# 2015 Annual Flower Trial Garden

## Performance Report

Dr. James E. Klett, David Staats and Sam Hagopian\*

### Introduction

The W. D. Holley Plant Environmental Research Center (PERC) on the Colorado State University campus has been in operation for over 40 years. Dr. James E. Klett is the Director of PERC and the faculty coordinator for the Annual Flower Trial Garden. In 2000, the trial garden was moved from its site at PERC to the park located on the north-west corner of Remington and Lake Streets (1401 Remington Street). The relocation of the garden to this more spacious and visible site furthered its mission by more effectively extending education, research and outreach to students, home gardeners, Master Gardeners, community members and Green Industry personnel.

The outdoor display and test areas were established to allow students, researchers, industry representatives, homeowners and extension personnel to learn, teach and evaluate horticultural research and demonstration projects in the Rocky Mountain/High Plains region. The Annual Flower Trial Garden is both an All-America Selections® display and trial site. The garden is open to students, industry personnel and the public for viewing, gathering ideas about new varieties, studying the different growth habits, tolerances and visual characteristics of many annual flowering varieties.

The purpose of the trial garden is to evaluate the performance of annual flower varieties under Rocky Mountain environmental conditions. Our growing conditions are characterized by high altitude, intense solar radiation, drying winds, severe hailstorms, large fluctuations between day and night temperatures and a season-long need for irrigation. Plants are evaluated for plant vigor, uniformity, floriferousness and tolerance to environmental and biotic stresses. Performances of these cultivars are judged in early August, and again in early September, by selected students, faculty, industry representatives, public horticulturalists and advanced Master Gardeners.

The trial garden is funded, in most part, by the entry fees collected from the plant breeding seed and vegetative companies who have chosen to participate in the trials. Additional financial assistance and supplies for the trial operations are donated by a number of sources. These sources include various state horticulture industry associations, foundations, nurseries, greenhouse growers and plant and seed production companies from across the nation and world. The trial garden at Colorado State University receives no operating dollars directly from state funds. Some operational and staff dollars have come from the Colorado State Agricultural Experiment Station, Extension, the College of Agricultural Sciences and the Department of Horticulture and Landscape Architecture.

---

\* Professor and Extension Landscape Horticulture Specialist; Horticulture Research Associate; Horticulture Graduate student and 2015 Garden Coordinator

## **Acknowledgements**

The Department of Horticulture and Landscape Architecture at Colorado State University would first like to thank the many vegetative and seed companies who continue to participate in the trials year after year. Without their cooperation and support, the research done at the trial garden would not be possible. There are 352 varieties planted in sun beds, 49 varieties planted in shade beds, 335 varieties planted in sun containers and 35 varieties planted in shade containers.

### **Participating Companies:**

American Takii Inc.	Hilverdakooij
AmeriSeed Inc.	Hort Couture
Ball FloraPlant	Keift Seed Co.
Ball Ingenuity	Michell's
Benary Seed	Oglevee
Botany Lane	Oro
Burpee Home Garden	PAC Elsner
Cultivaris	PanAmerican Seed
Danziger	Proven Winners
Darwin Perennials	Red Fox
Dummen Orange	Sakata Seed America Inc.
Dutch Heritage Gardens	Selecta
Flora Nova	Suntory Flowers Limited
Garden Genetics	Terra Nova
Goldsmith Seeds	Westhoff Flowers
Gulley Greenhouse	

### **In Kind Donations:**

**Greencare Fertilizers, Inc.** - Donated water soluble fertilizer for use in garden and greenhouse.

**Everris, Inc** - Donated the Osmocote® slow release fertilizer used in the beds and containers.

**SunGro** - Donated potting media used to grow-on vegetative plugs.

**Organix** - Donated organic media for sun beds and containers.

**Welby Gardens** - Grew all seed propagated plants at a substantially reduced cost for the trials.

### **In Appreciation**

The Department of Horticulture and Landscape Architecture would like to recognize and thank the following people for making the trial gardens happen this year.

Sam Hagopian – Graduate Student and Annual Trial Garden Coordinator  
The Trial Garden Staff – Suzianne Soares, Taylor Reid, Garrett Weaver, Hunter Konchan,  
Kristen Call, Jack Franchesci

David Staats – Horticulture Research Associate  
PERC Staff – Sean Walker

All the Larimer County Master Gardeners who volunteered their time and hard work.

Al Gerace and Dan Gerace of Welby Gardens and all of their staff.

The Trial Garden Advisory Committee – Harvey Lang (Syngenta Flowers), Danny Brooks (Ernst Benary of America, Inc.), Dan Gerace (Welby Gardens), Al Gerace (Welby Gardens), Diana Reavis (Eason Horticultural Resources Inc.), Duane Sinning (Colorado Department of Agriculture), Eric Pitzen (Syngenta Flowers), Frank Yantorno (Center Greenhouse, Inc.), Galen Dokter (SHS Griffin), Gary Douglas (Retired, Denver City Park Greenhouse), Gene Pielin (Gulley Greenhouse), Jim Devereux (Dummen Orange), Frannie Steinlage (Michell's), Sharon Kendall (Tagawa Greenhouses), Karl Trellinger (Syngenta Flowers), Keith Stieduhar (City of Westminster), Bridget Blomquist (Denver Botanic Gardens), Mark Seguin (Sakata Ornamentals), Merle Moore (retired, Denver Zoological Gardens), Ron Brum (Ball Horticultural Company), Amy Gonzales (Syngenta Flowers), Luke Ellington (Express Seed Company), Susan Stauber (Ball Horticultural Company), Wayne Pianta (PanAmerican Seed), Traicer Gray (Elitch Gardens), Aaron McDonald (Botany Lane Greenhouse), Cinde York (Davey Tree Company), Julie Lehman (Denver City Park Greenhouse), Charlotte Rose (Center Greenhouse), Niles Reese (retired, Walters Gardens), Brian Austin (Dutch Heritage Gardens), JP Williams (Ernst Benary of America, Inc.), Emily Mason (Dummen Orange), Jini Bates (Bloomin')

### **An Invitation**

You are cordially invited to tour the garden at your leisure to enjoy the color and ambiance of a place that is like no other in Colorado. Any suggestions you may have for future programs or improvements are strongly encouraged, so please feel free to contact us with your ideas.

# 2015 CULTURAL DATA

## Growing

All seeds were sent to Welby Gardens in Denver, CO in January and February 2015 for germination and growing-on in their greenhouses into 3.5" jumbo 4-cell packs. Seed varieties from Welby Gardens were all received on June 10 and planted in the garden on June 12. All vegetative varieties were received as plugs and transplanted into 4.5" pots shortly after arriving at Colorado State University from mid-March to mid-April.

## Fertilization in Greenhouses<sup>†</sup>

Dosatron<sup>®</sup> fertilizer injectors rated at 7 GPM were used in the greenhouses to fertilize plants each day they were watered, with the exception that every weekend they were watered with clear water. Greencare 14-4-14 water soluble fertilizer was used. Plants were grown in the greenhouses at the Plant Environmental Research Center (PERC). They received fertilization at a rate of 200ppm.

## Chemicals Used in Greenhouses

A drench of Banrot<sup>®</sup> (6 oz/gallon) and Rootshield<sup>®</sup> (0.5 tsp/gallon) was applied to all vegetative plugs immediately after arrival and prior to potting up.

This year there were no major abiotic or biotic issues in the greenhouse making for an extremely stress-free year on the plants. This factor coupled with multiple weeks of consistent cloud cover allowed that no Plant Growth Regulators or additional controls needed to be applied.

## Soil Amendments and Preparation

All beds were raked clean of old mulch, planting material and weeds prior to planting. Where necessary, RoundUp<sup>®</sup> was sprayed on weeds. Prior to planting, 1.5-2" of new Grower's Mix media from Organix Supply Inc. was added to all sun beds. The beds were roto-tilled to a depth of 8" which helped incorporate the new media. After tilling, the beds were crowned for better drainage and raked smooth. For containers, the top 6-8" of media was removed and ¼ teaspoon of Banrot<sup>®</sup> was sprinkled over the remaining soil and watered in. The containers were then re-filled with the same Grower's Mix media used on the sun beds.

June 17, 2015	AAS Bed: All AAS varieties.

## Bed Spacing

Variety	SPACE FOR "A" (inches)	SPACE FOR "B" (inches)
All Varieties	20	32

## Containers

There were extra containers located by the University Center for the Arts. These containers were filled by the Annual Flower Trial crew with extra plants of varieties which were planted in the trial garden.

## Watering Schedule

Plants were watered on an "as needed" basis while in the greenhouses. All plants were thoroughly hand watered after being planted in the garden or in the container. Container trials were irrigated three times a day (depending on rain), every day, for about the first two weeks after planting and then twice a day after that. Each container has 2 drip emitters positioned towards the center that are rated at 1 GPH. All sun containers ran for one hour per cycle and the shade containers ran for 30 minutes per cycle. Beds are zoned according to weekly water-use requirements of 0.5", 1.0" and 1.5" of water per week, and were watered 2-3 times a week for varying amounts of time, depending on the bed's water-use rating. Due to intense rain earlier in the summer, the irrigation was sometimes decreased depending on how much water the individual beds needed.

Bed	Irrigation (in)	Bed	Irrigation (in)
A	1.0"	K	0.5"
B	Drip Irrigation	L	0.5"
C	1.5"	M	0.5"
D	1.5"	N	0.5"
E	1.0"	SA	1.5"
F	1.0"	SB	1.5"
G	1.5"	SC	1.5"
H	0.5"	Shade Containers	Drip Irrigation
I	0.5"	Sun Containers	Drip Irrigation
J	1.0"	UCA Containers	Drip Irrigation

### Fertilization in Garden

All beds were top-dressed with Pro Rich<sup>®</sup> Fertilizer (14-5-5) at the rate of 1 pound N per 1000 square feet prior to planting. Before planting, Osmocote<sup>®</sup> (14-14-14) was applied to all sun containers at a rate of 130 grams/pot and mixed into the media prior to planting. After planting, Osmocote<sup>®</sup> (14-14-14) was applied to all shade containers at a rate of 65 grams/pot. After planting, Osmocote<sup>®</sup> (14-14-14) was applied to all sun beds at the rate of 6.4 grams/sq. ft. (suggested medium rate on label) or approximately 160 grams/variety. Osmocote<sup>®</sup> (14-14-14) was applied to the shade beds at a rate of 3.2 grams/sq. ft. or approximately 80 grams/variety. Greencare water soluble fertilizer (20-10-20) was dispensed through a 100 GPM Dosatron<sup>®</sup> twice a week at a rate of 200 ppm. Chelated iron (FeATURE<sup>®</sup>) was applied at the rate of 3 lbs/100 gallons to all Calibrachos on July 17<sup>th</sup> and July 30<sup>th</sup>.

### Maintenance of Flowers & Pinching

#### Greenhouse Maintenance

Genus	Maintenance
Geranium	Deadheaded 4/25, 5/19
Petunia & Petchoa	Pinched 4/28, 5/19
Calibrachoa	Pinched 4/28
Verbena	Pinched 4/25, 5/19

## Garden Maintenance

Genus	Maintenance
Bidens	Deadheaded 7/24
Bracteantha	Deadheaded 7/24, 8/20
Coleus	Deadheaded 7/24
Coreopsis	Deadheaded 7/24
Dahlia	Deadheaded 6/8, 6/23, 7/17, 7/24, 8/11, 8/20, 9/10
Geranium	Deadheaded 6/8, 6/29, 7/17, 7/24, 8/11, 8/20, 8/26, 9/10
Gerbera	Deadheaded 6/29, 7/24, 9/10
Leucanthemum	Deadheaded 7/17, 7/24, 8/20
Osteospermum	Deadheaded 7/17, 7/24, 9/10
Snapdragon	Deadheaded 7/22, 8/20
Veronica	Deadheaded 7/24
Zinnia	Deadheaded 7/24, 9/10

## Weed Control

RoundUp<sup>®</sup> was applied to all beds prior to tilling in the spring, as well as a spot treatment around the edges of the beds and in the pathways as needed. Otherwise, all weeding was done by hand throughout the season.

## Pest Control in Garden

Spinosad (0.5%) from Fertilome was applied at a rate of 4 tbs/gallon to the Cleome, Gaura, Lobularia and Cuphea to control flea beetle on June 30<sup>th</sup>.

## Disease Control in Garden

Due to the recent passage of new regulations, beds were unable to be fumigated with Vapam as in previous years. Instead Zeritol (Hydrogen Dioxide and Peroxyacetic Acid) was applied as a soil drench May 18<sup>th</sup> prior to planting and it was followed up with an application of Rootshield (*Trichoderma harzianum*) the following day. This was done as a preventative measure against *Xanthomonas* and miscellaneous fungi such as *Sclerotinia*. Two different fungicides were applied to the Petunias, Petchoa, Nemesia, Oxalis, Peppers, Veronica, Phlox, Sedum, Lobularia, Vinca, Zinnias, Portulaca, Marigold, Lantana, Melampodium, Bidens, Diascia, Euphorbia, Isotoma, Ipomea, Celosia and Angelonia. Bayleton (triadimefom) was applied at a rate of 3 tsp/4 gallons to control *Sclerotinia sclerotiorum* and it was alternated with Heritage fungicide (Azoxystrobin) at a rate of 1.2 grams/gallon. Bayleton was applied on June 24<sup>th</sup>, July 24<sup>th</sup>, August 20<sup>th</sup> and September 24<sup>th</sup>. Heritage was applied to petunias on July 1<sup>st</sup>, August 6<sup>th</sup>, and September 3<sup>rd</sup>. The annual garden has its own supplies and tools in order to reduce the potential spread of disease from other sites.

### **Monthly Temperatures and Precipitation for Summer 2015**

Month	Avg. Maximum Temperature	Avg. Minimum Temperature	Precipitation (Inches)
April	63.3° F	36.2° F	3.32
May	62.7° F	42.8° F	6.34
June	89.4° F	50.8° F	3.71
July 1-18	96.2° F	58.6° F	1.76
August	96.1° F	69.3° F	1.05
September	91.4° F	63.6° F	0.45

\*Weather information for the Fort Collins area provided by the Colorado State University at: [http://ccc.atmos.colostate.edu/sum\\_form.html](http://ccc.atmos.colostate.edu/sum_form.html)

### **Data Collection Methods**

#### **Plant Size**

Height and width measurements were taken twice during the growing season, June 22<sup>nd</sup>, and August 28<sup>th</sup>. This was done to get a feel for the average size of the plants and each variety's growth performance. For consistency in bed data collection, the third plant from the front of the right row was measured; however, if that plant was noticeably smaller or larger than average on August 28<sup>th</sup>, an alternate plant was selected for measurement and the location was noted so the same plant would be measured when the second measurements were taken. Measurements were taken at the highest and widest parts of the plant, including any flowers. This may account for the decrease in height on some varieties. For containers, measurements were taken at the highest and widest parts of overall growth.

#### **Flowering Performance**

Since 2007, data on the bloom period for each variety has been taken. In presenting this data, we hope to give a feel for how long the plants were in bloom and how well they bloomed during that period of time. Data was collected on a weekly basis. Plants were evaluated by estimating the overall flowering based on a scale of 1-5, with 5 being in peak bloom and 1 being plants not in bloom or have very few blooms. Full bloom (5) meaning the stage at which the average consumer perceives the plant as being in perfect bloom. One should take into consideration the broad range between these ratings when interpreting these data. If a variety started at full bloom, it means it was already in full bloom in the greenhouse before it was planted. All of this data is presented in numerical fashion in this performance evaluation. Towards the end of the season, any dead plants in the trial were not considered in the evaluation; thus, the data given always reflects the percent of live plants in bloom.

### Evaluation

The trial evaluation day was held on August 3<sup>rd</sup>. 95 judges consisting of industry representatives, master gardeners, university employees and trial garden advisory committee members evaluated the plant varieties for performance using a combination of these criteria:

#### Plant Quality:

- Uniformity of plant habit
- Bushy, well-branched shape versus open and leggy
- Healthy foliage (deep green versus chlorotic, yellow leaves)
- Foliage texture
- Disease resistance

#### Flower Quality:

- Flower power (number of flowers per plant, substance and holding power)
- Flower presentation (i.e. not hidden by the foliage)
- Color uniformity
- Stable color (resistance to fading) and stable pattern (for bicolor)
- Flower size and uniformity of flowers
- Balance of color in a mixture

#### Overall Presentation:

- Overall “clean” look, versus visible spent blooms
- Fragrant flowers and/or foliage
- Good vigorous growth
- Resistance to climatic stress
- Novelty value of unique features
- Overall consumer appeal

Plant varieties were rated on a scale of 1 to 10 (1 = very poor performance; 10 = excellent performance). These numerical evaluations were used to calculate the average ratings for each

variety in the trials. Participants were encouraged to circle pre-generated comments on the evaluation form, if appropriate, as well as write in any other comments and observations they had. The pre-generated comments they could choose from included: Low vigor, Vigorous plant, Few flowers, Many flowers, Uniform, Non-uniform, Unique color and Some chlorosis. This was the first year we enacted a digital evaluation format. Of the 95 evaluators, 64 performed evaluation using the digital format, while 31 used the paper evaluation forms.

**Selection of “Best Of” Winners, “Plants Rated As Superior”, and “Sneak Peeks”**

Ratings from all evaluators on August 3<sup>rd</sup> were averaged and the top five in each class were placed on a preliminary list. A class is determined to be any group of plants in the same genus that consisted of 10 or more trial entries. The “Best Of” award was given to classes whose top-five list had ratings of at least 6.0 and one of them could be considered superior. A sub-committee of university and industry representatives revisited the garden on September 11<sup>th</sup> to review the top-five list and verify the superiority of the top rated varieties later in the season and not just on August 3<sup>rd</sup>. A majority vote was taken for each class to determine the final selections for winners. “Plants Rated as Superior” was an award created to recognize other plants that deserved special recognition; especially for those plants that did not have ten varieties to make up a judging class.

**Other Information for the 2014 Trials**

Number of companies participating.....	31
Total number of trial entries (includes AAS).....	797
Varieties grown in the ground.....	348
Varieties grown in a container.....	315

## “Best Of...” Annuals from 2015 Colorado State University Trials

[www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu)

**Best of Show** - Sun New Guinea Impatiens ‘Sunpatiens® Spreading Tropical Orange’ from Sakata

This winner was near perfection in every way. Electric orange flowers were vivid and had a great contrast against the beautiful foliage. Plants maintained a high level of flower power all season. It had impressive vigor while the growth habit was very uniform. Foliage was very attractive all by itself with a dark green edge and bright yellow center. Plants grew well in full sun but are also adaptable to light shade.

**Best Novelty** – Celosia ‘Dragon's Breath’ from Sakata

This plant garnered a lot of praise even before it started flowering for its beautiful burgundy colored foliage. Flowers formed late but were definitely worth the wait as they had a two-toned combination of burgundy and hints of fluorescent purple that seemed to glow. The vigorous plants had good garden presence all season. It would make a great textural accent for combination plantings.

**Best New Variety** - Lobularia ‘Raspberry Stream’ from Danziger

Extreme flower power was combined with an intense raspberry color for an impressive flower display. The unique raspberry flower color was also noted for a nice cream colored eye for a slight two-toned effect which was very attractive. Overall it had a very uniform growth habit which held its shape and the plants maintained a clean appearance all season. Bees loved it and it also had a nice, sweet fragrance.

### “Best Of...” in Class

**Best Angelonia** - ‘Archangel Dark Rose’ from Ball FloraPlant

This plant makes a great item for the landscape with dense, compact branching and abundant flowering. Flowers had large florets and a unique “antique rose” color that produced a lot of flower power.

**Best Begonia boliviensis** - ‘Sparks Will Fly’ from Ball Ingenuity

A very unique appearance was created by this plant with beautiful dark foliage and a very uniform growth habit. The dark foliage made a great contrast for the numerous small orange/red flowers interspersed throughout. Flowers had a unique shape and the foliage also had a unique two-tone color to it.

**Best Begonia semperflorens** - ‘Whopper Red Green Leaf’ from Ball Ingenuity

Beauty is combined with adaptability which makes this plant a great choice for many different landscape situations. Plants were vigorous with vibrant green foliage and had abundant red flowers which created a stunning image of vitality. Sun and shade tolerant, these plants are also adaptable for high altitude gardens and a good shade alternative to the recent downy mildew problem on seed impatiens.

**Best Calibrachoa** - ‘Superbells® Evening Star’ from Proven Winners

Plants were grown in a container and besides being a massive ball of flowers and color it was also noted for unique flower color that would shimmer in the sunlight. Flower color seemed to be made up of three different shades of purple with a dark eye. The growth habit was very uniform and the flowers also were noted for opening up earlier in the day than many other Calibrachoa.

**Best Coleus** - 'ColorBlaze® Apple Brandy' from Proven Winners

The overall appearance was characterized by excellent uniformity and high contrast foliage. Leaves had attractive, jagged leaf margins which combined well with the jagged pattern on the leaf. Plants did not have any flowering and maintained a good appearance all season.

**Best Combo** - 'Trixi™ Fairy' from Selecta

This was a unanimous winner for "Best Combo" and was also considered in the voting for "Best New Variety" and "Best of Show". Flowering was excellent from all three different Scaevola in the mix for a very nice color blend. Described as a "waterfall of color", the white and lavender was combined with a nice strong pink. The mix of the three varieties of Scaevola was also very uniform in growth habit.

**Best Dahlia** - 'XXL Sunset' from Red Fox by Dummen Orange

Abundant flowers had very beautiful tropical shades of mango and pineapple color. Plants were uniform and vigorous. The cactus flower type would serve a dual purpose as both a landscape plant and a cut flower.

**Geranium (Interspecific)** - 'Big Ezee Neon' from Red Fox by Dummen Orange

Large, vigorous plants produced large umbels of flowers that made a very attractive display of color. Flowers were a vivid watermelon color which was very unique and added to the overall flower power.

**Geranium (Zonal)** - 'Allure™ Purple Rose' from Ball FloraPlant

Bright green foliage made a beautiful contrast with the electric rose flower color. Blooms were very abundant and constant all season. Plants were vigorous and very uniform.

**Best Impatiens** - 'Big Bounce™ Lavender' from Selecta

The entire 'Big Bounce' series was noted as being superior since it had four varieties ranked in the top five but the Lavender selection was selected as the best. Large lavender flowers covered the large, mounding plant. It appeared to be resistant to downy mildew and is sure to brighten up a shady area.

**Best Lobelia** - 'Hot® Night Blue' from Westhoff

Brilliant blue flowers were very abundant and had an especially deep, rich color. Plants had a trailing growth habit and had a long lasting bloom period. Flowering continued through all types of weather including the heat of the summer and looked very good even in September.

**Best Lobularia** - 'Lavender Stream' from Danziger

Abundant flowers and uniform growth habit made this plant near perfect. Flower color was a vibrant lavender color which looked beautiful even as it faded. The 'Stream' series had two other selections that placed in the top five and is a tribute to the strength of the entire series. Besides combining well with other flowers, it is also bee friendly and fragrant.

**Best New Guinea Impatiens** - 'Magnum Red Flame' from Red Fox by Dummen Orange

Large red flowers were a standout because of their vivid shade of red and depth of color. Plants were vigorous, large and very uniform.

**Best Osteospermum** - '4D Lemon Ice' from Selecta

Plants had prolific flowering of beautiful soft primrose colored flowers. Blooms were unique with a double center of small yellow anemone type petals that also kept the flower from closing creating a longer flowering period. Plants were uniform and had very attractive foliage even throughout the hot summer days.

**Best Petunia (Veg Mound)** - 'Perfectunia® Orange Morn' from Westhoff

Flowers were unique with a very beautiful soft orange color complemented by a white and yellow eye. Plants had prolific flowering as well as being very uniform. It was noted that blooms still looked very good even as they faded. This flower would make a good choice for a cottage garden.

**Best Petunia (Veg Spread)** - 'Cascadia Indian Summer' from Danziger

Unique flower color made this a winner along with impressive vigor and a multitude of flowers. Blooms had a fascinating blend of colors that included shade of peach, orange and yellow that is a true color breakthrough. This plant was also a winner in previous years and has proven to be a dependable favorite.

**Best Petunia (Seed Spreading)**- 'Opera Supreme Pink Morn' from American Takii

Bright pink flowers faded to a soft pink and created an impressive bicolor effect. The cascading growth habit looked great in a pot but also was equally attractive in the ground. Vigorous plants bloomed all along the stem and were blanketed with flowers.

**Best Portulaca** - 'Cupcake Yellow Chrome' from Red Fox by Dummen Orange

Plants were vigorous and very uniform. Bright yellow flowers made a nice contrast with the foliage. Flowering was constant throughout the season with minimal irrigation.

**Best Salvia farinacea** - 'Cathedral™ Shining Seas' from Michell's

Bountiful and beautiful bi-color flowers had shades of lavender blue and white that combined for a striking effect. Prolific flowering continued throughout the summer even during the hot days. Plants had good vigor and were a favorite of bees.

**Best Salvia splendens** - 'Mojave Improved Red' from Flora Nova

Flaming red flowers were stout and had good staying power so they did not require any deadheading all season. Plants were vigorous and uniform for a great visual effect overall.

**Best Sun New Guinea Impatiens** - 'SunPatiens® Spreading Tropical Orange' from Sakata

This winner was near perfection in every way. It was also selected as the "Best Of Show" winner. Electric orange flowers were vivid and had a great contrast against the beautiful foliage. Plants maintained a high level of flower power all season. It had impressive vigor while the growth habit was very uniform. Foliage was very attractive all by itself with a dark green edge and bright yellow center. Plants grew well in full sun but are also adaptable to light shade.

**Best Verbena** - 'Endurascape™ Hot Pink' from Ball FloraPlant

A great plant for the landscape with a vigorous spreading growth habit and was covered with many "bright, bright, bright pink" flowers. Plants were very uniform as well as resistant to mildew.

**Best Vinca** - 'Mega Bloom Deep Lavender' from Ameriseed

Almost all *Vinca* looked great in 2015 but the 'Mega Bloom' series placed four entries in the top five rankings. The 'Mega Bloom' series has a good range of colors but the deep lavender selection was rated the best for its large flowers and vigorous plants. Plants appeared to be resistant to phytophthora.

**Best Zinnia** - 'Zahara® Double Fire' from PanAmerican Seed

Flower power was extreme due to prolific and very double flowers with fiery orange color. Plants had good vigor and performed well in the heat. It was also a past All-America Selections program winner so it performed well in many other places across the country.

**Other Outstanding Plants**

**Angelonia 'Alonia™ Pink Romance'** from Danziger

Dark green plants with phenomenal upright growth habit were equally matched by impressive flowering. Large, pink blooms had a burgundy and white eye which created added interest and a romantic feel. Both flowering and growth habit were very uniform.

**Lantana 'Lucky Sunrise Rose'** from Ball FloraPlant

This has been an award winner in the past and has become a perpetual favorite. The brightly colored flowers were very prolific and the dark foliage color really made the flower color "pop". Plants were vigorous but maintained a uniform growth habit.

**Petunia (Seed Spread) 'Tidal Wave Silver'** from PanAmerican Seed

Plants were covered with so many flowers it was difficult to see the foliage. Vigor was phenomenal and has the potential to "consume small pets and children". This would be a perfect choice for all season color. It has been a highly ranked variety for years and based on its solid history it is considered "idiot proof".

**Verbena 'Meteor Shower'** from Proven Winners

Delicate, tiny flowers formed balls of blooms held up high on tall stems that create a nice effect in cottage gardens. Flowering was prolific and long lasting. Plants were well branched and uniform with an upright growth habit that was knee-high.

For a more complete report and photos of all of these winners go to [www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu).

For further information about the Colorado State University Annual Flower Trials, contact Jim Klett at [Jim.Klett@ColoState.edu](mailto:Jim.Klett@ColoState.edu) or phone 970-218-0104.

### **Consumer's Top 5 Plants**

This was the second year that we included a digital evaluation of on our garden for garden visitors to vote for their favorite plants. This new feature was very popular with the public garden visitors. This year we had 268 visitors submit digital and physical votes. The variety which received second place in this category in 2014 has also received top honors in 2015. The top 5 consumer voted plants are as follows:

<b>VARIETY NAME</b>	<b>COMPANY</b>
1. Dahlia – Mystic Illusion	Dummen Orange
2. Celosia – Dragons Breath	Sakata
3. Dahlia – Dalaya Red + White	Selecta
4. Coleus – Experimental Red Shades	Sakata
5. Lantana - Lucky Sunrise Rose	Ball FloraPlant

Vinca	Mega Bloom Red	Ameriseed	red	New	sun	s	5.50	[1] Non-Uniform, [1] Unique Flower, [2] Great Foliage, [2] Many Flowers, [2] Uniform, [2] Unique Flower Color, [3] Vibrant Flower Color, [3] Vigorous Plant, [4] Few Flowers <i>True red flower color, some color variation to flowers, possibly being choked out by shade</i>
Vinca	Mega Bloom Strawberry	Ameriseed	pink, dark-pink eye	New	sun	s	6.25	[1] Vibrant Flower Color, [2] Few Flowers, [3] Great Foliage, [5] Many Flowers, [6] Vigorous Plant, [7] Uniform <i>Flower color very pale, many flowers</i>
Viola	HipHop Red/Yellow Bunny	Hort Couture	purple, red, yellow	New	shade	s	5.00	[1] Disease Present, [1] Few Flowers, [2] Unique Flower Color, [4] Vigorous Plant, [5] Low Vigor, [6] Many Flowers, [7] Non-Uniform <i>Does not fill out the pot, leggy, hanging basket type, amazing for this time of year</i>

+ = Grown in both the ground and a container. \*C = by cutting, S = by seed. \*\*Ratings = 1 (poor) to 10 (excellent)

\*\*\*Numbers in comment section indicate the number of occurrences the comment was circled by evaluators on 8/4/15. There were 30-35 evaluators - not all of them circled comments for each plant, but every evaluator did give a rating from 1-10. Space separates circled comments from handwritten comments.
