Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MU 695E Independent Study: Music History Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MU 695F Independent Study: Music Literature Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MU 695G Independent Study: Music Therapy Credits: Var[1-3] (0-0-0)

Course Description: Individual instruction on music therapy research projects.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor. Sections may be offered: Online.

Grade Mode: Instructor Option.

Special Course Fee: No.

MU 695H Independent Study: Pedagogy Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MU 798 Music Therapy Dissertation Preparation Credit: 1 (0-0-.75)

Course Description: Preparation assessments for dissertation processes, such as formulating research questions, formatting dissertation writing to APA styles, and dissertation proposals.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor. Repeatable up to three times.

Terms Offered: Fall, Spring.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

MU 799 Dissertation Credits: Var[1-15] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

Theatre (TH)

TH 140 Text Analysis Credits: 3 (3-0-0)

Course Description: Analyzing plays with an aim toward being better prepared, as theatre artists, to understand the dramatic text, the basis of theatre art and craft.

Prerequisite: None.

Registration Information: Credit not allowed for both TH 140 and TH 241.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 141 Introduction to Theatre (GT-AH1) Credits: 3 (3-0-0)

Course Description: Theatre as an art form and one of the humanities, its impact on society, and its relationship to other art forms.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Arts & Humanities 3B, Arts & Expression (GT-AH1).

TH 150 Introduction to Performance Credits: 3 (1-0-2)

Course Description: Imagination as the actor's primary resource: acting exercises, compositions, improvisations to acquire the basic approach to text through action.

Prerequisite: None.

Registration Information: Must register for lecture and recitation.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 151 Acting I Credits: 3 (2-2-0)

Course Description: First in four-part acting sequence. Imagination as an actor's resource, finding action, objective, the art of memory, improvisation, scene study, from simple scenes in realistic plays.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 153 Singing for Actors I Credits: 2 (0-0-2)

Course Description: Fusion of acting technique and singing technique for credible performance in the musical genre.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 160 Drawing for Theatre Credits: 3 (1-4-0)

Course Description: Drawing, drafting, watercolor, and other graphic skills essential to communicating design ideas used by set, costume, lighting, and media designers in theatre and production designers, storyboard artists, and costume designers in film.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 161 Stagecraft Credits: 3 (2-2-0)

Course Description: Learn how theatre works technically: Tools, materials, and techniques used for stage and film. Introduction to the resources at the University Center for the Arts (UCA).

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 163 Costume Construction Credits: 3 (1-4-0)

Course Description: An introduction to costume construction methods used by professional costume shops to create costumes used in entertainment.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 186 Theatre Practicum I--Crew Assignment Credit: 1 (0-2-0)

Course Description: Practical experience in mounting theatrical productions on a running crew in either lights, costume, set, sound or projections.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 192 First Year Seminar--Telling Your Story Credits: 3 (0-0-3)

Course Description: Collaborative creative processes required to transfer storytelling and self-scripting literature to theatrical performance with faculty artists/scholars.

Prerequisite: None.

Restrictions: Must not be a: Freshman, Sophomore. Must be a: Undergraduate.

Registration Information: Enrollment in theatre major required.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 242 World Theatre History I Credits: 3 (3-0-0)

Course Description: Theatre history from its African origins through the 18th century across global traditions.

Prerequisite: TH 140, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 243 World Theatre History II Credits: 3 (3-0-0)

Course Description: Theatre history from the 19th century to the present across global traditions.

Prerequisite: TH 140.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 250 Voice and Movement Credits: 3 (2-2-0)

Course Description: Survey of traditional and topical approaches to voice and movement for the theatre actor.

Prerequisite: TH 151, may be taken concurrently.

Restriction: .

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 251 Acting II Credits: 3 (1-4-0)

Course Description: Second in four-part acting sequence. Application of the given circumstances to a text and development of characterization, foundational course in scene work, and "inside- out" approaches to acting vocabulary.

Prerequisite: TH 151.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 253 Singing for Actors II Credits: 2 (0-4-0)

Course Description: Provides a foundation in vocal technique while learning repertoire from the musical theatre canon.

Prerequisite: MU 111.

Registration Information: Written consent of instructor.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 260 Computer Assisted Drafting for Theatre Credits: 3 (2-2-0)

Course Description: Computer assisted drafting to provide technical drawings, 3D-renderings, laser cutting, CNC routing, and 3D printing for stage and film.

Prerequisite: TH 161 with a minimum grade of C and TH 160 with a minimum grade of C.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 262 Stage Management I Credits: 3 (3-0-0)

Course Description: Introduction for professional stage managers of the performing arts; expectations, duties, and responsibilities.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 263 Costume Design I Credits: 3 (2-2-0)

Course Description: Exploration and practice of the unique process of the costume designer, including development of individual aesthetic and style through a series of projects in theatrical and entertainment design.

Prerequisite: TH 163.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 264 Lighting Design I Credits: 3 (2-2-0)

Course Description: Essential principles and theory for stage lighting including design process, control, equipment, and lighting aesthetics.

Prerequisite: TH 160 and TH 161.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 265 Set Design I Credits: 3 (2-2-0)

Course Description: Theory and techniques for designing scenery for the stage, film, and industry.

Prerequisite: TH 260, may be taken concurrently.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 266 Sound Design I Credits: 3 (2-2-0)

Course Description: Sound design fundamentals: mixing, audio engineering, and design for live performance settings.

Prerequisite: TH 160 and TH 161.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 267 Scenic Painting Credits: 3 (1-6-0)

Course Description: Basic techniques and practical applications in scenic painting for the theatre.

Prerequisite: TH 265, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 268 Projection Design I Credits: 3 (2-2-0)

Course Description: Projection design techniques: including show control, masking, animation, mapping, and content creation for live performance settings.

Prerequisite: TH 264.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 269A Makeup and Hair Design I: Actors Credit: 1 (0-2-0)

Course Description: Exploration of character creation using industry makeup techniques including basic makeup application, basic SFX design, basic wig care, and styling, and airbrush makeup.

Prerequisite: None.

Registration Information: This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 269B Makeup and Hair Design I: Designers Credits: 3 (1-4-0)

Course Description: Explores character creation using industry makeup techniques including basic makeup application, basic SFX design, basic wig care, and styling, and airbrush makeup.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 286 Theatre Practicum II--Shop Assignment Credit: 1 (0-0-2)

Course Description: Practical experience in mounting theatrical productions, working in lighting/electrics, scene, or costume shops.

Prerequisite: TH 186.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 292 Design and Technology Seminar Credit: 1 (0-0-1)

Course Description: Weekly examination of the ongoing production processes and strategies for stage managers and designers assigned productions in the mainstage season.

Prerequisite: TH 141, may be taken concurrently or TH 160, may be taken concurrently.

Registration Information: May be taken up to six times for a maximum of 6 credits.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 301A Theatre Design and Production Seminar: Lecture Only Credits: 3 (3-0-0)

Course Description: In-depth study of general interest in design and production. Possible topics may include design for business theatre, film, or pop culture.

Prerequisite: TH 161.

Registration Information: Written consent of instructor. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 301B Theatre Design and Production Seminar: Lecture and Lab Credits: 3 (1-4-0)

Course Description: In-depth study of general interest in design and production. Possible topics may include storyboarding, fabric dyeing, live audio mixing, lighting for pop culture/music, prop design etc.

Prerequisite: TH 161.

Registration Information: Written consent of instructor. Must register for lecture and laboratory. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 301C Theatre Design and Production Seminar: Lab Only Credits: 3 (0-6-0)

Course Description: In-depth study of general interest in design and production. Possible topics may include storyboarding, fabric dyeing, live audio mixing, lighting for pop culture/music, prop design etc.

Prerequisite: TH 161.

Registration Information: Written consent of instructor. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 324 Teaching Creative Drama for Children Credit: 1 (0-2-0)

Course Description: Theoretical and practical experience in teaching creative drama for children/theatre for young audiences.

Prerequisite: None.

Registration Information: Written consent of instructor. This is a partial semester course. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: No.

TH 343 Theatre for Social Change Credits: 3 (3-0-0)

Course Description: The study of revolutionary movements and alternative staging practices in theatre focused on Theatre for Social Change and Transformation.

Prerequisite: TH 242 or TH 243, may be taken concurrently.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 344 Global Dramaturgies Credits: 3 (0-0-3)

Course Description: Training in the application of dramaturgical techniques to facilitate the collaborative creative process in contemporary performance practices from around the nation and world.

Prerequisite: TH 242 or TH 243.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 345 Global Theatre Credits: 3 (3-0-0)

Course Description: Global theatre history, practice and dramatic literature, explored through text, style, and cultural context.

Prerequisite: TH 100 to 499 - at least 3 credits.

Registration Information: Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

TH 348 Speech and Dialects Credits: 3 (1-4-0)

Course Description: Study of speech and dialects as they relate to theatrical expression, acting and musical theatre performance.

Prerequisite: TH 250.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 350 Classical Text Credits: 3 (1-4-0)

Course Description: An overview of approaches to classical text and detonated language from a variety of global playwrights and traditions.

Prerequisite: TH 251 and TH 140, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 351 Acting III Credits: 3 (1-4-0)

Course Description: Third in four-part acting sequence. Acting methods for challenges presented in various performance styles, which may include the Greeks, Restoration comedy, non-Western forms, and other "outside-In" acting styles.

Prerequisite: TH 251.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 355 Directing I Credits: 3 (1-4-0)

Course Description: Practical directing workshop, short directing exercises, short scenes, techniques, theories, readings, staging prompts.

Prerequisite: (TH 140) and (TH 242, may be taken concurrently or TH 243).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 361 Technical Direction Credits: 3 (1-4-0)

Course Description: Advanced training and techniques in construction management and technical production for the theatre.

Prerequisite: TH 161.

Registration Information: Must register for lecture and laboratory.

Grade Mode: Traditional.

Special Course Fee: No.

TH 362 Stage Management II Credits: 3 (3-0-0)

Course Description: Problem-solving in the stage manager leadership role: advanced study in production realization, stage management concepts and techniques in practice.

Prerequisite: TH 262.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 363 Costume Design II Credits: 3 (1-4-0)

Course Description: An in-depth study of advanced costume design, including character development, graphic media, costume history, fabrics, fashion terms, and industry practice of the costume designer.

Prerequisite: TH 263.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 364 Lighting Design II Credits: 3 (2-2-0)

Course Description: Principles and theory for stage lighting including advanced programming, tour preparation, and presentation techniques.

Prerequisite: TH 264.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 365 Set Design II Credits: 3 (1-4-0)

Course Description: Set design for theatre, dance, opera, and production design for film. Applies visual storytelling techniques to more challenging projects, including multi-set plays, musicals, operas, ballet, production design for film, and industrial design.

Prerequisite: TH 265 with a minimum grade of C, may be taken concurrently.

Restriction: Must not be a: Freshman.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 366 Sound Design II Credits: 3 (1-4-0)

Course Description: Advanced sound design elements including live mixing, monitoring, mastering, automated dialogue replacement, recording, audio engineering, and design for live performance settings.

Prerequisite: TH 264 and TH 266.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 368 Projection Design II Credits: 3 (1-4-0)

Course Description: Advanced projection / media design techniques for live performance, concerts and events: including system design, 3D animation, virtual reality pre-visualization, and modern digital show control systems.

Prerequisite: TH 268.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 369 Makeup and Hair Design II Credits: 3 (1-4-0)

Course Description: Advanced techniques in makeup and hair design for theatre.

Prerequisite: TH 269B.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 371 Musical Theatre History and Repertory I Credits: 3 (2-4-0)

Course Description: Musical theatre and its influences from 1776-1966 in Europe and America.

Prerequisite: MU 111 and TH 140.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 372 Musical Theatre History and Repertory II Credits: 3 (1-4-0)

Course Description: Covers collaborations/solo artists shaping the last 50 years of contemporary American Musical Theater and post concept musical cabaret.

Prerequisite: TH 371.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 373 Musical Theatre Workshop--Scene to Song Credits: 3 (1-4-0)

Course Description: Study advanced elements of musical theatre performance with particular emphasis on the transition from the scripted scene into music and song.

Prerequisite: MU 472 or TH 251 or TH 372.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 375 Playwriting I Credits: 3 (1-0-2)

Course Description: Introduction to playwriting. Character, conflict, structure, setting, dialogue, and the process of rewriting, resulting in a finished 10-minute play.

Prerequisite: TH 140.

Registration Information: Must register for lecture and recitation.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 382A Study Abroad--South Africa: Performing Arts and Culture Credits: 6 (0-0-6)

Course Description: Study performing arts and culture in South Africa. Engage historic, sociopolitical, and creative contexts of artistic work. Six-week online course followed by 3 weeks in-country.

Prerequisite: None.

Restriction: Must not be a: Freshman.

Registration Information: AUCC 1C or 3B or 3C or 3D or 3E – at least 3 credits.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

TH 384 Supervised College Teaching Credits: 3 (0-0-7.5)

Course Description: Teaching assistant position. Work closely with the professor of record on pedagogy and assist in the teaching of class.

Prerequisite: TH 100 to 499 - at least 12 credits.

Registration Information: Junior standing. Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted toward graduation requirements. Completed, signed agreement approved by Director of Theatre.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 386A Theatre Practicum III: Production Crew Credit: 1 (0-0-2)

Course Description: Work on a production as production crew member. Assignments may include: wardrobe head, hair and makeup head, costume crafts person, painter dyer, assistant shop manager, assistant cutter, stitcher, scenic charge assistant, electrics team, sound engineer, etc.

Prerequisite: TH 286, may be taken concurrently.

Registration Information: Written consent of instructor. May be repeated 6 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

TH 386B Theatre Practicum III: Asst. Designer in Conceptual Design Process Credit: 1 (0-0-2)

Course Description: Practical experience as an assistant designer in a SMTD production.

Prerequisite: TH 286, may be taken concurrently.

Registration Information: Written consent of instructor. May be repeated 6 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

TH 386C Theatre Practicum III: Assistant Designer Applied Credit: 1 (0-0-2)

Course Description: Practical experience as an assistant designer in a SMTD production.

Prerequisite: TH 286, may be taken concurrently.

Registration Information: Written consent of instructor. May be repeated 6 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 392 Theatre Seminar Credits: Var[1-3] (0-0-0)

Course Description: Gain valuable theatrical knowledge on current theatre topics taught by visiting professionals or current faculty.

Prerequisite: None.

Registration Information: Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

TH 400 Theatre Practicum--Performance Credit: 1 (0-0-2)

Course Description: Major performance production assignment in acting, assistant/directing, or dramaturgy in department season.

Prerequisite: None.

Registration Information: Written consent of instructor. May be repeated 8 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 401A Theatre Design and Production Advanced Topics: Lecture Credits: 3 (3-0-0)

Course Description: Advanced topics in theatre and entertainment design and technology. Possible topics: period styles, pop culture, advanced wig and makeup design, costume crafts and dyeing, film analysis and production design, advanced drawing, animation and visual effects, among others.

Prerequisite: None.

Registration Information: Written consent of instructor. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 401B Theatre Design and Production Advanced Topics: Lecture and Lab Credits: 3 (2-4-0)

Course Description: Advanced topics in theatre and entertainment design and technology. Possible topics: period styles, pop culture, advanced wig and makeup design, costume crafts and dyeing, film analysis and production design, advanced drawing, animation and visual effects, among others.

Prerequisite: None.

Registration Information: Written consent of instructor. Must register for lecture and laboratory. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 401C Theatre Design and Production Advanced Topics: Lab Credits: 3 (0-6-0)

Course Description: Advanced topics in theatre and entertainment design and technology. Possible topics: period styles, pop culture, advanced wig and makeup design, costume crafts and dyeing, film analysis and production design, advanced drawing, animation and visual effects, among others.

Prerequisite: None.

Registration Information: Written consent of instructor. May be repeated 4 times for credit.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 450 Professional Actor Preparation Credits: 3 (1-4-0)

Course Description: Prepares actors for work after graduation. Portfolios, casting, breakdowns, reels, agents, managers, interviews, cold reading techniques, on-camera work, and marketing.

Prerequisite: TH 351 or TH 373.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

TH 451 Acting IV Credits: 3 (1-0-2)

Course Description: Alternative, experimental, and physical approaches to acting methodology, using very recent texts.

Prerequisite: TH 351.

Restriction: Must be a: Undergraduate.

Registration Information: Must register for lecture and recitation.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

TH 452 Advanced Topics in Acting--Devising Credits: 3 (1-4-0)

Course Description: Focus on alternative acting modalities (devised performance, physical theatre, memoir, adaptation, etc.). Practice different methodologies and performance styles, encounter and utilize adapted material, and gain historical, cultural and social context through research, analysis, and practical experience.

Prerequisite: TH 351.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 453 Applied Theatre in the World Credits: 3 (1-4-0)

Course Description: Artistic and activist exploration of theatre in applied settings around the world.

Prerequisite: TH 243 or TH 343.

Registration Information: Written consent of instructor. Must register for lecture and laboratory. Credit not allowed for both TH 353 and TH 453.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 455 Directing II Credits: 3 (2-4-0)

Course Description: Theatrical, practical, and creative approaches to directing a full-length play: research, analysis, semiotics, identifying visual metaphor, point of view.

Prerequisite: TH 355.

Registration Information: Written consent of instructor. Instructor permission for non-performance majors. Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 460 Design Portfolio and Professional Preparation Credits: 3 (1-4-0)

Course Description: Capstone for designers. Creating effective portfolio and design presentation; digital portfolios, articulating concepts, professional preparation for career.

Prerequisite: (TH 362 or TH 363 or TH 364 or TH 365 or TH 366 or TH 368) and (TH 386B, may be taken concurrently or TH 386C, may be taken concurrently).

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

TH 465 Dress and Decor Credits: 3 (2-2-0)

Course Description: Provides a foundation for understanding the cultural and historical influences on costume and decor. Develop the skills to research more thoroughly as designers and craftspeople working on theatrical and film productions how events in world history such as war, disease and technological innovation shaped the way people lived and dressed.

Prerequisite: TH 263, may be taken concurrently or TH 265, may be taken concurrently.

Restriction: Must not be a: Freshman.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 475 Playwriting II Credits: 3 (1-0-2)

Course Description: Development of imaginative capabilities and insights, to articulate an individual voice as a writer of longer and more complex plays for theatre.

Prerequisite: TH 375.

Registration Information: Must register for lecture and recitation.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

TH 478 Theatre in London Seminar Credits: 3 (0-0-3)

Course Description: Seminar to prepare for study in London for theatre research as an evolving art form rich in historical and artistic traditions.

Prerequisite: TH 141.

Registration Information: Must have concurrent registration in TH 479.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

TH 479 Theatre in London: Travel Abroad Credits: 3 (0-0-3)

Course Description: To foster theatre research as an evolving art form rich in historical and artistic traditions. Students will attend 13-15 live theatre productions.

Prerequisite: TH 141.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

TH 482A Study Abroad--Prague: Theatre Design, Performance, and Management Credits: 6 (0-0-6)

Course Description: Only offered once every four summers, as it is organized around the Prague Quadrennial, the most significant theatre design exposition in the world. The PQ combines exhibition of design from around the world with international performances, workshops, and collaboration. Experience traditional and avant garde performances and venues in Prague and Berlin, as well as explore the broader culture of the region and how performance and design have shaped them.

Prerequisite: TH 141.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

TH 484 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description: Advanced Teaching Assistant position. Work closely with professor of record on pedagogy and assist in teaching of class.

Prerequisite: TH 384.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Permission of instructor and completed, signed agreement approved by Director of Theatre. A maximum of 10 combined credits for all 384 and 484 courses are counted toward graduation requirements.

Grade Mode: Traditional.

Special Course Fee: No.

TH 486A Theatre Practicum IV: Lead Production/Technical Credit: 1 (0-0-4)

Course Description: Advanced topics in applied theatre production. Mainstage lead design assignment in a technical role. Address challenges in developing and mounting a theatrical performance.

Prerequisite: TH 386B or TH 386C.

Registration Information: Written consent of instructor. Repeatable up to 6 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

TH 486B Theatre Practicum IV: Lead Designer--Conceptual Credit: 1 (0-0-4)

Course Description: Advanced topics in applied theatre production. Mainstage lead design assignment in conceptual design process.

Challenges in developing and mounting a theatrical performance.

Prerequisite: TH 386B or TH 386C.

Registration Information: Written consent of instructor. Repeatable up to 6 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

TH 486C Theatre Practicum IV: Lead Designer--Applied Credit: 1 (0-0-4)

Course Description: Advanced topics in applied theatre production.

Mainstage lead design assignment in applied design process. Challenges in developing and mounting a theatrical performance.

Prerequisite: (TH 386B or TH 386C) and (TH 486B).

Registration Information: Written consent of instructor. Repeatable up to 6 times for credit.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

TH 487 Theatre Internship Credits: Var[1-12] (0-0-0)

Course Description: Advisor-approved position at a professional regional theatre, training program, summer theatre or other internship.

Prerequisite: TH 100 to 499 - at least 3 credits.

Restriction: Must not be a: Freshman.

Registration Information: Written consent of department chair. May be repeated up to 4 times for a maximum of 12 credits.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

TH 491 Repertory Theatre Workshop Credits: Var[1-18] (0-0-0)

Course Description: Principles and practice of repertory theatre operation; practical experience offered.

Prerequisite: None.

Registration Information: Audition only.

Term Offered: Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

TH 492 Advanced Theatre Seminar Credits: 3 (0-0-3)

Course Description: Gain valuable theatrical knowledge on current theatre topics taught by visiting professionals or current faculty at an advanced level.

Prerequisite: TH 392.

Registration Information: Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

TH 495 Independent Study Credits: Var[1-18] (0-0-0)

Course Description: Working independently on a topic of interest under guidance of a supervising instructor.

Prerequisite: TH 100 to 499 - at least 3 credits.

Restriction: Must not be a: Freshman.

Registration Information: Written consent of department chair. Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

TH 498 Theatre Research Credits: Var[3-6] (0-0-0)

Course Description: Scholarly research paper in theatre. Topic approved by faculty advisor.

Prerequisite: None.

Registration Information: Theatre majors only. Written consent of faculty advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

TH 499 Theatre Thesis Credits: Var[3-6] (0-0-0)

Course Description: Written thesis in theatre. Topic approved by faculty advisor.

Prerequisite: None.

Registration Information: Written consent of faculty advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Major in Dance

Office in University Center for the Arts, Room 120

Professor Emily Morgan, Director of Dance

(emily.morgan@colostate.edu)

(970) 491-5529

dance.colostate.edu (<http://dance.colostate.edu>)

At Colorado State University our dance training center is designed to prepare majors for careers in dance.

Upon academic admission to CSU and acceptance into one of the three dance degrees, students explore the many possibilities for movement expression, along with creative and scholarly examination, in a challenging and supportive environment.

In addition to regular training in classical and contemporary dance techniques provided by our dedicated faculty and professional guest artists, the curriculum requires performance, choreography, pedagogy, production, and theoretical coursework. Numerous performance opportunities, including five main stage productions each year and regular guest artist residencies and masterclasses.

Training not only hones essential life skills but lays the groundwork for advanced study in dance and opens doors to a variety of professional opportunities in dance and other educational, physical, and creative pursuits.

The challenging curriculum, combined with the inclusive and friendly setting at Colorado State's University Center for the Arts, provides the perfect canvas for students to explore, showcase, and refine their artistry and scholarship!

Students not majoring in dance are encouraged to enroll in dance technique courses, space permitting. Any student enrolled in a dance technique class can audition for a role in our dance performances. Auditions for performances are held each semester. Come join the dance community at CSU!

Majors

- Major in Dance, B.F.A.
- Major in Dance, B.F.A., Dance Education Concentration
- Major in Dance, B.A.

Focus Areas

The CSU Dance program focuses on the following areas throughout the curriculum:

- Technique, Performance, and Repertoire
- Choreography and Improvisation
- Pedagogy and Teaching Methodologies
- History and Theory
- Technical Production and Design
- Guest Artists and Masterclasses

Why Study Dance at CSU

At the heart of our educational philosophy is the idea that fundamentals propel dynamic exploration and growth. Our challenging curriculum merges career preparation with a liberal arts foundation, serving as a catalyst for shaping well-rounded individuals. With a B.A. Dance, the option to double major or minor in diverse disciplines opens doors to exciting career paths. The B.F.A. Dance prepares students for a professional dance career, and the B.F.A. Dance with a concentration in dance education prepares students to teach in PK-12 schools, private studios, and the community at large. In all degrees, students engage in experiential coursework, work in leadership roles, and benefit from live musical accompaniment in technique classes. Exceptional guest artist residencies and travel opportunities enrich the educational journey, while community partnerships underscore our commitment to engagement. Within our large institution, CSU Dance fosters a close-knit family atmosphere, providing personalized attention and a top-tier education. Taught exclusively by faculty artists, our focus on undergraduates ensures unique opportunities for student success and a supportive learning environment. The University Center for the Arts, featuring world-class facilities, complements this immersive performing arts environment, encouraging exploration, collaboration, and performance opportunities for everyone.

Dance Audition

In addition to applying to CSU through the Office of Admissions, a dance audition is required for entrance into the B.F.A., B.F.A. in Dance Education, and B.A. dance degrees. Admission to the dance major is competitive, and therefore it is important to apply early. Visit Dance Audition Information (<https://dance.colostate.edu/audition/>) for details.

Major in Dance, B.A.

The B.A. allows students to tailor their study of dance to fit their interests and is designed to prepare students for a variety of dance-related careers after college. With opportunities for scholarly and creative research, community engagement, and interdisciplinary collaboration, the degree is constructed for students wishing to major in dance and major or minor in another discipline. Technique classes in contemporary and classical forms aim to help students achieve a high level of performance and artistry. Students apply theoretical knowledge in tangible ways, such as performance of repertoire, supervised teaching opportunities, concert direction, independent projects, and choreography for concerts.

The School of Music, Theatre, and Dance is comprised of esteemed faculty and administrative and production staff, all dedicated to supporting student education in the arts.

Learning Objectives

1. Demonstrate technical and artistic competence in classical or contemporary dance performance, choreography, and teaching.
2. Create solo, group, and/or site-specific choreography utilizing established and inventive devices and movement vocabulary.
3. Develop best practices in the field and connect dance with other fields through research, writing, and/or performance.
4. Interpret and express the development and significance of dance forms across cultures.
5. Explore the multitude of ways in which community engagement is embedded in dance, embracing diversity, equity, inclusion, and leadership.

6. Experience facets of dance production and collaborate with colleagues in technical theatre to navigate the many moving parts that contribute to dance production.

Dance Audition

In addition to applying to CSU through the Office of Admissions, a dance audition is required for entrance into the B.F.A., B.F.A. in Dance Education, and B.A. dance degrees. Admission to the dance major is competitive, and therefore it is important to apply early. Visit Dance Audition Information (<https://dance.colostate.edu/audition/>) for details.

Major in Dance, B.F.A.

The Bachelor of Fine Arts (B.F.A.) is a professional education program designed to prepare students for careers in dance.

Our B.F.A. degree is a professional degree program designed to prepare students for careers in dance. Students explore the many possibilities for movement expression, along with creative and scholarly examination, in a challenging and supportive environment. The curriculum is focused on classical and contemporary dance performance, choreography, and pedagogy. This holistic approach also includes anatomy and kinesiology, music, production design, and career development. Technique classes in classical and contemporary forms are aimed at achieving an advanced level of performance and artistry. Students have multiple opportunities to apply theoretical knowledge in tangible ways, such as performance of repertoire, supervised teaching, supervised concert direction, and choreography for concerts. Beginning freshman year, students are eligible to perform in our five annually produced dance concerts.

The School of Music, Theatre, and Dance is comprised of esteemed faculty and administrative and production staff, all dedicated to supporting student education in the arts.

Learning Objectives

1. Demonstrate technical and artistic achievement in classical and contemporary dance performance, teaching, and choreography.
2. Create solo, group, and site-specific choreography utilizing established and inventive devices and movement vocabulary.
3. Apply research, assessment, critical thinking, and advocacy skills to develop best pedagogical practices as a dance teacher.
4. Interpret and perform original and historic repertoire with confidence and discuss the development and significance of dance forms across cultures.
5. Explore the multitude of ways in which community engagement is embedded in dance, embracing diversity, equity, inclusion, and leadership.
6. Experience multiple facets of dance production and collaborate with colleagues in technical theatre to successfully navigate the many moving parts that contribute to dance production.

Dance Audition

In addition to applying to CSU through the Office of Admissions, a dance audition is required for entrance into the B.F.A., B.F.A. in Dance Education, and B.A. dance degrees. Admission to the dance major is competitive, and therefore it is important to apply early. Visit Dance Audition Information (<https://dance.colostate.edu/audition/>) for details.

Requirements Effective Fall 2023

A successful audition is required prior to entrance into the B.F.A. in Dance. A minimum grade of C is required in all dance courses required for this major.

Major in Dance, B.F.A., Dance Education Concentration

Our unique B.F.A. in Dance with a concentration in dance education prepares students to teach in elementary and secondary schools, dance studios, and the community at large, with field experience in all three areas. Each of the classes in dance education involves supervised teaching and field experience, giving students extensive professional experience while in the program. Students have multiple opportunities to apply practical and theoretical knowledge in tangible ways. The degree equips students to apply for dance teaching licensure (grades P-12) in the state of Colorado in conjunction with CSU's Center for Educator Preparation (<https://www.chhs.colostate.edu/soe/center-for-educator-preparation/>). Dance students receive in-depth training in pedagogy, classical, contemporary, and urban dance techniques and performance, and choreography. This holistic approach includes anatomy and kinesiology, music for dance, production design, and career development. The program strives to center equitable teaching practices and philosophies that reflect best teaching practices. Beginning in the first year, students are eligible to perform in five annually produced dance concerts. The School of Music, Theatre, and Dance is comprised of esteemed faculty and administrative and production staff, all dedicated to supporting student education in the arts.

Learning Objectives

1. Apply research, assessment, critical thinking, and advocacy skills to develop best pedagogical practices as a dance teacher in elementary and secondary schools, dance studios, and the community at large.

2. Assess the backgrounds, abilities, developmental levels, and individual identities of students and plan curriculum that considers their physical, intellectual, social, and emotional development.
3. Explore the multitude of ways in which community engagement is embedded in dance, embracing diversity, equity, inclusion, and leadership.
4. Demonstrate technical and artistic achievement in the areas of classical, contemporary, and urban dance performance, teaching, and choreography.
5. Create solo, group, and site-specific choreography utilizing established and inventive devices and movement vocabulary.
6. Interpret and perform original and historic repertoire with confidence and discuss the development and significance of dance forms across cultures.

Dance Audition

In addition to applying to CSU through the Office of Admissions, a dance audition is required for entrance into the B.F.A., B.F.A. in Dance Education, and B.A. dance degrees. Admission to the dance major is competitive, and therefore it is important to apply early. Visit Dance Audition Information (<https://dance.colostate.edu/audition/>) for details.

Requirements Effective Fall 2023

A successful audition is required prior to entrance into the Dance Education Concentration. A minimum grade of C is required in all dance courses required for this major.

Major in Music (B.M.)

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu>)

The Bachelor of Music (B.M.) at CSU is a professional degree program, with concentrations designed to prepare students to become highly skilled music educators, music therapists, performers, and composers. Program goals encourage and develop high standards of teaching, scholarship, performance, and research in music. We are pleased to offer small academic classes, applied study with highly qualified faculty, and careful attention to advising. A successful audition is required before entrance into the Bachelor of Music (B.M.) concentrations.

Courses in music appreciation, music theory fundamentals, and ensembles are open to all students regardless of major.

Learning Objectives

1. Ability to perform music from a variety of historical/ style periods and exhibit the appropriate skills for musical self-expression in juried performances at a level appropriate for the particular concentration. These skills include technique, musicianship, tone, diction/articulation, style, interpretation, sight-reading, rhythm, and artistry.
2. Keyboard or an equivalent competency appropriate to the course of study.
3. The rudimentary capacity to create original or derivative music.

4. Understanding of the common elements and organizational patterns of music, including musical forms, processes, and structures.
5. Knowledge of music history and cultures through the present time, including study and experience of musical language and achievements that extend beyond those associated with the primary specialization.
6. Students are also expected to learn music literature from all periods through aural and score analysis. Performance skills are tested at the end of the sophomore year and in a graduation recital if required by the degree option. Some programs require satisfactory completion of supervised student teaching, an internship, or a senior project.

There are unique learning objectives for each concentration. See concentration pages for details.

Potential Occupations

The professional undergraduate music curricula at CSU can lead to personally fulfilling careers as music educators, music therapists, performers, composers, private teachers, and entrepreneurs. Music graduates from CSU have successfully gained employment in public and private schools, hospitals and institutions, and as professional performers and composers, and/or have advanced to outstanding graduate programs throughout the United States.

Concentrations and Options

- Composition Concentration
- Music Education Concentration

- Choral Option
- Instrumental Option
- Music Therapy Concentration
- Performance Concentration
 - Jazz Studies Option
 - Orchestral Instrument Option (Brass, Percussion, Strings, Woodwinds)
 - Organ Option
 - Piano Option
 - Voice Option

Music Audition

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smt@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

Music Program Fee: Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. Please visit the Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) for special course fees.

Major in Music (B.M.), Composition Concentration

The Bachelor of Music (B.M.), Composition Concentration is a professional undergraduate degree program designed to prepare students to compose original music for various genres, including symphonic works, chamber music, electronic music, and media music. Coursework emphasizes comprehensive musicianship throughout the curriculum with emphasis on individualized study in music composition.

Students receive six semesters of applied composition lessons and specialized training in arranging, orchestration, electronic music production, and music analysis. The degree culminates with a student composition recital and the completion of a senior thesis in the form of a major work for orchestra or another large ensemble.

Concentration-Level Learning Objectives

1. Compose original music in a style consistent with current trends in contemporary art music and related fields, including music for visual media.
2. Score music that is effective for the performing media employed in the student's compositions, including but not limited to solo and chamber music, music for standard large ensembles such as orchestra, chorus, and wind ensemble, and electronic/electroacoustic works.
3. Produce musical scores in keeping with current professional standards and demonstrate an understanding of traditional and contemporary notation practice.
4. Produce fully realized performances and/or recordings of original compositions for various media and/or performers.
5. Demonstrated competency using music technology including digital audio workstations, music notation software, MIDI applications, and recording/live audio hardware.
6. Demonstrate an understanding of the rights and responsibilities a composer has in the performance, publication, and distribution of his/her works including intellectual property rights for musicians.

Please review the common B.M. Program-Level Learning Objectives.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smt@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. [Please visit the](https://provost.colostate.edu/students/Office%20of%20the%20Provost%20and%20Executive%20Vice%20President%20for%20special%20course%20fees) (<https://provost.colostate.edu/students/Office of the Provost and Executive Vice President for special course fees>).

Requirements

¹ Students with previous keyboard experience may test out of MU 150 and/or MU 151B and replace with the same number of elective credit(s).

² First-year voice students take 1 semester each of MU 173 and MU 272Q and two semesters of MU 272Q in year 2. Instrumentalists take MU 272A-MU 272P or MU 272R-MU 272V on a major instrument for 2 semesters each of the first 2 years.

³ Students must participate in an ensemble during each semester in which they are enrolled in MU 172A-MU 172B or MU 272A-MU 272V. An additional four credits of ensembles are to be completed in semesters of the student's choosing for a total of eight credits. At least one

semester during the program of study, this must be achieved by taking MU 408 or another small ensemble.

⁴ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Major in Music (B.M.), Music Education Concentration

The Bachelor of Music (B.M.), Music Education Concentration is a professional degree program that prepares students for teaching choral, instrumental, and general music in elementary and secondary schools. This degree prepares students to apply for music teaching licensure (grades K-12) in the state of Colorado. CSU's outstanding music education faculty members are in demand as clinicians, guest lecturers, conductors, and researchers.

A feature unique to the accredited music education curriculum is the extensive field experience students receive throughout their coursework, culminating in a semester of student teaching at the end of the program.

Concentration-Level Learning Objectives

1. Develop and apply musical skills that can be flexibly applied and adapted to a multifaceted array of K-12 music learning contexts.
2. Develop practice-based pedagogical skills appropriate for music learning in K-12 music education contexts.
3. Apply and develop instructional acumen through practica and professional internships in K-12 contexts.
4. Understand and evaluate curricula and instructional resources appropriate for the K-12 music education context.

Please review the common B.M. Program-Level Learning Objectives.

Options

- Choral Option
- Instrumental Option

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. [Please visit the](#) Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) [for special course fees.](#)

Major in Music (B.M.), Music Education Concentration, Choral Option

Please refer to the main Bachelor of Music, Music Education Concentration page (<https://catalog.colostate.edu/general-catalog/colleges/liberal-arts/music-theatre-dance/music-bm-education-concentration/>) for the degree overview, audition link, and fee information.

Requirements Effective Fall 2022

A minimum grade of C (2.000) is required in all music courses used to satisfy the requirements of the BM in Music, Music Education Concentration, Choral Option. Required EDUC courses must be completed with a minimum grade of C (2.000).

Major in Music (B.M.), Music Therapy Concentration

The Bachelor of Music (B.M.), Music Therapy Concentration is a professional degree designed to prepare the student to take the examination of the Certification Board for Music Therapists (MT-BC). Music therapy is the clinical and evidence-based use of music to accomplish individualized goals within a therapeutic relationship. As an MT-BC, graduates may work in a variety of healthcare settings, including hospitals, clinics, rehabilitation facilities, assisted living centers, and in special education. Some music therapists maintain private practices or serve as consultants.

The undergraduate curriculum includes core music courses, music therapy methods and research courses, and general education courses. All students learn to demonstrate musicianship on several instruments including piano, guitar, and voice. Students engage with community members in a variety of service learning and clinical practicum placements, where they are supervised by board-certified music therapists. Students also complete a clinical internship at one of several approved sites, for a total of 1200 hours of clinical experience (as required by the American Music Therapy Association).

The music therapy program at CSU is internationally recognized for its leadership in clinical training and research. The music therapy area includes the Undergraduate Music Therapy Research Academy and the interdisciplinary Brainwaves Research Laboratory, where students have opportunities for hands-on involvement in music and music therapy research.

A background check is required before participating in the practicum course (MU 486A)

Music Therapy Tracks

- A Music Therapy Track **WITH** applied studio lessons on your instrument/voice. In addition to the music therapy audition, this track requires a successful audition on your instrument/voice before entrance.
- A Music Therapy Track **WITHOUT** applied studio lessons on your instrument/voice. This track does NOT require an audition on your instrument/voice before entrance. The music therapy audition is required.

Concentration-Level Learning Objectives

1. Demonstrate foundational implementation of the four music therapy methods: improvisation, composition, recreative, and receptive.

Major in Music (B.M.), Performance Concentration

The Bachelor of Music (B.M.), Performance Concentration is a professional degree that prepares students for potential professional careers in the music and creative industries as performers, entrepreneurs, and private music teachers. It also prepares students for continued study at the graduate level. The curriculum provides a solid foundation in music history, music theory, and performance, with many performance

opportunities, including large and small ensemble participation and solo recitals.

To complete the Performance Concentration, students must select one of the following options:

Options

- Jazz Studies Option
- Orchestral Instrument Option (Brass, Percussion, Strings, Woodwinds)

- Organ Option
- Piano Option
- Voice Option

Concentration-Level Learning Outcomes

1. Ability to perform music from a variety of historical/style periods and exhibit the appropriate skills for musical self-expression in juried performances. These skills include technique, musicianship, tone, diction/articulation, style, interpretation, sight-reading, rhythm, and artistry.
2. Keyboard skills.
3. The capacity to create original or derivative music.
4. Understanding of the common elements and organizational patterns of music, including musical forms, processes, and structures.
5. Knowledge of music history and repertory, including representative composers and works according to the area of specialization, as well as study and experiences with music in addition to that of the primary culture encompassing the area of specialization.
6. Students are also expected to learn music literature from all periods through aural and score analysis. Performance skills are tested at the end of the sophomore year and in a graduation recital if required by the degree option. Some programs require the satisfactory completion of supervised student teaching, an internship, or a senior project.

Please review the common B.M. Program-Level Learning Objectives.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. [Please visit the](#) Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) [for special course fees.](#)

Major in Music (B.M.), Performance Concentration, Jazz Studies Option

[Please refer to the main Major in Music \(B.M.\), Performance Concentration page for the performance concentration overview and learning objectives.](#)

Jazz Studies Option

Within the Performance Concentration, the Jazz Studies Option is a professional degree program that offers instrumental students a balanced course of study in both performance and academic classes to help them develop their skills as jazz artists and educators. Students in the degree program can study jazz history, theory, improvisation, pedagogy and composition, and arranging, in addition to taking private lessons with traditional applied faculty and jazz specialists.

The Jazz Studies Option is intended to give the student the necessary skills to pursue a career in performing jazz and other popular styles while also learning the core performance skills and musicological knowledge of a traditional Bachelor of Music in Performance degree. The degree is designed to prepare students to perform jazz at a high level in public performance and/or continue graduate work in jazz and other genres.

Ensembles in the Jazz Studies area consist of two large jazz ensembles and two smaller jazz combos. Both the ensembles and combos expose students to classic and contemporary jazz literature and styles with an emphasis on quality performance and education.

The B.M., Performance Concentration, Jazz Studies Option is available to undergraduate jazz students who play the following instruments:

- Saxophone
- Trumpet
- Trombone
- Percussion
- Piano
- Double Bass
- Guitar

Option-Level Learning Objectives

1. Ability to perform music from a variety of historical/ style periods and exhibit the appropriate skills for musical self-expression in juried performances at a level appropriate for the particular concentration. These skills include technique, musicianship, tone, diction/articulation, style, interpretation, sight-reading, rhythm, and artistry.
2. Keyboard or an equivalent competency appropriate to the course of study.
3. The capacity to create original or derivative music in the jazz idiom as an improviser and composer/arranger.
4. Understanding of the common elements and organizational patterns of music, including musical forms, processes, and structures.
5. Knowledge of music history and cultures through the present. time, including study and experience of musical language and achievements that extend beyond those associated with the primary specialization.
6. Students are also expected to learn music literature from all periods through aural and score analysis. Performance skills are tested at the end of the sophomore year and in a graduation recital if required by

the degree option. Some programs require satisfactory completion of supervised student teaching, an internship, or a senior project.

Please review the common B.M. Program-Level Learning Objectives.

Music Auditions

- Jazz Studies is currently available to students who play the following instruments only: trumpet, trombone, saxophone, piano, percussion, and double bass.
- Auditions for the jazz ensembles are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>).

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Major in Music (B.M.), Performance Concentration, Orchestral Instrument Option

[Please refer to the main Major in Music \(B.M.\), Music Performance Concentration page](#) for the performance concentration overview and learning objectives.

Students should reference the information for their instrument on the music website (<https://music.colostate.edu>) for additional details.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of

Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. [Please visit the](https://provost.colostate.edu/students/) (<https://provost.colostate.edu/students/>) [Office of the Provost and Executive Vice President for special course fees.](#)

Requirements Effective Fall 2022

A minimum grade of C (2.000) is required in all music courses used to satisfy the requirements of the BM in Music, Performance Concentration, Orchestral Instrument Option.

¹ Students with previous keyboard experience may test out of MU 150 and/or MU 151B and replace with the same number of elective credit(s).

² Major instrument. Take two semesters each during the freshman and sophomore years.

³ Students must participate in an ensemble during each semester in which they are enrolled in MU 275A-MU 275V and MU 475A-MU 475V. At least once during the program of study, this must be achieved by taking MU 408 or through another small ensemble experience.

⁴ Major instrument. Take two semesters each during the junior and senior years.

⁵ Select enough elective credits to bring the program total to 120, of which at least 42 must be upper-division (300- to 400-level).

Major in Music (B.M.), Performance Concentration, Organ Option

Please refer to the main [Bachelor of Music, Music Performance Concentration page](#) for the performance concentration overview and learning objectives.

Organ Option

Within the Performance Concentration, Organ Option students have an opportunity to perform on the world-famous Casavant organ. Since its installation in 1968, the Casavant organ has gained international fame as one of the 25 greatest organs in the world (Anton Heiller, 1968). Built in the North German tradition, CSU's Casavant is among the world's most beautifully balanced and well-voiced organs.

In addition to practice and lesson time on the Casavant, organ students, through an arrangement with local churches, have access to practice and lesson times on three other exemplary organs in Fort Collins:

- The Phelps organ at St. Luke's Episcopal Church
- The Marcussen & Son organ at First United Methodist Church
- The Allen Digital organ at the American Baptist Church.

Harpsichord students practice and take lessons on one of the department's two instruments:

Built in 2022 by Bruce Kennedy, whose workshop in Tuscany produces world-famous harpsichords, the instrument is a German double-manual

(after M. Mietke, 1702-1704), capable of playing a range of keyboard music, but especially that of J.S. Bach.

A two-manual, three-choir instrument built by Dennis Brown (1982) to the specifications of Taskin, the great French harpsichord builder to the Louis at Versailles.

Liturgical Studies is a course of study that complements the degree program of an undergraduate or graduate music student interested in church music. It is also designed to provide continuing education to professional musicians in the community. The program seeks to offer theory and history of liturgical music together with applied music lessons and practical training for church music careers.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Music Program Fee

A music program fee is assessed with undergraduate and graduate music majors and minors, per semester. The fee does not apply to the following students: online degree students, summer-only master's degree students, music therapy students in an internship off-campus, music education students who are student teaching off-campus, and music minors who are not actively enrolled in any lessons or ensembles. [Please](#)

[visit the](https://provost.colostate.edu/students/) (<https://provost.colostate.edu/students/>) [Office of the Provost and Executive Vice President for special course fees.](#)

Major in Music (B.M.), Performance Concentration, Piano Option

[Please refer to the main Major in Music \(B.M.\), Music Performance Concentration page](#) for the performance concentration overview and learning objectives.

In the Piano Option, the pursuit of excellence in musical expression, technical mastery, and artistry in performance is our primary goal. As a pianist, organist, or harpsichordist in performance, you will be guided in your study by a team of artist-teachers, performers, and internationally recognized scholars. Students cherish the high level of individual attention and focus they receive in private lessons, weekly masterclasses, departmental recitals, keyboard literature classes, liturgical music studies, or classes in chamber music, arranging, and conducting. Keyboard students also enjoy numerous performance opportunities, including collaborative experiences.

At the heart of the program is an intense love of the instrument, its touch, its vast repertoire, and its seemingly inexhaustible capacity for expression.

In the keyboard area, emphasis is placed upon the growth of the individual student, with excellence in applied instruction reinforced by practical experience in the public performance of solo, chamber, and concerto repertoire. Weekly private lessons and performance classes on Steinway grand pianos culminate in solo public recitals in the junior and senior years.

Collaborative experience is gained throughout the four years of undergraduate study through class instruction, laboratory experience in the vocal and instrumental studios, and placement on select band, orchestra, choral, and jazz repertoire. The annual Concerto Competition is an additional opportunity to appear as a soloist with a large ensemble.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smted@colostate.edu (cla_advising@colostate.edu). Upper-Division Music History 4A/4B Courses

Code	Title	AUCC	Credits
MU 332	History of Jazz	4A,4B	3
MU 334	Perspectives in Early Music History	4A,4B	3
MU 335	Music of the Common Practice Era	4A,4B	3
MU 430	20th and 21st Century Music	4A,4B	3
MU 431	American Music	4A,4B	3

¹ Take two semesters each in the freshman and sophomore years.
² Students must participate in an ensemble during each semester in which they are enrolled in MU 275I or MU 475I. At least once during the program of study, this must be achieved by taking MU 408 or through another small ensemble experience.
³ Take two semesters of a foreign language in the sophomore year.
⁴ Take two semesters each in the junior and senior years.

⁵ Select enough elective credits to bring the program total to 120, of which at least 42 must be upper-division (300- to 400-level).

Major in Music (B.M.), Performance Concentration, Voice Option

Please refer to the main [Major in Music \(B.M.\), Music Performance Concentration page](#) for the performance concentration overview and learning objectives.

Voice Option

The Bachelor of Music, Performance Concentration, Voice Option is a professional degree program that provides students with excellent opportunities for vocal, artistic and personal growth. Each member of the voice faculty provides a nurturing, yet challenging studio environment. The emphasis of process over product allows students to develop a solid platform of vocal technique for realizing their personal artistry.

All voice students study with a highly qualified and experienced faculty of professors of voice. In addition to a seminar for freshman voice majors that supports their transition to collegiate study, voice majors spend the fall semester of their first year by participating in individual lesson rotations with each of the voice faculty. In their second semester of study, voice majors are placed with a single teacher for the rest of their degree program to promote personalized and engaged care for the student throughout their study at CSU.

Voice students have the opportunity to perform in a variety of styles and formats, as soloists and ensemble members of choirs, opera and musical theater productions, and chamber music collaborations. Voice students perform a jury each semester and sing on voice area and departmental recitals throughout the year.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the B.M. concentrations. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smtm@colostate.edu (cla_advising@colostate.edu). Current CSU students need to complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. [Please visit the](https://provost.colostate.edu/students/) (<https://provost.colostate.edu/students/>) [Office of the Provost and Executive Vice President for special course fees.](#)

Requirements

Effective Fall 2022

A minimum grade of C (2.000) is required in all music courses used to satisfy the requirements of the BM in Music, Performance Concentration, Voice Option.

Major in Music (B.A.)

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu>)

The Bachelor of Arts in Music (B.A.) allows students to study music within the larger context of a liberal arts education. In comparison to the curriculum leading to the Bachelor of Music (B.M.), less emphasis is placed on studies specifically in music, with greater flexibility for studies in a field outside of the required music core curriculum. Instead of more music credits as required for the B.M., the B.A. student can choose at least 21 credits in one or more areas outside the music core. In addition, the completion of a capstone experience is required during the senior year.

The B.A. in Music provides flexibility for students wishing to double-major in music and another discipline.

B.A. in Music Tracks

- **Studio Track:** This track includes primary instrument/voice lessons. Acceptance into an applied studio (e.g. flute, violin, voice, etc.) is necessary if a student will engage in primary instrument/voice lessons for elective credits. This track requires a playing audition before entrance.
- **No Studio Track:** This track does NOT include primary instrument/voice lessons, and the degree does not require enrollment in an

applied studio. Students do not need to complete a playing audition, but an interview with music faculty is required before entrance.

Audition requirements for each track are listed below.

Learning Objectives

1. Demonstrate knowledge of diverse musical cultures, including historical eras, genres, and literature.
2. Identify and work conceptually with elements of music such as rhythm, melody, harmony, structure, timbre, and texture.
3. Analyze, research, compose, improvise, and/or perform in multiple musical styles.
4. Develop critical thinking skills and demonstrate a synthesis of knowledge and/or skills in one or more areas of music.

Music Auditions

Prospective CSU Students: In addition to applying to CSU through the Office of Admissions, students applying to the B.A. in Music are required to audition and/or interview with music faculty members. Students may elect to audition for the "Studio Track" (i.e., flute, voice, guitar, etc.) or interview for the "No Studio Track" within the degree. Students auditioning for the applied "Studio Track" must complete the performance audition for their instrument/voice. The music faculty will interview students opting for the "No Studio Track" to discuss musical experiences and long-term goals within the degree program. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must complete the audition and interview process outlined in the above paragraph for prospective students and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Join an Ensemble: Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. [Please visit the](#) Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) [for special course fees.](#)

Requirements

A minimum grade of C is required in all music courses used to satisfy the requirements of the major programs (B.A. and B.M.) in music.

Minor in Music

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu

A minor in music presents students with a liberal arts education that includes opportunities to engage in music theory, music history, and the culture of music, along with a variety of performance opportunities through ensemble play and applied lessons.

Learning Objectives

1. [Demonstrate a sense of informed musicianship.](#)
2. [Interpret music based on their knowledge of music theory and music history.](#)
3. [Develop a foundation for a lifelong appreciation of music.](#)

Track Options

- The minor in music track WITH applied instrument/voice lessons. This track requires a successful audition before entrance.
- The minor in music track WITHOUT applied studio instrument/voice lessons. This track does NOT require an audition.

Students pursuing a music minor are encouraged to work with the SMTD undergraduate coordinator for advising in the music minor to create a "track" in the music minor. Students can make choices in their lower and upper-division coursework to make the minor more academic or performance-focused.

Auditions

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Music faculty is required for entrance into the Music Minor "applied lessons" track. The academic track will not require an audition. Please visit the music website for Music Audition Information. (<https://music.colostate.edu/admissions/undergrad-apply/>)

Current CSU Students: To change your major to music, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must complete the audition process and be accepted to the School of Music, Theatre, and Dance before contacting the College of

Liberal Arts Academic Advising Center. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. Please visit the **Office of the Provost and Executive Vice President** for special course fees.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Lower Division		
Music Theory - Select at least 3 credits from the following: ¹		3
MU 111	Music Theory Fundamentals (GT-AH1)	
MU 117	Music Theory I	
History and Culture of Music - Select at least 3 credits from the following:		3
MU 131	Introduction to Music History and Literature (GT-AH1)	
MU 132	Exploring World Music	
MU 133	Survey of Jazz History (GT-AH1)	
MU 1** or 2**	Lower Division electives ²	3
Upper Division - Select at least 12 credits from the following:		
MU 3** or 4**	Upper Division Music Electives ²	12
Program Total Credits:		21

¹ Incoming students must take a Music Theory diagnostic exam to recommend either MU 111 or MU 117 as the appropriate placement in the Music Theory category

² May include ensembles or applied lessons. Lessons and some ensembles require auditions.

Master of Music, Choral Conducting Specialization

music.colostate.edu (<http://music.colostate.edu/>)

The Master of Music, Instrumental Conducting Specialization program is committed to musical excellence with a curriculum designed to build a well-rounded conductor/teacher, using the musical and personal strengths of the graduate conducting student. The degree requires a two-year residency on the CSU campus.

The specialization offers students the opportunity to conduct a range of ensembles in preparation for their career. The art of conducting is examined from the perspective of gesture and movement, score study/analysis/ear training, and rehearsal techniques and strategies.

Orchestral Conducting

The M.M., Conducting Specialization trains and prepares conductors to serve as professional and educational leaders of 21st-century orchestras. This program provides unparalleled education and hands-on experience across a variety of orchestral opportunities. Students learn by doing through substantial podium time with our concert and symphony orchestras, and opera. The program is tailored to the needs and abilities of each student in helping them to consider, shape, and achieve their unique path to the podium.

Band/Wind Conducting

For students focused on band conducting, this is a program of advanced study in repertoire and advanced wind/percussion techniques with a strong supporting program of theoretical and analytical studies. Graduate band/wind conducting students are also an integral part of the Athletic Bands Program, assisting with rehearsals and games and learning the administration of an athletic bands program.

Learning Objectives

Students will:

1. Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the conducting field.
2. Develop a method of score study to help in all educational and professional settings.
3. Develop the skills necessary to lead ensembles in their specific discipline (band or orchestra, including theatrical accompaniment) with best-practice rehearsal strategies and methodology.
4. Conduct repertoire in all three disciplines of varying difficulty levels, spanning many genres and time periods.
5. Integrate best-practice rehearsal strategies with sound conducting technique to inform instruction with conducting gestures.
6. Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in oral and written forms.
7. Develop an awareness of substantive publications in music and conducting.
8. Describe the contemporary role of programming and assessment design in the teaching-learning process.

Admission

The conducting degrees accept a limited number of students who pursue a variety of professional goals, including education and directors of instrumental ensembles. Students who are full-time music educators at the middle/high school levels are considered if they have three years prior teaching experience and are presently conducting an ensemble(s). Students who are not public-school educators must show at least three years of full-time music/conducting employment and presently conduct a high school, religious, or community ensemble.

In addition to the admissions processes for the Graduate School and the School of Music, Theatre, and Dance, a personal audition (<https://music.colostate.edu/admissions/grad-apply/>) with CSU Music faculty is required for admission into the choral graduate conducting program. Please visit the music website (<https://music.colostate.edu/admissions/grad-apply/>) for details.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website

13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Music, Collaborative Piano Specialization

No new students are being accepted to this specialization.

Requirements Effective Spring 2012

Master of Music, Music Education Specialization

music.colostate.edu (<http://music.colostate.edu/>)

The Master of Music, Music Education Specialization (M.M.) is designed for elementary and secondary music teachers who already hold a K-12 State music-teaching license. Specifically, this program is designed to inspire and develop the next generation of leaders in the field of music education by developing and applying scholarly research skills in the field of music education, the in-depth study of advanced pedagogical expertise, and the impact of contemporary learning theory on K-12 music education.

In this program, successful students will have the opportunity to gain content knowledge regarding the history and philosophy of music education, an understanding of how quantitative, qualitative, and historical music research is conducted, advanced skills in music analysis and interpretation, and a contemporary understanding of the pedagogy of music teaching and learning. Students will also have the opportunity to participate in CSU music ensembles to continue to develop as musical artists. Also, students are expected to be full-time students in residence and will most likely be given the opportunity to teach or assist with undergraduate music education coursework depending on expertise and program demands.

The degree coursework is designed to be completed over two years and includes both on-campus and online coursework. Students in this program are expected to be in residence full-time during the school year and are encouraged to take advantage of the diverse summer elective offerings.

All students in this program are strongly encouraged to undertake the Plan A Track, which involves one extra semester of coursework to write a master's thesis. The thesis distinguishes work in the program and prepares the student with the qualifications needed to pursue doctoral work in the future. Plan B Track students do not undertake a thesis.

Learning Objectives

Students will:

1. Transfer research knowledge and skills to practice-based applications in the K-12 music education context.
2. Evaluate pedagogical approaches intrinsic to a variety of music education arenas.
3. Create innovative approaches to music learning in school systems.
4. Be poised to be both highly qualified practitioners and leaders in K-12 education at the elementary and secondary levels.

5. Apply learned skills in professional K-12 music teaching settings, including age-appropriate instructional delivery, ensemble leadership, a curricular and pedagogical process, learning theory, and the impacts of assessment on student learning.
6. Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in oral and written forms.
7. Develop an awareness of substantive publications in the field of music education and the field of education as a whole.
8. Define national trends in music education that impact K-12 educational settings.
9. Describe the contemporary role curriculum and assessment design plays in the teaching-learning process.
10. Create music curriculum assessment tools designed to measure simple and complex learning in classroom and studio/applied settings.
11. Engage in informed, critical discussion regarding current standards-based frameworks in music and contemporary K-12 American education contexts.

Admission

Master of Music, Music Education—Composition Specialization

music.colostate.edu (<http://music.colostate.edu/>)

The Master of Music in Music Education, Composition Specialization is intended as a professional degree with specialized training toward composing music for educational ensembles and incorporating composition, improvisation, and music theory into K-12 music classrooms. Students enrolled in the program will produce original compositions for educational ensembles and have them performed publicly by student ensembles.

The degree option in music education with a specialization in composition is designed to provide music educators with the ability

to apply compositional and arranging skills and the pedagogy of the creative process to the classroom in K-12 settings. This provides an option for a master's degree in music education for students with an interest in composition, arranging, and the pedagogy of the creative process as opposed to the more traditional CSU graduate music education offerings of conducting, Kodály, instrumental, and choral.

Students take advanced coursework in scoring and arranging for educational ensembles, curriculum development for composition in K-12 classrooms, music theory and history, and applied composition lessons. Students in the program will have multiple opportunities to have their works performed and recorded by local student ensembles.

This hybrid program is open to students with bachelor's degrees in music education or composition and equips them to pursue a career in educational composition.

Learning Objectives

Students will:

1. Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the field of Music Education.
2. Compose original works for educational ensembles at the elementary and secondary school levels. Such ensembles include (but are not limited to) the following: choral ensembles, wind ensemble or concert bands, string orchestra, full orchestra, jazz ensembles, and chamber ensembles.
3. Arrange preexisting works from the standard repertoire for educational ensembles at the elementary and secondary school levels.
4. Design and develop curricular goals for music composition, improvisation, score analysis, and aural skills.
5. Develop and implement pedagogical strategies for incorporating music composition and related creative skills into the elementary and secondary school music classroom.
6. Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in both oral and written forms;
7. Develop an awareness of substantive publications in the field of music education and the field of education as a whole;
8. Define national trends in music education that impact K-12 educational settings;
9. Describe the contemporary role that curriculum and assessment design plays in the teaching-learning process;
10. Create music curriculum assessment tools designed to measure both simple and complex learning in both classroom and studio/applied settings;
11. Engage in informed critical discussion regarding current standards-based frameworks in music and in contemporary K-12 American education contexts.

Admission

This hybrid program is open to students with bachelor's degrees in either music education or composition. It equips students to pursue a career in the field of educational composition.

In addition to the admissions processes for the Graduate School and the School of Music, Theatre, and Dance, applicants will submit a portfolio of three original compositions with recordings, at least one of which is composed for an educational ensemble (choral, orchestral, or wind band work at an appropriate difficulty for secondary schools). Select applicants will complete an on-campus or video interview with the composition and music education faculty. Please visit the **Music website** for additional details.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination and PD)
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website

12. Report of final examination (GS Form 24) Within two working days after results are known; refer to published deadlines from the Graduate School website

13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation Refer to published deadlines from the Graduate School website.

14. Submit the thesis/dissertation electronically

Refer to published deadlines from the Graduate School website

15. Graduation

Ceremony information is available from the Graduate School website

Master of Music, Music Education—Conducting Specialization

The Master of Music, Music Education – Conducting Specialization is a CSU-exclusive online degree program (<https://www.online.colostate.edu/degrees/conducting/>). The program features an annual Summer Conducting Seminar, the residency portion of the degree, with additional courses offered online during the school year. Classes are designed for current middle school and high school choir, band, and orchestra directors who seek to further their knowledge and conducting skills while earning a master's degree, completing most of their coursework in three summers.

Students enrolled in the program will receive well-rounded experience in conducting and further specialized training for the twenty-first-century music educator.

The two-week conducting seminar (four credits each summer) includes daily conducting opportunities in all three disciplines, with a workshop orchestra, band, and choir providing further hands-on training. All participants learn to conduct in all three disciplines.

In addition, each student takes three, 3-credit academic classes (music history, analytical techniques, and music research), one 3-credit music education course (Foundations of Music Education), and three 1-credit seminars on various topics of interest to music educators. These courses are either offered on campus during the summer or online during the school year.

The complete program consists of 30 credits. A maximum of six credits of academic courses can be transferred to the student's graduate program from NASM-accredited universities, pending approval by their advisor and the Graduate School (<https://graduateschool.colostate.edu/>).

Learning Objectives

Students will:

1. Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the field of Music Education.
2. Develop a method of score study to help in all educational and professional settings.

3. Develop the skills necessary to lead ensembles in all three disciplines (band, orchestra, and choir) of all levels with best-practice rehearsal strategies and methodology.
4. Conduct repertoire in all three disciplines (band, orchestra, and choir) of varying difficulty levels, spanning many genres and time periods.
5. Integrate best-practice rehearsal strategies with sound conducting technique into the secondary school music classroom and/or community/professional ensemble, to inform instruction with conducting gestures.
6. Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in both oral and written forms.
7. Develop an awareness of substantive publications in the field of music education and the field of education as a whole.
8. Define national trends in music education that impact K-12 educational settings.
9. Describe the contemporary role that curriculum and assessment design plays in the teaching-learning process.

Admission

For information about the admissions processes to the Graduate School and School of Music, Theatre, and Dance, as well as information about the summer seminar, visit CSU Online (<https://www.online.colostate.edu/degrees/conducting/>).

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Master of Music, Music Education—Kodaly Emphasis Option

The Master of Music, Music Education Specialization - Kodály Emphasis Option is a graduate program designed for elementary classroom music teachers, independent music instructors, and secondary music teachers interested in developing their teaching, conducting, musicianship, and depth of knowledge about music education.

One unique aspect of this program is that it enables students to earn national certification in Kodály music teaching through CSU's Colorado Kodály Institute while earning a master's degree. The Colorado Kodály Institute (CKI) is one of the select programs endorsed by the Organization of American Kodály Educators (<https://www.oake.org/>). CKI faculty are among the top experts in the United States, and the University Center for the Arts location, at the foothills of the Rockies, provides an inspiring setting for personal growth.

The degree is designed to be completed over a time span of three summers with a minimum of 30 total credits (the degree is officially conferred at the end of the fall semester following the term in which all coursework has been completed), with several distance and/or evening courses required to be taken during the school year. Students have the option, therefore, of living remotely during the school year and traveling to Fort Collins for the core summer coursework. The majority of participants in this degree program teach either part or full-time during the school year, gaining relevant experience while pursuing the graduate degree. As a result, they are continually assimilating real-world teaching experiences into their academic coursework.

Graduate Music Education Degrees: General Learning Objectives

Students will:

1. Develop the ability to think abstractly, analyze complex ideas or phenomena, synthesize or generalize knowledge across disciplines and sub-disciplines, interpret and apply scholarly findings to specialized topic areas, and communicate ideas effectively in oral and written forms.
2. Develop an awareness of substantive publications in music education and the field of education.
3. Define national trends in music education that impact K-12 educational settings.
4. Describe the contemporary role of curriculum and assessment design plays in the teaching-learning process.
5. Create music curriculum assessment tools designed to measure simple and complex learning in classroom and studio/applied settings.
6. Engage in informed critical discussion regarding current standards-based frameworks in music and contemporary K-12 American education contexts.

Kodály Program-Level Learning Objectives

Students will:

1. Develop the skill, intellect, and musicianship necessary among those who wish to become the next generation of leaders in the field of Music Education.
2. Develop a philosophical and pedagogical approach to utilize in all educational settings and competency in techniques that embody the approach.
3. Develop foundational skills in advocacy and leadership for school settings.
4. Develop a method of score analysis that fosters learners' success in all educational settings.

5. Develop a concept-based collection of pedagogical repertoires that is fully analyzed, researched both musically and culturally, and organized into a practical, retrievable curriculum.
6. Develop the skills necessary to lead and conduct ensembles within K-12 schools with best-practice rehearsal strategies and methodology, including repertoire of varying difficulty levels spanning multiple genres and time periods.
7. Integrate best-practice rehearsal strategies with sound conducting technique into school music classrooms and/or community/professional ensembles.

Admission

Applicants are expected to be State-Licensed Music Teachers* and demonstrate excellent musicianship and interpersonal skills.

*Exceptions may be made by the Music Education area on a case-by-case basis. For information about the admissions processes to the Graduate School and School of Music, Theatre, and Dance, as well as information about the summer institute, **please visit our website.** (<https://music.colostate.edu/master-music-education-kodaly/>)

Master of Music, Performance Option

University Center for the Arts

(970) 491-5529

music.colostate.edu (<http://music.colostate.edu/>)

The Master of Music, Performance Option provides students with a comprehensive approach to the study and performance of literature in all styles and idioms of music. The curriculum is designed to develop musicianship, technical proficiency, and cultural awareness in both performance and pedagogy. Regardless of degree concentration, the graduate student will maintain regular study on their applied instrument or voice and additional directed areas based on individual goals and needs. Graduate students may choose to specialize in one or more areas as they work toward degree recital requirements.

The intent of the option is to prepare students with outstanding performance potential to be competitive in performance and teaching careers and to advocate for the arts in their communities. They may help meet the needs for skilled performers of solo and small and large ensemble music, and they will be able to teach in a university and help meet the considerable community demand for excellent private studio teachers.

Performance areas include woodwinds, brass, strings, percussion, harp, guitar, voice, piano, and organ. Please visit the "Areas" section of the Music website (<https://music.colostate.edu/>) for information about each studio.

Unique performance opportunities include the Graduate String Quartet/Trio program and professional organizations in Fort Collins' thriving arts community.

Learning Objectives

Students will:

1. Perform music from a variety of historical/ style periods and exhibit advanced skills for musical self-expression in juried performances. These skills include techniques, musicianship, tone, diction/ articulation, style, interpretation, and artistry.
2. Understand advanced common elements and organizational patterns of music, including a wide variety of musical forms, processes, and structures.
3. Identify music history and repertory and representative composers and works from each on a defined evaluation instrument.
4. Analyze music through tonal and post-tonal techniques.

Music Audition

In addition to applying to CSU through Graduate Admissions, a successful audition with CSU Music faculty is required for entrance into the M.M., Performance Option. Please visit the music website for Music Audition Information (<https://music.colostate.edu/admissions/undergrad-apply/>).

Bands, Orchestras, and Choirs are open to all CSU students. Ensemble audition excerpts and instructions are available at Ensemble Audition Information (<https://music.colostate.edu/auditions/>) (some ensembles do not require an audition).

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. Please visit the Office of the Provost and Executive Vice President (<https://provost.colostate.edu/student-resources/>) for special course fees.

Master of Music, Plan A, Music Therapy Specialization

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu/>)

The Master of Music, Music Therapy Specialization at CSU is intended to provide Board Certified music therapists with advanced training in clinical skills and research. Our curriculum specializes in neuroscience and evidence-based music therapy to improve sensorimotor, speech and language, and cognitive function in children and adults who have disabilities. Specifically, the study of music therapy at CSU is designed to prepare music therapists for advanced clinical work in music therapy, as music therapy supervisors and administrators and for teaching positions at the college or university level.

Two master's curriculum tracks are offered: the first is a thesis program of 30 credit hours designed to provide students with the opportunity to complete a substantial research project. The second track is a 32-hour program that requires, in lieu of a thesis, additional coursework in music therapy, a final project, and a common final exam. Either program prepares the student to pursue doctoral study. Our academic curricula are approved by both the American Music Therapy Association and the National Association of Schools of Music.

Learn to work with people who have neurological disorders such as stroke, traumatic brain injury, Alzheimer's disease, Parkinson's disease, Huntington's disease, autism, developmental disorders, and multiple sclerosis.

The Master of Music Therapy is offered on-campus (<https://music.colostate.edu/music-therapy/>) or online (<https://www.online.colostate.edu/degrees/music-therapy/>).

Learning Objectives

Students who earn the degree will demonstrate advanced learning in clinical practice, research, and teaching. Specific objectives include:

1. Identify theoretical constructs from music therapy and related fields that underlie various clinical practices.
2. Define a variety of philosophies, approaches, and/or theories in music therapy.
3. Describe research according to ethical principles in a variety of methodologies to sufficiently address meaningful research questions in music therapy.
4. Implement a diverse and equitable approach to music therapy practice.

Admission

For information about the admissions processes to the Graduate School and School of Music, Theatre, and Dance, please visit our website (<https://music.colostate.edu/music-therapy/music-therapy-masters-degrees/>).

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. Please visit the **Office of the Provost and Executive Vice President** for special course fees.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website

13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Ph.D. in Music Therapy

Office in University Center for the Arts, Room 120
(970) 491-5529
music.colostate.edu (<http://music.colostate.edu>)

The Ph.D. in Music Therapy emphasizes research and scholarship, as appropriate for the music therapist who aspires to a career in research, college-level teaching, or advanced clinical practice. In this program, you will engage in coursework that will advance your scholarship and help you to reach your professional goals. You will be involved in groundbreaking research, with the opportunity to develop original research in an interest area.

This program is offered on campus (<https://music.colostate.edu/music-therapy/music-therapy-phd/>) and as a distance learning (<https://www.online.colostate.edu/degrees/music-therapy-phd/>) program.

The degree is focused on three core areas:

- **Research Core:** You will engage in coursework and collaborative research projects focused on advancing research skills. You will also have the opportunity to pursue your own original research.
- **Music Therapy Clinical Practice Core:** You will further your understanding of advanced clinical competencies, with an emphasis in evidence-based practices.
- **Academic Core:** To prepare for a future as an educator or supervisor in music therapy, you will engage in coursework focused on teaching and learning in higher education.

Learning Objectives

Students will:

1. Identify theoretical constructs from music therapy and related fields that underlie various clinical practices.
2. Articulate and defend a personal philosophy, approach, and/or theory to music therapy, through a deeper understanding of music therapy.
3. Conduct research according to ethical principles in a variety of methodologies to sufficiently address meaningful research questions in music therapy.
4. Use various teaching methods to explain the breadth and depth of knowledge of clinical practice in music therapy.

Credit Requirements

The Ph.D. in Music Therapy is comprised of 72 credits, of which 30 credits may be accepted from a prior master's degree. Program credits include:

- 12-15 credits in each core area (research, clinical practice, academic) that are selected to prepare the student for future work in an academic, research, or advanced clinical position.
- 15 directed electives, which are selected with the graduate committee to best meet the student's needs and career goals. Subjects of study may include, but are not limited to, neuroscience, music therapy methods, research methods, statistics, teaching methods, and developmental science.
- The program culminates with a final exam and the completion of a substantial piece of original research.

Visit our website (<https://music.colostate.edu/music-therapy/music-therapy-phd/>) for information about research opportunities, eligibility, and teaching assistantships.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Music Program Fee

A music program fee is assessed with Undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students. Please visit the **Office of the Provost and Executive Vice President** for special course fees.

Program Total Credits:		72

- A minimum of 72 credits are required to complete this program.
- ¹ MU 792 may be taken more than once for elective credits.
- ² Variable credits per semester may be taken in order to add up to 15 total credits.
- ³ Student may apply an earned Master's degree for up to 30 credits toward the PhD requirements.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Major in Theatre

University Center for the Arts, Office 120
 Dr. Megan Lewis, Director (megan.lewis)
theatre.colostate.edu (<http://theatre.colostate.edu>)

Creative life training for the undergraduate by experienced professionals.

As educators and mentors, we share our industry expertise as we model the creative, collaborative, imaginative, and technical power of the theatrical arts. CSU Theatre offers concentrations in performance, musical theatre, and a range of design and technology areas.

At CSU, our dedicated faculty, staff, and professional guest artists – with extensive experience on stages worldwide, including Broadway and regional theatres – provide students with a seasoned perspective to delve into every facet of theatre, including theory and practice of acting and directing, musical theatre, theatre history, dramaturgy, playwriting, theatrical design and technical theatre, stage management, and storytelling/devising.

Upon academic admission to CSU and acceptance into one of the Bachelor of Arts in Theatre concentrations, students receive foundational skills and immersive experiences in theatre within a liberal arts framework. This not only hones essential life skills but also lays the groundwork for advanced study in theatre and opens doors to a variety of potential employment opportunities in fields related to theatre, film, and other creative pursuits.

At CSU, we believe that artistic excellence occurs when talent is nurtured within a supportive community and inviting atmosphere that values collaboration, creative vision, and problem-solving, alongside fostering individual responsibility, determination, and growth.

Concentrations:

- Musical Theatre Concentration
- Performance Concentration
- Costume Design and Technology Concentration
- Lighting Design and Technology Concentration
- Projection Design and Technology Concentration
- Set Design Concentration
- Sound Design and Technology Concentration

Learning Objectives:

No matter which concentration you choose, the B.A. in Theatre program features the following learning objections:

1. **IMAGINATION AND EXPRESSION:** Cultivate and articulate a unique vision, focus, and craft as an artist. Sharpen written, verbal, visual/design, embodied and intellectual analysis, storytelling, and expression of creative ideas.
2. **CONTEXT AND SOCIAL RESPONSIBILITY:** Understand texts within their contexts, our place in history as contemporary artists, the potential of art for social transformation, and ourselves as global citizens.
3. **COLLABORATION AND PROFESSIONALISM:** Develop a holistic understanding of the theatre-making process and industry protocols through hands-on practice, telling compelling, relevant stories through the united labor of our distinct areas of expertise. Conduct ourselves professionally in attitude, approach, and vision to prepare for life after CSU.
4. **CREATIVE PROBLEM-SOLVING:** Solve abstract and material problems, draw on various resources, strategies, and skills, and embrace creative risk-taking.

In addition, each theatre concentration has two learning outcomes unique to that subject.

Comprehensive training occurs in classrooms, labs, shops, rehearsal studios, and in annual productions of plays, musicals, operas, dance concerts, and special events, produced by a company of student actors, directors, designers, and technicians under the mentorship of our professional faculty and staff. These outstanding artists and technicians

offer individualized teaching, advising, and small class sizes, providing students with hands-on learning opportunities from their first day on campus.

Audition or Interview for CSU Theatre

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Theatre faculty is required to enter the Performance and Musical Theatre Concentrations. A successful interview with CSU Theatre faculty is required to enter the Theatre Design and Technology Concentrations. Please visit our Auditions and Interviews (<https://theatre.colostate.edu/auditions-portfolio-reviews/>) web page for more information.

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for Theatre Audition and Interview Information. (<https://theatre.colostate.edu/auditions-portfolio-reviews/>)

Major in Theatre, Costume Design and Technology Concentration

The Costume Design and Technology Concentration provides opportunities for students to develop their unique artistic visions as costume, makeup, and hair designers and technicians. It offers students practice in the research, technical, and conceptual skills necessary to design and build costumes for the stage, dance, or film, including vocabulary and best practices, the universal language of clothes, primary research, and diverse aesthetic styles to build characters. Students develop an understanding of the costume designer and technician-artisan as a collaborative artist, craftsperson, and creative visionary.

Concentration-Level Learning Objectives:

In addition to four B.A. in Theatre Learning Objectives, the Costume Design and Technology Concentration includes the following unique learning objectives:

- 1. COSTUME DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY:** Explore the specific techniques that costume, hair, and makeup designers and technicians use to develop and communicate their ideas through research, synthesis of skills including drawing, painting, mockups, and application of emerging technologies. From realized works on mainstage shows, understand how the costume, hair, and makeup designer supports, collaborates, and interacts with the creative team.
- 2. DESIGN ARTISTRY:** Develop an understanding of the Costume Designer as a collaborative artist, creative visionary, and craftsperson by practicing organizational, design, and craft skills to realize a show from concept to production, and building a portfolio of creative design and/or technical work.

Interview for Costume Design and Technology:

In addition to applying to CSU through the Office of Admissions, a successful interview with CSU Theatre faculty is required to enter the Theatre Design and Technology Concentrations. Please visit the theatre website for interview information. (<https://theatre.colostate.edu/auditions-portfolio-reviews/>)

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for interview information (<https://theatre.colostate.edu/auditions-portfolio-reviews/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Requirements Effective Fall 2023

Students in this concentration must satisfactorily undergo a portfolio review each spring, where their work will be celebrated and examined to provide guidance for goals for the following year. Concentration specific courses may not double-count in multiple Theatre concentrations.

Major in Theatre, Lighting Design and Technology Concentration

In the B.A. in Theatre, Lighting Design and Technology Concentration, students express their creativity and artistry as they learn how to be lighting designers, engineers, and technicians for stage, television, live productions, and film. In addition to a robust curriculum of lighting design, students are required to explore other fields of design (such as projection design, sound design, costume design, or set design) to better understand the collaborative effort of creating a world onstage. Students also take practicum classes where they put the skills learned in design courses to use, working on departmental productions and/or live events design teams.

Concentration-Level Learning Objectives:

In addition to four B.A. in Theatre Learning Objectives, the Lighting Design and Technology Concentration includes the following unique learning objectives:

1. **LIGHTING DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY:** Explore the specific techniques that lighting designers use to develop and communicate their ideas through research, synthesis of skills including drafting, computerized/virtual reality pre-visualization, automated lighting programming, and application of emerging technologies with a robust understanding of how the lighting designer supports, collaborates, and interacts with the creative team.
2. **DESIGN ARTISTRY:** Develop an understanding of the Lighting Designer as a collaborative artist, creative visionary, and technician, and by practicing organizational, design, and technical skills to

realize a show from concept to production and building a portfolio of creative design and/or technical work.

Lighting design and technology offers students several ways to express their creativity and artistry:

- Lighting designers for theatre, musicals, opera, or dance
- Lighting engineers for stage, television, and film
- Lighting technicians for stage, dance, live productions, television, and film

Interview for Lighting Design and Technology:

In addition to applying to CSU through the Office of Admissions, a successful interview with CSU Theatre faculty is required to enter the Theatre Design and Technology Concentrations. Please visit the theatre website for interview information. (<https://theatre.colostate.edu/auditions-portfolio-reviews/>)

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for interview information (<https://theatre.colostate.edu/auditions-portfolio-reviews/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Major in Theatre, Musical Theatre Concentration

Students in the B.A. in Theatre, Musical Theatre Concentration practice incremental techniques and skills necessary for musical theatre – including singing, dancing, and acting – and musical theatre history, theory, and repertoire. Students train to analyze and perform contemporary and classical scripts as actors, to effectively deliver highly physical staging or dance, and to practice healthy habits that support a lifetime of vocal production for the stage, screen, and/or recording. As informed collaborators, students contribute to the creation, rehearsal, development, and future of musical theatre performance.

Concentration-Level Learning Objectives

In addition to four B.A. in Theatre Learning Objectives, the Musical Theatre Concentration includes the following unique learning objectives:

1. **MUSICAL THEATRE IN PERFORMANCE:** Develop a unique artistic vision by practicing incremental techniques and skills necessary to perform in the discipline of musical theatre, including singing, dancing, and acting.
2. **MUSICAL THEATRE ARTISTRY:** Develop an understanding of the musical theatre performer as a collaborative artist, and creative visionary, and explore the discipline of musical theatre as an art form, its history, repertory, conventions, and etiquette.

CSU Theatre produces one full-scale musical each season.

Musical Theatre Concentration Audition:

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Theatre faculty is required to enter the Performance and Musical Theatre Concentrations. Please visit our Auditions and Interviews (<https://theatre.colostate.edu/auditions-portfolio-reviews/>) web page for more information.

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must complete the audition and portfolio review process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for Theatre Auditions and

Interviews (<https://theatre.colostate.edu/auditions-portfolio-reviews/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Musical Theatre Program Fee

A program fee is assessed with undergraduate and graduate music and musical theatre majors and music minors, per semester. Does not apply to the following students: online degree students and summers-only master's degree students.. [Please visit the](https://provost.colostate.edu/students/) (<https://provost.colostate.edu/students/>) [Office of the Provost and Executive Vice President](https://provost.colostate.edu/students/) website [for special course fees.](https://provost.colostate.edu/students/)

Major in Theatre, Performance Concentration

The B.A. in Theatre, Performance Concentration is designed to offer extensive opportunities in both the study and practice of theatrical performance. The concentration features foundational to advanced courses in multiple acting styles, approaches to acting, and entry points for the experience and vocabulary of performance. The concentration teaches Western “inside-out” approaches (i.e., Stanislavski, Meisner) based in the vocabulary of action, objective, and tactic, as well as “outside-in” approaches (i.e., Suzuki, clown, Commedia) based in character creation through the study of the voice and body.

Concentration-Level Learning Objectives:

In addition to four B.A. in Theatre Learning Objectives, the Performance Concentration includes the following unique learning objectives:

1. **PERFORMANCE IN THEATRE:** Develop a unique artistic vision by practicing incremental techniques and skills necessary to perform for the stage, including personal experience as a basis for storytelling; western “inside-out” approaches based in the vocabulary of action, objective, and tactic, as well as movement based “outside-in” approaches based in the voice and body; and devising techniques, including memoir, adaptation, and physical theatre.
2. **PERFORMANCE ARTISTRY:** Develop an understanding of the performer as a collaborative artist, and creative visionary, as well

as cultivate cross-disciplinary skills in directing, playwriting, global theatre traditions, musical theatre, and/or theatre for social change to expand sophistication in performance.

Performance Concentration Audition:

In addition to applying to CSU through the Office of Admissions, a successful audition with CSU Theatre faculty is required to enter the Performance and Musical Theatre Concentrations. Please visit our Auditions and Interviews (<https://theatre.colostate.edu/auditions-portfolio-reviews/>) web page for more information.

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must complete the audition and portfolio review process and be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for Theatre Auditions and Interviews (<https://theatre.colostate.edu/auditions-portfolio-reviews/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Major in Theatre, Projection Design and Technology Concentration

In the B.A. in Theatre, Projection Design and Technology Concentration, students express their creativity and artistry as they learn how to be projection designers, video engineers, and video mixers for stage, television, live productions, and film. In addition to coursework in projection design, students are required to explore other design fields/ concentrations (such as sound design, lighting design, costume design, or set design) to better understand the collaborative effort of creating a world onstage. Students also take practicum classes where they put the skills learned in design courses to use, working on departmental productions and/or live events design teams.

Concentration-Level Learning Objectives:

In addition to four B.A. in Theatre Learning Objectives, the Projection Design and Technology Concentration includes the following unique learning objectives:

- 1. PROJECTION DESIGN and TECHNOLOGY FOR THEATRE, FILM, and INDUSTRY:** Explore the specific techniques that projection designers use to develop and communicate their ideas through research, synthesis of skills including drafting, computerized/virtual reality pre-visualization, content creation, video programming, and application of emerging technologies with a robust understanding of how the projection designer supports, collaborates, and interacts with the creative team.
- 2. DESIGN ARTISTRY:** Develop an understanding of the Projection Designer as a collaborative artist, creative visionary, and technician, by practicing organizational, design, and technical skills to realize a

show from concept to production and building a portfolio of creative design and/or technical work.

Projection design and technology offers students several ways to express their creativity and artistry:

- Projection designers for theatre, musicals, live events, opera, or dance
- Video engineers for stage, television, and film
- Video mixers for stage, dance, live productions, television, and film

Interview for Projection Design and Technology:

In addition to applying to CSU through the Office of Admissions, a successful interview with CSU Theatre faculty is required to enter the Theatre Design and Technology Concentrations. Please visit the theatre website for interview information. (<https://theatre.colostate.edu/auditions-portfolio-reviews/>)

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for interview information (<https://theatre.colostate.edu/auditions-portfolio-reviews/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Major in Theatre, Set Design Concentration

Students in the B.A. in Theatre, Set Design Concentration explore creative concepts of set design for theatre, musicals, opera, dance, and industry, as well as production design and art direction for film and television, on a theoretical level in the classroom and studio while reinforcing their training through practical application in main stage productions of music, theatre, and dance. In addition to their coursework, undergraduate students will first work as assistants and then step into leadership roles as designers as they travel through the program.

Concentration-Level Learning Objectives:

In addition to four B.A. in Theatre Learning Objectives, the Set Design Concentration includes the following unique learning objectives:

1. **SET DESIGN FOR THEATRE, FILM, and INDUSTRY:** Explore incremental to advanced skills that set designers and craftspeople use to design and build sets and scenery for the stage, dance, film, or industry, including primary research, vocabulary and best practices, diverse aesthetic styles, and synthesis of skills including design, drafting, modeling, painting, computer-assisted design, and application of emerging technologies.
2. **DESIGN ARTISTRY:** Develop an understanding of the Set Designer as a collaborative artist, and creative visionary, by practicing organizational, craft, and creative skills to realize a show from concept to production and building a portfolio of creative design and/or technical work.

Set Design offers students several ways to express their creativity and artistry:

- Set designers for theatre, musicals, opera, or dance
- Set technicians and craftspeople for stage, dance, live productions, television, and film

Interview for Set Design:

In addition to applying to CSU through the Office of Admissions, a successful interview with CSU Theatre faculty is required to enter the Theatre Design and Technology Concentrations. Please visit the theatre website for interview information. (<https://theatre.colostate.edu/auditions-portfolio-reviews/>)

Current CSU Students: To change your major to theatre, you may call the School of Music, Theatre, and Dance at (970) 491-5891 or email smttd@colostate.edu (cla_advising@colostate.edu). Current CSU students must be accepted to the School of Music, Theatre, and Dance before contacting the College of Liberal Arts Academic Advising Center. Please visit the theatre website for interview information (<https://theatre.colostate.edu/auditions-portfolio-reviews/>). (<https://music.colostate.edu/admissions/undergrad-apply/>)

Requirements Effective Fall 2023

Students in this concentration must satisfactorily undergo a portfolio review each spring, where their work will be celebrated and examined to provide guidance for goals for the following year. Concentration specific courses may not double-count in multiple Theatre concentrations.

Social Inequality, Social Justice & Governance
Environment & Natural Resources
Food, Agriculture & Development
Crime, Law & Deviance

"Specialty and interdisciplinary experiences and mentorship in CSU's Sociology graduate program have been my springboard into amazing opportunities." – Michelle '13

Graduate Programs in Sociology

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Sociology. (<https://sociology.colostate.edu/graduate/>)

Master's Programs

- Master of Arts in Sociology, Plan A* (research track)
- Master of Arts in Sociology, Plan B* (professional track)

Ph.D.

- Ph.D. in Sociology*

*Please see the department (<https://sociology.colostate.edu/graduate/>) for the program of study.

Sociology at CSU offers graduate students unique opportunities for:

- A professional, supportive environment with open-door access to world-renowned faculty at a Tier 1 land grant research institution.
- Faculty-student collaboration on theoretical, applied and policy research at local, national and international levels.
- The development of research and data analytic skills necessary to explore complex issues from multiple angles and opportunities to hone these skills by working closely with talented and committed faculty members.
- An interdisciplinary community of faculty and graduate students across the university with whom to exchange ideas and learn.
- Financial support, available on a competitive basis, as Graduate Teaching Assistants (GTAs) and Graduate Research Assistants (GRAs) on faculty research projects.
- A beautiful and sustainability-minded environment in which to live and work.

As students develop professional skills to be competitive in academic, public, and private sector job markets, they also acquire:

- Rigorous, scholarly yet practical training.
- Expertise in specialized areas including environment and natural resources, food, agriculture and development, criminology and

deviance, community, environmental governance, fair trade, and race-ethnicity and gender.

- High competence in social theory, research methodology and quantitative and qualitative data analysis.
- Ability to collaborate creatively and effectively within Sociology and interdisciplinary complex social and environmental problems.
- Our faculty members carry out theoretical, applied and policy research nationally and internationally on the causes and consequences of social change on individuals, communities and nations of the world. Most of our faculty do research, outreach and engagement in two or more of the four areas above, a unique strength of our program that prepares our graduates to make rigorous but flexible contributions as professional sociologists.

Courses Sociology (SOC)

Please note that courses listed in this catalog are not necessarily available EVERY semester that is noted in "Term Offered." Specific courses you may be hoping to take specific semesters may not be available that academic year. Please discuss all course options with your Academic Success Coordinator or Advisor on a semester-by-semester basis.

SOC 100 Introduction to Sociology (GT-SS3) Credits: 3 (3-0-0)

Course Description: Introduces a way of viewing interactions, relationships, and social phenomena that mold everyday experiences. Examines how social structures shape interactions, and how society constructs social categories and meanings.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

SOC 105 Social Problems (GT-SS3) Credits: 3 (3-0-0)

Course Description: Examines social problems related to differences in power and privilege. Investigates how social problems emerge and the people and communities they harm. Considers how people contest social problems and develop and implement solutions.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

SOC 205 Sociology of Race and Racism (GT-SS3) Credits: 3 (3-0-0)

Course Description: Introduction to major theories and research in the sociology of race and racism. Examines historical and contemporary racial inequalities, with a focus on systemic and structural racism.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Diversity, Equity, & Inclusion 1C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

SOC 210 The Power of Numbers--Statistics in Sociology Credits: 3 (3-0-0)

Course Description: Provides tools to think quantitatively about the social world and critically consume statistics encountered in everyday life. Covers the logic of statistical inference and how to perform quantitative analyses.

Prerequisite: MATH 100 to 199 - at least 1 credit.

Registration Information: Completion of AUCC Category 1B or at least 1 credit MATH.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 220 Environment, Food, and Social Justice (GT-SS3) Credits: 3 (3-0-0)

Course Description: Introduces the social causes and consequences of contemporary environmental issues. Critically analyzes social structures such as capitalism, beliefs and cultural norms, and social inequalities in relation to food and the environment.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Diversity, Equity, & Inclusion 1C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

SOC 253 Intro to Criminology and Criminal Justice Credits: 3 (3-0-0)

Course Description: Introduces central mechanism of formal social control in the United States: the criminal justice system. Uses a sociological lens to critically assess its goals, organizational components, and attempts to achieve justice.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 270 Social Production of Reality (GT-SS3) Credits: 3 (3-0-0)

Course Description: Explores how humans shape and are shaped by society. Examines how communication, interactions, and perceptions of society shape identities, attitudes, small groups, and collective behavior.

Prerequisite: None.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

SOC 271 Body and Society (GT-SS3) Credits: 3 (3-0-0)

Course Description: Examines the body by focusing on its relationship with society. Explores the role of social structures and social norms on how physiques and figures fit or don't fit into broader expectations. Ties the social context to embodied self-perceptions and experiences.

Prerequisite: None.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

SOC 275 Introduction to Forensic Anthropology Credits: 3 (3-0-0)

Also Offered As: ANTH 275.

Course Description: Forensic anthropological theory and methods including estimation of age-at-death, sex, stature, ancestry, and trauma analysis.

Prerequisite: None.

Registration Information: Credit not allowed for both ANTH 275 and SOC 275. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

SOC 301 Development of Sociological Thought Credits: 3 (3-0-0)

Course Description: Central themes in sociological thought from Enlightenment to present.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 302 Contemporary Sociological Theory Credits: 3 (3-0-0)

Course Description: Explores contemporary social theorists and theoretical schools with a focus on including historically marginalized voices, such as women and people of color. Addresses new theoretical questions, debates, and solutions to confront today's complex social problems.

Prerequisite: SOC 100 or SOC 105.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 311 Sociological Research Methods Credits: 3 (3-0-0)

Course Description: Covers methods sociologists use to conduct empirically grounded and theoretically engaged research. Examines research design, the role of theory, ethics, and multiple methods for gathering data.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 314 Applications of Quantitative Research Credits: 3 (3-0-0)

Course Description: Covers quantitative data acquisition, cleaning, management and analysis. Introduces an analytical software package to clean, merge, and manage data. Provides tools to perform quantitative analyses and present results using tables and figures.

Prerequisite: (SOC 210 or STAT 200 to 499) and (SOC 311, may be taken concurrently).

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 315 Applications of Qualitative Research Credits: 3 (3-0-0)

Course Description: Covers qualitative research practices, including in-depth interviewing, focus group interviews, content analysis, and participant observation. Provides tools to code and analyze data as well as various ways to present results.

Prerequisite: SOC 311, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 320 Population-Natural Resources and Environment Credits: 3 (3-0-0)

Course Description: Population studies; world growth patterns and their relationship to natural resources and environment.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 322 Environmental Justice Credits: 3 (3-0-0)

Course Description: Examines inequitable exposure to degraded environments and access to healthy and clean places and amenities in the United States and globally. Explores the structural forces leading to environmental disparities and how environmental justice movements and activists organize for change.

Prerequisite: SOC 100 or SOC 105.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 323 Soc. of Environmental Cooperation & Conflict Credits: 3 (3-0-0)

Course Description: Roles of government and civil society in creating environmental problems and in developing effective responses to those problems.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 324 Food Justice Credits: 3 (3-0-0)

Course Description: Investigates the institutional drivers and social experiences of inequities in the food system. Examines how the food justice movement responds by organizing for grassroots, community, and global, as well as cultural, economic, and political change.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 330 Social Inequality Credits: 3 (3-0-0)

Course Description: Explores patterns in, and theories of, social inequality in the United States and internationally.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 332 Comparative Majority-Minority Relations Credits: 3 (3-0-0)

Course Description: Discrimination, ideology, power, policy issues in the U.S. and selected societies; application of basic concepts in student's self appraisal.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 333 Gender and Society Credits: 3 (3-0-0)

Course Description: Analysis of social organization of gender in contemporary society, emphasizing gendered experiences and institutional linkages.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 334 Sociology of Intersectionality Credits: 3 (3-0-0)

Course Description: Examines the intersections of socially constructed identities like race, class, gender, and sexuality. Delves into how and why the theory of intersectionality emerged. Explores sociological research on daily lived experiences, inequalities, and social change through this critical framework.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 340 Bureaucracy and Modern Organizations Credits: 3 (3-0-0)

Course Description: Structure and function of large-scale organization; coordination of activities between organizations and society.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 341 Sociology of Rural Life Credits: 3 (3-0-0)

Course Description: Rural life in U.S. and third world societies; analysis of sociocultural systems, social differentiation, social institutions, and problems of social change.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 342 Work and Leisure in Society Credits: 3 (3-0-0)

Course Description: Considers the interrelationship between work and leisure in modern life. Explores how technological change produces shifts in the organization of work and how growing inequality affects our ability to leisure.

Prerequisite: SOC 100 or SOC 105.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 343 Sport and Society Credits: 3 (3-0-0)

Course Description: Analysis of sports as social phenomena with a focus on the social implications of sports in everyday life.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 344 Health, Medicine, and Society Credits: 3 (3-0-0)

Course Description: Examines how race, gender, and social class influence determinants of health and access to care. Discusses the rising cost of health care, the power of the pharmaceutical industry, the medicalization of illness, and new emerging biomedical technologies.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 351 Corporate and State Crime Credits: 3 (3-0-0)

Course Description: A comprehensive exploration of the nature, causes, and control of corporate, state, and state-corporate crime. Examples of environmental crime, financial crime, corruption, and war crime.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 352 Criminology Credits: 3 (3-0-0)

Course Description: Examines historical and contemporary sociological theories of crime in contemporary society. Discusses the implications of these explanations for criminal justice policy, prevention of crime, and notions of justice, including with respect to race/ethnicity, class, and gender.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 353 Criminal Investigations Credits: 3 (3-0-0)

Course Description: Introduction to criminal investigational procedures police use after a crime has occurred. Consider the strengths and limitations of these methods as a critical facet of the criminal processing system.

Prerequisite: SOC 100 or SOC 105.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 354 Policing and Society Credits: 3 (3-0-0)

Course Description: Provides a comprehensive introduction to policing through an overview of its historical context and development as a profession in the United States. Examines policing as an institution within the criminal justice system as well as an action – something that police officers and organizations do. Explores challenges developing a mutually beneficial relationship between police and the communities where policework takes place.

Prerequisite: (SOC 100 or SOC 105) and (SOC 253).

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 356 Inequality in Criminal Sentencing Credits: 3 (3-0-0)

Course Description: Examines the structure and process involved in the prosecution, adjudication, and sentencing of criminal defendants, and how that structure and process can produce disparities in criminal justice outcomes.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 357 Women, Crime, and Victimization Credits: 3 (3-0-0)

Course Description: Examines sociological research, policy, and programming that addresses women's and girls' experiences with crime, victimization, and the criminal processing system more broadly.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online. Credit not allowed for SOC 357 and SOC 450.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 358 Punishment and Society Credits: 3 (3-0-0)

Course Description: Sociological examination of the forms and functions of punishment and the intended and unintended consequences of punishment policy.

Prerequisite: (SOC 100 or SOC 105) and (SOC 253).

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 359 Green Criminology Credits: 3 (3-0-0)

Course Description: Environmental offenses, victims, and responses to environmental crimes and harms.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 360 Political Sociology Credits: 3 (3-0-0)

Course Description: Analysis of power as a sociological concept, emphasizing competing theories of the state and power.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 362 Social Change Credits: 3 (3-0-0)

Course Description: Sources of stability and stress in changing societies, consequences of planned and unplanned change; future trends.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 364 Food, Agriculture and Global Society Credits: 3 (3-0-0)

Course Description: Analyzes relationships between global food and agricultural systems and social change. Identifies key policy debates and choices, economic systems, and the role of civil society regarding how we produce, distribute, and consume food.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 372 Sociology of Deviance Credits: 3 (3-0-0)

Course Description: Description, comparison, and analysis of theories and research of deviance.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 373 Visual Sociology Credits: 3 (3-0-0)

Course Description: Blends theory, methods, and practice to examine the role of images in sociological inquiry. Applies sociological principles to understand photographs and the role of the photographer, with a focus on the intended audience, and their role in society at large.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 374 Social Movements Credits: 3 (3-0-0)

Course Description: Investigate past and present social movements to understand their significance as key drivers of history and social change. Examines the causes, structure, culture, and outcomes of social movements to evaluate the power of mass mobilizations outside mainstream institutions.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Credit not allowed for both SOC 374 and SOC 474.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 375 Sociology of Religion Credits: 3 (3-0-0)

Course Description: Descriptions and analyses of the roles and relationships of religion as a modern social institution.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 403 Capstone Seminar Credits: 3 (0-0-3)

Course Description: Student demonstration of central concepts and procedures currently employed in sociology discipline.

Prerequisite: (SOC 210 or STAT 200 to 499 - at least 3 credits) and (SOC 301 or SOC 302) and (SOC 311) and (SOC 314 or SOC 315).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 422 Comparative Legal Systems Credits: 3 (3-0-0)

Also Offered As: ANTH 422.

Course Description: Traditional approaches to law, competing concepts of law in the global system, and experiences of minorities in state legal systems.

Prerequisite: ANTH 100 or SOC 100.

Registration Information: Credit not allowed for both SOC 422 and ANTH 422.

Term Offered: Spring (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

SOC 431 Community Dynamics and Development Credits: 4 (3-2-0)

Course Description: Nature of community; its institutions, problems and processes, including growth, disintegration, and development.

Prerequisite: (SOC 100 or SOC 105) and (SOC 311).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 444 Federal Indian Law and Policy Credits: 3 (3-0-0)

Also Offered As: ETST 444.

Course Description: Indian policy processes and their impact on Native lives and culture, particularly Native sovereignty.

Prerequisite: None.

Registration Information: Credit not allowed for both ETST 444 and SOC 444.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 455 Sociology of Law Credits: 3 (3-0-0)

Course Description: Investigates how social forces create laws and how they are enforced in society.

Prerequisite: (SOC 100 or SOC 105) and (SOC 253).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 460 Environmental and Natural Resource Sociology Credits: 3 (3-0-0)

Course Description: Investigates vital questions about the relationships between human societies and biophysical systems. Examines topics such as global climate change, biodiversity loss, and industrial contamination. Considers why building better political and economic systems is critical to solving such multi-scalar environmental problems.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 461 Water and Social Justice Credits: 3 (3-0-0)

Course Description: Analyzes how human societies interact with and depend upon water with attention to institutions and inequalities. Examines various power dynamics of water access, control, rights, and management, and sustainable and just solutions to complex water problems.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 462 Applied Social Change Credits: 3 (3-0-0)

Course Description: Applied sociology with a focus on research and practice designed to foster social change.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 463 Sociology of Disaster Credits: 3 (3-0-0)

Course Description: Determinants and consequences of behavior and response to environmental extremes including floods, earthquakes, wind, severe storms, and technological emergencies.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 482A Travel Abroad: Comparative Criminal Justice Credits: 3 (0-0-3)

Course Description: International and comparative issues in sociology.

Prerequisite: SOC 482B, may be taken concurrently.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 482B Travel Abroad: Crime and Deviance Credits: 3 (0-0-3)

Course Description: International and comparative issues in sociology.

Prerequisite: SOC 482A, may be taken concurrently.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 487 Internship Credits: 3 (0-0-9)

Course Description: Academic-based work experience with selected organizations or agencies. Supervised application of sociological principles.

Prerequisite: (SOC 210 or STAT 200 to 499) and (SOC 301 or SOC 302) and (SOC 311) and (SOC 314 or SOC 315 or CS 110).

Registration Information: Must have concurrent registration in SOC 492.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

SOC 492 Seminar Credit: 1 (0-0-1)

Course Description: Provides a structured academic environment to examine work experience gained in the concurrent internship. Integrates sociological tools learned during academic program in an applied setting.

Prerequisite: (SOC 210 or STAT 200 to 499) and (SOC 301 or SOC 302) and (SOC 311) and (SOC 314 or SOC 315 or CS 110).

Registration Information: Must have concurrent registration in SOC 487.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

SOC 495 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

SOC 500 The Sociological Profession I Credit: 1 (1-0-0)

Course Description: Examination of issues and values affecting sociology as a profession.

Prerequisite: SOC 100 to 481 - at least 15 credits.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 501 The Sociological Profession II Credits: 3 (3-0-0)

Course Description: Examination of the activities and procedures critical to the socialization of professional sociologists.

Prerequisite: SOC 100 to 499 - at least 15 credits.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 502 Foundations of Theoretical Sociology Credits: 3 (3-0-0)

Course Description: Contributions of major sociological theorists prior to mid-20th century.

Prerequisite: SOC 500, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 503 Contemporary Sociological Theory Credits: 3 (3-0-0)

Course Description: Contributions of major sociological theorists since mid-20th century.

Prerequisite: SOC 502.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 510 Sociological Methods I Credits: 3 (3-0-0)

Course Description: Linkage of sociological theory and conceptual models; case studies; data-gathering techniques.

Prerequisite: SOC 210 or SOC 311.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 511 Sociological Methods II Credits: 3 (3-0-0)

Course Description: Linkage of sociological theory and conceptual models; case studies; data-gathering techniques.

Prerequisite: SOC 510.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 540 Community Sociology Credits: 3 (3-0-0)

Course Description: Intellectual roots of community sociology and contemporary community studies.

Prerequisite: SOC 500.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 555 Society, Deviance, and Crime Credits: 3 (0-0-3)

Course Description: Sociological perspectives and research in the areas of deviance and crime, including classical, positivist, and critical approaches.

Prerequisite: SOC 300 to 499 - at least 12 credits.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 559 Green Criminology Credits: 3 (3-0-0)

Course Description: Examines crimes and harms that impact the natural environment, human and non-human life. Covers core concepts and major theoretical approaches in the study of global environmental and social harm, victimization, and regulatory responses to environmental crimes and wrongs.

Prerequisite: None.

Restriction: Must be a Graduate.

Registration Information: Graduate standing. Credit not allowed for both SOC 559 and SOC 580A2.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 562 Sociology of Food Systems and Agriculture Credits: 3 (2-0-1)

Also Offered As: AGRI 562.

Course Description: How agricultural choices generate intended and unintended consequences for human communities and the natural environment.

Prerequisite: SOC 100 or SOC 105.

Registration Information: Credit not allowed for both SOC 562 and AGRI 562.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 564 Environmental Justice Credits: 3 (3-0-0)

Course Description: Unequal distribution of environmental risks, benefits, policies, and regulatory practices across different populations.

Prerequisite: SOC 100 or SOC 105.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 566 Contemporary Issues of Developing Countries Credits: 3 (3-0-0)

Also Offered As: AREC 566.

Course Description: Social, economic, and technological factors in developing countries.

Prerequisite: None.

Registration Information: Must have taken 2 or more courses in SOC or AREC or ECON. Credit not allowed for both SOC 566 and AREC 566.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 610 Seminar in Methods of Qualitative Analysis Credits: 3 (0-0-3)

Course Description: Examination and application of qualitative techniques of analysis.

Prerequisite: SOC 311, may be taken concurrently or POLS 620, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both SOC 610 and POLS 621.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 612 Seminar in Methods of Evaluational Research Credits: 3 (0-0-3)

Course Description: Quantitative and qualitative techniques of evaluating social action programs.

Prerequisite: SOC 511.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 613 Seminar in Multiple Regression and Path Analysis Credits: 3 (0-0-3)

Course Description: Analysis and application of techniques for multiple regression and path analysis.

Prerequisite: SOC 511.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 614 Comparative Sociology Credits: 3 (3-0-0)

Course Description: Examination of problems and prospects in extending and carrying out sociological research across social systems.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 630 Social Stratification Credits: 3 (3-0-0)

Course Description: Theory and research on class structure, status attainment, ideology, and social change.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 631 Sociology of Rural Development Credits: 3 (3-0-0)

Course Description: Rural social organization and development, modernization, and social change as it relates to rural social systems; underdeveloped regions of world.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 633 Theories of Modern Organizations Credits: 3 (3-0-0)

Course Description: Comparison of various theoretical perspectives on functioning of modern large-scale organizations.

Prerequisite: SOC 340.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 639 Technology Assessment and Social Forecasting Credits: 3 (3-0-0)

Course Description: Interrelationship between technology and society emphasizing procedures for evaluating impacts and forecasting alternatives.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 660 Theories of Development and Social Change Credits: 3 (3-0-0)

Course Description: Central concepts, issues, and approaches in sociology of development.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 661 Gender and Global Society Credits: 3 (0-0-3)

Course Description: Gender relations and social change in global society.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 662 Seminar in Sociological Policy Analysis Credits: 3 (0-0-3)

Course Description: Examination of sociological perspectives on formulation and impact of policies to deal with social problems.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 663 Sociology of Sustainable Development Credits: 3 (3-0-0)

Course Description: Social dimensions of sustainable Third World development and implications for policy.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 664 Sociology of Water Resources Credits: 3 (3-0-0)

Course Description: Social organization, conflict, and power in arid environments.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 665 Sociology of Science and Technology Credits: 3 (3-0-0)

Course Description: Examination of connections among science, technology, and social development in national and global context.

Prerequisite: SOC 100.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must have taken 10 credits of undergraduate natural sciences.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 666 Globalization and Socioeconomic Restructuring Credits: 3 (0-0-3)

Course Description: Sociological theories and issues in globalization; socioeconomic restructuring of the world economy.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 667 Theories of State, Economy, and Society Credits: 3 (3-0-0)

Course Description: Major classical and contemporary sociological theories of state-economy-society relations emphasizing development.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

SOC 668 Environmental Sociology Credits: 3 (3-0-0)

Course Description: Connections between social organizations, the environment, and science and technology.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 669 Global Inequality and Change Credits: 3 (0-0-3)

Course Description: Major issues in global inequality and change from a historical and contemporary perspective.

Prerequisite: SOC 500.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 671 Metatheoretical Issues in Sociology Credits: 3 (0-0-3)

Course Description: Analysis of metatheoretical concepts and issues in sociological theory.

Prerequisite: SOC 502.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 693A Seminar: Structural Theory Credits: 3 (0-0-3)

Course Description:

Prerequisite: SOC 602.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 693B Seminar: Cultural Theory Credits: 3 (0-0-3)

Course Description:

Prerequisite: SOC 602.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 693C Seminar: Middle Range Theory Credits: 3 (0-0-3)

Course Description:

Prerequisite: SOC 602.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 693D Seminar: Metatheory Credits: 3 (0-0-3)

Course Description:

Prerequisite: SOC 602.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

SOC 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

SOC 696 Group Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Maximum of 8 credits allowed in course.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

SOC 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Sociology

Sociology is the study of societies. Sociologists examine social issues using empirical evidence and learn how to act as agents of social justice and change. Students gain critical thinking skills to understand the complexities of our current social world. Sociology represents one of CSU's most popular majors. Sociology faculty members' high quality, committed teaching regularly receives recognition and awards across the College of Liberal Arts and the University. Our undergraduate program offers solid training in social theory and research methods. Our high impact teaching practices include a popular internship, a criminology study abroad program in Prague and more.

Visit the department website (<https://sociology.colostate.edu/undergraduate/>) for more details.

Concentrations

- Criminology and Criminal Justice Concentration
- Environmental Sociology Concentration
- General Sociology Concentration

To change your major to Sociology, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. More information is available on <https://advising.libarts.colostate.edu>.

Learning Objectives

Student who successfully complete a major in Sociology will be able to:

- **Critique individualistic explanations of social phenomena by locating them within broader societal patterns.** They will demonstrate their understanding of sociological concepts and theories, and apply them to better understand, evaluate, and foster social change in real-world settings.
- **Formulate research questions and select the appropriate sociological research methodologies to answer them.** They will apply this knowledge to collect and analyze quantitative and qualitative data as

well as evaluate information they encounter in scholarly sources as well as from a variety of media sources from their everyday lives.

- **Analyze the links between individuals, societies, and systems** with a focus on describing the ways gender, race, class, and other intersecting structures of power produce social inequalities. They will demonstrate their understanding of these relationships by examining the effects of social inequalities as well as evaluating actions, policies, and programs that can prevent or ameliorate them.
- **Express sociological ideas clearly and effectively** in written and oral contexts to a variety of audiences.
- **Think critically by engaging in teamwork** where they negotiate different perspectives thereby demonstrating an understanding of the complexity of the social world.
- **Describe how their training as sociologists, academic experiences, and department mentoring provide them with a foundation to critically examine the social world** and their own lives in a way that is relevant to their own career and personal pathway.

Career Paths: What can you do with a degree in Sociology?

Almost anything! Our graduates have incorporated their sociology degrees and training into rewarding and impactful careers around the world. Some specific career paths our majors and minors have taken recently:

- Research Assistant (Institute for Women's Policy Research)
- Youth Case Worker (City of Denver)
- Correctional Services Specialist (Larimer County Community Corrections)
- Data Analyst (Colorado Department of Human Services)
- Guardian ad Litem (State of Colorado)
- Detective in Domestic Violence Unit (City of Longmont)
- Facility Manager (U.S. Department of Agriculture)
- Senior Financial Analyst (Prologis)
- Urban Planner (Pierce County, Washington)
- Cryptologic Technician (United States Navy)
- Graduate School for Psychology, Social Work, Law, Public Health & much more

Sociology has taught me that there are always more answers than we think.
— EMILY, '15, NON-PROFIT PROJECT MANAGER

CSU SOC gives insight into why certain inequalities exist and how to not become part of the problem.
— TEAGAN, '15, POLICE DETECTIVE

I learned that my voice was actually needed as I could offer a unique perspective.
— IMANI, '18, GRADUATE SCHOOL

CSU Sociology set me up for success in my career because sociology is working with people.
— MONICA, '15 (PICTURED), TITLE V PROJECT DIRECTOR

FUN FACT: Sociologists are everywhere — just not often recognizable by job title

I'm a Sociologist

Major in Sociology, Criminology and Criminal Justice Concentration

Students who concentrate in Criminology and Criminal Justice learn to view issues of crime, victimization, and justice at multiple levels—from individuals to communities and institutions. A sociological perspective on these issues focuses our attention to the social aspects of crime, law, and deviance including understanding societal factors that contribute to crime, effective and innovative programmatic approaches to prevent or control crime, the unintended consequences of our system for marginalized communities, and the role of research in creating effective policy. Our faculty teach courses that address issues like forms of punishment in the U.S. and global context, how gender shapes people's experiences with crime, environmental and state crime, as well as evidence-based policing practices. Moreover, our undergraduate program provides students with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential skills for a wide variety of careers including those associated with law, justice, or advocacy. Our unique mentoring program models how to transfer students' sociological skill sets to meaningful employment after graduation. We can't wait to guide you through a life-changing major!

Visit the department website (<https://sociology.colostate.edu/ccj/>) for details. To change your major to Sociology, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu.

Requirements Effective Fall 2022

Each course used to satisfy requirements of the concentration requires a minimum grade of C (2.000), i.e. all SOC courses, STAT 2**, and each course taken to satisfy the Social and Behavioral Sciences electives or the Criminology and Criminal Justice electives.

Freshman

Major in Sociology, Environmental Sociology Concentration

Environmental sociology teaches you how to address contemporary issues and why that matters at multiple scales – from individuals, to communities, to nations. Our students develop tools to better understand the sources of and create systems-based solutions to vital social and environmental problems. Our faculty teach courses that address issues

like environmental inequalities, natural resource conservation, and food justice. Moreover, our undergraduate program provides students with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential skills for a wide variety of careers associated with environment, natural resources, policy, justice, or advocacy—as well as strong preparation for graduate or law school. Our unique mentoring program models how to transfer students’ sociological skill sets to meaningful employment after graduation. We can’t wait to guide you through a life-changing major!

Visit the department website (<https://sociology.colostate.edu/envsoc/>) for details. To change your major to Sociology, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu.

Requirements Effective Fall 2022

Each course used to satisfy requirements of the concentration requires a minimum grade of C (2.000), i.e. all SOC courses, STAT 2**, and each course taken to satisfy the Social and Behavioral Sciences electives or the Environmental Sociology electives.

Major in Sociology, General Sociology Concentration

array of topics such as dynamics of social inequalities, race, gender, capitalism, environmental justice, deviance, and the criminal justice system. Moreover, our undergraduate program provides students with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential skills for a wide variety of careers including researchers, counselors, policy analysts, managers, criminal justice personnel, as well as strong preparation for graduate or law school. Our unique mentoring program models how to transfer students' sociological skill sets to meaningful employment after graduation. We can't wait to guide you through a life-changing major!

Visit the department website (<https://sociology.colostate.edu/gensoc/>) for details. To change your major to Sociology, you can either call the College of Liberal Arts Academic Advising Center at 970-491-3117 or send an email to cla_advising@colostate.edu. Our General Sociology degree is also offered through CSU Online (<https://www.online.colostate.edu/degrees/sociology/>).

Sociology is the study of societies. Sociologists examine social issues using empirical evidence and learn how to act as agents of social justice and change. Students gain critical thinking skills to understand the complexities of our current social world. A General Sociology concentration provides flexibility so that students can explore a diverse

Minor in Criminology and Criminal Justice

The Department of Sociology offers a minor in Criminology and Criminal Justice for students from other departments who wish to have some experience in an area outside their majors. Minors require fewer credit hours to complete than majors. Through this minor, students will gain sociological understanding of a variety of issues related to crime,

deviance, and criminal justice. This course work will help prepare students who wish to work in a variety of fields, including those related to the criminal justice system.

To add a Criminology and Criminal Justice minor, contact the Department of Sociology at (970) 491-6044 or cla-soc_dept_info@mail.colostate.edu.

Learning Objectives

Upon successful completion, students will be able to:

1. Analyze critically the major classical and contemporary theories from the 19th and 20th centuries. Demonstrate how well these theories help us understand or explain current social phenomena both in the U.S. and abroad. Apply a wide variety of theories, including European critical theory, functionalism, symbolic interactionism, and post-modern theory, in required empirical research.
2. Analyze critically sociological phenomena by applying objective social research methodologies. Demonstrate a working knowledge of sociological theories and the application of these theories to real world social phenomena. Specifically, students will understand conceptual frameworks associated with:
 - a. Social structure (social stratification, ethnic structures, social institutions, small group dynamics, social demography, and social organizations);
 - b. Culture (socialization and the development of personalities, social norms, framing normative assumptions of societies and organizations); and
 - c. Social agency (the behavior of the individual, collective behavior such as with social movements, and the principles of social-psychology).

Requirements Effective Fall 2020

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students must receive a grade of C or higher for each course counting toward the minor.

Code	Title	Credits
Lower Division		
SOC 100 or SOC 105	Introduction to Sociology (GT-SS3) Social Problems (GT-SS3)	3
SOC 253	Intro to Criminology and Criminal Justice	3
Upper Division		
SOC 301 or SOC 302	Development of Sociological Thought Contemporary Sociological Theory	3
SOC 311	Sociological Research Methods	3
Select one course from the following:		3
SOC 352	Criminology	
SOC 372	Sociology of Deviance	
Criminal Justice Systems Courses – select one course from the following:		3
SOC 354	Policing and Society	
SOC 358	Punishment and Society	
SOC 455	Sociology of Law	
SOC 482A	Travel Abroad: Comparative Criminal Justice	
Critical Criminology and Criminal Justice Courses – select one course from the following:		3
SOC 322	Environmental Justice	

SOC 351	Corporate and State Crime
SOC 356	Inequality in Criminal Sentencing
SOC 357	Women, Crime, and Victimization
SOC 359	Green Criminology
SOC 482B	Travel Abroad: Crime and Deviance

Program Total Credits: 21

Minor in General Sociology

A minor in Sociology provides students in other majors with the opportunity to learn methodological skills as well the conceptual framework to examine and create solutions to address a variety of complex social problems.

To add a General Sociology minor, contact the department at (970) 491-6044 or cla-soc_dept_info@mail.colostate.edu.

Requirements Effective Spring 2014

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students must receive a grade of C or higher for each course counting toward the minor.

Code	Title	Credits
Lower Division		
SOC 100 or SOC 105	Introduction to Sociology (GT-SS3) Social Problems (GT-SS3)	3
Upper Division		
SOC 301 or SOC 302	Development of Sociological Thought Contemporary Sociological Theory	3
Select one from the following:		3
SOC 311	Sociological Research Methods	
Equivalent course work in social research		
Minimum of 12 credits in sociology courses beyond specific requirements chosen on the basis of relevance to student's program of study. A minimum of 9 credits must be upper-division (300- to 400-level).		12
Program Total Credits:		21

Certificate in Applied Social Research

The Certificate in Applied Social Research advances and refines students' ability to identify, gather, interpret, and organize information about today's pressing social issues. The courses provide hands-on training so students acquire the research tools needed to produce and communicate evidence-driven arguments about how to address social inequalities and social justice issues. The Certificate in Applied Social Research gives students a strategic advantage in the competitive job market and provides the skills necessary to identify and create new pathways for social change.

To add a Certificate in Applied Social Research, contact the Department of Sociology at (970) 491-6044 or cla-soc_dept_info@mail.colostate.edu.

Learning Objectives

Upon successful completion of this certificate, students will be able to:

1. Link sociological theory to the development of research questions.
2. Apply a variety of research design strategies to research questions.
3. Assess the quality and limitations of both quantitative and qualitative data.
4. Discuss socio-cultural, ethical, and political considerations in social science research.
5. Collect both quantitative and qualitative data from a variety of sources, including considerations of sampling, conceptualization, operationalization, and measurement.
6. Manage different types of social science data, including restructuring data for analysis, transcription, coding, and integrating data from diverse sources.
7. Identify and apply appropriate techniques for analyzing both quantitative and qualitative data.
8. Effectively present and write up research results for a variety of audiences, including considerations of causality, data display and visualization, and integrating quantitative and qualitative results.

Requirements Effective Spring 2023

Each course used to satisfy requirements of the certificate requires a minimum grade of C (2.000), i.e. all SOC courses AND electives.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Required Courses:		
SOC 311	Sociological Research Methods	3
SOC 314	Applications of Quantitative Research	3
SOC 315	Applications of Qualitative Research	3
Select two courses from the following:		6
ANTH 441	Method in Cultural Anthropology	
ANTH 443	Ethnographic Field Methods	
ANTH 444	Cultures of Virtual Worlds—Research Methods	
CO 301C	Writing in the Disciplines: Social Sciences (GT-CO3)	
CO 302	Writing in Digital Environments (GT-CO3)	
ECON 235/LB 235	Working With Data	
ECON 335/ AREC 335	Introduction to Econometrics	
ETST 441	Indigenous Knowledges	
ETST 493	Capstone Seminar	
GR 315	Quantitative Geographical Methods	
HIST 392	Seminar in Historical Methods	
JTC 300	Strategic Writing and Communication (GT-CO3)	
JTC 319	Science and Environmental Communication	
JTC 417	Data Visualization Design	
POLS 320	Empirical Political Analysis	
POLS 459	Program Evaluation for Public Administrators	
POLS 465	Public Policy Analysis	
SPCM 334	Co-Cultural Communication	
SPCM 335	Gender and Communication	
SPCM 401	Rhetoric in Social Movements	
SPCM 434	Intercultural Communication	

Program Total Credits:

Warner College of Natural Resources

Office in Michael Smith Natural Resources Building, Room 410
(970) 491-6675

warnercnr.colostate.edu (<http://warnercnr.colostate.edu>)

Professor A. Alonso Aguirre, Dean

Undergraduate Majors

Ecosystem Science and Sustainability
Fire and Emergency Services Administration
Fish, Wildlife, and Conservation Biology
Forest and Rangeland Stewardship
Geology
Human Dimensions of Natural Resources
Natural Resource Tourism
Natural Resources Management
Restoration Ecology
Watershed Science and Sustainability

Undergraduate Minors

Diversity and Inclusion in Natural Resources
Ecological Restoration
Fishery Biology
Forestry
Geology
Geospatial Information Science for Natural Resources
Range Ecology
Watershed Science

Interdisciplinary Minor

Interdisciplinary Minor in Conservation Biology

For a complete list of departmental program offerings (including certificates), see individual department catalog pages.

College-Wide Graduate Programs

Graduate Certificate

Certificate in Sustainable Military Lands Management

The College offers studies and professional training in the management, administration, and scientific investigation of renewable and nonrenewable natural resources. Programs include the study of every component of natural systems with particular emphasis on fish, forests, minerals, range, watershed, wildlife, and outdoor recreation areas. Graduate areas of emphasis also include ecosystems and greenhouse gas management.

The Natural Resource Ecology Laboratory, housed in the College, is devoted to research and training in ecosystem science and management.

The College also houses the Center for Environmental Management of Military Lands, CEMML, (<http://www.cemml.colostate.edu/>) which is a team of environmental professionals experienced in the conservation and sustainable management of natural and cultural resources on Department of Defense lands.

College Programs

Undergraduate Majors

The scope of the College's programs is more broadly based than most natural resources schools. There are ten undergraduate degree programs, most with specialized concentrations or designated areas of further study. Undergraduate majors in all five departments lead to the Bachelor

of Science degree, which requires a minimum of 120 credits. A minimum of 42 credits in upper division courses is required for all majors.

Field Training Programs

Most undergraduate majors require the completion of a four or five-week summer field training program (five or six credits) *before* their junior or senior year. Summer field instruction is given at the CSU Mountain Campus (<http://mountaincampus.colostate.edu/>) campus, 55 miles west of Fort Collins, and the geosciences department offers a summer field course in northern New Mexico and southern Colorado.

During interim or summer periods, some majors devote several weeks to advanced field training programs off campus. Students taking advanced ROTC should arrange their schedules with their advisors in their junior year to avoid conflicts during senior spring semester. It is recommended for all majors, and required for some, that students have a minimum of one summer of field experience before graduation.

International Education

International resources management is an increasingly important concern of the Warner College of Natural Resources. It is desirable that students in the College have opportunities to study abroad, just as students from abroad are encouraged to study here. CSU has agreements covering study abroad opportunities with institutions throughout the world. Students may complete one or two semesters of resources management education abroad. Students interested in studying abroad should plan far in advance by discussing opportunities with their academic advisor and by visiting the Office of International Programs (<http://international.colostate.edu>) in Laurel Hall.

Graduate Programs

Master of Science and Doctor of Philosophy degree programs are offered in each department. Four professional master's degrees are offered by departments in the college: the Master of Fish, Wildlife, and Conservation Biology, the Master of Natural Resources Stewardship, the Master of Tourism Management, and the Professional Science Master's in Ecosystem Science and Sustainability. Descriptions of the various graduate programs may be found in the Graduate and Professional Bulletin or on the departmental websites.

Admissions Information

Contact: Carmyn Ginnetti, College Recruitment and Engagement Coordinator
Office: 970-491-3613
carmyn.ginnetti@colostate.edu

For High School Graduates

High school students are advised to take all the English, science, and mathematics courses possible to prepare for college-level work in natural resources.

Limitation on Transfer of Credits

Students planning to attend another college or community college prior to enrolling at CSU should follow the freshman program for their chosen major as closely as possible. To assure that they have the opportunity to complete all degree requirements in four years, they should plan to transfer to CSU no later than the beginning of their junior year. Credits which transfer but are not equivalent to specific curriculum requirements may be used as elective credits.

Transfer Students

Students are required to choose a major when enrolling. Transfer students, therefore, should follow the departmental curriculum closely. Check the individual major and concentration for specific courses.

Graduate Certificate in Sustainable Military Lands Management

The Graduate Certificate in Sustainable Military Lands Management at CSU is designed to enhance the knowledge and skills of current practitioners and managers, as well as new professionals interested in applying their education and background to the management of military lands. The knowledge and skill sets are transferable to professionals in a wide array of federal and state land management agencies. This online program is the first and only program of its kind in the United States.

After successfully completing this certificate, you will have an enhanced knowledge base of military land management and understanding of the cultural and ecological significance of sustaining these lands. This certificate can lead to unique job opportunities and career advancement as a military land management professional.

Learning Objectives

Students will:

- 1. Gain an overview of military lands in the United States in historical, geographical, and environmental contexts.
- 2. Learn the general practices and theory of land management, with particular attention to the full range and natural and cultural resources that may be impacted by long-term military training and testing activities.
- 3. Study the ecological principles of military training and testing areas and the impacts of disturbances caused by these activities.
- 4. Explore cultural resources laws, policies, management, and preservation as they apply to military lands.
- 5. Prepare to lead stewardship-related matters on military lands.
- 6. Explore the NEPA Law and understand its role in the environmental office on a military installation.
- 7. Apply your knowledge and skills to a wide array of federal, state, and foreign land management agencies.

Requirements Effective Fall 2023

Additional coursework may be required due to prerequisites.

Code	Title	Credits
NR 550	Sustainable Military Lands Management	3
Select 3 courses from the following:		9
NR 551	Cultural Resource Management on Military Lands	
NR 552	Ecology of Military Lands	
NR 567	Analysis of Environmental Impact	
NR 576	Theory and Practice of NEPA Compliance	
Program Total Credits:		12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Minor in Diversity and Inclusion in Natural Resources

To get more information about this minor or to officially declare it, please visit the department website (<https://warnercnr.colostate.edu/diversity-and-inclusion-in-natural-resources-minor/>).

This minor embraces human diversity and inclusion in natural resources fields, through exploration of how complex and important aspects of diversity serve to shape natural resources and our environment in our modern era. The minor serves students already passionate about natural resources through an exploration of counter-narratives not often thoroughly discussed in seminal works of natural resource history. It provides for a critical examination of historical and current relationships between human diversity, natural resources, and the environment. Students will develop an understanding of the importance of, and types of, diversity in human-environment interactions; how this diversity contributes to vulnerability and/or resilience to environmental change; and the barriers and opportunities for recognizing and protecting human diversity in the context of natural resource conservation and management. The curriculum provides students with the knowledge and skills needed to address diversity and inclusion issues within the natural resource disciplines represented in the Warner College. This includes proposing solutions to environmental injustices, facilitating intercultural environmental communication, integrating multicultural perspectives in assessment of natural resource issues and development of policy and management solutions, and cultivating a deeper understanding and respect for diverse ways of knowing and experiencing the environment.

Learning Objectives

Upon successful completion, students will be able to:

- 1. Reflect on and extend personal knowledge regarding how individual, family, and cultural contexts have shaped past and present human-environment relationships.
- 2. Distinguish and describe multiple dimensions of diversity, including unique contributions of marginalized social and cultural groups in natural resources.
- 3. Critically analyze historic and contemporary perspectives of dynamic interactions and relationships between people and nature, centering experiences of historically marginalized communities.
- 4. Articulate historical and contemporary sources of discrimination and injustice in natural resource conservation and management.
- 5. Apply diverse conceptual and ethical frameworks for evaluating how environmental risks, costs, and benefits are distributed across populations.
- 6. Critically analyze how different forms of environmental governance and institutional arrangements can determine distribution of power and access to resources, and differentially impact cultural communities.
- 7. Identify and develop critical career resources and skills necessary for respectfully engaging diversity in the natural resources field.
- 8. Apply analytical tools to engage multicultural perspectives in assessment and management of natural resources.

9. Demonstrate competency to communicate across social and cultural differences.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
NR 140	Diversity and Inclusion in Natural Resources	3

Select Foundational Course 3

Please choose one of the following courses.

ANTH 100	Introductory Cultural Anthropology (GT-SS3)
ETST 100	Introduction to Ethnic Studies (GT-SS3)
GR 100	Introduction to Geography (GT-SS2)
SOC 100	Introduction to Sociology (GT-SS3)
or SOC 105	Social Problems (GT-SS3)

Select 18 credits from the courses below with a minimum of 3 credits from each elective competency area. The remaining 9 credits may be selected from any elective area. At least 12 credits applied towards the minor must be WCNR courses

Human-environment relationships and interactions:

ANTH 415	Indigenous Ecologies and the Modern World
ANTH 417	Indigenous Environmental Stewardship
ESS 365	Global Climate Justice (Online Course only)
ESS 401	Sustainability of Parks and Protected Places
ETST 250/ HIST 250	African American History (GT-HI1)
ETST 252/ HIST 252	Asian American History (GT-HI1)
ETST 253	Chicanx History and Culture (GT-HI1)
ETST 255/ HIST 255	Native American History (GT-HI1)
ETST 270	Introduction to Critical Disability Studies
NRRT 330	Social Aspects of Natural Resource Management
OT 355	The Disability Experience in Society

Natural resource, justice, ethics, and governance:

ESS 400	Global Perspectives on Sustainability
ESS 505	International Climate Negotiations
ETST 365	Global Environmental Justice Movements
ETST 420	Disability, Race, Gender in the Environment
GR 213	Climate Migrants (GT-SS2)
NRRT 402	Cultural and Political Ecology
SOC 220	Environment, Food, and Social Justice (GT-SS3)
SOC 322	Environmental Justice

Skills and applications in Diversity & Inclusion:

ESS 506	Virtual International Climate Negotiations
FW 310	Mapping Diverse Perspectives in Conservation
NR 321	Natural Resource Rights and Reconciliation
NRRT 320	International Issues-Recreation and Tourism

Program Total Credits: 24

Minor in Geospatial Information Science for Natural Resources

The minor in Geospatial Information Science for Natural Resources provides students with fundamental geospatial skills in natural resource science and management. Geographic information systems, global positioning systems, and remote sensing are key tools for the 21st century workforce.

This minor is designed for students desiring to gain technical skills and to increase their employment potential in an applied area. The minor in Geospatial Information Science has a broad interdisciplinary appeal due to the ability to adapt and use these technologies in many disciplines.

For more information on the minor including minor declaration events, please visit the department website (<http://warnercnr.colostate.edu/geospatial-information-science-for-natural-resources-minor/>).

Learning Objectives

After successfully completing this minor, students will be able to:

1. Describe geospatial characteristics of landscapes through the use of digital data.
2. Carry out geospatial data analysis procedures and generate cartographically sound thematic maps of derived geographical information.
3. Apply geospatial tools to solve real-world spatial problems in a competent manner.
4. Address problem-solving for natural resource management.
5. Soundly and accurately apply geospatial tools to different digital data sources to assess produced outcomes.
6. Comprehend and apply the principles of spatial analysis and modelling in real-world problem solving.
7. Understand and implement spatial analysis tools using state-of-the-art geographic information system software.
8. Understand concepts of data collection, data entry, and spatial data analysis for real-world problem solving.
9. Explore the breadth and depth of geospatial analysis in the natural environment.
10. Articulate and demonstrate an understanding of concepts and applications of geospatial analysis for natural resources.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Required Lower Division:		
CS 152	Python for STEM	2
GR 220	Mapping, Cartography, and Spatial Thinking	3
Required Upper Division:		
NR 319	Introduction to Geospatial Science	4
NR 323/GR 323	Remote Sensing and Image Interpretation	3
NR 423	Applications of Global Positioning Systems	1
NR 426	Programming for GIS I	2
Required Upper Division Applications – select one course from the following:		3-4
FW 325	Spatial Ecology–Applications with R	
NR 422	GIS Applications in Natural Resource Management	
NR 450	Geospatial Project Design and Analysis	
NR 495	Independent Study ¹	
Upper Division Electives – select from the following courses to reach a minimum of 21 credits total for the minor		2-4
FW 310	Mapping Diverse Perspectives in Conservation	
FW 325	Spatial Ecology–Applications with R ²	
FW 477	Wildlife Habitat Use and Management	
GEOL 440	Geodetic and Near-Surface Geophysical Methods	
GR 430	Land Change Science and Remote Sensing	
NR 422	GIS Applications in Natural Resource Management ²	
NR 427	Programming for GIS II	
NR 450	Geospatial Project Design and Analysis ²	
NR 453	Geospatial Field Methods in Natural Resources	
NR 493	Seminar–GIS and Remote Sensing Applications	
NR 495	Independent Study ^{1,2}	
Program Total Credits:		21

¹ NR 495 Independent Study must include geospatial applications and be approved by the minor advisor.

² Can be counted if not used to fill "Required Upper Division Applications" category.

Department of Ecosystem Science and Sustainability

Office: A104 Natural and Environmental Sciences Building
 Phone: (970) 491-5589
 Email: WCNR_ESS_info@Mail.ColoState.edu

Department Head: Rich Conant, Ph.D.

warnercnr.colostate.edu/ess/ (<https://warnercnr.colostate.edu/ess/>)

Established in 2011, the Department of Ecosystem Science and Sustainability investigates the intricate physical, chemical, human, and biological interactions driving ecosystems. Our responsibility is to understand the world's ecosystems and the effect of human societies

on ecosystem processes and their long-term sustainability. Research and education are central to that understanding, enhancing our ability to manage for the sustainability of ecosystems, societies and the biosphere.

The Department of Ecosystem Science and Sustainability currently offers the following degrees and certificates:

- Major in Ecosystem Science and Sustainability
- Major in Watershed Science and Sustainability
- Minor in Watershed Science
- Graduate Certificate in Carbon Management
- Graduate Certificate in Water Resources
- Master of Science in Ecosystem Sustainability
- Master of Science in Watershed Science
- Professional Science Master's in Ecosystem Science and Sustainability
- Ph.D. in Ecosystem Sustainability
- Ph.D. in Watershed Science

Undergraduate Majors

- Major in Ecosystem Science and Sustainability
- Major in Watershed Science and Sustainability
- Major in Watershed Science (*No new students are being admitted into this program of study. Please see the Major in Watershed Science and Sustainability*)

Minor

- Minor in Watershed Science

Graduate Graduate Programs in Ecosystem Science and Sustainability

The department offers master's and Ph.D. programs in Ecosystem Sustainability, and Watershed Science. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the website for the Department of Ecosystem Science and Sustainability (<http://warnercnr.colostate.edu/ess-home/>).

Certificates

- Carbon Management
- Water Resources

Master's Programs

- Master of Science in Ecosystem Sustainability, Plan A
- Master of Science in Watershed Science, Plan A
- Master of Science in Watershed Science, Plan B
- Professional Science Master's in Ecosystem Science and Sustainability

Ph.D.

- Ph.D. in Ecosystem Sustainability
- Ph.D. in Watershed Science

Courses

Subjects in this department include: Ecosystem Science and Sustainability (ESS) and Watershed Science (WR).

Ecosystem Science and Sustainability (ESS)

ESS 120 Intro to Ecosystem and Watershed Sciences Credit: 1 (1-0-0)

Course Description: Exploration of the fields of Ecosystem Science and Sustainability and Watershed Science, including career pathways.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: This is a partial semester course. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

ESS 129 Information Management for Sustainability Credit: 1 (1-0-0)

Course Description: Learn to access, retrieve, store, and manipulate information for natural resources and sustainability applications. Basic mapping, statistics, and graphing.

Prerequisite: None.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 129 and ESS 180A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 130 Intro to Systems Theory for Sustainability Credit: 1 (1-0-0)

Course Description: Introduction to the concept of a "system," fundamental tenets of systems theory, and application of systems theory to the sustainability of social-ecological systems.

Prerequisite: ESS 129, may be taken concurrently.

Registration Information: This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 150 Imagining Sustainability Credits: 3 (3-0-0)

Also Offered As: ANTH 150.

Course Description: Science alone cannot imagine the revolutionary changes necessary to sustain future life on our planet. Explore key concepts and practices of sustainability as represented in contemporary fiction, film, and the news media. Interdisciplinary approach will be anthropological and historical, charting the development of sustainability thinking through different epochs of capitalism.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: ANTH 150, ANTH 181A1, ESS 150, or ESS 181A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 210 Physical Geography Credits: 3 (3-0-0)

Also Offered As: GR 210.

Course Description: Energy, mass budget, and human impacts on atmosphere, hydrosphere, and continental land surfaces.

Prerequisite: None.

Registration Information: Credit not allowed for both ESS 210 and GR 210.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 211 Foundations in Ecosystem Science Credits: 3 (3-0-0)

Course Description: Linkage between society and ecosystems services as foundation for sustainability of the coupled human-environmental system.

Prerequisite: GR 210 or ESS 210.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 220 Research Skills for Ecosystem Science I Credit: 1 (0-0-1)

Course Description: Fundamental skills for participating in ecosystem science research through hands-on learning modules.

Prerequisite: None.

Registration Information: Written consent of instructor.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 221 Research Methods for Ecosystem Science II Credit: 1 (0-0-1)

Course Description: Advanced topics in the practice of the scientific method and participation in research.

Prerequisite: ESS 220.

Registration Information: Written consent of instructor.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 298 Research Credits: Var[1-3] (0-0-0)

Course Description: Directed ecosystem science research.

Prerequisite: ESS 221, may be taken concurrently.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 311 Ecosystem Ecology Credits: 3 (3-0-0)

Course Description: Principles of ecosystems ecology, emphasis on their application to coupled natural and human systems.

Prerequisite: (PH 121 or PH 141) and (LIFE 320).

Registration Information: Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 312 Sustainability Science Credits: 3 (3-0-0)

Course Description: Synthesize multifaceted information across a wide range of disciplines, with the goal to develop potential solutions to complex human-societal-environmental challenges at multiple scales. Implement methods for understanding current issues, develop alternative scenarios to current practices and policies, and stage interventions to achieve more sustainable behaviors and practices.

Prerequisite: LIFE 320.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 320 Internship and Career Preparation Credit: 1 (0-0-1)

Course Description: Career-related skills and professional development in ecosystem science and sustainability (ESS) for majors.

Prerequisite: LIFE 320.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 330 Quantitative Reasoning for Ecosystem Science Credits: 3 (2-2-0)

Course Description: Understanding diverse approaches for using data and models to understand complex ecological systems.

Prerequisite: (ESS 211 or LIFE 320) and (MATH 155 or MATH 160) and (STAT 301 or STAT 307 or STAT 315).

Registration Information: Junior or senior standing.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 353 Global Change Impacts, Adaptation, Mitigation Credits: 3 (3-0-0)

Course Description: Explore challenges of climate change for mountain environments and society and their solutions.

Prerequisite: LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Required field trips. Credit allowed for only one of the following: BZ 353, ESS 353, or NR 353.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 365 Global Climate Justice Credits: 3 (3-0-0)

Course Description: Explore how mechanisms of environmental transport (air, water, land, biota) act as drivers within different ecosystems and how such drivers create pathways that lead to climate justice issues among the world's vulnerable populations.

Prerequisite: None.

Registration Information: Completion of AUCC categories 2 and 3A. Credit not allowed for both ESS 365 and ESS 381A1.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 382A Study Abroad: Socio-Ecological Landscapes of Mongolia Credits: 6 (0-0-6)

Course Description: Travel to Mongolia for a field-based, place-based experience with Mongolian students and herders. Engage in research projects partnering with Mongolian counterparts for field data collection using ecological, social science, and geospatial tools. Examine the intersection of culture and environment through observational exercises and experiential learning. Experience nomadic culture through field trips and participatory community activity.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Written consent of instructor.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 400 Global Perspectives on Sustainability Credits: 3 (3-0-0)

Course Description: Explores the intersections between ecosystem science, communities and sustainability in the context of the global challenges of climate change focusing on the new global framework (The Paris Agreement), Sustainable Development Goals (SDGs), and ecological indicators.

Prerequisite: ESS 311.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 401 Sustainability of Parks and Protected Places Credits: 3 (3-0-0)

Course Description: Explore connections between culture, sustainability, and park management topics while discussing people, parks, and places through the lens of diversity and inclusion in natural resources.

Prerequisite: None.

Registration Information: Completion of AUCC Categories 2 and 3A.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 405 Global Agriculture and Environmental Change Credits: 3 (3-0-0)
Also Offered As: SOCR 405.

Course Description: Explore the past, present, and future of global agroecosystems in a changing environment. Examine a range of environmental issues facing agroecosystems around the world, including water management, climate change, air pollution, and land use change. Assess the history of agricultural development and the factors that determine food security, as well as what strategies could help create a more sustainable and food secure world.

Prerequisite: BSPM 302 or BSPM 308 or BSPM 361 or LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Offered as Mixed Face-to-Face. Credit not allowed for both ESS 405 and SOCR 405.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 411 Earth Systems Ecology Credits: 3 (3-0-0)

Course Description: Earth as a system, stressing ecological interactions among energy, water, and biogeochemistry.

Prerequisite: ESS 311 and ESS 312.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 412 Sustainable Cities Credits: 3 (3-0-0)

Course Description: Explore the ecology of cities, evaluate the most innovative science developed for the city, and discuss with renowned researchers leading these efforts. Analyze sustainability plans from a variety of cities around the globe, and interact with the practitioners developing and implementing sustainable goals. Delve into sustainability theory, specifically "the sustainable city myth."

Prerequisite: ANTH 100 or ANTH 200 or ESS 210 or GES 101 or GR 100 or GR 210 or LAND 220 or LIFE 220 or LIFE 320 or NR 120A or NR 130 or SOC 220.

Registration Information: Junior standing. Credit not allowed for both ESS 412 and ESS 480A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 432 Microbial Ecology Credits: 3 (2-0-1)

Also Offered As: MIP 432.

Course Description: Principles of microorganism interactions with their living and non-living environments; implications for the environment, plants, and animals.

Prerequisite: MIP 300.

Registration Information: Must register for lecture and recitation. Credit not allowed for both ESS 432 and MIP 432.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 433 Microbial Ecology Laboratory Credit: 1 (0-3-0)

Also Offered As: MIP 433.

Course Description: Experimental microbial ecology; the design, conduct and interpretation of experiments that illustrate basic principles of microbial ecology.

Prerequisite: MIP 300.

Registration Information: Must be taken concurrently with ESS 432 or MIP 432. Credit not allowed for both ESS 433 and MIP 433.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 440 Practicing Sustainability Credits: 4 (2-0-2)

Course Description: Capstone integration of ecosystem science and sustainability, focused on case studies.

Prerequisite: ESS 311 and ESS 312.

Registration Information: Senior standing in WCNR. Must register for lecture and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 471 Special Topics in Ecosystem Sustainability Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: ESS 311.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 474 Limnology Credits: 3 (2-2-0)

Course Description: Biology, chemistry, and physics of lakes including limnological methods.

Prerequisite: LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Must register for lecture and laboratory. Required field trips. Credit not allowed for both BZ 474 and ESS 474.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 486 Ecosystem Practicum Credits: 2 (0-0-4)

Course Description: One-week field practicum to examine ecosystem science and sustainability issues in Colorado landscapes.

Prerequisite: ESS 311.

Registration Information: Senior standing. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 487 Internship Credits: Var[1-6] (0-0-0)

Course Description: Supervised work experience in professional settings related to Ecosystem Science and Sustainability.

Prerequisite: ESS 320.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 495 Independent Study in Ecosystem Science Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 500 Integrated Ecosystem/Sustainability Analysis Credits: 2 (2-0-0)

Course Description: Introduction to concepts and techniques that underpin future learning related to water resources, carbon management, sustainable food systems, environmental data science, and climate resilience.

Prerequisite: None.

Restriction: Must be a Graduate.

Registration Information: Admission to the Professional Science Master's in Ecosystem Science and Sustainability. This is a partial semester course. Required field trips. Field trip dates take place prior to the start of the semester. Credit not allowed for both ESS 500 and ESS 580A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

ESS 501 Principles of Ecosystem Sustainability Credits: 3 (3-0-0)

Course Description: Principles of ecosystem sustainability and threats to sustainability. Students will investigate and develop case studies.

Prerequisite: BZ 300 to 499 - at least 3 credits or CHEM 300 to 499 - at least 3 credits or LIFE 300 to 499 - at least 3 credits.

Registration Information: Admission to graduate school. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 505 International Climate Negotiations Credits: 2 (2-0-0)

Course Description: Preparation for international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations around the world. Explore environmental sustainability issues on international teams with peers from other institutions. Teams examine environmental issues/policies through a research project, and have the opportunity to prepare for actual climate action negotiations.

Prerequisite: None.

Registration Information: Department approval required. This is a partial semester course. Credit not allowed for ESS 505 and ESS 581A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 506 Virtual International Climate Negotiations Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations around the world through virtual participation. Explore environmental sustainability issues on international teams with peers from other institutions. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. Sections may be offered: Online. This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 516 Climate Justice and Policy Credits: 2 (2-0-0)

Also Offered As: NR 516.

Course Description: Overview on i) the unequal distribution of the benefits of natural resource use and the burdens of environmental degradation across spatiotemporal scales, and ii) the role of policy tools and approaches in creating, exacerbating, or addressing those inequalities. Examine environmental and climate justice (EJ/CJ) concepts, recognize environmental and climate inequalities, and learn how to integrate EJ/CJ considerations in policy analysis and review.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only. Credit not allowed for both ESS 516 and NR 516.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 523A Environmental Data Science Applications:

Introduction Credits: 5 (5-0-0)

Course Description: Explore tools and best practices for working with large environmental datasets primarily using the programming language R. Cover technical topics like: data types, file management, iteration, functional programming, debugging, code management and collaboration with git and GitHub. Use these tools to analyze environmental data using statistical approaches like: linear models, trend analysis, simple machine learning techniques.

Prerequisite: STAT 158 or STAT 301 with a minimum grade of D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 523B Environmental Data Science Applications: Food and Agriculture Credits: 2 (2-0-0)

Also Offered As: SOCR 523B.

Course Description: Explore the application of data science to the analysis of food and agricultural systems. Examine the ways food and agricultural researchers utilize data science in contemporary scientific literature and in research taking place across campus. Work in a team to create, document, and communicate an analysis that utilizes data science techniques to answer questions about food and agricultural system functioning and/or sustainability.

Prerequisite: ESS 523A, may be taken concurrently or SOCR 523A, may be taken concurrently.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 523B and SOCR 523B.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 523C Environmental Data Science Applications: Water

Resources Credits: 2 (2-0-0)

Also Offered As: WR 523C.

Course Description: Focus on analyzing and understanding water resources. Examine key innovations in deep learning for hydrological prediction and model parameterization, with a focus on cutting-edge techniques and hands-on analyses.

Prerequisite: ESS 523A, may be taken concurrently or SOCR 523A, may be taken concurrently.

Registration Information: This is a partial semester course. Credit not allowed for both ESS 523C and WR 523C.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 524 Foundations for Carbon/Greenhouse Gas Mgmt Credits: 3 (3-0-0)

Course Description: Foundations for understanding greenhouse gas emissions management and accounting.

Prerequisite: BZ 300 to 499 - at least 3 credits or CHEM 300 to 499 - at least 3 credits or LIFE 300 to 499 - at least 3 credits.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 542 Greenhouse Gas Policies Credits: 2 (0-0-2)

Course Description: Rules, regulations and standards for greenhouse gas management and accounting.

Prerequisite: ESS 524, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 543 Global Climate Change Credits: 2 (2-0-0)

Also Offered As: ATS 543.

Course Description: Climate change science, climate change impacts, and climate change mitigation, including discussions of current topics in climate change.

Prerequisite: BZ 300 to 499 - at least 3 credits or CHEM 300 to 499 - at least 3 credits or LIFE 300 to 499 - at least 3 credits.

Registration Information: Sections may be offered: Online. Credit not allowed for both ATS 543 and ESS 543.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 545 Applications in Greenhouse Gas Inventories Credits: 4 (2-6-0)

Course Description: Overview of methods for estimating greenhouse gas emissions and mitigation potential for agriculture and forestry activities.

Prerequisite: (ESS 524) and (STAR 511 or STAT 511A).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 554 Ecological and Social Agent-based Modeling Credits: 3 (2-2-0)

Also Offered As: ANTH 554.

Course Description: Exploring the use and making of agent-based models featuring interacting individuals in ecological and social simulation, with examples and projects.

Prerequisite: None.

Registration Information: Junior standing. Must register for lecture and laboratory. Credit allowed for only one of the following: ANTH 554, ESS 554, or NR 554.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 555 Life Cycle Assessment for Sustainability Credits: 3 (3-0-0)

Also Offered As: ANEQ 555.

Course Description: The quantitative and qualitative measure of cradle-to-grave impacts of products and services on the environment, the economy, and society.

Prerequisite: ANEQ 300 to 479 - at least 3 credits or BZ 300 to 479 - at least 3 credits or CHEM 300 to 479 - at least 3 credits or ENGR 300 to 479 - at least 3 credits or LIFE 300 to 479 - at least 3 credits.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: ANEQ 555, ENGR 555, ESS 555, ENGR 581A1, or ESS 581A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 565 Niche Models Credits: 4 (3-2-0)

Course Description: Concepts and application of niche models in ecosystem science.

Prerequisite: (BSPM 526 or BZ 526 or BZ 535 or BZ 548 or BZ 561 or ECOL 505 or ECOL 600 or ECOL 610 or ECOL 620 or FW 555 or FW 662) and (STAR 511 or STAT 511A).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 575 Models for Ecological Data Credits: 4 (3-2-0)

Course Description: Gaining insight about the operation of ecological processes using models and data.

Prerequisite: MATH 255 and STAT 340.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582A Study Abroad--Europe and British Isles: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations around Europe/British Isles. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582B Study Abroad--Americas: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations in Latin America. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582C Study Abroad--Asia/Oceania: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations within Asia and Oceania. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 582D Study Abroad--Africa: UN Climate Change Conference (COP) Credit: 1 (0-0-1)

Course Description: Provides hands-on experience in international climate negotiations including the Framework Convention on Climate Change (UNFCCC), Conference of the Parties (COP) in locations in Africa. Explore environmental sustainability issues on international teams with peers from institutions around the world. Teams examine environmental issues/policies through a research project, and have the opportunity to participate in actual climate action negotiations at the UN Climate Conference.

Prerequisite: None.

Registration Information: Must have concurrent registration in ESS 505. This is a partial semester course. Students should register for one of the following depending on where the conference is being held: ESS 582A, ESS 582B, ESS 582C, or ESS 582D.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 587 Internship Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 625 Ecology of Forest Production Credits: 3 (3-0-0)

Also Offered As: F 625.

Course Description: Develops student expertise in understanding carbon and nutrient flows in forests.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must have taken a 300-level course in ECOL. Credit not allowed for both ESS 625 and F 625. Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 650 Edge Effects--Place, Embodiment, Environment Credits: 3 (3-0-0)

Also Offered As: ANTH 650.

Course Description: Interdisciplinary thinking on questions of place, power, embodiment, and environmental adaptation. Drawing on human geography, ethnography, political ecology, and social-ecological theory, develop an understanding of boundaries and transitional zones as places of complex social and species exchange by looking at some key philosophical texts, but also applying theoretical understanding to specific case studies.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both ANTH 650 and ESS 650.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 655 Multivariate Analysis for Community Ecology Credits: 2 (2-0-0)

Course Description: Techniques and conceptual understanding for analyzing multivariate ecological data characteristic of community ecology, including ordination, classification, and permanova.

Prerequisite: (STAR 511 or STAT 511A) and (BZ 500 to 679 - at least 3 credits or ECOL 500 to 679 - at least 3 credits or ESS 500 to 679 - at least 3 credits or FW 500 to 679 - at least 3 credits).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

ESS 660 Biogeochemical Cycling in Ecosystems Credits: 3 (3-0-0)

Course Description: Biotic and abiotic processes responsible for distribution and fluxes of elements at ecosystem, landscape, and global scales.

Prerequisite: ECOL 500 to 699 - at least 3 credits or ESS 500 to 699 - at least 3 credits.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

ESS 692 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 695 Independent Study in Ecosystem Science Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

ESS 696 Group Study Credits: Var[1-6] (0-0-0)

Course Description: Group study projects on topics in ecosystem science and sustainability.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

ESS 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

Watershed Science (WR)

WR 204 Sustainable Watersheds (GT-SC2) Credits: 3 (3-0-0)

Also Offered As: GR 204.

Course Description: Effects of climate, land use, and water use on the sustainability of water quantity and quality.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GR 204, GR 304, WR 204 or WR 304.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

WR 406 Seasonal Snow Environments Credits: 3 (2-3-0)

Course Description: Evaluation of the physical environment; characteristics of snow; methods of studying snow; snow safety.

Prerequisite: None.

Restriction: Must be a: Junior, Senior, Senior - 5yr Bachelor, Senior - Post Bachelor, Senior - Second Bachelor.

Registration Information: Junior or senior standing. Must register for lecture and laboratory. Required field trips.

Term Offered: Spring (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

WR 416 Land Use Hydrology Credits: 3 (3-0-0)

Course Description: Fundamental concepts in hydrology and effects of land use on hydrologic processes.

Prerequisite: (ESS 210 or GEOL 110 and GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150 or GR 210 or SOCR 240) and (CIVE 202 or STAT 201 or STAT 301 or STAT 307 or STAT 315) and (PH 110 or PH 121 or PH 141).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 417 Watershed Measurements Credits: 3 (2-3-0)

Course Description: Instrument and field techniques in watershed science. Project design and data analysis.

Prerequisite: WR 416 and WR 418.

Registration Information: Must register for lecture and laboratory. This is a partial semester course. Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

WR 418 Land Use and Water Quality Credits: 3 (3-0-0)

Course Description: Physical, chemical, biological water quality parameters affecting land use; land management to maintain water quality; water quality standards, legislation.

Prerequisite: (CHEM 103 and CHEM 104 or CHEM 107 and CHEM 108 or CHEM 111 and CHEM 112) and (STAT 158) and (STAT 301 or STAT 315).

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

WR 419 Water Quality Analyses Credits: 3 (2-2-0)

Course Description: Analyze freshwater samples for water quality constituents. Analyze data along with public water quality datasets.

Prerequisite: (CHEM 107 or CHEM 111) and (STAT 301 or STAT 315) and (WR 417).

Registration Information: Must have concurrent registration in WR 418. Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 440 Watershed Problem Analysis Credits: 3 (2-2-0)

Course Description: Capstone integration of spatial watershed issues, focused on problem solving in watershed science.

Prerequisite: (NR 319 or NR 322) and (WR 416 and WR 418).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 474 Snow Hydrology Credits: 3 (3-0-0)

Course Description: Snowfall, accumulation, distribution, physical processes in the snowpack, energy balance, ablation and runoff, measurement methods, runoff forecasting.

Prerequisite: WR 416, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 486 Watershed Field Practicum Credits: 2 (0-6-0)

Course Description: Field visits to watershed management projects and sites of significant field studies.

Prerequisite: None.

Restriction: Must be a: Junior.

Registration Information: Junior standing. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 487 Internship Credits: Var[1-6] (0-0-0)

Course Description: Supervised work experience in professional settings related to Watershed Science.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

WR 492 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

WR 495 Independent Study-Watershed Resources Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

WR 510 Watershed Management in Developing Countries Credits: 2 (2-0-0)

Course Description: Watershed management problems, approaches, and solutions in developing countries.

Prerequisite: CIVE 322 or WR 416.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 511 Water Resource Development Credits: 3 (3-0-0)

Course Description: Basic principles of water resource management including surface and subsurface flows.

Prerequisite: None.

Registration Information: Graduate standing. Offered as an online course only. Written consent of instructor.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 512 Water Law for Non-Lawyers Credits: 3 (0-0-3)

Course Description: Basics of water law and policy for Colorado, western states, and the U.S.

Prerequisite: None.

Registration Information: Graduate standing. Written consent of instructor. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 513 Water Sustainability in the Western US Credits: 3 (3-0-0)

Course Description: Explores the historical, social, agricultural, and environmental issues related to water resources and the sustainability of its use in the Western United States.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Credit not allowed for both WR 513 and WR 580A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

WR 514 GIS and Data Analysis in Water Resources Credits: 3 (1-4-0)

Course Description: Exposure to multiple data analysis and GIS tools used to study water resources. Assess online data sources, download and pre-process digital data, and analyze water information.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and laboratory. Offered as an online course only. Credit not allowed for both WR 514 and WR 581A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

WR 516 Cumulative Effects and Watershed Analysis Credits: 3 (2-0-1)

Course Description: Definition, causal processes, and modeling of cumulative watershed effects; comparison and evaluation of current watershed analysis procedures.

Prerequisite: WR 416 and WR 417.

Registration Information: Must register for lecture and recitation.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 520 Evapotranspiration Credits: 2 (2-0-0)

Course Description: Theory, estimation, measurement, simulation, and application of evapotranspiration processes in hydrology.

Prerequisite: PH 122.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

WR 523C Environmental Data Science Applications: Water**Resources Credits: 2 (2-0-0)****Also Offered As:** ESS 523C.**Course Description:** Focus on analyzing and understanding water resources. Examine key innovations in deep learning for hydrological prediction and model parameterization, with a focus on cutting-edge techniques and hands-on analyses.**Prerequisite:** ESS 523A, may be taken concurrently or SOCR 523A, may be taken concurrently.**Registration Information:** This is a partial semester course. Credit not allowed for both ESS 523C and WR 523C.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 524 Modeling Watershed Hydrology Credits: 3 (2-2-0)****Also Offered As:** CIVE 524.**Course Description:** Development and application of watershed models: structure, calibration, evaluation, sensitivity analysis, simulation.**Prerequisite:** (CIVE 203 or STAT 301 or STAT 315) and (CIVE 322 or WR 416).**Registration Information:** Must register for lecture and laboratory. Credit not allowed for both CIVE 524 and WR 524.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 574 Advanced Snow Hydrology Credits: 4 (3-0-1)****Course Description:** Snow processes in hydrologic cycle; physical and conceptual methods of modeling; techniques for measuring different states and change rates.**Prerequisite:** CIVE 322 or ENVE 322 or WR 416.**Registration Information:** Must register for lecture and recitation.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 575 Snow Hydrology Field Methods Credit: 1 (0-2-0)****Course Description:** Field course offering hands-on experience in snow hydrology.**Prerequisite:** None.**Registration Information:** Enrollment in a graduate program. Required field trips.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 616 Hillslope Hydrology and Runoff Processes Credits: 3 (1-0-2)****Course Description:** Hillslope hydrology and runoff processes in different environments; implications for management and modeling.**Prerequisite:** CIVE 322 or WR 416.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Must register for lecture and recitation.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 671 Advanced Topics in Watershed Science Credits: Var[1-6] (0-0-0)****Course Description:** Explores advanced topics in watershed hydrology, biogeochemistry, and ecology.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** May be repeated for a maximum of 9 credits.**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 674 Data Issues in Hydrology Credits: 3 (3-0-0)****Course Description:** Types of data, data sources, data quality, missing data, spatial data, data usage, sensitivity in models, error, presentation of data and results.**Prerequisite:** WR 574.**Restriction:** Must be a: Graduate, Professional.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**WR 692 Seminar Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**WR 695 Independent Study Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**WR 696 Group Study Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**WR 698 Research Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**WR 699 Thesis Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**WR 712 Watershed Systems Credits: 3 (2-2-0)****Course Description:** Dynamic simulation of watershed behavior; application and evaluation of current hydrologic models.**Prerequisite:** (CIVE 322 or WR 416) and (STAT 340).**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Must register for lecture and laboratory.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.

WR 714 Water Quality for Wildland Managers Credits: 3 (3-0-0)

Course Description: Sampling, statistics of sampling, concepts of ionic equilibrium, water quality modeling, instream flow requirements.

Prerequisite: WR 418.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

WR 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

WR 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Ecosystem Science and Sustainability

The major in Ecosystem Science and Sustainability provides a strong scientific foundation in ecosystem ecology integrated with a broad knowledge of the cultural, social, economic, and political issues that are shaping the issue of sustainability. Students in the major learn to integrate science into real-world decision making, with the goal of developing sustainable strategies to maintain ecosystem services around the globe. We provide students with a broad base of experiential and collaborative learning opportunities, opportunities for undergraduate research, and the latest scientific knowledge about sustainability science and how organisms interact with their environments to form complex ecosystems. Opportunities for research, internships, practical and group-based learning, and field experiences in the beautiful Rocky Mountains and around the world, combined with an outstanding classroom education, build a solid foundation for applying sustainable resource management principles.

Learning Objectives

- 1. **Systems understanding:** Identify and distinguish system components and their interactions to explain and illustrate systems understanding.
- 2. **Ecosystem content and principles:** Identify, analyze, synthesize, and assess fundamental ecosystem concepts.
- 3. **Sustainability content and principles:** Understand and apply insight and understanding of ecosystem concepts and how these principals contribute to sustainable strategies for society.
- 4. **Ecosystem science and sustainability methods:** Discriminate among methods and apply these to examine complex ecosystem processes and sustainability issues.
- 5. **Problem solving:** Work independently and efficiently in teams, demonstrate respect for alternative points of view, and communicate and engage effectively, solving problems using a diverse set of analytical and applied tools.

Potential Occupations

Completion of the undergraduate degree qualifies students for a wide variety of careers related to sustainability and natural resource science. Examples of possible careers include: sustainability coordinator, ecologist, environmental educator, invasive species specialist, biological science technician, climate change scientist, natural resource specialist, or corporate environmental consultant. Students completing the undergraduate degree in Ecosystem Science and Sustainability will also be well prepared to succeed in graduate education in a variety of disciplines.

Undergraduate Advising

Would you like to learn more from a Peer Mentor or Academic Success Coordinator?
Please visit our ESS Advising page here (<https://warnercnr.colostate.edu/ess/ess-undergraduate-degree-tracks/advising-student-resources/>).

Requirements Effective Fall 2024

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3
ESS 120	Intro to Ecosystem and Watershed Sciences		1
ESS 129	Information Management for Sustainability		1
ESS 130	Intro to Systems Theory for Sustainability		1
Select one course from the following:			3
ANTH 100	Introductory Cultural Anthropology (GT-SS3)	3C	
AREC 202	Agricultural and Resource Economics (GT-SS1)	3C	
AREC 240/ECON 240	Economics of Environmental Sustainability (GT-SS1)	3C	
ECON 202	Principles of Microeconomics (GT-SS1)	3C	
ECON 204	Principles of Macroeconomics (GT-SS1)	3C	
POLS 101	American Government and Politics (GT-SS1)	3C	
POLS 103	State and Local Government and Politics (GT-SS1)	3C	

SOC 100	Introduction to Sociology (GT-SS3)	3C	
SOC 105	Social Problems (GT-SS3)	3C	
Select one group from the following:			4
Group A:			
BZ 110	Principles of Animal Biology (GT-SC2)	3A	
BZ 111	Animal Biology Laboratory (GT-SC1)	3A	
Group B:			
LIFE 102	Attributes of Living Systems (GT-SC1)	3A	
Select one group from the following:			5
Group A:			
CHEM 107	Fundamentals of Chemistry (GT-SC2)	3A	
CHEM 108	Fundamentals of Chemistry Laboratory (GT-SC1)	3A	
Group B:			
CHEM 111	General Chemistry I (GT-SC2)	3A	
CHEM 112	General Chemistry Lab I (GT-SC1)	3A	
Select one course from the following:			3-4
AB 111	Feeding the World in a Changing Climate (GT-SC2)	3A	
ATS 150	Science of Global Climate Change (GT-SC2)	3A	
GES 101	Foundations of Environmental Sustainability		
NR 120A	Environmental Conservation (GT-SC2)	3A	
Select one course from the following:			4
MATH 155	Calculus for Biological Scientists I (GT-MA1)	1B	
MATH 160	Calculus for Physical Scientists I (GT-MA1)	1B	
Arts and Humanities		3B	3
Total Credits			28-29
Sophomore			
ESS 210/GR 210	Physical Geography		3
LIFE 320	Ecology		3
Select one course from the following:			4
BZ 120	Principles of Plant Biology (GT-SC1)	3A	
LIFE 103	Biology of Organisms-Animals and Plants (GT-SC1)	3A	
Select one course from the following:			5
PH 121	General Physics I (GT-SC1)	3A	
PH 141	Physics for Scientists and Engineers I (GT-SC1)	3A	
Select one course from the following:			3
STAT 301	Introduction to Applied Statistical Methods		
STAT 307	Introduction to Biostatistics		
Arts and Humanities		3B	3
Diversity, Equity, and Inclusion		1C	3
Electives			4
Total Credits			28
Junior			
ESS 311	Ecosystem Ecology		3
ESS 312	Sustainability Science		3
ESS 320	Internship and Career Preparation		1
ESS 330	Quantitative Reasoning for Ecosystem Science		3
NR 319	Introduction to Geospatial Science		4
WR 204/GR 204	Sustainable Watersheds (GT-SC2)	3A	3
Select one course from the following:			3
CO 301B	Writing in the Disciplines: Sciences (GT-C03)	2	

CO 301C	Writing in the Disciplines: Social Sciences (GT-CO3)	2	
JTC 300	Strategic Writing and Communication (GT-CO3)	2	
LB 300	Specialized Professional Writing	2

Senior			
ESS 440	Practicing Sustainability	4C	4
NR 400	Public Communication in Natural Resources		3
Select one course from the following:			3
ESS 400	Global Perspectives on Sustainability	4A,4B	
ESS 411	Earth Systems Ecology	4A,4B	
ESS Electives (see list below)			15
Electives ¹			2-3
Total Credits			27-28
Program Total Credits:			120

Professional Development and Engagement Requirement

The timeline to complete the Professional Development and Engagement may vary. Suggested completion of summer coursework (NR 220 and some department-approved study abroad programs) may occur between sophomore and junior years or between junior and senior years. ESS 487 has a prerequisite of ESS 320, so should be completed after junior year. ESS 220/ESS 221/ESS 298 may be completed during the academic year, ideally during junior or senior year, thus moving elective credits to freshman and sophomore years.

Code	Title	Credits
Select one group from the following:		
Group A:		5
NR 220	Natural Resource Ecology and Measurements	
Group B: Students must obtain department pre-approval before enrolling in the appropriate course.		5
ESS 487	Internship	
or ESS 495	Independent Study in Ecosystem Science	
Group C:		5
ESS 220	Research Skills for Ecosystem Science I	
ESS 221	Research Methods for Ecosystem Science II	
ESS 298	Research	
Group D:		5
Department-approved Study Abroad		

Ecosystem Science and Sustainability Electives

Select a minimum of 15 credits not taken elsewhere in the program from the list below. A minimum of 3 credits must be from each of the three categories (Ecosystem Science, Sustainability, and Tools/analysis). The additional 6 credits can be from any category or from the longer uncategorized list. Additional coursework may be required due to prerequisites.

Code	Title	Credits
Ecosystem Science selections: select a minimum of 3 credits from the following courses:		
ESS 353	Global Change Impacts, Adaptation, Mitigation ²	3
ESS 405/SOCR 405	Global Agriculture and Environmental Change	3
ESS 411	Earth Systems Ecology	3
ESS 432/MIP 432	Microbial Ecology	3
ESS 433/MIP 433	Microbial Ecology Laboratory	1
ESS 474	Limnology	3
ESS 524	Foundations for Carbon/Greenhouse Gas Mgmt	3
ESS 543/ATS 543	Global Climate Change	2
Sustainability selections: select a minimum of 3 credits from the following courses:		
ESS 353	Global Change Impacts, Adaptation, Mitigation ²	3
ESS 365	Global Climate Justice	3
ESS 400	Global Perspectives on Sustainability	3
ESS 401	Sustainability of Parks and Protected Places	3
ESS 501	Principles of Ecosystem Sustainability	3

ESS 505	International Climate Negotiations	2	BZ 440	Plant Physiology	3
ESS 506	Virtual International Climate Negotiations	1	BZ 441	Plant Physiology Laboratory	2
ESS 542	Greenhouse Gas Policies	2	BZ 450	Plant Ecology	4
ESS 582A	Study Abroad--Europe and British Isles: UN Climate Change Conference (COP)	1	BZ 471	Stream Biology and Ecology	3
ESS 582B	Study Abroad--Americas: UN Climate Change Conference (COP)	1	BZ 472	Stream Biology and Ecology Laboratory	1
ESS 582C	Study Abroad--Asia/Oceania: UN Climate Change Conference (COP)	1	CHEM 338	Environmental Chemistry	3
ESS 582D	Study Abroad--Africa: UN Climate Change Conference (COP)	1	ECON 304	Intermediate Macroeconomics	3
WR 512	Water Law for Non-Lawyers	3	ECON 306	Intermediate Microeconomics	3
Tools and analysis selections: select a minimum of 3 credits from the following courses:			ECON 317	Population Economics	3
ESS 523A	Environmental Data Science Applications: Introduction	5	ERHS 448	Environmental Contaminants	3
ESS 523B/SOCR 523B	Environmental Data Science Applications: Food and Agriculture	2	ETST 352/SOWK 352	Indigenous Women, Children, and Tribes	3
ESS 523C/WR 523C	Environmental Data Science Applications: Water Resources	2	ETST 365	Global Environmental Justice Movements	3
ESS 555/ANeq 555	Life Cycle Assessment for Sustainability	3	ETST 420	Disability, Race, Gender in the Environment	3
NR 323/GR 323	Remote Sensing and Image Interpretation	3	ETST 444/SOC 444	Federal Indian Law and Policy	3
NR 426	Programming for GIS I	2	F 311	Forest Ecology	3
NR 427	Programming for GIS II	2	F 322	Economics of the Forest Environment	3
NR 453	Geospatial Field Methods in Natural Resources	2	F 324	Fire Effects and Adaptations	3
NR 450	Geospatial Project Design and Analysis	4	F 466/HORT 466	Urban and Community Forestry	3
WR 416	Land Use Hydrology	3	FW 204	Introduction to Fishery Biology	3
WR 418	Land Use and Water Quality	3	FW 260	Principles of Wildlife Management	3
WR 474	Snow Hydrology	3	FW 300	Biology and Diversity of Fishes	2
Select 0-6 credits from the following courses:			FW 301	Ichthyology Laboratory	1
ANTH 329	Cultural Change	3	FW 375	Field Wildlife Studies	3
ANTH 330	Human Ecology	3	FW 400	Conservation of Fish in Aquatic Ecosystems	3
ANTH 414/ETST 414	Development in Indian Country	3	FW 477	Wildlife Habitat Use and Management	3
ANTH 415	Indigenous Ecologies and the Modern World	3	GES 440/ATS 440	Sea Level Rise and a Sustainable Future	3
ANTH 417	Indigenous Environmental Stewardship	3	GES 470	Applications of Environmental Sustainability	3
ANTH 453	Impacts on Ancient Environments	3	GR 303	Mountain Geography	3
ANTH 479/IE 479	International Development Theory and Practice	3	GR 320	Cultural Geography	3
AREC 340/ECON 340	Introduction-Economics of Natural Resources	3	GR 330	Urban Geography	3
AREC 341	Environmental Economics	3	GR 348	Biogeography	3
AREC 440	Advanced Environmental and Resource Economics	3	GR 410	Climate Change: Science, Policy, Implications	3
AREC 444/ECON 444	Economics of Energy Resources	3	GR 430	Land Change Science and Remote Sensing	3
ATS 350	Introduction to Weather and Climate	2	GR 431	Land Change Science Lab	1
ATS 351	Introduction to Weather and Climate Lab	1	GR 448	Forest Biogeography and Climate Change	3
ATS 556	Climate Intervention to Cool a Warming Planet	2	HIST 355	American Environmental History	3
BSPM 302	Applied and General Entomology	2	HIST 476	History of America's National Parks	3
BSPM 308	Ecology and Management of Weeds	3	NR 300	Biological Diversity	3
BSPM 361	Elements of Plant Pathology	3	NR 320	Natural Resources History and Policy	3
BSPM 365	Integrated Tree Health Management	4	NR 321	Natural Resource Rights and Reconciliation	3
			NR 330	Human Dimensions in Natural Resources	3

Major in Watershed Science and Sustainability

Watershed Science and Sustainability is the interdisciplinary study of the natural processes and human activities that affect freshwater resources. Water is a critical component of Earth's ecosystems and is used for human consumption, agriculture, energy production, transportation, and recreation. Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide. Across all of the Watershed Science concentrations, students will gain foundational knowledge in physical, geological, and biological controls on how water moves through ecosystems and how these systems, in turn, are controlled by social and legal systems. Through three different concentrations, students will have the opportunity to specialize in the biophysical, data analysis, or sustainability components of understanding how watersheds work.

No matter which concentration students choose, they will share an ability to immediately engage in the quickly expanding fields of water resource management, watershed monitoring, sustainable water decision making, and other related fields. Students from this program have gone on to work as federal hydrologists, environmental consultants, municipal water resource managers, data scientists, graduate students, and other related fields.

Concentrations

- Watershed Data Concentration
- Watershed Science Concentration
- Watershed Sustainability Concentration

Major in Watershed Science and Sustainability, Watershed Data Concentration

The Watershed Data concentration focuses on fusing data science skills and techniques with deep knowledge of the physical, chemical, social, and biological factors that affect the quantity and quality of water as it moves through ecosystems. Students will engage in field, laboratory, and classroom research in both watershed and data science courses, and graduate with a Minor in Applied Data Science in addition to their major. The program starts with students taking core foundational physical and mathematical courses that build towards an understanding of how to use watershed data to better understand watershed function and management. Core classes emphasize watershed science, data analysis, data science techniques, and combining these skills for dynamic research and reporting.

Learning Objectives

- Upon successful completion, students will be able to:
1. Articulate core concepts in watershed science and sustainability including climate processes, surface and subsurface hydrology, water quality, human uses of water, and sustainable water management.
 2. Apply data science techniques to spatial and temporal datasets to address watershed and water resource problems.
 3. Collect, analyze, and interpret meteorological, hydrological, and water quality, water use and management data.
 4. Analyze watershed problems and sustainability challenges using geospatial data, field observations, sensor data, and watershed models.
 5. Demonstrate strong critical thinking, writing, and oral communication skills.

Major in Watershed Science and Sustainability, Watershed Science Concentration

The Watershed Science concentration focuses on the physical, chemical, social, and biological factors that affect the quantity, quality, and flux of water through engagement in the field, laboratory, and classroom. Students begin their program with core courses that build a strong foundation in the physical and natural sciences in preparation for upper-division coursework in land use and snow hydrology, land use and

water quality, and watershed problem analysis. Courses emphasize field learning and technical skills, with core classes emphasizing watershed measurements, data analysis, modeling, and research. Students graduating in the watershed science concentration will qualify for federal hydrology jobs under the Office of Personnel Management series 1315.

Learning Objectives

Upon successful completion, students will be able to:

1. Articulate core concepts in watershed science and sustainability including climate processes, surface and subsurface hydrology, water quality, human uses of water, and sustainable water management.
2. Describe how different types of land and water use affect hydrologic processes and water quality.
3. Collect, analyze, and interpret meteorological, hydrological, and water quality, water use and management data.
4. Analyze watershed problems and sustainability challenges using geospatial data, field observations, sensor data, and watershed models.
5. Demonstrate strong critical thinking, writing, and oral communication skills.

Major in Watershed Science and Sustainability, Watershed Sustainability Concentration

In the Watershed Sustainability concentration, students will focus on how human systems interact with the physical, chemical, and biological processes in watersheds. They will combine foundational science courses with background in sociology and economics, in preparation for upper division courses on water resources, water economics, and sustainability.

Learning Objectives

Upon successful completion, students will be able to:

1. Articulate core concepts in watershed science and sustainability including climate processes, surface and subsurface hydrology, water quality, human uses of water, and sustainable water management.
2. Describe how social, institutional, governance, and economic factors affect allocation and management of water resources
3. Analyze, and interpret meteorological, hydrological, and water quality, water use and management data.
4. Analyze watershed problems and sustainability challenges using geospatial data, field observations, sensor data, and watershed models.
5. Demonstrate strong critical thinking, writing, and oral communication skills.

Minor in Watershed Science

The Watershed Science minor addresses land use hydrology and sustainable watersheds through a set of core courses and engages students in experiential learning in a watershed field course. The program offers a broad and flexible selection of additional coursework options that emphasize physical, biogeochemical, and societal aspects of water resources and watershed management. Students can select the combination of courses that best fits their interests and complements their major.

Learning Objectives

Upon successful completion, students will be able to:

1. Demonstrate understanding of the key concepts in watershed science, including surface and subsurface hydrology and water quality.
2. Demonstrate understanding of land use effects on fresh water resources.
3. Develop skills in collection and analysis in two or more areas, such as terrain meteorological, hydrological, and/or water quality analyses.

Undergraduate Advising

Would you like to learn more from a Peer Mentor or Academic Success Coordinator?

Please visit our ESS Advising page here (<https://warnercnr.colostate.edu/ess/ess-undergraduate-degree-tracks/advising-student-resources/>).

Requirements Effective Fall 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

GEOL 454	Geomorphology	
GR 410	Climate Change: Science, Policy, Implications	
NR 310	Ecosystem Services and Human Well-Being	
NR 320	Natural Resources History and Policy	
SOCR 470	Soil Physics	
SOCR 471	Soil Physics Laboratory	
SOC 461	Water and Social Justice	
WR 406	Seasonal Snow Environments	
WR 417	Watershed Measurements	
WR 418	Land Use and Water Quality	
WR 474	Snow Hydrology	

Program Total Credits: 21-22

Graduate Certificate in Carbon Management

Demand is growing for professionals trained in carbon accounting and tracking greenhouse gas emissions. The US Securities and Exchange Commission has proposed new rules requiring publicly traded companies to disclose their greenhouse gas emissions. Students in the Graduate Certificate in Carbon Management learn the technical skills needed to do greenhouse gas emission accounting and how to develop GHG accounting systems. They also learn about current and emerging policies, and the tradeoffs between carbon, nitrous oxide and methane.

The Graduate Certificate in Carbon Management is designed to deliver the latest fundamental knowledge and skills to practicing environmental/sustainability professionals to enable them to advance their careers by expanding into this emerging area.

This certificate program can be completed through traditional, on-campus coursework or through CSU Online (<https://www.online.colostate.edu/certificates/carbon-management/>).

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion of the program, students will be able to:

- 1. Apply quantitative and qualitative methods to the study of greenhouse gas emission management.
- 2. Explain greenhouse gas sources and sinks and how they might be managed.
- 3. Discuss current issues in greenhouse gas policies and climate change.
- 4. Evaluate the linkages between socioeconomic and ecological processes driving increases in atmospheric greenhouse gas concentrations.
- 5. Apply methods of conducting GHG mitigation analyses following current ISO standards.
- 6. Design, evaluate, set up, test and operate GHG information management systems and GHG assurance processes that are appropriate for specific applications and that conform to applicable standards.
- 7. Carry out basic greenhouse gas assessments using systems approaches and integrative methods, including the application of life cycle analysis and other numerical quantification tools.

Requirements
Effective Fall 2019

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Required Courses:		
ESS 524	Foundations for Carbon/Greenhouse Gas Mgmt	3
ESS 542	Greenhouse Gas Policies	2
ESS 543/ATS 543	Global Climate Change	2
Select one course from the following:		3-4
ANEQ 626	Animal Nutrition, Emissions, and Management	
ESS 545	Applications in Greenhouse Gas Inventories	
ESS 555/ ANEQ 555	Life Cycle Assessment for Sustainability	
ESS 625/F 625	Ecology of Forest Production	
Program Total Credits:		10-11

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Water Resources

This certificate program is designed to provide college graduates, current practitioners, and new professionals with targeted knowledge and skills to advance their understanding and career mobility related to water resources planning, management, and policy. This skillset can be applied to a wide array of natural resource managers, as water planning is essential to sound governmental policy and community management. All courses include case studies and exercises pertaining to various

water issues in Colorado and the United States, as well as international examples.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion, students will be able to:

- 1. Apply and demonstrate the principles of the hydrologic cycle and explain complex interactions of groundwater and surface water.
- 2. Recognize and articulate the foundational assumptions of water resource management in multiple settings (Colorado, the US and international).
- 3. Conduct research and analysis of water data, both temporally and spatially, using spreadsheets, geographic information systems and statistical software.
- 4. Contrast and compare water policy, laws, and regulation to assess potential changes to water management.

Requirements
Effective Fall 2019

Additional coursework may be required due to prerequisites.

Code	Title	Credits
WR 511	Water Resource Development	3
or CIVE 544	Water Resources Planning and Management	
WR 512	Water Law for Non-Lawyers	3
WR 514	GIS and Data Analysis in Water Resources	3
Program Total Credits:		9

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Science in Ecosystem Sustainability, Plan A

CSU's innovative Master of Science in Ecosystem Sustainability, Plan A, is a research degree that enables students to develop core competencies in ecosystem science—the study of organisms and the environment—and apply that knowledge to address real-world issues.

The program serves as a foundation for a wide range of careers, including academic and scholarly professions, and work in government agencies, non-governmental organizations, and corporate and entrepreneurial environments.

We develop leaders in sustainability science: a new generation of practitioners able to address complex, integrated social-ecological problems in collaborative partnerships with researchers, resource users, and decision-makers.

A focus on solutions

Students work at the cutting edge of new research on ecosystem sustainability. Collaborating with some of the world's leading ecosystem and sustainability scientists, students explore solutions to global problems related to water and natural resources, food supplies, energy,

greenhouse gas management, land-use change, climate change, and environmental justice, among others.

Learning Objectives

Successful students will acquire:

1. Detailed knowledge of quantitative and qualitative methods.
2. An understanding of complex ecosystem functioning.
3. A transdisciplinary understanding of social-ecological processes.
4. The ability to work in teams across disciplines and with decision-makers, resource users, and team members outside of academia.
5. The skills to conduct integrated assessments using systems approaches; conceptual, mathematical, geospatial, and statistical models; and innovative, collaborative processes.
6. The ability to apply critical thinking in the development of sustainable systems at local and global scales.
7. Advanced training in the methods of urban ecology and managing the sustainable cities of the future.

Local and Global Relevance

Our graduate community benefits from a highly networked program with close working links to the city governments of Fort Collins, Boulder, and Denver, and to local agencies, farming communities, and non-profits across the Front Range. We work at the highest elevations of the Rockies, in the lowest short-grass steppe regions, in cities, and neighborhoods. Our active research programs are spread around the globe: from northern, eastern, and southern Africa to China, Mongolia, Nepal, Tibet, Honduras, and Mexico.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Requirements Effective Fall 2023

Code	Title	Credits
Required Core Courses:		
ESS 501	Principles of Ecosystem Sustainability	3
ESS 692	Seminar	1
Areas – Select a minimum of 20 credits from the four Areas indicated below:		20
Ecosystem Science		
At least one course must be selected from the following (2-3 credits):		
ESS 524	Foundations for Carbon/Greenhouse Gas Mgmt	
ESS 543/ATS 543	Global Climate Change	
ESS 625/F 625	Ecology of Forest Production	
ESS 660	Biogeochemical Cycling in Ecosystems	
Additional courses may be selected from the following:		
ATS 753	Global Hydrologic Cycle	
ATS 760	Global Carbon Cycle	
BZ 572	Phytoremediation	
BZ 642	Plant Metabolism	
ECOL 505	Foundations of Ecology	
ECOL 600	Community Ecology	
ECOL 620	Applications in Landscape Ecology	

F 510	Ecophysiology of Trees
F 624	Fire Ecology
FW 555	Conservation Biology
HORT 571	Soil-Plant-Water Relations/Water Stress
RS 531	World Grassland Ecogeography
RS 630	Ecology of Grasslands and Shrublands
SOCR 522	Micrometeorology
SOCR 540	Soil-Plant-Nutrient Relationships
WR 574	Advanced Snow Hydrology
WR 616	Hillslope Hydrology and Runoff Processes
Ecosystem Sustainability	
The following course must be taken (2 credits):	
ESS 542	Greenhouse Gas Policies
Additional courses may be selected from the following:	
AGRI 500	Advanced Issues in Agriculture
AGRI 521	Emerging Issues and Challenges for Global Agr
AGRI 602	Bioenergy Policy, Economics, and Assessment
AGRI 632	Managing for Ecosystem Sustainability
AGRI 635	Integrated Forage Management
AGRI 637	Understanding Policy and Emerging Issues
AGRI 638	Ecosystem Services on Agricultural Lands
ANTH 529	Anthropology and Sustainable Development
ANTH 530	Human-Environment Interactions
AN EQ 548	Issues in Manure Management
AREC 542	Applied Advanced Water Resource Economics
AREC 566/ SOC 566	Contemporary Issues in Developing Countries
ECOL 592	Interdisciplinary Seminar in Ecology
GES 542	Biobased Fuels, Energy, and Chemicals
NR 515	Natural Resources Policy and Biodiversity
NR 535	Action for Sustainable Behavior
NR 550	Sustainable Military Lands Management
PHIL 565	Seminar in Environmental Philosophy
POLS 670	Politics of Environment and Sustainability
POLS 709	Environmental Politics in the U.S.
POLS 729	Political Theory and the Environment
POLS 739	International Environmental Politics
POLS 749	Comparative Environmental Politics
POLS 759	Environmental Policy and Administration
RS 565	Riparian Ecology and Management
SOC 564	Environmental Justice
SOC 666	Globalization and Socioeconomic Restructuring
SOC 668	Environmental Sociology
SOC 669	Global Inequality and Change
WR 510	Watershed Management in Developing Countries

Quantitative Methods

At least one course must be selected from the following (4 credits):

ESS 545	Applications in Greenhouse Gas Inventories
ESS 565	Niche Models
ESS 575	Models for Ecological Data

Additional courses may be selected from the following:

ANTH 554/ ESS 554	Ecological and Social Agent-based Modeling
AREC 535/ ECON 535	Applied Econometrics
AREC 540/ ECON 540	Environmental and Natural Resource Economics
ECOL 620	Applications in Landscape Ecology
F 521	Advanced Quantitative Methods in Forestry II
GEOL 551	Groundwater Modeling
LAND 520	Geographic Information Systems
NR 503/GR 503	Remote Sensing and Image Analysis
NR 505	Concepts in GIS
NR 512	Spatial Statistical Modeling-Natural Resources
NR 523/STAT 523	Quantitative Spatial Analysis
NR 565	Principles of Natural Resources Ecology
RS 532	Rangeland Ecosystem Sampling
SOCR 620	Modeling Ecosystem Biogeochemistry
SOCR 670	Terrestrial Ecosystems Isotope Ecology
STAA 551	Regression Models and Applications
STAA 552	Generalized Regression Models
STAA 553	Experimental Design
STAA 554	Mixed Models
STAA 561	Probability with Applications
STAA 562	Mathematical Statistics with Applications
STAA 565	Quantitative Reasoning
STAA 566	Data Visualization Methods
STAA 567	Computational and Simulation Methods
STAA 571	Survey Statistics
STAA 572	Nonparametric Methods
STAA 573	Analysis of Time Series
STAA 574	Methods in Multivariate Analysis
STAA 575	Applied Bayesian Statistics
STAA 576	Methods in Spatial Statistics
STAR 511	Design and Data Analysis for Researchers I
STAR 512	Design and Data Analysis for Researchers II
STAT 521	Stochastic Processes I
STAT 525	Analysis of Time Series I
STAT 540	Data Analysis and Regression
STAT 544/ ERHS 544	Biostatistical Methods for Quantitative Data
STAT 547/ CIVE 547	Statistics for Environmental Monitoring
STAT 560	Applied Multivariate Analysis
STAT 570	Nonparametric Statistics
STAT 600	Statistical Computing

STAT 605	Theory of Sampling Techniques
STAT 640	Design and Linear Modeling I
STAT 645	Categorical Data Analysis and GLIM
STAT 650	Design and Linear Modeling II
WR 524/CIVE 524	Modeling Watershed Hydrology
WR 575	Snow Hydrology Field Methods
WR 674	Data Issues in Hydrology

Communication/Collaboration

At least one course must be selected from the following (1-3 credits):

ECOL 693	Research Seminar
JTC 614	Public Communication Campaigns
JTC 660	Communication and Innovation
JTC 661	Information Design
JTC 662	Communicating Science and Technology
NR 501	Leadership and Public Communications

Research and Thesis (minimum credits required):

ESS 698	Research	3
ESS 699	Thesis	3

Program Total Credits: 30

A minimum of 30 credits are required to complete this program.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website

9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Science in Watershed Science, Plan A

Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide, and we need scientists who can address complex water issues. The watershed science program focuses on how water moves through the landscape, what factors affect its quality, and how to manage water resources. Students in the Master of Science in Watershed Science, Plan A program work closely with research scientists in the classroom, laboratory, and field on both basic and applied watershed science research. Students are exposed to cutting-edge field, data analysis, and modeling techniques through flexible programs of study and access to a breadth of water-related courses throughout the university. Students also have opportunities to participate in seminars and field courses.

The program emphasizes the advisor/student relationship. There is no core curriculum; rather, the advisor and student develop a program of study that best meets the requirements of the research to be undertaken and the needs of the student, culminating in the completion of a master's thesis.

The program has a strong record of employment and acceptance to leading doctoral programs after graduation, with graduates holding positions in federal, state, and local natural resource agencies, consulting firms, non-governmental organizations, industry, teaching, and research. Most students complete coursework that enables them to meet the U.S. governmental hydrologist certification.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

1. **Systems understanding:** Identify and distinguish systems components and their interactions to explain, illustrate and analyze system understanding.
2. **Watershed science content and principals:** Apply complex watershed science principals to complex problems to develop sustainable solutions.
3. **Problem solving:** Work in teams and communicate effectively using a diverse set of analytical and applied tools.
4. **Interdisciplinary understanding:** Work in an interdisciplinary environment and demonstrate respect for alternative points of view.

Requirements

Program requirements are:

- 30 credits that meet Graduate School requirements
- Thesis
- Selected courses approved by advisor and committee – Prefixes that can be used to meet course requirements: ANTH, AREC, ATS, BZ, CHEM, CIS, CIVE, ECOL, ECON, ENVE, ESS, FW, F, GR, GEOL, GRAD, HORT, MATH, NR, NRRT, RS, SOC, SOCR, STAA, STAT, WR.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website

9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Science in Watershed Science, Plan B

Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide, and we need scientists who can address complex water issues. The watershed science program focuses on how water moves through the landscape, what factors affect its quality, and how to manage water resources. Students in the Master of Science in Watershed Science, Plan B program work closely with research scientists in the classroom, laboratory, and field on applied watershed science research. Students are exposed to cutting-edge field, data analysis, and modeling techniques through flexible programs of study and access to a breadth of water-related courses throughout the university. Additionally, students participate in seminars and field courses to further develop their skills. Advisor and student develop a program of study that best meets the requirements of the research to be undertaken and the needs of the student, culminating in the completion of a professional report.

The program has a strong record of employment, with graduates holding positions in federal, state, and local natural resource agencies, consulting firms, nongovernmental organizations, industry, teaching, and research. Most students complete coursework that enables them to meet the U.S. governmental hydrologist certification.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

1. **Systems understanding:** Identify and distinguish systems components and their interactions to explain, illustrate and analyze system understanding.

2. **Watershed science content and principals:** Apply complex watershed science principals to complex problems to develop sustainable solutions.
3. **Problem solving:** Work in teams and communicate effectively using a diverse set of analytical and applied tools.
4. **Interdisciplinary understanding:** Work in an interdisciplinary environment and demonstrate respect for alternative points of view.

Requirements

Program requirements are:

- 30 credits that meet Graduate School requirements
- Professional Report
- Selected courses approved by advisor and committee – Prefixes that can be used to meet course requirements: ANTH, AREC, ATS, BZ, CHEM, CIS, CIVE, ECOL, ECON, ENVE, ESS, FW, F, GR, GEOL, GRAD, HORT, MATH, NR, NRRT, RS, SOC, SOCR, STAA, STAT, WR.

Professional Science Master's in Ecosystem Science and Sustainability

The Professional Science Master's (PSM) in Ecosystem Science & Sustainability (PSM) is an excellent course of study for students eager to work in environmental sustainability right away or for working professionals looking to transition quickly or advance their careers.

- The PSM is coursework-focused – the degree does not require a thesis.
- Through coursework, students gain expertise in sustainable management solutions through policy analysis, applied methods, and skills-based learning.
- Students choose from three different degree specializations: carbon management, watershed science, or sustainable food systems.
- Students are required to participate in an intensive 4-credit, 400-hour internship, where they gain hands-on knowledge in their chosen field, implement the skills learned within the classroom, and begin to establish a professional network. The program has successfully placed many students in paid internships focused on their career objectives.

Program Learning Objectives

After successfully completing the program, students will be able to:

1. Describe ecosystem processes and sustainable management strategies to maintain those processes.
2. Discuss current issues in environmental policy related to ecosystem sustainability.
3. Evaluate the linkages between socioeconomic and ecological processes that influence ecosystem sustainability.
4. Apply quantitative and qualitative methods to assess ecosystem sustainability using systems approaches and integrative methods.

5. Build, work within, and lead interdisciplinary teams in a professional environment.

Institutional Learning Objectives

How the Program Learning Objectives (PLOs) relate to CSU's Institutional Learning Objectives:

- **Creativity:** The development of sustainable management strategies (PLO 2) and the promotion of policies enhancing ecosystem sustainability (PLO 3) require creative problem-solving that integrates diverse perspectives on human and ecosystem interactions. This aligns with the ILO on creativity since generating innovative solutions to complex sustainability challenges requires creative thinking across disciplines and analytical approaches.
- **Reasoning:** Evaluating socioeconomic and ecosystem linkages (PLO 1) and the development of sustainable management strategies (PLO 2) directly engage with the ILO of reasoning through the development and application of a diverse analytical skillset necessary to address complex environmental problems.
- **Communication:** The ability to build, work within, and lead interdisciplinary teams (PLO 4) and promote policies for ecosystem sustainability (PLO 3) requires advanced communication skills. These objectives require students learn to listen substantively and communicate both effectively and respectfully to professional and public audiences.
- **Responsibility:** The entire curriculum of the program encourages an understanding of the responsibility professionals have toward promoting sustainability and human well-being. By focusing on the determinants of sustainability (PLO 1) and the development of strategies and policies that consider the long-term health of ecosystems (PLOs 2 and 3), students learn about personal and social responsibility in a global context.
- **Collaboration:** Building, working within, and leading interdisciplinary teams in a professional environment (PLO 4) directly supports the ILO on collaboration. This PLO develops skills for solving sustainability challenges while emphasizing the benefits of shared discourse, open inquiry, and constructive disagreement

In addition to the PSM degree, we offer graduate certificates that provide further training through 9-15 credits of graduate-level coursework to be completed on the CSU campus or online, allowing credentialed specializations in carbon management and water resource planning, management, and policy.

The PSM in Ecosystem Science and Sustainability enables students from diverse academic backgrounds, such as environmental studies, business, engineering, natural resources, and agriculture, to understand the latest ecosystem science and develop the skills needed for emerging professions in areas such as greenhouse gas/carbon management, water sustainability and watershed management, and climate adaptation.

The PSM in Ecosystem Science & Sustainability is an affiliated Professional Science Master's (PSM) degree. Affiliation is administered by the Commission on Affiliation of PSM Programs (<https://www.professionalsciencemasters.org/>) (formerly named PSM National Office) to ensure a strong and distinctive PSM brand. The PSM is designed for students seeking a graduate degree in science or mathematics and understanding the need for developing workplace skills valued by top employers.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Requirements Effective Fall 2024

Code	Title	Credits
ESS 500	Integrated Ecosystem/Sustainability Analysis	2
ESS 523A	Environmental Data Science Applications: Introduction	5
ESS 587	Internship	4
ESS 692	Seminar	1
Select one course from the following:		2-3
ESS 542	Greenhouse Gas Policies	
WR 512	Water Law for Non-Lawyers	
Foundational Elective Courses ^{1,2}		9-10
Data Tools and Quantitative Analysis Elective Courses ³		12
Program Total Credits:		36

A minimum of 36 credits are required to complete this program.

¹ Students who take ESS 542 to meet curriculum requirements must take 10 credits of Foundational Elective Courses.

² Select courses (e.g. water resources, hydrology, foundations in greenhouse management and accounting, climate change, international climate negotiations, global agriculture and environmental change, etc.) with approval of advisor and graduate committee.

³ Select courses (e.g. GIS, remote sensing, numerical analysis, modeling, greenhouse gas inventory, hydrological data analysis, etc.) with approval of advisor and graduate committee.

15. Graduation	Ceremony information is available from the Graduate School website

Ph.D. in Ecosystem Sustainability

Many physical, ecological, and social factors interact to shape the future of our ecosystems and societies. CSU's innovative Ph.D. in Ecosystem Sustainability enables students to develop core competencies in ecosystem science—the study of organisms and the environment—and apply that knowledge to address real-world issues. We help develop leaders in sustainability science: a new generation of practitioners able to

address complex, integrated social-ecological problems in collaborative partnerships with researchers, resource users, and decision-makers.

Our graduates have the tools to understand complex scientific questions in sustainability, and the leadership and collaborative skills required to address current and future issues in sustainability. The program serves as a foundation for a wide range of careers, including academic and scholarly professions, and work in government agencies, non-governmental organizations, and corporate and entrepreneurial environments.

A focus on solutions

Students work at the cutting edge of new research on ecosystem sustainability. Collaborating with some of the world's leading ecosystem and sustainability scientists, students explore solutions to global problems related to water and natural resources, food supplies, energy, greenhouse gas management, land-use change, climate change, and environmental justice, among others.

Learning Objectives

Upon successful completion, students will have:

1. Detailed knowledge of quantitative and qualitative methods.
2. Understanding of complex ecosystem functioning.
3. Transdisciplinary understanding of social-ecological processes.
4. Ability to work in teams across disciplines and with decision-makers, resource users, and team members outside of academia.
5. Skills to conduct integrated assessments using systems approaches, conceptual, mathematical, geospatial, and statistical models, and innovative collaborative processes.
6. Ability to apply critical thinking in the development of sustainable systems at local and global scales.
7. Advanced training in the methods of urban ecology and on managing the sustainable cities of the future.

Local and Global Relevance

Our graduate community benefits from a highly networked program with close working links to the city governments of Fort Collins, Boulder, and Denver, and to local agencies, farming communities, and non-profits across the Front Range. We work at the highest elevations of the Rockies, in the lowest short grass steppe regions, in cities, and in neighborhoods. Our active research programs are spread around the globe: from northern, eastern, and southern Africa to China, Mongolia, Nepal, Tibet, Honduras, and Mexico.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Requirements Effective Fall 2023

Code	Title	Credits
Required Core Courses:		
ESS 501	Principles of Ecosystem Sustainability	3
ESS 692	Seminar	1
Areas – Select a minimum of 20 credits from the four Areas indicated below:		20
Ecosystem Science		

At least one course must be selected from the following (2-3 credits):

ESS 524	Foundations for Carbon/Greenhouse Gas Mgmt
ESS 543/ATS 543	Global Climate Change
ESS 625/F 625	Ecology of Forest Production
ESS 660	Biogeochemical Cycling in Ecosystems

Additional courses may be selected from the following:

ATS 753	Global Hydrologic Cycle
ATS 760	Global Carbon Cycle
BZ 572	Phytoremediation
BZ 642	Plant Metabolism
ECOL 505	Foundations of Ecology
ECOL 600	Community Ecology
ECOL 620	Applications in Landscape Ecology
F 510	Ecophysiology of Trees
F 624	Fire Ecology
FW 555	Conservation Biology
HORT 571	Soil-Plant-Water Relations/Water Stress
RS 531	World Grassland Ecogeography
RS 630	Ecology of Grasslands and Shrublands
SOCR 522	Micrometeorology
SOCR 540	Soil-Plant-Nutrient Relationships
WR 574	Advanced Snow Hydrology
WR 616	Hillslope Hydrology and Runoff Processes

Ecosystem Sustainability

The following course must be taken (2 credits):

ESS 542	Greenhouse Gas Policies
---------	-------------------------

Additional courses may be selected from the following:

AGRI 500	Advanced Issues in Agriculture
AGRI 521	Emerging Issues and Challenges for Global Agr
AGRI 602	Bioenergy Policy, Economics, and Assessment
AGRI 632	Managing for Ecosystem Sustainability
AGRI 635	Integrated Forage Management
AGRI 637	Understanding Policy and Emerging Issues
AGRI 638	Ecosystem Services on Agricultural Lands
ANTH 529	Anthropology and Sustainable Development
ANTH 530	Human-Environment Interactions
AN EQ 548	Issues in Manure Management
AREC 542	Applied Advanced Water Resource Economics
AREC 566/ SOC 566	Contemporary Issues in Developing Countries
ECOL 592	Interdisciplinary Seminar in Ecology
GES 542	Biobased Fuels, Energy, and Chemicals
NR 515	Natural Resources Policy and Biodiversity
NR 535	Action for Sustainable Behavior
NR 550	Sustainable Military Lands Management
PHIL 565	Seminar in Environmental Philosophy
POLS 670	Politics of Environment and Sustainability

POLS 709	Environmental Politics in the U.S.
POLS 729	Political Theory and the Environment
POLS 739	International Environmental Politics
POLS 749	Comparative Environmental Politics
POLS 759	Environmental Policy and Administration
RS 565	Riparian Ecology and Management
SOC 564	Environmental Justice
SOC 666	Globalization and Socioeconomic Restructuring
SOC 668	Environmental Sociology
SOC 669	Global Inequality and Change
WR 510	Watershed Management in Developing Countries

Quantitative Methods

At least one course must be selected from the following (4 credits):

ESS 545	Applications in Greenhouse Gas Inventories
ESS 565	Niche Models
ESS 575	Models for Ecological Data

Additional courses may be selected from the following:

ANTH 554/ ESS 554	Ecological and Social Agent-based Modeling
AREC 535/ ECON 535	Applied Econometrics
AREC 540/ ECON 540	Environmental and Natural Resource Economics
ECOL 620	Applications in Landscape Ecology
F 521	Advanced Quantitative Methods in Forestry II
GEOL 551	Groundwater Modeling
LAND 520	Geographic Information Systems
NR 503/GR 503	Remote Sensing and Image Analysis
NR 505	Concepts in GIS
NR 512	Spatial Statistical Modeling-Natural Resources
NR 523/STAT 523	Quantitative Spatial Analysis
NR 565	Principles of Natural Resources Ecology
RS 532	Rangeland Ecosystem Sampling
SOCR 620	Modeling Ecosystem Biogeochemistry
SOCR 670	Terrestrial Ecosystems Isotope Ecology
STAA 551	Regression Models and Applications
STAA 552	Generalized Regression Models
STAA 553	Experimental Design
STAA 554	Mixed Models
STAA 561	Probability with Applications
STAA 562	Mathematical Statistics with Applications
STAA 565	Quantitative Reasoning
STAA 566	Data Visualization Methods
STAA 567	Computational and Simulation Methods
STAA 571	Survey Statistics
STAA 572	Nonparametric Methods
STAA 573	Analysis of Time Series
STAA 574	Methods in Multivariate Analysis

STAA 575	Applied Bayesian Statistics
STAA 576	Methods in Spatial Statistics
STAR 511	Design and Data Analysis for Researchers I
STAR 512	Design and Data Analysis for Researchers II
STAT 521	Stochastic Processes I
STAT 525	Analysis of Time Series I
STAT 540	Data Analysis and Regression
STAT 544/ ERHS 544	Biostatistical Methods for Quantitative Data
STAT 547/ CIVE 547	Statistics for Environmental Monitoring
STAT 560	Applied Multivariate Analysis
STAT 570	Nonparametric Statistics
STAT 600	Statistical Computing
STAT 605	Theory of Sampling Techniques
STAT 640	Design and Linear Modeling I
STAT 645	Categorical Data Analysis and GLIM
STAT 650	Design and Linear Modeling II
WR 524/CIVE 524	Modeling Watershed Hydrology
WR 575	Snow Hydrology Field Methods
WR 674	Data Issues in Hydrology

Communication/Collaboration

At least one course must be selected from the following (1-3 credits):

ECOL 693	Research Seminar
JTC 614	Public Communication Campaigns
JTC 660	Communication and Innovation
JTC 661	Information Design
JTC 662	Communicating Science and Technology
NR 501	Leadership and Public Communications

Research and Dissertation (minimum credits required):

ESS 798	Research	3
ESS 799	Dissertation	3

Additional credits required to complete this degree may include: 42

Master's Degree Credit (a maximum of 30 credits may be accepted from a master's degree)

Additional courses not taken previously from the Areas listed above

Additional credits completed under ESS 798 or ESS 799 beyond the minimum credits required above

Program Total Credits: 72

A minimum of 72 credits are required to complete this program.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should

consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Ph.D. in Watershed Science

Sustainable management of freshwater resources is an increasingly important and complex challenge in Colorado and worldwide, and we need scientists who can address complex water issues. The watershed science program focuses on how water moves through the landscape, what factors affect its quality, and how to manage water resources. Students in the Ph.D. in Watershed Science program work closely with research scientists in the classroom, laboratory, and field on both basic and applied watershed science research.

Students are exposed to cutting-edge field, data analysis, and modeling techniques through flexible programs of study and access to a breadth of water-related courses throughout the university. Students also have opportunities to participate in seminars and field courses.

The Ph.D. in Watershed Science requires 72 credits, most of which are research credits. Coursework includes in-depth classes in the student's area of research, as well as classes that expand into other disciplines. Each student develops an individualized program of study with the guidance and approval of the student's graduate committee. Students in the Ph.D. program develop new contributions to the literature of the watershed science discipline.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Program Learning Objectives

Upon successful completion, students will have valuable skills in the following areas:

1. **Systems understanding:** Identify and distinguish systems components and their interactions to explain, illustrate and analyze system understanding.
2. **Watershed science content and principals:** Apply complex watershed science principals to complex problems to develop sustainable solutions.
3. **Problem solving:** Work in teams and communicate effectively using a diverse set of analytical and applied tools.
4. **Interdisciplinary understanding:** Work in an interdisciplinary environment and demonstrate respect for alternative points of view.
5. **Research:** Contribute new research and understanding of watershed processes and issues to the published literature of the discipline.

Institutional Learning Objectives

[How the Program Learning Objectives \(PLOs\) relate to CSU's Institutional Learning Objectives:](#)

- **Creativity:** Through the development of new research, students will employ creative techniques including visual, verbal, and written strategies for analysis and communication.
- **Reasoning:** The Watershed PLOs of problem solving and systems understanding inherently involve reasoning through logical and analytical skills. Students identify and analyze problems as part of their independent research and synthesize the results in their final publications and dissertation.
- **Communication:** Students develop communication skills through the program's course sequence, which includes classes that emphasize both written and oral presentation. They also gain experience with communication through attending professional meetings and through writing and presenting their final research.
- **Responsibility:** Students in the PhD program move from being participants in research into developing and guiding their own research. They engage in collaborations with others internal and external to CSU and practice applying principles of ethical research conduct throughout their studies.
- **Collaboration:** The research experience in the PhD program is a collaborative process with advisors and other collaborators. Students gain experience working with partners from different backgrounds and accounting for different perspectives in their research practice and products.

Requirements
Effective Fall 2024

Code	Title	Credits
Required Foundation Courses		
GRAD 544	Ethical Conduct of Research	1
Discussion Courses		
Select at least 3 credits from the following:		3
WR 574	Advanced Snow Hydrology	
WR 616	Hillslope Hydrology and Runoff Processes	
Quantitative Courses		
Select at least 3 credits from the following:		3
ESS 523A	Environmental Data Science Applications: Introduction	
NR 512	Spatial Statistical Modeling-Natural Resources	
NR 523/STAT 523	Quantitative Spatial Analysis	
STAR 511	Design and Data Analysis for Researchers I	
STAR 512	Design and Data Analysis for Researchers II	
WR 523C/ESS 523C	Environmental Data Science Applications: Water Resources	
WR 674	Data Issues in Hydrology	
Skill Courses		
Select at least 3 credits from the following:		3
GEOL 551	Groundwater Modeling	
GEOL 554	Remote Sensing of the Earth System	
NR 503/GR 503	Remote Sensing and Image Analysis	
NR 505	Concepts in GIS	
WR 417	Watershed Measurements	
WR 419	Water Quality Analyses	
WR 524/CIVE 524	Modeling Watershed Hydrology	
WR 575	Snow Hydrology Field Methods	
Depth and Breadth Courses		
Select at least 6 credits from the following:		6
AREC 542	Applied Advanced Water Resource Economics	
CIVE 515	River Mechanics	
CIVE 520	Physical Hydrology	
CIVE 544	Water Resources Planning and Management	
CIVE 613	River Restoration Design	
CIVE 622	Risk Analysis of Water/Environmental Systems	
CIVE 625	Quantitative Eco-Hydrology	
CIVE 626	Integrated Analysis of Coupled Water Issues	
ESS 501	Principles of Ecosystem Sustainability	
ESS 543/ATS 543	Global Climate Change	
ESS 660	Biogeochemical Cycling in Ecosystems	
GEOL 452	Hydrogeology	
GEOL 552	Advanced Topics in Hydrogeology	
GEOL 652	Fluvial Geomorphology	

NR 510	Ecosystem Services--Theory and Practice	
NR 577	Wetland Ecology and Restoration	
SOC 461	Water and Social Justice	
SOC 664	Sociology of Water Resources	
SOCR 522	Micrometeorology	
SOCR 540	Soil-Plant-Nutrient Relationships	
SOCR 670	Terrestrial Ecosystems Isotope Ecology	
WR 416	Land Use Hydrology	
WR 418	Land Use and Water Quality	
WR 510	Watershed Management in Developing Countries	
WR 511	Water Resource Development	
WR 512	Water Law for Non-Lawyers	
Research and Dissertation		
WR 798	Research	2
WR 799	Dissertation	2
Additional Credits (A maximum of 30 credits may be accepted from a master's degree toward the Ph.D.)		52
Program Total Credits:		72

A minimum of 72 credits are required to complete this program.

Department of Fish, Wildlife, and Conservation Biology

Office in Wagar Building, Room 109D
(970) 491-5020

warnercnr.colostate.edu/departments/fwcb (<http://warnercnr.colostate.edu/departments/fwcb/>)

Professor Jennifer Boyd, Department Head

We are the only program in Colorado to offer comprehensive undergraduate and graduate education in Fish, Wildlife, and Conservation Biology. We have approximately 600 undergraduates and 60 graduate students enrolled in our department, and several thousand alumni who work to resolve national and international natural-resource related issues. We contribute to the economic and ecological health of society by assisting individuals and agencies solve complex environmental problems.

Undergraduate Majors

- Major in Fish, Wildlife, and Conservation Biology
 - Conservation Biology Concentration
 - Fisheries and Aquatic Sciences Concentration
 - Wildlife Biology Concentration

Minor

- Minor in Fishery Biology

Graduate Graduate Programs in Fish, Wildlife, and Conservation Biology

Graduate programs lead to Master of Science and Doctor of Philosophy degrees in fish, wildlife, and conservation biology or a Master of Fish, Wildlife, and Conservation Biology degree. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Fish, Wildlife, and Conservation Biology (<http://warnercnr.colostate.edu/fwcb-graduate-study/graduate-program/>).

Certificate

- Wildlife Conservation Actions

Master's Programs

- Master of Science in Fish, Wildlife, and Conservation Biology, Plan A*
- Master of Science in Fish, Wildlife, and Conservation Biology, Plan B*
- Master of Fish, Wildlife, and Conservation Biology, Plan C (M.F.W.C.B.)

Ph.D.

- Ph.D. in Fish, Wildlife, and Conservation Biology*

* Please see department for program of study.

Courses

Fish, Wildlife, and Conservation Biology (FW)

FW 104 Wildlife Ecology and Conservation (GT-SC2) Credits: 3 (3-0-0)

Course Description: Essentials of wildlife ecology as a foundation for understanding issues on the origins, management and conservation of biodiversity.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

FW 111 Basic Outdoor Skills in FWCB Credit: 1 (.5-1-0)

Course Description: Basic outdoor skills for FWCB and outdoor novices. History of wildlife conservation and reasons for declining outdoor participation.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. May be taken up to 3 times for a maximum of 3 credits. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 179 New-to-the-Major Seminar Credit: 1 (0-0-1)

Course Description: Introduces students new to the Fish, Wildlife, and Conservation Biology major to curriculum, faculty, research, key concepts, careers, professional development, and other students.

Prerequisite: None.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 182A Study Abroad--Mexico: Outdoor Skills Credit: 1 (0-0-1)

Course Description: Introduction and development of basic outdoor skills important to fish, wildlife, and conservation biology (FWCB) in environments in Baja California Sur, Mexico (e.g., marine, coastal, tropical, desert). Skills are related to the basic history and philosophies of the FWCB profession. Focus learning through hands-on experience. Does not provide full competence in any skill area.

Prerequisite: None.

Registration Information: Required field trips. FW 111 and FW 182A may be repeated for a maximum of 3 credits for the two courses.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 204 Introduction to Fishery Biology Credits: 3 (2-3-0)

Course Description: Exposure to sampling techniques, agencies, and topics in fishery biology careers.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 260 Principles of Wildlife Management Credits: 3 (3-0-0)

Course Description: Ecology principles applied to conservation and management of fish/wildlife resources. Quantitative methods, socioeconomic factors, population dynamics.

Prerequisite: (MATH 120 or MATH 124 or MATH 127) and (BZ 110 or LIFE 103).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 300 Biology and Diversity of Fishes Credits: 2 (2-0-0)

Course Description: Biology and zoology of fishes: anatomy, taxonomy, evolution, physiology, behavior, ecology, zoogeography, and conservation.

Prerequisite: BZ 111 or LIFE 103.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 301 Ichthyology Laboratory Credit: 1 (0-2-0)

Course Description: Anatomy, taxonomy, evolution and ecology of North American freshwater fishes.

Prerequisite: FW 300, may be taken concurrently.

Registration Information: Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 310 Mapping Diverse Perspectives in Conservation Credits: 3 (2-3-0)

Course Description: Principles and geospatial tools to explore conservation science and practice through diverse social and cultural perspectives. Through discussions and hands-on mapping exercises, develop a spatial understanding of diverse perspectives and social justice issues in conservation, including mapping local ecological knowledge, patterns of environmental injustice, hotspots of biological and cultural diversity, human-wildlife conflict, and non-colonialist geographies. No GIS experience required.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both FW 310 and FW 380A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 325 Spatial Ecology--Applications with R Credits: 3 (3-0-0)

Course Description: Explore the principles and procedures of spatial ecology and application to contemporary ecological issues. Application of R-based tools for spatial analysis, GIS, and basic visualizations. Topics include methods for estimating spatial pattern, the effects of varying spatial and temporal scales, conservation management, species distribution, and data collection, input, and manipulation.

Prerequisite: (LIFE 320) and (STAT 301 or STAT 307).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Credit not allowed for both FW 325 and FW 380A2.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 370 Design of Fish and Wildlife Projects Credits: 3 (2-2-0)

Course Description: Design, analysis, and evaluation of wildlife projects; lab exercises in design and data analysis; preparation and presentation of project proposals.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (FW 260 or FW 360) and (NR 220) and (MATH 155 or MATH 160) and (STAT 301 or STAT 307).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 373A Travel Abroad : Wildlife Conservation--Baja California Sur Credits: 3 (0-0-3)

Course Description: Study tour of various overseas ecosystems and natural resources conservation programs; discussions with local ecologists/managers.

Prerequisite: None.

Registration Information: Written consent of instructor. Students need a minimum of a 2.500 GPA per Education Abroad standards. Credit allowed for only one of the following: FW 373A, FW 382, or FW 382A.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 375 Field Wildlife Studies Credits: 3 (1-4-0)

Course Description: Field trips to see wildlife management and habitats and to discuss problems and practices with professional ecologists and resources managers.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (FW 260).

Registration Information: Must register for lecture and laboratory. Required field trips.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 384 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description: Instruction and practice in laboratory instruction in lower-division departmental courses.

Prerequisite: None.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 400 Conservation of Fish in Aquatic Ecosystems Credits: 3 (2-0-1)

Course Description: Ecological processes that create habitat and biotic template for fish in aquatic ecosystems; human effects; strategies for conserving fishes.

Prerequisite: LIFE 320 and FW 300.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 401 Fishery Science Credits: 3 (2-3-0)

Course Description: Theory, philosophy, and applications for study and management of fishery resources.

Prerequisite: (FW 300) and (STAT 301 or STAT 307 or ERHS 307) and (MATH 141 or MATH 155 or MATH 160).

Registration Information: Computer literacy. Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

FW 402 Fish Culture Credits: 4 (3-2-0)

Course Description: Principles and practices to produce food, bait, and sport fishes.

Prerequisite: FW 300.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 405 Fish Physiology Credits: 3 (2-3-0)

Course Description: Physiological ecology of fish; functional adaptations and adjustments used to cope with environmental and physiological states.

Prerequisite: BZ 214 or FW 300.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both FW 405 and FW 605.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 430 Waterfowl Ecology and Management Credits: 3 (2-3-0)

Course Description: Apply concepts from life history theory, evolutionary ecology, population ecology, community ecology, and wildlife management to become familiar with the ecology and management of North American waterfowl across their migratory life cycles. Labs and field trips will develop practical field skills in waterfowl biology, conservation, and management in addition to data analysis and computing skills.

Prerequisite: (FW 260 with a minimum grade of C or LIFE 320 with a minimum grade of C) and (STAT 301 with a minimum grade of C or STAT 307 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Required field trips. Credit not allowed for both FW 430 and FW 481A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 455 Principles of Conservation Biology Credits: 3 (3-0-0)

Course Description: Review of efforts to study and conserve biological diversity, focused on fish and wildlife populations.

Prerequisite: (FW 260 and LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Credit allowed for only one of the following: FW 455, FW 555, or NR 300.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 465 Managing Human-Wildlife Conflicts Credits: 3 (2-2-0)

Course Description: Methods for resolving conflicts caused by wildlife; integrating animal behavior, population dynamics, economics, and human dimensions into solutions.

Prerequisite: FW 260.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 467 Wildlife Disease Ecology Credits: 3 (2-0-1)

Course Description: Ecological, epidemiological, and evolutionary principles of disease in fish and wildlife populations; contemporary issues in disease ecology.

Prerequisite: LIFE 320.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 468 Bird Ecology and Conservation Credits: 3 (2-3-0)

Course Description: Introduction to the principles and the practice of avian ecology and conservation. Class discussions, outdoor labs and field trips emphasize major threats to birds and opportunities for overcoming those challenges. Learn to identify local birds by sight and sound, employ field methods (e.g., bird banding), participate in long-term applied research projects, collect and analyze data independently, and interact with conservation practitioners.

Prerequisite: LIFE 320.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 469 Conservation and Management of Large Mammals Credits: 3 (3-0-0)

Course Description: Principles of behavior, ecology, population dynamics, and conservation related to large mammals.

Prerequisite: (BZ 330 and FW 260 and LIFE 320) and (NR 319 or NR 322) and (STAT 301 or STAT 307).

Registration Information: Required field trips.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 471 Wildlife Data Collection and Analysis Credits: 4 (2-4-0)

Course Description: Analysis methods used in wildlife management and research; adaptive resource management with emphasis on learning through field and computer labs.

Prerequisite: FW 370 and NR 220.

Registration Information: Must register for lecture and laboratory. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 472 Issues in Animal Conservation and Management Credits: 3 (2-0-1)

Course Description: Current and emerging issues in fish and wildlife conservation and management at the state, national, and global scales.

Prerequisite: (FW 260) and (LIFE 320).

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 473A Travel Abroad: Conserving Desert/Marine Animals Credits: 3 (0-0-3)

Course Description: Ecology and conservation of animals from desert, marine, intertidal, and shore ecosystems and application to problems of animal conservation in an international setting.

Prerequisite: LIFE 320.

Registration Information: Written consent of instructor. Students need a minimum of a 2.5 GPA per Education Abroad standards. Credit allowed for only one of the following: FW 473A, FW 482, or FW 482A.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 475 Conservation Decision Making Credits: 3 (3-0-0)

Course Description: Structured approaches to conservation and management of vertebrates; articulating objectives, developing management options, and predicting outcomes.

Prerequisite: (MATH 155 or MATH 160) and (STAT 301 or STAT 307) and (LAND 220 or LIFE 220 or LIFE 320).

Registration Information: Junior standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 477 Wildlife Habitat Use and Management Credits: 3 (1-3-1)

Course Description: Wildlife habitat evaluation, classification, and improvement; analysis of habitat use patterns; planning and implementation of management plans.

Prerequisite: (FW 260) and (NR 319 or NR 322).

Registration Information: Must register for lecture, lab, and recitation.

Credit allowed for only one of the following courses: FW 477, FW 577, or FW 677. Required field trips.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 487 Internship Credits: Var[1-6] (0-0-0)

Course Description: Field experience in fish and wildlife management.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 492 Seminar-Wildlife Biology Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 495A Independent Study: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LIFE 320 or FW 104 or NR 220 or LAND 220 or LIFE 220.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 495B Independent Study: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LAND 220 or LIFE 320 or FW 104 or NR 220 or LIFE 220.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 496A Group Study: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LAND 220 or LIFE 320 or FW 104 or NR 220 or LIFE 220.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 496B Group Study: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: LAND 220 or LIFE 320 or FW 104 or NR 220 or LIFE 220.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 540 Fisheries Ecology Credits: 3 (2-0-1)

Course Description: Population, community, and ecosystem management for fishes and other aquatic organisms in freshwater habitats.

Prerequisite: None.

Registration Information: One course in fishery science; one course in aquatic ecology. Must register for lecture and recitation.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 544 Ecotoxicology Credits: 3 (2-0-1)

Course Description: Ecological effects of contaminants on populations, communities, and ecosystems.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (STAT 301 or STAT 307).

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 551 Design of Fish and Wildlife Studies Credits: 3 (2-0-1)

Course Description: Principles, types of studies, and philosophy of science in design of experimental, observational, and sampling studies for wildlife investigations.

Prerequisite: STAT 301 or STAT 307 or ERHS 307.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 552 Applied Sampling for Wildlife/Fish Studies Credits: 3 (2-0-1)

Course Description: Survey sampling theory and techniques, including distance sampling, with emphasis on wildlife and fish studies.

Prerequisite: STAT 301 or STAT 307.

Registration Information: Must register for lecture and recitation. Graduate standing. Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 553 Adaptive Fish and Wildlife Management Credits: 3 (2-2-0)

Course Description: Formal approaches to making management decisions about wildlife and fish populations, using tools of decision analysis.

Prerequisite: (FW 104 or FW 260 or FW 555 or LIFE 320 or NR 300) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 555 Conservation Biology Credits: 3 (2-0-1)

Course Description: Ecological factors in conservation of biological diversity.

Prerequisite: (LAND 220 or LIFE 220 or LIFE 320) and (STAT 307).

Registration Information: Must register for lecture and recitation. Offered face-to-face in the spring and online in the fall. Credit allowed for only one of the following: FW 455, FW 555, or NR 300.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 556 Wildlife Conservation Ethics Credits: 3 (3-0-0)

Course Description: Philosophy, art, history, and science of wildlife and land management from writings of Aldo Leopold and others.

Prerequisite: None.

Restriction: Must be a Graduate.

Registration Information: Graduate standing. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 557 Wildlife Habitat Management on Private Land Credits: 3 (0-0-3)

Course Description: Management of cover, food, and water for wildlife and fish in the Great Plains. Emphasis on practices compatible with other uses of private land.

Prerequisite: None.

Registration Information: Bachelor's degree, or any level ecology or wildlife management course, or written consent of instructor. Offered online only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 558 Conservation Genetics of Wild Populations Credits: 3 (2-0-1)

Course Description: Examine the background, concepts, and tools required to determine how genetic data can be used to evaluate wild vertebrate species and communities of conservation concern.

Prerequisite: (BZ 350 or LIFE 201A or LIFE 201B) and (LIFE 220 or LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Written consent of instructor. Must register for lecture and recitation. Offered as an online course only. Admission to a graduate program in Fish, Wildlife, and Conservation Biology.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 561A Advanced Topics: Fishery Biology Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 561B Advanced Topics: Wildlife Biology Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 561C Advanced Topics: Population Analysis Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 561E Advanced Topics: Vertebrate Management Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 562 Fish and Wildlife Population Dynamics Credits: 3 (2-0-1)

Course Description: Factors that influence population abundance and density, and how they change over time. It blends ecology, evolution, genetics, and mathematical modeling into a unified field. Concentrate on understanding single-species population growth models, including metapopulation concepts, as well as multi-species topics such as predation and competition.

Prerequisite: (MATH 155 or MATH 160) and (LIFE 220 or LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Must register for lecture and recitation. Written consent of instructor. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 563 Analyses for Managing Wild Populations Credits: 3 (2-0-1)

Course Description: Design of wildlife population studies and the analysis of mark-recapture and occupancy data. Discussion of scientific philosophy, statistical theory, sampling design, and the application of the latest quantitative approaches to the analysis of population data.

Prerequisite: FW 260 and STAT 301.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and recitation. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 564 Science of Managing Human-Wildlife Conflicts Credits: 3 (2-0-1)

Course Description: Human-wildlife conflicts, and in particular, damage caused by wildlife, often termed wildlife damage. Topics such as animal behaviors, population dynamics, public attitudes, economics, and effective strategies in understanding the various types of conflicts and how to manage them.

Prerequisite: FW 104 or LAND 220 or LIFE 220 or LIFE 320.

Registration Information: Must register for lecture and recitation. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 567 Wildlife Disease Ecology Credits: 3 (2-0-1)

Course Description: Ecological, epidemiological, and evolutionary principles of disease in fish and wildlife populations; contemporary issues in disease ecology.

Prerequisite: (LIFE 320) and (STAT 301 or STAT 307).

Registration Information: Graduate standing. Sections may be offered: Online.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 568 Sustaining River Ecosystems in Changing World Credits: 3 (3-0-0)

Also Offered As: BZ 568.

Course Description: Applying the concepts and principles of freshwater ecosystem structure and function to develop a multidisciplinary and integrated understanding of the approaches and methods for restoring and sustainably managing these systems in the face of increasing human demands and rapid climate change.

Prerequisite: None.

Restriction: Must not be a: Freshman, Sophomore, Junior.

Registration Information: Senior standing. Credit allowed for only one of the following: BZ 568, BZ 680A2, FW 568, and FW 680A2.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 572 Wildlife Conservation Communications Credits: 3 (2-0-1)

Course Description: Examines the identification and engagement of groups involved in wildlife conservation action and applies knowledge from social science fields to shape communications related to biodiversity conservation to effectively inform and converse.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and recitation. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 573 Travel Abroad-Wildlife Ecology/Conservation Credits: 3 (3-0-0)

Course Description: Study tour of various overseas ecosystems and natural resources conservation programs; discussions with local ecologists/managers.

Prerequisite: None.

Registration Information: Written consent of instructor.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 575 Wildlife Habitat Evaluation for Educators Credits: 3 (0-0-3)

Course Description: Teachers or leaders implement wildlife habitat evaluation procedures in classroom or community programs and evaluate performance of students.

Prerequisite: None.

Registration Information: Graduate standing. Offered as a correspondence course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 576 Wildlife Policy, Administration, and Law Credits: 3 (0-0-3)

Course Description: Evolution of policy affecting wildlife and humans using historical, current, philosophical, legal, and administrative constructs.

Prerequisite: None.

Registration Information: Required: one course in political science; one course in natural resources management. Offered as a correspondence course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FW 577 Management of Wildlife Habitat Credits: 3 (2-0-1)

Course Description: Identifying and implementing management techniques for evaluating, classifying, and improving wildlife habitat to sustain and conserve populations.

Prerequisite: (FW 260) and (GR 311 or GR 323 or NR 323 or GR 420 or NR 319 or NR 322 or NR 422 or SOCR 377).

Registration Information: Written consent of instructor. Must register for lecture and recitation. Offered as an online course only. Admission to graduate program in Fish, Wildlife, and Conservation Biology. Credit allowed for only one of the following courses: FW 477, FW 577, or FW 677.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FW 579 Wildlife Conservation Policy--Current Events Credits: 3 (2-0-1)

Course Description: Addresses a subset of the most current topics in fish and wildlife conservation policy (e.g., climate change, renewable energy, endangered species legislation). Review history, legislative and administrative policy underpinnings, and contemporary impact on fish and wildlife conservation and management in the United States.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and recitation. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FW 605 Advanced Physiological Ecology of Fishes Credits: 4 (2-3-1)

Course Description: Physiological ecology of fishes; functional adaptations and adjustments used to cope with environmental and physiological states.

Prerequisite: FW 300.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture, lab, and recitation. Credit not allowed for both FW 405 and FW 605.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 662 Wildlife Population Dynamics Credits: 3 (1-2-1)

Course Description: Population models; experimental evidence and analysis of theories of population regulation; case studies.

Prerequisite: (FW 260 and STAT 301) and (MATH 155 or MATH 160).

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture, laboratory and recitation.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 663 Sampling & Analysis Vertebrate Populations Credits: 5 (3-3-1)

Course Description: Sampling and analysis of fish and wildlife populations, including survival estimation, capture-recapture sampling, and transect sampling.

Prerequisite: FW 260 and STAT 301.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture, lab, and recitation.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 673 Hierarchical Modeling in Ecology Credits: 3 (3-0-0)

Also Offered As: STAT 673.

Course Description: Hierarchical ecological modeling using common forms of data in fish and wildlife studies and emphasizing spatial and temporal aspects of analysis.

Prerequisite: ESS 575 or STAT 420.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both FW 673 and STAT 673.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FW 677 Wildlife Habitat Management Credits: 3 (1-3-1)

Course Description: Habitat models; vegetation manipulation and monitoring for wildlife; extended field trips.

Prerequisite: FW 260.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture, lab, and recitation. Credit allowed for only one of the following courses: FW 477, FW 577, or FW 677. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

FW 684 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 692 Seminar: Fish, Wildlife, and Conservation Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 695A Independent Study: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 695B Independent Study: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 696 Group Study: Fish, Wildlife, Conservation Biology Credits: Var[1-18] (0-0-0)

Course Description: Group study projects on topics in fish, wildlife, and conservation biology.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 698A Research: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 698B Research: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 699A Thesis: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 699B Thesis: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 798A Research: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 798B Research: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 799A Dissertation: Fishery Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

FW 799B Dissertation: Wildlife Biology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Fish, Wildlife, and Conservation Biology

The Fish, Wildlife, and Conservation Biology major is intended for students interested in understanding wildlife and the habitats in which they live. We offer three concentrations: Conservation Biology, Fisheries and Aquatic Sciences, and Wildlife Biology. The curriculum has a strong foundation in the biological, physical, and social sciences with the focus on solving current and future issues related to conservation and sustainability of wild animals and their habitats. The faculty offers a wide range of expertise with a keen interest in innovative teaching and research methods.

Our program prepares students for professional careers involving fish, wildlife, and conservation that include federal and state agencies, nongovernmental organizations, the private sector, academic institutions, and graduate school. Numerous opportunities exist for students to gain experience through research and internships, including professional and career mentoring and involvement with professional societies to further their studies, practical experience, and career potential. A summer field course at CSU's Mountain Campus is required and provides students with hands-on learning about natural resource ecology and measurements. Additional experiential learning opportunities exist in courses and study abroad programs.

Required natural science courses include general biology, vertebrate biology, botany, calculus, and statistics, while required courses in the major focus on wildlife ecology and conservation, principles of wildlife management, design of wildlife projects, conservation biology, fishery science, and wildlife data collection and analysis. Along with a strong science foundation, courses in problem solving, communication skills and outreach, are also emphasized as they are critical to building skills to effectively resolve the complex issues faced by today's natural resource professionals.

Learning Objectives

Students will:

1. Demonstrate a mastery of ecological concepts and fundamental principles and techniques to manage and conserve fish and wildlife populations, and how they apply to current natural resource management issues.
2. Demonstrate mathematical, statistical, and study design knowledge and skills required for careers in fishery, wildlife, and conservation biology.

3. Become effective in oral and written communication about issues related to the environment and natural resources, including as members of multi-disciplinary teams.
4. Learn approaches to solving complex natural resource management issues, including planning, organizing, creating, and presenting group projects.

Potential Occupations

Federal and state agencies that manage natural resources offer most employment opportunities in fish, wildlife, and conservation biology. Key federal agencies include the U.S. Fish and Wildlife Service, Forest Service, Bureau of Land Management, Geological Survey, National Park Service, Environmental Protection Agency, Bureau of Reclamation, National Marine Fisheries Service, and state departments of fish, wildlife and natural resources. Non-governmental organizations, e.g., The Nature Conservancy, private companies, and environmental consultants also offer excellent employment opportunities. Participation in internships, independent study/research, student organizations, volunteer activities, or cooperative education opportunities is highly recommended to enhance practical training and development. Undergraduates who go on for graduate-level studies can attain more advanced positions with the possibility of rising to top professional levels, e.g., researchers and teachers in academic institutions and scientists and directors at natural resource agencies. Our degree is also excellent preparation for veterinary school.

Examples of career opportunities include, but are not limited to: fishery/wildlife/conservation biologist or ecologist, wildlife refuge or natural resource manager, environmental consultant, research scientist, and educator. Within these areas, a variety of specializations are possible including fish, wildlife, and conservation education and interpretation; endangered species monitoring and protection; habitat enhancement and

restoration; administration; research; law enforcement, fish and wildlife population assessment, statistical analyst, and human-wildlife conflicts.

Concentrations

- Conservation Biology Concentration
- Fisheries and Aquatic Sciences Concentration
- Wildlife Biology Concentration

Major in Fish, Wildlife, and Conservation Biology, Conservation Biology Concentration

The Conservation Biology concentration focuses on understanding the ecological processes necessary to conserve biological diversity, with an emphasis on fish and wildlife species and their habitats. This concentration has a broader coverage across both the fish and wildlife disciplines, including the systems that support them (soils, water, forests, fire, geology). There is also a more focused exploration of the human, historical, and political aspects that have shaped conservation efforts and what can be done to ensure sustainable practices and management of natural resources.

Requirements Effective Fall 2024

A minimum grade of C (2.000) is required in all biological, mathematical/statistical, physical science, fish, wildlife, and conservation biology and natural resource courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting these requirements.

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3
FW 104	Wildlife Ecology and Conservation (GT-SC2)	3A	3
FW 179	New-to-the-Major Seminar		1
Select one group from the following:			8
Group A:			
BZ 110	Principles of Animal Biology (GT-SC2)	3A	
BZ 111	Animal Biology Laboratory (GT-SC1)	3A	
BZ 120	Principles of Plant Biology (GT-SC1)	3A	
Group B:			
LIFE 102 ¹	Attributes of Living Systems (GT-SC1)	3A	
LIFE 103 ¹	Biology of Organisms-Animals and Plants (GT-SC1)	3A	
Select one set of chemistry and physics courses from the following:			13-15
Group A:			
CHEM 107	Fundamentals of Chemistry (GT-SC2)	3A	
CHEM 108	Fundamentals of Chemistry Laboratory (GT-SC1)	3A	
PH 121	General Physics I (GT-SC1)	3A	
PH 122	General Physics II (GT-SC1)	3A	
Group B:			
CHEM 111	General Chemistry I (GT-SC2)	3A	
CHEM 112	General Chemistry Lab I (GT-SC1)	3A	
CHEM 113	General Chemistry II		

CHEM 114	General Chemistry Lab II		
PH 110	Physics of Everyday Phenomena (GT-SC2)	3A	
PH 111	Physics of Everyday Phenomena Laboratory (GT-SC1)	3A	
Diversity, Equity, and Inclusion		1C	3

----------------------	--	--	--------------

Sophomore

FW 260	Principles of Wildlife Management		3
LIFE 320	Ecology		3
Select one course from the following:			3-4
BZ 220	Introduction to Evolution		
BZ 350	Molecular and General Genetics		
SOCR 330	Principles of Genetics		
Select one course from the following:			3
HONR 499 ²	Senior Honors Thesis		
SPCM 200 ²	Public Speaking		
Select one course from the following:			4
MATH 155	Calculus for Biological Scientists I (GT-MA1)	1B	
MATH 160	Calculus for Physical Scientists I (GT-MA1)	1B	
Select one course from the following:			3
STAT 301	Introduction to Applied Statistical Methods		
STAT 307	Introduction to Biostatistics		
Arts and Humanities		3B	6
Social and Behavioral Sciences		3C	3

Total Credits			28-29
----------------------	--	--	--------------

Summer

NR 220	Natural Resource Ecology and Measurements		5
--------	---	--	---

Total Credits			5
----------------------	--	--	----------

Junior

FW 370	Design of Fish and Wildlife Projects	4A,4B	3
Select one group from the following:			4-7
Group A:			
BSPM 302	Applied and General Entomology		
BSPM 303A	Entomology Laboratory: General		
Group B:			
BZ 212	Animal Biology-Invertebrates		
NR 312	Applied Insect Ecology		
Select two courses or course pair for 6-7 credits not taken elsewhere from the following:			6-7
BZ 214	Animal Biology-Vertebrates		
BZ 329	Herpetology		
BZ 330	Mammalogy		
BZ 335	Ornithology		
FW 300 & FW 301 ³	Biology and Diversity of Fishes		
Select one Plant Biology course from the following:			3-4
BZ 223	Plant Identification		
BZ 325	Plant Systematics		
BZ 450	Plant Ecology		
F 311	Forest Ecology		
RS 300	Rangeland Conservation and Stewardship		
RS 313/F 313	Dendrology and Herbaceous Plant ID		

Select one course from the following:			3
CO 300	Writing Arguments (GT-CO3)	2	
CO 301A	Writing in the Disciplines: Arts and Humanities (GT-CO3)	2	
CO 301B	Writing in the Disciplines: Sciences (GT-CO3)	2	
CO 301C	Writing in the Disciplines: Social Sciences (GT-CO3)	2	
CO 301D	Writing in the Disciplines: Education (GT-CO3)	2	
JTC 300	Strategic Writing and Communication (GT-CO3)	2	
Select one course from the following:			3-4
FW 310	Mapping Diverse Perspectives in Conservation		
FW 325	Spatial Ecology--Applications with R		
NR 319	Introduction to Geospatial Science		
Historical Perspectives		3D	3

Total Credits**25-31****Senior**

Select one Aquatic Biology course or course pair not taken elsewhere from the following:			3-4
BZ 415	Marine Biology		
BZ 471 & BZ 472	Stream Biology and Ecology		
ESS 474	Limnology		
FW 300 & FW 301	Biology and Diversity of Fishes		
FW 400	Conservation of Fish in Aquatic Ecosystems		
FW 401	Fishery Science		
FW 402	Fish Culture		
FW 405	Fish Physiology		
FW 430	Waterfowl Ecology and Management		
FW 568/BZ 568	Sustaining River Ecosystems in Changing World

Guided Electives ⁶		6
Elective ⁷		0-1
Total Credits		24-28
Program Total Credits:		120

¹ Students taking this biology selection should choose a botany-related course in the department elective options to meet the botany/plant course requirements for certain federal positions related to wildlife, fisheries, and/or conservation biology.

² Students in the Honors Track 1 program must take HONR 499.

³ FW 300 and FW 301 count together as one selection in this choice.

⁴ Restricted to FW subject code, department travel abroad courses, taught by FWCB faculty. No transfer or substitute courses will be accepted.

⁵ Students may need to obtain a registration override from the appropriate department to take this course.

⁶ Guided electives are courses intended to expand a student’s depth and breadth in wildlife biology and include any 300- or 400-level regular course with a BC, BMS, BSPM, BZ, CHEM, ESS, F, FW, GES, MATH, MIP, NR, NRRT, PH, RS, SOCR, STAT, or WR subject code (excluding courses ending in -80 to -99); CHEM 245 and CHEM 246; SOCR 240; other courses with prior approval by department and advisor. Courses may not double-count as Guided Electives and for other requirements in the major.

⁷ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

The curriculum for the Fish, Wildlife and Conservation Biology major – Conservation Biology concentration assumes students enter college prepared to take calculus. Students who have not met the prerequisites for calculus, will be required to successfully complete the prerequisites in their first year. A minimum grade of C (2.000) is required in all biological, mathematical / statistical, physical science, fish, wildlife, and conservation biology, and natural resources courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting degree requirements. NR 220 is a summer course in which students reside at CSU’s Mountain Campus. Students must choose ONE of two CHEM + PH paths: (Path A) CHEM 107/CHEM 108 and PH 121/PH 122 or (Path B) CHEM 111, CHEM 112, CHEM 113, CHEM 114 and PH 110/PH 111. Students must also choose ONE biology group A) BZ 110/BZ 111 or B) LIFE 102/LIFE 103.

Major in Fish, Wildlife, and Conservation Biology, Fisheries and Aquatic Sciences Concentration

The Fisheries and Aquatic Sciences concentration allows students to develop a strong background in basic fishery ecology, management, and conservation, which includes knowledge of the ecosystems that support aquatic species and an understanding of the linkages between land and water.

Students choosing the Fisheries and Aquatic Sciences concentration are also required to complete at least 80 hours of paid or non-paid employment related to fishery and aquatic biology.

Requirements Effective Fall 2024

A minimum grade of C (2.000) is required in all biological, mathematical/statistical, physical science, fish, wildlife, and conservation biology, and natural resource courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting these requirements. Students choosing the Fisheries and Aquatic Sciences concentration are also required to complete at least 80 clock hours in an internship experience related to fishery and aquatic biology.

¹ Students taking this biology selection should choose a botany-related course in the department elective options to meet botany/plant course requirements for certain federal positions related to wildlife, fisheries, and/or conservation biology.

² Students in the Honors Track 1 program must take HONR 499.

³ Take 1 credit of FW 487 during the semester in which you are completing the 80 h work experience requirement.

⁴ Students selecting GR 204/WR 204 only need select three credits. Students selecting one of the geosciences lecture courses (GEOL 120, GEOL 122, GEOL 124) also need to take GEOL 121.

⁵ Students will need to obtain a registration override from the appropriate department to take this course.

⁶ Guided Electives are courses intended to expand a student's depth and breadth in wildlife biology and include any 300- or 400-level regular course with a BC, BMS, BSPM, BZ, CHEM, ESS, F, FW, GES, MATH, MIP, NR, NRRT, PH, RS, SOCR, STAT, or WR subject code (excluding courses ending in -80 to -99); CHEM 245; CHEM 246; SOCR 240; other courses with prior approval by department and advisor. Courses may not double-count as Guided Electives and for other requirements in the major.

⁷ Select enough elective credits to bring the program total to 120, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program: The curriculum for the Fish, Wildlife and Conservation Biology major – Fisheries and Aquatic Sciences concentration assumes students enter college prepared to take calculus. Students who have not met the prerequisites for calculus, will be required to successfully complete the prerequisites in their first year. Program Total Credits:					120

Major in Fish, Wildlife, and Conservation Biology, Wildlife Biology Concentration

The Wildlife Biology concentration focuses primarily on terrestrial species and how they interact with their habitats while building a strong foundation in basic wildlife ecology, management, and conservation.

Requirements Effective Fall 2024

A minimum grade of C (2.000) is required in all biological, mathematical/statistical, physical science, fish, wildlife and conservation biology, and natural resource courses used to meet graduation requirements for the Fish, Wildlife, and Conservation Biology major. The minimum applies to courses taken as substitutions for meeting these requirements.

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3
FW 104	Wildlife Ecology and Conservation (GT-SC2)	3A	3
FW 179	New-to-the-Major Seminar		1
Select one group of courses from the following:			8
Group A:			
BZ 110	Principles of Animal Biology (GT-SC2)	3A	
BZ 111	Animal Biology Laboratory (GT-SC1)	3A	
BZ 120	Principles of Plant Biology (GT-SC1)	3A	
Group B:			
LIFE 102 ¹	Attributes of Living Systems (GT-SC1)	3A	
LIFE 103 ¹	Biology of Organisms-Animals and Plants (GT-SC1)	3A	
Select one set of chemistry and physics courses from the following:			13-15
Group A:			
CHEM 107	Fundamentals of Chemistry (GT-SC2)	3A	
CHEM 108	Fundamentals of Chemistry Laboratory (GT-SC1)	3A

Guided Electives⁶

3-4

3

9

Elective	0-3
Total Credits	25-27
Program Total Credits:	120

- ¹ Students taking this biology selection should choose a botany-related course in the department elective options to meet botany/plant course requirements for certain federal positions related to wildlife, fisheries, and/or conservation biology.
- ² Students in the Honors Track 1 program must take HONR 499.
- ³ FW 300 and FW 301 count together as one selection in this choice.
- ⁴ Students will need to obtain a registration override from the appropriate department to take this course.
- ⁵ Restricted to FW subject code, department travel abroad courses, taught by FWCB faculty. No transfer or substitute courses will be accepted.
- ⁶ Guided Electives are courses intended to expand a student's depth and breadth in wildlife biology and include any 300- or 400-level regular course with a BC, BMS, BSPM, BZ, CHEM, ESS, F, FW, GES, MATH, MIP, NR, NRRT, PH, RS, SOCR, STAT, or WR subject code (excluding courses ending in -80 to -99); CHEM 245 and CHEM 246; SOCR 240; other courses with prior approval by department and advisor. Courses may not double-count as Guided Electives and for other requirements in the major.

- ⁷ Select enough elective credits to bring program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program: The curriculum for the Fish, Wildlife and Conservation Biology major – Wildlife Biology concentration assumes students enter college prepared to take calculus. Students who have not met the prerequisites for calculus, will be required to successfully complete the prerequisites in their first year. A minimum grade of C (2.000) is required in all biological, mathematical/ statistical, physical science, fish, wildlife, and conservation biology, and natural resource courses used to meet graduation requirements for the fish, wildlife, and conservation biology major. The minimum applies to courses taken as substitutions for meeting degree requirements. NR 220 is a summer course in which students reside at CSU's Mountain Campus. Students must choose ONE of two CHEM + PH paths: (Path A) CHEM 107/CHEM 108 and PH 121/PH 122 or (Path B) CHEM 111, CHEM 112, CHEM 113, CHEM 114 and PH 110/PH 111. Students must also choose ONE biology group A) BZ 110/BZ 111/BZ 120 or B) LIFE 102/LIFE 103.

Minor in Fishery Biology

Students majoring in Watershed Science, Forestry, Rangeland Ecology, Zoology, and others may find that a minor in Fishery Biology will increase

employment opportunities. The requirements for this minor provide a solid base for work in fishery and aquatic science.

Requirements

Effective Spring 2011

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits

Program Total Credits:		26-28

Graduate Certificate in Wildlife Conservation Actions

This online graduate certificate prepares you to take wildlife conservation actions in the real world that integrates the needs of nature and people in a sustainable and equitable way. While completing this certificate, you can dive into the history of the land ethic while refining your own, you can build the skills of a sustainability change agent, you can construct a habitat management plan, you can communicate to different audiences about conservation, and you can study the history and/or the current state of wildlife policy.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion, students will be able to:

1. Refine their own land ethic after studying the writings and ideas of leaders in wildlife conservation;
2. Improve community stewardship of natural resources using the skills of a sustainability change agent;
3. Construct a habitat management plan that is grounded in conservation science and responsible human land use;
4. Create effective, visually appealing conservation messages designed for specific audiences;
5. Evaluate how science, advocacy, and public engagement inform wildlife conservation policy; and
6. Analyze current fish and wildlife conservation policy and the scientific, political, and socio-economic forces influencing it.

Requirements

Effective Fall 2023

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Select a minimum of 4 courses in consultation with advisor:		12
FW 556	Wildlife Conservation Ethics	
FW 557	Wildlife Habitat Management on Private Land	
FW 576	Wildlife Policy, Administration, and Law	
FW 579	Wildlife Conservation Policy–Current Events	
NR 501	Leadership and Public Communications	
NR 515	Natural Resources Policy and Biodiversity	
NR 535	Action for Sustainable Behavior	
Program Total Credits:		12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Fish, Wildlife, and Conservation Biology, Plan C (M.F.W.C.B.)

The Master of Fish, Wildlife, and Conservation Biology, Plan C degree provides the training and credentials natural resource professionals need to effectively guide studies, decisions, and policies related to fish and wildlife management. The degree is geared towards natural resource professionals with at least 2 years of experience and is an intensive, coursework-only master's degree primarily taught through online courses. Courses focus on the skills and tools needed to analyze, communicate, and make decisions about conservation issues. Students broaden their critical thinking on current issues and receive the training to be successful and advance in careers at natural resources agencies, firms, and non-government organizations.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion, students will be able to:

1. Apply ecological concepts and principles to key problems in their discipline areas of wildlife, fishery biology, ecology, and/or natural resources.
2. Critically review scientific information through a thorough search of literature pertinent to the problem topic, and draw pertinent connections to research and management problem statements.
3. Formulate needed research projects in fishery or wildlife theory and/or practical issues of concern through problem identification, study design, literature review, data interpretation, and data analysis.
4. Summarize and provide cogent descriptions of the current issues in fish and wildlife conservation to a variety of audiences, including the public.

Requirements Effective Spring 2022

Code	Title	Credits
Core Courses		
Select 21 credits from the following:		21
FW 551	Design of Fish and Wildlife Studies	
FW 552	Applied Sampling for Wildlife/Fish Studies	
FW 553	Adaptive Fish and Wildlife Management	
FW 555	Conservation Biology	
FW 562	Fish and Wildlife Population Dynamics	
FW 564	Science of Managing Human-Wildlife Conflicts	
FW 577	Management of Wildlife Habitat	
NR 515	Natural Resources Policy and Biodiversity	
Select at least 9 additional credits from the following:		9
FW 544	Ecotoxicology	
FW 558	Conservation Genetics of Wild Populations	
FW 563	Analyses for Managing Wild Populations	
FW 567	Wildlife Disease Ecology	
FW 572	Wildlife Conservation Communications	
FW 579	Wildlife Conservation Policy--Current Events	
Program Total Credits:		30

A minimum of 30 credits are required to complete this program.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Department of Forest and Rangeland Stewardship

Office in Forestry Building, Room 123
(970) 491-6911

Dr. Eric Toman, Department Head

Cassie Mattson, Assistant to the Department Head
Tiara Marshall, Manager of Undergraduate Programs and Academic Advisor

Logan Bell, Academic Success Coordinator

Sonya Le Febre, Graduate Program Coordinator

Undergraduate Majors

- Major in Fire and Emergency Services Administration
- Major in Forest and Rangeland Stewardship
 - Major in Forest and Rangeland Stewardship, Forest Biology Concentration
 - Major in Forest and Rangeland Stewardship, Forest Fire Science Concentration
 - Major in Forest and Rangeland Stewardship, Forest Management Concentration
 - Major in Forest and Rangeland Stewardship, Rangeland and Forest Management Concentration
 - Major in Forest and Rangeland Stewardship, Rangeland Conservation and Management Concentration
- Major in Natural Resources Management
- Major in Restoration Ecology

Minors

- Minor in Ecological Restoration
- Minor in Forestry
- Minor in Range Ecology

Graduate Graduate Programs in Forest and Rangeland Stewardship

The department offers graduate programs leading to Master of Science and Doctor of Philosophy degrees in Forest Sciences and Rangeland Ecosystem Science, and to Master of Natural Resources Stewardship with specializations in Ecological Restoration, Forest Sciences, and Rangeland Ecosystems. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Forest and Rangeland Stewardship (<http://warnercnr.colostate.edu/frs-graduate-study/graduate-program/>).

Certificates

- Advanced Silviculture for the Practicing Forester
- Climate Adaptation and Risk Management (CARMA)

Master's Programs

- Master of Natural Resources Stewardship, Plan C, Ecological Restoration Specialization
- Master of Natural Resources Stewardship, Plan C, Forest Sciences Specialization
- Master of Natural Resources Stewardship, Plan C, Rangeland Ecology and Management Specialization
- Master of Natural Resources Stewardship, Plan C, Western Ranch Management and Ecosystem Stewardship
- Master of Science in Forest Sciences, Plan A*
- Master of Science in Forest Sciences, Plan B*
- Master of Science in Rangeland Ecosystem Science, Plan A*
- Master of Science in Rangeland Ecosystem Science, Plan B*

Ph.D.

- Ph.D. in Forest Sciences*
- Ph.D. in Rangeland Ecosystem Science*

* Please see department for program of study.

Courses

Subjects in this department include: Fire and Emergency Service Administration (FESA), Forest and Rangeland Stewardship (F), select Natural Resources (NR), and Rangeland Ecosystem Science (RS).

Fire and Emergency Service Administration (FESA)

FESA 310 Fire Service Leadership Credits: 3 (0-0-3)

Course Description: Theory, practice, and application of ethical leadership in public safety; developing personal ethics and leadership skills and abilities.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 330 Industrial Processes and Fire Protection Credits: 3 (0-0-3)

Course Description: Industrial processes and fire protection managed by fire and safety personnel.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Summer (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 331 Structure Influence on Tactics and Strategy Credits: 3 (3-0-0)

Course Description: How construction type, alterations, design and materials influence a building's reaction to fire. Fireground influence on tactics and strategy.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 333 Proposals/Reports in Fire Service Management Credits: 3 (0-0-3)

Course Description: Process of preparing reports and developing a proposal supported by research. Introduction to research techniques, Internet and library use; conventions of documentation.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 334 Orientation to Experiential Learning Credit: 1 (0-0-1)

Course Description: Demonstration of knowledge, skill, and professional experience for the purpose of enhancing documentation and career development skills.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 335 Trends in Fire Science Technologies Credits: 3 (0-0-3)

Course Description: Analytical tools designed to evaluate, align, select, and implement emerging fire science technologies.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 336 Fire Emergency Services Administration Credits: 3 (0-0-3)

Course Description: Fire and emergency service administrative structures and processes. Examination of management and leadership models and applications.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 337 Policy and Public Administration Credits: 3 (3-0-0)

Course Description: Political and legal foundations of fire and emergency services. Public administration concepts, decision making and policy development.

Prerequisite: FESA 334.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 338 Essentials of Emergency Management Credits: 3 (3-0-0)

Course Description: Emergency management theory; mitigation, planning, response, and recovery in large-scale incidents. Development/operation of emergency operation centers.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 339 Incident Command Systems Credits: 3 (0-0-3)

Course Description: Theory and application of incident command systems (ICS) to the command and coordination of major emergency operations.

Prerequisite: FESA 334.

Registration Information: Offered as an online course only.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 341 Fire Officer I-A Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory level of performance, as confirmed by NFPA Standard 1021, Level I, 4.1 to 4.4.

Prerequisite: None.

Registration Information: Enrollment in FESA program or written consent of instructor. Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 342 Fire Officer I-B Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory level of performance, as confirmed by NFPA Standard 1021, Level II, 4.5 to 4.7.

Prerequisite: FESA 341 with a minimum grade of C.

Registration Information: Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 431 Emergency Medical Services Management Credits: 3 (0-0-3)

Course Description: Emergency medical service models, design implementation, evaluation. Interactions with health care systems, public policy and public health systems.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 432 Fire and Emergency Services Budgeting Credits: 3 (3-0-0)

Course Description: Application of emergency service budgeting systems with emphasis on revenues, public financial controls, capital funding and performance measures.

Prerequisite: FESA 333 and FESA 336.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 433 Fire and Emergency: Human Resources Credits: 3 (3-0-0)

Course Description: Theory, practice, and models of human resources applied to emergency organizations; workforce development, HR functions, and labor relation.

Prerequisite: FESA 333 and FESA 336.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 434 Training Program Management Credits: 3 (0-0-3)

Course Description: Development of agency training and education programs. Utilization of training and education practices, resources, facilities and technologies.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 435 Volunteer/Combination Organization Management Credits: 3 (0-0-3)

Course Description: Development and management of fire and emergency service organizations with volunteer and combination resources.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 436 Fire Protection Through Model Building Codes Credits: 3 (0-0-3)

Course Description: Overview of the most current fire codes that are used across the United States. Discussion of fire inspection methodology and enforcement practices.

Prerequisite: None.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 437 Fire and Emergency: Legal Considerations Credits: 3 (0-0-3)

Course Description: Fire Service in relation to the complex legal system of the United States, individual states and local jurisdictions.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 438 Prevention Program Management Credits: 3 (3-0-0)

Course Description: Design, implementation, and evaluation of fire and risk prevention programs using education, engineering, and enforcement approaches.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 441 Fire Officer II-A Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory/managerial level of performance, as confirmed by NFPA Standard 1021, Level II, 5.1 to 5.4.

Prerequisite: FESA 342 with a minimum grade of C.

Registration Information: Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 442 Fire Officer II-B Credits: 3 (3-0-0)

Course Description: Fire officer competencies at the supervisory/managerial level of performance, as confirmed by NFPA Standard 1021, Level II, 5.5 to 5.7.

Prerequisite: FESA 441 with a minimum grade of C.

Registration Information: Offered as an online course only.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

FESA 467 Integrated Management Simulation Credits: 3 (0-0-3)

Course Description: Integration management and administrative knowledge and skills in the development of a fire and emergency service management simulation.

Prerequisite: FESA 432 and FESA 433.

Registration Information: Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

FESA 492 Seminar Credits: Var[1-3] (0-0-0)

Course Description: Discussion and documentation of professional experience in fire and emergency services.

Prerequisite: None.

Registration Information: Written consent of instructor. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

FESA 495 Independent Study Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Admission to the FESA B.S. program; written consent of instructor. Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

Forest and Rangeland Stewardship (F)

F 101 Intro to Forest and Rangeland Stewardship Credit: 1 (1-0-0)

Course Description: Introduce both first year and transfer students to the faculty, and expertise within the department of Forest and Rangeland Stewardship. Gain an appreciation for the majors selected.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 209 Introduction to Forest and Rangeland Ecology Credits: 3 (3-0-0)

Course Description: Ecological concepts pertaining to natural resources and the management of forests and rangelands. Analysis of species, population, and community interactions within an applied framework.

Prerequisite: (BZ 100 to 199 - at least 3 credits or LIFE 100 to 199 - at least 3 credits) and (MATH 118 or MATH 120 or MATH 124 or MATH 125 or MATH 126 or MATH 127 or MATH 141 or MATH 155 or MATH 159 or MATH 160).

Registration Information: Credit allowed for only one of the following:

F 209, LAND 220, LIFE 220 or LIFE 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 224 Wildland Fire Measurements Credit: 1 (0-2-0)

Course Description: Wildland fire control and use measurements: fuels, weather, topography, fire behavior, and fire ecology.

Prerequisite: None.

Registration Information: Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 230 Forestry Field Measurements Credits: 2 (0-4-0)

Course Description: Develop field skills using maps, compasses, and aerial photos; photo interpretation; tree and stand measurements; stand volume and value estimates.

Prerequisite: None.

Term Offered: Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

F 310 Forest and Rangeland Ecogeography Credits: 3 (2-2-0)

Also Offered As: RS 310.

Course Description: Distribution of wildland plant communities and identification of important grasses, forbs, shrubs, and trees common in North America.

Prerequisite: BZ 101 or BZ 104 or BZ 110 or BZ 120 or LIFE 102.

Registration Information: Must have concurrent registration in F 312.

Must register for lecture and laboratory. Credit not allowed for both F 310 and RS 310.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 311 Forest Ecology Credits: 3 (3-0-0)

Course Description: Relationships of ecological concepts to the dynamics of forest ecosystems.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 312 Dendrology Credits: 2 (1-2-0)

Course Description: Identification, classification, nomenclature, morphology, phenology, ecology, geographic ranges, and natural history of trees. Explore the historical and current importance of trees to society. Focus on major forest tree species of North America, and includes several exotic species that commonly occur in urban areas.

Prerequisite: BZ 120.

Registration Information: Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 313 Dendrology and Herbaceous Plant ID Credits: 3 (2-2-0)

Also Offered As: RS 313.

Course Description: Identification, classification, nomenclature, morphology, phenology, ecology, geographic ranges, and natural history of trees, herbaceous plants, plant associations, and habitat typing. Explore the historical and current importance of key trees and herbaceous plants to society. Within the context of plant associations and indicator species, course content will focus on major forest, rangeland, and urban ecosystems and will highlight exotic tree and herbaceous plant species of North America.

Prerequisite: BZ 120.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: F 312, F 313, or RS 313. Credit allowed for only one of the following: F 313, RS 312, or RS 313.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 321 Forest and Natural Resource Biometry Credits: 3 (2-2-0)

Course Description: Measure and calculate the structure of different ecosystems. Sampling and statistical techniques to quantify ecosystem structure. Methods to model ecosystem structure to predict potential future conditions.

Prerequisite: (MATH 117 to 160 - at least 3 credits and NR 220) and (STAT 201 or STAT 301).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

F 322 Economics of the Forest Environment Credits: 3 (3-0-0)

Course Description: Economic principles and techniques applied to forested environments.

Prerequisite: AREC 202 or ECON 202 or ECON 240 or AREC 240.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 324 Fire Effects and Adaptations Credits: 3 (3-0-0)

Course Description: Introduction to fire ecology including fire history, ecosystem effects, and organism responses.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 325 Silviculture Credits: 3 (3-0-0)

Course Description: Principles of silviculture and the application to ecologically-based management and restoration of forests ecosystems.

Prerequisite: NR 220.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 326 Wildland Fire Behavior and Management Credits: 3 (3-0-0)

Course Description: Physical and managerial principles influencing fire, how fires shape our forests and approaches used to manage wildland fire.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 330 Forest Planning and Wood Harvesting Systems Credits: 2 (2-0-0)

Course Description: Principles and components of forest planning and wood harvesting systems to understand and synthesize impacts on ecosystems components and services; market and non-market valuations; and social and cultural experiences.

Prerequisite: F 321.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Required field trips. Credit not allowed for both F 330 and F 380A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 331 Wood Products in Society Credits: 3 (2-2-0)

Course Description: Role of wood products in society; spectrum of wood products; some field trips.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 335 Applications of Silviculture Credit: 1 (0-3-0)

Course Description: Laboratory and some field experience in utilization of ecologically-based silvicultural practices for sustainable timber production, maintenance or restoration of biological diversity, and protection of aesthetic quality and site productivity.

Prerequisite: F 325, may be taken concurrently.

Registration Information: Enrollment in Forest and Rangeland Stewardship major. Required field trips.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 421 Ecological Forest Management Credits: 3 (3-0-0)

Course Description: Preparation of forest management plans to achieve integrated environmental and economic goals based upon principles of forest ecology; evaluation of alternative prescriptions; adaptive management and monitoring.

Prerequisite: F 311 and F 321 and F 325 and F 335.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

F 422 Quantitative Methods in Forest Management Credits: 3 (2-2-0)

Course Description: Design and analysis of optimization and nonoptimization models in forest managerial operations.

Prerequisite: F 321 and F 322.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 425 Advanced Wildland Fire Behavior and Management Credits: 3 (3-0-0)

Course Description: Advanced strategies, tools, and techniques for wildland fire management: prediction, prevention, suppression, and use for resource benefit.

Prerequisite: F 326 and NR 319.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 430 Forestry Field Practices Credits: 3 (1-4-0)

Course Description: Forestry field course, S212 saw certification, collect stand inventory data, develop and implant stand prescription, and harvest and process trees.

Prerequisite: F 330 and F 421.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 466 Urban and Community Forestry Credits: 3 (3-0-0)

Also Offered As: HORT 466.

Course Description: Policies and management of publicly and privately owned community forests in urbanized areas.

Prerequisite: F 310 or RS 310 or HORT 221.

Registration Information: Credit not allowed for both F 466 and HORT 466.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 487 Professional Forestry Internship Credits: Var[3-12] (0-0-0)

Course Description: Professional-level field experience with forestry organization.

Prerequisite: None.

Registration Information: Written consent of department chair.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 495 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 510 Ecophysiology of Trees Credits: 3 (2-3-0)

Course Description: Environmental factors affecting physiology of woody plants; emphasis on water relations in trees and importance of water in physiological processes.

Prerequisite: BZ 440.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 520 Advanced Quantitative Methods in Forestry I Credits: 3 (3-0-0)

Course Description: Design and analysis of optimization models in forest management operations: linear, goal, and dynamic programming.

Prerequisite: F 322 and MATH 160.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 521 Advanced Quantitative Methods in Forestry II Credits: 3 (2-2-0)

Course Description: Analysis of forest inventory information; dynamic and stochastic models oriented to decision making and research in forestry.

Prerequisite: F 520.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 522 Advanced Forest Economics Credits: 3 (3-0-0)

Course Description: Analysis of forestry issues: financial maturity, management intensity, federal policy, taxation, natural environments, and silviculture.

Prerequisite: ECON 306.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

F 524 Forest Fire Meteorology and Behavior Credits: 3 (2-2-0)

Course Description: Effects of atmospheric processes on wild and prescribed fires; interrelationships of weather, fuels, and topography on forest and range fires.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 525 Silvicultural Practices Credits: 4 (3-0-1)

Course Description: Comprehensive coverage of silvicultural practices as applied in US forestry.

Prerequisite: F 311.

Registration Information: Must register for lecture and recitation. Credit not allowed for both F 525 and F 526.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 526 Multiple Resources Silviculture Credits: 3 (3-0-0)

Course Description: Concepts and techniques of silviculture and their application to forest ecology to meet a wide range of desired conditions and resource objectives. Develops knowledge of ecological applications directed at the management of forests with multiple considerations, including wildlife, recreation, forest health, and timber production.

Prerequisite: F 311 or LIFE 320 or NR 565 or NR 578.

Registration Information: Offered as an online course only. Credit allowed for only one of the following: F 525, F 526, or F 581A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 540 Fuels, Vegetation, and Fire Management Credits: 3 (2-3-0)

Course Description: Develop, test and display the impact of alternative fuels and vegetation treatments on vegetation development, fuels and fire behavior.

Prerequisite: None.

Registration Information: Admission to the Continuing Education in Fuels Management program through the Office of Conference Services.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

F 571 Applied Forest Ecology Credits: 2 (2-0-0)

Course Description: Concepts and theory of stand dynamics in relation to advanced ecological concepts within the Rocky Mountain Region and Intermountain West and applications of these concepts to natural disturbance-based management.

Prerequisite: F 311.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 572 Advanced Silviculture Practices Credits: 3 (3-0-0)

Course Description: Application of forest ecology principles and silvicultural techniques to meet a wide range of desired conditions and resource objectives.

Prerequisite: F 571.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 574 Climate Adaptive Forest Management Credit: 1 (1-0-0)

Course Description: Application of climate science and adaptive silviculture strategies to real-world forest management scenarios.

Prerequisite: F 325.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. This is a partial semester course. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 575 Monitoring for Advanced Silviculture Credits: 2 (2-0-0)

Course Description: Best practices and principles for evaluating forest management effectiveness at various scales across the landscape.

Prerequisite: F 421.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

F 576 Advanced Silviculture Capstone Credits: 3 (3-0-0)

Course Description: Application of ecological principles, climate change science, and regional silvicultural principles to the management of a local forest stand.

Prerequisite: F 572 and F 575.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 592 Advanced Silviculture Seminar Credit: 1 (0-0-1)

Course Description: Forestry professionals and faculty present different aspects of advanced silviculture skills to prepare students for the rigor of online, graduate-level courses and to create a plan and portfolio for their final project at the culmination of the certificate.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. This is a partial semester course. Offered as an online course only.

Term Offered: Fall (odd years).

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

F 593 Seminar-Fire Science Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 610 Advanced Forest Ecology Credits: 3 (1-0-2)

Course Description: Patterns of tree mortality and their consequences for ecological communities, disturbance regimes, and ecosystem processes. The literature included is diverse ranging from ecophysiology to dendroecology to climate science, and the goal is to integrate this diverse literature to understand the ecological consequences of climate variability on forest ecosystems of the southern Rocky Mountains and globally.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: At least one undergraduate or graduate course in ecology. Must register for lecture and recitation. Required field trips. Credit not allowed for both F 610 and F 680A1.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

F 624 Fire Ecology Credits: 3 (3-0-0)

Course Description: Fire in forest and range ecosystems; principles and techniques for evaluating fire effects on vegetation, soils, watersheds, and wildlife.

Prerequisite: ECOL 505 or F 310 or F 311 or LIFE 320 or NR 565 or NR 578 or RS 300 or RS 310 or RS 452.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

F 625 Ecology of Forest Production Credits: 3 (3-0-0)

Also Offered As: ESS 625.

Course Description: Develops student expertise in understanding carbon and nutrient flows in forests.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must have completed one 300-level course in ECOL. Credit not allowed for both F 625 and ESS 625. Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 693 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 721 Forest Policy Credits: 3 (3-0-0)

Course Description: Policies and institutions affecting management of forest lands in U.S.

Prerequisite: NR 567.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

F 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

F 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Natural Resources (NR)

NR 565 Principles of Natural Resources Ecology Credits: 3 (3-0-0)

Course Description: Overview of ecological fundamentals examined from the perspective of forest, rangeland, wildlife and fisheries science and management.

Prerequisite: None.

Registration Information: Admission to the Master of Natural Resources Stewardship or written consent of instructor. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NR 566 Natural Resource Inventory and Data Analysis Credits: 3 (3-0-0)

Course Description: Sampling designs, implementation and analysis for inventory and monitoring of forests, rangelands, wetlands and streams.

Prerequisite: STAT 301 or STAT 311 or STAT 312.

Registration Information: Admission to the Master of Natural Resources Stewardship or written consent of instructor. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NR 568 Economics of Forests, Restoration and Fire Credits: 3 (3-0-0)

Course Description: Overview of basic microeconomics principles as applied to forestry, restoration, and wildland fire management.

Prerequisite: None.

Registration Information: Admission to the Master of Natural Resources Stewardship or written consent of instructor. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NR 578 Ecology of Disturbed Lands Credits: 3 (3-0-0)

Course Description: Analysis of basic and applied ecological principles involved in the restoration of drastically disturbed lands.

Prerequisite: (LAND 220 or LIFE 220 or LIFE 320 or NR 565) and (SOGR 240).

Registration Information: Sections may be offered: Online. Credit not allowed for both NR 578 and RS 578.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Rangeland Ecosystem Science (RS)

RS 300 Rangeland Conservation and Stewardship Credits: 3 (3-0-0)

Course Description: Conservation and management of rangeland-ecosystem values using sustainable practices.

Prerequisite: (BZ 120 or LIFE 102 or LIFE 103) and (F 209 or LAND 220 or LIFE 220 or LIFE 320).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 310 Rangeland and Forest Ecogeography Credits: 3 (2-2-0)

Also Offered As: F 310.

Course Description: Distribution of wildland plant communities and identification of important grasses, forbs, shrubs, and trees common to North America.

Prerequisite: BZ 101 or BZ 104 or BZ 110 or BZ 120 or LIFE 102.

Registration Information: Must have concurrent registration in RS 312. Must register for lecture and laboratory. Credit not allowed for both RS 310 and F 310.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 312 Rangeland Plant Identification Lab Credit: 1 (0-2-0)

Course Description: Identification of characteristic grasses, forbs, and shrubs common to North American rangelands.

Prerequisite: None.

Registration Information: Must have concurrent registration in RS 310.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 313 Dendrology and Herbaceous Plant ID Credits: 3 (2-2-0)

Also Offered As: F 313.

Course Description: Identification, classification, nomenclature, morphology, phenology, ecology, geographic ranges, and natural history of trees, herbaceous plants, plant associations, and habitat typing. Explore the historical and current importance of key trees and herbaceous plants to society. Within the context of plant associations and indicator species, course content will focus on major forest, rangeland, and urban ecosystems and will highlight exotic tree and herbaceous plant species of North America.

Prerequisite: BZ 120.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: F 312, F 313, or RS 313. Credit allowed for only one of the following: F 313, RS 312, or RS 313.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 329 Rangeland Assessment Credit: 1 (0-3-0)

Course Description: Five-day intensive field-based course on principles of rangeland ecosystem assessment.

Prerequisite: (F 310 or RS 310) and (RS 300 and SOCR 240).

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 331 Wildland Plants and Plant Communities Credits: 3 (2-2-0)

Course Description: Distribution of non-forested wildland plant communities and important plant species in the western United States.

Prerequisite: BZ 223 or NR 220.

Registration Information: Must register for lecture and laboratory. Required field trips. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 351 Wildland Ecosystems in a Changing World Credits: 3 (2-2-0)

Course Description: Understanding and conserving non-forested wildland ecosystems, processes, and services under changing environmental conditions.

Prerequisite: (LIFE 320 or LAND 220 or LIFE 220) and (SOCR 240).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 378 Disturbance Ecology Credits: 2 (2-0-0)

Course Description: Foundational knowledge of ecological disturbances, the role of disturbance in biotic communities and ecosystems, and how various communities and ecosystems recover from disturbances.

Prerequisite: F 209 or LAND 220 or LIFE 220 or LIFE 320.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 400 Rangeland Improvements Credits: 2 (2-0-0)

Course Description: Improvement of rangelands through biological and cultural methods; management of improved rangelands.

Prerequisite: RS 300 or SOCR 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 420 Grass Taxonomy Credits: 3 (1-4-0)

Course Description: Anatomy, morphology, and identification of grasses.

Prerequisite: BZ 223.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 432 Rangeland Measurements and Monitoring Credits: 2 (1-3-0)

Course Description: Vegetation sampling and field measurements emphasizing applications for monitoring and adaptive management.

Prerequisite: (NR 220 and RS 300, may be taken concurrently) and (STAT 201 or STAT 301 or STAT 307).

Registration Information: Credit not allowed for both RS 432 and RS 532.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

RS 452 Rangeland Herbivore Ecology and Management Credits: 3 (3-0-0)

Course Description: Ecology and management of large ungulate herbivores including consumer functions at organismal and ecosystem levels.

Prerequisite: (F 209 or LAND 220 or LIFE 220 or LIFE 320) and (RS 300).

Registration Information: Voluntary field trips. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 470 Rangeland Economics and Analysis Credits: 2 (2-0-0)

Course Description: Economics of rangeland resource use; analytical techniques for allocation of rangeland resources.

Prerequisite: (AREC 202 or ECON 202) and (RS 300).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 471 Rangeland Planning and Grazing Management Credits: 2 (2-0-0)

Course Description: Definition of grazing management, grazing systems. Synthesis of animal, plant responses to grazing management. Structure, function of rangeland planning.

Prerequisite: RS 300 or SOCR 320.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

RS 472 Rangeland Ecosystem Planning Credits: 4 (1-6-0)

Course Description: Range allotment, ranch, and restoration planning.

Prerequisite: RS 471.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 478 Ecological Restoration Credits: 3 (3-0-0)

Course Description: Analysis of environmental factors influencing restoration of disturbed lands and practices for successful restoration of disturbed ecosystems.

Prerequisite: (BZ 450 or F 209 or LAND 220 or LIFE 220 or LIFE 320) and (SOCR 240).

Registration Information: Credit not allowed for both RS 478 and NR 678.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

RS 495 Independent Study-Rangeland Ecosystems Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

RS 496 Group Study-Rangeland Ecosystem Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

RS 500 Advanced Rangeland Management Credits: 3 (3-0-0)**Course Description:** Rangeland management concepts.**Prerequisite:** LAND 220 or LIFE 320 or NR 220 or LIFE 220.**Registration Information:** Sections may be offered: Online.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**RS 531 World Grassland Ecogeography Credits: 3 (2-3-0)****Course Description:** Distribution, climate, and structure of the world's major grasslands with emphasis on North America.**Prerequisite:** BZ 223.**Registration Information:** Must register for lecture and laboratory.

Required field trips. Sections may be offered: Online.

Term Offered: Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**RS 532 Rangeland Ecosystem Sampling Credits: 3 (1-3-1)****Course Description:** Measurement, analysis techniques for rangeland vegetation. Applications to management emphasized.**Prerequisite:** (STAT 301) and (LAND 220 or LIFE 320 or NR 220 or LIFE 220).**Registration Information:** Must register for lecture, lab, and recitation.

Required field trips. Credit not allowed for both RS 532 and RS 432.

Term Offered: Fall.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**RS 552 Range Animal Production and Management Credits: 4 (3-0-1)****Course Description:** Biological and ecological basis for production of meat from rangelands.**Prerequisite:** LAND 220 or LIFE 320 or NR 220 or LIFE 220.**Registration Information:** Must register for lecture and recitation.

Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**RS 565 Riparian Ecology and Management Credits: 3 (2-2-0)****Course Description:** Analysis of interactions among biotic and abiotic processes as relates to the ecology and management of riparian systems, emphasizing case studies.**Prerequisite:** LAND 220 or LIFE 220 or LIFE 320.**Registration Information:** Must register for lecture and laboratory.

Required field trips.

Term Offered: Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**RS 630 Ecology of Grasslands and Shrublands Credits: 3 (3-0-0)****Course Description:** Distributions and climatic controls on grassland and shrubland plant communities.**Prerequisite:** NR 565 or NR 578.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**RS 693 Seminar Credit: 1 (0-0-1)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 695 Independent Study-Rangeland Ecosystem Credits:****Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 696 Group Study-Rangeland Ecosystem Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 698 Research Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 699 Thesis Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 793 Seminar Credit: 1 (0-0-1)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 795 Independent Study-Rangeland Ecosystem Credits:****Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**RS 798 Research Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

Major in Fire and Emergency Services Administration

The fire and emergency services have a long and proud history of serving their communities with a wide variety of fire protection, prevention, emergency medical, and public education services. The fire and emergency services administrators of the future need advanced administration, management, and leadership skills to address the ever-evolving nature of emergency services. The major prepares students for managerial and officer positions in emergency and fire service organizations.

The major is a degree completion program for students to gain advanced knowledge of emergency service related subjects. The coursework builds upon technical skills and experiences earned in First Responder associate degree programs and on-the-job training. Students will explore key administrative and management areas such as emergency operations, public service budgeting, human resources, prevention, and incident command. The major is focused on the administration and management of First Responder organizations.

All fire and emergency services administration courses are upper-division and offered online via distance education only through the CSU Online (<http://www.online.colostate.edu/>).

Learning Objectives

Students will demonstrate their ability to:

1. Effectively integrate academic knowledge into fire and emergency services administrative and managerial roles within current and future employment situations.
2. Collaborate with peers to solve fire and emergency services organizational problems. Effective collaboration includes the ability to organize and synthesize ideas, develop a persuasive argument, interact with individuals and groups, and use applicable presentation aids.
3. Apply their knowledge, skills, and competencies in the fire and emergency services field to fire and emergency services organizations. Examples include knowledge of proposal and report writing, trends in emergency management and incident command systems, and comprehension of public service administration practices.
4. Interact with professional First Responders nationally and internationally.

Potential Occupations

Students in the Fire and Emergency Services Administration major should have work experience in the fire and emergency services field. Typical students are employed as career or volunteer firefighters, wildland firefighters, paramedics, emergency medical technicians, inspectors, or trainers. Graduates can expect positions as fire chiefs, company officers, public administrators, fire marshals, or educators.

Requirements Effective Spring 2015

Students must complete an additional 60 credits including All-University Core Curriculum (AUCC) Categories 1-3.

¹ Select enough credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major in Forest and Rangeland Stewardship

Forests and rangelands are always changing, sometimes very slowly as a result of long-term processes, followed by rapid changes as a result of fires, timber harvesting, or grazing. Rangelands occupy nearly fifty percent of the earth's land surface and consist of natural grasslands, savannas, shrublands, riparian areas, deserts, tundra, and coastal marshes. Sustaining forests and rangelands in the modern world requires managers who understand ecosystem changes, and how forests and rangelands connect to global, ecological, and social systems. State and federal land management agencies, private landowners, consultants, and conservation organizations employ graduates of the Forest and Rangeland Stewardship (FRS) major. The curriculum includes a balanced mix of courses in plant and animal biology, integrated resource management, and the physical sciences. Colorado is an ideal setting for the study of forestry and rangeland ecology and management with shortgrass steppe to the east and high elevation grasslands, forests, woodlands, and riparian areas to the west. Students learn about ecosystem productivity, policy, conservation, and the latest in computer-based management tools. Students also gain an understanding of economics related to recognizing alternatives and analytical and decision-making skills, as well as developing communication, political and interpersonal skills to make their education effective, and contribute to their respective fields fully upon graduation.

The forestry-specific concentrations within the FRS major are accredited by the Society of American Foresters, with curricula meeting the Office of Personnel Management (OPM) requirements for the forestry series (0460) and the forestry technician series (0462). The range-specific concentrations in the FRS major are accredited by the Society for Range Management and students generally meet the OPM requirements for the Rangeland Management Series (0454) and Soil Conservation Series (0457).

Students in the FRS major will gain an understanding of and learn how to manage the animal, soil, and vegetation resources on rangelands or in forests for state and federal land management agencies as well as a variety of private landowners and non-governmental agencies. With a few additional courses, graduates meet OPM requirements for the Ecology Series (0408). Students develop an in-depth understanding of basic plant and animal biology; a basic understanding of the physical sciences as they relate to rangeland ecology; and knowledge of important concepts of ecology and range management.

The FRS major includes summer field courses. All FRS students take a 4-week summer field course at the CSU Mountain Campus for field studies in forest and rangeland ecology and management, wildlife, watershed and human dimensions of natural resources. Students in the forestry concentrations take another 2-week summer field course at the Mountain Campus that focuses on forestry field measurements. Students in the rangeland concentrations take a 1-week summer field course focused on rangeland inventory and assessment that is normally held in shortgrass steppe or foothills rangelands close to Fort Collins.

Potential Occupations

Careers in forestry and natural resources are exceptionally varied, challenging, and personally satisfying. Opportunities are available in rural and urban settings worldwide. Positions are available in industry, education, consulting, public service, and government agencies. Some examples of career opportunities include, but are not limited to: forest manager, forest/park ranger, environmental policy and conservation consultant, fire fighter/manager, natural resource journalist, naturalist, land use planner, geospatial information systems specialist, forest products business person, researcher/professor.

Examples of career opportunities in range management include, but are not limited to restoration ecologist, rangeland scientist, rangeland management specialist, soil conservationist, soil scientist, rangeland conservationist, plant ecologist, riparian ecologist, ranch manager, researcher, commercial sales and service representative, consultants, mine rehabilitation specialist, real estate/land manager, and international rangeland specialist.

Learning Objectives

Students will:

1. Effectively communicate knowledge of forestry and natural resources, both verbally and in writing.
2. Demonstrate proficiency in subject areas outside their major study focus, including principles/issues in wildlife, water, recreation, wilderness, soil, range, and fishery resources.
3. Demonstrate comprehensive knowledge of subject areas relevant to the major fields of study in forest sciences, including forest ecology and forest management, and apply this knowledge in a complex, problem-solving environment.
4. Demonstrate fundamental knowledge of ecosystem components and ecosystem functioning, including human systems.
5. Measure and assess ecosystem components, properties, and functioning, including human systems.
6. Identify and evaluate management objectives.
7. Demonstrate skills in management planning, practice, and implementation.

Major in Forest and Rangeland Stewardship, Forest Biology Concentration

The Forest Biology concentration in the Forest and Rangeland Stewardship major provides forestry education that spans the entire range of experiences necessary to understand and manage forests. Curricula include a background in the biological, physical, social, and management sciences, followed by professional forestry courses. The curriculum also focuses on forest biology, forest ecology, natural resource management, and the physical sciences. More specifically, this concentration is intended for students interested in forest ecology and tree biology and it prepares students for graduate studies in forest biological sciences and eventual careers in teaching or research.

Major in Forest and Rangeland Stewardship, Forest Fire Science Concentration

The Forest Fire Science concentration in the Forest and Rangeland Stewardship major provides forestry education that spans the entire range of experiences necessary to understand and manage forests. Curricula include a background in the biological, physical, social, and

management sciences, followed by professional forestry courses.

More specifically, this concentration is the study of fire as an ecological process and its application as a forest management tool. Students learn how to control wildfires and how prescribed fires can enhance habitat, prepare seedbeds, control forest insects and disease, and reduce fuel hazards.

Major in Forest and Rangeland Stewardship, Forest Management Concentration

The Forest Management concentration in the Forest and Rangeland Stewardship major provides forestry education that spans the entire range of experiences necessary to understand and manage forests. Curricula include a background in the biological, physical, social, and

management sciences, followed by professional forestry courses. More specifically, this concentration is designed to instill an understanding of the basic principles of forest ecology and forest management. Although many students go on to graduate studies, the program is primarily intended for students interested in managing forestlands.

Major in Forest and Rangeland Stewardship, Rangeland and Forest Management Concentration

The Rangeland and Forest Management concentration in the Forest and Rangeland Stewardship major emphasizes interdisciplinary study,

research, and management of the world's rangelands. More specifically, this concentration prepares students in multiple-use principles to manage and administer both rangeland and forest resources for federal and state government agencies or private business.

Major in Forest and Rangeland Stewardship, Rangeland Conservation and Management Concentration

The Rangeland Conservation and Management concentration in the Forest and Rangeland Stewardship major emphasizes interdisciplinary

study, research, and management of the world's rangelands. More specifically, this concentration focuses on the stewardship of rangelands for multiple uses. These uses include both consumptive and non-consumptive activities such as recreation, preservation of wildlife habitat, providing for aesthetic beauty, livestock grazing, and ranching.

Major in Natural Resources Management

The goal of the Natural Resources Management major is to provide students with a broad-based understanding of the interconnectedness of social, political, and ecological systems. This knowledge will enable students to design sustainable solutions to address natural resource conservation and management problems. Students will learn about natural resource stewardship in both theory and practice, with an eye toward designing systems that are adaptable and resilient in light of the social and ecological complexity and change that characterize today's challenges. Using an integrative approach, students will learn how to develop local solutions that are sustainable and ethical at larger, global scales. Environmental issues such as land-use change and planning, conservation biology, energy use, climate change, renewable resource management, and citizen engagement in place-based conservation will be addressed. Field measurements and field skills are important components of this major, and students are required to attend a four-week summer field course in ecological investigations and resource management.

Specific objectives are to provide each student with:

1. a science-based core curriculum in biological, physical, and social sciences;
2. a broad foundation in natural resources science and environmental management; and
3. specialization in a subject relevant to natural resources management.

The breadth of the major allows students to specialize in a wide range of topics, including conservation biology, geographic information systems, forest management, rangeland ecology, restoration ecology, natural resource policy, recreation resources, watershed management, wildlife management, or other topics related to natural resources management. This specialization is accomplished by coupling the major with a required minor, typically declared by a student's junior year.

Students are encouraged to participate in internships and obtain related work experience. Participating in seasonal and voluntary work, internships, and cooperative education opportunities will enhance your chances for permanent full-time employment. The department offers numerous opportunities to become engaged in these kinds of endeavors. At the completion of the program, students should have the technical and communication skills that are critical to resolving important natural resource management problems.

Learning Objectives

Students will:

1. Demonstrate knowledge of a wide range of natural resource topics spanning ecological, social, and physical aspects of wildland ecosystems.
2. Demonstrate proficiency in an area of specialization through completion of a minor in an area complementary to natural resource management. Some minors that students find well-suited to develop a proficiency are: Global Environmental Sustainability, Forestry, Rangeland Ecology, Ecological Restoration, Watershed Science, Conservation Biology, or Environmental Affairs, and many additional options.
3. Be able to apply their broad natural resources knowledge to create sustainable solutions at local, national, and global scales.
4. Accurately communicate their knowledge of natural resources, both verbally and in written form.

Potential Occupations

Opportunities are available with a wide array of local, national, and international organizations and institutions involved in natural resource management. Graduates apply their education in science, technology, social science, and policy to solving today's critical natural resource and environmental problems. Positions are found with federal, state, and local government agencies, industry, and education and advocacy organizations. Some natural resource professionals are employed in environmental consulting firms and corporate environmental departments. The nonprofit sector provides a variety of environmentally-related jobs, ranging from science application to policy development, education, and collaborative conservation.

Examples of available career choices include, but are not limited to: natural resource manager; professional forester; land use planner; geographic information system (GIS) or remote sensing specialist; fishery/wildlife manager; environmental policy analyst; environmental advocate; environmental consultant; resources/environmental lawyer (with continued education); youth agency administrator; natural resource communications specialist; law enforcement officer; natural resources/environmental educator; restoration specialist; multiple resource use planner; regulatory compliance enforcement officer.

At least 200 hours of acceptable professional work experience in the student's field prior to graduation is highly recommended. This can include summer/seasonal/school semester employment in natural resource management through paid summer jobs, an approved internship, volunteer positions, or work study experience. Acceptable work experience includes (but is not limited to) working for federal, state, non-governmental, private, and university organizations that research or manage natural resources, or are responsible for public policy or public relations related to natural resources.

¹ Students must complete the requirements for a minor in any discipline.

Major Completion Map

Major in Restoration Ecology

The Major in Restoration Ecology emphasizes interdisciplinary study, research, and restoration of damaged, degraded or destroyed rangelands and forested ecosystems of the world. More specifically, this major focuses on the restoration of rangelands and forests for multiple uses. These uses include both consumptive and non-consumptive activities such as recreation, preservation of wildlife habitat, providing for aesthetic beauty, livestock grazing, and timber production. Forests and rangelands occupy the vast majority of the earth's land surface and Colorado is an ideal setting for the study of restoration ecology with many different types of rangeland and forest ecosystems in close proximity.

Students in this program will gain the important knowledge and skills necessary to restore damaged ecosystems. They will learn how to manipulate soil, water, vegetation and animal resources in order to implement successful restoration for local, state and federal land management agencies as well as for a variety of private entities, landowners and non-governmental agencies. Students develop an in-depth understanding of basic plant and animal biology; a basic understanding of the physical sciences as they relate to restoration ecology; knowledge of important concepts of ecology and natural resources management; an understanding of economics related to evaluating alternatives; and analytical and decision-making skills. Students also develop communication, political and interpersonal skills to make their education effective. Examples of career opportunities include, but are not limited to restoration ecologist, soil conservationist, plant ecologist, riparian ecologist, researcher, commercial sales and service representative, consultants, and mine reclamation specialist.

1. Accurately and effectively communicate their understanding of restoration ecology both verbally and in written form.
2. Demonstrate an understanding of the ways in which the ecological structure and functioning of natural resource systems are damaged, degraded or destroyed by disturbances.
3. Apply qualitative and quantitative measurement and analytical techniques to identify and evaluate objectives and metrics for restoration programs.
4. Demonstrate proficiency in working with diverse, multi-disciplinary and multi-stakeholder teams to develop and communicate goals, objectives, and prescriptions for overcoming limitations to restoration.
5. Demonstrate learning of subject areas outside their major study focus, including (but not restricted to) principles/issues in wildlife, water, recreation, wilderness, soil, rangeland, and fishery resources; students will also demonstrate knowledge of social science analytic techniques.
6. Develop vegetation/habitat management and restoration techniques and methods based on scientific insights that can be used to craft solutions responsive to unique challenges.
7. Be able to work together as a team to solve natural resource problems, taking into account ecological, social, government policy, and economic contexts, and the use of inquiry, analytical, integrative/synthetic, and communication skills.

Minor in Ecological Restoration

Forest and Rangeland Stewardship Department
Forestry Building, Office 123
970.491.6911

The minor in Ecological Restoration allows students in related majors to gain knowledge of the science and art of restoring ecosystems. This background is especially valuable to students who will be working in the various natural resource management fields. Since the prevalence of damaged, degraded or destroyed ecosystems is likely to increase in the future, restoration will be imperative for transforming these lands to once again provide ecosystem services.

To get more information about this minor or to officially declare it, please visit the Warner College of Natural Resources Undergraduate Student Advising website (<https://warnercnr.colostate.edu/advising/>) to make an appointment with an advisor.

Requirements
Effective Spring 2013

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Second Year		Credits
NR 300	Biological Diversity	3
RS 300	Rangeland Conservation and Stewardship	3
Total Credits		6
Third Year		
BSPM 308	Ecology and Management of Weeds	3

Total Credits		5
Program Total Credits:		23

Minor in Forestry

Forest and Rangeland Stewardship Department
Forestry Building, Office 123
970.491.6911

The minor in Forestry provides students with the opportunity to obtain exposure to forest sciences. It provides insight into the management of forested lands and is particularly appropriate for students majoring in other natural resource disciplines or natural sciences.

To get more information about this minor or to officially declare it, please visit the Warner College of Natural Resources Undergraduate Student Advising website (<https://warnercnr.colostate.edu/advising/>) to make an appointment with an advisor.

Learning Objectives

Students will:

- 1. Effectively communicate knowledge of forestry and natural resources, both verbally and in writing.
- 2. Demonstrate comprehensive knowledge of subject areas relevant to fields of study in forest sciences, including forest ecology and forest management, and apply this knowledge in a complex, problem-solving environment.
- 3. Demonstrate and measure fundamental knowledge of ecosystem components and ecosystem functioning, including human systems.
- 4. Identify and evaluate management objectives.
- 5. Demonstrate skills in management planning, practice, and implementation.

Requirements
Effective Fall 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
F 311	Forest Ecology	3
F 321	Forest and Natural Resource Biometry	3
F 325	Silviculture	3
F 330	Forest Planning and Wood Harvesting Systems	2
F 335	Applications of Silviculture	1
F 421	Ecological Forest Management	3

F 326	Wildland Fire Behavior and Management	
Program Total Credits:		25-26

Minor in Range Ecology

Forest and Rangeland Stewardship Department

Forestry Building, Office 123

970.491.6911

The minor in Range Ecology provides an academic background for students interested in wildlife habitat, integrated land management, ranch management, applied ecology, and international development of arid lands. The minor provides additional flexibility for students who have a liberal arts or international education goal, but would like to increase their employment potential in an applied area. A minimum of 12 credits in the minor must be from Rangeland Ecosystem Science (RS) courses.

To get more information about this minor or to officially declare it, please visit the Warner College of Natural Resources Undergraduate Student Advising website (<https://warnercnr.colostate.edu/advising/>) to make an appointment with an advisor.

Learning Objectives

Students will:

1. Develop an in-depth understanding of basic plant and animal biology and physical sciences as they relate to the field of rangeland science.
2. Understand the important concepts of ecology and rangeland management.

Requirements

Effective Fall 2024

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Code	Title	Credits

¹ SOCR 240 and one of BZ 223 or NR 220 are recommended.

Graduate Certificate in Advanced Silviculture for the Practicing Forester

The Graduate Certificate in Advanced Silviculture for the Practicing Forester provides forestry professionals with advanced contemporary knowledge for making sound, science-based management decisions within an adaptive management context. This online certificate will prepare students with the tools, methods, theories, and tactics to identify, compare, and apply advanced ecological and silvicultural concepts to diverse forest ecosystems, as well as develop, implement, and evaluate silvicultural solutions to help forests and communities adapt to a changing climate. The program is comprised of a set of six core courses.

Learning Objectives

After successfully completing the graduate certificate, students will be able to:

1. Identify, compare, and apply advanced ecological and silvicultural concepts across diverse forest ecosystems.
2. Develop a comprehensive silviculture prescription that identifies a suite of options at the stand level within a landscape context, that addresses climate change adaptation and mitigation, and that meets a variety of management objectives and desired future conditions.
3. Evaluate and assess the effectiveness of on-the-ground management through the development and implementation of a monitoring plan to inform future adaptive management decisions.
4. Demonstrate effective written, oral, and visual communication skills.
5. Demonstrate ethical and professional behaviors in all aspects of forest management.
6. Demonstrate lifelong learning skills and know how to access, evaluate quality and relevance, and utilize current scientific information.

Requirements

Effective Fall 2021

Additional coursework may be required due to prerequisites.

Code	Title	Credits
F 571	Applied Forest Ecology	2
F 572	Advanced Silviculture Practices	3
F 574	Climate Adaptive Forest Management	1
F 575	Monitoring for Advanced Silviculture	2
F 576	Advanced Silviculture Capstone	3
Select one course from the following:		1-2
F 592	Advanced Silviculture Seminar	

NR 693	Natural Resources Stewardship Seminar
Program Total Credits:	12-13

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Climate Adaptation and Risk Management (CARMA)

The online Graduate Certificate in Climate Adaptation and Risk Management (CARMA) provides post-baccalaureate students and professionals from a variety of disciplines with advanced knowledge of adaptive climate change solutions within the context of risk management and social considerations. This online certificate will prepare the students with scientifically-based knowledge, tools, methods, theories, and tactics to identify, compare, evaluate, and apply climate-adaptive strategies across a diverse suite of ownerships, rights holders, sectors and land-uses at the local, state, regional, and global levels.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

After successfully completing the graduate certificate, students will be able to:

1. Assess, quantify, and understand how climate change has affected and will likely impact social and ecological systems and the linkages between them.
2. Identify, compare, and evaluate climate models, risk management frameworks, and adaptive planning approaches for ecological and social systems.
3. Develop climate adaptation plans to inform decision making that incorporate scientific, social, economic, and policy considerations across temporal and spatial scales.
4. Identify and analyze social justice implications, historical/legacy considerations, policy approaches, and communication strategies related to climate adaptation, mitigation, and risk assessments.
5. Demonstrate effective written, oral, and visual communication skills that contribute to lifelong learning skills regarding how to access, evaluate, utilize, and disseminate relevant and high-quality scientific information for the benefit of the public, policymakers, stakeholders and rights-holders, and decision-makers in the public and private sectors.

Requirements Effective Fall 2023

Additional coursework may be required due to prerequisites.

Code	Title	Credits
ESS 516/NR 516	Climate Justice and Policy	2
ESS 543/ATS 543	Global Climate Change	2
NR 517/NRRT 517	Climate Change Communication and Engagement	2
NR 518	Climate Impacts and Risk Assessments	3

Select one course from the following: 1-4

F 574	Climate Adaptive Forest Management
FW 579	Wildlife Conservation Policy--Current Events
NR 501	Leadership and Public Communications
NR 535	Action for Sustainable Behavior
NR 678	Advanced Ecological Restoration

Program Total Credits: 10-13

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course maybe counted only in one certificate.

Master of Natural Resources Stewardship, Plan C, Ecological Restoration Specialization

This Master of Natural Resources Stewardship (M.N.R.S.), Plan C, Ecological Restoration Specialization is a coursework-intensive, professional master's degree. It provides students with a broad natural resources education and specialized resource management expertise in ecological restoration.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Students will:

1. Demonstrate broad knowledge of natural resource issues and management and in depth knowledge in one area of specialization: rangeland ecosystems, forested lands, or ecological restoration.
2. Design natural resource inventory and monitoring programs and collect, process and interpret data.
3. Oversee the preparation of and critically analyze an Environmental Impact Assessment, including its content, structure, and compliance with the intent and legal requirements of the National Environmental Policy Act.

Requirements Effective Fall 2023

Code	Title	Credits
Core Courses		
NR 567	Analysis of Environmental Impact	3
NR 578	Ecology of Disturbed Lands	3
Select one course from the following:		2-3
F 575	Monitoring for Advanced Silviculture	
NR 566	Natural Resource Inventory and Data Analysis	
RS 532	Rangeland Ecosystem Sampling	
Select one course from the following:		1-2
F 592	Advanced Silviculture Seminar	
NR 693	Natural Resources Stewardship Seminar	
Ecological Restoration Specialization		
Select a minimum 9 credits from the following:		9

AB 551	Advanced Integrated Pest Management
BSPM 528	Invasive Plants/Weeds–Ecosystems to Molecules
BZ 526/BSPM 526	Evolutionary Ecology
CIVE 613	River Restoration Design
ECOL 505	Foundations of Ecology
FW 568/BZ 568	Sustaining River Ecosystems in Changing World
NR 577	Wetland Ecology and Restoration
NR 678	Advanced Ecological Restoration
SOCR 441	Soil Ecology
SOCR 567	Environmental Soil Chemistry
No more than one of the following three courses may count towards the 9 credits above:	
F 624	Fire Ecology
NR 552	Ecology of Military Lands
RS 630	Ecology of Grasslands and Shrublands
Electives ¹	10-12
Program Total Credits:	30

A minimum of 30 credits are required to complete this program.

¹ Select courses with approval of advisor.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made

9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Natural Resources Stewardship, Plan C, Forest Sciences Specialization

The Master of Natural Resources Stewardship (M.N.R.S.), Plan C, Forest Sciences Specialization is a coursework-intensive professional master's degree. It provides students with a broad natural resources education and specialized resource management expertise in forest sciences.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students will:

1. Demonstrate broad knowledge of natural resource issues and management and in depth knowledge in one area of specialization: rangeland ecosystems, forested lands, or ecological restoration.
2. Design natural resource inventory and monitoring programs and collect, process and interpret data.
3. Oversee the preparation of and critically analyze an Environmental Impact Assessment, including its content, structure, and compliance with the intent and legal requirements of the National Environmental Policy Act.

Requirements Effective Fall 2023

Master of Natural Resources Stewardship, Plan C, Western Ranch Management and Ecosystem Stewardship Specialization

This Master of Natural Resources Stewardship (MNRS), Plan C, Western Ranch Management and Ecosystem Stewardship Specialization is a coursework-intensive professional master's degree. It provides students with a broad natural resources education and specialized resource management expertise in ranch management.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

After successfully completing the program, students will be able to:

1. Critically evaluate traditional and novel ranch management approaches using knowledge of sustainable natural resource management (forests, rangelands, wildlife, and watersheds), ecology, business, livestock production, and agriculture.
2. Track and evaluate current scientific information, apply a variety of tools and technologies, and manage business operations to achieve management goals.
3. Develop, implement, monitor, and adapt ranch management approaches to support ecosystem processes, foster lasting protection of the land, and achieve economic sustainability, across diverse ecological and social contexts.
4. Consider multiple perspectives and understand how diverse cultures/backgrounds/experiences/social positions affect values/attitudes/roles related to ranch management.
5. Demonstrate effective written, oral, and visual communication skills with a variety of stakeholders and excel working in teams.
6. Leverage resources (e.g., partnerships, grants, expert opinion) and build communities of practice and professional networks.
7. Demonstrate ethical and professional behaviors in all aspects of ranch management and ecosystem stewardship.

Requirements Effective Fall 2023

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Core Requirements:		
NR 539	Western Ranch Assessment and Planning	3
NR 567	Analysis of Environmental Impact	3
NR 578	Ecology of Disturbed Lands	3
Select one from the following		2-3
F 575	Monitoring for Advanced Silviculture	1-2
NR 566	Natural Resource Inventory and Data Analysis	
RS 532	Rangeland Ecosystem Sampling	
Select one from the following:		1-2

Courses Geosciences (GEOL)

GEOL 110 Introduction to Geology-Parks and Monuments (GT-SC2) Credits: 3 (3-0-0)

Course Description: Understanding the physical processes, natural hazards, earth materials, and natural resources of planet Earth, and the relationship of humans to this planet. Outstanding examples of natural features from national and local parks and monuments, using narrated high-resolution (including aerial) video.

Prerequisite: None.

Registration Information: This is a partial semester course. Offered as an online course only. Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 120 Geology and Society (GT-SC2) Credits: 3 (3-0-0)

Course Description: Explore the dynamic Earth system that we call home. Examine the processes that shape the world and create the resources used and the natural hazards faced. Learn about plate tectonics, climate change, minerals, rocks, geologic time, resources, earthquakes, volcanoes, flooding, and landslides. Build scientific skills and an understanding of the scientific process through making observations, interpreting data, performing calculations, reading maps, and evaluating graphs.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 121 Experiential Geoscience Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Explore the variety of methods used by geoscientists to study the Earth through field trips, examination of datasets, and experiments with physical models. Learn to identify rocks and minerals, read the landscape using maps, measure surface and groundwater, and interpret climate data. Build scientific skills and gain an understanding of how science operates by participating in inquiry activities.

Prerequisite: GEOL 110, may be taken concurrently or GEOL 120, may be taken concurrently or GEOL 122, may be taken concurrently or GEOL 124, may be taken concurrently.

Registration Information: Sections may be offered: Online. Required field trips. Credit not allowed for both GEOL 121 and GEOL 150.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

GEOL 122 Geoscience--Climate and Environmental Change (GT-SC2) Credits: 3 (3-0-0)

Course Description: Explore the Earth processes that shape the environment. Examine how Earth systems change and how people contribute to and are affected by these changes. Learn about climate change, the hydrological cycle, rock and mineral formation, weathering and erosion, glaciers, oceans, and plate tectonics. Build scientific skills and an understanding of the scientific process through making observations, interpreting data, performing calculations, reading maps, and evaluating graphs.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 124 Earth Resources and Sustainability (GT-SC2) Credits: 3 (3-0-0)

Course Description: Explore the role of Earth resources in building a sustainable society. Learn about the geologic processes that create water, mineral, and energy resources. Examine positive and negative impacts of resource extraction and use. Investigate economic, political, and environmental issues associated with Earth resources. Build scientific skills and an understanding of the scientific process through making observations, interpreting data, performing calculations, reading maps, and evaluating graphs.

Prerequisite: None.

Registration Information: Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 150 Dynamic Earth (GT-SC2) Credits: 4 (3-3-0)

Course Description: Explore the geology of the dynamic Earth from core to surface and over timescales of hours to millions of years through hands-on activities in the laboratory and field. Learn to identify and interpret Earth materials. Build proficiency in scientific hypothesis testing. Learn how plate tectonic forces shape landscapes and tie dynamic Earth processes to societal interests, including global climate change, natural hazards, and critical natural resources.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Required field trips. Credit allowed for only one of the following: GEOL 110, GEOL 120, GEOL 122, GEOL 124, or GEOL 150. Credit not allowed for both GEOL 121 and GEOL 150.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

GEOL 154 Historical and Analytical Geology Credits: 4 (3-3-0)

Course Description: Physical and biological history of Earth with introduction to laboratory, computer, and field techniques.

Prerequisite: GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 192 New Student Seminar--Exploring Geosciences Credit: 1 (0-0-1)

Course Description: Geosciences as a field of study; exploration of the major and career paths; strategies for academic success and beyond.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Freshman and sophomore geology majors only. This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 201 Field Geology of the Colorado Front Range Credit: 1 (0-2-0)

Course Description: Geology of the Rocky Mountain Front Range taught primarily through field trips and field exercises, emphasizing hands-on experiences. Learn to make basic field observations and measurements on a variety of rock types and surficial features.

Prerequisite: GEOL 121 or GEOL 150.

Registration Information: Freshman, sophomore or junior standing only. Geology majors or minors only. This is a partial semester course. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 232 Mineralogy Credits: 3 (2-3-0)

Course Description: Crystal structures, crystal chemistry, rock-forming and economically important minerals, crystal growth and defects, physical properties of minerals.

Prerequisite: (CHEM 111, may be taken concurrently) and (GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (MATH 120 or MATH 124 or MATH 127 or MATH 155 or MATH 160 or MATH 161 or MATH 255).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 250 The Solid Earth Credits: 3 (2-2-0)

Course Description: Structure, flow, and composition of the deep Earth; introduction to geophysics; tests of plate tectonic theory.

Prerequisite: (GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (MATH 124) and (MATH 125 or MATH 127 or MATH 155 or MATH 160 or MATH 161 or MATH 255).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 332 Optical Mineralogy Credits: 2 (1-2-0)

Course Description: Fundamental light optics in crystalline substances; optical indicatrix; isotropic, uniaxial, and biaxial substances; common minerals in thin section.

Prerequisite: GEOL 232, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 340 Glacial Geology Credits: 3 (3-0-0)

Course Description: Glacier physics (mass balance, ice dynamics, heat flow, and hydrology), glacial erosion and sedimentation, glacial landforms, and the relationship between forcings (orbital, climate, tectonic, biological) and glaciations in Earth's history.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (PH 121 or PH 141).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Required field trips. Credit not allowed for both GEOL 340 and GEOL 380A2.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 342 Paleontology Credits: 3 (2-3-0)

Course Description: Description of invertebrates, vertebrates, and plants and their distribution in earth history.

Prerequisite: GEOL 154.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 343 Dinosaur Paleontology Field Camp Credit: 1 (0-0-2)

Course Description: Develops field-based skills in sedimentology and paleontology, including general sedimentary geology techniques (interpreting depositional environments, measuring section, collecting samples, note taking) and paleontological techniques (prospecting, data collection, excavation, mapping, inventory), to reconstruct and interpret fossil ecosystems.

Prerequisite: GEOL 154.

Registration Information: Required field trips. Class will spend one week camping at the Denver Museum of Nature and Science field station.

Credit not allowed for both GEOL 343 and GEOL 380A3.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 344 Stratigraphy and Sedimentology Credits: 4 (3-3-0)

Course Description: Description, genesis, correlation, and age of sediments, sedimentary rocks and layered rock sequences.

Prerequisite: GEOL 154 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 364 Igneous and Metamorphic Petrology Credits: 4 (3-3-0)

Course Description: Identification, classification, geochemistry, petrogenesis of igneous and metamorphic rocks; textural interpretation of hand samples and thin sections.

Prerequisite: GEOL 232 with a minimum grade of C-.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 366 Sedimentary Petrology and Geochemistry Credits: 4 (3-3-0)

Course Description: Composition, identification, and classification of sedimentary rocks; geochemical processes affecting sedimentary rocks and surficial deposits.

Prerequisite: CHEM 113 and GEOL 154 and GEOL 364.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 372 Structural Geology Credits: 4 (3-3-0)

Course Description: Stress and strain in rocks, geometry of deformed rocks, and tectonic principles.

Prerequisite: (GEOL 154, may be taken concurrently) and (MATH 125 or MATH 127 or MATH 155 or MATH 160 or MATH 161 or MATH 255) and (PH 121, may be taken concurrently or PH 141, may be taken concurrently).

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 376 Geologic Field Methods Credits: 3 (1-4-0)

Course Description: Scientific, surveying, and mapping methods used in geologic field studies; proposal, map, and report preparation.

Prerequisite: GEOL 344 and GEOL 372, may be taken concurrently.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 384 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description: Instruction and practice in laboratory instruction in lower-division departmental courses.

Prerequisite: None.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 401 Geology of the Rocky Mountain Region Credit: 1 (0-3-0)

Course Description: Field course; geology of the local Rocky Mountain region.

Prerequisite: GEOL 154.

Registration Information: May be taken up to 3 times for credit. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 415 Critical Zone Science Credits: 3 (3-0-0)

Course Description: Focus on the Earth's terrestrial near-surface environment that sustains most non-marine life on the planet, known as the Critical Zone. Gain experience with the architecture and geologic and geomorphologic context of the Critical Zone in different environments. Explore the interactions between the solid earth, atmosphere, hydrosphere and biosphere that give rise to the Critical Zone, and learn how the Critical Zone modulates various Earth surface processes.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 150 or ESS 210 or GR 210 or SOCR 240) and (CHEM 107 or CHEM 111) and (MATH 155 or MATH 159 or MATH 160 or STAT 301).

Restriction: Must not be a: Freshman.

Registration Information: Required field trips. Credit not allowed for both GEOL 380A1 and GEOL 415.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 436 Geology Summer Field Course Credits: 6 (0-12-0)

Course Description: Geologic mapping, measuring sections, interpreting geologic history in Colorado. Required comprehensive reports, geologic maps, and cross sections.

Prerequisite: GEOL 364 and GEOL 372 and GEOL 376.

Registration Information: This is a partial semester course. Required field trips.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 440 Geodetic and Near-Surface Geophysical Methods Credits: 4 (3-3-0)

Course Description: Introduction to geodetic and near-surface geophysical methods to answer societally-relevant geological and environmental questions. Methods include (i) dataloggers and instruments, (ii) geodetic tools (GNSS surveys, lidar, and Structure from Motion), and (iii) near-surface geophysical methods (ground-penetrating radar, active seismic profiling, and electrical resistivity imaging). Emphasizes learning to collect, analyze/interpret, and synthesize multiple types of geophysical data.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (GEOL 344, may be taken concurrently) and (PH 122 or PH 142) and (MATH 161 or MATH 255).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and laboratory. Required field trips. Credit not allowed for both GEOL 440 and GEOL 480A4.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 442 Applied Geophysics Credits: 4 (3-2-0)

Course Description: Geophysical exploration methods emphasizing hydrocarbon and mineral exploration, hydrogeology, and engineering applications.

Prerequisite: GEOL 372 and MATH 161 and PH 142.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 446 Environmental Geology Credits: 3 (3-0-0)

Course Description: Geology applied to environmental problems.

Prerequisite: (CHEM 111) and (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (MATH 155 or MATH 160) and (PH 121 or PH 141).

Registration Information: Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 447 Mineral Deposits Credits: 3 (2-3-0)

Course Description: Occurrence, origin, and exploration of economic metallic mineral deposits.

Prerequisite: GEOL 366, may be taken concurrently and GEOL 372.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 452 Hydrogeology Credits: 4 (3-3-0)

Course Description: Interaction of water and geologic materials; surface and groundwater; quantitative analysis and geologic effects on quality and flow of groundwater.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150 or GR 210) and (MATH 161 or MATH 255) and (PH 121 or PH 141).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 454 Geomorphology Credits: 4 (3-3-0)

Course Description: Origin of landforms; morphology and processes.

Prerequisite: (GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150 or GR 210) and (STAT 301 or STAT 307 or STAT 315).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 492 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494A Independent Study: Environmental/Engineering Geology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494B Independent Study: Geomorphology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494C Independent Study: Mineralogy/Petrology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494D Independent Study: Geoscience Field Studies Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494E Independent Study: Paleontology/Stratigraphy Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494F Independent Study: Sedimentology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494G Independent Study: Structural Geology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 494I Independent Study: Geophysics Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 498 Research Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Term Offered: Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 530 Advanced Petrology Credits: 3 (2-2-0)

Course Description: Igneous and metamorphic processes and products explored through thermodynamics, phase equilibria, and textural analysis.

Prerequisite: GEOL 364.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 535 Microtectonics Credits: 3 (2-2-0)

Course Description: Focuses on microstructural features, processes, mechanisms, and measurements. Structurally interesting rocks especially on the microscale, development of structural fabrics and reactivation, analysis of fault rocks and kinematic indicators especially in fault and shear zones, stress measurement through microstructural indicators, shock deformation/metamorphism in impact structures, chemical changes with deformation, deformation mechanisms, and isotopic investigation of deformation.

Prerequisite: GEOL 332 and GEOL 372.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both GEOL 535 and GEOL 580A3.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 540 Petrophysics and Well Log Interpretation Credits: 3 (3-0-0)

Course Description: Petrophysics and well log interpretation as it relates to hydrocarbon exploration and production. Wireline logs, calculating rock and fluid properties from log measurements, and recognizing zones of potential hydrocarbons. Map and calculate volumes of hydrocarbons in the subsurface using the analysis of petrophysical properties from wireline well logs.

Prerequisite: GEOL 344 and GEOL 366 and PH 142.

Registration Information: Senior or graduate standing in Geosciences, Engineering, or Physics. Credit not allowed for both GEOL 540 and GEOL 581A4.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 541 Geostatistics Credits: 2 (2-0-0)

Course Description: Geostatistics for earth science applications. Aquifer and reservoir heterogeneity, spatial data analysis, variogram modeling, spatial estimation, kriging, and geostatistical simulation.

Prerequisite: (GEOL 150) and (MATH 161 or MATH 255) and (STAT 301 or STAT 315).

Registration Information: Credit not allowed for both GEOL 541 and GEOL 581A5.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 542 Paleoclimate Credits: 3 (3-0-0)

Also Offered As: ATS 542.

Course Description: A survey of past climate and Earth system states, from the Archean to the Holocene. Special emphasis on extreme climates and on time periods where there remains substantial model-data disagreement. Role of paleoclimate in understanding future warming and evolution of the Earth system.

Prerequisite: GEOL 154.

Restriction: Must not be a: Freshman.

Registration Information: Credit allowed for only one of the following: ATS 542, ATS 580B1, GEOL 542, or GEOL 580B1.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 543 Carbonate Sedimentology Credits: 2 (1-3-0)

Course Description: Recognition of carbonate grains, cement types, and carbonate depositional environments, and their response to sea-level changes.

Prerequisite: GEOL 344.

Registration Information: Junior standing.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 545 Shale Sedimentology Credits: 2 (2-0-0)

Course Description: Recognize and interpret mud and mudstone facies and their depositional environments, as well as reconstructing their diagenetic history. Observe stacking patterns and reconstruct sea-level fluctuations from mudstone/shale successions and their impact on the 3D distribution of mudstones/shales.

Prerequisite: GEOL 344.

Registration Information: Junior standing. Credit not allowed for both GEOL 545 and GEOL 580A6.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 546 Sedimentary Basin Analysis Credits: 4 (3-3-0)

Course Description: Sedimentologic data base, correlation, mapping, facies models, classification, and evolution of sedimentary basins. Applications to petroleum exploration.

Prerequisite: GEOL 344.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 547 Ore Deposit Geochemistry Credits: 3 (3-0-0)

Course Description: Geochemical techniques applied to the geology, exploration, and environmental analysis of ore deposits.

Prerequisite: GEOL 447.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 548 Petroleum Geology Credits: 4 (3-2-0)

Course Description: Comprehensive treatment of the petroleum system with a focus on hydrocarbon exploration and production data and methods.

Prerequisite: GEOL 344 and GEOL 372.

Restriction: Must not be a: Freshman, Sophomore, Junior.

Registration Information: Senior standing. Must register for lecture and laboratory. Credit allowed for only one of the following: GEOL 548, GEOL 565, or GEOL 581A6.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 551 Groundwater Modeling Credits: 3 (3-0-0)

Course Description: Groundwater modeling from a geologic perspective. Conceptual models and computer modeling of groundwater flow and solute transport.

Prerequisite: CIVE 423 or GEOL 452.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 552 Advanced Topics in Hydrogeology Credits: Var[2-3] (0-0-0)

Course Description: Current literature, new techniques, legislative and political developments in hydrogeology, and appropriate case histories.

Prerequisite: GEOL 452.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 553 Use of Tracers in Hydrogeology Credits: 3 (3-0-0)

Course Description: Use of environmental and applied tracers in hydrogeology to understand groundwater flow and transport properties. Environmental tracers are used to determine groundwater age and recharge rates, ground/water surface water interactions and to estimate the average temperature when the groundwater was recharged. Applied tracers are used to determine flow and transport processes in porous media to understand controls on solute transport, especially related to contaminant movement.

Prerequisite: CIVE 423 or GEOL 452.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 554 Remote Sensing of the Earth System Credits: 3 (2-2-0)

Course Description: Introduction to the physics and specific applications of common passive and active remote sensing techniques to study the Earth system. Gain an understanding of how to access, process, analyze and interpret remote sensing observations to answer specific research questions focused on the Earth system.

Prerequisite: (GEOL 110 or GEOL 120 or GEOL 122 or GEOL 124 or GEOL 150) and (PH 122 or PH 142).

Restriction: Must not be a: Freshman, Sophomore, Junior.

Registration Information: Senior geology majors or graduate students. Must register for lecture and laboratory. Credit not allowed for both GEOL 554 and GEOL 580B2.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 570 Plate Tectonics Credits: 3 (3-0-0)

Course Description: Examination of the historical development of plate tectonic theory and its application to understanding geological processes.

Prerequisite: GEOL 364 and GEOL 372 and PH 142.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 571 Tectonic Geomorphology Credits: 3 (3-0-0)

Course Description: Interactions between tectonic, climatic and earth surface processes that give rise to mountainous landscapes. Topics range from landscape response to single earthquake events to geochronological tools used to constrain rates of landscape change to orogen-scale interactions and feedbacks between tectonics and climate through lectures, in-class activities, data analysis, modeling, and reading assignments.

Prerequisite: GEOL 372 and GEOL 454, may be taken concurrently and MATH 160.

Registration Information: Required field trips. One weekend field trip to study tectonic geomorphology in southern CO is required. Credit not allowed for both GEOL 571 and GEOL 581B1.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 572 Advanced Structural Geology Credits: 4 (3-3-0)

Course Description: Rheology, deformation mechanisms, structural associations and advanced methods of structural analysis.

Prerequisite: GEOL 436.

Registration Information: Must register for lecture and laboratory. Required field trips. Graduate standing can substitute for prerequisite course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 574 Geodynamics Credits: 3 (3-0-0)

Course Description: Continuum mechanics applied to understanding of deformation within the earth. Stress and strain as tensors, with application to various geological settings; plate flexure and isostasy; steady state and time dependent heat conduction in a geological context; fluid mechanics of the earth.

Prerequisite: GEOL 250 and MATH 261 and PH 141.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 575 Subsurface Geophysical Mapping Credits: 4 (3-2-0)

Course Description: Advanced techniques for creating subsurface geological maps based on seismic reflection and well log data.

Prerequisite: GEOL 344 and GEOL 372 and MATH 161 and PH 142.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 576 Exploration Seismology Credits: 3 (3-0-0)

Course Description: Seismic exploration methods, including theory, data acquisition, and data processing.

Prerequisite: GEOL 344 and GEOL 372 and MATH 161 and PH 142.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 578 Global Seismology Credits: 4 (3-2-0)

Course Description: Quantitative introduction to seismology; basics of seismic data analysis; fundamentals of wave propagation; earthquakes; structure of the Earth.

Prerequisite: PH 142 and MATH 261.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 579 Solid Earth Inverse Methods and Practices Credits: 3 (3-0-0)

Course Description: Inverse and parameter estimation theory and applications in the earth sciences in the context of Frequentist and Bayesian approaches to estimating and interpreting data-driven models. Review of linear algebra, statistical, and other mathematical underpinnings, and of basic MATLAB programming. Linear and nonlinear inverse problems. Nonuniqueness, ill-posedness, rank-deficiency. Regularization methods for geophysical problems.

Prerequisite: (MATH 161 or MATH 255) and (MATH 229) and (STAT 301 or STAT 315).

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 601 Professional Development for Geoscientists Credit: 1 (0-0-1)

Course Description: The conduct of science, role of scientific publications, publication process, proposal writing, responsible conduct of research, and professional ethics.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

GEOL 652 Fluvial Geomorphology Credits: 3 (3-0-0)

Course Description: Geomorphology of channels, slopes, and drainage systems.

Prerequisite: GEOL 120.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: Yes.

GEOL 662 Field Geomorphology Credits: 2 (1-2-0)

Course Description: Field-based geomorphologic analysis of landscape forms and processes. Apply appropriate field techniques to address relevant research hypotheses related to advanced subject matter in geomorphology. Analyze and interpret field-based data, orally present findings in a symposium setting, and discuss and critically evaluate relevant literature.

Prerequisite: GEOL 454.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory. This is a partial semester course. Required field trips. Credit not allowed for both GEOL 662 and GEOL 680A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

GEOL 684 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 692 Seminar Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 696 Group Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

GEOL 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Geology

The Major in Geology provides an academic and practical basis for diverse professional Earth science, environmental, and other careers. Career paths include private and public sector water, energy, mineral, and other natural resources, geologic hazards, environmental management, and education. The major provides a quantitative science and general education preparation for graduate studies, including hydrology, geophysics, environmental science, economic geology, resources management, public policy, and many other areas.

The curriculum encompasses a strong geosciences core, and includes integrating field studies in the Colorado Rocky Mountains and elsewhere with extensive on-campus classroom and laboratory studies. Students complete courses in mathematics, physical sciences, communications, and the liberal arts to develop effective quantitative, decision making, and communications skills. Four concentrations are offered to allow focus on specialized career interests: Geology, Environmental Geology, Geophysics, and Hydrogeology.

Learning Objectives

Students will demonstrate:

1. A solid foundation in the physical sciences and broad understanding of geological processes.
2. Application of field and classroom scientific reasoning skills to data analysis and problem solving in the geosciences, both individually and in teams.
3. An awareness of sociopolitical, economic factors, and ethical practices and standards relevant to professional careers in geosciences.

Potential Occupations

Many opportunities exist for geology graduates in the private and public sectors across a wide range of societally important and satisfying careers. Environmental science and management, energy resources, water resources and management, construction services, mining, energy, computer software, insurance, and many other industries employ geoscientists. Private employers and federal, state, county, and municipal agencies employ geoscientists for resource mapping and assessment, renewable and other energy resources evaluation and development, resource and environmental water studies, leasing and conservation, restoration and rehabilitation, hazards assessment and mitigation, regulatory activities, national defense, communications, and basic and applied research. Schools, colleges, universities, National Laboratories, and private research firms employ geoscientists in a wide

variety of positions. Many geosciences graduates pursue successful careers in consulting and other private business, law, medicine, public policy, administration, and other diverse professional fields. By obtaining teaching certification, graduates may become primary and secondary educators.

Participation in internships, volunteer activities, collaborative team-building activities, professional societies, education, and public outreach and engagement are highly encouraged and supported by the department via faculty, staff, and alumni mentoring to ensure student success, and to enhance training and career networking. Graduates who go on to pursue advanced degrees in Geology enjoy a strong disciplinary base for diverse areas of graduate study in environmental studies, energy, seismology, hydrology, meteorology, oceanography, geomorphology, and space sciences.

Concentrations

- Environmental Geology Concentration
- Geology Concentration
- Geophysics Concentration
- Hydrogeology Concentration

Major in Geology, Environmental Geology Concentration

Environmental Geology concentration students develop expertise in surface and shallow subsurface processes that shape the Earth and provide critical soil and water resources and services for human society and the natural world. Graduates will be prepared for careers that address environmental implications of geological process and human activities. The curriculum emphasizes the fundamentals of geology, surface and shallow subsurface processes, field-based research methodologies and technologies, and environmental geosciences. The concentration empowers students to pursue positions with corporations and public, private, and nonprofit organizations that address environmental/natural resource management issues, regulatory agency activities, hazard identification and mitigation, land use, and support research that informs natural resource policy and decision making to advance sound stewardship. The curriculum provides a strong foundation for graduate studies in the many fields of geosciences and environmental science.

Major in Geology, Geology Concentration

The Geology concentration provides a comprehensive undergraduate education in geoscience, emphasizing a hands-on and field-oriented approach that is well-suited to professional careers in the energy, water, environmental and resources industries, and the many other fields that employ geologists. The Geology concentration provides a strong general science background for additional diverse careers, including primary

and secondary school teaching, science writing, environmental and resource law, and resource and/or hazards specializations within the construction, insurance, land use, securities, and other industries. The Geology concentration additionally provides foundational preparation for graduate education in the many geosciences subdisciplines.

Major in Geology, Geophysics Concentration

The Geophysics concentration combines a strong foundation in geology with additional depth in geophysics, physics, mathematics, associated quantitative data analysis, and computer skills. The concentration provides strong preparation for employment in a wide variety of

public- and private-sector geosciences, resources, national defense, and geotechnical careers, and for graduate education in geophysics, seismology, geodynamics, energy, water, environmental science, space science, and many other disciplines.

Major in Geology, Hydrogeology Concentration

The Hydrogeology concentration provides a rigorous education in surface and subsurface water science, resources and applications, and ensures that students are well prepared for a variety of geosciences careers. Students will be particularly well prepared for employment in environmental, water resource, geotechnical, and groundwater

disciplines, and for public- or private-sector careers managing or assessing water and environmental resources. The concentration provides strong preparation for graduate education in hydrogeology and other water science, environmental, and resource disciplines.

Requirements Effective Fall 2024

Freshman

		AUCC	Credits
CHEM 111	General Chemistry I (GT-SC2)	3A	4
CHEM 112	General Chemistry Lab I (GT-SC1)	3A	1
CO 150	College Composition (GT-CO2)	1A	3

Minor in Geology

The minor in Geology is available to students in all majors seeking curricular depth in geosciences. The minor provides core knowledge and experience encompassing geology, geophysics, environmental geology,

and hydrogeology. Students who may particularly benefit in their careers from completing the geology minor include those within the Colleges of Natural Resources, Natural Science, Business, Engineering, Health and Human Sciences, and Agricultural Sciences.

Learning Objectives

Students will demonstrate:

1. A solid foundation in the physical sciences and broad understanding of geological processes.
2. Application of scientific reasoning skills to data analysis and problem solving in the geosciences, both individually and in teams.
3. An awareness of sociopolitical and economic factors and ethical practices and standards that apply to fields in geosciences.

Requirements Effective Fall 2019

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Required Courses		
Select one group from the following for four credits:		4
Group A:		
GEOL 120 & GEOL 121	Exploring Earth - Physical Geology (GT-SC2) and Introductory Geology Laboratory (GT-SC1)	
Group B:		
GEOL 122 & GEOL 121	The Blue Planet - Geology of Our Environment (GT-SC2) and Introductory Geology Laboratory (GT-SC1)	
Group C:		
GEOL 124 & GEOL 121	Geology of Natural Resources (GT-SC2) and Introductory Geology Laboratory (GT-SC1)	
Group D:		
GEOL 150	Physical Geology for Scientists and Engineers	
Group E:		
GEOL 110 & GEOL 121	Introduction to Geology-Parks and Monuments (GT-SC2) and Introductory Geology Laboratory (GT-SC1)	
GEOL 154	Historical and Analytical Geology	4
Selected Courses		
Select a minimum of 13 credits of GEOL coursework, of which at least 12 credits must be upper-division (300- to 400-level).		
A maximum of two credits may be satisfied by non-regular courses (courses ending in -82 to -99), of which only one credit may be GEOL 401.		
GEOL *** Geology Electives		13
Program Total Credits:		21

Master of Science in Geosciences, Plan A

The Master of Science in Geosciences, Plan A program provides best-practices preparation for employment in major fields in the geoscience professions, and is a typical working degree for many energy, environmental, natural resource, regulatory, and other professional careers. Each graduate student follows a custom-tailored program of coursework and research developed with their advisor and graduate committee and documented in their thesis. Strengths of the program include diverse scientific specializations, an interdisciplinary approach to addressing Earth resource education, professional networking and other preparation, global to local research topics reflecting the wide range of specializations in the department, field research, and close student/faculty mentorship.

Faculty advise M.S. students in the wide range of subdisciplines represented within the department, including geophysics, economic geology, environmental geology, geochemistry, geochronology, geodynamics, geomorphology, hydrogeology, igneous and metamorphic petrology, sedimentology, seismology, paleoclimatology, remote sensing, glaciology, stratigraphy, structural geology, and tectonics. Students work with their advisor and graduate committee to identify a curriculum specific to their academic interests and goals. Prospective students should contact candidate department faculty advisors to discuss interests and develop a program plan.

Students interested in graduate work should refer to CSU's Graduate and Professional Bulletin.

Learning Objectives

1. Develop expertise in one or more fields of the Geosciences, to a level at which the student can successfully prosper in the profession.
2. Obtain practice in the steps of a research project, including proposal writing, research design, data collection and data evaluation, communication, and interpretation.
3. Become practiced at the critical thinking skills needed to conceive, develop, test, and refine scientific ideas and hypotheses.
4. Master preparation and writing of a comprehensive research report in the form of a thesis, with an oral defense including placing one's own research and results into the context of current disciplinary knowledge and understanding.

Requirements Effective Fall 2019

A minimum of 30 semester credit hours are required to complete this program.

At least 16 credits must be at the graduate level (500-level or higher).

At least 15 credits in courses numbered 500-581, 600-681, or 700-781 are required and should be selected in consultation with the student's advisor.

Up to 6 of the 30 credits may be for GEOL 699 Thesis.

With permission of the advisor and committee, 300- or 400-level course credits may be applied to the degree.

Completion and successful oral defense of a thesis is a degree requirement.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website

15. Graduation

Ceremony information is available from the Graduate School website

Ph.D. in Geosciences

Geosciences Ph.D. students contribute original basic and applied research during the completion of their degrees. The Ph.D. degree opens opportunities for a wide range of Earth science careers, including geology, seismology, economic geology, environmental geosciences, glaciology, paleoclimatology, geochemistry, geophysics, geochronology, geodynamics, geomorphology, hydrogeology, igneous and metamorphic petrology, petroleum geology and petrology, sedimentology, stratigraphy, structural geology, tectonics, and more. Students work closely with their advisor and graduate committee to identify and pursue their dissertation topic with a curriculum that is specific to their academic needs and goals. Prospective students should contact relevant candidate faculty advisors in the department.

Students interested in graduate work should refer to CSU's Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>).

Learning Objectives

1. Development of breadth and depth of expertise in geosciences and cognate sciences to levels of an independently creative scientist.
2. Practice of the process of widespread dissemination of research results through oral and poster presentations at professional meetings and through the steps and requirements of peer-reviewed publications.
3. Mastery of design and completion of research projects in at least one of the subdisciplines of geosciences that involve multiple research methodologies, and of linking results from multiple methodologies into scientific interpretations.

Requirements Effective Fall 2018

Ph.D. students must complete 72 semester credits beyond those required for the B.S. degree. They must satisfy a breadth requirement by:

Taking a six-credit upper-division or graduate-level course sequence outside of the student's discipline. Most students will take their breadth requirement courses outside of their department.

At least 10 credits beyond the master's degree must be earned in regular courses numbered 500-level or above.

A minimum of 72 credits are required to complete this program.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

<https://warnercnr.colostate.edu/hdnr/>

Professor Michael Manfredo, Department Head
Master Instructor Paul Layden, Undergraduate Coordinator
Professor Alan Bright, Graduate Coordinator

Undergraduate Majors

- Major in Human Dimensions of Natural Resources
- Major in Natural Resource Tourism
 - Global Tourism Concentration
 - Natural Resource Tourism Concentration

Graduate Graduate Programs in Human Dimensions of Natural Resources

Programs lead to a Master of Conservation Leadership, Master of Science in Environmental Leadership, Master of Tourism Management, and Master of Science and Doctor of Philosophy degrees in Human Dimensions of Natural Resources. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Human Dimensions of Natural Resources (<http://warnercnr.colostate.edu/hdnr-graduate-study/graduate-program/>).

Certificates

- Communications for Conservation
- Adventure Tourism (*No new students are being admitted into this certificate*)
- Agritourism Management (*No new students are being admitted into this certificate*)
- Ski Area Management (*No new students are being admitted into this certificate*)

Master's Programs

- Master of Conservation Leadership, Plan C
- Master of Park and Protected Area Management, Plan C

- Master of Science in Environmental Leadership, Plan A and Plan B
- Master of Science in Human Dimensions of Natural Resources, Plan A
- Master of Tourism Management, Plan C

Ph.D.

- Ph.D. in Human Dimensions of Natural Resources*

*Please see department for program of study.

Courses

Subjects in this department include: Natural Resource Recreation and Tourism (NRRT).

Natural Resource Recreation and Tourism (NRRT)

NRRT 193 New to the Major Seminar Credit: 1 (0-0-1)

Course Description: Introduces students new to the Human Dimensions of Natural Resources and Natural Resource Tourism majors to faculty, department, college and university resources, careers, research, outreach, advising resources, and other students.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Undergraduate standing. This is a partial semester course. Required field trips. Sections may be offered: Online. Credit not allowed for both NRRT 180A1 and NRRT 193.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 231 Principles-Parks/Protected Area Management Credits: 3 (3-0-0)

Course Description: Provide a broad but comprehensive understanding of the history, challenges, and practices of parks and protected areas management.

Prerequisite: None.

Registration Information: Sections may be offered: Online. Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 250 Wilderness First Aid and Risk Management Credits: 3 (2-2-0)

Course Description: Provides actionable skills to manage risk to people and organizations. Analyze risk management frameworks and build risk management plans. Students are prepared for certification in Wilderness First Aid by the American Red Cross.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Offered as Mixed Face-to-Face. Required field trips. Credit not allowed for both NRRT 250 and NRRT 380A2.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

NRRT 251 Coastal Wilderness Leadership--On Location Credits: 3 (1-2-1)

Course Description: Learn to navigate and lead others in coastal environments. Become proficient in operating paddle craft while visiting and examining remote coastal ecosystems, such as Intertidal zones, mangrove forests, estuaries, sea grass beds, and barrier islands. During a seven to ten-day trip, incrementally gain the skills and knowledge to plan and execute an overnight paddling trip to a barrier island.

Prerequisite: None.

Registration Information: Ability to swim required. Must register for lecture, lab, and recitation. Written consent of instructor. This is a partial semester course. Required field trips. On-line sessions will precede a 7-10 day camping trip.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

NRRT 262 Principles of Environmental Communication Credits: 3 (3-0-0)

Course Description: Principles of environmental communication, education, and interpretation for managing natural and cultural resources.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 270 Principles of Natural Resource Tourism Credits: 3 (3-0-0)

Course Description: Tourism and private commercial outdoor recreation industry in America.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 301 Conservation Leadership Credits: 3 (3-0-0)

Course Description: Approaches to conservation leadership.

Prerequisite: NRRT 262 and NRRT 231.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 320 International Issues-Recreation and Tourism Credits: 3 (3-0-0)

Course Description: History, development, and preservation of international parks, preserves, tourist and historical sites.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 321 Travel Abroad-Marine Ecotourism-Bahamas Credits: 3 (1-3-1)

Course Description: Environmental and socio-cultural aspects of marine ecotourism in the Bahamas.

Prerequisite: None.

Registration Information: Minimum GPA 2.500; 3 credits in natural sciences. Passport and ability to swim will be required.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 322 Study Abroad--Italy: Introduction to Culinary Tourism Credits: 3 (0-0-3)

Course Description: Overview of the culinary tourism industry applied to the leading culinary destination, Italy. Explores defining components of culinary tourism, development of this growing sector in the Tuscan area, Italian culinary attractions, festivals and events, the introduction of marketing, promotion and branding of culinary tourism, current global trends in the culinary tourism industry, related special topics and the future of the industry related to Italy.

Prerequisite: NRRT 270.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Offered as Mixed Face-to-Face. Credit not allowed for both NRRT 322 and NRRT 382A.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 330 Social Aspects of Natural Resource Management Credits: 3 (3-0-0)

Course Description: Review social science concepts and research important to the way humans use and manage natural resources. Using lectures and readings on social theory and management frameworks, dissect current natural resource management issues. Case study presentations, exercises, and discussions will connect various social science approaches and theoretical frameworks to their natural resource applications.

Prerequisite: None.

Registration Information: Sophomore standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 331 Management of Parks and Protected Areas Credits: 3 (2-3-0)

Course Description: Comprehensive assessment of problems confronted by park professionals and the techniques and tools applied to their solution.

Prerequisite: NRRT 231 and NRRT 330.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 340 Principles in Conservation Planning and Mgmt Credits: 3 (3-0-0)

Course Description: Social, economic, legal, and ecological concepts that shape planning and management frameworks within conservation.

Prerequisite: NRRT 231.

Registration Information: Required field trips.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 350 Wilderness Leadership Credits: 3 (2-2-0)

Course Description: Practical and philosophical aspects of wilderness usage including safety, group dynamics, and backcountry skills.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 351 Wilderness Instructors Credits: 3 (2-2-0)

Course Description: Preparation to safely lead and instruct groups in outdoor wilderness programs; further refine skills including judgement and leadership.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

NRRT 362 Environmental Conflict Management Credits: 3 (3-0-0)

Course Description: Theoretical, critical and practical approaches to negotiation, mediation and conflict management strategies related to natural resources.

Prerequisite: NRRT 262.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 368 Biodiversity Conservation Culture/Business Credits: 3 (3-0-0)

Course Description: Introduction to biological and cultural diversity. Examine biocultural conservation, a framework for ensuring just and effective approaches to conservation. Explore how culture and cultural diversity shape conservation across space and time. This ranges from local communities with diverse knowledge systems to the burgeoning global movement to link environmental, social and governance factors of businesses with environmental conservation initiatives.

Prerequisite: NRRT 231.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 371 Techniques in Interpretation Credits: 3 (2-1-0)

Course Description: Intermediate techniques in interpretation including exhibit design and construction, personal program development and visitor studies.

Prerequisite: NRRT 262.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 372 Tourism Promotion Credits: 3 (3-0-0)

Course Description: Explores different approaches for tourism marketing in order to develop a sound background in the field. Addresses the forces that drive change in the tourism marketplace; how marketing managers can most effectively position their services, destination and products, through a systems approach to capture today's traveler. Basic concepts and skills in tourism marketing are examined through problems and characteristics specific to tourism.

Prerequisite: NRRT 270.

Registration Information: Sophomore standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 376 Human Dimensions Research and Analysis Credits: 3 (2-2-0)

Course Description: Applies human dimensions (recreation) research and analysis techniques to natural resource issues. Predicated on the assumption that the best way to learn research methodology and statistics is to become directly involved in the process of scientific inquiry. Consequently, a considerable amount of time is devoted to conducting research tasks (e.g., developing surveys, analyzing data).

Prerequisite: STAT 201.

Registration Information: Sophomore standing. Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 384 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 400 Environmental Governance Credits: 3 (3-0-0)

Course Description: Theory and practice of prevalent environmental governance approaches in diverse social and environmental contexts.

Prerequisite: NRRT 231.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 401 Collaborative Conservation Credits: 3 (3-0-0)

Course Description: Guiding principles and practices for effectively engaging stakeholders in conservation issues and natural resource management.

Prerequisite: NRRT 231 or NRRT 262.

Registration Information: Required field trips. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 402 Cultural and Political Ecology Credits: 3 (3-0-0)

Course Description: Exploration of cultural and political ecology, the study of (un)equal control of, and access to, natural resources, focuses on human-environment interactions, with particular attention to the social and cultural meanings of resources. Entails the interrogation of definitions of nature and culture, interactions between society and nature, and natural resource management, access and control.

Prerequisite: NRRT 231.

Registration Information: Junior standing. Credit not allowed for both NRRT 402 and NRRT 480A1.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 425 Communication for Tourism Credits: 3 (3-0-0)

Course Description: Exploration and practical application of communication theories, concepts, and techniques for successful communication in the context of tourism industry practice.

Prerequisite: NRRT 372.

Registration Information: Junior standing.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 431 Integrated Planning for Conservation Credits: 3 (3-0-0)

Course Description: Integrated planning practices within public and private lands that work at the interface of social and ecological dimensions of conservation.

Prerequisite: (NRRT 231) and (LAND 220 or LIFE 220).

Restriction: Must be a: Undergraduate.

Registration Information: Junior standing. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 439 Open Space and Natural Area Management Credits: 3 (3-0-0)

Course Description: Acquisition of, planning for, and management of local government and private open space and natural areas.

Prerequisite: NR 440 or NRRT 331.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 440 Applications in Environmental Communication Credits: 3 (3-0-0)

Course Description: Application of tools and techniques for communicating to audiences about issues related to conservation, environment and sustainability.

Prerequisite: NRRT 262.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 441 Spatial Analysis of Protected Areas Credits: 3 (2-2-0)

Course Description: Spatial analytical techniques used in planning and managing protected areas, including locating, managing, and assessing parks.

Prerequisite: NRRT 231.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 442 Tourism Planning Credits: 3 (3-0-0)

Course Description: Examines the relationship among tourists, tourist developments and the planning of tourist attractions and services. Focuses on the planning of tourist resources and programs within a geographic region, as well as at a destination and site level. Planning tools and design concepts are reviewed and analyzed. A regional strategic planning process is applied to the development of a regional tourism plan in Colorado.

Prerequisite: NRRT 270.

Registration Information: Junior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 460 Tourism Event and Conference Planning Credits: 3 (3-0-0)

Course Description: Foundation in planning, organizing, and producing tourism special events and conferences. Functions and strategies necessary for effective tourism event management.

Prerequisite: NRRT 270.

Registration Information: Junior standing. Sections may be offered: Online. Credit not allowed for both NRRT 460 and RRM 460.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 462 Environmental Communication-Natural Resources Credits: 3 (3-0-0)

Course Description: Exploration and application of theories, concepts, and techniques for successful environmental communication in natural resources.

Prerequisite: NRRT 262.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 463 Non-Profit Administration in Conservation Credits: 3 (3-0-0)

Course Description: Role of NGOs in protected-area management and conservation education; models for development, including grant writing, in conservation.

Prerequisite: NRRT 231 and NRRT 262.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 470 Tourism Impacts Credits: 3 (3-0-0)

Course Description: Examine the impacts of tourism from several distinct, but interrelated perspectives: social, political, economical, environmental, and technological. Limits to future tourism growth are discussed and possible strategies to mitigate impacts are detailed. Case studies are used to highlight issues discussed.

Prerequisite: NRRT 270.

Registration Information: Junior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 471 Starting and Managing Tourism Enterprise Credits: 3 (3-0-0)

Course Description: Concepts surrounding the starting, planning, and managing of a tourism business with a small business creation and management approach. Focus is given to: (1) connections between commercial recreation/tourism and entrepreneurship, (2) starting and managing a business including selecting the form of business, raising funds, financial/marketing management, and (3) legal aspects including identifying and minimizing risks, supervision of workers and employment laws.

Prerequisite: NRRT 231 or NRRT 270.

Registration Information: Junior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 473 Ski Area Management Credits: 3 (3-0-0)

Course Description: Ski area management; history and trends, ski area operations, human resource management, environmental issues, liability, resort planning and design.

Prerequisite: NRRT 270.

Registration Information: Senior standing.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 475 Leadership for Conservation Action Credits: 3 (2-0-1)

Course Description: Develop knowledge and skills important for leading others to achieve positive outcomes in conservation. Fundamental leadership and systems-thinking principles are applied to analyze case studies in conservation, and determine courses of action that positively affect conservation. Through building self-awareness, exploring leadership strategies, and systems-thinking, skills are gained to make a difference in socio-ecological systems.

Prerequisite: NRRT 340.

Restriction: Must be a: Undergraduate.

Registration Information: Junior standing. Must register for lecture and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

NRRT 483 Off-Campus Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Special Course Fee: No.

NRRT 487 Internship Credits: Var[4-12] (0-0-0)

Course Description:

Prerequisite: NR 377.

Registration Information: Junior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 495A Independent Study: Administration Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 495B Independent Study: Management Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 495C Independent Study: Interpretation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 496 Group Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 499 Senior Thesis Credits: Var[1-18] (0-0-0)

Course Description: Independent research project culminating in thesis presented to faculty mentor.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

NRRT 505 Environmental Education History and Theory Credits: 3 (3-0-0)

Course Description: History and theories, planning and instruction; outcomes, historical events; ecological literacy; experiential learning models.

Prerequisite: None.

Registration Information: Upper-division course in natural resources. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 506 Methods in Environmental Education Research Credits: 3 (3-0-0)

Course Description: Research methods and designs; literature reviews, needs assessments and program evaluation of environmental education in informal settings.

Prerequisite: None.

Registration Information: Upper-division course in natural resources. Offered as a correspondence course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 507 Environmental Education Planning Credits: 3 (3-0-0)

Course Description: Informal learning theory; evaluation models focused on education in informal settings such as nature centers, zoos, etc.

Prerequisite: None.

Registration Information: One upper-division course in natural resources, biological sciences, or ecology. Offered as a correspondence course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 508 Current Issues in Environmental Education Credits: 3 (3-0-0)

Course Description: Impact of current events, legislation, demographic changes, and other events on informal environmental education.

Prerequisite: None.

Registration Information: One upper-division course in natural resources, biological sciences, or ecology. Offered as a correspondence course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 517 Climate Change Communication and Engagement Credits: 2 (2-0-0)

Also Offered As: NR 517.

Course Description: Explore ways in which effective community engagement can shape responses to climate change. Gain the skills and knowledge required to work alongside communities to respond to climate change more effectively and equitably.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Bachelor's degree required. Offered as an online course only. Credit not allowed for both NR 517 and NRRT 517.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 520 Perspectives on Ski Area Management Credits: 2 (2-0-0)

Course Description: Introduction to the history of skiing, the ski industry, and ski area management around the world.

Prerequisite: None.

Registration Information: Bachelor's degree required. This is a partial semester course. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 521 Sustainable Ski Area Management Credits: 2 (2-0-0)

Course Description: Examines sustainability issues that relate specifically to ski resort development and management.

Prerequisite: NRRT 520, may be taken concurrently.

Registration Information: This is a partial semester course. Sections may be offered: Online. Offered every Spring term and every other Fall term.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 522 Ski Area Operations and Human Resources Credits: 2 (2-0-0)

Course Description: Examines ski area operations and services.

Prerequisite: NRRT 520, may be taken concurrently.

Registration Information: This is a partial semester course. Sections may be offered: Online. Offered every Spring term and every other Fall term.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 523 Strategic Ski Area Marketing and Management Credits: 2 (2-0-0)

Course Description: Examines strategic management and marketing concepts within a ski area context.

Prerequisite: NRRT 520, may be taken concurrently.

Registration Information: This is a partial semester course. Sections may be offered: Online. Offered every Spring term and every other Fall term.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 524 Ski Area Finance and Investment Credits: 2 (2-0-0)

Course Description: Examines finance and investment considerations relevant to ski area operations and management.

Prerequisite: NRRT 520, may be taken concurrently.

Registration Information: This is a partial semester course. Sections may be offered: Online. Offered every Spring term and every other Fall term.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 525 Ski Area Planning and Development Credits: 2 (2-0-0)

Course Description: Examines the various planning and design considerations for ski area development and expansion.

Prerequisite: NRRT 520, may be taken concurrently.

Registration Information: This is a partial semester course. Sections may be offered: Online. Offered every Spring term and every other Fall term.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 530 Insight into the Adventure Tourism Industry Credits: 2 (2-0-0)

Course Description: Definitions of adventure tourism, and relevant leisure, outdoor education, and tourism theories and frameworks are discussed and critically examined. Key stakeholders are identified, along with current and future trends, opportunities, and challenges. The need for sustainable practices and cross-cultural understanding and communication within adventure tourism is also emphasized.

Prerequisite: None.

Registration Information: This is a partial semester course. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 531 Building an Adventure Tourism Enterprise Credits: 2 (2-0-0)

Course Description: Entrepreneurial skills and know-how to successfully build an adventure tourism enterprise. As most adventure tourism businesses are small-to-medium enterprises, there is a need for students to understand the fundamentals of how to develop an adventure tourism concept and turn it into a successful business.

Prerequisite: None.

Registration Information: This is a partial semester course. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 532 Leading the Adventure Tourism Experience Credits: 2 (2-0-0)

Course Description: Skills and knowledge to successfully plan and lead an adventure tourism experience. Focus is given to leadership and facilitation strategies, guiding standards and best practices, and the importance of environmental and cultural education and interpretation for guests. This is in addition to quality programming and logistics, ensuring guest safety through risk mitigation, emergency planning and crisis management, public relations, and guest management.

Prerequisite: NRRT 530, may be taken concurrently.

Registration Information: This is a partial semester course. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 533 Adventure Tourism Policy and Planning Credits: 2 (2-0-0)

Course Description: Key stakeholders and policies that influence the adventure tourism industry. This involves a detailed examination of adventure tourism standards and regulations, in addition to broader government policies that influence the environment within which the adventure tourism industry is situated. As many adventure tourism ventures operate on public lands, the role of public land agencies and their relationships with adventure tourism operators are also closely examined.

Prerequisite: NRRT 530, may be taken concurrently.

Registration Information: This is a partial semester course. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 534 Applications in the Outdoor Products Industry Credits: 2 (2-0-0)

Course Description: Outdoor products industry and the various steps involved in developing an outdoor product and bringing it to market. Focus is placed on identifying and understanding the outdoor products consumer, product development processes, product aesthetics and functionality, the unique characteristics of branding, selling, and distributing outdoor products, current and future trends, and the diverse career opportunities that exist within the outdoor products industry.

Prerequisite: NRRT 530, may be taken concurrently.

Registration Information: This is a partial semester course. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 541 Overview & Trends of Agritourism Management Credits: 2 (2-0-0)

Course Description: Introductory agritourism sector concepts and emerging business opportunities. Identify and assess agritourism sector data describing industry supply and demand attributes and examine key distinguishing aspects of agritourism enterprise. Regulatory frameworks and policy, community and economic development dimensions, and relevant case studies specific to new agritourism oriented opportunities.

Prerequisite: None.

Registration Information: Graduate standing. This is a partial semester course. Offered as an online course only. Required field trips.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 542 Spatial & Community Dimensions of Agritourism Credits: 2 (2-0-0)

Course Description: Advanced analysis methodology and the use of data in enterprise valuation, market analysis and the assessment of the agritourism sector. Distinguishing aspects of agritourism supply and economic development dimensions that target tourism demand enhancement. Creative market assessment methods are employed to illustrate concepts and analysis, including spatial, economic impact and trip evaluation techniques.

Prerequisite: None.

Registration Information: Graduate standing. This is a partial semester course. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 545 Culinary Tourism Credits: 2 (2-0-0)

Course Description: Aspects of tourism concepts and assessment of the culinary sector in relation to the supply and demand experience attributes. Explores frameworks related to the culinary community, policy, and training dimensions, and reviews case studies specific to new and ongoing culinary tourism oriented opportunities.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online. Credit not allowed for both NRRT 545 and NRRT 580A2.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 548 Agritourism Enterprise Management Credits: 2 (2-0-0)

Course Description: Examines the role of agritourism in the agricultural economy and provides students with frameworks to identify and assess opportunities for agritourism development. Focusing on determinants of business success and the role and importance of comprehensive business planning. Students will develop and present a comprehensive business plan for a prototype agritourism business as a requirement of this course.

Prerequisite: None.

Registration Information: Graduate standing. This is a partial semester course. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 550 Ecotourism Credits: 3 (3-0-0)

Course Description: Concept of ecotourism, impacts associated with ecotourism, and role of education/interpretation in mitigating these impacts.

Prerequisite: NRRT 470.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 565 Research-Human Dimensions Natural Resources Credits: 3 (3-0-0)

Course Description: Theory, research, literature review, hypothesis development, scientific writing, proposal development.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 567 Tourism Entrepreneurship Credits: 2 (2-0-0)

Course Description: Explore the dynamics that influence tourism entrepreneurship, including how to think like an entrepreneur, the entrepreneurial ecosystem, and how to plan for adapting to issues; learn financial and organizational components of starting a tourism enterprise, and how to identify and acquire start-up funding; and apply entrepreneurial thinking, strategies, theories, and technical skills to address complex socio-environmental issues and conservation through experiential learning.

Prerequisite: None.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Admission to the Master of Tourism Management program. Sections may be offered: Face-to-Face, Mixed Face-to-Face, or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 600 Tourism Industry Concepts and Practices Credits: 2 (2-0-0)

Course Description: Fundamental tourism theories and concepts that lay the groundwork for understanding tourists and the tourism industry. Based on the interdisciplinary nature of tourism studies, covers the broad range of fundamental theories and interrelated concepts that guide decision-making in the tourism industry. Focuses on several key themes aimed to capture the primary areas of conceptual thinking and analysis in contemporary tourism.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 601 Tourism Research Methods and Application I Credits: 2 (2-0-0)

Course Description: Introduction to the role and importance of data in tourism. Examine data collection methods, presentation of data, and interpretation. Explore qualitative and quantitative research methods utilized within the tourism industry, techniques to summarize and interpret data, and best practices for communication.

Prerequisite: STAT 201 or STAT 301.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 602 Tourism Research Methods and Application II Credits: 2 (2-0-0)

Course Description: Quantitative analysis methods to specific tourism problems. Students explore visitor intercept techniques and identify other local, regional, national and international institutional data sources, including "Big Data" analytic engines. Using these sources, students estimate destination demand, supply and economic impact as well as perform competitive analysis in a variety of settings.

Prerequisite: NRRT 601, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 605 Human Dimensions of Natural Resources Theory Credits: 3 (3-0-0)

Course Description: Review social science concepts and research important to the management and conservation of natural resources.

Examine current conservation issues, and how those issues can be addressed through an understanding of human thought and behavior.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Sections may be offered: Online or Mixed Face-to-Face.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 608 Nature, Outdoor Recreation--Human Well-being Credits: 2 (2-0-0)

Course Description: Investigate the importance of spending time and travelling outdoors in nature for human well-being. Examine the scientifically proven physical, cognitive, emotional, and social benefits that result from time spent in nature, and how these are achieved through tourism. Immersion in nature is linked to positive conservation outcomes. Examine the role of nature and wellness in achieving tourism and conservation outcomes.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Tourism Management program. This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 609 Tourism and Conservation Credits: 2 (2-0-0)

Course Description: Provides the landscape view that situates how tourism, conservation, and natural resource management come together. Examine the history of public lands and protected areas around the world. Explore the evolution of the relationship between tourism and conservation, and the way in which different international agreements on biodiversity and climate change affect tourism and conservation.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Tourism Management program. This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 610 Tourism and Conservation Management Credits: 2 (2-0-0)

Course Description: Tourism and conservation management practices necessary for the delivery of quality tourism experiences while advancing a sound conservation ideology and goals. This includes an evaluation of conceptual tools commonly used in tourism and visitor management. The role and importance of tourism outfitters and guides is also highlighted, with attention given to concessions management, permitting, and other special use authorization on public lands and protected areas.

Prerequisite: NRRT 609, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 615 Sustainable Tourism Development Foundation Credits: 2 (2-0-0)

Course Description: Theory, practice, history, terminology and issues surrounding sustainable tourism development. Sustainable tourism planning and management are examined in the context of sustainable livelihoods. A comprehensive survey of sustainable tourism components – including indicators of sustainability, community participation, poverty alleviation, alternative tourism, governance and power, and socio-environmental responsibility – will be covered from a systems thinking perspective.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 620 Organizational Management in Tourism Credits: 2 (2-0-0)

Course Description: Application of management concepts to tourism organizations. Topics include managing ethics, diversity, and globalization; planning, decision-making, and competitive advantage; organizational structure and design; leading individuals and groups, and controlling communication and information technology. Discussions, exercises, and case studies will allow students to apply management principles to the tourism organizations.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 624 Tourism Accounting Fundamentals Credit: 1 (1-0-0)

Course Description: Introduction to tourism accounting. Topics include basics of financial accounting within a tourism context, introduction to basic finance, economic concepts, and the development, interpretation, and analysis of financial statements for tourism businesses.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Tourism Management program. This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 625 Communication/Conflict Management in Tourism Credits: 2 (2-0-0)

Course Description: Managerial communication skills and negotiation tools and their implications for effective organizational communication and management of potential conflicts faced by managers in the tourism industry.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 630 Protected Areas and Global Conservation Credits: 3 (3-0-0)

Course Description: Study international categories of protected areas, including those outlined by the World Conservation Union (IUCN). Targets and methods associated with biodiversity conservation help evaluate conservation progress. Explore the economic benefits of protected areas and apply fundamentals of conservation biology (e.g., population dynamics, species niches, and habitat requirements) to the design and management of protected areas.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 631 Protected Area Planning and Management Credits: 3 (3-0-0)

Course Description: Successful protected area management is facilitated by forward-thinking systems design, efficient allocation of resources, and timely and appropriate responses to changes in conditions, all of which rely on effective planning. Develop the tools to apply planning frameworks in diverse contexts, gain competence at participatory planning methods, development of implementation schedules, adaptive management, and evaluation of management effectiveness.

Prerequisite: NRRT 630, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 632 Public Use and Recreation in Protected Areas Credits: 3 (3-0-0)

Course Description: Develops the full range of skills and tools needed to reap the benefits of visitation while controlling its negative effects on natural resources, adjacent communities, or other visitors. Addresses issues of tourism planning at the national, regional, and unit levels, tourism value chains, management of private concessions, public use zoning, and techniques for onsite management of visitors.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 633 Protected Areas and Resource Management Credits: 3 (3-0-0)

Course Description: Focus on evolving natural and cultural resource management challenges. Address competing use challenges through management of biodiversity, timber, and non-timber forest products, water, agriculture and grazing, and mineral resources, along with management of cultural sites and resources and restoration of degraded landscapes and seascapes. Learn methods for monitoring changes in biodiversity, buffer zone, and corridor management.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 634 Protected Area Policy and Finance Credits: 3 (3-0-0)

Course Description: The complex nature of many environmental challenges means protected area managers need to understand key actors, processes, and institutions involved in policy, governance and finance at multiple scales. Examine these connections and the many ways protected areas agencies generate revenue, access and use government budgets, and obtain additional resources from other sources to be able to fulfill their mandates.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 635 Infrastructure Management in Protected Areas Credits: 3 (3-0-0)

Course Description: Develop skills to plan, create, manage, and maintain infrastructure in protected areas. Acquire hands-on experience in the planning and implementation of on-the-ground projects, development strategies, site analysis, contractor and volunteer management, as well as monitoring and maintenance programs. Explore technologies that can help managers achieve goals (i.e. GIS, telemetry, camera traps, drones, SMART, etc.).

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 636 Social Context of Protected Areas Credits: 3 (3-0-0)

Course Description: Focus on concepts defining sociocultural dimensions inherent to protected area management including gender, culture, community, organization, stakeholders, and networks. Cases on biosphere reserves, sacred sites, indigenous territories, transboundary protected areas, extractive reserves, and urban protected areas. Analyses of social and political conflicts, human rights controversies, safeguards, and application of free, prior, and informed consent.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 637 Leadership, Management, and Protected Areas Credits: 3 (3-0-0)

Course Description: Explore and contrast key leadership, management concepts, and approaches in the protected area context. Critical topics covered in case studies and coursework include team cohesion and leadership development, inclusivity and equity, the role of volunteers and managing volunteer programs, institutional hiring options, and the role of capacity development. Emerging leadership/management topics linked to protected area management are considered.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 638 Protected Area Data and Decision-Making Credits: 3 (3-0-0)

Course Description: Presents social science methods for collecting and analyzing data to inform management decisions, especially when working with buffer zone communities and stakeholders. Understand the importance of information collected from the public, including traditional ecological knowledge. Learn data-driven management techniques and conduct ethical social science research in consideration of cultural differences and inherent biases.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 639 Threats and Frontiers in Protected Areas Credits: 3 (3-0-0)

Course Description: Examine emerging threats and new frontiers in protected area management. Issues such as climate change, invasive species, novel ecosystems, mega-development projects, and exclusivity are addressed alongside recent developments such as protection of night skies and natural sounds. Apply tools such as scenario and action planning to evaluate proposed mitigation strategies including compensation for ecosystem services, citizen science, and decarbonization.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 640 Protected Area Communication Credits: 3 (3-0-0)

Course Description: Communicate effectively with diverse protected areas audiences through effective message planning and dissemination, audience analysis, development of specific communication strategies, communication outreach and engagement, and evaluation of communication efforts. Specific approaches such as thematic interpretation, environmental education, engaging the media, and social media are developed with detailed content, case studies, and student projects.

Prerequisite: NRRT 631, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Park and Protected Area Management program. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 650 Financial Management in Tourism Credits: 2 (2-0-0)

Course Description: Apply financial concepts to the management of tourism businesses. Financial accounting aspects of finance, including development and analysis of financial statements are covered. Management accounting aspects of finance include forecasting and budgeting; analysis of profit, and profitability; and working capital management. Application of capital budgeting techniques, time value of money, and business valuation are emphasized.

Prerequisite: NRRT 624.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 655 Marketing Tourism Products and Destinations Credits: 2 (2-0-0)

Course Description: Marketing theories, concepts, and applications within a travel and tourism organizational context. The travel and tourism industry has unique characteristics that create a variety of problems and opportunities specific to that industry and important for tourism marketing professionals.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 656 Tourism Digital and Social Media Marketing Credit: 1 (1-0-0)

Course Description: Provides best practices on how to communicate across digital and social media platforms for tourism businesses and destination. Learn about trend analysis and big data role in influencing campaign delivery. Examine platforms, capabilities, and articulate appropriate goals for social and digital tourism campaigns. Critically evaluate campaign objectives, identify relevant markets and develop tourism campaigns.

Prerequisite: NRRT 655.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 660 Law and Legal Liability in Tourism Credits: 2 (2-0-0)

Course Description: Concepts of legal liability, business law, and risk management to travel, tourism, and hospitality organizations. Topics include contract law; agency law; business organization and formation; torts and legal liability; employment law and labor-management relations, and the protection of organization assets through risk management.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 662 Global Tourism Policy Credits: 2 (2-0-0)

Course Description: Major international policies, trends, and challenges facing tourism. Provides an understanding of policies, programs, and regulations and how international tourism is affected.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 665 Survey Research and Analysis Credits: 3 (2-2-0)

Course Description: Survey research, design, and analysis in human dimensions of natural resources.

Prerequisite: STAT 301.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 666 Qualitative Research in NRRT Credits: 3 (3-0-0)

Course Description: Qualitative approaches to tourism research and techniques from a range of disciplinary backgrounds; methodological aspects.

Prerequisite: NRRT 565.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 667 Applied Experiential Learning in Tourism Credits: 2 (2-0-0)

Course Description: Work with community partners to conduct an applied research or consultancy project, and then provide a final written and oral report to present to the stakeholders. Students are expected to conduct themselves professionally, develop their networking and leadership skills, and work cooperatively in teams.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Tourism Management program. Sections may be offered: Face-to-Face, Mixed Face-to-Face, or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 671 Strategic Management for Travel and Tourism Credits: 2 (2-0-0)

Course Description: Factors, tools, and techniques for strategic management of a travel and tourism business or organization.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 673 Decolonial Feminist Political Ecology Credits: 3 (0-0-3)

Course Description: Explores the origins of political ecology and evolution of decolonial feminist political ecology scholarship that interrogates historical and current colonial processes and structures, drawing from the scholarship of color.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both NRRT 673 and NRRT 680A2.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 677 Project Mgmt and Tourism Event Planning Credits: 2 (2-0-0)

Course Description: Applies project management knowledge and skills to the planning of tourism events. Event planning, logistics, and management best practices are discussed within the context of leisure, cultural, sporting, lifestyle and business meetings and events.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Tourism Management program. This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 678 Tourism Leadership Credits: 2 (2-0-0)

Course Description: Introduction to the fundamentals of leadership theory and different leadership styles. Apply this knowledge at an individual, organizational, and community level within a tourism context. The role of leadership in service excellence, crisis and change management, and sustainability is examined, with a focus on providing the necessary skills to develop resilient tourism industry leaders.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Tourism Management program. This is a partial semester course. Sections may be offered as Mixed Face-to-Face or Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 679A Current Topics in Nature Based Tourism Credit: 1 (0-0-1)

Course Description: Current topics in nature-based travel and tourism.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Graduate standing. Students will enroll for this course during both the Fall and Spring semesters.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 679B Current Topics in Nature Based Tourism Credit: 1 (0-0-1)

Course Description: Current topics in nature-based travel and tourism.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Graduate standing. Students will enroll for this course during both the Fall and Spring semesters.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 695A Independent Study: Administration Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 695B Independent Study: Management Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 695C Independent Study: Interpretation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 695D Independent Study: Landscape Planning Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

NRRT 765 Applied Multivariate Analysis Credits: 3 (2-2-0)

Course Description: Application and interpretation of multivariate statistics to human dimensions in natural resources, recreation, and tourism.

Prerequisite: NRRT 665.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

NRRT 784 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Major in Human Dimensions of Natural Resources

The source of many challenges in natural resources involves human behavior, and solutions to those challenges requires innovative problem-solving, a deep understanding of complex issues, and collective action. This major is focused on understanding the social aspects of natural resources, and developing the skills to assess, plan, and implement strategies that lead to successful conservation. Curriculum for this major trains students in the areas of communication, leadership, systems thinking, collaboration, conflict management, decision-making, social science research in conservation, and conservation planning and management.

Learning Objectives

Students will:

1. Comprehend the institutions, policies, and actors that influence conservation outcomes and historical perspectives.
2. Understand the role of social science in achieving conservation outcomes.
3. Recognize and articulate the interdependencies and linkages within social-ecological systems, and how these linkages assist in understanding the drivers, processes and outcomes of environmental issues.

4. Gain appreciation for the value and benefit in addressing environmental issues through inclusive processes that invite a diversity of perspectives, world views, and ways of knowing.
5. Acquire skills to critically analyze social science research, and examine the role between human dimensions research and environmental decision-making.
6. Gain skills to effectively engage stakeholders in conservation action, and recognize their personal strengths and limits in influencing others to achieve positive conservation outcomes.
7. Acquire skills to effectively plan, design and deliver communication campaigns to achieve environmental outcomes.
8. Comprehend and critically analyze the policies, institutions and actors that influence environmental decision-making at different scales.
9. Gain the skills to effectively address conservation problems through application of theory, inquiry, planning, and related techniques.

Potential Occupations

Students are prepared for various positions with local, state and federal land management and natural resource agencies in the United States. Opportunities are also available both domestically and abroad with non-governmental, and nonprofit conservation and development organizations as well as private foundations. Examples of the types of positions include conservation planner/administrator, environmental communication specialist, conservation/environmental educator, nature center coordinator, visitor services manager, public outreach coordinator, public information officer, protected area manager, park/wilderness ranger, communication coordinator, policy liaison, environmental analyst, sustainability manager and others.

More Information

To learn more about the Human Dimensions of Natural Resources major, or to change to or declare this major, please click here (<https://warnercnr.colostate.edu/hdnr/undergraduate-study/undergraduate-program-advising/>) to schedule an individualized face-to-face or virtual meeting with an advisor.

Major in Natural Resource Tourism

Graduates possess technical skills in problem solving, systems planning, integrative team decision making, quantitative analysis, oral and verbal communications, and computer operations. Graduates are familiar with skills useful in a business setting and the historic evolution of environmental conservation. Additionally, graduates develop an appreciation for how their discipline contributes to environmental stewardship and sustainability. Two concentrations are offered – Global Tourism and Natural Resource Tourism.

Learning Objectives

Students will demonstrate:

1. Written and oral communication skills, with a focus on writing skills. Student writing and speaking will embody characteristics that represent attention to high quality communication skills, including

substance of the issue addressed, organization of the paper or presentation, mechanics, and evidence.

2. Research and analytical skills. These skills will include the ability to generate a problem statement, associated research questions, data acquisition methodologies, synthesis of related information, and the development of management implications and conclusions.
3. Planning skills. These will involve an ability to implement the planning process, including setting goals and objectives, acquiring relevant background information, synthesizing information, conceptualizing ideas, constructing alternative courses of action, making recommendations, and considering ways of evaluating decisions.

Accelerated Program

The major in Natural Resource Tourism includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for

students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

Graduates primarily work in a variety of private commercial tourism and recreation enterprises. Competition can be intense for full time/permanent positions in highly attractive natural resource locations, although ample opportunities exist to gain experience through seasonal/temporary and volunteer work. Participation in a high quality, pre-approved internship is required for the degree. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Career opportunities available to graduates in the global and natural resource tourism concentrations include, but are not limited to: retail relations manager; social media planner; convention sales coordinator; marketing/public relations specialist; trip counselor; travel account manager; food and beverage supervisor; small tourism enterprise/ecotourism owner/manager; regional sales director; account executive; director of trail development; tourism planner; travel pricing and demand analyst; concession specialist; marketing/sales manager; conference/meeting/event planner; resort services director; member relations director; purchasing manager; camp and nature center director; tourist information center manager; sustainable energy director.

Concentrations

- Global Tourism Concentration
- Natural Resource Tourism Concentration

More Information

To learn more about the Global Tourism or Natural Resource Tourism concentrations, or to declare one of these concentrations, please click here (<https://warnercnr.colostate.edu/hdnr/undergraduate-study/undergraduate-program-advising/>) to schedule an individualized face-to-face or virtual meeting with an advisor.

Major in Natural Resource Tourism, Global Tourism Concentration

The Global Tourism concentration is focused on a unique blend of subjects. Business and tourism topics provide students with planning, management, marketing, financial, and entrepreneurship skills essential in the tourism industry. Because sustainable tourism requires a healthy natural environment, the environment is another area of study. Finally, students are provided cross-cultural experience by learning a second language, studying at a university abroad, and participating in an international internship.

More Information

To learn more about the Global Tourism concentration, or to declare this concentration, please click here (<https://warnercnr.colostate.edu/hdnr/undergraduate-study/undergraduate-program-advising/>) to schedule an individualized face-to-face or virtual meeting with an advisor.

Major in Natural Resource Tourism, Natural Resource Tourism Concentration

The Natural Resource Tourism curriculum emphasizes courses in tourism management, marketing and planning, natural resources, business, entrepreneurship, and social science to develop appropriate skills for work in recreation and tourism enterprises. The department works closely with several natural resource-focused Colorado resorts and private tourism enterprises.

More Information

To learn more about the Natural Resource Tourism concentration, or to declare this concentration, please click here (<https://warnercnr.colostate.edu/hdnr/undergraduate-study/undergraduate-program-advising/>) to schedule an individualized face-to-face or virtual meeting with an advisor.

Program Total Credits:		12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Communications for Conservation

The Graduate Certificate in Communications for Conservation is a 6-course, 12-credit offering covering concepts and strategies, research and case studies, and tools and skills for successful conservation communications. Focus is given to various methods of community and stakeholder outreach, and public and media relations as they relate to conservation and conservation planning.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion of this graduate certificate, students will be able to:

1. Apply environmental communications theories and strategies to a wide range of conservation communications activities, including public relations campaigns, public planning and engagement on conservation projects, educational and interpretive opportunities, and crisis management when dealing with critical and diverse audiences to affect change for conservation management.
2. Identify different media and public relations channels and products, and analyze their coverage and portrayal of natural resources management and conservation issues.
3. Develop writing, speaking, and other communications skills to be able to deliver clear, relevant, and engaging conservation-related materials for interactions with different audiences.
4. Demonstrate familiarity and competency with a variety of social and digital media applications to share information and deliver messages for conservation programs and campaigns.
5. Respond appropriately to environmental crisis situations through competently explaining to, and interacting with, different audiences about causes, responses, risks, and actions.

6. Apply conservation communications skills towards decision-making and policy advisory opportunities, national media outreach, required public-planning and information situations, and other executive management responsibilities.
7. Demonstrate competency and familiarity with strategic communications planning and evaluation processes for conservation programs and campaigns.
8. Develop targeted conservation messages, activities, and strategies as part of broader communication efforts.

Requirements Effective Spring 2019

Additional coursework may be required due to prerequisites.

Code	Title	Credits
NR 569	Conservation Communication Fundamentals	2
NR 570	Conservation Managers – Media Communications	2
NR 571	New Media Communications for Conservation	2
NR 572	Strategic Communications for Conservation	2
NR 573	Conservation Crisis Communications	2
NR 574	Advanced Communications for Conservation	2

Program Total Credits: 12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Ski Area Management

No new students are being admitted into this certificate.

Requirements

The graduate certificate in ski area management is a 6 course, 12 credit offering that provides students with the management, finance, and operational knowledge required for successful ski area management and operations. Principles relating to sustainability, strategic management, marketing, human resource management, finance and investment, and planning and development are examined and applied within a ski area context.

Effective Fall 2015

Additional coursework may be required due to prerequisites.

Code	Title	Credits
NRRT 520	Perspectives on Ski Area Management	2
NRRT 521	Sustainable Ski Area Management	2
NRRT 522	Ski Area Operations and Human Resources	2
NRRT 523	Strategic Ski Area Marketing and Management	2
NRRT 524	Ski Area Finance and Investment	2

NRRT 525	Ski Area Planning and Development	2
Program Total Credits:		12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Conservation Leadership, Plan C

The Master of Conservation Leadership, Plan C, is a graduate degree which prepares leaders to address complex conservation issues at local, regional, and global scales. The program is built around principles of experiential learning, inter-disciplinary instruction, and applied approaches. Students work closely with a network of practitioners and complete an applied project in partnership with a conservation organization.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion of the program, students will be able to:

1. Analyze conservation issues from multiple disciplines and stakeholder perspectives.
2. Collaborate with diverse stakeholders and individuals.
3. Utilize systems thinking to examine conservation issues.
4. Apply interdisciplinary problem-solving approaches to conservation issues.
5. Apply inquiry tools and methods to address conservation issues.
6. Effectively communicate conservation via varied media, academic outputs and presentations.
7. Demonstrate leadership skills to work effectively in group environments.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website

12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Science in Environmental Leadership

The Master of Science in Environmental Leadership prepares leaders to address complex conservation issues at local, regional, and global scales. The program is built around principles of experiential learning, inter-disciplinary instruction, and applied approaches. Students work in partnership with an academic advisor and conservation organization to complete a research-based thesis or project.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Learning Objectives

Upon successful completion, students will be able to:

1. Analyze conservation issues from multiple disciplines and stakeholder perspectives.
2. Collaborate with diverse stakeholders and individuals.
3. Utilize systems thinking to examine conservation issues.
4. Apply interdisciplinary problem-solving approaches to conservation issues.
5. Apply inquiry tools and methods to address conservation issues.
6. Effectively communicate conservation via varied media, academic outputs and presentations.
7. Demonstrate leadership skills to work effectively in group environments.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known

8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Park and Protected Area Management, Plan C (M.P.P.M.)

The Master of Park and Protected Area Management (M.P.P.M.) program is offered through CSU Online (<https://www.online.colostate.edu/degrees/mpm-china/>) by the Department of Human Dimensions of Natural Resources (HDNR) in partnership with Central China Normal University (CCNU). It is designed to develop an understanding of theory, research, and practice related to protected areas, and is aimed at preparing students for leadership roles as highly knowledgeable practitioners within the field. Through the integration of social and ecological science, students will gain a holistic understanding of protected area values, services, and governance, as well as the expertise to operationalize those values through effective planning and management of public use, concessions, finance strategies, community collaboration, and human capacity development.

[Students interested in graduate work should refer to the Graduate and Professional Bulletin.](#)

Requirements Effective Spring 2022

Code	Title	Credits
NRRT 630	Protected Areas and Global Conservation	3
NRRT 631	Protected Area Planning and Management	3
NRRT 632	Public Use and Recreation in Protected Areas	3
NRRT 633	Protected Areas and Resource Management	3

NRRT 634	Protected Area Policy and Finance	3
NRRT 635	Infrastructure Management in Protected Areas	3

Master of Tourism Management, Plan C (M.T.M)

The Master of Tourism Management program is a professional master's degree that teaches the skills needed by future leaders of the rapidly expanding global tourism industry. It takes a holistic approach to learning that blends sustainable tourism practices, strategic analysis, and tourism industry expertise based on input from its advisory board.

The M.T.M. program is available on-campus (<https://warnercnr.colostate.edu/hdnr/master-tourism-management/>) or through CSU Online (<https://www.online.colostate.edu/degrees/tourism-management/>). It requires the completion of 30 credits. There are 18 required credits, and up to 12 credits of the elective courses may be used to earn a graduate certificate in C (<https://www.online.colostate.edu/certificates/agritourism-management/communications-for-conservation/>). Students are required to work with their Program Coordinator to determine their approved course plan.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion of this program, students will be able to:

1. Discuss the importance of nature-based tourism in today's society and its ability to contribute to socio-cultural, economic, and environmental well-being.
2. Critically assess key trends within, and affecting, the tourism industry and how to capitalize on current and future opportunities.
3. Utilize nature-based tourism as a tool for community and destination development through the conservation of natural resources.
4. Identify and implement relevant, sustainable business strategies and tools for strategic nature-based tourism development.
5. Implement business fundamentals to successfully operate a nature-based tourism operation.
6. Critically evaluate management and conservation challenges associated with tourism development in public and private spaces.
7. Communicate professionally with a wide range of industry, community, government, and third-sector stakeholders.

Requirements Effective Spring 2024

Code	Title	Credits
Required Courses: ¹		
NRRT 567	Tourism Entrepreneurship	2
NRRT 600	Tourism Industry Concepts and Practices	2
NRRT 608	Nature, Outdoor Recreation–Human Well-being	2
NRRT 609	Tourism and Conservation	2
NRRT 615	Sustainable Tourism Development Foundation	2
NRRT 620	Organizational Management in Tourism	2
NRRT 667	Applied Experiential Learning in Tourism	2
NRRT 671	Strategic Management for Travel and Tourism	2
NRRT 679A	Current Topics in Nature Based Tourism	1
NRRT 679B	Current Topics in Nature Based Tourism	1

NRRT 631	Protected Area Planning and Management
NRRT 632	Public Use and Recreation in Protected Areas
NRRT 633	Protected Areas and Resource Management
NRRT 650	Financial Management in Tourism
NRRT 655	Marketing Tourism Products and Destinations
NRRT 656	Tourism Digital and Social Media Marketing
NRRT 660	Law and Legal Liability in Tourism
NRRT 662	Global Tourism Policy
NRRT 665	Survey Research and Analysis
NRRT 677	Project Mgmt and Tourism Event Planning
NRRT 678	Tourism Leadership
NRRT 695A	Independent Study: Administration
NRRT 695B	Independent Study: Management
NRRT 695C	Independent Study: Interpretation
NRRT 695D	Independent Study: Landscape Planning
NRRT 698	Research
RRM 510	Foodservice Management
RRM 520	Lodging Management

Program Total Credits: **30**

A minimum of 30 credits are required to complete this program.

¹ Memorandum of Understanding (MOU) with international universities may identify culturally specific course substitutions and total credits.

² For those international students enrolled in this program, the number of directed electives credits (approved by the advisor) is to be consistent with the MOU with the cooperating international university.

³ A maximum of six (6) credits of 300-level elective courses may be counted.

Requirements for All Graduate Degrees

College-Wide Graduate Programs: Master's Programs

- Master of Natural Sciences Education, Plan C
- Professional Science Master's in Natural Sciences, Biological Data Analytics Specialization
- Professional Science Master's in Natural Sciences, Microscope Imaging Technology Specialization
- Professional Science Master's in Natural Sciences, Zoo, Aquarium, and Animal Shelter Management Specialization

Interdisciplinary Graduate Programs

- Master of Science in Materials Science and Engineering, Plan A and Plan B
- Ph.D. in Materials Science and Engineering

College Programs

Our goal is to provide an extraordinary education to students in order to prepare them for science careers in industry, modern research, and academia. In addition, the College of Natural Sciences provides foundational courses in the biological, mathematical, behavioral, and physical sciences for CSU's seven other colleges, supporting CSU's broad liberal arts and general education objectives.

Undergraduate Majors

The college's eight departments offer eleven undergraduate majors, all leading to a Bachelor of Science degree which requires a minimum of 120 credits including 42 or more credits in upper-division courses. The undergraduate major in Neuroscience is offered jointly with the College of Veterinary Medicine and Biomedical Sciences.

A major should be chosen with both educational and career objectives in mind. Students earning degrees in College of Natural Sciences majors will be well prepared to succeed in careers in a wide variety of industry areas including but not limited to biotechnology, life sciences, behavioral sciences, education, statistical and data sciences, computer sciences, animal and human health, mathematical and physical sciences, and wildlife conservation. Students who plan to enter a human- or animal-health profession must formally declare an academic major. There is no specific premedical, pre-veterinary, etc. major at CSU because health profession programs do not require a specific major, only specific courses. Majors such as Biological Sciences, Biochemistry, Chemistry, Psychology, and Zoology are popular for students interested in a career in the health professions.

All College of Natural Sciences students have the ability to work with an academic advisor to plan the coursework necessary to graduate from CSU. The College of Natural Sciences also provides students with the opportunity to seek specialized career counseling from a career education manager in the CSU Career Center. Our services are offered to all Natural Sciences students and alumni in all aspects of their career development. Additionally, pre-health professions advisors are available at the Collaborative for Student Achievement (<http://studentachievement.colostate.edu/>), located in Canvas Stadium, East Building, 1415 Meridian Ave.

The college provides multiple opportunities for students to become engaged outside the classroom, including science-based student organizations, the Amplify Community (a residential learning community), and undergraduate research opportunities.

Education Abroad

Education abroad programs are available to all students in the College of Natural Sciences. Because the knowledge of another culture is valuable in understanding one's own and because culture influences the process of science, students are encouraged to participate in an educational experience outside of the United States as part of their overall program at CSU. Students interested in education abroad should plan, well in advance, by discussing opportunities with their academic advisor and by visiting the Education Abroad Office (<https://international.colostate.edu/educationabroad/>) through the Office of International Programs. The Education Abroad office offers information about credit and non-credit opportunities (service-learning/volunteer, research, internships), as well as support prior to and during travel, information about scholarships and financial aid, and specific resources for adult learners & veterans, students with disabilities, and students from diverse economic, educational, ethnic and social backgrounds.

Graduate Programs

Faculty and graduate students in the College of Natural Sciences are engaged in cutting-edge research in multiple disciplines and the college is proud of the graduate student education it provides. Master of Science and Doctor of Philosophy degrees are offered by all departments. Accelerated Master's Programs (<https://graduateschool.colostate.edu/advising-and-mentoring/mou-templates/>), through which eligible undergraduate students may obtain a master's degree in less time and at significant cost savings, are offered in the areas of Applied Statistics, Biochemistry, Computer Science, and Mathematics. A Master of Natural Sciences Education is offered through the college along with Professional Science Master's in Natural Sciences degrees with specializations in Biological Data Analytics, Microscope Imaging Technology, and Zoo, Aquarium and Animal Shelter Management. For detailed information about graduate degree programs, please consult the appropriate department and see the Graduate and Professional Bulletin.

Major in Data Science

Data Science is the discovery of knowledge and insight through the analysis of data. As such, it draws on the study of algorithms and their

implementation from computer science, the power of abstraction and of geometric and topological formalism from mathematics, and the modeling and analysis of data from statistics. It has emerged as a separate field in response to the avalanche of data from web enabled sensors and instrumentation, mobile devices, web logs and transactions, and the availability of computing power for data storage and analysis. Modern data is challenging not only due to its large scale, but also because it is increasingly heterogeneous and unstructured. Information gleaned from this data none-the-less is revolutionizing diverse areas of human endeavor from health policy to high energy physics.

Concentrations

- Computer Science Concentration
- Economics Concentration
- Mathematics Concentration
- Neuroscience Concentration
- Statistics Concentration

Learning Objectives

1. **Data Analysis:** Students will be able to determine which data analysis methods are appropriate in a wide variety of contexts, build and assess statistical models, perform the analyses, and report the results.
2. **Quantitative Literacy and Communication:** Students will be able to use graphical, oral, and written means to effectively and fluently communicate analysis results and ideas. Students will be able to interact and communicate with collaborators in a wide range of fields.
3. **Professional interactions:** Students will attain an ability to function effectively in teams to accomplish a common goal.
4. **Software design:** Students will have the ability to apply design and development principles in the construction of software systems of varying complexity.
5. **Co-curricular learning:** Students will have the opportunity to participate in Individual Study, Undergraduate Research, Honors Projects, Conferences attendance, and Internships.

Major in Data Science, Computer Science Concentration

Data Science is the discovery of knowledge and insight through the analysis of data. Major in Data Science, Mathematics Concentration

Data Science is the discovery of knowledge and insight through the analysis of data. As such, it draws on the study of algorithms and their implementation from computer science, the power of abstraction and of geometric and topological formalism from mathematics, and the modeling and analysis of data from statistics. It has emerged as a separate field in response to the avalanche of data from web enabled

sensors and instrumentation, mobile devices, web logs and transactions, and the availability of computing power for data storage and analysis. Modern data is challenging not only due to its large scale, but also because it is increasingly heterogeneous and unstructured. Information gleaned from this data none-the-less is revolutionizing diverse areas of human endeavor from health policy to high energy physics.

¹ The calculus requirement for the major may alternatively be satisfied by completion of MATH 160, MATH 161, and MATH 261.

Major Completion Map

Distinctive Requirements for Degree Program:

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Major in Data Science assumes students enter college prepared to begin a year-long calculus sequence (either MATH 155/MATH 255 or MATH 160/MATH 161) in the first semester of their first year. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam).

Program Total Credits:	120

Minor in Applied Data Science

Students with a minor in Applied Data Science will receive essential training in computer science, mathematics and statistics in order to apply methods of modern data science within their major field of study.

Learning Objectives

Upon successful completion, students will be able to:

1. Perform essential data handling practices in python and R.
2. Identify basic mathematical and statistical concepts underpinning modern data science.
3. Perform basic analyses using modern data science software.
4. Interpret and present the results in the context of their major course of study.

Requirements Effective Fall 2020

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
CS 152	Python for STEM	2

WR 416	Land Use Hydrology	3

Minor in Data Science

Students with a minor in Data Science will receive foundational training in modern data science to complement and enhance their major field of study.

Learning Objectives

Upon successful completion, students will be able to:

1. Determine the appropriate method to apply to a given data science problem.
2. Prepare data drawn from disparate sources in to a form suitable for analysis.
3. Perform basic data science analyses.
4. Interpret and present the results.

Requirements Effective Fall 2023

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Code	Title	Credits

¹ Courses used to satisfy degree (program) requirements outside this minor cannot count toward completing minor *electives*. (I.e. If using a course to complete a major, the student must take a different course for the minor elective.)

For example: A CS student using STAT 342 as a technical elective as part of their CS degree, cannot count this course as a minor elective in the DSCI minor.

Major in Natural Sciences

The Bachelor of Science in Natural Sciences meets the needs of two audiences:

- Students who wish to become high school or junior high/middle school science teachers.
- Students who seek a broad exposure to mathematics and the physical sciences, rather than specialization in one discipline.

Learning Objectives

Students will demonstrate:

- Skills to critically interpret scientific data.
- Logical and critical thinking.
- The ability to analyze and solve complex problems.
- Strong written and oral communication skills.

Potential Occupations

Graduates with *licensure in secondary science education* will find a strong demand for high school and junior high/middle school teachers in Colorado and elsewhere in the nation. In addition, these graduates will also have the background required for graduate science education programs.

With proper planning, *physical science* graduates can meet requirements for professional schools (e.g., medicine or law) or graduate programs in the basic or applied sciences. Internships and volunteer activities can provide practical training and experience.

Secondary Education

The Bachelor of Science in Natural Sciences provides the scientific subject matter, education classes, and the classroom experience required for secondary science education licensure in Colorado.

Concentrations in the Natural Sciences major include: Biology Education, Chemistry Education, Geology Education, and Physics Education.

The program includes science courses in a concentration such as Biology, Geology, Physics, Chemistry; the All-University Core Curriculum and professional classes in the Educator Preparation (<http://cep.chhs.colostate.edu>) program in the School of Education. In addition, the CEP program helps schedule classroom visits and practica. The experience culminates in a semester of student teaching under the supervision of a master teacher.

Concentrations

- Biology Education Concentration
- Chemistry Education Concentration
- Geology Education Concentration
- Physical Science Concentration

Major in Natural Sciences, Physical Science Concentration

The Physical Science concentration begins with two semesters each of calculus, chemistry, and physics, plus a semester of biological science. Students then complete the major by earning two minors selected from Biochemistry, Chemistry, Computer Science, Geology, Mathematics, Statistics, or Physics. Completion of the double minor gives an unusual

breadth in the physical sciences. Recent graduates have pursued careers in the sciences. Others use this background as a basis for graduate work and research or for entry into medical or veterinary professional programs.

¹ Declare and complete two minors from the following list: Biochemistry, Chemistry, Computer Science, Geology, Mathematics, Physics, Statistics, Applied Statistics.

² Complete a 3 credit course satisfying AUCC category 4B that is offered within a major that is the same as one of the minors that will be completed.

³ Complete a 3 credit course satisfying AUCC category 4C that is offered within a major that is the same as one of the minors that will be completed.

⁴ Complete a 3 credit course satisfying AUCC category 4A that is offered within a major that is the same as one of the minors that will be completed.

⁵ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- and 400-level).

Master of Natural Sciences Education, Plan C (M.N.S.E.)

The Master of Natural Sciences Education, Plan C (M.N.S.E.) is an online degree program (<https://www.online.colostate.edu/degrees/natural-sciences-education/>) designed for:

- Current science teachers with a desire to learn new pedagogical techniques that contribute to student learning and engagement;
- Current science teachers who want the flexibility to teach other natural science disciplines by enhancing their knowledge in biology, chemistry, physics, Earth science, and environmental science;
- Current non-science teachers with a natural science undergraduate degree who would like to pursue science teaching positions;
- Current non-science teachers with a related undergraduate degree (computer science, agriculture, engineering) and a strong science background who would like to pursue science teaching positions; and,
- Individuals with strong science backgrounds and past or current experience in educational settings who would like to earn a master's degree in science education and separately pursue a teaching certification.

Learning Objectives

Successful students will:

1. Build upon knowledge in biology, chemistry, earth science, physics, and environmental science.
2. Develop creative teaching strategies to become more effective science educators.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

EDUC 660	Advanced Methods-Science and Math Instruction	3

Natural Science Courses

Select at least 15 credits from the following: 15-16

NSCI 619A	Physics for Educators: Optics
NSCI 619B	Physics for Educators: Mechanics
NSCI 620	Chemistry for Science Educators
NSCI 630	Spectroscopy for Science Educators
NSCI 640	Energetics for Science Educators
NSCI 650	Pollution and Environmental Biology for Educators

NSCI 660	Evolutionary Biology for Educators	
NSCI 670	Earth Sciences for Educators	
STAR 511	Design and Data Analysis for Researchers I	
Research		
NSCI 698	Research Experience in Natural Sciences ²	6
Program Total Credits:		30-31

¹ The independent study requires enrollment in the summer session after completing the program's course requirements. It involves weekly meetings of the student with her/his research advisor, but does not require full-time residency on campus.

² The research experience requires full time enrollment in the summer session after completing the program's course requirements. Instructors are graduate student advisors who hold regular faculty appointments in the Departments of Biology, Chemistry, or Physics.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee

11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Professional Science Master's in Natural Sciences, Biological Data Analytics Specialization

The Professional Science Master's (PSM) program with a specialization in Biological Data Analytics is a graduate degree program that was designed in coordination with leaders in the biotechnology industries in order to ensure that students will have the scientific, business, and communication skills required to be competitive for jobs in these industries. Students will develop skills that will allow them to analyze data from genomic, transcriptomic, proteomic, and metabolomic studies to find statistically relevant information, while interfacing with biologists in data interpretation and experimental design.

The PSM in Natural Sciences, Biological Data Analytics Specialization is an affiliated Professional Science Master's (PSM) degree. Affiliation is administered by the Commission on Affiliation of PSM Programs (<https://www.professionalsciencemasters.org/>) (formerly named PSM National Office) to ensure a strong and distinctive PSM brand. The PSM is designed for students who are seeking a graduate degree in science or mathematics and understand the need for developing workplace skills valued by top employers.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion of this program, students will be able to:

1. Describe how quantitative biological data are generated;
2. Computationally analyze large biological data sets;
3. Analytically interpret results; and
4. Integrate the above aspects into a business setting.

Requirements Effective Fall 2021

Because this program is intended to serve students with a wide range of backgrounds, each student must work with an advisor to determine an appropriate selection of courses.

First Year		Credits
BUS 500	Foundations for Business Impact	2
DSCI 510	Linux as a Computational Platform	1
DSCI 511	Genomics Data Analysis in Python	2
NSCI 693C	Graduate Seminar: Biological Data Analytics	1
Select one course from the following:		1-3
BC 601	Responsible Conduct in Biochemistry	
BUS 505	Legal and Ethical Environment of Business	
CM 666/PHIL 666	Science and Ethics	
GRAD 544	Ethical Conduct of Research	
NSCI 575/GRAD 575	Ethical Issues in Big Data Research	
Select one course from the following:		3-4
ERHS 535	R Programming for Research	
STAR 511	Design and Data Analysis for Researchers I	
Select a minimum of 3 credits from the following:		3-4
BC 563 ¹	Molecular Genetics	
CM 505	Nucleic Acids for Non-Life Scientists	
CM 506	Protein Basics for NonBiologists	
MIP 543	RNA Biology	
Total Credits		13-17
Second Year		
DSCI 512	RNA-Sequencing Data Analysis	1
MGT 340	Fundamentals of Entrepreneurship	3
NSCI 693C	Graduate Seminar: Biological Data Analytics	1
NSCI 696F	Group Study: Biological Data Analytics Project Proposal	6
Select one course from the following:		3-4
BC 563 ¹	Molecular Genetics	
MIP 543	RNA Biology	
Select one course from the following:		3-4
ERHS 544/STAT 544	Biostatistical Methods for Quantitative Data	

STAR 512	Design and Data Analysis for Researchers II	
Electives (select from the list below with approval of advisor) ²		4-10
Total Credits		21-29
Program Total Credits:		40

A minimum of 40 credits are required to complete this program.

Electives

Code	Title	Credits
Math/Computational Electives:		
BC 571	Quantitative Biochemistry	
CS 548/STAT 548		
DSCI 475	Topological Data Analysis	
MATH 532	Mathematical Modeling of Large Data Sets	
Statistics Electives:		
ERHS 534	SAS and Epidemiologic Data Management	
HORT 579	Mass Spectrometry Omics-Methods and Analysis	
STAR 511	Design and Data Analysis for Researchers I	
Science Electives:		
BC 512	Principles of Macromolecular Structure	
BC 565	Molecular Regulation of Cell Function	
BC 663	Gene Expression	
MIP 543	RNA Biology	
MIP 565/BZ 565	Next Generation Sequencing Platform/Libraries	
MIP 570	Functional Genomics	
MIP 576/BSPM 576	Bioinformatics	
Business Electives:		
MGT 430	Leadership and Social Responsibility	
MGT 450		
Communications Electives:		
GRAD 550	STEM Communication	

¹ BC 563 is generally required in either the first or second year, but may be waived if the student has sufficient prior coursework.

² Select enough elective credits to bring the program total to a minimum of 40 credits. Students are required to take elective courses from at least 2 of the 5 categories. Electives may be taken in the first or second year with the approval of advisor.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should

consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Professional Science Master's in Natural Sciences, Microscope Imaging Technology Specialization

The Professional Science Master's (PSM) in Natural Sciences, Microscope Imaging Technology Specialization program prepares graduate students for employment as microscopists or managers of light microscope cores in academic, government or private sector businesses, or in research laboratories. Students gain the scientific, business, and

communication skills required to be competitive for management jobs in these positions. Students learn how to analyze images, automate data collection and analysis, deal with large data sets, and interface between bioscientists and engineers for experimental design, selecting the optimal imaging system, and in data acquisition and interpretation. Students also obtain skills for business management and operation.

The PSM in Natural Sciences, Microscope Imaging Technology Specialization is an affiliated Professional Science Master's (PSM) degree. Affiliation is administered by the Commission on Affiliation of PSM Programs (<https://www.professionalsciencemasters.org/>) (formerly named PSM National Office) to ensure a strong and distinctive PSM brand. The PSM is designed for students who are seeking a graduate degree in science or mathematics and understand the need for developing workplace skills valued by top employers.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion of this program, students will be able to understand:

1. The basic principles of light and its detection.
2. Engineering principles of optical design and imaging systems.
3. Molecular and cell biological methods for making/expressing tagged molecules.
4. Operation and applications of various microscope systems.
5. Acquisition, automation, data storage, and analysis of imaging data.
6. How to integrate this knowledge and communicate in a business setting.

Requirements Effective Fall 2019

Students may need to take additional coursework in Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Physics, or Statistics.

Code	Title	Credits
BC 565	Molecular Regulation of Cell Function	4
BC 665A	Advanced Topics in Cell Regulation: Microscopic Methods	2
GRAD 510	Fundamentals of High Performance Computing	3
GRAD 544	Ethical Conduct of Research	1

GRAD 550	STEM Communication	1
MGT 340	Fundamentals of Entrepreneurship	3
NSCI 677	Microscopic Image Collection & Processing	2
NSCI 687D	Internship: Microscopy (4 x 10 weeks; var. Cr)	8
NSCI 693D	Graduate Seminar: Microscopy	1
NSCI 696D	Group Study: Microscopy Proposal	6
Select one of the following Business/Marketing electives:		2-3
BUS 500	Foundations for Business Impact	
BUS 501	Business Communication–Multicultural Audience	
MGT 430	Leadership and Social Responsibility	
MGT 440	New Venture Management	
Select one:		2
BC 404	Comprehensive Biochemistry Laboratory	
CM 502/NB 502	Techniques in Molecular & Cellular Biology	

Program Total Credits: 35-36

A minimum of 35 credits are required to complete this program.

Requirements for All Graduate Degrees

15. Graduation	Ceremony information is available from the Graduate School website

Professional Science Master's in Natural Sciences – Zoo, Aquarium, and Animal Shelter Management Specialization

The Professional Science Master's (PSM) in Natural Sciences – Zoo, Aquarium, and Animal Shelter Management Specialization is a unique opportunity to blend business skills and applied science with a specific focus on helping animal organizations. Our two-year Professional Science Master's degree program focuses on experiential learning and development of skills in addition to academic learning.

The PSM in Natural Sciences, Zoo, Aquarium, and Animal Shelter Management Specialization is an affiliated Professional Science Master's (PSM) degree. Affiliation is administered by the Commission on Affiliation of PSM Programs (<https://www.professionalsciencemasters.org/>) (formerly named PSM National Office) to ensure a strong and distinctive PSM brand. The PSM is designed for students who are seeking a graduate degree in science or mathematics and understand the need for developing workplace skills valued by top employers.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion of this program, students will be able to:

1. Compare and contrast biological aspects of different animals kept in captivity and how this affects their care, diet and behavior evaluation and assessment of welfare.
2. Apply critical thinking in solving animal-related issues, including how ethical dilemmas relate to animal organizations.

3. Analyze and develop their approach to leadership in animal organizations, including managing human capital, communication, conflict resolution and how their personal characteristics affect their leadership style.

Innovate and apply techniques in marketing, fundraising, donor cultivation, grant writing, non-profit accounting and finance to benefit animal organizations.

Requirements Effective Fall 2024

Code	Title	Credits
NSCI 579/VS 579	Applied Animal Behavior	4
NSCI 601	PSM Ethics for Animal Professionals	1
NSCI 611	Leadership in Animal Organizations	3
NSCI 621	Workplace Wellness - Animal Organizations	3
NSCI 631	Non-Profit Marketing and Community Relations	3
NSCI 641	Fiscal Management for Animal Welfare Leaders	2
NSCI 651	Non-Profit Fund Development and Grant Writing	3
NSCI 688A	PSM Capstone: Preparation	2
NSCI 688B	PSM Capstone: Proposal Writing	2
NSCI 688C	PSM Capstone: Project	1
NSCI 688D	PSM Capstone: Support for Deliverable and Job Search	2
NSCI 688E	PSM Capstone: Completion	3
NSCI 693A	Graduate Seminar: Zoo, Aquarium, and Animal Shelter Management	4
Select one course from the following:		2-3
ANEQ 322	Pet Nutrition	
ANEQ 323	Zoo Nutrition	
ANEQ 522	Animal Metabolism	
Professional skills electives (select from the list below with approval of advisor)		8-9
Program Total Credits:		43-45

A minimum of 43 credits are required to complete this program.

Professional Skills Electives

Code	Title	Credits
Aquarium

Graduate

Graduate Programs in Biochemistry

The department offers graduate programs leading to Master of Science and Doctor of Philosophy degrees. Students interested in graduate work should refer to the Graduate and Professional Bulletin, and the department's website (<https://www.bmb.colostate.edu/>).

Master's Programs

- Master of Science in Biochemistry, Plan A*
- Master of Science in Biochemistry, Plan B*
- Professional Science Master's in Natural Sciences, Biological Data Analytics Specialization
- Professional Science Master's in Natural Sciences, Microscope Imaging Technology Specialization

Ph.D.

- Ph.D. in Biochemistry*

*Please see department (<https://www.bmb.colostate.edu/>) for program of study.

Courses

Biochemistry and Molecular Biology (BC)

BC 192 Biochemistry Freshman Seminar Credits: 2 (1-0-1)

Course Description: Introduction to curriculum and career options for biochemistry majors.

Prerequisite: None.

Registration Information: Must register for lecture and recitation.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 295 Introductory Independent Study Credits: Var[1-3] (0-0-0)

Course Description: Apply principles and knowledge being learned in first and second year life sciences and chemistry courses.

Prerequisite: LIFE 102 or CHEM 112, may be taken concurrently.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 351 Principles of Biochemistry Credits: 4 (4-0-0)

Course Description: Structure and function of biological molecules; biocatalysis; metabolism and energy transduction.

Prerequisite: (BZ 110 or BZ 120 or LIFE 102) and (CHEM 241 or CHEM 245 or CHEM 341 or CHEM 345).

Registration Information: For majors in biological sciences, engineering, and preprofessional students in the health sciences. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 353 Pre-Health Genetics Credits: 4 (4-0-0)

Course Description: Applies and extends the biochemical concepts learned in BC 351 to macromolecules and molecular processes based on nucleic acids.

Prerequisite: BC 351.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 360 Responsible Conduct in Biochemical Research Credit: 1 (1-0-0)

Course Description: Research ethics and the responsible conduct of research.

Prerequisite: LIFE 212.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Biochemistry majors only. This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 401 Comprehensive Biochemistry I Credits: 3 (3-0-0)

Course Description: Macromolecular structure and dynamics; membranes; enzymes; bioenergetics.

Prerequisite: (CHEM 241 or CHEM 245 or CHEM 343, may be taken concurrently) and (MATH 155 or MATH 160) and (LIFE 201B, may be taken concurrently or BZ 350, may be taken concurrently or SOCR 330, may be taken concurrently).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 403 Comprehensive Biochemistry II Credits: 3 (3-0-0)

Course Description: Metabolic pathways and their regulation; cellular biochemistry.

Prerequisite: BC 351 or BC 401.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 404 Comprehensive Biochemistry Laboratory Credits: 2 (0-6-0)

Course Description: Experimental approaches to studying macromolecules, metabolism, and gene expressions.

Prerequisite: (BC 401, may be taken concurrently) and (CHEM 242 or CHEM 246 or CHEM 344) and (LIFE 212 and LIFE 203).

Restriction: Must not be a: Freshman.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BC 405 Comprehensive Biochemistry II--Honors Recitation Credit: 1 (0-0-1)

Course Description: Read and discuss current literature related to material presented in BC 403.

Prerequisite: None.

Registration Information: Must have concurrent registration in BC 403. For students participating in the Honors program.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 406A Investigative Biochemistry: Protein Biochemistry Credits: 2 (0-4-0)

Course Description: Advanced inquiry-based protein chemistry and molecular biology lab.

Prerequisite: BC 404.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BC 406B Investigative Biochemistry: Molecular Genetics Credits: 2 (1-3-0)

Course Description: Advanced biochemical and molecular biological techniques and a problem-solving approach to molecular genetics.

Prerequisite: BC 404.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BC 406C Investigative Biochemistry: Cellular Biochemistry Credits: 2 (1-3-0)

Course Description: Advanced biochemical and molecular biological techniques and a problem-solving approach to cellular biochemistry.

Prerequisite: BC 404.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BC 411 Physical Biochemistry Credits: 4 (3-0-1)

Course Description: Thermodynamics; reaction rates; quantum chemistry; spectroscopy; macromolecular folding and interactions; ligand binding; enzyme kinetics; membranes.

Prerequisite: (BC 351 with a minimum grade of B or BC 401) and (CHEM 113) and (MATH 161 or MATH 255).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 441 3D Molecular Models for Biochemistry Credit: 1 (0-1.5-.5)

Course Description: Computer instruction to construct 3D models of proteins and nucleic acids using leading software.

Prerequisite: BC 401, may be taken concurrently.

Registration Information: Must register for laboratory and recitation.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 463 Molecular Genetics Credits: 3 (3-0-0)

Course Description: Molecular basis of gene structure, replication, repair, recombination, and expression.

Prerequisite: (BC 401 with a minimum grade of C, may be taken concurrently or BC 351 with a minimum grade of C) and (LIFE 201B with a minimum grade of C or BZ 350 with a minimum grade of C).

Registration Information: Credit not allowed for both BC 463 and BC 563.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 464 Molecular Genetics Recitation Credit: 1 (0-0-1)

Course Description: Methods used to study the molecular basis of gene structure, replication, repair, recombination, and expression.

Prerequisite: (LIFE 201B) and (BC 351, may be taken concurrently or BC 401, may be taken concurrently).

Registration Information: Must have concurrent registration in BC 463.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 465 Molecular Regulation of Cell Function Credits: 3 (3-0-0)

Course Description: Molecular regulation of cell organization, membrane formation, organelle biogenesis, cell communication, shape and motility, growth, aging, and death.

Prerequisite: (LIFE 210) and (BC 403, may be taken concurrently or BC 351).

Registration Information: Sections may be offered: Online. Credit not allowed for both BC 465 and BC 565.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 466 Molecular Regulation of Cell Function-Honors Credit: 1 (0-0-1)

Course Description: Discussions of current articles in cell biology including methods and molecular mechanisms that explain cell behavior in health and disease.

Prerequisite: None.

Registration Information: Must have concurrent registration in BC 465.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 467 Biochemistry of Disease Credits: 3 (3-0-0)

Course Description: Biochemical basis of specific human diseases.

Prerequisite: BC 401.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 475 Mentored Research Credits: 3 (0-6-1)

Course Description: Plan and conduct mentored research with weekly discussion of progress, presentation at all-university symposium, and submission of written report.

Prerequisite: BC 404.

Registration Information: Must register for laboratory and recitation. Maximum of 9 credits allowed in course.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 484 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description: Assist in teaching selected courses in biochemistry and molecular biology.

Prerequisite: None.

Registration Information: A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 487A Internship Credits: Var[1-18] (0-0-0)

Course Description: Work experience with an approved preceptor outside of a university laboratory environment.

Prerequisite: BC 401 and BC 403 and BC 404.

Registration Information: Written consent of instructor. Minimum GPA of 2.0.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 487B Internship: International Credits: Var[1-18] (0-0-0)

Course Description: Research in foreign host laboratory in contact with CSU mentor.

Prerequisite: BC 401 and BC 463 and BC 495 - at least 1 credit.

Registration Information: Selection by departmental committee. BC 495 (one credit in lab of CSU mentor).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 493 Senior Seminar Credit: 1 (0-0-1)

Course Description: Critical analysis of selected literature in biochemistry and molecular biology.

Prerequisite: None.

Registration Information: BC 401 or concurrent registration.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 495 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Minimum cumulative GPA of 3.0.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 496 Group Study Credits: Var[1-18] (0-0-0)

Course Description: Faculty-directed exploration of areas of special interest in biochemistry and molecular biology.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 498 Research Credits: Var[1-6] (0-0-0)

Course Description: Supervised laboratory research in biochemistry and molecular biology.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 499A Thesis: Laboratory Research-Based Credits: 3 (0-0-3)

Course Description: Laboratory-based research thesis.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 499B Thesis: Literature Based Credits: 3 (0-0-3)

Course Description: Thesis - Literature-based in Gen. Biochemistry.

Prerequisite: BC 493.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 499C Thesis: Literature-based in Health and Med Sci Credits: 3 (0-0-3)

Course Description: Thesis - Literature-based in Health and Med. Sci.

Prerequisite: BC 493.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 499D Thesis: Literature-based in Pre-Pharmacy Credits: 3 (0-0-3)

Course Description: Thesis - Literature-based in Pre-Pharmacy.

Prerequisite: BC 493.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 499E Thesis: Literature-based in Neurobiochemistry Credits: 3 (0-0-3)

Course Description: Thesis - Literature-based in Neurobiochemistry.

Prerequisite: BC 493, may be taken concurrently.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 499F Thesis: Literature-Based in Data Science Credits: 3 (0-0-3)

Course Description: Thesis - Literature-based in Data Science.

Prerequisite: BC 493.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 511 Structural Biology I Credits: 4 (3-0-1)

Course Description: Structural principles of biological macromolecules and techniques of structural analysis.

Prerequisite: BC 401, may be taken concurrently.

Registration Information: Must register for lecture and recitation.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 512 Principles of Macromolecular Structure Credit: 1 (1-0-0)

Course Description: Physical interactions controlling folding and solution behavior of biological macromolecules, including proteins, nucleic acids, and membranes.

Prerequisite: BC 411, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 513 Enzymology Credit: 1 (1-0-0)

Course Description: Kinetic methods, mechanism, and regulation of enzyme catalysis.

Prerequisite: BC 403.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 517 Metabolism Credits: 2 (2-0-0)

Course Description: Design and regulation of metabolic pathways.

Prerequisite: BC 351 and BC 403.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 521 Principles of Chemical Biology Credits: 3 (3-0-0)

Also Offered As: CHEM 521.

Course Description: Principles of chemical biology. Chemical methods for understanding and controlling the structure and function of biopolymers.

Prerequisite: CHEM 245 or CHEM 343 or CHEM 346.

Registration Information: Credit not allowed for both BC 521 and CHEM 521.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 523 Visual Communication in Science Credits: 2 (2-0-0)

Course Description: Training in visual design principles and tools to help scientists tell visual stories about their research and to effectively collaborate with graphic design professionals.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Written consent of instructor. Credit not allowed for both BC 523 and BC 580A3.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 563 Molecular Genetics Credits: 4 (3-0-1)

Course Description: Mechanisms of replication, transcription, processing, translation, and packaging of genetic material, emphasizing original literature and methods.

Prerequisite: BC 401 and LIFE 201B.

Registration Information: Must register for lecture and recitation. Credit not allowed for both BC 563 and BC 463.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BC 565 Molecular Regulation of Cell Function Credits: 4 (3-0-1)

Course Description: Molecular regulation of cell organization, membrane formation, organelle biogenesis, cell communication, shape and motility, growth, aging, and death.

Prerequisite: (LIFE 210) and (BC 351 or BC 403, may be taken concurrently).

Registration Information: Credit not allowed for both BC 565 and BC 465. Must register for lecture and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 566 Advanced Topics in Mitotic Processes Credit: 1 (1-0-0)

Course Description: Mitotic spindle, microtubules, kinetochores, and molecular motors, specifically during cell division.

Prerequisite: BC 465 or BC 565.

Restriction: .

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 571 Quantitative Biochemistry Credit: 1 (1-0-0)

Course Description: Introduction to statistics, error analysis, and curve fitting of biochemical data with a focus on practical examples.

Prerequisite: BC 511, may be taken concurrently.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 589 Current Trends in Molecular Biosciences Credits: 2 (1-2-0)

Course Description: Biochemical and molecular biological foundations of molecular genetics/genetic engineering; molecular analysis of genes.

Prerequisite: None.

Registration Information: B.S. or B.A. in biology or chemistry; secondary school teaching certification required. Offered as an online course only.

Term Offered: Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

BC 598 Research Credits: Var[1-9] (0-0-0)

Course Description: Biochemistry research in a research laboratory.

Prerequisite: BC 401.

Registration Information: Written consent of advisor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BC 601 Responsible Conduct in Biochemistry Credit: 1 (1-0-0)

Course Description: Design of experiments; error and fraud, publishing/ grant application submission, scientific misconduct, classic examples of fraud, case studies.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring. (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BC 611 Structural Biology II Credits: 2 (2-0-0)

Course Description: Structure and interactions of biological macromolecules related to function.

Prerequisite: BC 511.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 663 Gene Expression Credits: 2 (2-0-0)

Course Description: Eukaryotic transcription mechanisms with emphasis on methods of study and regulatory mechanisms.

Prerequisite: BC 563.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 665A Advanced Topics in Cell Regulation: Microscopic Methods Credits: 2 (2-0-0)

Course Description: Analysis of cell behavior, function and regulation.

Prerequisite: BC 565.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 665B Advanced Topics in Cell Regulation: Modern Methods Credits: 2 (2-0-0)

Course Description: Modern methods in cell biology.

Prerequisite: BC 565.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BC 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BC 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BC 701 Grant Proposal Writing and Reviewing Credit: 1 (1-0-0)

Course Description: Didactic and hands-on experience with locating funding sources, writing effective grant proposals, and the review process in the bio-molecular sciences.

Prerequisite: (BC 403) and (BC 511, may be taken concurrently) and (BC 563, may be taken concurrently).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Instructor Option.

Special Course Fee: No.

BC 711A Advanced Topics in Structural Biology: Protein Structure and Function Credit: 1 (1-0-0)

Course Description:

Prerequisite: BC 511 and BC 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 711B Advanced Topics in Structural Biology: Membrane Proteins Credit: 1 (1-0-0)

Course Description:

Prerequisite: BC 511 and BC 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 711C Advanced Topics in Structural Biology: Protein-DNA Interactions Credit: 1 (1-0-0)

Course Description:

Prerequisite: BC 511 and BC 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 711D Advanced Topics in Structural Biology: Biomolecular Spectroscopy Credit: 1 (1-0-0)

Course Description:

Prerequisite: BC 511 and BC 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 711E Advanced Topics in Structural Biology: Biomolecular NMR Credit: 1 (1-0-0)

Course Description:

Prerequisite: BC 511 and BC 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 711F Advanced Topics in Structural Biology: Macromolecular X-ray Crystallography Credit: 1 (1-0-0)

Course Description:

Prerequisite: BC 511 and BC 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BC 763A Advanced Molecular Genetics Topics: Chromatin and Transcription Credit: 1 (1-0-0)**Course Description:****Prerequisite:** BC 663, may be taken concurrently.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BC 763B Advanced Molecular Genetics Topics: Transcriptional Control - Co-Activators and Corepressors Credit: 1 (1-0-0)****Course Description:****Prerequisite:** BC 663, may be taken concurrently.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BC 763C Advanced Molecular Genetics Topics: Concepts and Techniques of Genetic Analysis Credit: 1 (1-0-0)****Course Description:****Prerequisite:** BC 663, may be taken concurrently.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BC 784 Supervised College Teaching Credits: Var[1-3] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BC 793 Seminar Credit: 1 (0-0-1)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BC 795 Independent Study Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**BC 796 Group Study Credits: Var[1-5] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**BC 798 Research Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**BC 799 Dissertation Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.

Major in Biochemistry

As the name suggests, biochemistry links biology and chemistry. Biochemistry is most simply defined as the chemistry of living systems. It is the science that tries to explain how “lifeless” molecules work together to make “living” organisms. The methods of chemistry and molecular biology are used to study the structure and behavior of the complex molecules found in biological materials and the ways these molecules interact to form cells, tissues, and whole organisms. Biochemistry provides the basis for advances in human and veterinary medicine, agriculture, and biotechnology. Biochemists may participate in interdisciplinary research and development projects alongside chemical engineers, biologists, microbiologists, agronomists, physicians, and other professionals. They investigate the molecular mechanisms of such diseases as AIDS, diabetes, cancer, heart disease and stroke, and develop solutions to environmental problems through biotechnology.

The Biochemistry major provides a student with a strong, well-balanced background in the biological, physical, and mathematical sciences. As a Biochemistry major, studies include macromolecular structure and function; cellular biochemistry; metabolism; gene expression, DNA and protein structure, DNA replication and repair; cell organization, communication, growth, aging, and death. Students are also required to take courses in physics, organic chemistry, and statistical measurements and methods used in research. Independent study and internships (typically during the junior and senior years, but could start in the freshman year) provide opportunities for experiential learning and working closely with the faculty, sometimes leading to authorship of original publications.

Learning Objectives

Students will be able to:

- Describe the basic concepts of chemistry, biology, biochemistry, molecular biology, and cellular biology
- Critically analyze, and present the methods, results, and conclusions of scientific papers in the current biochemical literature, and orally present technical material in a clear and comprehensible form
- Use a variety of laboratory instruments and techniques, interpret experimental results, and design new experiments
- Demonstrate the ability to perform original research in biochemistry and molecular biology

Potential Occupations

Possible career opportunities include, but are not limited to: process research technician, production/quality assurance lab technician, biomedical/pharmaceutical researcher or salesperson, molecular biologist, biophysicist, cytologist, toxicologist, crime scene investigator, industrial hygienist, dairy technologist, environmental analyst, hygienist, chemist, wastewater treatment chemist, food and drug inspector, museum technician, teacher, writer, fisheries biologist, research analyst, and medical or clinical lab technologist. Many biochemistry majors go on to earn higher degrees in graduate school or health care related

professional schools, leading to careers in medicine, veterinary medicine, pharmacy, or law.

Concentrations

- ASBMB Concentration (American Society for Biochemistry and Molecular Biology)
- Data Science Concentration
- Health and Medical Sciences Concentration
- Pre-Pharmacy Concentration

Major in Biochemistry, ASBMB Concentration

The American Society for Biochemistry and Molecular Biology (ASBMB) concentration in Biochemistry is composed of a “core” set of courses comprised of 24 credits of primarily upper division coursework (22/24 credits are 400 level), along with a total of 9 “bioscience elective” credits selected from a list provided by the department. This option gives the student 13 “free elective” credits, which they can use to pursue a minor, a

double major, and/or other academic interests. Thus, this concentration is designed to provide a broad background in biochemistry and can be tailored to meet the individual needs of specific students. The ASBMB concentration is recommended for students considering teaching and/or research as a career. Students who graduate from this program can state on their resume that they graduated from an “ASBMB program.” If desired, students can take a 1-hour ASBMB exam during the spring semester of their senior year. Students who pass the exam will additionally receive degree certification from ASBMB. Accreditation (and certification) by ASBMB confirms that our undergraduate degree program meets very high standards, and thus will enhance the credentials of our graduating seniors.

Requirements
Effective Fall 2023

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

Freshman

		AUCC	Credits

Biosciences Electives List – Select a minimum of 9 credits in consultation with advisor

A minimum of 3 credits must be selected from Group A; a maximum of 6 credits may be selected from group B; a maximum of 3 credits may be selected from Group C.

Code	Title	Credits
Group A – Select 3-9 credits from the following:		
BMS 300	Principles of Human Physiology	4
BMS 301	Human Gross Anatomy	5
BMS 305	Domestic Animal Gross Anatomy	4
BMS 330	Microscopic Anatomy	4
BMS 345	Functional Neuroanatomy	4
BMS 360	Fundamentals of Physiology	4
BMS 420	Cardiopulmonary Physiology	3
BMS 430	Endocrinology	3
BMS 450	Pharmacology	3
BMS 500	Mammalian Physiology I	4
ERHS 332	Principles of Epidemiology	3
FSHN 350	Human Nutrition	3

HES 319	Neuromuscular Aspects of Human Movement	4
HES 403	Physiology of Exercise	3
VS 331	Histology	4
Group B – Select 0-6 credits from the following:		
BC 467	Biochemistry of Disease	3
BIOM 306/BTEC 306	Bioprocess Engineering	4
BIOM 504/CBE 504	Fundamentals of Biochemical Engineering	3
BMS 325	Cellular Neurobiology	3
BMS 405	Nerve and Muscle-Toxins, Trauma and Disease	3
BSPM 462/BZ 462/MIP 462	Parasitology and Vector Biology	5
BZ 220	Introduction to Evolution	3
BZ 311	Developmental Biology	4
BZ 360	Bioinformatics and Genomics	4
BZ 401	Comparative Animal Physiology	3
BZ 440	Plant Physiology	3
BZ 455	Human Heredity and Birth Defects	3
BZ 476/BZ 576	Genetics of Model Organisms	3
CHEM 334	Quantitative Analysis Laboratory	1

CHEM 335	Introduction to Analytical Chemistry	3
CHEM 433	Clinical Chemistry	3
ERHS 450	Introduction to Radiation Biology	3
FSHN 470	Integrative Nutrition and Metabolism	3
FTEC 350	Fermentation Microbiology	3
FTEC 460	Brewing Science II	5
MIP 300	General Microbiology	3
MIP 302	General Microbiology Laboratory	2
MIP 342	Immunology	4
MIP 343	Immunology Laboratory	2
MIP 351	Medical Bacteriology	3
MIP 352	Medical Bacteriology Laboratory	3
MIP 420	Medical and Molecular Virology	4
MIP 425	Virology and Cell Culture Laboratory	2
MIP 443	Microbial Physiology	4
MIP 450	Microbial Genetics	3
NB 501	Cellular and Molecular Neurophysiology	2
Group C – Select 0-3 credits from the following:		
BC 406A	Investigative Biochemistry: Protein Biochemistry	2
BC 475	Mentored Research	3
BC 487A	Internship	Var.

BC 495	Independent Study	Var.
BC 496	Group Study	Var.

¹ Select from the list of courses in categories 3B-3D (six credits [two courses] must come from 3B; one course each from categories 3C and 3D) in the AUCC. Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.

² Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Biochemistry major - ASBMB concentration assumes students enter college prepared to begin a year-long calculus sequence (either MATH 155/MATH 255 or MATH 160/MATH 161) in the first semester of their first year. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam).

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

Major in Biochemistry, Data Science Concentration

The Data Science concentration in Biochemistry builds on the general biochemistry core set of courses (24 credits of primarily upper division courses) and includes 21 data science specific course credits. This option gives the student 3 “free elective” credits, which they can use to complete either data science elective, bioscience elective, or second semester physics courses. This concentration is designed to provide a solid background in biochemistry, molecular genetics and cell biology, augmented with computer science, mathematics and statistics. The

data science concentration is recommended for students interested in a career in life science data analysis. Students who graduate with this concentration obtain the skills necessary for organizing, analyzing and communicating the meaning of massive data sets.

Requirements Effective Fall 2023

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

¹ Select from the list of courses in categories 3B-3D (six credits [two courses] must come from 3B; one course each from categories 3C and 3D) in the AUCC. Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.

² Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level). Students are encouraged to fulfill their free elective credits with research credits, additional Data Science electives, Bioscience electives, PH 122/PH 142, or apply them to a minor.

Major Completion Map

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

Major in Biochemistry, Health and Medical Sciences Concentration

This concentration augments the ASBMB Concentration with additional coursework in anatomy and physiology, biochemistry of disease, and either a medical internship or mentored research by requiring an

additional 14-15 credits of concentration-specific coursework. The Health and Medical Sciences concentration is geared toward students interested in a number of health professions including, but not limited to, medicine, veterinary, dentistry, physician assistant and physical therapy.

Requirements Effective Fall 2022

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

Students successfully completing the program can state on their resume that they graduated from an "American Society for Biochemistry and Molecular Biology (ASBMB) accredited program." Further, students also have the option of taking a 1-hour ASBMB exam during the spring semester of their senior year. Student who pass the exam will additionally receive degree certification from ASBMB.

² Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Biochemistry major - Health and Medical Sciences concentration assumes students enter college prepared to begin a year-long calculus sequence (either MATH 155/MATH 255 or MATH 160/MATH 161) in the first semester of their first year. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam).

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

Major in Biochemistry, Pre-Pharmacy Concentration

This concentration augments the ASBMB Concentration with additional coursework in physiology, microbiology, immunology, economics and public speaking. This concentration fulfills the prerequisite courses for admission to most pharmacy schools. It is also an appropriate concentration for a career as a medical technician.

Requirements Effective Fall 2022

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

If students successfully complete an additional 1-credit course, Responsible Conduct in Biochemical Research BC 360, they can state on their resume that they graduated from an "American Society for Biochemistry and Molecular Biology (ASBMB) accredited program."
Further, students also have the option of taking a 1-hour ASBMB exam during the spring semester of their senior year. Student who pass the exam will additionally receive degree certification from ASBMB.

Select one course from the following:			3

BC 499A	Thesis: Laboratory Research-Based	4C	
BC 499D	Thesis: Literature-based in Pre-Pharmacy	4C	
Foundations and Perspectives ¹		3B, 3D	9
Electives ²			7
Total Credits			29
Program Total Credits:			120

¹ Select from the list of courses in categories 3B, 3D (six credits [two courses] must come from 3B; one course from category 3D) in the AUCC. Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses. Students should plan on taking ECON 202 as the AUCC Cat 3C requirement.

² Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Biochemistry major - Pre-Pharmacy concentration assumes students enter college prepared to begin a year-long calculus sequence (either MATH 155/MATH 255 or MATH 160/MATH 161) in the first semester of their first year. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam).

A minimum grade of C (2.000) must be earned for BC 493 and all biochemistry (BC) and LIFE subject code lecture and laboratory courses at or above the 200-level required in the biochemistry major.

Major Completion Map

Distinctive Requirements for Degree Program:

Freshman

Semester 1		Critical	Recommended	AUCC	Credits
BC 192	Biochemistry Freshman Seminar				2
CHEM 111	General Chemistry I (GT-SC2)	X		3A	4
CHEM 112	General Chemistry Lab I (GT-SC1)	X		3A	1
LIFE 102	Attributes of Living Systems (GT-SC1)	X		3A	4
Select one course from the following:					4
MATH 155	Calculus for Biological Scientists I (GT-MA1)	X		1B	
MATH 160	Calculus for Physical Scientists I (GT-MA1)	X		1B	
Total Credits					15

Semester 2		Critical	Recommended	AUCC	Credits
CHEM 113	General Chemistry II	X			3
CHEM 114	General Chemistry Lab II	X			1
CO 150	College Composition (GT-CO2)	X		1A	3
LIFE 201B	Introductory Genetics: Molecular/Immunological/Developmental (GT-SC2)	X		3A	3
LIFE 203	Introductory Genetics Laboratory	X			2
Select one course from the following:					4
MATH 161	Calculus for Physical Scientists II (GT-MA1)	X		1B	
MATH 255	Calculus for Biological Scientists II	X		1B	
Total Credits					16

Sophomore

Semester 3		Critical	Recommended	AUCC	Credits
CHEM 341	Modern Organic Chemistry I	X			3
ECON 202	Principles of Microeconomics (GT-SS1)			3C	3
LIFE 210	Introductory Eukaryotic Cell Biology	X			3
LIFE 212	Introductory Cell Biology Laboratory	X			2
SPCM 200	Public Speaking				3
Total Credits					14
Semester 4		Critical	Recommended	AUCC	Credits
CHEM 343	Modern Organic Chemistry II	X			3
CHEM 344	Modern Organic Chemistry Laboratory	X			2

Select one course from the following:					4
BMS 300	Principles of Human Physiology				
BMS 360	Fundamentals of Physiology				
Select one course from the following:					5
PH 121	General Physics I (GT-SC1)			X	3A
PH 141	Physics for Scientists and Engineers I (GT-SC1)			X	3A
Total Credits					14
Junior					
Semester 5		Critical	Recommended	AUCC	Credits
BC 401	Comprehensive Biochemistry I		X	4A	3
BMS 302	Laboratory in Principles of Physiology				2
Select one course from the following:					5
PH 122	General Physics II (GT-SC1)			X	3A
PH 142	Physics for Scientists and Engineers II (GT-SC1)			X	3A
Select one course from the following:					3
STAT 301	Introduction to Applied Statistical Methods				
STAT 307	Introduction to Biostatistics				
STAT 315	Intro to Theory and Practice of Statistics				
Diversity, Equity, and Inclusion				1C	3
Total Credits					16
Semester 6		Critical	Recommended	AUCC	Credits
BC 403	Comprehensive Biochemistry II		X	4B	3
BMS 301	Human Gross Anatomy		X		5
MIP 300	General Microbiology				3
MIP 302	General Microbiology Laboratory				2
Advanced Writing				2	3
PH 122 or PH 142 must be completed by the end of Semester 6.		X			
Total Credits					16
Senior					
Semester 7		Critical	Recommended	AUCC	Credits
BC 404	Comprehensive Biochemistry Laboratory		X	4B	2
BC 411	Physical Biochemistry		X		4
BC 493	Senior Seminar		X	4A,4C	1
Select one course from the following:					3
BC 463	Molecular Genetics		X		
Foundations and Perspectives				3B, 3D	
Electives					4
Students that elect to take BC 463 must do so Fall (Semester 7) and plan to take AUCC 3B, 3D (Foundations and Perspectives) in Spring (Semester 8).					
Total Credits					14
Semester 8		Critical	Recommended	AUCC	Credits
Select one course from the following:					3
BC 465	Molecular Regulation of Cell Function		X		
Foundations and Perspectives				3B, 3D	
Select one course from the following:					3
BC 499A	Thesis: Laboratory Research-Based		X	4C	
BC 499D	Thesis: Literature-based in Pre-Pharmacy		X	4C	
Foundations and Perspectives				3B, 3D	6
Elective				X	3
Students that elect to take BC 465 must do so Spring (Semester 8) and plan to take AUCC 3B, 3D (Foundations and Perspectives) in Fall (Semester 7).		X			

The benchmark courses for the 8th semester are the remaining courses in the entire program of study.

Minor in Biochemistry

The minor in Biochemistry is valuable to students majoring in any biological or physical science, or in engineering. The minor requires a sound chemistry background, provides fundamental courses in molecular biosciences, and augments the latter with more specialized courses in biochemistry and molecular genetics.

Requirements Effective Fall 2010

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Lower Division		
LIFE 201B	Introductory Genetics: Molecular/Immunological/Developmental (GT-SC2)	3
LIFE 203	Introductory Genetics Laboratory	2
LIFE 210	Introductory Eukaryotic Cell Biology	3
LIFE 212	Introductory Cell Biology Laboratory	2
Upper Division		
BC 401	Comprehensive Biochemistry I	3
BC 403	Comprehensive Biochemistry II	3
BC 404	Comprehensive Biochemistry Laboratory	2
Select one from the following:		3-4
BC 411	Physical Biochemistry	
BC 463	Molecular Genetics	
BC 465	Molecular Regulation of Cell Function	
BC 493	Senior Seminar	1
Program Total Credits:		22-23

Department of Biology

From cells to the biosphere, the Biology Department makes discoveries about fundamental questions in our living world, and we use this new knowledge to make Earth a better place. CSU Biology is a place where everyone is welcome to indulge their curiosity about the living world.

Office in the Biology Building, Room 111

(970) 491-7011

[biology.colostate.edu](http://www.biology.colostate.edu) (<http://www.biology.colostate.edu>)

Professor Deborah M. Garrity, Chair

Undergraduate Majors

- Major in Biological Science
 - Biological Science Concentration
 - Botany Concentration
- Major in Zoology

Minors

- Minor in Botany
- Minor in Zoology

Graduate Graduate Programs in Biology

The department offers graduate programs leading to Master of Science and Doctor of Philosophy degrees in Biological Science. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Biology (<http://www.biology.colostate.edu>).

Master's Programs

- Master of Science in Biological Science, Plan A and Plan B
- Professional Science Master's in Natural Sciences – Zoo, Aquarium, and Animal Shelter Management Specialization

Ph.D. Programs

- Ph.D. in Biological Science

Courses

BZ 101 Humans and Other Animals (GT-SC2) Credits: 3 (3-0-0)

Course Description: Intended for non-science majors, exploring the genetic basis of common life processes, including form and function of the human body, evolution, and biodiversity. A number of current and controversial socio-scientific issues are addressed.

Prerequisite: None.

Registration Information: Credit not allowed for students who have already taken BZ 110 or LIFE 102 or LIFE 103. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

BZ 104 Basic Concepts of Plant Life (GT-SC2) Credits: 3 (3-0-0)

Course Description: Broad concepts of biology with major emphasis on plant life.

Prerequisite: None.

Registration Information: For nonscience and physical science majors. Sections may be offered: Online. Credit not allowed for students who have already taken BZ 120 or LIFE 102 or LIFE 103.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

BZ 105 Basic Concepts of Plant Life Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Laboratory exercises covering fundamental biological concepts related to plants and plant-like organisms.

Prerequisite: BZ 104, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

BZ 110 Principles of Animal Biology (GT-SC2) Credits: 3 (3-0-0)

Course Description: General features (body form, physiology, life history, ecology) and evolutionary relationships of major phyla of animals.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

BZ 111 Animal Biology Laboratory (GT-SC1) Credit: 1 (0-3-0)

Course Description: Laboratory exercises demonstrating major features of animal biology and major phyla of animals.

Prerequisite: BZ 110, may be taken concurrently.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

BZ 120 Principles of Plant Biology (GT-SC1) Credits: 4 (3-3-0)

Course Description: Diversity of relationships of plants and their structural and functional characteristics.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

BZ 182A Study Abroad--Australia: First Year Seminar Biology Credits: 3 (0-0-3)

Course Description: Introduction of skills necessary for academic and career success within the biological sciences through exposure to science career pathways, diverse species of animals and plants, global culture, field and laboratory research, and opportunity to envision career goals. Tools for success at CSU are explored, including connection to campus resources, time management, and study skills. Bridging hands-on experience with a weekly class creates a strong community.

Prerequisite: None.

Restrictions: Must not be a: Sophomore, Junior, Senior. Must be a: Undergraduate.

Registration Information: Written consent of advisor. This is a partial semester course. Credit not allowed for both BZ 182A and BZ 192.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 192 First Year Seminar--Biology/Zoology Credit: 1 (1-0-0)

Course Description: Introduction to the biological science and zoology majors through development of academic skills necessary for success within the sciences, exposure to academic resources, science career pathways, research, and relevant topics like globalization and diversity in science fields.

Prerequisite: None.

Restrictions: Must not be a: Sophomore, Junior, Senior. Must be a: Undergraduate.

Registration Information: Freshman only. This is a partial semester course. Credit not allowed for both BZ 182A and BZ 192.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 212 Animal Biology-Invertebrates Credits: 4 (3-3-0)

Course Description: General biology of invertebrates; their characteristics, classification, and adaptations.

Prerequisite: BZ 110 and BZ 111 or LIFE 103.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 214 Animal Biology-Vertebrates Credits: 4 (3-3-0)

Course Description: Evolution of the anatomical, morphological, physiological and ecological characteristics of vertebrate animals. Provides foundation for advanced training in ichthyology, herpetology, ornithology and mammalogy. Includes a dissection-based lab to provide in-depth exploration of the external and internal anatomy of the nine extant classes of vertebrates.

Prerequisite: BZ 111 and BZ 110 or LIFE 103.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 220 Introduction to Evolution Credits: 3 (3-0-0)

Course Description: Fundamental concepts in evolutionary biology.

Prerequisite: (BZ 110 and BZ 111 or BZ 120 or LIFE 102 or LIFE 103) and (MATH 118 or MATH 120 or MATH 127).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 223 Plant Identification Credits: 3 (2-2-0)

Course Description: Relationships and identification of flowering plants.

Prerequisite: BZ 120 or LIFE 103.

Registration Information: Must register for lecture and laboratory.

Offered as an online course only.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 240 Synthetic Biology-Principles and Applications Credits: 3 (3-0-0)

Course Description: Biological principles underlying the contemporary practice of synthetic biology, along with relevant concepts from a wide range of disciplines. Diverse applications are explored at an introductory level.

Prerequisite: LIFE 102.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 296 Group Study-Biology Credits: Var[1-3] (0-0-0)

Course Description: Faculty-directed group investigation of areas of special interest in biology.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 300 Animal Behavior Credits: 3 (3-0-0)

Course Description: Evolutionary and mechanistic approaches to understanding why and how animals behave the way they do. Integrative approach linking behavior to brain, genes and hormones at the mechanistic level and to ecology to explain its functional and evolutionary basis.

Prerequisite: BZ 220.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 310 Cell Biology Credits: 4 (3-3-0)

Course Description: Structure and function of cells emphasizing molecular mechanisms. Communication, metabolism, motility, genetics, growth, and reproduction.

Prerequisite: (BZ 110 and BZ 111 or LIFE 102) and (CHEM 113).

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 311 Developmental Biology Credits: 4 (3-2-0)

Course Description: Developmental aspects of growth and differentiation in plants and animals.

Prerequisite: BZ 310.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 325 Plant Systematics Credits: 4 (3-2-0)

Course Description: Principles and contemporary methods of classification of plants and the application of modern phylogenetic theory in comparative biology.

Prerequisite: BZ 220.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 329 Herpetology Credits: 4 (3-2-0)

Course Description: Integrates knowledge and competencies spanning all scales of biology--molecules to ecosystems--using amphibians and reptiles as focal taxa.

Prerequisite: BZ 110 and BZ 111 or LIFE 102 and LIFE 103.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and laboratory. Credit not allowed for both BZ 329 and BZ 329A. Credit not allowed for both BZ 329 and BZ 329B.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 330 Mammalogy Credits: 4 (3-2-0)

Course Description: Integrates knowledge and competencies spanning all scales of biology -- molecules and evolutionary history to management and ecosystems -- using mammals as a focal taxon.

Prerequisite: BZ 111 and BZ 110 or LIFE 103.

Restriction: Must not be a: Freshman.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both BZ 330 and BZ 330A. Credit not allowed for both BZ 330 and BZ 330B.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 331 Developmental Plant Anatomy Credits: 4 (2-4-0)

Course Description: Structure of plant cells, tissues, and organs as they develop.

Prerequisite: BZ 120 or LIFE 103.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 333 Introductory Mycology Credits: 4 (2-4-0)

Course Description: Introduction to the biology and evolutionary history of groups of fungi including classification, structure, morphogenesis, phylogeny, genetics, and reproduction.

Prerequisite: BZ 120 or LIFE 103.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 335 Ornithology Credits: 4 (3-3-0)

Course Description: Biology of birds, especially behavior, ecology, and identification in the laboratory and field.

Prerequisite: BZ 111 and BZ 110 or LIFE 103.

Registration Information: Must register for lecture and laboratory. Required field trips.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 338 Comparative Morphology of Vascular Plants Credits: 4 (2-4-0)

Course Description: Origin, evolution, structure, and reproduction of the vascular plants, including comparative study of organs occurring in each group.

Prerequisite: BZ 120 or LIFE 103.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 339 Biology Field Practicum Credits: 3 (1-4-0)

Course Description: This course provides students with opportunities to explore a variety of field techniques, research approaches, and scientific problems that scientists in a fundamental biology program study. By accompanying graduate students into the field in local settings and getting to know their research, they explore what their own opportunities in science might look like.

Prerequisite: (LIFE 102 or LIFE 103) and (BZ 220).

Registration Information: Must register for lecture and laboratory. This is a partial semester course. Required field trips.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 340 Field Mammalogy Credits: 4 (1-6-0)

Course Description: An intensive field course that introduces field wildlife techniques through the lens of studying the evolutionary relationships, ecology, and conservation of Colorado mammals. Opportunities to learn about wildlife handling and study techniques and apply them in independent research projects. A significant portion of the course is spent in the field, primarily at the CSU Mountain Campus in the mountains northwest of Fort Collins.

Prerequisite: BZ 110 or LIFE 103.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and laboratory. Required field trips. Credit not allowed for both BZ 340 and BZ 380A3.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 342 Exploring Range Shifts in a Changing World Credits: 3 (3-0-0)

Course Description: A structured, team-based research project that guides students through learning the skills needed to search for, obtain, clean, and analyze distributional data from publicly available sources, including iNaturalist and global museum databases. The data is used to explore a question of how distributions are changing over time, including correlating those changes with abiotic and anthropogenic changes, such as climate change, urbanization, or the introduction of nonnative species.

Prerequisite: BZ 220.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Credit not allowed for both BZ 342 and BZ 381A2.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 348 Theory of Population and Evolutionary Ecology Credits: 4 (3-3-0)

Also Offered As: MATH 348.

Course Description: Principles and methods for building, analyzing, and interpreting mathematical models of ecological and evolutionary problems in biology.

Prerequisite: MATH 155 or MATH 160.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: BZ 348, BZ 548, MATH 348.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 349 Tropical Ecology and Evolution Credits: 3 (3-0-0)

Course Description: Broad introduction to terrestrial and aquatic tropical biodiversity and the ecological and evolutionary processes that generate and maintain this diversity.

Prerequisite: BZ 220.

Restriction: Must not be a: Freshman.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 350 Molecular and General Genetics Credits: 4 (3-0-1)

Course Description: Mendelian, molecular, and population genetics emphasizing the molecular basis of genetics.

Prerequisite: (BZ 110 or BZ 120 or LIFE 102) and (STAT 201, may be taken concurrently or STAT 301, may be taken concurrently or STAT 307, may be taken concurrently or ERHS 307, may be taken concurrently).

Registration Information: Must register for lecture and recitation. Primarily for students in biological sciences. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 360 Bioinformatics and Genomics Credits: 4 (3-0-1)

Course Description: Introductory genomics, bioinformatics, and computer programming concepts for biologists.

Prerequisite: BZ 110 or BZ 120 or LIFE 102.

Registration Information: Must register for lecture and recitation.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 384 Supervised College Teaching Credits: Var[1-5] (0-0-0)**Course Description:****Prerequisite:** None.**Registration Information:** 3.0 overall GPA; written consent of instructor; grade of A in course with which student assists. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BZ 401 Comparative Animal Physiology Credits: 3 (3-0-0)****Course Description:** Physiological mechanisms of digestion, metabolism, osmoregulation, excretion, circulation, and respiration in vertebrates and invertebrates that allow them to function and survive in varied environments.**Prerequisite:** BZ 220.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 415 Marine Biology Credits: 4 (3-0-1)****Course Description:** Marine organisms, habitats, and communities.**Prerequisite:** LIFE 320.**Registration Information:** Must register for lecture and recitation.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 418 Ecology of Infectious Diseases Credits: 4 (3-0-1)****Course Description:** Ecological perspectives of infectious disease outbreaks in wildlife and human populations.**Prerequisite:** LIFE 320.**Registration Information:** Must register for lecture and recitation. Sections may be offered: Online.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 420 Evolutionary Medicine Credits: 3 (3-0-0)****Course Description:** Integration of evolutionary biology with behavior, genetics, and ecology to understand health and disease. Exploration of insights into medical research and practice (diagnosis and therapy) and human health from an evolutionary standpoint. Fundamentals of evolution, and the importance of evolutionary biology in understanding the ultimate and proximate causes of human disease. Engage in scientific discourse.**Prerequisite:** BZ 110 and BZ 111 or LIFE 102.**Registration Information:** Sophomore standing.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 424 Principles of Systematic Science Credits: 3 (3-0-0)****Also Offered As:** BSPM 424.**Course Description:** Introduction to the core principles of systematic science and exploration of issues including speciation, taxonomy and classification, constructing and evaluating hypotheses of evolutionary relationships, characters used in taxonomy, species descriptions, the taxonomic literature, museums and museum science, and careers in systematic science.**Prerequisite:** BZ 220.**Registration Information:** Credit not allowed for both BSPM 424 and BZ 424.**Term Offered:** Spring (even years).**Grade Mode:** Traditional.**Special Course Fee:** Yes.**BZ 425 Conservation and Population Genomics Credits: 3 (3-0-0)****Course Description:** Introduction to molecular genetic markers for questions in ecology, evolution, behavior, and conservation.**Prerequisite:** BZ 220.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 430 Animal Behavior and Conservation Credits: 3 (3-0-0)****Course Description:** The interface between animal behavior and conservation biology, exploring how behavioral tools can be applied to conservation problems.**Prerequisite:** (BZ 110 and BZ 111 or LIFE 103) and (BZ 300).**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 433 Behavioral Genetics Credits: 3 (3-0-0)****Course Description:** An integrative view of genetic basis of animal behavior, with emphasis on complex behaviors and societal implications of genetics research.**Prerequisite:** LIFE 102 or LIFE 103.**Restriction:** Must not be a: Freshman, Sophomore.**Registration Information:** Junior standing.**Term Offered:** Fall (odd years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 435A Study Abroad--Honduras: Field Course--Dolphin Behavior and Physiology Credits: 2 (0-0-2)****Course Description:** Field program offers an 8-day research experience to Roatan, Honduras. Study animal behavior, animal physiology, and conservation methods at the Roatan Institute for Marine Science (RIMS). Classroom lectures and discussions provide the framework to develop an understanding of the subject matter. Develop the skills necessary to conduct preliminary research.**Prerequisite:** BZ 110 and BZ 111 or BZ 120 or LIFE 102.**Registration Information:** Sophomore standing. This is a partial semester course.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.

BZ 435B Study Abroad--Mexico: Practices in Marine Biology and Ecology Credits: 3 (0-0-3)

Course Description: Exposure to two of the most productive and biologically diverse marine areas in North America. Living in a landlocked state makes it hard to bring marine biology to life. However, studying the organisms/ecosystems in Baja California Sur is an opportunity to experience first-hand the subject matter that is normally only read about in textbooks. Venture into the field and gain practical knowledge from fieldwork that strengthens research skills.

Prerequisite: LIFE 320.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore Standing. Written consent of instructor. This is a partial semester course. Students apply through Office of International Programs.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 435C Study Abroad--Kenya: Biology and Behavior of African Mammals Credits: 3 (0-0-3)

Course Description: An immersive field course in the techniques relevant to research on African mammals and conservation management.

Prerequisite: BZ 220.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. This is a partial semester course. Sections offered as Mixed Face-to-Face.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 440 Plant Physiology Credits: 3 (3-0-0)

Course Description: Functions and activities of plants.

Prerequisite: BZ 120 or LIFE 103.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 441 Plant Physiology Laboratory Credits: 2 (0-2-1)

Course Description: Laboratory applications of plant physiology principles.

Prerequisite: BZ 440, may be taken concurrently.

Registration Information: Must register for laboratory and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 449A Study Abroad: Ecology/Conservation--Ecuadorian Biodiversity Credits: 4 (0-0-4)

Course Description: Winter (January) study abroad experience in Ecuador. First-hand exposure to the unparalleled biodiversity of Ecuador. Ecuador is an ideal location to learn about tropical biodiversity, because it houses an enormous diversity of tropical ecosystems in a relatively small geographic area, all of which are very accessible. Students will visit these ecosystems—including cloud forest, páramo, and lowland Amazonian rainforest.

Prerequisite: BZ 220.

Registration Information: Junior standing. Written consent of instructor.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 450 Plant Ecology Credits: 4 (3-2-0)

Course Description: Relation of plants to their environment.

Prerequisite: LIFE 103 or BZ 120.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 455 Human Heredity and Birth Defects Credits: 3 (3-0-0)

Course Description: Human heredity and its individual and social implications; causes of congenital defects.

Prerequisite: BZ 110 and BZ 111 or LIFE 103.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 460 Genome Evolution Credits: 4 (3-0-1)

Course Description: Evolution of DNA, RNA, and proteins; use of genomic data to infer evolutionary history and processes.

Prerequisite: (BZ 220) and (BZ 310 or BZ 350).

Registration Information: Must register for lecture and recitation.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 462 Parasitology and Vector Biology Credits: 5 (3-4-0)

Also Offered As: BSPM 462 and MIP 462.

Course Description: Protozoa, helminths, and insects and related arthropods of medical importance; systematics, epidemiology, host damage and control.

Prerequisite: (BZ 110 or LIFE 103) and (BZ 212 or LIFE 206 or MIP 302).

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: BZ 462, BSPM 462, MIP 462.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 471 Stream Biology and Ecology Credits: 3 (3-0-0)

Course Description: Biology and ecology of running waters.

Prerequisite: LAND 220 or LIFE 220 or LIFE 320.

Restriction: Must not be a: Freshman.

Registration Information: Sections may be offered: Mixed Face-to-Face.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 472 Stream Biology and Ecology Laboratory Credit: 1 (0-3-0)

Course Description: Field sampling and laboratory analysis of habitats, biota, and ecological relationships in running waters.

Prerequisite: BZ 471, may be taken concurrently.

Registration Information: Required field trips.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

BZ 475 Marine Mammalogy Credits: 3 (3-0-0)

Course Description: Taxonomy, evolution, morphology, physiological adaptations, behavior, and ecology of marine animals.

Prerequisite: BZ 214.

Registration Information: Junior standing. Credit not allowed for both BZ 475 and BZ 481A3.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 476 Genetics of Model Organisms Credits: 3 (3-0-0)**Also Offered As:** BZ 576.**Course Description:** Advanced topics in model genetic systems including molecular and developmental genetics.**Prerequisite:** BZ 350 or LIFE 201A or LIFE 201B or SOCR 330.**Registration Information:** Junior standing. Credit not allowed for both BZ 476 and BZ 576.**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 477 Genome Editing Laboratory Credits: 2 (1-3-0)****Course Description:** Learn theory and application of CRISPR/Cas genome editing. Design and create genome editing constructs to induce genetic modifications that lead to visible phenotypes using the model plant Arabidopsis. By sequencing the DNA of modified plants, students are able to link genotypic changes to their phenotypic consequences.**Prerequisite:** BZ 310 or BZ 350 or LIFE 201 or SOCR 330.**Registration Information:** Must register for lecture and laboratory. Credit allowed for only one of the following: BZ 477, BZ 480A7, or SOCR 480A7.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** Yes.**BZ 478 Biology and Behavior of Cats Credits: 3 (3-0-0)****Also Offered As:** VS 478.**Course Description:** Comprehensive inquiry into how aspects of physiology, neurobiology, development and genetics influence the behavior of domestic cats. Evolution and domestication are explored as contextual reference for some behavior problems, and differentiated from true abnormal behavior. Emphasis is on interpreting scientific experiments in feline biology.**Prerequisite:** BZ 220.**Restriction:** Must not be a: Freshman, Sophomore.**Registration Information:** Junior standing. Sections may be offered: Online. Credit not allowed for both BZ 478 and VS 478.**Terms Offered:** Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 479 Biology and Behavior of Dogs Credits: 3 (3-0-0)****Also Offered As:** VS 479.**Course Description:** Interactions of physiology, neurobiology, and genetics on behavior of domestic dogs, and how evolution and domestication influence behavioral traits.**Prerequisite:** BZ 220.**Restriction:** Must not be a: Freshman, Sophomore.**Registration Information:** Junior standing. Sections may be offered: Online. Credit not allowed for both BZ 479 and VS 479.**Terms Offered:** Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 482A Study Abroad: Field Marine Biology Credits: 4 (0-0-4)****Course Description:** Exposure to two of the most productive and biologically diverse marine areas in North America. Field sampling and exploration of marine ecosystems from levels of primary production to the top level predators. Students will learn a wide variety of hands on sampling techniques and data analyses with the goal of comparing the marine ecology of the Baja peninsula.**Prerequisite:** BZ 415 and BZ 496.**Registration Information:** Junior Standing. Written consent of instructor. Students to apply through Office of International Programs.**Term Offered:** Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 482E Study Abroad--Madagascar: Biology and Behavior of Primates Credits: 3 (0-0-3)****Course Description:** Provides a unique opportunity to gain experience in field techniques and the cultural/community context for the conservation of a critically endangered group of endemic mammals, Malagasy lemurs, including the impact of their physiology, ecological niches, behavior, and evolutionary history.**Prerequisite:** BZ 220.**Term Offered:** Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 487 Internship Credits: Var[1-12] (0-0-0)****Course Description:** Supervised work-related research experience in laboratory or field setting with consultation and approval of a regular faculty member.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**BZ 492A Seminar: Behavior Credits: Var[1-3] (0-0-0)****Course Description:****Prerequisite:** None.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BZ 492B Seminar: Ecology Credits: Var[1-3] (0-0-0)****Course Description:****Prerequisite:** None.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BZ 492C Seminar: Genetics Credits: Var[1-3] (0-0-0)****Course Description:****Prerequisite:** None.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BZ 492D Seminar: Ornithology Credits: Var[1-3] (0-0-0)****Course Description:****Prerequisite:** None.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

BZ 492E Seminar: Herpetology Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 492F Seminar: Evolution Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 492G Seminar: Departmental Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 495 Independent Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Maximum of 7 credits allowed in course.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 496 Group Study—Biology Credits: Var[1-3] (0-0-0)

Course Description: Faculty-directed group investigation of areas of special interest in biology.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 498 Laboratory or Field Research Credits: Var[1-6] (0-0-0)

Course Description: Supervised laboratory or field research in biology, botany, or zoology.

Prerequisite: None.

Registration Information: Written consent of research mentor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 505 Cognitive Ecology Credits: 3 (3-0-0)

Course Description: The evolutionary ecology of mechanisms related to information processing and decision-making in animals.

Prerequisite: BZ 300.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 510 Zoophysiological Ecology Credits: 3 (3-0-0)

Course Description: Concepts, principles, and examples of adaptive physiological strategies used by animals.

Prerequisite: (BMS 300 or BMS 360 or BZ 401) and (LIFE 320 or LAND 220 or LIFE 220).

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 515 Physiological Ecology of Marine Vertebrates Credits: 3 (3-0-0)

Course Description: Physiological adaptations of vertebrates to different marine environments.

Prerequisite: (BZ 214 and BZ 330) and (BC 351 or BC 401 or BMS 300 or BZ 401).

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 520 Advanced Systematics Credits: 3 (3-0-0)

Also Offered As: BSPM 520.

Course Description: Theory and practice of modern systematics.

Prerequisite: BZ 325 or BZ 424 or BSPM 424.

Registration Information: Credit not allowed for both BZ 520 and BSPM 520.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 525 Advanced Conservation & Evolutionary Genomics Credits: 4 (3-0-1)

Course Description: Population genetic theory and application of genomic methods to conservation.

Prerequisite: (BZ 220 and BZ 350) and (STAT 301 or STAT 307).

Registration Information: Junior standing. Must register for lecture and recitation.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 526 Evolutionary Ecology Credits: 3 (3-0-0)

Also Offered As: BSPM 526.

Course Description: Adaptation to abiotic and biotic environments; how current ecological processes interact with evolutionary history.

Prerequisite: LIFE 320 or LAND 220 or LIFE 220.

Registration Information: Credit not allowed for both BZ 526 and BSPM 526.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 530 Ecological Plant Morphology Credits: 2 (2-0-0)

Course Description: Adaptive significance and evolution of plant form and structure.

Prerequisite: (BZ 220) and (LIFE 320 or BZ 450).

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 535 Behavioral and Cognitive Ecology Credits: 3 (3-0-0)

Course Description: Evolutionary and theoretical perspectives in animal behavior using examples from model empirical systems. Emphasis on decision rules and social behavior.

Prerequisite: BZ 300 with a minimum grade of B.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 540 Translocation in Plants Credits: 2 (2-0-0)

Course Description: Transport of sugars, organic and inorganic ions, water, and hormones across membranes and through vascular systems of plants.

Prerequisite: BZ 331 and BZ 440.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 544 Presenting Research in Biology Credits: 2 (2-0-0)

Course Description: Procedures for preparing and presenting results of biological research in scientific journals and at professional meetings.

Prerequisite: None.

Registration Information: Written consent of instructor.

Term Offered: Fall.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

BZ 548 Theory of Population and Evolutionary Ecology Credits: 4 (3-3-0)

Course Description: Principles and methods for building, analyzing, and interpreting mathematical models of ecological and evolutionary problems in biology; research module.

Prerequisite: MATH 155 or MATH 160.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: BZ 548, BZ 348, MATH 348.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 560 Teaching and Communicating Science Credits: 3 (3-0-0)

Course Description: Nature of science, scientific reasoning, scientific argumentation, communication theories, and instructional strategies are explored. Develop science argumentation and communication skills in undergraduate courses and in informal settings. Create materials for a professional portfolio.

Prerequisite: (STAT 201 or STAT 204 or STAT 301 or STAT 307 or STAT 315) and (BZ 220 or LIFE 320) and (BZ 350 or LIFE 203 or SOCR 330).

Registration Information: Intended for students in a life science program. Credit allowed for only one of the following: BZ 560, BZ 670 or BZ 680A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 562 Computational Approaches in Molecular Ecology Credits: 2 (1-2-0)

Course Description: Explore current analysis methods for working with genome-wide sequencing data from non-model organisms. Analysis methods focus on ecological, evolution, and conservation related topics.

Prerequisite: (BZ 220) and (STAT 301 or STAT 307).

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both BZ 562 and BZ 581A2.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 565 Next Generation Sequencing Platform/Libraries Credit: 1 (0-2-0)

Also Offered As: MIP 565.

Course Description: Theoretical and experimental aspects of next generation sequencing experiments with a focus on the Illumina platform. Students will create and sequence metagenomic and 16S rDNA libraries from soil samples and unknown bacterial cultures.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. This is a partial semester course. Credit allowed for only one of the following: BZ 565, CM 581A2, or MIP 565.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 568 Sustaining River Ecosystems in Changing World Credits: 3 (3-0-0)

Also Offered As: FW 568.

Course Description: Applying the concepts and principles of freshwater ecosystem structure and function to develop a multidisciplinary and integrated understanding of the approaches and methods for restoring and sustainably managing these systems in the face of increasing human demands and rapid climate change.

Prerequisite: None.

Restriction: Must not be a: Freshman, Sophomore, Junior.

Registration Information: Senior standing. Credit allowed for only one of the following: BZ 568, BZ 680A2, FW 568, and FW 680A2.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 570 Molecular Aspects of Plant Development Credits: 3 (3-0-0)

Course Description: Molecular mechanisms that regulate diverse vegetative and reproductive developmental processes in plants.

Prerequisite: BC 463 or BZ 350 or MIP 450 or SOCR 330.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 572 Phytoremediation Credits: 3 (3-0-0)

Course Description: Environmental cleanup using plants.

Prerequisite: BZ 120 or LIFE 103.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 576 Genetics of Model Organisms Credits: 4 (3-0-1)

Also Offered As: BZ 476.

Course Description: Advanced topics in model genetic systems including molecular and developmental genetics.

Prerequisite: BZ 350 or LIFE 201A or LIFE 201B or SOCR 330.

Registration Information: Junior standing. Credit not allowed for both BZ 576 and BZ 476.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

BZ 584 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Maximum of 6 credits allowed in course.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 587A Internship: General Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 587B Internship: Herbarium Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 594 Independent Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 642 Plant Metabolism Credits: 3 (3-0-0)

Course Description: Biosyntheses and transformations of important plant metabolites.

Prerequisite: BC 351 and BZ 440.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

BZ 692A Seminar: Behavior Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 692C Seminar: Ecology Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 692D Seminar: Genetics Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 692E Seminar: Ornithology Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 692G Seminar: Evolution Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 692H Seminar: Departmental Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 695 Independent Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 784 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Maximum of 6 credits allowed in course.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 792 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

BZ 795 Independent Study Credits: Var[1-3] (0-0-0)**Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BZ 798 Research Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**BZ 799 Dissertation Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

Major in Biological Science

Biology is the study of all living things—including microscopic bacteria and viruses, plants and animals, and their relationship to their environments. Biology majors study the structure and function of cells, organ systems and tissues of animals and plants, ecology (the relationship between living things and their environment), animal behavior, genetics/genomics and evolution. They learn about physiology, behavior, genetics and heredity, aquatic systems, microscopic organisms such as bacteria, and techniques for diverse areas ranging from field research to biotechnology. This major provides a solid foundation of understanding the basic biological sciences. It also offers an opportunity to choose an area of emphasis within life sciences that relates to particular career goals (for example: pre-health biology; cellular, molecular and genetic biology; behavioral biology; microbiology; botany; zoology; ecology; aquatic biology; evolution, genetics and systematics; etc.).

Learning Objectives

In addition to mastery of biological knowledge and skills, students will:

1. Interpret scientific data both mathematically and statistically.
2. Demonstrate organizational and laboratory skills.
3. Define scientific hypotheses and design experiments or observations to test them.
4. Work effectively in groups.
5. Demonstrate strong writing and oral communication skills.

Potential Occupations

Training in biology prepares students for a wide variety of occupations. A degree in biological science offers a broad foundation for professional degrees in nursing, dental, medical or veterinary school, and a number of health professions such as physician's assistant, physical therapy, occupational therapy, optometry or public health. Graduates often pursue advanced degrees in life sciences to carry out basic research or advance into leadership positions in industry. Participation in internships and/or laboratory research experience is highly recommended and strongly encouraged by the department to enhance practical training and development. Our biology graduates have gone on to careers as:

- Aquarium, zoo, and museum worker
- Assistant research scientist
- Research technician in industry or university laboratories
- Biology photographer
- Biotechnologist
- Brewery laboratory assistant
- Fisheries biologist or conservationist
- Consumer product researcher
- Marine bacteriologist
- Field ecologist
- Nuclear medicine technician
- Park naturalist

- Pharmaceutical researcher or salesperson
- Public health officer
- Science librarian
- Environmental educator, health specialist, or impact specialist
- Industrial hygienist
- Occupational therapist (with a master's degree)
- Medical or clinical laboratory technologist

Combining biology with additional skills can lead to other exciting transdisciplinary careers. Biology and computer science can be linked to the ever-expanding and exciting area of bioinformatics. Biology and writing can be incorporated into a career as a technical writer or science fiction novelist. Biology and visual arts combine in medical and scientific illustration. Biology and other humanities may lead to studies of the history of science or medicine. Work in both biology and philosophy/religion can be incorporated in careers in bioethics. Biology is linked with psychology for the neuroscientist or genetic counselor. Study biology and political science to work in environmental law or be a patent lawyer in biotechnology. Try mixing biology and business to get into hospital administration, small business or biotechnology administration. Specialized master's degrees are designed for many of these unique career paths.

Concentrations

- Biological Science Concentration
- Botany Concentration

Change of Major Process

- **For future or incoming CSU students:** Please contact Admissions (<https://admissions.colostate.edu/>) to declare Biological Science.
- **For current on-campus CSU students:** To learn more about Biological Science and decide if you are interested in declaring, you must first review the major requirements (<https://www.biology.colostate.edu/undergraduate-students/>), then sign up for and attend a Major Information Session (<https://www.biology.colostate.edu/advising/>):
 - These are 50-minute group sessions led by advisors with individualized course recommendations and built-in time to answer your questions.
 - If you are exploring the Biological Science major, or if you are registering before your session, we recommend you review the program links above and register for any open courses that you are eligible to add.

Major in Biological Science, Biological Science Concentration

This curriculum provides a broad background in the basic biological sciences, and permits students to select courses in areas of particular interest. The major is especially useful in meeting the pre-professional requirements in the biosciences. Students desiring this preparation should also check the appropriate pre-professional requirements.

The curriculum includes a two-semester introductory biology sequence, cell biology, developmental biology, ecology, evolution, and genetics. Required courses in the physical sciences include a minimum of one year in introductory chemistry and in physics (with labs), and at least one course in organic chemistry (with lab), and one in biochemistry. A calculus course and a statistics course are also required. In addition, students must complete a minimum of 18 upper-division credits of which 9 credits must be from "BZ" courses.

Learning Objectives

Students completing the Major in Biological Science with a concentration in Biological Science will attain a well-rounded education grounded in the natural sciences, with emphasis on the current state of knowledge in biology. Upon successfully completing the degree, they will be able to:

1. Attain a solid foundation in the natural sciences, with emphasis on biological processes and phenomena;
2. Demonstrate a fundamental understanding of biological concepts, processes, and phenomena that are broadly applicable to organisms, and a detailed understanding of knowledge relevant to specific fields of biology of interest to the student;
3. Demonstrate strong analytical, mathematical, and statistical skills, and the ability to apply these appropriately in biological contexts;
4. Demonstrate the ability to analyze, synthesize, integrate, and evaluate material from biology and related fields, and effectively communicate such information.

Department of Biology Undergraduate Programs (<https://www.biology.colostate.edu/undergraduate-students/>)

Requirements

Effective Fall 2024

To be qualified for graduation, students in the Biological Science major must have a minimum grade of C- in each of their biological, physical

science, and mathematical courses used to meet requirements for the major. This applies to courses taken as substitutions for meeting these requirements. The minimum scholastic average acceptable for graduation is 2.000 computed only for courses attempted at CSU.

Freshman

		AUCC	Credits
CHEM 111	General Chemistry I (GT-SC2)	3A	4
CHEM 112	General Chemistry Lab I (GT-SC1)	3A	1
CO 150	College Composition (GT-CO2)	1A	3
LIFE 102	Attributes of Living Systems (GT-SC1)	3A	4

Distinctive Requirements for Degree Program:

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Biological Sciences major -Biological Sciences concentration assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam). Earned grade of C or better is required in each of their biological, physical science, and mathematical courses used to meet requirements for the major. It is recommended that you do not take BZ 310 and BZ 350 together.

Major in Biological Science, Botany Concentration

Botany is the general study of plants and plant-like organisms from microscopic algae to giant redwoods, from mushrooming fungi to flowering angiosperms. Plant anatomy, how plants grow and develop, and how they survive and interrelate within their environments are topics of study. For students who like the outdoors, a career in plant ecology, taxonomy, or forestry might be appealing. Students attracted to the beauty and design of the microscopic world might enjoy a career in plant anatomy or plant developmental biology. Those interested in chemistry might enjoy plant biochemistry, molecular biology, or plant biotechnology. Those intrigued by plant diseases might become plant pathologists and the mathematically oriented might explore systems ecology, genetics, or plant biotechnology.

The botany curriculum begins with a solid foundation in mathematics, the biological sciences, chemistry, organic chemistry, physics, evolution, and genetics. Botany emphasizing terrestrial plant studies including

plant systematics, anatomy, and ecology, biochemistry, and earth sciences round out the core. Botany students also take liberal arts and communications courses to give breadth to their education.

Learning Objectives

Students completing the major in in Biological Science with a concentration in Botany will attain a well-rounded education grounded in the natural sciences, with emphasis on the current state of knowledge in botany. Upon successfully completing the degree, they will be able to:

1. Attain a solid foundation in the natural sciences, with emphasis on biological processes and phenomena;
2. Demonstrate a fundamental understanding of biological concepts, processes, and phenomena that are broadly applicable to organisms, as well as more a detailed understanding of multiple aspects of biological concepts, processes and phenomena applicable to plants and allied organisms;
3. Demonstrate strong analytical, mathematical, and statistical skills, and the ability to apply these appropriately in botanical contexts;
4. Demonstrate the ability to analyze, synthesize, integrate, and evaluate material from botany and related fields, and effectively communicate such information.

Department of Biology Undergraduate Programs (<https://www.biology.colostate.edu/undergraduate-students/>)

Requirements Effective Fall 2023

To be qualified for graduation, students in the Biological Science major must have a minimum grade of C- in each of their biological, physical science, and mathematical courses used to meet requirements for the major. This applies to courses taken as substitutions for meeting these requirements. The minimum scholastic average acceptable for graduation is 2.000 computed only for courses attempted at CSU.

Major in Zoology

Zoologists study animals—their origin, behavior, diseases, and life processes. Some experiment with live animals in controlled or natural surroundings while others study the structure and function of animal cells, tissues, and organ systems. Some zoologists go on to study veterinary medicine. Zoologists participate in research that has practical outcomes in farming, medicine, pharmacy, wildlife conservation, and pest control. Zoology encompasses many specialties. At CSU, students may focus on general training in animal biology or choose a concentration in the following areas: animal behavior, development, aquatic biology, ecology (how animals adapt to their environments), genetics and evolution, invertebrate organisms, cellular/molecular biology and physiology, systematics, and morphology of vertebrate organisms.

The curriculum is designed to provide a basic understanding of zoology through a variety of laboratory experiences in combination with the study of basic theories and defining concepts. The program encourages flexibility, strength, and depth. The course work includes a two-semester introductory biology sequence, one course each in invertebrates and vertebrates, and courses in evolution and ecology. Required courses in the physical sciences include a minimum of one year of introductory chemistry and at least one course in organic chemistry, two courses in physics (all with labs) and one in biochemistry. A course each in calculus and statistics is also required. In addition, students select a minimum of 15 credits of Zoology courses in their chosen areas of concentration.

Learning Objectives

In addition to mastery of biological knowledge and skills, students will:

1. Interpret scientific data.
2. Demonstrate strong organizational and laboratory skills.
3. Define scientific hypotheses and design experiments to test them.

4. Work effectively in groups.
5. Demonstrate strong writing and oral communication skills.

Potential Occupations

This major prepares students to work in various areas of zoology, such as research or private industry, or to begin graduate school or professional studies. Career opportunities include medical biotechnology, research technician, protective agencies such as shelters and refuges, trainers and handlers, animal-related business, aquatic/marine biologists, exotic animal specialists, and wildlife conservation. It is an appropriate major for students planning to attend medical or veterinary school. Graduates often pursue advanced degrees to carry out basic research or advance into leadership positions in industry. Participation in internships, laboratory, or research opportunities is highly recommended and encouraged by the department to enhance practical training and development.

Additional careers for Zoology majors include, but are not limited to: aquarium and museum curator/director; zoo keeper, animal trainer and instructor, science librarian, environmental technician, fish and wildlife technician, veterinary technician/assistant, marine bacteriologist or biologist or ecologist, humane society positions, cytotechnologist, ecologist, fisheries biologist or conservationist, laboratory technician, marketing researcher, medical technologist, park ranger, pharmaceutical sales representative, production supervisor, quality analysis technician in food or pharmaceutical industry, radiation protection technician, research technician, industrial hygienist, wildlife photographer.

Change of Major Process

- **For future or incoming CSU students:** Please contact Admissions (<https://admissions.colostate.edu/>) to declare Zoology.
- **For current on-campus CSU students:** To learn more about Zoology and decide if you are interested in declaring, you must first review the Zoology Major Requirements (<https://www.biology.colostate.edu/undergraduate-students/>). Then sign up for and attend a Major Information Session (<https://www.biology.colostate.edu/advising/>):
 - These are 50-minute group sessions led by advisors with individualized course recommendations and built-in time to answer your questions.
 - If you are exploring the Zoology major, or if you are registering before your session, we recommend you review the Zoology Major Requirements link above and register for any open courses that you are eligible to add.

Requirements Effective Fall 2024

To be qualified for graduation, students in the Zoology major must have a minimum grade of C- in each of their biological, physical science, and mathematical courses used to meet requirements for the major. This applies to courses taken as substitutions for meeting

these requirements. The minimum scholastic average acceptable for graduation is 2.000 computed only for courses attempted at CSU.

BZ 492F	Seminar: Evolution	1-3
BZ 496	Group Study--Biology	1-3
BZ 505	Cognitive Ecology	3
BZ 515	Physiological Ecology of Marine Vertebrates	3
BZ 525	Advanced Conservation & Evolutionary Genomics	4
BZ 535	Behavioral and Cognitive Ecology	3
BZ 560	Teaching and Communicating Science	3
BZ 562	Computational Approaches in Molecular Ecology	2
BZ 565/MIP 565	Next Generation Sequencing Platform/Libraries	1
BZ 568/FW 568	Sustaining River Ecosystems in Changing World	3
FW 300	Biology and Diversity of Fishes	2
FW 301	Ichthyology Laboratory	1
FW 400	Conservation of Fish in Aquatic Ecosystems	3
FW 405	Fish Physiology	3
GEOL 342	Paleontology	3
NR 312	Applied Insect Ecology	3
PHIL 325	Philosophy of Natural Science	3
PHIL 326	Philosophy of Biology	3

A maximum of 6 credits may be selected from the following courses:

BMS 300	Principles of Human Physiology
BMS 305	Domestic Animal Gross Anatomy
MIP 300	General Microbiology
MIP 302	General Microbiology Laboratory
MIP 315	Pathology of Human and Animal Disease
MIP 342	Immunology
MIP 343	Immunology Laboratory

A maximum of 3 credits may be selected from the following courses:

BZ 384	Supervised College Teaching
BZ 487	Internship
BZ 495	Independent Study
BZ 498	Laboratory or Field Research

¹ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

² CHEM 341, CHEM 343, and CHEM 344 may be taken as an alternative to CHEM 245 and CHEM 246.

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Zoology major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam). Earned grade of C or better is required in each of their biological, physical science, and mathematical courses used to meet requirements for the major. Term 5 may have to be adjusted if the student chooses 2 semesters of Organic Chemistry. It is recommended that you do not take BZ 310 and BZ 350 together.

Major Completion Map

Distinctive Requirements for Degree Program:

Freshman

Semester 1		Critical	Recommended	AUCC	Credits

Minor in Botany

The Minor in Botany allows students to develop expertise in the study of plants, their ecology, and applied sciences that use these skillsets, as a supplement to their major program.

Learning Objectives

Students in the Botany minor develop foundational knowledge in the anatomy, physiology, evolution, and management of plants and use that knowledge to develop expertise and scientific competencies that augment their major program of study.

Department of Biology Undergraduate Programs (<https://www.biology.colostate.edu/undergraduate-students/>)

Requirements Effective Fall 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Minor in Zoology

The minor in Zoology is a useful complement to a major in animal science, fishery biology, geology, natural resource recreation and tourism, or wildlife biology.

Learning Objectives

Students successfully completing the Zoology minor will:

1. Demonstrate a fundamental understanding of multiple aspects of biological concepts, processes, and phenomena relevant to animals;
2. Broaden their knowledge-base in biology and zoology, such that they will be able to integrate their knowledge of animal biology with their broader or complementary interests, e.g., their major field of study.

Department of Biology Undergraduate Programs (<https://www.biology.colostate.edu/undergraduate-students/>)

Requirements Effective Fall 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Master of Science in Biological Science

Studies in the Department of Biology's (<https://www.biology.colostate.edu/>) Master of Science in Biological Science (Plan A and Plan B) degree program span everything from molecules to ecosystems and involve the study of organisms across all domains of life. Topics are rooted in both basic and applied research. Students work and study at sites within Colorado, across the United States, and around the world. Some general areas of investigation include:

- anatomy/morphology
- behavior
- bioinformatics
- biological science education
- biotechnology
- cell biology
- conservation biology
- developmental biology
- disease biology
- ecology
- ecosystem science
- evolutionary biology
- genetics/genomics
- global change biology
- molecular biology
- neurobiology
- physiology
- systematics
- systems biology
- synthetic biology
- theoretical/mathematical biology

Learning Objectives

Successful students will:

1. Develop a broad background in the diverse fields that make up the biological sciences, and a deep scholarly and technical expertise in their specific field(s) of study.
2. Present to scientific audiences in the form of peer-reviewed scientific papers, poster presentations, and/or oral conference presentations to refine their oral and written communication skills.
3. Develop effective mentoring and teaching skills to communicate content in the biological sciences to students at an undergraduate level.
4. Identify the skills and professional development opportunities necessary for them to succeed in one or more of the diverse career tracks available to individuals with training in the biological sciences.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Biology (<https://www.biology.colostate.edu/graduate-students-2/>).

Plan A Effective Fall 2018

Code	Title	Credits
Coursework completed in consultation with advisor		30
BZ 699	Thesis	
Minimum of 24 credits earned at CSU		
Minimum of 21 credits earned at CSU since admission to the Graduate School		
Minimum of 16 credits earned at CSU at the 500-level or higher		
Minimum of 12 credits earned at CSU in regular courses at the 500-level or higher (which excludes courses ending in -82 through -99)		
Program Total Credits:		30

A minimum of 30 credits are required to complete this program.

Additional Program Requirements:

- No specific courses must be taken in satisfaction of Departmental degree requirements; however, the candidate must be able to demonstrate a general knowledge of biological science as well as competence in specific areas of concentration.
- A graduate student participating in an advanced degree program of the Department of Biology must meet with the Graduate Advisory Committee at least once annually, and the student shall submit an annual report of progress toward the degree, signed by their Graduate Advisory Committee, to the Department Chair for review.
- A graduate degree in Biological Science indicates that the individual has achieved a professional level of competence in research as well as formal classwork. Consequently satisfactory progress in a research program must parallel the effort in coursework.
- A completed thesis must be submitted to the Graduate Advisory Committee and approved following a successful oral defense (final examination).

Plan B Effective Fall 2018

Code	Title	Credits
Coursework completed in consultation with advisor		30
Scholarly paper, exam, portfolio, or similar project		
Minimum of 24 credits earned at CSU		
Minimum of 21 credits earned at CSU since admission to the Graduate School		
Minimum of 16 credits earned at CSU at the 500-level or higher		
Minimum of 12 credits earned at CSU in regular courses at the 500-level or higher (which excludes courses ending in -82 through -99)		
Program Total Credits:		30

A minimum of 30 credits are required to complete this program.

Additional Program Requirements:

- No specific courses must be taken in satisfaction of Departmental degree requirements; however, the candidate must be able to demonstrate a general knowledge of biological science as well as competence in specific areas of concentration.
- A graduate student participating in an advanced degree program of the Department of Biology must meet with the Graduate Advisory Committee at least once annually, and the student shall submit an annual report of progress toward the degree, signed by their Graduate Advisory Committee, to the Department Chair for review.
- A graduate degree in Biological Science indicates that the individual has achieved a professional level of competence in research as well as formal classwork. Consequently satisfactory progress in a research program must parallel the effort in coursework.
- A completed scholarly paper, exam, portfolio, or similar project must be submitted to and approved by the Graduate Advisory Committee.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration

5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Ph.D. in Biological Science

Studies in the Department of Biology's Ph.D. in Biological Science program span everything from molecules to ecosystems and involve

the study of organisms across all domains of life. Topics are rooted in both basic and applied research. Students work and study at sites within Colorado, across the United States, and worldwide. Some general areas of investigation include:

- anatomy/morphology
- behavior
- bioinformatics
- biological science education
- biotechnology
- cell biology
- conservation biology
- developmental biology
- disease biology
- ecology
- ecosystem science
- evolutionary biology
- genetics and genomics
- global change biology
- molecular biology
- neurobiology
- physiology
- systematics
- systems biology
- synthetic biology
- theoretical/mathematical biology

Learning Objectives

1. Develop a broad background in the diverse fields that make up the biological sciences and a deep scholarly and technical expertise in their specific field(s) of study.
2. Present to scientific audiences in the form of peer-reviewed scientific papers, poster presentations, and/or oral conference presentations to refine their oral and written communication skills.
3. Develop effective mentoring and teaching skills to communicate content in the biological sciences to students at an undergraduate level.
4. Identify the skills and professional development opportunities necessary for them to succeed in one or more of the diverse career tracks available to individuals with training in the biological sciences.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Biology (<https://www.biology.colostate.edu/graduate-students-2/>).

Requirements Effective Fall 2018

Code	Title	Credits

Ph.D.

- Ph.D. in Chemistry*

* Please see department for program of study.

Courses

Subjects in the department include: Chemistry (CHEM).

Chemistry (CHEM)

CHEM 103 Chemistry in Context (GT-SC2) Credits: 3 (3-0-0)

Course Description: Chemistry, chemical principles from more conceptual, less mathematical perspective; how chemical substances, chemical reactions affect our daily lives.

Prerequisite: None.

Registration Information: For students who do not plan to take additional courses in chemistry. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

CHEM 104 Chemistry in Context Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Laboratory applications of principles covered in CHEM 103.

Prerequisite: CHEM 103, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

CHEM 105 Problem Solving in General Chemistry Credits: 2 (1-0-1)

Course Description: Foundational problem-solving skills in general chemistry to support students for later success in general chemistry courses.

Prerequisite: MATH 118 or MATH 120 or MATH 127 or MATH 141 or MATH 155 or MATH 160 or MATH 161 or MATH 229 or MATH 261.

Registration Information: This is a partial semester course. Must register for lecture and recitation.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 107 Fundamentals of Chemistry (GT-SC2) Credits: 4 (4-0-0)

Course Description: Atomic/molecular theory, gases, liquids, solids, solutions, acid/base and oxidation/reduction reactions, kinetics, selected topics. Quantitative reasoning but with less focus on mathematical calculations than CHEM 111/CHEM 113.

Prerequisite: MATH 117 or MATH 120 or MATH 127 or MATH 141, may be taken concurrently or MATH 155, may be taken concurrently or MATH 160, may be taken concurrently or MATH 161, may be taken concurrently or MATH 229, may be taken concurrently or MATH 261, may be taken concurrently.

Registration Information: For students in science-related programs requiring one semester of general chemistry. Sections may be offered: Online. Credit allowed for only one of the following: CHEM 107, CHEM 111, CHEM 117, or CHEM 120.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

CHEM 108 Fundamentals of Chemistry Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Laboratory applications of principles presented in CHEM 107.

Prerequisite: CHEM 107, may be taken concurrently.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: CHEM 108, CHEM 112, or CHEM 121.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

CHEM 111 General Chemistry I (GT-SC2) Credits: 4 (3-0-1)

Course Description: Fundamental aspects of chemistry and chemical principles; emphasis on structure, bonding, and stoichiometry.

Prerequisite: MATH 118 or MATH 120 or MATH 127 or MATH 141 or MATH 155 or MATH 160 or MATH 161 or MATH 229 or MATH 261.

Registration Information: Must register for lecture and recitation.

Intended for science majors. Students should complete the sequence CHEM 111, CHEM 112, CHEM 113, and CHEM 114. Credit allowed for only one of the following: CHEM 107, CHEM 111, CHEM 117, or CHEM 120.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

CHEM 112 General Chemistry Lab I (GT-SC1) Credit: 1 (0-3-0)

Course Description: Laboratory applications of principles covered in CHEM 111.

Prerequisite: CHEM 111, may be taken concurrently or CHEM 117, may be taken concurrently.

Registration Information: Credit not allowed for both CHEM 112 and CHEM 108.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

CHEM 113 General Chemistry II Credits: 3 (3-0-0)

Course Description: Acid/base equilibria, kinetics, thermodynamics, solubility, oxidation-reduction reactions, electrochemistry, selected topics.

Prerequisite: (CHEM 107 or CHEM 111 or CHEM 117) and (MATH 120 or MATH 124 or MATH 127 or MATH 141, may be taken concurrently or MATH 155, may be taken concurrently or MATH 160, may be taken concurrently or MATH 161, may be taken concurrently or MATH 229, may be taken concurrently or MATH 261, may be taken concurrently).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 114 General Chemistry Lab II Credit: 1 (0-3-0)

Course Description: Laboratory applications of principles covered in CHEM 113.

Prerequisite: (CHEM 108 or CHEM 112) and (CHEM 113, may be taken concurrently).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 115 General Chemistry II Recitation Credit: 1 (0-0-1)

Course Description: Problem solving applied to topics in, e.g., acid/base equilibria, kinetics, thermodynamics, solubility, oxidation-reduction reactions, electrochemistry.

Prerequisite: None.

Registration Information: Must have concurrent registration in CHEM 113.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 117 General Chemistry I for Chemistry Majors Credits: 3 (3-0-0)

Course Description: Fundamental aspects of chemistry and chemical principles, with an emphasis placed on atomic and molecular structure, bonding and stoichiometry.

Prerequisite: MATH 118 or MATH 120 or MATH 127 or MATH 141 or MATH 155 or MATH 160 or MATH 161 or MATH 229 or MATH 261.

Registration Information: Must have concurrent registration in CHEM 192. Credit allowed for only one of the following: CHEM 107, CHEM 111, CHEM 117, or CHEM 120.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 120 Foundations of Modern Chemistry (GT-SC2) Credits: 4 (3-0-1)

Course Description: Fundamental aspects of chemistry and chemical principles, with an emphasis placed on modern atomic and molecular structure theory, structure and reactivity.

Prerequisite: MATH 118 or MATH 120 or MATH 127 or MATH 141 or MATH 155 or MATH 160 or MATH 161 or MATH 229 or MATH 261.

Registration Information: Intended for Chemistry majors. Must register for lecture and recitation. Credit allowed for only one of the following: CHEM 107, CHEM 111, CHEM 117, or CHEM 120.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

CHEM 121 Foundations of Modern Chemistry Laboratory (GT-SC1) Credit: 1 (0-3-0)

Course Description: Laboratory applications of principles covered in CHEM 120.

Prerequisite: CHEM 120, may be taken concurrently.

Registration Information: Intended for Chemistry majors. Credit allowed for only one of the following: CHEM 108, CHEM 112, or CHEM 121.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

CHEM 192 Introductory Seminar in Chemistry Credits: 2 (0-0-2)

Course Description: Small-group discussions of aspects of chemistry.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 231 Foundations of Analytical Chemistry Credits: 3 (3-0-0)

Course Description: Fundamental chemical measurement science. Measuring chemical composition, either qualitative or quantitative, is essential to interact with the world and understand chemistry. Importance of equilibrium in making measurements.

Prerequisite: CHEM 113 and CHEM 114 or CHEM 120 and CHEM 121.

Registration Information: Chemistry majors only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 232 Foundations of Analytical Chemistry Lab Credits: 2 (0-6-0)

Course Description: Laboratory applications of principles of analytical chemistry.

Prerequisite: (CHEM 114 or CHEM 121) and (CHEM 231, may be taken concurrently).

Registration Information: Chemistry majors only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 241 Foundations of Organic Chemistry Credits: 4 (3-0-1)

Course Description: Nomenclature, structure, bonding, reactions, mechanisms, synthesis, and the stereochemistry of organic compounds.

Prerequisite: CHEM 111 and CHEM 113 or CHEM 120.

Registration Information: Must register for lecture and recitation. Credit allowed for only one of the following: CHEM 241, CHEM 245, CHEM 341, or CHEM 345.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 242 Foundations of Organic Chemistry Laboratory Credit: 1 (0-3-0)

Course Description: Laboratory applications of organic chemistry principles.

Prerequisite: (CHEM 114 or CHEM 121) and (CHEM 241, may be taken concurrently).

Registration Information: Chemistry majors only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 245 Fundamentals of Organic Chemistry Credits: 4 (4-0-0)

Course Description: Nomenclature, structure, bonding, reactions, mechanisms, synthesis, stereochemistry of organic compounds.

Prerequisite: CHEM 107 or CHEM 113.

Registration Information: Intended for students in science-related programs requiring one semester of organic chemistry. Credit allowed for only one of the following: CHEM 245, CHEM 341, and CHEM 345. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 246 Fundamentals of Organic Chemistry Laboratory Credit: 1 (0-2-0)

Course Description: Laboratory applications of principles presented in CHEM 245.

Prerequisite: (CHEM 108 or CHEM 112 or CHEM 114 or CHEM 121) and (CHEM 245, may be taken concurrently).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 261 Fundamentals of Inorganic Chemistry Credits: 3 (3-0-0)

Course Description: Preparation, structures, properties, and reactions of chemical elements and inorganic compounds; periodic trends, organizing principles; applications.

Prerequisite: CHEM 113, may be taken concurrently.

Registration Information: Credit not allowed for both CHEM 261 and CHEM 263.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 263 Foundations of Inorganic Chemistry Credits: 4 (3-0-1)

Course Description: Preparation, structures, properties, and reactions of chemical elements and inorganic compounds; periodic trends, organizing principles; applications.

Prerequisite: CHEM 113 or CHEM 120.

Registration Information: Must register for lecture and recitation. Chemistry majors only. Credit not allowed for both CHEM 261 and CHEM 263.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 264 Foundations of Inorganic Chemistry Laboratory Credit: 1 (0-3-0)

Course Description: Synthetic techniques and instrumental methods in inorganic chemistry.

Prerequisite: (CHEM 114 or CHEM 121) and (CHEM 263, may be taken concurrently).

Registration Information: Chemistry majors only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 301 Advanced Scientific Writing--Chemistry (GT-CO3) Credits: 3 (3-0-0)

Course Description: Advanced scientific writing using the read-analyze-write approach to writing scientific journal articles.

Prerequisite: (CO 150) and (CHEM 232 or CHEM 242 or CHEM 264 or CHEM 322 or CHEM 334 or CHEM 344 or CHEM 345 or CHEM 498).

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Advanced Writing 2, Advanced Writing (GT-CO3).

CHEM 311 Introduction to Nanoscale Science Credits: 3 (3-0-0)

Course Description: Synthesis, characterization, and applications of nanoscale materials.

Prerequisite: (CHEM 113) and (CHEM 346 or CHEM 343).

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 315 Foundations of Polymer Chemistry Credits: 3 (3-0-0)

Course Description: Synthesis, characterization, and applications of polymeric materials.

Prerequisite: CHEM 241 or CHEM 245 or CHEM 341 or CHEM 345.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 320 Chemistry of Addictions Credits: 3 (3-0-0)

Course Description: Chemical processes of addiction; receptor binding, molecular deactivation, and feedback in the context of protein-substrate molecular interactions.

Prerequisite: CHEM 241 or CHEM 245 or CHEM 341 or CHEM 345.

Registration Information: Junior standing.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 321 Foundations of Chemical Biology Credits: 4 (3-0-1)

Course Description: Principles of chemical biology. Chemical methods for understanding and controlling the structure and function of biopolymers.

Prerequisite: CHEM 241 or CHEM 341.

Registration Information: Must register for lecture and recitation.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 322 Foundations of Chemical Biology Laboratory Credit: 1 (0-3-0)

Course Description: Chemical biology approaches used to illustrate how chemistry can be applied to manipulate and study biological problems using a combination of experimental techniques ranging from organic chemistry, analytical chemistry, biochemistry, molecular biology, biophysical chemistry, and cell biology.

Prerequisite: (CHEM 242 or CHEM 344) and (BC 351, may be taken concurrently or CHEM 321, may be taken concurrently).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 333 Forensic Chemistry Credits: 3 (3-0-0)

Course Description: Basic knowledge related to the application of chemical principles in forensic sciences. Techniques discussed are hair, soil, dye, glass, ammunition, drugs, and biological materials analysis. These techniques are used to support evidence on and off the crime scene.

Prerequisite: (LIFE 102) and (CHEM 108 or CHEM 114 or CHEM 232) and (CHEM 241 or CHEM 245 or CHEM 341).

Restriction: Must not be a: Freshman.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 334 Quantitative Analysis Laboratory Credit: 1 (0-3-0)

Course Description: Laboratory applications of principles presented in CHEM 335.

Prerequisite: CHEM 114 and CHEM 335, may be taken concurrently.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 335 Introduction to Analytical Chemistry Credits: 3 (3-0-0)

Course Description: Modern and classical applications and methods in analytical chemistry including statistical, kinetic, spectroscopic, and chromatographic analysis.

Prerequisite: CHEM 113 with a minimum grade of C and CHEM 334, may be taken concurrently.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 338 Environmental Chemistry Credits: 3 (3-0-0)

Course Description: Processes that control the fate of chemicals in the environment. Focus on the chemistry of the atmosphere, hydrosphere, and soils, especially as it pertains to pollution of these environmental compartments. Topics covered in the course may include smog and air pollution, ocean acidification, acid mine drainage, pesticide chemistry, and heavy metal contamination.

Prerequisite: (CHEM 107 or CHEM 113 or CHEM 120 or CHEM 231 or CHEM 263) and (CHEM 241 or CHEM 245 or CHEM 341 or CHEM 345).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 341 Modern Organic Chemistry I Credits: 3 (3-0-0)

Course Description: Structures, nomenclature, dynamics, spectroscopy, and reactions of organic molecules.

Prerequisite: CHEM 113.

Registration Information: Credit allowed for only one of the following: CHEM 341, CHEM 245, and CHEM 345.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 343 Modern Organic Chemistry II Credits: 3 (3-0-0)

Course Description: Continued studies of reactions and mechanisms of organic molecules and biological chemistry.

Prerequisite: CHEM 241 with a minimum grade of C- or CHEM 245 with a minimum grade of C- or CHEM 341 with a minimum grade of C- or CHEM 345 with a minimum grade of C-.

Registration Information: Credit not allowed for both CHEM 343 and CHEM 346.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 344 Modern Organic Chemistry Laboratory Credits: 2 (0-6-0)

Course Description: Laboratory applications of modern organic chemistry.

Prerequisite: (CHEM 114 or CHEM 121) and (CHEM 343, may be taken concurrently).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 345 Organic Chemistry I Credits: 4 (3-3-0)

Course Description: Structure, nomenclature, dynamics, spectroscopy, reactions of organic molecules. Laboratory applications of principles presented in lecture.

Prerequisite: CHEM 113 and CHEM 114.

Registration Information: Chemistry majors only. Must register for lecture and laboratory. Students should plan to complete the sequence CHEM 345, CHEM 346. Credit allowed for only one of the following: CHEM 245, CHEM 341, and CHEM 345.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 346 Organic Chemistry II Credits: 4 (3-3-0)

Course Description: Continue studies of reactions and mechanisms of organic molecules. Laboratory applications of principles presented in lecture.

Prerequisite: CHEM 345.

Registration Information: Chemistry majors only. Must register for lecture and laboratory. Students should plan to complete the sequence CHEM 345 and CHEM 346. Credit not allowed for both CHEM 343 and CHEM 346.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 355 Foundations of Sustainable Chemistry Credits: 3 (3-0-0)

Course Description: Explore how chemistry can help address global human health and environmental issues and how solutions draw from a wide range of multidisciplinary concepts.

Prerequisite: (CHEM 241 or CHEM 245 or CHEM 341) and (GES 101).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 371 Fundamentals of Physical Chemistry Credits: 4 (4-0-0)

Course Description: Quantum mechanics; molecular structure and spectroscopy; statistical and equilibrium thermodynamics; kinetics.

Prerequisite: (CHEM 232) and (MATH 161 or MATH 271) and (PH 141).

Registration Information: Chemistry majors only. Credit allowed for only one of the following CHEM 371, CHEM 473, or CHEM 474.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 372 Fundamentals of Physical Chemistry Lab Credit: 1 (0-3-0)

Course Description: Laboratory experiments illustrate the Fundamentals of Physical Chemistry, including atomic and molecular spectroscopy, thermochemistry, chemical equilibrium, and kinetics.

Prerequisite: CHEM 371, may be taken concurrently.

Registration Information: Chemistry majors only. Credit not allowed for both CHEM 372 and CHEM 475.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 384 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: CHEM 100 to 499 - at least 20 credits.

Registration Information: Written consent of department chair. Maximum of 12 credits for any combination of CHEM 384, CHEM 487, CHEM 495, CHEM 498. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 431 Instrumental Analysis Credits: 4 (3-3-0)

Course Description: Instrumental methods of chemical analysis.

Prerequisite: CHEM 371 and CHEM 372 or CBE 310, may be taken concurrently or CHEM 473, may be taken concurrently or CHEM 474, may be taken concurrently.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 433 Clinical Chemistry Credits: 3 (2-3-0)

Course Description: Principles and methodology of clinical chemistry.

Laboratory experience in methodology and method development.

Prerequisite: (CHEM 232 or CHEM 334) and (BC 404 or CHEM 322).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 434 Forensic Chemistry Laboratory Credit: 1 (0-3-0)

Course Description: Techniques used to illustrate how chemistry can be applied to criminal investigation. Forensic chemical tools for the analysis of drugs, fire and explosive debris, trace evidence, and firearms.

Prerequisite: (CHEM 333, may be taken concurrently) and (CHEM 232 or CHEM 242 or CHEM 246 or CHEM 264 or CHEM 344).

Restriction: Must not be a: Freshman.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 440 Advanced Organic Chemistry Laboratory Credits: 2 (0-6-0)

Course Description: Advanced techniques in organic synthesis, mechanisms of reactions, structure determination.

Prerequisite: CHEM 242 or CHEM 344 or CHEM 346.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 442 Chemistry of Hemp and Cannabis Credits: 3 (2-3-0)

Course Description: Examine characteristics of cannabis chemical families and the pharmacological properties. Study the methods for isolation, separation, processing and the transformation into commercial products within the context of chemical principles. Examine analytic techniques for quantitation.

Prerequisite: (CHEM 241 or CHEM 245 or CHEM 341 and CHEM 343) and (CHEM 113 or CHEM 231 or CHEM 335) and (CHEM 232 or CHEM 334) and (CHEM 242 or CHEM 246 or CHEM 344).

Registration Information: Must register for lecture and laboratory. Credit not allowed for both CHEM 442 and CHEM 480A3.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 445 Synthetic Organic Chemistry Credits: 3 (3-0-0)

Course Description: Functional group interconversions, carbonyl chemistry, alkene synthesis, pericyclic reactions, metal-mediated reactions, synthetic planning and retrosynthesis, stereocontrolled reactions.

Prerequisite: CHEM 241 or CHEM 343 or CHEM 346.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 448 Medicinal Chemistry Credits: 3 (3-0-0)

Course Description: Foundational understanding of how drugs function and affect biological systems, overview of the pharmaceutical industry, synthetic chemistry relevant to therapeutic compounds, introduction to process (scale up) chemistry, case studies of drug development.

Prerequisite: CHEM 241 or CHEM 343 or CHEM 346.

Registration Information: Sections may be offered: Online. Credit not allowed for both CHEM 448 and CHEM 480A2.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 451 Foundations of Catalytic Chemistry Credits: 3 (3-0-0)

Course Description: Foundational aspects of catalytic chemistry applied to homogeneous and heterogeneous systems utilizing molecular and biological catalysts as well as nano and supported catalytic materials.

Prerequisite: (CHEM 241 or CHEM 343 or CHEM 346) and (CHEM 261 or CHEM 263) and (BC 351 or CHEM 321) and (CHEM 371 or CHEM 473 or CHEM 474).

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 461 Inorganic Chemistry Credits: 3 (3-0-0)

Course Description: Concepts, models to explain structural, spectroscopic, magnetic, thermodynamic, and kinetic properties of inorganic compounds; symmetry, group theory.

Prerequisite: (CHEM 261 or CHEM 263) and (CBE 310 or CHEM 371 or CHEM 474).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 462 Inorganic Chemistry Laboratory Credits: 2 (0-4-0)

Course Description: Synthetic techniques and instrumental methods in inorganic chemistry.

Prerequisite: CHEM 264.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 465 Chemistry of Sustainable E-Waste Management Credit: 1 (1-0-0)

Course Description: A chemistry complement to a trans-disciplinary overview of the electronics industry. Focus on the chemistry of the extraction, use, and toxicity of electronics materials.

Prerequisite: (CHEM 263) and (BC 351 or CHEM 321) and (CHEM 371) and (GES 465, may be taken concurrently or MSE 465, may be taken concurrently).

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 473 Foundations of Physical Chemistry Credits: 4 (4-0-0)

Course Description: Quantum chemistry; molecular structure and spectroscopy; equilibrium thermodynamics; kinetics.

Prerequisite: (CHEM 113) and (MATH 161 or MATH 255 or MATH 271) and (PH 122 or PH 142).

Registration Information: Credit allowed for only one of the following CHEM 371, CHEM 473, or CHEM 474.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 474 Physical Chemistry I Credits: 3 (3-0-0)

Course Description: Quantum chemistry; applications to bonding, molecular structure, and spectroscopy.

Prerequisite: (CHEM 113) and (MATH 261 or MATH 272) and (PH 142).

Registration Information: Credit allowed for only one of the following CHEM 371, CHEM 473, or CHEM 474.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 475 Physical Chemistry Laboratory I Credit: 1 (0-3-0)

Course Description: Physiochemical experiments; emphasis on quantum mechanics/spectroscopy; interpretation/presentation of data; formal lab reports.

Prerequisite: (CBE 310, may be taken concurrently or CHEM 473, may be taken concurrently or CHEM 474, may be taken concurrently) and (CHEM 334).

Registration Information: Credit not allowed for both CHEM 372 and CHEM 475.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 476 Physical Chemistry II Credits: 3 (3-0-0)

Course Description: Statistical thermodynamics; applications to phase and chemical equilibria; kinetics.

Prerequisite: CHEM 371 or CHEM 474.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 477 Advanced Physical Chemistry Laboratory Credit: 1 (0-3-0)

Course Description: Physiochemical experiments; emphasis on thermodynamics/statistical mechanics/kinetics; interpretation/presentation of data; formal lab reports.

Prerequisite: CHEM 372.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: Yes.

CHEM 487 Internship Credits: Var[1-12] (0-0-0)

Course Description: Supervised work experience in approved off-campus chemical laboratory setting. Consultation with faculty adviser/instructor.

Prerequisite: CHEM 476.

Registration Information: Maximum of 12 credits allowed for any combination of CHEM 384, CHEM 487, CHEM 495, and CHEM 498.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 493 Senior Seminar Credits: 2 (0-0-2)

Course Description: Critical analysis of selected literature; develop presentation of technical topic; required oral presentation.

Prerequisite: CHEM 371 or CHEM 473 or CHEM 474.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 495 Independent Study Credits: Var[1-3] (0-0-0)

Prerequisite: CHEM 100 to 499 - at least 9 credits.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 498 Research Credits: Var[1-3] (0-0-0)

Prerequisite: CHEM 100 to 499 - at least 20 credits.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 499 Senior Thesis Credits: 2 (0-0-2)

Course Description: Preparation of a written thesis and an oral defense, based upon undergraduate research performed or an internship experience, under the guidance of a thesis advisor and thesis committee.

Prerequisite: CHEM 487 or CHEM 498.

Registration Information: Senior standing. Written consent of department chair.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 511 Solid State Chemistry Credits: 3 (3-0-0)

Course Description: Physical and descriptive chemistry of solids including characterization and synthetic methods.

Prerequisite: CHEM 461 and CHEM 476.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 515 Polymer Chemistry Credits: 3 (3-0-0)

Course Description: Fundamentals of polymer chemistry: synthesis, characterization, physical properties.

Prerequisite: CHEM 346 and CHEM 476.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 517 Chemistry of Electronic Materials Credits: 3 (3-0-0)

Course Description: Chemical aspects of preparation and processing of materials in electronic devices, "molecular electronics," and nanostructured materials.

Prerequisite: CHEM 571A, may be taken concurrently or CHEM 571B, may be taken concurrently.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 521 Principles of Chemical Biology Credits: 3 (3-0-0)

Also Offered As: BC 521.

Prerequisite: CHEM 245 or CHEM 343 or CHEM 346.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 522 Methods of Chemical Biology Credits: 2 (2-0-0)

Course Description: Approaches to quantitative chemical biology, visualization, study and characterization of macromolecules and macromolecular-dependent processes.

Prerequisite: BC 351 with a minimum grade of B or BC 401 with a minimum grade of B.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 530A Advanced Topics in Chemical Analysis: Environmental Chemical Analysis Credit: 1 (1-0-0)

Course Description:

Prerequisite: CHEM 431, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 530B Advanced Topics in Chemical Analysis: Absorption and Emission Spectroscopy Credit: 1 (1-0-0)

Course Description:

Prerequisite: CHEM 431, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 530C Advanced Topics in Chemical Analysis: Bioanalytical Chemistry Credit: 1 (1-0-0)

Course Description:

Prerequisite: CHEM 431, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 530D Advanced Topics in Chemical Analysis: Statistical Analysis in Analytical Chemistry Credit: 1 (1-0-0)

Course Description:

Prerequisite: CHEM 431, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 530E Advanced Topics in Chemical Analysis: Mass Spectrometry Credit: 1 (1-0-0)

Course Description:

Prerequisite: CHEM 431, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 530F Advanced Topics in Chemical Analysis: Analysis of Materials Credit: 1 (1-0-0)

Course Description:

Prerequisite: CHEM 431, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 532 Advanced Chemical Analysis II Credits: 3 (3-0-0)

Course Description: Advanced optics; instrumentation and methodology for analytical spectroscopy; computer applications.

Prerequisite: CHEM 431.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 533 Chemical Separations Credits: 3 (3-0-0)

Course Description: Fundamentals and applications of chemical separations.

Prerequisite: CHEM 335 and CHEM 431.

Terms Offered: Fall, Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 537 Electrochemical Methods Credits: 3 (3-0-0)

Course Description: Theory and methods of electrochemistry; applications of modern electrochemical techniques.

Prerequisite: CHEM 431.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 539A Principles of NMR and MRI: Basic NMR Principles Credit: 1 (1-0-0)**Course Description:****Prerequisite:** CHEM 474.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 539B Principles of NMR and MRI: NMR Diffusion****Measurements-2D NMR and MRI Credit: 1 (1-0-0)****Course Description:****Prerequisite:** CHEM 474.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 539C Principles of NMR and MRI: Advanced NMR and MRI Techniques Credit: 1 (1-0-0)****Course Description:****Prerequisite:** CHEM 474.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 541 Organic Molecular Structure Determination Credits: 2 (2-0-0)****Course Description:** Determination of organic molecular structure by spectroscopic methods.**Prerequisite:** CHEM 440.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 543 Structure/Mechanisms in Organic Chemistry Credits: 2 (2-0-0)****Course Description:** Structure including stereochemistry and conformational isomerism; reactivity and mechanisms in organic chemistry.**Prerequisite:** CHEM 343 or CHEM 346.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 545 Synthetic Organic Chemistry I Credits: 3 (3-0-0)****Course Description:** Reactions and synthesis in organic chemistry.**Prerequisite:** CHEM 543.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 547 Physical Organic Chemistry Credits: 3 (3-0-0)****Course Description:** Mechanisms, theory, kinetics, and thermodynamics.**Prerequisite:** CHEM 543.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 548 Organometallics in Synthesis Credits: 2 (2-0-0)****Course Description:** Fundamental aspects of organometallic chemistry applied to organic synthesis.**Prerequisite:** CHEM 545.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 549 Synthetic Organic Chemistry II Credits: 2 (2-0-0)****Course Description:** Strategies for the total synthesis of natural products.**Prerequisite:** CHEM 545.**Term Offered:** Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 550A Materials Chemistry: Hard Materials Credit: 1 (1-0-0)****Course Description:** Structure and bonding; crystallography; properties; synthesis; characterization of metals, semiconductors, and network solids.**Prerequisite:** (CHEM 343 or CHEM 346) and (CHEM 461 and CHEM 476).**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 550B Materials Chemistry: Soft Materials Credit: 1 (1-0-0)****Course Description:** Structure and bonding, mechanisms, properties, applications, synthesis, characterization of polymers, complex fluids, and biomaterials.**Prerequisite:** (CHEM 343 or CHEM 346) and (CHEM 461 and CHEM 476).**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 550C Materials Chemistry: Nanomaterials Credit: 1 (1-0-0)****Course Description:** Structure and bonding, synthesis, properties, characterization of carbon nanotubes, metal and semiconductor nanocrystals, and nanocomposites.**Prerequisite:** (CHEM 343 or CHEM 346) and (CHEM 461 and CHEM 476).**Term Offered:** Fall (even years).**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 551 Catalytic Chemistry Credits: 3 (3-0-0)****Course Description:** Fundamental aspects of catalytic chemistry applied to homogeneous and heterogeneous systems utilizing molecular catalysts as well as nano and supported catalytic materials.**Prerequisite:** (CHEM 343 or CHEM 346) and (CHEM 461 and CHEM 476).**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 555 Chemistry of Sustainability Credits: 3 (3-0-0)****Course Description:** The central role of chemistry for achieving sustainability in key areas including chemicals and materials, energy, and environment.**Prerequisite:** (BC 411 or CBE 310 or CHEM 476) and (CHEM 343 or CHEM 346).**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 560 Foundations of Inorganic Synthesis Credit: 1 (1-0-0)****Prerequisite:** CHEM 461.**Grade Mode:** Traditional.**Special Course Fee:** No.**CHEM 561 Inorganic Synthesis Credits: 2 (2-0-0)****Course Description:** Chemistry of compounds of representative elements and transition metals.**Prerequisite:** CHEM 560, may be taken concurrently.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.

CHEM 563A Physical Methods in Inorganic Chemistry: Group Theory Credit: 1 (1-0-0)

Course Description: Modern experimental methods in inorganic chemistry.

Prerequisite: CHEM 461.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 563B Physical Methods in Inorganic Chemistry: Vibrational Spectroscopy Credit: 1 (1-0-0)

Course Description: Modern experimental methods in inorganic chemistry.

Prerequisite: CHEM 461.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 563C Physical Methods in Inorganic Chemistry: Electronic Structure and Magnetism Credit: 1 (1-0-0)

Course Description: Modern experimental methods in inorganic chemistry.

Prerequisite: CHEM 461.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 563D Physical Methods in Inorganic Chemistry: Magnetic Spectroscopies Credit: 1 (1-0-0)

Course Description: Modern experimental methods in inorganic chemistry.

Prerequisite: CHEM 461.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 563E Physical Methods in Inorganic Chemistry: Advanced Nuclear Magnetic Resonance Spectroscopy Credit: 1 (1-0-0)

Course Description: Modern experimental methods in inorganic chemistry.

Prerequisite: CHEM 461.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 563F Physical Methods in Inorganic Chemistry: Other Structural Methods Credit: 1 (1-0-0)

Course Description: Modern experimental methods in inorganic chemistry.

Prerequisite: CHEM 461.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 565 Inorganic Mechanisms Credits: 3 (3-0-0)

Course Description: Fundamental tools, key principles, selected classic case histories of inorganic and organometallic mechanistic chemistry, emphasizing kinetic methods.

Prerequisite: CHEM 476.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 566 Bioinorganic Chemistry Credits: 3 (3-0-0)

Course Description: Biological-inorganic chemistry, including key principles, prototype systems, classic papers, and problems.

Prerequisite: CHEM 461.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 567 Crystallographic Computation Credit: 1 (1-0-0)

Course Description: Theory and practice of structural computations using single crystal X-ray diffraction data.

Prerequisite: CHEM 474 with a minimum grade of C-.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 569 Chemical Crystallography Credits: 3 (3-0-0)

Course Description: Theory and practice of determination of crystal and molecular structure by single crystal X-ray and neutron diffraction.

Prerequisite: CHEM 474.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 570 Chemical Bonding Credits: 3 (3-0-0)

Course Description: Electronic structure methods; chemical bonding models; intermolecular interactions.

Prerequisite: CBE 310 or CHEM 474.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 571A Quantum Chemistry: Foundations Credits: 2 (2-0-0)

Course Description: Simple systems; symmetry; approximate methods; time dependent methods; molecular structures.

Prerequisite: CBE 310 or CHEM 474.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 571B Quantum Chemistry: Electronic Structure Credit: 1 (1-0-0)

Course Description: Simple systems; symmetry; approximate methods; time dependent methods; molecular structures.

Prerequisite: CHEM 571A, may be taken concurrently.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 573A Chemical Spectroscopy: Interactions of Light and Matter Credit: 1 (1-0-0)

Course Description: Introduction to the fundamentals of spectroscopies used in chemical analysis from the perspective of time dependent quantum mechanics. Time-dependent perturbation theory, absorption and emission of radiation, two-level systems, and electronic, vibrational and rotational transitions.

Prerequisite: CHEM 571A.

Registration Information: This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 573B Chemical Spectroscopy: Electromagnetic Fields in Practice Credit: 1 (1-0-0)

Course Description: Foundation in electromagnetic fields used in chemical spectroscopy. Dispersion and phase, the measurement of electromagnetic fields, properties of short optical pulses, and modulating electromagnetic fields.

Prerequisite: CHEM 431.

Registration Information: This is a partial semester course.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 573C Chemical Spectroscopy: Condensed Phase Spectroscopy Credits: 2 (2-0-0)

Course Description: Foundations of spectroscopic measurements conducted on condensed phase chemical systems. Use of quantum mechanics and statistical mechanics to describe Response Theory, density matrix formalism, correlation functions, line shapes and spectral fluctuations, response functions, and the use of polarization in spectroscopy.

Prerequisite: CHEM 571A and CHEM 576.

Registration Information: This is a partial semester course.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 573D Chemical Spectroscopy: Nonlinear Spectroscopy Credit: 1 (1-0-0)

Course Description: Foundations of multidimensional spectroscopic measurements conducted on chemical systems.

Prerequisite: CHEM 573A and CHEM 573C.

Registration Information: This is a partial semester course.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 573E Chemical Spectroscopy: Spectroscopic Instrumentation Credit: 1 (1-0-0)

Course Description: Instrumentation used to carry out spectroscopic measurements in chemistry research. Lasers and other light sources, optics, and detectors, spectroscopic techniques, and electronic and digital interfacing specific to spectroscopic instrumentation.

Prerequisite: CHEM 431.

Registration Information: This is a partial semester course.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 573F Chemical Spectroscopy: Computational Spectroscopy Credit: 1 (1-0-0)

Course Description: Theory and computational techniques to compute and analyze molecular spectra, including aspects of quantum mechanics and statistical mechanics. Emphasis on implementation and computation of molecular spectra.

Prerequisite: CHEM 571A and CHEM 571B and CHEM 575 and CHEM 576.

Registration Information: This is a partial semester course.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 575 Fundamentals of Chemical Thermodynamics Credit: 1 (1-0-0)

Course Description: Fundamental thermodynamic concepts and some applications to chemical problems.

Prerequisite: CBE 310 or CHEM 476 or PH 361.

Registration Information: This is a partial-semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 576 Statistical Mechanics Credits: 2 (2-0-0)

Course Description: Principles of statistical mechanics with applications to chemical systems.

Prerequisite: CHEM 575, may be taken concurrently.

Registration Information: This is a partial-semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 577 Surface Chemistry Credits: 3 (3-0-0)

Course Description: Capillarity; interfacial thermodynamics, electrical aspects of surface chemistry, adsorbed layers.

Prerequisite: CBE 310 or CHEM 476.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 578A Computational Chemistry: Electronic Structure Credit: 1 (1-0-0)

Course Description: Electronic structure calculations of energetic and structural properties of molecules and chemical reactions.

Prerequisite: CHEM 571A and CHEM 571B.

Registration Information: This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 578B Computational Chemistry: Molecular Dynamics Credit: 1 (1-0-0)

Course Description: Molecular Dynamics simulations of liquids to compute static and time dependent properties. Applications include biological and materials chemistry.

Prerequisite: CHEM 576.

Registration Information: This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 579 Chemical Kinetics Credits: 3 (3-0-0)

Course Description: Elementary reactions, unimolecular reactions, reactions in solution, gas phase ion chemistry, photochemistry, and kinetic modeling.

Prerequisite: CBE 310 or CHEM 476.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 601 Responsible Conduct in Chemistry Research Credit: 1 (1-0-0)

Course Description: Appropriate conduct in research, publishing, intellectual property decisions, job hunting, and negotiating; social responsibilities of scientists.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 641 Organic Reaction Mechanisms Credits: 2 (2-0-0)

Course Description: Organic reaction mechanisms, including using arrows to show electron movement; heterolytic, radical, and pericyclic reactions.

Prerequisite: CHEM 545.

Restriction: Must be a: Graduate, Professional.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 651A Special Topics in Chemistry: Analytical Chemistry Credits: Var[1-4] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 651B Special Topics in Chemistry: Inorganic Chemistry Credits: Var[1-4] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 651C Special Topics in Chemistry: Organic Chemistry Credits: Var[1-4] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 651D Special Topics in Chemistry: Physical Chemistry Credits: Var[1-4] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 651E Special Topics in Chemistry: Materials Chemistry Credits: Var[1-4] (0-0-0)

Course Description: Discussion of current topics in materials chemistry.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 651F Special Topics in Chemistry: Chemical Biology Credits: Var[1-4] (0-0-0)

Course Description: Discussion of current topics in chemical biology.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 651G Special Topics in Chemistry: Chemistry Education Credits: Var[1-4] (0-0-0)

Course Description: Discussion of current topics in chemistry education.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 695 Independent Study Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 698 Research Credits: Var[1-9] (0-0-0)

Course Description: Graduate research in chemistry for students who do not plan to write an M.S. thesis.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Graduate standing in chemistry.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 699 Thesis Credits: Var[1-15] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 702 Independent Research Proposal Credit: 1 (0-0-1)

Course Description: Preparation, submission, and defense of an independent research proposal; creative and original thinking about research problems in modern chemistry.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to Ph.D. candidacy.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 751 Methods of Chemistry Laboratory Instruction Credit: 1 (1-0-0)

Course Description: Basic materials, methods, and skill development related to teaching undergraduate chemistry laboratory courses.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

CHEM 752 Advanced Chemical Instruction Credit: 1 (0-0-1)

Course Description: Advanced materials, methods, and presentation skills development related to teaching undergraduate chemistry courses.

Prerequisite: CHEM 751.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 773 Atomic and Molecular Spectroscopy Credits: 3 (3-0-0)

Course Description: Time-dependent methods; multiphoton and nonlinear spectroscopy; fundamentals of rotational, vibrational, electronic and magnetic resonance spectroscopy.

Prerequisite: CHEM 571A or CHEM 571B.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 775 Pillars of Physical Chemistry Credit: 1 (1-0-0)

Course Description: Fundamental concepts in physical chemistry through reading and discussing primary literature.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CHEM 784 Supervised College Teaching Credits: Var[1-2] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 793 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 795A Independent Study: Inorganic Chemistry Credits:

Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 795B Independent Study: Analytical Chemistry Credits:

Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 795C Independent Study: Biological Chemistry Credits:

Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 795D Independent Study: Physical Chemistry Credits:

Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CHEM 799 Dissertation Credits: Var[1-15] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Chemistry

This Bachelor of Science in Chemistry is certified by the American Chemical Society (ACS). Chemistry, the central science, engages biochemistry, biology, engineering, and environmental and materials sciences. Chemists synthesize compounds ranging from life-enhancing medicines to the materials of modern society, with the understanding that there can be unintended consequences. Chemists collect and analyze data used in policy decisions, including those involving the air, food, soil, and water. Chemists develop materials and processes that are safer, and are more energy and material efficient. Chemists develop processes for the recovery and conversion of waste to raw material.

With these important and diverse roles, chemists need to be skilled at the various arts of chemistry, conversant with other scientists as well as policy decision makers, and cognizant of the diverse impacts that their works have on society. Chemistry majors develop a solid foundation in general chemistry and mathematics, followed by course work in organic chemistry, analytical chemistry, physical chemistry, inorganic chemistry, chemical biology, and physics. The curriculum is rounded out by courses in the liberal and communications arts.

Learning Objectives

Upon earning a bachelor of science degree in chemistry, successful students will be able to:

1. Demonstrate foundational skills and knowledge in all the major sub-disciplines of chemistry (analytical, biological, inorganic, materials, organic, and physical).
2. Demonstrate rigorous in-depth skills and knowledge in at least two of the sub-disciplines.
3. Exhibit valuable laboratory skills in all fundamental areas of chemistry, enabling them to contribute effectively to a professional laboratory as well as engage in original research.
4. Use visualization tools, theory, computation, and simulations to explain experimental results, make predictions, and test hypotheses.
5. Obtain, organize, and critically evaluate chemical information, and effectively present it coherently through oral and written discourse with specialists and non-specialists alike.
6. Ethically and responsibly engage their knowledge of chemistry to address current global and societal challenges.
7. Apply sustainability principles that incorporate complex environmental, economic, and social factors.

Potential Occupations

Chemists are employed in a vast array of professional fields in private industry, government, and education. Chemists work in research and development, analysis and testing, consulting, industrial quality control and assurance, environmental resource management, and forensics. Principal employers are petrochemical firms, biotechnology firms, consumer chemical firms, environmental testing laboratories, pharmaceutical companies, agricultural companies, governmental regulatory agencies, governmental and educational research laboratories, and manufacturing firms. Many chemists are also engaged in startup companies. Chemistry is also an excellent major for those preparing for careers in veterinary medicine and the health professions. Students whose career goals involve teaching at the secondary school level have the opportunity to complete the teacher licensure program through the School of Education (<http://soe.chhs.colostate.edu/>).

Many possible occupations for chemists include, but are not limited to: agricultural chemist, air and water quality analyst, biochemical technician, chemical sales and marketing representative, clinical chemist,

consultant, educator, forensic analyst, laboratory technician/bench chemist, materials analyst, patent examiner, pharmaceutical chemist, polymer technician, technical writer, and toxicologist.

Concentrations

- Environmental Chemistry Concentration
- Forensic Chemistry Concentration
- Health Sciences Concentration
- Materials Concentration
- Sustainable Chemistry Concentration

Requirements Effective Spring 2024

Chemistry majors must achieve a minimum grade of C (2.000) in all the listed courses required for the major in chemistry.

Freshman

		AUCC	Credits
CHEM 120 ¹	Foundations of Modern Chemistry (GT-SC2)	3A	4
CHEM 121 ¹	Foundations of Modern Chemistry Laboratory (GT-SC1)	3A	1
CHEM 192	Introductory Seminar in Chemistry		2
CHEM 241 ²	Foundations of Organic Chemistry		4
CHEM 242 ²	Foundations of Organic Chemistry Laboratory		1
CHEM 263	Foundations of Inorganic Chemistry		4
CHEM 264	Foundations of Inorganic Chemistry Laboratory		1
CO 150	College Composition (GT-CO2)	1A	3
Select one course from the following:			4
MATH 155	Calculus for Biological Scientists I (GT-MA1)	1B	
MATH 160	Calculus for Physical Scientists I (GT-MA1)	1B	
Arts and Humanities			3
Diversity, Equity, and Inclusion			3
Total Credits			30

Sophomore

CHEM 231	Foundations of Analytical Chemistry		3
CHEM 232	Foundations of Analytical Chemistry Lab		2
CHEM 322	Foundations of Chemical Biology Laboratory		1
Select one course from the following:			4
BC 351	Principles of Biochemistry		
CHEM 321	Foundations of Chemical Biology		
Select one group from the following:			8
Group A			
MATH 271	Applied Mathematics for Chemists I		
MATH 272	Applied Mathematics for Chemists II		
Group B			
MATH 161	Calculus for Physical Scientists II (GT-MA1)	1B	
MATH 261	Calculus for Physical Scientists III		
Select one course from the following:			5
PH 121	General Physics I (GT-SC1)	3A	
PH 141	Physics for Scientists and Engineers I (GT-SC1)	3A	

Select one course from the following:			5
PH 122	General Physics II (GT-SC1)	3A	
PH 142	Physics for Scientists and Engineers II (GT-SC1)	3A	
Total Credits			28
Junior			
CHEM 371	Fundamentals of Physical Chemistry		4
CHEM 372	Fundamentals of Physical Chemistry Lab	4A	1
In-depth Chemistry Courses (see list below)			4
Advanced Electives			3
Advanced Writing ³		2	3
Arts and Humanities		3B	3
Social and Behavioral Science		3C	3
Historical Perspectives		3D	3
Electives			6
Total Credits			30
Senior			
Select one course from the following:			2
CHEM 493	Senior Seminar	4C	
CHEM 499 ⁴	Senior Thesis	4C	
In-depth Chemistry Courses (see list below)			8
Advanced Electives (see list below)			12
Electives ⁵			10
Total Credits			32
Program Total Credits:			120

In-depth Chemistry Courses

- At least 5 credits must come from AUCC 4B designated courses: CHEM 431, CHEM 440, CHEM 445, CHEM 461, CHEM 462, CHEM 476, CHEM 477.

- At least 3 credits must come from laboratory course or lab components of lecture/laboratory courses: CHEM 431, CHEM 433, CHEM 440, CHEM 462, CHEM 477, or CHEM 498.

Code	Title	AUCC	Credits
CHEM 311	Introduction to Nanoscale Science		3
CHEM 315	Foundations of Polymer Chemistry		3
CHEM 320	Chemistry of Additions		3
CHEM 333	Forensic Chemistry		3
CHEM 338	Environmental Chemistry		3
CHEM 431	Instrumental Analysis	4B	4
CHEM 433	Clinical Chemistry		3
CHEM 440	Advanced Organic Chemistry Laboratory	4B	2
CHEM 445	Synthetic Organic Chemistry	4B	3
CHEM 448	Medicinal Chemistry		3
CHEM 461	Inorganic Chemistry	4B	3
CHEM 462	Inorganic Chemistry Laboratory	4B	2
CHEM 476	Physical Chemistry II	4B	3
CHEM 477	Advanced Physical Chemistry Laboratory	4B	1
CHEM 498	Research		1-3

Advanced Electives

Code	Title	Credits
ATS 350	Introduction to Weather and Climate	2
ATS 351	Introduction to Weather and Climate Lab	1
ERHS 320	Environmental Health–Water Quality	3
ERHS 332	Principles of Epidemiology	3
ERHS 400	Radiation Safety	3
ERHS 410	Environmental Health-Air and Waste Management	3
ERHS 430	Human Disease and the Environment	3
ERHS 446	Environmental Toxicology	3
ERHS 448	Environmental Contaminants	3
ERHS 450	Introduction to Radiation Biology	3

Major in Chemistry, Environmental Chemistry Concentration

Environmental chemistry is the application of chemical principles to the study of the natural environment, including air, water, land, and the biosphere. This concentration is recommended for students who wish to pursue a career in environmental management, or in the fundamental study of environmental systems. This concentration is also suitable for students planning to attend law or professional school or pursue graduate studies in environmental chemistry.

Chemistry majors in the environmental track are encouraged to participate in undergraduate research. Ample opportunities exist for undergraduate students to become involved in ground-breaking research in the laboratories of individual faculty members. Students have access to state-of-the-art equipment in faculty laboratories and the Analytical Resources Core facility, including NMR, FTIR, UV/Vis, fluorescence, mass spectrometers, vacuum lines, x-ray diffractometers, and many more. Undergraduate research is strongly encouraged for any student considering a career in chemistry, and many students complete supervised research for academic credit.

Learning Objectives

Upon successful completion, students will be able to:

1. Articulate the interconnected chemical processes, both naturally occurring and human caused, that shape the environment.
2. Develop and apply analytical skills to measure environmental chemical species and quantify their role in environmental chemistry.
3. Effectively communicate the results of the collection and analysis of data used in policy decisions for questions involving the air, food, soil, and water.
4. Apply interdisciplinary knowledge from biology, microbiology, statistics, and engineering to answer environmental questions.

Requirements Effective Spring 2024

Chemistry majors must achieve a minimum grade of C (2.000) in all the listed courses required for the major in chemistry.

Major in Chemistry, Forensic Chemistry Concentration

Forensic chemistry is the application of chemical analysis principles to criminal investigation. Students interested in pursuing careers in the laboratory analysis of forensic evidence or criminal investigation, attend law school, or study forensic science in graduate school are recommended to choose this concentration.

Chemistry majors in the forensic track are encouraged to participate in undergraduate research. Ample opportunities exist for undergraduate students to become involved in ground-breaking research in the laboratories of individual faculty members. Students have access to state-of-the-art equipment in faculty laboratories and the Analytical Resources Core facility, including NMR, FTIR, UV/Vis, fluorescence, mass spectrometers, vacuum lines, x-ray diffractometers, and many more. Undergraduate research is strongly encouraged for any student considering a career in chemistry, and many students complete supervised research for academic credit. Development of skills in all of

the aforementioned analytical techniques will enable graduates to pursue a forensic analyst or researcher career.

Learning Objectives

Upon successful completion, students will be able to:

1. Design chemical experiments to comprehensively investigate forensic samples.
2. Apply interdisciplinary knowledge from biology, microbiology, statistics, criminal justice, and anthropology to answer forensic and legal questions.

Requirements Effective Spring 2024

Chemistry majors must achieve a minimum grade of C (2.000) in all the listed courses required for the major in chemistry.

Major in Chemistry, Health Sciences Concentration

The health science concentration compliments a students' chemistry knowledge with content from biology, anatomy, physiology, and microbiology. This concentration is recommended for students who wish to pursue a career in the medical, veterinary, pharmacy, dentistry, and allied fields. The additional course work is designed to enable students to fulfill the prerequisite requirements for health sciences professional programs.

Chemistry majors in the health sciences concentration are encouraged to participate in undergraduate research. Ample opportunities exist for undergraduate students to become involved in ground-breaking research in the laboratories of individual faculty members. Students have access to state-of-the-art equipment in faculty laboratories and the Analytical Resources Core facility, including NMR, FTIR, UV/Vis, fluorescence, mass spectrometers, vacuum lines, x-ray diffractometers, and many more. Undergraduate research is strongly encouraged for any student considering a career in the sciences, and many students complete

supervised research for academic credit. Development of laboratory and research skills result in transferable skills that a graduate can apply towards a career in the health sciences.

Learning Objectives

Upon successful completion, students will be able to:

- 1. Identify the anatomical features of humans or domestic animals and define their physiological roles.
- 2. Articulate the role chemistry plays in disease and its treatment.
- 3. Apply interdisciplinary knowledge from chemistry and related fields (biology, microbiology, anatomy, physiology, and psychology) to problems and questions in the health sciences.

Requirements Effective Spring 2024

Chemistry majors must achieve a minimum grade of C (2.000) in all the listed courses required for the major in chemistry.

CHEM 498	Research		1-3

¹ Students who complete General Chemistry in Freshman year (CHEM 111 or CHEM 107, CHEM 112 or CHEM 108, CHEM 113, CHEM 114) do not have to take CHEM 120 and CHEM 121.

² Students may complete the organic chemistry requirement by taking CHEM 341, CHEM 343, and CHEM 344. Students who

take CHEM 245/CHEM 246 may complete the organic chemistry requirement by taking CHEM 343/CHEM 344. For both sets of these students, CHEM 343/CHEM 344 together count as an in-depth chemistry course.

³ CHEM 301 is recommended.

⁴ CHEM 499 by department approval. Students fulfilling the AUCC 4C requirement with CHEM 499 must write a thesis and present it to the department.

prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. CHEM 111 and CHEM 120 require Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam). Earned grades of C (2.000) or better are required in all listed courses for the major in chemistry. Students with credit for CHEM 111 CHEM 112, CHEM 113, CHEM 114 do not need to take CHEM 120, CHEM 121. Students with credit for CHEM 341, CHEM 343, CHEM 344 do not need to take CHEM 241, CHEM 242.

Major in Chemistry, Materials Concentration

Chemists study the atomic and molecular structure of physical matter and analyze how it changes. Materials chemists study large and/or extended materials without defined molecular bounds such as polymers and extended inorganic solids. More specifically, they investigate how atoms and molecules may be combined to create materials that can produce useful or improved products. They also develop methods to

measure materials properties such as strength and conductivity, enabling insight into a range of processes solar photo conversion, renewable plastics, energy storage, and drug delivery.

Chemistry majors are encouraged to participate in undergraduate research. Ample opportunities exist for undergraduate students to become involved in ground-breaking research in the laboratories of individual faculty members. Students have access to state-of-the-art equipment in faculty laboratories and the Central Instrument Facility including NMR, FTIR, UV/Vis, fluorescence, and mass spectrometers,

vacuum lines, x-ray diffractometers, and many more. Undergraduate research is strongly encouraged for any student considering a career in chemistry and many students complete supervised research for academic credit.

Learning Objectives

Upon successful completion, students will be able to:

1. Demonstrate rigorous in-depth skills and knowledge in materials chemistry, and at least one other sub-discipline.
2. Describe how the characterization and analysis of materials is distinct from molecular species.

3. Describe one or more applications of materials that cannot be accomplished by typical molecular species.
4. Demonstrate use and analysis of data acquired by one of the methods used to analyze material, such as scanning electron microscopy, transmission electron microscopy, wide-angle x-ray diffraction, small angle x-ray diffraction, and/or dynamic light scattering.

Requirements Effective Fall 2024

Chemistry majors must achieve a minimum grade of C (2.000) in all the listed courses required for the Major in Chemistry.

Major in Chemistry, Sustainable Chemistry Concentration

The sustainable chemistry concentration is recommended for students who wish to pursue a career in the interdisciplinary field of sustainability, including renewable energy, green materials, pollution control, and waste remediation. Because sustainability requires that chemists be well rounded, students will take courses that develop an understanding of the social, economic, and environmental pillars of sustainability as well as the intrinsic interconnectedness of these areas.

Chemistry majors in the sustainability track are encouraged to participate in undergraduate research. Ample opportunities exist for undergraduate students to become involved in ground-breaking research in the

laboratories of individual faculty members. Students have access to state-of-the-art equipment in faculty laboratories and the Analytical Resources Core facility, including NMR, FTIR, UV/Vis, fluorescence, and mass spectrometers, vacuum lines, x-ray diffractometers, and many more. Undergraduate research is strongly encouraged for any student considering a career in chemistry, and many students complete supervised research for academic credit. Development of skills in all of the aforementioned analytical techniques will enable graduates to pursue a consultant, educator, or researcher career.

Learning Objectives

Upon successful completion, students will be able to:

1. Describe the unintended consequences associated with the synthesis of compounds ranging from life-enhancing medicines to the materials of modern society.
2. Articulate the thought process used to develop safer, more energy and material efficient processes, including the recovery and conversion of waste to raw material—the principles of Green chemistry.
3. Effectively communicate the results of the collection and analysis of data used in policy decisions for questions involving the air, food, soil, and water.

Requirements Effective Spring 2024

Chemistry majors must achieve a minimum grade of C (2.000) in all the listed courses required for the major in chemistry.

¹ Students who complete General Chemistry Freshman year (CHEM 111 or CHEM 107, CHEM 112 or CHEM 108, CHEM 113, CHEM 114) do not have to take CHEM 120 and CHEM 121.

² Students may complete the organic chemistry requirement by taking CHEM 341, CHEM 343, and CHEM 344. Students who take CHEM 245/CHEM 246 may complete the organic chemistry requirement by taking CHEM 343/CHEM 344. For both sets of these students, CHEM 343/CHEM 344 together count as an in-depth chemistry course.

³ CHEM 301 is recommended.

⁴ CHEM 499 by department approval. Students fulfilling the AUCC 4C requirement with CHEM 499 must write a thesis and present it to the department.

⁵ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

TO PREPARE FOR FIRST SEMESTER: The curriculum for the new American Chemical Society Certified Chemistry major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. CHEM 111 and CHEM 120 require Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam). Earned grades of C (2.000) or better are required in all listed courses for the major in chemistry. Students with credit for CHEM 111, CHEM 112, CHEM 113, CHEM 114 do not need to take CHEM 120, CHEM 121. Students with credit for CHEM 341, CHEM 343, CHEM 344 do not need to take CHEM 241, CHEM 242.

Freshman

Semester 1		Critical	Recommended	AUCC	Credits
CHEM 120	Foundations of Modern Chemistry (GT-SC2)	X		3A	4
CHEM 121	Foundations of Modern Chemistry Laboratory (GT-SC1)	X		3A	1
CHEM 192	Introductory Seminar in Chemistry	X			2
CO 150	College Composition (GT-CO2)	X		1A	3
Select one course from the following:		X			3
AREC 202	Agricultural and Resource Economics (GT-SS1)			3C	
ECON 202	Principles of Microeconomics (GT-SS1)			3C	
Diversity, Equity, and Inclusion		X		1C	3

Minor in Chemistry

The Department of Chemistry offers a minor in Chemistry to interested students from other disciplines. A minor in Chemistry provides students the opportunity to land a job in the intersection of multiple fields, like veterinary technician, research associate, teacher, environmental coordinator, laboratory analyst, computational analyst, among other interdisciplinary careers. Pursuing a Chemistry minor is also a valuable asset to prepare for any professional or graduate degree.

Learning Objectives

Students will:

1. Increase their exposure to chemistry concepts and methods.
2. Gain valuable laboratory experience through laboratory courses.
3. Gain perspective about the role of chemistry in their given field.
4. Gain knowledge and skills that will help them to succeed in their chosen field and/or career.

Requirements

Effective Fall 2023

A minimum grade of C- is required in all of the courses required for the minor.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Code	Title	Credits
Lower Division		
Choose one group from the following:		9-10
Group A		
CHEM 111	General Chemistry I (GT-SC2)	
or CHEM 107	Fundamentals of Chemistry (GT-SC2)	
CHEM 112	General Chemistry Lab I (GT-SC1)	
or CHEM 108	Fundamentals of Chemistry Laboratory (GT-SC1)	
CHEM 113	General Chemistry II	
CHEM 114	General Chemistry Lab II	
Group B		
CHEM 120	Foundations of Modern Chemistry (GT-SC2)	

CHEM 121	Foundations of Modern Chemistry Laboratory (GT-SC1)	
CHEM 231	Foundations of Analytical Chemistry	
CHEM 232	Foundations of Analytical Chemistry Lab	
Upper Division		
Select a minimum of 15 credits from the following courses from at least two different areas of chemistry - analytical, biological, inorganic, organic, and physical; at least 12 credits must be upper-division courses (300-499). ^{1,2}		15
Analytical		
CHEM 231	Foundations of Analytical Chemistry	
CHEM 232	Foundations of Analytical Chemistry Lab	
CHEM 334	Quantitative Analysis Laboratory	
CHEM 335	Introduction to Analytical Chemistry	
CHEM 338	Environmental Chemistry	
CHEM 431	Instrumental Analysis	
CHEM 433	Clinical Chemistry	
Biological		
CHEM 320	Chemistry of Addictions	
CHEM 321	Foundations of Chemical Biology	
or BC 351	Principles of Biochemistry	
or BC 401	Comprehensive Biochemistry I	
or BC 403	Comprehensive Biochemistry II	
CHEM 322	Foundations of Chemical Biology Laboratory	
Inorganic		
CHEM 261	Fundamentals of Inorganic Chemistry	
CHEM 263	Foundations of Inorganic Chemistry	
CHEM 264	Foundations of Inorganic Chemistry Laboratory	
CHEM 311	Introduction to Nanoscale Science	
CHEM 461	Inorganic Chemistry	
CHEM 462	Inorganic Chemistry Laboratory	
Organic		
CHEM 241	Foundations of Organic Chemistry	
CHEM 242	Foundations of Organic Chemistry Laboratory	
CHEM 245	Fundamentals of Organic Chemistry	
CHEM 246	Fundamentals of Organic Chemistry Laboratory	
CHEM 341	Modern Organic Chemistry I	

CHEM 343	Modern Organic Chemistry II
CHEM 344	Modern Organic Chemistry Laboratory
CHEM 345	Organic Chemistry I
CHEM 346	Organic Chemistry II
CHEM 440	Advanced Organic Chemistry Laboratory
CHEM 445	Synthetic Organic Chemistry
Physical	
CHEM 371	Fundamentals of Physical Chemistry
CHEM 372	Fundamentals of Physical Chemistry Lab
CHEM 473	Foundations of Physical Chemistry
or BC 411	Physical Biochemistry
CHEM 474	Physical Chemistry I
CHEM 475	Physical Chemistry Laboratory I
CHEM 476	Physical Chemistry II
CHEM 477	Physical Chemistry Laboratory II

Program Total Credits: 24-25

¹ At least one of these courses must include a laboratory. No more than three of the 15 upper-division chemistry credits may be fulfilled by CHEM 301, CHEM 384, CHEM 487, CHEM 493, CHEM 495, or CHEM 498.

² The following courses may count as laboratory: CHEM 232, CHEM 242, CHEM 246, CHEM 264, CHEM 322, CHEM 334, CHEM 344, CHEM 345, CHEM 346, CHEM 372, CHEM 431, CHEM 433, CHEM 440, CHEM 462, CHEM 475, CHEM 477, CHEM 498 (up to three credits only).

Master of Science in Chemistry, Plan B

Requirements Effective Summer 2010

Code	Title	Credits
Graduate courses in chemistry and other disciplines ¹		12-15
CHEM 751	Methods of Chemistry Laboratory Instruction	1
CHEM 784	Supervised College Teaching	1
CHEM 793	Seminar	2
Electives		2-5
CHEM 698	Research ²	9
Program Total Credits:		30

A minimum of 30 credits are required to complete this program.

Additional Requirements

- Incoming students must demonstrate undergraduate proficiency in analytical, inorganic, organic, and physical chemistry by having received (at their undergraduate institution) or by receiving (upon matriculation at CSU) a B- in the appropriate undergraduate course(s) or by passing an exam in the aforementioned subjects administered by the chemistry department, or by any combination of these ways to demonstrate undergraduate proficiency in the four subjects.
- Students must pass 2 cumulative exams, or the equivalent³, which are given monthly 9 times each year, in no more than 12 attempts.

- Students must pass a faculty-refereed scientific presentation. Students may fulfill this requirement in one of three ways:

- Students may give a public seminar based on the scientific literature;
- Students may give a public seminar based on their thesis research;
- Students may pass the Preliminary Oral Exam for the Ph.D. degree.

¹ Select courses with advisor approval according to department guidelines.

² Up to 9 credits of CHEM 698 may be satisfied by CHEM 799.

³ See instructions available from the chemistry department.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website

12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Department of Computer Science

Office in Computer Science Building, Room 279

compsci.colostate.edu (<http://www.cs.colostate.edu>)

Professor Bruce Draper, Chair

Undergraduate Majors

- Major in Computer Science
 - Artificial Intelligence and Machine Learning Concentration
 - Computer Science Concentration
 - Computer Science Education Concentration
 - Computing for Creatives Concentration
 - Computing Systems Concentration
 - Human-Centered Computing Concentration
 - Networks and Security Concentration
 - Software Engineering Concentration

Minors

- Minor in Bioinformatics
- Minor in Computer Science
- Minor in Machine Learning

Change of Major Process

The Computer Science Department is a competitive major because we want students to be set up for success. To be eligible to declare the

Major in Computer Science, the Minor in Computer Science, or the Minor in Machine Learning, students must meet the following requirements:

- CSU GPA of 2.5 or greater
- 'C' or better in CS 162 or CS 163 or CS 164; and
- 'C' or better in CS 165 or MATH 156 or MATH 160

For more information, or to declare the Computer Science major or one of our minors, students should meet with a Computer Science advisor to discuss degree requirements, career opportunities, undergraduate research, department resources and policies. Visit the Computer Science Advising website (<https://compsci.colostate.edu/advising/>) for more information on how to schedule an appointment.

If a student does not meet the requirements yet, we encourage them to:

- Take the following courses to work towards the major/minor control requirements: CS 150B, CS 152, CS 162, CS 164, CS 165, CS 220.
- Participate in the Computer Science community through applicable Computer Science Department clubs.

Graduate Graduate Programs in Computer Science

The department offers Master of Science, Master of Computer Science, and Doctor of Philosophy degree programs in Computer Science. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Computer Science (<http://www.cs.colostate.edu>).

Master's Programs

- Master of Science in Computer Science, Plan A
- Master of Science in Computer Science, Plan B*
- Master of Computer Science, Plan C (M.C.S.)

Ph.D.

- Ph.D. in Computer Science*

* Please see department for program of study.

Courses

Subjects in this department include: Computer Science (CS) and Computing Technology (CT).

Computer Science (CS)

CS 110 Personal Computing Credits: 4 (3-3-0)

Course Description: Hardware/software concepts, Internet services, OS commands, electronic presentations, spreadsheets, databases, programming concepts.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both CS 110 and BUS 150. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 150A Culture and Coding: Java (GT-AH3) Credits: 3 (2-2-0)

Course Description: Survey of computer science, formal logic, and computational thinking. Explores the historical, gender, and cultural perspectives on the role of technology in society. Includes learning basic elements of the Java programming language. Write small programs, and construct written arguments on ways in which technology influences our modern culture. Previous computer science experience not necessary.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following: CS 150, CS 150A, or CS 150B.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Arts & Humanities 3B, Ways of Thinking (GT-AH3).

CS 150B Culture and Coding: Python (GT-AH3) Credits: 3 (2-2-0)

Course Description: Survey of computer science, formal logic, and computational thinking. Explores the historical, gender, and cultural perspectives on the role of technology in society. Includes learning basic elements of the Python programming language. Write small programs, and construct written arguments on ways in which technology influences our modern culture. Previous computer science experience not necessary.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following: CS 150, CS 150A, or CS 150B.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Arts & Humanities 3B, Ways of Thinking (GT-AH3).

CS 152 Python for STEM Credits: 2 (1-0-1)

Course Description: Introductory Python programming for students with no prior programming experience focusing on STEM disciplines. Topics include variables, types, operators, expressions, conditionals, loops, functions, lists, dictionaries, strings, file input/output, and modules. Programming is motivated with examples and assignments from various STEM fields.

Prerequisite: CS 163 or MATH 124 with a minimum grade of B or MATH 125 with a minimum grade of B or MATH 126 with a minimum grade of B or MATH 127 with a minimum grade of B or MATH 141 with a minimum grade of C or MATH 155 with a minimum grade of C or MATH 156 with a minimum grade of C or MATH 157 with a minimum grade of C or MATH 159 with a minimum grade of C or MATH 160 with a minimum grade of C.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CS 155 Introduction to Unix Credit: 1 (1-0-0)

Course Description: Unix shell commands, utilities (editors, sorting, file management), shell scripting.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CS 156 Introduction to C Programming I Credit: 1 (1-0-0)

Course Description: Basic elements of language structure, data types, expressions, program control flow and modularity.

Prerequisite: (CS 155, may be taken concurrently) and (MATH 118 or MATH 127).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CS 157 Introduction to C Programming II Credit: 1 (1-0-0)

Course Description: More basic design types, function usage and strings. Arrays, user-defined types and structures, enumerated types, recursion, dynamic storage allocation.

Prerequisite: (CS 156, may be taken concurrently) and (MATH 118 or MATH 127).

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CS 158 Mathematical Algorithms in C Credit: 1 (0-2-0)

Also Offered As: MATH 158.

Course Description: Compilers, expressions, variable types, control statements, pointers, logical statements, plotting, secant method, trapezoidal rule, recursion.

Prerequisite: MATH 151 and CS 156 and MATH 160.

Registration Information: Credit not allowed for both CS 158 and MATH 158.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 162 CS1--Introduction to Java Programming Credits: 2 (1-0-1)

Course Description: Introduction to java and object oriented programming concepts. Topics include variables, assignment, expressions, operators, Booleans, conditionals, characters and strings, loops, arrays, objects and classes, file input/output, interfaces, recursion, lists, and sorting. Covers four pillars of object oriented programming: Encapsulation, Abstraction, Inheritance, and Polymorphism. Assumes prior programming experience.

Prerequisite: CS 150B with a minimum grade of B or CS 152 with a minimum grade of B, may be taken concurrently or CS 163.

Registration Information: Must register for lecture and recitation. This is a partial semester course. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 163 CS1---No Prior Programming Experience Credits: 4 (3-2-0)

Course Description: Computer programming for students without previous programming experience. Topics include variables, assignment, expressions, operators, booleans, conditionals, characters and strings, control loops, arrays, objects and classes, file input/output, interfaces, recursion, lists, and sorting.

Prerequisite: CIS 240 with a minimum grade of C or CS 150A with a minimum grade of C or CS 150B with a minimum grade of C or CS 152 with a minimum grade of C or MATH 120 with a minimum grade of C or MATH 124 with a minimum grade of C or MATH 127 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following courses: CS 160, CS 163, or CS 164.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

CS 164 CS1--Computational Thinking with Java Credits: 4 (3-2-0)

Course Description: Learn computational thinking using Java as the primary language. Problem formulation and decomposition, data representation, and algorithmic design. Coding concepts include expressions, operators, Booleans, conditionals, characters and strings, loops, arrays, objects and classes, file input/output, interfaces, recursion, lists, and sorting. Covers four pillars of object oriented programming: Encapsulation, Abstraction, Inheritance, and Polymorphism.

Prerequisite: CIS 240 with a minimum grade of B or CS 150A with a minimum grade of B or CS 150B with a minimum grade of B or CS 152 with a minimum grade of B or CS 163.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 165 CS2--Data Structures Credits: 4 (3-2-0)

Course Description: Object oriented concepts, assertions, inheritance, polymorphism, algorithms and data structures using an object oriented language.

Prerequisite: CS 162 with a minimum grade of C or CS 163 with a minimum grade of C or CS 164 with a minimum grade of C or CIS 340 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit not allowed for both CS 165 and CS 200.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 192 First-Year Seminar-Computer Science Credit: 1 (0-0-1)

Course Description: Computer science as a field of study and a major program at CSU. Addresses career exploration, research experience opportunities, post-graduation planning, and building a skill base of successful academic strategies.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Freshman and sophomore Computer Science and Applied Computing Technology majors only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 201 Ethical Computing Systems (GT-AH3) Credits: 3 (3-0-0)

Also Offered As: PHIL 201.

Course Description: Survey of contemporary ethical issues in information technology and software development. Explore moral, social, and legal issues with information technology in the modern world. Construct arguments based on modern ethical issues, and issues explored through science fiction.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Arts & Humanities 3B, Ways of Thinking (GT-AH3).

CS 214 Software Development Credits: 3 (2-0-1)

Course Description: Development of large software systems. Design and enhance the features and quality of a large system while using tools for software engineering and project management.

Prerequisite: CS 165 with a minimum grade of C.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 220 Discrete Structures and their Applications Credits: 4 (3-0-1)

Course Description: Integer representations and properties, propositions, predicates, sets, functions, program proofs, induction, counting, complexity; Python implementations of these concepts.

Prerequisite: (CS 152 with a minimum grade of B or CS 162 with a minimum grade of C or CS 163 with a minimum grade of C or CS 164 with a minimum grade of C) and (MATH 155 or MATH 156 or MATH 159 or MATH 160).

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and recitation. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 250 Computer Systems Foundations Credits: 4 (3-0-1)

Course Description: Foundations of computer systems encompassing processors, networks, storage, and computing frameworks. Discussion of processors, cores, and co-processors (GPUs, TPUs). Speed differential across the memory hierarchy and the implications of caching. Data structures for storage systems. Overview of parallel and distributed computing frameworks. Future computing systems including neuromorphic computing.

Prerequisite: CS 162 with a minimum grade of C or CS 163 with a minimum grade of C or CS 164 with a minimum grade of C.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Must register for lecture and recitation. Sections may be offered: Online. Credit not allowed for both CS 250 and CS 280A1.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 253 Software Development with C++ Credits: 4 (3-0-1)

Course Description: Developing and modifying large software. Relating programming language to its machine implementation. C++ programming for experienced programmers.

Prerequisite: CS 165 with a minimum grade of C.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online. Credit not allowed for both CS 253 and CT 301.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 270 Computer Organization Credits: 4 (3-2-0)

Course Description: Data representation, arithmetic, assembly and C language, digital logic and systems, Boolean algebra, circuits, CPU and memory models, state machines.

Prerequisite: CS 163 with a minimum grade of C or CS 164 with a minimum grade of C.

Registration Information: Sophomore standing. Computer Science and Applied Computing Technology majors only. Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 295 Independent Study Credits: Var[1-4] (0-0-0)

Course Description: Investigation of special topics under direction of computer science faculty.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CS 310H Design Thinking Toolbox: Mixed Reality Design Credits: 3 (3-0-0)

Also Offered As: IDEA 310H.

Course Description: Introduction to topics in virtual and augmented reality. Learn how to create virtual (i.e., artificial) worlds using a game engine to provide hands-on experience and promote "iterative tinkering" through exploration of various design processes.

Prerequisite: CS 214 with a minimum grade of C or CS 253 with a minimum grade of C or IDEA 210.

Registration Information: Sophomore standing. Sections may be offered: Online. Credit not allowed for both CS 310H and IDEA 310H.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: Yes.

CS 312 Modern Web Applications Credits: 3 (2-2-0)

Course Description: Development of the modern web application. Emphasis on the essentials needed to create fully functional web applications including rich graphical content and dynamic content, using modern web standards. Explore service-based architecture, web UX design, asynchronous content delivery, and full-stack development.

Prerequisite: CIS 340 with a minimum grade of C or CS 165 with a minimum grade of C or JTC 370 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following: CIS 410, CS 312, or CT 310.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 314 Software Engineering Credits: 3 (3-0-0)

Course Description: Principles, concepts, and techniques associated with team-based development of large, complex software systems. Topics include teamwork, configuration management, project management, requirements engineering, and systematic testing techniques. Use software tools in the context of a Scrum-based Agile development project.

Prerequisite: CS 214 with a minimum grade of C or CS 253 with a minimum grade of C.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 320 Algorithms--Theory and Practice Credits: 3 (3-0-0)

Course Description: Analysis, design, implementation and applications of algorithms.

Prerequisite: (CS 220 with a minimum grade of C and CS 165 with a minimum grade of C) and (MATH 155 with a minimum grade of C or MATH 156 with a minimum grade of C or MATH 160 with a minimum grade of C) and (DSCI 369 with a minimum grade of C or MATH 229 with a minimum grade of C or MATH 369 with a minimum grade of C).

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 345 Machine Learning Foundations and Practice Credits: 3 (3-0-0)

Course Description: Machine learning algorithms and tools for predictive modeling presented using case studies that inform their use in real-world applications.

Prerequisite: (CS 220 with a minimum grade of C) and (CS 150B with a minimum grade of C or CS 152 with a minimum grade of C or CS 165 with a minimum grade of C or DSCI 235 with a minimum grade of C) and (MATH 155 with a minimum grade of C or MATH 156 with a minimum grade of C or MATH 159 with a minimum grade of C or MATH 160 with a minimum grade of C) and (STAT 301 with a minimum grade of C or STAT 302A with a minimum grade of C or ECE 303 with a minimum grade of C or STAT 303 with a minimum grade of C or STAT 307 with a minimum grade of C or STAT 315 with a minimum grade of C).

Registration Information: Sections may be offered: Online. Credit not allowed for both CS 345 and DSCI 445.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 356 Systems Security Credits: 3 (3-0-0)

Course Description: Computer and system security, authentication, access control, malicious software, and software security.

Prerequisite: CS 214 with a minimum grade of C or CS 253 with a minimum grade of C or CS 370 with a minimum grade of C.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 370 Operating Systems Credits: 3 (3-0-0)

Course Description: Introduction to operating systems including memory organization, I/O control, multitasking, process control, coordination, and resource management.

Prerequisite: (CS 165 with a minimum grade of C) and (CS 250 with a minimum grade of C or CS 270 with a minimum grade of C or ECE 251 with a minimum grade of C).

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 384 Supervised College Teaching Credits: Var[1-2] (0-0-0)

Course Description: Work closely with the professor of record on pedagogy for teaching computer science labs and recitations.

Prerequisite: None.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted toward graduation requirements.

Term Offered: Fall.

Grade Mode: Instructor Option.

Special Course Fee: No.

CS 410 Introduction to Computer Graphics Credits: 4 (3-2-0)

Course Description: Graphics hardware and software; drawing simple objects; coordinate transformations in 2D and 3D; modeling and viewing complex 2D and 3D objects.

Prerequisite: (CS 214 with a minimum grade of C or CS 253 with a minimum grade of C) and (DSCI 369 with a minimum grade of C or MATH 229 with a minimum grade of C or MATH 369 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 414 Object-Oriented Design Credits: 4 (3-3-0)

Course Description: Object-oriented methods for large-scale software systems. Software design for reuse using patterns. WWW applications in languages, e.g., Java.

Prerequisite: CS 314 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 415 Software Testing Credits: 4 (3-2-0)

Course Description: Systematic approaches to software testing, theoretical foundations, and the current state of practice. Techniques and tools that improve software testing and overall development skills.

Prerequisite: CS 314 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 420 Introduction to Analysis of Algorithms Credits: 4 (3-0-1)

Prerequisite: CS 320 with a minimum grade of C.

Grade Mode: Traditional.

Special Course Fee: No.

CS 422 Automata, Logic, and Computation Credits: 4 (3-2-0)

Course Description: Foundations for modeling and analysis of computational systems. Topics include finite-state automata, regular expressions, pushdown automata, context-free languages, Turing machines and decidability, reducibility, logical theories.

Prerequisite: CS 320 with a minimum grade of C or ECE 312 with a minimum grade of B or MATH 360 with a minimum grade of B or MATH 366 with a minimum grade of B.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit not allowed for both CS 422 and CS 480A4.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 425 Introduction to Bioinformatics Algorithms Credits: 4 (3-2-0)

Course Description: Algorithms for analysis of large scale biological data.

Prerequisite: (BZ 360 with a minimum grade of C or CS 320 with a minimum grade of C) and (CS 345 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 430 Database Systems Credits: 4 (3-2-0)

Course Description: Database analysis, design, administration, implementation, hierarchical, network relational models; data sublanguages; query facilities.

Prerequisite: CS 314 with a minimum grade of C or CS 370 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 435 Introduction to Big Data Credits: 4 (3-2-0)

Course Description: Fundamental issues in Big Data. Examine issues related to data organization, storage, retrieval, analysis and knowledge discovery at scale. Topics include large-scale data analysis, scalable computing frameworks, data storage systems, and semi-structured data models. Involves hands-on programming assignments and term project using real-world datasets.

Prerequisite: CS 320 with a minimum grade of C or CS 370 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 440 Introduction to Artificial Intelligence Credits: 4 (3-2-0)

Course Description: Concepts, representations, and algorithms for solving search, logical reasoning and machine learning problems.

Prerequisite: CS 320 with a minimum grade of C and CS 345 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 445 Introduction to Machine Learning Credits: 4 (3-2-0)

Course Description: Fundamental concepts and methods of computational data analysis, including pattern classification, prediction, visualization, and recent topics in deep learning.

Prerequisite: (CS 165 with a minimum grade of C) and (CS 345 with a minimum grade of C or DSCI 445 with a minimum grade of C and DSCI 235 with a minimum grade of C) and (DSCI 369 with a minimum grade of C or MATH 229 with a minimum grade of C or MATH 369 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit not allowed for both: CS 445 and CS 480A3.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 453 Introduction to Compiler Construction Credits: 4 (3-0-1)

Course Description: Functional components of a compiler: modules, interfaces, lexical and syntax analysis, error recovery, resource allocation, code generation.

Prerequisite: CS 314 with a minimum grade of C.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 454 Principles of Programming Languages Credits: 4 (3-3-0)

Course Description: Language design concepts; functional programming; interpreter support for environments, procedures, recursion, types, objects; language paradigms.

Prerequisite: CS 253 with a minimum grade of C and CS 320 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 455 Introduction to Distributed Systems Credits: 4 (3-2-0)

Course Description: Distributed systems including model of distributed computations; concurrency; thread pools and scalable servers; distributed mutual exclusion; cloud computing; distributed graph algorithms; data representation formats; atomic transactions; large-scale storage systems; distributed shared memory; and overlays.

Prerequisite: CS 370 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. CS majors and minors only. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 456 Modern CyberSecurity Credits: 4 (3-2-0)

Course Description: Contemporary cyber-security issues; techniques, programs, tools and methods for examining contemporary cyber-attacks and cyber-defenses.

Prerequisite: CS 356 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 457 Computer Networks and the Internet Credits: 4 (3-3-0)

Course Description: Principles of communications, local area networks, communication protocols, TCP/IP, and the Internet.

Prerequisite: (CS 214 with a minimum grade of C or CS 253 with a minimum grade of C) and (CS 370 with a minimum grade of C) and (STAT 301 with a minimum grade of C or STAT 303 with a minimum grade of C or ECE 303 with a minimum grade of C or STAT 307 with a minimum grade of C or ERHS 307 with a minimum grade of C or STAT 311 with a minimum grade of C or STAT 315 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 458 Blockchain Principles and Applications Credits: 4 (3-2-0)

Course Description: Presents various aspects of blockchain technology including distributed ledgers and consensus, internal mechanisms, smart contracts and DApps (distributed applications). Focus on Naivecoin, Bitcoin and Ethereum as case studies. Explore various application areas for blockchains including elections, supply chain management and others. Engage hands-on in the design, implementation and evaluation of DApps.

Prerequisite: CS 314 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit not allowed for both CS 458 and CS 481A3.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 462 Engaging in Virtual Worlds Credits: 4 (3-2-0)

Course Description: A hands-on introduction to the fundamental concepts and practices required to design, develop, and adapt virtual 3D worlds using mature, state-of-the-art tools. Basics of 3D modeling, scene construction, lighting, rendering, and properties; bringing objects into motion, characters to life, and interactions into the world.

Prerequisite: (CS 214 with a minimum grade of C or CS 253 with a minimum grade of C) and (DSCI 369 with a minimum grade of C or MATH 369 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 464 Principles of Human-Computer Interaction Credits: 4 (3-2-0)

Course Description: History and trends in human-computer interaction; user-centered design techniques; prototyping; experimental methods for the evaluation of technology.

Prerequisite: CS 214 with a minimum grade of C or CS 253 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 470 Computer Architecture Credits: 4 (3-2-0)

Course Description: Instruction set; hardwired, microprogramming; memory; arithmetic; I/O and buses; performance evaluation; pipelining, RISC.

Prerequisite: CS 370.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 475 Parallel Programming Credits: 4 (3-3-0)

Course Description: Parallel programming techniques for shared-memory and message-passing systems; process synchronization, communication; example languages.

Prerequisite: (CS 250 with a minimum grade of C or CS 270 with a minimum grade of C) and (CS 320 with a minimum grade of C and CT 301 with a minimum grade of C).

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 486 Practicum Credits: Var[1-4] (0-0-0)

Course Description: Supervised work experience in approved computer science setting with periodic consultation of faculty.

Prerequisite: None.

Registration Information: Maximum of 12 credits allowed for any combination of CS 486, CS 495.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CS 495 Independent Study Credits: Var[1-18] (0-0-0)

Prerequisite: None.

Grade Mode: Instructor Option.

Special Course Fee: No.

CS 498 Research Credits: Var[1-4] (0-0-0)

Prerequisite: None.

Grade Mode: Instructor Option.

Special Course Fee: No.

CS 501 Introduction to Research in Computer Science Credit: 1 (2-0-0)

Course Description: Develop the skills needed to effectively participate in graduate work (both orally and in writing) and learn how to successfully function in academic discourse communities. Participate in a number of rotations related to current research interests of department faculty, explore advanced research in the field, and develop skills to produce research.

Prerequisite: CS 314.

Restriction: Must be a: Graduate.

Registration Information: May be taken twice for credit. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

CS 510 Image Computation Credits: 4 (3-3-0)

Course Description: Image generation theory and implementation, image manipulation/interpretation. Ray tracing, geometric and photometric manipulation, image matching.

Prerequisite: CS 410.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 514 Software Product and Process Evaluation Credits: 4 (3-3-0)

Course Description: Software development process modeling and evaluation; software metrics, testing, verification, validation; experimental methods in software engineering.

Prerequisite: CS 414.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 515 Software Maintenance & Evolution Credits: 4 (3-2-0)

Course Description: Software maintenance fundamentals, software evolution principles, software properties and paradigms, software decay and aging, software change management, software quality, software refactoring, mining software repositories, defect prediction and effort estimation, and software documentation.

Prerequisite: CS 414.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and laboratory. Sections may be offered: Online. Credit not allowed for both CS 515 and CS 581A3.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 517 Software Specification and Design Credits: 4 (3-3-0)

Course Description: Rigorous techniques for modeling, specifying, and analyzing software requirements and designs; reusable software development.

Prerequisite: CS 414.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 518 Distributed Software System Development Credits: 4 (3-2-0)

Course Description: Principles of developing distributed systems; middleware technologies and techniques for building complex distributed component-based systems.

Prerequisite: CS 414.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 520 Analysis of Algorithms Credits: 4 (3-3-0)

Course Description: Asymptotic complexity, algorithm complexity, and problem complexity; the Master Method; parallel algorithms; algorithm design.

Prerequisite: CS 420.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 522 Foundations of Cyber-Physical Systems Credits: 4 (3-2-0)

Course Description: Principles of design, specification, modeling, and analysis of cyber-physical systems and software. Topics include model-based design, formal methods for specification and verification, and control theory.

Prerequisite: CS 320 or CS 420.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must register for lecture and laboratory. Credit not allowed for both CS 522 and CS 581A4.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 523 Foundations of Computation Credits: 4 (3-2-0)

Course Description: Foundations of modeling and analysis of computational systems; finite-state automata, regular expressions, pushdown automata, context-free languages, Turing machines and decidability, reducibility, and logical theories.

Prerequisite: CS 320 with a minimum grade of C or ECE 312 with a minimum grade of C or MATH 360 with a minimum grade of C or MATH 366 with a minimum grade of C.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following: CS 422, CS 480A4, CS 523, or CS 580A7.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 525 Bioinformatics Algorithms Credits: 4 (3-2-0)

Course Description: Computational methods for analysis of DNA/protein sequences and other biological data, including deep learning and other machine learning methods.

Prerequisite: (CS 320 with a minimum grade of C and CS 345 with a minimum grade of C) and (STAT 301 with a minimum grade of C or ECE 303 with a minimum grade of C or STAT 303 with a minimum grade of C or STAT 307 with a minimum grade of C or STAT 315 with a minimum grade of C) and (DSCI 369 with a minimum grade of C or MATH 369 with a minimum grade of C).

Restriction: .

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online. Credit not allowed for both CS 425 and CS 525.

Grade Mode: Traditional.

Special Course Fee: No.

CS 528 Embedded Systems and Machine Learning Credits: 4 (3-2-0)

Also Offered As: ECE 528.

Course Description: Machine learning for embedded computing systems; hardware/software optimizations for machine learning; hardware accelerators for deep learning; data reuse and sharing techniques; memory and network design for machine learning acceleration; anomaly detection and adversarial learning; advanced applications of machine learning in embedded applications.

Prerequisite: CS 250 with a minimum grade of C or CS 270 with a minimum grade of C or ECE 251 with a minimum grade of C.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following: CS 528, CS 581C1, ECE 528, or ECE 581C1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 530 Fault-Tolerant Computing Credits: 4 (3-3-0)

Course Description: Achieving high reliability and fault tolerance. Fault modeling, testing, reliability evaluation, redundancy, fault tolerance. (NT-0)

Prerequisite: CS 370.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 533 Database Management Systems Credits: 4 (3-2-0)

Course Description: Theory and implementation of concurrency control, recovery, and query processing as it applies to centralized and distributed systems.

Prerequisite: CS 430.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 535 Big Data Credits: 4 (3-3-0)

Course Description: Topics in scalable computing models, optimization algorithms, large-scale non-traditional data storage frameworks including graph, key-value, and column-family storage systems; data stream analysis; scalable prediction models and in-memory storage systems.

Prerequisite: CS 435 with a minimum grade of B.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 540 Artificial Intelligence Credits: 4 (3-3-0)

Course Description: Knowledge representation and reasoning, search, planning, evolutionary computation, data mining, information retrieval, intelligent Web, agent systems.

Prerequisite: CS 440.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 542 Natural Language Processing Credits: 4 (3-2-0)

Course Description: A survey of fundamental concepts, mathematical foundations, and algorithms in natural language processing and computational linguistics. Computational analysis of language data on all levels using methods that include finite state machines; n-gram language models; Bayesian, generative, and conditional models; hidden Markov models; statistical parsing; distributional semantics; and neural networks.

Prerequisite: CS 345 with a minimum grade of C.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 545 Machine Learning Credits: 4 (3-3-0)

Course Description: Computational methods that allow computers to learn; neural networks, decision trees, genetic algorithms, bagging and boosting.

Prerequisite: CS 440.

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 553 Algorithmic Language Compilers Credits: 4 (3-3-0)

Course Description: Compiler construction; lexical scanner generators, parser generators, dataflow analysis, optimization.

Prerequisite: CS 453.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 555 Distributed Systems Credits: 4 (3-2-0)

Course Description: Principles, paradigms, protocols and algorithms underlying modern distributed systems.

Prerequisite: CS 455.

Registration Information: Must register for lecture and laboratory.

Computer Science graduate students only. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 556 Computer Security Credits: 4 (3-2-0)

Course Description: Topics in computer security: concepts, threats, risks, access control models, trusted systems, cryptography, authentication.

Prerequisite: CS 356 or CS 455.

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 557 Advanced Networking Credits: 4 (3-3-0)

Course Description: Core internet protocols, including transport, routing, and security protocols. Protocol design principles. Network measurements and assessment.

Prerequisite: CS 457.

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 559 Quantitative Security Credits: 4 (3-2-0)

Course Description: Quantitative assessment of security risks in computing systems. Approaches involve data-based analysis of vulnerabilities, their exploitation, the impact of security breaches and the economy of risk-control measures.

Prerequisite: (CS 356 with a minimum grade of B) and (STAT 301 with a minimum grade of B or STAT 315 with a minimum grade of B).

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 560 Foundations of Fine-Grain Parallelism Credits: 4 (3-2-0)

Also Offered As: ECE 560.

Course Description: Programming novel architectures; performance tuning; automatic parallelization; program transformation; polyhedral model; equational programming.

Prerequisite: CS 475.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both CS 560 and ECE 560. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 561 Hardware/Software Design of Embedded Systems Credits: 4 (3-3-0)

Also Offered As: ECE 561.

Course Description: Embedded systems design including system level modeling, design space exploration, hardware-software partitioning, high level synthesis.

Prerequisite: CS 250 with a minimum grade of C or CS 270 with a minimum grade of C or CS 470 or ECE 251 with a minimum grade of C or ECE 452.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both CS 561 and ECE 561. Sections may be offered: Online.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

CS 567 3D User Interfaces Credits: 4 (3-2-0)

Course Description: Introduction to the theory of interaction design for 3D user interfaces (3DUI). Interaction (selection, manipulation, travel, and wayfinding), virtual environments, and application to 3DUI. Relevance of 3DUI principles to traditional displays, virtual reality, augmented reality, and mixed reality.

Prerequisite: None.

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 570 Advanced Computer Architecture Credits: 4 (3-3-0)

Course Description: Pipelined CPU design. Superscalar architectures and instruction-level parallelism. Cache and memory hierarchy design. Storage systems.

Prerequisite: CS 470.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 575 Parallel Processing Credits: 4 (3-3-0)

Course Description: Parallel and distributed computing models, algorithms, mapping and performance evaluations, parallel computing tools and applications.

Prerequisite: CS 475.

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

CS 612 Topics in Computer Graphics Credits: 4 (3-2-0)

Course Description: Computer graphics research topics.

Prerequisite: CS 510.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 614A Advanced Topics in Software Engineering: Specification and Design Credits: 4 (3-3-0)

Course Description:

Prerequisite: CS 514 or CS 517 or CS 518.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 614B Advanced Topics in Software Engineering: Testing and Verification Credits: 4 (3-3-0)

Course Description:

Prerequisite: CS 514 or CS 517 or CS 518.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 614C Advanced Topics in Software Engineering: Software Environments and Tools Credits: 4 (3-3-0)

Course Description:

Prerequisite: CS 514 or CS 517 or CS 518.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 614D Advanced Topics in Software Engineering: Software Measurement, Analysis, & Evaluation Credits: 4 (3-3-0)

Course Description:

Prerequisite: CS 514 or CS 517 or CS 518.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 614E Advanced Topics in Software Engineering: Application Domains Credits: 4 (3-3-0)

Course Description:

Prerequisite: CS 514 or CS 517 or CS 518.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 620 Advanced Topics in Algorithms Credits: 4 (3-2-0)

Course Description: Designing and analyzing algorithms and data structures; illustrations from a variety of problem domains.

Prerequisite: CS 520.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

CS 635 Advanced Fault-Tolerant Computing Credits: 4 (3-3-0)

Course Description: Advanced topics and recent developments in high reliability and fault-tolerant systems.

Prerequisite: CS 530.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 640 Advanced Artificial Intelligence I Credits: 2 (2-0-0)

Course Description: Research topics in artificial intelligence: genetic algorithms, neural networks, connectionist models; machine learning; planning, automated reasoning.

Prerequisite: CS 540.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 641 Advanced Artificial Intelligence II Credits: 2 (2-0-0)

Course Description: Advanced research topics in artificial intelligence.

Prerequisite: CS 640.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 645 Advanced Machine Learning: Neural Networks Credits: 4 (3-2-0)

Course Description: Study of machine learning research literature and implementations of algorithms for neural networks and reinforcement learning.

Prerequisite: CS 545 with a minimum grade of C.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 646 Machine Learning in Bioinformatics Credits: 4 (3-2-0)

Course Description: Recent research on the applications of machine learning in bioinformatics.

Prerequisite: CS 545 or STAT 560.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 653 Topics in Programming Language Implementation Credits: 4 (3-3-0)

Course Description: Data dependence analysis; code generation.

Prerequisite: CS 553.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 655 Advanced Topics in Distributed Systems Credits: 4 (3-2-0)

Course Description: Issues related to robustness, replication, consistency, scalability, isolation and privacy in large-scale distributed systems.

Prerequisite: CS 555.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 656A Advanced Topics in Computer Security: Formal Models of Computer Security Credits: 4 (3-2-0)

Course Description: Advanced research topics in computer security.

Prerequisite: CS 556.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 656B Advanced Topics in Computer Security: Models for Privacy and Application Security Credits: 4 (3-2-0)

Course Description: Advanced research topics in computer security.

Prerequisite: CS 556.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 656C Advanced Topics in Computer Security: Network Security Credits: 4 (3-2-0)

Course Description: Advanced research topics in computer security.

Prerequisite: CS 556.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 657 Advanced Topics in Computer Networking Credits: 4 (3-2-0)

Course Description: Advanced research topics in computer networks.

Prerequisite: CS 557.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

CS 658 Internet Engineering Credits: 4 (3-3-0)

Also Offered As: ECE 658.

Course Description: Link technologies, multiple access, hardware and software for internetworks routing, switching flow control, multicast, performance, and applications.

Prerequisite: CS 457 or ECE 456.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory.

Sections may be offered: Online. Credit not allowed for both ECE 658 and CS 658.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

CS 670B Topics in Architecture/Systems: Performance Evaluation and Modeling Credits: Var[1-4] (0-0-0)

Also Offered As: ECE 670B.

Course Description:

Prerequisite: CS 570 or ECE 554.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both CS 670B and ECE 670B.

Grade Mode: Traditional.

Special Course Fee: No.

CS 670C Topics in Architecture/Systems: Distributed Systems Credits: Var[1-4] (0-0-0)

Also Offered As: ECE 670C.

Course Description:

Prerequisite: CS 570 or ECE 554.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both CS 670C and ECE 670C.

Grade Mode: Traditional.

Special Course Fee: No.

CS 670D Topics in Architecture/Systems: Architecture of Advanced Systems Credits: Var[1-4] (0-0-0)

Also Offered As: ECE 670D.

Course Description:

Prerequisite: CS 570 or ECE 554.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both CS 670D and ECE 670D.

Grade Mode: Traditional.

Special Course Fee: No.

CS 675 Advanced Parallel Computing Credits: 4 (3-3-0)

Course Description: Parallel computing, computational models, parallel languages and algorithms, distributed simulation, Internet and mobile computing, parallel search.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor. Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

CS 692 Seminar Credits: Var[1-18] (0-0-0)**Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**CS 695 Independent Study Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**CS 696 Group Study Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**CS 699 Thesis Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**CS 787 Internship Credit: 1 (0-3-0)****Course Description:** Summer internship experience in computer science.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Term Offered:** Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**CS 793 Research Seminar in Computer Science Credits: 4 (0-0-4)****Course Description:** Research methods in specific areas of computer science.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Graduate standing in computer science.**Terms Offered:** Fall, Spring.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**CS 799 Dissertation Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

Computing Technology (CT)

CT 301 C++ Fundamentals Credits: 2 (1-0-1)**Course Description:** C++ syntax, memory management, file input/output, pointers, references, exceptions, and object-oriented programming in C++.**Prerequisite:** CS 162 with a minimum grade of C or CS 163 with a minimum grade of C or CS 164 with a minimum grade of C.**Registration Information:** Must register for lecture and recitation. Sections may be offered: Online. Credit not allowed for both CS 253 and CT 301.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**CT 320 Network and System Administration Credits: 4 (3-3-0)****Course Description:** Installation of network and operating system services, management and support; upgrades, security, backups.**Prerequisite:** CS 156 or CS 270.**Registration Information:** Must register for lecture and laboratory.**Term Offered:** Fall.**Grade Mode:** Traditional.**Special Course Fee:** No.

Major in Computer Science

Computer science is about creating innovative solutions to complex, real-world problems. Students in this major study step-by-step computational methods for solving problems by encoding, storing, tracking and transforming information. Computer science is much broader than just programming. It is informed by the theory and architecture of computing devices, and the tools and practices used to design and implement software.

The computer science major at CSU provides students a broad background in the field while simultaneously allowing students to focus on specific areas. We offer the following concentrations:

- Artificial Intelligence and Machine Learning
- Computer Science Education
- Computing for Creatives
- Computing Systems
- Human-Centered Computing
- Networks and Security
- Software Engineering
- General Computer Science

The department offers a wide range of specialized senior-level courses where students can explore in depth different areas of computer science including: big data, computer networks, distributed systems, artificial intelligence, machine learning, computational biology / bioinformatics, human-computer interaction, database systems, compilers, parallel programming, object oriented design, software testing, cybersecurity, blockchain, virtual worlds, and advanced topics in algorithms and theory of computer science.

Learning Objectives

Upon completing this program, students will be able to:

- Understand how to use the principles of computing to design and develop software and computing systems.
- Work effectively in teams to develop computational solutions to complex problems.
- Communicate technical ideas effectively in writing and verbally.
- Practice CS in an ethical and socially responsible manner, with an awareness of biases that can result from their indiscriminate use.
- Confidently pursue graduate studies or professional employment in the field of computer science.

Potential Occupations

Our computer science students and graduates are in high demand. Their proven performance attracts annual recruiting visits by industry, government agencies, and research laboratories. Internships are readily available to enhance students' skills and marketability.

Career opportunities for computer science graduates include:

Software developer, database programmer, computer systems analyst, network architect, web developer, information security analyst, data scientist, computer and information systems manager, IT project manager, cybersecurity analyst, UX designer, cloud engineer, systems architect, mobile application developer, and educator.

Major in Computer Science, Artificial Intelligence and Machine Learning Concentration

Artificial intelligence (AI) and machine learning (ML) are about creating intelligent systems – systems that perceive and respond to the world

around them. AI and ML systems are everywhere, in our cars and smartphones, and businesses of all sizes are investing in these areas.

The AI/ML concentration combines a rigorous computer science degree with coursework in AI, ML, and big data. This concentration also provides students the necessary foundational coursework and skills in math, statistics, and data science.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Develop AI and ML approaches for complex real-world problems.
2. Deploy high-performance computing tools for the analysis of large datasets.
3. Use a broad range of AI and ML tools, techniques, and algorithms.
4. Apply AI and ML tools in an ethical and socially responsible manner, with an awareness of biases that can result from their indiscriminate use.
5. Communicate results of complex analyses verbally and in writing using appropriate visualization techniques.
6. Confidently pursue graduate studies or professional employment in AI/ML and computer science.

Potential Occupations

In addition to the career opportunities open to all computer science graduates, the AI/ML concentration opens career paths that include:

Machine learning engineer, data scientist, business intelligence developer, big data engineer, data mining analyst, natural language processing analyst, computer vision engineer.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, DSCI, MATH, and STAT courses which are required for graduation .

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3
MATH 156 or 160 ¹	Mathematics for Computational Science I (GT-MA1) Calculus for Physical Scientists I (GT-MA1)	1B	4
Select one group from the following: ²			5-9
Group A:			
CS 150A or 150B	Culture and Coding: Java (GT-AH3) Culture and Coding: Python (GT-AH3)	3B	
CS 162 or 164	CS1–Introduction to Java Programming CS1–Computational Thinking with Java

CS 435	Introduction to Big Data		
CS 455	Introduction to Distributed Systems		
CS 475	Parallel Programming		
Additional Computer Science Course - select one course from the following:			4

CS 410	Introduction to Computer Graphics	
CS 425	Introduction to Bioinformatics Algorithms	
CS 430	Database Systems	
CS 435	Introduction to Big Data	
CS 440	Introduction to Artificial Intelligence	
CS 445	Introduction to Machine Learning	
CS 455	Introduction to Distributed Systems	
CS 462	Engaging in Virtual Worlds	
CS 464	Principles of Human-Computer Interaction	
CS 475	Parallel Programming	
Electives ⁴		14
Total Credits		30
Program Total Credits:		120

¹ MATH 156 is recommended for computer science majors who do not already have MATH 160 credit.

² Recommended sequence for most incoming students is Group A: CS 150B to CS 164.

³ CS 192 or other seminar course is a recommended elective for incoming first semester students.

⁴ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

To prepare for first semester: The curriculum for the Computer Science major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. All students must maintain a C (2.000) or better in CO 150 and in all CS, DSCI, MATH, and STAT courses which are required for graduation.

Freshman

Semester 1		Critical	Recommended	AUCC	Credits

Major in Computer Science, Computer Science Concentration

The Computer Science#general concentration is a broad program that prepares students for any introductory position in the computer science field and many other fields, including business, natural sciences, health, research, engineering, defense and more.

This concentration offers students options to customize their knowledge and skill set on top of core computer science concepts, allowing them to tailor their education to their passions. Students can focus on a specific research area (<https://compsci.colostate.edu/research/>) in their 400-level coursework or take a breadth focus – a little bit of everything – for a broader perspective. Students can also complete a second major or minor, producing a highly interdisciplinary degree.

This concentration allows students to build on multiple different skill sets from across the other concentrations. The knowledge, skill set and focus students create within this concentration varies depending on the courses taken.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Leverage teamwork to develop innovative, logical approaches to solving complex real-world problems.
2. Analyze and improve processes and outcomes.
3. Communicate technical skills verbally and in writing.
4. Confidently pursue graduate studies or professional employment in computer science.

Potential Occupations

This broad concentration is easily applicable to numerous industries and careers. Based on the courses chosen, potential occupations may be listed below, in other concentrations and as cross-disciplinary careers.

Potential occupations include: software engineer, mobile app developer, data scientist, big data engineer, machine learning engineer, virtual and augmented reality developer, cybersecurity analyst, bioinformatics engineer, computational chemist, mixed-reality artist, data journalist and many more.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, [DSCI](#), MATH, STAT and departmental Technology Focus Elective courses which are required for graduation.

Major in Computer Science, Computer Science Education Concentration

Computer science is the study of algorithms and software systems: their theory, analysis, design, efficiency, implementation, maintenance, and application. Computers Science Educators seek to advance the fundamental quality of computer science education by having a deeper understanding on how students learn combined with the complexities of the computational mindset that is developed through computer science.

Computer Science Education students will engage in coursework related to both computer science and education, and their intersection, the growing field of computer science education. Through course work, service learning, and student teaching, this degree will prepare students to enter the field as a K-12 teachers. Furthermore, this degree will serve as preparation for admission into advanced degree programs and college level teaching and research in the field of computer science education.

Course work includes the same core foundation expected of all computer science concentrations, and course work specific to computer science education and teaching standards including web development, software engineering, and networking.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Demonstrate proficiency in the areas of software design and development, computing systems, and algorithmic analysis. Students will have a thorough grounding in the key principles and practices of computing, and in the mathematical and scientific principles of computation.

2. Work effectively in groups to develop computational solutions to complex problems.
3. Communicate ideas effectively, both generally and specifically, with regard to technology and computing.
4. Demonstrate strong pedagogical practices related to education and computational thinking.
5. Develop lesson plans related to computer science with artifact generation and statistical analysis of artifacts and student performance.
6. Demonstrate the variety of fields in which computer science is applied, with direct knowledge in fields relating to the CO Standards for CS Education (algorithms, data structures, web development, networking and security).

Potential Occupations

Upon completing this program, students can either attend graduate school in computer science, find professional computer-related employment, or directly enter employment as K-12 computer science / technology education teachers.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (<http://www.cep.chhs.colostate.edu/>) and the School of Education for general information.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, DSCI, MATH, and STAT courses which are required for graduation.

Freshman

Major in Computer Science, Computing for Creatives Concentration

The Computing for Creatives Concentration is intended for students who seek to work at the interface of computer science and creative fields such as film, theater, art and design. The concentration combines the core computing curriculum with computationally-focused study in creative fields.

Learning Objectives

Upon successful completion, students will be able to:

1. Demonstrate proficiency in most core areas of computer science and have a thorough grounding in the key principles and practices of computing.

2. Utilize advanced computing skills to create artifacts such as art, film, games, and 3D simulations that interact with people visually and aurally.
3. Demonstrate design, narrative, and human factors skills required to create those artifacts.
4. Communicate ideas effectively, both generally and with regard to computing and technology.
5. Confidently pursue graduate studies or professional employment in both computer science and fields combining computing and the creative arts.

Requirements Effective Fall 2024

A minimum grade of C (2.000) is required in CO 150 and in all CS, [DSCI](#), MATH, STAT and IDEA courses which are required for graduation.

Major in Computer Science, Computing Systems Concentration

Computing systems are integrated devices that input, output, process, and store data and information. Computing systems encompass a wide range, from simple sensors and hardware components to phones, laptops, desktops, and entire data centers. Computing systems specialists are challenged to provide ever increasing levels of performance from these systems.

The Computing Systems concentration provides students the necessary tools to solve important and demanding systems problems at scale. Students will learn how to design and assess computer systems from a holistic perspective that encompasses distributed and parallel algorithms, big data, systems software, networking, compiler design, and artificial intelligence/machine learning.

Data is our most valuable resource. Large scale data are being generated by programs, sensors, and simulations. Drawing timely and effective insights from these data are at the heart of modern problems in computer science and society in general. The Computing Systems concentration includes courses that teach you how to accomplish this

goal, from storing, transporting, organizing, and extracting insights from data to expressing programs that execute in parallel and distributed environments encompassing hundreds of thousands of cores.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Design scalable systems for computational and data intensive problems.
2. Design distributed and parallel algorithms to analyze large data sets.
3. Leverage diverse computing architectures in support of problem solutions.
4. Program accelerators/coprocessors (e.g., for deep learning).
5. Confidently pursue graduate studies or professional employment in computer systems and computer science.

Potential Occupations

In addition to the career opportunities open to all computer science graduates, the Computing Systems concentration opens career paths that include:

Cloud applications designer, systems designer, data scientist, big data analyst, compiler designer, database specialist, and supercomputing applications specialist.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, DSCI, MATH, STAT and departmental Technical Elective courses which are required for graduation.

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3
MATH 156 or 160 ¹	Mathematics for Computational Science I (GT-MA1) Calculus for Physical Scientists I (GT-MA1)	1B	4
Select one group from the following: ²			5-9
Group A:			
CS 150A or 150B	Culture and Coding: Java (GT-AH3) Culture and Coding: Python (GT-AH3)	3B	
CS 162 or 164	CS1—Introduction to Java Programming CS1—Computational Thinking with Java

Major in Computer Science, Human-Centered Computing Concentration

Human-centered computing (HCC) focuses on developing tools that improve the relationship between people and technology so that people can concentrate on the problem rather than the technology. The ultimate goal of HCC is to make the computer invisible.

Human-centered computing involves designing, developing, and deploying human-centric computer systems. In this concentration students will learn techniques for human-computer interaction using gestures, mobile devices, large surfaces, and virtual environments. Students will also learn how to design and conduct human-subject experiments and understand the role of HCC in developing human-centric artificial intelligence systems. The concentration provides rich interdisciplinary training in computer vision, machine learning, design and psychology.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Design interactive systems using state-of-the-art HCC techniques.
2. Design and conduct human-subject experiments.
3. Build complex 3D worlds for user interaction (e.g., virtual and augmented reality).
4. Confidently pursue graduate studies or professional employment in HCC and computer science.

Potential Occupations

In addition to the career opportunities open to all computer science graduates, the HCC concentration opens career paths that include:

User experience designer, virtual and augmented reality developer, and human-centric developer for intelligent systems.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, [DSCI](#), MATH, STAT, and Technical Elective courses which are required for graduation.

Major in Computer Science, Networks and Security Concentration

Networks connect computers and other devices so they can share information. The Networks and Security concentration involves designing, building, and maintaining networks and protecting them from cyberattacks.

Network and security technology is vitally important to almost every modern field of human endeavor including biology, physics, agriculture, medicine, defense, and more.

There is explosive demand for professionals who can understand the underlying principles of networks and security, incorporate them into

products and practices, and provide defensive capabilities against cyber threats.

The Networks and Security concentration provides students core and elective courses on computer networking, systems security (including the latest trends and technologies in cyber-security), ethical hacking, operating systems, databases, and software. Students will develop fundamental skills in security architecture and analysis, cryptography, system vulnerabilities and attack vectors, malware analysis and defense, intrusion detection and protection, network architecture, engineering and network software development. The *CSU Cyber-Security Center of Excellence* expands upon these course offerings with lab equipment, research topics, and certification opportunities.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Work effectively in teams to develop computational solutions to complex problems.
2. Develop products and technologies that provide network/cyber-security solutions or incorporate these technologies into products that require security or network capabilities.
3. Analyze technologies and situations for cyber vulnerabilities to develop improvements to attack and defense methodologies.
4. Communicate technical ideas effectively in writing and verbally.
5. Confidently pursue graduate studies or professional employment in networks and security and computer science.

Potential Occupations

In addition to the career opportunities open to all computer science graduates, the networks and security concentration opens career paths that include:

Software developer, software architect, network security analyst, software project manager, computer systems security analyst, computer and information systems manager, and R&D jobs for both cyber-security attack and defense.

Employers in a wide range of fields recognize the need for network and cyber-security architecture and implementations within their domains, which creates R&D and management opportunities across a wide job market.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, DSCI, MATH, STAT and departmental Technical Elective courses which are required for graduation.

Freshman

Major in Computer Science, Software Engineering Concentration

Software engineering involves designing, implementing, and maintaining computer programs. Developing modern software systems requires more than programming skills and core computer science concepts. It requires software engineering skills, which are in high demand in the software industry.

The Software Engineering concentration focuses on the concepts, techniques, and tools necessary for software analysis, design, testing, maintenance, and teamwork. Courses will include hands-on work with the software engineering tools used in industry.

This concentration combines a rigorous computer science degree with courses in software design, software testing, project management, and system analysis and design.

Learning Objectives

Upon successfully completing this program, students will be able to:

1. Work effectively in teams to develop computational solutions to complex problems.
2. Communicate technical ideas effectively in writing and verbally.
3. Confidently pursue graduate studies or professional employment in software engineering and computer science.

Potential Occupations

In addition to the career opportunities open to all computer science graduates, the software engineering concentration opens career paths that include:

Software developer, software architect, full-stack developer, software project manager, database programmer, computer systems analyst, web developer, computer and information systems manager, UX designer, cloud engineer, and mobile application developer.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, CIS, DSCI, MATH, and STAT courses which are required for graduation.

Minor in Bioinformatics

At the intersection of biology and computer science, bioinformatics is the study of applying computational tools to collect and analyze complex biological data such as genomic sequences.

A minor in Bioinformatics will give students interested in biology a foundation in programming that will complement their biology backgrounds. In addition to programming, students will take basic courses in statistics and machine learning, leading up to coursework in bioinformatics.

Please contact a department advisor for more information.

Learning Objectives

Students successfully completing this program will be able to:

- 1. Retrieve and use genomics and protein data.
- 2. Perform computational analysis of biological data using existing software, informed by an algorithmic understanding of those tools.
- 3. Write custom programs to complement existing software.
- 4. Use bioinformatics databases and resources such as the National Center for Biotechnology Information (NCBI) and Uniprot.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of a C (2.000) is required in all courses required for the minor.

Select one course from the following:		2-3
CS 150B	Culture and Coding: Python (GT-AH3)	
CS 152	Python for STEM	
Select one course from the following:		3-4
BZ 110	Principles of Animal Biology (GT-SC2)	
BZ 120	Principles of Plant Biology (GT-SC1)	
LIFE 102	Attributes of Living Systems (GT-SC1)	
Select one course from the following:		2-4
CS 163	CS1—No Prior Programming Experience	
CS 164	CS1—Computational Thinking with Java	

DSCI 235	Data Wrangling	
Select one course from the following:		3
STAT 301	Introduction to Applied Statistical Methods	
STAT 303/ ECE 303	Introduction to Communications Principles	
STAT 307	Introduction to Biostatistics	
STAT 315	Intro to Theory and Practice of Statistics	
Program Total Credits:		29-33

Minor in Computer Science

Computer science and programming skills are in high demand in every field. Most jobs now require them.

A minor in Computer Science will give students a foundation in software development, programming, and computer and information theory. Students will begin with a gradual introduction to programming and data structures. Then students can take courses in an area of emphasis that complements their current degree.

This customized minor can significantly boost a student's career opportunities and success.

Computer Science has competitive entrance requirements. Please contact a department advisor for more information.

Learning Objectives

Students successfully completing this program will be able to:

- 1. Solve computational problems related to their primary field of study.
- 2. Design and implement software related to their programs of study.

Requirements Effective Fall 2023

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C (2.000) is required in all courses required for the minor.

Code	Title	Credits
Lower Division		
Select one course from the following:		2-4
CS 162	CS1—Introduction to Java Programming	
CS 163	CS1—No Prior Programming Experience	
CS 164	CS1—Computational Thinking with Java	
CS 165	CS2—Data Structures	4
Select one course from the following:		3-4
CS 214	Software Development	
CS 220	Discrete Structures and their Applications	
CS 250	Computer Systems Foundations	
CS 253	Software Development with C++	
CS 270	Computer Organization	
Upper Division		

CS***	Courses numbered 300- or above ¹	12
Program Total Credits:		21-24

¹ Excluding CS 480-499.

Minor in Machine Learning

Machine learning (ML) is the science of creating algorithms that learn from data. ML systems are everywhere, from cars and smartphones to various home devices. Businesses of all sizes are investing in ML technology. ML is also ubiquitous across the sciences: Many areas of science generate large amounts of data and rely on ML to assist in making new discoveries in fields ranging from particle physics to medicine.

The ML minor provides students a path that includes introductory and advanced machine learning courses along with the necessary foundational coursework and skills in computing, math, and statistics.

Computer Science has competitive entrance requirements. Please contact a department advisor for more information.

Learning Objectives

Upon successful completion of this program, students will be able to:

1. Develop ML approaches for complex real-world problems.
2. Use a broad range of ML tools, techniques, and algorithms.
3. Apply ML tools in an ethical and socially responsible manner, with an awareness of biases that can result from their indiscriminate use.
4. Communicate results of complex analyses using appropriate visualization techniques.

Requirements Effective Fall 2022

A minimum grade of C (2.000) is required in all courses required for the minor.

Additional coursework may be required due to prerequisites.

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Code	Title	Credits
CS 165	CS2--Data Structures	4
CS 220	Discrete Structures and their Applications	4
CS 345	Machine Learning Foundations and Practice	3
CS 445	Introduction to Machine Learning	4
Select one course from the following:		2-4
CS 162	CS1--Introduction to Java Programming	
CS 163	CS1--No Prior Programming Experience	
CS 164	CS1--Computational Thinking with Java	
Select one course from the following:		3-4
DSCI 369	Linear Algebra for Data Science	
MATH 369	Linear Algebra I	
Select one course from the following:		1-3
STAT 301	Introduction to Applied Statistical Methods	
STAT 302A	Statistics Supplement: General Applications	
STAT 303/ECE 303	Introduction to Communications Principles	
STAT 307	Introduction to Biostatistics	
STAT 315	Intro to Theory and Practice of Statistics	

Program Total Credits:

21-26

Master of Science in Computer Science, Plan A

The Master of Science in Computer Science, Plan A is a research-based degree which includes coursework, research, and a thesis. The degree is appropriate for students who intend to go on to work in computer science research and development for industry or government, or those seeking more advanced research training in a computer science Ph.D. program.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Requirements Effective Fall 2010

At least 35 credits of graduate course work, including up to 8 credits of CS 699.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee

11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website
13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Computer Science, Plan C (M.C.S.)

The Master of Computer Science, Plan C degree is a professional (non-research) degree consisting of coursework only. This degree is intended for students desiring an advanced credential in computer science to enhance their technical abilities and knowledge of state-of-the-art computer science principles to apply as software engineers in organizational settings (industry, government, etc.).

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Requirements Effective Fall 2010

A total of 35 semester hours in lecture and laboratory courses are required for graduation. At least 20 of these credits must be in computer sciences courses at the 500-level or above (graduate level courses). No independent study credits of any kind will be accepted toward meeting the 35 hour requirement.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

13. Submit a signed Thesis/Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Department of Mathematics

Office in Weber Building, Room 101
(970) 491-1303
[math.colostate.edu](http://www.math.colostate.edu) (<http://www.math.colostate.edu>)

Professor Alexander Hulpke, Chair

Undergraduate Majors

- Major in Mathematics
 - Actuarial Science Concentration
 - Applied Mathematics Concentration
 - Computational Mathematics Concentration
 - General Mathematics Concentration
 - Mathematics Education Concentration

Minors

- Minor in Mathematics
- Minor in Mathematical Biology

Graduate Graduate Programs in Mathematics

The department offers the Master of Science and Doctor of Philosophy degrees with programs in pure and applied mathematics. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Mathematics (<http://www.math.colostate.edu>).

Master's Programs

- Master of Science in Mathematics, Plan A*
- Master of Science in Mathematics, Plan B*

Ph.D.

- Ph.D. in Mathematics*

* Please see department for program of study.

Courses

Mathematics (MATH)

MATH 101 Math in the Social Sciences (GT-MA1) Credits: 3 (2-2-0)

Course Description: Voting theory, power indices, fair division, apportionment, circuits and trees, list processing, descriptive statistics, probability.

Prerequisite: None.

Registration Information: Does not satisfy the prerequisite for MATH 117. Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 105 Patterns of Phenomena (GT-MA1) Credits: 3 (2-0-1)

Course Description: Applications of mathematical ideas and mode of thought in the arts and humanities, focusing on classification, recognition.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 116 Precalculus Supplement for Success in Math Credit: 1 (1-0-0)

Course Description: Supplemental academic instruction developing skills to succeed in precalculus courses and future mathematics and STEM courses.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Concurrent registration in face-to-face section of MATH 117 and MATH 118. Approval by department representative required.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 117 College Algebra in Context I (GT-MA1) Credit: 1 (1-0-0)

Course Description: Functions as mathematical models. Linear, quadratic, and polynomial functions considered symbolically, graphically, numerically, and contextually.

Prerequisite: None.

Registration Information: Math Placement Tool or ELM Tutorial required. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 118 College Algebra in Context II (GT-MA1) Credit: 1 (1-0-0)

Course Description: Reciprocals of linear functions, rational functions, and power functions considered symbolically, graphically, numerically, and contextually.

Prerequisite: MATH 117, may be taken concurrently.

Registration Information: MATH 117 or Math Placement Tool required. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 120 College Algebra (GT-MA1) Credits: 3 (3-0-0)

Course Description: Examine ideas of quantity, variable, rate of change, and formula. Develop meaningful formulas and graphs to represent the patterns (linear, quadratic, exponential) of how two quantities change together, and develop and interpret function formulas and graphs to represent quantitative relationships in applied contexts.

Prerequisite: None.

Registration Information: Math Placement Tool or ELM Tutorial required. Credit allowed for only one of the following: MATH 120, MATH 124, or MATH 127.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 124 Logarithmic and Exponential Functions (GT-MA1) Credit: 1 (1-0-0)

Course Description: Definition and graphs of exponential and logarithmic functions, properties of logarithmic functions, exponential and logarithmic equations, applications.

Prerequisite: MATH 118, may be taken concurrently.

Registration Information: MATH 118 or Math Placement Tool required. Sections may be offered: Online. Credit not allowed for both MATH 120 and MATH 124.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 125 Numerical Trigonometry (GT-MA1) Credit: 1 (1-0-0)

Course Description: Definition and graphs of trigonometric functions, laws of sines and cosines, solutions of right and oblique triangles, applications.

Prerequisite: MATH 118, may be taken concurrently or MATH 120.

Registration Information: MATH 118 or Math Placement Tool required. Sections may be offered: Online. Credit not allowed for both MATH 125 and MATH 127.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 126 Analytic Trigonometry (GT-MA1) Credit: 1 (1-0-0)

Course Description: Inverse trigonometric functions, trigonometric identities, solving trigonometric equations.

Prerequisite: MATH 125, may be taken concurrently.

Registration Information: MATH 125 or Math Placement Tool required. Sections may be offered: Online. Credit not allowed for both MATH 126 and MATH 127.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 127 Precalculus (GT-MA1) Credits: 4 (4-0-0)

Course Description: Examine ideas of quantity, variable, rate of change, and formula that are necessary for succeeding in and learning precalculus and calculus. Develop meaningful formulas and graphs to represent the patterns (linear, quadratic, exponential, trigonometric) of how two quantities change together, and develop and interpret function formulas and graphs to represent quantitative relationships in applied contexts.

Prerequisite: None.

Registration Information: Math Placement Tool or ELM Tutorial required. Credit allowed for only one of the following: MATH 120, MATH 125, MATH 126, or MATH 127.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 141 Calculus in Management Sciences (GT-MA1) Credits: 3 (3-0-0)

Course Description: Analytic geometry, limits, equilibrium of supply and demand, differentiation, integration, applications of the derivative, integral.

Prerequisite: MATH 118.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following courses: MATH 141, MATH 155, MATH 159, or MATH 160.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 151 Mathematical Algorithms in Matlab I Credit: 1 (0-2-0)

Course Description: Statements, expressions and variable assignments, scripts, control statements and logical statements. Newton's method, Simpson's rule, recursion.

Prerequisite: MATH 141 or MATH 155 or MATH 160.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 152 Mathematical Algorithms in Maple Credit: 1 (0-2-0)

Course Description: Iteration and recursion, control and logical statements, expressions, functions, data types, binary numbers, symbolic manipulation of terms.

Prerequisite: MATH 141 or MATH 155 or MATH 160.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 155 Calculus for Biological Scientists I (GT-MA1) Credits: 4 (4-0-0)

Course Description: Limits, continuity, differentiation, and integration of elementary functions with applications in the biosciences.

Prerequisite: None.

Registration Information: MATH 124; MATH 125 or MATH 127. Credit allowed for only one of the following courses: MATH 141, MATH 155, MATH 159, or MATH 160. Programmable graphing calculator required.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 156 Mathematics for Computational Science I (GT-MA1) Credits: 4 (4-0-0)

Course Description: Sets; relations; number systems; functions; sequences and series; concepts of differential and integral calculus as relevant to computational science.

Prerequisite: None.

Registration Information: MATH 124 with a B- or better; MATH 126 with a B- or better or MATH 127 with a B- or better. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 157 One Year Calculus IA (GT-MA1) Credits: 3 (3-0-0)

Course Description: Algebra and trigonometry, study skills for calculus. Limits, continuity, differentiation of elementary functions with applications.

Prerequisite: None.

Registration Information: MATH 118; MATH 124 or concurrent registration; MATH 125; MATH 126 or concurrent registration or MATH 127.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 158 Mathematical Algorithms in C Credit: 1 (0-2-0)

Also Offered As: CS 158.

Course Description: Compilers, expressions, variable types, control statements, pointers, logical statements, plotting, secant method, trapezoidal rule, recursion.

Prerequisite: MATH 151 and CS 156 and MATH 160.

Registration Information: Credit not allowed for both MATH 158 and CS 158.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 159 One Year Calculus IB (GT-MA1) Credits: 3 (3-0-0)

Course Description: Study skills for calculus. Differentiation and integration of elementary functions with applications. Conic section.

Prerequisite: None.

Registration Information: MATH 124; MATH 126; MATH 157 or MATH 127; MATH 157. Credit allowed for only one of the following: MATH 141, MATH 155, MATH 159, or MATH 160.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 160 Calculus for Physical Scientists I (GT-MA1) Credits: 4 (3-2-0)

Course Description: Limits, continuity, differentiation and integration of elementary functions with applications.

Prerequisite: None.

Registration Information: MATH 124 with a B- or better; MATH 126 with a B- or better or MATH 127 with a B- or better. Must register for lecture and laboratory. Sections may be offered: Online. Credit allowed for only one of the following courses: MATH 141, MATH 155, MATH 159 or MATH 160.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 161 Calculus for Physical Scientists II (GT-MA1) Credits: 4 (3-2-0)

Course Description: Transcendental functions, integration techniques, polar coordinates, sequences and series, with mathematical software.

Prerequisite: (MATH 124 or MATH 127) and (MATH 159 or MATH 160).

Registration Information: Must register for lecture and laboratory. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

MATH 192 First Year Seminar in Mathematical Sciences Credit: 1 (0-0-1)

Course Description: Introduction to the richness and variety of problems addressed by mathematical language and techniques; resources and available careers.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 229 Matrices and Linear Equations Credits: 2 (2-0-0)

Course Description: Linear systems, matrix arithmetic, homogeneous coordinates, complex numbers, eigenvalues, eigenvectors, applications to discrete dynamical systems.

Prerequisite: MATH 141 or MATH 155 or MATH 160.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 230 Discrete Mathematics for Educators Credits: 3 (2-2-0)

Course Description: Voting theory, fair division, graph theory, linear programming, probability, teaching in small groups, proof techniques, mathematical technology.

Prerequisite: MATH 161 and EDUC 275, may be taken concurrently.

Registration Information: Credit not allowed for both MATH 230 and MATH 330.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 235 Introduction to Mathematical Reasoning Credits: 2 (2-0-0)

Course Description: Mathematical statements and proof techniques, induction, set theory, inequalities, number systems, functions.

Prerequisite: MATH 156 or MATH 161 or MATH 271.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 255 Calculus for Biological Scientists II Credits: 4 (4-0-0)

Course Description: Derivatives and integrals of functions of several variables, differential and difference equations, matrices, applications in the biosciences.

Prerequisite: (MATH 126, may be taken concurrently or MATH 127, may be taken concurrently) and (MATH 155).

Registration Information: Credit not allowed for both MATH 255 and MATH 261. Programmable graphing calculator required.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B.

MATH 256 Mathematics for Computational Science II Credits: 4 (4-0-0)

Course Description: Methods from vector calculus, advanced calculus, and analytic geometry as relevant to machine learning and data science. Optimization.

Prerequisite: (MATH 156 or MATH 161) and (DSCI 369 or MATH 369).

Registration Information: Sections may be offered: Online. Credit not allowed for both MATH 256 and MATH 281A2.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 261 Calculus for Physical Scientists III Credits: 4 (4-0-0)

Course Description: Vector functions, partial differentiation, cylindrical and spherical coordinates, multiple integrals, line integrals, Green's theorem.

Prerequisite: MATH 161.

Registration Information: Sections may be offered: Online. Credit not allowed for both MATH 255 and MATH 261.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 269 Geometric Introduction to Linear Algebra Credits: 2 (2-0-0)

Course Description: A first introduction to linear algebra with a geometric rather than a computational approach.

Prerequisite: MATH 117 or MATH 120 or MATH 127.

Restriction: Must be a: Undergraduate.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 271 Applied Mathematics for Chemists I Credits: 4 (4-0-0)

Course Description: Series and limits, Taylor series, complex variables, first- and second- order ordinary differential equations, matrices, linear transformations, determinants, and eigenvalues.

Prerequisite: MATH 155 or MATH 159 or MATH 160.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 272 Applied Mathematics for Chemists II Credits: 4 (4-0-0)

Course Description: Vector fields, partial differentiation, cylindrical and spherical coordinates, multiple integrals, line integrals, the Wave and the Schrödinger equations, separation of variables method. Inner Product Spaces. Fourier Series.

Prerequisite: MATH 271.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 301 Introduction to Combinatorial Theory Credits: 3 (3-0-0)

Course Description: Counting problems; binomial coefficients; proof techniques in combinatorics; recurrence relations and generating functions; graph theory, including walks, trees, and planar graphs.

Prerequisite: MATH 161.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 317 Advanced Calculus of One Variable Credits: 3 (3-0-0)

Course Description: Convergence of sequences, series: limits, continuity, differentiation, integration of one-variable functions.

Prerequisite: (MATH 156 or MATH 161) and (CS 220 or MATH 230 or MATH 235).

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 331 Introduction to Mathematical Modeling Credits: 3 (3-0-0)

Course Description: Problem formulation. Modeling, theoretical and empirical. Variable selection. Derivation and simulation of solutions. Model testing including prediction.

Prerequisite: (MATH 161) and (DSCI 369, may be taken concurrently or MATH 369, may be taken concurrently).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 332 Partial Differential Equations Credits: 3 (3-0-0)

Course Description: Partial differential equations, separation of variables, Fourier series and transforms, Laplace, heat and wave equations.

Prerequisite: MATH 340 or MATH 345.

Registration Information: Credit not allowed for both MATH 332 and MATH 530.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 340 Intro to Ordinary Differential Equations Credits: 4 (3-2-0)

Course Description: First and second order equations, series, Laplace transforms, linear algebra, eigenvalues, first order systems of equations, numerical techniques.

Prerequisite: MATH 255 or MATH 261.

Registration Information: Sections may be offered: Online. Must register for lecture and laboratory. Credit not allowed for both MATH 340 and MATH 345.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 345 Differential Equations Credits: 4 (3-2-0)

Course Description: First and second order equations, LaPlace transforms, first order systems of equations, numerical methods, applied linear algebra, linearization.

Prerequisite: (MATH 255 or MATH 261) and (DSCI 369 or MATH 369).

Registration Information: Must register for lecture and laboratory. Credit not allowed for both MATH 340 and MATH 345.

Terms Offered: Fall, Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 348 Theory of Population and Evolutionary Ecology Credits: 4 (3-3-0)

Also Offered As: BZ 348.

Course Description: Principles and methods for building, analyzing, and interpreting mathematical models of ecological and evolutionary problems in biology.

Prerequisite: MATH 155 or MATH 160.

Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: BZ 348, BZ 548, MATH 348.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 360 Mathematics of Information Security Credits: 3 (3-0-0)

Course Description: Codes, ciphers, Chinese remainder theorem, primality testing, public key ciphers, RSA, finite fields, discrete algorithms, AES encryption.

Prerequisite: (MATH 156 or MATH 161) and (CS 220 or MATH 235).

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 366 Introduction to Abstract Algebra Credits: 3 (3-0-0)

Course Description: Sets, integers, polynomials, real and complex numbers, groups, integral domains, and fields; development of skills for proving theorems.

Prerequisite: MATH 156 or MATH 161 or MATH 271.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 369 Linear Algebra I Credits: 3 (3-0-0)

Course Description: Linear systems, matrices, subspaces of Euclidean spaces, linear transformations on Euclidean spaces, eigenvalues, eigenvectors.

Prerequisite: MATH 156 or MATH 161 or MATH 255 or MATH 271.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 384 Supervised College Teaching Credit: 1 (1-0-0)

Course Description: Skills for effective tutoring of precalculus mathematics; design and implementation of the Individualized Mathematics Program.

Prerequisite: None.

Registration Information: Written consent of instructor. May not be used to satisfy Mathematics degree requirements. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 405 Introduction to Number Theory Credits: 3 (3-0-0)

Course Description: Diophantine equations; distribution of primes; multiplicative functions; finite fields; quadratic reciprocity; quadratic number fields.

Prerequisite: MATH 360 or MATH 366.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 417 Advanced Calculus I Credits: 3 (3-0-0)

Course Description: Topology of Euclidean spaces, limits, derivatives and integrals on Euclidean spaces. Implicit functions and the implicit function theorem.

Prerequisite: (MATH 317) and (DSCI 369 or MATH 369).

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 418 Advanced Calculus II Credits: 3 (3-0-0)

Course Description: Line and surface integrals, series, sequences and series of functions.

Prerequisite: MATH 417.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 419 Introduction to Complex Variables Credits: 3 (3-0-0)

Course Description: Analyticity, Cauchy integral theorem and formula, Taylor and Laurent series, residue calculus, conformal mapping and harmonic functions.

Prerequisite: MATH 261.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 425 History of Mathematics Credits: 3 (3-0-0)

Course Description: Historical development of geometry, arithmetic, algebra, and calculus from ancient times to 20th century.

Prerequisite: (EDUC 331) and (DSCI 369 and MATH 317 or DSCI 369 and MATH 366 or MATH 317 and MATH 366 or MATH 317 and MATH 369 or MATH 366 and MATH 369).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 430 Fourier and Wavelet Analysis with Apps Credits: 3 (3-0-0)

Also Offered As: ECE 430.

Course Description: Fourier analysis and transforms, FFTs; sampling theorems, computational algorithms; wavelets; applications to communication, imaging, and compression.

Prerequisite: MATH 340 or MATH 345.

Registration Information: Credit not allowed for both ECE 430 and MATH 430.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 435 Projects in Applied Mathematics Credits: 3 (1-4-0)

Course Description: Open-ended projects with emphasis on problem identification and formulation, team approach, and reporting results.

Prerequisite: (CS 150A or CS 150B or CS 152 or CS 163 or CS 164 or CS 165 or CS 253 or MATH 151) and (DSCI 369 or MATH 369) and (MATH 340 or MATH 345).

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 450 Introduction to Numerical Analysis I Credits: 3 (3-0-0)

Course Description: Solutions of systems of linear and nonlinear equations, interpolation, approximation.

Prerequisite: (CS 150A or CS 150B or CS 152 or CS 163 or CS 164 or CS 165 or CS 253 or MATH 151) and (MATH 255 or MATH 261).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 451 Introduction to Numerical Analysis II Credits: 3 (3-0-0)

Course Description: Numerical computation of eigenvalues, numerical solution of ordinary and partial differential equations.

Prerequisite: (CS 150A or CS 150B or CS 152 or CS 163 or CS 164 or CS 165 or CS 253 or MATH 151) and (MATH 340 or MATH 345).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 455 Mathematics in Biology and Medicine Credits: 3 (3-0-0)

Course Description: Models in population biology, cell division, host-parasoid systems, bacterial growth and predator-prey systems.

Prerequisite: BZ 348 or MATH 255 or MATH 340 or MATH 345 or MATH 348.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 460 Information and Coding Theory Credits: 3 (3-0-0)

Course Description: Entropy, mutual information, channel capacity, channel coding theorem, syndrome decoding, BCH codes, recent developments.

Prerequisite: (MATH 360 or MATH 366) and (DSCI 369 or MATH 369).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 463 Post-Quantum Cryptography Credits: 3 (3-0-0)

Course Description: Exploration of secure communication in an environment where an adversary has a quantum computer. Survey of known quantum attacks on classical public key cryptosystems, and a detailed study of some of the leading candidates for quantum-resistant protocols.

Prerequisite: (MATH 161) and (DSCI 369 or MATH 369).

Registration Information: Credit not allowed for both MATH 463 and MATH 480A1.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 466 Abstract Algebra I Credits: 3 (3-0-0)

Course Description: Comprehensive introduction to groups, rings, and fields.

Prerequisite: MATH 235 or MATH 360 or MATH 366.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 467 Abstract Algebra II Credits: 3 (3-0-0)

Course Description: Advanced topics in abstract algebra: Euclidean domains, abstract vector spaces, extension fields, Galois theory.

Prerequisite: (DSCI 369, may be taken concurrently or MATH 369, may be taken concurrently) and (MATH 466).

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 469 Linear Algebra II Credits: 3 (3-0-0)

Course Description: Abstract vector spaces, general theory of linear transformations, theory of determinants, canonical forms.

Prerequisite: (MATH 161) and (DSCI 369 or MATH 369).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 470 Euclidean and Non-Euclidean Geometry Credits: 3 (3-0-0)

Course Description: Topics from real Euclidean, affine metric and non-Euclidean geometries emphasizing methods and connections with other areas of mathematics.

Prerequisite: (MATH 261) and (DSCI 369 or MATH 369).

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 472 Introduction to Topology Credits: 3 (3-0-0)

Course Description: Topologies on sets, continuous functions, homeomorphisms. Sequences and convergence, metric spaces, connectedness, path-connectedness. Separation properties. Compactness, Countability axioms.

Prerequisite: MATH 317.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 474 Introduction to Differential Geometry Credits: 3 (3-0-0)

Course Description: Local and global geometry of curves and surfaces in Euclidean space, curvature, covariant differentiation, geodesics and the Gauss-Bonnet theorem.

Prerequisite: (MATH 261) and (DSCI 369 or MATH 369).

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 476 Topics in Mathematics Credits: 3 (3-0-0)

Course Description: Study experiences which deal with established content areas in mathematics.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 484 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 487 Internship Credits: Var[1-16] (0-0-0)

Course Description: A work-learn experience integrating classroom theory with practical experience.

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 495 Independent Study Credits: Var[1-18] (0-0-0)

Prerequisite: None.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 498 Undergraduate Research in Mathematics Credits: Var[1-3] (0-0-0)

Prerequisite: None.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 501 Combinatorics I Credits: 3 (3-0-0)

Course Description: Puzzles, numbers and counting, subsets, recurrence relations, generating functions, inversion, counting with symmetry, networks, matchings.

Prerequisite: (MATH 301) and (MATH 360 or MATH 366).

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 502 Combinatorics II Credits: 3 (3-0-0)

Course Description: Graph algorithms, external set theory; partitions, Hadamard matrices, q-binomials, finite geometries, strongly regular graphs, triple systems, designs.

Prerequisite: MATH 501.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 505 Teaching Problem Solving in Mathematics K-12 Credits: 3 (0-0-3)

Course Description: Problem-solving strategies, cooperative learning, and manipulatives for K-12 classroom.

Prerequisite: None.

Registration Information: Offered as telecourse only. Teacher licensure required.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 507 Advanced Reasoning in Mathematics Credits: 3 (3-0-0)

Course Description: General proof techniques, proof in abstract algebra, proof in analysis, and proof in combinatorics.

Prerequisite: None.

Registration Information: This is a partial semester course. Sections may be offered: Online.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 510 Linear Programming and Network Flows Credits: 3 (3-0-0)

Course Description: Optimization methods; linear programming, simplex algorithm, duality, sensitivity analysis, minimal cost network flows, transportation problem.

Prerequisite: MATH 261 or MATH 315.

Registration Information: Credit not allowed for both MATH 510 and ENGR 510.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 517 Introduction to Real Analysis Credits: 3 (3-0-0)

Course Description: Euclidean and metric spaces, compactness, continuity, sequences, series, multivariable differentiation, inverse and implicit function theorems.

Prerequisite: MATH 417 and MATH 369.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 519 Complex Variables I Credits: 3 (3-0-0)

Course Description: Analytic functions, complex integration theory, singularities, elementary functions, and mapping.

Prerequisite: MATH 317.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 520 Nonlinear Programming Credits: 3 (3-0-0)

Prerequisite: MATH 510.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 522 Random Walks Credits: 3 (3-0-0)

Also Offered As: ECE 522.

Course Description: Mathematical aspects of random walks and diffusion processes. Stochastic modeling of complex systems.

Prerequisite: (ECE 303 with a minimum grade of C or STAT 303 with a minimum grade of C or STAT 315 with a minimum grade of C) and (ECE 312 with a minimum grade of C or ECE 457 with a minimum grade of C or MATH 469 with a minimum grade of C).

Registration Information: Junior standing. Sections may be offered: Online. Credit allowed for only one of the following: ECE 522, ECE 681A2, and MATH 522.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 525 Optimal Control Credits: 3 (3-0-0)

Course Description: Theory and application of optimal control and optimal estimation theory; continuous and discrete time systems; Pontryagin maximum principle.

Prerequisite: MATH 340 or MATH 345.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 530 Mathematics for Scientists and Engineers Credits: 3 (3-0-0)

Course Description: Proof-oriented linear algebra, ordinary and partial differential equations.

Prerequisite: MATH 340 or MATH 345.

Registration Information: Primarily for students in the Mathematics Graduate Interdisciplinary Studies Program. Credit not allowed for both MATH 332 and MATH 530.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 532 Mathematical Modeling of Large Data Sets Credits: 3 (3-0-0)

Course Description: Mathematical theory and algorithms for modeling large data sets. Application to real world problems. Emphasis on geometric ideas.

Prerequisite: MATH 369 or MATH 530.

Registration Information: Preparedness to do programming in a standard language required.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 535 Foundations of Applied Mathematics Credits: 3 (3-0-0)

Course Description: Calculus of variations, perturbation methods, models of continuum, dimensional analysis, stochastic models, integral equations, diffusion.

Prerequisite: MATH 340 or MATH 345.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 540 Dynamical Systems Credits: 3 (3-0-0)

Course Description: Linear and nonlinear systems, orbits, phase space, flows of vector fields, stability, bifurcation theory, chaos, strange attractors and applications.

Prerequisite: MATH 369 and MATH 417.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 545 Partial Differential Equations I Credits: 3 (3-0-0)

Course Description: Second order linear PDEs, elliptic and parabolic equations, equations of math physics, separation of variables, Fourier series.

Prerequisite: MATH 340 or MATH 345 or MATH 530.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 546 Partial Differential Equations II Credits: 3 (3-0-0)

Course Description: Distribution theory, Green's functions, Sobolev spaces, elliptic and parabolic equations.

Prerequisite: MATH 545.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 550 Numerical Methods in Science and Engineering Credits: 3 (3-0-0)

Also Offered As: ENGR 550.

Course Description: Numerical methods, including finite elements, finite differences, spectral methods, method of lines, and conservation laws; stability and convergence analysis for PDEs; and applications in science and engineering.

Prerequisite: MATH 340 or MATH 345 or MATH 530.

Registration Information: Sections may be offered: Online. Credit not allowed for both ENGR 550 and MATH 550.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 560 Linear Algebra Credits: 3 (3-0-0)

Course Description: Finite dimensional vector spaces, inner products, dual spaces, transformations, projections, adjoints, norms, eigenvalues, eigenvectors.

Prerequisite: MATH 369.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 561 Numerical Analysis I Credits: 3 (3-0-0)

Course Description: Numerical linear algebra, solving nonlinear systems, least squares, and minimization.

Prerequisite: (CS 156 or CS 253 or MATH 151) and (MATH 560).

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 566 Introduction to Abstract Algebra I Credits: 3 (3-0-0)

Course Description: Analysis of algebraic structures including groups, rings, fields, and vector spaces.

Prerequisite: MATH 366.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 567 Introduction to Abstract Algebra II Credits: 3 (3-0-0)

Course Description: Field theory, Galois theory, and advanced linear algebra.

Prerequisite: MATH 566.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 569A Linear Algebra for Data Science: Matrices and Vectors Spaces Credit: 1 (1-0-0)

Course Description: A basic introduction to matrices and linear algebra with preparation to pursue further studies in the applications of matrices with an emphasis on the foundations of data science.

Prerequisite: MATH 124 and MATH 126 or MATH 127.

Restriction: Must be a: Graduate.

Registration Information: Graduate students in Mathematics may not take this course for credit. Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 569B Linear Algebra for Data Science: Geometric Techniques for Data Reduction Credit: 1 (1-0-0)

Course Description: Projections, data fitting and over-determined linear systems, eigenvectors and eigenvalues, the spectral theorem for symmetric matrices, data driven bases, principal component analysis, the singular value decomposition.

Prerequisite: MATH 569A.

Restriction: Must be a: Graduate.

Registration Information: Sections may be offered: Online. Credit not allowed for both MATH 569B and MATH 580A3.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 569C Linear Algebra for Data Science: Matrix Factorizations and Transformations Credit: 1 (1-0-0)

Course Description: Advanced algorithms for the characterization of data using matrix factorizations and transformations.

Prerequisite: MATH 569B.

Restriction: Must be a: Graduate.

Registration Information: Sections may be offered: Online. Credit not allowed for both MATH 569C and MATH 580A4.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 569D Linear Algebra for Data Science: Theoretical Foundations Credit: 1 (1-0-0)

Course Description: Theoretical development of linear algebraic tools for data science; theorem and proof driven.

Prerequisite: MATH 569C.

Restriction: Must be a: Graduate.

Registration Information: Sections may be offered: Online. Credit not allowed for both MATH 569D and MATH 580A5.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 570 Topology I Credits: 3 (3-0-0)

Course Description: Point-set topology including basic set theory, continuity, product and quotient spaces, metrization, compactness, and connectedness.

Prerequisite: MATH 417 or MATH 472.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 571 Topology II Credits: 3 (3-0-0)

Course Description: Fundamental group, free groups and presentations, and manifolds.

Prerequisite: MATH 566 and MATH 570.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 574 Intro to Mathematics Education Research Credits: 3 (3-0-0)

Course Description: Synthesize mathematics education research, learn about research methods in mathematics education research, suggest areas of research most useful to advancing the field, and discuss classroom practice implications.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Credit not allowed for both MATH 574 and MATH 581A4.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 584 Supervised College Teaching Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 592 Seminar in Mathematics Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 601 Advanced Combinatorics I Credits: 3 (3-0-0)

Course Description: Special numbers, mobius inversions, transversals, partial orders, different sets, codes, t-designs.

Prerequisite: MATH 502 and MATH 566.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 602 Advanced Combinatorics II Credits: 3 (3-0-0)

Course Description: Hypergeometric functions, graph algorithms, hadamard matrices, strongly regular graphs, association schemes.

Prerequisite: MATH 601.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 605A Number Theory: Algebraic Number Theory Credits: 3 (3-0-0)

Course Description:

Prerequisite: MATH 519, may be taken concurrently and MATH 566 and MATH 567, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 605B Number Theory: Arithmetic Geometry Credits: 3 (3-0-0)

Course Description:

Prerequisite: MATH 519, may be taken concurrently and MATH 566 and MATH 567, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 605C Number Theory: Elliptic Curves Credits: 3 (3-0-0)

Course Description:

Prerequisite: MATH 519, may be taken concurrently and MATH 566 and MATH 567, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 617 Integration and Measure Theory Credits: 3 (3-0-0)

Course Description: Riemann-Cauchy integration theory, sigma-algebras, Lebesgue theory of measure and integration, Fubini's Theorem, Radon-Nikodym theorem, L_p spaces.

Prerequisite: MATH 517.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 618 Advanced Real Analysis Credits: 3 (3-0-0)

Course Description: Normed linear spaces, Banach and Hilbert spaces, elements of functional analysis.

Prerequisite: MATH 560 and MATH 617.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 619 Complex Variables II Credits: 3 (3-0-0)

Course Description: Infinite products, entire functions, analytic continuation, Riemann surfaces, other topics.

Prerequisite: MATH 519.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 620 Variational Methods and Optimization I Credits: 3 (3-0-0)

Course Description: Unconstrained and constrained infinite dimensional optimization, calculus of variations, applications.

Prerequisite: MATH 570 or MATH 517.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 621 Variational Methods and Optimization II Credits: 3 (3-0-0)

Course Description: Unconstrained and constrained infinite dimensional optimization, variational inequalities, Lagrange multipliers, control, applications.

Prerequisite: MATH 620.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 633 Industrial and Applied Mathematics Credits: 3 (2-2-0)

Course Description: Team solution of problems arising in industrial and applied mathematics. Problem formulation, solution proposal, implementation and analysis.

Prerequisite: MATH 530 or MATH 560 or MATH 561.

Restriction: Must be a: Graduate, Professional.

Registration Information: Preparedness to do programming in a standard language required. Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 640 Ordinary Differential Equations I Credits: 3 (3-0-0)

Course Description: Existence and uniqueness, continuation, continuous dependence, linear systems, and stability.

Prerequisite: (MATH 340 or MATH 345 or MATH 530) and (MATH 369 and MATH 517).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 641 Ordinary Differential Equations II Credits: 3 (3-0-0)

Course Description: Topics selected from nonlinear boundary value problems, periodic phenomena, differential operators, and others.

Prerequisite: MATH 640.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 645 Advanced Partial Differential Equations I Credits: 3 (3-0-0)

Course Description: Abstract methods for linear partial differential equations.

Prerequisite: MATH 546.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 646 Advanced Partial Differential Equations II Credits: 3 (3-0-0)

Course Description: Problems in nonlinear partial differential equations.

Prerequisite: MATH 645.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 651 Numerical Analysis II Credits: 3 (3-0-0)

Course Description: Interpolation, approximation, quadrature, initial and boundary value problems.

Prerequisite: MATH 561.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 652 Advanced Numerical Methods for PDEs Credits: 3 (3-0-0)

Course Description: Theory of numerical methods for solution of PDEs: convergence and stability properties; error estimation; approximation theory.

Prerequisite: MATH 545 or MATH 560 or MATH 617.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 666 Advanced Algebra I Credits: 3 (3-0-0)

Course Description: Theory of rings and algebras with applications.

Prerequisite: MATH 567.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 667 Advanced Algebra II Credits: 3 (3-0-0)

Course Description: Advanced topics from algebra: representation theory, Wedderburn theory, bilinear forms, multilinear and homological algebra.

Prerequisite: MATH 666.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 670 Introduction to Differential Manifolds Credits: 3 (3-0-0)

Course Description: Finite-dimensional differential manifolds, submanifolds, vector fields and flows, Lie groups and algebras.

Prerequisite: MATH 560.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 672 Projective Geometry I Credits: 3 (3-0-0)

Course Description: Algebraic sets in projective space, the Nullstellensatz, rational maps and functions, coordinate rings, Hilbert functions, dimension, degree.

Prerequisite: MATH 567.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 673 Projective Geometry II Credits: 3 (3-0-0)

Course Description: Topics selected from curves and surfaces, sheaf theory, algebraic geometry, singularity theory, vector bundles.

Prerequisite: MATH 672.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 674 Mathematics Education Theoretical Perspective Credits: 3 (3-0-0)

Course Description: Analysis, synthesis, and re-conceptualization of theoretical perspectives that are adopted in mathematics education research.

Prerequisite: MATH 574.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both MATH 674 and MATH 680A2.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 675 Topics in Mathematics Education Credits: 3 (3-0-0)

Course Description: Contemporary topics in mathematics education research. Content will vary and may include assessment, access and equity in mathematics teaching and learning, embodied cognition at the collegiate level, backwards design, research in undergraduate mathematics education, technology for teaching and learning mathematics, etc.

Prerequisite: MATH 574.

Restriction: Must be a: Graduate, Professional.

Registration Information: May be taken up to 5 times for credit.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 676 Topics in Mathematics Credits: 3 (3-0-0)

Course Description: Advanced study experiences which deal with established content areas in mathematics.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: May be taken up to 5 times for credit.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 687 Internship Credits: Var[1-9] (0-0-0)

Course Description: A work-learn experience integrating classroom theory with practical experience.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 693 Seminar in Mathematics Credits: 3 (0-0-3)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 695 Independent Study Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 717 Functional Analysis I Credits: 3 (3-0-0)

Course Description: Topological vector spaces; Banach and Hilbert spaces.

Prerequisite: MATH 618.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (odd years).

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 718 Functional Analysis II Credits: 3 (3-0-0)

Course Description: Spectral theory, operator theory, semigroups of transformations, and distribution theory.

Prerequisite: MATH 717.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

MATH 750 Numerical Methods and Models I Credits: 3 (3-0-0)

Course Description: Derivation of model equations, introduction to solution techniques and computing.

Prerequisite: MATH 561.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

MATH 751 Numerical Methods and Models II Credits: 3 (3-0-0)

Course Description: Convergence, stability, error estimates and computing.

Prerequisite: MATH 561.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

MATH 793 Seminar in Mathematics Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 798 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

MATH 799 Dissertation Credits: Var[1-18] (0-0-0)**Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.

Major in Mathematics

Mathematics is the science of numbers, shapes, probabilities, and measurements. It is a universal language in which information is stated in the simplest possible form. Mathematics has a dual nature—it is an independent discipline valued for its precision and elegance, and it is an essential source of ideas and techniques for other scientific endeavors.

The undergraduate program is structured to provide a broad liberal arts education in mathematics, a strong set of core courses, and flexibility to choose from a broad range of courses. The liberal arts component requires students to acquire a broad background in communication skills, humanities, social sciences, and natural sciences. The major core focuses on developing students' understanding and appreciation of the mathematical sciences, problem solving skills, and their ability to combine knowledge and skills in productive ways. Core mathematics subjects include calculus and advanced calculus, linear algebra, methods of proof, abstract algebra, computer programming, and statistics.

Four concentrations are available in the program: Actuarial Science, Applied Mathematics, General Mathematics, and Mathematics Education.

Learning Objectives

Graduates will:

1. Obtain a solid background in theoretical mathematics and will be able to participate in mathematical work in a variety of fields or continue on to graduate school.
2. Be able to apply a range of mathematical and statistical tools to a diverse set of problems as presented to them in either employment or the pursuit of further education.
3. Be capable of describing their mathematical assumptions and results to colleagues.

Accelerated Program

The major in Mathematics, General Mathematics concentration and Mathematics Education concentration, includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses

to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

The Mathematics major prepares students for a wide variety of occupations in business, industry, government, and education. Actuarial science graduates who have passed the first two professional actuary exams can expect to find positions with excellent entry-level salaries. Applied mathematics graduates continue to find employment opportunities in government and private industry. Many pursue advanced degrees in mathematics, computational science, or engineering. About one-third of general mathematics graduates continue on to graduate school in mathematics or other disciplines, with the rest finding employment in a large variety of capacities. Education students spend a semester teaching a classroom and have excellent job placement. Participation in internships, volunteer activities, or cooperative education opportunities is highly recommended to enhance practical training and development. Graduates who continue to pursue advanced degrees can attain more responsible positions with the possibility of rising to top professional levels.

Career opportunities include, but are not limited to: applied mathematician, actuary, engineer, statistician, financial analyst/advisor, computer programmer, computer systems analyst, mortgage officer, market analyst, risk analyst, tax auditor, accountant, math educator.

Concentrations

- Actuarial Science Concentration
- Applied Mathematics Concentration
- General Mathematics Concentration
- Mathematics Education Concentration

Major in Mathematics, Actuarial Science Concentration

The Actuarial Science concentration trains students how to use mathematics, statistics, business, and economics to analyze and plan for future situations involving financial uncertainties and risks. This concentration is designed to qualify students to take the first two examinations administered by the Society of Actuaries (<https://www.soa.org/member/>) and provides the foundation for the remaining examinations.

Requirements

Effective Fall 2022

A minimum grade of C (3.000) is required in all mathematics, statistics, and computer science courses that are required for graduation.

Freshman

		AUCC	Credits

- ¹ Students in this concentration must take a total of 10 credits in category 3A, and at least one course must have a laboratory component.
- ² Students in this concentration may need to obtain a prerequisite override from the appropriate department to enroll in this class.
- ³ Preparation for Exam I administered by the Society of Actuaries.
- ⁴ Select enough elective credits to bring program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Major in Mathematics, Actuarial Sciences Concentration assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester: MATH 117, MATH 118, MATH 124, MATH 125, MATH 126. A minimum grade of C (3.000) is required in all mathematics, statistics, and computer science courses that are required for graduation.

Major in Mathematics, Applied Mathematics Concentration

The Applied Mathematics concentration prepares students for careers as applied mathematicians working in business, government, and industry. It is recommended that students supplement the core mathematical program with courses in their chosen application area; for example, engineering, public health, finance, electronics, or geology. Course requirements emphasize mathematical foundations as well as the

application of mathematics in other disciplines. In particular, students receive training in numerical analysis, mathematical modeling, statistics, and computing, as well as a solid preparation for further study.

Requirements Effective Fall 2023

A minimum grade of C is required in all mathematics, statistics, and computer science courses that are required for graduation.

Major in Mathematics, General Mathematics Concentration

The General Mathematics concentration is a liberal arts program providing both a strong mathematics core and many free electives. This concentration is well suited for students who want to combine mathematics with other areas, such as business, law, computer science (<http://www.cs.colostate.edu/>), or statistics (<http://www.stat.colostate.edu/>).

The General Mathematics concentration also prepares students for graduate work in mathematics (<https://mathematics.colostate.edu/graduate-students/>) or related fields. Mathematics is a great option for pre-law and pre-med students.

The career options for General Mathematics majors are vast and varied. A few examples include working with the National Security Agency, the military, in education, computing, or engineering firms.

Additional resources on careers for Mathematics majors can be found at:

- Mathematical Association of America (<http://mathcareers.maa.org/>)
- American Mathematical Society (<http://www.ams.org/profession/>)
- Society for Industrial and Applied Mathematics (<http://www.siam.org/careers/thinking.php>)

Requirements Effective Fall 2022

A minimum grade of C (2.000) is required in all mathematics, statistics, and computer science courses that are required for graduation.

Major in Mathematics, Mathematics Education Concentration

The Major in Mathematics, Mathematics Education Concentration is a professionally oriented program designed to prepare students for a secondary teaching certificate in Mathematics. Students in this concentration take a strong mathematics core, including the proofs-oriented course in advanced calculus required in the other concentrations. The program aims to prepare leaders in secondary education.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (<http://www.cep.chhs.colostate.edu/>) and the School of Education for general information.

Requirements Effective Fall 2022

A minimum grade of C (2.000) is required in all mathematics, statistics, and computer science courses that are required for graduation.

Minor in Mathematics

The Department of Mathematics offers a minor in Mathematics for those students who wish to acquire a more extensive knowledge of mathematical sciences in support of their personal interests or major area of study. If you are majoring in a technical area such as engineering or computer science, your major requirements may put you just one or two courses short of a minor in Mathematics. To earn a minor, you must complete a calculus sequence and then take 12 credits of upper-division (300+) mathematical sciences. Of these 12 credits, 9 credits must be in mathematics, but the remaining 3 credits can be in CS, MATH, STAT, or DSCI.

Requirements Effective Fall 2024

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C is required in each MATH, STAT, and CS course required for the minor in mathematics.

Code	Title	Credits

Group D:		
MATH 156	Mathematics for Computational Science I (GT-MA1)	
MATH 256	Mathematics for Computational Science II	
Choose 6-7 credits from the following: ¹		6-7
MATH, STAT, or CS Upper-Division (300- to 400- level) courses		
CS 220	Discrete Structures and their Applications	
MATH 230	Discrete Mathematics for Educators	
MATH 235	Introduction to Mathematical Reasoning	
MATH 261	Calculus for Physical Scientists III	

MATH 269	Geometric Introduction to Linear Algebra	
MATH 272	Applied Mathematics for Chemists II	
Upper-Division Mathematics Electives (300- 400- level MATH courses) ²		9
Program Total Credits:		23

¹ At least 3 credits must be from the upper-division (300- to 400-level) courses.
² Courses ending in –80 to –99 cannot be used to satisfy upper-division (300- to 400-level) requirements.

Minor in Mathematical Biology

The minor in Mathematical Biology is designed for students of the life sciences who wish to acquire a broader base of quantitative expertise in support of their major area of study. The minor includes courses on the mathematical modeling of biological systems.

Requirements Effective Fall 2011

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C is required in all mathematics, statistics, and computer science courses including all MATH, STAT, or CS joint-listed courses required for the minor in mathematical biology.

Code	Title	Credits
Select one group from the following:		8
Group A:		
MATH 155	Calculus for Biological Scientists I (GT-MA1)

 - Applied Physics Concentration
 - Physics Concentration

Minor

- Minor in Physics

Change of Major Process

- **Future or incoming students:** Please contact the Office of Admissions (<https://admissions.colostate.edu>) to declare a Major in Physics. Incoming students specifically, please contact Prof. Martin Gelfand (martin.gelfand@colostate.edu) immediately after declaring Physics to make sure you receive appropriate advising before the start of the semester. Please feel free to contact Prof. Gelfand if you have questions about Physics before declaring the major as well.
- **Current on-campus CSU students:** To learn more about Physics and decide if you are interested in declaring, please contact Prof. Martin Gelfand (martin.gelfand@colostate.edu) to arrange a meeting.
 - In order to complete the program as rapidly as possible, students who are considering Physics should make progress every semester in Mathematics, completing Precalculus as soon as possible, and then taking MATH 160, followed either by MATH 161, MATH 261, and MATH 340 or MATH 271 and MATH 272. The latter sequence has limited availability, so the former is more common.

Graduate Graduate Programs in Physics

Graduate programs in Physics and Applied Physics lead to Master of Science and Doctor of Philosophy degrees. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Physics (<http://www.physics.colostate.edu>).

Master's Programs

- Master of Science in Physics, Plan A*
- Master of Science in Physics, Plan B*

Courses

Subjects in this department include: Astronomy (AA) and Physics (PH).

Astronomy (AA)

AA 100 Introduction to Astronomy (GT-SC2) Credits: 3 (3-0-0)

Course Description: Description of the various objects found in the heavens as well as the principles and techniques employed in investigations of these objects.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

AA 101 Astronomy Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Conduct observations, experiments, and simulations to develop an intuitive understanding of astronomical phenomena.

Prerequisite: AA 100, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

AA 250 Introduction to Astrophysics Credits: 3 (3-0-0)

Course Description: Comprehensive introduction to astrophysics, including: observational astronomy, stellar evolution, cosmology, exoplanets, and astrobiology.

Prerequisite: (MATH 161 or MATH 255 or MATH 271) and (PH 122 or PH 142).

Registration Information: Credit allowed for only one of the following: AA 250, AA 280A1, and AA 380A1.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

AA 495 Independent Study in Astrophysics Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Physics (PH)

PH 110 Physics of Everyday Phenomena (GT-SC2) Credits: 3 (3-0-0)

Course Description: Fundamental concepts of physics and elementary quantitative reasoning applied to phenomena in everyday life and beyond.

Prerequisite: None.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/o lab (GT-SC2).

PH 111 Physics of Everyday Phenomena Laboratory (GT-SC1) Credit: 1 (0-2-0)

Course Description: Experiments dealing with basic physics concepts including explorations of everyday phenomena.

Prerequisite: PH 110, may be taken concurrently.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

PH 121 General Physics I (GT-SC1) Credits: 5 (3-2-1)

Course Description: Concepts of force, torque, energy, momentum, work used to cover fluids, waves, sound, temperature, heat; biological, physical examples (noncalculus).

Prerequisite: MATH 120 and MATH 125, may be taken concurrently or MATH 124 and MATH 125, may be taken concurrently or MATH 127 or MATH 155, may be taken concurrently or MATH 157, may be taken concurrently or MATH 160, may be taken concurrently.

Registration Information: Must register for lecture, lab, and recitation. Credit not allowed for both PH 121 and PH 141.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

PH 122 General Physics II (GT-SC1) Credits: 5 (3-2-1)

Course Description: Electricity including electrostatics and simple circuits; magnetism; optics; nuclear physics, radiation; biological, physical examples (noncalculus).

Prerequisite: PH 121 or PH 141.

Registration Information: Must register for lecture, lab, and recitation. Credit not allowed for both PH 122 and PH 142.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

PH 141 Physics for Scientists and Engineers I (GT-SC1) Credits: 5 (3-2-1)

Course Description: Forces, energy, momentum, angular momentum, oscillations, waves, heat, thermodynamics (calculus based).

Prerequisite: None.

Registration Information: (MATH 126 or concurrent registration; MATH 155 or concurrent registration) or (MATH 127 or concurrent registration; MATH 155 or concurrent registration) or MATH 159 or concurrent registration or MATH 160 or concurrent registration. Must register for lecture, lab, and recitation. Credit not allowed for both PH 121 and PH 141.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

PH 142 Physics for Scientists and Engineers II (GT-SC1) Credits: 5 (3-2-1)

Course Description: Electricity and magnetism, circuits, light, optics (calculus based).

Prerequisite: (PH 141) and (MATH 161, may be taken concurrently or MATH 255, may be taken concurrently or MATH 271, may be taken concurrently).

Registration Information: Must register for lecture, lab, and recitation. Credit not allowed for both PH 142 and PH 122.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Biological & Physical Sciences 3A, Natural & Physical Sciences w/ lab (GT-SC1).

PH 193 Introductory Seminar in Physics Credit: 1 (0-0-1)

Course Description: An orientation to the discipline of physics and the undergraduate major.

Prerequisite: None.

Restrictions: Must not be a: Junior, Senior. Must be a: Undergraduate.

Registration Information: Credit not allowed for both PH 180A2 and PH 193.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PH 210 Introduction to Computing in Physics Credits: 3 (3-0-0)

Course Description: An introduction to the use of computers in physics focusing on the design, implementation, and application of algorithms used to solve common physics problems, utilizing Python.

Prerequisite: (CS 150B or CS 152) and (PH 141).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PH 245 Introduction to Electronics Credits: 3 (2-3-0)

Course Description: AC circuits, physical bases and applications of electronic devices.

Prerequisite: MATH 161 and PH 142.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 293 Selected Topics in Physics Credit: 1 (1-0-0)

Course Description: Selected topics in physics with emphasis on depth of understanding.

Prerequisite: PH 142.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PH 298 Introductory Research Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 314 Introduction to Modern Physics Credits: 4 (3-0-1)

Course Description: Relativity; quantum mechanics; atomic structure; applications to solid-state, nuclear, and elementary particle physics.

Prerequisite: (MATH 261, may be taken concurrently or MATH 272, may be taken concurrently) and (PH 142).

Registration Information: Must register for lecture and recitation.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 315 Modern Physics Laboratory Credits: 2 (0-4-0)

Course Description: Experiments in modern physics.

Prerequisite: PH 314, may be taken concurrently.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 327 Analytical Techniques for Physics Credits: 3 (3-0-0)

Course Description: Applications to physics of curvilinear coordinate systems, line/surface integrals, linear algebra, ordinary/partial differential eqs., probability.

Prerequisite: (MATH 261) and (MATH 340 or MATH 345) and (PH 142 and PH 314).

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PH 341 Mechanics Credits: 4 (4-0-0)

Course Description: Particle dynamics, translation and rotation of rigid bodies, moving coordinate systems, Lagrangian mechanics, matrix and tensor methods.

Prerequisite: (MATH 340 or MATH 345) and (PH 141).

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 351 Electricity and Magnetism Credits: 4 (4-0-0)

Course Description: Electrostatics, magnetostatics, currents, time-dependent electric and magnetic fields, radiation.

Prerequisite: (MATH 340 or MATH 345) and (PH 142).

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 353 Optics and Waves Credits: 4 (3-3-0)

Course Description: Geometrical optics; wave optics; interference, diffraction, and polarization; quantum optics.

Prerequisite: MATH 261 and PH 142.

Registration Information: Must register for lecture and laboratory.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 361 Physical Thermodynamics Credits: 3 (3-0-0)

Course Description: Laws of thermodynamics; thermodynamic potentials; applications such as fluids, phase transitions, electrical and magnetic systems, binary mixtures.

Prerequisite: MATH 261 and PH 142.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 384 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description: Participation as a physics tutor.

Prerequisite: PH 121 or PH 141.

Registration Information: Written consent of department chair required.

A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 412 Quantum Optics for Quantum Info Science Credits: 4 (3-2-0)

Course Description: Topics in the field of quantum optics which are relevant for quantum information science. Lectures are focused on the physics of the quantum behavior of light including concepts such as field quantization, coherent states, and quantum entanglement. The laboratory component focuses on tabletop experiments in quantum optics.

Prerequisite: PH 314.

Registration Information: Must register for lecture and laboratory.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 425 Advanced Physics Laboratory Credits: 2 (0-4-0)

Course Description: Advanced experiments in electricity and magnetism, statistical physics and quantum mechanics.

Prerequisite: PH 315 and PH 451.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 451 Introductory Quantum Mechanics I Credits: 3 (3-0-0)

Course Description: Schrodinger's theory of wave mechanics, potential wells, harmonic oscillators, wave packets, operators, angular momentum.

Prerequisite: (MATH 272 or MATH 340 or MATH 345) and (PH 314 with a minimum grade of C).

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 452 Introductory Quantum Mechanics II Credits: 3 (3-0-0)

Course Description: Approximation techniques, perturbation theory, identical particles and spin, structure and spectra of atoms and molecules, hydrogen atom.

Prerequisite: PH 451.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 462 Statistical Physics Credits: 3 (3-0-0)

Course Description: Maxwell-Boltzmann, Fermi-Dirac, and Bose-Einstein distribution functions; kinetic theory; applications to solids, metals, semiconductors, and gases.

Prerequisite: MATH 340 and PH 314 and PH 361.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 492 Seminar Credit: 1 (0-0-1)

Course Description: Preparation and presentation of seminars on selected modern topics.

Prerequisite: PH 315.

Registration Information: Written consent of instructor required.

Term Offered: Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 495 Independent Study Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 498 Research Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 517 Chaos, Fractals, and Nonlinear Dynamics Credits: 3 (3-0-0)

Course Description: Strange attractors, fractal dimensions, Lyapunov exponents, multifractal spectrum, period doubling, universality, intermittency, time-delay embedding.

Prerequisite: (MATH 261 and PH 341) and (MATH 340 or MATH 345).

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 521 Introduction to Lasers Credits: 3 (3-0-0)

Course Description: Stimulated emission; laser resonators; theory of laser oscillation; specific laser systems; applications.

Prerequisite: (MATH 340 and PH 353) and (CHEM 476 or PH 451).

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 522 Introductory Laser Laboratory Credit: 1 (0-2-0)

Course Description: Experiments providing hands-on experiences with lasers.

Prerequisite: PH 521, may be taken concurrently.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 531 Introductory Condensed Matter Physics Credits: 3 (3-0-0)

Course Description: Crystal structures and bonding, electronic levels and vibrations, dielectric, optical and magnetic properties, quasiparticles, superconductivity.

Prerequisite: PH 451 and PH 361.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 561 Elementary Particle Physics Credits: 3 (3-0-0)

Course Description: Particle interactions and detection techniques. Quark model, scattering models and standard model of electroweak interactions, physics of colliders.

Prerequisite: PH 451.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 571 Mathematical Methods for Physics I Credits: 3 (3-0-0)

Course Description: Vector analysis, eigenvalues and eigenvectors, infinite series, method of Frobenius, complex variables, contour integration.

Prerequisite: MATH 340.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 572 Mathematical Methods for Physics II Credits: 3 (3-0-0)

Course Description: Partial differential equations, Sturm-Liouville theory, special functions, Green's functions, Fourier series, Fourier and Laplace transforms.

Prerequisite: PH 571.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 621 Classical Mechanics Credits: 3 (3-0-0)

Course Description: Central forces, scattering, noninertial reference frames, Coriolis force, Lagrange's and Hamilton's equations, small oscillations, continuum mechanics.

Prerequisite: (PH 341) and (PH 571, may be taken concurrently).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 631 Modern Topics in Condensed Matter Physics Credits: 3 (3-0-0)

Course Description: Selected topics in modern condensed matter physics. Examples include topological phases of matter, superconductivity, heavy fermions, density functional theory, surfaces and interfaces.

Prerequisite: PH 531.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (every third year).

Grade Mode: Traditional.

Special Course Fee: No.

PH 641 Electromagnetism I Credits: 3 (3-0-0)

Course Description: Electrostatics in a vacuum and a medium, general solution of Laplace's equation, Green's functions, magnetostatics in a vacuum and a medium.

Prerequisite: (PH 351) and (PH 571).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 642 Electromagnetism II Credits: 3 (3-0-0)

Course Description: Maxwell's equations, electromagnetic waves, radiation by accelerated charges, special relativity, Lagrangian formulation of electromagnetism.

Prerequisite: PH 641.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 651 Quantum Mechanics I Credits: 3 (3-0-0)

Course Description: WKB theory, Heisenberg picture, 3D wells, hydrogen atom, time-independent perturbation theory, angular momentum and spin, Clebsch-Gordan coefficients.

Prerequisite: (PH 452) and (PH 571, may be taken concurrently).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 652 Quantum Mechanics II Credits: 3 (3-0-0)

Course Description: Wigner-Eckhart theorem, symmetries, density matrix, identical particles, interaction picture, time-dependent perturbation theory, scattering.

Prerequisite: PH 651.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 671 Statistical Mechanics Credits: 3 (3-0-0)

Course Description: Canonical and grand-canonical ensembles; Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics; density operator; Bose-Einstein condensation.

Prerequisite: (PH 452 and PH 462) and (PH 571, may be taken concurrently).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PH 692 Seminar Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 693 Current Topics in Physics Research Credits: 3 (0-0-3)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Term Offered: Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 698 Research Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 699 Thesis Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 721 Advanced Atomic, Molecular, Optical Physics Credits: 3 (3-0-0)

Course Description: Atomic and molecular structure, interaction of atoms and molecules with radiation, laser cooling, atomic and molecular traps, experimental design, and a survey of contemporary experiments.

Prerequisite: PH 652, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both PH 721 and PH 780A1.

Term Offered: Spring (every third year).

Grade Mode: Traditional.

Special Course Fee: No.

PH 722 Quantum Electronics Credits: 3 (3-0-0)

Course Description: One- and two-photon spectroscopy; broadening mechanisms; nonlinear optics; coherent phenomena; experimental methods.

Prerequisite: PH 521.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PH 731 Condensed Matter Theory Credits: 3 (3-0-0)

Course Description: Second quantization; electrons; phonons; electron-phonon interaction; superconductivity; magnetism; spin waves; density-functional methods; symmetry.

Prerequisite: (PH 462) and (PH 531) and (PH 652).

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

PH 762 Elementary Particle Theory Credits: 3 (3-0-0)

Course Description: Symmetries, electrodynamics, renormalization, and the running coupling constant. Hadron structure, QCD, gauge symmetry and electroweak interaction.

Prerequisite: PH 561 and PH 652.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

PH 770 Quantum Theory Credits: 3 (3-0-0)

Course Description: Formal scattering theory; relativistic quantum mechanics, quantum theory of radiation, symmetries and statistics, many-body theory.

Prerequisite: PH 652.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PH 784 Supervised College Teaching Credits: Var[1-5] (0-0-0)

Course Description: Supervised teaching of general physics laboratory and recitation sections.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 793A Seminar: Condensed Matter Physics Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 793B Seminar: Laser Spectroscopy/Quantum Electronics Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 793C Seminar: Statistical Mechanics Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 793D Seminar: Mathematical Physics Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 793E Seminar: High Energy Physics Credits: Var[1-5] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 795 Independent Study Credits: Var[1-6] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PH 799 Dissertation Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

Major in Physics

Physics is the study of motion, matter, and energy. It is the most fundamental of sciences, and provides the essential underpinning of chemistry, biology, astronomy, and geology. Physicists probe the structure of atomic nuclei, study exotic states of matter that occur at ultra-low temperatures, and develop theories that predict the origin and destiny of the universe. Physics has practical applications to a wide variety of tasks such as fabricating very large scale integrated circuits, producing high efficiency solar cells, and developing nanomachines, high-power lasers, and scanners for imaging activity within the human brain. Fundamental research in physics has led to many important inventions, including the transistor, the computer, the internet, the flat panel display, and the cell phone.

The Physics major begins with an emphasis on fundamentals in the basic sciences and mathematics to provide students with a broad foundation. Subsequent course work is designed to develop analytical and experimental abilities that allow students to solve problems involving the technical applications of physics. The curriculum includes courses on classical mechanics, modern physics, quantum mechanics, electricity and magnetism, and thermal physics. A strong liberal arts program rounds out the major and provides educational breadth. Participation in undergraduate research is strongly encouraged since it enhances practical training and expands employment opportunities, as well as being expected of anyone applying to research-based graduate programs.

Two concentrations are offered: Physics and Applied Physics. The former is the standard concentration, and is recommended for students planning to apply to graduate programs in Physics or related disciplines. The latter requires the student to select a specific "field": there are a variety to choose from, and each has its own menu of associated electives. The Applied Physics concentration is ideal for students who are double-majoring in other technical disciplines, or who anticipate further education towards a career in health professions (including, notably, Medical Physics).

Learning Objectives

Successful graduates will:

1. Obtain a solid background in experimental and theoretical physics. This will include a conceptual understanding of mechanics, electromagnetism, thermal physics, and quantum mechanics as applied to important model systems and real systems.
2. Acquire the contemporary skills and knowledge necessary for positions in a variety of occupations or for admission to graduate or professional schools.
3. Carry out experiments on diverse physics phenomena using electrical and optical techniques; analyze data using statistical methods appropriately; identify systematic errors; and relate the results to core physics content at the advanced undergraduate level.
4. Appropriately apply physics theories to physical systems qualitatively and quantitatively, including identifying a proper theoretical approach, using relevant mathematical techniques, and applying justifiable approximations.
5. Communicate the results of experiments and theoretical analyses in writing and orally.

Potential Occupations

Physics majors who go into the workforce directly after graduation use their training in a variety of settings. The primary employers for our graduates have been large aerospace/defense and electronics companies, as well as software firms and other types of high-tech companies. In addition to the more obvious jobs in those settings, such as computer programming, quality control, and engineering, our students have also been hired in training and sales capacities. High school teaching is a possibility: there are several pathways for students with undergraduate Physics degrees to obtain teaching credentials. Physics graduates possess excellent mathematical and analytical skills that are useful in business and finance as well.

Our majors have gone on to research-based graduate programs in disciplines including Physics, Astrophysics, Applied Physics, Applied Mathematics, Atmospheric Science, and Quantitative Biology. Those earning graduate degrees can work in college teaching and at industrial, government, and academic research labs and reach the highest professional levels.

Health Physics and Medical Physics are two less-known career paths that offer great opportunities for students interested in the direct application of physics to human well-being. The former is concerned with protecting

people from dangers associated with ionizing radiation, while the latter involves working with x-ray machines and radioisotopes in clinical settings. Both require Master's degrees in the discipline, and a Physics major is the preferred undergraduate preparation.

Concentrations

- Applied Physics Concentration
- Physics Concentration

Major in Physics, Applied Physics Concentration

The Applied Physics concentration combines fundamental course work in physics with a selection of courses in a related field. Eight fields are available:

- The **Electronics, Semiconductors, and Optics** field and the **Materials and Fluids** field are designed for students interested in rapidly changing technology or in areas that overlap the boundaries of traditional engineering disciplines.
- The **Computers** field provides a foundation for the application of modern computer technology to problems in physics, the development of new types of computers, and jobs in computer programming.
- The **Chemistry** field combines thorough knowledge of both chemistry and physics, which is useful in such interdisciplinary areas as materials science, surface science, and physical chemistry/chemical physics.
- The **Medical Physics** field and the **Biophysics** field prepare students for further study in medical physics (the application of physics technologies to medical practice), health physics (radiation safety and protection), or biophysics, and are also appropriate for students planning careers in traditional health professions.
- The **Geophysics** field prepares students for further study in geophysics and careers involving application of physical methods in geology.
- The **Data Science** field provides students with the tools to analyze large data sets using contemporary statistical methods.

With this concentration, it is also possible for students to design a custom field (in consultation with departmental advisors) to meet their specific needs.

Requirements Effective Fall 2023

Each course used to meet requirements of the concentration need a minimum grade of C-, including courses to satisfy AUCC Categories 1, 2, and 3A.

¹ For students who change majors from Electrical Engineering or are double-majoring in Electrical Engineering, please see an advisor for possible substitutions.

² Other courses in AUCC Category 2 may be accepted if they are taken prior to declaring the Physics major or are taken to meet requirements of another major.

³ A minimum of 6 credits must be 300-, 400-, or 500-level.

⁴ Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300-, 400-level, or 500-level).

Major Completion Map

Distinctive Requirements for Degree Program:

Required PH courses above the 100-Level are typically offered only Fall or Spring, not both. A grade of C- or better is required in all courses used to meet requirements of the major, except for unrestricted electives and courses taken to satisfy All-University Core Curriculum (AUCC) categories 1A, 1C, 3B, 3C, and 3D. Courses in a Selected Field list have additional prerequisites. Any student considering the Applied Physics concentration should meet with an advisor as soon as possible.

Major in Physics, Physics Concentration

The Physics concentration provides a broad background in physics that serves as a base for later specialization, either in graduate school or on the job. It is designed for those seeking greater insight into physics and an introduction to more advanced topics and methods. Students who obtain a degree in Physics with the Physics concentration are prepared

for a career in industry or government, or for advanced study at the graduate level.

Requirements Effective Fall 2023

Each course used to meet requirements of the concentration need a minimum grade of C-, including courses to satisfy AUCC Categories 1, 2, and 3A.

Freshman

		AUCC	Credits
CO 150	College Composition (GT-CO2)	1A	3

Minor in Physics

Most technical fields require some background in physics. A minor in Physics can provide students with an increased understanding of the foundations of their chosen major. For students majoring in Computer Science and Mathematics, a minor in Physics can offer experience in applying the skills acquired in their major to concrete physical problems.

Requirements Effective Fall 2018

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C- is required in all courses applying toward the minor in physics.

Code	Title	Credits
Lower Division		
PH 141	Physics for Scientists and Engineers I (GT-SC1)	5
PH 142	Physics for Scientists and Engineers II (GT-SC1)	5
Upper Division		
PH 314	Introduction to Modern Physics	4
Select a minimum of 8 credits from the list below.		8
PH 315	Modern Physics Laboratory	
PH 341	Mechanics	
PH 351	Electricity and Magnetism	
PH 353	Optics and Waves	
PH 361	Physical Thermodynamics	
PH 425	Advanced Physics Laboratory	
PH 451	Introductory Quantum Mechanics I	
PH 452	Introductory Quantum Mechanics II	
PH 462	Statistical Physics	
Program Total Credits:		22

Substitutions require approval of the Key Advisor.

Department of Psychology

Office in Behavioral Sciences Building, Room 201
(970) 491-3799

psychology.colostate.edu (<https://psychology.colostate.edu/>)

Professor Don Rojas, Chair

Undergraduate Majors

- Major in Psychology
 - Accelerated Addictions Counseling Concentration
 - Addictions Counseling Concentration
 - Clinical/Counseling Psychology Concentration
 - General Psychology Concentration
 - Industrial/Organizational Concentration

- Mind, Brain, and Behavior Concentration

Change of Major Process

- **For future or incoming CSU students:** Please contact Admissions (<https://admissions.colostate.edu/>) to declare Psychology.
- **For current on-campus CSU students:** To learn more about Psychology and decide if you are interested in declaring, you must first review our major (<https://psychology.colostate.edu/undergraduate-students/>) and then sign up for and attend a Psychology Major Information Session (<https://psychology.colostate.edu/ugadvising/>):
 - These are 60-minute group sessions led by advisors with individualized course recommendations and built-in time to answer your questions.
 - If you are exploring Psychology or if you are registering before your session, we recommend you review the concentration links above and register for any open courses that you are eligible to add. Many Psychology courses will open to non-Psychology majors after a certain date. Summer courses are open to all majors.
 - Helpful classes to complete early (depending on concentration choice)
 - PSY 100
 - MATH 117, MATH 118, and MATH 124 or higher-level math
 - LIFE 102
 - Any 3 credit SPCM course
 - Any 3 or 4 credit CS course
 - Any 3 credit PHIL course

Graduate Graduate Programs in Psychology

The department offers graduate programs leading to Master of Science and Doctor of Philosophy degrees. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Psychology. (<http://www.colostate.edu/Depts/Psychology/>)

Certificates

- Applied Positive Psychology
- Organizational Development
- Performance Management
- Substance Use Disorder Identification and Treatment

Master's Programs

- Master of Addiction Counseling in Psychology, Plan C (M.A.C.P.)
- Master of Addiction Counseling in Psychology and Social Work (M.A.C.P. / M.S.W.)
- Master of Applied Industrial/Organizational Psychology, Plan C (M.A.I.O.P.)
- Master of Science in Psychology, Plan A*
- Master of Science in Psychology, Plan B*

Ph.D.

- Ph.D. in Psychology*

* Please see department for program of study.

Courses

Psychology (PSY)

PSY 100 General Psychology (GT-SS3) Credits: 3 (3-0-0)

Course Description: Principles of psychology emphasizing empirical approaches; theories and research on learning, individual differences, perception, social behavior.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C, Human Behavior, Culture, or Social Frameworks (GT-SS3).

PSY 121 Psychology of Happiness and Wellbeing Credit: 1 (1-0-0)

Course Description: Provides the tools of happiness and wellbeing. Drawing on the science of wellbeing and positive psychology, learn how to engage in exercises and activities to help manage stress and increase wellbeing. Topics include mindfulness, meaning and purpose, gratitude, positive relationships, positive body and health, goals, positive emotions, and character strengths. The focus is using tools to be resilient and happy.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Special Course Fee: No.

PSY 152 Science of Learning Credits: 3 (3-0-0)

Course Description: The science of learning and remembering with an emphasis on strategies and methods that students can use to enhance their learning and studying.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Social & Behavioral Sciences 3C.

PSY 182A Study Abroad--Costa Rica: Psychology First-Year Seminar Credit: 1 (0-0-1)

Course Description: Opportunity to learn cross-cultural psychology and the role of psychologists in Costa Rica. Address career options, curriculum planning, and build a skill base of successful academic strategies.

Prerequisite: None.

Registration Information: This is a partial semester course. Credit not allowed for both PSY 182A and PSY 192.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 192 Psychology First-Year Seminar Credit: 1 (0-0-1)

Course Description: Introduction to and discussion of topics in the major branches of psychology.

Prerequisite: None.

Registration Information: Sections may be offered: Online. Credit not allowed for both PSY 182A and PSY 192.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 210 Psychology of the Individual in Context Credits: 3 (3-0-0)

Course Description: Psychological explanations of cultural, social, and individual differences in behavior.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 250 Research Design and Analysis I Credits: 3 (3-0-0)

Course Description: Design, analysis, and reporting of psychological research.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 252 Mind, Brain, and Behavior Credits: 3 (3-0-0)

Course Description: Psychological, physiological, and evolutionary explanations of perception, cognition, and behavior.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 253 Human Factors and Engineering Psychology Credits: 3 (3-0-0)

Course Description: Introduction to human factors psychology and its connection to engineering psychology. Engineering psychology involves understanding the human mind as it relates to technology and systems. Human factors psychology applies knowledge of human behavior to the development and refinement of technology, training, and systems.

Prerequisite: None.

Registration Information: Offered as an online course only. Credit not allowed for both PSY 253 and PSY 280A1.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 260 Child Psychology Credits: 3 (3-0-0)

Course Description: Description and explanation of development of human behavior emphasizing theory and research concerned with infant and child.

Prerequisite: PSY 100.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 292A Seminar: Industrial/Organizational Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 292B Seminar: Mind, Brain & Behavior Credit: 1 (0-0-1)

Course Description:

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 320 Psychopathology Credits: 3 (3-0-0)

Course Description: Definition and description of psychopathology; theory and research on factors in etiology and treatment of behavior disorders.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 325 Psychology of Personality Credits: 3 (3-0-0)

Course Description: Theory and research related to personality as a psychological concept; analytic, phenomenological, and behavioristic views.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 327 Psychology of Women Credits: 3 (2-0-1)

Course Description: Contemporary theory and research focusing on emotional, cognitive, biosocial, and interpersonal contributions to female identity and sex role.

Prerequisite: PSY 100.

Registration Information: Must register for lecture and recitation.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 328 Psychology of Human Sexuality Credits: 3 (3-0-0)

Course Description: Biopsychosocial review of human sexuality including cross cultural analysis, sexual development, social perspectives and values, sexual dysfunction, sexual healing interventions, and intersectional-sexological analysis of the human sexual experience.

Prerequisite: HDFS 101 or PSY 100 or SOWK 105.

Registration Information: Junior standing. Sections may be offered: Online. Credit not allowed for both PSY 228 and PSY 328.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 330 Clinical and Counseling Psychology Credits: 3 (3-0-0)

Course Description: Conceptualization of clients, assessment, intervention techniques for behavior change, research methods, ethical issues.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 335 Forensic Psychology Credits: 3 (3-0-0)

Course Description: The psychology of crime and criminal behavior, including theory on deviance, the criminal mind, and the root causes of violence in society.

Prerequisite: PSY 100.

Registration Information: Junior or senior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 340 Organizational Psychology Credits: 3 (3-0-0)

Course Description: Theories and research on interpersonal relations, work group processes, decision making, power, and change strategies within organizations.

Prerequisite: PSY 250.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 341 Organizational Psychology Laboratory Credit: 1 (0-2-0)

Course Description: Application of organizational psychology through simulations and field involvements.

Prerequisite: PSY 340, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 345 Occupational Health Psychology Credits: 3 (3-0-0)

Course Description: Overview of seminal and current research on topics of work stress and occupational health psychology.

Prerequisite: PSY 100.

Restriction: Must not be a: Freshman.

Registration Information: Sophomore standing. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 350 Research Design and Analysis II Credits: 3 (3-0-0)

Course Description: Design, analysis, and reporting of psychological research.

Prerequisite: PSY 250.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 352 Learning and Memory Credits: 3 (3-0-0)

Course Description: Research, theory, and applications regarding conditioning, learning, and retention in animals and humans.

Prerequisite: PSY 252.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 354 Human-Computer Interaction Credits: 3 (3-0-0)

Course Description: Theoretical and applied areas of psychology and computer science in the area of human-computer interaction.

Prerequisite: PSY 100.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 360 Psychology of Drug Addiction Treatment Credits: 3 (3-0-0)

Course Description: Psychological theory and method for treating substance use addictions.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 361 Addiction Counseling Case Conceptualization Credits: 3 (3-0-0)

Course Description: Assessment and diagnostic impression during client intake; the components of clinical assessment, including biopsychosocial interventions, diagnosis using the DSM-V, and use of the ASAM criteria; stages of treatment, systems of care, and facets of service planning.

Prerequisite: PSY 100.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Enrollment in the Accelerated Addiction Counseling Concentration. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 362 Professional Issues in Addiction Treatment Credits: 3 (3-0-0)

Course Description: Diversity, ethno-cultural, and ethical issues in drug addiction treatment.

Prerequisite: PSY 100, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 364 Infectious Diseases and Substance Use Credits: 3 (0-0-3)

Course Description: Infectious disease transmission/progression related to substance use, risk assessment and treatment of substance users in alcohol and drug treatment.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 365 Addiction Counseling Techniques Credits: 3 (3-0-0)

Course Description: Group counseling skills and cognitive behavioral therapy for addiction counseling.

Prerequisite: PSY 100.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Enrollment in the Accelerated Addiction Counseling Concentration. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 366 Foundational Addiction Counseling Skills Credits: 3 (3-0-0)

Course Description: Entry level training in the treatment of substance use disorders with a focus on introductory motivational interviewing and group therapy for individuals with substance use disorders.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 370 Psychological Measurement and Testing Credits: 3 (3-0-0)

Course Description: Measurement theory including scale properties, reliability, and validity; construction and evaluation of psychological tests.

Prerequisite: PSY 250.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 371 Psychological Measurement and Testing Lab Credit: 1 (0-2-0)

Course Description: Exercises and problems in test administration, norming, reliability, validity, and scale construction.

Prerequisite: PSY 370, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 384 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description: Supervised teaching, training, and discussion leadership in undergraduate courses.

Prerequisite: PSY 100.

Registration Information: Written consent of department chair. A maximum of 10 combined credits for all 384 and 484 courses are counted toward graduation requirements. Enrollment limited to one per student per semester.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 392 Honors Seminar: Current Topics in Psychology Credits: 2 (0-0-2)

Course Description: Research areas in psychology; reading and discussing current journal articles.

Prerequisite: PSY 100 and PSY 250.

Registration Information: Enrollment in University Honors Program required.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

PSY 401 History and Systems of Psychology Credits: 3 (3-0-0)

Course Description: Philosophical and scientific underpinnings of psychology; major historical developments in psychology; schools of psychological thought.

Prerequisite: PSY 250.

Registration Information: Junior or senior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 410 Psychobiology of Addictions Credits: 3 (3-0-0)

Course Description: Biological basis of the psychology of addictions.

Prerequisite: PSY 250 and PSY 252.

Restriction: .

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 437 Psychology of Gender Credits: 3 (3-0-0)

Course Description: Psychology of gender in cultural context.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 440 Industrial Psychology Credits: 3 (3-0-0)

Course Description: The application of psychological theories and principles to understand how people behave in the workplace and to improve workers' productivity and well-being.

Prerequisite: PSY 250.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 441 Industrial Psychology Laboratory Credit: 1 (0-2-0)

Course Description: Hands-on experience with concepts such as job analysis, performance appraisals, interviews, and training, designed to supplement information provided in PSY 440.

Prerequisite: PSY 440, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 450 Applied Research Methods in Psychology II Credits: 4 (3-2-0)

Course Description: Interpretation and reporting of psychological research findings.

Prerequisite: PSY 350.

Registration Information: Must register for lecture and laboratory. Enrollment in University Honors Program required.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 451 Evaluating Data Visualizations Credit: 1 (0-2-0)

Course Description: Empirical evaluation of the effectiveness of and biases in data visualizations through design of experiments, calculation of performance measures, and interpretation of user studies related to visualizations. Hands-on experience running experiments, analyzing data, and disseminating the results.

Prerequisite: STAT 158.

Registration Information: Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 452 Cognitive Psychology Credits: 3 (3-0-0)

Course Description: Human thinking processes as related to perception, attention, memory, knowledge representation, reasoning, decision making, and problem solving.

Prerequisite: PSY 252.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 453 Cognitive Psychology Laboratory Credits: 2 (0-4-0)

Course Description: Exercises in laboratory research in perceptual processes, attention, memory, language, problem solving, and decision making.

Prerequisite: PSY 452, may be taken concurrently.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 454 Biological Psychology Credits: 3 (3-0-0)

Course Description: Research and theory on the biological basis of behavior.

Prerequisite: PSY 252.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 455 Biological Psychology Laboratory Credits: 2 (0-4-0)

Course Description: Laboratory exercises in biological psychology.

Prerequisite: PSY 454, may be taken concurrently and PSY 250.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 456 Sensation and Perception Credits: 3 (3-0-0)

Course Description: Review of research on physiological substrates of sensation; methods of scaling sensory experience; role of perception in behavioral adaptation.

Prerequisite: PSY 252.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 457 Sensation and Perception Laboratory Credits: 2 (0-4-0)

Course Description: Review of research on physiological substrates of sensation; methods of scaling sensory experience; role of perception in behavioral adaptation.

Prerequisite: PSY 456, may be taken concurrently and PSY 250.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 458 Cognitive Neuroscience Credits: 3 (3-0-0)

Course Description: Review of the human brain and its mediation of cognitive processes.

Prerequisite: PSY 252.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 459 Cognitive Neuroscience Laboratory Credits: 2 (0-4-0)

Course Description: Laboratory exercises in cognitive neuroscience.

Prerequisite: PSY 458, may be taken concurrently and PSY 250.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 460 Child Exceptionality and Psychopathology Credits: 3 (3-0-0)

Course Description: Definition and description of child exceptionality and psychopathology; theory and research in etiology, educational implications, and treatment.

Prerequisite: PSY 100.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 465 Adolescent Psychology Credits: 3 (3-0-0)

Course Description: Contemporary theory and research on adolescence including physiological and psychological changes, social influences.

Prerequisite: PSY 100.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 484 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description: Advanced supervised teaching, training, and discussion leadership in undergraduate courses.

Prerequisite: PSY 100.

Registration Information: Written consent of department chair required. A maximum of 10 combined credits for all 384 and 484 are counted towards graduation requirements.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 486 Practicum Credits: Var[1-3] (0-0-0)

Course Description: Supervised work experience in approved psychological setting with periodic consultation of faculty.

Prerequisite: None.

Registration Information: Enrollment limited to one per student per semester.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 487 Internship Credits: Var[1-3] (0-0-0)

Course Description: Supervised affiliation with and/or service work in approved psychological setting.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 488 Field Placement Credits: Var[1-3] (0-0-0)

Course Description: Supervised affiliation with and/or service work in approved psychological setting.

Prerequisite: None.

Registration Information: Enrollment restricted to students in the Addictions Counseling Concentration or Counseling/Clinical Concentration. Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: Yes.

PSY 492A Seminar: Applied Social Psychology Credits: Var[1-3] (0-0-0)

Course Description: Review of theory, research and/or practice relevant to various subtopics in social psychology.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Grade Modes: Instructor Option, Traditional.

Special Course Fee: No.

PSY 492B Seminar: Cognitive Psychology Credits: Var[1-3] (0-0-0)

Course Description: Review of theory, research and/or practice relevant to various subtopics in cognitive psychology.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 492C Seminar: Counseling/Clinical Psychology Credits: Var[1-3] (0-0-0)

Course Description: Review of theory, research and/or practice relevant to various subtopics in counseling/clinical psychology.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 492D Seminar: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)

Course Description: Review of theory, research and/or practice relevant to various subtopics in industrial/organizational psychology.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Terms Offered: Fall, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 492E Seminar: Perceptual and Brain Sciences Credits: Var[1-3] (0-0-0)

Course Description: Review of theory, research and/or practice relevant to various subtopics in perceptual/brain sciences.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 492F Seminar: Special Topics in Psychology Credits: Var[1-3] (0-0-0)

Course Description: Review of theory, research and/or practice relevant to various subtopics in psychology.

Prerequisite: None.

Registration Information: Sections may be offered: Online.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 493 Capstone Seminar Credits: 3 (0-0-3)

Course Description: Special, controversial, and emerging topics in psychology, considered in the context of foundational knowledge and principles from the field.

Prerequisite: PSY 210 and PSY 250 and PSY 252.

Registration Information: Senior standing. Sections may be offered: Online.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 495A Independent Study: Applied Social Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation in applied social psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 495B Independent Study: Cognitive Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation in cognitive psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 495C Independent Study: Counseling/Clinical Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation in counseling/clinical psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 495D Independent Study: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation in industrial/organizational psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 495E Independent Study: Perceptual and Brain Sciences Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of the psychology of perceptual and brain sciences under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 495F Independent Study: Special Topics in Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of topics in psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 496A Group Study: Applied Social Psychology Credits: Var[1-3] (0-0-0)

Course Description: Collective investigation of applied social psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 496B Group Study: Cognitive Psychology Credits: Var[1-3] (0-0-0)

Course Description: Collective investigation of cognitive psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 496C Group Study: Counseling/Clinical Psychology Credits: Var[1-3] (0-0-0)

Course Description: Collective investigation of counseling/clinical psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 496D Group Study: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)

Course Description: Collective investigation of industrial/organizational psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 496E Group Study: Perceptual and Brain Sciences Credits: Var[1-3] (0-0-0)

Course Description: Collective investigation of perceptual and brain sciences within psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 496F Group Study: Special Topics in Psychology Credits: Var[1-3] (0-0-0)

Course Description: Collective investigation of topics in psychology under direction of faculty.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 498A Research: Applied Social Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in applied social psychology, culminating in a formal research paper.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 498B Research: Cognitive Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in cognitive psychology, culminating in a formal research paper.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 498C Research: Counseling/Clinical Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in counseling/clinical psychology, culminating in a formal research paper.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 498D Research: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in industrial/organizational psychology, culminating in a formal research paper.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 498E Research: Perceptual and Brain Sciences Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in perceptual and brain sciences within psychology, culminating in a formal research paper.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 498F Research: Special Topics in Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project on special topics in psychology, culminating in a formal research paper.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 499A Thesis: Applied Social Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in applied social psychology, culminating in a thesis presented to a faculty committee.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 499B Thesis: Cognitive Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in cognitive psychology, culminating in a thesis presented to a faculty committee.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 499C Thesis: Counseling/Clinical Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in counseling/clinical psychology, culminating in a thesis presented to a faculty committee.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 499D Thesis: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in industrial/organizational psychology, culminating in a thesis presented to a faculty committee.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 499E Thesis: Perceptual and Brain Sciences Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in perceptual/brain sciences within psychology, culminating in a thesis presented to a faculty committee.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 499F Thesis: Special Topics in Psychology Credits: Var[1-3] (0-0-0)

Course Description: Independent research project in a topic area of psychology, culminating in a thesis presented to a faculty committee.

Prerequisite: None.

Registration Information: Written consent of instructor. Sections may be offered: Online.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 500 Advanced Introduction to Positive Psychology Credits: 3 (3-0-0)

Course Description: Explore the theoretical and empirical foundations of positive psychology with emphasis on learning to evaluate and develop science-based positive psychology applications. Examine topics like meaning, purpose, character strengths, relationships, health, emotions, spirituality, leadership, and education.

Prerequisite: None.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 515 Women's Health Credits: 3 (3-0-0)

Course Description: Current issues in women's health.

Prerequisite: None.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

PSY 517 Perspectives in Global Health Credits: 3 (0-0-3)

Also Offered As: IE 517.

Course Description: Science, skills, and beliefs directed at the maintenance and improvement of health for all people.

Prerequisite: None.

Registration Information: Credit not allowed for both PSY 517 and IE 517.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

PSY 522 Positive Sport Psychology Credits: 3 (3-0-0)

Course Description: Introduction to theory, research, and practical application related to personal growth, well-being, and peak performance among athletes, leveraging the disciplines of positive psychology and sport psychology.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 550 Responsible Conduct of Psychological Research Credit: 1 (1-0-0)

Course Description: Application of professional norms and research ethics in the conduct of psychological research.

Prerequisite: None.

Registration Information: Graduate standing or consent of instructor. This is a partial-semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 573 Psychopharmacology of Addictions Credits: 3 (3-0-0)

Course Description: Neurobiological basis of addiction and how addictive substances affect neurochemistry.

Prerequisite: PSY 250.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Enrollment in the Major in Psychology, Accelerated Addiction Counseling Concentration. Offered as an online course only.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 574 Addiction Counseling & Co-Occurring Disorders Credits: 3 (3-0-0)

Course Description: Development of clinical skills pertaining to addiction and co-occurring conditions; identification and diagnosis of conditions that commonly co-occur with substance use disorders.

Prerequisite: PSY 250.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Junior standing. Enrollment in the Accelerated Addiction Counseling Concentration. Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 575 Addiction Counseling with Diverse Populations Credits: 3 (3-0-0)

Course Description: Development of culturally responsive clinical skills for delivering addiction counseling services to diverse populations; development of multicultural competence based on an understanding of culture, cultural humility, diversity, justice, social justice, and systematic racial injustice.

Prerequisite: PSY 250.

Restriction: Must not be a: Freshman, Sophomore.

Registration Information: Enrollment in the Accelerated Addictions Counseling Concentration. Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 595A Independent Study: Applied Social Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a topic in applied social psychology under direction of faculty.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 595B Independent Study: Cognitive Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a topic in cognitive psychology under direction of faculty.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 595C Independent Study: Counseling/Clinical Psych Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a topic in counseling/clinical psychology under direction of faculty.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 595D Independent Study: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)

Course Description: Individual investigation of a topic in industrial/organizational psychology under direction of faculty.

Prerequisite: None.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 595E Independent Study: Perceptual/Brain Sciences Credits: Var[1-3] (0-0-0)**Course Description:** Individual investigation of a topic in perceptual and brain sciences under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 595F Independent Study: Special Topics in Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Individual investigation of a special topic in psychology under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 596A Group Study: Applied Social Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Collective investigation of a topic in applied social psychology under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 596B Group Study: Cognitive Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Collective investigation of a topic in cognitive psychology under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 596C Group Study: Counseling/Clinical Psych Credits: Var[1-3] (0-0-0)****Course Description:** Collective investigation of a topic in counseling/clinical psychology under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 596D Group Study: Industrial/Organizational Psych Credits: Var[1-3] (0-0-0)****Course Description:** Collective investigation of a topic in industrial/organizational psychology under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 596E Group Study: Perceptual/Brain Sciences Credits: Var[1-3] (0-0-0)****Course Description:** Collective investigation of a topic in perceptual and brain sciences under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 596F Group Study: Special Topics in Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Collective investigation of a special topic in psychology under direction of faculty.**Prerequisite:** None.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 600A Advanced Psychology: History Credits: 3 (3-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 600B Advanced Psychology: Cognitive Neuroscience Credits: 3 (3-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 600C Advanced Psychology: Neuropsychology Credits: 3 (3-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 600D Advanced Psychology: Sensation and Perception Credits: 3 (3-0-0)****Also Offered As:** NB 600.**Course Description:** Neural mechanisms of human perception; color and depth perception, pitch, loudness, and the effects of aging.**Prerequisite:** PSY 100 to 799 - at least 15 credits and PSY 456.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Credit not allowed for both PSY 600D and NB 600.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 600E Advanced Psychology: Animal Learning Credits: 3 (3-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 600F Advanced Psychology: Human Learning and Memory Credits: 3 (3-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring.**Grade Mode:** Traditional.**Special Course Fee:** No.

PSY 600G Advanced Psychology: Social Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 600H Advanced Psychology: Lifespan Development Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 600I Advanced Psychology: Personality Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 600J Advanced Psychology: Health Psychology Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 600K Advanced Psychology: Measurement Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both PSY 600K and PSY 605.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 600L Advanced Psychology: Human Performance, Motor and Intellectual Capacities Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 600M Advanced Psychology: Cognitive Processes Credits: 3 (3-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 601 Measurement Laboratory Credit: 1 (0-2-0)

Course Description: Laboratory experience using measurement concepts and procedures.

Prerequisite: PSY 600K, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

PSY 602A Foundations in Psychology: History and Systems Credit: 1 (1-0-0)

Course Description: One of a series of partial-semester courses that establish the Foundations of Psychology; covers philosophical and scientific underpinnings of psychology, major historical developments in psychology, and schools of psychological thought.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 602B Foundations in Psychology: Lifespan Development Credit: 1 (1-0-0)

Course Description: One of a series of partial-semester courses that establish the Foundations of Psychology; covers physical, cognitive, and psychosocial development across the lifespan.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 602C Foundations in Psychology: Biological Bases of Behavior Credit: 1 (1-0-0)

Course Description: One of a series of partial-semester courses that establish the Foundations of Psychology; covers the biological bases of perception, cognition, and emotion.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 602D Foundations in Psychology: Cognitive Bases of Behavior Credit: 1 (1-0-0)

Course Description: One of a series of partial-semester courses that establish the Foundations of Psychology; covers cognitive bases of behavior.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 602E Foundations in Psychology: Affective Bases of Behavior Credit: 1 (1-0-0)

Course Description: One of a series of partial-semester courses that establish the Foundations of Psychology; covers affective bases of behavior.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 602F Foundations in Psychology: Social Bases of Behavior Credit: 1 (1-0-0)

Course Description: One of a series of partial-semester courses that establish the Foundations of Psychology; covers social bases of behavior.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: This is a partial semester course.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 605 Applied Measurement Theory Credits: 3 (0-0-3)

Course Description: Study and application of measurement theory and methods for test construction and validation.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Credit not allowed for both PSY 605 and PSY 600K. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 610 Counseling and Clinical Pre-Practicum I Credits: 3 (3-0-0)

Course Description: Basic assessment and intervention skills; accurate observation, conceptualization, and response.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor.

Term Offered: Fall.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 611 Counseling and Clinical Pre-Practicum II Credits: 3 (3-0-0)

Course Description: Counseling and clinical techniques; assessment and intervention strategies; special applications.

Prerequisite: PSY 610.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 612 Introduction to Addiction Counseling Credits: 3 (3-0-0)

Course Description: Therapies used to treat individuals with substance use disorders, with an emphasis on empirically supported treatments.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Addiction Counseling.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 613 Advanced Addiction Counseling Credits: 3 (3-0-0)

Course Description: Advanced therapies used to treat individuals with substance use disorders, with an emphasis on empirically supported treatments.

Prerequisite: PSY 612.

Restriction: Must be a: Graduate, Professional.

Registration Information: Psychology graduate students.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 620 Addiction Counseling Concepts Credits: 4 (4-0-0)

Course Description: Client records management, client assessment, diagnoses and treatment practices for addiction counselors. Develop the basic skills necessary to create and maintain therapeutic relationship.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the MACP. Sections may be offered: Online. Credit not allowed for both PSY 620 and PSY 680A2.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 621 Psychology of Calling and Meaningful Work Credits: 3 (3-0-0)

Course Description: Overview of theory, research and practice related to calling and meaningful work. Topics occupy the intersection of positive psychology, vocational psychology, and organizational behavior. Introduction to historical, philosophical, theoretical, methodological, and practical implications of the accumulating research related to career development, work, and eudaimonic well-being.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 623 Positive Education Credits: 3 (3-0-0)

Course Description: Examines the field of positive education through a multilevel approach including student, staff, and community wellbeing, core theories and concepts in positive education, and advances and research on implementing positive education programs and assessing their effects. This course is for people interested in educational systems that teach academic content and also help students develop the best potential and cultivate skills for wellbeing.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 624 Positive Career Counseling and Coaching Credits: 3 (3-0-0)

Course Description: Theory, research, and evidence-based best-practices for career development counseling and coaching from a positive psychology perspective.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PSY 625 Positive Organizations and Leadership Credits: 3 (3-0-0)

Course Description: Theory, research, and applications within Positive Organizational Scholarship (POS) and positive leadership.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

PSY 643 Industrial/Organizational Psychology I Credits: 3 (3-0-0)

Course Description: Integration of multiple perspectives for examining work organizations, roles, and relationships, and organizational entry and socialization.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Credit not allowed for both PSY 643 and PSY 647.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 644 Industrial/Organizational Psychology II Credits: 3 (3-0-0)

Course Description: Multiple perspectives for examining individual and organizational development, orientation to organizations, and science and practice in industrial/organizational psychology.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 645 Industrial/Organizational Psychology at Work I Credits: 2 (2-0-0)

Course Description: Integrating theory, research, and practice in industrial/organizational settings. Assessment and development of applications of psychology in organizations.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 646 Industrial/Organizational Psychology at Work II Credits: 2 (2-0-0)

Course Description: Development and application of scientific, ethical, and professional standards and competencies in applying psychology in industrial/organizational settings.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 647 Applied Industrial Psychology Credits: 3 (0-0-3)

Course Description: Applications of theory and methods for recruitment, selection, training, and performance management within organizations.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Credit not allowed for both PSY 647 and PSY 643. Offered as an online course only.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 648 Applied Organizational Psychology Credits: 3 (0-0-3)

Course Description: Study of work behavior, roles, and relationships within organizations.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 652 Methods of Research in Psychology I Credits: 4 (3-2-0)

Course Description: Psychological research emphasizing hypothesis testing and simple research designs, introducing general linear model approach.

Prerequisite: STAT 300 to 499 - at least 1 course.

Restriction: Must be a: Graduate, Professional.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both PSY 652 and PSY 662.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 653 Methods of Research in Psychology II Credits: 4 (3-2-0)

Course Description: Advanced research designs emphasizing general linear model approach.

Prerequisite: PSY 652.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Registration Information: Must register for lecture and laboratory. Credit not allowed for both PSY 653 and PSY 663

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 654 Research Methods for Addiction Counseling Credits: 3 (3-0-0)

Course Description: Skills essential to addiction counseling research, as well as theory and techniques pertaining to research design and evaluation. Preparation to critically evaluate published research studies; acquire the research language and semantics common in professional journals; and effectively design, implement, and evaluate original research.

Prerequisite: PSY 612 and PSY 613, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only. Credit not allowed for both PSY 654 and PSY 680A4.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 655A Research Issues and Models in Psychology:Applied Credits: 3 (3-0-0)

Course Description: Generation and development of research ideas, evaluating approaches, interpreting and reporting findings.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 655B Research Issues and Models in Psychology: General Experimental Credits: 3 (3-0-0)

Course Description: Generation and development of research ideas, evaluating approaches, interpreting and reporting findings.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 660 Applied Cross-Cultural Industrial/Organizational Psychology Credits: 3 (0-0-3)

Course Description: Cultural differences in the application of individual and organizational interventions to improve human and organizational effectiveness.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology; PSY 647 or PSY 648. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 661 Applied Organizational Development Credits: 3 (0-0-3)

Course Description: Techniques and interventions for developing, improving and effecting change in organizations through diagnosis, planned change, and survey feedback.

Prerequisite: PSY 648.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only. Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 662 Applied Psychological Research Methods I Credits: 4 (0-0-4)

Course Description: Psychological research emphasizing hypothesis testing and simple research designs, the general linear model approach with emphasis on application.

Prerequisite: STAT 300 to 499 - at least 1 course.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Credit not allowed for both PSY 662 and PSY 652. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 663 Applied Psychological Research Methods II Credits: 4 (0-0-4)

Course Description: Advanced research designs emphasizing general linear model approach with emphasis on application.

Prerequisite: PSY 662.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Credit not allowed for both PSY 663 and PSY 653. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 665 Applied Psychological Research Design Credits: 3 (0-0-3)

Course Description: Review of scientific method, generation of hypotheses, and design of laboratory and field research studies.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology; any graduate applied statistics course. Offered as an online course only.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 666 Succession Planning and Leadership Development Credits: 3 (0-0-3)

Course Description: Examines modern theories of leadership, strategies for succession planning; training, coaching, mentoring, professional development for leadership.

Prerequisite: PSY 648.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Offered as an online course only.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 667 Competency Modeling and Criterion Development Credits: 3 (0-0-3)

Course Description: Conducting job analyses and competency modeling within organizations, application of the results of those processes to criterion development.

Prerequisite: PSY 647.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Offered as an online course only.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 668 Workforce Training and Development Credits: 3 (0-0-3)

Course Description: An overview of adult learning theory, emphasizing the role of I/O psychology in identifying, designing, transferring, and evaluating training.

Prerequisite: PSY 647.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied Industrial/Organizational Psychology. Offered as an online course only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 669 Capstone: Practicum and Skills Development Credits: 3 (0-0-3)
Course Description: Refine I/O consulting skills through applied research/ consulting projects with actual organizations, working in virtual teams with faculty mentors.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Plan C graduate program in Applied I/O Psychology; 32 hours of program requirements. Offered as an online course only.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 670 Psychological Measurement-Personality Credits: 3 (3-0-0)

Course Description: Construction, administration, interpretation of objectional measures of personality including aptitudes, abilities, interests.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 671 Assessment for Addiction Counseling Credits: 3 (3-0-0)

Course Description: History of individual appraisal, the major technical considerations governing assessments, and a survey of measurement devices in the cognitive and affective domains. Uses and implications of standardized and non-standardized assessment devices. Responsible use and interpretation of ability, aptitude, interest, personality, and career development assessment tools.

Prerequisite: PSY 612 and PSY 613, may be taken concurrently.

Restriction: Must be a: Graduate, Professional.

Registration Information: Offered as an online course only. Credit not allowed for both PSY 671 and PSY 680A3.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 672 Psychological Assessment Credits: 3 (3-0-0)

Course Description: Use of test data to determine cognitive functioning and predict behavior; supervised test administration and interpretation.

Prerequisite: PSY 670.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 675 Ethics and Professional Psychology Practice Credits: 3 (3-0-0)

Course Description: Ethical practice of psychology, duty-to-warn statutes, Colorado law, problematic ethical situations.

Prerequisite: PSY 611.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Addiction Counseling.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 677 Psychology of Women, Men, and Gender Credits: 3 (0-0-3)

Course Description: Focuses on the psychology of women, men and gender, by intersectionalities, and in cultural, transnational context. Topics include gendered life paths; gender and the media; gender and relationships; gender and health, gender and work; and gender and globalization.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 684 Supervised College Teaching Credits: Var[1-3] (0-0-0)

Course Description: Supervised teaching, training and discussion leadership in undergraduate courses.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: S/U Sat/Unsat Only.

Special Course Fee: No.

PSY 686A Practicum: Counseling and Diagnosis I Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 686C Practicum:Industrial/Organizational I Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 692B.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 686D Practicum: School I Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 692B.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 686E Practicum: Applied Social I Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 686F Practicum:Perceptual and Brain Sciences I Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 611.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 686G Practicum: Cognitive I Credits: Var[1-18] (0-0-0)**Course Description:****Prerequisite:** PSY 611.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Instructor Option.**Special Course Fee:** No.**PSY 692A Seminar: Applied Social Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 692B Seminar: Cognitive Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 692C Seminar: Counseling Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 692E Seminar: Perceptual and Brain Sciences Credits:****Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 692F Seminar: Special Topics in Psychology Credits:****Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 699A Thesis: Applied Social Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 699B Thesis: Cognitive Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 699C Thesis: Counseling Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 699D Thesis: Industrial/Organizational Psychology Credits:****Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 699E Thesis: Perceptual and Brain Sciences Credits:****Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 710 Advanced Addiction Treatments Credits: 3 (3-0-0)****Course Description:** Advanced addiction treatments and specifically Screening, Brief Intervention, and Referral to Treatment (SBIRT). PSY 724 Motivational Interviewing Credits: 3 (3-0-0)

Course Description: Motivational interviewing in the treatment of individuals with substance use disorders.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Psychology graduate students or admission to the Master of Addiction Counseling.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 726 Neuropharmacology of Addiction Credits: 3 (3-0-0)

Course Description: Neurobiological basis of addiction and how addictive substances affect neurochemistry.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Psychology graduate students or admission to the Master of Addiction Counseling.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 727 Theories of Vocational Development Credits: 3 (3-0-0)

Course Description: Nature and current status of vocational development theory with implications for career counseling.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Psychology graduate students only.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 729 Counseling and Psychotherapy II Credits: 3 (3-0-0)

Course Description: Theory and practice of group psychotherapy and counseling.

Prerequisite: PSY 722.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 753 Structural Equation Modeling Credits: 3 (3-0-0)

Course Description: Fundamental concepts and application of Structural Equation Modeling, a statistical framework which is more flexible than regression analysis and is at the core of many modern approaches to analyzing complex datasets.

Prerequisite: PSY 652 and PSY 653.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 754 Multivariate Analysis in Behavioral Sciences Credits: 3 (3-0-0)

Course Description: Multivariate analysis, including factor and component analysis, applied to psychological research.

Prerequisite: PSY 653.

Restriction: Must be a: Graduate, Professional.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

PSY 775 Diversity Issues in Counseling Credits: 3 (3-0-0)

Course Description: Diversity issues in clients and counselors such as gender, race, age, sexual orientation, education, religion, disability, socioeconomic status.

Prerequisite: PSY 611.

Restriction: Must be a: Graduate, Professional.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 776 Business and Practice of Addiction Counseling Credits: 3 (3-0-0)

Course Description: Business aspects and professional development issues associated with a career in addiction counseling.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Psychology graduate students or admission to the Master of Addiction Counseling.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 784 Supervised College Teaching Credits: Var[1-18] (0-0-0)

Course Description: Philosophy, approaches, and techniques of college-level instruction; supervised teaching with consultation of faculty.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786A Advanced Practicum: Counseling and Diagnosis II Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 686A.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786C Advanced Practicum: Industrial/Organizational II Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 686C.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786D Advanced Practicum: School II Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 686D.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786E Advanced Practicum: Clinical Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 686A or PSY 686C or PSY 686D or PSY 686E or PSY 686F or PSY 686G.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786F Advanced Practicum: Supervision Credits: Var[1-18] (0-0-0)**Course Description:**

Prerequisite: PSY 686A or PSY 686C or PSY 686D or PSY 686E or PSY 686F or PSY 686G.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786G Advanced Practicum: Applied Social II Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 686E.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786H Advanced Practicum: Perceptual and Brain Sciences

II Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 686F.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786I Advanced Practicum: Cognitive II Credits: Var[1-18] (0-0-0)**Course Description:**

Prerequisite: PSY 686G.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 786J Advanced Practicum: Vocational Assessment Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: PSY 610 and PSY 727.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 787 Internship Credits: Var[1-18] (0-0-0)

Course Description: Supervised work experience under departmental guidelines in approved psychological agency or setting.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Instructor Option.

Special Course Fee: No.

PSY 792A Advanced Seminar: Applied Social Psychology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 792B Advanced Seminar: Cognitive Psychology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 792C Advanced Seminar: Counseling Psychology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 792D Advanced Seminar: Industrial/Organizational

Psychology Credits: Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Graduate cooperative program, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 792E Advanced Seminar: Perceptual and Brain Sciences Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 792F Advanced Seminar: Special Topics in Psychology Credits:

Var[1-18] (0-0-0)

Course Description:

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 793 Clinical Supervision of Addiction Counseling Credits: 3 (3-0-0)

Course Description: Tools and models in the supervision and treatment of addictions.

Prerequisite: None.

Restriction: Must be a: Graduate, Professional.

Registration Information: Admission to the Master of Addiction Counseling.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

PSY 795A Independent Study: Applied Social Psychology Credits: Var[1-3] (0-0-0)**Course Description:** Independent investigation of a topic in applied social psychology under direction of faculty.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Primarily for doctoral candidates in psychology.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 795B Independent Study: Cognitive Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Independent investigation of a topic in cognitive psychology under direction of faculty.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Primarily for doctoral candidates in psychology.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 795C Independent Study: Counseling/Clinical Psych Credits: Var[1-3] (0-0-0)****Course Description:** Independent investigation of a topic in counseling/clinical psychology under direction of faculty.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Primarily for doctoral candidates in psychology.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 795D Independent Study: Industrial/Organizational Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Independent investigation of a topic in industrial/organizational psychology under direction of faculty.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Primarily for doctoral candidates in psychology.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 795E Independent Study: Perceptual/Brain Sciences Credits: Var[1-3] (0-0-0)****Course Description:** Independent investigation of a topic in perceptual and brain sciences under direction of faculty.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Primarily for doctoral candidates in psychology.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 795F Independent Study: Special Topics in Psychology Credits: Var[1-3] (0-0-0)****Course Description:** Independent investigation of a special topic in psychology under direction of faculty.**Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Registration Information:** Primarily for doctoral candidates in psychology.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** S/U Sat/Unsat Only.**Special Course Fee:** No.**PSY 799A Dissertation: Applied Social Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 799B Dissertation: Cognitive Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 799C Dissertation: Counseling Psychology Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 799D Dissertation: Industrial/Organizational Psych Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.**PSY 799E Dissertation: Perceptual and Brain Sciences Credits: Var[1-18] (0-0-0)****Course Description:****Prerequisite:** None.**Restriction:** Must be a: Graduate, Professional.**Terms Offered:** Fall, Spring, Summer.**Grade Mode:** Traditional.**Special Course Fee:** No.

Major in Psychology

Psychology is one of the most popular and versatile majors. The major emphasizes a strong background in the natural sciences (e.g., mathematics, chemistry, biology, statistics, human physiology), writing, and research.

Electives enable students to obtain a second major or minor in a field of interest or take pre-professional courses and graduate with:

1. A combination of courses and experiences to qualify for semiprofessional jobs in psychological settings or closely-related fields (e.g., addictions counseling);
2. A combination of courses providing a background for careers outside of psychology (e.g., human resources);
3. Pre-professional courses for potential admittance into professional training programs (e.g., medicine, occupational therapy, veterinary medicine); and/or
4. A complement of courses for potential admittance into psychology graduate school programs. Advanced degrees are often a prerequisite for professional careers in psychology.

Learning Objectives

Upon successful completion of the degree, students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.
3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.
5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.
6. Demonstrate the ability to write and communicate effectively on topics in psychology.
7. Appraise the diversity, complexity, and intersectionality of human experience.
8. Apply ethical standards to evaluate psychological science and practice.
9. Engage in professional development and lifelong learning.

Accelerated Program

The major in Psychology, General Psychology concentration, includes an accelerated program option (<https://provost.colostate.edu/accelerated-programs/>) for students to graduate on a faster schedule. Accelerated Programs typically include 15-16 credits each fall and spring semester for three years, plus 6-9 credits over two to three summer sessions (<https://summer.colostate.edu/acceleratedprograms/>). Students who enter CSU with prior credit (AP, IB, transfer, etc.) may use applicable courses to further accelerate their graduation. Visit the Office of the Provost website for additional information about Accelerated Programs (<https://provost.colostate.edu/accelerated-programs/>).

Potential Occupations

A B.S. degree in Psychology prepares students for a variety of career opportunities. Because of the strong science orientation, students develop a number of important skills required in a broad range of occupations. Skills such as written and oral communication, cooperation, analytical and critical thinking, and a background in the sciences demonstrate versatility and an ability to pursue a variety of career paths. Participating in paid or volunteer work, internships, research, study abroad, and experiential education opportunities are highly recommended to increase students' employment opportunities.

Possible career opportunities include, but are not limited to: addictions counselor, human services worker, case worker, mental health services

worker, probation officer, community relations officer, educator, program developer/administrator, human resources administrator, labor relations representative, compensation and benefits administrator, public relations specialist/special events administrator, advertising producer/writer, account services representative, media representative, market researcher, government program administrator, business manager, buying agent, sales representative, real estate broker, industrial/organizational consultant, psychometrician, neuropsychologist (with advanced degree), cognitive neuroscientist (with advanced degree), engineering psychologist (with advanced degree), clinical psychologist (with advanced degree), family therapist (with advanced degree), lawyer (with advanced degree), occupational therapist (with advanced degree), veterinarian (with advanced degree) or physician (with advanced degree).

Concentrations

- Accelerated Addictions Counseling Concentration
- Addictions Counseling Concentration
- Clinical/Counseling Psychology Concentration
- General Psychology Concentration
- Industrial/Organizational Concentration
- Mind, Brain, and Behavior Concentration

Major in Psychology, Accelerated Addictions Counseling Concentration

Students completing the Major in Psychology will receive a sound, liberal arts education grounded in the natural sciences. In attaining a B.S. degree, majors will acquire a solid foundation in the natural sciences; develop strong analytical, mathematical, and statistical skills; and develop skills in evaluating, designing, and analyzing psychological research.

Students in the Accelerated Addictions Counseling (AAC) Concentration focus on the psychology of treating addictions. The AAC Concentration is designed for students who are interested in completing the Accelerated Masters in Addiction Counseling in Psychology program. This is part of a Collaborative Campus Agreement between Northeastern Junior College (NJC) and CSU where the student completes an associate's degree at NJC, transfers to CSU and completes a B.S. degree and the AAC Concentration by taking online courses and remote courses offered on the NJC campus. Graduates who complete the concentration with a GPA of 3.00 or better and complete specific courses will be eligible for admission to the Graduate School to complete one year of graduate education and earn the Master of Addiction Counseling in Psychology, Plan C (M.A.C.P) degree.

Learning Objectives

Successful students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.
3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.
5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.
6. Demonstrate the ability to write and communicate effectively on topics in psychology.

7. Appraise the diversity, complexity and intersectionality of human experience.
8. Apply ethical standards to evaluate psychological science and practice.
9. Engage in professional development and lifelong learning.
10. Demonstrate knowledge and skills in counseling psychology and addictions treatment.

PSY 311C, PSY 350, the two lecture-lab pairs in psychology (for the AUCC 4A, 4B requirement) and the third additional lecture selection from: PSY 315, PSY 370, PSY 452, or PSY 458 .

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

Requirements

Effective Fall 2024

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252,

Freshman

Major in Psychology, Addictions Counseling Concentration

The Addictions Counseling concentration provides students with an undergraduate degree in psychology while completing the required courses for becoming certified addictions technicians in the state of Colorado. Besides coursework, students are required to complete internship hours at an approved facility. Students who are interested in the clinical/counseling field of psychology, but do not wish to seek an advanced degree in psychology, may find this an attractive concentration.

Learning Objectives

Successful students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.
3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.

5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.
6. Demonstrate the ability to write and communicate effectively on topics in psychology.
7. Appraise the diversity, complexity and intersectionality of human experience.
8. Apply ethical standards to evaluate psychological science and practice.
9. Engage in professional development and lifelong learning.
10. Demonstrate knowledge and skills in counseling psychology and addictions treatment.
11. Develop counseling skills via an internship in which they receive hands-on, supervised experience in an approved facility.
12. Complete the course work necessary for becoming a Certified Addictions Technician (CAT) in the state of Colorado.

Requirements Effective Fall 2024

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 311A, PSY 350, the two lecture-lab pairs in psychology (for the AUCC 4A, 4B requirement), and the additional PSY lecture selection from: PSY 315, PSY 370, PSY 452, or PSY 458.

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

Major in Psychology, Clinical/Counseling Psychology Concentration

The Clinical/Counseling Psychology concentration prepares students to pursue graduate education and careers in clinical and counseling psychology. Students in this concentration complete a set of core courses that focus on the application of psychological principles to personal and interpersonal functioning, assessment, and intervention. In addition to coursework, students are required to complete an internship at an approved facility as part of their capstone experience.

Learning Objectives

Successful students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.
3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.
5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.

6. Demonstrate the ability to write and communicate effectively on topics in psychology.
7. Appraise the diversity, complexity and intersectionality of human experience.
8. Apply ethical standards to evaluate psychological science and practice.
9. Engage in professional development and lifelong learning.
10. Demonstrate knowledge and skills in clinical/counseling psychology, in preparation for an advanced degree in this area.
11. Develop clinical/counseling skills via an internship in which they receive hands-on, supervised experience in an approved facility.

Requirements Effective Fall 2024

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 330, PSY 350, the two lecture-lab pairs in psychology (for the AUCC 4A, 4B requirement), and the additional PSY lecture selection from: PSY 315, PSY 452, PSY 454 or PSY 458.

Some courses with this prefix will satisfy the AUCC 3B requirement.⁶ Students should select a total of two lecture/lab pairs of courses over the junior and senior years. Two pairs are necessary to satisfy AUCC Cat 4A and 4B requirements.⁷ Select one 3- to 5-credit course from this list, excluding BZ 101, BZ 110, LIFE 102, BC 192, BZ 192, CHEM 192, CS 192, MATH 192, STAT 192, and variable credit options, that is not counted elsewhere. Acceptable MATH options are MATH 141, MATH 155, MATH 156, MATH 157, MATH 159, MATH 160, MATH 191, MATH 192, MATH 193, MATH 194, MATH 195, MATH 3** (excluding MATH 384) and MATH 4** (excluding MATH 484, MATH 487, MATH 495, MATH 498)⁸ Students may substitute other subtopics with department approval.⁹ Select one course from this list, excluding variable credit options, that is not counted elsewhere.¹⁰ Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program: Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 330, PSY 350, the two lecture-lab pairs in psychology (for the AUCC 4A, 4B requirement), and the additional PSY lecture selection from: PSY 315, PSY 452, PSY 454, or PSY 458.

Maximum of 12 credits allowed for graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F, PSY 499S, PSY 499T, PSY 499U, PSY 499V, PSY 499W, PSY 499X, PSY 499Y, PSY 499Z, PSY 499AA, PSY 499AB, PSY 499AC, PSY 499AD, PSY 499AE, PSY 499AF, PSY 499AG, PSY 499AH, PSY 499AI, PSY 499AJ, PSY Major in Psychology, General Psychology Concentration

Students who prefer a broad view of the field often choose the General Psychology concentration. Students in this concentration can tailor the psychology lecture/lab pair and upper division psychology elective requirements to fit their interests. Students with an interest in the applied applications of psychology are encouraged to participate in internships, while those with an interest in pursuing an advanced degree in graduate

school are encouraged to seek research experience with a faculty member.

Learning Objectives:

Successful students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.

3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.
5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.
6. Demonstrate the ability to write and communicate effectively on topics in psychology.
7. Appraise the diversity, complexity and intersectionality of human experience.
8. Apply ethical standards to evaluate psychological science and practice.
9. Engage in professional development and lifelong learning.

Requirements Effective Fall 2024

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 350, PSY 493, the two lecture-lab pairs in psychology (for the AUCC 4A, 4B requirement), and the additional PSY lecture selection from: PSY 315, PSY 340, PSY 370, PSY 440, PSY 452, PSY 454, PSY 456 or PSY 458.

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

Program Total Credits:			120

¹ MATH 120 may be completed as a substitute for MATH 117, MATH 118, and MATH 124.

² Select any CS course except CS 192 or variable credit options. Some courses with this prefix will also satisfy the AUCC 3B requirement.

³ Select any PHIL course except variable credit options. Some courses with this prefix will satisfy the AUCC 3B requirement.

⁴ Select any course in category 3C of the AUCC except HONR 492 or any PSY course.

⁵ Select any SPCM course except SPCM 178 and variable credit options. Some courses with this prefix will satisfy the AUCC 3B requirement.

⁶ Students should select a total of two lecture/lab pairs of courses over the junior and senior years. Two pairs are necessary to satisfy AUCC Cat 4A and 4B requirements.

⁷ Select one course from this list, excluding variable credit options, that is not counted elsewhere.

⁸ A total of 12 psychology elective credits are needed; 9 psychology elective credits must be upper division PSY non-special study courses other than those used to fulfill other major requirements and up to 3

credits can be 100- or 200-level PSY courses or any combination of special study credits.

⁹ Select one 3- to 5-credit course from this list, excluding BZ 101, BZ 110, LIFE 102, BC 192, BZ 192, CHEM 192, CS 192, MATH 192, STAT 192, and variable credit options, that is not counted elsewhere. Acceptable MATH options are MATH 141, MATH 155, MATH 156, MATH 157, MATH 159, MATH 160, MATH 161, MATH 3** (excluding MATH 384) and MATH 4** (excluding MATH 484, MATH 487, MATH 495, MATH 498)

¹⁰ Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 350, PSY 493, the two lecture-lab pairs in psychology (for the AUCC 4A,

4B requirement), and the additional PSY lecture selection from: PSY 315, PSY 340, PSY 370, PSY 440, PSY 452, PSY 454, PSY 456 or PSY 458.

PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488,

Major in Psychology, Industrial/Organizational Concentration

The Industrial/Organizational concentration prepares students to move into the workforce with a bachelor's degree or to pursue graduate education in industrial/organizational psychology. Students in this concentration take seminars that focus on psychology in the workplace.

These seminars cover topics such as leadership, work-life balance, training, and motivation. Students are strongly encouraged to participate in experiential education opportunities to enhance their marketability in the workforce, such as internships. Students are also encouraged to work as research assistants in order to strengthen their graduate school applications.

Learning Objectives

Successful students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.
3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.
5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.
6. Demonstrate the ability to write and communicate effectively on topics in psychology.
7. Appraise the diversity, complexity and intersectionality of human experience.
8. Apply ethical standards to evaluate psychological science and practice.

9. Engage in professional development and lifelong learning.
10. Demonstrate specialized knowledge of psychology as applied to the workplace, in support of direct employment or graduate education in industrial/organizational psychology.

Requirements Effective Fall 2024

Students must have a C or better in each of the following courses:

PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 350, PSY 493, and the three lecture-lab pairs in psychology (for the AUCC 4A, 4B requirement).

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

Major in Psychology, Mind, Brain, and Behavior Concentration

The Mind, Brain, and Behavior Concentration prepares students to be competitive candidates for graduate programs in cognitive psychology, cognitive neuroscience, behavioral neuroscience, and sensation and perception. Many students considering a career in medicine or an allied health profession also choose to complete this concentration. Students acquire a stronger science and quantitative background compared to the other concentrations in psychology. Students are encouraged to participate as undergraduate research assistants and work with a faculty member on a research project.

Learning Objectives

Successful students will:

1. Attain a solid foundation in the natural sciences.
2. Demonstrate strong analytical, mathematical, and statistical skills.
3. Identify, describe, and demonstrate knowledge of the major branches of psychology.
4. Describe, evaluate, and apply methods for conducting research and analyzing data in psychology.
5. Demonstrate the ability to analyze, synthesize, and evaluate material from psychology.

- 6. Demonstrate the ability to write and communicate effectively on topics in psychology.
- 7. Appraise the diversity, complexity and intersectionality of human experience.
- 8. Apply ethical standards to evaluate psychological science and practice.
- 9. Engage in professional development and lifelong learning.
- 10. Demonstrate knowledge of the physiological methods used to study the mind and brain.
- 11. Demonstrate knowledge of the major content ideas pertaining to the mind and brain (e.g., sensation, perception, cognition).
- 12. Attain background knowledge and hands-on experience in conducting research on the mind and brain, if the goal is to pursue a graduate degree in this field of study.

Requirements Effective Fall 2024

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250,PSY 252, PSY 350, PSY 493, the four MBB lecture courses, and the three MBB laboratory courses.

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

⁵ Select any SPCM course except SPCM 178 and variable credit options. Some courses with this prefix will satisfy the AUCC 3B requirement.

⁶ Select one course from this list, excluding variable credit options, that is not counted elsewhere.

⁷ Two PSY lecture courses from the set of PSY 452, PSY 454, PSY 456, PSY 458 are needed to satisfy the AUCC 4B requirement, and two PSY laboratory courses from the set of PSY 453, PSY 455, PSY 457, and PSY 459 are needed to satisfy the AUCC 4A requirement.

⁸ Selections may include any 300- or 400-level courses from DSCI, MATH, or STAT, excluding STAT courses used to satisfy other requirements.

⁹ Select any 300- or 400-level course from BC, BMS, BZ, CHEM, CS, or PH, excluding variable credit courses, that is not counted elsewhere.

¹⁰ Selection may include any 300- or 400-level laboratory course from BC, BMS, BZ, CHEM, CS, DSCI, MATH, PH, or STAT, not counted elsewhere.

¹¹ Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

Students must have a C or better in each of the following courses: PSY 100, PSY 192, PSY 210, PSY 250, PSY 252, PSY 350, PSY 493, the four MBB lecture courses, and the three MBB laboratory courses.

Maximum of 12 credits allowed toward graduation for any combination of PSY 295, PSY 296, PSY 384, PSY 484, PSY 486, PSY 487, PSY 488, PSY 495A-PSY 495F, PSY 496A-PSY 496F, PSY 498A-PSY 498F, PSY 499A-PSY 499F.

Freshman

Semester 1		Critical	Recommended	AUCC	Credits

Graduate Certificate in Applied Positive Psychology

The Graduate Certificate in Applied Positive Psychology provides foundational knowledge about the scientific study of human excellence, performance, and wellbeing, while also helping professionals gain skills to understand, develop, and use science-grounded practices and interventions in more specialized areas. The knowledge and skills learned in this certificate may be applied to students' own lives or to professional topics in leadership, work and organizations, education, sports, and psychotherapy.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students will:

1. Describe Positive Psychology, including what it is, its history, and how it emerged as a field.
2. Describe the role of the scientific method in Positive Psychology and the research strategies commonly used to research Positive Psychology topics.
3. Evaluate and apply the central theories and models employed in Positive Psychology.
4. Describe, evaluate, and analyze how Positive Psychology research has been applied to topic areas such as Work, Organizations, Leadership, Education, Sports Psychology, Coaching, Career Counseling, and/or Psychotherapy.
5. Create applications, interventions, and programs that are grounded in the science of Positive Psychology.

Requirements Effective Fall 2021

Additional coursework may be required due to prerequisites.

Code	Title	Credits
PSY 500	Advanced Introduction to Positive Psychology	3
Select three courses from the following:		9

PSY 522	Positive Sport Psychology	
PSY 621	Psychology of Calling and Meaningful Work	
PSY 623	Positive Education	
PSY 624	Positive Career Counseling and Coaching	
PSY 625	Positive Organizations and Leadership	
Program Total Credits:		12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Organizational Development

The Graduate Certificate in Organizational Development provides an introduction to the concepts and practices related to systems and technologies that facilitate organizational change and enhance organizational effectiveness. This certificate is designed for professionals involved with recruitment, selection, placement, training, and performance management of employees and staff in organizations.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students will:

1. Understand and define core theories that explain human behavior in the workplace and facilitate or resist change in organizations.
2. Define what it means to be an employer of choice and recommend multiple strategies to increase the attractiveness of an organization to individuals inside and outside the organization.
3. Develop and refine problem-solving and consulting skills to facilitate change and development in organizations.
4. Conduct empirically-based diagnostic activities necessary to plan organizational change and development interventions.
5. Design empirically-based evaluation interventions to affect change in organizations.

6. Conduct empirically-based evaluation activities necessary to determine the effectiveness of organizational change and development interventions.

Requirements Effective Fall 2017

Additional coursework may be required due to prerequisites.

Code	Title	Credits
PSY 648	Applied Organizational Psychology	3
PSY 661	Applied Organizational Development	3
PSY 666	Succession Planning and Leadership Development	3

Program Total Credits: 9

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Performance Management

The Graduate Certificate in Performance Management provides an introduction to the concepts and practices related to systems and technologies that help manage the performance of individuals in organizations. The certificate is designed for professionals involved with recruitment, selection, placement, training, and performance management of employees and staff in organizations.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Students will:

1. Understand and state how individual attributes affect performance in the workplace.
2. Explain theories on how adults learn and develop new skills.
3. Conduct empirically-based diagnostic activities to create performance measurement systems and training programs.
4. Design and implement empirically-based interventions to manage performance or train employees relevant to job-related knowledge and skills.
5. Conduct empirically-based evaluation activities to determine the effectiveness of performance measurement systems and training programs.

Requirements Effective Fall 2017

Additional coursework may be required due to prerequisites.

Code	Title	Credits
PSY 647	Applied Industrial Psychology	3
PSY 667	Competency Modeling and Criterion Development	3

PSY 668	Workforce Training and Development	3
Program Total Credits:		9

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Substance Use Disorder Identification and Treatment

The Graduate Certificate in Substance Use Disorder Identification and Treatment provides mental and behavioral health clinicians with the skills needed to identify and treat substance use disorders across the lifespan and the diverse groups that typically suffer from substance use disorders. The coursework provides specific education on empirically supported screening tools and interventions for substance use disorders, including screening, brief intervention, and referral to treatment, motivational interviewing, cognitive behavioral therapy for addictions, and treating diverse populations.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

Upon successful completion, graduates of the certificate program will be able to identify and treat substance use disorders using empirically supported screening tools and interventions. They will be able to do this across the range of diverse identities among those who experience substance use disorders. They will also be able identify and treat substance use disorders across the lifespan.

Requirements Effective Fall 2021

Additional coursework may be required due to prerequisites.

Code	Title	Credits
PSY 613	Advanced Addiction Counseling	3
PSY 710	Advanced Addiction Treatments	3
PSY 724	Motivational Interviewing	3
PSY 726	Neuropharmacology of Addiction	3
Program Total Credits:		12

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Master of Addiction Counseling in Psychology, Plan C (M.A.C.P.)

The Master of Addiction Counseling in Psychology is designed to provide students the education needed to become a licensed addiction counselor. With this degree and licensure, graduates are able to enter the workforce as treatment providers for those struggling with substance use and substance use disorders. The program is structured as one year of course work and one year of internship in order to satisfy state requirements for certification and licensure.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Learning Objectives

The Program will prepare students to work as Certified Addiction Specialist (CAS) in the State of Colorado, or as Licensed Addiction Counselors (LAC), either in private practice or addiction treatment centers nationwide. Typical responsibilities for LAC Counselors include:

- Providing treatment for substance use disorders and behavioral addictions through either individual or group therapy.
- Providing training and supervision for CAT and CAS counselors.
- Providing community outreach, informing the public of what treatment options are available and what the impacts of addictive disorders are on public health.

All courses are designed to embody emerging principles in Addiction Counseling as set forth by the field, the Behavioral Health Administration (<https://bha.colorado.gov/resources/cac-clinical-training-program/>), and the Department of Regulatory Agencies (<https://dora.colorado.gov/>) (both part of the Colorado Department of Human Services (<https://cdhs.colorado.gov/>)). Courses will provide critical core knowledge, and will map onto the coursework and training experiences required by OBH and DORA so that graduates will be eligible to sit for licensure exams upon completion of the Master's in Addiction Counseling Program.

Requirements Effective Fall 2022

First Year

Fall		Credits
PSY 612	Introduction to Addiction Counseling	3
PSY 675	Ethics and Professional Psychology Practice	3
PSY 724	Motivational Interviewing	3
PSY 726	Neuropharmacology of Addiction	3
Total Credits		12

Spring

PSY 613	Advanced Addiction Counseling	3
PSY 620	Addiction Counseling Concepts	4
PSY 775	Diversity Issues in Counseling	3
PSY 793	Clinical Supervision of Addiction Counseling	3
Total Credits		13

Second Year

Fall		Credits
PSY 787	Internship	9
Total Credits		9

Spring

PSY 787	Internship	9
Total Credits		9
Program Total Credits:		43

A minimum of 43 credits are required to complete this program.

Requirements for All Graduate Degrees

For more information, please visit Requirements for All Graduate Degrees in the Graduate and Professional Bulletin.

Summary of Procedures for the Master's and Doctoral Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website (<https://graduateschool.colostate.edu/deadline-dates/>). Students should consult this schedule whenever they approach important steps in their careers.

Forms (<https://graduateschool.colostate.edu/forms/>) are available online.

Step	Due Date
1. Application for admission (online)	Six months before first registration
2. Diagnostic examination when required	Before first registration
3. Appointment of advisor	Before first registration
4. Selection of graduate committee	Before the time of fourth regular semester registration
5. Filing of program of study (GS Form 6)	Before the time of fourth regular semester registration
6. Preliminary examination (Ph.D. and PD)	Two terms prior to final examination
7. Report of preliminary examination (GS Form 16) - (Ph.D. and PD)	Within two working days after results are known
8. Changes in committee (GS Form 9A)	When change is made
9. Application for Graduation (GS Form 25)	Refer to published deadlines from the Graduate School Website
9a. Reapplication for Graduation (online)	Failure to graduate requires Reapplication for Graduation (online) for the next time term for which you are applying
10. Submit thesis or dissertation to committee	At least two weeks prior to the examination or at the discretion of the graduate committee
11. Final examination	Refer to published deadlines from the Graduate School Website
12. Report of final examination (GS Form 24)	Within two working days after results are known; refer to published deadlines from the Graduate School website

13. Submit a signed Thesis/ Dissertation Submission Form (GS Form 30) to the Graduate School and Submit the Survey of Earned Doctorates (Ph.D. only) prior to submitting the electronic thesis/ dissertation	Refer to published deadlines from the Graduate School website.
14. Submit the thesis/dissertation electronically	Refer to published deadlines from the Graduate School website
15. Graduation	Ceremony information is available from the Graduate School website

Master of Applied Industrial/Organizational Psychology, Plan C (M.A.I.O.P)

The Master of Applied Industrial/Organizational Psychology, Plan C (M.A.I.O.P) degree program studies the behavior of individuals in businesses and organizations to determine how to improve performance and productivity for the organization. Students learn how to use research and measurement skills to solve practical workplace issues and to apply the principles of psychology to human resources and leadership challenges within an organization. This degree is practitioner-oriented, providing practical knowledge and skills focusing on research and consulting.

Students interested in graduate work should refer to the Graduate and Professional Bulletin.

Requirements Effective Spring 2009

First Year		Credits
PSY 605	Applied Measurement Theory	3
PSY 647	Applied Industrial Psychology	3
PSY 648	Applied Organizational Psychology	3
PSY 662	Applied Psychological Research Methods I	4
PSY 663	Applied Psychological Research Methods II	4
PSY 666	Succession Planning and Leadership Development	3
Total Credits		20
Second Year		
PSY 660	Applied Cross-Cultural Industrial/Organizational Psychology	3
PSY 661	Applied Organizational Development	3
PSY 665	Applied Psychological Research Design	3

PSY 667	Competency Modeling and Criterion Development	3
PSY 668	Workforce Training and Development	3
PSY 669	Capstone: Practicum and Skills Development	3
Total Credits		18
Program Total Credits:		38

A minimum of 38 credits are required to complete this program.

Requirements for All Graduate Degrees

Graduate Graduate Programs in Statistics

The department offers graduate programs leading to Master of Applied Statistics, Master of Science and Doctor of Philosophy degrees. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Statistics (<http://www.stat.colostate.edu>).

Certificates

- Data Analysis
- Theory and Applications of Regression Models

Master's Programs

- Master of Applied Statistics, Plan C (M.A.S.)
 - Master of Applied Statistics, Plan C, Data Science Specialization
 - Master of Applied Statistics, Plan C, Statistical Science Specialization
- Master of Science in Statistics, Plan A*
- Master of Science in Statistics, Plan B*

Ph.D.

- Ph.D. in Statistics*

* Please see department for program of study.

Courses

Subjects in this department include: Applied Statistics (STAA), Applied Statistics for Researchers (STAR) and Statistics (STAT).

Applied Statistics (STAA)

STAA 551 Regression Models and Applications Credits: 2 (2-0-0)

Course Description: Model estimation and goodness of fit for linear models; confidence intervals for prediction and estimation; lack of fit, model diagnostics, transformations, model selection, influential observations, collinearity, interaction, weighted least squares, imputation.

Prerequisite: MATH 369 and STAT 315.

Restriction: Must be a: Graduate.

Registration Information: Admission to the Master of Applied Statistics or admission to the Graduate Certificate in Theory and Applications of Regression Models. Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 552 Generalized Regression Models Credits: 2 (2-0-0)

Course Description: Categorical data analysis, estimation and testing for contingency tables, introduction to generalized linear models, logit and probit models for binary regression, extensions to nominal and ordinal multicategory responses, count data, Poisson and negative binomial regression, log-linear models.

Prerequisite: STAA 551, may be taken concurrently or STAR 512 or STAT 512 or STAT 540.

Registration Information: Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 553 Experimental Design Credits: 2 (2-0-0)

Course Description: Analysis of variance, covariance, randomized block, latin square, factorial, balanced and unbalanced designs. Applications to agriculture, biosciences. Implementation in SAS and R.

Prerequisite: (STAA 551 or STAT 540) and (STAA 562 or STAT 530).

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 554 Mixed Models Credits: 2 (2-0-0)

Course Description: Topics in linear models that have both fixed and random predictors: split-plot and related designs, mixed-effects factorials, repeated measures, random coefficients, and spatial models for designed experiments. Introduction to generalized linear and nonlinear mixed models. Statistical topics will be integrated with implementation in SAS and R.

Prerequisite: STAA 552.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Must have concurrent registration in STAA 553. Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 555 Statistical Consulting Skills Credit: 1 (1-0-0)

Also Offered As: STAT 555.

Course Description: Skills necessary to collaborate with non-statisticians. Communicate both verbally and in writing with collaborators while honing in on study objectives and identifying measures and factors. Readings of selected papers and texts and mock client sessions and shadowing. Common statistical tools necessary for statistical consulting will be reviewed.

Prerequisite: None.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Sections may be offered online. Credit not allowed for both STAA 555 and STAT 555.

Term Offered: Fall.

Grade Mode: Instructor Option.

Special Course Fee: No.

STAA 556 Statistical Consulting Credits: 2 (2-0-0)

Course Description: Effective consulting to meet with clients, analyze real data, and prepare reports.

Prerequisite: STAA 500 to 599 - at least 28 credits.

Registration Information: Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Summer.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 561 Probability with Applications Credits: 2 (2-0-0)

Course Description: Random variables, continuous and discrete distributions, expectations, joint and conditional distributions, moments and moment generating functions, transformations, order statistics.

Prerequisite: MATH 369 or STAT 315.

Restriction: Must be a: Graduate.

Registration Information: Admission to the Master of Applied Statistics or admission to the Graduate Certificate in Theory and Applications of Regression Models. Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 562 Mathematical Statistics with Applications Credits: 2 (2-0-0)

Course Description: Theory and applications of estimations, testing, and confidence intervals. Computer simulations, sampling from the normal distribution.

Prerequisite: STAA 561, may be taken concurrently or STAT 520.

Registration Information: Written consent of instructor. This is a partial-semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 565 Quantitative Reasoning Credit: 1 (1-0-0)

Course Description: Confounding, types of bias such as selection bias and regression effect bias, Simpson's paradox, experiments versus observational studies.

Prerequisite: STAA 551 or STAR 512, may be taken concurrently or STAT 512.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 566 Data Visualization Methods Credit: 1 (1-0-0)

Course Description: Principles of effective graphs, data visualization methods, grammar of graphics, multi-panel conditioning, exploratory data analysis using graphics, 3D plotting, ROC curves, data wrangling.

Prerequisite: STAA 551, may be taken concurrently or STAR 512, may be taken concurrently or STAT 512.

Restriction: Must be a: Graduate.

Registration Information: Admission to Master of Applied Statistics program or Graduate Certificate in Data Analysis. This is a partial semester course. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 567 Computational and Simulation Methods Credit: 1 (1-0-0)

Course Description: Statistical computation and simulation methods used to estimate probability distribution of non-standard test statistics, find estimators, test hypotheses, and compute confidence intervals. Optimization, bootstrapping, pivoting techniques.

Prerequisite: (STAA 551, may be taken concurrently or STAT 512, may be taken concurrently or STAT 540, may be taken concurrently) and (STAA 561, may be taken concurrently or STAT 511A or STAT 511B or STAT 520, may be taken concurrently).

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 568 Topics Industrial/Organizational Statistics Credit: 1 (1-0-0)

Course Description: Six Sigma techniques, DMAIC, CT trees, VOC tools, data collection, process capability, capability metrics, graphical data exploration, and process control.

Prerequisite: (STAA 553, may be taken concurrently or STAR 512, may be taken concurrently or STAT 512) and (STAA 561 or STAR 511 or STAT 511A or STAT 520).

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 571 Survey Statistics Credits: 2 (2-0-0)

Course Description: Survey design, simple random, stratified, and cluster samples. Estimation and variance estimation.

Prerequisite: (STAA 551 or STAT 540) and (STAA 562 or STAT 530).

Registration Information: Written consent of instructor. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 572 Nonparametric Methods Credits: 2 (2-0-0)

Course Description: Rank-based methods, nonparametric inferential techniques, scatterplot smoothing, nonparametric function estimation, environmental applications.

Prerequisite: (STAA 551, may be taken concurrently or STAR 512, may be taken concurrently or STAT 512 and STAT 540, may be taken concurrently) and (STAA 561, may be taken concurrently or STAR 511, may be taken concurrently or STAT 511A or STAT 511B or STAT 520, may be taken concurrently).

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. This is a partial semester course.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 573 Analysis of Time Series Credits: 2 (2-0-0)

Course Description: Exploratory analysis of time series, including periodicity and trends, moving average and auto-regressive models, estimation and forecasting. Financial and environmental applications.

Prerequisite: (STAA 551, may be taken concurrently or STAT 540, may be taken concurrently) and (STAA 561, may be taken concurrently or STAT 520, may be taken concurrently).

Restriction: Must be a: Graduate.

Registration Information: Admission to Master of Applied Statistics program or Graduate Certificate in Data Analysis; students in the Graduate Certificate in Data Analysis require permission of the instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 574 Methods in Multivariate Analysis Credits: 2 (2-0-0)

Course Description: Multivariate ANOVA, principal components, factor analysis, cluster analysis, discrimination analysis.

Prerequisite: STAA 551, may be taken concurrently and STAA 561.

Registration Information: Written consent of instructor. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 575 Applied Bayesian Statistics Credits: 2 (2-0-0)

Course Description: Bayesian analysis of statistical models, prior and posterior distributions, computing methods, interpretation.

Prerequisite: (STAA 552) and (STAA 562 or STAT 530) and (STAA 567).

Registration Information: Written consent of instructor. This is a partial semester course.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 576 Methods in Spatial Statistics Credits: 2 (2-0-0)

Course Description: Covariance estimation, covariance/variogram models, spatial regression models, spatial prediction, spatial point patterns.

Prerequisite: (STAA 552) and (STAA 561 or STAT 520).

Restriction: Must not be a: Graduate.

Registration Information: Graduate standing. Written consent of instructor. This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 577 Statistical Learning and Data Mining Credits: 2 (2-0-0)

Course Description: Applications-oriented overview into how to use statistical methods to do data mining, inference, and prediction.

Prerequisite: STAA 551, may be taken concurrently and STAA 561.

Registration Information: This is a partial semester course. Sections may be offered: Online.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAA 578 Machine Learning Credits: 2 (2-0-0)

Course Description: K-means clustering, perceptron algorithm, evaluating model performance, neural networks, learning theory and dimension reduction.

Prerequisite: STAA 577, may be taken concurrently.

Restriction: Must be a: Graduate.

Registration Information: Graduate standing. This is a partial semester course. Sections may be offered: Online. Credit not allowed for both CS 545 and STAA 578.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

Applied Statistics for Researchers (STAR)

STAR 501 Data Wrangling/Visualization for Researchers Credits: 2 (2-0-0)

Course Description: Data manipulation in R, importing and exporting data, variable transformation, converting dataset formats, generating summary statistics, principles of effective graphs, data visualization methods, exploratory data analysis using graphics, multi-panel plotting, high-density plotting, 3D plotting.

Prerequisite: STAR 511 or STAT 511A or STAT 511B.

Restriction: Must be a: Graduate.

Registration Information: Does not apply to Master of Applied Statistics program. Sections may be offered: Online. Credit not allowed for both STAR 501 and STAT 580A3.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAR 502 Multivariate Analysis for Researchers Credits: 2 (2-0-0)

Course Description: Multivariate ANOVA, principal components, factor analysis, cluster analysis, discriminant analysis.

Prerequisite: STAR 511 or STAT 511A or STAT 511B.

Restriction: Must be a: Graduate.

Registration Information: Does not apply to Master of Applied Statistics program. Sections may be offered: Online. Credit not allowed for both STAR 502 and STAT 581A4.

Term Offered: Fall (odd years).

Grade Mode: Traditional.

Special Course Fee: No.

STAR 511 Design and Data Analysis for Researchers I Credits: 4 (3-0-1)

Course Description: Statistical methods for experimenters and researchers emphasizing design and analysis of experiments.

Prerequisite: STAT 301 or STAT 307 or STAT 311 or STAT 315.

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online. Credit not allowed for both STAR 511 and STAT 511A. Credit not allowed for both STAR 511 and STAT 511B.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

STAR 512 Design and Data Analysis for Researchers II Credits: 4 (3-0-1)

Course Description: Statistical methods for experimenters and researchers emphasizing design and analysis of experiments.

Prerequisite: STAR 511 or STAT 511A.

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online. Credit not allowed for both STAR 512 and STAT 512.

Term Offered: Spring.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

STAR 513 Regression Models for Researchers Credits: 2 (2-0-0)

Course Description: Model estimation and goodness of fit for linear models; confidence intervals for prediction and estimation; lack of fit, model diagnostics, transformations, model selection, influential observations, collinearity, interaction, polynomial regression, regression with dummy variables, weighted least squares, imputation.

Prerequisite: STAR 511 or STAT 511A or STAT 511B.

Restriction: Must be a: Graduate.

Registration Information: Does not apply to Master of Applied Statistics program. Sections may be offered: Online. Credit not allowed for both STAR 513 and STAT 581A3.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAR 514 Experimental Design/Analysis for Researchers Credits: 2 (2-0-0)

Course Description: Analysis of variance, covariance, randomized block, latin square, factorial, balanced and unbalanced designs. Applications to agriculture, biosciences. Implementation in R and JMP.

Prerequisite: STAR 511 or STAT 511A or STAT 511B.

Restriction: Must be a: Graduate.

Registration Information: Sections may be offered: Online. Credit not allowed for both STAR 514 and STAT 580A4.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

STAR 531 Generalized Regression Models for Researchers Credits: 2 (2-0-0)

Course Description: Categorical data analysis, estimation and testing for contingency tables, introduction to generalized linear models, logit and probit models for binary regression, extensions to nominal and ordinal multicategory responses, count data, Poisson and negative binomial regression, log-linear models.

Prerequisite: STAR 512 or STAR 513 or STAT 512.

Restriction: Must be a: Graduate.

Registration Information: Does not apply to Master of Applied Statistics program. Sections may be offered: Online. Credit not allowed for both STAR 531 and STAT 581A5.

Term Offered: Spring (even years).

Grade Mode: Traditional.

Special Course Fee: No.

STAR 532 Mixed Models for Researchers Credits: 2 (2-0-0)

Course Description: Topics in linear models that have both fixed and random predictors: split-plot and related designs, mixed-effects factorials, repeated measures, random coefficients, and spatial models for designed experiments. Introduction to generalized linear and nonlinear mixed models.

Prerequisite: STAR 512 or STAR 514 or STAT 512.

Restriction: Must be a: Graduate.

Registration Information: Does not apply to Master of Applied Statistics program. Sections may be offered: Online.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

STAR 534 Machine Learning for Researchers Credits: 2 (2-0-0)

Course Description: K-means clustering, perceptron algorithm, evaluating model performance, neural networks, learning theory and dimension reduction.

Prerequisite: STAR 512 or STAR 513 or STAT 512.

Restriction: Must be a: Graduate.

Registration Information: Does not apply to Master of Applied Statistics program. Sections may be offered: Online.

Term Offered: Fall (even years).

Grade Mode: Traditional.

Special Course Fee: No.

STAR 695 Independent Study in Applied Statistics Credits: Var[1-3] (0-0-0)

Course Description: Application of statistics to a student's specific research, guided by a statistician. Intended for students who are not in the Statistics department.

Prerequisite: STAR 511 or STAT 511A or STAT 511B.

Restriction: Must be a: Graduate, Professional.

Registration Information: Written consent of instructor. Credit not allowed for both STAR 695 and STAT 681A1.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Statistics (STAT)

STAT 100 Statistical Literacy (GT-MA1) Credits: 3 (2-0-1)

Course Description: Learn to be an intelligent consumer of statistical information. Concepts of randomness and probability, variation, types of measurement, errors in measurement, experiments versus observational studies, Simpson's paradox, biases in statistical studies, p-value.

Prerequisite: None.

Restriction: Must be a: Undergraduate.

Registration Information: Must register for lecture and recitation. Sections may be offered: Online.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

STAT 158 Introduction to R Programming Credit: 1 (1-0-0)

Course Description: Programming using the R Project for the Statistical Computing. Data objects, for loops, if statements, using packages.

Prerequisite: None.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 192 First-Year Seminar in Statistics Credit: 1 (0-0-1)

Course Description: Explore careers in statistics and the variety of problems encountered by statisticians.

Prerequisite: None.

Term Offered: Fall.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 201 General Statistics (GT-MA1) Credits: 3 (2-0-1)

Course Description: Graphs, descriptive statistics, confidence intervals, hypothesis tests, correlation and simple regression, tests of association. Use JMP software to analyze data.

Prerequisite: None.

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online. Credit not allowed for both STAT 201 and STAT 204.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

STAT 204 Statistics With Business Applications (GT-MA1) Credits: 3 (2-0-1)

Course Description: Statistical methods in business; descriptive methods, simple probability, sampling distributions, confidence intervals, hypothesis testing, correlation, simple and multiple regression, practical concerns in inference. Use Excel software to analyze data.

Prerequisite: None.

Registration Information: Must register for lecture and recitation.

Sections may be offered: Online. Credit not allowed for both STAT 201 and STAT 204.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

Additional Information: Quantitative Reasoning 1B, Mathematics (GT-MA1).

STAT 258 Advanced R Programming Credits: 2 (2-0-0)

Course Description: Advanced R programming skills for statisticians and data scientists. Topics include coding best practices and debugging; R packages for wrangling complex data structures; application programming interfaces (APIs), scraping data from the web; developing interactive graphics, web applications, and maps; literate programming documents, scalability in R; R package development, parallelization.

Prerequisite: STAT 158.

Registration Information: Sections may be offered: Online.

Terms Offered: Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 301 Introduction to Applied Statistical Methods Credits: 3 (3-0-0)

Course Description: Statistical methods in science; descriptive methods, simple probability, sampling distributions, confidence intervals, hypothesis testing, statistical power, one-way ANOVA, correlation, simple and multiple regression, interaction, practical concerns in inference (e.g. interpreting p-values, publication bias), reading and evaluating statistical results in published papers and popular media. Emphasis on using software rather than hand calculation to conduct analyses.

Prerequisite: MATH 117 or MATH 118 or MATH 120 or MATH 124 or MATH 125 or MATH 126 or MATH 127 or MATH 141 or MATH 155 or MATH 159 or MATH 160.

Registration Information: Sections may be offered: Online. Credit allowed for only one of the following: STAT 301, STAT 302A, STAT 307, or STAT 311.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option, Traditional.

Special Course Fee: No.

STAT 302A Statistics Supplement: General Applications Credit: 1 (1-0-0)

Course Description: Statistical power, one-way ANOVA, and multiple regression with indicator variables and interaction.

Prerequisite: STAT 201 with a minimum grade of B or STAT 204 with a minimum grade of B.

Registration Information: Credit allowed for only one of the following: STAT 301, STAT 302A, or STAT 381A1.

Terms Offered: Fall, Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 303 Introduction to Communications Principles Credits: 3 (3-0-0)

Also Offered As: ECE 303.

Course Description: Basic concepts in design and analysis of communication systems.

Prerequisite: MATH 340, may be taken concurrently and MATH 261 with a minimum grade of C.

Registration Information: Sections may be offered: Online. Credit not allowed for both ECE 303 and STAT 303.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 305 Sampling Techniques Credits: 3 (3-0-0)

Course Description: Sample designs: simple random, stratified, systematic, cluster, unequal probability, two-phase; methods of estimation and sample size determination.

Prerequisite: STAT 301 or STAT 307 or ERHS 307 or STAT 311 or STAT 315.

Term Offered: Fall.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

STAT 307 Introduction to Biostatistics Credits: 3 (3-0-0)

Course Description: Biostatistical methods; confidence intervals, hypothesis tests, simple correlation and regression, one-way analysis of variance.

Prerequisite: MATH 117 or MATH 118 or MATH 120 or MATH 124 or MATH 125 or MATH 126 or MATH 127 or MATH 141 or MATH 155 or MATH 160.

Registration Information: Credit allowed for only one of the following: STAT 301, STAT 307, or STAT 311.

Terms Offered: Fall, Spring, Summer.

Grade Modes: S/U within Student Option, Trad within Student Option.

Special Course Fee: No.

STAT 315 Intro to Theory and Practice of Statistics Credits: 3 (3-0-0)

Course Description: Descriptive statistics, probability theory, random variables, sampling distributions, hypothesis testing, confidence intervals, ANOVA, simple and multiple regression. R software is utilized for analyzing real world data sets.

Prerequisite: MATH 155 or MATH 156 or MATH 159 or MATH 160.

Terms Offered: Fall, Spring, Summer.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 316 Games and Gambling Credit: 1 (1-0-0)

Course Description: Application of probability concepts to games of chance and gambling contests.

Prerequisite: STAT 315.

Term Offered: Spring.

Grade Mode: Traditional.

Special Course Fee: No.

STAT 331 Intermediate Applied Statistical Methods Credits: 3 (3-0-0)

Course Description: Covers applied regression methods, including: interaction; model assumptions and diagnostics, selection, and validation; penalized estimation; GLMs; mixed models; factorial ANOVA; ANCOVA. Also covers basic categorical data analysis and non-parametrics. Strong emphasis on application and interpretation; lesser emphasis on mathematics. Assignments involve reproducing analyses in published scientific papers and open ended data analysis projects. Data analyses are performed using JMP software.

Prerequisite: STAT 301 or STAT 302A or STAT 307 or STAT 315.

Registration Information: Credit not allowed for both STAT 331 and STAT 380A1.

Term Offered: Fall.

Grade Mode: Traditional.
