

Special River Bulletin.

The Agricultural Experiment Station

FORT COLLINS, COLORADO.

Poudre River Bulletin.

Oct. 8 to 14.—The river during the week has been considerably better than normal, with an average of 183 cubic feet per second as compared with 130 cubic feet per second for the normal. This also is better than for the corresponding week since the years 1895-6.

During the week .88 inches of precipitation fell, making the total to date 17.39 inches, while the normal rainfall for the year to November 1 is but 13.74.

The following is the record for the week in second feet:

	1902	1901	Normal
Oct. 8.....	182.....	126.....	134
" 9.....	173.....	136.....	131
" 10.....	171.....	135.....	130
" 11.....	173.....	133.....	124
" 12.....	192.....	129.....	123
" 13.....	202.....	126.....	131
" 14.....	181.....	122.....	130
Average.....	183.....	130.....	130

The following is the record for the corresponding week in previous years:

1881.....	1890.....	87	1897.....	122	
1884.....	205	1891.....	117	1898.....	57
1885.....	203	1892.....	...	1899.....	146
1886.....	126	1893.....	...	1900.....	138
1887.....	118	1894.....	117	1901.....	130
1888.....	101	1895.....	192	1902.....	183
1889.....	61	1896.....	210
