## 2020 Flower Trial Garden

### Purpose

The purpose of the flower trial garden is to evaluate the performance of flower varieties under our unique Rocky Mountain environmental conditions. Our growing conditions are characterized by high altitude, intense solar radiation, drying winds, severe hailstorms, large fluctuations between day and night temperatures, season-long need for irrigation and heavy clay soils. Plants are evaluated based on plant vigor, uniformity, floriferousness and tolerance to environmental and biotic stresses. Performances of these varieties are judged by selected students, faculty, industry representatives, public horticulturalists and advanced Master Gardeners. The report will be distributed at the end of the season to all participating companies. The trial results will also be available to the public online at [www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu).

We had twenty-two seed and vegetative companies participate in our twenty-sixth annual, industry-supported, bedding plant trials. The garden consists of approximately 1153 different plant varieties this year. Plants are grown in either the sun or under our shade structure that provides about 70% shade. The plant companies are given the option to choose whether they want their varieties grown in a ground bed, a container or in both locations. Each trial entry in the ground is planted in 2 parallel rows of 9 plants per row for a maximum of 18 plants. Each 20" container is planted with 5 plants. A combination container is planted with 3 plants. There are 526 varieties planted in sun beds, 49 varieties planted in shade beds, 509 varieties planted in sun containers and 69 varieties planted in shade containers.

### Participating Companies:

American Takii Inc.	Green-Fuse Botanicals
Ameriseed	HilverdaFlorist
Ball FloraPlant	Keift Seed Co.
Ball Ingenuity	PanAmerican Seed
Beekenkamp	Proven Winners
Benary+	Sakata Seed America Inc.
Colorado State University	Selecta One
Danziger	Suntory Flowers Limited
Darwin Perennials	Syngenta
Dummen Orange	Terra Nova
GardenChoice®	Westhoff Flowers

### In Kind Donations:

**Greencare Fertilizers, Inc.** - Donated water soluble fertilizer for use in the garden and greenhouse.  
**Everris, Inc** - Donated the Osmocote® slow release fertilizer used in the beds and containers.  
**Pindstrup** - Donated potting media used to grow-on vegetative plugs.  
**Tagawas** - Donated potting media used to grow-on vegetative plugs.  
**Organix** - Donated organic media for sun beds and containers.  
**Welby Gardens** - Grew all AAS seed plants  
**Browns Greenhouse, Kiyota's Greenhouse, Plantorium Greenhouse** - propagated seed varieties at a substantially reduced cost for the trials.  
**Harrell's** – Donated water soluble and slow release fertilizers for containers

### In Appreciation

The Department of Horticulture and Landscape Architecture would like to recognize and thank the following people for making the trial gardens happen this year.

Lauryn Schriener – Graduate Student and Annual Trial Garden Coordinator

The Trial Garden Staff – Emily Gritters, Basil Blume

David Staats – Horticulture Research Associate

All the Larimer & Weld County Master Gardeners who volunteered their time and hard work.

Browns Greenhouse, Kiyota Greenhouse, Plantorium Greenhouse, and Welby Gardens and all of their staff.

The Trial Garden Advisory Committee –Dan Gerace (Welby Gardens), Al Gerace (Welby Gardens), Diana Reavis (Eason Horticultural Resources Inc.), Duane Sinning (Colorado Department of Agriculture), Galen Dokter (Vaughns), Gene Pielin (Gulley Greenhouse), Jim Devereux (Green-Fuse Botanicals), Milan Clickingbeard (Tagawa Greenhouses), Karl Trellinger (Syngenta Flowers), Bridget Blomquist (Denver Botanic Gardens), Mark Seguin (Sakata Ornamentals), Nora Lozada (Michelle's), Ron Brum (Ball Horticultural Company), Amy Gonzales (Syngenta Flowers), Susan Stauber (Ball Horticultural Company), Traicer Gray (Elitch Gardens), Julie Lehman (Denver City Park Greenhouse), Richard Anderson (Tech Center Landscape), Brian Austin (Dutch Heritage Gardens), Diana Shull (Dummen Orange), Holly Shield (Denver City Parks), Steven Engel (PanAmerican Seed), Beth Gulley (Gulley Greenhouse), Kathy McKay (Flamingo Holland), Sean Moody (Ceres Landcare), Stephanie Guterrez (Designs By Stephanie), Ryan Giacomini (Brown's Greenhouse), Dale Kiyota (Kiyota Greenhouse), Sara Metcalf (Plantorium), Aaron Biven (Altman Plants), John Navant (Highland Hills Park and Rec), Debra Pfaff (City of Broomfield), Shalene Hiller (City of Westminster), David Gartner (Tagawa Greenhouse), Emily Mason (DummenOrange), Chris Berg (DummenOrange)

### An Invitation

You are cordially invited to tour the garden at your leisure to enjoy the color and ambiance of a place that is like no other in Colorado. Any suggestions you may have for future programs or improvements are strongly encouraged, so please feel free to contact us with your ideas.

Jessica Davis – Department Head

Phone: (970) 491-7018

James E. Klett – Annual and Perennial Flower Trial Garden Faculty Coordinator

# 2020 CULTURAL DATA

## Growing

All seeds were sent to Brown's Greenhouse, Kiyota Greenhouse, and Plantorium Greenhouse in January and February 2020 for germination and growing-on in their greenhouses into cell packs or 50-cell trays. Seeds were separated between the three greenhouses for germination but all varieties of the same genus were sent to one location. Seed varieties from these three companies were all received on June 1, 3 & 8 and planted in the garden starting on June 5. All vegetative varieties were received as plugs and transplanted into 4.5" pots shortly after arriving at Colorado State University from late March to mid-April.

## Fertilization in Greenhouses\*

Dosatron® fertilizer injectors rated at 7 GPM were used in the greenhouses to fertilize plants each day they were watered, with the exception that every weekend they were watered with clear water. Greencare 14-4-14 water soluble fertilizer was used. Plants were grown in the greenhouses at the CSU Horticulture Center. They received fertilization at a rate of 200 ppm.

## Chemicals Used in Greenhouses

A drench of Banrot® (6 oz/gallon) was applied to all vegetative plugs immediately after arrival and prior to potting up.

This year there were no major abiotic or biotic issues in the greenhouse making for an extremely stress-free year on the plants. The new greenhouse environment was ideal for growing quality plants. High sun and warm temperatures lead to the application of B-Nine on some more vigorous Petunias on May 4<sup>th</sup>. A preventative fungicide and insecticide application of Mantra and Enstar® was applied twice on March 28<sup>th</sup> and May 4<sup>th</sup>. A treatment insecticide application of PyGanic 5.0 was applied on June 16<sup>th</sup> to extra replacement annuals in the greenhouse.

## Soil Amendments and Preparation

All beds were raked clean of old mulch, planting material and weeds prior to planting. Where necessary, RoundUp® was sprayed on weeds. Prior to planting, 1.5-2" of new Grower's Mix media from Organix Supply Inc. was added to all sun beds. The beds were roto-tilled to a depth of 8" which helped incorporate the new media. After tilling, the beds were crowned for better drainage and raked smooth. For containers, the top 6-8" of media was removed and ¼ teaspoon of Banrot® was sprinkled over the remaining soil and watered in. The containers were then re-filled with the same Grower's Mix media used on the sun beds.

Pepper	17	19
Eggplant	17	19

Squash	17	19
Euryops	17	20
Sanvitalia	17	20

**Containers**

There were extra containers located in the shade area and the last row of the sun container area. These containers were filled by Larimer County Master Gardeners Tomato Trials and AAS Trial plants. There were some extra shade containers therefore, we double planted with 3 plants in the second container for any begonia trailing or semi-trailing varieties and all impatiens.

**Watering Schedule**

Plants were watered on an “as needed” basis while in the greenhouses. All plants were thoroughly hand watered after being planted in the garden or in the container. Container trials were irrigated three times a day (depending on rain), every day, for about the first two weeks after planting and then twice a day after that. Each container has 2 drip emitters positioned towards the center that are rated at 1 GPH. All sun containers ran for one hour per cycle and the shade containers ran for 30 minutes per cycle. Beds are zoned according to weekly water-use requirements of 0.5”, 1.0” and 1.5” of water per week, and were watered 2-3 times a week for varying amounts of time starting around July 1, depending on the bed’s water-use rating. Due to some rain this summer, the irrigation was sometimes decreased depending on how much water the individual beds needed.

<b>Bed</b>	<b>Irrigation (in)</b>	<b>Bed</b>	<b>Irrigation (in)</b>
<b>A</b>	1.5”	K	1.0”
<b>B</b>	Drip Irrigation	L	1.0”
<b>C</b>	1.5”	M	0.5”
<b>D</b>	1.5”	N	0.5”
<b>E</b>	1.0”	SA	1.5”
<b>F</b>	1.0”	SB	1.5”
<b>G</b>	1.5”	SC	1.5”
<b>H</b>	1.0”	Shade Containers	Drip Irrigation
<b>I</b>	1.0”	Sun Containers	Drip Irrigation
<b>J</b>	0.5”	UCA Containers	Drip Irrigation

**Fertilization in Garden**

All beds were top-dressed with Pro Rich® Fertilizer (14-5-5) at the rate of 1 pound N per 1000 square feet prior to planting. Before planting, Osmocote® (14-14-14) was applied to all sun containers at a rate of 130 grams/pot and mixed into the media prior to planting. After planting, Osmocote® (14-14-14) was applied to all shade containers at a rate of 65 grams/pot. Prior to planting, Osmocote® (14-14-14) was applied to all sun beds at the rate of 6.4 grams/sq. ft. (suggested medium rate on label) or approximately 160 grams/variety. Osmocote® (14-14-14) was applied to the shade beds at a rate of 3.2 grams/sq. ft. or approximately 80 grams/variety. Greencare water soluble fertilizer (20-10-20) was dispensed through a 100 GPM Dosatron® twice a week at a rate of 200 ppm during the growing season. Fertilizer for extra containers was supplied by Harrell’s.

## Maintenance of Flowers & Pinching

### Greenhouse Maintenance

Genus	Maintenance
Geranium	Deadheaded 4/23, 5/06

### Garden Maintenance

Genus	Maintenance
Geranium	Deadheaded 6/26, 7/20, 8/18
Dahlia	Deadheaded 6/26, 7/21, 8/18

### Weed Control

RoundUp® was applied to all beds prior to tilling in the spring, as well as a spot treatment around the containers. Otherwise, all weeding was done by hand throughout the season.

### Disease and Insect Control in Garden

Zerotol was applied as a soil drench prior to planting. In previous years this was done as a preventative measure against *Xanthomonas*. Rootshield (*Trichoderma harzianum* strain T-22) was applied as a preventative on 6/27/20. Heritage (Azoxystrobin), Palladium (Cyprodinil + Fludioxonil) and Bayleton (Triadimefon) were applied to help control *Sclerotinia* approximately every two weeks from early July thru late August. Palladium was applied on 7/2/20. Heritage was applied on 7/17/20 and 8/23/20. Bayleton was applied on 8/2/20.

On 8/10/20, Pyganic (Pyrethrins) was sprayed on the Calibrachoa in containers to control aphids.

The annual garden has its own supplies and tools in order to reduce the potential spread of disease from other sites.

### Monthly Temperatures and Precipitation for Summer 2020

Month	Avg. Maximum Temperature	Avg. Minimum Temperature	Precipitation (Inches)
April	62.8° F	32.0° F	1.71
May	73.3° F	45.7° F	2.55
June	85.0° F	54.0° F	1.33
July	90.2° F	58.1° F	0.11
August	90.2° F	56.8° F	0.48
September	78.3° F	45.5° F	1.39

## **Data Collection Methods**

### **Plant Size**

Height and width measurements were taken twice during the growing season, July 8<sup>th</sup>, and September 20<sup>th</sup>. This was done to get a feel for the average size of the plants and each variety's growth performance. For consistency in bed data collection, the third plant from the front of the right row was measured; however, if that plant was noticeably smaller or larger than average on July 8<sup>th</sup>, an alternate plant was selected for measurement and the location was noted so the same plant would be measured when the second measurements were taken. Measurements were taken at the highest and widest parts of the plant, including any flowers. This may account for the decrease in height on some varieties. For containers, measurements were taken at the highest and widest parts of overall growth.

### **Flowering Performance**

Since 2007, data on the bloom period for each variety has been taken. In presenting this data, we hope to give a feel for how long the plants were in bloom and how well they bloomed during that period of time. Data was collected on a regular basis, every 7-14 days. Plants were evaluated by estimating the overall flowering based on a scale of 1-5, with 5 being in peak bloom and 1 being plants not in bloom or have very few blooms. Full bloom (5) meaning the stage at which the average consumer perceives the plant as being in perfect bloom. One should take into consideration the broad range between these ratings when interpreting these data. If a variety started at full bloom, it means it was already in full bloom in the greenhouse before it was planted. All this data is presented in numerical fashion in this performance evaluation. Towards the end of the season, any dead plants in the trial were not considered in the evaluation: thus, the data given always reflects the percent of live plants in bloom.

### Evaluation

The trial evaluation week was held from August 3<sup>rd</sup> to 7<sup>th</sup>, 2020. 95 judges consisting of industry representatives, master gardeners, university employees and trial garden advisory committee members evaluated the plant varieties for performance using a combination of these criteria:

#### Plant Quality:

- Uniformity of plant habit
- Bushy, well-branched shape versus open and leggy
- Healthy foliage (deep green versus chlorotic, yellow leaves)
- Foliage texture
- Disease resistance

#### Flower Quality:

- Flower power (number of flowers per plant, substance and holding power)
- Flower presentation (i.e. not hidden by the foliage)
- Color uniformity
- Stable color (resistance to fading) and stable pattern (for bicolor)
- Flower size and uniformity of flowers
- Balance of color in a mixture

#### Overall Presentation:

- Overall “clean” look, versus visible spent blooms
- Fragrant flowers and/or foliage
- Good vigorous growth
- Resistance to climatic stress
- Novelty value of unique features
- Overall consumer appeal

Plant varieties were rated on a scale of 1 to 5 (1 = very poor performance; 5 = excellent performance). These numerical evaluations were used to calculate the average ratings for each variety in the trials. Participants were encouraged to circle pre-generated comments on the evaluation form, if appropriate, as well as write in any other comments and observations they had. The pre-generated comments they could choose from included: Low vigor, Vigorous plant, Few flowers, Many flowers, Uniform, Non-uniform, Unique color and Some chlorosis. This was the fifth year we enacted a digital evaluation format. Of the 95 evaluators, 62 performed evaluation using the digital format, while 33 used the paper evaluation forms, some people group evaluated.

### **Selection of “Best Of” Winners, “Plants Rated As Superior”, and “Sneak Peeks”**

Ratings from all evaluators on August 3<sup>rd</sup>-7<sup>th</sup> were averaged and the top five in each class were placed on a preliminary list. A class is determined to be any group of plants in the same genus that consisted of 10 or more trial entries. The “Best Of” award was given to classes whose top five list had ratings of at least 4.0 and one of them could be considered superior. A subcommittee of university and industry representatives revisited the garden on September 11<sup>th</sup> to review the top-five list and verify the superiority of the top-rated varieties later in the season and not just on August 3<sup>rd</sup>-7<sup>th</sup>. A majority vote was taken for each class to determine the final selections for winners

### **Other Information for the 2019 Trials**

Number of companies participating.....	23
Total number of trial entries (excludes AAS).....	1153
Varieties grown in the ground.....	518
Varieties grown in a container.....	542
Varieties propagated by seed.....	230

## **“Best Of...” Annuals from 2020 Colorado State University Trials**

### **Best of Show – Dahlia ‘Lubega® Dark Velvet’ from Benary+**

This was a ‘show stopper’ due to the strong contrast between the dark purple/velvet foliage and beautiful bicolor blooms. Plants were extremely attractive all by themselves with the dark foliage coloring and uniform compact growth habit. The prolific flowers were held high above the plants to create maximum show. Blooms had single petals which attracted many bees. Plants did not have any sign of powdery mildew even late in the season.

### **Best Novelty – Colocasia ‘Heart of the Jungle™’ from Proven Winners**

This plant makes a dramatic statement to any landscape with its large, dark foliage. The impressive size and shape creates a very tropical and exotic appearance. It is grown for the beautiful foliage which makes a great structure plant in the garden. It does best in full sun.

### **Best New Variety – Centaurea ‘Snowy Owl’ from Terra Nova**

Unique silvery foliage made this plant a standout in the garden. Large, velvety leaves added an interesting textural element. The beautiful gray color made a great combination with other plants. It was highly visible in the garden and very uniform.

### **Best Container – Petunia ‘Bee’s Knee’ from Ball FloraPlant**

The abundant flowers and great two tone yellow color provided exceptional flower power on very vigorous and well branched plants. It was noted for having the best yellow of any petunia in the trial. The color held up very well in the high light intensity of Colorado.

## **"Best Of..." by Class**

### **Angelonia (container) – ‘Serenita® Pink’ from PanAmerican Seed**

Masses of beautiful spikes of pink flowers filled the container while maintaining a very uniform appearance all season. The bicolor flowers were an attractive combination of pink with dark burgundy eye.

### **Angelonia (ground) - ‘Archangel™ Raspberry’ from Ball FloraPlant**

Rosey-pink flowers were very abundant and made a very attractive show. They seemed to jump forward towards the viewer. Blooms were large and plants were of medium height. Uniform plants were described as having a good “roundy, moundy” growth habit. Overall, these plants had great vigor and were very low maintenance.

### **Begonia (container, vegetative) – ‘Dreams BK Collection Vermillion Red®’ from Beekenkamp Plants**

The intense red flowers almost glowed in the shade. The multiflora cluster of flowers gave the impression of a really large bloom. Plants were vigorous and had attractive dark green foliage. This was a repeat winner from last year and noted as a dependable performer.

### **Begonia (container, semi-trailing, vegetative) – ‘Solenia Red®’ from Beekenkamp Plants**

Plant was noted for its prolific blooming and gorgeous red flowers. It was described as being “tough as nails” for its ability to continually bloom throughout the heat of the summer. It looked great in a container but reported to do well in the ground also.

**Begonia (container, seed) – ‘BIG Bronze Leaf Deep Rose’ from Benary+**

Vigorous plants had large foliage and large blooms. The vibrant flower color popped exceptionally well in contrast with the deep bronze/green of the foliage. Plants were noted to have good uniformity.

**Calibrachoa – ‘Cha-Cha™ Frosty Lemon’ from Ball FloraPlant**

Large, bicolor flowers were beautiful combination of soft primrose with a deep yellow throat. Plants featured good foliage and a nice tight growth habit. Vigorous plants produced abundant flowers and lots of color.

**Celosia (container) – ‘Sol™ Lizzard Leaf’ from Pan American Seed**

This plant looked good both in container and in the ground. The glossy foliage was unique and would look great in a mix combo container. Foliage was darker in full sun. Grown mostly for the foliage, the flowers were considered mostly a bonus but they added considerable interest with a unique crested shape.

**Celosia (ground) – ‘Bright Sparks™ Burgundy’ from Syngenta**

The huge, rich red flowers stood out from all the other celosias. Flower size and color was very impressive but the prolific blooming added to the impressive show. Plants were uniform but also very attractive by themselves with very attractive burgundy foliage.

**Coleus (container) – ‘Main Street Beale Street’ from DummerOrange**

A multi-year winner due to its rich, velvety burgundy leaf color which provided color to the garden all season long. Plant vigor was excellent while also maintaining a very uniform growth habit. Flowers were virtually non-existent. Plants performed great in both the ground and containers.

**Coleus (ground) – ‘FlameThrower™ Cajun Spice’ from Ball FloraPlant**

Foliage was noted for a “crazy” leaf pattern and a showy golden/green edge. Plants had controlled vigor that resulted in a very uniform growth habit. The overall appearance was attractive and plants did not have any flower spikes.

**Combination – ‘Kwik Kombos™ Pink Lemonade Mix’ from Syngenta**

Overall appearance of this combo was very vibrant. It was also impressive that all three components looked great together. Plants had good vigor and a good trailing habit over the side of the container. It was a dependable performer in past years as well as in 2020.

**Dahlia - ‘Lubega® Dark Velvet’ from Benary+**

This was a ‘show stopper’ due to the strong contrast between the dark purple/velvet foliage and beautiful bicolor blooms. Plants were extremely attractive all by themselves with the dark foliage coloring and uniform compact growth habit. The prolific flowers were held high above the plants to create maximum show. Blooms had single petals which attracted many bees. Plants did not have any sign of powdery mildew even late in the season.

**Geranium (interspecific) – ‘Calliope® Large Dark Red’ from Syngenta**

Another dependable performer as it has been a multi-year winner and still leads the pack. Flowers were a very impressive dark, rich shade of red with a lot of flower power. Plant had great vigor that were great in the landscape but also good for containers.

**Geranium (zonal) – ‘Super Moon Red’ from Selecta One**

The rich red flower color were a standout in that it did not wash out in the intense sunlight. Plants were very vigorous and uniform with an excellent overall appearance. Blooming was strong throughout the season. Foliage had nice zonation.

**Impatiens – ‘Beacon® White’ from PanAmerican Seed**

Abundant, clear white blooms covered the plants which really brightened up a shady location. Dark green foliage helped make the flower color even more bright. Plants had a very uniform growth habit and had the added plus of being disease resistant to downy mildew.

**Lantana – ‘Hot Blooded™ Red’ from Syngenta**

Vibrant flowers had at least 3 different colors that ranged from deep red to tangerine. Plants had a beautiful and uniform growth habit with abundant flowers on top of plant producing a lot of flower power.

**Lobelia – ‘Glow™ White Lightning’ from Danziger**

Vigorous plants combined with prolific flowering that continued throughout the heat of a record setting summer. The abundant white blossoms were on plants that maintained great uniformity.

**New Guinea Impatiens – ‘SunPatiens® Vigorous Lavender Splash’ from Sakata**

Dark green foliage made a great flower to foliage contrast that helped make the lavender flowers really stand out. Plants were vigorous but maintained an attractive and uniform growth habit.

**Pentas – ‘BeeBright™ Violet’ from Syngenta**

Flowers lived up to their name with abundant violet flowers that were a favorite of the bees. Plants were noted to be superior due to uniform, compact growth habits and dark green foliage.

**Petunia (container, vegetative) – ‘SuperCal® Royal Red’ from Sakata**

Blooms were a fantastic dark cherry color which impressed the evaluators with “stop in your tracks” flower power. Color was held even as the flowers faded. Plants were very vigorous and were well branched that resulted in an excellent growth habit

**Petunia (ground, vegetative) – ‘ColorRush™ White’ from Ball FloraPlant**

Large flowers were a good clean white color and very abundant. Plants were vigorous, uniform and had excellent flower power.

**Petunia (ground, seed) – ‘Easy Wave® Violet’ from PanAmerican Seed**

Violet flowers covered vigorous plants that had a great spreading growth habit that resulted in a vibrant blanket of blooms. Plants held up well under adverse conditions and maintained good uniformity even with some shade.

**Portulaca – ‘ColorBlast™ Double Orange \*2’ from Westhoff**

Showy flowers were noted for vivid shades of orange and double petals. Plants were vigorous and had excellent uniformity.

**Salvia – ‘Mystic Spires’ from Ball FloraPlant**

Dependable flowering and great growth habit made this a winner both in 2020 and in previous years. Vigorous plants were stately and upright with abundant dark purple flowers. Foliage was clean and glossy. This was another bee friendly plant that was often buzzing with excitement with pollinators.

**Scaevola – ‘Abanico Power Laguna Blue’ from Benary+**

Plants had impressive vigor and produced large flowers that covered the plants. The showy, blue blooms held their color and were weather resistant. This entry was grown in a container but would work well in the ground.

**Thunbergia – ‘Sunny Susy® Yellow Dark Eye’ from Benary+**

The vigorous plants made great climbers and were perfect for either a trellis or hanging basket. Flowers were a very vibrant lemon yellow with a nice dark brown throat for added contrast.

**Verbena (container) – ‘Estrella™ Blueberry Improved’ from Westhoff**

The big, blue flowers stood out against the dark foliage for an impressive overall appearance. The semi-trailing habit worked well in containers but would also do well in the ground. Plants were bred for mildew resistance and looked clean all season.

**Verbena (ground) – ‘EnduraScape™ White’ from Ball FloraPlant**

Plant would be great for landscapes due to vigorous growth, large plants and mammoth blooms. Showy, white blooms paired well with many other garden plants. Plants ‘buried their dead’ blooms to keep a fresh appearance all season.

**Vinca (container) – ‘Valiant™ Pure White’ from PanAmerican Seed**

Flowers lived up to their pure white name and the large blooms created a lot of flower power. Plants were vigorous, well-structured and filled the container. The glossy, dark green foliage made a good contrast with the white blooms.

**Vinca (ground) – ‘Virtuosa Lavender’ from Sakata**

Plants were vigorous and produced abundant large, soft lavender flowers that had a white eye for added interest. The compact and uniform plants did well in the ground but would probably also look great in a container.

**Zinnia (container) – ‘Preciosa™ Orange’ from American Takii**

Bright, clear orange flowers eventually faded to an attractive gold color but were fully double and very prolific. Plants were bred to be more compact with superior branching and they filled the container producing excellent flower power.

**Zinnia (ground) – ‘Magellan™ Orange’ from Syngenta**

Large orange flowers were very prolific and very showy. Plants were vigorous, sturdy and did not lodge with overhead watering. Overall appearance was impressive with the vibrant color and uniform growth habit.

For a more complete report and photos of all these winners go to [www.flowertrials.colostate.edu](http://www.flowertrials.colostate.edu).

For further information about the Colorado State University Annual Flower Trials, contact Jim Klett at [Jim.Klett@ColoState.edu](mailto:Jim.Klett@ColoState.edu) or phone 970-218-0104.

### **Consumer's Top Plants**

This was the fourth year that we included a digital evaluation of on our garden for garden visitors to vote for their favorite plants. This new feature was very popular with the public garden visitors. This year we had about 400 visitors submit digital and physical votes. The top consumer voted plants are as follows:

<b>Variety Name</b>	<b>Company</b>
Coleus HeartBreaker	Ball FloraPlant
Coleus Main Street La Rambla 2020	DummenOrange
Geranium Super Moon Red	Selecta One
Celosia Bright Sparks™ Burgundy	Syngenta
Lantana Lucky™ Sunrise Rose	Ball FloraPlant
Helianthus Suncredible® Yellow	Proven Winners
Zinnia Double Zahara™ Yellow Improved	PanAmerican Seed
Petunia Hippy Chick™ Violet	Danziger
