## 2018 Flower Trial Garden

### Purpose

The purpose of the flower trial garden is to evaluate the performance of flower varieties under our unique Rocky Mountain environmental conditions. Our growing conditions are characterized by high altitude, intense solar radiation, drying winds, severe hailstorms, large fluctuations between day and night temperatures, season-long need for irrigation and heavy clay soils. Plants are evaluated based on plant vigor, uniformity, floriferousness and tolerance to environmental and biotic stresses. Performances of these varieties are judged by selected students, faculty, industry representatives, public horticulturalists and advanced Master Gardeners. The report will be distributed at the end of the season to all participating companies. The trial results will also be available to the public online at [www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu).

We had twenty-three seed and vegetative companies participate in our twenty-fifth annual, industry-supported, bedding plant trials. The garden consists of approximately 1085 different plant varieties this year. Plants are grown in either the sun or under our shade structure that provides about 70% shade. The plant companies are given the option to choose whether they want their varieties grown in a ground bed, a container or in both locations. Each trial entry in the ground is planted in 2 parallel rows of 9 plants per row for a maximum of 18 plants. Each 20" container is planted with 5 plants. There are 515 varieties planted in sun beds, 38 varieties planted in shade beds, 446 varieties planted in sun containers and 43 varieties planted in shade containers.

### Participating Companies:

American Takii Inc.	Green-Fuse Botanicals
Ameriseed	PAC
Ball FloraPlant	PAS/Keift Seed Co.
Ball Ingenuity	PanAmerican Seed
Beekenkamp	Proven Winners
Benary	Sakata Seed America Inc.
Danziger	Selecta
Darwin Perennials	Suntory Flowers Limited
Dummen Orange	Syngenta
Dutch Heritage	Terra Nova
Floranova	Westhoff Flowers
Florist Holland B.V.	

### In Kind Donations:

**Greencare Fertilizers, Inc.** - Donated water soluble fertilizer for use in the garden and greenhouse.  
**Everris, Inc** - Donated the Osmocote® slow release fertilizer used in the beds and containers.  
**Pindstrup** - Donated potting media used to grow-on vegetative plugs.  
**Altman Plants** - Donated potting media used to grow-on vegetative plugs.  
**Organix** - Donated organic media for sun beds and containers.  
**Welby Gardens** - Grew all seed propagated plants at a substantially reduced cost for the trials.

### In Appreciation

The Department of Horticulture and Landscape Architecture would like to recognize and thank the following people for making the trial gardens happen this year.

Sean Markovic – Graduate Student and Annual Trial Garden Coordinator

The Trial Garden Staff – April Ferzoco, Burt Thomas, Clark Arbogast

David Staats – Horticulture Research Associate

All the Larimer & Weld County Master Gardeners who volunteered their time and hard work.

Al Gerace and Dan Gerace of Welby Gardens and all of their staff.

The Trial Garden Advisory Committee – Melissa Main (Ernst Benary of America, Inc.), Dan Gerace (Welby Gardens), Al Gerace (Welby Gardens), Diana Reavis (Eason Horticultural Resources Inc.), Duane Sinning (Colorado Department of Agriculture), Frank Yantorno (Center Greenhouse, Inc.), Galen Dokter (Vaughns), Gene Pielin (Gulley Greenhouse), Jim Devereux (Green-Fuse Botanicals), Milan Clickingbeard (Tagawa Greenhouses), Karl Trellinger (Syngenta Flowers), Keith Stieduhar (City of Westminster), Bridget Blomquist (Denver Botanic Gardens), Mark Seguin (Sakata Ornamentals), Merle Moore (retired, Denver Zoological Gardens), Ron Brum (Ball Horticultural Company), Amy Gonzales (Syngenta Flowers), Susan Stauber (Ball Horticultural Company), Traicer Gray (Elitch Gardens), Julie Lehman (Denver City Park Greenhouse), Richard Anderson, Brian Austin (Dutch Heritage Gardens), Diana Shull (Dummen Orange), Debra Pfaff (City of Broomfield), Holly Shield (Denver City Parks), Nick Marinelli (Weston Landscape and Design), Scott Fulton (Botany Lane Greenhouse), Steven Engel (PanAmerican Seed), Beth Gulley (Gulley Greenhouse), Kathy McKay (Flamingo Holland), Sean Moody (Ceres Landcare)

### An Invitation

You are cordially invited to tour the garden at your leisure to enjoy the color and ambiance of a place that is like no other in Colorado. Any suggestions you may have for future programs or improvements are strongly encouraged, so please feel free to contact us with your ideas.

Jessica Davis – Department Head

Phone: (970) 491-7018

James E. Klett – Annual and Perennial Flower Trial Garden Faculty Coordinator

Phone: (970) 491-7179; Fax: (970) 491-7745; Cell Phone (970) 218-0104

E-mail: [jim.klett@colostate.edu](mailto:jim.klett@colostate.edu)

# 2018 CULTURAL DATA

## Growing

All seeds were sent to Welby Gardens in Denver, CO in January and February 2018 for germination and growing-on in their greenhouses into 4-cell packs. Seed varieties from Welby Gardens were all received on June 7 and planted in the garden starting on June 14. All vegetative varieties were received as plugs and transplanted into 4.5" pots shortly after arriving at Colorado State University from mid-March to late April.

## Fertilization in Greenhouses\*

Dosatron<sup>®</sup> fertilizer injectors rated at 7 GPM were used in the greenhouses to fertilize plants each day they were watered, with the exception that every weekend they were watered with clear water. Greencare 14-4-14 water soluble fertilizer was used. Plants were grown in the greenhouses at the CSU Horticulture Center. They received fertilization at a rate of 200 ppm.

## Chemicals Used in Greenhouses

A drench of Banrot<sup>®</sup> (6 oz/gallon) was applied to all vegetative plugs immediately after arrival and prior to potting up.

This year there were no major abiotic or biotic issues in the greenhouse making for an extremely stress-free year on the plants. The newer greenhouse environment was ideal for growing quality plants. High sun and warm temperatures lead to the application of B-Nine on some more vigorous Petunias on May 8<sup>th</sup>. A preventative fungicide and insecticide application of Mantra and Pageant was applied twice on April 17<sup>th</sup> and May 3<sup>rd</sup>.

## Soil Amendments and Preparation

All beds were raked clean of old mulch, planting material and weeds prior to planting. Where necessary, RoundUp<sup>®</sup> was sprayed on weeds. Prior to planting, 1.5-2" of new Grower's Mix media from Organix Supply Inc. was added to all sun beds. The beds were roto-tilled to a depth of 8" which helped incorporate the new media. After tilling, the beds were crowned for better drainage and raked smooth. For containers, the top 6-8" of media was removed and ¼ teaspoon of Banrot<sup>®</sup> was sprinkled over the remaining soil and watered in. The containers were then re-filled with the same Grower's Mix media used on the sun beds.

\* No endorsement of products named is intended nor is criticism of products not mentioned.

**Soil Analysis**

	pH	E.C. mmhos/ cm	Lime Estimate	% O.M.	NO <sub>3</sub> - N	P	K	Zn	Fe	Mn	Cu	Texture

Osteospermum	20	22
Lobularia	20	22
Dianthus	20	22
Antirrhinum	20	22
Pentas	19	22
Ipomea	19	22

### Containers

There were extra containers located in the shade area and the last row of the sun container area. These containers were filled by the Annual Flower Trial crew with extra plants of varieties which were located in the garden.

### Watering Schedule

Plants were watered on an “as needed” basis while in the greenhouses. All plants were thoroughly hand watered after being planted in the garden or in the container. Container trials were irrigated three times a day (depending on rain), every day, for about the first two weeks after planting and then twice a day after that. Each container has 2 drip emitters positioned towards the center that are rated at 1 GPH. All sun containers ran for one hour per cycle and the shade containers ran for 30 minutes per cycle. Beds are zoned according to weekly water-use requirements of 0.5”, 1.0” and 1.5” of water per week, and were watered 2-3 times a week for varying amounts of time starting around July 1, depending on the bed’s water-use rating. Due to some rain this summer, the irrigation was sometimes decreased depending on how much water the individual beds needed.

<b>Bed</b>	<b>Irrigation (in)</b>	<b>Bed</b>	<b>Irrigation (in)</b>
<b>A</b>	0.5”	K	0.5”
<b>B</b>	Drip Irrigation	L	0.5”
<b>C</b>	1.5”	M	0.5”
<b>D</b>	1.5”	N	0.5”
<b>E</b>	1.0”	SA	1.5”
<b>F</b>	1.0”	SB	1.5”
<b>G</b>	1.0”	SC	1.5”
<b>H</b>	1.0”	Shade Containers	Drip Irrigation
<b>I</b>	1.0”	Sun Containers	Drip Irrigation
<b>J</b>	1.5”	UCA Containers	Drip Irrigation

### Fertilization in Garden

All beds were top-dressed with Pro Rich<sup>®</sup> Fertilizer (14-5-5) at the rate of 1 pound N per 1000 square feet prior to planting. Before planting, Osmocote<sup>®</sup> (14-14-14) was applied to all sun containers at a rate of 130 grams/pot and mixed into the media prior to planting. After planting, Osmocote<sup>®</sup> (14-14-14) was applied to all shade containers at a rate of 65 grams/pot. Prior to planting, Osmocote<sup>®</sup> (14-14-14) was applied to all sun beds at the rate of 6.4 grams/sq. ft. (suggested medium rate on label) or approximately 160 grams/variety. Osmocote<sup>®</sup> (14-14-14) was applied to the shade beds at a rate of 3.2 grams/sq. ft. or approximately 80 grams/variety. Greencare water soluble fertilizer (20-10-20) was dispensed through a 100 GPM Dosatron<sup>®</sup> twice a week at a rate of 200 ppm during the growing season.

## Maintenance of Flowers & Pinching

### Greenhouse Maintenance

Genus	Maintenance
Geranium	Deadheaded 5/09

### Garden Maintenance

Genus	Maintenance
Geranium	Deadheaded 7/12, 8/19
Dahlia	Deadheaded 7/15, 8/24

## Weed Control

RoundUp® was applied to all beds prior to tilling in the spring, as well as a spot treatment around the containers. Otherwise, all weeding was done by hand throughout the season.

## Pest Control in Garden

No insecticides were applied due to advanced scouting and lack of pest populations.

## Disease Control in Garden

Zerotol was applied as a soil drench prior to planting. In previous years this was done as a preventative measure against *Xanthomonas*. The annual garden has its own supplies and tools in order to reduce the potential spread of disease from other sites.

For prevention of fungus on Petunias and other trial Genera a rotation was performed of different fungicides:

5/28/18 Banrot to Bed J, 6/20/18 Rootshield to all ground beds, 7/4/18 Heritage to beds H-N, 7/11/18 Heritage to beds A-G, 7/18/18 Bayleton to beds H-N, 7/25/18 Bayleton to beds A-G, 8/1/18 Heritage to beds H-N, 8/10/18 Heritage to beds A-G, 8/17/18 Palladium to beds H-N, 8/23/18 Palladium to beds A-G.

### **Monthly Temperatures and Precipitation for Summer 2018**

Month	Avg. Maximum Temperature	Avg. Minimum Temperature	Precipitation (Inches)
April	64.0° F	37.5° F	2.05
May	73.4° F	42.1° F	1.84
June	86.7° F	59.9° F	0.15
July	88.2° F	58.8° F	0.02
August	87.7° F	59.5° F	1.56
September	81.9° F	54.6° F	1.14

## **Data Collection Methods**

### **Plant Size**

Height and width measurements were taken twice during the growing season, July 5<sup>th</sup>, and September 25<sup>th</sup>. This was done to get a feel for the average size of the plants and each variety's growth performance. For consistency in bed data collection, the third plant from the front of the right row was measured; however, if that plant was noticeably smaller or larger than average on July 8<sup>th</sup>, an alternate plant was selected for measurement and the location was noted so the same plant would be measured when the second measurements were taken. Measurements were taken at the highest and widest parts of the plant, including any flowers. This may account for the decrease in height on some varieties. For containers, measurements were taken at the highest and widest parts of overall growth.

### **Flowering Performance**

Since 2007, data on the bloom period for each variety has been taken. In presenting this data, we hope to give a feel for how long the plants were in bloom and how well they bloomed during that period of time. Data was collected on a regular basis, every 7-14 days. Plants were evaluated by estimating the overall flowering based on a scale of 1-5, with 5 being in peak bloom and 1 being plants not in bloom or have very few blooms. Full bloom (5) meaning the stage at which the average consumer perceives the plant as being in perfect bloom. One should take into consideration the broad range between these ratings when interpreting these data. If a variety started at full bloom, it means it was already in full bloom in the greenhouse before it was planted. All of this data is presented in numerical fashion in this performance evaluation. Towards the end of the season, any dead plants in the trial were not considered in the evaluation; thus, the data given always reflects the percent of live plants in bloom.

### Evaluation

The trial evaluation day was held on August 7<sup>th</sup>. 153 judges consisting of industry representatives, master gardeners, university employees and trial garden advisory committee members evaluated the plant varieties for performance using a combination of these criteria:

#### Plant Quality:

- Uniformity of plant habit
- Bushy, well-branched shape versus open and leggy
- Healthy foliage (deep green versus chlorotic, yellow leaves)
- Foliage texture
- Disease resistance

#### Flower Quality:

- Flower power (number of flowers per plant, substance and holding power)
- Flower presentation (i.e. not hidden by the foliage)
- Color uniformity
- Stable color (resistance to fading) and stable pattern (for bicolor)
- Flower size and uniformity of flowers
- Balance of color in a mixture

#### Overall Presentation:

- Overall “clean” look, versus visible spent blooms
- Fragrant flowers and/or foliage
- Good vigorous growth
- Resistance to climatic stress

Novelty value of unique features  
Overall consumer appeal

Plant varieties were rated on a scale of 1 to 10 (1 = very poor performance; 10 = excellent performance). These numerical evaluations were used to calculate the average ratings for each variety in the trials. Participants were encouraged to circle pre-generated comments on the evaluation form, if appropriate, as well as write in any other comments and observations they had. The pre-generated comments they could choose from included: Low vigor, Vigorous plant, Few flowers, Many flowers, Uniform, Non-uniform, Unique color and Some chlorosis. This was the second year we enacted a digital evaluation format. Of the 153 evaluators, 84 performed evaluation using the digital format, while 41 used the paper evaluation forms, some people group evaluated.

### **Selection of “Best Of” Winners, “Plants Rated As Superior”, and “Sneak Peeks”**

Ratings from all evaluators on August 7<sup>th</sup> were averaged and the top five in each class were placed on a preliminary list. A class is determined to be any group of plants in the same genus that consisted of 10 or more trial entries. The “Best Of” award was given to classes whose top-five list had ratings of at least 6.0 and one of them could be considered superior. A sub-committee of university and industry representatives revisited the garden on September 11<sup>th</sup> to review the top-five list and verify the superiority of the top rated varieties later in the season and not just on August 7<sup>th</sup>. A majority vote was taken for each class to determine the final selections for winners. “Plants Rated as Superior” was an award created to recognize other plants that deserved special recognition; especially for those plants that did not have ten varieties to make up a judging class.

### **Other Information for the 2018 Trials**

Number of companies participating.....	23
Total number of trial entries (includes AAS).....	1095
Varieties grown in the ground.....	558
Varieties grown in a container.....	439
Varieties grown in both locations.....	49
Varieties propagated by seed.....	235
Varieties propagated by cuttings.....	811
Number of genera represented.....	72
Number of student employees dedicated to the project	
Spring (part-time, 10-20 hrs/wk).....	3
Summer (full-time, 40 hrs/wk).....	3.5
Fall (part-time, 10-15 hrs/wk).....	3

## “Best Of...” Annuals from 2018 Colorado State University Trials

[www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu)

### **Best of Show - Salvia 'Big Blue' from PanAmerican Seed**

A later bloomer that is worth the wait was impressive with large flower spikes that are showy in the garden as well as making a good cut flower. Plants had dark green foliage, strong upright growth habit, excellent branching and very uniform overall. A strong favorite with bees as well as humans.

### **Best Novelty - Artemisia 'MAKANA™ Silver' from TerraNova**

This fine textured foliage plant makes a great complement to many other plants in a classic border. The beautiful silver foliage is dense on vigorous and very compact and uniform plants. It would look great in both a container as well as ground. It makes a good filler plant as well adding a strong textural element to any garden.

### **Best New Variety - Rudbeckia 'Rising Sun® AS Chestnut Gold' from Green Fuse Botanicals**

Huge flowers covered this plant all season creating impressive flower power. Besides the prolific flowering, the intense coloring of the flowers make this a definite "55 MPH plant". It is impossible not to be impressed even from a brief glance at a great distance.

### **"Best Of..." by Class**

#### **Argyranthemum - Limer White from Benary+**

Large, crisp white, flowers covered the canopy that were very eye-catching. Plants were self-cleaning and were popular in regard to having low maintenance but high visual impact. The blooms were long lasting while the plants also had great uniformity.

#### **Angelonia - Archangel™ Raspberry from Ball FloraPlant**

Flowers were abundant all season but stood out also for the intense unique raspberry color. The upright plants maintained excellent uniformity and made a nice complement to the flowers above the glossy green foliage below.

#### **Begonia semperflorens (Shade) - 'Megawatt™ Pink Bronze Leaf' from PanAmerican Seed**

The vigorous plants were characterized by their large leaves, strong stems and large flowers. The bright pink flowers were very floriferous and had excellent contrast with the dark foliage. Blooms were self-cleaning so the plants always looked fresh.

#### **Begonia hybrids - 'I'Conia Portofino Orange' from Dümmer Orange**

Vibrant orange flowers appeared even brighter against the very dark bronze foliage. The serrated edges and sheen to the leaves created an attractive leaf shape. Flowers were large and made a dramatic statement in a container.

#### **Begonia elatior - 'BK Collection Evi Bright Pink' from Beekenkamp**

Large pink flowers with double petals had good tolerance to sun and heat all season and still looked fresh into September. Flowers were abundant and very showy. Plants were very uniform and would look good in either a landscape or container setting.

#### **Bracteantha - 'Mohave™ White 19' from Selecta**

Clean white flowers covered the canopy and made a dazzling display in full sun. Plants were very uniform with a nice mounding growth habit. The prolific flowers were also everlasting and excellent for dried bouquets.

**Bidens - 'Bidy Boom Red' from Dümnen Orange**

Large amounts of long lasting red flowers were packed on a smaller, compact plant with a very tidy growth habit. Blooms also had very intense color to create a lot of flower power for a small plant. Bees love this flower.

**Calibrachoa - 'Calitastic® Papaya' from Westhoff**

Unique color and a larger bloom made this standout from other calibrachos. The bicolor flowers had a nice bright color and strong blooming. Growth habit was very uniform and looked good overall.

**Celosia - 'Kelos® Fire Scarlet' from Beekenkamp**

The attractive dark foliage was impressive all by itself but the abundant petite flowers were bright and made a great contrast with the foliage. Plants are vigorous and have good garden performance.

**Coleus - 'FlameThrower™ Serrano' from Ball FloraPlant**

The attractive dark red foliage had a bright green edge that created a lot of contrast and a bold look. Leaf shape was also unique and added interest. Plants did not flower and kept a very uniform appearance all season.

**Combination - 'Kwik Kombos™ Fire and Ice™ Mix' from Syngenta**

Plants created a ball of flowers in a container that had a very high "Wow!" factor. Colors were vibrant and made an excellent mix. It was noted that very few combos work with different genera but this is the exception as the bidens, petunia and lobelia were equally represented and none dominated the other.

**Dahlia - 'Temptation Orange' from Dümnen Orange**

The intense dark foliage makes the color of the clear orange flowers really pop out. The contrast was especially good in full sun and flower color doesn't fade. Dark foliage also hides dead heads and requires less maintenance. Growth habit was very uniform.

**Geranium (Interspecific) - 'Caliente® Coral Salmon' from Syngenta**

Impressive vigor and flowering were the obvious characteristics of this winning plant. Prolific flowering and vibrant color made for exceptional flower power. This is definitely a great choice for a landscape plant.

**Geranium (Zonal) - 'Brocade Cherry Night' from Dümnen Orange**

Plants were unique with foliage that has a very large zonation with a rich chocolate color. The dark foliage makes for high contrast with the bright rose colored flowers. The tight double flowers have a bit of a multiflora look to them. Overall the plants were very uniform.

**Ipomoea - 'SolarPower™ Black Heart' from Ball FloraPlant**

Extra-large, heart shaped leaves were dark and created a bold appearance. Plants had good vigor but maintained a compact and uniform growth habit that "plays well with the neighbors".

**Lantana – ‘Lucky™ Sunrise Rose’ from Ball FloraPlant**

This is a dependable performer and is a winner from multiple years in the past as well as 2018. The bright flowers had a mesmerizing mix of colors often found in a sunrise. Plants were very uniform and flowering was very abundant all through the season.

**Lobularia – ‘Passionaria™ Purple White’ from Ball Ingenuity**

Flowering was so prolific that no foliage was visible. Plants created a mass of intense purple and white bicolor flowers that looked great all by themselves or would look good combined with others. The growth habit was very compact and uniform

**Marigold (French) – ‘Super Hero Dark Orange’ from Benary**

Dark green foliage combined well to show off the intense orange flowers. Plants had a nice mounding growth habit that looked good without any deadheading through early September. The cheerful looking flowers would look great in any border.

**New Guinea Impatiens – ‘Sun Harmony™ Blushing Orchid’ from Danziger**

Plants were both vigorous and very floriferous and made a very colorful container. The large flowers held up to the sun and had added interest due to the light lavender striping in the petals. Growth habit was very uniform.

**Osteospermum ‘Osticade™ Lemon’ from Danziger**

Abundant clear yellow flowers were unusually large and had a deep yellow eye for added interest. Blooms were consistent all season long and very showy with uniform plants with clean foliage.

**Pentas – ‘Lucky Star® Dark Red’ from PanAmerican Seed**

Rich red flowers made a great contrast with the dark green foliage. Flowers were abundant and very showy. Plants were vigorous with a tight and compact growth habit.

**Petunia (Container) – ‘Constellation® Aries’ from Westhoff**

Flowers had a unique appearance with speckles and blotches on blooms but were also very floriferous. The densely flowered plants were noted for a good uniform growth habit that held its shape late into the season.

**Petunia (Seed) – ‘Easy Wave® Silver’ from PanAmerican Seed**

Abundant flowers covered this plant and had superior performance in the ground. Flowers were mostly white with a silky sheen and a hint of lavender primarily near the eye. The overall growth habit was very uniform.

**Petunia (Spreading) – ‘Supertunia Vista® Bubblegum’ from Proven Winners**

This is a multi-year winner from many past trials and is considered to be possibly the best petunia in the last 10 years. It always has a dependable show of prolific pink flowers with exceptional vigor.

**Portulaca – ‘ColorBlast™ Double Magenta’ from Westhoff**

Plants were vigorous and very uniform. Double flowers were very showy and had the added benefit of staying open longer than the single petaled varieties. Plants stood out for the unique magenta flower color and spreading growth habit.

**Salvia – ‘Mystic Spires Improved’ from Ball FloraPlant**

Another past winner, it stood out again in 2018 for the abundant dark purple flowers and vigorous, upright plants. Foliage was clean and glossy. This was another bee friendly plant that was often buzzing with excitement.

**Scaevola – ‘Scalora® Pearl’ from Westhoff**

Plants were vigorous and covered with abundant white flowers. The dense round growth habit was very uniform and superior to many other varieties. The multiflora blooms were a favorite with many pollinators in the garden.

**Verbena – ‘Lanai® Upright Twister Watercolor’ from Syngenta**

Abundant flowering covered the canopy almost all season with attractive shades of soft lavender that was attractive even as the blooms faded. Plants had a long lasting flower display and seemed to “bury its dead” blooms under new ones. Uniform growth habit and lack of any sign of mildew also made this plant a winner.

**Vinca – ‘Tattoo™ Papaya’ from PanAmerican Seed**

Very unique flower color and abundant blooms were very impressive. Flowers had a very unusual and beautiful “inky” blush pattern that helped earn the first part of the name, “Tattoo”. Plants had an upright growth habit and can grow well in full sun or part shade.

**Other Outstanding Plants**

**Anigozanthos ‘Kanga Jump Red’ from Green Fuse Botanicals**

Another novelty plant that is popular in Australia but just starting to make an impression in the United States. Foliage almost looks succulent or tropical while the flowers almost look like red fuzzy pods for a very unique overall appearance. Blooms were very abundant and emerged bright red and matured to a dark maroon color over a long period of time.

**Begonia ‘Tophat™ Pink’ from Syngenta**

Plants had great vigor that just kept getting bigger and better as the season progressed until a hard frost. Produces abundant, large pink blooms that are outstanding. Plants had a very uniform growth habit.

**Coreopsis ‘Electric Sunshine’ from Darwin Perennials**

This was a non-stop bloomer which still looked great late in the season. Bright yellow flowers also had a splash of dark red on the petal for excellent contrast. Plants were vigorous but considered an annual for Zone 5.

### **Gomphrena ‘Truffula™ Pink’ from Proven Winners**

Abundant and long lasting pink flowers covered this plant all season. Well branched, mounding plants were very uniform and considered “well behaved” even with the vigorous growth. This low maintenance plant does not require deadheading and can tolerate some dry conditions.

### **Iberis ‘Summer Snowdrift’ from Darwin Perennials**

Bright white flowers covered the plant all summer without any shattering. Plants had a very compact and mounded growth habit that were covered with white blooms. Flowers give a similar flower effect as the perennial type. They bloom all summer but unfortunately are only considered an annual for Zone 5.

For a more complete report and photos of all of these winners go to [www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu).
