Major in Statistics

Statistics is the science of modeling, summarizing, and analyzing data. Statisticians help people produce trustworthy data, analyze the data, and present the results in a useful manner. Statisticians work with people from other professional backgrounds to solve practical problems. They provide crucial guidance in determining what information is reliable and which predictions can be trusted. An exciting aspect of the field is the diversity of areas where statistical methods are used; this is one reason

for continuing strong demand for well-trained statisticians. With the popularity of big data and the focus on quantitative analysis in many fields, there will continue to be a high demand for graduates with a statistics major or minor. Students who succeed in the field of statistics typically have strong quantitative skills, analytical minds, and like to help other people solve problems.

Learning Objectives

Students successfully completing this program will be able to:

1. Conceptualize analytical questions in terms of a model,
2. Apply their knowledge of the core set of statistical methods,
3. Perform data analysis using statistical software,
4. Interpret and communicate statistical results,
5. Either attend graduate school in statistics or find professional employment in a statistics field upon completion of a statistics major.

Potential Occupations

Statisticians find employment in a wide range of industries including medicine (evaluating new medicines and medical treatments), computing, business, market research, natural resources, government, industrial quality control, social science research, and more. Almost every industry has a statistician or a group of statisticians somewhere in the organization. Graduate school is also an option after graduation. Many of our undergraduate majors have continued on to graduate school in statistics, either at CSU or other universities. Almost all statistics majors are able to find work in this field and/or gain entrance to graduate school after successfully completing a statistics degree.

To learn more about a Major in Statistics please see our Advising page (<https://statistics.colostate.edu/advising/>), or contact us at stats@stat.colostate.edu.

Requirements Effective Fall 2022

The minor has 12 credits of electives, giving lots of flexibility in course choices. Statistical skills are in demand across a wide range of disciplines. A minor in statistics is a valuable complement to many majors in the physical, biological, Earth, social and human sciences. Statistical skills are also in high demand in most private industries and government organizations.

If you are interested a minor in Statistics, please see our advising page (<https://statistics.colostate.edu/advising/>) or contact our department at stats@stat.colostate.edu.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C must be achieved in all STAT courses required for the minor in statistics.

Learning Objectives

Upon successful completion, students will be able to:

1. Analyze the unique aspects of sports data and modeling sports data.
2. Acquire sports data using data scraping techniques and R packages.
3. Create graphical and visual summaries of sports data.
4. Utilize theory and methods from probability, statistics, and machine learning to analyze sports data.

Graduate Certificate in Data Analysis

The Graduate Certificate in Data Analysis provides a solid background in data analysis using modern software for professionals or graduate students in diverse fields who are seeking a short-term program that will strengthen their statistical skills.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

This certificate is designed to help students develop and strengthen their skills in statistical analysis. Upon successfully completing the certificate, students will be proficient in:

1. Collecting data.
2. Analyzing and interpreting different types of data.
3. Drawing appropriate conclusions in industry or other areas where statistical applications are used.

Institutional Learning Objectives

These program-level learning objectives support the Institutional Learning Objective (ILO) of Reasoning. The ILO of Reasoning calls in part for the development and application of logic, analytic skills, and use of information to understand and solve problems. The Data Analysis certificate curriculum, which develops students' statistical analysis skills including collecting data, analyzing and interpreting different types of data, and drawing appropriate conclusions, directly addresses these aspects of the Reasoning ILO via the core knowledge domain of "Quantitative Methods for Acquiring, Interpreting, and Using Data".

College Programs

A concern for health and the diseases of animals and humans provides the unifying theme for the undergraduate, professional, and graduate programs of the College of Veterinary Medicine and Biomedical Sciences

(CVMBS)—a manifestation of the concept of One Health. The College combines teaching, research, and public service activities in basic biomedical disciplines such as anatomy, neurobiology, physiology, microbiology, pathology, and radiological health sciences, with applied disciplines such as clinical veterinary medicine and surgery, diagnostic imaging, radiology, clinical laboratory sciences, epidemiology, and environmental health sciences. Graduates of the College in either the veterinary sciences or the biomedical sciences serve society in the broadest sense: they represent the concept that there is but “one medicine” supporting “one health” with human and animal health intimately interrelated within their environments.

Major Courses of Study

The CVMBS offers undergraduate, professional, and graduate courses of study. There are two undergraduate programs leading to the Bachelor of Science, with majors in Biomedical Sciences and Neuroscience in partnership with the College of Natural Sciences. The Bachelor of Science degree requires a minimum of 120 credits with a minimum of 42 credits in upper-division courses. The four-year professional veterinary medical program leads to the Doctor of Veterinary Medicine degree; students in this program typically complete a baccalaureate degree prior to program admission. Graduate studies in each of the four departments of the college lead to Master of Science and Doctor of Philosophy degrees with selected professional master's programs serving emerging needs in society and through practitioner skill development.

Education Abroad

Education abroad programs are available to students in the CVMBS. Because the knowledge of at least one other culture is valuable in understanding our own, students are strongly encouraged to study outside the United States. Students interested in education abroad should plan far in advance by discussing opportunities with their academic advisor and by visiting the Office of International Programs (<http://international.colostate.edu>) in Laurel Hall.

Continuing and Distance Education

The CVMBS supports the veterinary profession by offering continuing education courses that enable practicing veterinarians to obtain new medical information and meet the Colorado Veterinary Practice Act continuing education requirements for re-licensure. The College shares responsibility for continuing education and maintains close liaison with the American Veterinary Medical Association (AVMA), the Colorado Veterinary Medical Association (CVMA), the Colorado Board of Veterinary Medicine, and the Western Interstate Commission for Higher Education (WICHE). Innovative programs like Health Professions preparation—for students finishing essential courses to prepare to pursue health professions—are offered through CSU Online (<https://www.online.colostate.edu/>).

Graduate Programs

Programs leading to the Master of Science and Doctor of Philosophy degrees are offered in all departments of the College.

Students with Bachelor of Science or Doctor of Veterinary Medicine (DVM) degrees, or well-qualified students who are currently pursuing veterinary medicine degrees, are eligible to study for advanced degrees in the Departments of Biomedical Sciences; Clinical Sciences; Environmental and Radiological Health Sciences; and Microbiology, Immunology, and Pathology.

The CVMBS and the College of Business have created a combined five-year **DVM-MBA** program of study that can result in earning both the

Master of Business Administration (MBA) degree and the DVM degree. All applicants to the DVM program are encouraged to consider enhancing their veterinary education by including a one-year start to an MBA degree. This program allows selected students to start an MBA degree in the year prior to starting the DVM program. After successfully completing the first year of the MBA program, students will be guaranteed admission to the first year of the DVM program and will be expected to complete the remaining MBA course requirements concurrently with the first two years of the DVM curriculum. This program was undertaken to improve training of our students in veterinary practice management, business and economics beyond what is currently offered as core content within the DVM curriculum.

Combining the expertise from public/environmental health and veterinary medicine and partnering with the Colorado School of Public Health (<http://publichealth.ucdenver.edu>), the College has created a five-year **DVM-MPH** program which provides specialty training in veterinary medicine and public health. Students spend the first year in the Master of Public Health (MPH) program, years two and three jointly in the DVM and MPH programs, and then years four and five focusing on completing the DVM requirements. Given the threats to public health from zoonotic diseases, changing ecosystems due to climate, and enhanced need for health professionals versed in the interplay of human, animal and environmental factors, DVM-MPH graduates bring a critical skill set to bear down on issues of significant public impact.

The CVMBS and the Department of Animal Sciences within the College of Agricultural Sciences have partnered in developing a **DVM-MS-Animal Sciences** five-year combined degree, aimed at offering robust training in livestock production, animal health, industry and economics to future livestock veterinarians. Students will be optimally equipped to provide animal health services, advise individuals within production units, provide leadership within professional organizations, and contribute to knowledge development through research. Students complete graduate coursework in Animal Sciences and initiate clinical/field research in the first year, then complete research requirements during the subsequent four years of DVM training.

There is a national need for veterinarians who can serve as the bridge between research and all aspects of animal health and welfare. The College has developed a seven-year **DVM-PhD** program that integrates clinical and research training to provide a dual degree to selected candidates. Numerous outstanding research opportunities exist in diverse areas that complement DVM training, including cancer biology, infectious disease, neurosciences, reproductive biology, epidemiology, orthopedic sciences, environmental health and toxicology. The typical DVM/PhD program progresses as follows:

- basic graduate study and laboratory rotations (year one)
- first two years of DVM training plus electives and graduate work (years two and three)
- exclusive research work in the PhD program (years four and five)
- completion of the DVM training (years six and seven)

For detailed information about CVMBS graduate programs, view the CVMBS (<https://vetmedbiosci.colostate.edu/degree-programs/graduate/>) (<http://csu-cvmb.colostate.edu/academics/Pages/default.aspx>) website. Information on DVM combined degrees may be viewed on the DVM Program (<https://vetmedbiosci.colostate.edu/dvm/special-degree-programs/>) website.

Interdepartmental Program Doctor of Veterinary Medicine (DVM)

A four-year professional Doctor of Veterinary Medicine (DVM) program is offered annually to approximately 156 students. Each year, approximately 142 students are admitted to the DVM program located on the main CSU campus in Fort Collins, Colorado. Additionally, up to 14 students are admitted to the CSU-University of Alaska Fairbanks (UAF) 2+2 DVM Program. These students complete the first two years of the four-year program in Fairbanks, Alaska, and join the larger cohort to complete years three and four in Fort Collins. Students in the 2+2 Program graduate with a DVM degree from CSU, and enjoy unique opportunities at UAF in small animal sports medicine, rural outreach, conservation, and wildlife medicine.

Because the number of applicants exceeds the number of students who can be admitted to any class, the members of the DVM Admissions Committee for the CVMBS carefully evaluate each applicant in a holistic manner to recommend those best qualified. For more information concerning the academic program which leads to the DVM degree, please visit the DVM Program (<https://vetmedbiosci.colostate.edu/dvm/>) website.

The full course of study requires four years beyond completion of the pre-veterinary requirements. While exceptional students may complete pre-veterinary requirements in two to three years and then be accepted into the DVM Program, it is much more common that students complete a baccalaureate degree or graduate degree, followed by four years in the professional program.

Pre-Veterinary Training for the Doctor of Veterinary Medicine Program

Students may complete pre-professional (pre-veterinary) training at any accredited institution whether these courses are part of a regularly offered baccalaureate program or whether the courses are taken as “stand alone” choices independent of a degree program. Courses must be substantially equivalent in subject content and level as offered for pre-veterinary students at CSU.

Inquiries regarding equivalent or substitute courses that may be taken *specifically* to meet pre-veterinary requirements should be directed to DVMAdmissions@colostate.edu. There is also a form for requests (Prerequisite Substitute Course Request (<https://vetmedbiosci.colostate.edu/dvm/admission-requirements/>)), which is submitted to DVMAdmissions@colostate.edu.

The minimum course requirements for admission to the DVM program, exclusive of electives, are:

- Arts, Humanities, Behavioral and Social Sciences – at least 12 semester credits. (The required credits for English composition explicit in most programs of study as all university requirements—see category that follows—do not fulfill these requirements.)
- Biological Sciences – at least 3 semester credits in genetics; 3 semester credits in cell biology; 3 semester credits in Systems Physiology; a laboratory associated with a biological science course
- Chemistry – at least 3 semester credits in biochemistry (requiring organic chemistry as a prerequisite) and a laboratory associated with a chemistry course.
- English Composition – at least 3 semester credits.
- Physics – at least 4 semester credits with laboratory.

- Statistics – at least 3 semester credits (upper-division course preferred).
- Additional Biomedical Science courses (upper division) - 9 credits

In addition to these minimum course requirements, 15 credits of elective courses are required. Highly recommended courses include anatomy, cell biology, developmental biology, histology, immunology, microbiology, nutrition, physiology, and computer science. These courses will enhance the student's preparation for the DVM program.

The pre-veterinary requirements include a total of 60 semester credits that must be completed prior to admission to the DVM program. Students may apply prior to completing all prerequisite requirements; however, in order to assure the most competitive application, one is encouraged to have the majority of the prerequisites completed at the time of application. The large majority of students will complete the pre-veterinary requirements as part of a baccalaureate program. Exceptional students may apply for admission to the DVM program when only the pre-veterinary requirements are met.

Students who wish to pursue pre-professional veterinary medicine training (sufficient to meet minimum requirements to apply to the CSU DVM Program) through courses offered at CSU as part of their undergraduate degree program will find detailed information online (<https://vetmedbiosci.colostate.edu/dvm/admission-requirements/>).

Combined Degree Programs

CSU offers four combined degree programs, pairing the DVM with a graduate degree. These include the DVM-MBA, DVM-MPH, DVM-MS-Animal Sciences, and DVM-PhD. Please see "Graduate Programs" above for detailed information.

Food Animal Veterinary Career Incentive Program

There are many vacancies and numerous career opportunities in all sectors of private livestock practice, including mixed animal practice and specialty practices in dairy cattle, beef cow-calf, beef feedlots, sheep, small ruminants and swine. There are also many opportunities in public practice including food safety and inspection, communicable disease management, and regulatory veterinary medicine. Many practitioners and producers have found it difficult to recruit new graduates into food and fiber animal practice, especially in rural communities. Reduced veterinary participation in food and fiber production animal medicine may contribute to increased vulnerability of livestock industries to emerging infectious diseases, exotic and zoonotic diseases, public health risks from food safety and quality problems, lowered public confidence in animal agricultural products, as well as threats to the national economy. Thus, the overarching goal of the Food Animal Veterinary Career Incentive Program (FAVCIP) is to create a sustainable source of future veterinarians for underserved disciplines and geographic regions central to the future of safe and successful food and fiber animal production. This program includes a plan of academic work, experience, and mentoring that encompasses undergraduate and veterinary medical education and meets specific needs of animal agriculture through a cooperative venture of the CVMBS and the Department of Animal Sciences in the College of Agricultural Sciences. It should be noted that DVM students who do not complete the FAVCIP may still focus coursework and clinical experiences on livestock medicine, especially in years three and four.

Undergraduate students with a strong interest in the discipline will be encouraged to follow the FAVCIP curriculum and program requirements ([https://vetmedbiosci.colostate.edu/degree-programs/veterinary-professional-program/dvm-program/food-animal-veterinary-career-](https://vetmedbiosci.colostate.edu/degree-programs/veterinary-professional-program/dvm-program/food-animal-veterinary-career-incentive-program/)

Major in Biomedical Sciences

The interdisciplinary Biomedical Science major (BMS) is designed to provide students in-depth training in the applied life sciences. The program prepares students for employment by public sector and government agencies, private industry, academic institutions, as well as graduate study in medicine, veterinary medicine, and related biomedical and health fields. Students will begin their studies with foundational science courses including biology, physics, general chemistry, organic chemistry, math, and statistics, and then choose an area of concentration (anatomy and physiology, environmental public health or microbiology and infectious disease) to tailor their educational experiences to specific career objectives.

The basic science curriculum meets many requirements for entrance into professional schools. Experiential learning opportunities are encouraged and could include participating in laboratory research, teaching/tutoring in selected courses, volunteer experiences and leadership positions within student club(s), study abroad, internships, and honors curriculum. These opportunities are encouraged with the student's interests and career goals as the focus.

Learning Objectives

1. Obtain a foundational knowledge in math and science, and be able to integrate knowledge from the molecular to the systemic level.
2. Demonstrate critical thinking and the ability to analyze scientific data to solve complex problems as an individual and as a member of a team.
3. Demonstrate effective organization, leadership, and laboratory skills.

4. Demonstrate strong writing and oral communication skills necessary to communicate scientific knowledge to a range of audiences.

Potential Occupations

A Bachelor of Science degree in Biomedical Sciences will provide students with a variety of opportunities for further study or employment in the broad area of biomedical sciences. The coursework is designed to prepare students for health-related graduate and professional programs. Post-graduate opportunities will include additional studies in specialty areas of physiology such as neuroscience, reproductive endocrinology, cardiopulmonary, and patho-physiology. Employment opportunities can be found in government at the local, state, and national levels; research in a variety of settings such as university, industry, and private laboratories; education; administration and management; and industry such as biotechnology, pharmaceuticals, and medical devices. Students will be exposed to skill sets which are necessary in a competitive, ever changing job market.

Major in Biomedical Sciences, Anatomy and Physiology Concentration

This program prepares students for a wide variety of opportunities which have a basis in cellular and molecular biology, human/animal anatomy and physiology. In addition to enrolling in required courses, students will have opportunities to engage in elective courses and laboratory research in specialty areas of endocrinology, pharmacology, pathophysiology, neurophysiology, reproductive physiology, and cardiopulmonary physiology. In this process, students are able to tailor their educational experiences to specific career objectives. The curriculum will prepare graduates to pursue further studies in professional schools for medicine, veterinary medicine, pharmacy, dentistry, and optometry, as well as other programs such as nursing, physician assistant and physical therapy. The Anatomy and Physiology concentration will also prepare students for graduate studies in animal and human health sciences as well as for employment in a variety of innovative and developing fields in biotechnology.

The basic science curriculum meets many requirements for entrance into professional schools. Experiential learning opportunities are encouraged and could include participating in laboratory research, teaching/tutoring in selected courses, volunteer experiences and leadership positions within student club(s), study abroad, internships, and honors curriculum. These opportunities are encouraged with the student's interests and career goals as the focus.

Learning Objectives

1. Obtain a solid background in anatomy and physiology and be able to integrate knowledge from the molecular to the systemic level.
2. Demonstrate strong writing and oral communication skills.
3. Develop scientific hypotheses and experiments to test them.
4. Work effectively in groups.

5. Demonstrate effective organization, leadership, and laboratory skills.
6. Think critically and logically.

Distinctive Requirements for Degree Program:

To Declare Major: competitive entry controls required and capped enrollment in place. Please contact Director of Student Success in the CVMBS Student Success Center for more information.

To Prepare for First Semester: The curriculum for the anatomy and physiology concentration assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester.

Those pre-calculus requirements are listed as benchmark courses in Freshman Semester 1 below. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam.

Major in Biomedical Sciences, Environmental Public Health Concentration

Environmental Public Health is a branch of public health that studies how biological, chemical, and physical factors in natural and built environments impact human health and disease. Students will learn how to help prevent injuries and disease by managing environmental hazards and promoting healthier air, water, soil, homes, workplaces, and communities. The EPH concentration within the Biomedical Sciences major is one of only 25 programs nationwide to be fully accredited by the standards of the **National Environmental Health Science and Protection Accreditation Council**, and the only such program in Colorado.

Why study Environmental Public Health?

- According to the World Health Organization, 24% of all estimated global deaths are related to the environment, including 8 million people who die due to air pollution, 2 million due to waterborne diseases, and 3 million from work-related diseases and accidents annually.
- Abundant and varied career opportunities with local, state and federal health agencies as well as private sector businesses, consulting firms and universities with starting salaries of \$60,000 - \$75,000.
- Learn more in this quick video (https://www.youtube.com/watch?v=6bmgGb_aPtE).

Academics:

Students begin their studies with foundational science courses in biology, physics, general chemistry, organic chemistry, biochemistry, microbiology, physiology, math, and statistics, and then use these basic sciences as tools to solve environmental public health problems. Students are involved in actual and simulated field projects with data gathering and analysis, characterization of environmental public health problems, evaluation of alternative solutions, and presentation of results in written and oral formats. All Environmental Public Health students complete a professional internship for academic credit with a private sector company or public health agency.

Learning Objectives:

Upon successful completion, students will be able to:

1. Effectively communicate the health consequences of actions, behaviors, or environmental degradation to the public, political community, legal experts, or the media,
2. Demonstrate critical thinking and problem solving abilities for environmental issues as an individual and as a member of a problem solving team,
3. Integrate knowledge in social, physical, and biological sciences to evaluate environmental issues, and
4. Apply knowledge of scientific methods to evaluate compliance with environmental health standards and assess risks to workers and the public.

Special Opportunities:

- A capstone internship which allows students to put their coursework into practice under the guidance of a qualified mentor. A pre-internship seminar course prepares students in the essentials of resume & cover letter writing, interviewing, networking and securing the internship.
- Access to exclusive internships for students from accredited EPH programs, such as National Environmental Public Health Internship Program (<https://www.neha.org/nephip/>) and the US Public Health Service JRCOSTEP (<https://www.usphs.gov/students/>).

- BS & MPH dual degree program which offers the opportunity to earn your bachelor's degree and the Master of Public Health degree (<https://publichealth.colostate.edu/dual-degree/bs-mp/>) in 5 years.
- BS & MS dual degree program which offers the opportunity to earn your bachelor's degree and the Master of Science in Radiological Health, Health Physics specialization (<https://vetmedbiosci.colostate.edu/degree-programs/graduate/ms-radiological-health/health-physics/>) in 5 years.

Potential Occupations:

Occupations of Environmental Public Health alumni include, but are not limited to: environmental public health specialist, industrial hygienist, toxicologist, epidemiologist, air quality analyst, water quality manager, pollution prevention specialist, hazardous and solid waste specialist, occupational safety specialist, radiation safety officer, disaster assistance team leader, emergency manager, environmental consultant, and health educator. In addition, Environmental Public Health is excellent preparation for entry into medical school, veterinary school and other health-related professional programs as well as masters and PhD programs in a variety of scientific disciplines.

Major in Biomedical Sciences, Microbiology and Infectious Disease Concentration

Microbiology is the study of organisms, many of which are too small to be seen with the naked eye, including fungi, protists, and bacteria, as well as acellular agents such as viruses and prions. Microbiology emerged as a distinct science in the late nineteenth century, with the discovery that microorganisms are the cause of many infectious diseases, and that they play essential roles in ecosystems (such as the microbiome) and in industrial processes. Much work in this field is directed toward the cure, control, or eradication of disease in humans and animals, as well as understanding how microbes support health and life. Genetically engineered microorganisms can also be used for the production of improved foods, new drugs and vaccines, and for removing toxic wastes and spills from the environment. Unfortunately, some microbes have received considerable attention as potential agents of bioterrorism and biowarfare, and consequently much work is being done to counter such threats.

Students completing the undergraduate Biomedical Sciences degree program with a concentration in Microbiology and Infectious Diseases acquire knowledge and laboratory skills in the structure, physiology, genetics, pathogenicity, ecology, and taxonomy of microorganisms, as well as immunological techniques. Students engage in authentic hypothesis-driven research problems in inquiry-based laboratory courses. Required courses in biological sciences, chemistry, physics, and mathematics support the major. Ample opportunities exist for undergraduates to obtain laboratory research experience and many student researchers have presented at conferences and have been awarded research grants or fellowships.

A Bachelor of Science degree in Biomedical Sciences with a concentration in Microbiology and Infectious Disease prepares graduates well for continued education in a professional or graduate degree program or for employment in the field.

Learning Objectives

1. **Core Knowledge:** Students will apply and integrate the fundamentals of chemistry, microbial biology, and biochemistry and key principles from the following five core areas of the discipline: immunology, bacteriology, virology, microbial physiology, and microbial genetics.
2. **Relevance/Impact:** Students will demonstrate an awareness of issues at the forefront of the discipline and will evaluate the important interaction between microbes and society, from their beneficial use in industrial, biotechnological, and clinical applications to their role as etiologic agents of infectious disease in humans and animals.

3. **Communication Skills:** Students will assimilate factual and conceptual information and effectively communicate disciplinary knowledge to both science literate and general audiences through written or verbal presentations.
4. **Laboratory Skills:** Students will demonstrate proficiency using microbiological and immunological laboratory techniques employed in clinical, industrial, and research laboratories, and will be able to explain the principles behind the procedures, employ mathematical computations, properly execute the procedures, interpret the results correctly, and analyze the results to draw a conclusion.

Potential Occupations

The curriculum, with the proper selection of departmental electives, meets the requirements for entrance into most professional programs in veterinary and human medicine, and is ideal preparation for students desiring a career as a veterinarian, physician, physician assistant, pharmacist, medical laboratory scientist, optometrist, or dentist. The degree also prepares students for graduate (PhD or MS) studies in various biological sciences, and also provides students with the knowledge and skills to go directly into a career. Career opportunities will continue to grow because microbiology is at the center of complex issues facing our world today, as well as at the forefront of fast-paced innovation and development. Employment opportunities exist in biotechnology (vaccine and therapeutics, pharmaceutical, food, beverage, and medical device industries); government public health agencies (CDC, FDA, and state and municipal health departments); and primary research institutions, such as universities.

Accelerated Program

The Microbiology and Infectious Disease concentration includes an **accelerated program option** for students to graduate on a faster schedule. Accelerated programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three **summer sessions**. Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about **Accelerated Programs**.

Major Completion Map

Distinctive Requirements for Degree Program:

To Declare Major: competitive entry controls required and capped enrollment in place. Please contact Director of Student Success in the CVMBS Student Success Center for more information.

To prepare for first semester: The curriculum for the microbiology and infectious disease concentration assumes students enter college prepared to take MATH 124. Entering students who are not prepared to take MATH 124 will need to prerequisite requirements in the first semester. Those requirements are listed as benchmark courses in Freshman Semester 1 below. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam).

Major in Neuroscience

The Department of Biomedical Sciences offers a B.S. in Neuroscience (<https://vetmedbiosci.colostate.edu/degree-programs/undergraduate/bs-neuroscience/>) with two different concentrations available: Behavioral and Cognitive Neuroscience and Cell and Molecular Neuroscience. Both concentrations have a strong foundation in mathematics, physics, chemistry and biological sciences that utilize a common core for the first two years, differing in only a single course for each concentration, thus making it easy to switch between concentrations if a student's interest changes during the first two years. Both concentrations require completion of an undergraduate thesis, providing significant opportunities for experiential learning in research laboratories in which they work closely with faculty, and which sometimes lead to authorship of original publications. Electives allow students in one concentration to acquire breadth and depth in the other area, if desired.

Learning Objectives

Students will obtain:

- 1. A command of basic concepts in chemistry, physics, biology, biochemistry, molecular biology, and cellular biology as well as a more in-depth understanding of the structure and function of the nervous system.
- 2. An understanding of how the brain works, from molecules to the mind, and how its function becomes disrupted in diseases and following brain injury.
- 3. The ability to critically analyze and present the methods, results, and conclusions of scientific papers in the current neuroscience literature, and orally present technical material in a clear and comprehensible form.
- 4. Experience in the use of a variety of laboratory techniques, ability to critically interpret experimental results, and ability to design new experiments.
- 5. The ability to perform original research or to critically analyze published work to advance an understanding of a specific area of neuroscience by preparing and defending an undergraduate thesis.

Potential Occupations

Possible career opportunities for students with a B.S. in Neuroscience include, but are not limited to: research technician, medical or clinical lab technologist, production/quality assurance lab technician, pharmaceutical research worker or salesperson, human resource specialist, neurotoxicology technician, teacher, writer, and research analyst. Many Neuroscience majors go to professional schools in medicine, veterinary medicine, or health sciences, or into graduate

programs encompassing virtually all areas of biomedical sciences and psychology.

Concentrations

- Behavioral and Cognitive Neuroscience Concentration
- Cell and Molecular Neuroscience Concentration

Major in Neuroscience, Behavioral and Cognitive Neuroscience Concentration

Overview

The Behavioral and Cognitive Neuroscience concentration integrates an understanding of neuroanatomy with the mechanisms of sensation/perception and learning/memory, generally applied to human behavior. Its focus is at the functional level of neuronal systems and networks. It differs from classical psychology in providing a more in-depth cellular and molecular basis for understanding behavior and neurological disorders that influence behavior. Graduates with this concentration are well prepared for many graduate and professional degree programs in health professions, as well as for careers in a variety of clinical settings, non-profit disease oriented foundations, and private sector organizations in either research-related or human resource service-related positions.

Major in Neuroscience, Cell and Molecular Neuroscience Concentration

The Cell and Molecular Neuroscience (CMN) concentration integrates neuroanatomy with the cellular and molecular basis of nervous system function. Its focus is to understand cellular processes in neurons and glia at the molecular level. It differs from degree programs in biochemistry or biomedical sciences by its specific focus on the nervous system. Required courses in microbiology, immunology, biochemistry, and advanced cell biology provide an excellent background for students interested in pursuing careers in medicine or biomedical research through graduate or professional schools. However, graduates with this concentration should also be well qualified for any positions in academia, government or the private sector where knowledge of cell and molecular processes is required, whether or not it is applied to the nervous system.

Students in the CMN Concentration with strong research interests and a GPA of 3.250 or above may qualify for early entry into the M.S. degree

program in Biochemistry while pursuing the B.S. degree program in Neuroscience. Early entry requires that students have identified a faculty member willing to mentor them in their laboratory research for the M.S. degree and that they have obtained permission from the Neuroscience program and the Department of Biochemistry and Molecular Biology to apply to the graduate school for this. Students can apply to the graduate program (allowing them access to courses above those at the 500 level) during the semester that they complete 75 or more credits. Students will be moved from undergraduate to graduate standing the semester after they complete 120 or more credits. At that time they begin paying graduate tuition and fees and will lose all undergraduate institutional and scholarship aid, but they can qualify for many graduate assistantships and fellowships. Both degrees can be awarded during the same semester but the M.S. degree cannot be awarded before completing the requirements of the B.S. degree.

Minor in Biomedical Sciences

The minor in Biomedical Sciences provides students with a useful complement to majors in Animal Science, Biochemistry, Biological Science, Health and Exercise Science, Human Development and Family Studies, Neuroscience, Psychology, and other biomedical science areas. The program offers a variety of courses which serve to broaden the background of students pursuing professional careers in biomedical sciences, human and veterinary medicine, and a variety of health-related disciplines. Candidates begin the program with a course in physiology. The remainder of the required 21 credits is selected to complement the student's educational goals and interests.

Requirements Effective Fall 2018

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C (2.000) in either BMS 300 or BMS 360 will be required for those students who are seeking to graduate with a minor in biomedical sciences.

Master of Science in Biomedical Sciences, Plan A

The traditional Master of Science in Biomedical Sciences, Plan A is a research-based program and typically takes two to three years to complete. While less comprehensive than a Ph.D., students complete a meaningful and original research project, which culminates in writing and defending a thesis. This option is designed for motivated students who have the ability to develop critical thinking skills and conduct research in one of the three primary areas of study in our department: cardiovascular physiology, reproductive physiology, and neurobiology.

Students interested in graduate work should refer to the Graduate and Professional Bulletin. Visit the Department of Biomedical Sciences (<http://csu-cvmb.colostate.edu/academics/bms/Pages/master-science-biomedical-sciences.aspx>) for more information.

The Master of Science in Biomedical Sciences, Plan B, Anatomical and Physiological Sciences Specialization, is a one-year, non-thesis, coursework-intensive program, with an emphasis on upper-division and graduate-level coursework in gross anatomy, physiology, and neurobiology. The program can be completed in one year, culminating in written comprehensive exams. It was created to provide increased academic strength to students who aspire to attend professional school; however, it also serves students pursuing various careers in the biomedical sciences by providing them a solid biomedical foundation which can be applied to many career paths. Students must choose one of the following options to focus their studies: human anatomy, neurobiology, or animal anatomy.

Students interested in graduate work should refer to the Graduate and Professional Bulletin. Visit the Department of Biomedical Sciences (<https://vetmedbiosci.colostate.edu/degree-programs/graduate/ms-biomedical-sciences/anatomical-and-physiological-sciences/>) for more information.

Master of Science in Biomedical Sciences, Plan B, Reproductive Technology Specialization

The Master of Science in Biomedical Sciences, Plan B, Reproductive Technology Specialization is a one-year, non-thesis study of Assisted Reproductive Technologies (ART), culminating in writing a scholarly paper based on a research project or reproductive topic and the completion of an internship. It provides students with in-depth laboratory training in *in vitro* embryo production based on a bovine model, including techniques such as *in vitro* fertilization, embryo and semen cryopreservation and vitrification, embryo biopsy and micromanipulation, and basic maintenance of an assisted reproduction laboratory and all associated equipment. The curriculum prepares students for careers in applied reproduction, especially careers in human or bovine embryology, as well as application to professional or graduate school.

Students interested in graduate work should refer to the Graduate and Professional Bulletin. Visit the Department of Biomedical Sciences (<https://vetmedbiosci.colostate.edu/degree-programs/graduate/ms-biomedical-sciences/assisted-reproductive-technologies/>) for more information.

Department of Clinical Sciences

Office in Veterinary Teaching Hospital, 300 West Drake Road, Room A201 (970) 297-1274

vetmedbiosci.colostate.edu/cs/ (<https://vetmedbiosci.colostate.edu/cs/>)

Dr. Khursheed Mama, Interim Department Head

Faculty in the Department of Clinical Sciences participate in training professional veterinary medical students and graduate students. For the veterinary medical student curriculum, students are instructed in the diagnosis, medical and surgical treatment, and prevention and management of domestic and exotic animal diseases. Through field service clinical experience, students receive on-the-farm training in livestock herd health management and production medicine. Our major clinical training center is the Veterinary Teaching Hospital, which operates state-of-the-art primary and referral services in all areas of small animal medicine and surgery, equine, and agricultural animal clinical care.

Undergraduate

No undergraduate major is offered.

Graduate Graduate Programs in Clinical Sciences

Graduate programs offered in the department lead to Master of Science or Doctor of Philosophy degrees. Particular research focus areas within the department include epidemiology, musculoskeletal diseases, cancer biology, cardiovascular diseases, regenerative medicine, and infectious diseases of animals.

The department also offers a three-year combined master's degree and residency program in large and small animal surgery, anesthesiology, cardiology, dentistry, internal medicine, neurology, oncology, ophthalmology, dermatology, small and large animal sports medicine and rehabilitation, large and small animal theriogenology, and emergency and critical care medicine. These training programs partially fulfill requirements for board certification in these specialties. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Clinical Sciences (<https://vetmedbiosci.colostate.edu/cs/>).

Minor in Environmental Health

Environmental Health is a branch of public health that studies how biological, chemical, and physical factors in natural and built environments impact human health and disease. Students will learn how to help prevent injuries and disease by managing environmental hazards and promoting healthier air, water, soil, homes, workplaces, and communities. A minor in Environmental Health (EH) will benefit students majoring in a variety of biosciences who want to leverage and integrate EH skill sets into their professional endeavors (e.g., medicine, dentistry, law, research, industry) as well as those students interested in career options in environmental public health, private sector occupational health and safety, environmental toxicology, and environmental epidemiology.

Learning Objectives

Upon successful completion, students will be able to:

1. Effectively communicate the health consequences of actions, behaviors, or environmental degradation to the public, political community, legal experts, or the media.
2. Demonstrate critical thinking and problem solving abilities for environmental issues as an individual and as a member of a problem solving team.
3. Integrate knowledge in social, physical, and biological sciences to evaluate environmental issues.
4. Apply knowledge of scientific methods to evaluate compliance with environmental health standards and assess risks to workers and the public.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Graduate Certificate in Radiological and Nuclear Safety

Department of Environmental and Radiological Health Sciences (<https://vetmedbiosci.colostate.edu/erhs/>)

This certificate allows opportunities for students and professionals (e.g., employed by the military or in the nuclear sector) who are interested in obtaining basic knowledge of radiological and nuclear safety for specific applications in their workplace to further their education and training in their individual sub-fields without having to complete the formal requirements of a comprehensive graduate degree. Completing the certificate allows the students to have this credential appear on their transcripts, which may serve as confirmation for their employer of their professional training. Also, credits earned in the course of completing the graduate certificate may be applied towards fulfillment of the requirements for a graduate degree at a later date.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion, students will be able to:

1. Identify radiological and nuclear sources and their associated hazards.

Master of Science in Environmental Health, Plan A

This program provides graduate students with broad experience in environmental health. Our program is guided by the concepts and principles as delineated by the National Environmental Health Association, which defines environmental health as "the science and practice of preventing human injury and illness and promoting well-being by: identifying and evaluating environmental sources and hazardous agents and limiting exposures to hazardous physical, chemical, and biological agents in air, water, soil, food and other environmental media or settings that may adversely affect human health." Recognizing that environments may also have beneficial impacts on communities, we also seek to understand the positive impact of built and natural environments on mental and physical health.

The flexible nature of this program allows students to design their graduate coursework to meet specific professional goals and will prepare students to work in a number of settings including public and private

sectors as well as academia. Our goal is to provide students with critical analytic tools, subject-matter expertise, and problem-solving skills to be at the forefront of leadership and scholarship in the field of environmental health.

Ph.D. in Environmental Health

This program provides graduate students with broad experience in environmental health. Our program is guided by the concepts and principles as delineated by the National Environmental Health Association, which defines environmental health as “the science and practice of preventing human injury and illness and promoting well-being by: identifying and evaluating environmental sources and hazardous agents and limiting exposures to hazardous physical, chemical, and biological agents in air, water, soil, food and other environmental media or settings that may adversely affect human health.” Recognizing that environments may also have beneficial impacts on communities, we also seek to understand the positive impact of built and natural environments on mental and physical health.

The flexible nature of this program allows students to design their graduate coursework to meet specific professional goals and will prepare students to work in a number of settings including public and private sectors as well as academia. Our goal is to provide students with critical analytic tools, subject-matter expertise, and problem-solving skills to be at the forefront of leadership and scholarship in the field of environmental health.

As an inherently multidisciplinary field, our PhD program strives to have students have broad exposure to the core sciences/pillars in environmental health (epidemiology, toxicology, exposure assessment,

and policy) to be successfully collaborate and work across the field, while allowing students to pursue a depth of knowledge in a specific subject matter area that are required of all doctoral programs.

Ph.D. in Environmental Health, Occupational Ergonomics and Safety Specialization

The Ph.D. in Environmental Health, Occupational Ergonomics and Safety Specialization is based on a multidisciplinary group of faculty and courses aimed at enhancing the workplace in terms of safety, process and product quality, and the quality of work life. The foundation of the program is driven by the utilization of a systems approach in human-centered design and in the most current safety theories and practice. The program integrates a multidisciplinary approach from psychology, engineering, the health sciences and safety to better understand and optimize human well-being and overall system performance in the workplace.

The Ph.D. program has the flexibility for students to pursue research related to ergonomics and safety from approaches in psychology, engineering, the health sciences, and occupational epidemiology. Graduates from the Ph.D. program are typically employed in leadership positions in the field of occupational safety and health. Many of our doctoral level graduates are professors at universities, program managers and directors at multinational companies, researchers at private and public organizations, as well as managing consultants in industry.

Minor in Microbiology

A minor in Microbiology will be of considerable benefit to students majoring in biological science, natural science, food science, biochemistry, some fields of engineering, and other science-related fields.

The program is a good complement for graduates with an interest in food microbiology, immunology, medical microbiology and diagnostics, microbial genetics, or molecular biology. Additionally, some of the required and elective coursework overlaps with the interdisciplinary programs (IDPs) in molecular biology and food safety, and can be counted for both the minor and the IDP. Minors also complete classroom laboratories (MIP 302, which is required, and one additional elective lab from the approved departmental minor elective list).

Learning Objectives

Students will:

1. Obtain knowledge in microbiology, and integrate knowledge about the structure and function of microorganisms and its application to infectious disease.
2. Demonstrate strong writing and oral communication skills.
3. Work effectively in groups.
4. Think critically and logically.

Requirements Effective Fall 2020

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Master of Science in Microbiology, Plan B

The fully online non-thesis Master of Science in Microbiology program is designed to strengthen the scientific academic portfolio of those seeking professional degrees and provide differentiating preparation for those seeking careers in industry. Students work with one of the leading microbiology and immunology departments in the nation as they develop professional knowledge and skills.

With the growth of biotechnology and the increase in technology and specialization in applied microbiological sciences, there is a significant national need for additional educational opportunities for individuals wishing to pursue a career in these industries. In addition, many students wish to pursue additional post-baccalaureate studies due to a variety of interests such as improved preparation for professional (medical, veterinary, DO, etc.) schools or Ph.D. programs. The Department of Microbiology, Immunology, and Pathology's (<https://vetmedbiosci.colostate.edu/mip/>) Master of Science in Microbiology online program provides an excellent opportunity to meet these needs. As a recognized world leader in infectious disease basic and

translational research (including over \$144 million in active extramurally funded research programs, including a good variety of translational efforts that interface with industrial partners), the Department of Microbiology, Immunology, and Pathology is uniquely positioned to effectively provide high-quality advanced microbiology and immunology training.

The overall goal of the program is to build upon a student's undergraduate training in the life science to provide them with advanced knowledge – particularly in applied areas of the discipline – so that they achieve the skill set necessary to be competitive for future employment in the field or for admission to professional schools. This will be accomplished through:

1. A rigorous curriculum designed to provide cutting-edge knowledge in both theoretical and applied aspects of microbiology, virology, immunology, and molecular biology.
2. A strong emphasis on aspects of the discipline that are useful in real world employment scenarios.
3. A well-rounded curriculum that includes the development of vital professional skills such as verbal and written communication, responsible conduct of research, and biosafety/biosecurity.
4. Active communication with regional and national representatives from the pharmaceutical, biotech, government, and public health sectors to ensure that the program's curriculum remains pertinent and effective.
5. A high-level of communication in the program to facilitate active mentoring, networking and career discussions, and access to real-world research expertise within the Department of Microbiology, Immunology, and Pathology.

Learning Objectives

Upon successful completion, students will be able to:

1. Apply both theoretical and applied aspects of microbiology, virology, immunology and molecular biology.
2. Apply aspects of the discipline in real world employment scenarios.
3. Demonstrate vital professional skills such as verbal and written communication, and discuss policies/regulations in the discipline and biosafety.
4. Develop a high level of communication within the program through active mentoring, networking and career discussions.
5. Utilize cutting-edge facilities and expertise available in the department.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

GRADUATE AND PROFESSIONAL BULLETIN

The *Graduate and Professional Bulletin* is designed to provide post baccalaureate students and prospective students with the information which is most essential. It is not a comprehensive source.

A complete listing of graduate programs and degrees may be found by visiting the Graduate School (<https://graduateschool.colostate.edu/programs/>).

The policies and procedures in the Graduate and Professional Bulletin apply to all graduate students, except for Doctor of Veterinary Medicine (<https://vetmedbiosci.colostate.edu/dvm/>) (DVM) students.

CSU reserves the right at any time, without notice, to change, modify, or cancel any course, program, procedure, policy, financial requirement, or disciplinary arrangement set forth in this catalog whenever, in its sole discretion, it determines such action to be appropriate. Furthermore, CSU will not be responsible for any failure to present or complete any course or program or to perform any other activity, function, or obligation mentioned in this catalog. Since changes may occur at any time, students must check the relevant website (as noted throughout this catalog).

CSU Student Conduct Code

The Student Conduct Code (<https://resolutioncenter.colostate.edu/student-conduct-code/>) exists to notify students, faculty, and staff of the specific expectations Colorado State University holds related to student behavior and the rights and responsibilities that accompany being a student and participating in student clubs or organizations.

Functions and Organization of the Graduate School

The purpose of the Graduate School is to promote high quality education and specialized training and to further the scholarly research and creative artistry with which such education is intimately linked. The advanced study necessary for graduate degrees requires the discovery of new knowledge, the original application or adaptation of existing knowledge, or esthetic contribution to the culture. Accordingly, graduate students perform research or do artistic work. Similarly, the faculty who are responsible for graduate education are themselves researchers or artists whose responsibilities include the transmission of their own creative skills and abilities to their students. The graduate educational mission of CSU and the research/artistic mission of CSU complement and reinforce each other and go forward in mutual interdependence.

Through the offering of the best graduate education available, CSU seeks to provide the skills and training necessary to a rapidly changing society and also to provide the basis for individual gratification and fulfillment on the part of its graduates.

Graduate degrees are awarded by CSU as an overall institution. Accordingly, CSU has specified that certain academic practices and procedures shall apply to all graduate degrees regardless of the departments and colleges in which study is undertaken. As is the case in most quality universities, some consistency of requirements has

been found desirable. The Graduate School is the unit which applies and administers these requirements.

This activity involves several discrete kinds of functions. First, the Graduate School monitors all students' progress through the entire graduate career, from sending out preliminary information on admissions to graduation. It maintains student records on application, admission, credits earned, formal programs of study, academic standing, progress toward the degree, and graduation. Additionally, it provides a regular flow of information to students and faculty regarding these practices so that the necessary steps can be taken as easily and conveniently as possible.

The Graduate School maintains an active liaison with students both on matters of overall interest and at the level of individual concerns. The former typically involves close contact with the Graduate Student Council, the campus-wide organization of graduate students, or its officers. The latter centers around matters which particular students raise as specific single cases.

The Graduate School collects and maintains information on the condition of the graduate educational mission of CSU. It concerns itself with institution-wide policies and practices that may affect this condition and will implement particular arrangements or make recommendations to the Faculty Council as appropriate.

Formal student involvement in the Graduate School proceeds through the Graduate Student Council. The Student Council consists of one student representative and one alternate from each department offering programs leading to advanced degrees. The Council elects its own officers and nominates graduate students for memberships on Faculty Council and Graduate School committees.

CSU's graduate admissions program is designed to foster excellence in scholarship and promote diversity within the student population while assuring equal opportunity to all applicants.

The ultimate criterion for admission is applicant potential for attaining an advanced degree at CSU. However, the resources of CSU are limited and not all applicants who possess this potential can be admitted. Thus, selection is made taking into account a range of factors: past academic performance as indicated by transcripts of formal collegiate work, degrees completed, standardized examination scores (for example, the Graduate Record Examination or Graduate Management Admission Test), geographic residence, leadership qualities, recommendations from qualified references, economic status, ethnic origin, and racial background.

CSU does not set quotas for people possessing particular ethnic, gender, or racial characteristics. However, the vitality of CSU and the quality of the educational experience to be enjoyed by all students depend in part on the existence of a diverse student population. Thus, CSU actively seeks applicants from many backgrounds and with diverse characteristics. The institution is committed to a truly heterogeneous University community.

Application: U.S. Citizens or Permanent Residents

Students apply online (<http://gradadmissions.colostate.edu/apply/>). In addition to the online application, a non-refundable application fee must be electronically submitted.

The on-line application will be electronically submitted to the Office of Graduate Admissions and then forwarded to the appropriate academic departments. With this system, most documents are uploaded directly by the applicant.

The following are required for a complete application:

1. A non-refundable application fee.
2. Unofficial transcripts of all collegiate work completed post-high school. Separate transcripts are required for study abroad if the courses, grades and credits are not recorded on the transcripts of the university that sponsored the study abroad. Note: departments may require official transcripts prior to an offer of admission.
3. Official transcripts before students can register for second semester coursework. If the transcript does not show the degree and date awarded, a diploma must also be submitted.
4. A resume or curriculum vitae.
5. A written statement of purpose.
6. Two letters of recommendation. Applicants cannot submit letters of recommendation. Recommenders will be notified and prompted to provide a recommendation letter through the online system. The letter of recommendation will be automatically processed and submitted to the student's online file. Note: departments may require more than two letters of recommendation.
7. Test scores such as GRE or GMAT, if required by department, should be submitted with institution code 4075.

The application fee is not refundable even if the application is withdrawn or admission denied, nor is it applied to tuition and fees if the applicant subsequently enrolls. The non-refundable application fee must be paid, waived, or deferred before the application can be reviewed.

Applicants must have earned a bachelor's degree from colleges or universities accredited by one of the major regional accrediting agencies. Degrees from schools that do not possess overall, institutional accreditation or that have only specialized accreditation cannot be accepted. Accelerated Master's Program (AMP) students must earn their bachelor's degrees prior to, or concurrent with, the award of their graduate degrees.

An undergraduate grade point average of 3.000 (A = 4.000) is required for unconditional admission.

The Graduate School recognizes that many undergraduates experience additional pressures beyond their academic experience that can impact the GPA, such as being first generation, care-taking responsibilities, and financial need. In keeping with the land grant mission of CSU,

the Graduate School provides accessibility to a graduate education for applicants with a GPA of 2.800-3.000. Such applicants will be provisionally admitted and immediately placed on academic warning. Departments must recommend such applicants for admissions and commit to supporting the applicant's individual student success as indicated by the department within SLATE during the admissions process.

For applicants with a GPA below 2.800, the Access Admission Pathway (see Access Admission Pathway section) provides an admission pathway that balances accessibility with individual student success for applicants who have completed six credits of regular, graduate-level coursework at CSU and received a B or better in each individual course. Applicants who qualify for Access Admission will be provisionally admitted and immediately placed on academic warning. Departments must recommend Access Admission applicants for admission and supply a department support letter describing in detail how they will support the individual student success.

For applicants with a GPA below 2.800 and who do not qualify for Access Admissions, departments may petition the Graduate School to provisionally admit the applicant under unusual circumstances. Applicants must present strong countervailing evidence that successful completion of a degree program is likely. Examples of the kinds of evidence that might be considered are explanation of extenuating circumstances that affected the undergraduate GPA and how circumstances have changed to favor success as a graduate student, a grade of B or better in regular, graduate-level courses taken elsewhere or at CSU as a guest, high scores on standardized tests required by the program, excellent letters of recommendation, relevant professional experience, and other indicators of exceptional motivation and performance. A positive recommendation by the department is required in such cases. Some departments may waive their specific requirements under similarly exceptional and compelling circumstances. However, they are not required to do so and many cannot, due to space and resource considerations.

Applicants who are provisionally admitted and placed immediately on academic warning must achieve a term GPA of 3.000, averaged across all coursework that is traditionally graded (A through F), in the first semester, or the student will be dismissed from the Graduate School. This policy applies to all provisionally admitted graduate students.

Departments may have requirements in addition to or more stringent than those of the Graduate School. Applicants are strongly urged to contact the department in which they intend to study. Meeting the minimum CSU or department standards does not entitle an applicant to admission. Meeting such standards only insures consideration of the application. Since CSU cannot accommodate all who meet the minimum standards, it reserves the right to select individuals for admission on the basis of merit in such a way as to promote the best interests of CSU and the society as a whole and to maximize the potential for individual accomplishment.

Admissions decisions are made by the Graduate School after strong consideration of recommendations made by academic departments. Decisions made by the Graduate School to deny admission are final and not subject to appeal by the applicant. Among departments where the number of admitted students is capped each year, the selection of admitted students not only considers the qualifications discussed above, but the competitiveness of the applicant pool and available resources of the department.

Persons not seeking advanced degrees may be recommended for admission as non-degree students if space permits and if they meet the academic admission requirements. Advanced course work, research experience, teacher recertification, and specialized training are among the objectives of students requesting admission in this category.

Students who have not been admitted to graduate study but who take courses on some other basis have no assurance that such courses will be acceptable in a degree program. Credits taken prior to admission to Graduate School may be allowed, but acceptance of any courses in a graduate degree program is at the discretion of the student's graduate committee and the Graduate School and will not be calculated in the student's GPA.

Courses taken by CSU *undergraduates* may, under certain circumstances, be subsequently credited toward graduate degrees at CSU.

Undergraduates who enroll in 500-level courses that are not applied toward the bachelor's degree may request that an exclusion statement be placed on their academic records for no more than 9 credits. Students cannot exclude any courses below the 500 level under this policy. *Courses at the 600 level are automatically excluded from use for an undergraduate degree.*

Accelerated Master's Program (AMP) students who wish to double count up to 9 credits of 500 level courses must submit a AMP Double Count Courses GS Form 4 (GS form 4 (<https://graduateschool.colostate.edu/wp-content/uploads/2022/01/Example-GS4-Form.pdf>)) once admitted into the Graduate School and prior to completing your undergraduate degree. Double counted courses must appear on the formal program of study (GS form 6 (<https://graduateschool.colostate.edu/wp-content/uploads/2020/08/G6-Example-8-28-2020.pdf>)) filed during the first semester after Graduate School admission.

Permission to double count courses from the bachelor's degree does not assure acceptance of these credits toward a graduate degree program. No course will be accepted for transfer with a grade of B- or less. Both departmental and Graduate School approval is required at the time of filing the formal program of study.

Those with bachelor's or advanced degrees who desire to complete requirements for certification as teacher, administrator, counselor, reading specialist, or vocational certification must contact the School of Education. Individuals seeking professional certification in other areas must contact the departments concerned.

The submission of any false information or fraudulent documents in connection with the application process is grounds for rejection of the application or dismissal from the Graduate School regardless of the nature of other credentials.

Application: International Students

Students apply online (<https://gradadmissions.colostate.edu/apply/>). In addition to the online application, a non-refundable application fee must be electronically submitted.

The online application will be electronically submitted to the Office of Graduate Admissions and then forwarded to the appropriate academic departments. With this system, most documents are uploaded directly by the applicant.

The following are required for a complete application:

1. A non-refundable application fee.
2. Unofficial transcripts of all collegiate work completed post-high school. If the degree has been completed at the time of application and the transcripts do not show the degree and date awarded, a diploma must be submitted. If the native language is not English, the transcripts must be submitted in the native language along with a certified English translation. Additionally, separate transcripts are required for study abroad if the courses, grades, and credits are not recorded on the transcripts of the university that sponsored the study abroad. Note: departments may require official transcripts prior to an offer of admission.
3. Official transcripts before students can register for second semester coursework. If the transcript does not show the degree and date awarded, a diploma must also be submitted.
4. A resume or curriculum vitae.
5. A written statement of purpose.
6. Two letters of recommendation. Applicants cannot submit letters of recommendation. Recommenders will be notified and prompted to provide a recommendation letter through the online system. The letter of recommendation will be automatically processed and submitted to the student's online file. Note: departments may require more than two letters of recommendation.
7. Test scores such as GRE or GMAT, if required by department, should be submitted with institution code 4075.
8. Scores on the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), Duolingo, or Pearson Test of English (PTE) Academic. Test scores should be submitted with institution code 4075.
 - a. When the CSU graduate degree program is taught outside the U.S., the TOEFL, IELTS, Duolingo, or the PTE Academic requirement will be waived.
 - b. Students are exempted from the TOEFL, IELTS, Duolingo, or PTE Academic requirement if the official language of their country is solely English, if they have recently earned a degree at a university in the United States, or if they have recently earned a degree from a university in a country on the English language proficiency exempt list maintained by the Graduate School (e.g. United Kingdom).

Required items for Immigration Document Issuance

These items are not required for the application review process, but will be required if officially admitted. The following materials must be uploaded to your CSU application:

1. Certified proof of financial support
2. Passport copy

Departmental requirements for additional materials such as standardized tests (e.g. GRE or GMAT) are the same as for U.S. students. Regulations regarding deadlines and application fees are likewise the same as for U.S. students.

Information on application deadlines and application fees is contained in the U.S. Citizens or Permanent Residents section.

The U.S. Bureau of Citizenship and Immigration Services requires CSU to have proof of financial support before immigration documentation can be issued. Immigration documentation is needed to obtain a visa. The following link provides more information: <https://international.colostate.edu/iss/students/obtain-your-immigration-documents/>

All international students and their accompanying dependents are required to maintain adequate health insurance during their stay at CSU.

Only persons with degrees equivalent to U.S. 4-year bachelor's degrees are qualified to apply for admission. Further, it is a CSU regulation that international applicants should be among the top students in their classes.

CSU requires that proficiency in the English language be demonstrated either by the TOEFL, IELTS, Duolingo, or PTE Academic tests prior to admissions. The minimum TOEFL score for admission without condition is 80 for the (internet-based exam). Contact the Graduate School for guidance on interpreting paper-based exam scores. The minimum IELTS score for admission without a condition is 6.5. The minimum Duolingo score for admission without condition is 120. The minimum PTE Academic Score for admission without a condition is 58. Official scores, taken within two years prior to admission, must be submitted directly from the testing agency.

To be considered for conditional admission, a student must have a minimum TOEFL score of 50 on the internet-based test, a minimum IELTS score of 5.5, a minimum Duolingo score of 95 or PTE scores from 40-57.

After receiving conditional admission, the student must satisfactorily complete the Intensive English Program offered through the Office of International Programs. Enrollment in regular CSU academic courses is at the discretion of the admitting department and the Intensive English Program. Approval of both the department and the Graduate School is necessary for conditional admission.

Generally, however, applicants should achieve satisfactory TOEFL, IELTS, Duolingo or PTE Academic scores before arriving on the CSU campus.

The individual departments may have requirements or standards in addition to or more stringent than those of CSU. Students must contact the department in which they intend to study for additional information. Consult the Department Head or Program Contact Persons for the proper addresses.

The paragraphs in the preceding section on U.S. Citizens or Permanent Residents on academic requirements, how students are selected for admission, non-degree study, previous undergraduate work at Colorado State, certification, and the consequences of presenting any materials that are not genuine, also apply to international students.

Language Requirements

English is the language of instruction at CSU. Adequate knowledge of that language is expected. The various departments generally evaluate students in this regard, and they may require students to secure remedial instruction if necessary.

Students whose native language is not English must demonstrate capability through the TOEFL examinations or other means (see above).

Some departments may require a knowledge of one or more foreign languages for advanced degrees. For information the student should contact the department.

Access Admission Pathway

The Graduate School recognizes that many undergraduates experience additional pressures beyond their academic experience that can impact the GPA, such as being first generation, having caretaking responsibilities, and having financial need. In keeping with the land grant mission of CSU, the Graduate School Access Admission pathway provides accessibility to

a graduate education for applicants who do not meet the 3.000 minimum GPA requirement for non-provisional admission. Such applicants will be provisionally admitted based on departmental recommendation and a commitment to supporting the applicant's individual student success, as indicated by the department within SLATE during the admissions process.

Applicants with a GPA below a 2.8 and who have completed six credits of regular, graduate-level coursework at CSU with a grade of B or better in each individual course are eligible for Access Admission.

Departments must recommend Access Admission applicants for admission and supply a department support letter describing in detail how they will support the applicant's individual student success.

Applicants accepted by the Graduate School through the Access Admission pathway will be provisionally admitted and placed immediately on academic warning. The student must achieve a term GPA of 3.000, averaged across all coursework that is traditionally graded (A through F) in the first semester, or the student will be dismissed from the Graduate School. This policy applies to all provisionally submitted graduate students.

Students applying through the Access Admission pathway follow the regular admissions process outlined above and submit their application **online**. In addition to the online application, a non-refundable application fee must be electronically submitted.

Application Deadline Dates for Graduate School and Financial Support

Individual degree programs establish their own application deadline dates for Graduate School and financial aid support. General deadlines for the receipt of complete applications are as follows: Fall Semester, April 1; Spring Semester, September 1; Summer Term, January 1. Please consult the degree program or department website for exact deadline dates. Applications completed later than published deadlines may be considered depending on space and resources available. Late applications that cannot be considered may be updated by the applicant or the department to a later semester or term; otherwise the application will be withdrawn. Except for Accelerated Master's Program (AMP) admissions, applications cannot be accepted more than fifteen months in advance of the term in which study is to begin.

Students who wish to be considered for fellowships, assistantships, or other forms of merit- or competency-based financial support may be subject to earlier deadlines. See Application for Financial Support.

Personal Identifier/Social Security Number

The personal identifier for all CSU students is the CSUID. The CSUID is a nine-digit unique numeric identifier that begins with the digit 8 and is assigned by the ARIES student information system. The Social Security number (SSN) is no longer used at CSU as a personal identifier.

All students are requested to submit a Social Security number (SSN) at the time of admission or before initial enrollment at CSU. The Social

Security number is maintained as a secure data element in the student information system and is not accessible as directory information or to unauthorized persons. International students are encouraged to file for a Social Security number although they are not eligible for Social Security benefits. Students' disclosure of the social security number is required for financial aid purposes, employment, and state and federal reports required by law.

The Social Security number is released to agencies or individuals outside CSU only at the request of the student or in accordance with federal and state requirements in regard to financial aid awards; Internal Revenue Service for student employee salary reporting and 1098T/1098E reporting; and State Controller's debt collection procedure. CSU has strict policies protecting and prohibiting the use of SSN and uses every reasonable effort to hide and protect SSN.

Readmission

Graduate students enrolled in a degree or certificate program are required to be continuously enrolled. If there is an interruption in successive semester-to-semester registration in a degree program, enrollment will lapse and graduate students will need to reapply for admission. This applies to all graduate students, on-campus resident instruction or on-line. There is a non-refundable readmission fee.

Readmission is not required for Guest registration or courses taken outside of a degree program.

For a certificate-seeking post-baccalaureate student not enrolled in a degree-program, or, if there is a lapse in continuous enrollment in a certificate program, students will be required to complete a new application. There is a non-refundable application fee.

Transfer of Graduate Credit from Other Institutions

Credit may be transferred to a graduate program at CSU with the approval of advisor, committee, and Graduate School. There is no right to transfer credits; each case is assessed individually and accepted or rejected on its merits. The number of credits that may be transferred is limited. See requirements for the number of credits that may be earned at CSU after admission to the Graduate School under the descriptions of the various degree programs and in Credit Requirements section.

Individual credits used to fulfill requirements for previously earned degrees are not accepted for transfer credit.

Requests to transfer graduate credit earned at another university must be accompanied by official transcripts. Courses accepted for transfer must be at the equivalent level of CSU's regular courses at the 500 level or above. Arrangements for transfer of credit are made when the program of study is submitted (see Program of Study). In general, credits transferred must be part of a graduate curriculum. However, credits that are part of a post baccalaureate professional curriculum in Medicine, Veterinary Medicine, Dentistry, Pharmacy, Law, or Divinity may be so transferred if they address the intellectual bases of a graduate discipline.

Credits earned at institutions not accredited by one of the major regional accrediting agencies are not acceptable for transfer; except that a CSU academic department may petition the Graduate School to have graduate level credits earned from an international institution accepted as transfer credit. Grades in courses accepted for transfer will not be included in

calculation of the grade point average. No course will be accepted for transfer with a grade of B- or less.

CSU may establish bilateral cooperative agreements with other institutions within the Colorado State University System (CSU-Pueblo (<http://www.csupueblo.edu/Pages/default.aspx>) and CSU-Global (<https://csuglobal.edu/>)) that permit transfer to CSU of up to half of the total required credits for a specific master's degree.

Procedures

1. Any bilateral agreement must be formal, proposed by an academic department, signed by the Provost/Academic Vice-President, and approved by the Committee on Scholarship, Research and Graduate Education (COSRGE). It must refer to a particular named master's degree now offered by CSU.
2. Courses offered for transfer under these arrangements must be:
 - a. The exact equivalents of particular courses at CSU and so certified by the Faculty Council Curriculum Committee.
 - b. Taught by persons who are Faculty or Affiliate Faculty of CSU.
3. Persons who seek to avail themselves of such transfer privileges must be admitted to graduate school at CSU. No more than nine credits offered for transfer may be earned prior to such admission. This means that students must apply for and secure admission well in advance of actual transfer to CSU.
4. Persons who transfer credits under such a bilateral agreement may also transfer credits under the normal procedures as described in this Bulletin. Such transfers may not exceed six credits and the total number of transferred credits, under bilateral agreement and normal procedure combined, may not exceed half the total required for the master's program.
5. Credits submitted or transferred under such special agreements must be earned by a person enrolled as either a graduate student or a post baccalaureate student at the cooperating institution. Credits earned prior to the award of a bachelor's degree or those used to fulfill requirements for a previously earned degree are not accepted.
6. Additional regulations and restrictions as described in this Bulletin under the section Transfer of Graduate Credit from Other Institutions also apply to bilateral agreement transfers.

Credit for Graduate Courses Taken at CSU Prior to Admission to a Graduate Program

Certain CSU courses taken after receipt of a bachelor's degree but prior to formal admission to a graduate program may contribute to graduate degree requirements (see Credit Requirements for the degree pursuing). Grades earned in such courses will not be included in the calculation of grade point averages. No course will be accepted for transfer with a grade of B- or less.

Students of Veterinary Medicine

A student in the College of Veterinary Medicine and Biomedical Sciences who holds a bachelor's degree and who meets the requirements for admission to the Graduate School may pursue work concurrently toward the degrees of Doctor of Veterinary Medicine and Master of Science if approved in advance by the Dean of the College of Veterinary Medicine and Biomedical Sciences and the Dean of the Graduate School. Credits applied on one degree may not be used in meeting requirements for the other. Refer to the Doctor of Veterinary Medicine program (<http://csu-cvmb.colostate.edu/dvm-program/Pages/default.aspx>) or the Graduate School (<http://www.graduateschool.colostate.edu/>) for more information.

Accelerated Master's Degree Programs

Accelerated master's programs (AMP) partner an undergraduate and a master's degree graduate program within or between departments, programs, or SAUs in the same or differing colleges, in a streamlined path that reduces the time to earn a master's degree. Undergraduate students are admitted internally by the participating programs and are guaranteed conditional admission to the partnering graduate program during their undergraduate career. Final admission to the graduate program and Graduate School is granted when students meet the minimum graduate program and Graduate School admissions criteria upon completion of the bachelor's degrees.

Undergraduate students in AMPs may enroll for a maximum of nine credits of 500-level regular coursework while paying the undergraduate tuition rate. These credits will be counted toward the undergraduate degree. Regular, 500-level courses with grades of B or better will be transferred and double-counted toward the graduate degree, as courses taken prior to final admission to the graduate program.

If the nine credits taken fulfill the requirements of a graduate certificate, the graduate certificate may be awarded once the student is enrolled in the partnering graduate degree. Graduate students must apply for the graduate certificate program and pay the application fee for the certificate to be conferred.

To participate in an AMP, undergraduate students complete an internal AMP application created by the partnering undergraduate and graduate programs. The timing of the application and its requirements are defined by the partnering programs. The minimum undergraduate GPA acceptable for entrance into an AMP is 3.000. Students may be admitted into the AMP at any point the partnering programs of the AMP so choose.

Students must complete the Graduate School application and pay the Graduate School application fee during their final undergraduate year.

To be eligible to offer an AMP, partnering programs must submit, and have approved by the department head(s), college dean(s), and Graduate School, a one-time Memorandum of Understanding (MOU), available from the Graduate School. The minimum requirements for the MOU are:

1. Description of the purpose of the AMP.
2. List participating undergraduate and graduate program codes.
3. List the internal admissions requirements for students participating in the AMP. All undergraduate students must have a GPA of 3.000 or higher to be admitted by the programs.
4. Students will be advised of the following:
 - a. Admitted undergraduate students are guaranteed conditional admission to the partnering graduate program.
 - b. Students may enroll in up to nine credits of 500-level regular course work of the graduate program as undergraduates, while paying the undergraduate tuition rate. These credits will be counted toward the undergraduate degree. Regular, 500-level courses with grades of B or better will be transferred and double-counted toward the graduate degree, as courses taken prior to final admission to the graduate program.
 - c. Students must complete the Graduate School application and pay the application fee during their final year as undergraduates.

Graduate applications will not be accepted earlier than one year prior to starting the graduate program.

- d. Students must complete and submit the GS4 Double Count Form (<https://graduateschool.colostate.edu/wp-content/uploads/2024/03/Example-GS4-Form.pdf>) in RAMweb during their final undergraduate semester and prior to completing the undergraduate degree.
- e. Final admission to the partnering graduate program and the Graduate School is granted when students meet the minimum graduate program and Graduate School admissions criteria upon completion of their bachelors' degrees.
- f. Students must earn 21 credits after admission to the Graduate School for a master's degree.
- g. If applicable, students will be advised that if the nine credits taken fulfill the requirements of a graduate certificate, the graduate certificate can be awarded once the student is enrolled in the partnering graduate degree. Graduate students must apply for the graduate certificate program and pay the application fee for the certificate to be conferred.
- h. This is a continuous enrollment program requiring students to be continuously registered in fall and spring semesters - both upon the completion of the undergraduate degree and throughout the completion of the AMP. Deferral of enrollment into the master's program is not permitted and continuous registration (CR) may not be used until the second semester in which a student is officially admitted to a graduate program.

5. Provide contacts of department staff members that will be managing the AMP.

6. Approval signatures of the department head(s), college dean(s), and the Dean of the Graduate School.

Departments offering AMP programs with unique requirements, incentives or other elements in addition to those stated above must request approval from the Graduate School for the specific terms they wish to address. The final terms of the agreement will be stipulated in an MOU between the Graduate School and the partnering programs.

Dual and Joint Master's Degree Programs

Dual and joint degree programs partner two master's degree programs within or between departments, colleges, programs, or SAUs in the same or differing college. Such dual and joint programs have been formally reviewed and approved through the University's curricular processes. A dual degree program results in the simultaneous conferral of two separate degrees. A joint degree program results in the conferral of a single degree with both programs listed on the diploma. For either the dual or joint degree program, a defined number of credits is shared between the two program areas, so that the total number of credits is less than that for two individual degrees.

Applicants must meet the minimum qualifications of the Graduate School (see section on Application: U.S. Citizens or Permanent Residents (<https://gradadmissions.colostate.edu/apply/>)), as well as any additional qualifications of the dual or joint program.

For new students, applicants must apply online (<https://gradadmissions.colostate.edu/apply/>) to the dual or joint program (see section on Application: U.S. Citizens or Permanent Residents (<https://gradadmissions.colostate.edu/apply/>)).

gradadmissions.colostate.edu/apply/). There is a single application process and only one application fee is submitted. If the student is already enrolled in one master's degree, and wishes to switch to a dual or joint master's degree program, the student must complete the Request for Change of Department and/or Degree Program (GS7) form (<https://graduateschool.colostate.edu/wp-content/uploads/2024/03/Example-GS7-Form.pdf>) and submit it to the Graduate School.

The earning of a graduate degree is a wide-ranging, challenging intellectual experience. It certainly involves mastery of important subject matter. It may require the possession of knowledge in addition to that acquired through course work and also the ability to creatively synthesize and interpret that knowledge. Further, research or artistic projects are often an integral part of graduate study as may be field responsibilities or service obligations. Since graduate work extends beyond completion of course work in several ways, it is often the case that some form of culminating event, be it comprehensive examination, thesis, or other undertaking is part of the degree program.

- Graduate Enrollment Requirement
- Posthumous Degree

The graduate experience, involving as many dimensions as it does, requires careful and comprehensive planning. This planning is done by the student, the advisor, and the graduate committee. Of course, it should take place early in the graduate career. The necessity for planning underlies the advisory system, the limitation on the number of credits that may be transferred, and requirements that certain amounts of the work in any degree program must be completed at CSU after admission to the Graduate School. These are all explained below.

Comprehensive planning assures that the greatest possible benefit will be gained from graduate study. Depending on discipline, career objectives, and particular curricular needs, unique study plans may be arranged for students on an individual basis.

Just as the scope of activities involved in earning a graduate degree is extensive and complex, so is the necessary evaluation of student performance. Students must not only demonstrate the ability to earn satisfactory grades in their courses, but must also show that they possess those more elaborate abilities and skills essential to the various academic and professional fields. The advisor and graduate committee have the primary responsibility for assessing these broader dimensions of student progress.

The requirements set forward in this section are those of CSU as a whole. However, the various programs may have additional requirements not listed here. These requirements must also be met in completing a degree. Please consult the department for appropriate information. See the Areas of Study within the Graduate Degrees (<http://graduateschool.colostate.edu/programs/>) section in the Graduate School website.

The Advisory System

Since thoughtful planning is vital to a graduate student career, a comprehensive arrangement for advising has been established. Each student is initially assigned a faculty member as advisor by the head of the department in which the major is pursued.

A permanent advisor will be selected from among departmental faculty once initial entry to the program has been completed. (The temporary advisor may assume this role if appropriate.)

The advisor is the chief source of advice in the planning process. This individual works closely with the student throughout the graduate career on all matters related to the degree program.

A close, cordial, and professional relationship is therefore of the utmost importance. Both student and advisor should work at achieving mutual understanding and respect.

Except for those pursuing Plan C master's degrees, each student has an individual graduate advisory committee. Members of the committee should be chosen on the basis of the student's interests, the student's experience with faculty members, and the advisor's knowledge and expertise. The makeup of a graduate committee must be approved by the department head and, of course, agreed to by the potential members themselves. It is well for the student to assume the responsibility of securing these approvals and agreements.

The purpose of the committee is to make available to the student a broad range of knowledge and expertise. It aids in general advising of the student and assists in planning the major elements of the program. The committee also evaluates student progress throughout the graduate career. It may provide assessments at various stages and it administers the final examination. The committee is not responsible for reminding students of published deadlines nor for monitoring procedural details. The student should manage such matters independently.

The committee must consist of at least three faculty members for a master's degree program and at least four for a doctoral degree program. The members are as follows:

1. The advisor who serves as chairperson of the committee and who must hold academic faculty rank as a professor, associate professor, or assistant professor¹ of any appointment type within the department or program granting the degree;
2. One or more additional members from the department;
3. Any non-departmental faculty member who may be appropriate; and
4. One member from an outside department who, appointed by the Dean of the Graduate School, represents the Graduate School. The outside committee member appointed by the Dean of the Graduate School must hold a tenured, tenure-track, contract, continuing, transitional,

joint, or emeritus/emera faculty appointment at CSU. The outside member should serve as an impartial external evaluator on the committee, ensuring quality of scholarship and fairness in process.

5. Non-CSU employees may obtain faculty affiliate appointments in an academic department in order to be eligible to serve on graduate committees. They may also be appointed to such committees through a nomination process that is reviewed and approved by CoSRGE (Faculty Council Committee on Scholarship, Research, and Graduate Education).

¹ Departments may specify in their Codes whether Senior or Master Instructors may serve as graduate student advisors.

Please contact the Human Resource staff member of the appropriate department to determine the appointment designation of a potential committee member.

Due to the interdisciplinary nature of some scholarship at CSU, conflicts of interest in advisory committees between members or between the student and one or more members may not be avoidable. When a conflict of interest exists, a written report must be submitted by the chair of the advisory committee to the Dean of the Graduate School that includes: 1) the names of those involved in the conflict of interest, 2) the nature of the conflict of interest, 3) a plan to manage the conflict of interest. Failure to disclose a conflict of interest is a violation of CSU Policy (Faculty and Staff Manual: D.7.7. (<https://facultycouncil.colostate.edu/faculty-manual-section-d/#D77>), Appendix 2, Appendix 6 (https://facultycouncil.colostate.edu/faculty-manual-appendices/#Appendix%202:~:text=rights%20and%20expectations-,Appendix,-2%3A%20Discrimination%20and)))). Individuals who are not academic faculty but who have special expertise may serve on committees in addition to the prescribed members, but may not vote regarding examination results.

Plan C master's students are required to have an advisor but not a committee.

The advisor is identified and the committee is appointed through filing a GS Form 6 (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS6>) with the Graduate School. It is the student's responsibility to identify an advisor and a committee, all of whom are willing and qualified to serve. The student's department chair or designee will use their best efforts to facilitate selection of the committee and subsequent changes therein. With notification, temporary replacement of a member may be arranged. A member, including the advisor, may resign from the committee in accordance with any applicable provisions in the student's departmental code. In such cases, the affected student and their department chair will be notified promptly by the departing member. It is then the student's responsibility to obtain a replacement. Any permanent changes are recorded through the filing of GS Form 9A (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS9A>) with the Graduate School.

Persons who are not academic faculty (as defined in the Academic Faculty and Administrative Professional Manual (<http://facultycouncil.colostate.edu/faculty-manual/>)) of CSU may be appointed full voting members of graduate student advisory committees in the following manner. A person may be nominated for membership on a specific student's committee. This is accomplished by submission of the following materials to the department head: 1) a resume, 2) relevant supporting material, 3) a statement from the nominated individual that indicates whether or not there is a conflict of interest with any of the committee members or student. If there is a conflict of interest, the

chair of the advisory committee must submit a written plan to manage the conflict of interest. If, using procedures and criteria outlined in the departmental code, the department head judges the appointment appropriate, they shall forward a recommendation and all materials to the Dean of the Graduate School. The Dean of the Graduate School shall bring the nomination to the appropriate Faculty Council Committee, which shall act on the nomination.

A person so approved shall be eligible to serve on the committee for the duration of the student's work toward the degree. The Graduate School shall maintain a roster of such appointments. Although approval is granted with respect to a particular student's committee, such members may serve on other student committees in the same department with additional departmental approval provided that such service shall not extend beyond five years of the original appointment.

Such non-faculty appointments are subject to the following restrictions.

1. Such an appointee may not serve as an outside member of graduate committees.
2. Service may not be as the sole advisor of the student.
3. The appointee must have a degree equivalent to that sought by the student. In the case of professional doctorate graduate committees, an appointee without an equivalent degree may be nominated if the appointee has a substantial and relevant employment record in an applied setting.
4. The appointee must not be a student at CSU.
5. No more than one such person may serve on any graduate student's committee.
6. The person appointed should be an addition to the minimum number now required on graduate committees and not a replacement for required faculty. The advisor may invite others to participate in the examination in a nonvoting, advisory capacity.

Program of Study

Each student must prepare a Program of Study, a document which lists all courses taken in pursuit of the degree. This is the formal statement of what is done to achieve the degree, the summary of all academic planning. The advisor and the committee are heavily involved in the development of the Program of Study. The Program of Study must be filed with the Graduate School before the time of the fourth regular semester registration. Students who fail to meet this requirement may be denied subsequent registration. For Accelerated Master's Programs (AMP) Admission students, program of study forms (GS Form 6 (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS6>)) must be filed by the end of the second week of the students' first semester after admission to Graduate School. Courses listed and approved on this form for graduate requirements will be automatically excluded from the undergraduate degree program of the student. The Graduate School reviews each program of study (GS Form 6 (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS6>)) and determines whether the program of study conforms to University policy. That is, an early graduation check is performed. Problems are reported to students so that they can be corrected at an early date.

While it is important to plan the Program of Study early in the graduate career, it is not necessarily permanently fixed. Plans may develop and change. Modifications must be formally recorded, however, and the advisor, department head, and the Graduate School must approve. Courses which have been taken and for which a grade has been received (A through F, I, S or U) may not be removed from the Program of Study.

Changes in program of study or committee membership should be made with extreme care since no additional comprehensive checks are made until the time of graduation.

The Program of Study is submitted on GS Form 6; any changes are recorded on GS Form 25 (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS25>), Application for Graduation.

Scholastic Standards

To meet the requirements for graduation and to remain in good academic standing, a student must demonstrate acceptable performance in course work after being admitted to a graduate program. This requires a cumulative 3.000 grade point average in all regular course work. Regular course work is defined as courses other than independent or group studies, research courses, open seminars, thesis/dissertation credits, study abroad, U.S. travel, supervised college teaching, student teaching, practicum, internship, field placement, unique title courses offered through Continuing Education (CSU Online), and any courses graded pass/ fail.¹ Overall a 3.000 grade point average must be maintained in regular and non-regular courses graded traditionally (A through F). The grade point average in required courses included on the approved program of study (GS Form 6) must also equal at least 3.000.

¹ CSU recognizes two types of seminars at the graduate level. "Open" seminars are not content specific and may not address similar material from term to term. They may be organized around the ongoing research of those enrolled, current research of appropriate faculty members, presentations by visiting scholars, reviews of the latest developments in the disciplines, or other targets of intellectual opportunity. "Topical" seminars are advanced study experiences which deal with established content areas of the disciplines which are subject specific.

1. Overall course GPA, defined as the GPA calculated from all regular and non-regular courses graded traditionally (A through F).

- Regular courses with course numbers less than X82.
- Non-regular courses with numbers X82 to X99.

2. Regular course GPA, defined as the GPA calculated from all regular courses graded traditionally.

3. Program of Study overall GPA, defined as the GPA calculated from all traditionally graded regular and non-regular courses listed on the approved program of study.

4. Program of Study regular GPA, defined as the GPA calculated from all traditionally graded regular courses listed on the approved program of study.

A minimum GPA of 3.000 in categories 1 and 2 are required to remain in good academic standing. For graduation, a minimum GPA of 3.000 is required in all four categories.

Separate GPAs are calculated based on courses taken as a master's or doctoral student. For example, changing from a master's degree to a doctoral degree, or vice versa, will create separate GPAs based on grades received in coursework taken at each degree level.

In addition, good academic standing requires *satisfactory* progress in the overall graduate program. Students' individual graduate advisory committees may render judgments as to whether satisfactory progress is being made toward the degree, taking into account all aspects of

academic performance and promise, not necessarily coursework alone. A positive judgment is required to remain in good academic standing.

Failure to maintain good academic standing due to a cumulative grade point average less than 3.000 results in being placed on an Academic Dismissal Warning. The Academic Dismissal Warning period extends for one semester beyond the one in which this status is acquired. Exceptions to the Academic Dismissal Warning period are:

- New regularly admitted students will not be placed on Academic Dismissal Warning until they have completed 12 regular credits or two semesters of graduate work, whichever comes first, and
- Students who were admitted after waiver of the minimum undergraduate GPA requirement are considered provisionally admitted. Such students must achieve a regular and overall GPA of 3.000 or higher their first semester or they will be dismissed from their programs and the Graduate School.

During the Academic Dismissal Warning period, the student must register for traditionally graded courses that affect the grade point average. With permission of the student's advisory committee, the student may register for continuous registration instead of traditionally graded courses. Continuous registration may be used to extend the Academic Dismissal Warning period for a maximum of two semesters, after which traditionally graded courses must be taken. Students on Academic Dismissal Warning are subject to dismissal by the academic department or the Dean of the Graduate School at the end of the Academic Dismissal Warning semester unless good academic standing has been regained. This requires adequate improvement in cumulative grade point averages (3.000) and/or satisfactory progress as determined by the student's graduate advisory committee. Students not making satisfactory progress due to their grade point average are encouraged to contact their advisors and/or advisory committees in order to set up a meeting to create a progress plan.

Accelerated Master's Programs (AMP) students in combined bachelor's/master's degree programs who have accumulated at least 120 credit hours of course work and who fail to maintain a 3.000 GPA in their graduate course work as outlined above will be placed on Academic Dismissal Warning by the Graduate School and will have one semester in which to improve their cumulative grade point averages to no less than 3.000 in their graduate course work. Failure to bring the cumulative graduate GPA to at least 3.000 will result in dismissal from the Graduate School with no re-enrollment permitted prior to completion of the bachelor's degree. AMP students who are dismissed from the Graduate School, and who are still in good standing within their undergraduate programs, will be permitted to complete their undergraduate degrees. These students can petition the Registrar to reinstate courses to be applied toward their undergraduate degrees.

Grades of C or higher must be earned in all courses on a Program of Study. Outside of the Program of Study, D grades may be accepted in background courses, but such courses must be included in the computation of the cumulative grade point average. There is no repeat/repair option in Graduate School. If a student repeats a course that is on the Program of Study, both courses will be listed on the Program of Study. The Program of Study GPA will be calculated with the higher course grade only, and not with the average grade of both courses. The grades for both courses are included in the GPA calculation for the overall course GPA and regular course GPA from courses taken within and outside of the Program of Study. Graduate students may take 100 and 200 level courses for general enlightenment or to satisfy a background requirement. These courses are not to be included in the student's program of study, and grades earned in such courses will not be considered in computing the

graduate grade point averages described above. Once admitted to a graduate program, grades earned in courses 300 level and above will be considered in computing the graduate GPA. Standards and requirements for off-campus graduate study are the same as those standards and requirements on campus. The academic department head has the basic responsibility for the implementation of this policy. Note that only courses with a grade of B or better may be accepted as transfer courses and such courses are not included in the student's calculation of grade point averages.

For thesis, dissertation, research, and independent study graduate courses, the number of student credit hours earned will be determined using a base rate of 48 hours of student effort per credit hour. The faculty advisor, or other department official, shall estimate the total number of hours of student effort required over the length of the semester. This effort shall include consultation with the advisor, as well as library, laboratory, field, or studio work. The total number of hours shall be divided by 48 and the resultant quotient (rounded off to a whole number) shall define the number of credits to be awarded.

Diagnostic Examination

A diagnostic examination is administered by a number of departments before the first registration to determine the areas in which there may be inadequate preparation. Results from the diagnostic examination are used in planning remedial course work when needed and in preparing the Program of Study (GS Form 6 (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS6>)).

Final Examinations

Each candidate for a degree, except for Plan C master's students, must pass a final examination which must be held by the published deadlines of the student's graduating term. The examining committee is normally the student's graduate committee with the advisor serving as chairperson. If a department chooses to administer a common examination to its Plan B master's candidates, a departmental faculty examining committee may serve this function. The common exam must be cumulative in nature and rigorous to assess mastery of program learning objectives. Plans and arrangements for a common final examination for Plan B candidates must be approved and on file with the Graduate School in advance of the examining date.

Voting at all final oral examinations shall be limited to the members of the student's committee, and a majority vote is necessary to pass the examination. A tie vote is interpreted as failure to pass the examination. Committee members who are not academic faculty do not have a vote on the final examination.

Providing the committee approves, a candidate who fails the final examination may be reexamined once and, for the reexamination, may be required to complete further work. The reexamination must be held no later than 12 months after the first examination. The examination must not be held earlier than two months after the first examination unless the student agrees to a shorter time period. Failure to pass the second exam results in dismissal from the Graduate School.

The student is responsible for submitting the Report of Final Examination (GS Form 24 (<http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS24>)) to the Graduate School Office within two working days after results are known; this must be by the published deadline of the student's graduating term.

Participation in final examinations by the student and/or one or more members of the examining committee may be virtual via electronic link so long as all are participating simultaneously and all committee members and the student have agreed to this in advance.

Time Limit

There is a ten-year time limit for completion of the master's or doctoral degrees.

Courses to be applied toward fulfilling the requirements for the master's and doctoral degrees, including any which may have been transferred from another institution, must have been registered for and completed within the ten years immediately preceding the date of completion of requirements for the degrees.

Continuous Registration

All students admitted to a graduate program at CSU are required to be continuously registered in the fall and spring semester throughout their degree programs. This policy applies from the time of first enrollment through the graduation term. Students may fulfill this requirement by registering for any graduate credit-bearing course (regular or non-regular). As an alternative, students may opt for a Continuous Registration (CR) status. Registration for CR status is accomplished in the same way as registration for courses. Section ID numbers appear in the class schedule under the CR subject code. Students registering for CR will be assessed a fee for each semester of CR registration. Students who register for CR on or after the first day of the term will be charged a Late Registration Fee. Students must be either enrolled for at least one credit or must register for CR during the term (fall, spring, summer) they graduate.

Students enrolled in CR have access to library services and campus computing services; they pay a mandatory University Technology Fee. CR students may also choose to purchase CSU student health insurance and/or access the CSU Health Network for a fee.

The maximum number of CR semesters a student may enroll in during their degree program is ten (10). When a student is in their first (1st), fourth (4th) and eighth (8th) semesters of CR, the student's advisory committee is required to review the student's progress and intentions related to degree completion, with input from the student. Upon completion of the review, a report that provides a student plan which includes academic expectations and an accompanying timeline for satisfactory progress for the degree will be forwarded to the department head/chair and student. A registration hold will be placed on a student with more than 10 semesters of CR unless the student's department head has submitted the student's progression plan and a petition to the Dean of the Graduate School to extend the number of CR semesters to a specific number beyond 10.

Students may register for CR for the following reasons:

1. They do not require the use of University resources (other than those listed above), but are actively working on their degree requirements. Students who are utilizing CSU facilities to conduct their research must not enroll in CR; instead, they must enroll in the appropriate number of research, thesis or dissertation credits. See Contact Hour Guidelines (<https://curriculum.colostate.edu/media/sites/130/2017/01/CONTACT-HOURS-GRID.pdf>) on the Curriculum & Catalog website (<https://curriculum.colostate.edu/>) for information regarding faculty contact time needed to generate credit hours.

2. They will not be working on their degree requirements, but will be leaving the University for professional or personal reasons (e.g., mission service, medical or parental leave, work) or an official assignment for CSU.

Subject to the established time limits for the earning of graduate degrees and the various academic requirements, CR registrants need not apply for readmission should they wish to take additional graduate courses. Such students are ensured a place in their graduate programs as long as they remain in good academic standing. However, students who do not register will need to apply for readmission for their next semester of enrollment.

The availability of the CR option shall not supersede any other registration requirements to which students may be subject at the University, Department, or Program level. For example, the credit bearing registration requirement for graduate assistantships applies to all students appointed to these positions. Similarly, some units may adopt more stringent CR policies than that expressed here.

Graduate Enrollment Requirement

Graduate degree candidates must be either enrolled for at least one credit or must register for CR during the term (fall, spring, or summer) they will graduate.

Posthumous Degree

In exceptional circumstances, the Board of Governors of Colorado State University may award degrees posthumously (<https://catalog.colostate.edu/general-catalog/academic-standards/graduation/#undergraduate:~:text=National%20Student%20Clearinghouse,-Degrees,-Awarded%20Posthumously>).

Evaluation of Graduate Students and Graduate School Appeals Procedure

Evaluation of Graduate Students
Informal and Formal Complaints
Graduate School Appeals Procedure

Evaluation of Graduate Students

Graduate students are students, apprentices to the professions, and, when they hold an assistantship or other paid position, student employees. Each of these roles has its own rights and responsibilities. Graduate students are responsible for knowing any special expectations and requirements of their department and program. They are expected to remain in good academic standing by making satisfactory progress toward the degree (see Scholastic Standards) and must at all times have an advisor. In the event that an advisor resigns from that position, it is the student's responsibility to obtain a replacement.

Department codes shall designate a system for periodic evaluation of progress toward completion of the degree. The student and the advisor share responsibility for scheduling evaluations. Results of such evaluations will be sent to the department head and to the graduate student being evaluated.

When a student's graduate advisory committee or an appropriate departmental graduate committee finds that a student is not making

satisfactory progress toward the degree due to factors other than grade point average, and that satisfactory progress cannot be anticipated, a plan should be created, and the following steps should be taken.

1. Schedule a meeting with the student, advisor, and the department head that provides reasonable notice of the issues to be covered. If the student is a graduate assistant (GA), the supervisor is to be included in the meeting as well. The student has the right to include an advocate or mentor in the meeting.
2. During the meeting, inform the student of the concerns, create a progress plan with the student, and develop a timeline and inform the student of the potential consequences (e.g., recommendation for dismissal) if progress is not satisfactory. If the student has a disability, inform the student of their right to request reasonable accommodations from the Student Disability Center or OEO (if the student is a GA).
3. A written summary of the meeting will be shared with all parties and copied to the Dean of the Graduate School so that the Dean is informed. A copy of the summary shall be maintained in a departmental file.
4. The committee should keep in contact with the student to provide support and give feedback during the progress plan timeline and document such contacts and their outcomes.
5. At the end of the timeline, if progress is not adequate, the committee may recommend dismissal from the program and/or termination of an assistantship if applicable (See Termination of Graduate Assistants). The recommendation must include documentation of the steps taken with justification for the action. The recommendation is forwarded to the Department Head for approval and the Dean of the Graduate School for final action.

Graduate students have the right to appeal certain academic decisions, before any action is taken, as described under Graduate School Appeals Procedure. Appeals of grades and academic integrity decisions must utilize appropriate procedures described in the General Catalog. Students alleging termination of assistantships or dismissal from the graduate program on grounds of unlawful discrimination are advised to consult with the Office of Equal Opportunity. (For information on the "at will" employment status of graduate assistants, see Assistantships.).

Dismissals for misconduct and violations of the Student Code are addressed by Student Conduct Services (<https://resolutioncenter.colostate.edu/student-conduct-code/>).

Informal and Formal Complaints

This section explains CSU's policy on student complaints for matters not covered by other policies. If a student has a complaint related to sexual misconduct, sexual harassment, sex discrimination, or other discrimination, the student should contact the Office of Equal Opportunity (OEO) and consult CSU policies on Discrimination and Harassment, Title IX Sexual Harassment, Bullying in the Workplace, and Violence in the Workplace. In addition, students should use the CSU System's Compliance Reporting Hotline when the subject matter of the complaint concerns alleged fraud, abuse, waste of University resources, or violation of any law or regulation by the University in connection with its official business functions. Complaints related to research misconduct can be reported by contacting Research Compliance Services.

Otherwise, addressing conflict in a direct and professional manner is an important part of graduate student professional development. Occasions will arise when a student has a conflict with or complaint about a fellow student, a faculty member or staff, or their advisor. When

this happens, the student should first attempt to resolve the issue directly with the person involved by making an appointment with the person and communicating their concern in a calm and professional manner.

Students are encouraged to seek help from Conflict Resolution Services of the Student Resolution Center to learn how to communicate their concerns with the involved person. Students should also consult with their network of mentors, including graduate committee members or others who support the student in areas of academics, career development, and well-being, for guidance on how to resolve the conflict.

If speaking directly to the person involved does not resolve the issue, the student should seek informal resolution through the department chair or through Conflict Resolution Services. Conflict Resolution Services staff are available to facilitate conversations and help mediate conflict so that issues can be resolved informally. With the permission of the student, Conflict Resolution Services may involve the department chair, dean of the Graduate School, or others as appropriate in seeking a resolution.

If the conflict or complaint is related to employment as a graduate student assistant or student hourly position, the student should seek guidance from the Office of Equal Opportunity or the Office of the Ombuds.

Procedures for Filing a Written Complaint

If the issue or problem still exists after informal attempts at resolution, a student may initiate the formal complaint procedure as described in the CSU Student Complaint Reporting Policy and the accompanying online Student Complaint Form. All formal complaints must be submitted in writing and must be signed by the student (including electronic or digital facsimile signatures clearly attributable to the student, for example the student's name in an email message received from the student's CSU email account). The online Student Complaint Form is provided as a tool for presenting a written complaint but is not required.

Written complaints other than those submitted through the online Student Complaint Form must be sent to the following physical or email address:

Graduate School
Attn: Dean of the Graduate School
108 Student Services Building
1005 Campus Delivery
Fort Collins, CO 80523-1005
Email: gradschool@colostate.edu

The Graduate School will notify the student with an acknowledgement that the complaint was received.

Complaint Review and Resolution Process

The Graduate School is not an advocate for any party to a dispute but is an advocate for a fair process. Acting as a neutral third party, the Dean of the Graduate School or their designee will engage with the student and appropriate CSU officials to resolve the complaint and assure a fair process. Depending on the complaint, the Dean of the Graduate School or designee may involve the department chair, college dean, Vice Provost for Faculty Affairs, OEO, and/or Office of Legal Counsel.

If the resolution involves terminating the advisor-student relationship, the Dean of the Graduate School and the Vice Provost for Faculty Affairs will determine the distribution of responsibility of finding a new advisor, and graduate assistantship support if the student is a graduate assistant, between the student and the advisor's department.

A record of the complaint and its disposition will be maintained in the Graduate School. Information in the complaint will be made available to regulatory agencies and accrediting bodies, including the Higher Learning Commission and the Colorado Department of Higher Education, as required in accordance with applicable laws, regulations, and policies.

Protection from Retaliation

Colorado State University prohibits retaliation as set forth by the CSU Retaliation and Whistleblower Protection Policy. No student shall be retaliated against for bringing forward an informal complaint or for submitting a formal written complaint. This includes any forms of retaliation that threatens or takes materially adverse actions or omissions against a student that interferes with the student's education, training, and future career opportunities.

Graduate School Appeals Procedure

Graduate students may appeal decisions concerning unsatisfactory performance on graduate preliminary or final examinations (see this section), academic probation for reasons of unsatisfactory progress toward the degree other than insufficient grade point average, termination of or election to void an assistantship for reasons set forth in the terms and conditions applicable to graduate assistant appointments, or dismissal from the graduate program for academic reasons to the Dean of the Graduate School. Grading decisions in courses are subject to appeal according to the University's policy on Appeals of Grading Decisions, as set forth in the Academic Faculty and Administrative Professional Staff Manual (<http://facultycouncil.colostate.edu/faculty-manual/>).

A student has a total of 35 working days to make a formal appeal to the Dean of the Graduate School from the date when an appealable decision has been made that is of concern to the student. Prior to submitting an appeal to the Dean of the Graduate School, the student should discuss the decision with the academic officer(s) whose actions are challenged in an informal attempt to resolve concerns. (Academic officers may include the student's advisor, graduate committee, department head, supervisor, etc.) If the matter is not resolved to the student's satisfaction, the student may initiate a formal appeal by submitting the matter in writing to the Dean of the Graduate School. In the written appeal:

1. the student must clearly identify the actions being challenged,
2. the rationale for the challenge
3. the person(s) against whom the complaint is made, and
4. the redress sought.

If an appeal is not filed within 35 working days following the adverse recommendation or decision, then this recommendation or decision will become final. If an appeal is filed within 35 working days, then the decision regarding the appeal is final. The original adverse recommendation or decision being appealed by the student remains in effect until the appeal is final.

The Dean of the Graduate School shall implement the appeal procedures below, keeping records of the case. A review panel, composed of two faculty members with degrees at the level being pursued by the student appellant or higher and one graduate student pursuing a degree at that level or above, will be appointed. One faculty member will be appointed by the Dean of the Graduate School and another faculty member will be appointed by the dean of the college in which the student appellant's program is located. These appointees will be from departments other

than that of the student appellant, but they should be from related disciplines so they are reasonably familiar with the standard procedures in that department. In the event that either the Dean of the Graduate School or the dean is a principal in the case, the Provost will appoint appropriate faculty members. The Graduate Student Council will provide a list of graduate students pursuing graduate degrees who are willing to serve on review panels from which the Dean of the Graduate School will appoint a student who is from a different department than the student appellant, but who should be from a related discipline. In the event that the Dean of the Graduate School is a principal in the case, the Provost will appoint the student member.

The Review Panel will consider the case in detail. It must review any written record of the case. It must afford the student appellant an opportunity to appear in person before it and consider any relevant written materials the student may wish to bring to its attention. The panel will hear from the academic officer(s) whose action is being appealed and may confer with other involved parties. It shall evaluate any other information it deems important to its deliberations. Written summaries of the deliberations will be kept. To overcome the presumption of good faith in the performance judgment by the advisor, supervisor, and/or graduate committee, an appeal must demonstrate that the evaluation was based upon matters that are inappropriate or irrelevant to academic performance and applicable professional standards and that consideration of those matters was the deciding factor in the evaluation. If the panel finds in favor of the student by a majority vote, it will make appropriate recommendations to the Dean of the Graduate School, such as reassignment to another advisor and/or graduate committee, administration of another examination, or alternative assistantship assignment. The Dean of the Graduate School and the dean of the college involved shall jointly review the case, giving due consideration to the panel's report and recommendations. Following consultation with the Provost, as appropriate, the Dean of the Graduate School shall make the final decision of CSU. In the event where the Dean of the Graduate School is a principal in the case, the duties of the Dean of the Graduate School, with respect to this case, shall be transferred to the Provost. In the event that the decision recommends termination of an assistantship due to unavailability of funds or other conditions beyond CSU's control or due to a lack of performance of assigned duties and functions as set forth in the terms and conditions applicable to graduate assistant appointments, the termination must be approved by the Board of Governors, or the President, as its delegated representative.

Other appeal or reporting processes available to students are included below.

1. Students may appeal disciplinary issues, subject to the University Discipline Process, through the Student Resolution Center. (<https://resolutioncenter.colostate.edu/>)
2. Students may file a complaint regarding what a person may believe to be an act of discrimination or harassment, based on race/ethnicity, eg, color, religion, national origin, or ancestry, sex gender, disability, veteran status, genetic information, sexual orientation, or gender identity or expression to the Office of Equal Opportunity (<http://oeo.colostate.edu/>).
3. Procedures to report observed, suspected, or apparent Research Misconduct can be accessed through Research Compliance Services (<https://www.research.colostate.edu/safety-and-compliance/ri/>).

Master's Degrees

Master's Degrees

Master of Fine Arts Degree

Dual and Joint Master's Degrees

CSU offers a variety of master's degrees. The features and requirements of these degrees are summarized in the Programs A-Z section of the Catalog.

Master's Degrees

An important distinction is made between Plan A and Plan B, Plan C, and the Professional Science Master's. The former, Plan A option, requires the preparation of a thesis. The thesis is typically a written formal document which addresses, in an original fashion, some important concern of the discipline. A thesis involves significant independent work. A certain number of credits are allowed for the preparation of the thesis. The Plan B degree does not require a thesis; instead, either a scholarly paper, exam, portfolio, or similar project is required.

Plan C master's degree options are distinguished in two ways. First generally, only course work is required. No thesis, project, or final examination is required; however, some specific programs may require an internship, practicum, or other experience consistent with expressed goals of the program, as approved by the University Curriculum Committee. Second, Plan C options are designed for professional degrees; thus, this option is not available in the M.A. or M.S. Further, within any given department, Plan C degrees may not bear the same title as those with Plan A or Plan B options. Please note, however, that not every professional degree need offer the Plan C option.

The Professional Science Master's (PSM) degree option (30 credit minimum) is designed to meet the following curriculum requirements: 1) a majority of credits must be earned in advanced science, technology, engineering, math and/or computational sciences courses over the two year program; 2) there must be a professional skills component; and 3) a capstone activity based on an experiential component, that includes a field placement course (e.g. internship, practicum, affiliation, field work) must be a part of the curriculum. No thesis, project, or final examination is required. The PSM is to provide managers for organizations that provide technology-based outcomes in public, private, government, or non-profit sectors. PSMs must conform to the nationally accepted academic criteria for the PSM curriculum as determined by the Commission on Affiliation of PSM Programs (<https://www.professionalsciencemasters.org/>) (formerly named PSM National Office) (psmoffice@sciencemasters.com).

An active advisory board composed of individuals from industry, business, government, non-profit organizations, and CSU faculty is required; advisory board members serve to provide advice on the program curriculum, assist with student projects and placement, and interact individually with students. To be recognized as a PSM degree, programs must first be approved by the Commission on Affiliation of PSM Programs, and subsequently approved and routed through the paths required by the CSU Faculty Council, Curricular Policies and Procedures Handbook. PSM specializations are listed in the Graduate and Professional Bulletin.

Credit Requirements (Master's Degrees)

The minimum number of required credits for all master's degrees is 30. However, individual departments may have credit requirements in

excess of the minimum university requirement. For example, terminal professional degrees may have a minimum credit requirement that exceeds 60. The number of 500-level or above credits earned for master's degrees varies: a minimum of 50% for Plans A and B, and 21 or a minimum of 50% whichever is more for Plan C's and Professional Science Master's degrees. Additionally, at least 12 of the 500-level or more credits must be in regular courses for all master's degrees. Other courses may be at the 300-400 level or may be in courses not defined as regular. A minimum of 24 credits must be earned at CSU, 21 of which must be earned after admission to the Graduate School. Plan C master's and Professional Science Master's programs may not include independent study, research, or supervised college teaching credits toward the degree unless one or more of these are required by the program, as approved by the University Curriculum Committee. Additionally, Plan C master's may not include internship or practicum credits toward the degree unless one or both are required by the program, as approved by the University Curriculum Committee. Credits earned in pursuit of one master's degree may not be used for a second except in those cases where an M.A. degree is applied to the M.F.A. (see section on Master of Fine Arts Degree) or when the student is enrolled in an approved dual or joint master's degree program (see section on Dual and Joint Master's Degrees).

Final Examination (Master's Degrees)

Master's Plan A and Plan B students are required to complete and pass a final examination/defense. At the discretion of the committee, the final examination may be oral or written, or both. At least one week before the final examination the advisor must inform the student and the committee member of the nature and scope of the examination.

Master of Fine Arts Degree

This is a terminal degree for practicing professionals in the visual or literary arts. In general, it requires at least three years of full time study beyond the baccalaureate or at least one year of full time study beyond the Master of Arts degree.

This degree requires the preparation of a major artistic work. This work, whether in the form of a product of the visual arts, a performance, or a written manuscript, must

1. demonstrate a level of creativity sufficient to establish the student as a member of the appropriate artistic community, and
2. stand in its own right as a significant aesthetic or literary contribution. This work is presented as an M.F.A. thesis.

Credit Requirements (Master of Fine Arts Degree)

Total credit requirements vary from 48 to 60 according to the department in which the degree is earned. Further, individual departments may have requirements in excess of CSU minimums laid out in the Catalog. The number of 500-level or above credits earned for the Master of Fine Arts must be a minimum of 50%; of that number, 12 must be in regular courses. Other courses may be at the 300-400 level or may be in courses not defined as regular. In general, a minimum of 32 credits must be earned at CSU, 21 of which must be earned after formal admission to the Graduate School.

However, if a previously completed Master of Arts degree is submitted in partial fulfillment of the requirements, up to 30 credits may be accepted toward the program. If this option is used, no additional transfer credits

may be accepted. In this case, a minimum of 18 credits must be earned after formal admission to the M.F.A. program.

Final Examination (Master of Fine Arts Degree)

A final examination is required for the Plan A degree. The final examination may be oral or written or both. At least one week before the final examination, the adviser must inform the student and the committee members of the nature and scope of the examination.

Dual and Joint Master's Degrees

Dual and joint degree programs partner two intra-university master's degree programs within or between departments, programs, or SAUs in the same or differing colleges. A dual degree program results in the simultaneous conferral of two separate degrees. A joint degree program results in the conferral of a single degree with both programs listed on the diploma. For either the dual or joint degree program, a defined number of credits is shared between the two program areas, so that the total number of credits is less than that for two individual degrees.

Dual and joint degree programs must be reviewed and approved through the University's curriculum review and approval processes. Additionally, graduate program partners of a dual or joint master's degree program must submit, and have approved by the Graduate School, a onetime Memorandum of Understanding (MOU) that details the administrative oversight, financial agreements (including distribution of differential tuition and special fees), advisory and graduate committee requirements, other agreements, and curriculum of the dual or joint program. Contact the Dean of the Graduate School for details of the review and approval processes for new dual or joint degree program, and for details of the MOU format.

Students in a dual or joint master's degree program must meet all admissions requirements and all the curricular requirements for the dual or joint program. See the Dual and Joint Master's Degree Programs section of Admissions Requirements and Procedures for details on applying to a dual or joint master's degree program. All other Graduate School and Graduate and Professional Bulletin policies are to be met, including time limits.

A graduate committee is required unless both degree program areas of a dual or joint master's program are Plan C master's programs. The graduate committee must include faculty members from both academic areas, as well as an outside committee member not associated with either degree program area. See the Advisory System section of Requirements for All Graduate Degree, Graduate Study for more details.

See the Collaborative Degree Program section of Inter-University Graduate Programs for information on collaborative degree programs that partner a CSU graduate program with a graduate program at an international university.

Credit Requirements (Dual and Joint Master's Degrees)

Graduate programs that are accredited through a professional organization must align their curriculum with curricular standards of the accrediting body when participating in a dual or joint master's degree program.

No more than 50% of credits from the degree with lower credit requirements may be double-counted for both degrees. For example, if one master's degree requires 30 credits and the other degree requires 42 credits, no more than 15 credits can be double-counted toward both degrees. In addition to regular courses, double-counted credits may include practicum, internship, research, and thesis credits. Double-counting of credits will be granted only for credits earned at Colorado State University and completed with a grade of "B" or higher or a grade of "S" if applicable.

If a dual-degree student is dismissed from the Graduate School due to academic standing or failure to make academic progress, the student may be readmitted, in accordance with Graduate School policy, to only one of the programs (see the Readmission section of Admissions Requirements and Procedures). The student will no longer be eligible to participate in the dual or joint master's degree program.

Final Examination (Dual and Joint Master's Degrees)

A joint master's degree may have a single thesis, exam, project, or portfolio component that integrates content from both degree program areas, as appropriate to the degree type (plan A, B, or C).

If one or both of the academic areas of a dual degree has a thesis, exam, project, or portfolio component, a final thesis defense, examination, or project/portfolio presentation must be held covering the combined thesis, exam, or project/portfolio component. One thesis, exam, project, or portfolio is submitted to satisfy the requirements of both degrees of a dual degree program.

If a thesis, exam, project, or portfolio-based degree is combined with a coursework only degree in a dual degree program, the thesis, exam, project, or portfolio should integrate content from both degree program areas.

If a final examination is required for either a dual or joint degree program, the final examination may be oral or written, or both as determined by the examination committee. At least one week before the final examination, the advisor must inform the student and the committee members of the nature and scope of the examination.

Doctoral Degree

The doctoral degree is the highest academic degree offered by CSU. Those who earn it must demonstrate significant intellectual achievement, scholarly ability, and breadth of knowledge. The nature of the degree program will vary greatly depending on the type of doctoral degree and discipline involved. There are two types of doctoral degrees that may be earned, the doctor of philosophy (Ph.D.) and the professional doctorate (P.D.). There are several important distinctions between the Ph.D. and the P.D. The defining characteristics of each are as follows:

1. The Ph.D. and the P.D. degrees are distinguishable from each other based on the courses comprising the programs' curricula, student learning outcomes, and measures of student success. The New Degree Program Proposal must address these components as part of the Provost's and the University Curriculum Committee's review process for such proposals.
2. For the Ph.D., the scholarly, scientific, and creative outcomes are expected to contribute to the knowledge base of the field. Extensive original research or creative activity relevant to the discipline is required.

The preparation of a dissertation that presents the results of sustained research or investigation of an important intellectual problem is mandatory.

3. For the P.D., the experiential, scientific, and creative outcomes are expected to contribute to the highest level of professional skills and the application of such skills and knowledge in the profession and its practice. Applied research, clinical research, or extensive advanced experience relevant to the profession is required. The preparation of a dissertation that presents the results of an applied project relevant to the profession is mandatory for non-accredited programs; programs accredited through a national organization may require other capstone experiences or a dissertation.

Credit Requirements (Ph.D., P.D.)

A minimum of 72 semester credits beyond the baccalaureate degree is required for both the Ph.D and the P.D.

For students who submit a master's degree in partial fulfillment of these requirements: A master's degree from an accredited college or university may be accepted for a maximum of 30 credits. In addition, up to ten credits in courses earned after the date on which the master's degree was awarded may be accepted in transfer if approved by the student's advisory committee, the department, and the Graduate School (<https://graduateschool.colostate.edu/>). A minimum of 32 credits must be earned at CSU after admission to a doctoral program. At least 21 credits beyond the master's degree must be earned in courses numbered 500 or above.

For students enrolled in a continuous master's/doctoral program at CSU: All courses taken during the master's program may be applied to the doctoral degree, even if the total master's degree credits exceed 30. These courses must be specified on the doctoral program of study and approved by the student's advisory committee, the doctoral department, and the Graduate School. Continuous programs are those in which the student is admitted to the doctoral program and formally registers for the Fall or Spring semester immediately following receipt of the master's degree. All other prescribed credit requirements of the master's and doctoral degrees remain in effect in such cases.

For students who do not submit a master's degree in partial fulfillment of these requirements: Up to ten credits earned at an accredited college or university may be accepted for transfer if approved by the student's advisory committee, the department, and the Graduate School. A minimum of 62 credits must be earned at CSU after admission to a doctoral program. At least 37 credits beyond the bachelor's degree must be earned in courses numbered 500 or above.

A professional, post baccalaureate degree in Medicine, Veterinary Medicine, Dentistry, Pharmacy, Law, or Divinity may be accepted for a maximum of 30 credits. The institution granting such a degree must be certified by one of the major regional accrediting agencies. Students contemplating this option may be required to pass an equivalency examination to assure they possess levels of knowledge and skill generally expected of master's degree holders.

P.D. Requirements

Requirements for a P.D. may vary based on the presence or absence of an accreditation process. P.D. programs that are accredited through a national organization will identify curricular content, process, and outcome requirements for the degree to meet the accreditation standards. These curricular requirements may take precedence over

Graduate School requirements; however, the minimum number of credits and their level are Graduate School requirements regardless of accreditation standards. P.D. programs that are not accredited must conform to Graduate School requirements.

Departments or Special Academic Units with a P.D. program must form an active advisory board composed of CSU faculty and individuals from outside of CSU who are leaders in the discipline from applied settings. Advisory board members serve to provide advice on the program curriculum, assist with student projects and placements, and interact individually with students.

The Graduate School requires the following P.D. program components:

1. Programs that do not require relevant work experience for admission must include a significant experiential component within the curriculum.
2. Curricula must include a minimum of 18 credits of course work at the 500 level or above that reflect professionalism and applied or translational knowledge and fulfill the learning objectives of the programs. The 18 credits of coursework must meet the following criteria:

- a. A minimum of 6 credits is included within each of the two categories (professionalism, applied or translational knowledge),
- b. at least 9 credits must be regular coursework, and
- c. up to 9 credits may be non-regular coursework (Scholastic Standards) (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/graduate-study/procedures-requirements-all-degrees/#scholastic-standards>).

3. The preparation of a dissertation is required for non-accredited programs. The dissertation is a formal, written document which presents the results of an applied or clinical research project on an issue relevant to the profession and practice. The dissertation must represent an independent intellectual achievement and must make a meaningful contribution to the creation, use, and improvement of knowledge in the context of a profession and practice. Students typically earn a number of research credits while completing the work which underlies the dissertation.

4. At least one graduate committee member must have or have had a substantial and relevant employment record in an applied setting and meet the Graduate School requirements for membership (Graduate Advisor and Committee Makeup (<http://graduateschool.colostate.edu/policies-and-procedures/advisor-committee/>)). The committee chair must submit a request for approval of the individual that includes proof of the Advisory Committee's endorsement of the individual and a description of the individual's substantial and relevant employment record in an applied setting to the dean of the Graduate School.

Ph.D. Requirements

The preparation of a dissertation is required. The dissertation is a formal, written document which presents the results of sustained research or investigation on an important intellectual problem. The dissertation must represent independent, intellectual achievement and must make a meaningful contribution to the knowledge, accumulated wisdom, or culture of the field in which it is written. Students typically earn a number of research credits while completing the work which underlies the dissertation.

When programs within the same department have both a Ph.D. and a non-accredited P.D., Ph.D. students in the department offering the P.D. may enroll in one or more of the 18 P.D. credits that meet the professionalism and applied/translational knowledge requirement. However, these credits may NOT count toward the 72 credits beyond the baccalaureate required for the Ph.D.; they will be in addition to that number. Credits earned in P.D. specific courses cannot be part of the program of study for any Ph.D. student.

Doctoral Residency Requirement (Ph.D., P.D.)

There is no CSU residency requirement for doctoral degree programs; however, such requirements may exist at the department level. Students should check with their departments about such policies. Whether or not a residency requirement exists, registration policies as outlined above must be followed.

Doctoral Preliminary Examination (Ph.D., P.D.)

A preliminary examination shall be administered at least two terms before the final examination to determine whether the student is qualified to continue toward the doctorate. The usual procedure is to have written examinations in the field of specialization and supporting areas followed by an oral examination. In order to assure full information to all concerned (student, major professor, all committee members, department head, Graduate School), the intention to hold a doctoral Preliminary Examination is to be publicized two weeks in advance by the advisor. The student is responsible for obtaining the Report of Preliminary Examination (GS Form 16 (<https://graduateschool.colostate.edu/wp-content/uploads/2024/03/Example-GS16-Form.pdf>)) from their RAMweb (<https://ramweb.colostate.edu/registrar/Public/Login.aspx>) account and returning it to the Graduate School, appropriately completed, after the conclusion of the examination.

Providing the committee approves, a candidate who fails the preliminary examination may be reexamined once and, for the reexamination, may be required to complete further work. The reexamination must be held no later than 12 months after the first examination. The examination must not be held earlier than two months after the first examination, unless the student agrees to a shorter time period. Failure to pass the second exam results in dismissal from the Graduate School.

Participation in oral examinations by the student and/or one or more members of the examining committee may be via electronic link so long as all are participating simultaneously and all committee members and the student have agreed to this in advance.

Doctoral Candidacy (Ph.D., P.D.)

Doctoral students at CSU are considered to achieve "candidacy" for the degree upon passage of preliminary examinations. Candidates generally retain that status through the completion of the degree. However, candidacy is lost if

1. the student is placed on probation due to insufficient grade point average;

2. the student's graduate advisory committee finds insufficient progress is being made toward the degree; or
3. the student is dismissed for academic or disciplinary reasons.

The students who lose candidacy may regain it, when appropriate, through the established procedures for improving grade point average, demonstrating satisfactory progress, or achieving readmission.

Doctoral Final Examination (Ph.D., P.D.)

At least one month before the final examination, the advisor will inform the student and the committee members of the nature and scope of the examination. Normally, the final examination will cover primarily the dissertation, but additional subject matter, specified by the committee at the time of the preliminary examination, may also be covered. Dissertation defenses are open to all members of the CSU community and the public at large. In order to assure timely notification across the entire campus, advisors should announce this information to the CSU community and public at large at least two weeks in advance. Advisors may publicize the defense through CSU's electronic announcement and message delivery system. The chairperson of the committee shall have the prerogative to decide whether those in attendance (outside of the committee) should be allowed to ask questions of the candidate during an oral examination.

Graduate Certificates

Graduate Certificate Program

Graduate Certificates are optional and are offered by certain departments, special academic units (SAUs), or colleges. A Graduate Certificate consists of a minimum of 9 specified credits and not more than 15 credits, all of which must be at the graduate level (500- to 700-level). A minimum of 9 credits must be regular coursework; credits beyond 9 can be non-regular coursework. A student must earn a cumulative GPA of 3.000 or better and a minimum of a "C" in all courses in the Graduate Certificate. All coursework must be traditionally graded.

A Graduate Certificate may include courses from one or more academic units or special academic units. For certificates involving courses from two or more units, the coordinating department is indicated in the List of Graduate Certificates.

Guest and degree-seeking students with bachelor's degrees are eligible to apply to participate in the Graduate Certificate Program. Students must apply for admission into the program and for the conferral of the certificate. Students must be enrolled at CSU to receive and complete the certificate requirements. Graduate certificates by title are noted on the student's academic record (transcript). For degree seeking students this is at the time of degree conferral. The certificate title is not on the diploma. See the Graduate School website (<https://graduateschool.colostate.edu/programs/>) for details.

Graduate Specializations

Graduate Specializations

Within graduate degree programs, certain well-defined "specializations" may be offered. A Graduate Specialization is a formal Faculty Council approved program with a defined curriculum addressing a specialty within one of the graduate degree programs. Specializations are automatically listed on transcripts. Please visit the Graduate School

website (<http://graduateschool.colostate.edu/?s=specializations>) for a listing of degrees and available specializations.

Graduate Thesis and Dissertation

Graduate Thesis and Dissertation

Although a thesis or dissertation is planned and executed with the advice and supervision of the advisor and committee, the student must assume primary responsibility both in terms of the content of the document and in terms of its format and presentation.

Graduate students may be responsible for all or part of the expense of their thesis/dissertation research. This expense is highly variable depending on the discipline, the research topic, and the availability of support from funded projects, sponsored programs, or academic departments.

Theses and dissertations submitted for graduate degrees must be completed in the English language. In circumstances in which a scholarship would be enhanced if these documents are completed in a foreign language, this must be approved by the student's committee and the Chair/Head of the program. In such cases, an English translation of the title and abstract must be included in the document.

The candidate must submit to the Graduate School the Thesis/Dissertation Submission Form and submit their thesis/dissertation electronically by the published deadline date listed on the Graduate School website. Students should consult these deadlines whenever they approach important steps in their careers. Suggestions for preparation of the manuscript may be found in the Thesis and Dissertation Formatting Guide (<http://graduateschool.colostate.edu/for-current-students/completing-your-degree/thesis-dissertation/>).

Students have the right to disseminate the findings of their theses and dissertations more broadly than is accomplished by archiving and microfilming. Prompt publication of important results is clearly in the best interests of the academic community and society as a whole. Students are therefore encouraged to bring such results to the manuscript submission stage within one year of the award of the degree.

Master's theses and doctoral dissertations are electronically archived by the Libraries and ProQuest/UMI. General information on copyrights, publication, and embargos may be found in the Thesis and Dissertation Formatting Guide (<http://graduateschool.colostate.edu/for-current-students/completing-your-degree/thesis-dissertation/>). As a public institution, CSU exposes bibliographic information about theses and dissertations on the Internet for purposes of discovery and retrieval. One of the functions of CSU is the generation and dissemination of contributions of knowledge and culture. The fundamental purpose of theses and dissertations is to make such contributions openly available for public benefit.

Graduation Procedures

Application for Graduation

A graduate student must apply for graduation by submitting to the Graduate School Office an Application for Graduation (GS Form 25 (<https://graduateschool.colostate.edu/forms/g25-application-for-graduation-instructions/>)). Deadlines are available on the Graduate School website (<http://graduateschool.colostate.edu/policies-and-procedures/deadline-dates/>). For students in combined bachelor's/master's degree programs (Accelerated Master's Programs

(AMP) Admissions), an application for graduation from the Graduate School must be either contemporaneous or subsequent to filing an application for receiving the bachelor's degree. Students must be registered during the semester they graduate as specified under Graduate Enrollment Requirement above.

Clearance for Graduation

Departmental requirements (i.e., language requirement, preparation of required papers for publication) and discrepancies in grades for graduation term must be completed by the end of the graduation term.

Failure to meet all requirements during the term requested on GS Form 25 (<https://graduateschool.colostate.edu/forms/g25-application-for-graduation-instructions/>) will necessitate reapplication for graduation (online). Diplomas will be mailed approximately six to eight weeks after the end of the graduation term to the mailing address on file with CSU.

Inter-University Graduate Programs

Collaborative Degree Program

A collaborative degree is one that partners a CSU graduate program with a similar graduate program at an international university in order to allow students to transfer credits between the two programs and earn a degree at CSU. Both CSU and international students must earn a minimum of 60% of the degree credits at CSU and the remaining credits at the international university in either a master's or PhD degree.

The coursework for the degree program offered at the collaborating university must meet CSU standards. The courses accepted for transfer from the collaborating university to the CSU program must be equivalent in credit and content. These courses must be listed, evaluated and approved by the CSU department offering the degree; these courses must provide similar content and student learning outcomes and be reflected in the course syllabi as such. The coursework/syllabi that will be transferred from the collaborating university must be translated into English by the collaborating university for evaluation purposes.

International universities, colleges, or degree granting institutions must be invited to participate in a Collaborative Degree Program by a CSU program department. Such institutions must be accredited by a major regional accrediting agency in order to be eligible to participate in a Collaborative Degree Program. An Academic Collaboration Agreement must be signed between CSU and the international partner university with details of the Collaborative Degree Program, including admission and degree requirements, number of students eligible to participate, insurance, travel, enrollment, and other administrative issues. Collaborative degree students must meet all Graduate School admission and degree requirements. (See the Graduate School website (<http://graduateschool.colostate.edu/>) for more details.) Academic Collaboration Agreements are facilitated through the Office of International Programs and must be reviewed and approved by the following individuals from CSU: Dean, Department Head, and Program Director of the program wishing to create a Collaborative Degree Program; Legal Counsel; International Programs; Provost; Graduate School; individuals from the international university that have the authority to sign in support of the Academic Collaboration Agreement. When a student is completing a master's thesis or doctoral dissertation an additional agreement, the Co-Directed Graduate Study Agreement (aka "Cotutelle"), must also be completed and signed by the relevant parties that specifies the co-direction of the work and other pedagogical and publication-related issues. When students meet the requirements for the

Collaborative Degree Program, CSU independently confers the degree. The collaborating university may also independently confer a degree. A review process to monitor the quality and outcomes of the Collaborative Degree Program will be established by the department. Data will be reported to the College Dean and Graduate School or as stipulated in the review process.

Graduate Assistantships

Assistantships

Graduate Assistantship-Terms and Conditions of Appointment

Termination of Graduate Assistants

Assistantships

Assistantship awards offer a stipend to the student in return for certain specified services to CSU. The stipend is treated as income (subject to withholding taxes) and both CSU and the student agree to a formal appointment when an assistantship is arranged. Both the amount of the stipend and the extent of time commitment vary from case to case and are set forth in the appointment.

Performance of the assistantship duties provides the student with valuable experience which contributes to professional and career development. Most graduate student support at CSU and many other American universities is in the form of assistantships.

Teaching assistantships involve payment for services related to undergraduate instruction. Some form of experience, skill, or aptitude is necessary for appointment. The duties typically involve grading papers, compiling biographies, monitoring laboratories, conducting discussion sections, or teaching an entire class. Some of these duties require that teaching assistants be able to communicate effectively in English. Usually, teaching assistant duties are confined to beginning-level undergraduate classes.

Departments will conduct the ASCSU course survey for each teaching assistant who is the instructor of record for a course. For teaching assistants who are not the instructor of record but with significant undergraduate teaching contact, departments will ensure that an appropriate survey is completed. These surveys and records of other student feedback will be maintained as part of the department's information base and made available to faculty and administration for future assessment of the policy's effectiveness.

Teaching assistants required to take the TOEFL, IELTS, or the PTE Academic for admission will also be evaluated for their ability to communicate orally in English by their departments. The evaluation will occur prior to pedagogical exposure in the undergraduate classroom using a mechanism that is commensurate with the teaching expectations for their positions. A committee, appointed by the department, shall offer evaluative feedback to potential teaching assistants and determine whether they are capable of teaching in the program. This evaluation shall become part of the student's file. Departments will use the results of both the oral evaluation and course surveys, when available, in determining whether a teaching assistant communicates effectively in English. Teaching assistants unable to communicate effectively in English will be given assistance to help them become more proficient before being reevaluated and assigned responsibilities for classroom instruction.

Teaching assistantships are funded by the state of Colorado as part of the resident instruction budget. Teaching assistantships include payment of tuition on behalf of the student as an added benefit.

Research assistantships are basically similar to teaching assistantships except that recipients are given basic research assignments. The precise nature of the duties will vary depending on the nature of the discipline, the particular projects under way in the department, and the interests and skills of the students. Often the work required is related to the student's course work; in some instances it may directly contribute to thesis, dissertation, or other degree requirements. Generally, research assistantship work is an important part of the process of becoming an active participant in the discipline.

Research assistantships are typically funded through external research grants obtained by members of the faculty. A research assistantship contract may provide for payment of tuition, but this is not necessarily the case.

Residence hall, counseling, and athletic assistantships may be available. Residence hall assistantships sometimes include room, board, and tuition in addition to stipends. Write the Office of Housing and Dining Services (<http://housing.colostate.edu/contact-us/>) for residence hall assistantships.

Graduate Assistantship - Terms and Conditions of Appointment

The following terms and conditions apply to all graduate students being appointed as Graduate Assistants. The Graduate Assistant Appointment and Certification Form generated by the academic department should be signed only after reading the terms and conditions set forth below and those noted on the Graduate Assistant Appointment and Certification Form.

All appointments of a student (the "Student") as a Graduate Assistant (the "Appointment") by Colorado State University (the "University") are effective on the date set forth beside the student's signature on the Graduate Assistant Appointment and Certification Form, subject to final approval ("Final Approval") by the Board of Governors of the Colorado State University System or the individual to whom the Board has delegated such authority (its "delegated representative").

The stipend payable to a Graduate Assistant, as specified on a Graduate Assistant Appointment and Certification Form, is offered in return for services and shall be deemed taxable compensation. Tuition remission, if specified on a Graduate Assistant Appointment and Certification Form, is provided in the form of financial aid, independently of the stipend, as a qualified tuition reduction given for educational purposes under Section 117 of the Internal Revenue Code.

A Graduate Assistant may be appointed as a Support Assistant, a Teaching Assistant, or a Research Assistant, or some combination thereof, as specified on a Graduate Assistant Appointment and Certification Form. Support Assistants provide administrative services; they are typically located in non-academic units like Housing or Athletics, but may be found in any office. Teaching Assistants help in the provision of educational services to undergraduates. Responsibilities may range from grading papers through leading discussions or lab sessions to complete independent teaching of a class. Research Assistants typically work with a professor on a project of importance to scholarship. The particular nature of Student's duties will be specified in writing, to the Student by the student's advisor or a departmental representative.

Full-time graduate students should not be appointed to more than a half-time assistantship or hold a sum of part-time assistantships greater than half-time. A half-time assistantship (.5 FTE) usually involves an average of about 20 hours of service per week of a nominal 40 hour workweek. Stipends will vary by department and by the duties assigned as well as the skills, competencies, and experience exhibited by the student. However, the stipend for half-time assistants must be paid no less than the Graduate School's officially established minimum monthly amount. Contact the Graduate School for information on the amount of this minimum for any given year. A quarter-time assistantship (.25 FTE) usually involves an average of about 10 hours of service per week of a nominal 40 hour workweek. Those with such assignments, must be paid a minimum of half of this amount. Any other level of appointment (e.g. less than 25% or between 26% and 49%) must be paid at least the prorated established minimum stipend. The level of appointment, amount of stipend and any tuition remission for each Graduate Assistant shall be as set forth on the Graduate Assistant Appointment and Certification Form.

Signature of the Graduate Assistant Appointment and Certification Form by the Student and Final Approval by the Board of Governors of the Colorado State University System or its delegated representative shall constitute a legally binding employment agreement (the "Agreement") between the University and Student. Such Agreement shall be subject to the following terms and conditions::

1. Appointment as a Graduate Assistant is expressly conditioned upon:
 - a. Student securing admission to a graduate degree program and the Graduate School, and registering for and completing at least one (1) on-campus credit during each fall and spring semester, and such credits as the appointing department may require each summer term during which the appointment is in effect.
 - b. Student's conformance to each of the following: maintaining good academic standing at Colorado State University; maintaining at least a 3.0 grade point average in each of the various categories (regular courses and overall) specified in the Scholastic Standards section of the Graduate and Professional Bulletin after having attained 12 credits of regular coursework or two semesters of graduate work, whichever comes first; not being placed on academic probation; and for non-native speakers of English, taking and obtaining a satisfactory score on prescribed language competency tests.
 - c. Continued association with and enrollment in an academic department and the absence of suspension, dismissal, expulsion, or withdrawal from the University, Graduate School, or department.
 - d. Student's performance of assigned duties and functions in a timely and competent fashion.
 - e. A routine background check, if applicable, is completed and reviewed in compliance with the Colorado State University policy regarding background checks.
- Conditions A through C above shall be deemed conditions precedent which must be met by the Student in order to remain eligible for appointment as a Graduate Assistant. Failure to meet conditions A through C above shall render the appointment voidable at the option of the University, which option may be exercised by discontinuing payment of the stipend. Failure to meet the conditions set forth in D and E above may result in termination of the Appointment, subject to Paragraph 5 below. Termination of or election to void the Appointment shall terminate the stipend payable thereunder, although

such action shall not result in forfeiture of the tuition remission for the semester in which it occurs.

2. The University and the Student understand and agree that the stipend portion of an Assistantship is not a scholarship award; rather it is an appointment which involves the performance of services in return for reasonable compensation in the form of stipend. Tuition remission may also be provided in the form of financial aid, independently of the stipend, as a qualified tuition reduction given for educational purposes under Section 117 of the Internal Revenue Code.
3. The term of appointment as a Graduate Assistant and the stipend and tuition remission amounts specified in a Graduate Assistant appointment and Certification Form may reflect the anticipated continuation of the appointment for more than one academic semester, which is set forth as an administrative convenience only. Notwithstanding any such provisions, the term of appointment as a Graduate Assistant and Student's right to receive the stipend and tuition remission during any succeeding academic semester is not guaranteed by the University and no offer of future appointment shall be implied.
4. The University (or the appointing department) reserves the right to terminate the Appointment because of unavailability of funds or other conditions beyond its control upon thirty days written notice to Student, said notice effective when posted in a U.S. Mail Depository with sufficient postage attached thereto. Termination of the appointment shall terminate the stipend payable thereunder, although termination shall not result in forfeiture of the tuition remission for the semester in which such termination occurs.
5. Pursuant to State Statute C.R.S. 24-19-104, all Graduate Assistants are "employees at will" and their employment may be terminated by either party at any time, for any reason or no reason. Termination of at-will employees does not generally require pre-termination due process. However, except for non-renewals of employment following the end of a stated employment period or election to void an appointment due to failure of conditions A through C under Paragraph 1 above, the Provost/Academic Vice President must review and approve any recommendations concerning the termination of a Graduate Assistant Appointment, including a determination, based on advice from the Office of the General Counsel, as to whether any pre-termination due process is appropriate under the circumstances. Approval of the Board of Governors of the Colorado State University System or its delegated representative is required prior to any final action on such terminations. The provisions of this section shall not be interpreted to authorize the termination of any Graduate Assistant for any reason that is contrary to applicable federal, state, or local law. Termination of or an election to void an Assistantship shall be subject to appeal in accordance with the Graduate Appeals Procedure set forth in the Graduate and Professional Bulletin.
6. Payments will be made on the last work day of the month. All payments will be deposited directly in a bank or forwarded to the address indicated on the Earnings Disposition/Address Form. Students must report to their major department to complete the necessary forms.
7. Benefits: Between semesters Graduate Assistants usually concentrate on their research and associated library work. To the extent that the supervising faculty member and department head concur, Graduate Assistants may use such periods for leave. Graduate Assistants are covered by the University's liability insurance and by Workers' Compensation. The Graduate School provides a health insurance contribution to help offset the cost of health insurance to qualifying graduate assistants. See the Graduate School's Assistantship Health Insurance Contribution

(<https://graduateschool.colostate.edu/financial/assistantships/assistantship-health-contribution/>) for details and eligibility criteria. Graduate Assistants may also qualify for parental leave benefits. See the Graduate Student Parental Leave policy (<http://policylibrary.colostate.edu/policy.aspx?id=743>) for eligibility and application form details.

8. The Colorado Uniform Jury Selection and Service Act applied to persons appointed as Graduate Assistants and they must be excused for jury service as required by thereunder.
9. A Graduate Assistant may be required to participate in a retirement program depending on the number of credit hours for which they are enrolled and the number of hours of work required. Contribution to such a retirement program shall follow the University's rules and regulations currently in effect for such enrollment. More detailed information concerning participation in the student retirement plan is available from the Student Employment Services Office.
10. The appointment period specified on the Graduate Assistant Appointment and Certification Form may be renewed by the Department by generating a new Graduate Assistant Appointment and Certification Form requiring Student signature.
11. Increases in the amount of the stipend from that originally indicated on the Graduate Assistant Appointment and Certification Form will not require Student signature.
12. Changes other than those noted on #11 (e.g., type of assistantship, level of service, decrease in stipend, or tuition payment arrangements) require the drawing of a new Graduate Assistant Appointment and Certification Form for student signature.

Termination of Graduate Assistants

Pursuant to State Statute, C.R.S. 24-19-104, all graduate assistants are "employees at will." Their employment is subject to such administrative termination procedures as may be appropriate under the circumstances of each case. Advisors and/or department heads must consult with the Associate Dean of the Graduate School prior to taking any actions concerning terminations of assistantships before the end of the stated employment period. Except for non-renewals of employment following the end of stated employment periods or election to void an appointment as set forth in the terms and conditions applicable to graduate assistant appointments, the Provost/Academic Vice President must review and endorse any recommendation concerning the termination of graduate assistants. Approval of the President or Provost/Academic Vice President as the delegated representatives of the Board of Governors is required for any final action on such terminations. Stipends payable under graduate assistantships shall be terminated upon discontinuance of association with the appointing department, dismissal, placement on academic probation, or withdrawal from CSU. Such actions will not cause forfeiture of the tuition remission for the semester in which such action occurs. The provisions of this section shall not be interpreted to authorize the termination of any graduate assistant for any reason that is contrary to applicable federal, state, or local law.

Termination of an assistantship shall be subject to appeal in accordance with the Graduate Appeals Procedure.

Awards from Outside Agencies

There are two broad categories of financial support available to graduate students. The first is awarded on the basis of academic merit or the possession of competencies that permit the performance of specific services. The second is based on demonstrated student financial need.

Merit or Competency-Based Financial Support

Awards are generally arranged or initiated at the level of the academic department. Students should contact the department head on all related matters.

Application for Financial Support

Deadlines

Most merit- or competency-based financial support is awarded on an academic year basis beginning in the Fall Semester. The primary deadline for receipt of complete applications for such support is February 15. Persons who wish to be considered should submit an application for admission. This will ensure consideration for all types of support that might be available. The first review and award cycle will begin immediately after February 15.

Applications completed later than this date will be considered as availability of funds permits. Some departmentally-based awards, particularly in the form of research assistantships and teaching assistantships, may be awarded on a later schedule. Also, ad hoc funding opportunities may become available at various times throughout the year.

Applicants who intend to begin their studies in the Spring Semester or Summer term should submit application for admission (<http://www.graduateschool.colostate.edu/prospective-students/apply/>) and application for financial support by the appropriate primary deadline date, July 15 or November 15 respectively. Again, this will ensure consideration for all types of support that might be available. Applications completed later than these dates may be considered for any appropriate departmentally-based or ad hoc awards.

Some forms of financial support applications may require other specification as indicated below.

Financial Aid

Application Requirements

1. Be admitted to the graduate school in a regular program of study.
2. Complete a Free Application for Federal Student Aid (<https://studentaid.gov/h/apply-for-aid/fafsa/>) (FAFSA). This will require your Federal Student Aid (FSA) ID Username and Password. If you have

not created an FSA ID, you will be prompted to do so on the FAFSA website.

Types and Amounts of Aid

Title	Amounts per year	Availability of funds

Subsidized Loan	Not available for Graduate Students	N/A
Unsubsidized Loan	Not to exceed \$20,500 per school year	Unlimited
Supplemental Unsubsidized Loan (Veterinary medical students only)	Up to \$20,000 per school year	Unlimited
Health Professions Loan (Veterinary medical students only)	up to \$20,000	Limited
Federal Work-Study	Up to \$3,000	Limited
Colorado Graduate Grant	\$7500	Limited

Graduate fellowships and graduate teaching and research assistantships are offered through a student's respective department.

Funding

All financial aid, other than Federal Direct Loans, is awarded to the most disadvantaged students until funds have been exhausted. Federal Direct Loans are awarded on an ongoing basis.

Website

Please visit the Office of Financial Aid (<https://financialaid.colostate.edu/>) website for information on applying for financial aid, types of financial aid, costs, paying your bill, residency requirements, scholarship searches, how to contact us, etc.

Credit Requirements

Graduate students must be enrolled in at least five (5) credits to receive Federal Direct Loans. A financial aid award is based on full-time enrollment (9 credit hours); if a student is enrolled part-time, financial aid may be reduced and/or delayed. A student registered for Continuous Registration is not eligible to receive financial aid and is also not eligible for a loan deferment.

Satisfactory Academic Progress Standards

Students applying for and/or receiving financial aid are expected to maintain satisfactory academic progress. Failure to perform at established levels may result in students becoming ineligible for financial aid. Students' total number of credits are also evaluated, and students may not exceed established credit limits. Additionally, if a student receives all "F", "U", and/or "W" grades, they will be required to verify the last date of attendance and may be required to return up to 50% of the financial aid received. Copies of the complete policy (<https://financialaid.colostate.edu/financial-aid-guide/>) are available online within the Financial Aid Guide.

Fellowships and Traineeships

All fellowship awards are based on merit and are highly competitive.

These forms of support involve outright awards to cover educational expenses and may in some cases cover tuition, fees, and other direct expenses. They do not require any service on the part of the student. Several programs funded by a variety of private and public sources may be available at any given time. Graduate fellowship awards are available. These awards are designed to be part of a full support package and, hence, are usually supplementary to an assistantship appointment. Departments nominate promising candidates for these awards in response to a call in the fall of each year. Fellowships are given in recognition of academic excellence, student contribution to any of the goals of the CSU strategic plan (e.g., undergraduate instruction, diversity), and departmental quality.

The Martin Luther King, Jr. Graduate Scholarship provides support each year for a graduate student at CSU. It is awarded on the basis of academic excellence and contributions to the enhancement of individuals from ethnically diverse populations.

Income taxes

Assistantship stipends are considered payment for services rendered and are thus subject to regular income taxation. Appropriate amounts are withheld from stipend checks as per Internal Revenue Service Requirements.

Tuition payments made on behalf of graduate assistants may be considered "qualified tuition reductions," not subject to income taxation. However, this is explicitly dependent upon the proper execution of the formal contract described above.

Fellowship awards are considered taxable income. However, tuition and certain other direct educational expenditures may be excluded. Most fellowship holders will incur some tax liability. CSU will not deduct from fellowship checks to cover this liability; paying the taxes is a matter of individual responsibility. Fellowship holders should be aware of this additional liability in planning their financial affairs.

Veteran's Education Benefits

The Office of the Registrar (<https://registrar.colostate.edu/>) assists the U.S. Department of Veterans Affairs (VA) in providing certification for the following education benefits:

Under Title 38, U.S. Code

- Chapter 30 (Montgomery G.I. Bill®)
- Chapter 31 (Veteran Readiness and Employment)
- Chapter 32 (Post-Vietnam Era)
- Chapter 33 (Post-9/11 G.I. Bill®)
- Chapter 35 (Dependents Educational Assistance)

Under Title 10, U.S. Code

- Chapter 1606 (Selected Reserve/National Guard Members)
- Chapter 1607 REAP (Reserve Education Assistance Program)

In addition, the Office of Military & Veteran Benefits will advise and assist students in:

- Meeting residency requirements under the Veterans Choice Act of 2014, Colorado's GI Promise or the Yellow Ribbon Program
- Requesting and obtaining Joint Service Transcripts and other transcripts from military training
- Obtaining additional campus services

Students eligible for any of these benefits must contact the Office of Military and Veteran Benefits (<https://registrar.colostate.edu/military-veterans/>) in the Office of the Registrar prior to the expected date of enrollment. Applicants should apply to CSU in a degree-seeking major or for teacher licensure before applying for veterans' education benefits.

A description of the services (<https://alvs.colostate.edu/veteran-services/>) CSU provides may be found online. Regulations governing receipt of veteran's education benefits, Standards of Progress, and other policies (<https://registrar.colostate.edu/military-veterans/>) are also available online.

Sponsored Students

Sponsored students are those whose tuition, fees, or expenses are paid by an employer government agency or other sponsoring agency. Many international students, as well as some from the U.S., fall under this category. In cases where sponsors provide direct support for

students' research activities, special custodial accounts must be established. Additional fees are associated with this service. Specific information on these accounts is provided to each student at the time of admission, and additional advice may be obtained from the Graduate School (<https://graduateschool.colostate.edu/>), or in the case of international students, from the Office of International Programs (<https://international.colostate.edu/>), to the attention of the International Sponsored Student Coordinator, International Student and Scholar Services (ISSS).

Authority to set tuition rates is vested in the governing boards of Colorado's state institutions of higher education. The tuition rates which apply to any succeeding fiscal year will not be known until June of each year. The Board of Governors of the CSU System, therefore, reserves the right to change tuition and fee schedules and related policies, including the time, date, and method for payment, at any time.

By registering for a course, a student acknowledges legal and financial responsibility for any and all tuition and fees assessed as a result of registration. Students must follow, and are financially responsible for, formal add/drop and withdrawal procedures at CSU. Non-attendance does not relieve a student of financial responsibility. A student whose account becomes delinquent will be held responsible for paying any late payment charges, collection agency fees up to 40% of the debt, and all costs and expenses including reasonable attorney fees that CSU incurs in its collection efforts. CSU will not register a student, release a diploma

or proof of degree, nor provide official transcripts to any current or former student who has past due financial obligations to CSU.

Fourth-year veterinary students are assessed tuition on a credit basis for each semester since their class schedules vary during the three-semester period. Fees (<https://financialaid.colostate.edu/base-tuition/>) for fourth-year veterinary students are assessed over three semesters in equal payments. The University Technology Fee is also assessed to fourth-year students for the summer term.

Paying Your Bill

Payment of Student Accounts

Any student who completes registration agrees to pay the University as follows:

Charges	Fall	Spring	Summer
Tuition, fees, residence hall charges, health insurance and other institutional charges	September 10 th	February 10 th	Due when billed

Charges incurred after the bill date for the semester will be billed mid-month of the following month and have a due date of the 10th of the month after that statement date or the following business day if the 10th falls on a weekend or University holiday.

University charges are due by the date specified on your bill. Due dates are the 10th of each month unless the 10th falls on a weekend or holiday. In those cases, the due date is the following work day. Payment of all CSU charges is to be received in the University Cashier's Office or cashiering system by the due date to avoid late payment penalties. Penalties include a late payment charge and holds on CSU services. Payments by check are processed when received – postmarks do not apply and future dates are not honored.

Students are responsible for all charges on their account and arrangement of payments due. Payments should only be made when a balance due exists on an account. Credit card overpayments will be credited back to the originating card. All other overpayments will be refunded via mailed check to the student.

In support of CSU's Green Initiatives, CSU implemented e-billing effective in Fall 2010. Billing notifications are e-mailed to Rams e-mail addresses. Students can then log into RAMweb to view their University Billing Statement. Additional billing notifications may be sent to alternate e-mail addresses maintained by the student on RAMweb. Students who are sponsored by a third party may request direct billing to the sponsor for

tuition, fees, and other related educational expenses. Detailed information on sponsor billing is available upon request from the Office of Financial Aid. Arrangements for sponsor billing must be made prior to the student account due dates to prevent late payment penalties.

"Billing Information" in RAMweb (<https://ramweb.colostate.edu/>) provides more information on setting up a billing address, billing statement information, accepted payment methods, credit balance refunds, and education tax credit information.

Late Payment Penalties

Late Payment Charges

Mailed payments must reach the University Cashier's Office, 6015 Campus Delivery, by 4:00 p.m. Mountain Standard Time (MST) on the due date (postmarks do not apply). Online payments must be made by 2:00 p.m. MST on the due date for the payment to be considered timely. Penalties in the amount of 1.5% of the past due balance will be assessed monthly for the purpose of encouraging prompt payment. Failure to pay amounts due may also result in referral of outstanding balances to a collection agency. These agencies may take legal action to collect past due balances. Further, CSU reserves the right to impose a penalty fee and financial hold for returned checks.

Registration, Transcript, and Diploma Holds

Unpaid past due balances may cause a hold on registration, transcripts, and diplomas. CSU will not register a student, release a diploma or proof of degree, nor provide an official transcript or diploma to any student or former student who has past due financial obligations to CSU until the hold is removed. The release of the hold may be expedited by paying the past due balance in full.

Returned Checks

Any person who presents a check to CSU, either paper or electronic, that is not accepted for payment by the bank (due to insufficient funds, stopped payment, non-existent account, or other reason for which the person is responsible) is charged a penalty as provided by state law. Contact the Treasury Services Office, 555 S. Howes Street First Floor, for the current returned check penalty fee.

CSU sends a notice to the person who presents a check that is not accepted for payment by the bank. In the case of students, the notice is mailed to the student's billing address on file with CSU. Within the time specified in the notice, the person is expected to make payment by guaranteed funds including cash, cashier's check, money order, wire transfer, or accepted credit cards. The payment must be equal to the total of the invalid check plus penalty fee if applicable. Failure to do so will result in action deemed appropriate under the circumstances. If the original presentation of the returned check allowed a student to register for an academic term and full payment of the check plus penalty fee is not made within the time specified in the notice, the student's class schedule may be cancelled.

Conditions that Affect the Assessment of Charges

Tuition and fees for a student registering for a combination of regular on-campus courses, or Continuing Education (CSU Online) courses will be assessed individually according to the schedule established for each. Students who are off campus for full-time internships, practica, or professional affiliations, and who are not concurrently enrolled in other on-campus experiences or courses, may be assessed a reduced

student fee. CSU usually pays the tuition on behalf of teaching assistants (full-time registrants who receive a stipend of at least \$1,370.00 per month). Research assistantship stipends are typically paid from research grants received by faculty members. Tuition charges may also be paid from these grant funds on behalf of the students, but practice is highly variable. Information should be requested from the department head or the faculty member serving as principal investigator on a particular grant. All students are directly responsible for the payment of fees.

Accelerated Master's Programs (AMP) Admission students enrolled in combined bachelor's/master's degree programs will be assessed tuition at the undergraduate rate until they have accumulated 120 credits towards their baccalaureate degree after which they will be assessed tuition at the graduate rate. Such students likewise become eligible to hold Graduate Assistantships at the same transitional time.

Additional Academic Expenditures

Graduate students may be responsible for all or part of the costs involved in the preparation of theses, dissertations, or other pieces of scholarly work required in the academic program. The expenses of an appropriate research or artistic project are highly variable, depending on the discipline, the specific nature of the work involved, and the availability of resources from funded projects, students' sponsoring agencies, or the academic departments. In some cases, students may pay such costs directly. In others, departments may request that funds be deposited in a special account in advance.

Personal Expenses

Health Insurance

The CSU Student Health Insurance Plan is designed to work in conjunction with the student fee-funded services provided at the CSU Health Network. The plan, underwritten by Aetna Life Insurance Company and its affiliates ("AETNA"), provides students with access to comprehensive, high quality care. Plan benefits are provided both within the CSU Health Network and when services are provided off campus, outside the CSU Health Network. Fee-paying students are eligible to enroll in this plan.

Graduate students who are enrolled in less than six (6) RI credits may opt into coverage by completing an enrollment form at the CSU Student Insurance Office (information in the Student Insurance Office) before the plan enrollment/cancellation deadline. Graduate students enrolled in LESS THAN six (6) resident instruction (RI) credits will NO LONGER be automatically enrolled.

Students enrolled in six or more resident instruction credit hours are automatically enrolled in the plan and are subject to the mandatory insurance requirement. These students must demonstrate proof of enrollment in comparable insurance in order to opt out via the CSU Student Health Insurance Waiver (<https://health.colostate.edu/student-health-insurance/>) process. Students who have been granted a waiver in the fall semester will be automatically waived in the spring semester as well. All waiver requests must be submitted by the published enrollment/cancellation deadline.

If you do not waive out of the plan by the enrollment/cancellation deadline, your student account will be billed for the premium. Due to the terms of the insurance carrier, no exceptions can be made. Information

about the enrollment/cancellation deadline (<http://health.colostate.edu/student-health-insurance/>) for each semester is available online.

Note for International Students: International students are required to hold health insurance regardless of their enrollment status. You will be automatically enrolled in the CSU Student Health Insurance Plan and must show proof of enrollment in a comparable plan through the waiver process if you wish to opt out.

For more information visit the CSU Health Network (<https://health.colostate.edu/>) or the Graduate School (<https://graduateschool.colostate.edu/financial/assistantships/assistantship-health-contribution/>) websites.

Living Expenses

Since individual habits and needs vary greatly from individual to individual, it is difficult to produce a standard estimate of overall living expenses. Information on housing options and costs is available through Housing and Dining Services (<http://housing.colostate.edu/>) and the Office of Off-Campus Life (<https://ocl.colostate.edu/>).

New students should be aware that expenses incurred as a graduate student are likely to be higher than as an undergraduate. The purchase of research supplies, the acquisition of a personal library, attendance of seminars, conferences and meetings, and general change of lifestyle are some of the factors that may account for this.

International students particularly may incur high costs. Many necessary articles cannot be transported as luggage and may have to be purchased after arrival at CSU. Clothing appropriate to the climate may have to be acquired. A detailed estimate of expenses including out-of-state tuition and fees, living expenses, and cost of mandatory health insurance for a full calendar year (two semesters and a summer term) may be obtained from the Office of International Programs (<http://www.international.colostate.edu/>) or emailing iss@colostate.edu.

"In-State Residency" for Tuition Classification Purposes

Classification of students for tuition purposes is governed by State Statute ("tuition law") which sets forth conditions for a student being considered as "in-state" for purposes of tuition classification. The tuition law is contained in sections 23-7-101 to 23-7.4-204, of the Colorado Revised Statutes. Although individuals may be considered state residents for voting or other legal purposes after being in the state for a short period of time, the tuition law specifies additional requirements for classification as "in-state" for tuition purposes. The tuition law, which applies to all public institutions of higher education in Colorado, is subject to judicial interpretation and change at any time by the Colorado Legislature. CSU must apply the rules set forth in the Colorado Revised Statutes, and is not free to make exceptions except as specifically permitted under the Statute.

Note: This information is considered to be general guidance and is not legal advice. Refer to State Statute to review the actual law.

Definition of "In-State Residency" for Tuition Purposes

Under the Colorado tuition law, the term "in-state" student means: "A student who has been domiciled in Colorado for one year or more immediately preceding the first day of classes for the term for which such status is claimed." Further the tuition law states: "Attendance at an institution of higher education, public or private, within the state of Colorado shall not alone be sufficient to qualify for domicile in Colorado."

The Statute states that the applicant has the burden of providing clear and convincing evidence that a Colorado domicile has been established for the required one-year period. CSU may require completion of appropriate forms and additional documentation as necessary to make a determination of domicile. After registration, the initial tuition classification will remain unchanged absent clear and convincing evidence to the contrary.

In-state classification requires a domicile in Colorado for 12 months on or prior to the first day of classes of each semester. "Domicile" is the legal term used to describe the place where a person has chosen to make a true fixed and permanent home. Domicile is made up of two components: physical presence and evidence of intent. **Both** physical presence and evidence of intent must be established for 12 months on or prior to the first day of classes. A student can only establish domicile in Colorado for tuition purposes if they intend to reside permanently in the state and meet the definition of a "Qualified Person."

Initial residency determination for tuition purposes of any student enrolling at CSU is concluded by the Office of Admissions. To be initially considered for in-state classification you must answer all residency questions completely and accurately on the application and submit requested evidence substantiating their claim. Failure to do so will result in classification as out-of-state for tuition purposes.

In-State Status: Other Circumstances

Exceptions to the one-year residence requirement exist for the following:

- Colorado National Guard members
- Active-duty military stationed in Colorado
- Honorably-discharged members of the U.S. Armed Forces
- Returning active-duty military members
- Canadian military stationed in Colorado
- Peace Corps volunteer
- Employees of companies moving to Colorado receiving government economic incentives

For detailed explanation of the requirements for these exceptions, including spouse eligibility, go to CSU's Office of Financial Aid (<https://financialaid.colostate.edu/>) or the Colorado Higher Education Residency Guide (<https://cdhe.colorado.gov/summary-tuition-classification-regulations/>).

International Students

International students who are lawful permanent residents or who are admitted as refugees are eligible to establish domicile for tuition purposes. Nonimmigrant aliens who are residing in Colorado for purposes other than education may qualify for in-state status after one year of Colorado domicile. A nonimmigrant with the following student visa categories cannot qualify for in-state tuition classification: F-1, F-2, H-3,

H-4 (if the visa holder is the spouse or child of an H-3), J-1 and J-2 (if the J-1 visa holder is a student or trainee), M-1 and M-2.

Petition for Reclassification

A petition may be filed if a student wishes to contest out-of-state classification or if the student has subsequently become eligible for in-state status. Petitions will be processed only for students who have been admitted to CSU and currently enrolled for the semester in which they are requesting a change in classification. Please review the Office of Financial Aid (<https://financialaid.colostate.edu/>) website for more information.

A student's current tuition classification will remain until they have received notification from the Office of Financial Aid Tuition Classification Officer indicating a residency change has been approved. Students who are petitioning for in-state classification remain responsible for paying their tuition based upon current tuition classification. Students are strongly urged to petition as early as possible within the submission window dates provided on the Office of Financial Aid (<http://financialaid.colostate.edu/>) website in order to receive a response of their tuition classification prior to the beginning of the semester.

Petition Process/Deadline

The Office of Financial Aid must receive completed petitions no later than the published deadline date for the semester for which you are petitioning. Deadlines (<https://financialaid.colostate.edu/petition-process-and-deadlines/>) are provided on our website. Petitions will not be accepted after the published deadline date and incomplete petitions will not be accepted and/or reviewed for that semester, and your tuition classification and tuition assessment will remain nonresident for that term. Petitioners will be notified of the results of their petition by mail. Please allow 4-8 weeks for notification. If additional information is required, the additional information must be submitted within two weeks of the communication sent to the petitioner unless special arrangements are made with the Tuition Classification Officer.

Decisions made by the Tuition Classification Officer may be appealed by the petitioner. A petitioner wanting to appeal the decision to the Residency Appeals Committee must contact the Office of Financial Aid no later than the deadline date provided in the letter in which the decision was conveyed to the petitioner. The decision of the Residency Appeals Committee is the final University determination for that specific semester. In addition, there are no provisions in the Tuition Classification Statutes for retroactive compliance.

The fact that you do not qualify for in-state status in any other state does not guarantee in-state status in Colorado; in-state classification is governed solely by Colorado statute. The tuition classification statute places the burden of proof on the petitioner to provide clear and convincing evidence of eligibility.

Any student who provides false information to avoid paying out-of-state tuition may be subject to legal and/or disciplinary actions.

Enrollment and Academic Records

Information about credits, enrollment status, credit overloads, class schedules, registration process, registration waitlist, course overrides, late registration, registration cancellation prior to start of term, and repeating a course may be found in the Registration section of the General Catalog.

About Withdrawals

Class Attendance and Final Exams

Assessment of Tuition and Fees Based on Registration Changes in Full or Part-Time Status

Tuition and fees will be adjusted for students that go above or below the full-time credit assessment cut-off during the add/drop period at the beginning of the semester. The specific dates are listed in the appropriate online class schedule. After this deadline, there is no adjustment in tuition and fees if students withdraw from any portion of the courses for which they are registered.

Continuous Registration

All students admitted to a graduate degree program are required to be continuously enrolled in their degree program in the fall and spring semesters. This policy applies from the time of first enrollment through the graduation term. Students should contact their advisor if they do not plan to register for at least one credit of course work or research. Students graduating in summer term are required to be registered for at least one credit or Continuous Registration (CR). Students registering for CR will be assessed a fee for each semester of CR registration. If Continuous Registration is added on or after the first day of the term, a \$50 late registration charge will be applied. See Special Fees.

Students enrolled for Continuous Registration in any term may not be considered enrolled full time for the purposes of, for example, financial aid, student loans, visas, or employment. Moreover, to receive full privileges for the summer term, students must be enrolled either in the summer or for the following fall term.

Credit Load

Graduate assistants are required to register for at least one credit of course work and/or research during fall and spring terms. Assistants who have an appointment in effect in the summer must register for such credits as the appointing department may require. Students on other forms of financial assistance should register for the number of credits required by the sponsor.

Schedule Changes and the Add/Drop and Withdrawal Periods

See Schedule Changes.

Registration Alternatives

Independent Study

Independent study is a type of learning that supplements regular, supervised classroom instruction by permitting the student to carry such learning even further, working independently under necessary and sufficient guidance of a supervising instructor. While details of each independent study project are negotiated by the student and instructor, the expectation is that at least three hours per week of directed effort on the student's part is required for each credit. Personal contact (face-to-face, telephone, Internet, or other forms of communication) is expected.

The instructor and the student shall specify, in writing, the requirements the student should fulfill to complete the course, including due date, contact expectations, number of credits, and other pertinent information. The instructor, student, and department head shall sign this statement and retain a copy. Upon completion of the project, a copy or description

of the work involved shall be retained in the department for at least seven years.

About Grades

See Grade Points.

Student Option Satisfactory/Unsatisfactory

Satisfactory/Unsatisfactory registration for graduate students is subject to limitations imposed by graduate committees and departments. Required courses listed on the program of study may not be taken on a "student-option satisfactory/unsatisfactory" basis. Courses which are offered "satisfactory/unsatisfactory only" or "instructor option satisfactory/unsatisfactory" are acceptable. Background courses may be taken "student-option satisfactory/unsatisfactory" if department policies permit. Registration for satisfactory/unsatisfactory should be approved by the advisor prior to enrollment and cannot be altered except during the schedule change period. Repeating a course on a satisfactory/unsatisfactory basis for which a previous traditional grade was assigned will not alter the effect of the previous grade on the GPA. For "student-option satisfactory/unsatisfactory" courses:

- A correct satisfactory/unsatisfactory registration including advisor approval is the express responsibility of each student.
- Performance equivalent to a grade of C or better is recorded as S (Satisfactory); performance equivalent to a D or F is recorded as U (Unsatisfactory). Neither the S nor the U are used in calculating the CSU grade point average.
- A grade for a course taken as satisfactory/unsatisfactory may not be converted to a traditional grade for purposes of improving the GPA to meet graduation or scholastic requirements.
- When it is determined that an ineligible student is or has been registered for a satisfactory/unsatisfactory course, a traditional grade will be assigned.

Committed to excellence, the university offers over 70 undergraduate degree programs, 16 of which are also available online; 140 master's degree programs, 43 of which are offered online; 65 doctoral programs, 3 of which are offered online; and 64 graduate certificates, 55 of which are offered online. We have a student:faculty ratio of 17:1, which means that our extraordinary teachers in all disciplines interact with our students directly, whether in the classroom, the lab, or the field. World-class teaching and research mean academic programs that consistently rank among the best in the nation and world.

Colorado State University is designated as a Carnegie R1 (very high research activity) institution, with \$407 million in sponsored research. We are recognized internationally for our work in such diverse and critical fields as cancer research, atmospheric science, animal science, climate change, forest and wildlife management, engineering, and water management.

The CSU Office of Engagement applies research via CSU Online, CSU Extension, and the Colorado Water Center by connecting communities with shared solutions through education, research, and leadership.

Colorado State University is also, proudly, one of the most sustainable universities in the world (https://source.colostate.edu/colorado-state-university-makes-it-four-in-a-row-for-sustainability-earns-fourth-consecutive-platinum-stars-designation/?utm_source=newsletter&utm_medium=email&utm_term=https://source.colostate.edu/colorado-state-university-makes-it-four-in-a-row-for-sustainability-earns-fourth-consecutive-platinum-stars-designation). We were the first university in the nation to receive a Platinum designation – the highest available – from the Association for the Advancement of Sustainability in Higher Education (AASHE), and we earned our fourth Platinum rating in 2023. CSU has the best interdisciplinary sustainability curriculum among all institutions listed in the AASHE's Sustainable Campus Index Ratings of 2023.

Land-Grant Tradition

Our Land-Grant Mission

Colorado State University is a land-grant institution, a uniquely American idea built on the belief that anyone who wants a college or university education should have the opportunity to get it. Offering that access in the mid-19th century was a revolutionary concept, one that still is central to our land-grant mission today.

The Morrill Act of 1862 created land-grant colleges at a tumultuous time of converging social, political, and cultural changes in the United States, during the American Civil War and an era of westward expansion driven by a belief in "Manifest Destiny" – the idea that the nation was destined to expand across the continent.

The grants of land offered to the states by the Federal government to fund the new colleges – and as homesteads to settlers who would populate the west and to build railroads that would transport people and goods there – came directly from the dispossession of Native American nations and people who had inhabited that land for centuries.

To be a land-grant university in the 21st century requires we not only acknowledge that history, but also recognize the pain and harm it caused that still resonates today. A first step on that path was CSU's adoption of a Land Acknowledgment (<https://landacknowledgment.colostate.edu/>) in 2018. But we still face difficult questions about both the acquisition of land on which the university was built and the grants that helped fund its operation. CSU is committed to moving forward in a process of engagement, working to address those historical wrongs and bridge the equity gap that remains.

The spirit of the Morrill Act itself was and is one of access and inclusion. Those core values continue to guide CSU today.

We prize the diversity and rich history that different peoples and populations bring to our academic community. That is the true spirit of the Morrill Act itself, focused on teaching, research and service, creating new knowledge and putting it to work on behalf of all the people we serve.

We believe in the transformational power of education to prepare the next generation of scientists, artists, educators, entrepreneurs and more. As an R1 institution, CSU ranks among the top research universities in the country. Faculty and students engage in purpose-driven research to address some of our world's most complex and perplexing challenges. CSU scholarship, discovery, and innovation improve the quality of life for people in Colorado, across the nation, and around the world.

We set a high standard in our Principles of Community – inclusion, integrity, respect, service, and social justice – and are committed to excellence in carrying out all aspects of CSU's historic land-grant mission.

Colorado Agricultural Experiment Station

University Services Center, Room 408C
601 South Howes Street
(970) 491-5371

Agricultural research has been part of Colorado State University (CSU) since the institution's beginning. In 1888, the Colorado General Assembly established the Colorado Agricultural Experiment Station (CAES) (<http://aes.agsci.colostate.edu/>) as the contributor to the federally-created state agricultural experiment station system established by the Hatch Act, currently encompassing all fifty states and United States territories.

The CAES is an integral part of CSU and a unit within the College of Agricultural Sciences. The Colorado Agricultural Experiment Station creates and disseminates knowledge related to agriculture and natural resources with the overarching goal of enhancing economic viability and environmental sustainability in ways that are socially acceptable. Further, the CAES applies this knowledge to solving practical problems of producers and consumers.

The CAES supports faculty, staff, and students across CSU who conduct research on crop and livestock production, food systems, and natural resources problems. Our research is conducted in Fort Collins in seven of eight colleges, in more than 15 academic departments, and at nine off-campus research centers located throughout the state. The CAES is not a place but rather is an administrative umbrella that oversees research programs taking place on campus and at seven research centers across Colorado. These research centers are the Agricultural Research, Development and Education Center (ARDEC) near Fort Collins, the Arkansas Valley Research Center in Rocky Ford, the Eastern Colorado Research Center in Akron, the Plainsman Research Center in Walsh, the San Luis Valley Research Center in Center, the Southwestern Research Center in Yellow Jacket, and the Western Colorado Research Center with locations near Orchard Mesa, Roger's Mesa, and Fruita.

Agricultural research programs include the traditional areas of producing and processing food products such as wheat, beef, potatoes, fruits, and vegetables, as well as discovering how foods and diets influence human nutrition and health, new kinds of textiles we wear, the ornamental plants and gardens we enjoy, and sustainable use of rangelands where high-quality water comes from and which support grazing livestock and wildlife.

The CAES partners with CSU Extension, industry, schools, and any others who can help get new information and technologies into the hands of those who need it.

Colorado State Forest Service

State Office located at 3843 Laporte Avenue, Fort Collins, CO 80521
(970) 491-6303

The Colorado State Forest Service (CSFS) (<http://csfs.colostate.edu>) is a service and outreach agency of the Warner College of Natural Resources and provides staffing for the Division of Forestry within the Colorado Department of Natural Resources. Headquartered in Fort Collins and with 17 field offices throughout the state, the mission of the CSFS is

"to achieve stewardship of Colorado's diverse forest environments for the benefit of present and future generations". The CSFS is organized into four management areas and is staffed by approximately 105 full- and part-time employees and more than 100 seasonal employees. The CSFS provides forestry outreach and education and administers forest management programs and projects, treating thousands of acres of forestland every year. The agency works with landowners, communities, and government agencies to improve forest health and resilience to wildfire, climate change, insects, and diseases. The CSFS also grows and distributes seedling trees and shrubs for reforestation and other conservation purposes, and assists the forest products harvesting and manufacturing industries to increase utilization of Colorado wood.

Colorado Water Center

Offices in Engineering Building, Room E102
(970) 491-6308
watercenter.colostate.edu (<https://watercenter.colostate.edu/>)

The **Colorado Water Center** is one of 54 Water Resources Research Institutes created by the Water Resources Act of 1964, which collectively form the National Institutes for Water Resources. As a division under CSU's Office of Engagement and Extension, the Center aims to connect all water expertise in Colorado's higher education system with research and education needs of Colorado's water managers and users, building on the rich water history at Colorado State University. The Center leads interdisciplinary research, education, and outreach to address complex and evolving water-related challenges by fostering collaboration between higher education and water stakeholders, synthesizing objective water knowledge to inform decision-making, and inspiring the next generation of water leaders.

Environmental Learning Center

Offices in Michael Smith Natural Resources Building, Room 103
Program site at 2400 South County Road 9 Ft. Collins, CO 80525
(970) 491-1661

Staff of the Environmental Learning Center (ELC) (<http://www.csuelc.org/>) work to connect people with nature by facilitating educational, inclusive and safe experiences in the natural environment. The ELC provides a diversity of programs to groups throughout the community. This includes public schools, scout troops, CSU groups, service organizations, and many others.

Extension

Offices in University Square, Room 102
(970) 491-6281

Colorado State University Extension (CSUE) empowers Coloradans to address important and emerging community needs using dynamic, science-based educational resources. For over 100 years, CSUE has helped people find the answers they need, bringing the University's research-based resources to local communities. CSUE has offices across Colorado and serves all 64 counties.

Part of CSU's Office of Engagement and Extension, CSUE's outreach supports their land-grant mission, with a focus across a broad range of needs and critical areas including economic & community development, food & agriculture, health & well-being, natural resources & sustainability, and youth & family.

Through the CSUE internship program (<https://intern.colostate.edu/>), students from across CSU colleges engage in outreach projects in communities across the state. Intern experiences combine research, program delivery and dissemination efforts with hands-on learning.

CSU System

Colorado State University System

555 17th St., Ste. 1000
Denver, CO 80202
(303) 534-6290

The Colorado State University System (<http://www.csusystem.edu/>) has four campuses with distinct roles and missions that together serve the state, region, country, and the world, educating more than 40,000 new and returning scholars annually. Colorado State University in Fort Collins, the System's flagship, is a doctoral-granting R1 research university and the state's land grant institution. Colorado State University-Pueblo is a comprehensive, regionally focused university and a federally designated Hispanic-Serving Institution offering both graduate and undergraduate degree programs. CSU-Global is the nation's first independent, 100 percent online public university, created to serve learners in Colorado and beyond. The CSU Spur campus, located at the National Western Center in Denver, focuses on the themes of water, food, and health, and offers experiential educational opportunities for all ages. The CSU System is led by a Chancellor who works with the appointed Board of Governors of the CSU System to further the role and mission of the System universities and ensure exceptional service to Colorado.

Board of Governors of the Colorado State University System

The Board of Governors (<http://www.csusystem.edu/board-of-governors/board-members/>) consists of 15 members, nine of whom are voting members appointed by the Governor, as provided in Colo. Rev. Stat. § 23-30-101. The remaining members represent the component universities of the Colorado State University System, with one faculty member and one student leader from each campus.

The Board of Governors fosters the sustainable growth of Colorado State University, Colorado State University–Pueblo, and Colorado State University–Global and supports these separate and distinct institutions through thoughtful planning and resource development. The Board strives to maintain each institution's flexibility to address challenges and opportunities that arise as the institutions seek to fulfill their statutory missions, consistent with the policies of the Colorado Department of Higher Education.

The Board also supports opportunities for cooperation in program and resource sharing among the institutions and facilitates System-wide financial accountability.

Accreditation

All academic and professional degrees and all course credits earned at CSU are institutionally accredited by The Higher Learning Commission (<https://www.hlcommission.org/>) to provide assurance that they meet rigorous quality standards. Accreditation is a requirement for federal financial aid funding and may be a requirement for some employment opportunities, professional licensure, and graduate education.

230 South LaSalle Street, Suite 7-500
Chicago, IL 60604-1411
(800) 621-7440; (312) 263-0456

Many of CSU's academic programs are accredited through professional organizations in their disciplines. Details are available on the pages for individual Degree Programs. A comprehensive list of accredited academic programs may be found on CSU's Accreditation website. (<https://www.ir.colostate.edu/accreditation-2/>)

Assessment of Program Quality and Continuous Improvement

Academic degree programs are periodically reviewed through an internal process to assure the relevancy and high quality expected of a CSU degree. Each degree program defines meaningful student learning outcomes that identify the specific knowledge, competencies, skills, abilities, and values that students should be able to demonstrate upon completion. Defensible standards for evaluating whether students are achieving those outcomes are established and monitored by the faculty. Appropriate assessment of student learning outcomes may include both direct and indirect measures (comprehensive exams, thesis projects, internship evaluations, reflective journals, peer comparisons, job placement rates, graduate school acceptance rates etc.). Departments are responsible for the collection and analysis of learning outcomes data and additionally responsible to demonstrate that the findings are used in a process of continuous quality improvement within the degree program.

Colorado State University's main campus is located in **Fort Collins**, a vibrant and diverse community of some 170,000 residents near the foothills of the Rocky Mountains and alongside the banks of the Cache La Poudre River. Residents enjoy a moderate, four-season climate with an average of 300 days of sunshine and 14.5 inches of precipitation annually.

Fort Collins maintains an array of parks and recreational opportunities, offering easy access to bike trails, hiking, skiing, water sports, rafting, fishing, and other outdoor sports.

Located about an hour north of Denver on Interstate 25 and about 45 minutes south of Cheyenne, Wyoming, the city is within an hour's drive of major recreational areas, including Estes Park, Red Feather Lakes, Horsetooth Reservoir, the Roosevelt National Forest, Rocky Mountain National Park, and several mountain parks.

Fort Collins offers safe and reliable public transportation through Transfort – including MAX Bus Rapid Transit, FLEX regional transport, and the late-night Gold Route. There also are 200 miles of on-street and off-street trails for pedestrians and bicycles, and 35 miles of multi-use trail. In 2018, Fort Collins was named the No. 1 City in America for Cycling by PeopleForBikes.

The city is home to an active and varied arts and entertainment community, anchored by arts and entertainment venues, including the Lincoln Center and several museums and theater companies. Fort Collins also hosts a multi-location public library district, a civic symphony, and a vibrant live local music scene. The Colorado State University Center for the Arts also serves both the local community and hosts a wide range of campus events, include athletics, guest speakers, exhibits, theater, cinema, and concerts.

The natural beauty of its mountain setting, excellent climate, robust transportation systems, and wide range of outdoor and cultural opportunities combine to make Fort Collins an outstanding place to live and learn.
