

Fall 2013 Retention Study

Institutional Research

Introduction

The Freshman and Transfer Retention Study is conducted by Institutional Research (IR) annually to report freshman retention, persistence, and graduation rates for entering student cohorts. This year the report has a new format to display current year rates compared to last year's rates by a variety of cohort demographics. Additional details for trend analysis are available online. Please use the IR Interactive tool on our website at <http://www.ir.colostate.edu/retention.aspx>.

For the purpose of this report, a cohort includes only undergraduate resident-instruction (RI) students who enter in the fall semester as full-time (enrolled in 12 or more credits, who have not fully withdrawn from the university) either as a new freshman or a transfer student. Additional operational definitions are provided in the glossary on page 5.

As summary, Freshman retention is at 86.6%; up nearly two percentage points from last year. This is both the highest rate ever as well as the largest one-year gain ever.

The four-year graduation rate for new freshmen increased to 41.1%; students are graduating faster which not only saves them tuition dollars but also allows them to enter the workforce sooner.

The six-year graduation rate for new freshmen students increased to 65.2%; a higher proportion of students are graduating.

If you have questions or comments or require additional analysis of a specific sub population, please contact the Office of Institutional Research.

Glossary

Ethnicity	A student's self-reported ethnicity at the time of entry. Minority includes students who self-report a minority status; nonminority includes all other students (including international students).
Freshman Cohort	Resident-instruction (RI) undergraduates with a registration type of "NEW" in their first fall at CSU.
Full-time	Degree-seeking students enrolled in 12 or more credits in their entry cohort semester, and who have not fully withdrawn from the university
Graduate	A student is reported as a graduate after his/her bachelor's degree is conferred. Students who, up until fall 2011, enter as freshmen, stay at CSU, and then continue into the Professional Veterinary Medicine (PVM) program are counted as graduates. Graduation rates reflect the number of students who graduated each semester as a percentage of the original entering cohort. For example, graduation in the sixth summer includes those who graduated within six years.
CCHE Index Score	A Colorado Department of Higher Education (CDHE) standard, derived by using components of high school work (GPA and/or rank) and standard test scores (ACT or SAT). CDHE re-centered its admission index just prior to fall 2004. Reports about the index score use CDHE's current standard.
Persistence	Students who either graduate or are still enrolled each semester. Dismissed resident-instruction students who are enrolled in Continuing Education courses are not included as persisters. Exchange students (primarily study-abroad students) are included as persisters. Persistence rates reflect the number of students who graduated and/or enrolled each semester as a percentage of the original entering class. For example, persistence in the seventh Fall includes those who graduated within six years and those who have not yet completed a degree but are still enrolled (Seventh Fall).
Residency	The student tuition classification upon entering CSU.
Transfer Cohort	Resident-instruction (RI) undergraduates with a registration type of "TRNS" in their first fall at CSU.
