and policy in environmental and natural resource economics.

Prerequisite: AREC 506 or ECON 506.

Registration Information: Credit not allowed for both ECON 540 and AREC 540.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 541 Environmental Economics Credits: 3 (3-0-0)

Also Offered As: AREC 541.

Course Description: Economics of environmental policy; partial equilibrium and general equilibrium model; pollution; natural environments; population and economic growth.

Prerequisite: ECON 306.

Registration Information: Credit not allowed for both ECON 541 and AREC 541.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 563 Regional Economics-Theory, Methods, and Issues Credits: 3 (3-0-0)

Also Offered As: AREC 563.

Course Description: Tools and methods of regional economics, including supply, demand, and externality analysis. Applications to current urban and regional policy issues.

Prerequisite: ECON 306 and ECON 501, may be taken concurrently.

Registration Information: Credit not allowed for both ECON 563 and AREC 563.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 570 Evolution of Economic Thought Credits: 3 (3-0-0)

Course Description: From Plato and Aristotle to the modern period.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Fall (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 604 Macroeconomic Analysis I Credits: 3 (3-0-0)

Course Description: Theoretical and empirical analysis of short-run and long-run macroeconomic performance across countries using dynamic models.

Prerequisite: ECON 304 and ECON 501.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Major in Economics

Economics is the study of how people and societies use scarce resources to produce the things they want. Economic theory provides a framework for understanding economic issues, analyzing and predicting the likely effects of economic behavior and government policies, and formulating efficient and equitable solutions to pressing economic problems.

A strong liberal arts curriculum including arts and humanities, social and natural sciences, advanced composition, mathematics, and statistics provides the depth and breadth of knowledge needed to systematically and logically analyze problems, generate and test ideas, and develop effective communication and quantitative skills. Economics majors develop an appreciation of economic issues, and learn to analyze and critically evaluate economic phenomena and policies. The major core includes four semesters of economic theory, a semester of econometrics, a senior capstone seminar, and several semesters of economics electives covering a wide variety of economic topics from environmental and natural resource economics to the history of economic institutions and political economy.

Learning Outcomes

Students will:

- Display command of basic microeconomic concepts such as rationality, cost/benefit, supply and demand theory, decision making at the margin, monopoly and competition, and efficiency and equity.
- Display command of basic macroeconomic concepts such as aggregate demand and supply, fiscal and monetary policy, and the use of these policies in the macro-economy.
- Understand and analyze a broad array of economic issues found in the news and understand how the economic aspects of society work.

Potential Occupations

Economists are employed in a wide variety of fields from education and research to business and government. Nonprofit and international organizations use economists in overseas development, environmental conservation, and international relations. Economics, like many liberal arts majors, provides students with a broad academic background suitable for a variety of jobs. Economics majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Many employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Careers for graduates are available in education, business, and government. Participation in internships or cooperative education opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can pursue careers in economics or attain advanced positions with the possibility of rising to top professional levels.

Depending on interests, the electives taken, or the minor selected, available career choices include, but are not limited to: commodities/stock broker, financial analyst, economic forecaster, trust administrator, loan counselor, pension funds administrator, foreign trade analyst, public policy analyst, regional/urban planner, foreign service officer, tax auditor, natural resource analyst, educator, program administrator, researcher, community organizer, environmental activist, international aid organization analyst or administrator, marketing analyst, purchasing agent, public relations/media planner, program consultant, contract

administrator, systems evaluator, personnel planner, portfolio administrator, finance manager, secondary school teacher.

Requirements Effective Fall 2019

Economics majors must achieve a minimum grade of 1.670 (C-) in each of the economics courses counted toward the major.

Minor in Economics

The minor in Economics is designed to prepare students for understanding current socioeconomic problems in the areas of resource allocation, inflation, unemployment, income distribution, environmental degradation, international trade, and monopoly power. The program can be of help to students interested in careers in business management, teaching, government, banking, public policy, and related areas.

Learning Outcomes

Students will:

- Display command of basic microeconomic concepts such as rationality, cost/benefit, supply and demand theory, decision making at the margin, monopoly and competition, and efficiency and equity.
- Display command of basic macroeconomic concepts such as aggregate demand and supply, fiscal and monetary policy, and the use of these policies in the macro-economy.

- Understand and analyze basic economic issues found in the news and understand how the economic aspects of society work.

To declare the minor in Economics, please visit the Economics Department office in Clark C306.

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Economics minors must achieve a 2.000 grade point average in all courses taken for the minor.

Major in English

The English department at CSU is a vibrant and diverse community. We are home to poets and linguists, literacy researchers and teacher educators, novelists and literary scholars, composition specialists and writers of creative nonfiction. We share a passion for exploring the multiple and dynamic ways that the English language is used to meet the demands of life in the twenty-first century. Students, staff, and faculty are committed to inclusive excellence, intellectual growth, and the creation of a more just and sustainable world.

English majors develop an understanding of diverse cultures, literary traditions, and great works of English, American, and world literature. Students expand their ability to analyze a variety of texts and view them through the lenses of diverse critical perspectives. Majors develop the ability to write for both specialized and general audiences. There are five concentrations from which students can choose:

- Creative Writing,
- English Education,
- Language,
- Literature, or
- Writing, Rhetoric and Literacy.

Learning Outcomes

Upon completion of the B.A. in English, the accomplished graduate shall be able to:

- work with, explain, or analyze English-language writings of the broadest textual range with an eye practiced in close-reading, historical context, and rigorous critical judgment;
- write with flexibility, effectiveness, and originality for diverse rhetorical purposes and audiences;
- read and write with technical awareness of language foundations, contexts of literacy, multi-modal environments, and theories of discourse and meaning; and
- integrate English literacy (disciplinary methods of reading and analysis) with interdisciplinary knowledge and action.

Potential Occupations

A major in English prepares students for business, government, or education careers that require broadly educated people who can think critically, communicate effectively, analyze texts, and write well. Many employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments.

The department encourages experiential education by offering a variety of internship opportunities.

Students are also invited to generate their own positions in fields of interests, as well as pursue established local, regional, or national internships. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Depending on a student's interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: copy editor; project editor; manuscript reader or story analyst; sales representative; publicity and promotion specialist; advertising coordinator; production specialist; assistant book publicist; contracts and permission specialist; agency or arts administrator; human resource manager; human services program developer; public relations; English teacher; teacher of English as a second language; curriculum developer; education administrator; grant writer; technical writer for business, industry, or science; magazine, newspaper, television, education, or government writer; biographer or writer of prose, fiction, or nonfiction; lyricist.

Concentrations

- Creative Writing Concentration
- English Education Concentration
- Language Concentration
- Literature Concentration
- Writing, Rhetoric and Literacy Concentration

Major in English, Creative Writing Concentration

The Creative Writing concentration gives students the opportunity to strengthen their creative writing skills and infuses their analytic reading skills with imagination. Students take beginning, intermediate, and advanced courses in one or more of the following genres: fiction, poetry, and creative nonfiction. Intermediate and advanced courses are primarily workshop classes in which students read and critique one another's work. At the center of all creative writing courses is the study of craft. Students in the Creative Writing concentration also take a wide variety of English and literature courses that prepare them to be writers by schooling them in literary traditions and styles. An internship program for all English majors offers Creative Writing students positions that may lead to employment. In addition, the Creative Writing program runs a vibrant reading series that gives students the chance to meet visiting writers.

Requirements Effective Fall 2020

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

Major in English, English Education Concentration

The English Education concentration provides students with preparation for teaching in secondary schools. It is designed for students who wish to pursue a career in teaching language arts, and offers a range of courses in language, literature, and writing. Students may receive an endorsement from the state of Colorado in English/Language Arts. In addition to the common requirements for the English major, students take several extra courses in English, as well as education classes through the School of Education.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (CEP) (<http://cep.chhs.colostate.edu>).

Requirements Effective Fall 2020

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

Major in English, Language Concentration

The Language concentration is for students who wish to focus on linguistics and teaching English as a second or foreign language, as well as literature, writing, and education. It is designed for students interested in all aspects of language and linguistics. It offers students the ability to study key theories in linguistics and second-language learning, functional

aspects of language production and reception, and the impact of social and cultural contexts on language production and reception.

Requirements Effective Fall 2020

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

Major in English, Literature Concentration

The Literature concentration offers a curriculum featuring critical study of literature (from ancient to contemporary) in poetry, prose, and drama. Students will become familiar with major figures and forces, but also with non-traditional writers outside the established canon. Courses in literary theory will give students a sense of the wide variety of approaches that

can be applied to the interpretation of texts. In all courses, students practice a number of different types of analytical and critical writing.

Major in English, Writing, Rhetoric and Literacy Concentration

The Writing, Rhetoric and Literacy concentration builds on departmental strengths in writing theory and design, rhetoric, composition, public writing, and rhetoric and writing instruction. It is designed for students who wish to pursue the study of theories and practices of writing and rhetoric. The Writing, Rhetoric and Literacy concentration offers students the ability to:

- Study writing in a department that takes a humanistic approach to learning

- Engage writing and rhetoric with a focus on genre, audience, invention, and style
- Explore and practice writing and rhetorical approaches in social, cultural, and historical contexts

Requirements Effective Fall 2020

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

Minor in Creative Writing

The study of creative writing emphasizes creativity, self-motivation, persistence, and openness to criticism – skills many employers look for when hiring. It gives students the opportunity to explore their artistic talents and devote time to producing creative work that complements achievements in their majors.

This seven-course sequence combines small, discussion-based writing workshops with classes in composition or literature. The minor is open to majors in all disciplines except English and offers a unique opportunity

to balance work in the sciences, business, engineering, or the humanities with the imaginative freedom and cultural engagement of an education in the arts. Students will gain experience in two genres (poetry, fiction, and/or creative nonfiction) as they study with published authors, interact with visiting writers, and gain familiarity with today's literary landscape.

TO DECLARE: Visit the English Office, Eddy 359. For more information: visit the Department of English website (<http://catalog.colostate.edu/general-catalog/colleges/liberal-arts/english/creative-writing-minor/www.english.colostate.edu>), or email Andrew Altschul,

Director of Creative Writing: andrew.altschul@colostate.edu
(%20andrew.altschul@colostate.edu).

Requirements Effective Fall 2018

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Minor in English

Minors allow students to focus on an area that complements their major, enhance their knowledge and skills, or pursue a particular interest. The Department of English offers three minors: English, Creative Writing, and an Interdisciplinary Minor in Linguistics and Culture. When visiting the department's office to officially declare an English or English-related minor (<http://english.colostate.edu/undergraduate/english-related-minors/>), students will be provided with a course guide for that minor. To speak with an advisor regarding a minor, contact Professor Dan Beachy-Quick by email at dan.beachy-quick@colostate.edu (%20dan.beachy-quick@colostate.edu), in-person during office hours, or by appointment in Eddy Hall, Room 343.

For information about English and Composition course offerings and registration procedures for the upcoming semester or summer

session, please contact Sheila Dargon at Sheila.Dargon@colostate.edu (%20Sheila.Dargon@colostate.edu).

Minor in English

The minor in English offers opportunities for students to create a unique path through English and Composition classes. Requirements are open: 21 credits total of E and/or upper-division CO courses, 12 credits of which must be at the 300-level or higher. This freedom allows students to pursue what they love most in language, literature, composition, and writing. Students will gain a set of skills, critical and creative both, that will complement both their major and future career.

The English department also offers the Linguistics and Culture Interdisciplinary Minor and the Creative Writing Minor.

Requirements Effective Spring 1996

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

CO 150, E 487A, and E 487B may not count toward the minor. CO 300, CO 301A, CO 301B, CO 301C, CO 301D, CO 302, and CO 401 may count toward the minor. A minimum of 6 credits must be taken at CSU.

Graduate Certificate in TESOL Education

The Graduate Certificate in TESOL Education provides graduates with practical, theoretical, and critical knowledge of the English language and methods for teaching it in various social and academic settings. The courses required for the certificate promote reflective inquiry, provide students with the necessary tools for ongoing professional growth, serve as models of effective pedagogy, and introduce students to the various ways in which instruction can be enhanced by contemporary technologies.

Master of Arts in English, Plan A, TESL/TEFL Specialization

The Master of Arts in English, Plan A, TESL/TEFL specialization provides graduates with practical, theoretical, and critical knowledge of methods for teaching the English language in various social and academic settings. The program features an integrated core in which a comprehensive understanding of the form and communicative functions of the English language is combined with both general and skill-specific (reading, writing, listening, speaking) pedagogical theories and applications. These courses are designed to promote reflective inquiry, to provide students with the necessary tools for ongoing professional growth, to serve as models of effective pedagogy, and to introduce students to the various ways in which instruction can be enhanced by contemporary technologies. The connection of theory and practice is enhanced through a variety of supervised teaching experiences and the completion of a portfolio, project, or thesis.

Graduate Graduate Program in Ethnic Studies

The Department of Ethnic Studies seeks to teach students to understand the unique and interlocking experiences of racially marginalized groups and to analyze how race intersects with other forces of social differentiation, such as gender, sexuality, and class, in national and international contexts. The program recognizes the importance not only of the history of racial exclusion and marginalization but also the creative ways in which various racial groups sustain their humanity through cultural preservation, transference, and renewal. Ethnic Studies is committed to nurturing students to become culturally aware, astute, civic-minded individuals who strive to strengthen the communities in which they reside. Because the study of ethnic groups intrinsically reveals how race structures life chances and opportunities, the scholarly orientation of the department reflects a commitment to meaningful changes in public policy and social life. The department offers graduate-

level education to prepare students as leaders in the field of ethnic studies.

Students interested in earning a Master of Arts degree in Ethnic Studies should refer to the Graduate and Professional Bulletin and the Department of Ethnic Studies (<http://ethnicstudies.colostate.edu/>).

Major in Ethnic Studies

The Ethnic Studies major involves critically examining the interlocking forces of race, gender, class, sexuality, and other forms of social differentiation that shape the histories and experiences of racially marginalized groups. The programs of study interrogate how these socially constructed ideas impact distribution of social goods, affect life chances, shape identities and worldviews, and reproduce social inequalities. Drawing from interdisciplinary and comparative theoretical frameworks, we bring to bear issues of power, privilege, and social justice pertinent to the experiences of diverse populations in the U.S. and abroad. We are especially committed to nurturing civic-minded and culturally informed students who strive to strengthen the communities in which they reside. In support of the land-grant mission of CSU, students and faculty in the Ethnic Studies program engage with communities on and off campus in order to effect meaningful change in public policy and social life.

Learning Outcomes

Upon completion of the program of study, students will demonstrate:

- An understanding of the key concepts shaping the experiences of various racial and ethnic groups in the United States and abroad.
- Familiarity with social histories and experiences of racial and ethnic groups.
- Effective oral communication, writing, and research skills.
- An increase in critical thinking, intellectual, and personal growth.
- An understanding of the value of social consciousness and personal responsibility.

Potential Occupations

Both theoretical understandings of and practical experience in cross-cultural and inter-ethnic relations are invaluable in today's world. Ethnic Studies graduates work in the following fields and occupations: K-12 and adult education (e.g. refugee/immigrant education, diversity training in the private sector); human social services including counseling, health care, and civil service; federal, state, tribal, and local government, and community service; natural resources development and technology transfer: practices, economics, and law in ethnic contexts; communications media such as newspaper, radio, video, and television; archival and museum studies; non-profit agencies; and advanced studies including graduate programs in the social sciences and professional programs (e.g. law, social work).

Minor in Ethnic Studies

The minor in Ethnic Studies provides an opportunity for students to take a group of courses that address the impact of race, culture, class, gender, and sexuality in shaping institutions, social relations, and identities. Regardless of the main area of students' academic focus and career aspirations, a minor in Ethnic Studies will be advantageous as employers and organizations increasingly look for individuals capable of communicating across differences of identities.

Requirements

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Effective Fall 2020

Students in the Ethnic Studies minor must earn a minimum grade of C (2.000) for all Ethnic Studies courses required for the minor.

Minor in Indigenous Studies

The objective of the Indigenous Studies minor is to provide students with a deep understanding of the theoretical positions and practical applications central to Indigenous ways of knowing and being. The minor is dedicated to foundational knowledge and awareness of Indigenous scholarship, priorities and ways of engaging.

Learning Objectives

- Describe and demonstrate knowledge of traditional and contemporary Indigenous cultural experiences and knowledge production through theories and conceptual practices of Indigeneity; distinguish from stereotypical ideas and images and/or the abundance of misrepresentations.
- Apply and explain central environmental approaches and paradigms of nature from Indigenous values, histories, norms, and contemporary engagements.
- Integrate and demonstrate skills in the application of Indigeneity as it relates to kinship, gender, sexuality that include critical, creative, concise and accessible comprehension.
- Assess and conduct research on historical and contemporary policy/law in written and oral content that include relevant application and accessible comprehension.
- Analyze research from Indigenous methodological perspectives. Describe the dissemination of knowledge from Indigenous scholarship paradigms.

Requirements Effective Fall 2020

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Master of Arts in Ethnic Studies, Plan A

The Master of Arts in Ethnic Studies, Plan A provides students with a comprehensive understanding of the enduring and transformative nature of race and ethnicity in the United States and around the globe. The program develops professional competencies in working with diverse communities to bring about meaningful social change. Through the development of strong research, writing, and oral skills, a master's degree in ethnic studies prepares students to become informed citizens and competitive job seekers. Our students are uniquely positioned to enter a workplace that is more diverse than ever, and where issues of race, ethnicity, gender, and sexuality, among others, are more relevant than at any time in the recent past.

Teaching Endorsement

The Teacher Preparation Program is a non-degree program; bachelor degrees in education are not awarded. Students interested in pursuing

a teaching license through CSU may refer to the Center for Educator Preparation (CEP) (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>) and the School of Education section for general information.

- Teaching Endorsement

Minor Programs

A minor in a foreign language offers opportunities for studying the language and culture of another country and complements many major fields. A student with a broadly based education, including a foreign language, will be better prepared to deal with changing technological, economic, and social conditions on an international scale. A student who minors in a foreign language may expect to develop sufficient competency to speak and write with reasonable accuracy and fluency while pursuing interest in language, literature, and culture. See the department for specific information on upper-division transfer work in the language of the minor.

All majors and minors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each upper-division course that carries the LARA, LCHI, LFRE, LGEN, LGER, LITA, LJPN, LLAT, LRUS, LSGN, or LSPA subject code.
