Master of Education in Education and Human Resource Studies, Educational Leadership with K-12 Principal Licensure Specialization

The M.Ed. in Education and Human Resource Studies, Educational Leadership with K-12 Principal Licensure Specialization is a 15-month cohort program that focuses on the development and licensing of P-12 school administrators who are interested in gaining skills to lead either at the building or district level. Applicants must have a bachelor's degree from an accredited institution, a minimum of 3-years of licensed teaching or special service provider experience and demonstrate leadership potential. The goal of this program is to develop highly qualified leaders whose practice is grounded in research and theory. The program is designed using a relationship-based model that incorporates hybrid instructional formats tailored toward full-time, working educators. The program addresses growing needs for highly qualified educational leaders in P-12 school systems.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

To prepare administrators who:

1. Demonstrate organizational leadership by strategically developing a vision and mission, leading change, enhancing the capacity of personnel, distributing resources, and aligning systems of communication for continuous school improvement.
2. Demonstrate inclusive leadership practices that foster a positive school culture and promote safety and equity for all students, staff, and community.
3. Demonstrate instructional leadership by aligning curriculum, instruction and assessment, supporting professional learning, conducting observations, providing actionable feedback, and holding staff accountable for student outcomes.
4. Demonstrate professionalism through ethical conduct, reflection, and external leadership.

Master of Education in Education and Human Resource Studies, Teacher Licensure Specialization

The M.Ed. in Education and Human Resource Studies, Teacher Licensure Specialization is a 12-month cohort program that focuses on the development and licensing of teachers who have earned their undergraduate degrees (or who have met content course requirements) in specific content areas. Applicants must have a bachelor's degree from an accredited institution and have completed all content area courses required for licensure. The goal of this specialization is to develop mature, highly qualified teachers whose practice is grounded in research and theory gained through discovery, practice, demonstration, observation, and reflection. The program is designed following a Professional Development School model, with courses embedded in PK-12 schools. This specialization design leads to participants' strong pedagogical skills, as well as a deep understanding of effective theories of learning. The program addresses the growing needs of schools for highly qualified teachers.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

To prepare teachers who:

- Demonstrate mastery of and pedagogical expertise in the content they teach.
- Establish a safe, inclusive, and respectful learning environment for a diverse population of students.

Master of Science in Student Affairs in Higher Education

The **M.S. in Student Affairs in Higher Education (SAHE)** program is designed for students seeking careers in student affairs and higher education administration in a college setting. The curriculum is taught by faculty who are both scholars and practitioners. Topics of study include:

- Theories, assessments, and evaluations related to student affairs practice
- Cross-cultural and diversity issues within the context of higher education

- How diverse student learning, developmental theory, and research are relevant to students' education and development
- Current issues and practices in the student affairs profession

A central component of the SAHE program is engaging in intentionally reflective practice as a foundational skill necessary for effective practice in student affairs. This is both a process and an outcome such that reflection-on-action happens in the program to develop practitioner-scholars who can effectively reflect-in-action. The degree is offered in two formats: in-person on CSU's main campus and through CSU Online (<https://www.online.colostate.edu/degrees/student-affairs/>). Students may take additional credits beyond the required amount to strengthen their learning experiences.

Ph.D. in Education and Human Resource Studies, Higher Education Leadership Specialization

The Ph.D. in Education and Human Resource Studies, Higher Education Leadership Specialization prepares students to work as higher education administrators and leaders to address critical issues impacting colleges and universities.

By centering equity and justice in the program's coursework, students gain analytical, research, and critical thinking skills that help learners address contemporary issues in higher education policy and practice. Program graduates learn to apply and create knowledge that leads to transformation in higher education.

This hybrid program is structured in a cohort model where students take coursework online in the fall and spring semester using synchronous video conferencing. During the summers, students take a one-week course in Fort Collins. Specific dates for summer engagements are determined by the program faculty.

School of Social Work

Office in Education Building, Room 127

(970) 491-6612

www.chhs.colostate.edu/ssw (<https://www.chhs.colostate.edu/ssw/>)

School Leadership:

- Charlotte Bright, Director, School of Social Work
- Anne Williford, PhD Program Director
- Amy Martonis, Assistant Director, MSW Program Director
- Dana Gaines, BSW Program Director

The School of Social Work offers a Bachelor of Social Work (BSW) (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/bachelor-of-social-work/>), Master of Social Work (MSW) (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/>) and a Ph.D. in Social Work (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/ph-d-in-social-work/>). Additionally, the school offers several graduate certificate programs (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/graduate-certificates/>) to enhance training for specialized practice contexts.

Social work professionals are community problem solvers who assess and intervene on multiple levels including organizational settings, communities, social service agencies, groups, individuals, and families. Social workers have social justice goals of enhancing health and well-being and promoting social, economic, and environmental justice.

Employment Opportunities:

- Child Welfare
- Public Health
- Family Services
- Gerontology
- Behavioral Health
- Policy/Legislative Work
- Mental Health
- Addictions
- Medical/Health
- School Social Work

- Corrections
- Community Organization/Advocacy

The Social Work curriculum focuses on the practical application of social work principles, research, policies, and practices within human rights and social justice perspectives. Students acquire professional social work knowledge-based skills and values transferable to different settings, population groups, and problem areas. Students apply a person-in-environment lens to engage and intervene with social systems locally, nationally, and globally. Several practical experiences are required through intensive internship programs. Both the BSW and MSW programs are accredited by the Council on Social Work Education (<https://www.cswe.org/>).

Undergraduate Major

- Major in Social Work
- Addictions Counseling Concentration

Graduate Programs in Social Work

The School of Social Work offers an M.S.W. degree and a Ph.D. in Social Work. The MSW degree is accredited by the Council on Social Work Education, with an emphasis in advanced generalist practice. The Ph.D. prepares students for academic positions or for careers in research. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the School of Social Work (<http://www.ssw.chhs.colostate.edu/>).

Major in Social Work

Social work is distinguished by a tradition of concern for people and their interactions with society. Social work professionals are community problem solvers who intervene in organizational settings, communities, social service agencies, groups, individuals, and families with goals of enhancing well-being and promoting social and economic justice. Most social workers are employed in fields such as school social work,

community organization, mental health, advocacy, child and family services, medical social work, and judicial systems.

The Social Work curriculum focuses on the practical application of social work principles, policies, and practices within human rights and social justice perspectives. Students acquire a social work practice foundation transferable to different settings, population groups, and problem areas. Attention is devoted to understanding the person in environment in the U.S., and working with individuals, families, and communities to effect the desired change. At the global level, human rights and economic, environmental, and social needs are explored through international travel courses. Several practical experiences are required. Students work with an agency participant throughout their sophomore year, and then as seniors, participate in a social work agency internship. International placements may be available. The curriculum also includes a strong liberal arts base in social science research and statistics, arts, humanities, social science, and natural sciences.

CSU students are admitted to the School of Social Work (SSW) when they declare Social Work as a major. Two professional organizations, the National Association of Social Workers (NASW) (<https://www.socialworkers.org/>) and the Council on Social Work Accreditation (CSWE) (<https://www.cswe.org/>) guide social work practice and education. The NASW develops the Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>) for practicing social workers. The CSWE accredits bachelor's and master's social work education programs in the United States. The BSW program is accredited by CSWE.

Learning Objectives

Graduating seniors will have demonstrated:

1. Skills in conceptualizing and applying knowledge of social welfare policy and services, a systems perspective, theory, community resources, and community policy-making processes and practices.
2. Knowledge and mastery of the foundation competencies as required by the CSWE for accreditation of the BSW degree.
3. An understanding of the social work code of ethics including mastery of skills in maintaining client confidentiality, establishing professional boundaries, and resolving ethical dilemmas that are presented in case situations.

Potential Occupations

Social Work graduates are employed in a variety of settings including schools, hospitals, community non-profits, public health, judicial systems, adult and child welfare agencies, and county treatment centers. Entry-level job opportunities are plentiful. Graduates should be willing to work with people of all ages and in a multitude of circumstances and settings. Internships are required. Graduates of the BSW program are eligible to apply for advanced standing in graduate programs.

Some examples of career opportunities include, but are not limited to: program manager, international development, assisted living and rehabilitation center administrator, medical social service counselor, probation officer, client advocate, victim-witness program counselor, children and family services worker, transition age youth interventionist, crisis counselor, child protection worker, adult protection worker, gerontology, case manager, community outreach coordinator, youth program counselor, home health worker, occupational social services worker, foster parent consultant, addictions treatment counselor, domestic/intimate partner violence counselor, adoption worker.

Progression in the Major

Progression in the Major is guided by standards required by both NASW (<https://www.socialworkers.org/>) and CSWE (<https://www.cswe.org/>) to ensure compliance with accreditation standards, and that students meet nationally recognized ethical requirements for their profession.

The NASW (<https://www.socialworkers.org/>) Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>) requires that social workers act ethically in their work with clients. It also requires that social workers take action when their colleagues are not acting competently or ethically. The CSWE (<https://www.cswe.org/>) requires that social work programs describe the procedures for informing students of the program's criteria for evaluating students' academic and professional performance and that the program has policies and procedures for terminating students' enrollment in the social work program for reasons of academic and professional performance.

To meet the requirements of these professional governing bodies, the School of Social Work (SSW) has developed a Progression in the Major procedure. Progression in the Major is a time in a student's academic career when faculty and students can review each student's readiness for the profession of social work. Prior to enrolling in the 300 level practice courses (SOWK 340, SOWK 341, SOWK 343), students must apply for Progression in the Major. Approval of the Progression in the Major application is a prerequisite for enrollment in SOWK 340. Generally, students who have 60 or more credits must apply for progression to graduate in the following four semesters. The application for Progression in the Major will be described in SOWK 286A and SOWK 286B.

As a professional program, academic performance and readiness to proceed in the SSW program require a minimum grade point average, completion of required course work, and behaviors appropriate to the performance of social work. Concerns in student performance may be addressed with the student at any time in the student's academic career in the SSW. Learn more about the student expectations for progression and review process on the School of Social Work website (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/bachelor-of-social-work/>).

Practicum and Internship

In the senior year, students fulfill a 10-credit (450 hour) internship in an approved agency setting. The internship is a chance for students to apply a holistic approach and their educational knowledge through observation, practice, and social work supervision, build new skills and be exposed to new learning and growth to demonstrate the required CSWE competencies. CSWE competencies integrate ADEI (anti-oppressive, anti-racist, diversity, equity and inclusion) approaches, multi-level assessment and intervention with individuals, families, groups, organizations, and communities.

Graduate Certificate in Advanced Clinical Behavioral Health

The Graduate Certificate in Advanced Clinical Behavioral Health provides MSW students, social work professionals, and eligible individuals from other disciplines with specialized training and practice skills in advanced clinical behavioral health in the areas of psychopharmacology, trauma informed care, and addictions.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Students will:

1. Apply advanced clinical skills in diagnosis and intervention for practice with specialized mental health populations.
2. Differentiate practice models for client-centered and self-directed care to empower clients for anti-oppressive engagement with mental health services.
3. Distinguish the social work role for collaboration within interdisciplinary behavioral health teams to include social work values and ethics, theoretical orientations, and best practices.
4. Implement culturally aware assessment and intervention techniques for practice in clinical behavioral health, that recognize dynamics of privilege, oppression and personal bias.

Learn more about the Graduate Certificate in Advanced Clinical Behavioral Health on the CSU Online website (<https://www.online.colostate.edu/certificates/advanced-clinical-behavioral-health/>). (<https://www.online.colostate.edu/certificates/advanced-clinical-behavioral-health/>)

Requirements

The Graduate Certificate in Advanced Clinical Behavioral Health increases the competence and accountability of MSW students, social work professionals, and eligible individuals from other disciplines as they work with clients and interdisciplinary teams around assessment, diagnosis, medication, and trauma.

Effective Spring 2022

Additional coursework may be required due to prerequisites.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Conflict Resolution and Mediation

The Graduate Certificate in Conflict Resolution and Mediation provides fundamental skills for helping professionals as they work with clients and interdisciplinary teams around the rapidly growing field of mediation. This certificate provides the required 40 hours of training to be recognized as a mediator by the Mediation Association of Colorado (through SOWK 551). Additionally, this certificate prepares students to work with specialized populations requiring conflict resolution services.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Students will:

1. Apply knowledge, skills and values of conflict resolution and mediation to healthcare disputes, multi-parties, divorce and family, and/or workplace.
2. Apply theories relating to the healthcare and family systems, divorce and family systems, and/or workplace systems.
3. Demonstrate and apply Moore's mediation process in a variety of settings.
4. Demonstrate competence in negotiating disputes in multiple settings including healthcare, family systems, workplace, and/ or multi-parties.
5. Formulate an understanding of mediation ethics and bioethics standards.

Graduate Certificate in PreK-12 School Social Worker

PreK-12 School Social Worker is a specialized field of practice devoted to youth and families in educational environments. Social workers within school systems provide services to students to enhance their emotional wellbeing and improve their academic performance using micro, mezzo, and macro practices. By earning this certificate, students obtain the foundational credentials required by the Colorado Department of Education (CDE) to be a Special Services Provider (SSP) in PreK-12 settings. This additional specialized coursework will boost employment marketability.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students who successfully complete the certificate will be able to:

1. Analyze the roles and functions of social work in school-based practice settings.
2. Apply lessons learned from the history, legislative contexts, and theoretical perspectives of school social work.
3. Recommend practice-based solutions for K-12 students based on the Multi-Tiered System of Supports (MTSS) framework and other cultural, linguistic, and trauma-informed approaches.
4. Perform the assessment process of Functional Behavior Assessment for K-12 students.
5. Create Behavior Intervention Plans for K-12 students.
6. Propose solutions for students with exceptionalities that account for complex contexts, including attitudes and perceptions, inclusive education, and identification, referral, assessment, and service delivery within Special Education.
7. Perform the core skills necessary to practice the stages of mediation.
8. Apply skills of conflict resolution to assist students and schools.

Graduate Certificate in Social Aspects of Human-Animal Interaction

The Graduate Certificate in Social Aspects of Human-Animal Interaction (HAI) increases competence and professional skills of eligible individuals who work with animals and those who provide care to animals. This certificate enables students to ethically integrate animals into a variety of treatment settings and create mutually beneficial relationships with animals and the environment.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students will:

1. Address the intersections of human-animal interactions in society through the lens of social work and other behavioral sciences.
2. Engage, assess, and intervene with clients to promote healthy, mutually beneficial relationships with animals.
3. Apply competencies related to intervention strategies which utilize animal-assisted interventions in various treatment settings.
4. Identify and effectively intervene and advocate for the mental health and wellness of those who work with animals.

Master of Social Work

The Master of Social Work (MSW) degree is a nationally recognized Advanced Generalist program accredited by the Council on Social Work Education (CSWE). Our program equips students for versatile career paths from micro to macro settings, such as clinical practice through nonprofit leadership and policy advocacy. In alignment with social work values, our program is anti-oppressive and anti-racist, continually striving to advance diversity, equity, inclusion, and justice in every aspect of social work education and practice.

Learning Objectives

Through experiential learning, in the pursuit of social, economic, and environmental justice, the goals of the Advanced Generalist MSW program are to prepare graduates who:

1. Serve as skilled practitioners who engage in ethical, autonomous, and multi-disciplinary practice across system levels utilizing a Person-in-Environment perspective.
2. Serve as leaders who advance social, economic, and environmental justice, promote human rights, and engage in social action to eliminate oppressive conditions for all people.
3. Serve as leaders that value and appreciate human relationships and diversity in its multiple forms and who model and advocate for inclusive practices and cultural humility.
4. Practice life-long learning, engage in scientific inquiry, and utilize critical thinking to inform practice at all system levels.
5. Critically apply relevant theories and social work values to engage, assess, intervene and evaluate practice within changing contexts at all systems levels.

Program Options

The School of Social Work offers different program options for completing the MSW degree:

1. **Full Program** – For students who have an undergraduate degree in a different discipline, our two-year full-time program starts every fall and is offered in person. Students in this program complete three elective courses, enabling them to complete one of five graduate certificate programs offered by the School of Social Work or to engage in interdisciplinary coursework. This program is 64 credits. View the MSW program schedule (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/full-time-msw-program/>).
2. **Advanced Standing** – For students who have earned a BSW from an accredited program within the past seven years, this accelerated path starts every summer and is offered in person. Students complete this program over three semesters for a total of 39 credits, which includes three elective credits (one course). View the Advanced Standing MSW Program schedule (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/advanced-standing-msw-program/>).
3. **Part-time Online/Hybrid Learning Options** – The School of Social Work also offers a part-time online program completed in three years or in two years for students with Advanced Standing. Online students meet for one in-person learning weekend per semester at the cohort location. Current cohorts include Fort Collins (off-campus), Boulder/Longmont, and Denver. Please visit the Distance MSW Program website (https://www.online.colostate.edu/degrees/social-work/?utm_source=google&utm_medium=cpc&utm_campaign=3-

4. **MSW/MPH Dual Degree** – In partnership with the Colorado School of Public Health, the School of Social Work offers a dual degree Master of Social Work/Master of Public Health program. For information, visit the MSW/MPH website (<https://www.chhs.colostate.edu/ssw/programs-and-degrees/master-of-social-work/master-of-social-work-master-of-public-health-program/>).
5. **MACP/MSW Joint Degree** – In partnership with CSU's Department of Psychology, the School of Social Work offers a joint degree: Master's in Addiction Counseling in Psychology and Social Work.

Students who successfully complete the MSW program are prepared to pursue licensure in accordance with the Department of Regulatory Agencies (DORA) in Colorado and the Association of Social Work Boards (ASWB). Licensure requirements may vary in different states and US territories.

(<http://catalog.colostate.edu/general-catalog/colleges/liberal-arts/public-policy-administration-plan-c-mppa/public-policy-specialization/>) The **College of Liberal Arts** aims to educate committed and active citizens and to develop in them an understanding of humans, including their history, literature, and art; their social, political, and economic systems; and their relationship to the environment. The College offers courses in the arts, humanities, and social sciences, which constitute the foundation of a liberal arts education.

Undergraduate Programs (<https://www.libarts.colostate.edu/students/undergraduate-majors-minors/>)

Undergraduate majors lead to one of four degrees: Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science. Descriptions of the specific departmental and interdepartmental majors and concentrations in the College of Liberal Arts are located in the following pages. Students should consider simultaneously completing the requirements of a second major or a departmental or interdisciplinary minor, either in the College of Liberal Arts or in another college. With careful planning, numerous combinations are possible within four years of study. The minimum scholastic average acceptable for graduation in any college program is a 2.000 average in all major courses in addition to the university's overall grade point average requirement of 2.000 for CSU courses.

Change of Major (<https://advising.libarts.colostate.edu>)

To change your major, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117, or send an email to cla_advising@colostate.edu. More information is available on the College of Liberal Arts Academic Advising Center website (<https://advising.libarts.colostate.edu>).

Undergraduate Career Opportunities and Career Counseling (<https://www.libarts.colostate.edu/students/undergraduate-majors-minors/>)

Graduates from the College of Liberal Arts enter a remarkable variety of careers. Degrees from the College of Liberal Arts prepare students for success in their professional, personal, and civic lives. The skills and dispositions students develop through study in the liberal arts are widely sought. In preparing themselves for future career opportunities students are encouraged to work closely with Academic Support Coordinators, departmental mentors, and career counselors. Through these conversations students will be encouraged to develop resumes, interviewing skills, and articulation of the ways in which their skills will benefit potential employers. Students should also consider participating in internships to gain practical work experience.

Prelaw (<https://polisci.colostate.edu/pre-law/>)

Clark A, Room 076
(970) 491-5421
Prelaw advisor: Gina Robinson

Make an appointment by emailing: Gina.Robinson@colostate.edu (gina.robinson@colostate.edu)

Students preparing for law school can choose any major. Law schools seek above-average students with broad educational backgrounds and excellent communication, and analytical skills. Prelaw students, regardless of major, should design a course of study that develops their skills in speaking, writing and analytical capabilities. Law schools require an undergraduate degree for admission. Visit the Department of Political Science (<https://polisci.colostate.edu/pre-law/>) (<http://politicalscience.colostate.edu/undergraduate/pre-law/>) for more information.

Education Abroad (<https://www.libarts.colostate.edu/students/education-abroad/>)

Because the knowledge of at least one other culture is valuable in understanding our own, students are encouraged to take a semester or longer to study outside of the United States as part of their overall program at CSU. Students interested in education abroad should plan, far in advance, by discussing opportunities with their advisor and by visiting the Office of International Programs (<http://educationabroad.colostate.edu>) in Laurel Hall.

Graduate Programs (<https://www.libarts.colostate.edu/students/graduate-programs/>)

A variety of liberal arts advanced degrees are available in the College. Academic degrees offered are Doctor of Philosophy, Master of Arts, Master of Science, Master of Fine Arts, and Master of Music, Master of Sport Management, Master of Arts Leadership and Cultural Management and a Master of Public Policy Administration. The last three are generally considered professional degrees.

The College offers three interdisciplinary master's degrees. The Department of Anthropology and Geography (<https://anthgr.colostate.edu/graduate-programs/ma-in-anthropology/>) offers a master's degree in Anthropology with a specialization in International Development, with courses from across CSU. The Departments of English and Languages, Literatures and Cultures offer a joint master's program in foreign languages and the teaching of English as a second/foreign language. Information on all of these degree programs may be obtained from any participating department.

For detailed information about graduate programs, contact individual departments. See also the Graduate and Professional Bulletin.

Major in International Studies

College of Liberal Arts | Interdisciplinary Programs Main Office, Clark C 104

(970) 491-6296

inst.colostate.edu (<http://inst.colostate.edu/>)

Jonathan Carlyon, Interim Director

The International Studies major is an interdisciplinary program designed to help students understand the nature of diverse cultures and peoples. There are five concentrations: Asian Studies, European Studies, Global Studies, Latin American Studies, and Middle East and North African Studies. Courses are required in anthropology & geography, political science, economics, history, foreign language, and international studies, with other elective courses chosen from these and many more disciplines across the college and university.

Learning Objectives

Graduates of the International Studies major will demonstrate that they are competent and capable in:

1. Effectively articulating themes of International Studies and related fields in written and oral contexts.
2. Critically explaining and evaluating global issues.
3. Applying an interdisciplinary approach to knowledge.
4. Practicing positive global change.

Potential Occupations

Graduates in International Studies apply their education in a wide variety of careers, including those in international business, non-profit organizations, academics, public policy, law, government, city planning, engineering, environmental sustainability and clean energy, information systems, journalism, publishing, education, sales and marketing, management and administration, artistic production, mass media, communications, museums, entertainment, foreign service, and many other areas in need of well-rounded and broadly world-educated people. Many International Studies graduates enter graduate or professional schools for more specialized study in either international studies or one of many other disciplines. To enhance their career opportunities, majors are encouraged to consider participating in paid or volunteer work or internship opportunities, and to study abroad.

Accelerated Program

The major in International Studies includes an **accelerated program option** for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over three **summer sessions**. Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about **Accelerated Programs**.

Major in Interdisciplinary Liberal Arts

Interdisciplinary Liberal Arts

Clark Building, Room C 124

(970) 491-5421

cla_ilamajor@mail.colostate.edu

libartsmajor.colostate.edu (<http://libartsmajor.colostate.edu>)

Kevin Foskin, Director

The Interdisciplinary Liberal Arts major is a multipurpose, broad-based B.A. degree program specializing in analytical problem-solving, human and cultural knowledge, innovative thinking, and personal reflection. Our curriculum emphasizes broad intellectual understanding, informed cultural awareness, and spacious interdisciplinary perspective, resulting in a unique and personal academic experience. Students design their own individualized program of study, self-selecting courses from the humanities, social sciences, and the visual-performing arts. Equally, students will accrue career enhancing communication and problem-solving skills essential for success in hundreds of careers awaiting them after graduation. The Interdisciplinary Liberal Arts B.A. degree is purposefully designed to be flexible, adaptive, expansive, and responsive to the changing and evolving academic interests and intellectual needs of our students. It is a major ideally suited for the ever-changing and rapidly-evolving 21st century workplace, preparing students for both existing careers and those not yet imagined. As students change and evolve, so does this major.

To further increase depth and focus, and to enhance expertise and career opportunities, Interdisciplinary Liberal Arts students are required to complete a second field of study, which can be any minor, or a second major, or 21 credits (6 upper division) in a foreign language.

Learning Objectives

Students will:

1. Think analytically and follow lines of thinking in both fact-based argumentation and problem-solving.
2. Know and utilize multiple ways of seeing for the purpose of productively living and affecting positive change in the world.

Effective Fall 2022

Second Field Requirement

Students in the Interdisciplinary Liberal Arts major must complete one of the following choices:

3. Write and speak clearly and persuasively in both traditional and emerging (digital) platforms.
4. Summarize and communicate information in a variety of traditional and emerging information sharing formats.
5. Practice humility, tolerance, and self-criticism and use each to further the fostering of free and flourishing communities and environments, both locally and globally.
6. Understand how to work successfully and collaboratively with a variety of disciplinary perspectives and expertise, and to use this integrative ability to get things done.
7. Empathize with others and act responsibly and collaboratively in ongoing efforts to ensure a better social, political, cultural, and environmental world.
8. Master cultural understanding and sensitivity in the context of informed citizenry, premised on responsible social, democratic, and environmental stewardship locally, nationally, and internationally.

Accelerated Program

The major in Interdisciplinary Liberal Arts includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

Graduates in Interdisciplinary Liberal Arts apply their education in a wide variety of careers—existing and forthcoming—and/or academic professions, including public policy, politics, healthcare, artistic production, mass media, engineering, law, city planning, business, information systems, international business, journalism, publishing, education, sales and marketing, management and administration, government, communications, museum work, entertainment, foreign service, and many others. Many also continue on to graduate or professional schools for more specialized study. To enhance their career, academic or professional opportunities, the Interdisciplinary Liberal Arts majors can take advantage of the widest variety of internships, professional practicums, and/or study abroad opportunities of any undergraduate degree on campus.

Change of Major

To change your major, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117, or send an email to cla_advising@colostate.edu. More information is available on the [College of Liberal Arts Academic Advising Center website](#).

If you are interested in declaring your minor or if you have minor advising questions, please contact Usama Alshaibi (usama.alshaibi@colostate.edu).

The Media Studies minor provides a foundation for understanding the impacts and roles of mass media in society. Courses focus on media and film history, criticism, law, ethics, social effects, cultural consequences, and multicultural and international media issues. The minor is offered jointly by the Department of Journalism and Media Communication and the Department of Communication Studies. Students in the Journalism and Media Communication major may not use JTC courses to complete this minor. Students in the Communications Studies major may not use SPCM courses to complete this minor.

Learning Objectives

Upon successful completion, students will be able to:

1. Explain mass media's impacts on society.
2. Analyze a variety of media forms including news media, popular culture, advertising, social media, and other forms of mediated communication, information, art, and entertainment.
3. Assess various issues in media and film history, criticism, law, ethics, social effects, cultural consequences, and multicultural and international media.
4. Develop and apply skills in written, spoken, and mediated communication.

Requirements Effective Fall 2021

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

This program trains students to be leaders in arts policy, advocacy, and community engagement while also preparing them for career advancement and development in a range of areas within both for-profit and nonprofit arts organizations. The certificate consists of 12-credits (4 classes) and is offered online.

Learning Objectives

Students graduating with the Graduate Certificate in Arts Management will demonstrate knowledge and the capability to:

1. Synthesize complex arts management scenarios relating to leadership and operations.
2. Identify the critical differences between arts and culture organizations and other types of businesses, and how those differences can be used to build organizational consensus.
3. Apply leadership methodologies to the varying needs of arts organizations.
4. Recognize financial, leadership, and policy roles within arts organizational systems and cultures and identify the paths to sustainability.

Requirements Effective Spring 2024

Graduate Graduate Programs in Anthropology

The department offers graduate programs leading to a Master of Arts degree (Plan A thesis option or Plan B portfolio option). It also has a Master of Arts specialization in each of four programmatic areas: Health and Well-Being, Humans and the Environment, International Development and Globalization, and Professional Methods and Techniques. Students may develop a research project or professional program in these programmatic areas, or in any area related to our faculty's research interests.

Health and Well-Being—studies the ways that human health and wellness are influenced by past and present sociocultural, environmental, biological, and biocultural forces, by drawing from broad and holistic perspectives on human well-being.

Humans and the Environment—investigates how past and present human activities influence the environment; the ways ecological and other processes affect human evolution and the human condition today; and the resilience of social and ecological systems.

International Development and Globalization—examines how local societies respond to global influences; the extent to which cultural meanings, beliefs, institutions, structures of inequality, and social relations between genders and among kin are changing as a result; and how processes of economic and community development can improve basic aspects of human welfare.

Professional Methods and Techniques—develops skills in a wide range of methods and techniques used by professionals in applied anthropology, federal and state natural resource agencies, and other arenas of social, historical, biological and spatial research about humans. These include qualitative research and interview protocols, quantitative analysis, GIS and remote sensing, archaeological field survey, historic archaeological methods, culture and heritage resource management, and paleoanthropological methods.

ANTH 573 Paleoclimate and Human Evolution Credits: 3 (3-0-0)

Course Description: Methods used to reconstruct past environments and understand the effects of past climate on the major trends of human evolution.

Prerequisite: None.

Registration Information: Graduate standing.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 575 Paleoecology Credits: 3 (3-0-0)

Course Description: Introduction to the principles, theories, and methods of paleoecology with examples from paleoanthropology.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 617 Place, Space and Adaptation Credits: 3 (3-0-0)

Course Description: Critical evaluation of the nexus between space, society and environment. An interdisciplinary approach to studying the ways biological, material, historical, political-economic and cultural processes combine to shape human-environment relationships in place-based contexts.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 650 Edge Effects--Place, Embodiment, Environment Credits: 3 (3-0-0)

Also Offered As: ESS 650.

Course Description: Interdisciplinary thinking on questions of place, power, embodiment, and environmental adaptation. Drawing on human geography, ethnography, political ecology, and social-ecological theory, develop an understanding of boundaries and transitional zones as places of complex social and species exchange by looking at some key philosophical texts, but also applying theoretical understanding to specific case studies.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ANTH 650 and ESS 650.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 660 Field Archaeology Credits: Var[2-10] (0-0-0)

Course Description: Field applications of nondestructive survey methods, advanced cartographic and excavation methods, project supervision skills.

Prerequisite: ANTH 460.

Restriction: Must be a: Graduate, Professional.

Registration Information: Two seasons of field experience may substitute for ANTH 460. Required field trips.

Terms Offered: Fall, Summer.

Grade Mode: Instructor Option.

Special Course Fee: Yes.

ANTH 674 Research Design and Analysis in Anthropology Credits: 4 (3-2-0)

Course Description: Learn how to formulate anthropological research questions, design a research project, organize and analyze data, and visualize and interpret results.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 679 Applications of International Development Credits: 3 (3-0-0)

Also Offered As: IE 679.

Course Description: In-depth interdisciplinary analysis of theoretical and practical issues in implementing economic and community-based international development programs.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Graduate standing. Credit not allowed for both ANTH 679 and IE 679.

Terms Offered: Fall, Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 684 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 686 Practicum-Field Archaeology Credits: Var[1-18] (0-0-0)

Course Description: Direction of anthropological fieldwork under professional supervision.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 692 Seminar Credits: 3 (0-0-3)

Course Description: Current trends of research in archaeology; cultural and physical anthropology.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 696 Group Study-Anthropological Theory Credits: Var[1-3] (0-0-0)

Course Description: Intensive analysis of selected topics and theories in anthropology, both historical and contemporary.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 792 Special Topics in Anthropology Credits: 3 (0-0-3)

Course Description: A seminar course offering special topics each time the course is taught. Recent readings from the literature will be used to foster discussion.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Grade Mode: Traditional.

Special Course Fee: No.

ANTH 795 Independent Study Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ANTH 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Geography (GR)

GR 100 Introduction to Geography (GT-SS2) Credits: 3 (3-0-0)

Course Description: Major geographic themes applied to selected regions; physical environment, human-land relationships, regional analysis.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Geography (GT-SS2).

GR 102 Geography of Europe and the Americas (GT-SS2) Credits: 3 (3-0-0)

Course Description: Examines the physical and human geographies of Europe, including the former Soviet Union, and the Americas from the Southern Cone to Canada. Focus is on the content of these geographies, why they exist, and their current significance; supported by extensive map analysis.

Prerequisite: None.

Registration Information: Credit not allowed for both GR 102 and GR 180A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Diversity, Equity, & Inclusion 1C, Geography (GT-SS2).

GR 110 Introduction to Physical Geography (GT-SC2) Credits: 3 (3-0-0)

Course Description: Introduction to the fundamentals of physical geography including climatology, climate change, biogeography, plate tectonics, landforms and soils. Explore the science of mapping the physical earth, spatial analysis and thinking, and human-environment interactions.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GR 111 Introduction to Physical Geography Lab (GT-SC1) Credit: 1 (0-2-0)

Course Description: Laboratory application of the principles of physical geography.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

GR 204 Sustainable Watersheds (GT-SC2) Credits: 3 (3-0-0)

Also Offered As: WR 204.

Course Description: Effects of climate, land use, and water use on the sustainability of water quantity and quality.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GR 204, GR 304, WR 204 or WR 304.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GR 210 Physical Geography Credits: 3 (3-0-0)

Also Offered As: ESS 210.

Course Description: Energy, mass budget, and human impacts on atmosphere, hydrosphere, and continental land surfaces.

Prerequisite: None.

Registration Information: Credit not allowed for both GR 210 and ESS 210.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 213 Climate Migrants (GT-SS2) Credits: 3 (3-0-0)

Course Description: Explore the various drivers of migration, emphasizing climate and others including biogeographic, political, economic, and social factors.

Prerequisite: None.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Geography (GT-SS2).

GR 217 Human-Environment Geographies (GT-SS2) Credits: 3 (3-0-0)

Course Description: Examines human-environment relationships using geographic theories, geographic methods, and empirical evidence. Explores cross-scalar geographic interactions that shape environmental change and emphasizes critical thinking and small group interactions.

Prerequisite: None.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Geography (GT-SS2).

GR 220 Mapping, Cartography, and Spatial Thinking Credits: 3 (2-2-0)

Course Description: Spatial thinking is the science and art of making maps that play a key role in enabling geographers to visualize space and spatial patterns, as well as, convey spatial information to others. Introduction to the science of spatial thinking, including collecting spatial information and making maps, modern geographic information sciences (GIS) that have evolved from cartography, and spatial analysis techniques that are fundamental to Geography.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 303 Mountain Geography Credits: 3 (3-0-0)

Course Description: The physical and human dimensions of mountains. Examples from mountains around the world with case studies from Colorado.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: Junior standing.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 305 Geography of Global Health Credits: 3 (3-0-0)

Course Description: Study, research and practice of global health using an ecological approach that integrates health with spatial thinking. Focuses on a common set of issues which transcends boundaries, both domestic and international, and a set of actions to address the geographic burden of disease. Key principles and concepts, history of global health transitions, common and emerging health issues.

Prerequisite: ANTH 200 or GR 100 or INST 200.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 311 GIS for Social Scientists Credits: 3 (1-4-0)

Course Description: Applications of GIS techniques useful to the social sciences. Mapping techniques and GIS toolkits are practiced in lab.

Prerequisite: GR 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 315 Quantitative Geographical Methods Credits: 3 (3-0-0)

Course Description: Methods to collect, analyze, display, and model geographic data.

Prerequisite: GR 100.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 320 Cultural Geography Credits: 3 (3-0-0)

Course Description: Geographic analysis of cultural phenomena, elements emphasizing human-land relationships and spatial patterns of agriculture, cities, language, religion.

Prerequisite: GR 100.

Registration Information: Sections may be offered: Online.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

GR 323 Remote Sensing and Image Interpretation Credits: 3 (2-2-0)

Also Offered As: NR 323.

Course Description: Remote sensing systems and applications; characteristics of photographic, scanner and radar images; imagery interpretation.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: GR 323, GR 503, NR 323, NR 503.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 330 Urban Geography Credits: 3 (3-0-0)

Course Description: Spatial distribution of urban areas and the geographic similarities and contrasts that exist between and within them.

Prerequisite: GR 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 331 Geography of Farming Systems Credits: 3 (3-0-0)

Course Description: Critical geographic analysis of space, place, and power across historical and contemporary farming systems in the US and worldwide.

Prerequisite: GR 100.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 333 Glaciers and Climate Change Credits: 3 (3-0-0)

Course Description: Glacier mass balance, dynamics, past fluctuations, and glaciers' relation to climate change.

Prerequisite: GR 100 or GR 210 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150.

Registration Information: Credit allowed for only one of the following:

GEOL 381A2, GR 333 and GR 381A2.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 345 Geography of Hazards Credits: 3 (3-0-0)

Course Description: Causes, effects, distributional patterns, and human adjustments to environmental hazards.

Prerequisite: GR 210.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 348 Biogeography Credits: 3 (3-0-0)

Course Description: Species distribution of plants and animals in relation to earth history and environments, evolution, and ecology.

Prerequisite: GR 000 to 99999 - at least 3 credits.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 400 History of Theory-Anthropology and Geography Credits: 3 (3-0-0)

Also Offered As: ANTH 400.

Course Description: Anthropological/Geographical theory from its beginnings with Aristotle through recent developments into the 20th century.

Prerequisite: (ANTH 100 or ANTH 200) and (ANTH 120 and ANTH 121 and ANTH 140 or GR 100).

Registration Information: Junior or senior standing. Sections may be offered: Online. Credit not allowed for both ANTH 400 and GR 400.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 410 Climate Change: Science, Policy, Implications Credits: 3 (3-0-0)

Course Description: Implications and consequences for earth systems including the cryosphere, hydrosphere, biosphere, and human systems.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: Junior standing.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 415 The Geography of Commodities Credits: 3 (3-0-0)

Course Description: Social relations, international trade, and environmental impacts surrounding the production, transportation, exchange, and consumption of commodities.

Prerequisite: GR 100.

Registration Information: Junior standing.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 418 Development Geographies Credits: 3 (3-0-0)

Course Description: Examines development processes through a critical geography lens. Assesses the social and environmental impacts of various development interventions – from tropical medicine in the colonial era to Green Revolution technologies and current Chinese infrastructural development in Africa.

Prerequisite: GR 100 to 499 - at least 3 credits.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing.

Grade Mode: Traditional.

Special Course Fee: No.

GR 420 Spatial Analysis with GIS Credits: 4 (3-2-0)

Course Description: Theory, application of geographic information systems for spatial analysis; conceptual basis of GIS, nature and use of geographic data, case studies.

Prerequisite: GR 000 to 99999 - at least 3 credits.

Registration Information: Credit not allowed for both GR 420 and NR 322.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 425A Special Topics: Human Geography Credits: Var[1-3] (0-0-0)

Course Description: Special topics in human geography.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: May be taken for a maximum of 9 credits.

Grade Mode: Traditional.

Special Course Fee: No.

GR 425B Special Topics: Geospatial Geography Credits: Var[1-3] (0-0-0)

Course Description: Special topics in geospatial approaches in geography.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: May be taken for a maximum of 9 credits.

Grade Mode: Traditional.

Special Course Fee: No.

GR 425C Special Topics: Physical Geography Credits: Var[1-3] (0-0-0)

Course Description: Special topics in physical geography.

Prerequisite: GR 100 to 499 - at least 3 credits.

Registration Information: May be taken for a maximum of 9 credits.

Grade Mode: Traditional.

Special Course Fee: No.

GR 430 Land Change Science and Remote Sensing Credits: 3 (3-0-0)

Course Description: Local case studies and global cases of land-use/land-cover changes in rural, peri-urban, and urban areas.

Prerequisite: GR 100.

Registration Information: Junior standing.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 431 Land Change Science Lab Credit: 1 (0-3-0)

Course Description: Utilize advanced remote sensing techniques and satellite images, air photos, and ancillary data to investigate land-use and land-cover changes.

Prerequisite: GR 323 or NR 323 or GR 503 or NR 503.

Registration Information: Must have concurrent registration in GR 430.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 440 Political Geography Credits: 3 (3-0-0)

Also Offered As: POLS 440.

Course Description: Examines the meaning of political space; states and nations; competition for territory, including methods and justifications; the structure of political space focusing on states; geopolitics; and the state in an era of globalization. Concepts are illustrated by real-world situations.

Prerequisite: GR 100 or POLS 101.

Registration Information: Sophomore standing. Sections may be offered: Online or Mixed Face-to-Face. Credit not allowed for both GR 440 and POLS 440.

Grade Mode: Traditional.

Special Course Fee: No.

GR 448 Forest Biogeography and Climate Change Credits: 3 (3-0-0)

Course Description: Forest adaptation and conservation in relation to global change with a focus on climate change.

Prerequisite: ESS 211 or ESS 311 or F 311 or GR 100 or GR 210 or ESS 210 or GR 303 or GR 348 or GR 410.

Registration Information: Junior standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 482A Study Abroad--Vietnam: Land Change Science and Remote Sensing Credits: 3 (0-0-3)

Course Description: Vietnam specific local case studies of land-use/land-cover changes in rural, peri-urban, and urban areas. Integrate these local cases as examples that relate to global cases looking at the drivers of land-use/land-cover changes. The broader implications of these changes are discussed, and examples of these implications are witnessed through field visits.

Prerequisite: GR 100.

Registration Information: Sophomore standing. Credit not allowed for both GR 430 and GR 482A.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 487 Internship Credits: Var[1-9] (0-0-0)

Course Description: Academic-based work experience with selected organizations or agencies. Supervised application of principles of geography.

Prerequisite: GR 100 to 499 - at least 9 credits.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

GR 493 Capstone Seminar Credit: 1 (0-0-1)

Course Description: Exploration of the linkages among the human and physical geography sub-fields, geographic techniques, and other natural and social sciences as well as how professional geographers approach issues.

Prerequisite: None.

Registration Information: Junior standing. Concurrent registration in one of the following AUCC Category 4A courses for the Major in Geography: GR 303, GR 410, GR 415, or GR 430.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GR 495 Independent Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

GR 503 Remote Sensing and Image Analysis Credits: 4 (3-3-0)

Also Offered As: NR 503.

Course Description: Interpretation and analysis of photographic, multispectral scanner, and radar data; sensor systems; applications to resource management.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: GR 323, GR 503, NR 323, or NR 503.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GR 548 Biogeography Credits: 3 (3-0-0)

Course Description: Species distribution of plants and animals in relation to earth history and environments, evolution, and ecology.

Prerequisite: None.

Restriction: Must be a Graduate.

Registration Information: Graduate Standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GR 592 Special Topics in Geography Credits: 3 (0-0-3)

Course Description: Recent papers from the literature will be used to foster discussion among participants.

Prerequisite: None.

Registration Information: Graduate standing.

Grade Mode: Traditional.

Special Course Fee: No.

Major in Anthropology

The mission of the Department of Anthropology and Geography is to:

1. Offer and maintain instructional programs that provide a comprehensive overview and analyses of people and their cultures, both past and present.
2. Conduct research in order to advance and expand knowledge of the fields of anthropology and geography.
3. Participate actively in programs of interdisciplinary research.

The Department of Anthropology and Geography houses a faculty of cultural anthropologists, archaeologists, biological anthropologists, and geographers whose scholarship spans the breadth of the human experience. The program prepares undergraduate students to describe, analyze, and interpret the human condition. An examination of the social, environmental, and evolutionary contexts in which the human species is embedded defines most course work in the discipline. The program is integrative, drawing from geography, biology, the humanities, and other social and natural sciences. Geography figures prominently in our program and provides an important spatial lens through which human groups are examined over time. Four programmatic areas define faculty research and scholarship with which students can engage: humans and the environment, international development and globalization, health and well-being, and professional methods and techniques. In the education of undergraduates, the department values and promotes experiential training, primary research, as well as public engagement and education.

The research endeavors of the anthropology faculty are trans-disciplinary and international. They are interested in diverse topics including but not limited to contemporary culture, ethnicity, linguistics, comparative religion, virtual worlds, subsistence patterns, archaeology, human ecology, human anatomy, human evolution, biogeography, land cover/land use patterns, and the behavior of non-human primates.

Anthropology majors follow a liberal arts curriculum that provides a broad education with an emphasis on learning how to learn. The department has ten research and teaching laboratories and three summer field schools; the Ethnographic Field School, the Archaeology Field School, and the Paleontology Field School.

Undergraduate students can pursue a general anthropology degree focused on an appreciation of human diversity, past and present, from a broad and holistic perspective. Students can also declare a concentration within the program. Declaring a concentration allows for a focused course of study, specializing in the particular subfield of interest. Within each concentration (Archaeology, Biological Anthropology, and Cultural Anthropology), specific categories of classes guide students in learning the major theories, methods, and applications related to the modern practice of our discipline. Along with our offerings of world class field schools, course work in archaeological, biological, and ethnographic methods and geographical techniques are encouraged in order to further gain experience and perspective. Upon graduation, students are prepared for a diverse array of jobs or advanced training in graduate school. Students come away with a respect and appreciation for the diversity of human existence.

Learning Objectives

Students will:

1. Employ anthropological theory and qualitative/quantitative research methods to describe and analyze human biological and cultural variation over time and across space.
2. Describe and evaluate the inter-relationships between environments, health and well-being, and human cultural and biological evolution.
3. Synthesize anthropological theory, methods, and data to formulate arguments both orally and in written format.
4. Articulate anthropology to non-specialists and explain anthropological concepts across subfields and/or with other social sciences and humanities disciplines.
5. Transfer knowledge gained in anthropology program to a career trajectory after graduation.

Potential Occupations

Anthropology, like many majors in the liberal arts, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Anthropology majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participating in internships and cooperative education opportunities is highly recommended to enhance students' practical training and development. Careers for graduates are available in international development, health care, education, business, natural resource management, and government. Graduates who go on for advanced studies can pursue careers in anthropology or attain advanced positions with the possibility of rising to top professional levels.

Some career opportunities for Anthropology graduates include, but are not limited to: museum curator/researcher, genealogist, international relief representative, salvage archaeologist, collections assistant, resource specialist, classical or historical anthropologist, cultural affairs officer, diplomatic service representative, immigration or foreign service officer, linguist, educational television researcher, forensic osteologist, biographical writer, scientific/technical writer, reporter, ethnographic photographer, anthropological linguist, rural development worker, ethnic groups' special concerns advocate, intercultural educator, medical anthropologist, grant writer, psychological anthropologist, international development administrator, public relations representative, public opinion pollster, sales/marketing representative, consultant for cross-cultural relations, personnel worker, geographic information systems specialist.

Major in Anthropology, Archaeology Concentration

The Archaeology concentration focuses on the Americas, and includes prehistoric and historic archaeology. The faculty members of this sub-discipline have expertise in:

- Rocky Mountain and Plains archaeology
- Paleo-Indian studies
- Hunter-gatherer ecology
- Taphonomy
- Zooarchaeology
- Public archaeology
- Andean archaeology
- Inca and Spanish empires

- Mining communities
- Mesoamerican archaeology
- Landscape archaeology
- Geoarchaeology
- Legacies of Resilience Project (LORE-LPG)

Special resources include the Center for Mountain and Plains Archaeology, the MesoAmerican lab, the Center for Archaeogeophysics and Geoarchaeology, and the Cultural Resources section of the Center for the Ecological Study of Military Lands. The archaeology program sponsors an annual field school each summer and houses the CSU Archaeological Repository.

Major in Anthropology, Biological Anthropology Concentration

Over the past half century, Biological Anthropology has undergone tremendous change from a discipline that was defined by a descriptive, typological approach to human morphology (the study of shape) to one that includes both experimental and comparative analyses in a population-based framework.

Biological anthropologists continue to cross traditional disciplinary boundaries and interact with both the physical and natural sciences including biology, anatomy, genetics, chemistry, biometry, and endocrinology as well as the social sciences.

The expertise of existing faculty in Biological Anthropology at CSU includes:

Human skeletal biology
Forensic anthropology
Evolutionary theory
Neanderthal paleobiology and paleobiogeography
Dental anthropology

Early hominin feeding ecology
Taphonomy
Plio-Pleistocene Africa
Pleistocene Asia
Primate origins, biology, and locomotion

Two broad themes exist within biological anthropology. The first emphasizes evolutionary theory and morphological transformations, and the second is concerned with adaptations that are the product of the interaction between human biology and culture. Current faculty research addresses both of these themes.

Special resources include the Bone Lab, the Zooarchaeology Lab, the Human Osteology Lab, the 3-D Imaging and Analysis lab, the Center for Paleoanthropological Research, and the Primate Origins lab. The biological anthropology program sponsors an annual paleontology field school each summer in Wyoming. Existing faculty also have geographic foci significant to their research. Research areas include Uzbekistan, Kazakhstan, Croatia, Kenya, and Tanzania.

Major in Anthropology, Cultural Anthropology Concentration

The Cultural Anthropology concentration focuses on contemporary experiences of culturally distinct communities encountering a rapidly globalizing political economy. Students are provided with robust training in mixed methods, community-based approaches, and applied anthropology. Topically, faculty investigate issues related to the transformation of individual experience and community relations within the context of economic development, governmental and nongovernmental policy, and environmental change. Increasingly, faculty seek to understand the way subjective and material well-being are impacted by the rapidly changing contexts of modernity. Topics of research interest include:

Human-environment interactions
Community and economic development

Health and well-being
Cultural psychiatry
Disasters and resilience
Gender
Culture continuity and change

The faculty are passionate about teaching, and they strive to bring excitement and relevance to the classroom by infusing it with their practical field experiences. Cultural faculty conduct their research in India, Southeast Asia, Central Asia, Africa, the Caribbean, New Orleans, Native North America, and in virtual reality. Students concentrating in Cultural Anthropology explore issues of place and space, cultural theory, cultural content and methods.

Minor in Anthropology

Anthropology focuses on the evolution of the human condition and provides a cross-cultural view of humanity. The description and explanation of human activities in other societies and during different periods of time provides a sense of perspective for individuals operating within their own culture. A minor may be focused on one or more of the sub-disciplinary divisions such as biology, archaeology, cultural anthropology, or applied anthropology. The minor may also be distributed across the fields, similar to the requirements of the major.

To declare this minor, please visit Clark B 218.

Requirements Effective Fall 2001

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Major in Geography

The Geography major is housed in the Department of Anthropology and Geography. Through course work and internship opportunities, majors are provided with a broad background in geographic thinking. The major emphasizes interactions between humans and the environment in an era of rapid global change. Critical study of diverse relationships between space, place, humans, built and natural environments allows students to interpret geographic features, patterns and processes.

The Geography curriculum also concentrates specifically on mountain ecosystems and human-environment interactions. Course work takes advantage of faculty expertise in these areas of study, some of which are

specific to the state of Colorado. Geography faculty use a wide range of research methods, including geographic information systems (GIS), remote sensing, spatial modeling, spatial statistics, participatory methods, and ethnography to address applied research questions in Colorado, the Rocky Mountains, Patagonia, Southeast Asia, Latin America, Melanesia, and Africa. Undergraduate majors can expect to gain knowledge of and/or participate in faculty research related to:

1. Climate change implications for society and ecosystems
2. Land-use and land-cover change
3. Critical human geography
4. Critical Health geographies
5. Biogeography

- 6. Livelihood systems
- 7. Conservation
- 8. Cultural geography
- 9. Urban geography
- 10. Economic geography
- 11. Political/electoral geography
- 12. Geography of virtual worlds

The Geography major is built on the core values the Department of Anthropology and Geography promotes. These values emphasize experiential training, primary research, public engagement, and education.

Learning Objectives:

Students will demonstrate:

- 1. Mastery of the unifying themes of human and physical geography, as well as knowledge of the diverse conceptual and methodological approaches present in the discipline of geography.
- 2. The ability to identify, describe, and interpret spatial patterns and structures.
- 3. A critical understanding of relationships between humans and the environment, with a specific focus on mountain systems and local cultures.
- 4. An ability to present geographic concepts, approaches, methodologies, and applications in written, oral, cartographic, and other visual forms.

- 5. An understanding of the discipline’s relevance to everyday life.
- 6. An ability to communicate effectively and respectfully, including critical thinking and discussion skills.

Potential Occupations:

Like many other majors in Liberal Arts, the Geography major provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Geography majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Careers for graduates vary depending upon your focus in Geography. Geographers often work in international development, Foreign Service, education, conservation/natural resource management, urban and regional planning, data analysis, data management, GIS analyst, marketing, and business. Graduates who go on to advanced studies can pursue academic careers in geography.

Change of Major:

To change your major to Geography, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Minor in Geographic Information Science and Geographic Analysis

The Geographic Information Science and Geographic Analysis minor has a broad interdisciplinary application. The analytical methods introduced and the technologies used in the different courses and applied lab work are relevant to many disciplines including: urban and regional planning, marketing and business, archaeology, agriculture, conservation and engineering. This minor is designed for all students desiring to gain a background in the geographic theory, methods, tools and technical skills that will increase their employment potential in any number of applied fields where geographic analysis is a valuable skillset.

Learning Objectives

After successfully completing this minor, students will be able to:

1. Address spatial thinking and spatial problem-solving across a range of disciplines and applied fields.
2. Appropriately and accurately make use of different digital data sources, and apply geographic information science tools and analysis to these data in order to analyze and recommend actions related to real world problems.
3. Understand and appropriately apply geographic analysis principles and methods, including spatial modelling, to real-world problem solving.
4. Use state-of-the-art geographic information system software and computer cartography software to implement spatial analysis of geographic problems faced by managers, planners, and employees across a range of fields and disciplines.
5. Master concepts of spatial data collection, spatial data entry, and spatial analysis/geographic analysis for real-world problem solving.
6. Utilize geographic analysis methods and analytical procedures to produce cartographically sound thematic maps from geographic information.

Requirements Effective Spring 2021

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Minor in Geography

The minor in Geography examines the critical interactions among space, place, people and the built and natural environment. These perspectives are used to interpret the spatial and temporal distribution of features and processes by applying spatial techniques and information technologies such as Geographic Information Systems (GIS) and remote sensing.

Learning Objectives

Upon successful completion, students will demonstrate:

1. Mastery of the unifying themes of human and physical geography, as well as knowledge of the diverse conceptual and methodological approaches present in the discipline of geography.
2. Ability to identify, describe, and interpret spatial patterns and structures.
3. Critical understanding of the relationship between humans and the environment, with a specific focus on mountain systems and local cultures.
4. Ability to present geographic concepts, approaches, methodologies, and applications in written, oral, cartographic, and other visual forms.
5. Understanding of the discipline's relevance to everyday life.

Requirements Effective Fall 2022

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Certificate in Museum and Cultural Heritage Studies

Earning a Certificate in Museum and Cultural Heritage Studies prepares students for entry-level careers in museums, cultural heritage sites, and similar venues that promote public outreach and education, and provides a solid foundation for students who wish to pursue advanced studies in the field of museum studies. Core courses introduce students to the history of museum and cultural heritage management, administration, curation, artifact handling, collections management, interpretive planning, exhibitions, education, ethics, and working with indigenous communities.

Learning Objectives

Upon successful completion, students will be able to:

1. Describe the historical development of museums and cultural heritage sites around the world.
2. Identify the differences among various categories of museums and sites.
3. Explain various policies governing museums and sites in the areas of administration, mission, object acquisition and care, ethics, and working with indigenous communities.
4. Distinguish the role played in museum and cultural heritage site operations by directors, curators, conservators, exhibit designers, preparators, registrars, collections managers, education staff, and rangers in order to understand the training that is appropriate to enter these careers.
5. Demonstrate skills in written, oral presentation and practical settings, engage in fruitful oral discussion, debate, and formal presentations that are logically coherent, clearly and concisely stated, and accessible to their peers on topics within museum and cultural heritage studies.

Requirements Effective Fall 2020

Courses used to satisfy requirements outside this certificate cannot count toward completing this certificate. If using a course toward major/concentration/minor/honors requirements, the student must take a different course for this certificate.

Additional coursework may be required due to prerequisites.

Master of Arts in Anthropology

The Master of Arts in Anthropology at CSU prepares students for entrance into a Ph.D. program and for non-academic careers. The program builds on the diverse research interests of our faculty who specialize in cultural anthropology, archaeology, and biological anthropology as well as human and physical geography. The program options include writing a thesis or developing a portfolio as the principle demonstration of preparedness for further study or professional work.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Students who are conferred an M.A. from the Department of Anthropology and Geography will be able to:

1. Demonstrate an understanding of anthropological theory and method, and how to apply them appropriately.
2. Engage in independent research that addresses academic questions or societal challenges.
3. Demonstrate awareness of and respect for human diversity across space and time.
4. Possess the academic background and skills to enter a Ph.D. program in anthropology or a job related to the discipline.

Requirements Effective Fall 2021

Plan A

The thesis option must consist of a minimum of 30 semester credits of course work concentrated in anthropological areas relevant to the participant's professional goals. The thesis is the culmination of a research project carried out by the student under the guidance of his or her advisor. A final examination consists of a defense of the thesis, as well as other parts of the program of study.

Plan B

The non-thesis option is intended for students seeking development of an understanding of Anthropology which will allow them to move on to a PhD program in Anthropology, or be incorporated in their work. Plan B students are expected to take a more broadly distributed series of courses and to show less specialization than that which characterizes Plan A programs of study.

Requirements for Plan B are a minimum of 35 credits of study. Students must complete a portfolio of work demonstrating both the breadth of their understanding of Anthropology and their own area of specialization, selected in consultation with the student's advisor. A final examination consists of a defense of the portfolio, as well as other parts of the program of study.

Elective Courses - Select from 12 to 17 credits in courses integrated with the student's program of study in consultation with advisor.		12-17
Additional Credits for Independent Study or Thesis Work		1-6
Program Total Credits:		30-35

- A minimum of 18 hours of regular course work in Anthropology is required. This excludes independent study.
- A maximum of six credits of ANTH 695 allowed towards graduation under the Plan A option. A minimum of 3 credits of ANTH 695 is required toward graduation under the Plan B option.
- A maximum of six credits of ANTH 699 will be allowed towards graduation under Plan A. No credits of ANTH 699 allowed toward graduation under the Plan B option.

2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Arts in Anthropology, The Anthropology of Health and Well-Being Specialization

The Master of Arts in Anthropology, the Anthropology of Health and Well-Being Specialization studies the ways human health and wellness are influenced by past and present sociocultural, environmental, biological, and biocultural forces by drawing from broad and holistic perspectives on human well-being.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students who are conferred an M.A. in Anthropology will:

- 1. Demonstrate an understanding of anthropological theory and method, and how to apply them appropriately.
- 2. Engage in independent research that addresses academic questions or societal challenges.
- 3. Demonstrate awareness of and respect for human diversity across space and time.

Master of Arts in Anthropology, Humans and the Environment Specialization

The Master of Arts in Anthropology, Humans and the Environment Specialization investigates how past and present human activities influence the environment, the ways ecological and other processes affect human evolution and the human condition today, and the resilience of social and ecological systems.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

- Students who are conferred an M.A. in Anthropology will:
1. Demonstrate an understanding of anthropological theory and method, and how to apply them appropriately.
 2. Be able to engage in independent research that addresses academic questions or societal challenges.
 3. Demonstrate awareness of and respect for human diversity across space and time.
 4. Possess the academic background and skills to enter a PhD program in anthropology or a job related to the discipline.

Master of Arts in Anthropology, International Development Specialization

The Master of Arts in Anthropology, International Development Specialization examines how local societies respond to global influences and the extent to which cultural meanings, beliefs, institutions, structures of inequality, and social relations between genders and among kin are changing as a result. This specialization also explores how economic and community development processes can improve basic aspects of human welfare.

Master of Arts in Anthropology, Professional Methods and Techniques Specialization

The Master of Arts in Anthropology, Professional Methods and Techniques Specialization develops skills in a wide range of methods and techniques used by professionals in applied anthropology, federal, and state natural resource agencies, and other arenas of social, historical, biological, and spatial research about humans. These include qualitative research and interview protocols, quantitative analysis, GIS and remote sensing, archaeological field survey, historic archaeological methods, culture and heritage resource management, and paleoanthropological methods.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Students who are conferred an M.A. in Anthropology will be able to:

1. Demonstrate an understanding of anthropological theory and method, and how to apply them appropriately.
2. Engage in independent research that addresses academic questions or societal challenges.
3. Demonstrate awareness of and respect for human diversity across space and time.
4. Possess the academic background and skills to enter a PhD program in anthropology or a job related to the discipline.

Ph.D. in Anthropology

The Ph.D. in Anthropology at CSU supports advanced coursework and research with a focus on place, space, and adaptation. Students achieve this perspective on the discipline by engaging with a curriculum infused with geographic methods and approaches. This program provides students with the skills and expertise to address research questions that 1) sit at the intersection of anthropology and geography, 2) apply geographic methods to anthropological questions, and 3) critically evaluate the impact of place and space on human/ecosystem adaptation.

Master's Degree Credit (a maximum of 30 credits may be accepted from a master's degree)	30
Program Total Credits:	72

A minimum of 72 credits are required to complete this program.

Most students entering the Ph.D. program in anthropology will bring in 30 credits from a Master's program in a related field. The above curriculum represents a total of 42 credits beyond the Master's level. If a prospective student has less than 30 credits toward the program, an individualized curriculum plan will be developed by working with primary advisor that will cover possible anthropology deficiencies.

In the Department of Art and Art History at CSU, we approach learning in a holistic fashion with an eye towards helping students develop their creative problem-solving skills. We emphasize the conceptual and the practical, where the "why" is as important as the "how." Our program balances ideation and research with hands-on learning and material process. Our visual art degrees are thinking degrees where students learn to communicate within historical and contemporary contexts to find their place in the world.

Dr. Eleanor Moseman, Chair

Our programs:

The Department of Art and Art History offers undergraduate degrees rooted in a progressive, challenging, and engaging curriculum. Our programs offer opportunities for international and interdisciplinary study

and support our students' individual paths in research and creative artistry.

Our program begins with our Foundations classes, an intensive inquiry into fundamental questions of time and structure, form and observation, color and composition, and materials and space, along with a global survey of art history that lays the groundwork for an arts education. After completing the requirements of the Foundations Program, students can choose upper-division (300-400 level) courses in one of our ten concentration areas; often students opt to do more than one concentration.

All of our degree programs provide our students with a wide range of desirable job skills. They include creative ideation, visual literacy, time management and organization, project management, research, written and verbal communication skills, emotional intelligence, giving and receiving constructive criticism, problem solving, critical thinking, prioritizing, and discernment, among many others. We support our graduates in being engaged, ambitious, and well equipped to step into the next stage of their lives where their skills, knowledge, and confidence will allow them to pursue a successful career as creative thinkers in the rapidly changing world of the 21st century.

As part of the College of Liberal Arts, students in the Department of Art and Art History have access to career resources (<https://www.libarts.colostate.edu/students/careers/>) that help them create their future. We encourage our students to participate in internships, cooperative education, and service-learning opportunities to enrich their practical training and development.

Major in Art, B.F.A.

The Department of Art and Art History offers the **Major in Art, B.F.A. (Bachelor of Fine Arts)** with two options of study: the **Art Education**

Concentration, and the **Studio concentrations**. Both are considered professional degrees.

The **Major in Art, B.F.A., Art Education Concentration**, embraces the artist-teacher concept, allowing students to develop a strong studio practice and take coursework to prepare to teach art at the K-12 level. Students engage in philosophical and theoretical studies, contemporary pedagogical practices, and arts-based research to prepare for the complexities of the K-12 art studio. Student teaching, field work, and service learning is expected and prepares students to enter a career as an art educator.

The **Major in Art, B.F.A., Studio concentrations**, are professional degrees for the studio art major. With 10 studio concentrations to choose from (*see list below*), students explore various mediums and gain a foundational knowledge base in art history. Students have opportunities to learn from master artists and study art throughout the ages, delve into different forms of expression, and investigate their impact on society. Students encounter diverse studio environments designed to provide depth and breadth of knowledge, immersive experiences, and mastery of processes necessary to communicate meaning in art. Choices for studio concentrations are in Drawing, Electronic Art, Fibers, Graphic Design, Metalsmithing, Painting, Photo Image Making, Pottery, Printmaking, and Sculpture.

The curriculum progression in the department for the B.F.A. is similar within the concentrations and some concentrations may have restrictions. First-year students complete Foundations courses in form and observation, time and structure, color and composition, materials and space, and global art history. Sophomores explore various concentration courses and become familiar with studio practices for the concentration studios housed in dedicated classrooms that feature large, well-equipped studio spaces designed for exploration. Juniors and seniors focus on advanced topics in their chosen concentration by taking one upper-division course in their chosen field each semester. Additionally, at this level art education students are engaged in pedagogical course work.

Learning Objectives

Students will demonstrate:

1. Fundamental knowledge and mastery of media and processes necessary to communicate meaning in a work of art.
2. Ability to communicate clearly about their own art and the art of others in terms of both content and visual form.
3. Knowledge about contemporary art and the motivation to view and discuss current local, regional, and national exhibitions.

In addition to the outcomes above, students with an Art Education concentration will be able to:

1. Integrate literacy, numeracy, and other skill-building aptitudes while providing appropriate accommodation and differentiation strategies in the art experiences they develop for their students.
2. Effectively document, analyze, and reflect on student learning and make appropriate changes for more effective instruction.
3. Demonstrate proficiency in all areas of the Colorado Teacher Quality Standards.

Potential Occupations

Students with a B.F.A. in Art possess a number of transferable skills in communication, analysis, and critical thinking that are appropriate for work in traditional business as well as positions in academia and roles

as freelance artists, graphic designers, art educators, art historians, studio fine artists and as “creatives” in government, industry, and non-profits. Employers appreciate art majors for their diverse skills and their ability to adapt to a variety of tasks and work environments. Participation in internships, cooperative education, service learning, and education abroad opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can attain positions involving greater responsibilities with the possibility of rising to top professional levels. Depending on student interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: art appraiser, art director, art therapist, exhibit designer, art critic, jeweler, gallery director, graphic design artist, free lance artist, sculptor, woodworker, welder, foundry worker, studio photographer, technical illustrator, painter, textile designer, weaver, art educator, art curator, art librarian, art museum educator, web page designer, photo lab technician, art restorer, and master printer, among many others.

The Art Education concentration embraces the artist-teacher concept, allowing students to develop a strong studio practice and take coursework to prepare to teach art at the K-12 level. Students engage in philosophical and theoretical studies, contemporary pedagogical practices, and arts-based research to prepare for the complexities of the K-12 art studio. Student teaching, field work, and service learning is expected and prepares students to enter a career as an art educator.

Learning Objectives

Students will:

1. Demonstrate an understanding of art content (studio, art history, and visual literacy) enabling them to teach art at the K-12 level.
2. Demonstrate appropriate studio skills resulting in a coherent body of work and artist statement.
3. Demonstrate that they are able to integrate literacy, numeracy and provide appropriate accommodation and differentiation strategies in the art lessons they develop for their students.
4. Demonstrate that they can effectively document, analyze, and reflect on student learning and make appropriate changes for more effective instruction.
5. Demonstrate proficiency in all areas of the performance-based standards for Colorado teachers upon completion of the program.

Requirements Effective Fall 2023

The Art Education concentration requires a 2.75 cumulative CSU GPA, and that students pass the PLACE exam. Admission to the Center for Educator Preparation (CEP) (<http://www.cep.chhs.colostate.edu/students/teacher/admissions.aspx>) is also required. Fingerprint and background check.

A minimum grade of C (2.000) or better is required in all Art and Education coursework.

Major in Art (B.F.A.), Drawing Concentration

The Drawing Concentration includes a solid foundation in the basics of drawing, plus a strong emphasis on the advanced development of drawing as an art form in its own right. Initially, courses expose students to working from observation and thinking critically about observation as an attention-orienting skill. A variety of fundamental skills, research habits, techniques, and materials are explored through basic exercises and open projects. Perception skills and visual vocabulary are introduced to students through assignments, group critiques, and discussions. Throughout the program, students are expected to acquire, develop, and refine skills and to engage in an exploration of

personal expression and ideas. Drawing students are expected to be highly motivated individuals dedicated to the practice of drawing as a sophisticated art, and dedicated to thinking critically about their practice. Our program will assist them in developing their making and thinking aptitudes towards a body of work which displays an advanced level of visual challenge and aesthetics, as well as conveying a sense of content and meaning.

Major in Art (B.F.A.), Electronic Art Concentration

The Electronic Art concentration offers students the chance to create and critique within the context of digital methods and materials. By

integrating digital media theories into their creative practice, students work with software and hardware to explore humanity's relationship with the digital realm. These explorations can include game theory, experimental video techniques, net.art, user interface, software creation, the creation of social tools, installation work, physical computing, and code within the context of visual arts. Electronic art students are also

encouraged to incorporate interdisciplinary, interactive, and collaborative practices in their work.

Major in Art (B.F.A.), Fibers Concentration

The Fibers concentration fosters creativity and artistic expression in a wide variety of textile media. Students develop skills in visual communication as they investigate the language of textiles and the role of fibers in contemporary art and design. Undergraduate courses provide foundations in weaving and surface-design methods—including fabric printing, painting, dyeing, and embellishment. Classes also promote creative investigation of off-loom constructions, feltmaking, mixed media, and installation.

Studio work is enriched with research in the collections of the Gregory Allicar Museum of Art and the Avenir Museum of Design and

Merchandising. Students receive guidance in professional practices as they direct their talents toward careers in art, design, and education. CSU alumni exhibit their work regionally, nationally, and internationally; teach at public and private schools, colleges, and universities; and lead workshop programs throughout the U.S. Our alumni also jury and curate exhibitions, work as designers, and write for national publications. Study abroad and internship opportunities are available. Suggested non-art electives that would enhance the major include AM 363 and AM 460.

Requirements Effective Fall 2023

A minimum grade of C (2.000) or better is required in ART 350, ART 351, ART 450, ART 451.

Major in Art (B.F.A.), Graphic Design Concentration

The Graphic Design concentration is closely aligned with the artistry, practices, and standards of excellence in the contemporary design professions. With an emphasis on rich processes, conceptual problem-solving, and technical proficiency, students are able to create effective expressions of visual communication in a variety of print and digital media. Experimental explorations of typography, illustration, and design systems are expected from participants of the program, as well as applications of design that address social impact and awareness.

Design theory, history, and professional practices are discussed regularly with faculty. Projects and activities are designed to prepare students for the varied challenges and opportunities for professionals in visual communications.

Major in Art (B.F.A.), Metalsmithing Concentration

The Metalsmithing concentration offers students the opportunity to explore a range of traditional techniques and processes, while emphasizing formal and conceptual development within their own artistic practice. Class projects introduce and strengthen technical skills, and provide awareness of both historical and contemporary practice within the field. Students are encouraged to enter regional and national juried exhibitions, to participate in workshops and conferences, and

ultimately to locate and establish a place for themselves within the field of contemporary jewelry and metalsmithing, either professionally, academically, or both.

Major in Art (B.F.A.), Painting Concentration

The Painting concentration gives students the ability to explore, develop, and gain personal understanding of the visual language and technical aspects of the painting medium. Additionally, it encourages the development of material experimentation and conceptual thinking in the upper-level courses. Students begin by working from observation, developing skills and proficiency in oils. As students gain skills and abilities with oil paints, they are encouraged to challenge the very notion of what painting is by exploring alternative tools, methods, materials,

and surfaces. Discipline and perseverance are strengthened as students develop a unique voice, conceptually and formally. In their senior year, students work closely with the Painting faculty to develop a distinctive body of work that is sophisticated in its content and scope.

Major in Art (B.F.A.), Photo Image Making Concentration

Courses in the Photo Image Making concentration enable students to explore artistic, personally-driven and conceptual aspects of the photographic medium. Projects and assignments encourage each student to explore individual directions, with equal emphasis given to intuitive and intellectual concerns. Student work is evaluated for aesthetic qualities, technical excellence, and conceptual development. The curriculum is designed to help students build a strong foundation in the fundamentals of contemporary photographic practice, while emphasizing the medium's expressive potential and underscoring its connections to the contemporary art world. Interdisciplinary and

experimental work is encouraged, as are more traditional approaches and conventional processes. Facilities are available to enable offerings in a wide range of processes and techniques, from silver-based image production and digital capture/output methods to alternative processes such as cyanotype and palladium printing. Supportive instruction and information are provided for a range of image making strategies that students may wish to pursue.

Major in Art (B.F.A.), Pottery Concentration

The Pottery concentration is committed to providing a comprehensive curriculum in the range of processes and concepts present in contemporary ceramic art. The philosophy of the area encourages the concurrent development of critical, technical, and manual skills. Issues and debates in contemporary crafts, sculpture, architecture, design, and studio pottery are presented alongside a rigorous exploration of forming and decorating processes and technology. Faculty mentor students in refining their artistic voice through the medium of ceramics. Students'

conceptual development and materials-based learning are encouraged through access to a well-equipped studio facility with materials and tools that support experimentation. Students' capstone experience results in a defined body of work that demonstrates conceptual rigor and depth of choices connecting the material and the visual.

Major in Art (B.F.A.), Printmaking Concentration

Printmaking courses at the undergraduate level are structured to develop a strong personal artistic vision and instill the self-confidence necessary to allow ongoing creative growth through a variety of media. A sound technical background in Lithography, Screen-Printing, Intaglio, Relief

Woodcut, Post-Digital methods, and encouragement of experimental hybrid techniques will provide students with the professional skills needed to cultivate a robust studio practice and explore new innovative research based on that foundation. The community workshop atmosphere of the printmaking area immerses students in group collaboration as well as personal exploration, thus preparing each student for real-world occupational applications of their research. Through sharing visual concepts and technical investigations on a

regular basis, students learn how to apply newly acquired knowledge productively and intuitively, while simultaneously developing skill sets desired by prospective employers. Interactive artistic dialog between highly motivated printmakers is a cornerstone to the printmaking curriculum, leading to a wide array of unique and diverse avenues for creative inquiry.

Major in Art (B.F.A.), Sculpture Concentration

The Sculpture concentration challenges students to create a vibrant fusion between technical process, conceptual expression, and professionalism. Students are encouraged to experiment and innovate while exploring content in the areas of object-making, installation, site-based work, performance, time-based art, and digital processes. Refined technical skill will be developed and is a requirement for students as they progress through the Sculpture concentration. Through the integration of readings, classroom discussion, presentations, and individual research,

the sculpture curriculum is designed to enable students to explore concepts and content relevant in contemporary society and in the art world today. The synthesis of this broad spectrum of information is intended to aid students as they develop a unique personal vision for their artwork and studio practice.

Requirements Effective Fall 2023

A minimum grade of C (2.000) or better is required in ART 370, ART 371, ART 470, ART 471.

Major in Art, B.A.

The **Major in Art, B.A. (Bachelor of Arts)** is a liberal arts degree with two concentrations: **Art History** and **Integrated Visual Studies**. Both concentrations begin their study with the Foundations program. First-year students complete Foundations courses in studio art and global art history.

The **Art History concentration** seeks to develop students' critical and analytical skills and ability to comprehend global visual arts within social, historical, cultural, and aesthetic frameworks. Students develop an understanding about the visual and material culture of societies from around the world. Our Art History program champions a global history of art, offering courses that range from the Italian Renaissance to contemporary African art, women in art, and native North American art. Students in art history go on to careers in academia, museums, historical societies, and auction houses, and can apply their skills in visual literacy and analytical research to a wide range of careers.

The **Integrated Visual Studies concentration** is an ideal program for students to develop skills as makers and thinkers. By making work and interpreting images from visual art, photography, film, television, and commercial imagery, students learn to analyze visual communication from a variety of aesthetic, theoretical, scientific, economic, sociological and historical viewpoints. Students take a relatively equal ratio of studio and academic classes that foster critical awareness of how society is reflected and produced through visual means in the 21st century. Integrated Visual Studies students have the curricular flexibility to pursue interdisciplinary academic interests in combination with explorations in the theoretical and technical aspects of art making within a studio practice.

Learning Objectives

Art History students will demonstrate:

- Knowledge of the tools and techniques of art historical research and scholarship.
- Communication skills, original thinking, art historical interpretation, and research skills in written form, resulting in a work of original scholarship.
- Communication skills, original thinking, art historical interpretation, and research skills in oral form.
- General knowledge of the monuments and principal artists of global art, including a broad understanding of historical monuments as well as the art of the 20th and 21st centuries.
- Adequate mastery of a foreign language to support research through the reading of primary source materials.
- Functional knowledge of the creative process.

Integrated Visual Studies students will demonstrate:

- Communication skills in written and oral form with precision, cogency, and rhetorical force.
- The ability to explain and defend their creative work and research effectively and rationally, and the ability to advocate for their world view.

- Skills of invention and innovation—developing things and ideas that never existed before.

Potential Occupations

Students earning a B.A. with a major in Art develop a wide range of transferable communication, analytical, and critical-thinking skills. Participation in internships, cooperative education, service learning, and education abroad opportunities is highly recommended to enhance practical training and development. Depending on student interests, electives taken, or concentration selected, available career choices include academia, art museums, auction houses, historical societies, art appraiser, art director, exhibition designer, art critic, gallery director, art librarian, art restorer, art conservator, and art museum educator. Employers appreciate art majors for their multiple skills and the visual literacy that allows them to make sense of an image-saturated world.

Change of Major

To change your major to Art, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available at <https://advising.libarts.colostate.edu/>.

Major in Art (B.A.), Art History Concentration

The Art History concentration seeks to develop students' critical and analytical skills and their ability to comprehend global visual arts within social, historical, cultural, and aesthetic frameworks. Students learn about the visual and material culture of societies from around the [world and across time, reflecting the global turn in the discipline of art history today. Our program offers a diverse array of courses that range from the Italian Renaissance to contemporary African art, women in art, and native North American art.](#) Art History majors can apply their skills in visual literacy, analytical research, and oral communication to a wide range of fields to shape their career path. Our students [have entered careers in academia, museums, historical societies, and auction houses, just to name a few.](#)

Learning Objectives

Students will:

1. Identify major monuments and works of global art from within their historical contexts.
2. Apply accurate vocabulary to address the larger social, political, philosophical, and religious issues that impacted the production of major monuments and works of art.
3. Practice visual analysis, contextual analysis, comparison essays, and analyzing primary and secondary texts in art history.
4. Apply skills in visual and contextual analysis and working with primary and secondary texts to inform argument-based art historical research, writing, and oral presentation.
5. Develop visual literacy tools to interpret, negotiate, and make meaning from visual media.

Major in Art (B.A.), Integrated Visual Studies Concentration

The Integrated Visual Studies concentration is an ideal program for students to develop skills as makers and thinkers. By making work and interpreting images from visual art, photography, film, television, and commercial imagery, students learn to analyze visual communication from a variety of aesthetic, theoretical, scientific, economic, sociological and historical viewpoints. Students take a relatively equal ratio of studio and academic classes that foster critical awareness of how society is reflected and produced through visual means in the 21st century. The [Integrated](#) Visual Studies concentration gives students the flexibility to pursue interdisciplinary academic interests in combination with explorations of the conceptual and technical aspects of art making within a studio practice.

Learning Objectives

- Through directed studies and individual investigation, students will:
1. Demonstrate fundamental knowledge and mastery of technology and processes by creating and communicating meaning in works of art.
 2. Demonstrate fundamental knowledge and mastery of art/design history, theory, and criticism by clearly communicating about their own art work and the art of others.
 3. Synthesize concepts, knowledge, skills, and experiences in the visual arts through a culminating capstone project or experience.

Requirements Effective Fall 2024

A minimum grade of C (2.000) or better is required in all upper-division Art coursework.

Minor in Art History

Designed for students with an interest in art history who are not Art majors, the Art History minor will provide students with an understanding of the rich history of art in its global historical context. Students will learn the language of art history, enhance their skills in research, writing, and presenting, and practice using conceptual tools for interpreting and understanding our visual world across cultures and disciplines.

For students who are ready to declare the Art History minor, please reach out to Gentry Noel-Heunes (<https://art.colostate.edu/people/c836864974/>), Academic Success Coordinator.

For more information on the minor, please contact Professor Emily Moore (<https://art.colostate.edu/people/emilylm/>).

Learning Objectives

Students will:

1. Identify major monuments and works of global art from within their historical contexts.
2. Apply accurate vocabulary to address the larger social, political, philosophical, and religious issues that impacted the production of major monuments and works of art.
3. Practice visual analysis, contextual analysis, comparison essays, and analyzing primary and secondary texts in art history.
4. Apply skills in visual and contextual analysis and working with primary and secondary texts to inform argument-based art historical research, writing, and oral presentation.
5. Develop visual literacy tools to interpret, negotiate, and make meaning from visual media.

Requirements Effective Fall 2021

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

A minimum grade of C (2.000) or better is required in all Art History coursework.

¹ Courses should be selected in consultation with the student's advisor.

² Up to 3 credits of Art History-related courses from outside the Department of Art and Art History may be included in the Art History minor degree. Such courses must be chosen or included in consultation with the minor advisor and must be approved by Art History area faculty.

Certificate in Art History

The Certificate in Art History is designed for students enrolled in the Department of Art and Art History who are not pursuing the Art History concentration but wish to develop a broader background in art history. The certificate gives students the opportunity to gain a deeper understanding of art historical content and methodologies at the advanced level, complementing their primary course of study as studio artists and art educators.

The program requires a minimum of 12 credits. Students are required to take ART 419. The additional 9 credits should come from upper-division

credits taken in the Department of Art and Art History. Note that the 12-credit requirement is in addition to the regular art history coursework taken by all students pursuing the BA or the BFA in the Department of Art and Art History.

Learning Objectives

Students will:

1. Identify major monuments and works of global art from within their historical contexts.
2. Apply accurate vocabulary to address the larger social, political, philosophical, and religious issues that impacted the production of major monuments and works of art.
3. Practice visual analysis, contextual analysis, comparison essays, and analyzing primary and secondary texts in art history.

Master of Fine Arts (M.F.A.)

The Master of Fine Arts program at CSU fosters excellence in artistic inquiry and achievement. For more than forty years, the Department of Art and Art History has demonstrated its commitment to graduate education. With concentrations in Drawing, Fibers, Graphic Design, Metalsmithing and Jewelry, Painting, Printmaking, and Sculpture, ours is the most comprehensive visual arts program in the Rocky Mountain West and one of the largest academic departments at CSU.

Students accepted into our program work closely with nationally recognized faculty who guide a wide range of research and experimentation in studio media. In each phase of the curriculum, a student's individual studio practice is enriched by research in art history and clarified through engagement with contemporary discourse surrounding art, craft, and design. Graduate students exhibit work and give presentations at venues throughout the region and beyond as they prepare to move forward in their careers.

Alumni of the program exhibit their work nationally and internationally, teach at schools, universities, and specialist workshops, and are active in the arts community. Our alumni also jury and curate exhibitions, work as designers, contribute to conferences and arts publications, and work with arts organizations.

We encourage students interested in the graduate program to view the M.F.A. (<https://art.colostate.edu/master-of-fine-arts/>) section of our website and spend some time with the Graduate and Professional Bulletin (<https://catalog.colostate.edu/general-catalog/graduate-bulletin/>).

Learning Objectives

Students will:

1. Develop professional knowledge and mastery of media and processes necessary to aesthetically communicate meaning in a cohesive body of artworks.
2. Develop professional foundations through activities such as teaching, exhibitions, fellowships and grant applications.
3. Demonstrate oral and written skills related to involvement with scholarly dialogue.
4. Demonstrate the ability to communicate clearly and critically about art and related research.
5. Synthesize graduate experiences both within the context of academia and professional practice opportunities external to the university setting.

 Professor Elizabeth Williams, Chair

The Department of Communication Studies is a caring and supportive community of teachers, scholars, and students who are passionate about communication's centrality to our lives. Our communication scholars infuse the classroom with teaching practices that honor multiple ways of knowing, and program a rich array of coursework directly engaging diversity in text, identity, culture, positionality, history, and more. Our undergraduate, graduate, and faculty research consistently addresses power, identity, and agency. These innovative practices routinely receive regional, national, and international recognition.

Our approach to the study of communication is limitless. Students who join us:

- Study communication in interpersonal, organizational, and cultural contexts.
- Explore the history, theory, and criticism of media and film.
- Investigate the nature of public and political discourse.
- Bring the intersecting powers of story and film from communities and individuals around the world to Northern Colorado and beyond.
- Advocate for diversity, equity, and inclusion in public process.

Graduate Programs in Communication Studies

Graduate studies in communication at CSU attract students from around the world who deeply value teaching, scholarship, community, and excellence. The Department of Communication Studies offers two Master of Arts in Communication Studies degrees (Plan A and Plan B - see below), and one Ph.D. in Communication degree. All programs provide a rigorous scholarly experience that offers maximum flexibility in study across three areas of emphasis:

1. Film and media studies
2. Relational and organizational communication
3. Rhetoric and civic engagement

Coursework in each of these areas, respectively, includes the following topics:

1. Contemporary issues in media, media theories, media audiences, media texts, and media industries.
2. Communication theories, communication and diversity, interpersonal theories, and discourse and organization.
3. Public address, rhetoric and public affairs, rhetorical theory, rhetorical criticism, rhetoric of everyday life, and anti-racist, queer, and feminist theory.

Students enrolled in the Ph.D. in Communication degree develop programs of study tailored to their unique professional goals. They also teach a variety of undergraduate courses and are mentored by acclaimed scholars engaged in leading-edge research.

Students enrolled in M.A. in Communication Studies programs receive an introduction to the field of Communication Studies and instruction in critical and social scientific research methods. Plan A Master's students augment the M.A. core with electives of their choosing and complete a master's thesis under the advisement of a faculty committee. Plan B Master's students augment the M.A. core and elective curriculum with

coursework and research in public deliberation. They also complete an applied research project.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Communication Studies (<http://communicationstudies.colostate.edu>).

Major in Communication Studies

p>

Communication Studies majors receive a broad-based, liberal arts education designed to equip them for the challenges of the 21st century, the need to adapt to a rapidly changing workplace, and the likelihood of more than one career. The major encompasses many facets of film and media studies, relational and organizational communication, and rhetoric and civic engagement. Along with courses in communication studies, the major requires courses in arts and humanities, social sciences, history, and a minor or second major.

The department's goals for undergraduate majors include helping students to achieve an outstanding education in communication studies, to further their knowledge and understanding of human communication, and to provide leadership in communication activities. In so doing, we hope to help students prepare for successful careers, the duties of citizenship, and productive and rewarding lives.

Learning Objectives

Students will demonstrate:

Knowledge about the history and practice of our discipline in three specific areas: film and media studies, relational and organizational

communication, and rhetoric and civic engagement. Students will be able to explain the utility of theories from these areas and utilize research methods to explore questions from each area of inquiry.

Skills that allow them to apply their knowledge of the major as they address contemporary issues salient to their personal, professional, and civic lives. They will be skilled in both oral and written communication, being able to develop and deliver coherent, well-organized claims to specific audiences. Students will also develop critical thinking skills that allow them to analyze texts, situations, or issues using credible evidence and following a logical, systematic, and/or precise structure.

Accelerated Program

The major in Communication Studies includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The Communication Studies major, like many liberal arts majors, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate communication studies majors for their multiple skills and their ability to adapt to a variety of tasks and work environments.

Many majors find employment in public relations/marketing, politics, sales, human relations, government, business management, convention and meeting planning, education, and social media. Some students move on to graduate work in communication studies and to post-graduate study in business, law, and theology.

Career opportunities include, but are not limited to, employee relations specialist, employment counselor, human resources consultant, industrial relations representative, public relations specialist, labor relations consultant, training director, vocational rehabilitation counselor, advance agent, business communicator, equal opportunity representative, foreign service officer, cooperative extension service worker, politician, lobbyist,

speechwriter, press agent, literary agent, interviewer, sales representative, scriptwriter, filmmaker, lawyer, and teacher.

Internships are available to Communication Studies majors and are highly recommended to enhance practical training and development. Graduates who seek advanced studies can attain positions with higher responsibilities and can rise to top professional levels.

Certificate in STEM Communication

The Certificate in STEM Communication is designed for STEM students who wish to supplement their primary programs of study with communication skills. The certificate is geared toward students who wish to learn effective ways to communicate complex science information across a variety of situations. The two required and two elective courses in the certificate will help students develop effective strategies for communicating STEM content to key audiences, and understand the diverse perspectives surrounding STEM issues.

The Certificate in STEM Communication aims to equip students interested in pursuing careers in STEM fields with enhanced communication skills, as well as a deeper understanding of the interpersonal, professional, and cultural contexts that shape STEM content.

Learning Objectives

Upon successful completion, students will be able to:

1. Understand the diverse perspectives that individuals and groups bring to STEM issues and the impact of these perspectives on effective STEM communication.
2. Articulate the role that communication plays in sharing STEM content in broader social, economic, and cultural contexts.
3. Develop effective strategies both for communicating STEM content to key audiences and for overcoming barriers to reaching those audiences.
4. Assess misinformation around STEM content and develop skills for countering it using source-based (sharing accurate information from trusted sources) and relational-based (emphasize building relationships and listening effectively) approaches.

Ph.D. in Communication

The Ph.D. in Communication trains scholars, teachers, and professionals to engage social, political, and professional challenges using advanced expertise in the field of communication.

The program is shaped by the three areas of expertise present in our department. These three areas examine communication and engagement from three perspectives:

- 1. Interpersonal, Intercultural, and Organizational Communication:** For many individuals, engagement with the public world grows out of their relational lives and is expressed in the organizations to which they belong and in which they work. Professors and students in this area explore communication in relational or interpersonal systems, organizing and work contexts, and within national and global arenas. Here, the focus is on exploring how individuals respond to and participate as active members in various forms of community, paying special attention to the ways in which communicative actions can create, sustain, and disable engaged citizenship.
- 2. Film and Media Studies:** In the contemporary, globalized world, engaged citizenship often flows through media and is represented and enacted within popular culture. Professors and students in the area explore the mediation of public culture with particular attention to film, television, digital discourse, and the globalization of media institutions. Here, the focus is on the construction of critical media literacies and understandings of how our mediated forms of communication engage or disengage individuals as community members, empowering or disempowering them as political agents.
- 3. Rhetoric and Civic Engagement:** In popular conversation, "rhetoric" is often understood to mean empty speech. Communication scholars, however, trace the meaning of "rhetoric" to antiquity when thinkers such as Aristotle and Cicero placed rhetorical studies at the center of democratic engagement. Since then, rhetorical studies have explored public engagement and community building, examining the role of communication in civic life. The resurgence of rhetorical studies in the humanities is founded on a renewed sense of the importance of rhetoric to engaged citizenship in the 21st century. Professors and students in this area explore the role of public communication in creating, maintaining, and undermining civic culture.

Although these three areas of departmental emphasis are distinct, the strength of the program is the collaborative overlapping of these three areas. As a community, we developed a cutting-edge doctoral program that takes advantage of the shared commitment to study and engage in transformative communication.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Department of Economics

The Department of Economics is a vibrant learning community that supports the intellectual development and professional aspirations of undergraduates, graduate students, and faculty alike. Economics is a broad social science that brings together diverse tools for understanding the choices we make, the constraints we face, and the consequences for the critical social issues of equity, efficiency, and sustainability.

Our programs offer a variety of economic approaches to understanding some of the most pressing challenges of our time: how wealth, poverty, and inequality are generated; the economics of climate change; how nations are connected in global markets; the role of governments in managing markets; and so much more.

Our faculty members are caring teachers and prolific scholars who have active research agendas, providing many opportunities for both graduate and undergraduate students to collaborate. Our goal is to prepare our students to be critical thinkers who understand the debates about economic methodology and policy, as well as the techniques of economic analysis.

Undergraduate Program Highlights:

- We offer traditional, honors (<http://honors.colostate.edu/admissions/>), accelerated (<https://provost.colostate.edu/accelerated-programs/>), and online bachelor's degree (https://www.online.colostate.edu/degrees/economics/?utm_source=geniusmonkey&utm_medium=viewthrough) programs so **you can choose the path that is right for you.**
- The Economics major includes a solid foundation in economic analysis and provides the option to develop **an area of specialty in one of six tracks:** development/international economics, environmental economics, public policy, quantitative economics, political economy, and economics of race, class, and gender.
- Our students are required to choose a second major or minor, **giving them the flexibility to tailor their education to their unique interests and goals.**
- **Economics is a versatile major that can be a gateway to many career paths** in government, finance, nonprofit organizations, law, academia, and much more. Our students develop a framework for thinking analytically, and they also get the data and communication skills needed to be successful in the workplace.
- **Economics majors have the unique opportunity to apply for paid research internships**, providing opportunities to deepen their research skillsets and collaborate with our award-winning faculty. Every senior also develops an independent research project as part of the capstone course (ECON 492).

Graduate

Graduate Programs in Economics

The Department of Economics is currently only admitting students to the Doctor of Philosophy (Ph.D.) program. Six primary fields are presently emphasized: international economics, development economics, public economics, political economy, environmental economics, and regional economics. Core requirements include micro, macro, and heterodox theory, as well as history of economic thought and applied econometrics.

More information is available in the Graduate and Professional Bulletin.

Master's Program

Students admitted to the Ph.D. program earn a master's degree along the way. If a student does not pass the qualifying exam or does not wish to complete the doctorate after two years of study, they may exit the program with a Master of Arts in Economics (Plan B).

Term Offered: Spring (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 435 Intermediate Econometrics Credits: 3 (3-0-0)

Course Description: Econometric theory, model identification, testing, and estimation.

Prerequisite: (ECON 204) and (AREC 335 or ECON 335 or STAT 341).

Term Offered: Spring (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 436 Economic Forecasting Credits: 3 (3-0-0)

Course Description: Develop a range of forecasting skills to become an effective forecaster in both the private and public sectors. Focus on the acquisition of time series data that comes from a number of government and semi-private websites, and on the three most popular econometric techniques used in forecasting: univariate, vector autoregressive (VAR) and vector error correction (VECM) models.

Prerequisite: AREC 335 or ECON 335.

Registration Information: Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 440 Economics of International Trade and Policy Credits: 3 (3-0-0)

Course Description: Theory of international trade; payments, commercial policies, and economic integration.

Prerequisite: ECON 306.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 442 Economics of International Finance and Policy Credits: 3 (3-0-0)

Course Description: Balance of payments, adjustment mechanisms, and international monetary systems.

Prerequisite: ECON 304.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 444 Economics of Energy Resources Credits: 3 (3-0-0)

Also Offered As: AREC 444.

Course Description: Supply, consumption trends, and projected demand for alternative energy resources in domestic and world perspective; economics of public energy policies.

Prerequisite: ECON 306.

Registration Information: Junior standing. Sections may be offered: Online. Credit allowed for only one of the following: AREC 444, ECON 344, or ECON 444.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 460 Economic Development Credits: 3 (3-0-0)

Course Description: Economic problems of underdeveloped nations.

Prerequisite: ECON 304.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 463 Regional Economics Credits: 3 (3-0-0)

Course Description: Introduction to economic importance of location for firms, consumers, and policy makers. Basic tools, applications, and student research.

Prerequisite: ECON 306.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 474 Recent Economic Thought Credits: 3 (3-0-0)

Course Description: Nontraditional schools of economic thought, such as institutionalism and neo-Marxism, that critique neoclassical economic theory.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 484 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description: Assistance in teaching introductory economics courses.

Prerequisite: ECON 304 and ECON 306.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 487 Internship Credits: Var[1-3] (0-0-0)

Course Description: Supervised work experience integrating disciplinary learning and career exploration.

Prerequisite: ECON 202 with a minimum grade of C and ECON 204 with a minimum grade of C.

Registration Information: Written consent of instructor. Economics majors and minors only. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ECON 492 Seminar Credits: 3 (0-0-3)

Course Description: Summarizes, discusses, and applies issues and policies chosen by the instructor. Emphasis on student participation, discussion, and research.

Prerequisite: (AREC 335, may be taken concurrently or ECON 335, may be taken concurrently) and (ECON 304, may be taken concurrently and ECON 306, may be taken concurrently).

Restriction: .

Registration Information: Senior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 495 Independent Study Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a special topic in economics under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ECON 501 Quantitative Methods for Economists Credits: 3 (3-0-0)

Prerequisite: MATH 141 or MATH 155 or MATH 160.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 504 Applied Macroeconomics Credits: 3 (3-0-0)

Course Description: Application of macroeconomic models to economic growth, economic fluctuations, and policy analysis.

Prerequisite: ECON 304 and ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 505 History of Economic Thought Credits: 3 (3-0-0)

Prerequisite: None.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 506 Applied Microeconomic Theory Credits: 3 (3-0-0)

Also Offered As: AREC 506.

Course Description: Introduction to mathematical models in modern microeconomics, including choices and demand, production and supply, and market structures and failures.

Prerequisite: ECON 306.

Registration Information: Credit not allowed for both ECON 506 and AREC 506.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 510 Labor Market Analysis Credits: 3 (3-0-0)

Prerequisite: ECON 304 and ECON 306.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 515 Financial Institutions-Structure/Regulation Credits: 3 (3-0-0)

Course Description: Regulation of financial institutions in the U.S.; international banking and international financial institutions, and financial modernization.

Prerequisite: None.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 520 Public Economics I Credits: 3 (3-0-0)

Course Description: Analysis and evaluation of tax policy in terms of efficiency and equity.

Prerequisite: ECON 506 or AREC 506 or ECON 606 or AREC 606.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 530 Methodology of Economic Research Credits: 3 (3-0-0)

Also Offered As: AREC 570.

Course Description: Philosophical foundations of science and research. Concepts and skills for planning, performing, reporting, and evaluating economic research.

Prerequisite: ECON 304 and ECON 306.

Registration Information: Credit not allowed for both ECON 530 and AREC 570.

Term Offered: Fall (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 535 Applied Econometrics Credits: 3 (3-0-0)

Also Offered As: AREC 535.

Course Description: Econometric techniques applied to testing and quantification of theoretical economic relationships drawn from both microeconomics, macroeconomics.

Prerequisite: (ECON 335 or AREC 335) and (ECON 304 or ECON 306).

Registration Information: Credit not allowed for both AREC 535 and ECON 535.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 540 Environmental and Natural Resource Economics Credits: 3 (3-0-0)

Also Offered As: AREC 540.

Course Description: Theory, methods, and policy in environmental and natural resource economics.

Prerequisite: AREC 506 or ECON 506.

Registration Information: Credit not allowed for both ECON 540 and AREC 540.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 541 Environmental Economics Credits: 3 (3-0-0)

Also Offered As: AREC 541.

Course Description: Economics of environmental policy; partial equilibrium and general equilibrium model; pollution; natural environments; population and economic growth.

Prerequisite: ECON 306.

Registration Information: Credit not allowed for both ECON 541 and AREC 541.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 563 Regional Economics-Theory, Methods, and Issues Credits: 3 (3-0-0)

Also Offered As: AREC 563.

Course Description: Tools and methods of regional economics, including supply, demand, and externality analysis. Applications to current urban and regional policy issues.

Prerequisite: ECON 306 and ECON 501, may be taken concurrently.

Registration Information: Credit not allowed for both ECON 563 and AREC 563.

Term Offered: Fall.

Grade Mode: Traditional.

ECON 720 Public Economics II Credits: 3 (3-0-0)

Course Description: Analysis of welfare foundations of public expenditure, including cost-benefit analysis.

Prerequisite: ECON 506.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

ECON 735 Econometric Theory II Credits: 2 (2-0-0)

Also Offered As: AREC 735.

Course Description: Econometrics models and estimators in econometrics, from fully parametric to semiparametric and nonparametric approaches.

Prerequisite: AREC 635 or ECON 635.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both AREC 735 and ECON 735. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 736A Advanced Econometric Methods: Discrete Choice Models Credit: 1 (1-0-0)

Also Offered As: AREC 736A.

Course Description: Econometrics analysis of: Discrete Choice Models.

Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ECON 736B Advanced Econometric Methods: Panel Data Models Credit: 1 (1-0-0)

Also Offered As: AREC 736B.

Course Description: Econometrics analysis of: Panel Data Models.

Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.

Major in Economics

The economics major helps students develop an understanding of how individuals, organizations and societies make decisions to achieve their goals. In our introductory courses, students learn the fundamental principles of economics that can help them understand and analyze a wide range of social and policy issues. Our intermediate theory courses take a deeper dive, developing the analytical tools used in understanding individual choice, how markets function, and the determinants of key economic measures such as GDP, employment, and inflation. In addition to theory, our students also learn methods to describe and analyze economic data, allowing them to conduct their own empirical research. As part of the College of Liberal Arts, course work helps students look at economic issues through a variety of lenses, including history, culture, and institutions, allowing them to gain a richer understanding of specific aspects of economic behavior and public policy.

The major requires:

- Introductory and Intermediate Microeconomics
- Introductory and Intermediate Macroeconomics
- Econometrics
- Political Economy
- Senior Capstone Seminar
- Economics electives
- Prerequisite courses in math and statistics, as specified
- Completion of a minor or second major of the student's choice

Learning Objectives

Students will:

1. Understand and apply key microeconomic concepts, such as consumer choice, competition and strategic behavior, market failures and the role of government intervention, the value of information, and efficiency and equity.
2. Understand and apply key macroeconomic concepts, such as the determinants of unemployment, inflation, and economic growth, the causes of income inequality, and the role of government and the Federal Reserve in managing the economy.
3. Understand and analyze a broad array of economic issues found in the news and understand how the economic aspects of society work. Students may choose from electives in developmental/international economics, environmental economics, health economics, race, class, gender, public policy, and more.

Accelerated Program

The major in Economics includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Career Paths

Economics provides students with a broad academic background and critical thinking skills suitable to many fields: education, research, business, government, nonprofit, environmental conservation, international relations, and more. Economics is also a good major for those interested in attending law school.

Career choices include, but are not limited to:

- Financial analyst
- Economic forecaster
- Public policy analyst
- Regional/urban planner
- Foreign service officer
- Natural resource analyst
- Nonprofit analyst
- Program administrator
- Sales analyst

Change of Major

To change your major to Economics, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu/>.

Requirements Effective Fall 2022

Major in English

As an English major at CSU, you will become part of a dynamic community known for its devotion to teaching, interdisciplinary offerings, and excellence in both research and the creative arts.

Here, you will tap into curiosity and creativity, learn how to write purposely for a variety of audiences, and develop cultural understanding by exploring literature from a wide range of global perspectives and historical contexts. English majors can choose from five concentrations, allowing you to focus and specialize according to your interests and future goals: **Creative Writing, English Education, Linguistics, Literature, and Writing, Rhetoric and Literacy.**

No matter which direction you choose, you'll have the support and mentoring of faculty and staff committed to your success. Additionally, our small class sizes will help you foster meaningful relationships and make unexpected connections across the field of English Studies.

Learning Objectives

Student who successfully complete a major in English will be able to:

1. Analyze texts across a broad range of literary genres, styles, and historical and contemporary contexts with an eye practiced in close reading.
2. Write with clarity, effectiveness, and originality for a variety of rhetorical purposes and audiences.
3. Describe the ways we use language and literacy and understand how concepts are related to identities, cultures, and notions of power.
4. Identify and interpret how rhetorical theories and writing practices connect to larger socio-cultural contexts.
5. Approach topics through an interdisciplinary lens and evaluate the possibilities and benefits associated with fostering collaboration in thought, scholarship, and being.

Career Paths & Possibilities

A degree in English prepares you for incredible career flexibility. Within our coursework and the department's experiential learning opportunities, students develop key liberal arts skills that translate to a variety of industries, including jobs in healthcare, education, publishing, media, law, marketing and PR, policy, environmental justice, hospitality, and more.

Skills like critical thinking and problem-solving, verbal and written communication, digital proficiency and literacy, inclusive teamwork, and personal accountability are imparted across our classrooms and concentrations.

By building upon these skills, our students become engaging communicators, convincing writers, empathetic collaborators, ethical decision-makers, and compassionate global citizens—all traits top employers continue to prioritize. Additionally, the department encourages experiential education by offering a host of internship opportunities (<https://english.colostate.edu/undergraduate/student-experience/internships/>) in writing, research, teaching, community engagement, social media, and publishing to make meaningful connections with mentors and gain professional experience.

Upon graduation, students have chosen to pursue fulfilling careers as:

- Agency/Arts Administrator
- Book Publicist
- Copy Editor/Copywriter
- English Teacher/Teacher of English as a Second Language
- Grant Writer/Technical Writer
- Human Resources Manager
- Communications/Events Coordinator

Change of Major

To change your major to English, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Major in English, Creative Writing Concentration

The Creative Writing concentration gives students the opportunity to strengthen their creative writing skills and infuses their analytic reading skills with imagination. Students take beginning, intermediate, and advanced courses in one or more of the following genres: fiction, poetry, and creative nonfiction. Intermediate and advanced courses are primarily workshop classes in which students read and critique one another's work. At the center of all creative writing courses is the study of craft. Students in the Creative Writing concentration also take a wide variety of English and literature courses that prepare them to be writers by instructing them in literary traditions and styles. An internship program for all English majors offers Creative Writing students positions that may lead to employment. In addition, the Creative Writing program runs a vibrant reading series that gives students the chance to meet visiting writers.

To change your major to English with a concentration Creative Writing, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Major in English, English Education Concentration

The English Education concentration prepares students to teach English Language Arts in secondary schools. Students take courses in language, literature, and writing in the English Department and learn practical methods for teaching from an equity-based perspective. Students also take courses through the School of Education that equip them to pursue a Colorado teaching endorsement in English Language Arts, and they apply their knowledge and skills by working with students in area schools.

To change your major to English with an English Education Concentration, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

- 3 credits must be in literatures of the British Isles before 1830, or in American or European literatures before 1900;
- 3 credits must be in literatures of the British Isles after 1830, or in American or European literatures after 1900;
- 3 credits must be in either breakthroughs (ideological, racial, cultural, gendered) or genre courses;
- One course must be a world literature course;

- One course must be a capstone course (see list in senior year, above).

² Any lower or upper-division E subject code course.

Major Completion Map

Distinctive Requirements for Degree Program:

For graduation, an English major must attain a minimum grade point average of 2.000 in all Composition (CO) and English (E) courses.

For licensure, students must complete all coursework in the teaching concentration and professional education with a grade of C or above, and must have a cumulative GPA of 2.750.

Major in English, Linguistics Concentration

The Linguistics concentration introduces students to the scientific study of human language, with a particular focus on English and applied language studies. It draws on a wide range of theoretical and methodological approaches from various disciplines—from the humanities to the social and natural sciences. The Linguistics concentration offers students the ability to study key theories in linguistics and second-language learning, functional aspects of language production and reception, and the impact of social and cultural factors on language use.

This concentration is excellent for students who have an interest in (applied) linguistics and teaching English as an additional language, as well as literature, writing, and education. It is ideal for students who wish to pursue graduate and professional programs related to language as well as those who wish to succeed in careers requiring analytical thought, effective communication, and an in-depth understanding of language.

General Goals

1. To increase students' awareness and understanding of linguistics as an important field of study that intersects with other disciplines (e.g.,

Anthropology, Communication Studies, Computer Science, Education, Political Science, Rhetoric, Sociology, Psychology).

2. To draw students' attention to the various sub-fields of linguistics (e.g., Lexicology, Morphology, Phonetics, Pragmatics, Semantics, Syntax, Sociolinguistics, Psycholinguistics), and how they contribute to our understanding of how language is acquired, formed, and used.

3. To develop skills that are important for students in the field of linguistics:

- analytical skills (e.g., identifying and interpreting features and patterns of spoken and written language; analyzing and interpreting linguistic data);
- critical thinking skills (e.g., examine how language is used and situated to form and convey arguments; explore how language is used to identify and solve problems);
- application skills (e.g., applying linguistic knowledge and analytical skills to develop pedagogical materials, inform language learning practices in a variety of contexts, and address the needs of language users from diverse linguistic and cultural backgrounds).

4. To help students apply theory and knowledge to contemporary language-related issues (e.g., How do people learn a language? How can we measure language proficiency? How do languages change? What are

the interactions between language, culture, and thought? How do people communicate with/ through various technologies [e.g., computers, mobile devices, etc.]? How do we create new words in a language?).

5. To get students involved in problem-solving and language-related research (e.g., Learner data analysis, Conversation analysis, Discourse analysis, Corpus-based analysis of discipline-specific language).

6. To develop multiple literacies that can help enhance students' linguistic studies (e.g., How do language and other communication modalities interact? How are the various linguistic modalities [spoken/ written/ signed] similar and different?).

Potential Career Paths

The field of linguistics is extremely diverse, intersecting with many areas such as anthropology, computer science, engineering, foreign language study, neuroscience, philosophy, psychology, sociology, and speech and hearing science, among others. As a result, a degree in linguistics can provide the foundation for a wide range of jobs and careers, such as:

- Linguist
- Instructor of English as a second/ foreign language (in U.S. or abroad)
- English language arts teacher (in K-12 settings)

- Materials developer (i.e., textbooks, instructional materials, language tests, etc.)
- Language data analyst
- Computational linguist (conversation design, natural language processing, etc.)
- Copy editor
- Lexicographer
- Technical writer
- Translator and/or Interpreter
- Accent coach

Major in English, Literature Concentration

The Literature concentration invites students to engage in the critical study of literature in English produced in a range of historical eras and geographical locations. In addition to poetry, prose, and drama, students will also encounter contemporary and historical texts that challenge their definitions of literature. Students will learn new ways of approaching familiar figures while also gaining exposure to writers and thinkers whose work has not always been recognized. Students can expect guidance in developing their critical and analytical writing skills and in becoming conversant with theories and methods for analyzing texts.

To change your major to English with a concentration in Literature, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Major in English, Writing, Rhetoric and Literacy Concentration

The Writing, Rhetoric and Literacy concentration builds on departmental strengths in writing theory and design, rhetoric, composition, public writing, and rhetoric and writing instruction. It is designed for students who wish to pursue the study of theories and practices of writing and rhetoric. The Writing, Rhetoric and Literacy concentration offers students the ability to:

- Study writing in a department that takes a humanistic approach to learning
- Engage writing and rhetoric with a focus on genre, audience, invention, and style

- Explore and practice writing and rhetorical approaches in social, cultural, and historical contexts

To change your major to English, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Requirements Effective Fall 2022

Minor in Creative Writing

The study of creative writing emphasizes creativity, self-motivation, persistence, and openness to criticism – skills many employers look for when hiring. It gives students the opportunity to explore their artistic talents and devote time to producing creative work that complements achievements in their majors.

This seven-course sequence combines small, discussion-based writing workshops with classes in composition or literature. The minor is open to majors in all disciplines except English and offers a unique opportunity to balance work in the sciences, business, engineering, or the humanities with the imaginative freedom and cultural engagement of an education in the arts. Students will gain experience in two genres (poetry, fiction, and/or creative nonfiction) as they study with published authors, interact with visiting writers, and gain familiarity with today's literary landscape.

TO DECLARE: Visit the English Office, Eddy 359. For more information: visit the Department of English website (<https://english.colostate.edu/undergraduate/minors/>), or email Dan Beachy-Quick, Undergraduate Coordinator: Dan.Beachy-Quick@colostate.edu (dan.beachy-quick@colostate.edu)

Learning Objectives

Students will:

1. Craft works in one or more genres such as fiction, poetry, and nonfiction.
2. Articulate knowledge of literary tradition and styles.

Requirements Effective Fall 2018

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Minor in English

Minors allow students to focus on an area that complements their major, enhances their knowledge and skills, or allows them to pursue a particular interest. The Department of English offers three minors: English, Creative Writing, and an Interdisciplinary Minor in Linguistics and Culture. When visiting the department's office to officially declare an English or English-related minor (<https://english.colostate.edu/undergraduate/minors/>), students will be provided with a course guide for that minor. To speak with an advisor regarding a minor, contact Professor Dan Beachy-Quick by email at Dan.Beachy-Quick@colostate.edu (dan.beachy-quick@colostate.edu), in-person during office hours, or by appointment in Eddy Hall, Room 343.

For information about English and Composition course offerings and registration procedures for the upcoming semester or summer session, please contact Sheila Dargon at Sheila.Dargon@colostate.edu.

Minor in English

The minor in English offers opportunities for students to create a unique path through English and Composition classes. Requirements are open:

21 credits total of E and/or upper-division CO courses, 12 credits of which must be at the 300-level or higher. This freedom allows students to pursue what they love most in language, literature, composition, and writing. Students will gain a set of skills, critical and creative both, that will complement both their major and future career.

The English department also offers the Linguistics and Culture Interdisciplinary Minor and the Creative Writing Minor.

Requirements

Effective Spring 1996

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

CO 150, E 487A, and E 487B may not count toward the minor. CO 300, CO 301A, CO 301B, CO 301C, CO 301D, CO 302, and CO 401 may count toward the minor. A minimum of 6 credits must be taken at CSU.

Graduate Certificate in TESOL Education

The Graduate Certificate in TESOL Education provides graduates with practical, theoretical, and critical knowledge of the English language and methods for teaching it in various social and academic settings. Courses required for the certificate promote reflective inquiry, provide students with the necessary tools for ongoing professional growth, serve as models of effective pedagogy, and introduce students to the various ways in which instruction can be enhanced by contemporary technologies.

Learning Objectives

1. Enable graduates to teach English as a foreign or second language in the U.S. and abroad.
2. Evaluate the relative utility and validity of diverse teaching methodologies.
3. Develop materials for unique teaching/learning situations.
4. Evaluate recent research in applied linguistics and its relevance to ESL/EFL teaching and learning.

Requirements

Master of Fine Arts in Creative Writing

The Master of Fine Arts in Creative Writing is for students with advanced abilities in the writing of fiction, poetry, creative nonfiction, and hybrid forms. This nationally-ranked program offers a balance of intimate and intensive writing workshops with courses in literature, form and technique, and related electives. Coursework culminates in a book-length collection of short stories/poems/essays or a novel or memoir, as well as a comprehensive portfolio.

Learning Objectives

Students will:

1. Develop and refine their unique writing voices, producing high quality literary work in their chosen genre.
2. Demonstrate a comprehensive understanding of personal aesthetics as well as the models and cultural sources on which they are based.
3. Utilize effective approaches for creating exemplary creative works using techniques appropriate to chosen genre.
4. Critically analyze the conventions and approaches to their chosen genre, and hybrid forms. .
5. Appraise and locate their own work within literary and cultural contexts.
6. Develop constructive workshop practices and demonstrate the ability to read closely and respond critically and respectfully to peer writing.
7. Demonstrate advanced comprehension of revision strategies including the synthesis of advice and critiques from professors and peer writers.

- Students are required to submit a portfolio with writing, sample papers, and annotated bibliography at the end of their program.
- A minimum of 32 credits applied to an MFA degree must be earned at CSU. Of these, at least 21 must be earned after admission to the program.
- Graduate courses taken at CSU prior to admission to the Graduate School can be applied to an MFA degree if the grade earned is B or higher.
- At least 16 credits earned at CSU and applied to an MFA degree must be English courses at the 500-level or higher; of these credits, at least 12 must be in "regular" courses. English courses considered to be other than "regular" include E 607B, E 684, E 687, E 695, E 699, and any courses graded pass/fail.
- Courses transferred from an MFA program must have a grade of B or higher and must have a CSU equivalent at the 500-level or higher. Credits used to fulfill requirements for previously earned degrees are not accepted.
- Up to three credits of coursework for an MFA degree can come from CSU programs outside the English department at the 300-level or higher. Students can take two additional courses outside the department, but these courses must be 500-level or higher.
- Graduate students may register for any number of internship credits, but a total of only six credits of E 607B, E 684, and E 687 (combined) will count toward graduation.
- A maximum of two credits of E 695 can count toward an MFA degree.
- With the exception of specified courses, all courses taken in the English department and applied to an MFA degree must be taken at the 500-level or above.

¹ This must include one course (3 credits) of a Pre-Twentieth-Century Literature class with approval of advisor.

² This requirement may be waived for students whose undergraduate degree is in another major.

The Master of Arts in English, English Education Specialization provides students with preparation for and enhanced knowledge of teaching English in secondary schools. Framed with a commitment to equity, the program is designed for students who are:

- Seeking initial licensure;
- Currently employed, full- or part-time, as an English language arts teacher in a Colorado public school;

- Looking to revitalize their work with students and their own knowledge;
- Deepening their understanding of contemporary literacy scholarship and broadening their background to explore new directions in the profession; and
- Deeply considering their practice and seeking to improve their teaching skills.

Learning Objectives

Upon successful completion, students will be able to:

1. Engage with a wide range of theories, research findings and methodologies, and praxis-oriented approaches relevant to critical literacy pedagogy in secondary schools and related contexts.
2. Evaluate the cultural, ideological, socio-economic, and political discourses relevant to literacy pedagogy in secondary schools and related contexts (Plan A).
3. Consider critically the cultural, ideological, socio-economic, and political discourses relevant to literacy pedagogy in secondary schools and related contexts (Plan B).
4. Foster broad-based intellectual and professional growth as teachers, literacy scholars, educational leaders, and engaged public citizens.

Master of Arts in English, Plan A, TESL/TEFL Specialization

The Master of Arts in English, Plan A, TESL/TEFL Specialization provides graduates with practical, theoretical, and critical knowledge of methods for teaching the English language in various social and academic settings. The program features an integrated core in which a comprehensive understanding of the form and communicative functions of the English language is combined with both general and skill-specific (reading, writing, listening, speaking) pedagogical theories and applications. These courses are designed to promote reflective inquiry, to provide students with the necessary tools for ongoing professional growth, to serve as models of effective pedagogy, and to introduce students to the various ways in which instruction can be enhanced by contemporary technologies. The final requirement for the Plan A

option encourages students to carry out empirical research through the completion of a thesis.

Master of Arts in English, Writing, Rhetoric, and Social Change Specialization

Students in the Master of Arts in English, Writing, Rhetoric, and Social Change Specialization join a vibrant community of scholars who research the transformative potential of writing and rhetoric, analyzing the social, cultural, economic and historical forces shaping writing and rhetoric in theory and practice. Through analysis of and engagement with diverse contexts for writing, students create and apply methods for addressing shared social problems in classrooms and communities. Our graduates study in top tier rhetoric and composition Ph.D. programs, teach composition and rhetoric at secondary and post-secondary levels, and work for social change through careers in government, publishing, industry, and non-profit organizations.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion, students will be able to:

1. Demonstrate discipline specific knowledge and competencies in approaches to writing pedagogy and practice including the composing processes used by writers in varying contexts and for particular purposes.
2. Analyze the social, cultural, economic and historical forces shaping writing and rhetoric in theory and practice including the ways that writing and rhetoric can constitute communities around shared social problems.
3. Demonstrate fluency in the varied theories and methods of conducting research on writing and rhetoric in the public sphere.
4. Engage historical, contemporary, and emerging technologies as they shape and are shaped by practices of writing and rhetorical engagement, from pencil to pixel.

Professor Robert Gudmestad, Chair

Undergraduate History majors at CSU find an engaged community of peers and professors who want to explore the past. Our curriculum allows students to follow and expand their interests. CSU History faculty challenge students, helping them build critical thinking, research, and communication skills in the classroom and apply those skills in the world.

Graduate students take rigorous seminars, pursue internships, and work with professional public historians to build a range of skills. Some go on to PhD programs and many enter the workforce as historians, cultural resource managers, city planners, library and archive professionals, park interpreters, and teachers. Our graduate alumni join an active, growing network of people with careers from the National Library of Congress to the Grand Rapids Museum.

Graduate Graduate Programs in History

The Department of History at CSU chooses a select group of students each year for its Master of Arts program in History and in Public History. Earning an M.A. in History at CSU is a step toward any number of exciting future paths including:

- A successful career in public history working for Federal or state agencies, in consulting, for non-profits and communities, and more. Our concentration in Cultural Resource Management & Historic Preservation

Preservation is nationally renowned and has a high job placement rate.

- Advancing the careers and deepening the knowledge base of social studies and history teachers.
- Pursuing a Ph.D. in a field in which our faculty has expertise. We have a considerable concentration of established historians who study U.S. History, Public History, and Environmental History.

We offer three programs of study in which students can earn their M.A.:

- Write a thesis on Plan A.
- Earn your degree without a thesis on Plan B.
- Specialize in Cultural Resource Management & Historic Preservation.

Regardless of the program of study students select, they will work closely with one another and with the department's faculty mentors. Our department is committed to high-quality mentoring and to providing hands-on experience through internships, service-learning projects, and paid research positions at the Public Lands History Center. (<https://publiclands.colostate.edu/>) Although our curriculum is geographically based, the content of our graduate seminars explores themes of gender & sexuality, class, race & ethnicity, environment, and more. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of History (<https://history.colostate.edu/graduate/>) website.

Major in History

History: it's about time.

From how we express emotions to what we eat for breakfast, every aspect of human life is shaped by political, environmental, social, and cultural factors over time. As these factors change, people's lives change.

At CSU, we ask historical questions and follow the evidence to understand what happened in the past and why it happened. Through historical research, we move away from judgment and assumptions about other cultures and instead learn from every historical moment, including our own.

The Major and Minor in History at CSU offer students courses that encompass human history around the world, as well as several distinct features linked to our history as Colorado's Morrill Act land-grant university (<https://catalog.colostate.edu/general-catalog/about-csu/land-grant/>). We have led in the creation of graduate **public history** programs, and now have an undergraduate concentration in **Digital and Public History**, as well as concentrations in **General History**, **Language**, and **Social Studies Teaching**.

To change your major to History, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Our History majors work in many different careers (<https://history.colostate.edu/careers/>) in public history in museums, archives, state and local government agencies in historic preservation and cultural resources management, the National Park Service and Forest Service,

and consulting; they work in schools as teachers and administrators; they work in public service; and they are prepared for graduate and professional school in a variety of fields. We offer **internships** in many of these fields for CSU credit to help students explore their interests in history.

Whichever concentration you choose, our **Blaze Your Trail** program will allow you to follow your interests across time and space in our curriculum. Here are the major themes we offer to help you link your coursework and create personalized pathways through the History major:

- War & Diplomacy
- Women & Gender
- Revolution
- Race & Ethnicity
- Empire, Colonialism, & Borderlands
- Religion
- Environment

Learning Objectives

Students will:

1. Analyze and interpret historical materials, such as documents, material artifacts, and images;
2. Engage in chronological reasoning to understand causation and change over time;
3. Examine critically how people in the past understood their own history in scholarly works and in popular forms such as myths, memorials, and other public commemorations;
4. Interpret, write, and speak about the past using evidence and according to the standards and expectations of the historical discipline, including honest use of evidence, openness to multiple perspectives, and historical empathy; and
5. Analyze both change and continuities over time by considering how events such as revolution, migration, war, ecological disturbance, and globalization changed societies as well as how structures like class, ethnicity, gender, race, sexuality, climate, and religion shaped societies over a longer time horizon.

Accelerated Program

The major in History includes an **accelerated program option** for students in the Digital and Public History concentration, General History concentration, and Language concentration to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over three **summer sessions**. Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about **Accelerated Programs**.

Concentrations

- Digital and Public History Concentration
- General History Concentration
- Language Concentration
- Social and Behavioral Sciences Concentration
- Social Studies Teaching Concentration

Major in History, Digital and Public History Concentration

The Digital and Public History Concentration offers an opportunity for focused coursework in public history (i.e. National Parks, historic preservation, cultural resources management, etc.) and digital history, which applies twenty-first century tools and technologies to understand and interpret the past. This concentration also requires an **internship** for at least 3 credits, so students receive real-world experience in these fields before graduation.

History majors who select the Digital and Public History concentration must complete another major or minor offered at CSU (except the minor in History).

Requirements Effective Fall 2024

A minimum grade of C (2.00) must be earned in HIST 492 and all 100-level courses required in the history major.

Minor in History

The minor in History allows students to explore historical questions and issues while broadly exploring the past—or **Blaze Your Trail** by following their intellectual passions across our curriculum:

- War & Diplomacy
- Women & Gender
- Revolution
- Race & Ethnicity
- Empire, Colonialism, & Borderlands

- **Religion** - see also the **Religious Studies Interdisciplinary Minor**
- **Environment**

This very customizable minor consists of 21 semester credit hours, 12 of which must be taken at the upper-division level, and complements a wide variety of majors in other disciplines, such as international studies, political science, economics, natural resources, foreign languages, literature, anthropology, sociology, and philosophy. Majors in business, mathematics, the sciences, and communication can use the minor to apply interpretive and analytical skills to evaluate and assess evidence and sources.

To declare the minor in History, visit the History Office, B356 Clark, or email **Allison Pine** for details.

Learning Objectives

Upon successful completion, students will be able to:

1. Analyze and interpret historical materials, such as documents, artifacts, and images.
2. Engage in chronological reasoning to understand causation and change over time.
3. Examine critically how people in the past understood their own history in scholarly works, and in popular forms such as myths or commemorations.
4. Interpret, write, and speak about the past using evidence and according to the standards and expectations of the historical discipline, including honest use of evidence, openness to multiple perspectives, and historical empathy
5. Analyze how processes – such as revolution, migration, war, ecological disturbance, and globalization – shaped societies over time and how people grappled with issues like class, ethnicity, gender, race, religion, and ideology.

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Master of Arts in History, Plan A, Liberal Arts Specialization

The Master of Arts in History, Plan A, Liberal Arts Specialization offers students the opportunity to write an original thesis. Working closely with a faculty mentor in one of our department's areas of expertise (for example, U.S. history, environmental history, public history), students on Plan A conduct archival research to author an original piece of scholarship. Coursework on Plan A, and in all of our programs of study, is

based in small seminars and stresses historiography, research methods, and hands-on experience.

The Plan A program of study requires proficiency in a language other than English. This requirement can be met through an exam or through coursework.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students who successfully complete the program will:

1. Develop historical research questions and conduct historical synthesis, analysis, and interpretation using primary and secondary source research.
2. Develop the critical reading, speaking, and writing skills essential to professional historical practice.
3. Define historical narratives and develop both breadth and depth of knowledge in the historiography of chosen fields of study.
4. Conduct archival research to author an original piece of scholarship.
5. Practice historical methods in various settings, which may include academic, applied, and/or public.

Major in Journalism and Media Communication

The study of journalism, mass communication, and specialized media combines high-level professional training with a broad foundation in the liberal arts. All students complete a common 24-credit core, including writing, multimedia, and conceptual courses, as well as a capstone course. Students work closely with their Academic Success Coordinator and Faculty Advisors to select an additional 22 credits in a focus area crafted to match their career interests with options in **Journalism** and Storytelling, **Media** Production and Strategic **Communication**. Practical experience can be gained on the staffs of the *Rocky Mountain Collegian*, the award-winning campus television station Collegian TV, *College Avenue* magazine, and KCSU-FM Radio. Graduating seniors present professional portfolios for assessment by panels of faculty and communication professionals from Denver and elsewhere in Colorado. Because successful communicators require broad knowledge, this flexible program encourages development of a background in the humanities, social sciences, natural sciences, and in-depth study in an area of interest outside journalism. The addition of a minor or double major in disciplines such as political science, information technology, history, economics, business, communication studies, psychology, the arts, or natural or applied sciences is possible.

The Department of Journalism and Media Communication is one of a relatively small number of departments formally recognized by the Accrediting Council on Education in Journalism and Mass Communications. Participation in volunteer activities, cooperative education opportunities, or communication-related part time jobs is highly recommended to enhance practical training and development.

Learning Objectives

Students will demonstrate:

1. Competence in writing, editing, and producing media messages as well as in planning, designing, and evaluating effective public information programs.
2. Knowledge and use of communication theory and research principles to guide the selection of communication audiences, message content and format, and media channels to enhance communication impact.
3. Understanding of the ethics, laws, and values associated with professional communication activity.

Accelerated Program

The major in Journalism and Media Communication includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The Journalism and Media Communication program emphasizes the role of mass and specialized media in society and prepares students for entry-level work in private business, government, and education. Depending upon the focus of study, students may find career opportunities

in a wide variety of professional communication venues. Specific career opportunities may include: advertising copywriter, designer, or producer; agriculture writer, reporter, or editor; attorney specializing in communication law; blogger, columnist, or editorial cartoonist; college professor; communications manager or director; company spokesperson; corporate media specialist; e-mail and direct mail strategist; environmental media specialist; freelance writer, editor, or photographer; health writer, editor, or producer; marketing coordinator; media relations director or strategist; multimedia producer; non-profit communications director; novelist or non-fiction author; reporter or photojournalist for the web, magazines, newspapers, or television; owner of public relations agency or production company; professional speaker; public affairs officer for government agency; public relations agency account executive; publication designer for magazines or newspapers; radio disc jockey, reporter, or music director; reality television producer, writer, photographer, or on-camera talent; science writer or editor; social media specialist; sports writer, photographer, or producer; technical writer or editor; teacher for any level of K-12 education upon completion of appropriate licensing (see the Center for Educator Preparation (<http://cep.chhs.colostate.edu/>)); television news anchor or program host; television or radio news program producer or director; television documentary producer; travel writer, photographer, or program host; video editor for news, corporate, or entertainment television; website designer and manager.

To change your major to Journalism and Media Communication, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Requirements Effective Fall 2023

All majors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each course that carries the JTC subject code.

Association for Education in Journalism and Mass Communication Accreditation Requirements

Majors in Journalism and Media Communication must take a minimum of 46 credits of JTC courses and a minimum of 66 credits outside of JTC.

Of the 66 credits outside of JTC, 21 must meet **one** of the following Second Field criteria with approval of advisor.¹

1. a Minor;
2. an Interdisciplinary Minor;
3. 21 credits in one subject code;
4. 9 credits from one subject code and 12 credits from a second subject code;
5. a selection of 21 credits comprising a Second Field developed by the student and the advisor.

Courses taken outside of the department may include All-University Core Curriculum (AUCC) courses, Minor or Second Field courses, or any other out-of-department (non-JTC) courses used to complete the major as approved by advisor.

The 46 JTC required credits include 24 credits specified in the curriculum below plus 22 credits of directed electives to create an individualized focus area from the following categories (Writing, Production, Internship/Practicum, Advanced, Additional credits).

¹ Of the 21 credits required for the Second Field, 12 must be upper-division (300- to 400-level) and none may be from JTC.

² With approval of the department and advisor, students may substitute a 400-level Journalism and Media Communication study abroad course for 1 credit of the Internship/Practicum requirement and up to 3 credits of the Additional Credits requirement, for a maximum total of 4 credits for study abroad.

³ High-achieving students, with approval of advisor, may select JTC 544 to satisfy 3 credits of the Additional Credit requirement.

⁴ Select a minimum of 22 credits of Focus Area courses and 21 credits of Second Field courses over the sophomore, junior, and senior years, in consultation with advisor.

⁵ Select a three-credit statistics course offered by any department, with approval of advisor. A statistics course is required if one was not taken to satisfy AUCC 1B requirement.

⁶ Select 3 credits other than JTC 100 from the list of courses in category 3C of the AUCC. Students in this major must take 3 credits of Social and Behavioral Sciences other than JTC 100, which is required in the freshman year.

⁷ If either JTC 411 or JTC 415 was taken as a Concept Course in the junior year, students may take any different concept course here.

⁸ Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Minor in Journalistic Reporting and Storytelling

The Minor in Journalistic Reporting and Storytelling is designed for students who are interested in augmenting their major with strong skills in conducting primary source research, strategic use of media tools, and communicating narratives with accessible language. The minor provides students with a foundation in the principles of journalism, including ethics, newsgathering, and reporting. Students will also learn how to develop their own unique voice as a storyteller and how to craft compelling political and governmental coverage, breaking news, personality profiles, culture pieces, and more. Most importantly, a minor in reporting and storytelling will help students fluently produce and consume news within a complex media landscape, becoming a positive force against misinformation and division. Majors in Journalism and Media Communication may not complete this minor.

Learning Objectives

Upon successful completion of this program, students will develop a strong understanding of the principles and practices of journalism. Students will demonstrate fluency in the legal and ethical considerations of journalism and apply critical thinking and problem-solving skills to real-world developments around newsgathering and dissemination.

Requirements

Effective Fall 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits. Journalism and Media Communication majors are not allowed to enroll in this minor.

Minor in Science Communication

The minor in Science Communication is designed to educate highly qualified communicators who have interests in specialized academic disciplines and career fields. Because science often involves complicated research and processes, communicating the results of that work requires special skills.

This program is designed to prepare students for a wide range of niche career opportunities in media, corporate communication, science-related industries, and scientific environments. Journalism and Media Communication major students are not allowed to declare this minor, but may choose a science communication focus within their major.

Students will demonstrate competence in writing, editing, and producing media messages as well as in planning, designing and evaluating effective public information programs about science.

Requirements Effective Fall 2021

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Master of Communications and Media Management, Plan C (M.C.M.M.)

The Master of Communications and Media Management, Plan C (M.C.M.M.) is designed for students with a bachelor's degree seeking to transition to a communication-related career, or for those seeking to move up into a management role in their present media profession. The rapid rate of technological change in media technology has created a need for constant retraining and the acquisition of new multimedia knowledge and management skills. The program curriculum is designed to provide students with a comprehensive overview of "new media" developments. Upon completion of the program, students are prepared to strategize and manage specific communications projects, as well as manage and direct staff members or contract workers in a communications unit within a corporate, educational, or nonprofit organization.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion, students will be able to:

1. Identify theories related to current practices in communication management.
2. Compare research findings on how social media may be used to communicate with, and market services and products to, distinct state, national, and global audiences.

3. Apply hands-on experience with digital communication hardware and software tools.
4. Identify tools that students may manage after graduation, including teleconferencing and collaboration techniques used by global teams.

Ph.D. in Media Communication

The Ph.D. in Media Communication focuses on the historical, social, and cultural factors that shape the development of mediated communication, and the role of mediated communication in the public's understanding of contemporary issues. Students are encouraged to pursue a concentration in one of the following: Science Communication, Strategic Communication, or Journalism Studies. The program prepares students with high-level research and theoretical skills for careers in academic and communication research or research management positions.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

1. Develop an in-depth understanding of a wide range of communication, psychological, social, and structural theories related to media communication research;
2. Develop competency in research design, including theory-building, conceptualization, operationalization of concepts, development of research questions, hypothesis testing, and quantitative and/or qualitative methodologies applicable to conducting communication research;

3. Develop expertise in a specific content area outside of the Department of Journalism and Media Communication;
4. Practice instructional methods and presentation skills appropriate for higher education and industry;
5. Conduct a focused communication dissertation using the skills and knowledge acquired in the program;
6. Execute public dissemination of the primary dissertation project undertaken while a student in the program.

Minor Programs

A minor in a foreign language offers opportunities for studying the language and culture of another country and complements many major fields. A student with a broadly based education, including a foreign language, will be better prepared to deal with changing technological, economic, and social conditions on an international scale. A student who minors in a foreign language may expect to develop sufficient competency to speak and write with reasonable accuracy and fluency while pursuing interest in language, literature, and culture. See the department for specific information on upper-division transfer work in the language of the minor.

All majors and minors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each upper-division course that carries the LARA, LASL, LCHI, LFRE, LGEN, LGER, LHEB, LITA, LJPN, LKOR, LLAT, LRUS, or LSPA subject code.

Minors

- Minor in Chinese
- Minor in French
- Minor in German

Major in Languages, Literatures, and Cultures, Spanish for the Professions Concentration

This concentration will provide students with a foundation in Spanish for professional contexts, such as animal care, business, health care, and translation & interpreting. While receiving a foundation in the Spanish language, literature and culture, students will specialize in course sequences in an area of their choice from among the options LLC offers.

Learning Objectives

Upon successful completion of the program, students will be able to:

1. Successfully complete common and routine, as well as complex, workplace tasks which require communication in Spanish.
2. Demonstrate the ability to communicate and exchange ideas about common workplace related themes, both orally and in writing, using relevant field-specific vocabulary, grammatical accuracy and appropriate pronunciation.
3. Interact in a multi-cultural setting with an increased sensitivity to cultural and linguistic differences present in a specific work environment.
4. Demonstrate familiarity with relevant field-specific text types, genres and registers, as well as interpersonal and presentational formats of oral communication in particular work settings.

Requirements Effective Fall 2022

All majors and minors in the department must earn a minimum grade of C 2.000 (a grade of C- is not acceptable) in each upper-division course that carries the LARA, LASL, LCHI, LFRE, LGEN, LGER, LGRK, LITA, LJPN, LKOR, LLAT, LRUS, or LSPA subject code.

Interdisciplinary Minor in American Sign Language

The Interdisciplinary Minor in American Sign Language will increase students' proficiency in sign language and provide them with key tools for the workforce of the 21st century. Students are provided a solid foundation in the way Deaf culture, Deaf history and language accessibility intersect with power, equality and human connection. A minimum of 21 credits is required for the program.

Learning Objectives

A. Critical Analysis:

1. Articulate a critical understanding of the way that language, culture, privileged and marginalized societies have shaped the Deaf and ASL community and the relationship with the majority "hearing" society.
2. Identify linguistic patterns, analyze sentence structure, and apply essential components of sign language grammar in professional and conversational settings.
3. Analyze and interpret the use of literary and storytelling techniques in American Sign Language, including rhymes, rhythm, and movement. Examine literature and film in its cultural and historical context.
4. Construct grammatically correct and well-articulated expressive videos in the target language, on literary, linguistic, and cultural topics.

B. Global and Cultural Awareness:

1. Conduct dynamic conversations in a culturally and socially appropriate manner with speakers of the target language in person and with the use of technology.
2. Reflect critically on their own socially and culturally constructed values and behavior patterns, through recognizing and appreciating cultural difference.
3. Explain the conceptual shifts between Deaf history and current Deaf movements and how these are relevant to Deaf rights in America and around the world.
4. Analyze historical and cultural Deaf perspectives from a variety of countries, including the topics of Deaf empowerment, Deaf identity, and the documentation and preservation of language and culture.

C. Written and Oral Communication in a Second Language:

1. Practice signed expressive communication to present information, describe and narrate personal experiences and events in a coherent,

well-developed manner. Demonstrate contextual flexibility and appropriate register, applying proper advanced language techniques in a variety of professional and social interactions.

2. Exchange information and discuss opinions and individual perspectives on familiar topics of personal and public interest, both prepared and impromptu.
3. Present a coherent and persuasive argument, which demonstrates competent use of a variety of sentence structures, cohesive devices, and pertinent vocabulary.
4. Make effective use of written critical analysis on a variety of relevant topics, and articulate knowledge of the Deaf literary traditions-crafting works in poetry and creative formats (songs, handshape, letter & number stories etc.)

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Certificate in Korean Studies

The Certificate in Korean Studies is designed to introduce students to different aspects of Korean language, culture, history, political and economic systems, and artistic expressions, within the context of East Asia.

Korean has been deemed a "critical language" by the U.S. government and is thus extremely useful for careers in government, including the military, national security agencies, and the U.S. diplomatic corps. K-Pop has become one of the most popular music genres in the world. Korean television series regularly go viral on Netflix. And Korean companies are among some of the most popular consumer brands on the planet, including Samsung, Hyundai, Kia, and LG.

Learning Objectives

Students will:

1. Apply language skills to conduct written and oral communication on literary, linguistic, and cultural topics in a culturally and socially appropriate manner with the help of reference materials.
2. Reflect critically on their own socially and culturally constructed values and behavior patterns, through recognizing and appreciating cultural differences.
3. Explain and analyze key aspects of Korean culture, history, and civilization.

Requirements Effective Fall 2024

Additional coursework may be required due to prerequisites.

Certificate in Spanish for Animal Health and Care

The Certificate in Spanish for Animal Health and Care is designed for students who are preparing for a career in large and small animal production and care, as well as for practicing professionals in these and related fields. The certificate is intended to develop intermediate-level, field-specific communication skills in Spanish.

Learning Objectives

Upon successful completion of the certificate, students will be able to:

1. Issue and follow instructions in Spanish about animal daily care and handling, preventive care of animals, vaccination/drug administration and dosages, safety guidelines in animal handling and care.
2. Using appropriate Spanish terminology and sentence-length discourse, identify and describe common animal health conditions and related symptoms, treatment procedures and proper care recommendations.
3. Using appropriate Spanish terminology and question-formation structures, take animal health history and explain animal physical exam procedures and results, as well as the justification behind animal care best practices.
4. Using a basic past-tense frame, narrate incidents resulting from the mishandling of animals, the evolving condition of particular animal ailments, and personal experiences in the workplace.
5. Demonstrate the ability to infer meanings of key Spanish terms using a variety of strategies, and to research the origin, meaning and contextual uses of Spanish terms specific to animal health and care.
6. Identify and analyze differences between their own cultural patterns and those of workers from different cultural backgrounds in animal care settings, as well as the effects of cultural displacement, personal distance and power in the workplace.

Graduate Certificate in Spanish for the Veterinary Professional

The graduate certificate in Spanish for the Veterinary Professional is intended for students in DVM programs and practicing professionals in veterinary medicine who have obtained an undergraduate degree. It develops intermediate-level, field-specific communication skills in Spanish that are fundamental for consulting with Spanish speaking pet-owners about animal health. Additionally, it develops awareness on relevant diverse cultural perspectives surrounding animal care and on how to increase access to veterinary medicine to Spanish speaking community members.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion, students will be able to:

1. **Preventative Care:** Gather patient and client information and discuss best practices in preventative care (vaccination, parasite control, reproduction status, and diet) using simple, sentence-level discourse, appropriate question-formation structures, and targeted, field-specific terminology.
2. **Describing physical states and behaviors:** Obtain information about and describe animals' physical states and behaviors using appropriate Spanish terminology, simple, sentence-level discourse, and appropriate question-formation structures.
3. **Health History:** Take patients' health histories using appropriate Spanish terminology, question-formation structures, and a basic past-tense time frame. This includes the ability to track comprehension of client input about their animal's health and provide appropriate sentence-level summary statements of understanding.
4. **Diagnostics:** Use appropriate Spanish terminology and sentence-level discourse to provide basic explanations of the diagnostic results and their associated illnesses or conditions.
5. **Treatment and follow-up:** Use appropriate Spanish terminology and sentence-level discourse to recommend treatment options for common illnesses and conditions in veterinary medicine. Provide information about associated risks, medication administration, and basic instructions for at-home care.
6. **Culture & Accessibility:** Identify and analyze differences between their own cultural patterns and those of Spanish speaking pet owners and animal caretakers from different cultural backgrounds. Pinpoint and address areas of potential cultural misunderstanding to foster increased access to veterinary care for LEP Spanish speaking community members. Utilize information that is taught to design a clinic that is accessible to LEP Spanish speaking clientele.

Professor Kenneth Shockley, Department Chair
 Associate Professor Eirik Harris, Director of Graduate Studies
 Associate Professor Jeff Kasser, Director of Undergraduate Studies

Philosophy is the oldest form of systematic, scholarly inquiry. It is the study of the most basic moral, legal, aesthetic, religious, and metaphysical ideas by which we pursue understanding and develop principles of conduct. Philosophers seek to establish standards of evidence, provide rational methods of conflict resolution, establish criteria for just social orders, and create techniques for evaluating ideas and arguments.

The study of philosophy broadens and intensifies liberal education while enhancing interpretive abilities in many fields. The curriculum encourages a broad liberal arts background, including courses in foreign languages, and a plan for graduate school and teaching careers in philosophy. The broad relevance of philosophy to other fields permits

most students to work toward goals such as professional training in law, medicine, business, or theology. There are three concentrations available to Philosophy majors: General Philosophy; Global Philosophies and Religions; and Philosophy, Science and Technology. It is not unusual for Philosophy majors to second-major in other disciplines, and these concentrations combine easily with other majors at CSU.

Learning Objectives

Objective 1: Critical Thinking

Students will recognize, construct, and evaluate arguments and alternative positions by correctly applying logical standards and methodology, demonstrating the ability to identify underlying assumptions, ambiguous or contested terms, and potential objections to a thesis.

Objective 2: Content Knowledge

Students will demonstrate knowledge of major questions, arguments, problems, and figures from a variety of philosophical areas and traditions.

Objective 3: Reading and Research

Students will develop the interpretive, analytical, and conceptual skills to read with understanding a variety of philosophical texts. Students will be able to assess the quality and relevance of a variety of sources (books, journal articles, etc.) and use these sources in their own research and writing.

Objective 4: Communication

Students will clearly articulate ideas and arguments in writing and oral communication. Students will demonstrate competence in interpretive, analytical, and argumentative writing. They will effectively present their own ideas and research in oral communication and writing. Students will engage in open, thoughtful, and respectful dialogue.

Objective 5: Values and Attitudes

Students will demonstrate cognitive flexibility by applying alternative possibilities and conceptual frameworks to their own and others' ideas and values. They will demonstrate intellectual curiosity in their pursuits of truth and meaning. They will engage in reflective inquiry and aim to achieve a greater understanding of their subject matter.

Potential Occupations

A major in philosophy prepares students for a wide variety of professional aspirations, including graduate study in philosophy or other disciplines; training in law, computer technology, social work, health care, the ministry, business; and general intellectual flexibility in a changing world. The high level of skill that philosophy majors acquire in communication, writing, and analytical and critical thinking enables them to secure jobs in a variety of private and public sector professions and to become leaders in their fields.

Depending on the major concentration that a student pursues, available career opportunities include, but are not limited to: public policy analyst, business manager, public administrator, computer programmer, intelligence officer, legislator, teacher, foreign diplomat, social worker, community developer, philanthropic organizer, physician, lawyer, researcher, writer, theologian, human resources manager, publisher, and ethics consultant, in a variety of fields, e.g., in medicine, business, law, public administration, non-profit administration, engineering, and the sciences.

Concentrations

- General Philosophy Concentration
- Global Philosophies and Religions Concentration
- Philosophy, Science, and Technology Concentration

To change your major to Philosophy, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu> (<https://advising.libarts.colostate.edu/>).

Certificate in Ethics and Society

The Certificate in Ethics and Society aims to provide students with a broad background in ethics and social philosophy. The objective of the certificate is for students to competently navigate questions of social and ethical values on a wide range of issues. The program is structured to foster a deep understanding of both the theoretical foundations and the practical applications of ethics. By allowing choice from a wide range of courses in ethics, the certificate provides students the opportunity to gain experience making and assessing value judgments on a variety of important social issues or to focus on the particular issues most relevant to their major or their area of interest. The certificate is open to students in any major or minor.

Learning Objectives

Students will:

1. Analyze the sources of agreement and disagreement among the major schools of thought in ethics.
2. Apply ethical frameworks from each of the major schools of thought in ethics to solve ethical problems.

Major in Political Science

Political science is the study of politics and political action in society. It encompasses international agreements and organizations as well as the patterns of political action which both create and shape them. It encompasses citizen action and the institutions which produce public policy at the local, state, and national levels within the United States. It encompasses systems of voting, political parties, and courts, compared across national political systems. It encompasses the raising of normative questions about the nature and purposes of political life. The presence of politics is felt in all areas and sectors of society at all

times. The dynamic and transformative effects of political action are seen virtually everywhere.

The department's curriculum is distributed across five subfields of the discipline: American politics, political theory, comparative politics, international relations, and public policy. Course work across the discipline's subfields is complemented by a required support option. Support options include a minor in another department; an interdisciplinary minor; the second language support option; the methods support option, or a second major.

Learning Objectives

Students majoring in Political Science shall demonstrate the following:

1. Ability to reason through political claims and assertions by political actors.
2. Skill in recognizing and responding to diverse ideological perspectives.
3. Ability to locate political issues and controversies within their relevant institutional and historical contexts.
4. Familiarity with the institutional processes of politics in numerous global and domestic political arenas.
5. Confidence in expressing opinions and presenting analyses of political problems and their solutions.

Accelerated Program

The major in Political Science includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The major in Political Science, like all studies in the liberal arts, provides students with a broad academic background that is serviceable across a broad spectrum of employment in the public and private sectors. Political Science majors are trained to be independent and critical thinkers; to be discerning and active observers and listeners; to communicate persuasively; to constructively engage and solve intellectual and practical problems; to adapt and function effectively in a number of distinct occupational and institutional settings; to function comfortably in a multiethnic, multiracial, and globalizing society. The employment profiles of departmental alumni attest to the breadth of possibilities for today's graduates: public and non-profit organization managers, prosecutors, public policy analysts and consultants, federal law enforcement agents, legislators and legislative analysts, foreign service officers, private attorneys, demographers, criminal investigators, advertising specialists, urban/regional planners, environmental policy analysts, state budget analysts, public relations representatives, market researchers, elementary and high school teachers, international businessmen and businesswomen, lobbyists, novelists, construction industry managers, insurance agents and managers, financiers, and real estate brokers. Some graduates join professions following advanced study in law,

international relations, area studies, public administration, public policy analysis, and business management.

Concentrations

Students may complete the general Political Science major or select one of the following concentrations for a more specialized course of study.

- Environmental Politics and Policy Concentration
- Global Politics and Policy Concentration
- U.S. Government, Law, and Policy Concentration

For further information on declaring the Major in Political Science, please schedule an appointment with a College of Liberal Arts Academic Success Coordinator by calling 970-491-3117 or visiting Clark C207.

To change your major to Political Science, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an

email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Major in Political Science, Environmental Politics and Policy Concentration

The Environmental Politics and Policy concentration is designed to help students develop the knowledge and skills to analyze the connections between politics and the natural world, and pursue careers in environmental politics and policy-making. Students will learn about how political forces contribute to environmental degradation, the process for developing environmental policies, strategies to assess the strengths and weaknesses of different policy approaches, and how political forces can be harnessed to develop effective responses to problems such as climate change, water and air pollution, food security, and energy provision. Students will explore these issues from both domestic and global perspectives. Environmental Politics and Policy students are strongly encouraged to complete an internship to gain practical experience working in the field.

Learning Objectives

Students majoring in Political Science shall demonstrate the following:

1. Ability to reason through political claims and assertions by political actors.
2. Skill in recognizing and responding to diverse ideological perspectives.

3. Ability to locate political issues and controversies within their relevant institutional and historical contexts.
4. Familiarity with the institutional processes of politics in numerous global and domestic political arenas.
5. Confidence in expressing opinions and presenting analyses of political problems and their solutions.

Potential Occupations

Graduates may work as policy analysts, advocates, planners, educators or decision-makers in government agencies, non-profit organizations, businesses, and consulting firms at the local, state, national, and international levels.

Major in Political Science, Global Politics and Policy Concentration

The Global Politics and Policy concentration is designed to help students develop the knowledge and skills to analyze political relationships between and within countries and to pursue careers in international affairs (<http://www.apsia.org/career-guide/>). Students will learn about different systems of government, state-society relations in various parts of the world, the ways that public and private actors interact through international institutions and the global economy, as well as the causes of and responses to domestic and international conflict. Global Politics and Policy students are strongly encouraged to study a foreign language (<http://languages.colostate.edu/>) and to complete some of

their coursework in one of CSU's many study abroad programs (<http://educationabroad.colostate.edu/students/>).

Learning Objectives

Students majoring in Political Science shall demonstrate the following:

1. Ability to reason through political claims and assertions by political actors.
2. Skill in recognizing and responding to diverse ideological perspectives.
3. Ability to locate political issues and controversies within their relevant institutional and historical contexts.
4. Familiarity with the institutional processes of politics in numerous global and domestic political arenas.

5. Confidence in expressing opinions and presenting analyses of political problems and their solutions.

Major in Political Science, U.S. Government, Law, and Policy Concentration

The U.S. Government, Law, and Policy concentration is designed to prepare students to become future leaders in the public sector. The skills gained in this concentration help prepare students for a variety of careers. Resources for careers include the American Political Science Association (<https://www.apsanet.org/>) and the Network of Schools of Public Policy, Affairs, and Administration (<https://www.nasppa.org/>). The courses in this concentration educate students about the political processes and the legal environment of all levels of American government, as well as the processes of policymaking and the administrative apparatus used to implement public policy. Students will also be exposed to a variety of substantive policy issues including urban policy, energy policy, and environmental policy in the United States. U.S. Government, Law, and Public Policy students are strongly encouraged to complete an internship in one of the many organizations in the broader community. Students in this concentration are also encouraged to participate in the Legislative Internship Program (<https://polisci.colostate.edu/internships-and-careers/>) during their junior or senior years.

Learning Objectives

Students majoring in Political Science shall demonstrate the following:

1. Ability to reason through political claims and assertions by political actors.
2. Skill in recognizing and responding to diverse ideological perspectives.

3. Ability to locate political issues and controversies within their relevant institutional and historical contexts.
4. Familiarity with the institutional processes of politics in numerous global and domestic political arenas..
5. Confidence in expressing opinions and presenting analyses of political problems and their solutions.

Potential Occupations

Graduates may work for government agencies, nonprofits, community organizations, lobbying firms, elected office, political communication, research and policy analysts. Other graduates will utilize their political science education to prepare for law and graduate schools. Past students have completed internships (<https://polisci.colostate.edu/internships/>) with a variety of law firms, the cities of Fort Collins, Windsor, Loveland, and Westminster, the Colorado General Assembly, and Woodward among others.

Minor in Applied Environmental Policy Analysis

The minor in Applied Environmental Policy Analysis will provide students with a rigorous and in-depth study of the public sector environment, practice, and methods for analyzing and developing policy. Each course will also have the environment as a focus in the material, exams, and assignments. At the end of the minor, students will be able to recall and explain the basic rationales for public policies, apply rigorous research

methods for evaluating policy, and integrate the elements of theory, methods, problem structuring, ethics, analysis and argumentation to generate reports useable in government and nonprofit management. The minor is appropriate for practicing professionals and current undergraduate students interested in expanding their applied evaluation skills and environmental policy expertise.

For further information on adding Applied Environmental Policy Analysis as a minor, please contact Lauren Tighe at lauren.tighe@colostate.edu or visit Clark C346.

Requirements Effective Spring 2014

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students must complete each course in the minor with a grade of C or better.

¹ At least two courses (6-10 credits) are required in Spanish or French. Because language proficiency is required for effective research or work in this region, students are STRONGLY URGED to complete language coursework through the 300-level or above. Language courses, including Portuguese, may be taken at CSU or transferred from an accredited institution. Independent study courses may not count toward the language requirement.

² Courses used to fulfill this requirement may not double-count as electives.

³ Additional courses having a focus on Latin America or the Caribbean may be used to fulfill program requirements with approval of advisor.

Minor in Political Science

The minor in Political Science provides a sound academic core for students in other social science or non-social science majors who are interested in politics. It may be particularly useful for persons preparing themselves for careers in law, teaching in the social sciences, journalism, and public service.

For further information on adding Political Science as a minor, please contact Lauren Tighe at lauren.tighe@colostate.edu or visit Clark C346.

Requirements Effective Spring 1990

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Graduate Certificate in International Security

Students who complete the Graduate Certificate in International Security will gain a greater understanding of how and why organized violence

is used in contemporary world politics. They will learn to explain the outbreaks, durations, and terminations of war; the causes of human suffering during wartime; and the ways in which human beings can suffer from insecurity even during times of peace. In doing so, students will gain experience of using a variety of theoretical approaches. There will be a heavy emphasis on research methods and research design. The certificate is designed to prepare students to become competent analysts of contemporary and future international security issues.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion of this certificate, students will be able to:

1. Identify and describe theories of International Relations as they relate to international security studies.
2. Explain complex phenomena with reference to academic theories and concepts.
3. Produce rigorous research into international security topics, and convey findings to diverse audiences.

Program Requirements Effective Fall 2023

Graduate Certificate in Political Economy

This certificate provides students with the requisite knowledge and skills to engage in political economy research across the social sciences and humanities. Students are required to complete three (3) core courses from three (3) different departments in the College of Liberal Arts (CLA) to develop an understanding of theories of political economy and their application in social scientific and humanities research and wherever questions of social choice are involved.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Outcomes

Upon successful completion of this certificate, students will be able to:

- 1. Explain problems, concepts, and phenomena based on the complex relationships between politics, economics, culture, society, and the environment.
- 2. Define, explain, and combine a range of theoretical approaches to political economy from different disciplinary fields.
- 3. Apply diverse theoretical approaches of political economy in social science or humanities research, and wherever social choice is involved.
- 4. Effectively communicate complex concepts, theoretical perspectives, and empirical evidence from the field of political economy.

Graduate Certificate in Public Policy Analysis

The Graduate Certificate in Public Policy Analysis provides students with skills, knowledge, and abilities in public policy. Students complete coursework that provides them with an understanding of public policy and the methods used to analyze outputs and outcomes of policy decisions in the public sector.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion, students will be able to:

- 1. Appropriately structure policy problems and apply a systemic evidence based problem solving approach to those problems.
- 2. Integrate the elements of theory, methods, problem structuring, ethics, analysis, and argumentation to generate reports usable in government and nonprofit management.
- 3. Conduct evaluation methods using appropriate and standard methodologies.
- 4. Understand and analyze policy evaluations from experts.

Master of Arts in Political Science, Environmental Politics and Policy Specialization

The Master of Arts in Political Science, Environmental Politics and Policy Specialization examines the interplay between the environment and politics and the scope and severity of environmental governance challenges using interdisciplinary evidence, diverse perspectives, and multiple approaches. Specialists in this field normally examine key actors, institutions, and norms of environmental politics in domestic and international contexts for private or public organizations.

For more information on the Master of Arts in Political Science please email cla_polisci@mail.colostate.edu.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students who choose the Environmental Politics and Policy specialization will:

Diagnose:

1. Examine the interplay between the environment and politics and the scope and severity of environmental governance challenges using interdisciplinary evidence, diverse perspectives, and multiple approaches

Contextualize and Theorize:

1. Examine key actors, institutions, and norms of environmental politics in domestic and international contexts.
2. Evaluate key theories explaining the roles of actors, ideas, beliefs, identity and cultures in environmental politics.
3. Critique normative approaches and empirical measures of environmental problems
4. Appraise theoretical and normative approaches to environmental discourse, practice, performance, and politics.
5. Apply theory to improve the practice of environmental decision making.

Organize and Communicate:

1. Identify and assess organizational and administrative strategies of environmental groups, institutions, and administrations.
2. Analyze and develop organizational, administrative, institutional, and communicative strategies related to environmental politics.
3. Design solutions to environmental problems reflective of theoretic and normative complexity.

Research:

1. Design and implement research projects that measure, contextualize, communicate, or explicate environmental politics topics and concerns.
2. Develop and execute comparative and case-based approaches to evaluating environmental institutions, beliefs, contexts, cultures, and practices.
3. Develop and practice professional writing, speaking, and networking skills directed to broadly impacting environmental politics

Inform:

1. Examine the interplay between the environment and politics and the scope and severity of environmental governance challenges using interdisciplinary evidence, diverse perspectives, and multiple approaches.

Master of Arts in Political Science, Power, Justice, and Democracy Specialization

The Master of Arts in Political Science, Power, Justice, and Democracy Specialization analyzes contemporary theories of justice, democracy, development, and inequality from both domestic and international perspectives using interdisciplinary evidence, diverse perspectives, and multiple approaches. Specialists in this field develop methodological

skills for analyzing and interpreting contemporary social and political problems around such topics as development, ecology, gender, race, sexuality, social movements, and peacebuilding for private or public organizations.

For more information on the Master of Arts in Political Science please email cla_polisci@mail.colostate.edu.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students who choose the Power, Justice, and Democracy Specialization will:

Theorize & Diagnose:

1. Analyze contemporary theories of power, justice, and democracy from both domestic and international perspectives using interdisciplinary evidence, diverse perspectives, and multiple approaches.
2. Develop methodological skills for analyzing and interpreting contemporary political struggles.
3. Compare different forms of knowledge about issues related to power, justice, and democracy.

Contextualize & Clarify:

1. Identify the political and institutional origins, and assess the social changes affecting the development, of rights and freedoms.
2. Examine the interplay of different socio-political actors, institutions, and interests in the contestations over power, justice, and democracy.
3. Examine the role of formal and informal institutions, norms, and traditions in sustaining or dismantling inequalities.
4. Recognize the local, regional, national, or international political and institutional contexts that frame individual and collective action and the distribution of economic and political power.

Research & Evaluate:

1. Design and implement research projects that measure, contextualize, interpret, communicate or explicate issues of justice, power, or democracy.
2. Demonstrate abilities to identify suitable methods to engage with different types of individuals, organizations, institutions, and communities of knowledge in the study of power, inequality, or rights.
3. Critique normative approaches and empirical measures of power, democracy, inequality, or human rights.

Praxis/practice:

1. Engage with different political actors, stakeholders, or communities of knowledge in the identification of relevant research questions, empirical observations, or practical solutions to problems of injustice or inequality.
2. Support governmental and non-governmental actors, civil society organizations, or community groups in the identification of problems, and the design of policy or political solutions to issues of injustice or inequality.

Master of Public Policy Administration, Plan C (M.P.P.A.)

Graduates of the Master of Public Policy Administration, Plan C (M.P.P.A.) program become mid-to-high level public servants in local, state, and federal government positions as well as mid-to-high level leaders in domestic and global public and nonprofit service organizations. Alongside a core curriculum that includes courses like civic engagement, program evaluation, public human resources management, and public budgeting, students specialize in public policy, public management, or international policy and management to further refine their skills and prepare them for the future. Classes are held on weeknights on the Fort Collins campus to enable working professionals to complete the degree in as few as 4 semesters. Service learning, internships, and theory-practice linkages are emphasized throughout the program to prepare students to be highly qualified public servants. The program website can be viewed at this link: mppa.colostate.edu (<https://www.libarts.colostate.edu/students/graduate-programs/master-of-public-policy-and-administration/>).

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Graduate Graduate Programs in Race, Gender, and Ethnic Studies

The Department of Race, Gender, and Ethnic Studies seeks to teach students to understand the unique and interlocking experiences of racially marginalized groups and to analyze how race intersects with other forces of social differentiation, such as gender, sexuality, and class, in national and international contexts. The program recognizes the importance not only of the history of racial exclusion and marginalization, but also the creative ways in which various racial groups sustain their humanity through cultural preservation, transference, and renewal.

Race, Gender, and Ethnic Studies is committed to nurturing students to become culturally aware, astute, civic-minded individuals who strive to strengthen the communities in which they reside. Because the study of ethnic groups intrinsically reveals how race structures life chances and opportunities, the scholarly orientation of the department reflects a commitment to meaningful changes in public policy and social life. The department offers graduate-level education to prepare students as leaders in the field of race, gender, and ethnic studies.

Students interested in pursuing graduate work should refer to the Graduate and Professional Bulletin (<https://catalog.colostate.edu/general-catalog/graduate-bulletin/>) and the department website (<https://ethnicstudies.colostate.edu/graduate/>).

Major in Ethnic Studies

The Ethnic Studies major involves critically examining the interlocking forces of race, gender, class, sexuality, and other forms of social differentiation that shape the histories and experiences of racially marginalized groups. The programs of study interrogate how these socially constructed ideas impact distribution of social goods, affect life chances, shape identities and worldviews, and reproduce social inequalities. Drawing from interdisciplinary and comparative theoretical frameworks, we bring to bear issues of power, privilege, and social justice pertinent to the experiences of diverse populations in the U.S. and abroad. We are especially committed to nurturing civic-minded and culturally informed students who strive to strengthen the communities in which they reside. In support of the land-grant mission of CSU, students and faculty in the Ethnic Studies program engage with communities on

and off campus in order to effect meaningful change in public policy and social life.

Learning Objectives

Upon successful completion of a program of study, students will demonstrate:

1. An understanding of the key concepts shaping the experiences of various racial and ethnic groups in the United States and abroad.
2. Familiarity with social histories and experiences of racial and ethnic groups.
3. Effective oral communication, writing, and research skills.
4. An increase in critical thinking, intellectual, and personal growth.
5. An understanding of the value of social consciousness and personal responsibility.

Potential Occupations

Both theoretical understandings of and practical experience in cross-cultural and inter-ethnic relations are invaluable in today's world. Ethnic Studies graduates work in the following fields and occupations: K-12 and adult education (e.g. refugee/immigrant education); diversity, equity, and inclusion training/consulting; human social services including counseling, health care, and civil service; federal, state, tribal, and local government, and community service; natural resources development and technology; legal services; communications media such as newspaper, radio, video, and television; archival and museum studies; non-profit agencies and community organizing; and advanced studies including graduate programs in the social sciences and professional programs (e.g. law, social work).

Concentrations

- Community Organizing and Institutional Change Concentration
- Global Race, Power, & Resistance Concentration
- Social Studies Teaching Concentration

To change your major to Ethnic Studies, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Major in Ethnic Studies, Community Organizing and Institutional Change Concentration

The Community Organizing and Institutional Change concentration in the Ethnic Studies major offers students the opportunity to learn the history and methods diverse communities have used to seek civil rights. With a focus on recognizing, listening, respectfully engaging, and effectively organizing community efforts to create a more equitable

society, students will be able to help guide organizations and institutions. Through courses focused on policy, organizing, and institutional change, students will recognize and respond to contemporary issues.

Learning Objectives

Upon successful completion of the program of study, students will be able to:

1. Illustrate a critical understanding of structural, endemic, and institutional racism and discrimination.
2. Develop analytical skills to analyze and evaluate racism and discrimination in communal and organizational structures.
3. Create plans, programs, instruction, or policy solutions based on analysis and evaluations.
4. Develop analytical and practical skills in applying intersectional analyses and coalitional building across differences.

Requirements Effective Spring 2024

Students in the Ethnic Studies major must earn a minimum grade of C (2.000) for all Ethnic Studies courses required for the major.

Major in Ethnic Studies, Social Studies Teaching Concentration

The Major in Ethnic Studies, Social Studies Teaching Concentration prepares students to become social studies teachers in middle schools or high schools. Specific requirements for the teacher licensure can be found at Educator Preparation (<http://www.cep.chhs.colostate.edu/>) in the School of Education.

Learning Objectives

Upon successful completion of the program of study, students will be able to:

1. Demonstrate competence in teaching social studies courses at the high school level.
2. Apply ethnic studies and gender studies content to various areas in high school social studies curriculum.
3. Analyze the intersections between ethnic studies and standard social studies curriculum.
4. Enhance the state approved social sciences and history courses by incorporating diverse perspectives.
5. Develop critical understanding of instructional methodologies and pedagogy.
6. Work effectively with diverse student populations.

Requirements Effective Spring 2024

During their sophomore year, students must apply for admission to the licensure program. This requires completion of at least 30 credits, a minimum 3.000 GPA, and passing a criminal background check. To continue in the major, students must maintain a 3.000 GPA. Grades in all History, Social Studies and Education courses must be C or above.

Major in Women's and Gender Studies

The Women's and Gender Studies major prepares individuals for the needs and opportunities of an increasingly interconnected and interdependent world by building awareness of the range of human experience, potential, and accomplishment that place women and gender at the center of inquiry.

Please visit the Center for Women's Studies & Gender Research (<https://womensstudies.colostate.edu/>) for more information.

Learning Objectives

Upon successful completion of the program of study, students will be able to:

1. Demonstrate mastery of knowledge of academic disciplines from feminist and intersectional perspectives.
2. Analyze historic and contemporary contributions of women of all cultures.

3. Demonstrate effective oral communication, writing, and research skills.
4. Implement critical thinking, writing, reading skills to their intellectual, professional, and personal lives.
5. Assess critical ideological understandings regarding women and gender implicit in social institutions and structures.

To change your major to Women's and Gender Studies, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Requirements Effective Fall 2022

Students in the Women's and Gender Studies major must earn a minimum grade of C (2.000) for all WS and ETST courses required for the major.

Minor in Ethnic Studies

The minor in Ethnic Studies provides an opportunity for students to take a group of courses that address the impact of race, culture, class, gender, and sexuality in shaping institutions, social relations, and identities. Regardless of the main area of students' academic focus and career aspirations, a minor in Ethnic Studies will be advantageous as employers and organizations increasingly look for individuals capable of communicating across difference and addressing issues of equity and justice.

For more information on the minor, please visit the department website (<https://ethnicstudies.colostate.edu/undergraduate/>).

Learning Objectives

Upon successful completion of the program of study, students will:

1. Demonstrate a critical understanding of key concepts shaping racial and ethnic formations and structures.
2. Demonstrate knowledge of the social histories and cultural experiences of racial and ethnic groups.
3. Select and model respectful engagement with diverse populations.
4. Apply an understanding of the value of social consciousness and personal responsibility.
5. Develop critical thinking, writing, and reading skills to their intellectual and personal pursuits.

Requirements Effective Spring 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students in the Ethnic Studies minor must earn a minimum grade of C (2.000) for all Ethnic Studies courses required for the minor.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

¹ Graduate coordinator approval required. A minimum of 9 regular graduate credits are required to complete the certificate with only 3 credits in thesis, supervised college teaching, or independent study. All courses should include feminist, women's, and/or gender studies theories, methodologies, and paradigms. Students can submit course syllabi to the graduate coordinator for approval.

Master of Arts in Ethnic Studies, Plan A

The Master of Arts in Ethnic Studies, Plan A provides students with a comprehensive understanding of the enduring and transformative nature of race and ethnicity in the United States and around the globe. The program develops professional competencies in working with diverse communities to bring about meaningful social change. Through the development of strong research, writing, and oral skills, a master's degree in ethnic studies prepares students to become informed citizens and competitive job seekers. Our students are uniquely positioned to enter a workplace that is more diverse than ever, and where issues of race, ethnicity, gender, and sexuality, among others, are more relevant than at any time in the recent past.

Students interested in graduate work should refer to the Graduate and Professional Bulletin. For more information on the program, please visit the department website (<https://ethnicstudies.colostate.edu/graduate/>).

Learning Objectives

Upon successful completion of the program of study, students will be able to:

1. Recognize, identify, articulate and theorize about the unique and interlocking experiences of racially marginalized groups.
2. Explain and apply foundational theories and assumptions about how race intersects with other forces of social differentiation.
3. Engage the history of racial exclusion and identify creative ways racial groups sustain humanity through cultural preservation, transference, transformation and renewal.
4. Conduct a high quality original research project that integrates interdisciplinary concepts and theories grounded in Ethnic Studies.

The School of Music, Theatre, and Dance at CSU provides a rigorous undergraduate educational experience.

CSU Music believes that music is both an artistic and intellectual pursuit. We offer intense training in specialized music disciplines combined with a balance of core music courses in music history and theory. Our renowned and versatile faculty are committed to helping students discover their own unique identities through music. We offer Bachelor of Music (B.M.) degrees in Music Therapy, Music Education, Music Composition, and Music Performance, as well as a Bachelor of Arts in Music (B.A.). Additionally, undergraduates can earn a performance-based music minor.

CSU Theatre emphasizes a reciprocal relationship between practice and scholarly study. Students explore every aspect of theatre, including the theory and practice of acting, singing, theatrical design, stage management, technical theatre, dramaturgy, dramatic criticism, storytelling, and playwriting. Students pursuing a Bachelor of Arts in Theatre (B.A.) choose a concentration: Performance, Musical Theatre, Set Design, Lighting Design and Technology, Projection Design and Technology, or Sound Design and Technology. Each concentration provides fundamental skills and experiences in theatre within a liberal arts context.

CSU Dance offers programs in classical and contemporary dance education culminating in either a Bachelor of Fine Arts in Dance (B.F.A.), a Bachelor of Fine Arts with a concentration in Dance Education (B.F.A.), or a Bachelor of Arts in Dance (B.A.). Students focus on areas such as performance, technique, and foundations; performance and repertoire; choreography and improvisation; pedagogy and teaching methodologies; history and theory; and technical production and design. Guest artists and masterclasses are a regular occurrence. Dance majors explore the many possibilities for movement expression, along with creativity and scholarly examination, in a challenging and supportive environment.

Non-performing arts majors are welcome to participate in music ensembles, marching band, theatre productions, theatre shops, dance concerts, and dance technique classes. Many activities require an

audition and some do not. **Please visit our website for information** about how to get involved as a non-performing arts major.
