regular basis, students learn how to apply newly acquired knowledge productively and intuitively, while simultaneously developing skill sets desired by prospective employers. Interactive artistic dialog between highly motivated printmakers is a cornerstone to the printmaking curriculum, leading to a wide array of unique and diverse avenues for creative inquiry.

Major in Art (B.F.A.), Sculpture Concentration

The Sculpture concentration challenges students to create a vibrant fusion between technical process, conceptual expression, and professionalism. Students are encouraged to experiment and innovate while exploring content in the areas of object-making, installation, site-based work, performance, time-based art, and digital processes. Refined technical skill will be developed and is a requirement for students as they progress through the Sculpture concentration. Through the integration of readings, classroom discussion, presentations, and individual research,

the sculpture curriculum is designed to enable students to explore concepts and content relevant in contemporary society and in the art world today. The synthesis of this broad spectrum of information is intended to aid students as they develop a unique personal vision for their artwork and studio practice.

Major in Art, B.A.

The **Major in Art, B.A. (Bachelor of Arts)** is a liberal arts degree with two concentrations: **Art History** and **Integrated Visual Studies**. Both concentrations begin their study with the Foundations program. First-year students complete Foundations courses in studio art and global art history.

The **Art History concentration** seeks to develop students' critical and analytical skills and ability to comprehend global visual arts within social, historical, cultural, and aesthetic frameworks. Students develop an understanding about the visual and material culture of societies from around the world. Our Art History program champions a global history of art, offering courses that range from the Italian Renaissance to contemporary African art, women in art, and native North American art. Students in art history go on to careers in academia, museums, historical societies, and auction houses, and can apply their skills in visual literacy and analytical research to a wide range of careers.

The **Integrated Visual Studies concentration** is an ideal program for students to develop skills as makers and thinkers. By making work and interpreting images from visual art, photography, film, television, and commercial imagery, students learn to analyze visual communication from a variety of aesthetic, theoretical, scientific, economic, sociological and historical viewpoints. Students take a relatively equal ratio of studio and academic classes that foster critical awareness of how society is reflected and produced through visual means in the 21st century. Integrated Visual Studies students have the curricular flexibility to pursue interdisciplinary academic interests in combination with explorations in the theoretical and technical aspects of art making within a studio practice.

Student Learning Outcomes

Art History students will demonstrate:

- Knowledge of the tools and techniques of art historical research and scholarship.
- Communication skills, original thinking, art historical interpretation, and research skills in written form, resulting in a work of original scholarship.
- Communication skills, original thinking, art historical interpretation, and research skills in oral form.
- General knowledge of the monuments and principal artists of global art, including a broad understanding of historical monuments as well as the art of the 20th and 21st centuries.
- Adequate mastery of a foreign language to support research through the reading of primary source materials.
- Functional knowledge of the creative process.

Integrated Visual Studies students will demonstrate:

- Communication skills in written and oral form with precision, cogency, and rhetorical force.
- The ability to explain and defend their creative work and research effectively and rationally, and the ability to advocate for their world view.
- Skills of invention and innovation—developing things and ideas that never existed before.

Potential Occupations

Students earning a B.A. with a major in Art develop a wide range of transferable communication, analytical, and critical-thinking skills. Participation in internships, cooperative education, service learning, and education abroad opportunities is highly recommended to enhance practical training and development. Depending on student interests, electives taken, or concentration selected, available career choices include academia, art museums, auction houses, historical societies, art appraiser, art director, exhibition designer, art critic, gallery director, art librarian, art restorer, art conservator, and art museum educator. Employers appreciate art majors for their multiple skills and the visual literacy that allows them to make sense of an image-saturated world.

Major in Art (B.A.), Art History Concentration

The Art History concentration seeks to develop students' critical and analytical skills and their ability to comprehend global visual arts within social, historical, cultural, and aesthetic frameworks. Students learn about the visual and material culture of societies from around the world and across time, reflecting the global turn in the discipline of art history today. Our program offers a diverse array of courses that range from the Italian Renaissance to contemporary African art, women in art, and native North American art. Art History majors can apply their skills in visual literacy, analytical research, and oral communication to a wide range of fields to shape their career path. Our students have entered careers in academia, museums, historical societies, and auction houses, just to name a few.

Major in Art (B.A.), Integrated Visual Studies Concentration

The Integrated Visual Studies concentration is an ideal program for students to develop skills as makers and thinkers. By making work and interpreting images from visual art, photography, film, television, and commercial imagery, students learn to analyze visual communication from a variety of aesthetic, theoretical, scientific, economic, sociological and historical viewpoints. Students take a relatively equal ratio of studio and academic classes that foster critical awareness of how society is reflected and produced through visual means in the 21st century.

The Integrated Visual Studies concentration gives students the flexibility to pursue interdisciplinary academic interests in combination with explorations of the conceptual and technical aspects of art making within a studio practice.

Requirements Effective Fall 2023

A minimum grade of C (2.000) or better is required in all upper-division Art coursework.

Minor in Art History

Designed for students with an interest in art history who are not Art majors, the Art History minor will provide students with an understanding of the rich history of art in its global historical context. Students will learn the language of art history, enhance their skills in research, writing, and presenting, and practice using conceptual tools for interpreting and understanding our visual world across cultures and disciplines.

For students who are ready to declare the Art History minor, please reach out to Rosanna Bateman (<https://art.colostate.edu/people/rbateman/>), Academic Success Coordinator.

For more information on the minor, please contact Professor Emily Moore (<https://art.colostate.edu/people/emilylm/>).

Requirements Effective Fall 2021

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

A minimum grade of C (2.000) or better is required in all Art History coursework.

Certificate in Art History

The Certificate in Art History is designed for students enrolled in the Department of Art and Art History who are not pursuing the Art History concentration but wish to develop a broader background in art history. The certificate gives students the opportunity to gain a deeper understanding of art historical content and methodologies at the advanced level, complementing their primary course of study as studio artists and art educators.

The program requires a minimum of 12 credits. Students are required to take ART 419. The additional 9 credits should come from upper-division credits taken in the Department of Art and Art History. Note that the 12-credit requirement is in addition to the regular art history coursework taken by all students pursuing the BA or the BFA in the Department of Art and Art History.

Requirements Effective Fall 2023

A minimum grade of C (2.000) or better is required in all Art History coursework.

Additional coursework may be required due to prerequisites.

Master of Fine Arts (M.F.A.)

The Master of Fine Arts program at CSU fosters excellence in artistic inquiry and achievement. For more than forty years, the Department of Art and Art History has demonstrated its commitment to graduate education. With concentrations in Drawing, Fibers, Graphic Design, Metalsmithing and Jewelry, Painting, Printmaking, and Sculpture, ours is the most comprehensive visual arts program in the Rocky Mountain West and one of the largest academic departments at CSU.

Students accepted into our program work closely with nationally recognized faculty who guide a wide range of research and experimentation in studio media. In each phase of the curriculum, a student's individual studio practice is enriched by research in art history and clarified through engagement with contemporary discourse surrounding art, craft, and design. Graduate students exhibit work and give presentations at venues throughout the region and beyond as they prepare to move forward in their careers.

Alumni of the program exhibit their work nationally and internationally, teach at schools, universities, and specialist workshops, and are active in the arts community. Our alumni also jury and curate exhibitions, work as designers, contribute to conferences and arts publications, and work with arts organizations.

We encourage students interested in the graduate program to view the M.F.A. (<https://art.colostate.edu/master-of-fine-arts/>) section of our website and spend some time with the Graduate and Professional Bulletin (<https://catalog.colostate.edu/general-catalog/graduate-bulletin/>).

Professor Greg Dickinson, Chair

The Department of Communication Studies is a caring and supportive community of teachers, scholars, and students who are passionate about communication's centrality to our lives. Our communication scholars infuse the classroom with teaching practices that honor multiple ways of knowing and program a rich array of coursework directly engaging diversity in text, identity, culture, positionality, history, and more. Our undergraduate, graduate, and faculty research consistently addresses power, identity, and agency. These innovative practices routinely receive regional, national, and international recognition.

Our approach to the study of communication is limitless. Students who join us:

- Study communication in interpersonal, organizational, and cultural contexts.
- Explore the history, theory, and criticism of media and film.
- Investigate the nature of public and political discourse.
- Bring the intersecting powers of story and film from communities and individuals around the world to Northern Colorado and beyond.
- Advocate for diversity, equity, and inclusion in public process.

Graduate Programs in Communication Studies

Graduate studies in communication at CSU attract students from around the world who deeply value teaching, scholarship, community, and excellence. The Department of Communication Studies offers two Master of Arts in Communication Studies degrees (Plan A and Plan B - see below), and one Ph.D. in Communication degree. All programs provide a rigorous scholarly experience that offers maximum flexibility in study across three areas of emphasis:

1. Film and media studies
2. Relational and organizational communication
3. Rhetoric and civic engagement

Coursework in each of these areas, respectively, includes the following topics:

1. Contemporary issues in media, media theories, media audiences, media texts, and media industries.
2. Communication theories, communication and diversity, interpersonal theories, and discourse and organization.
3. Public address, rhetoric and public affairs, rhetorical theory, rhetorical criticism, rhetoric of everyday life, and anti-racist, queer, and feminist theory.

Students enrolled in the Ph.D. in Communication degree develop programs of study tailored to their unique professional goals. They also teach a variety of undergraduate courses and are mentored by acclaimed scholars engaged in leading-edge research.

Students enrolled in M.A. in Communication Studies programs receive an introduction to the field of Communication Studies and instruction in critical and social scientific research methods. Plan A Master's students augment the M.A. core with electives of their choosing and complete a master's thesis under the advisement of a faculty committee. Plan B Master's students augment the M.A. core and elective curriculum with coursework and research in public deliberation. They also complete an applied research project.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Communication Studies (<http://communicationstudies.colostate.edu>).

Major in Communication Studies

p>

Communication Studies majors receive a broad-based, liberal arts education designed to equip them for the challenges of the 21st century, the need to adapt to a rapidly changing workplace, and the likelihood of more than one career. The major encompasses many facets of film and media studies, relational and organizational communication, and rhetoric and civic engagement. Along with courses in communication studies, the major requires courses in the arts and humanities, the social sciences, and history, and a minor or second major.

The department's goals for undergraduate majors include helping students to achieve an outstanding education in communication studies, to further their knowledge and understanding of human communication, and to provide leadership in communication activities. In so doing, we hope to help students prepare for successful careers, the duties of citizenship, and productive and rewarding lives.

Learning Outcomes

Students will demonstrate:

Knowledge about the history and practice of our discipline in three specific areas: film and media studies, relational and organizational communication, and rhetoric and civic engagement. Students will be able to explain the utility of theories from these areas and utilize research methods to explore questions from each area of inquiry.

Skills that allow them apply their knowledge of the major as they address contemporary issues salient to their personal, professional, and civic lives. They will be skilled in both oral and written communication, being able to develop and deliver coherent, well-organized claims to specific audiences. Students will also develop critical thinking skills that allow

them to analyze texts, situations, or issues using credible evidence and following a logical, systematic, and/or precise structure.

Accelerated Program

The major in Communication Studies includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The Communication Studies major, like many liberal arts majors, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate communication studies majors for their multiple skills and their ability to adapt to a variety of tasks and work environments.

Many majors find employment in public relations/marketing, politics, sales, human relations, government, business management, convention and meeting planning, education, and social media. Some students move on to graduate work in communication studies and to post-graduate study in business, law, and theology.

Career opportunities include, but are not limited to, employee relations specialist, employment counselor, human resource consultant, industrial relations representative, public relations specialist, labor relations consultant, training director, vocational rehabilitation counselor, advance agent, business communicator, equal opportunity representative, foreign service officer, cooperative extension service worker, politician, lobbyist, speechwriter, press agent, literary agent, interviewer, sales representative, scriptwriter, filmmaker, lawyer, and teacher.

Internships are available to Communication Studies majors and are highly recommended to enhance practical training and development. Graduates who seek advanced studies can attain positions with higher responsibilities and can rise to top professional levels.

Ph.D. in Communication

The Ph.D. in Communication trains scholars, teachers, and professionals to engage social, political, and professional challenges using advanced expertise in the field of communication.

The program is shaped by the three areas of expertise present in our department. These three areas examine communication and engagement from three perspectives:

- 1. Interpersonal, Intercultural, and Organizational Communication:** For many individuals, engagement with the public world grows out of their relational lives and is expressed in the organizations to which they belong and in which they work. Professors and students in this area explore communication in relational or interpersonal systems, organizing and work contexts, and within national and global arenas. Here, the focus is on exploring how individuals respond to and participate as active members in various forms of community, paying special attention to the ways in which communicative actions can create, sustain, and disable engaged citizenship.
- 2. Film and Media Studies:** In the contemporary, globalized world, engaged citizenship often flows through media and is represented and enacted within popular culture. Professors and students in the area explore the mediation of public culture with particular attention to film, television, digital discourse, and the globalization of media institutions. Here, the focus is on the construction of critical media literacies and understandings of how our mediated forms of communication engage or disengage individuals as community members, empowering or disempowering them as political agents.
- 3. Rhetoric and Civic Engagement:** In popular conversation, "rhetoric" is often understood to mean empty speech. Communication scholars, however, trace the meaning of "rhetoric" to antiquity when thinkers such as Aristotle and Cicero placed rhetorical studies at the center of democratic engagement. Since then, rhetorical studies have explored public engagement and community building, examining the role of communication in civic life. The resurgence of rhetorical studies in the humanities is founded on a renewed sense of the importance of rhetoric to engaged citizenship in the 21st century. Professors and students in this area explore the role of public communication in creating, maintaining, and undermining civic culture.

Although these three areas of departmental emphasis are distinct, the strength of the program is the collaborative overlapping of these three areas. As a community, we developed a cutting-edge doctoral program that takes advantage of the shared commitment to study and engage in transformative communication.

Department of Economics

The Department of Economics is a vibrant learning community that supports the intellectual development and professional aspirations of undergraduates, graduate students, and faculty alike. Economics is a

broad social science that brings together diverse tools for understanding the choices we make, the constraints we face, and the consequences for the critical social issues of equity, efficiency, and sustainability.

Our programs offer a variety of economic approaches to understanding some of the most pressing challenges of our time: how wealth, poverty, and inequality are generated; the economics of climate change; how nations are connected in global markets; the role of governments in managing markets; and so much more.

Our faculty members are caring teachers and prolific scholars who have active research agendas, providing many opportunities for both graduate and undergraduate students to collaborate. Our goal is to prepare our students to be critical thinkers who understand the debates about economic methodology and policy, as well as the techniques of economic analysis.

Undergraduate Major

- Major in Economics

Minor

- Minor in Economics

Undergraduate Program Highlights:

- We offer traditional, honors (<http://honors.colostate.edu/admissions/>), accelerated (<https://provost.colostate.edu/accelerated-programs/>), and online bachelor's degree (https://www.online.colostate.edu/degrees/economics/?utm_source=geniusmonkey&utm_medium=viewthrough) programs so you can choose the path that is right for you.
- The Economics major includes a solid foundation in economic analysis and provides the option to develop **an area of specialty in one of six tracks**: development/international economics, environmental economics, public policy, quantitative economics, political economy, and economics of race, class, and gender.
- Our students are required to choose a second major or minor, **giving them the flexibility to tailor their education to their unique interests and goals**.
- **Economics is a versatile major that can be a gateway to many career paths** in government, finance, nonprofit organizations, law, academia, and much more. Our students develop a framework for thinking analytically, and they also get the data and communication skills needed to be successful in the workplace.
- **Economics majors have the unique opportunity to apply for paid research internships**, providing opportunities to deepen their research skillsets and collaborate with our award-winning faculty. Every

senior also develops an independent research project as part of the capstone course (ECON 492).

Graduate Graduate Programs in Economics

The Department of Economics is currently only admitting students to the Doctor of Philosophy (Ph.D.) program. Six primary fields are presently emphasized: international economics, development economics, public economics, political economy, environmental economics, and regional economics. Core requirements include micro, macro, and heterodox theory, as well as history of economic thought and applied econometrics.

More information is available in the Graduate and Professional Bulletin.

Prerequisite: ECON 304 and ECON 306.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 487 Internship Credits: Var[1-3] (0-0-0)

Course Description: Supervised work experience integrating disciplinary learning and career exploration.

Prerequisite: ECON 202 with a minimum grade of C and ECON 204 with a minimum grade of C.

Registration Information: Written consent of instructor. Economics majors and minors only. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ECON 492 Seminar Credits: 3 (0-0-3)

Course Description: Summarizes, discusses, and applies issues and policies chosen by the instructor. Emphasis on student participation, discussion, and research.

Prerequisite: (AREC 335, may be taken concurrently or ECON 335, may be taken concurrently) and (ECON 304, may be taken concurrently and ECON 306, may be taken concurrently).

Restriction: .

Registration Information: Senior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 495 Independent Study Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a special topic in economics under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 501 Quantitative Methods for Economists Credits: 3 (3-0-0)

Prerequisite: MATH 141 or MATH 155 or MATH 160.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 504 Applied Macroeconomics Credits: 3 (3-0-0)

Course Description: Application of macroeconomic models to economic growth, economic fluctuations, and policy analysis.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 505 History of Economic Thought Credits: 3 (3-0-0)

Prerequisite: None.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 506 Applied Microeconomic Theory Credits: 3 (3-0-0)

Also Offered As: AREC 506.

Course Description: Introduction to mathematical models in modern microeconomics, including choices and demand, production and supply, and market structures and failures.

Prerequisite: ECON 306.

Registration Information: Credit not allowed for both ECON 506 and AREC 506.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 510 Labor Market Analysis Credits: 3 (3-0-0)

Prerequisite: ECON 304 and ECON 306.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 515 Financial Institutions-Structure/Regulation Credits: 3 (3-0-0)

Course Description: Regulation of financial institutions in the U.S.; international banking and international financial institutions, and financial modernization.

Prerequisite: None.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 520 Public Economics I Credits: 3 (3-0-0)

Course Description: Analysis and evaluation of tax policy in terms of efficiency and equity.

Prerequisite: ECON 506 or AREC 506 or ECON 606 or AREC 606.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 530 Methodology of Economic Research Credits: 3 (3-0-0)

Also Offered As: AREC 570.

Course Description: Philosophical foundations of science and research. Concepts and skills for planning, performing, reporting, and evaluating economic research.

Prerequisite: ECON 304 and ECON 306.

Registration Information: Credit not allowed for both ECON 530 and AREC 570.

Term Offered: Fall (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 535 Applied Econometrics Credits: 3 (3-0-0)

Also Offered As: AREC 535.

Course Description: Econometric techniques applied to testing and quantification of theoretical economic relationships drawn from both microeconomics, macroeconomics.

Prerequisite: (ECON 335 or AREC 335) and (ECON 304 or ECON 306).

Registration Information: Credit not allowed for both AREC 535 and ECON 535.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 540 Environmental and Natural Resource Economics Credits: 3 (3-0-0)

Also Offered As: AREC 540.

Course Description: Theory, methods, and policy in environmental and natural resource economics.

Prerequisite: AREC 506 or ECON 506.

Registration Information: Credit not allowed for both ECON 540 and AREC 540.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 541 Environmental Economics Credits: 3 (3-0-0)

Also Offered As: AREC 541.

Course Description: Economics of environmental policy; partial equilibrium and general equilibrium model; pollution; natural environments; population and economic growth.

Prerequisite: ECON 306.

Registration Information: Credit not allowed for both ECON 541 and AREC 541.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 563 Regional Economics-Theory, Methods, and Issues Credits: 3 (3-0-0)

Also Offered As: AREC 563.

Course Description: Tools and methods of regional economics, including supply, demand, and externality analysis. Applications to current urban and regional policy issues.

Prerequisite: ECON 306 and ECON 501, may be taken concurrently.

Registration Information: Credit not allowed for both ECON 563 and AREC 563.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 570 Evolution of Economic Thought Credits: 3 (3-0-0)

Course Description: From Plato and Aristotle to the modern period.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Fall (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 604 Macroeconomic Analysis I Credits: 3 (3-0-0)

Course Description: Theoretical and empirical analysis of short-run and long-run macroeconomic performance across countries using dynamic models.

Prerequisite: ECON 304 and ECON 501.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 606 Microeconomic Analysis I Credits: 3 (3-0-0)

Also Offered As: AREC 606.

Course Description: Advanced price/allocation theory: consumer/producer decisions; uncertainty; market structure; partial/general equilibrium; efficiency/welfare.

Prerequisite: ECON 306 and ECON 501.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 606 and AREC 606.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 635 Econometric Theory I Credits: 3 (3-0-0)

Also Offered As: AREC 635.

Course Description: Theory of mathematical statistics and classical linear regression model in context of economic application.

Prerequisite: (AREC 535 or ECON 535) and (ECON 501, may be taken concurrently).

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 635 and AREC 635.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 640 International Trade Theory Credits: 3 (3-0-0)

Course Description: Theory of international trade including comparative advantage, factor growth, market distortions, and commercial policy.

Prerequisite: ECON 306 or ECON 506.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 663 Urban and Regional Modeling Credits: 3 (3-0-0)

Course Description: Methodological approaches in regional economics: general equilibrium, input-output, computable general equilibrium models; social accounting matrices.

Prerequisite: ECON 506.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 698 Research--Technical Paper Credits: 3 (0-0-3)

Course Description:

Prerequisite: (ECON 504 and ECON 506 and ECON 705) and (AREC 735 or ECON 735).

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 704 Macroeconomic Analysis II Credits: 3 (3-0-0)

Course Description: Theoretical and empirical frameworks for analyzing macroeconomic policies and their impact on economic growth, employment, and income distribution.

Prerequisite: ECON 604.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 705 Heterodox Approaches to Economics Credits: 3 (3-0-0)

Course Description: Contemporary heterodox approaches to economic research.

Prerequisite: ECON 505.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 706 Microeconomic Analysis II Credits: 3 (3-0-0)

Also Offered As: AREC 706.

Course Description: Advanced topics in microtheory: game theory; market imperfections; adverse selection; principal-agent problems; social choice theory; incentives, etc.

Prerequisite: ECON 606.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 706 and AREC 706.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 715 Monetary Economics Credits: 3 (3-0-0)

Course Description: Principle issues of monetary theory: money supply and demand, interest rates, and current problems of monetary policy.

Prerequisite: ECON 504.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 720 Public Economics II Credits: 3 (3-0-0)

Course Description: Analysis of welfare foundations of public expenditure, including cost-benefit analysis.

Prerequisite: ECON 506.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 735 Econometric Theory II Credits: 2 (2-0-0)

Also Offered As: AREC 735.

Course Description: Econometrics models and estimators in econometrics, from fully parametric to semiparametric and nonparametric approaches.

Prerequisite: AREC 635 or ECON 635.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both AREC 735 and ECON 735. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 736A Advanced Econometric Methods: Discrete Choice Models Credit: 1 (1-0-0)

Also Offered As: AREC 736A.

Course Description: Econometrics analysis of: Discrete Choice Models.

Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 736B Advanced Econometric Methods: Panel Data Models Credit: 1 (1-0-0)

Also Offered As: AREC 736B.

Course Description: Econometrics analysis of: Panel Data Models.

Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 736C Advanced Econometric Methods: Time Series Models Credit: 1 (1-0-0)

Also Offered As: AREC 736C.

Course Description: Econometrics analysis of: Time Series Models.

Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 736D Advanced Econometric Methods: Causal Inference Credit: 1 (1-0-0)

Also Offered As: AREC 736D.

Course Description: Introduces the notion of identification in econometrics and covers several commonly used methods for addressing endogeneity.

Prerequisite: AREC 735 or ECON 735.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Credit not allowed for both AREC 736D or ECON 736D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 740 Advanced Natural Resource Economics Credits: 3 (3-0-0)

Also Offered As: AREC 740.

Course Description: Advanced theory, methods, and literature in natural resource economics, including dynamic programming and optimal control.

Prerequisite: AREC 706 or ECON 706.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both AREC 740 and ECON 740.

Term Offered: Fall.

Grade Mode: Traditional.

Major in Economics

The economics major helps students develop an understanding of how individuals, organizations and societies make decisions to achieve their goals. In our introductory courses, students learn the fundamental principles of economics that can help them understand and analyze a wide range of social and policy issues. Our intermediate theory courses take a deeper dive, developing the analytical tools used in understanding individual choice, how markets function, and the determinants of key economic measures such as GDP, employment, and inflation. In addition to theory, our students also learn methods to describe and analyze economic data, allowing them to conduct their own empirical research. As part of the College of Liberal Arts, coursework helps students look at economic issues through a variety of lenses, including history, culture, and institutions, allowing them to gain a richer understanding of specific aspects of economic behavior and public policy.

The major requires:

- Introductory and Intermediate Microeconomics
- Introductory and Intermediate Macroeconomics
- Econometrics
- Political Economy
- Senior Capstone Seminar
- Economics electives
- Prerequisite courses in math and statistics, as specified
- Completion of a minor or second major of the student's choice

Learning Outcomes

Students will:

- Understand and apply key microeconomic concepts, such as consumer choice, competition and strategic behavior, market failures and the role of government intervention, the value of information, and efficiency and equity.
- Understand and apply key macroeconomic concepts, such as the determinants of unemployment, inflation, and economic growth, the causes of income inequality, and the role of government and the Federal Reserve in managing the economy.
- Understand and analyze a broad array of economic issues found in the news and understand how the economic aspects of society work. Students may choose from electives in developmental/international economics, environmental economics, race, class, gender, public policy, and more.

Accelerated Program

The major in Economics includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Career Paths

Economics provides students with a broad academic background and critical thinking skills suitable to many fields: education, research, business, government, nonprofit, environmental conservation, international relations, and more.

Career choices include, but are not limited to:

- Commodities/stock broker
- Banking
- Financial analyst
- Economic forecaster
- Loan counselor
- Foreign trade analyst
- Public policy analyst
- Regional/urban planner
- Foreign service officer
- Natural resource analyst
- Community organizer
- Program administrator
- Personal finance advisor
- Sales analyst

Requirements Effective Fall 2022

Economics majors must achieve a minimum grade of 1.670 (C-) in each of the economics courses counted toward the major.

Minor in Economics

The minor in Economics is designed to prepare students for understanding current socioeconomic problems in the areas of resource allocation, inflation, unemployment, income distribution, environmental degradation, international trade, and monopoly power. The program can be of help to students interested in careers in business management, teaching, government, banking, public policy, and related areas.

Learning Outcomes

Upon successful completion, students will be able to:

- Display command of basic microeconomic concepts such as rationality, cost/benefit, supply and demand theory, decision making at the margin, monopoly and competition, and efficiency and equity.
- Display command of basic macroeconomic concepts such as aggregate demand and supply, fiscal and monetary policy, and the use of these policies in the macro-economy.
- Understand and analyze basic economic issues found in the news and understand how the economic aspects of society work.

To declare the minor in Economics, please visit the Economics Department office in Clark C306.

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Economics minors must achieve a 2.000 grade point average in all courses taken for the minor.

Major in English

The English department at CSU is a vibrant and diverse community. We are home to poets and linguists, literacy researchers and teacher educators, novelists and literary scholars, composition specialists and writers of creative nonfiction. We share a passion for exploring the multiple and dynamic ways that the English language is used to meet the demands of life in the twenty-first century. Students, staff, and faculty are committed to inclusive excellence, intellectual growth, and the creation of a more just and sustainable world.

English majors develop an understanding of diverse cultures, literary traditions, and great works of English, American, and world literature. Students expand their ability to analyze a variety of texts and view them through the lenses of diverse critical perspectives. Majors develop the ability to write for both specialized and general audiences. Students can choose from five concentrations: Creative Writing, English Education, Linguistics, Literature, or Writing, Rhetoric and Literacy.

Learning Outcomes

Upon completion of the B.A. in English, the accomplished graduate shall be able to:

- work with, explain, or analyze English-language writings of the broadest textual range with an eye practiced in close-reading, historical context, and rigorous critical judgment;
- write with flexibility, effectiveness, and originality for diverse rhetorical purposes and audiences;

- read and write with technical awareness of language foundations, contexts of literacy, multi-modal environments, and theories of discourse and meaning; and
- integrate English literacy (disciplinary methods of reading and analysis) with interdisciplinary knowledge and action.

Potential Careers

The myth of the unemployed English major is just that—a myth!

Our major prepares students to be engaging communicators, creative and convincing writers, empathetic collaborators, ethical decision-makers and problem-solvers, and compassionate global citizens—all traits top employers continue to seek out and prioritize. These skills translate to a wide variety of exciting careers in environmental justice, tech, business, healthcare, education, law, marketing & PR, policy, and more. As an English major, you'll not only discover how to cultivate a meaningful life, but also build a fulfilling career.

The department encourages experiential education by offering a host of pre-professional internship opportunities—in writing, research, teaching, community engagement, social media, publishing, and more. Additionally, we promote multiple English-recommended education abroad programs: Gain firsthand experience in sustainability practices in Denmark, explore Shakespeare's lasting footprint in Oxford, England, or dive into community education and health in Zambia.

Depending on a student's interests, the electives taken, or the concentration selected, available career choices for English majors include:

- Teacher of English language arts or English as a foreign/second language
- Attorney and paralegal
- Arts administrator
- Communications and events coordinator
- Podcast writer/producer
- Human resource manager
- Medical professional
- Brand copywriter
- Technical writer for business, industry, or science
- Social media manager
- Poet, short fiction writer, novelist, YA author, essayist, writer of memoir
- Literary translator
- Nonprofit program coordinator
- Digital marketing and content strategist
- Community engagement officer
- Grant writer
- Project manager
- Counselor and therapist
- Web content designer
- Literary agent and more!

Concentrations

- Literature Concentration
- Writing, Rhetoric and Literacy Concentration

Major in English, Creative Writing Concentration

The Creative Writing concentration gives students the opportunity to strengthen their creative writing skills and infuses their analytic reading skills with imagination. Students take beginning, intermediate, and advanced courses in one or more of the following genres: fiction, poetry, and creative nonfiction. Intermediate and advanced courses are primarily workshop classes in which students read and critique one another's work. At the center of all creative writing courses is the study of craft.

Students in the Creative Writing concentration also take a wide variety of English and literature courses that prepare them to be writers by instructing them in literary traditions and styles. An internship program for all English majors offers Creative Writing students positions that may lead to employment. In addition, the Creative Writing program runs a vibrant reading series that gives students the chance to meet visiting writers.

Requirements Effective Fall 2022

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

¹ Excludes E subject code courses.

² The department requires majors to complete a second field. This may be met by completing the second semester of the second year of a foreign language or by completing 12 credits of upper division courses in a coherent field of study outside English.

³ Selection must match subtopic of E 311A, E 311B, or E 311C.

⁴ Select enough elective credits to bring the program table to 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major in English, English Education Concentration

The English Education concentration provides students with preparation for teaching English/Language Arts in secondary schools. This concentration offers a range of courses in language, literature, and writing. Students may also pursue a teaching endorsement from the state of Colorado in secondary English/Language Arts. In addition to the requirements for the English major, students also take courses that

focus on teaching the subject matter of English and additional education classes through the School of Education.

Requirements Effective Fall 2020

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

¹ The department requires Licensure majors to take a minimum of 12 credits of upper-division E or CO subject code courses to include the categories listed below. One course may count for two categories if necessary, but students must take a minimum of 12 credits to fulfill this requirement:

- 3 credits must be in literatures of the British Isles before 1830, or in American or European literatures before 1900;
- 3 credits must be in literatures of the British Isles after 1830, or in American or European literatures after 1900;

- 3 credits must be in either breakthroughs (ideological, racial, cultural, gendered) or genre courses;
- One course must be a world literature course;
- One course must be a capstone course (see list in senior year, above).

² Any lower or upper-division E subject code course.

Major in English, Linguistics Concentration

The Linguistics concentration introduces students to the scientific study of human language, with a particular focus on English and applied language studies. It draws on a wide range of theoretical and methodological approaches from various disciplines—from the

humanities to the social sciences. The Linguistics concentration offers students the ability to study key theories in linguistics and second-language learning, functional aspects of language production and reception, and the impact of social and cultural factors on language use. This concentration is excellent for students who have an interest in (applied) linguistics and teaching English as an additional language, as well as literature, writing, and education. It is ideal for students who wish to pursue graduate and professional programs related to language as

well as those who wish to succeed in careers requiring analytical thought, effective communication, and an in-depth understanding of language.

Major in English, Literature Concentration

The Literature concentration invites students to engage in the critical study of literature in English produced in a range of historical eras and geographical locations. In addition to poetry, prose, and drama, students will also encounter contemporary and historical texts that challenge their definitions of literature. Students will learn new ways of approaching familiar figures while also gaining exposure to writers and thinkers whose

work has not always been recognized. Students can expect guidance in developing their critical and analytical writing skills and in becoming conversant with theories and methods for analyzing texts.

Major in English, Writing, Rhetoric and Literacy Concentration

The Writing, Rhetoric and Literacy concentration builds on departmental strengths in writing theory and design, rhetoric, composition, public writing, and rhetoric and writing instruction. It is designed for students who wish to pursue the study of theories and practices of writing and rhetoric. The Writing, Rhetoric and Literacy concentration offers students the ability to:

- Study writing in a department that takes a humanistic approach to learning

- Engage writing and rhetoric with a focus on genre, audience, invention, and style
- Explore and practice writing and rhetorical approaches in social, cultural, and historical contexts

Requirements Effective Fall 2022

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

Minor in Creative Writing

The study of creative writing emphasizes creativity, self-motivation, persistence, and openness to criticism – skills many employers look for when hiring. It gives students the opportunity to explore their artistic talents and devote time to producing creative work that complements achievements in their majors.

This seven-course sequence combines small, discussion-based writing workshops with classes in composition or literature. The minor is open to majors in all disciplines except English and offers a unique opportunity to balance work in the sciences, business, engineering, or the humanities with the imaginative freedom and cultural engagement of an education in the arts. Students will gain experience in two genres (poetry, fiction, and/or creative nonfiction) as they study with published authors, interact with visiting writers, and gain familiarity with today's literary landscape.

TO DECLARE: Visit the English Office, Eddy 359. For more information: visit the Department of English website (<https://english.colostate.edu/>), or email Dan Beachy-Quick, Undergraduate Coordinator: Dan.Beachy-Quick@colostate.edu (dan.beachy-quick@colostate.edu)

Requirements

Effective Fall 2018

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Minor in English

Minors allow students to focus on an area that complements their major, enhances their knowledge and skills, or allows them to pursue a particular interest. The Department of English offers three minors: English, Creative Writing, and an Interdisciplinary Minor in Linguistics and Culture. When visiting the department's office to officially declare an English or English-related minor (<http://english.colostate.edu/undergraduate/english-related-minors/>), students will be provided with a course guide for that minor. To speak with an advisor regarding a minor, contact Professor Dan Beachy-Quick by email at dan.beachy-quick@colostate.edu.

quick@colostate.edu, in-person during office hours, or by appointment in Eddy Hall, Room 343.

For information about English and Composition course offerings and registration procedures for the upcoming semester or summer session, please contact Sheila Dargon at Sheila.Dargon@colostate.edu.

Minor in English

The minor in English offers opportunities for students to create a unique path through English and Composition classes. Requirements are open: 21 credits total of E and/or upper-division CO courses, 12 credits of which must be at the 300-level or higher. This freedom allows students to pursue what they love most in language, literature, composition, and writing. Students will gain a set of skills, critical and creative both, that will complement both their major and future career.

The English department also offers the Linguistics and Culture Interdisciplinary Minor and the Creative Writing Minor.

Requirements

Effective Spring 1996

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

CO 150, E 487A, and E 487B may not count toward the minor. CO 300, CO 301A, CO 301B, CO 301C, CO 301D, CO 302, and CO 401 may count toward the minor. A minimum of 6 credits must be taken at CSU.

Graduate Certificate in TESOL Education

The Graduate Certificate in TESOL Education provides graduates with practical, theoretical, and critical knowledge of the English language and methods for teaching it in various social and academic settings. Courses required for the certificate promote reflective inquiry, provide students with the necessary tools for ongoing professional growth, serve as models of effective pedagogy, and introduce students to the various ways in which instruction can be enhanced by contemporary technologies.

Additional Program Requirements:

- Students are required to submit a portfolio with writing, sample papers, and annotated bibliography at the end of their program.
- A minimum of 32 credits applied to an MFA degree must be earned at CSU. Of these, at least 21 must be earned after admission to the program.
- Graduate courses taken at CSU prior to admission to the Graduate School can be applied to an MFA degree if the grade earned is B or higher.
- At least 16 credits earned at CSU and applied to an MFA degree must be English courses at the 500-level or higher; of these credits, at least 12 must be in "regular" courses. English courses considered to be other than "regular" include E 607B, E 684, E 687, E 695, E 699, and any courses graded pass/fail.
- Courses transferred from an MFA program must have a grade of B or higher and must have a CSU equivalent at the 500-level or higher. Credits used to fulfill requirements for previously earned degrees are not accepted.

- Up to three credits of coursework for an MFA degree can come from CSU programs outside the English department at the 300-level or higher. Students can take two additional courses outside the department, but these courses must be 500-level or higher.
- Graduate students may register for any number of internship credits, but a total of only six credits of E 607B, E 684, and E 687 (combined) will count toward graduation.
- A maximum of two credits of E 695 can count toward an MFA degree.
- With the exception of specified courses, all courses taken in the English department and applied to an MFA degree must be taken at the 500-level or above.

¹ This must include one course (3 credits) of a Pre-Twentieth-Century Literature class with approval of advisor.

² This requirement may be waived for students whose undergraduate degree is in another major.

Master of Arts in English, English Education Specialization

The Master of Arts in English, English Education Specialization provides students with preparation for and enhanced knowledge of teaching English in secondary schools. Framed with a commitment to equity, the program is designed for students who are:

- Seeking initial licensure;
- Currently employed, full- or part-time, as an English language arts teacher in a Colorado public school;
- Looking to revitalize their work with students and their own knowledge;
- Deepening their understanding of contemporary literacy scholarship and broadening their background to explore new directions in the profession; and
- Deeply considering their practice and seeking to improve their teaching skills.

Students interested in pursuing an initial teaching license through CSU may refer to the Center for Educator Preparation (CEP). (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>)

Master of Arts in English, Plan A, TESL/TEFL Specialization

The Master of Arts in English, Plan A, TESL/TEFL Specialization provides graduates with practical, theoretical, and critical knowledge of methods for teaching the English language in various social and academic settings. The program features an integrated core in which a comprehensive understanding of the form and communicative functions of the English language is combined with both general and skill-specific (reading, writing, listening, speaking) pedagogical theories and applications. These courses are designed to promote reflective inquiry, to provide students with the necessary tools for ongoing professional growth, to serve as models of effective pedagogy, and to introduce students to the various ways in which instruction can be enhanced by contemporary technologies. The final requirement for the Plan A option encourages students to carry out empirical research through the completion of a thesis.

Master of Arts in English, Writing, Rhetoric, and Social Change Specialization

Students in the Master of Arts in English, Writing, Rhetoric, and Social Change Specialization join a vibrant community of scholars who research the transformative potential of writing and rhetoric, analyzing the social, cultural, economic and historical forces shaping writing and rhetoric in theory and practice. Through analysis of and engagement with diverse contexts for writing, students create and apply methods for addressing shared social problems in classrooms and communities. Our graduates study in top tier rhetoric and composition Ph.D. programs, teach composition and rhetoric at secondary and post-secondary levels, and work for social change through careers in government, publishing, industry, and non-profit organizations.

Graduate Graduate Program in Ethnic Studies

The Department of Ethnic Studies seeks to teach students to understand the unique and interlocking experiences of racially marginalized groups and to analyze how race intersects with other forces of social differentiation, such as gender, sexuality, and class, in national and international contexts. The program recognizes the importance not only of the history of racial exclusion and marginalization but also the creative ways in which various racial groups sustain their humanity through cultural preservation, transference, and renewal. Ethnic Studies is committed to nurturing students to become culturally aware, astute, civic-minded individuals who strive to strengthen the communities in which they reside. Because the study of ethnic groups intrinsically reveals how race structures life chances and opportunities, the scholarly orientation of the department reflects a commitment to meaningful changes in public policy and social life. The department offers graduate-level education to prepare students as leaders in the field of ethnic studies.

Students interested in earning a Master of Arts degree in Ethnic Studies should refer to the Graduate and Professional Bulletin and the Department of Ethnic Studies (<http://ethnicstudies.colostate.edu/>).

Major in Ethnic Studies

The Ethnic Studies major involves critically examining the interlocking forces of race, gender, class, sexuality, and other forms of social differentiation that shape the histories and experiences of racially marginalized groups. The programs of study interrogate how these socially constructed ideas impact distribution of social goods, affect life chances, shape identities and worldviews, and reproduce social inequalities. Drawing from interdisciplinary and comparative theoretical frameworks, we bring to bear issues of power, privilege, and social justice pertinent to the experiences of diverse populations in the U.S. and abroad. We are especially committed to nurturing civic-minded and culturally informed students who strive to strengthen the communities in which they reside. In support of the land-grant mission of CSU, students and faculty in the Ethnic Studies program engage with communities on and off campus in order to effect meaningful change in public policy and social life.

Learning Outcomes

Upon completion of the program of study, students will demonstrate:

- An understanding of the key concepts shaping the experiences of various racial and ethnic groups in the United States and abroad.
- Familiarity with social histories and experiences of racial and ethnic groups.
- Effective oral communication, writing, and research skills.
- An increase in critical thinking, intellectual, and personal growth.
- An understanding of the value of social consciousness and personal responsibility.

Potential Occupations

Both theoretical understandings of and practical experience in cross-cultural and inter-ethnic relations are invaluable in today's world. Ethnic Studies graduates work in the following fields and occupations: K-12 and adult education (e.g. refugee/immigrant education); diversity, equity, and inclusion training/consulting; human social services including counseling, health care, and civil service; federal, state, tribal, and local government, and community service; natural resources development and technology; legal services; communications media such as newspaper, radio, video, and television; archival and museum studies; non-profit agencies and community organizing; and advanced studies including

graduate programs in the social sciences and professional programs (e.g. law, social work).

Concentrations

- Community Organizing and Institutional Change Concentration
- Global Race, Power, & Resistance Concentration
- Social Studies Teaching Concentration

Major in Ethnic Studies, Community Organizing and Institutional Change Concentration

The Community Organizing and Institutional Change concentration in the Ethnic Studies major offers students the opportunity to learn the history and methods diverse communities have used to seek civil rights. With a focus on recognizing, listening, respectfully engaging,

and effectively organizing community efforts to create a more equitable society, students will be able to help guide organizations and institutions. Through courses focused on policy, organizing, and institutional change, students will recognize and respond to contemporary issues.

Learning Outcomes

Upon successful completion, students will be able to:

- Illustrate a critical understanding of structural, endemic, and institutional racism and discrimination.
- Develop analytical skills to analyze and evaluate racism and discrimination in communal and organizational structures.
- Create plans, programs, instruction, or policy solutions based on analysis and evaluations.
- Develop analytical and practical skills in applying intersectional analyses and coalitional building across differences.

Major in Ethnic Studies, Global Race, Power, & Resistance Concentration

The Global Race, Power, and Resistance concentration offers students an Ethnic Studies focus on transnationalism, diaspora, and migration

processes highlighting the impacts of colonialism, racial and ethnic ideologies, and imperialism on a global scale. This concentration prepares students for positions in federal, state, and local government, working in public policy, NGOs (Non-Government Organizations) and international organizations like the United Nations, immigration reform and policy.

Learning Outcomes

- Illustrate a critical understanding of key concepts related to transnationalism, diaspora studies, migration, colonialism, the formation of racial/ethnic ideologies, and imperialism.
- Develop analytical skills to analyze and evaluate racism and discrimination in communal and organizational structures.
- Create plans, programs, instruction, or policy solutions based on analysis and evaluations.
- Develop analytical and practical skills in applying intersectional analyses and coalitional building across differences.

Minor in Ethnic Studies

The minor in Ethnic Studies provides an opportunity for students to take a group of courses that address the impact of race, culture, class, gender, and sexuality in shaping institutions, social relations, and identities. Regardless of the main area of students' academic focus and career aspirations, a minor in Ethnic Studies will be advantageous as employers and organizations increasingly look for individuals capable of communicating across difference and addressing issues of equity and justice.

Requirements Effective Fall 2022

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students in the Ethnic Studies minor must earn a minimum grade of C (2.000) for all Ethnic Studies courses required for the minor.

Minor in Indigenous Studies

The objective of the Indigenous Studies minor is to provide students with a deep understanding of the theoretical positions and practical applications central to Indigenous ways of knowing and being. The minor is dedicated to foundational knowledge and awareness of Indigenous scholarship, priorities and ways of engaging.

Learning Objectives

- Describe and demonstrate knowledge of traditional and contemporary Indigenous cultural experiences and knowledge production through theories and conceptual practices of Indigeneity;

distinguish from stereotypical ideas and images and/or the abundance of misrepresentations.

- Apply and explain central environmental approaches and paradigms of nature from Indigenous values, histories, norms, and contemporary engagements.
- Integrate and demonstrate skills in the application of Indigeneity as it relates to kinship, gender, sexuality that include critical, creative, concise and accessible comprehension.
- Assess and conduct research on historical and contemporary policy/law in written and oral content that include relevant application and accessible comprehension.
- Analyze research from Indigenous methodological perspectives. Describe the dissemination of knowledge from Indigenous scholarship paradigms.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

¹ Graduate coordinator approval required. A minimum of 9 regular graduate credits are required to complete the certificate with only 3 credits in thesis, supervised college teaching, or independent study. All courses should include feminist, women's, and/or gender studies theories, methodologies, and paradigms. Students can submit course syllabi to the graduate coordinator for approval.

Master of Arts in Ethnic Studies, Plan A

The Master of Arts in Ethnic Studies, Plan A provides students with a comprehensive understanding of the enduring and transformative nature of race and ethnicity in the United States and around the globe. The program develops professional competencies in working with diverse communities to bring about meaningful social change. Through the development of strong research, writing, and oral skills, a master's degree in ethnic studies prepares students to become informed citizens and competitive job seekers. Our students are uniquely positioned to enter a workplace that is more diverse than ever, and where issues of race, ethnicity, gender, and sexuality, among others, are more relevant than at any time in the recent past.

Professor Robert Gudmestad, Chair

Undergraduate History majors at CSU find an engaged community of peers and professors who want to explore the past. Our curriculum allows students to follow and expand their interests. CSU History faculty challenge students, helping them build critical thinking, research, and communication skills in the classroom and apply those skills in world.

Graduate students take rigorous seminars, pursue internships, and work with professional public historians to build a range of skills. Some go on to PhD programs and many enter the workforce as historians, cultural resource managers, city planners, library and archive professionals, park interpreters, and teachers. Our graduate alumni join an active, growing network of people with careers from the National Library of Congress to the Grand Rapids Museum.

Undergraduate Majors

- Major in History
 - Digital and Public History Concentration
 - General History Concentration
 - Language Concentration
 - Social and Behavioral Sciences Concentration
 - Social Studies Teaching Concentration

Minor

- Minor in History

Graduate Graduate Programs in History

The Department of History at CSU chooses a select group of students each year for its Master of Arts program in History and in Public History. Earning an M.A. in History at CSU is a step toward any number of exciting future paths including:

- A successful career in public history working for Federal or state agencies, in consulting, for non-profits and communities, and more. Our concentration in Cultural Resource Management & Historic Preservation

Preservation is nationally renowned and has a high job placement rate.

- Advancing the careers and deepening the knowledge base of social studies and history teachers.
- Pursuing a Ph.D. in a field in which our faculty has expertise. We have a considerable concentration of established historians who study U.S. History, Public History, and Environmental History.

We offer three programs of study in which students can earn their M.A.:

- Write a thesis on Plan A
- Earn your degree without a thesis on Plan B
- Specialize in Cultural Resource Management & Historic Preservation.

Regardless of the program of study students select, they will work closely with one another and with the department's faculty mentors. Our department is committed to high-quality mentoring and to providing hands-on experience through internships, service-learning projects, and paid research positions at the Public Lands History Center. (<https://publiclands.colostate.edu/>) Although our curriculum is geographically based, the content of our graduate seminars explores themes of gender & sexuality, class, race & ethnicity, environment, and more. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of History (<https://history.colostate.edu/graduate/>) website.

Major in History

History: it's about time.

From how we express emotions to what we eat for breakfast, every aspect of human life is shaped by political, environmental, social, and cultural factors over time. As these factors change, people's lives change.

At CSU, we ask historical questions and follow the evidence to understand what happened in the past and why it happened. Through historical research, we move away from judgment and assumptions about other cultures and instead learn from every historical moment, including our own.

The Major and Minor in History at CSU offer students courses that encompass human history around the world, as well as several distinct features linked to our history as Colorado's Morrill Act land-grant university (<https://catalog.colostate.edu/general-catalog/about-csu/land-grant/>). We have led in the creation of graduate **public history** programs, and now have an undergraduate concentration in **Digital and Public History**, as well as concentrations in General History, Language, and Social Studies Teaching.

Our History majors work in many different careers (<https://history.colostate.edu/careers/>) in public history in museums, archives, state and local government agencies in historic preservation and cultural resources management, the National Park Service and Forest Service, and consulting; they work in schools as teachers and administrators; they work in public service; and they are prepared for graduate and professional school in a variety of fields. We offer **internships** in many of these fields for CSU credit to help students explore their interests in history.

Whichever concentration you choose, our **Blaze Your Trail** program will allow you to follow your interests across time and space in our curriculum. Here are the major themes we offer to help you link your coursework and create personalized pathways through the History major.

- War & Diplomacy
- Women & Gender
- Revolution
- Race & Ethnicity
- Empire, Colonialism, & Borderlands
- Religion
- Environment

Learning Outcomes

Students in History courses:

- Analyze and interpret historical materials, such as documents, material artifacts, and images;
- Engage in chronological reasoning to understand causation and change over time;
- Examine critically how people in the past understood their own history in scholarly works and in popular forms such as myths, memorials, and other public commemorations;
- Interpret, write, and speak about the past using evidence and according to the standards and expectations of the historical discipline, including honest use of evidence, openness to multiple perspectives, and historical empathy; and
- Analyze both change and continuities over time by considering how events such as revolution, migration, war, ecological disturbance, and globalization changed societies as well as how structures like class, ethnicity, gender, race, sexuality, climate and religion shaped societies over a longer time horizon.

Accelerated Program

The major in History includes an **accelerated program option** for students in the Digital and Public History concentration, General History concentration, and Language concentration to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over three **summer sessions**. Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation.

Visit the Office of the Provost website for additional information about **Accelerated Programs**.

Concentrations

- Digital and Public History Concentration
- General History Concentration
- Language Concentration
- Social and Behavioral Sciences Concentration
- Social Studies Teaching Concentration

Major in History, Digital and Public History Concentration

The Digital and Public History Concentration offers an opportunity for focused coursework in public history (i.e. National Parks, historic preservation, cultural resources management, etc.) and digital history, which applies twenty-first century tools and technologies to understand and interpret the past. This concentration also requires an **internship** for at least 3 credits, so students receive real-world experience in these fields before graduation.

History majors who select the Digital and Public History concentration must complete another major or minor offered at CSU (except the minor in History).

Requirements Effective Fall 2023

A minimum grade of C (2.00) must be earned in HIST 492 and all 100-level courses required in the history major.

Major in History, General History Concentration

The General History concentration is an excellent choice for students planning careers in history, government service, or other professional occupations requiring broad intellectual and practical skills, and it offers students maximum flexibility with History electives so students can pursue their own intellectual passions across our curriculum. Use our **Blaze your Trail** tool to find courses with common themes and perspectives in these fields:

- War & Diplomacy
- Women & Gender
- Revolution
- Race & Ethnicity
- Empire, Colonialism, & Borderlands
- Religion
- Environment

History majors who select the General History concentration must complete another major or minor offered at CSU (except the minor in History).

Requirements

Effective Fall 2023

A minimum grade of C (2.00) must be earned in HIST 492 and all 100-level courses required in the history major.

Major in History, Social Studies Teaching Concentration

The Social Studies Teaching concentration is for students who plan to teach in middle school, junior high, or high school. Students must also complete the requirements for the Social Studies Undergraduate Teaching Licensure through the Center for Educator Preparation (CEP) (<http://cep.chhs.colostate.edu/>) in the College of Health and Human Sciences.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (CEP) ([http://](http://cep.chhs.colostate.edu/)

cep.chhs.colostate.edu/) and the School of Education, or visit the Education Building, Room 111 for general information.

Requirements Effective Fall 2021

Distinctive Requirements for Degree Program:

During their sophomore year, students must apply for admission to the licensure program. This requires completion of at least 30 credits, a minimum **2.750** 3.000 GPA, and passing a criminal background check. To continue in the major, students must maintain a 3.000 GPA. Grades in all History, Social Studies and Education courses must be C (2.000) or above.

Minor in History

The minor in History allows students to explore historical questions and issues while broadly exploring the past—or **Blaze Your Trail** by following their intellectual passions across our curriculum:

- **War & Diplomacy**
- **Women & Gender**
- **Revolution**
- **Race & Ethnicity**
- **Empire, Colonialism, & Borderlands**
- **Religion** - see also the Religious Studies Interdisciplinary Minor (<https://catalog.colostate.edu/general-catalog/university-wide-programs/interdisciplinary-studies/religious-studies-interdisciplinary-minor/>)
- **Environment**

This very customizable minor consists of 21 semester credit hours, 12 of which must be taken at the upper-division level, and complements a wide variety of majors in other disciplines, such as international studies, political science, economics, natural resources, foreign languages, literature, anthropology, sociology, and philosophy. Majors in business, mathematics, the sciences, and communication can use the minor to apply interpretive and analytical skills to evaluate and assess evidence and sources.

To declare the minor in History, visit the History Office, B356 Clark, or email **Allison Pine** for details.

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Master of Arts in History, Plan A, Liberal Arts Specialization

The Master of Arts in History, Plan A, Liberal Arts Specialization offers students the opportunity to write an original thesis. Working closely with a faculty mentor in one of our department's areas of expertise (for example, U.S. history, environmental history, public history), students on Plan A conduct archival research to author an original piece of scholarship. Coursework on Plan A, and in all of our programs of study, is based in small seminars and stresses historiography, research methods, and hands-on experience.

The Plan A program of study requires proficiency in a language other than English. This requirement can be met through an exam or through coursework.

Learning Outcomes

Students who successfully complete the program will:

- 1) Develop historical research questions and conduct historical synthesis, analysis, and interpretation using primary and secondary source research.
- 2) Develop the critical reading, speaking, and writing skills essential to professional historical practice.
- 3) Define historical narratives and develop both breadth and depth of knowledge in the historiography of chosen fields of study.
- 4) Conduct archival research to author an original piece of scholarship.
- 5) Practice historical methods in various settings, which may include academic, applied, and/or public.

Master of Arts in History, Plan B, Liberal Arts Specialization

The Master of Arts in History, Plan B, Liberal Arts Specialization is a rigorous degree plan based in coursework and internships, but which does not require a thesis or foreign language proficiency test. This program of study is especially appropriate for those desiring to pursue studies in general public history, employment in secondary education (licensure may be required), or those who do not want to pursue further advanced degrees.

Working closely with a faculty mentor in one of our department's areas of expertise (for example, U.S. history, environmental history, public history), students on Plan B complete coursework and are encouraged to pursue internships or practicums. Coursework on Plan B, and in all of our programs of study, is based in small seminars and stresses historiography, research methods, and hands-on experience.

Learning Outcomes

Students who successfully complete the program will be able to:

- 1) Develop historical research questions and conduct historical synthesis, analysis, and interpretation using primary and secondary source research.

Major in Journalism and Media Communication

The study of journalism, mass communication, and specialized media combines high-level professional training with a broad foundation in the liberal arts. All students complete a common 24-credit core, including writing, multimedia, and conceptual courses, as well as a capstone course. Students work closely with their Academic Success Coordinator and Faculty Advisors to select an additional 22 credits in a focus area crafted to match their career interests with options in **Journalism** and Storytelling, **Media** Production and Strategic **Communication**. Practical experience can be gained on the staffs of the *Rocky Mountain Collegian*, the award-winning campus television station Collegian TV, *College Avenue* magazine, and KCSU-FM Radio. Graduating seniors present professional portfolios for assessment by panels of faculty and communication professionals from Denver and elsewhere in Colorado. Because successful communicators require broad knowledge, this flexible program encourages development of a background in the humanities, social sciences, natural sciences, and in-depth study in an area of interest outside journalism. The addition of a minor or double major in disciplines such as political science, information technology,

history, economics, business, communication studies, psychology, the arts, or natural or applied sciences is possible.

The Department of Journalism and Media Communication is one of a relatively small number of departments formally recognized by the Accrediting Council on Education in Journalism and Mass Communications. Participation in volunteer activities, cooperative education opportunities, or communication-related part time jobs is highly recommended to enhance practical training and development.

Learning Outcomes

Students will demonstrate:

- Competence in writing, editing, and producing media messages as well as in planning, designing, and evaluating effective public information programs.
- Knowledge and use of communication theory and research principles to guide the selection of communication audiences, message content and format, and media channels to enhance communication impact.
- Understanding of the ethics, laws, and values associated with professional communication activity.

Accelerated Program

The major in Journalism and Media Communication includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The Journalism and Media Communication program emphasizes the role of mass and specialized media in society and prepares students for entry-level work in private business, government, and education. Depending upon the focus of study, students may find career opportunities in a wide variety of professional communication venues. Specific career opportunities may include: advertising copywriter, designer, or producer; agriculture writer, reporter, or editor; attorney specializing in communication law; blogger, columnist, or editorial cartoonist; college professor; communications manager or director; company spokesperson; corporate media specialist; e-mail and direct mail strategist; environmental media specialist; freelance writer, editor, or photographer; health writer, editor, or producer; marketing coordinator; media relations director or strategist; multimedia producer; non-profit communications director; novelist or non-fiction author; reporter or photojournalist for the web, magazines, newspapers, or television; owner of public relations agency or production company; professional speaker; public affairs officer for government agency; public relations agency account executive; publication designer for magazines or newspapers; radio disc jockey, reporter, or music director; reality television producer, writer, photographer, or on-camera talent; science writer or editor; social media specialist; sports writer, photographer, or producer; technical writer or editor; teacher for any level of K-12 education upon completion of appropriate licensing (see the Center for Educator Preparation (<http://cep.chhs.colostate.edu/>)); television news anchor or program host; television or radio news program producer or director; television

documentary producer; travel writer, photographer, or program host; video editor for news, corporate, or entertainment television; website designer and manager.

Requirements Effective Fall 2023

All majors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each course that carries the JTC subject code.

Association for Education in Journalism and Mass Communication Accreditation Requirements

Majors in Journalism and Media Communication must take a minimum of 46 credits of JTC courses and a minimum of 66 credits outside of JTC.

Of the 66 credits outside of JTC, 21 must meet **one** of the following Second Field criteria with approval of advisor:¹

1. a Minor;
2. an Interdisciplinary Minor;
3. 21 credits in one subject code;

4. 9 credits from one subject code and 12 credits from a second subject code;
5. a selection of 21 credits comprising a Second Field developed by the student and the advisor.

Courses taken outside of the department may include All-University Core Curriculum (AUCC) courses, Minor or Second Field courses, or any other out-of-department (non-JTC) courses used to complete the major as approved by advisor.

The 46 JTC required credits include 24 credits specified in the curriculum below plus 22 credits of directed electives to create an individualized focus area from the following categories (Writing, Production, Internship/ Practicum, Advanced, Additional credits).

Directed Electives for Individualized Focus Area

Minor in Science Communication

The minor in Science Communication is designed to educate highly qualified communicators who have interests in specialized academic disciplines and career fields. Because science often involves complicated research and processes, communicating the results of that work requires special skills. This program is designed to prepare students for a wide range of niche career opportunities in media, corporate communication, science-related industries, and scientific environments. Journalism and Media Communication major students are not allowed to declare this minor, but may choose a science communication focus within their major.

Requirements Effective Fall 2021

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Master of Communications and Media Management, Plan C (M.C.M.M.)

The Master of Communications and Media Management, Plan C (M.C.M.M.) is designed for students with a bachelor's degree seeking to transition to a communication-related career, or for those seeking to move up into a management role in their present media profession. The rapid rate of technological change in media technology has created a need for constant retraining and the acquisition of new multimedia knowledge and management skills. The program curriculum is designed to provide students with a comprehensive overview of "new media" developments. Upon completion of the program, students are prepared to strategize and manage specific communications projects, as well as manage and direct staff members or contract

workers in a communications unit within a corporate, educational, or nonprofit organization.

Minor Programs

A minor in a foreign language offers opportunities for studying the language and culture of another country and complements many major fields. A student with a broadly based education, including a foreign language, will be better prepared to deal with changing technological, economic, and social conditions on an international scale. A student who minors in a foreign language may expect to develop sufficient competency to speak and write with reasonable accuracy and fluency while pursuing interest in language, literature, and culture. See the department for specific information on upper-division transfer work in the language of the minor.

All majors and minors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each upper-division course that carries the LARA, LASL, LCHI, LFRE, LGEN, LGER, LHEB, LITA, LJPN, LKOR, LLAT, LRUS, or LSPA subject code.

Major in Languages, Literatures, and Cultures

Learning Outcomes

Upon completion of the program of study, students will demonstrate:

- Communicative oral skills in the target language, including grammatical accuracy, correct use of tense, fluency, appropriate intonation, suitable vocabulary and discourse devices for expressing opinions or when giving research presentations.
- Communicative writing skills in the target language, including clarity of ideas, grammatical accuracy and appropriate vocabulary, adequate elaboration of ideas through a variety of sentence structures and vocabulary, and logical flow of ideas through the use of discourse organizational devices.
- Analytical skill in literary and cultural texts of the target language, including ability to formulate and present a topic of inquiry, to critically analyze the topic with valid supporting evidence, and to cogently synthesize and summarize the ideas in bibliographical sources and the results of their own analytical inquiry.
- Increased sensitivity to and appreciation of cultural and linguistic differences.

Study Abroad

The department strongly encourages education or other experiences abroad and has exchange agreements in place with universities in several countries. Students should visit the department prior to studying abroad for clarification on course transfers. Information is available through Education Abroad (<http://educationabroad.colostate.edu/>).

Minors and Other Languages

Minors are offered in Chinese, French, German, Japanese, and Spanish, as well as interdisciplinary minors in American Sign Language, Arabic, Italian and Russian Studies.

Potential Occupations

Available career choices include, but are not limited to: bilingual educator, foreign language teacher, translation/interpretation, linguist, civil service, foreign service and diplomacy, medical fields, social services, immigration/naturalization, journalism/ broadcasting, customs, banking, import/exports, sales/customer service, publishing, international business, international nonprofit organizations, government/military intelligence, global tourism.

Accelerated Program

The Spanish for the Professions concentration includes an **accelerated program option** for students to graduate on a faster schedule.

Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three **summer sessions**. Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about **Accelerated Programs**.

The School of Music, Theatre, and Dance at CSU provides a rigorous undergraduate educational experience.

CSU Music believes that music is both an artistic and intellectual pursuit. We offer intense training in specialized music disciplines combined with a balance of core music courses in music history and theory. Our renowned and versatile faculty are committed to helping students discover their own unique identities through music. We offer Bachelor of Music (B.M.) degrees in Music Therapy, Music Education, Music Composition, and Music Performance, as well as a Bachelor of Arts in Music (B.A.). Additionally, undergraduates can earn a performance-based music minor.

CSU Theatre emphasizes a reciprocal relationship between practice and scholarly study. Students explore every aspect of theatre, including the theory and practice of acting, singing, theatrical design, stage management, technical theatre, dramaturgy, dramatic criticism, storytelling, and playwriting. Students pursuing a Bachelor of Arts in Theatre (B.A.) choose a concentration: Performance, Musical Theatre, Set Design, Lighting Design and Technology, Projection Design and Technology, or Sound Design and Technology. Each concentration provides fundamental skills and experiences in theatre within a liberal arts context.

CSU Dance offers programs in classical and contemporary dance education culminating in either a Bachelor of Fine Arts in Dance (B.F.A.) or a Bachelor of Arts in Dance (B.A.). Students focus on areas such as performance, technique, and foundations; choreography and improvisation; pedagogy and teaching methodologies; history and theory; and theatrical production and design. Dance majors explore the many possibilities for movement expression, along with creativity and scholarly examination, in a challenging and supportive environment.

Non-performing arts majors are welcome to participate in music ensembles, marching band, theatre productions, theatre shops, dance concerts, and dance technique classes. Many activities require an audition and some do not. **Please visit our website for information** about how to get involved as a non-performing arts major.

The School of Music, Theatre, and Dance offers graduate programs leading to the Master of Music (M.M.), offering students the skills and experience necessary to become highly skilled music educators, music therapists, performing artists, and conductors.

The vibrant learning environment fosters and supports creativity and growth while high standards of teaching, scholarship, performance and research are developed. We are pleased to offer small academic classes, applied study with highly qualified faculty, and careful attention to advising. With over 100 performance dates a year, performance opportunities are extensive and the department represents the arts on campus in a highly visible and prestigious environment.

Applicants to graduate programs in music must have a B.M., B.M.E., or equivalent bachelor's degree. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the School of Music, Theatre, and Dance (<http://music.colostate.edu/>).

Major in Dance

Office in University Center for the Arts, Room 120

Professor Emily Morgan, Director of Dance (emily.morgan@colostate.edu)
(970) 491-5529

dance.colostate.edu (<http://dance.colostate.edu>)

Welcome to Colorado State University Dance where we offer a training center that prepares majors for professional careers in dance and related fields. Dance students explore the many possibilities for movement expression, along with creative and scholarly examination, in a challenging and supportive environment. In addition to regular training in classical and contemporary dance techniques, the curriculum requires performance, choreography, pedagogy, production, and theoretical coursework. Numerous performance opportunities include five main stage productions each year and regular guest artist residencies and masterclasses.

The Bachelor of Fine Arts in Dance (B.F.A.) is a professional education program designed to prepare students for careers in dance. The unique B.F.A. in Dance, Dance Education Concentration prepares students to teach in elementary and secondary schools, dance studios, and the community at large. The Bachelor of Arts in Dance (B.A.) allows students to tailor their study of dance to fit their interests and is designed to prepare students for a variety of dance-related careers. The B.A. is designed for students wishing to major in dance and major or minor in another field.

Students not majoring in dance are encouraged to enroll in dance technique courses, space permitting. Any student enrolled in a dance technique class is eligible to audition for a role in a dance performance. Auditions for performances are held each semester. Come join the dance community at CSU!

Dance Audition

In addition to applying to CSU through the Office of Admissions, a dance audition is required for entrance into the B.F.A. and B.A. dance degrees. Admission to the dance major is competitive, and therefore it is important to apply early. Visit Dance Audition Information (<https://dance.colostate.edu/audition/>) for details.

Major in Dance, B.A.

The **Bachelor of Arts in Dance (B.A.)** offers comprehensive education and training in classical and contemporary dance techniques, performance, choreography, and pedagogy.

The B.A. in Dance includes:

- Technique, Performance, and Repertoire
- Choreography and Improvisation
- Pedagogy and Teaching Methodologies
- History and Theory
- Technical Production and Design
- Guest Artists and Masterclasses

The B.A. allows students to tailor their study of dance to fit their interests and is designed to prepare students for a variety of dance-related careers after college. With opportunities for scholarly and creative research, community engagement, and interdisciplinary collaboration, the degree is constructed for students wishing to major in dance and major or minor in another discipline. Technique classes in contemporary and classical forms aim to help students achieve a high level of performance and artistry. Students apply theoretical knowledge in tangible ways, such as performance of repertoire, supervised teaching opportunities, concert direction, independent projects, and choreography for concerts.

The School of Music, Theatre, and Dance is comprised of esteemed faculty and administrative and production staff, all dedicated to supporting student education in the arts.

Program-level Learning Objectives

- Demonstrate technical and artistic competence in classical or contemporary dance performance, choreography, and teaching.
- Create solo, group, and/or site-specific choreography utilizing established and inventive devices and movement vocabulary.
- Develop best practices in the field and connect dance with other fields through research, writing, and/or performance.
- Interpret and express the development and significance of dance forms across cultures.

- Explore the multitude of ways in which community engagement is embedded in dance, embracing diversity, equity, inclusion, and leadership.
- Experience facets of dance production and collaborate with colleagues in technical theatre to navigate the many moving parts that contribute to dance production.

Dance Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Dance faculty is required for entrance into both the B.F.A. and the B.A. Visit Dance Audition Information (<https://dance.colostate.edu/audition/>) for more information.

Major in Dance, B.F.A.

Colorado State University offers a rigorous classical and contemporary dance program culminating in a **Bachelor of Fine Arts in Dance**. The degree requires a strong physical and mental commitment and an eagerness to learn and improve.

The B.F.A. in Dance consists of 120 total credits, including:

- Performance, Technique, and Repertoire
- Choreography and Improvisation
- Pedagogy and Teaching Methodologies
- History and Theory
- Technical Production and Design
- Guest Artists and Masterclasses

Our B.F.A. degree is a professional degree program designed to prepare students for careers in dance. Students explore the many possibilities for movement expression, along with creative and scholarly examination, in a challenging and supportive environment. The curriculum is focused on classical and contemporary dance performance, choreography, and

pedagogy. This holistic approach also includes anatomy and kinesiology, music, production design, and career development. Technique classes in classical and contemporary forms are aimed at achieving an advanced level of performance and artistry. Students have multiple opportunities to apply theoretical knowledge in tangible ways, such as performance of repertoire, supervised teaching, supervised concert direction, and choreography for concerts. Beginning freshman year, students are eligible to perform in our five annually produced dance concerts.

The School of Music, Theatre, and Dance is comprised of esteemed faculty and administrative and production staff, all dedicated to supporting student education in the arts.

Program-level Learning Objectives

- Apply research, assessment, critical thinking, and advocacy skills to develop best pedagogical practices as a dance teacher in elementary and secondary schools, dance studios, and the community at large.
- Assess the backgrounds, abilities, developmental levels, and individual identities of students and plan curriculum that considers their physical, intellectual, social, and emotional development.

- Explore the multitude of ways in which community engagement is embedded in dance, embracing diversity, equity, inclusion, and leadership.
- Demonstrate technical and artistic achievement in the areas of classical, contemporary, and urban dance performance, teaching, and choreography.
- Create solo, group, and site-specific choreography utilizing established and inventive devices and movement vocabulary.
- Interpret and perform original and historic repertoire with confidence and discuss the development and significance of dance forms across cultures.

Major in Dance, B.F.A., Dance Education Concentration

Our unique B.F.A. in Dance with a concentration in dance education prepares students to teach in elementary and secondary schools, dance studios, and the community at large, with field experience in all three areas. Each of the classes in dance education involves supervised teaching and field experience, giving students extensive professional experience while in the program. Students have multiple opportunities to apply practical and theoretical knowledge in tangible ways. The degree equips students to apply for dance teaching licensure (grades P-12) in the state of Colorado in conjunction with CSU's Center for Educator Preparation (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>). Dance students receive in-depth training in pedagogy, classical, contemporary, and urban dance techniques and performance, and choreography. This holistic approach also includes anatomy and kinesiology, music for dance, production design, and career development. The program strives to center equitable teaching practices and philosophies that reflect best teaching practices. Beginning freshman year, students are eligible to perform in our four, annually produced dance concerts. The School of Music, Theatre, and Dance is comprised of esteemed faculty and administrative and production staff, all dedicated to supporting student education in the arts.

Major in Music (B.M.)

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu>)

The Bachelor of Music (B.M.) at CSU is a professional degree program, with concentrations designed to prepare students to become highly skilled music educators, music therapists, performers, and composers. Program goals encourage and develop high standards of teaching, scholarship, performance, and research in music. We are pleased to offer small academic classes, applied study with highly qualified faculty, and careful attention to advising. A successful audition is required prior to entrance into the Bachelor of Music (B.M.) programs.

Courses in music appreciation, music theory fundamentals, and ensembles are open to all students regardless of major.

Program-level Learning Objectives

- Ability to perform music from a variety of historical/ style periods appropriate to the area of specialization, and exhibit the appropriate skills for musical self-expression in juried performances, public concerts, and other performance situations. These skills include: technique, musicianship, tone, diction/articulation, style, interpretation, sight-reading, rhythm, and artistry.
- Keyboard skills appropriate to the area of specialization.
- The capacity to create original or derivative music.
- Understanding of the common elements and organizational patterns of music, including musical forms, processes, and structures.

- Knowledge of music history and repertory, including representative composers and works according to the area of specialization, as well as study and experiences with music in addition to that of the primary culture encompassing the area of specialization.
- Students are also expected to learn music literature from all periods through aural and score analysis. Performance skills are tested at the end of the sophomore year and in a graduation recital if required by the degree option. Some programs require satisfactory completion of supervised student teaching, an internship, or a senior project.

Potential Occupations

The professional undergraduate music curricula at CSU can lead to personally fulfilling careers as music educators, music therapists, performers, composers, private teachers, and entrepreneurs. Music graduates from CSU have successfully gained employment in public and private schools, hospitals and institutions, and as professional performers and composers, and/or have advanced to outstanding graduate programs throughout the United States.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Please visit the Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) for special course fees.

Major in Music (B.M.), Composition Concentration

The Bachelor of Music, Composition Concentration is a professional undergraduate degree program designed to prepare the student to compose original music for a variety of genres, including symphonic works, chamber music, electronic music, and music for media. Coursework emphasizes comprehensive musicianship, with particular emphasis on individualized study in music composition.

Program-level Learning Objectives

- Compose original music in a style that is consistent with current trends in contemporary art music and related fields including music for visual media.
- Score music that is effective for the performing media employed in the student's compositions including but not limited to solo and chamber music, music for standard large ensembles such as orchestra, chorus and wind ensemble, and electronic/electroacoustic works.
- Produce musical scores in keeping with current professional standards and demonstrate an understanding of traditional and contemporary notation practice.
- Produce fully realized performances and/or recordings of original compositions for a variety of media and/or performers.
- Demonstrated competency using music technology including digital audio workstations, music notation software, MIDI applications, and recording/live audio hardware.
- Demonstrate an understanding of the rights and responsibilities a composer has in the performance, publication, and distribution of his/her works including intellectual property rights for musicians.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M., Composition Concentration. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

Major in Music (B.M.), Music Education Concentration

The Bachelor of Music, Music Education Concentration is a professional degree program that prepares students for teaching choral, instrumental, and general music in elementary and secondary schools. This degree prepares students to apply for music teaching licensure (grades K-12)

in the state of Colorado. CSU's outstanding music education faculty members are in demand as clinicians, guest lecturers, conductors, and researchers. A feature unique to the accredited music education curriculum is the extensive field experience that students receive throughout their coursework, culminating in a semester of student teaching at the end of the program. Students must select one of two options: instrumental or choral.

Program-level Learning Objectives

- Develop and apply musical skill that can be flexibly applied and adapted to a multifaceted array of K-12 music learning contexts.
- Develop practice-based pedagogical skills appropriate for music learning in K-12 music education contexts.
- Apply and develop instructional acumen through practica and professional internships in K-12 contexts.
- Understand and evaluate curricula and instructional resources appropriate for the K-12 music education context.

Options

- Choral Option
- Instrumental Option

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M., Music Education Concentration. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the

following students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Please visit the (<https://provost.colostate.edu/students/>)Office of the Provost and Executive Vice President for special course fees.

Major in Music (B.M.), Music Therapy Concentration

The Bachelor of Music, Music Therapy Concentration is a professional degree designed to prepare the student to take the examination of the Certification Board for Music Therapists (MT-BC). Music therapy is the clinical and evidence-based use of music to accomplish individualized goals within a therapeutic relationship. As a MT-BC, graduates may work in a variety of healthcare settings, including hospitals, clinics, rehabilitation facilities, assisted living centers, and in special education. Some music therapists maintain private practices or serve as consultants.

The undergraduate curriculum includes core music courses, music therapy methods and research courses, and general education courses. All students learn to demonstrate musicianship on several instruments including piano, guitar, and voice. Students engage with community members in a variety of service learning and clinical practicum placements, where they are supervised by board-certified music therapists. Students also complete a clinical internship at one of several approved sites, for a total of 1200 hours of clinical experience (as required by the American Music Therapy Association).

The music therapy program at CSU is internationally recognized for its leadership in clinical training and research. The music therapy area includes the Undergraduate Music Therapy Research Academy and the interdisciplinary Brainwaves Research Laboratory, where students have opportunities for hands-on involvement in music and music therapy research.

A background check is required prior to participating in the practicum course (MU 486A).

Program-level Learning Objectives

- Demonstrate foundational implementation of the four music therapy methods: improvisation, composition, recreative, and receptive.
- Identify a variety of diagnostic criteria for primary special needs populations, foremost including autism spectrum disorder, intellectual/developmental disabilities, Alzheimer's disease, stroke, Parkinson's Disease, mood disorders, thought disorders, and chemical dependency.
- Describe fundamental neuroscience as it relates to how the brain processes music, typically and atypically.

- Use evidence-based practice concepts and ideas in terms of knowing how to access the literature base, understand the client experience, and know the limits of one's personal and clinical expertise.

Music Audition

In addition to applying to CSU through the Office of Admissions, students applying to the B.M., Music Therapy Concentration are required to interview and audition with members of the Music Therapy faculty. Students may elect to audition for an applied studio (i.e., flute, voice, etc.) or to audition for therapy only ("No Studio Track"). Students auditioning for an applied studio must also complete the audition process for their instrument.

Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Please visit the (<https://provost.colostate.edu/students/>)Office of the Provost and Executive Vice President for special course fees.

Requirements Effective Fall 2022

A minimum grade of C (2.000) is required in all music courses used to satisfy the requirements of the BM in Music, Music Therapy Concentration.

Major in Music (B.M.), Performance Concentration

The Bachelor of Music, Performance Concentration is a professional degree that prepares students for potential professional careers in the music and creative industries as performers, entrepreneurs, and private music teachers. It also prepares students for continued study at the graduate level. The curriculum provides a strong foundation in music history, music theory, and performance, with many opportunities for performance, including large and small ensemble participation as well as solo recitals.

In order to complete the Performance Concentration, students must select one of the following options:

Options

- Jazz Studies Option
- Orchestral Instrument Option
- Organ Option
- Piano Option
- Voice Option

Program-level Learning Outcomes

- Ability to perform music from a variety of historical/style periods and exhibit the appropriate skills for musical self-expression in juried performances. These skills include technique, musicianship, tone, diction/articulation, style, interpretation, sight-reading, rhythm, and artistry.
- Keyboard skills.
- The capacity to create original or derivative music.
- Understanding of the common elements and organizational patterns of music, including musical forms, processes, and structures.
- Knowledge of music history and repertory, including representative composers and works according to the area of specialization, as well as study and experiences with music in addition to that of the primary culture encompassing the area of specialization.
- Students are also expected to learn music literature from all periods through aural and score analysis. Performance skills are tested at the end of the sophomore year and in a graduation recital if required by the degree option. Some programs require the satisfactory completion of supervised student teaching, an internship, or a senior project.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M., Performance Concentration. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Please visit the (<https://provost.colostate.edu/students/>)Office of the Provost and Executive Vice President for special course fees.

Major in Music (B.M.), Performance Concentration, Jazz Studies Option

Please refer to the main Bachelor of Music, Music Performance Concentration page for the performance concentration overview.

Jazz Studies Option

The Jazz Studies Option is a professional degree program that offers instrumental students a balanced course of study in both performance and academic classes to help them develop their skills as jazz artists and educators. Students in the degree program have the opportunity to study jazz history, theory, improvisation, pedagogy and composition and arranging, in addition to taking private lessons with both traditional applied faculty and jazz specialists.

The Bachelor of Music in Performance, Jazz Studies Option is intended to give the student the necessary skills to pursue a career in performing jazz and other popular styles while also learning the core performance skills and musicological knowledge of a traditional Bachelor of Music in Performance degree. The degree is designed to prepare students to perform jazz at a high level in public performance and/or continue graduate work in jazz and other genres.

Ensembles in the Jazz Studies area consist of two large jazz ensembles and two smaller jazz combos. Both the ensembles and combos expose

students to classic and contemporary jazz literature and styles with an emphasis on quality performance and education.

Program-level Learning Objectives

- Ability to perform music from a variety of historical/ style periods and exhibit the appropriate skills for musical self-expression in juried performances. These skills include technique, musicianship, tone, diction/articulation, style, interpretation, sight-reading, rhythm, improvisation, and artistry.
- Keyboard skills.
- The capacity to create original or derivative music in the jazz idiom as an improviser and composer/arranger
- Understanding of the common elements and organizational patterns of music, including musical forms, processes, and structures.
- Knowledge of music history and repertory, including representative composers and works according to the area of specialization, as well as study and experiences with music in addition to that of the primary culture encompassing the area of specialization.
- Students are also expected to learn music literature from all periods through aural and score analysis. Performance skills are tested at the end of the sophomore year and in a graduation recital if required by the degree option. Some programs require the satisfactory completion of supervised student teaching, an internship, or a senior project.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance

into the B.M., Performance Concentration, Jazz Studies Option. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

- Jazz Studies is currently available to students who play the following instruments only: trumpet, trombone, saxophone, piano, percussion, and double bass.
- Auditions for the jazz ensembles are open to all CSU students. Ensemble audition excerpts and instructions are available at Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Major in Music (B.M.), Performance Concentration, Organ Option

Please refer to the main Bachelor of Music, Music Performance Concentration page for the performance concentration overview.

Organ Option

Organ students have an opportunity to perform on the world-famous Casavant organ. Since its installation in 1968, the Casavant organ has gained international fame as one of the 25 greatest organs in the world (Anton Heiller, 1968). Built in the North German tradition, the Colorado State University's Casavant is among the most beautifully balanced and well-voiced organs in the world. In addition to practice and lesson time on the Casavant, organ students, through an arrangement with local churches, have access to practice and lesson times on three other exemplary organs in Fort Collins: the Phelps organ at St. Luke's Episcopal Church, the Marcussen & Son organ at First United Methodist Church, and the Allen Digital organ at the American Baptist Church. Harpsichord students practice and take lessons on a two-manual, three-choir instrument built by Dennis Brown (1982) to the specifications of Taskin, the great French harpsichord builder to the Louis' at Versailles.

Liturgical Studies is a course of study that complements the degree program of an undergraduate or graduate music student interested in the field of church music. It is also designed to provide continuing education to professional musicians in the community. The program seeks to offer

theory and history of liturgical music together with applied music lessons and practical training for church music careers.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M., Performance Concentration. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Major in Music (B.M.), Performance Concentration, Voice Option

Please refer to the main Bachelor of Music, Music Performance Concentration page for the performance concentration overview.

Voice Option

The Bachelor of Music, Performance Concentration, Voice Option is a professional degree program that provides students with excellent opportunities for vocal, artistic and personal growth. Each member of the voice faculty provides a nurturing, yet challenging studio environment. The emphasis of process over product allows students to develop a solid platform of vocal technique for realizing their personal artistry.

All voice students study with a highly qualified and experienced faculty of professors of voice. In addition to a seminar for freshman voice majors that supports their transition to collegiate study, voice majors spend the Fall semester of their Freshman year by participating in individual lesson rotations with each of the voice faculty. In their second semester of study, voice majors are placed with a single teacher for the remainder of their degree program to further promote personalized and engaged care for the student throughout their study at CSU.

Voice students have the opportunity to perform in a variety of styles and formats, as both soloists and ensemble members of choirs, opera and musical theater productions, as well as chamber music collaborations.

Voice students perform a jury each semester and sing on voice area and departmental recitals throughout the year.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M., Performance Concentration. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Major in Music (B.A.)

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu>)

The Bachelor of Arts in Music (B.A.) allows students to study music within a larger context of a liberal arts education. In comparison to the curriculum leading to the Bachelor of Music (B.M.), less emphasis is placed on studies specifically in music, with greater flexibility for studies outside of music. In lieu of a larger number of credits in music as required for the B.M., the B.A. student completes 21 elective credits in areas outside of music. In addition, the completion of a capstone paper, project, or recital (half recital) is required during the senior year.

Program-level Learning Objectives

- Hear, identify, and work conceptually with elements of music such as rhythm, melody, harmony, structure, timbre, and texture through composition, improvisation, and performance in multiple musical styles.
- Develop and defend musical judgments and demonstrate a synthesis of knowledge and/or skills in one or more areas of music.
- Articulate knowledge of a wide selection of musical literature, the principal eras, genres, and cultural sources.
- As part of a well-rounded liberal arts program, B.A. in Music majors are also expected to think, speak, and write clearly, and effectively address and defend diverse cultural, historical, moral, scientific, and

ethical issues (both orally and in written form) in subject matter related to music, other art forms, and outside disciplines.

Music Audition

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.A. in Music. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following

students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Please visit the (<https://provost.colostate.edu/students/>)Office of the Provost and Executive Vice President for special course fees.

Requirements

A minimum grade of C is required in all music courses used to satisfy the requirements of the major programs (B.A. and B.M.) in music.

Minor in Music

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu>)

A Minor in Music presents students with opportunities to engage in music theory, music history, and the culture of music, along with a variety of performance opportunities through ensemble playing and applied lessons.

Learning Outcomes

Upon successful completion of this minor, students will be able to:

1. Demonstrate a sense of informed musicianship.
2. Interpret music based on their knowledge of music theory and music history.
3. Develop a foundation for a lifelong appreciation of music.

Admission to Minor

Students pursuing a minor in music are encouraged to work with the SMTD undergraduate coordinator for advising in the music minor to create a "track" in the music minor. Students can make choices in their lower and upper division coursework to make the minor more academic or performance focused. For the performance track, in addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the Music Minor in the performance track. The academic track will not require an audition. Please visit the music website for Music Audition Information. (<https://music.colostate.edu/admissions/undergrad-apply/>)

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following students: online degree students, summers-only master's degree students, music therapy students in an internship off-campus, and music education students who are student teaching off-campus. Please visit the Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) for special course fees.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

² May include ensembles or applied lessons. Lessons and some ensembles require auditions.

Master of Music, Choral Conducting Specialization

The Master of Music, Choral Conducting Specialization is committed to musical excellence with a curriculum designed to build a well-rounded choral conductor/teacher, using the musical and personal strengths of the graduate choral conducting student. By the completion of the program, the student will have developed advanced conducting skills and techniques that are appropriate to a variety of musical needs. The student will learn effective rehearsal techniques and score preparation and become a knowledgeable scholar of important choral scores representing repertoire of various musical periods and secular and sacred styles.

Aspirations for Student Achievement

- Develop the necessary analytical and theoretical skills to analyze choral scores and successfully prepare scores for effective rehearsals.
- Develop historical skills to examine scores and documents to confirm historically informed decisions and apply the appropriate performance practice issues for different eras.
- Develop the necessary linguistic skills to be proficient in English, German, Latin, and French and be competent in International Phonetic Alphabet (IPA) when necessary.
- Develop technical skills to conduct community, professional, school, church, and university choirs on different levels domestically and internationally.
- Develop the skills to achieve effective and efficient rehearsal techniques by utilizing the appropriate verbal instruction and proper visual conducting presentation.
- Understand the origin and the history of choral music from the Renaissance to the present by examining the canon of the choral repertoire and attaining knowledge of the background of main choral genres.
- Develop a clear understanding of how the voices work, especially in choral settings, to achieve the necessary blend, balance, and sound and provide vocal instruction to ensemble members.
- Research and prepare to program appropriate repertoire for choral concerts on different levels.
- Attain competent instrumental conducting technique to lead rehearsals and performances in major choral-orchestral repertoire such as oratorios, cantatas, requiems, and symphonic masses.
- Understand the current trend of the choral profession by studying the living composers, their compositions, and the entrepreneurial aspect of the choral music industry.

Admission

The Choral Conducting Specialization accepts a limited number of students who pursue a variety of professional goals, including education and directors of choral/instrumental ensembles. Students who are full-time music educators at the middle/high school levels are considered if they have three years prior teaching experience and are presently conducting an ensemble(s). Students who are not public school educators must show a minimum of three years of full-time music/ conducting employment and be presently conducting a high school, religious, or community ensemble.

In addition to the admissions processes for the Graduate School and the School of Music, Theatre, and Dance, a personal audition (<https://music.colostate.edu/admissions/grad-apply/>) with CSU Music faculty is required for admission into the choral graduate conducting program.

³ One semester each of chamber music ensemble and choral accompanying.

Master of Music, Instrumental Conducting Specialization

The Master of Music, Instrumental Conducting Specialization offers students the opportunity to conduct a broad range of ensembles in preparation for their career. The art of conducting is examined from the perspective of gesture and movement, score study/analysis/ear training, and rehearsal techniques and strategies. For students focused on band conducting, this is a program of advanced study in repertoire and advanced wind/percussion techniques with a strong supporting program of theoretical and analytical studies. For students focused on

orchestral conducting, this is a program of advanced study in repertoire and advanced orchestral techniques with a strong supporting program of theoretical and analytical studies.

Graduate band/wind conducting students are also an integral part of the Athletic Bands Program, assisting with rehearsals and games and learning the administration of an athletic bands program.

Aspirations for Student Achievement

- Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the conducting field.
- Develop a method of score study to help in all educational and professional settings.
- Develop the skills necessary to lead ensembles in their specific discipline (band or orchestra, including theatrical accompaniment) with best-practice rehearsal strategies and methodology.
- Conduct repertoire in all three disciplines of varying difficulty levels, spanning many genres and time periods.
- Integrate best-practice rehearsal strategies with sound conducting technique to inform instruction with conducting gestures.
- Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in oral and written forms.
- Develop an awareness of substantive publications in the field of music and conducting.
- Describe the contemporary role of programming and assessment design in the teaching-learning process.

Admission

The conducting degrees accept a limited number of students who pursue a variety of professional goals, including education and directors of choral/instrumental ensembles. Students who are full-time music educators at the middle/high school levels are considered if they have three years prior teaching experience and are presently conducting an ensemble(s). Students who are not public school educators must show a minimum of three years of full-time music/conducting employment and be presently conducting a high school, religious, or community ensemble.

Master of Music, Music Education Specialization

The Master of Music, Music Education Specialization is a full-time residential graduate degree program designed for practicing elementary and secondary music teachers with a K-12 State Music Teaching license. Specifically, this program is designed to inspire and develop the next generation of leaders in the field of music education by developing and applying scholarly research skills in the field of music education, the in-depth study of advanced pedagogical expertise, and the impact of contemporary learning theory on K-12 music education.

In this program, successful students have the opportunity to gain content knowledge regarding the history and philosophy of music education; an understanding of how quantitative, qualitative, and historical music research is conducted; advanced skills in music analysis and interpretation; and a contemporary understanding of the pedagogy of music teaching and learning. Students also have the opportunity to participate in CSU music ensembles to continue to develop as musical artists. Additionally, students are expected to be full-time students in residence and will likely be given the opportunity to teach or assist with undergraduate music education coursework depending upon their level of expertise and program demands.

The degree coursework is designed to be completed over a time span of two years and includes both on-campus and online coursework. Students in this program are encouraged to take advantage of the diverse summer and/or online elective offerings.

All students in this program are strongly encouraged to undertake the Plan A Track, which involves one extra semester of coursework to write a master's thesis. The thesis distinguishes work in the program and prepares the student with the qualifications needed to pursue doctoral work in the future. Plan B Track students do not undertake a thesis.

Program-level Learning Objectives

- Transfer research knowledge and skills to practice-based applications in the K-12 music education context
- Evaluate pedagogical approaches intrinsic to a variety of music education arenas.
- Create innovative approaches to music learning in school systems.

Aspirations for Student Achievement

- Upon completion of this program, students are poised to be both highly qualified practitioners and leaders in K-12 education at the elementary and secondary levels
- Apply learned skills in professional K-12 music teaching settings, including age-appropriate instructional delivery, ensemble leadership, a curricular and pedagogical process, learning theory, and the impacts of assessment on student learning.
- Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize, or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in both oral and written forms.
- Develop an awareness of substantive publications in the field of music education and the field of education as a whole.
- Define national trends in music education that impact K-12 educational settings.
- Describe the contemporary role that curriculum and assessment design plays in the teaching-learning process.
- Create music curriculum assessment tools designed to measure simple and complex learning in classroom and studio/applied settings.
- Engage in informed critical discussion regarding current standards-based frameworks in music and contemporary K-12 American education contexts.

Master of Music, Music Education— Composition Specialization

The Master of Music in Music Education, Composition Specialization is intended as a professional degree with specialized training in composing music for educational ensembles and incorporating composition, improvisation, and music theory into K-12 music classrooms. Students enrolled in the program produce original compositions for educational ensembles and have them performed publicly by student ensembles.

The degree option in music education with a specialization in composition is designed to provide music educators with the ability to apply compositional and arranging skills and the pedagogy of the creative process to the classroom in K-12 settings. This provides an option for a master's degree in music education for students interested in composition, arranging, and the pedagogy of the creative process as opposed to the more traditional CSU graduate music education offerings of conducting, Kodály, instrumental, and choral.

Students take advanced coursework in scoring and arranging for educational ensembles, curriculum development for composition in K-12 classrooms, music theory, and history, and applied composition lessons. Students in the program have multiple opportunities to have their works performed and recorded by local student ensembles.

Aspirations for Student Achievement

- Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the field of Music Education.
- Compose original works for educational ensembles at the elementary and secondary school levels. Such ensembles include (but are not limited to) the following: choral ensembles, wind ensemble or concert band, string orchestra, full orchestra, jazz ensembles, and chamber ensembles.
- Arrange preexisting works from the standard repertoire for educational ensembles at the elementary and secondary school levels.
- Design and develop curricular goals for music composition, improvisation, score analysis, and aural skills.
- Develop and implement pedagogical strategies for incorporating music composition and related creative skills into the elementary and secondary school music classroom.
- Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in both oral and written forms;

- Develop an awareness of substantive publications in the field of music education and the field of education as a whole;
- Define national trends in music education that impact K-12 educational settings;
- Describe the contemporary role that curriculum and assessment design plays in the teaching-learning process;
- Create music curriculum assessment tools designed to measure both simple and complex learning in both classroom and studio/applied settings;
- Engage in informed critical discussion regarding current standards-based frameworks in music and in contemporary K-12 American education contexts.

Admission

This hybrid program is open to students with bachelor's degrees in either music education or composition. It equips students to pursue a career in the field of educational composition.

In addition to the admissions processes for the Graduate School and the School of Music, Theatre, and Dance, applicants will submit a portfolio of three original compositions with recordings, at least one of which is composed for an educational ensemble (choral, orchestral, or wind band work at an appropriate difficulty for secondary schools). Select applicants will complete an on-campus or video interview with the composition and music education faculty. Please visit the **Music website** for additional details.

Master of Music, Music Education— Conducting Specialization

The Master of Music, Music Education – Conducting Specialization is a CSU exclusive online degree program. The program features an annual Summer Conducting Seminar, the residency portion of the degree, with additional courses offered online during the school year. Classes are designed for current middle school and high school choir, band, and orchestra directors who seek to further their knowledge and conducting skills while earning a master's degree, completing most of their coursework in three summers.

Students enrolled in the program will receive well-rounded experience in conducting and further specialized training for the twenty-first century music educator.

The two-week conducting seminar (four credits each summer) includes daily conducting opportunities in all three disciplines, with a workshop orchestra, band, and choir providing further hands-on training. All participants learn to conduct in all three disciplines.

In addition, each student takes three, 3-credit academic classes (music history, analytical techniques, and music research), one 3-credit music education course (Foundations of Music Education), and three 1-credit seminars on various topics of interest to music educators. These courses are either offered on campus during the summer or online during the school year.

The complete program consists of 30 credits. A maximum of six credits of academic courses can be transferred to the student's graduate program from NASM-accredited universities, pending approval by their advisor and the Graduate School (<https://graduateschool.colostate.edu/>).

Program-level Learning Objectives

- Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the field of Music Education.

- Develop a method of score study to help in all educational and professional settings.
- Develop the skills necessary to lead ensembles in all three disciplines (band, orchestra, and choir) of all levels with best-practice rehearsal strategies and methodology.
- Conduct repertoire in all three disciplines (band, orchestra, and choir) of varying difficulty levels, spanning many genres and time periods.
- Integrate best-practice rehearsal strategies with sound conducting technique into the secondary school music classroom and/or community/professional ensemble, in order to inform instruction with conducting gestures.
- Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in both oral and written forms.
- Develop an awareness of substantive publications in the field of music education and the field of education as a whole.
- Define national trends in music education that impact K-12 educational settings.
- Describe the contemporary role that curriculum and assessment design plays in the teaching-learning process.

Master of Music, Music Education— Kodaly Emphasis Option

The Master of Music, Music Education Specialization - Kodály Emphasis Option is a graduate program designed for elementary classroom music teachers, independent music instructors, and secondary music teachers interested in developing their teaching, conducting, musicianship, and depth of knowledge about music education.

One unique aspect of this program is that it enables students to earn national certification in Kodály music teaching through CSU's Colorado

Kodály Institute while earning a master's degree. The Colorado Kodály Institute (CKI) is one of the select programs endorsed by the Organization of American Kodály Educators (<https://www.oake.org/>). CKI faculty are among the top experts in the United States, and the University Center for the Arts location, at the foothills of the Rockies, provides an inspiring setting for personal growth.

The degree is designed to be completed over a time span of three summers with a minimum of 30 total credits (the degree is officially conferred at the end of the fall semester following the term in which all coursework has been completed), with several online and/or evening courses required to be taken during the school year. Students have the option, therefore, of living remotely during the school year and traveling to Fort Collins for the core summer coursework. The majority of participants in this degree program teach either part or full-time during the school year, gaining relevant experience while pursuing the graduate degree. As a result, they are continually assimilating real-world teaching experiences into their academic coursework.

CSU Graduate Music Education Degrees: Learning Objectives

- Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in oral and written forms.
- Develop an awareness of substantive publications in music education and the field of education.
- Define national trends in music education that impact K-12 educational settings.
- Describe the contemporary role of curriculum and assessment design plays in the teaching-learning process.
- Create music curriculum assessment tools designed to measure simple and complex learning in classroom and studio/applied settings.
- Engage in informed critical discussion regarding current standards-based frameworks in music and contemporary K-12 American education contexts.

Kodály Program-level Learning Objectives

- Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the field of Music Education.
- Develop a philosophical and pedagogical approach to utilize in all educational settings and competency in techniques that embody the approach.
- Develop foundational skills in advocacy and leadership for school settings.
- Develop a method of score analysis that fosters learners' success in all educational settings.
- Develop a concept-based collection of pedagogical repertoires that is fully analyzed, researched both musically and culturally, and organized into a practical, retrievable curriculum.
- Develop the skills necessary to lead and conduct ensembles within K-12 schools with best-practice rehearsal strategies and methodology, including repertoire of varying difficulty levels spanning multiple genres and time periods.

- Integrate best-practice rehearsal strategies with sound conducting technique into school music classrooms and/or community/professional ensembles.

Admission

Applicants are expected to be State-Licensed Music Teachers* and demonstrate excellent musicianship and interpersonal skills.

*Exceptions may be made by the Music Education area on a case-by-case basis. For information about the admissions processes to the Graduate School and School of Music, Theatre, and Dance, as well as information about the summer institute, **please visit our website**.

Master of Music, Performance Option

The Master of Music, Performance Option provides students with a comprehensive approach to the study and performance of music in multiple styles and idioms. The curriculum is designed to develop musicianship, technical proficiency, and cultural awareness in performance and pedagogy. Regardless of degree concentration, the graduate student will maintain regular study on their applied instrument or voice and additional directed areas based on individual goals and needs. Graduate students may choose to specialize in one or more areas as they work toward degree recital requirements.

Aspiration for Student Achievement

This option intends to prepare students with outstanding performance potential to be competitive in performance and teaching careers and to be advocates for the arts in their communities. They may help meet the needs for skilled performers of solo and small and large ensemble music, and they will be able to teach in a university and help meet the considerable community demand for excellent private studio teachers.

Performance areas include woodwinds, brass, strings, percussion, harp, guitar, voice, piano, and organ. Please visit the "Areas" section of the

Music website (<https://music.colostate.edu>) for information about each studio.

Unique performance opportunities include the Graduate String Quartet/Trio program and professional organizations in Fort Collins' thriving arts community.

Music Audition

In addition to applying to CSU through the Office of Admissions, students seeking an M.M. in Vocal/Instrumental Performance must also register for an in-person audition with CSU Music faculty. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/grad-apply/>).

Master of Music, Plan A, Music Therapy Specialization

The Master of Music, Plan A, Music Therapy Specialization is intended to provide Board-Certified Music Therapists with advanced training in clinical skills and research. Our curriculum specializes in neuroscience and evidence-based music therapy to improve sensorimotor, speech and language, and cognitive function in children and adults with disabilities. Specifically, the study of music therapy is designed to prepare music therapists for advanced clinical work in music therapy, as music therapy supervisors, administrators, and for teaching positions at the college or university level.

Two master's curriculum tracks are offered: the first is a thesis program of 30 credit hours (Plan A) designed to provide students with the opportunity to complete a substantial research project. The second track is a 32-hour program (Plan B) that requires, in lieu of a thesis, additional course work in music therapy, a final project, and a common final exam. Either program prepares the student to pursue doctoral study. Our academic curricula meet the standards of the American Music Therapy Association (<https://www.musictherapy.org/>) and the National Association of Schools of Music (<https://nasm.arts-accredit.org/>).

Applicants are expected to be Board-Certified Music Therapists (or eligible to sit for the exam) and demonstrate excellent musicianship and interpersonal skills.

The Master of Music, Plan A, Music Therapy Specialization is offered on-campus (<https://music.colostate.edu/music-therapy/>) or online (<https://www.online.colostate.edu/degrees/music-therapy/>).

Program-level Learning Objectives

Students who earn the degree will demonstrate advanced learning in clinical practice, research, and teaching. Specific outcomes include:

- Identify theoretical constructs from music therapy and related fields that underlie various clinical practices.
- Define a variety of philosophies, approaches, and/or theories in music therapy.
- Describe research according to ethical principles in a variety of methodologies to sufficiently address meaningful research questions in music therapy.
- Implement a diverse and equitable approach to music therapy practice.

music.colostate.edu (<http://music.colostate.edu>)

The Ph.D. in Music Therapy emphasizes research and scholarship, as appropriate for the music therapist who aspires to a career in research, college-level teaching, or advanced clinical practice. In this program, students engage in coursework that advances scholarship and helps to reach professional goals. Students are involved in groundbreaking research, with the opportunity to develop original research in an area of interest.

The degree is focused on three core areas:

- **Research Core:** Engages in coursework and collaborative research projects that are focused on advancing research skills. Opportunity to pursue original research.

- **Music Therapy Clinical Practice Core:** Further understanding of advanced clinical competencies, with an emphasis in evidence-based practices.
- **Academic Core:** In order to prepare for a future as an educator or supervisor in music therapy, Students engage in coursework focused on teaching and learning in higher education.

Credit Requirements

The Ph.D. in Music Therapy is comprised of 72 credits, of which 30 credits may be accepted from a prior master's degree. Program credits include:

- 12-15 credits in each core area (research, clinical practice, academic) that are selected to prepare the student for future work in an academic, research, or advanced clinical position.
- 15 directed electives, which are selected with the graduate committee to best meet the student's needs and career goals. Subjects of study may include, but are not limited to, neuroscience, music therapy methods, research methods, statistics, teaching methods, and developmental science.
- The program culminates with a final exam and completion of a substantial piece of original research.

Visit our website (<https://music.colostate.edu/music-therapy/music-therapy-phd/>) for information about research opportunities, eligibility, and teaching assistantships.

Major in Theatre

University Center for the Arts, Office 120

Dr. Megan Lewis, Director (megan.lewis)

theatre.colostate.edu (<http://theatre.colostate.edu>)

Student performing artists and designers find a welcoming place of study in the School of Music, Theatre, and Dance.

At CSU, faculty, staff, and professional guest artists – all with extensive experience on stages ranging from Broadway to regional theatres and worldwide – provide students with an experienced lens through which to study every aspect of theatre. This includes the theory and practice of acting and directing, musical theatre, theatre history/dramaturgy/playwriting, theatrical design and technical theatre, stage management, and storytelling/devising.

Upon academic admission to CSU and acceptance into one of the Bachelor of Arts in Theatre concentrations, students are provided with fundamental skills and experiences in theatre within a liberal arts context, honing vital life skills. This will prepare students for graduate study in theatre and potential employment opportunities in a variety of fields related to theatre, film, and other creative endeavors.

Concentrations:

- Musical Theatre Concentration
- Performance Concentration
- Costume Design and Technology Concentration
- Lighting Design and Technology Concentration
- Projection Design and Technology Concentration
- Set Design Concentration
- Sound Design and Technology Concentration

Auditions and Portfolio Reviews:

In addition to applying to CSU through the Office of Admissions, a successful audition or portfolio review with CSU Theatre faculty is required to enter the B.A. in Theatre concentrations. Please visit theatre.colostate.edu for more information.

Theatre Program Level Learning Objectives:

- **IMAGINATION AND EXPRESSION:** Cultivate and articulate a unique vision, focus, and craft as an artist. Sharpen written, verbal, visual/design, embodied and intellectual analysis, storytelling, and expression of creative ideas.

- **CONTEXT AND SOCIAL RESPONSIBILITY:** Understand texts within their contexts, our place in history as contemporary artists, the potential of art for social transformation, and ourselves as global citizens.
- **COLLABORATION AND PROFESSIONALISM:** Develop a holistic understanding of the theatre-making process and industry protocols through hands-on practice, telling compelling, relevant stories through the united labor of our distinct areas of expertise. Conduct ourselves professionally in attitude, approach, and vision to prepare for life after CSU.
- **CREATIVE PROBLEM-SOLVING:** Solve abstract and material problems, draw on various resources, strategies, and skills, and embrace creative risk-taking.
- In addition, each theatre concentration has two learning outcomes unique to that subject.

Comprehensive training occurs in classrooms, labs, shops, rehearsal studios, and in annual productions of plays, musicals, operas, dance concerts, and special events, produced by a company of student actors, directors, designers, and technicians under the mentorship of our professional faculty and staff. These outstanding artists and technicians offer individualized teaching, advising and small class sizes, providing students with hands-on learning opportunities from their first day on campus.

Major in Theatre, Costume Design and Technology Concentration

The Costume Design and Technology Concentration provides opportunities for students to develop their unique artistic visions as costume, makeup, and hair designers and technicians. It offers students practice in the research, technical, and conceptual skills necessary to design and build costumes for the stage, dance, or film, including vocabulary and best practices, the universal language of clothes, primary research, and diverse aesthetic styles to build characters. Students develop an understanding of the costume designer and technician-artisan as a collaborative artist, creative visionary, and working professional.

In addition to the overall CSU Theatre Program Learning Objectives, the Costume Design and Technology Concentration includes the following unique learning objectives:

- **COSTUME DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY**

Explore the specific techniques that costume, hair, and makeup designers and technicians use to develop and communicate their ideas through research, synthesis of skills including drawing, painting, mockups, and application of emerging technologies. From realized works on mainstage shows, understand how the costume, hair, and makeup designer supports, collaborates, and interacts with the creative team.

- **DESIGN ARTISTRY**

Develop an understanding of the Costume Designer as a collaborative artist, creative visionary, craftsperson, and working professional by practicing organizational, design, and craft skills to realize a show from

concept to production, and building a portfolio of creative design and/or technical work.

Your program portfolio review is also your scholarship audition. Please visit theatre.colostate.edu for more information.

Costume Design and Technology Concentration Portfolio Review:

In addition to applying to CSU through the Office of Admissions, a successful portfolio review with CSU Theatre faculty is required to enter the B.A. in Theatre, Costume Design and Technology Concentration.

Requirements Effective Fall 2023

Students in this concentration must satisfactorily undergo a portfolio review each spring, where their work will be celebrated and examined to provide guidance for goals for the following year. Concentration specific courses may not double-count in multiple Theatre concentrations.

Major in Theatre, Lighting Design and Technology Concentration

In the B.A. in Theatre, Lighting Design and Technology Concentration, students take Drawing for Theatre, Computer Assisted Drafting for Theatre, two levels of lighting design courses, Projection Design, Design Portfolio and Professional Prep, and are required to explore other fields of design (such as projection design, sound design, costume design, or set design) to better understand the collaborative effort of creating a world onstage. Students also take practicum classes where they put the skills learned in design courses to use, working on departmental productions and/or live events design teams.

In addition to the overall CSU Theatre Program Learning Objectives, the Lighting Design and Technology Concentration includes the following unique learning objectives:

- **LIGHTING DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY:** Explore the specific techniques that lighting designers use to develop and communicate their ideas through research, synthesis of skills including drafting, computerized/virtual reality pre-visualization, automated lighting programming, and application of emerging technologies with a robust understanding of how the lighting designer supports, collaborates, and interacts with the creative team.

- **DESIGN ARTISTRY:** Develop an understanding of the Lighting Designer as a collaborative artist, creative visionary, and technician, and by practicing organizational, design, and technical skills to realize a show from concept to production and building a portfolio of creative design and/or technical work.

Lighting design and technology offers students several ways to express their creativity and artistry:

- Lighting designers for theatre, musicals, opera, or dance
- Lighting engineers for stage, television, and film
- Lighting technicians for stage, dance, live productions, television, and film

Lighting Design and Technology Concentration Portfolio Review:

In addition to applying to CSU through the Office of Admissions, a successful portfolio review with CSU Theatre faculty is required to enter the B.A. in Theatre, Lighting Design and Technology Concentration. Your program portfolio review is also your scholarship audition. Please visit theatre.colostate.edu for more information.

Major in Theatre, Musical Theatre Concentration

Students in the B.A. in Theatre, Musical Theatre Concentration practice incremental techniques and skills necessary for the art form of musical theatre – including singing, dancing, and acting – and musical theatre history, theory, and repertoire. Students train to analyze and perform contemporary and classical scripts as actors, to effectively deliver highly physical staging or dance, and to practice healthy habits that support a lifetime of vocal production for the stage, screen, and/or recording. As informed collaborators, students contribute to the creation, rehearsal, development, and future of musical theatre performance.

In addition to the overall CSU Theatre Program Learning Objectives, the Musical Theatre Concentration includes the following unique learning objectives:

- **MUSICAL THEATRE IN PERFORMANCE:** Develop a unique artistic vision by practicing incremental techniques and skills necessary to perform in the discipline of musical theatre, including singing, dancing, and acting.
- **MUSICAL THEATRE ARTISTRY:** Develop an understanding of the musical theatre performer as a collaborative artist, and creative visionary, and explore the discipline of musical theatre as an artform, its history, repertory, conventions, and etiquette.

CSU Theatre produces one full-scale musical each season.

Musical Theatre Concentration Audition:

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Theatre faculty is required to enter the B.A. in Theatre, Musical Theatre Concentration. Your program audition is also your scholarship audition. Please visit theatre.colostate.edu for more information.

Musical Theatre Program Fee

A program fee is assessed with undergraduate and graduate music and musical theatre majors, and music minors, per semester. This does not apply to the following students: online degree students, summers-only master's degree students, music therapy students in an internship

off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. Please visit the (<https://provost.colostate.edu/students/>)Office of the Provost and Executive Vice President website for special course fees.

Major in Theatre, Performance Concentration

The B.A. in Theatre, Performance Concentration is designed to offer extensive opportunities in both the study and practice of theatrical performance. The concentration features foundational to advanced courses in multiple acting styles, approaches to acting, and entry points for the experience and vocabulary of performance. The concentration teaches Western "inside-out" approaches (i.e., Stanislavski, Meisner)

based in the vocabulary of action, objective, and tactic, as well as "outside-in" approaches (i.e., Suzuki, clown, Commedia) based in character creation through the study of the voice and body.

In addition to the overall CSU Theatre Program Learning Objectives, the Performance Concentration includes the following unique learning objectives:

- **PERFORMANCE IN THEATRE:** Develop a unique artistic vision by practicing incremental techniques and skills necessary to perform for the stage, including personal experience as a basis for storytelling; western “inside-out” approaches based in the vocabulary of action, objective, and tactic, as well as movement based “outside-in” approaches based in the voice and body; and devising techniques, including memoir, adaptation, and physical theatre.
- **PERFORMANCE ARTISTRY:** Develop an understanding of the performer as a collaborative artist, and creative visionary, as well as cultivate cross-disciplinary skills in directing, playwriting, global

theatre traditions, musical theatre, and/or theatre for social change to expand sophistication in performance.

Performance Concentration Audition:

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Theatre faculty is required to enter the B.A. in Theatre, Performance Concentration. Your program audition is also your scholarship audition. Please visit theatre.colostate.edu for more information.

Major in Theatre, Projection Design and Technology Concentration

In the B.A. in Theatre, Projection Design and Technology Concentration, students take Drawing for Theatre, Computer Assisted Drafting for Theatre, two levels of projection design courses, Projection Design, Design Portfolio and Professional Prep, and are required to explore other fields of design (such as sound design, lighting design, costume design, or set design) to better understand the collaborative effort of creating a world onstage. Students also take practicum classes where they put the skills learned in design courses to use, working on departmental productions and/or live events design teams.

In addition to the overall CSU Theatre Program Learning Objectives, the Projection Design and Technology Concentration includes the following unique learning objectives:

- **PROJECTION DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY:** Explore the specific techniques that projection designers use to develop and communicate their ideas through research, synthesis of skills including drafting, computerized/virtual reality pre-visualization, content creation, video programming, and application of emerging technologies with a robust understanding of how the projection designer supports, collaborates, and interacts with the creative team.

- **DESIGN ARTISTRY:** Develop an understanding of the Projection Designer as a collaborative artist, creative visionary, and technician, by practicing organizational, design, and technical skills to realize a show from concept to production and building a portfolio of creative design and/or technical work.

Projection design and technology offers students several ways to express their creativity and artistry:

- Projection designers for theatre, musicals, live events, opera, or dance
- Video engineers for stage, television, and film
- Video mixers for stage, dance, live productions, television, and film

Projection Design and Technology Concentration Portfolio Review:

In addition to applying to CSU through the Office of Admissions, a successful portfolio review with CSU Theatre faculty is required to enter the B.A. in Theatre, Projection Design and Technology Concentration. Your program portfolio review is also your scholarship audition. Please visit theatre.colostate.edu for more information.

Major in Theatre, Set Design Concentration

Students in the B.A., Set Design Concentration explore creative concepts of set design for theatre, musicals, opera, dance, and industry, as well as production design and art direction for film and television, on a theoretical level in the classroom and studio while reinforcing their training through practical application in main stage productions of music,

theatre, and dance. In addition to their coursework, students will first work as assistants and then step into leadership roles as designers as they travel through the program.

In addition to the overall CSU Theatre Program Learning Objectives, the Set Design Concentration includes the following unique learning objectives:

- **SET DESIGN FOR THEATRE, FILM, and INDUSTRY:** Explore incremental to advanced skills that set designers and craftspeople use to design and build sets and scenery for the stage, dance, film, or industry, including primary research, vocabulary and best practices, diverse aesthetic styles, and synthesis of skills including design, drafting, modeling, painting, computer-assisted design, and application of emerging technologies.
- **DESIGN ARTISTRY:** Develop an understanding of the Set Designer as a collaborative artist, and creative visionary, by practicing organizational, craft, and creative skills to realize a show from concept to production and building a portfolio of creative design and/or technical work.

Set Design offers students several ways to express their creativity and artistry:

- Set designers for theatre, musicals, opera, or dance
- Set technicians and craftspeople for stage, dance, live productions, television, and film

Set Design Concentration Portfolio Review:

In addition to applying to CSU through the Office of Admissions, a successful portfolio review with CSU Theatre faculty is required to enter the B.A. in Theatre, Set Design Concentration. Major in Theatre, Sound Design and Technology Concentration

In the B.A. in Theatre, Sound Design and Technology Concentration, students take Drawing for Theatre, Computer Assisted Drafting for Theatre, two levels of Sound Design courses, Projection Design, Design Portfolio and Professional Prep, and are required to explore other fields of design (such as Projection Design, Lighting Design, Costume Design or Set Design) to better understand the collaborative effort of creating a world onstage. Students also take practicum classes where they put the skills learned in design courses to use, working on departmental productions and/or live events design teams.

In addition to the overall CSU Theatre Program Learning Objectives, the Sound Design and Technology Concentration includes the following unique learning objectives:

- **SOUND DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY:** Explore the specific techniques that sound designers use to develop and communicate their ideas through research, synthesis of skills including recording, mixing, audio engineering, sound control programming, content creation, and application of emerging technologies with a robust understanding of how the sound designer supports, collaborates, and interacts with the creative team.

- **DESIGN ARTISTRY:** Develop an understanding of the Sound Designer as a collaborative artist, creative visionary, and technician, by practicing organizational, design, musical, and technical skills to realize a show from concept to production and building a portfolio of creative design and/or technical work.

Sound design and technology offers students several ways to express their creativity and artistry:

- Sound designers for theatre, musicals, opera, or dance
- Sound engineers for stage, television, and film
- Sound mixers for stage, dance, live productions, television, and film

Sound Design and Technology Concentration Portfolio Review:

In addition to applying to CSU through the Office of Admissions, a successful portfolio review with CSU Theatre faculty is required to enter the B.A. in Theatre, Sound Design and Technology Concentration. Your program portfolio review is also your scholarship audition. Please visit theatre.colostate.edu for more information.

Major in Philosophy

Philosophy is the oldest form of systematic, scholarly inquiry. It is the study of the most basic moral, legal, aesthetic, religious, and metaphysical ideas by which we pursue understanding and develop principles of conduct. Philosophers seek to establish standards of evidence, provide rational methods of conflict resolution, establish criteria for just social orders, and create techniques for evaluating ideas and arguments.

The study of philosophy broadens and intensifies liberal education while enhancing interpretive abilities in many fields. The curriculum

encourages a broad liberal arts background, including courses in foreign languages, and a plan for graduate school and teaching careers in philosophy. The broad relevance of philosophy to other fields permits most students to work toward goals such as professional training in law, medicine, business, or theology. There are three concentrations available to Philosophy majors: General Philosophy; Global Philosophies and Religions; and Philosophy, Science and Technology. It is not unusual for Philosophy majors to second-major in other disciplines, and these concentrations combine easily with other majors at CSU.

Student Learning Outcomes

Outcome 1: Critical Thinking

Students will recognize, construct, and evaluate arguments and alternative positions by correctly applying logical standards and methodology, demonstrating the ability to identify underlying assumptions, ambiguous or contested terms, and potential objections to a thesis.

Outcome 2: Content Knowledge

Students will demonstrate knowledge of major questions, arguments, problems, and figures from a variety of philosophical areas and traditions.

Outcome 3: Reading and Research

Students will develop the interpretive, analytical, and conceptual skills to read with understanding a variety of philosophical texts. Students will be able to assess the quality and relevance of a variety of sources (books, journal articles, etc.) and use these sources in their own research and writing.

Outcome 4: Communication

Students will clearly articulate ideas and arguments in writing and oral communication. Students will demonstrate competence in interpretive, analytical, and argumentative writing. They will effectively present their own ideas and research in oral communication and writing. Students will engage in open, thoughtful, and respectful dialogue.

Outcome 5: Values and Attitudes

Students will demonstrate cognitive flexibility by applying alternative possibilities and conceptual frameworks to their own and others' ideas and values. They will demonstrate intellectual curiosity in their pursuits of truth and meaning. They will engage in reflective inquiry and aim to achieve a greater understanding of their subject matter.

Potential Occupations

A major in philosophy prepares students for a wide variety of professional aspirations, including graduate study in philosophy or other disciplines; training in law, computer technology, social work, health care, the ministry, business; and general intellectual flexibility in a changing world. The high level of skill that philosophy majors acquire in communication, writing, and analytical and critical thinking enables them to secure jobs in a variety of private and public sector professions and to become leaders in their fields.

Depending on the major concentration that a student pursues, available career opportunities include, but are not limited to: public policy analyst, business manager, public administrator, computer programmer, intelligence officer, legislator, teacher, foreign diplomat, social worker, community developer, philanthropic organizer, physician, lawyer, researcher, writer, theologian, human resources manager, publisher, and ethics consultant, in a variety of fields, e.g., in medicine, business, law,

public administration, non-profit administration, engineering, and the sciences.

Minor in Philosophy

Philosophy is the study of the most basic moral, legal, aesthetic, religious, and metaphysical ideas by which we pursue understanding and development of principles of conduct. Philosophers seek to establish standards of evidence, provide rational methods of conflict resolution, establish criteria for just social orders, and create techniques for evaluating ideas and arguments. The minor in Philosophy is intended to broaden students' education and to complement and encourage critical and constructive reflection in other courses.

Effective Fall 2020

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students are required to receive at least a C (2.000) in each Philosophy course required for the Minor in Philosophy.

Certificate in Ethics and Society

The Certificate in Ethics and Society aims to provide students with a broad background in ethics and social philosophy. The objective of the certificate is for students to competently navigate questions of social and ethical values on a wide range of issues. The program is structured to foster a deep understanding of both the theoretical foundations and the practical applications of ethics. By allowing choice from a wide range of courses in ethics, the certificate provides students the opportunity to gain experience making and assessing value judgments on a variety of important social issues or to focus on the particular issues most relevant to their major or their area of interest. The certificate is open to students in any major or minor.

Master of Arts in Philosophy, Plan A

The Department of Philosophy offers courses of study that lead to a Master of Arts in Philosophy. Master's students can specialize in applied

ethics, particularly animal welfare and environmental ethics; comparative philosophy; ethical theory; history of modern philosophy; metaphysics; aesthetics; or epistemology. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Philosophy. (<http://philosophy.colostate.edu/>)

Learning Outcomes

Outcome 1: Critical Thinking Skills

Recognize, evaluate, and construct arguments in a way that correctly applies logical methodology and evaluative standards and demonstrates an ability to identify underlying assumptions, ambiguous or contested terms, and potential objections to a thesis.

Outcome 2: Content Mastery

Explain, orally or in writing, the current state of knowledge and research, referencing the major works and positions in the field, on topics within three areas of philosophy: (1) value theory, broadly construed; (2) metaphysics, epistemology, and related fields; and (3) history of philosophy.

Outcome 3: Research Skills

Conduct independent research on a philosophical topic, identifying the major texts, positions, and arguments concerning that topic.

Outcome 4: Writing Skills

Write an original philosophical paper that contributes to knowledge in some field of philosophical study and is of sufficient quality to be presented at a professional conference or published in a professional journal.

Outcome 5: Oral Communication Skills

Give an oral presentation that clearly and effectively explains philosophical arguments, issues, and positions in a manner demonstrating a broad competency in the field.

Requirements Effective Fall 2023

Any courses required to address deficiencies must be completed before graduation. Credits earned through completion of such courses do not count toward the M.A. degree.

Major in Political Science

Political science is the study of politics and political action in society. It encompasses international agreements and organizations as well as the patterns of political action which both create and shape them. It encompasses citizen action and the institutions which produce public policy at the local, state, and national levels within the United States. It encompasses systems of voting, political parties, and courts, compared across national political systems. It encompasses the raising of normative questions about the nature and purposes of political life. The presence of politics is felt in all areas and sectors of society at all times. The dynamic and transformative effects of political action are seen virtually everywhere.

The department's curriculum is distributed across five subfields of the discipline: American politics, political theory, comparative politics, international relations, and public policy. Course work across the discipline's subfields is complemented by a required support option. Support options include a minor in another department; an interdisciplinary minor; the second language support option; the methods support option, or a second major.

Learning Outcomes

Students majoring in Political Science shall demonstrate the following:

- Ability to reason through political claims and assertions by political actors
- Skill in recognizing and responding to diverse ideological perspectives
- Ability to locate political issues and controversies within their relevant institutional and historical contexts
- Familiarity with the institutional processes of politics in numerous global and domestic political arenas
- Confidence in expressing opinions and presenting analyses of political problems and their solutions

Accelerated Program

The major in Political Science includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The major in Political Science, like all studies in the liberal arts, provides students with a broad academic background that is serviceable across a broad spectrum of employment in the public and private sectors. Political Science majors are trained to be independent and critical thinkers; to be discerning and active observers and listeners; to communicate persuasively; to constructively engage and solve intellectual and practical problems; to adapt and function effectively in a number of distinct occupational and institutional settings; to function comfortably in a multiethnic, multiracial, and globalizing society. The employment profiles of departmental alumni attest to the breadth of possibilities for today's graduates: public and non-profit organization managers, prosecutors, public policy analysts and consultants, federal law enforcement agents, legislators and legislative analysts, foreign service officers, private attorneys, demographers, criminal investigators, advertising specialists, urban/regional planners, environmental policy analysts, state budget analysts, public relations representatives, market researchers, elementary and high school teachers, international businessmen and businesswomen, lobbyists, novelists, construction industry managers, insurance agents and managers, financiers, and real estate brokers. Some graduates join professions following advanced study in law, international relations, area studies, public administration, public policy analysis, and business management.

Concentrations

Students may complete the general Political Science major or select one of the following concentrations for a more specialized course of study.

- Environmental Politics and Policy Concentration
- Global Politics and Policy Concentration
- U.S. Government, Law, and Policy Concentration

For further information on declaring the Major in Political Science, please schedule an appointment with a College of Liberal Arts Academic Success Coordinator by calling 970-491-3117 or visit Clark C 207.

Major in Political Science, Environmental Politics and Policy Concentration

The Environmental Politics and Policy concentration is designed to help students develop the knowledge and skills to analyze the connections between politics and the natural world, and pursue careers in environmental politics and policy-making. Students will learn about how political forces contribute to environmental degradation, the process for developing environmental policies, strategies to assess the strengths and weaknesses of different policy approaches, and how political forces can be harnessed to develop effective responses to problems such as climate change, water and air pollution, food security, and energy provision. Students will explore these issues from both domestic

and global perspectives. Environmental Politics and Policy students are strongly encouraged to complete an internship to gain practical experience working in the field.

Learning Outcomes

Students majoring in Political Science shall demonstrate the following:

- Ability to reason through political claims and assertions by political actors
- Skill in recognizing and responding to diverse ideological perspectives
- Ability to locate political issues and controversies within their relevant institutional and historical contexts

- Familiarity with the institutional processes of politics in numerous global and domestic political arenas
- Confidence in expressing opinions and presenting analyses of political problems and their solutions

For further information on declaring the Major in Political Science, Environmental Politics and Policy Concentration, please schedule an appointment with a College of Liberal Arts Academic Success Coordinator by calling 970-491-3117 or visit Clark C 207.

Potential Occupations

Graduates may work as policy analysts, advocates, planners, educators or decision-makers in government agencies, non-profit organizations, businesses and consulting firms at the local, state, national and international levels.

Requirements Effective Fall 2018

Political science majors must achieve a minimum grade of C (2.000) in each of the political science (POLS) courses counted toward meeting the requirement of the major.

Major in Political Science, Global Politics and Policy Concentration

The Global Politics and Policy concentration is designed to help students develop the knowledge and skills to analyze political relationships between and within countries and to pursue careers in international affairs (<http://www.apsia.org/career-guide/>). Students will learn about different systems of government, state-society relations in various parts of the world, the ways that public and private actors interact through international institutions and the global economy, as well as the causes of and responses to domestic and international conflict. Global Politics and Policy students are strongly encouraged to study a foreign language (<http://languages.colostate.edu/>) and to complete some of their coursework in one of CSU's many study abroad programs (<http://educationabroad.colostate.edu/students/>).

Learning Outcomes

Students majoring in Political Science shall demonstrate the following:

- Ability to reason through political claims and assertions by political actors
- Skill in recognizing and responding to diverse ideological perspectives

- Ability to locate political issues and controversies within their relevant institutional and historical contexts
- Familiarity with the institutional processes of politics in numerous global and domestic political arenas
- Confidence in expressing opinions and presenting analyses of political problems and their solutions

Potential Occupations

Graduates may work for government agencies, intergovernmental organizations, international businesses, consulting firms or non-profit organizations in the U.S. and abroad.

For further information on declaring the Major in Political Science, Global Politics and Policy Concentration, please schedule an appointment with a College of Liberal Arts Academic Success Coordinator by calling 970-491-3117 or visit Clark C 207.

Major in Political Science, U.S. Government, Law, and Policy Concentration

The U.S. Government, Law, and Policy concentration is designed to prepare students to become future leaders in the public sector. The skills gained in this concentration help prepare students for a variety of careers. Resources for careers include the American Political Science Association (<https://www.apsanet.org/>) and the Network of Schools of Public Policy, Affairs, and Administration (<https://www.naspaa.org/>). The courses in this concentration educate students about the political processes and the legal environment of all levels of American government, as well as the processes of policymaking and

the administrative apparatus used to implement public policy. Students will also be exposed to a variety of substantive policy issues including urban policy, energy policy, and environmental policy in the United States. U.S. Government, Law, and Public Policy students are strongly encouraged to complete an internship in one of the many organizations in the broader community. Students in this concentration are also encouraged to participate in the Legislative Internship Program (<https://polisci.colostate.edu/internships-and-careers/>) during their junior or senior years.

Learning Outcomes

Students majoring in Political Science shall demonstrate the following:

- Ability to reason through political claims and assertions by political actors

- Skill in recognizing and responding to diverse ideological perspectives
- Ability to locate political issues and controversies within their relevant institutional and historical contexts
- Familiarity with the institutional processes of politics in numerous global and domestic political arenas
- Confidence in expressing opinions and presenting analyses of political problems and their solutions

Potential Occupations

Graduates may work for government agencies, nonprofits, community organizations, lobbying firms, elected office, political communication, research and policy analysts. Other graduates will utilize their political science education to prepare for law and graduate schools. Past students have completed internships (<https://polisci.colostate.edu/internships/>)

with a variety of law firms, the cities of Fort Collins, Windsor, Loveland, and Westminster, the Colorado General Assembly, and Woodward among others.

For further information on declaring the Major in Political Science, U.S. Government, Law, and Policy Concentration, please schedule an appointment with a College of Liberal Arts Academic Success Coordinator by calling 970-491-3117 or visit Clark C 207.

Requirements Effective Fall 2018

Minor in Applied Environmental Policy Analysis

The minor in Applied Environmental Policy Analysis will provide students with a rigorous and in-depth study of the public sector environment, practice, and methods for analyzing and developing policy. Each course will also have the environment as a focus in the material, exams, and assignments. At the end of the minor, students will be able to recall and explain the basic rationales for public policies, apply rigorous research methods for evaluating policy, and integrate the elements of theory, methods, problem structuring, ethics, analysis and argumentation to generate reports useable in government and nonprofit management. The minor is appropriate for practicing professionals and current undergraduate students interested in expanding their applied evaluation skills and environmental policy expertise.

For further information on adding Applied Environmental Policy Analysis as a minor, please contact Lauren Tighe at lauren.tighe@colostate.edu or visit Clark C346.

Requirements Effective Spring 2014

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students must complete each course in the minor with a grade of C or better.

Minor in Political Science

The minor in Political Science provides a sound academic core for students in other social science or non-social science majors who are interested in politics. It may be particularly useful for persons preparing themselves for careers in law, teaching in the social sciences, journalism, and public service.

For further information on adding Political Science as a minor, please contact Lauren Tighe at 970-491-5156 or visit Clark C346.

Requirements Effective Spring 1990

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Graduate Certificate in International Security

Students who complete the Graduate Certificate in International Security will gain a greater understanding of how and why organized violence is used in contemporary world politics. They will learn to explain the outbreaks, durations, and terminations of war; the causes of human suffering during wartime; and the ways in which human beings can suffer from insecurity even during times of peace. In doing so, students will gain experience of using a variety of theoretical approaches. There will be a heavy emphasis on research methods and research design. The certificate is designed to prepare students to become competent analysts of contemporary and future international security issues.

Learning Outcomes

Upon successful completion of this certificate, students will be able to:

Master of Public Policy Administration, Plan C (M.P.P.A.)

Graduates of the Master of Public Policy Administration, Plan C (M.P.P.A.) program become mid-to-high level public servants in local, state, and federal government positions as well as mid-to-high level leaders in domestic and global public and nonprofit service organizations. Alongside a core curriculum that includes courses like civic engagement, program evaluation, public human resources management, and public budgeting, students specialize in public policy, public management, or international policy and management to further refine their skills and prepare them for the future. Classes are held on weeknights on the Fort Collins campus to enable working professionals to complete the degree in as few as 4 semesters. Service learning, internships, and theory-practice linkages are emphasized throughout the program to prepare students to be highly qualified public servants. The program

website can be viewed at this link: mppa.colostate.edu (<https://www.libarts.colostate.edu/students/graduate-programs/master-of-public-policy-and-administration/>).

Program Level Learning Objectives

- Understand, articulate, and exemplify the ethics, values, responsibilities, obligations, and social roles of a member of the public service profession.
- Identify and apply economic, legal, political, social, and ethical theories and frameworks to the practice of public service leadership, management, and policy.
- Identify and apply organizational theories and frameworks to the practice of public service leadership, management, and policy.
- Respond to and engage collaboratively with diverse stakeholders and communities to address challenges in the public interest.
- Understand the complexities of public policy design, implementation, and assessment.
- Employ appropriate methodologies and techniques to investigate, monitor, and manage human, fiscal, technological, information, physical, and other resource use.
- Conceptualize, analyze, and develop creative and collaborative solutions to challenges in public policy, leadership, and management.
- Assess challenges and explore solutions to advance cross-sectoral and inter-jurisdictional cooperation in public programs and services.
- Develop and demonstrate verbal and written communication skills as a professional and through interpersonal interactions in groups and in society.
- Reflect critically about emerging issues concerning public service management and policy.

Major in Sociology

Sociology focuses on the interaction between human groups and societal institutions from social relationships within family units in preindustrial cultures to those within large, bureaucratic institutions in major industrialized nations. Sociology represents one of CSU's most popular majors. Sociology faculty members' high quality, committed teaching regularly receives recognition and awards across the College of Liberal Arts and the University. Our undergraduate program offers solid training in social theory and research methods. Our high impact teaching practices include a popular internship, a criminology study abroad program in Prague and more.

Learning Objectives

Student who successfully complete a major in Sociology will be able to:

- **Critique individualistic explanations of social phenomena by locating them within broader societal patterns.** They will demonstrate their understanding of sociological concepts and theories, and apply them to better understand, evaluate, and foster social change in real-world settings.
- **Formulate research questions and select the appropriate sociological research methodologies to answer them.** They will apply this knowledge to collect and analyze quantitative and qualitative data as well as evaluate information they encounter in scholarly sources as well as from a variety of media sources from their everyday lives.
- **Analyze the links between individuals, societies, and systems** with a focus on describing the ways gender, race, class and other intersecting structures of power produce social inequalities. They will demonstrate their understanding of these relationships by examining the effects of social inequalities as well as evaluating actions, policies, and programs that can prevent or ameliorate them.
- **Express sociological ideas clearly and effectively** in written and oral contexts to a variety of audiences.
- **Think critically by engaging in teamwork** where they negotiate different perspectives thereby demonstrating an understanding of the complexity of the social world.
- **Describe how their training as sociologists, academic experiences, and department mentoring provide them with a foundation to critically examine the social world** and their own lives in a way that is relevant to their own career and personal pathway.

Career Paths: What can you do with a degree in Sociology?

Almost anything! Our graduates have incorporated their sociology degrees and training into rewarding and impactful careers around the world. Some specific career paths our majors and minors have taken recently:

Major in Sociology, Criminology and Criminal Justice Concentration

Students who concentrate in Criminology and Criminal Justice learn to view issues of crime, victimization, and justice at multiple levels—from individuals to communities and institutions. A sociological perspective on these issues focuses our attention to the social aspects of crime, law, and deviance including understanding societal factors that contribute to crime, effective and innovative programmatic approaches to prevent or control crime, the unintended consequences of our system for marginalized communities, and the role of research in creating effective policy. Our faculty teach courses that address issues like forms of punishment in the U.S. and global context, how gender shapes people's experiences with crime, environmental and state crime, as well as evidence-based policing practices. Moreover, our undergraduate program provides students with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential

skills for a wide variety of careers including those associated with law, justice, or advocacy. Our unique mentoring program models how to transfer students' sociological skill sets to meaningful employment after graduation. We can't wait to guide you through a life-changing major!

Major in Sociology, Environmental Sociology Concentration

Environmental sociology teaches you how to address contemporary issues and why that matters at multiple scales – from individuals, to communities, to nations. Our students develop tools to better understand the sources of and create systems-based solutions to vital social and environmental problems. Our faculty teach courses that address issues like environmental inequalities, natural resource conservation, and food justice. Moreover, our undergraduate program provides students with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential skills for a wide variety of careers associated with environment, natural resources, policy, justice, or advocacy—as well as strong preparation for graduate or law school. Our unique mentoring program models how to transfer students' sociological skill sets to meaningful employment after graduation. We can't wait to guide you through a life-changing major!

- ¹ No courses used to satisfy AUCC requirements may be used to satisfy the Social and Behavioral Sciences requirement.
- ² Select 12 credits from the Environmental Sociology electives list of eligible upper-division sociology courses. A total of 6 credits may come from outside sociology. Students can also petition the department for program credit when >25% of course material and grading are related to environment and society.
- ³ A statistics course is required if STAT 201 or STAT 204 was not taken to satisfy the AUCC 1B requirement. SOC 210 is recommended.
- ⁴ Select STAT 201 General Statistics (GT-MA1) or any Statistics course 200-level or above.
- ⁵ Select enough elective credits to bring program total to minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Each course used to satisfy requirements of the concentration requires a minimum grade of C (2.000), i.e. all SOC courses, STAT 2**, and each course taken to satisfy the Social and Behavioral Sciences electives or the Environmental Sociology electives.

Major in Sociology, General Sociology Concentration

Sociology is the study of societies. Sociologists examine social issues using empirical evidence and learn how to act as agents of social

justice and change. Students gain critical thinking skills to understand the complexities of our current social world. A General Sociology concentration provides flexibility so that students can explore a diverse array of topics such as dynamics of social inequalities, race, gender, capitalism, environmental justice, deviance, and the criminal justice system. Moreover, our undergraduate program provides students

with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential skills for a wide variety of careers including researchers, counselors, policy analysts, managers, criminal justice personnel, as well as strong preparation for graduate or law school. Our unique mentoring program models how to transfer students' sociological skill sets to meaningful employment after graduation. We can't wait to guide you through a life-changing major!

Requirements Effective Fall 2023

Each course used to satisfy requirements of the concentration requires a minimum grade of C (2.000), i.e. all SOC courses, STAT 2**, and each course taken to satisfy the Social and Behavioral Sciences electives.

Minor in Criminology and Criminal Justice

The Department of Sociology offers a minor in Criminology and Criminal Justice for students from other departments who wish to have some experience in an area outside their majors. Minors require fewer credit hours to complete than majors. Through this minor, students will gain sociological understanding of a variety of issues related to crime, deviance, and criminal justice. This course work will help prepare students who wish to work in a variety of fields, including those related to the criminal justice system.

Certificate in Applied Social Research

The Certificate in Applied Social Research advances and refines students' ability to identify, gather, interpret, and organize information about today's pressing social issues. The courses provide hands-on training so students acquire the research tools needed to produce and communicate evidence-driven arguments about how to address social inequalities and social justice issues. The Certificate in Applied Social Research gives students a strategic advantage in the competitive job market and provides the skills necessary to identify and create new pathways for social change.

Learning Outcomes

1. Link sociological theory to the development of research questions.
2. Apply a variety of research design strategies to research questions.
3. Assess the quality and limitations of both quantitative and qualitative data.
4. Discuss socio-cultural, ethical, and political considerations in social science research.
5. Collect both quantitative and qualitative data from a variety of sources, including considerations of sampling, conceptualization, operationalization, and measurement.
6. Manage different types of social science data, including restructuring data for analysis, transcription, coding, and integrating data from diverse sources.
7. Identify and apply appropriate techniques for analyzing both quantitative and qualitative data.
8. Effectively present and write up research results for a variety of audiences, including considerations of causality, data display and visualization, and integrating quantitative and qualitative results.

Certificate in Sustainable Military Lands Management

The College offers studies and professional training in the management, administration, and scientific investigation of renewable and nonrenewable natural resources. Programs include the study of every

component of natural systems with particular emphasis on fish, forests, minerals, range, watershed, wildlife, and outdoor recreation areas. Graduate areas of emphasis also include ecosystems and greenhouse gas management.

The Natural Resource Ecology Laboratory, housed in the College, is devoted to research and training in ecosystem science and management.

The College also houses the Center for Environmental Management of Military Lands, CEMML, (<http://www.cemml.colostate.edu/>) which is a team of environmental professionals experienced in the conservation and sustainable management of natural and cultural resources on Department of Defense lands.

College Programs

Undergraduate Majors

The scope of the College's programs is more broadly based than most natural resources schools. There are ten undergraduate degree programs, most with specialized concentrations or designated areas of further study. Undergraduate majors in all five departments lead to the Bachelor of Science degree, which requires a minimum of 120 credits. A minimum of 42 credits in upper division courses is required for all majors.

Field Training Programs

Most undergraduate majors require the completion of a four or five-week summer field training program (five or six credits) *before* their junior or senior year. Summer field instruction is given at the CSU Mountain Campus (<http://mountaincampus.colostate.edu/>) campus, 55 miles west of Fort Collins, and the geosciences department offers a summer field course in northern New Mexico and southern Colorado.

During interim or summer periods, some majors devote several weeks to advanced field training programs off campus. Students taking advanced ROTC should arrange their schedules with their advisors in their junior year to avoid conflicts during senior spring semester. It is recommended for all majors, and required for some, that students have a minimum of one summer of field experience before graduation.

International Education

International resources management is an increasingly important concern of the Warner College of Natural Resources. It is desirable that students in the College have opportunities to study abroad, just as students from abroad are encouraged to study here. CSU has agreements covering study abroad opportunities with institutions throughout the world. Students may complete one or two semesters of resources management education abroad. Students interested in studying abroad should plan far in advance by discussing opportunities with their academic advisor and by visiting the Office of International Programs (<http://international.colostate.edu>) in Laurel Hall.

Graduate Programs

Master of Science and Doctor of Philosophy degree programs are offered in each department. Four professional master's degrees are offered by departments in the college: the Master of Fish, Wildlife, and Conservation Biology, the Master of Natural Resources Stewardship, the Master of Tourism Management and the Professional Science Master's in Ecosystem Science and Sustainability. Descriptions of the various graduate programs may be found in the Graduate and Professional Bulletin or on the departmental websites.

Admissions Information

Jake.aglietti@colostate.edu

For High School Graduates

High school students are advised to take all the English, science, and mathematics courses possible to prepare for college-level work in natural resources.

Limitation on Transfer of Credits

Students planning to attend another college or community college prior to enrolling at CSU should follow the freshman program for their chosen major as closely as possible. To assure that they have the opportunity to complete all degree requirements in four years, they should plan to transfer to CSU no later than the beginning of their junior year. Credits which transfer but are not equivalent to specific curriculum requirements may be used as elective credits.

Transfer Students

Students are required to choose a major when enrolling. Transfer students, therefore, should follow the departmental curriculum closely. Check the individual major and concentration for specific courses.

Graduate Certificate in Sustainable Military Lands Management

The Graduate Certificate in Sustainable Military Lands Management at CSU is designed to enhance the knowledge and skills of current practitioners and managers, as well as new professionals interested in applying their education and background to the management of military lands. The knowledge and skill sets are transferable to professionals in a wide array of federal and state land management agencies. This online program is the first and only program of its kind in the United States.

Effective Fall 2023

Additional coursework may be required due to prerequisites.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Minor in Diversity and Inclusion in Natural Resources

To get more information about this minor or to officially declare it, please visit the department website (<https://warnercnr.colostate.edu/diversity-and-inclusion-in-natural-resources-minor/>).

This minor embraces human diversity and inclusion in natural resources fields, through exploration of how complex and important aspects of diversity serve to shape natural resources and our environment in our modern era. The minor serves students already passionate about natural resources through an exploration of counter-narratives not often thoroughly discussed in seminal works of natural resource history. It provides for a critical examination of historical and current relationships between human diversity, natural resources, and the environment. Students will develop an understanding of the importance of, and types of, diversity in human-environment interactions; how this diversity contributes to vulnerability and/or resilience to environmental change; and the barriers and opportunities for recognizing and protecting human diversity in the context of natural resource conservation and management. The curriculum provides students with the knowledge and skills needed to address diversity and inclusion issues within the natural resource disciplines represented in the Warner College. This includes proposing solutions to environmental injustices, facilitating intercultural environmental communication, integrating multicultural perspectives in assessment of natural resource issues and development of policy and management solutions, and cultivating a deeper understanding and respect for diverse ways of knowing and experiencing the environment.

Requirements
Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Minor in Geospatial Information Science for Natural Resources

The minor in Geospatial Information Science for Natural Resources provides students with fundamental geospatial skills in natural resource science and management. Geographic information systems, global positioning systems, and remote sensing are key tools for the 21st century workforce.

This minor is designed for students desiring to gain technical skills and to increase their employment potential in an applied area. The minor in Geospatial Information Science has a broad interdisciplinary appeal due to the ability to adapt and use these technologies in many disciplines.

For more information on the minor including minor declaration events, please visit the department website (<http://warnercnr.colostate.edu/geospatial-information-science-for-natural-resources-minor/>).

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Department of Ecosystem Science and Sustainability

Office: A104 Natural and Environmental Sciences Building

Phone: (970) 491-5589

Email: WCNR_ESS_info@Mail.ColoState.edu

Department Head: Rich Conant, Ph.D.

warnercnr.colostate.edu/ess/ (<https://warnercnr.colostate.edu/ess/>)

Established in 2011, the Department of Ecosystem Science and Sustainability investigates the intricate physical, chemical, human,

and biological interactions driving ecosystems. Our responsibility is to understand the world's ecosystems and the effect of human societies on ecosystem processes and their long-term sustainability. Research and education are central to that understanding, enhancing our ability to manage for the sustainability of ecosystems, societies and the biosphere.

The Department of Ecosystem Science and Sustainability currently offers the following degrees and certificates:

- Major in Ecosystem Science and Sustainability
- Major in Watershed Science and Sustainability
- Minor in Watershed Science
- Graduate Certificate in Carbon Management
- Graduate Certificate in Water Resources
- Master of Science in Ecosystem Sustainability
- Master of Science in Watershed Science
- Professional Science Master's in Ecosystem Science and Sustainability
- Ph.D. in Ecosystem Sustainability
- Ph.D. in Watershed Science

Undergraduate Majors

- Major in Ecosystem Science and Sustainability
- Major in Watershed Science and Sustainability
- Major in Watershed Science (No new students are being admitted into this program of study. Please see the Major in Watershed Science and Sustainability).

Minor

- Minor in Watershed Science

Graduate Graduate Programs in Ecosystem Science and Sustainability

The department offers master's and Ph.D. programs in Ecosystem Sustainability, and Watershed Science. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the website for the Department of Ecosystem Science and Sustainability (<http://warnercnr.colostate.edu/ess-home/>).

Certificates

- Carbon Management
- Water Resources

Master's Programs

- Master of Science in Ecosystem Sustainability, Plan A
- Master of Science in Watershed Science, Plan A
- Master of Science in Watershed Science, Plan B
- Professional Science Master's in Ecosystem Science and Sustainability

Ph.D.

- Ph.D. in Ecosystem Sustainability
- Ph.D. in Watershed Science

Courses

Subjects in this department include: Ecosystem Science and Sustainability (ESS) and Watershed Science (WR).

Ecosystem Science and Sustainability (ESS)

ESS 120 Intro to Ecosystem and Watershed Sciences Credit: 1 (1-0-0)

Course Description: Exploration of the fields of Ecosystem Science and Sustainability and Watershed Science, including career pathways.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: This is a partial semester course. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

ESS 129 Information Management for Sustainability Credit: 1 (1-0-0)

Course Description: Learn to access, retrieve, store, and manipulate information for natural resources and sustainability applications. Basic mapping, statistics, and graphing.

Prerequisite: None.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 129 and ESS 180A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 130 Intro to Systems Theory for Sustainability Credit: 1 (1-0-0)

Course Description: Introduction to the concept of a "system," fundamental tenets of systems theory, and application of systems theory to the sustainability of social-ecological systems.

Prerequisite: ESS 129, may be taken concurrently.

Registration Information: This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 150 Imagining Sustainability Credits: 3 (3-0-0)

Also Offered As: ANTH 150.

Course Description: Science alone cannot imagine the revolutionary changes necessary to sustain future life on our planet. Explore key concepts and practices of sustainability as represented in contemporary fiction, film, and the news media. Interdisciplinary approach will be anthropological and historical, charting the development of sustainability thinking through different epochs of capitalism.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: ANTH 150, ANTH 181A1, ESS 150, or ESS 181A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 210 Physical Geography Credits: 3 (3-0-0)

Also Offered As: GR 210.

Course Description: Energy, mass budget, and human impacts on atmosphere, hydrosphere, and continental land surfaces.

Prerequisite: None.

Registration Information: Credit not allowed for both ESS 210 and GR 210.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 211 Foundations in Ecosystem Science Credits: 3 (3-0-0)

Course Description: Linkage between society and ecosystems services as foundation for sustainability of the coupled human-environmental system.

Prerequisite: GR 210 or ESS 210.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 220 Research Skills for Ecosystem Science I Credit: 1 (0-0-1)

Course Description: Fundamental skills for participating in ecosystem science research through hands-on learning modules.

Prerequisite: None.

Registration Information: Written consent of instructor.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 221 Research Methods for Ecosystem Science II Credit: 1 (0-0-1)

Course Description: Advanced topics in the practice of the scientific method and participation in research.

Prerequisite: ESS 220.

Registration Information: Written consent of instructor.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 298 Research Credits: Var[1-3] (0-0-0)

Course Description: Directed ecosystem science research.

Prerequisite: ESS 221, may be taken concurrently.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 311 Ecosystem Ecology Credits: 3 (3-0-0)

Course Description: Principles of ecosystems ecology, emphasis on their application to coupled natural and human systems.

Prerequisite: (PH 121 or PH 141) and (LIFE 320).

Registration Information: Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 312 Sustainability Science Credits: 3 (3-0-0)

Course Description: Synthesize multifaceted information across a wide range of disciplines, with the goal to develop potential solutions to complex human-societal-environmental challenges at multiple scales. Implement methods for understanding current issues, develop alternative scenarios to current practices and policies, and stage interventions to achieve more sustainable behaviors and practices.

Prerequisite: LIFE 320.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 320 Internship and Career Preparation Credit: 1 (0-0-1)

Course Description: Career-related skills and professional development in ecosystem science and sustainability (ESS) for majors.

Prerequisite: LIFE 320.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 330 Quantitative Reasoning for Ecosystem Science Credits: 3 (2-2-0)

Course Description: Understanding diverse approaches for using data and models to understand complex ecological systems.

Prerequisite: (ESS 211 or LIFE 320) and (MATH 155 or MATH 160) and (STAT 301 or STAT 307 or STAT 315).

Registration Information: Junior or senior standing.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 353 Global Change Impacts, Adaptation, Mitigation Credits: 3 (3-0-0)

Course Description: Explore challenges of climate change for mountain environments and society and their solutions.

Prerequisite: LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Required field trips. Credit allowed for only one of the following: BZ 353, ESS 353, or NR 353.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 365 Global Climate Justice Credits: 3 (3-0-0)

Course Description: Explore how mechanisms of environmental transport (air, water, land, biota) act as drivers within different ecosystems and how such drivers create pathways that lead to climate justice issues among the world's vulnerable populations.

Prerequisite: None.

Registration Information: Completion of AUCC categories 2 and 3A. Credit not allowed for both ESS 365 and ESS 381A1.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 382A Study Abroad: Socio-Ecological Landscapes of Mongolia Credits: 6 (0-0-6)

Course Description: Travel to Mongolia for a field-based, place-based experience with Mongolian students and herders. Engage in research projects partnering with Mongolian counterparts for field data collection using ecological, social science, and geospatial tools. Examine the intersection of culture and environment through observational exercises and experiential learning. Experience nomadic culture through field trips and participatory community activity.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Written consent of instructor.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 400 Global Perspectives on Sustainability Credits: 3 (3-0-0)

Course Description: Explores the intersections between ecosystem science, communities and sustainability in the context of the global challenges of climate change focusing on the new global framework (The Paris Agreement), Sustainable Development Goals (SDGs), and ecological indicators.

Prerequisite: ESS 311.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 401 Sustainability of Parks and Protected Places Credits: 3 (3-0-0)

Course Description: Explore connections between culture, sustainability, and park management topics while discussing people, parks, and places through the lens of diversity and inclusion in natural resources.

Prerequisite: None.

Registration Information: Completion of AUCC Categories 2 and 3A.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 405 Global Agriculture and Environmental Change Credits: 3 (3-0-0)

Also Offered As: SOCR 405.

Course Description: Explore the past, present, and future of global agroecosystems in a changing environment. Examine a range of environmental issues facing agroecosystems around the world, including water management, climate change, air pollution, and land use change. Assess the history of agricultural development and the factors that determine food security, as well as what strategies could help create a more sustainable and food secure world.

Prerequisite: BSPM 302 or BSPM 308 or BSPM 361 or LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Credit not allowed for both ESS 405 and SOCR 405.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 411 Earth Systems Ecology Credits: 3 (3-0-0)

Course Description: Earth as a system, stressing ecological interactions among energy, water, and biogeochemistry.

Prerequisite: ESS 311 and ESS 312.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 412 Sustainable Cities Credits: 3 (3-0-0)

Course Description: Explore the ecology of cities, evaluate the most innovative science developed for the city, and discuss with renowned researchers leading these efforts. Analyze sustainability plans from a variety of cities around the globe, and interact with the practitioners developing and implementing sustainable goals. Delve into sustainability theory, specifically "the sustainable city myth."

Prerequisite: ANTH 100 or ANTH 200 or ESS 210 or GES 101 or GR 100 or GR 210 or LAND 220 or LIFE 220 or LIFE 320 or NR 120A or NR 130 or SOC 220.

Registration Information: Junior standing. Credit not allowed for both ESS 412 and ESS 480A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 432 Microbial Ecology Credits: 3 (2-0-1)

Also Offered As: MIP 432.

Course Description: Principles of microorganism interactions with their living and non-living environments; implications for the environment, plants, and animals.

Prerequisite: MIP 300.

Registration Information: Must register for lecture and recitation. Credit not allowed for both ESS 432 and MIP 432.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 433 Microbial Ecology Laboratory Credit: 1 (0-3-0)

Also Offered As: MIP 433.

Course Description: Experimental microbial ecology; the design, conduct and interpretation of experiments that illustrate basic principles of microbial ecology.

Prerequisite: MIP 300.

Registration Information: Must be taken concurrently with ESS 432 or MIP 432. Credit not allowed for both ESS 433 and MIP 433.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 440 Practicing Sustainability Credits: 4 (2-0-2)

Course Description: Capstone integration of ecosystem science and sustainability, focused on case studies.

Prerequisite: ESS 311 and ESS 312.

Registration Information: Senior standing in WCNR. Must register for lecture and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 471 Special Topics in Ecosystem Sustainability Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: ESS 311.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 474 Limnology Credits: 3 (2-2-0)

Course Description: Biology, chemistry, and physics of lakes including limnological methods.

Prerequisite: LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Must register for lecture and laboratory. Required field trips. Credit not allowed for both BZ 474 and ESS 474.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 486 Ecosystem Practicum Credits: 2 (0-0-4)

Course Description: One-week field practicum to examine ecosystem science and sustainability issues in Colorado landscapes.

Prerequisite: ESS 311.

Registration Information: Senior standing. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 487 Internship Credits: Var[1-6] (0-0-0)

Course Description: Supervised work experience in professional settings related to Ecosystem Science and Sustainability.

Prerequisite: ESS 320.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 495 Independent Study in Ecosystem Science Credits:

Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 501 Principles of Ecosystem Sustainability Credits: 3 (3-0-0)

Course Description: Principles of ecosystem sustainability and threats to sustainability. Students will investigate and develop case studies.

Prerequisite: BZ 300 to 499 or ECOL 300 to 499 or CHEM 300 to 499.

Registration Information: Admission to graduate school. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 505 International Climate Negotiations Credits: 2 (2-0-0)

Course Description: Preparation for international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations around the world. Explore environmental sustainability issues on international teams with peers from other institutions. Teams examine environmental issues/policies through a research project, and have the opportunity to prepare for actual climate action negotiations.

Prerequisite: None.

Registration Information: Department approval required. This is a partial semester course. Credit not allowed for ESS 505 and ESS 581A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 506 Virtual International Climate Negotiations Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations around the world through virtual participation. Explore environmental sustainability issues on international teams with peers from other institutions. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 516 Climate Justice and Policy Credits: 2 (2-0-0)

Also Offered As: NR 516.

Course Description: Overview on i) the unequal distribution of the benefits of natural resource use and the burdens of environmental degradation across spatiotemporal scales, and ii) the role of policy tools and approaches in creating, exacerbating, or addressing those inequalities. Examine environmental and climate justice (EJ/CJ) concepts, recognize environmental and climate inequalities, and learn how to integrate EJ/CJ considerations in policy analysis and review.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only. Credit not allowed for both ESS 516 and NR 516.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 523A Environmental Data Science Applications:

Introduction Credits: 3 (3-0-0)

Also Offered As: SOCR 523A.

Course Description: Explore tools and best practices for working with large environmental datasets primarily using the programming language R. Cover technical topics like: data types, file management, iteration, functional programming, debugging, code management and collaboration with git and GitHub. Use these tools to analyze environmental data using statistical approaches like: linear models, trend analysis, simple machine learning techniques.

Prerequisite: STAR 511 or STAT 158.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 523A and SOCR 523A.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 523B Environmental Data Science Applications: Food and

Agriculture Credits: 2 (2-0-0)

Also Offered As: SOCR 523B.

Course Description: Explore the application of data science to the analysis of food and agricultural systems. Examine the ways food and agricultural researchers utilize data science in contemporary scientific literature and in research taking place across campus. Work in a team to create, document, and communicate an analysis that utilizes data science techniques to answer questions about food and agricultural system functioning and/or sustainability.

Prerequisite: ESS 523A, may be taken concurrently or SOCR 523A, may be taken concurrently.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 523B and SOCR 523B.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 523C Environmental Data Science Applications: Water Resources Credits: 2 (2-0-0)

Also Offered As: WR 523C.

Course Description: Focus on analyzing and understanding water resources. Examine key innovations in deep learning for hydrological prediction and model parameterization, with a focus on cutting-edge techniques and hands-on analyses.

Prerequisite: ESS 523A, may be taken concurrently or SOCR 523A, may be taken concurrently.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 523C and WR 523C.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 524 Foundations for Carbon/Greenhouse Gas Mgmt Credits: 3 (3-0-0)

Course Description: Foundations for understanding greenhouse gas emissions management and accounting.

Prerequisite: BZ 300 to 499 or ECOL 300 to 499 or CHEM 300 to 499.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 542 Greenhouse Gas Policies Credits: 2 (0-0-2)

Course Description: Rules, regulations and standards for greenhouse gas management and accounting.

Prerequisite: ESS 524, may be taken concurrently.

Registration Information: Graduate standing. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 543 Global Climate Change Credits: 2 (2-0-0)

Also Offered As: ATS 543.

Course Description: Climate change science, climate change impacts, and climate change mitigation, including discussions of current topics in climate change.

Prerequisite: BZ 300 to 499 or ECOL 300 to 499 or LIFE 300 to 499 or CHEM 300 to 499.

Registration Information: Sections may be offered: Online. Credit not allowed for both ATS 543 and ESS 543.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 545 Applications in Greenhouse Gas Inventories Credits: 4 (2-6-0)

Course Description: Overview of methods for estimating greenhouse gas emissions and mitigation potential for agriculture and forestry activities.

Prerequisite: (ESS 524) and (STAR 511 or STAT 511A).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 554 Ecological and Social Agent-based Modeling Credits: 3 (2-2-0)
Also Offered As: ANTH 554.

Course Description: Exploring the use and making of agent-based models featuring interacting individuals in ecological and social simulation, with examples and projects.

Prerequisite: None.

Registration Information: Junior standing. Must register for lecture and laboratory. Credit allowed for only one of the following: ANTH 554, ESS 554, or NR 554.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 555 Life Cycle Assessment for Sustainability Credits: 3 (3-0-0)

Also Offered As: ANEQ 555.

Course Description: The quantitative and qualitative measure of cradle-to-grave impacts of products and services on the environment, the economy, and society.

Prerequisite: BIOM 300 to 479 or BZ 300 to 379 or BZ 400 to 479 or CHEM 300 to 379 or CHEM 400 to 479 or CIVE 300 to 479 or ECOL 300 to 379 or ENGR 300 or MECH 300 to 379.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ANEQ 555, ENGR 555, ESS 555, ENGR 581A1, or ESS 581A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 565 Niche Models Credits: 4 (3-2-0)

Course Description: Concepts and application of niche models in ecosystem science.

Prerequisite: (BSPM 526 or BZ 526 or BZ 535 or BZ 548 or BZ 561 or ECOL 505 or ECOL 600 or ECOL 610 or ECOL 620 or FW 555 or FW 662) and (STAR 511 or STAT 511A).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 575 Models for Ecological Data Credits: 4 (3-2-0)

Course Description: Gaining insight about the operation of ecological processes using models and data.

Prerequisite: MATH 255 and STAT 340.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582A Study Abroad--Europe and British Isles: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations around Europe/British Isles. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582B Study Abroad--Americas: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations in Latin America. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582C Study Abroad--Asia/Oceania: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations within Asia and Oceania. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582D Study Abroad--Africa: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations in Africa. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 587 Internship Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 625 Ecology of Forest Production Credits: 3 (3-0-0)

Also Offered As: F 625.

Course Description: Develops student expertise in understanding carbon and nutrient flows in forests.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must have taken a 300-level course in ECOL. Credit not allowed for both ESS 625 and F 625. Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 650 Edge Effects--Place, Embodiment, Environment Credits: 3 (3-0-0)

Also Offered As: ANTH 650.

Course Description: Interdisciplinary thinking on questions of place, power, embodiment, and environmental adaptation. Drawing on human geography, ethnography, political ecology, and social-ecological theory, develop an understanding of boundaries and transitional zones as places of complex social and species exchange by looking at some key philosophical texts, but also applying theoretical understanding to specific case studies.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ANTH 650 and ESS 650.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 655 Multivariate Analysis for Community Ecology Credits: 2 (2-0-0)

Course Description: Techniques and conceptual understanding for analyzing multivariate ecological data characteristic of community ecology, including ordination, classification, and permanova.

Prerequisite: (STAR 511 or STAT 511A) and (BZ 500 to 679 - at least 3 credits or ECOL 500 to 679 - at least 3 credits or ESS 500 to 679 - at least 3 credits or FW 500 to 679 - at least 3 credits).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 660 Biogeochemical Cycling in Ecosystems Credits: 3 (3-0-0)

Course Description: Biotic and abiotic processes responsible for distribution and fluxes of elements at ecosystem, landscape, and global scales.

Prerequisite: CHEM 245 and SOCR 240 and ECOL 300 to 699.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 692 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 695 Independent Study in Ecosystem Science Credits:

Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 696 Group Study Credits: Var[1-6] (0-0-0)

Course Description: Group study projects on topics in ecosystem science and sustainability.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

Watershed Science (WR)

WR 204 Sustainable Watersheds (GT-SC2) Credits: 3 (3-0-0)

Also Offered As: GR 204.

Course Description: Effects of climate, land use, and water use on the sustainability of water quantity and quality.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GR 204, GR 304, WR 204 or WR 304.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

WR 406 Seasonal Snow Environments Credits: 3 (2-3-0)

Course Description: Evaluation of the physical environment; characteristics of snow; methods of studying snow; snow safety.

Prerequisite: None.

Restriction: Must be a: Junior, Senior, Senior - 5yr Bachelor, Senior - Post Bachelor, Senior - Second Bachelor.

Registration Information: Junior or senior standing. Must register for lecture and laboratory. Required field trips.

Term Offered: Spring (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

WR 416 Land Use Hydrology Credits: 3 (3-0-0)

Course Description: Fundamental concepts in hydrology and effects of land use on hydrologic processes.

Prerequisite: (ESS 210 or GEOL 110 and GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150 or GR 210 or SOCR 240) and (CIVE 202 or STAT 201 or STAT 301 or STAT 307 or STAT 315) and (PH 110 or PH 121 or PH 141).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 417 Watershed Measurements Credits: 3 (2-3-0)

Course Description: Instrument and field techniques in watershed science. Project design and data analysis.

Prerequisite: WR 416 and WR 418.

Registration Information: Must register for lecture and laboratory. This is a partial semester course. Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

WR 418 Land Use and Water Quality Credits: 3 (3-0-0)

Course Description: Physical, chemical, biological water quality parameters affecting land use; land management to maintain water quality; water quality standards, legislation.

Prerequisite: (CHEM 103 and CHEM 104 or CHEM 107 and CHEM 108 or CHEM 111 and CHEM 112) and (STAT 158) and (STAT 301 or STAT 315).

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

WR 419 Water Quality Analyses Credits: 3 (2-2-0)

Course Description: Analyze freshwater samples for water quality constituents. Analyze data along with public water quality datasets.

Prerequisite: (CHEM 107 or CHEM 111) and (STAT 301 or STAT 315) and (WR 417).

Registration Information: Must have concurrent registration in WR 418. Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 440 Watershed Problem Analysis Credits: 3 (2-2-0)

Course Description: Capstone integration of spatial watershed issues, focused on problem solving in watershed science.

Prerequisite: (NR 319 or NR 322) and (WR 416 and WR 418).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 474 Snow Hydrology Credits: 3 (3-0-0)

Course Description: Snowfall, accumulation, distribution, physical processes in the snowpack, energy balance, ablation and runoff, measurement methods, runoff forecasting.

Prerequisite: WR 416, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 486 Watershed Field Practicum Credits: 2 (0-6-0)

Course Description: Field visits to watershed management projects and sites of significant field studies.

Prerequisite: None.

Restriction: Must be a: Junior.

Registration Information: Junior standing. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 487 Internship Credits: Var[1-6] (0-0-0)

Course Description: Supervised work experience in professional settings related to Watershed Science.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

WR 492 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

WR 495 Independent Study-Watershed Resources Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

WR 510 Watershed Management in Developing Countries Credits: 2 (2-0-0)

Course Description: Watershed management problems, approaches, and solutions in developing countries.

Prerequisite: CIVE 322 or WR 416.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 511 Water Resource Development Credits: 3 (3-0-0)

Course Description: Basic principles of water resource management including surface and subsurface flows.

Prerequisite: None.

Registration Information: Graduate standing. Offered as an online course only. Written consent of instructor.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 512 Water Law for Non-Lawyers Credits: 3 (0-0-3)

Course Description: Basics of water law and policy for Colorado, western states, and the U.S.

Prerequisite: None.

Registration Information: Graduate standing. Written consent of instructor. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 514 GIS and Data Analysis in Water Resources Credits: 3 (1-4-0)

Course Description: Exposure to multiple data analysis and GIS tools used to study water resources. Assess online data sources, download and pre-process digital data, and analyze water information.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and laboratory. Offered as an online course only. Credit not allowed for both WR 514 and WR 581A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 516 Cumulative Effects and Watershed Analysis Credits: 3 (2-0-1)

Course Description: Definition, causal processes, and modeling of cumulative watershed effects; comparison and evaluation of current watershed analysis procedures.

Prerequisite: WR 416 and WR 417.

Registration Information: Must register for lecture and recitation.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 520 Evapotranspiration Credits: 2 (2-0-0)

Course Description: Theory, estimation, measurement, simulation, and application of evapotranspiration processes in hydrology.

Prerequisite: PH 122.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

WR 523C Environmental Data Science Applications: Water Resources Credits: 2 (2-0-0)

Also Offered As: ESS 523C.

Course Description: Focus on analyzing and understanding water resources. Examine key innovations in deep learning for hydrological prediction and model parameterization, with a focus on cutting-edge techniques and hands-on analyses.

Prerequisite: ESS 523A, may be taken concurrently or SOCR 523A, may be taken concurrently.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 523C and WR 523C.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 524 Modeling Watershed Hydrology Credits: 3 (2-2-0)

Also Offered As: CIVE 524.

Course Description: Development and application of watershed models: structure, calibration, evaluation, sensitivity analysis, simulation.

Prerequisite: (CIVE 203 or STAT 301 or STAT 315) and (CIVE 322 or WR 416).

Registration Information: Must register for lecture and laboratory. Credit not allowed for both CIVE 524 and WR 524.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 574 Advanced Snow Hydrology Credits: 4 (3-0-1)

Course Description: Snow processes in hydrologic cycle; physical and conceptual methods of modeling; techniques for measuring different states and change rates.

Prerequisite: CIVE 322 or ENVE 322 or WR 416.

Registration Information: Must register for lecture and recitation.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 575 Snow Hydrology Field Methods Credit: 1 (0-2-0)

Course Description: Field course offering hands-on experience in snow hydrology.

Prerequisite: None.

Registration Information: Enrollment in a graduate program. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 616 Hillslope Hydrology and Runoff Processes Credits: 3 (1-0-2)

Course Description: Hillslope hydrology and runoff processes in different environments; implications for management and modeling.

Prerequisite: CIVE 322 or WR 416.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and recitation.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 671 Advanced Topics in Watershed Science Credits: Var[1-6] (0-0-0)

Course Description: Explores advanced topics in watershed hydrology, biogeochemistry, and ecology.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: May be repeated for a maximum of 9 credits.

Grade Mode: Traditional.

Special Course Fee: No.

WR 674 Data Issues in Hydrology Credits: 3 (3-0-0)

Course Description: Types of data, data sources, data quality, missing data, spatial data, data usage, sensitivity in models, error, presentation of data and results.

Prerequisite: WR 574.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 692 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

WR 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Ecosystem Science and Sustainability

The major in Ecosystem Science and Sustainability provides a strong scientific foundation in ecosystem ecology integrated with a broad knowledge of the cultural, social, economic, and political issues that are shaping the issue of sustainability. Students in the major learn to integrate science into real-world decision making, with the goal of developing sustainable strategies to maintain ecosystem services around the globe. We provide students with a broad base of experiential and collaborative learning opportunities, opportunities for undergraduate research, and the latest scientific knowledge about sustainability science and how organisms interact with their environments to form complex ecosystems. Opportunities for research, internships, practical and group-based learning, and field experiences in the beautiful Rocky Mountains and around the world, combined with an outstanding classroom education, build a solid foundation for applying sustainable resource management principles.

Learning Outcomes

Students in the major learn:

- How to use natural resources and implement solutions in a sustainable way.
- About environmental change at local to global scales.
- The amazing connections between different earth system components, founded in a systems thinking approach.
- How to conduct research or field work in a variety of settings addressing questions important to sustainability.

Potential Occupations

Completion of the undergraduate degree qualifies students for a wide variety of careers related to sustainability and natural resource science. Examples of possible careers include: sustainability coordinator, ecologist, environmental educator, invasive species specialist, biological science technician, climate change scientist, natural resource specialist, or corporate environmental consultant. Students completing the undergraduate degree in Ecosystem Science and Sustainability will also be well prepared to succeed in graduate education in a variety of disciplines.

Professional Development and Engagement Requirement

The timeline to complete the Professional Development and Engagement may vary. Suggested completion of summer coursework (NR 220 and some department-approved study abroad programs) may occur between sophomore and junior years or between junior and senior years. ESS 487 has a prerequisite of ESS 320, so should be completed after junior year. ESS 220/ESS 221/ESS 298 may be completed during the academic year, ideally during junior or senior year, thus moving elective credits to freshman and sophomore years.

Major in Watershed Science and Sustainability

Watershed Science and Sustainability is the interdisciplinary study of the natural processes and human activities that affect freshwater resources. Water is a critical component of Earth's ecosystems and is used for human consumption, agriculture, energy production, transportation, and recreation. Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide. Across all of the Watershed Science concentrations, students will gain foundational knowledge in physical, geological, and biological controls on how water moves through ecosystems and how these systems, in turn, are controlled by social and legal systems. Through three different concentrations, students will have the opportunity to specialize in the biophysical, data analysis, or sustainability components of understanding how watersheds work.

No matter which concentration students choose, they will share an ability to immediately engage in the quickly expanding fields of water resource management, watershed monitoring, sustainable water decision making, and other related fields. Students from this program have gone on to work as federal hydrologists, environmental consultants, municipal water resource managers, data scientists, graduate students, and other related fields.

Concentrations

- Watershed Data Concentration
- Watershed Science Concentration
- Watershed Sustainability Concentration

Major in Watershed Science and Sustainability, Watershed Data Concentration

The Watershed Data concentration focuses on fusing data science skills and techniques with deep knowledge of the physical, chemical, social, and biological factors that affect the quantity and quality of water as it moves through ecosystems. Students will engage in field, laboratory, and classroom research in both watershed and data science courses, and graduate with a Minor in Applied Data Science in addition to their major. The program starts with students taking core foundational physical and mathematical courses that build towards an understanding of how to use watershed data to better understand watershed function and management. Core classes emphasize watershed science, data analysis, data science techniques, and combining these skills for dynamic research and reporting.

Learning Outcomes

Students will be able to:

- Articulate core concepts in watershed science and sustainability including climate processes, surface and subsurface hydrology, water quality, human uses of water, and sustainable water management.
- Apply data science techniques to spatial and temporal datasets to address watershed and water resource problems.
- Collect, analyze, and interpret meteorological, hydrological, and water quality, water use and management data.
- Analyze watershed problems and sustainability challenges using geospatial data, field observations, sensor data, and watershed models.
- Demonstrate strong critical thinking, writing, and oral communication skills.

Major in Watershed Science and Sustainability, Watershed Science Concentration

The Watershed Science concentration focuses on the physical, chemical, social, and biological factors that affect the quantity, quality, and flux

of water through engagement in the field, laboratory, and classroom. Students begin their program with core courses that build a strong foundation in the physical and natural sciences in preparation for upper-division coursework in land use and snow hydrology, land use and water quality, and watershed problem analysis. Courses emphasize field learning and technical skills, with core classes emphasizing watershed measurements, data analysis, modeling, and research. Students

graduating in the watershed science concentration will qualify for federal hydrology jobs under the Office of Personnel Management series 1315.

Learning Outcomes

Students will be able to:

- Articulate core concepts in watershed science and sustainability including climate processes, surface and subsurface hydrology, water quality, human uses of water, and sustainable water management.
- Describe how different types of land and water use affect hydrologic processes and water quality.

- Collect, analyze, and interpret meteorological, hydrological, and water quality, water use and management data.
- Analyze watershed problems and sustainability challenges using geospatial data, field observations, sensor data, and watershed models.
- Demonstrate strong critical thinking, writing, and oral communication skills.

Major in Watershed Science and Sustainability, Watershed Sustainability Concentration

In the Watershed Sustainability concentration, students will focus on how human systems interact with the physical, chemical, and biological processes in watersheds. They will combine foundational science courses with background in sociology and economics, in preparation for upper division courses on water resources, water economics, and sustainability.

Learning Outcomes

Students will be able to:

- Articulate core concepts in watershed science and sustainability including climate processes, surface and subsurface hydrology, water quality, human uses of water, and sustainable water management.
- Describe how social, institutional, governance, and economic factors affect allocation and management of water resources
- Analyze, and interpret meteorological, hydrological, and water quality, water use and management data.
- Analyze watershed problems and sustainability challenges using geospatial data, field observations, sensor data, and watershed models.
- Demonstrate strong critical thinking, writing, and oral communication skills.

Minor in Watershed Science

The Watershed Science minor addresses land use hydrology and sustainable watersheds through a set of core courses and engages students in experiential learning in a watershed field course. The program offers a broad and flexible selection of additional coursework options that emphasize physical, biogeochemical, and societal aspects of water resources and watershed management. Students can select the combination of courses that best fits their interests and complements their major.

Undergraduate Advising

Requirements Effective Fall 2021

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Graduate Certificate in Carbon Management

Demand is growing for professionals trained in carbon accounting and tracking greenhouse gas emissions. The US Securities and Exchange Commission has proposed new rules requiring publicly traded companies to disclose their greenhouse gas emissions. Students in the Graduate Certificate in Carbon Management learn the technical skills needed to do greenhouse gas emission accounting and how to develop GHG accounting systems. They also learn about current and emerging policies, and the tradeoffs between carbon, nitrous oxide and methane.

The Graduate Certificate in Carbon Management is designed to deliver the latest fundamental knowledge and skills to practicing environmental/sustainability professionals to enable them to advance their careers by expanding into this emerging area.

This certificate program can be completed through traditional, on-campus coursework or through CSU Online (<https://www.online.colostate.edu/certificates/carbon-management/>).

Graduate Certificate in Water Resources

This certificate program is designed to provide college graduates, current practitioners, and new professionals with targeted knowledge and skills to advance their understanding and career mobility related to water resources planning, management, and policy. This skillset can be applied to a wide array of natural resource managers, as water planning is essential to sound governmental policy and community management. All courses include case studies and exercises pertaining to various water issues in Colorado and the United States, as well as international examples.

Master of Science in Ecosystem Sustainability, Plan A

CSU's innovative Master of Science in Ecosystem Sustainability, Plan A, is a research degree that enables students to develop core competencies in ecosystem science—the study of organisms and the environment—and apply that knowledge to address real-world issues.

The program serves as a foundation for a wide range of careers, including academic and scholarly professions, and work in government agencies, non-governmental organizations, and corporate and entrepreneurial environments.

We develop leaders in sustainability science: a new generation of practitioners able to address complex, integrated social-ecological problems in collaborative partnerships with researchers, resource users, and decision-makers.

A focus on solutions

Students work at the cutting edge of new research on ecosystem sustainability. Collaborating with some of the world's leading ecosystem and sustainability scientists, students explore solutions to global problems related to water and natural resources, food supplies, energy, greenhouse gas management, land-use change, climate change, and environmental justice, among others.

What students can expect to gain:

Successful students will acquire:

1. Detailed knowledge of quantitative and qualitative methods.
2. An understanding of complex ecosystem functioning.
3. A transdisciplinary understanding of social-ecological processes.
4. The ability to work in teams across disciplines and with decision-makers, resource users, and team members outside of academia.
5. The skills to conduct integrated assessments using systems approaches; conceptual, mathematical, geospatial, and statistical models; and innovative, collaborative processes.
6. The ability to apply critical thinking in the development of sustainable systems at local and global scales.
7. Advanced training in the methods of urban ecology and managing the sustainable cities of the future.

Local and Global Relevance

Our graduate community benefits from a highly networked program with close working links to the city governments of Fort Collins, Boulder, and Denver, and to local agencies, farming communities, and non-profits across the Front Range. We work at the highest elevations of the Rockies, in the lowest short-grass steppe regions, in cities, and neighborhoods. Our active research programs are spread around the globe: from northern, eastern, and southern Africa to China, Mongolia, Nepal, Tibet, Honduras, and Mexico.

Master of Science in Watershed Science, Plan A

Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide, and we need scientists who can address complex water issues. The watershed science program focuses on how water moves through the landscape, what factors affect its quality, and how to manage water resources. Students in the Master of Science in Watershed Science, Plan A program work closely with research scientists in the classroom, laboratory, and field on both basic and applied watershed science research. Students are exposed to cutting-edge field, data analysis, and modeling techniques through flexible programs of study and access to a breadth of water-related courses throughout the university. Students also have opportunities to participate in seminars and field courses.

The program emphasizes the advisor/student relationship. There is no core curriculum; rather, the advisor and student develop a program of study that best meets the requirements of the research to be undertaken and the needs of the student, culminating in the completion of a master's thesis.

The program has a strong record of employment and acceptance to leading doctoral programs after graduation, with graduates holding positions in federal, state, and local natural resource agencies, consulting firms, non-governmental organizations, industry, teaching, and research. Most students complete coursework that enables them to meet the U.S. governmental hydrologist certification.

Requirements

Program requirements are:

- 30 credits that meet Graduate School requirements
- Thesis
- Selected courses approved by advisor and committee – Prefixes that can be used to meet course requirements: ANTH, AREC, ATS, BZ, CHEM, CIS, CIVE, ECOL, ECON, ENVE, ESS, FW, F, GR, GEOL, GRAD, HORT, MATH, NR, NRRT, RS, SOC, SOCR, STAA, STAT, WR.

Master of Science in Watershed Science, Plan B

Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide, and we need scientists who can address complex water issues. The watershed science program focuses on how water moves through the landscape, what factors affect its quality, and how to manage water resources. Students in the Master of Science in Watershed Science, Plan B program work closely with research scientists in the classroom, laboratory, and field on applied watershed science research. Students are exposed to cutting-edge field, data analysis, and modeling techniques through flexible programs of study and access to a breadth of water-related courses throughout the university. Additionally, students

participate in seminars and field courses to further develop their skills. Advisor and student develop a program of study that best meets the requirements of the research to be undertaken and the needs of the student, culminating in the completion of a professional report.

The program has a strong record of employment, with graduates holding positions in federal, state, and local natural resource agencies, consulting firms, nongovernmental organizations, industry, teaching, and research. Most students complete coursework that enables them to meet the U.S. governmental hydrologist certification.

Requirements

Program requirements are:

- 30 credits that meet Graduate School requirements
- Professional Report
- Selected courses approved by advisor and committee – Prefixes that can be used to meet course requirements: ANTH, AREC, ATS, BZ, CHEM, CIS, CIVE, ECOL, ECON, ENVE, ESS, FW, F, GR, GEOL, GRAD, HORT, MATH, NR, NRRT, RS, SOC, SOCR, STAA, STAT, WR.

Professional Science Master's in Ecosystem Science and Sustainability

The Professional Science Master's (PSM) in Ecosystem Science & Sustainability (PSM) is an excellent course of study for students eager to work in environmental sustainability right away or for working professionals looking to transition quickly or advance their careers.

- The PSM is coursework-focused – the degree does not require a thesis.
- Through coursework, students gain expertise in sustainable management solutions through policy analysis, applied methods, and skills-based learning.
- Students choose from three different degree specializations: carbon management, watershed science, or sustainable food systems.
- Students are required to participate in an intensive 4-credit, 400-hour internship, where they gain hands-on knowledge in their chosen field, implement the skills learned within the classroom, and begin to establish a professional network. The program has successfully placed many students in paid internships focused on their career objectives.

After completing the program, students are able to:

- Describe ecosystem processes and sustainable management strategies to maintain those processes.
- Discuss current issues in environmental policy related to ecosystem sustainability.
- Evaluate the linkages between socioeconomic and ecological processes that influence ecosystem sustainability.
- Apply quantitative and qualitative methods to assess ecosystem sustainability using systems approaches and integrative methods.

- Build, work within, and lead interdisciplinary teams in a professional environment.

In addition to the PSM degree, we offer graduate certificates that provide further training through 9-15 credits of graduate-level coursework to be completed on the CSU campus or online, allowing credentialed specializations in carbon management and water resource planning, management, and policy.

The PSM in Ecosystem Science and Sustainability enables students from diverse academic backgrounds, such as environmental studies, business, engineering, natural resources, and agriculture, to understand the latest ecosystem science and develop the skills needed for emerging professions in areas such as greenhouse gas/carbon management, water sustainability and watershed management, and climate adaptation.

The PSM in Ecosystem Science & Sustainability is an affiliated Professional Science Master's (PSM) degree. Affiliation is administered by the Commission on Affiliation of PSM Programs (<https://www.professionalsciencemasters.org/>) (formerly named PSM National Office) to ensure a strong and distinctive PSM brand. The PSM is designed for students seeking a graduate degree in science or mathematics and understanding the need for developing workplace skills valued by top employers.

A minimum of 36 credits are required to complete this program with 21 or more credits at 500-level or higher, including a 4-credit Internship (ESS 587).

¹ Students who take ESS 542 to meet curriculum requirements must take 11 credits of Foundational Elective Courses.

- ² Select courses (e.g. water resources, hydrology, foundations in greenhouse management and accounting, climate change, international climate negotiations, global agriculture and environmental change, etc.) with approval of advisor and graduate committee.
- ³ Select courses (e.g. GIS, remote sensing, numerical analysis, modeling, greenhouse gas inventory, hydrological data analysis, etc.) with approval of advisor and graduate committee.

Ph.D. in Ecosystem Sustainability

Many physical, ecological, and social factors interact to shape the future of our ecosystems and societies. CSU's innovative Ph.D. in Ecosystem Sustainability enables students to develop core competencies in ecosystem science—the study of organisms and the environment—and apply that knowledge to address real-world issues. We help develop leaders in sustainability science: a new generation of practitioners able to address complex, integrated social-ecological problems in collaborative partnerships with researchers, resource users, and decision-makers.

Our graduates have the tools to understand complex scientific questions in sustainability, and the leadership and collaborative skills required to address current and future issues in sustainability. The program serves as a foundation for a wide range of careers, including academic and scholarly professions, and work in government agencies, non-governmental organizations, and corporate and entrepreneurial environments.

A focus on solutions

Students work at the cutting edge of new research on ecosystem sustainability. Collaborating with some of the world's leading ecosystem and sustainability scientists, students explore solutions to global problems related to water and natural resources, food supplies, energy, greenhouse gas management, land-use change, climate change, and environmental justice, among others.

What students can expect to gain

- Detailed knowledge of quantitative and qualitative methods
- An understanding of complex ecosystem functioning
- A transdisciplinary understanding of social-ecological processes
- The ability to work in teams across disciplines and with decision-makers, resource users, and team members outside of academia
- The skills to conduct integrated assessments using systems approaches, conceptual, mathematical, geospatial, and statistical models, and innovative collaborative processes
- The ability to apply critical thinking in the development of sustainable systems at local and global scales
- Advanced training in the methods of urban ecology and on managing the sustainable cities of the future

Local and Global Relevance

Our graduate community benefits from a highly networked program with close working links to the city governments of Fort Collins, Boulder, and Denver, and to local agencies, farming communities, and non-profits across the Front Range. We work at the highest elevations of the Rockies, in the lowest short grass steppe regions, in cities, and in neighborhoods. Our active research programs are spread around the globe: from northern, eastern, and southern Africa to China, Mongolia, Nepal, Tibet, Honduras, and Mexico.

Ph.D. in Watershed Science

Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide, and we need scientists who can address complex water issues. The watershed science program focuses on how water moves through the landscape, what factors affect its quality, and how to manage water resources. Students in the Ph.D. in Watershed Science program work closely with research scientists in the classroom, laboratory, and field on both basic and applied watershed science research. Students are exposed to cutting-edge field, data analysis, and modeling techniques through flexible programs of study and access to a breadth of water-related courses throughout the university. Students also have opportunities to participate in seminars and field courses.

The Ph.D. in Watershed Science requires 72 credits, most of which are research credits. Coursework includes in-depth classes in the student's area of research, as well as classes that expand into other disciplines. Each student develops an individualized program of study with the guidance and approval of the student's graduate committee. Students in the Ph.D. program develop new contributions to the literature of the watershed science discipline.

Professor Kathryn Stoner, Department Head

We are the only program in Colorado to offer comprehensive undergraduate and graduate education in Fish, Wildlife, and Conservation Biology. We have approximately 550 undergraduates and 60 graduate students enrolled in our department. Over 2,400 alumni are working to resolve natural-resource related issues. We contribute to the economic and ecological health of our state by assisting many individuals and agencies to solve complex environmental problems.

Undergraduate Majors

- Major in Fish, Wildlife, and Conservation Biology
 - Conservation Biology Concentration
 - Fisheries and Aquatic Sciences Concentration
 - Wildlife Biology Concentration

Minors

- Minor in Fishery Biology

Graduate Graduate Programs in Fish, Wildlife, and Conservation Biology

Graduate programs lead to a fish, wildlife, and conservation biology Master of Science, and Doctor of Philosophy degrees. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Fish, Wildlife, and Conservation Biology (<http://warnercnr.colostate.edu/fwcb-graduate-study/graduate-program/>).

Courses

Fish, Wildlife, and Conservation Biology (FW)

FW 104 Wildlife Ecology and Conservation (GT-SC2) Credits: 3 (3-0-0)

Course Description: Essentials of wildlife ecology as a foundation for understanding issues on the origins, management and conservation of biodiversity.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

FW 111 Basic Outdoor Skills in FWCB Credit: 1 (.5-1-0)

Course Description: Basic outdoor skills for FWCB and outdoor novices. History of wildlife conservation and reasons for declining outdoor participation.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. May be taken up to 3 times for a maximum of 3 credits. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 179 New-to-the-Major Seminar Credit: 1 (0-0-1)

Course Description: Introduces students new to the Fish, Wildlife, and Conservation Biology major to curriculum, faculty, research, key concepts, careers, professional development, and other students.

Prerequisite: None.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 182A Study Abroad--Mexico: Outdoor Skills Credit: 1 (0-0-1)

Course Description: Introduction and development of basic outdoor skills important to fish, wildlife, and conservation biology (FWCB) in environments in Baja California Sur, Mexico (e.g., marine, coastal, tropical, desert). Skills are related to the basic history and philosophies of the FWCB profession. Focus learning through hands-on experience. Does not provide full competence in any skill area.

Prerequisite: None.

Registration Information: Required field trips. FW 111 and FW 182A may be repeated for a maximum of 3 credits for the two courses.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 204 Introduction to Fishery Biology Credits: 3 (2-3-0)

Course Description: Exposure to sampling techniques, agencies, and topics in fishery biology careers.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 260 Principles of Wildlife Management Credits: 3 (3-0-0)

Course Description: Ecology principles applied to conservation and management of fish/wildlife resources. Quantitative methods, socioeconomic factors, population dynamics.

Prerequisite: (MATH 120 or MATH 124 or MATH 127) and (BZ 110 or LIFE 103).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 300 Biology and Diversity of Fishes Credits: 2 (2-0-0)

Course Description: Biology and zoology of fishes: anatomy, taxonomy, evolution, physiology, behavior, ecology, zoogeography, and conservation.

Prerequisite: BZ 111 or LIFE 103.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 301 Ichthyology Laboratory Credit: 1 (0-2-0)

Course Description: Anatomy, taxonomy, evolution and ecology of North American freshwater fishes.

Prerequisite: FW 300, may be taken concurrently.

Registration Information: Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 310 Mapping Diverse Perspectives in Conservation Credits: 3 (2-3-0)

Course Description: Principles and geospatial tools to explore conservation science and practice through diverse social and cultural perspectives. Through discussions and hands-on mapping exercises, develop a spatial understanding of diverse perspectives and social justice issues in conservation, including mapping local ecological knowledge, patterns of environmental injustice, hotspots of biological and cultural diversity, human-wildlife conflict, and non-colonialist geographies. No GIS experience required.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both FW 310 and FW 380A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 325 Spatial Ecology--Applications with R Credits: 3 (3-0-0)

Course Description: Explore the principles and procedures of spatial ecology and application to contemporary ecological issues. Application of R-based tools for spatial analysis, GIS, and basic visualizations. Topics include methods for estimating spatial pattern, the effects of varying spatial and temporal scales, conservation management, species distribution, and data collection, input, and manipulation.

Prerequisite: (LIFE 320) and (STAT 301 or STAT 307).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Credit not allowed for both FW 325 and FW 380A2.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 370 Design of Fish and Wildlife Projects Credits: 3 (2-2-0)

Course Description: Design, analysis, and evaluation of wildlife projects; lab exercises in design and data analysis; preparation and presentation of project proposals.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (FW 260 or FW 360) and (NR 220) and (MATH 155 or MATH 160) and (STAT 301 or STAT 307).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 373A Travel Abroad : Wildlife Conservation--Baja California Sur Credits: 3 (0-0-3)

Course Description: Study tour of various overseas ecosystems and natural resources conservation programs; discussions with local ecologists/managers.

Prerequisite: None.

Registration Information: Written consent of instructor. Students need a minimum of a 2.500 GPA per Education Abroad standards. Credit allowed for only one of the following: FW 373A, FW 382, or FW 382A.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 375 Field Wildlife Studies Credits: 3 (1-4-0)

Course Description: Field trips to see wildlife management and habitats and to discuss problems and practices with professional ecologists and resources managers.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (FW 260).

Registration Information: Must register for lecture and laboratory. Required field trips.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 384 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description: Instruction and practice in laboratory instruction in lower-division departmental courses.

Prerequisite: None.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 400 Conservation of Fish in Aquatic Ecosystems Credits: 3 (2-0-1)

Course Description: Ecological processes that create habitat and biotic template for fish in aquatic ecosystems; human effects; strategies for conserving fishes.

Prerequisite: LIFE 320 and FW 300.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 401 Fishery Science Credits: 3 (2-3-0)

Course Description: Theory, philosophy, and applications for study and management of fishery resources.

Prerequisite: (FW 300) and (STAT 301 or STAT 307 or ERHS 307) and (MATH 141 or MATH 155 or MATH 160).

Registration Information: Computer literacy. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

FW 402 Fish Culture Credits: 4 (3-2-0)

Course Description: Principles and practices to produce food, bait, and sport fishes.

Prerequisite: FW 300.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 405 Fish Physiology Credits: 3 (2-3-0)

Course Description: Physiological ecology of fish; functional adaptations and adjustments used to cope with environmental and physiological states.

Prerequisite: BZ 214 or FW 300.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both FW 405 and FW 605.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 430 Waterfowl Ecology and Management Credits: 3 (2-3-0)

Course Description: Apply concepts from life history theory, evolutionary ecology, population ecology, community ecology, and wildlife management to become familiar with the ecology and management of North American waterfowl across their migratory life cycles. Labs and field trips will develop practical field skills in waterfowl biology, conservation, and management in addition to data analysis and computing skills.

Prerequisite: (FW 260 with a minimum grade of C or LIFE 320 with a minimum grade of C) and (STAT 301 with a minimum grade of C or STAT 307 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Required field trips. Credit not allowed for both FW 430 and FW 481A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 455 Principles of Conservation Biology Credits: 3 (3-0-0)

Course Description: Review of efforts to study and conserve biological diversity, focused on fish and wildlife populations.

Prerequisite: (FW 260 and LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Credit allowed for only one of the following: FW 455, FW 555, or NR 300.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 465 Managing Human-Wildlife Conflicts Credits: 3 (2-2-0)

Course Description: Methods for resolving conflicts caused by wildlife; integrating animal behavior, population dynamics, economics, and human dimensions into solutions.

Prerequisite: FW 260.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 467 Wildlife Disease Ecology Credits: 3 (2-0-1)

Course Description: Ecological, epidemiological, and evolutionary principles of disease in fish and wildlife populations; contemporary issues in disease ecology.

Prerequisite: LIFE 320.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 468 Bird Ecology and Conservation Credits: 3 (2-3-0)

Course Description: Introduction to the principles and the practice of avian ecology and conservation. Class discussions, outdoor labs and field trips emphasize major threats to birds and opportunities for overcoming those challenges. Learn to identify local birds by sight and sound, employ field methods (e.g., bird banding), participate in long-term applied research projects, collect and analyze data independently, and interact with conservation practitioners.

Prerequisite: LIFE 320.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 469 Conservation and Management of Large Mammals Credits: 3 (3-0-0)

Course Description: Principles of behavior, ecology, population dynamics, and conservation related to large mammals.

Prerequisite: (BZ 330 and FW 260 and LIFE 320) and (NR 319 or NR 322) and (STAT 301 or STAT 307).

Registration Information: Required field trips.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 471 Wildlife Data Collection and Analysis Credits: 4 (2-4-0)

Course Description: Analysis methods used in wildlife management and research; adaptive resource management with emphasis on learning through field and computer labs.

Prerequisite: FW 370 and NR 220.

Registration Information: Must register for lecture and laboratory. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 472 Issues in Animal Conservation and Management Credits: 3 (2-0-1)

Course Description: Current and emerging issues in fish and wildlife conservation and management at the state, national, and global scales.

Prerequisite: (FW 260) and (LIFE 320).

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 473A Travel Abroad: Conserving Desert/Marine Animals Credits: 3 (0-0-3)

Course Description: Ecology and conservation of animals from desert, marine, intertidal, and shore ecosystems and application to problems of animal conservation in an international setting.

Prerequisite: LIFE 320.

Registration Information: Written consent of instructor. Students need a minimum of a 2.5 GPA per Education Abroad standards. Credit allowed for only one of the following: FW 473A, FW 482, or FW 482A.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 475 Conservation Decision Making Credits: 3 (3-0-0)

Course Description: Structured approaches to conservation and management of vertebrates; articulating objectives, developing management options, and predicting outcomes.

Prerequisite: (MATH 155 or MATH 160) and (STAT 301 or STAT 307) and (LAND 220 or LIFE 220 or LIFE 320).

Registration Information: Junior standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 477 Wildlife Habitat Use and Management Credits: 3 (1-3-1)

Course Description: Wildlife habitat evaluation, classification, and improvement; analysis of habitat use patterns; planning and implementation of management plans.

Prerequisite: (FW 260) and (NR 319 or NR 322).

Registration Information: Must register for lecture, lab, and recitation.

Credit allowed for only one of the following courses: FW 477, FW 577, or FW 677. Required field trips.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 487 Internship Credits: Var[1-6] (0-0-0)

Course Description: Field experience in fish and wildlife management.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 492 Seminar-Wildlife Biology Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 495A Independent Study: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LIFE 320 or FW 104 or NR 220 or LAND 220 or LIFE 220.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 495B Independent Study: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LAND 220 or LIFE 320 or FW 104 or NR 220 or LIFE 220.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 496A Group Study: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LAND 220 or LIFE 320 or FW 104 or NR 220 or LIFE 220.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 496B Group Study: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LAND 220 or LIFE 320 or FW 104 or NR 220 or LIFE 220.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 540 Fisheries Ecology Credits: 3 (2-0-1)

Course Description: Population, community, and ecosystem management for fishes and other aquatic organisms in freshwater habitats.

Prerequisite: None.

Registration Information: One course in fishery science; one course in aquatic ecology. Must register for lecture and recitation.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 544 Ecotoxicology Credits: 3 (2-0-1)

Course Description: Ecological effects of contaminants on populations, communities, and ecosystems.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (STAT 301 or STAT 307).

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 551 Design of Fish and Wildlife Studies Credits: 3 (2-0-1)

Course Description: Principles, types of studies, and philosophy of science in design of experimental, observational, and sampling studies for wildlife investigations.

Prerequisite: STAT 301 or STAT 307 or ERHS 307.

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 552 Applied Sampling for Wildlife/Fish Studies Credits: 3 (2-0-1)

Course Description: Survey sampling theory and techniques, including distance sampling, with emphasis on wildlife and fish studies.

Prerequisite: STAT 301 or STAT 307.

Registration Information: Must register for lecture and recitation.

Graduate standing. Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 553 Adaptive Fish and Wildlife Management Credits: 3 (2-2-0)

Course Description: Formal approaches to making management decisions about wildlife and fish populations, using tools of decision analysis.

Prerequisite: (FW 104 or FW 260 or FW 555 or LIFE 320 or NR 300) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 555 Conservation Biology Credits: 3 (2-0-1)

Course Description: Ecological factors in conservation of biological diversity.

Prerequisite: (LAND 220 or LIFE 220 or LIFE 320) and (STAT 307).

Registration Information: Must register for lecture and recitation. Offered face-to-face in the spring and online in the fall. Credit allowed for only one of the following: FW 455, FW 555, or NR 300.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 556 Wildlife Conservation Ethics Credits: 3 (3-0-0)

Course Description: Philosophy, art, history, and science of wildlife and land management from writings of Aldo Leopold and others.

Prerequisite: None.

Restriction: Must be a Graduate.

Registration Information: Graduate standing. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 557 Wildlife Habitat Management on Private Land Credits: 3 (0-0-3)

Course Description: Management of cover, food, and water for wildlife and fish in the Great Plains. Emphasis on practices compatible with other uses of private land.

Prerequisite: None.

Registration Information: Bachelor's degree, or any level ecology or wildlife management course, or written consent of instructor. Offered online only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 558 Conservation Genetics of Wild Populations Credits: 3 (2-0-1)

Course Description: Examine the background, concepts, and tools required to determine how genetic data can be used to evaluate wild vertebrate species and communities of conservation concern.

Prerequisite: (BZ 350 or LIFE 201A or LIFE 201B) and (LIFE 220 or LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Written consent of instructor. Must register for lecture and recitation. Offered as an online course only. Admission to a graduate program in Fish, Wildlife, and Conservation Biology.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 561A Advanced Topics: Fishery Biology Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 561B Advanced Topics: Wildlife Biology Credits: Var[1-3] (0-0-0)

Course Description:

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 561C Advanced Topics: Population Analysis Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 561E Advanced Topics: Vertebrate Management Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 562 Fish and Wildlife Population Dynamics Credits: 3 (2-0-1)

Course Description: Factors that influence population abundance and density, and how they change over time. It blends ecology, evolution, genetics, and mathematical modeling into a unified field. Concentrate on understanding single-species population growth models, including metapopulation concepts, as well as multi-species topics such as predation and competition.

Prerequisite: (MATH 155 or MATH 160) and (LIFE 220 or LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Must register for lecture and recitation. Written consent of instructor. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 563 Analyses for Managing Wild Populations Credits: 3 (2-0-1)

Course Description: Design of wildlife population studies and the analysis of mark-recapture and occupancy data. Discussion of scientific philosophy, statistical theory, sampling design, and the application of the latest quantitative approaches to the analysis of population data.

Prerequisite: FW 260 and STAT 301.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and recitation. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 564 Science of Managing Human-Wildlife Conflicts Credits: 3 (2-0-1)

Course Description: Human-wildlife conflicts, and in particular, damage caused by wildlife, often termed wildlife damage. Topics such as animal behaviors, population dynamics, public attitudes, economics, and effective strategies in understanding the various types of conflicts and how to manage them.

Prerequisite: FW 104 or LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Must register for lecture and recitation. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 567 Wildlife Disease Ecology Credits: 3 (2-0-1)

Course Description: Ecological, epidemiological, and evolutionary principles of disease in fish and wildlife populations; contemporary issues in disease ecology.

Prerequisite: (LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Sections may be offered: Online.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 568 Sustaining River Ecosystems in Changing World Credits: 3 (3-0-0)**Also Offered As:** BZ 568.**Course Description:** Applying the concepts and principles of freshwater ecosystem structure and function to develop a multidisciplinary and integrated understanding of the approaches and methods for restoring and sustainably managing these systems in the face of increasing human demands and rapid climate change.**Prerequisite:** None.**Registration Information:** Senior standing. Credit allowed for only one of the following: BZ 568, BZ 680A2, FW 568, and FW 680A2.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**FW 572 Wildlife Conservation Communications Credits: 3 (2-0-1)****Course Description:** Examines the identification and engagement of groups involved in wildlife conservation action and applies knowledge from social science fields to shape communications related to biodiversity conservation to effectively inform and converse.**Prerequisite:** None.**Restriction:** Must be a: Graduate.**Registration Information:** Graduate standing. Major in Fish, Wildlife, and Conservation Biology

Professor Will Clements
Chair of the Undergraduate Major

The Fish, Wildlife, and Conservation Biology major is intended for students interested in understanding wildlife and the habitats in which they live. We offer three concentrations: Conservation Biology, Fisheries and Aquatic Sciences, and Wildlife Biology. The curriculum has a strong foundation in the biological, physical, and social sciences with the focus on solving current and future issues related to conservation and sustainability of wild animals and their habitats. The faculty offers a wide range of expertise with a keen interest in innovative teaching and research methods.

Our program prepares students for professional careers involving fish, wildlife, and conservation that include federal and state agencies, nongovernmental organizations, the private sector, academic institutions, and graduate school. Numerous opportunities exist for students to gain experience through research and internships, including professional and career mentoring and involvement with professional societies to further their studies, practical experience, and career potential. Required natural science courses include general biology, vertebrate biology, botany, calculus, and statistics, while required courses in the major focus on wildlife ecology and conservation, principles of wildlife management, design of wildlife projects, conservation biology, fishery science, and wildlife data collection and analysis.

Required courses in the concentrations, as well as elective courses, explore specific areas of fish, wildlife, and conservation biology. A summer field course at CSU's mountain campus is required and provides students with hands-on learning about natural resource ecology and measurements. Additional hands-on opportunities exist in courses and study abroad programs. Along with a strong science foundation, problem solving, communication skills and outreach, are important to resolve difficult issues faced by today's natural resource professionals.

Learning Outcomes

Students will:

- Demonstrate a mastery of ecological concepts and fundamental principles and techniques to manage and conserve fish and wildlife populations, and how they apply to current natural resource management issues

- Demonstrate mathematical, statistical, and study design knowledge and skills required for careers in fishery, wildlife, and conservation biology
- Become effective in oral and written communication about issues related to the environment and natural resources, including as members of multi-disciplinary teams
- Learn approaches to solving complex natural resource management issues, including planning, organizing, creating, and presenting group projects

Potential Occupations

Federal and state agencies that manage natural resources offer most employment opportunities in fish, wildlife, and conservation biology. Key federal agencies include the U.S. Forest Service, Fish and Wildlife Service, Bureau of Land Management, Geological Survey, National Park Service, Environmental Protection Agency, Bureau of Reclamation, National Marine Fisheries Service, and state departments of wildlife and natural resources. Non-governmental organizations, e.g., The Nature Conservancy, private companies, and environmental consultants also offer excellent opportunities. Participation in internships, independent study/research, volunteer activities, or cooperative education opportunities is highly recommended to enhance practical training and development. Undergraduates who go on for graduate-level studies can attain more advanced positions with the possibility of rising to top professional levels, e.g., researchers and teachers in academic institutions and scientists at natural resource agencies. Our degree is also excellent preparation for veterinary school.

Examples of career opportunities include, but are not limited to: fishery/wildlife/conservation biologist, ecologist, wildlife refuge or natural resource manager, environmental consultant, research scientist, and educator. Within these areas, a variety of specializations are possible including fish, wildlife, and conservation education and interpretation; endangered species; habitat enhancement and restoration; administration; research; law enforcement, fish and wildlife population assessment, statistical analyst, and human-wildlife conflicts.

Concentrations

- Conservation Biology Concentration
- Fisheries and Aquatic Sciences Concentration
- Wildlife Biology Concentration

Major in Fish, Wildlife, and Conservation Biology, Conservation Biology Concentration

The Conservation Biology concentration focuses on understanding the ecological processes necessary to conserve biological diversity, with an emphasis on fish and wildlife species and their habitats. This is a newer concentration developed for students who desire broader coverage across both the fish and wildlife disciplines as well as a focus on the systems that support them (soils, water, forests, fire, geology). There is also a more focused exploration of the human, historical, and political aspects that have shaped conservation efforts and what can be done to ensure sustainable practices and management of natural resources.

Requirements Effective Spring 2023

natural resource courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting these requirements.

A minimum grade of C (2.000) is required in all biological, mathematical/statistical, physical science, fish, wildlife, and conservation biology and

¹ Students taking this biology selection should choose a botany-related course in the department elective options to meet the botany/plant course requirements for certain federal positions related to wildlife, fisheries, and/or conservation biology.

² Students may need to obtain a registration override from the appropriate department to take this course.

³ Students in the Honors Track 1 program must take HONR 499.

⁴ FW 300 and FW 301 count together as one selection in this choice.

⁵ Restricted to FW subject code, department travel abroad courses, taught by FWCB faculty. No transfer or substitute courses will be accepted.

⁶ Guided electives are courses intended to expand a student's depth and breadth in wildlife biology and include any 300- or 400-level regular course with a BC, BMS, BSPM, BZ, CHEM, ESS, F, FW, GES, MATH, MIP, NR, NRRT, PH, RS, SOCR, STAT, or WR subject code (excluding courses ending in -80 to -99); SOCR 240; other courses with prior approval by department and advisor. Courses may not double-count as Guided Electives and for other requirements in the major.

⁷ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Distinctive Requirements for Degree Program:

The curriculum for the Fish, Wildlife and Conservation Biology major – Conservation Biology concentration assumes students enter college prepared to take calculus. Students who have not met the prerequisites for calculus, will be required to successfully complete the prerequisites in their first year. A minimum grade of C (2.000) is required in all biological, mathematical / statistical, physical science, fish, wildlife, and conservation biology, and natural resources courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting degree requirements. NR 220 is a summer course in which students reside at CSU's Mountain Campus. Students must choose ONE of two CHEM + PH paths: (Path A) CHEM 107/CHEM 108 and PH 121/PH 122 or (Path B) CHEM 111, CHEM 112, CHEM 113, CHEM 114 and PH 110/PH 111. Students must also choose ONE biology group A) BZ 110/BZ 111 or B) LIFE 102/LIFE 103.

Major in Fish, Wildlife, and Conservation Biology, Fisheries and Aquatic Sciences Concentration

The Fisheries and Aquatic Sciences concentration allows students to develop a strong background in basic fishery ecology, management, and conservation, which includes an understanding of the linkages between land and water.

Students choosing the Fisheries and Aquatic Sciences concentration are also required to complete at least 80 hours of paid or non-paid employment related to fishery and aquatic biology.

Requirements Effective Spring 2023

A minimum grade of C (2.000) is required in all biological, mathematical/statistical, physical science, fish, wildlife, and conservation biology, and natural resource courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting these requirements. Students choosing the Fisheries and Aquatic Sciences concentration are also required to complete at least 80 clock hours in an internship experience related to fishery and aquatic biology.

¹ Students taking this biology selection should choose a botany-related course in the department elective options to meet botany/plant course requirements for certain federal positions related to wildlife, fisheries, and/or conservation biology.

² Students will need to obtain a registration override from the appropriate department to take this course.

³ Students in the Honors Track 1 program must take HONR 499.

⁴ Take 1 credit of FW 487 during the semester in which you are completing the 80 h work experience requirement.

⁵ Students selecting GR 204/WR 204 only need select three credits. Students selecting one of the geosciences lecture courses (GEOL 120, GEOL 122, GEOL 124) also need to take GEOL 121.

Major in Fish, Wildlife, and Conservation Biology, Wildlife Biology Concentration

The Wildlife Biology concentration focuses primarily on terrestrial species and how they interact with their habitats while building a strong foundation in basic wildlife ecology, management, and conservation.

Requirements Effective Spring 2023

A minimum grade of C (2.000) is required in all biological, mathematical/statistical, physical science, fish, wildlife and conservation biology, and natural resource courses used to meet graduation requirements for the Fish, Wildlife, and Conservation Biology major. The minimum applies to courses taken as substitutions for meeting these requirements.

¹ Students taking this biology selection should choose a botany-related course in the department elective options to meet botany/plant course requirements for certain federal positions related to wildlife, fisheries, and/or conservation biology.

² Students in the Honors Track 1 program must take HONR 499.

³ FW 300 and FW 301 count together as one selection in this choice.

⁴ Students will need to obtain a registration override from the appropriate department to take this course.

⁵ Restricted to FW subject code, department travel abroad courses, taught by FWCB faculty. No transfer or substitute courses will be accepted.

⁶ Guided Electives are courses intended to expand a student's depth and breadth in wildlife biology and include any 300- or 400-level regular course with a BC, BMS, BSPM, BZ, CHEM, ESS, F, FW, GES, MATH, MIP,

NR, NRRT, PH, RS, SOCR, STAT, or WR subject code (excluding courses ending in -80 to -99); SOCR 240; other courses with prior approval by department and advisor. Courses may not double-count as Guided Electives and for other requirements in the major.

⁷ Select enough elective credits to bring program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program: The curriculum for the Fish, Wildlife and Conservation Biology major – Wildlife Biology concentration assumes students enter college prepared to take calculus. Students who have not met the prerequisites for calculus, will be required to successfully complete the prerequisites in their first year. A minimum

grade of C (2.000) is required in all biological, mathematical/ statistical, physical science, fish, wildlife, and conservation biology, and natural resource courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting degree requirements. NR 220 is a summer course in which students reside at CSU's Mountain

Campus. Students must choose ONE of two CHEM + PH paths: (Path A) CHEM 107/CHEM 108 and PH 121/PH 122 or (Path B) CHEM 111, CHEM 112, CHEM 113, CHEM 114 and PH 110/PH 111. Students must also choose ONE biology group A) BZ 110/BZ 111/BZ 120 or B) LIFE 102/LIFE 103.

Minor in Fishery Biology

Students majoring in Watershed Science, Forestry, Rangeland Ecology, Zoology, and others may find that a minor in Fishery Biology will increase employment opportunities. The requirements for this minor provide a solid base for work in fishery and aquatic science.

Requirements

Effective Spring 2011

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Graduate Certificate in Wildlife Conservation Actions

This online graduate certificate prepares you to take wildlife conservation actions in the real world that integrates the needs of nature and people in a sustainable and equitable way. While completing this certificate, you can dive into the history of the land ethic while refining your own, you can build the skills of a sustainability change agent, you can construct a habitat management plan, you can communicate to different audiences about conservation, and you can study the history and/or the current state of wildlife policy.

Learning Outcomes

Upon successful completion, students will be able to:

1. Refine their own land ethic after studying the writings and ideas of leaders in wildlife conservation;
2. Improve community stewardship of natural resources using the skills of a sustainability change agent;
3. Construct a habitat management plan that is grounded in conservation science and responsible human land use;
4. Create effective, visually appealing conservation messages designed for specific audiences;
5. Evaluate how science, advocacy, and public engagement inform wildlife conservation policy; and
6. Analyze current fish and wildlife conservation policy and the scientific, political, and socio-economic forces influencing it.

Requirements Effective Fall 2023

Additional coursework may be required due to prerequisites.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Fish, Wildlife, and Conservation Biology, Plan C (M.F.W.C.B.)

The Master of Fish, Wildlife, and Conservation Biology, Plan C degree provides the training and credentials natural resource professionals need to effectively guide studies, decisions, and policies related to fish and wildlife management. The degree is geared towards natural resource professionals with at least 2 years of experience and is an intensive, coursework-only master's degree primarily taught through online courses. Courses focus on the skills and tools needed to analyze, communicate, and make decisions about conservation issues. Students broaden their critical thinking on current issues and receive the training to be successful and advance in careers at natural resources agencies, firms, and non-government organizations.

Courses

Subjects in this department include: Fire and Emergency Service Administration (FESA), Forest and Rangeland Stewardship (F), select Natural Resources (NR), and Rangeland Ecosystem Science (RS).

Fire and Emergency Service Administration (FESA)

FESA 310 Fire Service Leadership Credits: 3 (0-0-3)

Course Description: Theory, practice, and application of ethical leadership in public safety; developing personal ethics and leadership skills and abilities.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 330 Industrial Processes and Fire Protection Credits: 3 (0-0-3)

Course Description: Industrial processes and fire protection managed by fire and safety personnel.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Summer (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 331 Structure Influence on Tactics and Strategy Credits: 3 (3-0-0)

Course Description: How construction type, alterations, design and materials influence a building's reaction to fire. Fireground influence on tactics and strategy.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 333 Proposals/Reports in Fire Service Management Credits: 3 (0-0-3)

Course Description: Process of preparing reports and developing a proposal supported by research. Introduction to research techniques, Internet and library use; conventions of documentation.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 334 Orientation to Experiential Learning Credit: 1 (0-0-1)

Course Description: Demonstration of knowledge, skill, and professional experience for the purpose of enhancing documentation and career development skills.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 335 Trends in Fire Science Technologies Credits: 3 (0-0-3)

Course Description: Analytical tools designed to evaluate, align, select, and implement emerging fire science technologies.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 336 Fire Emergency Services Administration Credits: 3 (0-0-3)

Course Description: Fire and emergency service administrative structures and processes. Examination of management and leadership models and applications.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 337 Policy and Public Administration Credits: 3 (3-0-0)

Course Description: Political and legal foundations of fire and emergency services. Public administration concepts, decision making and policy development.

Prerequisite: FESA 334.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 338 Essentials of Emergency Management Credits: 3 (3-0-0)

Course Description: Emergency management theory; mitigation, planning, response, and recovery in large-scale incidents. Development/operation of emergency operation centers.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 339 Incident Command Systems Credits: 3 (0-0-3)

Course Description: Theory and application of incident command systems (ICS) to the command and coordination of major emergency operations.

Prerequisite: FESA 334.

Registration Information: Offered as an online course only.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 341 Fire Officer I-A Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory level of performance, as confirmed by NFPA Standard 1021, Level I, 4.1 to 4.4.

Prerequisite: None.

Registration Information: Enrollment in FESA program or written consent of instructor. Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 342 Fire Officer I-B Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory level of performance, as confirmed by NFPA Standard 1021, Level II, 4.5 to 4.7.

Prerequisite: FESA 341 with a minimum grade of C.

Registration Information: Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 431 Emergency Medical Services Management Credits: 3 (0-0-3)

Course Description: Emergency medical service models, design implementation, evaluation. Interactions with health care systems, public policy and public health systems.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 432 Fire and Emergency Services Budgeting Credits: 3 (3-0-0)

Course Description: Application of emergency service budgeting systems with emphasis on revenues, public financial controls, capital funding and performance measures.

Prerequisite: FESA 333 and FESA 336.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 433 Fire and Emergency: Human Resources Credits: 3 (3-0-0)

Course Description: Theory, practice, and models of human resources applied to emergency organizations; workforce development, HR functions, and labor relation.

Prerequisite: FESA 333 and FESA 336.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 434 Training Program Management Credits: 3 (0-0-3)

Course Description: Development of agency training and education programs. Utilization of training and education practices, resources, facilities and technologies.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 435 Volunteer/Combination Organization Management Credits: 3 (0-0-3)

Course Description: Development and management of fire and emergency service organizations with volunteer and combination resources.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 436 Fire Protection Through Model Building Codes Credits: 3 (0-0-3)

Course Description: Overview of the most current fire codes that are used across the United States. Discussion of fire inspection methodology and enforcement practices.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 437 Fire and Emergency: Legal Considerations Credits: 3 (0-0-3)

Course Description: Fire Service in relation to the complex legal system of the United States, individual states and local jurisdictions.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 438 Prevention Program Management Credits: 3 (3-0-0)

Course Description: Design, implementation, and evaluation of fire and risk prevention programs using education, engineering, and enforcement approaches.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 441 Fire Officer II-A Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory/managerial level of performance, as confirmed by NFPA Standard 1021, Level II, 5.1 to 5.4.

Prerequisite: FESA 342 with a minimum grade of C.

Registration Information: Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 442 Fire Officer II-B Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory/managerial level of performance, as confirmed by NFPA Standard 1021, Level II, 5.5 to 5.7.

Prerequisite: FESA 441 with a minimum grade of C.

Registration Information: Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 467 Integrated Management Simulation Credits: 3 (0-0-3)

Course Description: Integration management and administrative knowledge and skills in the development of a fire and emergency service management simulation.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 492 Seminar Credits: Var[1-3] (0-0-0)

Course Description: Discussion and documentation of professional experience in fire and emergency services.

Prerequisite: None.

Registration Information: Written consent of instructor. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FESA 495 Independent Study Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Admission to the FESA B.S. program; written consent of instructor. Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

Forest and Rangeland Stewardship (F)

F 101 Intro to Forest and Rangeland Stewardship Credit: 1 (1-0-0)

Course Description: Introduce both first year and transfer students to the faculty, and expertise within the department of Forest and Rangeland Stewardship. Gain an appreciation for the majors selected.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 209 Introduction to Forest and Rangeland Ecology Credits: 3 (3-0-0)

Course Description: Ecological concepts pertaining to natural resources and the management of forests and rangelands. Analysis of species, population, and community interactions within an applied framework.

Prerequisite: (BZ 100 to 199 - at least 3 credits or LIFE 100 to 199 - at least 3 credits) and (MATH 118 or MATH 120 or MATH 124 or MATH 125 or MATH 126 or MATH 127 or MATH 141 or MATH 155 or MATH 159 or MATH 160).

Registration Information: Credit allowed for only one of the following:

F 209, LAND 220, LIFE 220 or LIFE 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 224 Wildland Fire Measurements Credit: 1 (0-2-0)

Course Description: Wildland fire control and use measurements: fuels, weather, topography, fire behavior, and fire ecology.

Prerequisite: None.

Registration Information: Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 230 Forestry Field Measurements Credits: 2 (0-4-0)

Course Description: Develop field skills using maps, compasses, and aerial photos; photo interpretation; tree and stand measurements; stand volume and value estimates.

Prerequisite: None.

Term Offered: Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

F 310 Forest and Rangeland Ecogeography Credits: 3 (2-2-0)

Also Offered As: RS 310.

Course Description: Distribution of wildland plant communities and identification of important grasses, forbs, shrubs, and trees common in North America.

Prerequisite: BZ 101 or BZ 104 or BZ 110 or BZ 120 or LIFE 102.

Registration Information: Must have concurrent registration in F 312.

Must register for lecture and laboratory. Credit not allowed for both F 310 and RS 310.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 311 Forest Ecology Credits: 3 (3-0-0)

Course Description: Relationships of ecological concepts to the dynamics of forest ecosystems.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 312 Dendrology Credits: 2 (1-2-0)

Course Description: Identification, classification, nomenclature, morphology, phenology, ecology, geographic ranges, and natural history of trees. Explore the historical and current importance of trees to society. Focus on major forest tree species of North America, and includes several exotic species that commonly occur in urban areas.

Prerequisite: BZ 120.

Registration Information: Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 321 Forest and Natural Resource Biometry Credits: 3 (2-2-0)

Course Description: Measure and calculate the structure of different ecosystems. Sampling and statistical techniques to quantify ecosystem structure. Methods to model ecosystem structure to predict potential future conditions.

Prerequisite: (MATH 117 to 160 - at least 3 credits) and (NR 220) and (STAT 201 or STAT 301).

Registration Information: Must register for lecture and laboratory.

Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

F 322 Economics of the Forest Environment Credits: 3 (3-0-0)

Course Description: Economic principles and techniques applied to forested environments.

Prerequisite: AREC 202 or ECON 202 or ECON 240 or AREC 240.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 324 Fire Effects and Adaptations Credits: 3 (3-0-0)

Course Description: Introduction to fire ecology including fire history, ecosystem effects, and organism responses.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 325 Silviculture Credits: 3 (3-0-0)

Course Description: Principles of silviculture and the application to ecologically-based management and restoration of forests ecosystems.

Prerequisite: NR 220.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 326 Wildland Fire Behavior and Management Credits: 3 (3-0-0)

Course Description: Physical and managerial principles influencing fire, how fires shape our forests and approaches used to manage wildland fire.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 330 Timber Harvesting and the Environment Credit: 1 (1-0-0)

Course Description: Principles of timber harvesting and effects of logging on the environment.

Prerequisite: F 321.

Registration Information: Sophomore standing. Credit not allowed for both F 330 and F 380A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 331 Wood Products in Society Credits: 3 (2-2-0)

Course Description: Role of wood products in society; spectrum of wood products; some field trips.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 335 Applications of Silviculture Credit: 1 (0-3-0)

Course Description: Laboratory and some field experience in utilization of ecologically-based silvicultural practices for sustainable timber production, maintenance or restoration of biological diversity, and protection of aesthetic quality and site productivity.

Prerequisite: F 325, may be taken concurrently.

Registration Information: Enrollment in Forest and Rangeland Stewardship major. Required field trips.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 421 Ecological Forest Management Credits: 3 (3-0-0)

Course Description: Preparation of forest management plans to achieve integrated environmental and economic goals based upon principles of forest ecology; evaluation of alternative prescriptions; adaptive management and monitoring.

Prerequisite: F 311 and F 321 and F 325 and F 335.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

F 422 Quantitative Methods in Forest Management Credits: 3 (2-2-0)

Course Description: Design and analysis of optimization and nonoptimization models in forest managerial operations.

Prerequisite: F 321 and F 322.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 425 Advanced Wildland Fire Behavior and Management Credits: 3 (3-0-0)

Course Description: Advanced strategies, tools, and techniques for wildland fire management: prediction, prevention, suppression, and use for resource benefit.

Prerequisite: F 326 and NR 319.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 430 Forestry Field Practices Credits: 3 (1-4-0)

Course Description: Forestry field course, S212 saw certification, collect stand inventory data, develop and implant stand prescription, and harvest and process trees.

Prerequisite: F 330 and F 421.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 466 Urban and Community Forestry Credits: 3 (3-0-0)

Also Offered As: HORT 466.

Course Description: Policies and management of publicly and privately owned community forests in urbanized areas.

Prerequisite: F 310 or RS 310 or HORT 221.

Registration Information: Credit not allowed for both F 466 and HORT 466.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 487 Professional Forestry Internship Credits: Var[3-12] (0-0-0)

Course Description: Professional-level field experience with forestry organization.

Prerequisite: None.

Registration Information: Written consent of department chair.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 495 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 510 Ecophysiology of Trees Credits: 3 (2-3-0)

Course Description: Environmental factors affecting physiology of woody plants; emphasis on water relations in trees and importance of water in physiological processes.

Prerequisite: BZ 440.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 520 Advanced Quantitative Methods in Forestry I Credits: 3 (3-0-0)

Course Description: Design and analysis of optimization models in forest management operations: linear, goal, and dynamic programming.

Prerequisite: F 322 and MATH 160.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 521 Advanced Quantitative Methods in Forestry II Credits: 3 (2-2-0)

Course Description: Analysis of forest inventory information; dynamic and stochastic models oriented to decision making and research in forestry.

Prerequisite: F 520.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 522 Advanced Forest Economics Credits: 3 (3-0-0)

Course Description: Analysis of forestry issues: financial maturity, management intensity, federal policy, taxation, natural environments, and silviculture.

Prerequisite: ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 524 Forest Fire Meteorology and Behavior Credits: 3 (2-2-0)

Course Description: Effects of atmospheric processes on wild and prescribed fires; interrelationships of weather, fuels, and topography on forest and range fires.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 525 Silvicultural Practices Credits: 4 (3-0-1)

Course Description: Comprehensive coverage of silvicultural practices as applied in US forestry.

Prerequisite: F 311.

Registration Information: Must register for lecture and recitation. Credit not allowed for both F 525 and F 526.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 526 Multiple Resources Silviculture Credits: 3 (3-0-0)

Course Description: Concepts and techniques of silviculture and their application to forest ecology to meet a wide range of desired conditions and resource objectives. Develops knowledge of ecological applications directed at the management of forests with multiple considerations, including wildlife, recreation, forest health, and timber production.

Prerequisite: F 311 or LIFE 320 or NR 565 or NR 578.

Registration Information: Offered as an online course only. Credit allowed for only one of the following: F 525, F 526, or F 581A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 540 Fuels, Vegetation, and Fire Management Credits: 3 (2-3-0)

Course Description: Develop, test and display the impact of alternative fuels and vegetation treatments on vegetation development, fuels and fire behavior.

Prerequisite: None.

Registration Information: Admission to the Continuing Education in Fuels Management program through the Office of Conference Services.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

F 571 Applied Forest Ecology Credits: 2 (2-0-0)

Course Description: Concepts and theory of stand dynamics in relation to advanced ecological concepts within the Rocky Mountain Region and Intermountain West and applications of these concepts to natural disturbance-based management.

Prerequisite: F 311.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 572 Advanced Silviculture Practices Credits: 3 (3-0-0)

Course Description: Application of forest ecology principles and silvicultural techniques to meet a wide range of desired conditions and resource objectives.

Prerequisite: F 571.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 574 Climate Adaptive Forest Management Credit: 1 (1-0-0)

Course Description: Application of climate science and adaptive silviculture strategies to real-world forest management scenarios.

Prerequisite: F 325.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. This is a partial semester course. Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 575 Monitoring for Advanced Silviculture Credits: 2 (2-0-0)

Course Description: Best practices and principles for evaluating forest management effectiveness at various scales across the landscape.

Prerequisite: F 421.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 576 Advanced Silviculture Capstone Credits: 3 (3-0-0)

Course Description: Application of ecological principles, climate change science, and regional silvicultural principles to the management of a local forest stand.

Prerequisite: F 572 and F 575.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 592 Advanced Silviculture Seminar Credit: 1 (0-0-1)

Course Description: Forestry professionals and faculty present different aspects of advanced silviculture skills to prepare students for the rigor of online, graduate-level courses and to create a plan and portfolio for their final project at the culmination of the certificate.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. This is a partial semester course. Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

F 593 Seminar-Fire Science Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 610 Advanced Forest Ecology Credits: 3 (1-0-2)

Course Description: Patterns of tree mortality and their consequences for ecological communities, disturbance regimes, and ecosystem processes. The literature included is diverse ranging from ecophysiology to dendroecology to climate science, and the goal is to integrate this diverse literature to understand the ecological consequences of climate variability on forest ecosystems of the southern Rocky Mountains and globally.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: At least one undergraduate or graduate course in ecology. Must register for lecture and recitation. Required field trips. Credit not allowed for both F 610 and F 680A1.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 624 Fire Ecology Credits: 3 (3-0-0)

Course Description: Fire in forest and range ecosystems; principles and techniques for evaluating fire effects on vegetation, soils, watersheds, and wildlife.

Prerequisite: ECOL 505 or F 310 or F 311 or LIFE 320 or NR 565 or NR 578 or RS 300 or RS 310 or RS 452.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 625 Ecology of Forest Production Credits: 3 (3-0-0)

Also Offered As: ESS 625.

Course Description: Develops student expertise in understanding carbon and nutrient flows in forests.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must have completed one 300-level course in ECOL. Credit not allowed for both F 625 and ESS 625. Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 693 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 721 Forest Policy Credits: 3 (3-0-0)

Course Description: Policies and institutions affecting management of forest lands in U.S.

Prerequisite: NR 567.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Natural Resources (NR)

NR 565 Principles of Natural Resources Ecology Credits: 3 (3-0-0)

Course Description: Overview of ecological fundamentals examined from the perspective of forest, rangeland, wildlife and fisheries science and management.

Prerequisite: None.

Registration Information: Admission to the Master of Natural Resources Stewardship or written consent of instructor. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NR 566 Natural Resource Inventory and Data Analysis Credits: 3 (3-0-0)

Course Description: Sampling designs, implementation and analysis for inventory and monitoring of forests, rangelands, wetlands and streams.

Prerequisite: STAT 301 or STAT 311 or STAT 312.

Registration Information: Admission to the Master of Natural Resources Stewardship or written consent of instructor. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NR 568 Economics of Forests, Restoration and Fire Credits: 3 (3-0-0)

Course Description: Overview of basic microeconomics principles as applied to forestry, restoration, and wildland fire management.

Prerequisite: None.

Registration Information: Admission to the Master of Natural Resources Stewardship or written consent of instructor. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NR 578 Ecology of Disturbed Lands Credits: 3 (3-0-0)

Course Description: Analysis of basic and applied ecological principles involved in the restoration of drastically disturbed lands.

Prerequisite: (LAND 220 or LIFE 220 or LIFE 320 or NR 565) and (SOCR 240).

Registration Information: Sections may be offered: Online. Credit not allowed for both NR 578 and RS 578.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Rangeland Ecosystem Science (RS)

RS 300 Rangeland Conservation and Stewardship Credits: 3 (3-0-0)

Course Description: Conservation and management of rangeland-ecosystem values using sustainable practices.

Prerequisite: BZ 120 or LIFE 102.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 310 Rangeland and Forest Ecogeography Credits: 3 (2-2-0)

Also Offered As: F 310.

Course Description: Distribution of wildland plant communities and identification of important grasses, forbs, shrubs, and trees common to North America.

Prerequisite: BZ 101 or BZ 104 or BZ 110 or BZ 120 or LIFE 102.

Registration Information: Must have concurrent registration in RS 312. Must register for lecture and laboratory. Credit not allowed for both RS 310 and F 310.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 312 Rangeland Plant Identification Lab Credit: 1 (0-2-0)

Course Description: Identification of characteristic grasses, forbs, and shrubs common to North American rangelands.

Prerequisite: None.

Registration Information: Must have concurrent registration in RS 310.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 329 Rangeland Assessment Credit: 1 (0-3-0)

Course Description: Five-day intensive field-based course on principles of rangeland ecosystem assessment.

Prerequisite: (F 310 or RS 310) and (RS 300 and SOCR 240).

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 331 Wildland Plants and Plant Communities Credits: 3 (2-2-0)

Course Description: Distribution of non-forested wildland plant communities and important plant species in the western United States.

Prerequisite: BZ 223 or NR 220.

Registration Information: Must register for lecture and laboratory. Required field trips. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 351 Wildland Ecosystems in a Changing World Credits: 3 (2-2-0)

Course Description: Understanding and conserving non-forested wildland ecosystems, processes, and services under changing environmental conditions.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (SOCR 240).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 378 Disturbance Ecology Credits: 2 (2-0-0)

Course Description: Foundational knowledge of ecological disturbances, the role of disturbance in biotic communities and ecosystems, and how various communities and ecosystems recover from disturbances.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 400 Rangeland Improvements Credits: 2 (2-0-0)

Course Description: Improvement of rangelands through biological and cultural methods; management of improved rangelands.

Prerequisite: RS 300 or SOCR 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 420 Grass Taxonomy Credits: 3 (1-4-0)

Course Description: Anatomy, morphology, and identification of grasses.

Prerequisite: BZ 223.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 432 Rangeland Measurements and Monitoring Credits: 2 (1-3-0)

Course Description: Vegetation sampling and field measurements emphasizing applications for monitoring and adaptive management.

Prerequisite: (NR 220 and RS 300, may be taken concurrently) and (STAT 201 or STAT 301 or STAT 307).

Registration Information: Credit not allowed for both RS 432 and RS 532.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 452 Rangeland Herbivore Ecology and Management Credits: 3 (3-0-0)

Course Description: Ecology and management of large ungulate herbivores including consumer functions at organismal and ecosystem levels.

Prerequisite: (F 209 or LAND 220 or LIFE 220 or LIFE 320) and (RS 300).

Registration Information: Voluntary field trips. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 470 Rangeland Economics and Analysis Credits: 2 (2-0-0)

Course Description: Economics of rangeland resource use; analytical techniques for allocation of rangeland resources.

Prerequisite: (AREC 202 or ECON 202) and (RS 300).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 471 Rangeland Planning and Grazing Management Credits: 2 (2-0-0)

Course Description: Definition of grazing management, grazing systems. Synthesis of animal, plant responses to grazing management. Structure, function of rangeland planning.

Prerequisite: RS 300 or SOCR 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 472 Rangeland Ecosystem Planning Credits: 4 (1-6-0)

Course Description: Range allotment, ranch, and restoration planning.

Prerequisite: RS 471.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 478 Ecological Restoration Credits: 3 (3-0-0)

Course Description: Analysis of environmental factors influencing restoration of disturbed lands and practices for successful restoration of disturbed ecosystems.

Prerequisite: (BZ 450 or F 209 or LAND 220 or LIFE 220 or LIFE 320) and (SOCR 240).

Registration Information: Credit not allowed for both RS 478 and NR 678.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 495 Independent Study-Rangeland Ecosystems Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

RS 496 Group Study-Rangeland Ecosystem Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

RS 500 Advanced Rangeland Management Credits: 3 (3-0-0)

Course Description: Rangeland management concepts.

Prerequisite: LAND 220 or LIFE 320 or NR 220 or LIFE 220.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

RS 531 World Grassland Ecogeography Credits: 3 (2-3-0)

Course Description: Distribution, climate, and structure of the world's major grasslands with emphasis on North America.

Prerequisite: BZ 223.

Registration Information: Must register for lecture and laboratory. Required field trips. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 532 Rangeland Ecosystem Sampling Credits: 3 (1-3-1)

Course Description: Measurement, analysis techniques for rangeland vegetation. Applications to management emphasized.

Prerequisite: (STAT 301) and (LAND 220 or LIFE 320 or NR 220 or LIFE 220).

Registration Information: Must register for lecture, lab, and recitation. Required field trips. Credit not allowed for both RS 532 and RS 432.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 552 Range Animal Production and Management Credits: 4 (3-0-1)

Course Description: Biological and ecological basis for production of meat from rangelands.

Prerequisite: LAND 220 or LIFE 320 or NR 220 or LIFE 220.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Major in Fire and Emergency Services Administration

The fire and emergency services have a long and proud history of serving their communities with a wide variety of fire protection, prevention, emergency medical, and public education services. The fire and emergency services administrators of the future need advanced administration, management, and leadership skills to address the ever-evolving nature of emergency services. The major prepares students for managerial and officer positions in emergency and fire service organizations.

The major is a degree completion program for students to gain advanced knowledge of emergency service related subjects. The coursework builds upon technical skills and experiences earned in First Responder associate degree programs and on-the-job training. Students will explore key administrative and management areas such as emergency operations, public service budgeting, human resources, prevention, and incident command. The major is focused on the administration and management of First Responder organizations.

All fire and emergency services administration courses are upper-division and offered online via distance education only through the CSU Online (<http://www.online.colostate.edu/>).

Learning Outcomes

Students will demonstrate their ability to:

- Effectively integrate academic knowledge into fire and emergency services administrative and managerial roles within current and future employment situations.
- Collaborate with peers to solve fire and emergency services organizational problems. Effective collaboration includes the ability to organize and synthesize ideas, develop a persuasive argument, interact with individuals and groups, and use applicable presentation aids.
- Apply their knowledge, skills, and competencies in the fire and emergency services field to fire and emergency services organizations. Examples include knowledge of proposal and report writing, trends in emergency management and incident command systems, and comprehension of public service administration practices.
- Interact with professional First Responders nationally and internationally.

Potential Occupations

Students in the Fire and Emergency Services Administration major should have work experience in the fire and emergency services field. Typical students are employed as career or volunteer firefighters, wildland firefighters, paramedics, emergency medical technicians, inspectors, or

trainers. Graduates can expect positions as fire chiefs, company officers, public administrators, fire marshals, or educators.

Requirements Effective Spring 2015

Major in Forest and Rangeland Stewardship

Forests and rangelands are always changing, sometimes very slowly as a result of long-term processes, followed by rapid changes as a result of fires, timber harvesting, or grazing. Rangelands occupy nearly fifty percent of the earth's land surface and consist of natural grasslands, savannas, shrublands, riparian areas, deserts, tundra, and coastal

marshes. Sustaining forests and rangelands in the modern world requires managers who understand ecosystem changes, and how forests and rangelands connect to global, ecological, and social systems. State and federal land management agencies, private landowners, consultants, and conservation organizations employ graduates of the Forest and Rangeland Stewardship (FRS) major. The curriculum includes a balanced mix of courses in plant and animal biology, integrated resource management, and the physical sciences. Colorado is an ideal setting for the study of forestry and rangeland ecology and management with shortgrass steppe to the east and high elevation grasslands, forests, woodlands, and riparian areas to the west. Students learn about ecosystem productivity, policy, conservation, and the latest in computer-based management tools. Students also gain an understanding of economics related to recognizing alternatives and analytical and decision-making skills, as well as developing communication, political and interpersonal skills to make their education effective, and contribute to their respective fields fully upon graduation.

The forestry-specific concentrations within the FRS major are accredited by the Society of American Foresters, with curricula meeting the Office of Personnel Management (OPM) requirements for the forestry series (0460) and the forestry technician series (0462). The range-specific concentrations in the FRS major are accredited by the Society for Range Management and students generally meet the OPM requirements for the Rangeland Management Series (0454) and Soil Conservation Series (0457).

Students in the FRS major will gain an understanding of and learn how to manage the animal, soil, and vegetation resources on rangelands or in forests for state and federal land management agencies as well as a variety of private landowners and non-governmental agencies. With a few additional courses, graduates meet OPM requirements for the Ecology Series (0408). Students develop an in-depth understanding of basic plant and animal biology; a basic understanding of the physical sciences as they relate to rangeland ecology; and knowledge of important concepts of ecology and range management.

The FRS major includes summer field courses. All FRS students take a 4-week summer field course at the CSU Mountain Campus for field studies in forest and rangeland ecology and management, wildlife, watershed and human dimensions of natural resources. Students in the forestry concentrations take another 2-week summer field course at the Mountain Campus that focuses on forestry field measurements. Students in the rangeland concentrations take a 1-week summer field course focused on rangeland inventory and assessment that is normally held in shortgrass steppe or foothills rangelands close to Fort Collins.

Careers in forestry and natural resources are exceptionally varied, challenging, and personally satisfying. Opportunities are available in

rural and urban settings worldwide. Positions are available in industry, education, consulting, public service, and government agencies. Some examples of career opportunities include, but are not limited to: forest manager, forest/park ranger, environmental policy and conservation consultant, fire fighter/manager, natural resource journalist, naturalist, land use planner, geospatial information systems specialist, forest products business person, researcher/professor.

Examples of career opportunities in range management include, but are not limited to restoration ecologist, rangeland scientist, rangeland management specialist, soil conservationist, soil scientist, rangeland conservationist, plant ecologist, riparian ecologist, ranch manager, researcher, commercial sales and service representative, consultants, mine rehabilitation specialist, real estate/land manager, and international rangeland specialist.

Major in Forest and Rangeland Stewardship, Forest Fire Science Concentration

The Forest Fire Science concentration in the Forest and Rangeland Stewardship major provides forestry education that spans the entire range of experiences necessary to understand and manage forests. Curricula include a background in the biological, physical, social, and

management sciences, followed by professional forestry courses. More specifically, this concentration is the study of fire as an ecological process and its application as a forest management tool. Students learn how to control wildfires and how prescribed fires can enhance habitat, prepare seedbeds, control forest insects and disease, and reduce fuel hazards.

Major in Forest and Rangeland Stewardship, Rangeland and Forest Management Concentration

The Rangeland and Forest Management concentration in the Forest and Rangeland Stewardship major emphasizes interdisciplinary study,

research, and management of the world's rangelands. More specifically, this concentration prepares students in multiple-use principles to manage and administer both rangeland and forest resources for federal and state government agencies or private business.

Major in Forest and Rangeland Stewardship, Rangeland Conservation and Management Concentration

The Rangeland Conservation and Management concentration in the Forest and Rangeland Stewardship major emphasizes interdisciplinary

study, research, and management of the world's rangelands. More specifically, this concentration focuses on the stewardship of rangelands for multiple uses. These uses include both consumptive and non-consumptive activities such as recreation, preservation of wildlife habitat, providing for aesthetic beauty, livestock grazing, and ranching.

Major in Natural Resources Management

The goal of the Natural Resources Management major is to provide students with a broad-based understanding of the interconnectedness of social, political, and ecological systems. This knowledge will enable students to design sustainable solutions to address natural resource conservation and management problems. Students will learn about natural resource stewardship in both theory and practice, with an eye toward designing systems that are adaptable and resilient in light of the

social and ecological complexity and change that characterize today's challenges. Using an integrative approach, students will learn how to develop local solutions that are sustainable and ethical at larger, global scales. Environmental issues such as land-use change and planning, conservation biology, energy use, climate change, renewable resource management, and citizen engagement in place-based conservation will be addressed. Field measurements and field skills are important components of this major, and students are required to attend a four-week summer field course in ecological investigations and resource management.

Specific objectives are to provide each student with:

1. a science-based core curriculum in biological, physical, and social sciences;
2. a broad foundation in natural resources science and environmental management; and
3. specialization in a subject relevant to natural resources management.

The breadth of the major allows students to specialize in a wide range of topics, including conservation biology, geographic information systems, forest management, rangeland ecology, restoration ecology, natural resource policy, recreation resources, watershed management, wildlife management, or other topics related to natural resources management. This specialization is accomplished by coupling the major with a required minor, typically declared by a student's junior year.

Students are encouraged to participate in internships and obtain related work experience. Participating in seasonal and voluntary work, internships, and cooperative education opportunities will enhance your chances for permanent full-time employment. The department offers numerous opportunities to become engaged in these kinds of endeavors. At the completion of the program, students should have the technical and communication skills that are critical to resolving important natural resource management problems.

Learning Outcomes

Students will:

- Demonstrate knowledge of a wide range of natural resource topics spanning ecological, social and physical aspects of wildland ecosystems
- Demonstrate proficiency in an area of specialization through completion of a minor in an area complementary to natural resource management. Some minors that students find well-suited to develop a proficiency are Global Environmental Sustainability, Forestry,

Rangeland Ecology, Ecological Restoration, Watershed Science, Conservation Biology, or Environmental Affairs, though there are many additional options

- Be able to apply their broad natural resources knowledge to create sustainable solutions at local, national, and global scales
- Accurately communicate their knowledge of natural resources, both verbally and in written form

Potential Occupations

Opportunities are available with a wide array of local, national, and international organizations and institutions involved in natural resource management. Graduates apply their education in science, technology, social science, and policy to solving today's critical natural resource and environmental problems. Positions are found with federal, state, and local government agencies, industry, and education and advocacy organizations. Some natural resource professionals are employed in environmental consulting firms and corporate environmental departments. The nonprofit sector provides a variety of environmentally-related jobs, ranging from science application to policy development, education, and collaborative conservation.

Examples of available career choices include, but are not limited to: natural resource manager; professional forester; land use planner; geographic information system (GIS) or remote sensing specialist; fishery/wildlife manager; environmental policy analyst; environmental advocate; environmental consultant; resources/environmental lawyer (with continued education); youth agency administrator; natural resource communications specialist; law enforcement officer; natural resources/environmental educator; restoration specialist; multiple resource use planner; regulatory compliance enforcement officer.

At least 200 hours of acceptable professional work experience in the student's field prior to graduation is highly recommended. This can include summer/seasonal/school semester employment in natural resource management through paid summer jobs, an approved internship, volunteer positions, or work study experience. Acceptable work experience includes (but is not limited to) working for federal, state, non-governmental, private, and university organizations that research or manage natural resources, or are responsible for public policy or public relations related to natural resources.

¹ Students must complete the requirements for a minor in any discipline.

Major in Restoration Ecology

The Major in Restoration Ecology emphasizes interdisciplinary study, research, and restoration of damaged, degraded or destroyed rangelands and forested ecosystems of the world. More specifically, this major focuses on the restoration of rangelands and forests for multiple uses. These uses include both consumptive and non-consumptive activities such as recreation, preservation of wildlife habitat, providing for aesthetic beauty, livestock grazing, and timber production. Forests and rangelands occupy the vast majority of the earth's land surface and Colorado is an ideal setting for the study of restoration ecology with many different types of rangeland and forest ecosystems in close proximity.

Students in this program will gain the important knowledge and skills necessary to restore damaged ecosystems. They will learn how to manipulate soil, water, vegetation and animal resources in order to implement successful restoration for local, state and federal land

management agencies as well as for a variety of private entities, landowners and non-governmental agencies. Students develop an in-depth understanding of basic plant and animal biology; a basic understanding of the physical sciences as they relate to restoration ecology; knowledge of important concepts of ecology and natural resources management; an understanding of economics related to evaluating alternatives; and analytical and decision-making skills. Students also develop communication, political and interpersonal skills to make their education effective. Examples of career opportunities include, but are not limited to restoration ecologist, soil conservationist, plant ecologist, riparian ecologist, researcher, commercial sales and service representative, consultants, and mine reclamation specialist.

Minor in Ecological Restoration

The minor in Ecological Restoration allows students in related majors to gain knowledge of the science and art of restoring ecosystems. This background is especially valuable to students who will be working in the various natural resource management fields. Since the prevalence of damaged, degraded or destroyed ecosystems is likely to increase in the future, restoration will be imperative for transforming these lands to once again provide ecosystem services.

To get more information about this minor or to officially declare it, please visit the Warner College of Natural Resources Undergraduate Student Advising website (<https://warnercnr.colostate.edu/advising/>) to make an appointment with an advisor.

Minor in Forestry

The minor in Forestry provides students with the opportunity to obtain exposure to forest sciences. It provides insight into the management of forested lands and is particularly appropriate for students majoring in other natural resource disciplines or natural sciences.

To get more information about this minor or to officially declare it, please visit the Warner College of Natural Resources Undergraduate Student Advising website (<https://warnercnr.colostate.edu/advising/>) to make an appointment with an advisor.

Minor in Range Ecology

The minor in Range Ecology provides an academic background for students interested in wildlife habitat, integrated land management, ranch management, applied ecology, and international development of arid lands. The minor provides additional flexibility for students who have a liberal arts or international education goal, but would like to increase their employment potential in an applied area. A minimum of 12 credits in the minor must be from Rangeland Ecosystem Science (RS) courses.

To get more information about this minor or to officially declare it, please visit the Warner College of Natural Resources Undergraduate Student Advising website (<https://warnercnr.colostate.edu/advising/>) to make an appointment with an advisor.

Graduate Certificate in Advanced Silviculture for the Practicing Forester

The Graduate Certificate in Advanced Silviculture for the Practicing Forester provides forestry professionals with advanced contemporary knowledge for making sound, science-based management decisions within an adaptive management context. This online certificate will prepare students with the tools, methods, theories, and tactics to identify, compare, and apply advanced ecological and silvicultural concepts to diverse forest ecosystems, as well as develop, implement, and evaluate silvicultural solutions to help forests and communities adapt to a changing climate. The program is comprised of a set of six core courses (12 credits total).

Graduate Certificate in Climate Adaptation and Risk Management (CARMA)

The online Graduate Certificate in Climate Adaptation and Risk Management (CARMA) provides post-baccalaureate students and professionals from a variety of disciplines with advanced knowledge of adaptive climate change solutions within the context of risk management and social considerations. This online certificate will prepare the students with scientifically-based knowledge, tools, methods, theories, and tactics to identify, compare, evaluate, and apply climate-adaptive strategies across a diverse suite of ownerships, rights holders, sectors and land-uses at the local, state, regional, and global levels.

Learning Outcomes

After successfully completing the graduate certificate, students will be able to:

1. Assess, quantify, and understand how climate change has affected and will likely impact social and ecological systems and the linkages between them.
2. Identify, compare, and evaluate climate models, risk management frameworks, and adaptive planning approaches for ecological and social systems.
3. Develop climate adaptation plans to inform decision making that incorporate scientific, social, economic, and policy considerations across temporal and spatial scales.
4. Identify and analyze social justice implications, historical/legacy considerations, policy approaches, and communication strategies related to climate adaptation, mitigation, and risk assessments.
5. Demonstrate effective written, oral, and visual communication skills that contribute to lifelong learning skills regarding how to access, evaluate, utilize, and disseminate relevant and high-quality scientific information for the benefit of the public, policymakers, stakeholders and rights-holders, and decision-makers in the public and private sectors.

Courses Geosciences (GEOL)

GEOL 110 Introduction to Geology-Parks and Monuments (GT-SC2) Credits: 3 (3-0-0)

Course Description: Understanding the physical processes, natural hazards, earth materials, and natural resources of planet Earth, and the relationship of humans to this planet. Outstanding examples of natural features from national and local parks and monuments, using narrated high-resolution (including aerial) video.

Prerequisite: None.

Registration Information: This is a partial semester course. Offered as an online course only. Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 120 Exploring Earth - Physical Geology (GT-SC2) Credits: 3 (3-0-0)

Course Description: Develops scientific understanding through introduction to earth processes, materials, resources, and hazards.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 121 Introductory Geology Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Laboratory applications of introductory geology.

Prerequisite: GEOL 110, may be taken concurrently or GEOL 120, may be taken concurrently or GEOL 122, may be taken concurrently or GEOL 124, may be taken concurrently.

Registration Information: Required field trips. Credit not allowed for both GEOL 121 and GEOL 150.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

GEOL 122 The Blue Planet - Geology of Our Environment (GT-SC2) Credits: 3 (3-0-0)

Course Description: Develops scientific understanding through introduction to geological processes, natural hazards, earth resources, and their impacts on society.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 124 Geology of Natural Resources (GT-SC2) Credits: 3 (3-0-0)

Course Description: Develops scientific understanding through introduction to the origin, use and environmental impact of geological resources extracted from the Earth.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, GEOL 150.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 150 Physical Geology for Scientists and Engineers Credits: 4 (3-3-0)

Course Description: Earth materials, structures, and surface processes. Geologic analysis using field data, topographic and geologic maps, and aerial photos.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, GEOL 150. Credit not allowed for both GEOL 121 and GEOL 150. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A.

GEOL 154 Historical and Analytical Geology Credits: 4 (3-3-0)

Course Description: Physical and biological history of Earth with introduction to laboratory, computer, and field techniques.

Prerequisite: GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 192 New Student Seminar--Exploring Geosciences Credit: 1 (0-0-1)

Course Description: Geosciences as a field of study; exploration of the major and career paths; strategies for academic success and beyond.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Freshman and sophomore geology majors only. This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 201 Field Geology of the Colorado Front Range Credit: 1 (0-2-0)

Course Description: Geology of the Rocky Mountain Front Range taught primarily through field trips and field exercises, emphasizing hands-on experiences. Learn to make basic field observations and measurements on a variety of rock types and surficial features.

Prerequisite: GEOL 121 or GEOL 150.

Registration Information: Freshman, sophomore or junior standing only. Geology majors or minors only. This is a partial semester course. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 232 Mineralogy Credits: 3 (2-3-0)

Course Description: Crystal structures, crystal chemistry, rock-forming and economically important minerals, crystal growth and defects, physical properties of minerals.

Prerequisite: (CHEM 111, may be taken concurrently) and (GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (MATH 120 or MATH 124 or MATH 127 or MATH 155 or MATH 160 or MATH 161 or MATH 255).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 250 The Solid Earth Credits: 3 (2-2-0)

Course Description: Structure, flow, and composition of the deep Earth; introduction to geophysics; tests of plate tectonic theory.

Prerequisite: (GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (MATH 124) and (MATH 125 or MATH 127 or MATH 155 or MATH 160 or MATH 161 or MATH 255).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 332 Optical Mineralogy Credits: 2 (1-2-0)

Course Description: Fundamental light optics in crystalline substances; optical indicatrix; isotropic, uniaxial, and biaxial substances; common minerals in thin section.

Prerequisite: GEOL 232, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 340 Glacial Geology Credits: 3 (3-0-0)

Course Description: Glacier physics (mass balance, ice dynamics, heat flow, and hydrology), glacial erosion and sedimentation, glacial landforms, and the relationship between forcings (orbital, climate, tectonic, biological) and glaciations in Earth's history.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (PH 121 or PH 141).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Required field trips. Credit not allowed for both GEOL 340 and GEOL 380A2.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 342 Paleontology Credits: 3 (2-3-0)

Course Description: Description of invertebrates, vertebrates, and plants and their distribution in earth history.

Prerequisite: GEOL 154.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 343 Dinosaur Paleontology Field Camp Credit: 1 (0-0-2)

Course Description: Develops field-based skills in sedimentology and paleontology, including general sedimentary geology techniques (interpreting depositional environments, measuring section, collecting samples, note taking) and paleontological techniques (prospecting, data collection, excavation, mapping, inventory), to reconstruct and interpret fossil ecosystems.

Prerequisite: GEOL 154.

Registration Information: Required field trips. Class will spend one week camping at the Denver Museum of Nature and Science field station.

Credit not allowed for both GEOL 343 and GEOL 380A3.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 344 Stratigraphy and Sedimentology Credits: 4 (3-3-0)

Course Description: Description, genesis, correlation, and age of sediments, sedimentary rocks and layered rock sequences.

Prerequisite: GEOL 154 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 364 Igneous and Metamorphic Petrology Credits: 4 (3-3-0)

Course Description: Identification, classification, geochemistry, petrogenesis of igneous and metamorphic rocks; textural interpretation of hand samples and thin sections.

Prerequisite: GEOL 232 with a minimum grade of C-.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 366 Sedimentary Petrology and Geochemistry Credits: 4 (3-3-0)

Course Description: Composition, identification, and classification of sedimentary rocks; geochemical processes affecting sedimentary rocks and surficial deposits.

Prerequisite: CHEM 113 and GEOL 154 and GEOL 364.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 372 Structural Geology Credits: 4 (3-3-0)

Course Description: Stress and strain in rocks, geometry of deformed rocks, and tectonic principles.

Prerequisite: (GEOL 154, may be taken concurrently) and (MATH 125 or MATH 127 or MATH 155 or MATH 160 or MATH 161 or MATH 255) and (PH 121, may be taken concurrently or PH 141, may be taken concurrently).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 376 Geologic Field Methods Credits: 3 (1-4-0)

Course Description: Scientific, surveying, and mapping methods used in geologic field studies; proposal, map, and report preparation.

Prerequisite: GEOL 344 and GEOL 372, may be taken concurrently.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 384 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description: Instruction and practice in laboratory instruction in lower-division departmental courses.

Prerequisite: None.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 401 Geology of the Rocky Mountain Region Credit: 1 (0-3-0)

Course Description: Field course; geology of the local Rocky Mountain region.

Prerequisite: GEOL 154.

Registration Information: May be taken up to 3 times for credit. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 415 Critical Zone Science Credits: 3 (3-0-0)

Course Description: Focus on the Earth's terrestrial near-surface environment that sustains most non-marine life on the planet, known as the Critical Zone. Gain experience with the architecture and geologic and geomorphologic context of the Critical Zone in different environments. Explore the interactions between the solid earth, atmosphere, hydrosphere and biosphere that give rise to the Critical Zone, and learn how the Critical Zone modulates various Earth surface processes.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 150 or ESS 210 or GR 210 or SOCR 240) and (CHEM 107 or CHEM 111) and (MATH 155 or MATH 159 or MATH 160 or STAT 301).

Restriction: Must not be a: Freshman.

Registration Information: Required field trips. Credit not allowed for both GEOL 380A1 and GEOL 415.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 436 Geology Summer Field Course Credits: 6 (0-12-0)

Course Description: Geologic mapping, measuring sections, interpreting geologic history in Colorado. Required comprehensive reports, geologic maps, and cross sections.

Prerequisite: GEOL 364 and GEOL 372 and GEOL 376.

Registration Information: This is a partial semester course. Required field trips.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 440 Geodetic and Near-Surface Geophysical Methods Credits: 4 (3-3-0)

Course Description: Introduction to geodetic and near-surface geophysical methods to answer societally-relevant geological and environmental questions. Methods include (i) dataloggers and instruments, (ii) geodetic tools (GNSS surveys, lidar, and Structure from Motion), and (iii) near-surface geophysical methods (ground-penetrating radar, active seismic profiling, and electrical resistivity imaging). Emphasizes learning to collect, analyze/interpret, and synthesize multiple types of geophysical data.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (GEOL 344, may be taken concurrently) and (PH 122 or PH 142) and (MATH 161 or MATH 255).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and laboratory. Required field trips. Credit not allowed for both GEOL 440 and GEOL 480A4.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 442 Applied Geophysics Credits: 4 (3-2-0)

Course Description: Geophysical exploration methods emphasizing hydrocarbon and mineral exploration, hydrogeology, and engineering applications.

Prerequisite: GEOL 372 and MATH 161 and PH 142.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 446 Environmental Geology Credits: 3 (3-0-0)

Course Description: Geology applied to environmental problems.

Prerequisite: (CHEM 111) and (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (MATH 155 or MATH 160) and (PH 121 or PH 141).

Registration Information: Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 447 Mineral Deposits Credits: 3 (2-3-0)

Course Description: Occurrence, origin, and exploration of economic metallic mineral deposits.

Prerequisite: GEOL 366, may be taken concurrently and GEOL 372.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 452 Hydrogeology Credits: 4 (3-3-0)

Course Description: Interaction of water and geologic materials; surface and groundwater; quantitative analysis and geologic effects on quality and flow of groundwater.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150 or GR 210) and (MATH 161 or MATH 255) and (PH 121 or PH 141).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 454 Geomorphology Credits: 4 (3-3-0)

Course Description: Origin of landforms; morphology and processes.

Prerequisite: (GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150 or GR 210) and (STAT 301 or STAT 307 or STAT 315).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 492 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494A Independent Study: Environmental/Engineering Geology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494B Independent Study: Geomorphology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494C Independent Study: Mineralogy/Petrology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494D Independent Study: Geoscience Field Studies Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494E Independent Study: Paleontology/Stratigraphy Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494F Independent Study: Sedimentology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494G Independent Study: Structural Geology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494I Independent Study: Geophysics Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 498 Research Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Term Offered: Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 530 Advanced Petrology Credits: 3 (2-2-0)

Course Description: Igneous and metamorphic processes and products explored through thermodynamics, phase equilibria, and textural analysis.

Prerequisite: GEOL 364.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 535 Microtectonics Credits: 3 (2-2-0)

Course Description: Focuses on microstructural features, processes, mechanisms, and measurements. Structurally interesting rocks especially on the microscale, development of structural fabrics and reactivation, analysis of fault rocks and kinematic indicators especially in fault and shear zones, stress measurement through microstructural indicators, shock deformation/metamorphism in impact structures, chemical changes with deformation, deformation mechanisms, and isotopic investigation of deformation.

Prerequisite: GEOL 332 and GEOL 372.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both GEOL 535 and GEOL 580A3.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 540 Petrophysics and Well Log Interpretation Credits: 3 (3-0-0)

Course Description: Petrophysics and well log interpretation as it relates to hydrocarbon exploration and production. Wireline logs, calculating rock and fluid properties from log measurements, and recognizing zones of potential hydrocarbons. Map and calculate volumes of hydrocarbons in the subsurface using the analysis of petrophysical properties from wireline well logs.

Prerequisite: GEOL 344 and GEOL 366 and PH 142.

Registration Information: Senior or graduate standing in Geosciences, Engineering, or Physics. Credit not allowed for both GEOL 540 and GEOL 581A4.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 541 Geostatistics Credits: 2 (2-0-0)

Course Description: Geostatistics for earth science applications. Aquifer and reservoir heterogeneity, spatial data analysis, variogram modeling, spatial estimation, kriging, and geostatistical simulation.

Prerequisite: (GEOL 150) and (MATH 161 or MATH 255) and (STAT 301 or STAT 315).

Registration Information: Credit not allowed for both GEOL 541 and GEOL 581A5.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 543 Carbonate Sedimentology Credits: 2 (1-3-0)

Course Description: Recognition of carbonate grains, cement types, and carbonate depositional environments, and their response to sea-level changes.

Prerequisite: GEOL 344.

Registration Information: Junior standing.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 545 Shale Sedimentology Credits: 2 (2-0-0)

Course Description: Recognize and interpret mud and mudstone facies and their depositional environments, as well as reconstructing their diagenetic history. Observe stacking patterns and reconstruct sea-level fluctuations from mudstone/shale successions and their impact on the 3D distribution of mudstones/shales.

Prerequisite: GEOL 344.

Registration Information: Junior standing. Credit not allowed for both GEOL 545 and GEOL 580A6.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 546 Sedimentary Basin Analysis Credits: 4 (3-3-0)

Course Description: Sedimentologic data base, correlation, mapping, facies models, classification, and evolution of sedimentary basins. Applications to petroleum exploration.

Prerequisite: GEOL 344.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 547 Ore Deposit Geochemistry Credits: 3 (3-0-0)

Course Description: Geochemical techniques applied to the geology, exploration, and environmental analysis of ore deposits.

Prerequisite: GEOL 447.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 548 Petroleum Geology Credits: 4 (3-2-0)

Course Description: Comprehensive treatment of the petroleum system with a focus on hydrocarbon exploration and production data and methods.

Prerequisite: GEOL 344 and GEOL 372.

Restriction: Must not be a: Freshman, Sophomore, Junior.

Registration Information: Senior standing. Must register for lecture and laboratory. Credit allowed for only one of the following: GEOL 548, GEOL 565, or GEOL 581A6.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 551 Groundwater Modeling Credits: 3 (3-0-0)

Course Description: Groundwater modeling from a geologic perspective. Conceptual models and computer modeling of groundwater flow and solute transport.

Prerequisite: CIVE 423 or GEOL 452.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 552 Advanced Topics in Hydrogeology Credits: Var[2-3] (0-0-0)

Course Description: Current literature, new techniques, legislative and political developments in hydrogeology, and appropriate case histories.

Prerequisite: GEOL 452.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 553 Use of Tracers in Hydrogeology Credits: 3 (3-0-0)

Course Description: Use of environmental and applied tracers in hydrogeology to understand groundwater flow and transport properties. Environmental tracers are used to determine groundwater age and recharge rates, ground/water surface water interactions and to estimate the average temperature when the groundwater was recharged. Applied tracers are used to determine flow and transport processes in porous media to understand controls on solute transport, especially related to contaminant movement.

Prerequisite: CIVE 423 or GEOL 452.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 554 Remote Sensing of the Earth System Credits: 3 (2-2-0)

Course Description: Introduction to the physics and specific applications of common passive and active remote sensing techniques to study the Earth system. Gain an understanding of how to access, process, analyze and interpret remote sensing observations to answer specific research questions focused on the Earth system.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (PH 122 or PH 142).

Restriction: Must not be a: Freshman, Sophomore, Junior.

Registration Information: Senior geology majors or graduate students. Must register for lecture and laboratory. Credit not allowed for both GEOL 554 and GEOL 580B2.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 570 Plate Tectonics Credits: 3 (3-0-0)

Course Description: Examination of the historical development of plate tectonic theory and its application to understanding geological processes.

Prerequisite: GEOL 364 and GEOL 372 and PH 142.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 571 Tectonic Geomorphology Credits: 3 (3-0-0)

Course Description: Interactions between tectonic, climatic and earth surface processes that give rise to mountainous landscapes. Topics range from landscape response to single earthquake events to geochronological tools used to constrain rates of landscape change to orogen-scale interactions and feedbacks between tectonics and climate through lectures, in-class activities, data analysis, modeling, and reading assignments.

Prerequisite: GEOL 372 and GEOL 454, may be taken concurrently and MATH 160.

Registration Information: Required field trips. One weekend field trip to study tectonic geomorphology in southern CO is required. Credit not allowed for both GEOL 571 and GEOL 581B1.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 572 Advanced Structural Geology Credits: 4 (3-3-0)

Course Description: Rheology, deformation mechanisms, structural associations and advanced methods of structural analysis.

Prerequisite: GEOL 436.

Registration Information: Must register for lecture and laboratory. Required field trips. Graduate standing can substitute for prerequisite course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 574 Geodynamics Credits: 3 (3-0-0)

Course Description: Continuum mechanics applied to understanding of deformation within the earth. Stress and strain as tensors, with application to various geological settings; plate flexure and isostasy; steady state and time dependent heat conduction in a geological context; fluid mechanics of the earth.

Prerequisite: GEOL 250 and MATH 261 and PH 141.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 575 Subsurface Geophysical Mapping Credits: 4 (3-2-0)

Course Description: Advanced techniques for creating subsurface geological maps based on seismic reflection and well log data.

Prerequisite: GEOL 344 and GEOL 372 and MATH 161 and PH 142.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 576 Exploration Seismology Credits: 3 (3-0-0)

Course Description: Seismic exploration methods, including theory, data acquisition, and data processing.

Prerequisite: GEOL 344 and GEOL 372 and MATH 161 and PH 142.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 578 Global Seismology Credits: 4 (3-2-0)

Course Description: Quantitative introduction to seismology; basics of seismic data analysis; fundamentals of wave propagation; earthquakes; structure of the Earth.

Prerequisite: PH 142 and MATH 261.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 579 Solid Earth Inverse Methods and Practices Credits: 3 (3-0-0)

Course Description: Inverse and parameter estimation theory and applications in the earth sciences in the context of Frequentist and Bayesian approaches to estimating and interpreting data-driven models. Review of linear algebra, statistical, and other mathematical underpinnings, and of basic MATLAB programming. Linear and nonlinear inverse problems. Nonuniqueness, ill-posedness, rank-deficiency. Regularization methods for geophysical problems.

Prerequisite: (MATH 161 or MATH 255) and (MATH 229) and (STAT 301 or STAT 315).

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 601 Professional Development for Geoscientists Credit: 1 (0-0-1)

Course Description: The conduct of science, role of scientific publications, publication process, proposal writing, responsible conduct of research, and professional ethics.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 652 Fluvial Geomorphology Credits: 3 (3-0-0)

Course Description: Geomorphology of channels, slopes, and drainage systems.

Prerequisite: GEOL 120.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 662 Field Geomorphology Credits: 2 (1-2-0)

Course Description: Field-based geomorphologic analysis of landscape forms and processes. Apply appropriate field techniques to address relevant research hypotheses related to advanced subject matter in geomorphology. Analyze and interpret field-based data, orally present findings in a symposium setting, and discuss and critically evaluate relevant literature.

Prerequisite: GEOL 454.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory. This is a partial semester course. Required field trips. Credit not allowed for both GEOL 662 and GEOL 680A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 684 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 692 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Major in Geology

The Major in Geology provides an academic and practical basis for diverse professional geosciences and other careers that include private and public sector water, energy, mineral and other natural resources, geologic hazards, resources and environmental management, and education. The major also provides a quantitative science and general education preparation for graduate studies, including hydrology, geophysics, environmental geology, economic geology, resources management, public policy, and many other areas.

The Geology curriculum encompasses a strong geosciences core within the broader framework of a liberal education. Emphasis is placed on integrating field studies in the Colorado Rocky Mountains and elsewhere with extensive on-campus classroom and laboratory work. In addition to obtaining a thorough knowledge of geosciences, students complete courses in mathematics, physical sciences, communications, and the liberal arts to develop effective quantitative, decision making, and communications skills. Four concentrations are offered to allow focus on specialized career interests: Geology, Environmental Geology, Geophysics, and Hydrogeology.

Learning Outcomes

Students will demonstrate:

- A solid foundation in the physical sciences and broad understanding of geological processes
- Application of field and classroom scientific reasoning skills to data analysis and problem solving in the geosciences, both individually and in teams
- An awareness of sociopolitical, economic factors, and ethical practices and standards relevant to professional careers in geosciences

Potential Occupations

Many opportunities exist for geology graduates in the private and public sectors within a wide range of societally important and satisfying careers. Environmental management, energy resources, water resource and management, construction services, mining, power generation, computer software, and many other industries employ geoscientists in exploration, development, production, communications, building, management, and research. Federal and state agencies employ geoscientists for resource mapping and assessment, oil-gas-coal-groundwater-geothermal resource evaluation and development, resource and environmental water studies, leasing and conservation, resource restoration and rehabilitation, hazards assessment and mitigation,

regulatory activities, national defense, and basic and applied research. State and local governments employ geoscientists for geologic and soils mapping and resource management, natural resources, hazards evaluation and mitigation, public information activities, consulting, management, and communications. Environmental, engineering, and water resources firms further employ geoscientists for mapping, restoration and rehabilitation planning, monitoring and evaluation of geologic and built environment hazards, and in site feasibility evaluation and implementation of construction projects, water management and reuse evaluation, groundwater pollution assessment and remediation, and contaminant prevention and treatment. Schools, colleges, universities, national laboratories, and private research firms employ geoscientists in a variety of teaching, research, and administrative positions.

Participation in internships, volunteer activities, collaborative team-building activities, professional societies, education, and public outreach and engagement are highly encouraged and supported by the department via faculty, staff, and alumni mentoring to enhance training and career opportunities. Graduates who go on to pursue advanced degrees acquire a strong disciplinary base for diverse areas of graduate study, including environmental studies, energy, seismology, hydrology, meteorology, oceanography, and the space sciences. Geoscientists with advanced degrees can often more effectively attain management-level and research positions. Careers include, but are not limited to: instructor, professor, environmental or geological entrepreneur or consultant, exploration professional geologist, petroleum geologist, environmental geologist, geophysicist, hydrologist, mining geologist, oceanographer, production geologist, researcher, resource evaluator, geobiologist, or seismologist. With additional training and diversification, geosciences graduates may pursue associated career directions in business, law, medicine, public policy, and other diverse professional fields. By obtaining teaching

certification, graduates can become primary and secondary educators in geosciences.

Concentrations

- Environmental Geology Concentration
- Geology Concentration
- Geophysics Concentration
- Hydrogeology Concentration

Major in Geology, Environmental Geology Concentration

Environmental Geology concentration students develop expertise in surface and shallow subsurface processes that shape the Earth and provide critical soil and water resources and services for human society and the natural world. Graduates will be prepared for careers that address environmental implications of geological process and human activities. The curriculum emphasizes the fundamentals of geology, surface and shallow subsurface processes, field-based research methodologies and technologies, and environmental geosciences. The concentration empowers students to pursue positions with corporations and public, private, and nonprofit organizations that address environmental/natural resource management issues, regulatory agency activities, hazard identification and mitigation, land use, and support research that informs natural resource policy and decision making to advance sound stewardship. The curriculum provides a strong foundation for graduate studies in the many fields of geosciences and environmental science.

Major in Geology, Geology Concentration

The Geology concentration provides a comprehensive undergraduate education in geoscience, emphasizing a hands-on and field-oriented approach that is well-suited to professional careers in the energy, water, mining and other resources industries, government agencies, consulting, resource management, and the many other fields that employ geologists. The Geology concentration provides a strong general science background

for other diverse careers, including primary and secondary school teaching, science writing, environmental and resource law, and resource and/or hazards specializations within the construction, insurance, land use, securities, and other industries. The Geology concentration additionally provides foundational preparation for graduate education in the many geosciences subdisciplines.
