Colorado State University

2022 Flower Trial Garden

Purpose

The purpose of the flower trial garden is to evaluate the performance of flower varieties under our unique Rocky Mountain environmental conditions. Our growing conditions are characterized by high altitude, intense solar radiation, drying winds, severe hailstorms, large fluctuations between day and night temperatures, season-long need for irrigation and heavy clay soils. Plants are evaluated based on plant vigor, uniformity, floriferousness and tolerance to environmental and biotic stresses. Performances of these varieties are judged by selected students, faculty, industry representatives, public horticulturalists and advanced Master Gardeners.

We had twenty-eight seed and vegetative companies participate in our twenty-eighth annual, industry-supported, bedding plant trials. The garden consists of approximately 1,200 different plant varieties this year. Plants are grown in either the sun or under our shade structure that provides about 60 to 70% shade. The plant companies are given the option to choose whether they want their varieties grown in a ground bed, a container or in both locations. Each trial entry in the ground is planted in 2 parallel rows of 9 plants per row for a maximum of 18 plants. Each 20" container is planted with 5 plants. A combination container is planted with 3 plants. There are 581 varieties planted in sun beds, 56 varieties planted in shade beds, 471 varieties planted in sun containers and 101 varieties planted in shade containers.

Participating Companies:

American Takii Inc.	Hilverda Florist
Ameriseed	JYK Seed Co.
Ball FloraPlant	Kieft Seed Co.
Ball Ingenuity	Kintzler-innova
Beekenkamp	PAC
Benary+	PanAmerican Seed
Bull Plant Genetics	Plants Nouveau
Cerny Seed	Proven Winners
Concept Plants	Sakata Seed America Inc.
Danziger	Selecta One
Darwin Perennials	Suntory Flowers Limited
Dummen Orange	Syngenta
GardenChoice®	Terra Nova
Green-Fuse Botanicals	Westhoff Flowers

In Kind Donations:

ICL Specialty Fertilizer - Donated Osmocote slow-release fertilizer used in the beds and containers.

Harrell's – Donated water soluble and slow-release fertilizers for containers.

Tagawas - Donated potting media used to grow-on vegetative plugs.

Organix - Donated organic media for sun beds and containers.

Welby Gardens - Grew all AAS seed plants as a gift in kind.

Browns Greenhouse, Kiyota's Greenhouse - propagated seed grown plants at a substantially reduced cost for the trials.

In Appreciation

The Department of Horticulture and Landscape Architecture would like to recognize and thank the following people for making the trial gardens happen this year.

Tate Erickson – Undergrad and Annual Trial Garden Coordinator

The Trial Garden Staff – Ian McLellan, Cienna Tonini, and Ila Jolly

David Staats – Horticulture Research Associate

All the Larimer & Weld County Master Gardeners who volunteered their time and hard work.

Browns Greenhouse, Kiyota Greenhouse, Welby Gardens, and all of their staff.

The Trial Garden Advisory Committee – Dan Gerace (Welby Gardens), Al Gerace (Welby Gardens), Galen Dokter (Vaughan's Horticulture), Aki Okamoto (Tagawa Greenhouses), Milan Clinkingbeard (Tagawa Greenhouses), Amy Gonzalez (Syngenta Flowers), Mandy Gerace (Syngenta Flowers), Karl Trellinger (Syngenta), Kathy McKay (Schoneveld, Bull PG), Mark Seguin (Sakata Ornamentals), Stephanie Gutierrez (Plants by Stephanie), Steven Engel (PanAmerican Seed), Dale Kiyota (Kiyota Greenhouses), John Navant (Hylands Hills Park and Rec), Beth Gulley (Gulley Greenhouse), Gene Pielin (Gulley Greenhouse), Jim Devereux (GreenFuse Botanicals), Traicer Gray (Elitch Gardens), Diana Reavis (Eason Horticulture), Peter Ault (Dutch Heritage), Angela Storm (Dummen Orange), Duane Sinning (Department of Agriculture), Bridget Blomquist (Denver Botanic Garden), Cassie Doolittle (Denver Botanic Garden), Philip Douglas (Denver Botanic Garden), David Hartley (CSU Emeritus), Holly Shields (City Park Greenhouse), Julie Lehman (City Park Greenhouse), Shalene Hiller (City of Westminster), Sean Moody (Ceres Land Care), Ryan Giacomini (Browns Greenhouse), Scott Fulton (Botany Lane Greenhouse), Doug Parry (Benary Plus), Susan Stauber (Ball Horticulture), Nora Lozada (Ball Horticulture), Ron Brum (Ball Horticulture), Aaron Bivens (Altman Plants), Jim Klett (CSU), David Staats (CSU)

An Invitation

You are cordially invited to tour the garden at your leisure to enjoy the color and ambiance of a place that is like no other in Colorado. Any suggestions you may have for future programs or improvements are strongly encouraged, so please feel free to contact us with your ideas.

Mengmeng Gu – Department Head

Email: Mengmeng.gu@colostate.edu

James E. Klett – Annual and Perennial Flower Trial Garden Faculty Coordinator

Phone: (970) 491-7179; Fax: (970) 491-7745; Cell Phone (970) 218-0104

E-mail: jim.klett@colostate.edu

2022 CULTURAL DATA

Growing

All seeds were sent to Brown's Greenhouse and Kiyota Greenhouse in January and February 2022 for germination and growing-on in their greenhouses into cell packs or 50-cell trays. Seeds were separated between the two greenhouses for germination, but all varieties of the same genus were sent to one location. Seed varieties from these two companies were all received on June 8, 9 and planted in the garden starting on June 14. All vegetative varieties were received as plugs and transplanted into 4.5" pots shortly after arriving at Colorado State University from late March to mid-April.

Fertilization in Greenhouses*

Dosatron® fertilizer injectors rated at 7 GPM were used in the greenhouses to fertilize plants each day they were watered, with the exception that every weekend they were watered with clear water. GreenCare and Harrell's 14-4-14 water soluble fertilizer was used. Plants were grown in the greenhouses at the CSU Horticulture Center. They received fertilization at a rate of 200 ppm.

Chemicals Used in Greenhouses

A drench of Banrot® (6 oz/gallon) was applied to all vegetative plugs immediately after arrival and prior to potting up as a preventative fungicide treatment.

This year there were some minor pest issues in the greenhouse. Mainspring and Flagship were applied as a treatment for white flies and aphids on 4/8. Safari was applied as a treatment for aphids on 5/6 and 5/24. Mural was applied as a treatment for powdery mildew for select plants on 4/8. An early shipment of two varieties of seed petunias lead to vigorous growth, so B-Nine® was applied as a growth regulator to these varieties on May 3rd.

Soil Amendments and Preparation

All beds were raked clean of old mulch, planting material and weeds prior to planting. Where necessary, RoundUp was sprayed on weeds. Prior to planting, some Grower's Mix media from Organix Supply Inc. was added to some sun beds where media was low. The beds were roto-tilled to a depth of 8" which helped incorporate the new media. After tilling, the beds were crowned for better drainage and raked smooth. For containers, all the containers were replaced in spring 2022, Organix Grower's Mix media was used to fill the entire container, updated analysis following. ¼ teaspoon of Banrot was sprinkled over the soil and watered in. New media proved a challenge to hydrate so containers were frequently irrigated prior and post planting till media retained moisture.

* No endorsement of products named is intended nor is criticism of products not mentioned.

Containers

There were extra containers located in the sun near the University Center for the Arts. Larimer County Master Gardener Vegetable Display filled some of these containers, along with AAS Trial plants, and Crew Combos featuring plants in the 2022 Annual and Perennial Trials. There were no extra shade containers this season.

Watering Schedule

Plants were watered on an “as needed” basis while in the greenhouses. All plants were thoroughly hand watered after being planted in the garden or in the container. Container trials were irrigated three times a day (depending on rain), every day, for about the first two weeks after planting and then twice a day after that. Each container has 2 drip emitters positioned towards the center that are rated at 1 GPH. All sun containers ran for one hour per cycle and the shade containers ran for 30 minutes per cycle. Beds are zoned according to weekly water-use requirements of 0.5”, 1.0” and 1.5” of water per week, and were watered 2-3 times a week for varying amounts of time starting around July 12, depending on the bed’s water-use rating. Due to some rain this summer, the irrigation was sometimes decreased depending on how much water the individual beds needed.

Bed	Irrigation (in)	Bed	Irrigation (in)
A	1.5”	K	1.0”
B	Drip Irrigation	L	1.0”
C	1.5”	M	1.0”
D	1.5”	N	1.0”
E	0.5”	SA	1.5”
F	0.5”	SB	1.0”
G	0.5”	SC	1.0”
H	0.5”	Shade Containers	Drip Irrigation
I	0.5”	Sun Containers	Drip Irrigation
J	1.5”	UCA Containers	Drip Irrigation

Fertilization in Garden

All beds were top-dressed with Pro Rich Fertilizer (14-5-5) at the rate of 1 pound N per 1000 square feet prior to planting. Before planting, Osmocote (14-14-14) was applied to all sun containers at a rate of 130 grams/pot and mixed into the media prior to planting. After planting, Osmocote (14-14-14) was applied to all shade containers at a rate of 65 grams/pot. Prior to planting, Osmocote (14-14-14) was applied to all sun beds at the rate of 6.4 grams/sq. ft. (suggested medium rate on label) or approximately 160 grams/variety. Osmocote (14-14-14) was applied to the shade beds at a rate of 3.2 grams/sq. ft. or approximately 80 grams/variety.

Greencare water soluble fertilizer (20-10-20) was dispensed through a 100 GPM Dosatron twice a week at a rate of 200 ppm during the growing season. A transition to Harrell’s water soluble fertilizer (14-4-14) was dispensed after 7/14. Supplemental chelated iron (Ferrilene 6%) was added to Calibrachoa containers on 7/7 (2.27g/gallon).

Maintenance of Flowers & Pinching

Greenhouse Maintenance

Genus	Maintenance
Geranium	Deadheaded 4/29
Dahlia	Deadheaded 5/25

Garden Maintenance

Genus	Maintenance
Geranium	Deadheaded 7/11, 7/19, 8/15, 9/12
Dahlia	Deadheaded 7/13, 7/28, 8/15

Weed Control

RoundUp® was applied to all beds prior to tilling in the spring, as well as a spot treatment around the containers. Otherwise, all weeding was done by hand throughout the season.

Pest Control in Garden

Safari® was applied to calibrachoa for aphids on 7/12. Safari® and Pylon® were applied to Sun New Guinea Impatiens in containers and beds to treat for possible broad mites on 7/5 and 7/12. Container Dahlia's were treated with Pylon® for possible mites on 7/29 and ground Dahlias were treated on 8/12/22 due to similar symptoms.

Disease Control in Garden

ZeroTol® was applied as a soil drench prior to planting, on 5/12. In previous years this was done as a preventative measure against Xanthomonas. The annual garden has its own supplies and tools in order to reduce the potential spread of disease from other sites.

RootShield® was applied to all sun beds on 6/25 as a biological preventative fungicide treatment. Mural® fungicide was applied to all sun beds on 7/4. Palladium® was applied to all in sun beds 7/14 and 7/15 as a preventative fungicide treatment. Bayleton® was applied on 7/20 as a preventative fungicide treatment.

Monthly Temperatures and Precipitation for Summer 2022

Month	Avg. Maximum Temperature	Avg. Minimum Temperature	Precipitation (Inches)
April	65.2° F	34.4° F	0.11
May	72.1° F	43.3° F	2.37
June	85.0° F	53.5° F	0.94
July	89.8° F	60.4° F	3.84
August	88.0° F	59.5° F	0.51
September	82.5° F	50.5° F	1.28

Data Collection Methods

Plant Size

Height and width measurements were taken twice during the growing season, July 14th, and August 16th. This was done to get a feel for the average size of the plants and each variety's growth performance. For consistency in bed data collection, the third plant from the front of the right row was measured; however, if that plant was noticeably smaller or larger than average on July 14th, an alternate plant was selected for measurement and the location was noted so the same plant would be measured when the second measurements were taken. Measurements were taken at the highest and widest parts of the plant, including any flowers. This may account for the decrease in height on some varieties. For containers, measurements were taken at the highest and widest parts of overall growth.

Flowering Performance

Since 2007, data on the bloom period for each variety has been taken. In presenting this data, we hope to give a feel for how long the plants were in bloom and how well they bloomed during that period of time. Data was collected on a regular basis, every 7-14 days. Plants were evaluated by estimating the overall flowering based on a scale of 1-5, with 5 being in peak bloom and 1 being plants not in bloom or have very few blooms. Full bloom (5) meaning the stage at which the average consumer perceives the plant as being in perfect bloom. One should take into consideration the broad range between these ratings when interpreting these data. If a variety started at full bloom, it means it was already in full bloom in the greenhouse before it was planted. All this data is presented in numerical fashion in this performance evaluation. Towards the end of the season, any dead plants in the trial were not considered in the evaluation: thus, the data given always reflects the percent of live plants in bloom.

[Individuals evaluating sun beds on Industry Evaluation Day]

Evaluation

The trial evaluation day was held on August 9th 2022. 241 judges consisting of industry representatives, master gardeners, university employees and trial garden advisory committee members evaluated the plant varieties for performance using a combination of these criteria:

Plant Quality:

- Uniformity of plant habit
- Bushy, well-branched shape versus open and leggy
- Healthy foliage (deep green versus chlorotic, yellow leaves)
- Foliage texture
- Disease resistance

Flower Quality:

- Flower power (number of flowers per plant, substance and holding power)
- Flower presentation (i.e. not hidden by the foliage)
- Color uniformity
- Stable color (resistance to fading) and stable pattern (for bicolor)
- Flower size and uniformity of flowers
- Balance of color in a mixture

Overall Presentation:

- Overall “clean” look, versus visible spent blooms
- Fragrant flowers and/or foliage
- Good vigorous growth
- Resistance to climatic stress
- Novelty value of unique features
- Overall consumer appeal

Plant varieties were rated on a scale of 1 to 5 (1 = very poor performance; 5 = excellent performance). These numerical evaluations were used to calculate the average ratings for each variety in the trials. Participants were encouraged to circle pre-generated comments on the evaluation form, if appropriate, as well as write in any other comments and observations they had. The pre-generated comments they could choose from included: Low vigor, Vigorous plant, Few flowers, Many flowers, Uniform, Non-uniform, Unique color and Some chlorosis. This was the fifth year we enacted a digital evaluation format. Of the 241 evaluators, 191 performed evaluation using the digital format, while 50 used the paper evaluation forms.

Selection of “Best Of” Winners and “Other Outstanding Plants”

Ratings from all evaluators on August 9th were averaged and the top five in each class were placed on a preliminary list. A class is determined to be any group of plants in the same genus that consisted of 10 or more trial entries. The “Best Of” award was given to classes whose top five list had ratings of at least 4.0 and one of them could be considered superior. A subcommittee of university and industry representatives revisited the garden on September 8th to review the top-five list and verify the superiority of the top-rated varieties later in the season and not just on August 9th. A majority vote was taken for each class to determine the final selections for winners.

Other Information for the 2022 Trials

Number of companies participating.....	28
Total number of trial entries (excludes AAS)	1,198
Varieties grown in the ground.....	637
Varieties grown in a container.....	561
Varieties propagated by seed.....	180
Varieties propagated by cuttings.....	851
Number of genera represented.....	51
Number of student employees dedicated to the project	
Spring (part-time, 10-20 hrs/wk).....	4
Summer (full-time, 40 hrs/wk).....	3 ½
Fall (part-time, 10-15 hrs/wk).....	3

“Best Of...” Annuals from 2022 Colorado State University Trials

Best of Show – SunPatiens® Vigorous Peach Candy from Sakata® Seed America

Prolific peach colored flowers blanket the attractive dark green foliage. Blooms kept a nice pattern and were a very nice bicolor with peach and white that maintained vibrant color even in the intense Colorado sun. Plants were noted for their great vigor and uniform shape. Plants would be ideal for the landscape with its ability to provide massive color.

Best Novelty – Senecio Angel Wings (‘Senaw’) ^{PP28,830} from Concept Plants

Prolific flowering was sustained throughout the entire growing season. The soft lavender flowers were very showy and had a slight fragrance in the heat of the afternoon. Plants had good uniformity and were a favorite of pollinators.

Best New Variety – Salvia Rockin’® Deep Purple 2023 from Proven Winners®

Deep purple flowers combined with dark calyx and stems made a great color contrast with the attractive foliage. Plants were very sturdy and did not lodge even with overhead irrigation. Growth habit was very uniform and plants had excellent vigor. Would make a good choice for either ground or containers.

“Best Of...” by Class

Angelonia (container) - Archangel™ Blue Bicolor (‘Balarclubi’) from Ball FloraPlant®

Plants had prolific flowering and had excellent rounded habits without any “spiking”. Large bicolor flowers were very attractive against the glossy dark green foliage. Plants were very healthy and low maintenance.

Angelonia (ground) - Archangel™ Purple Improved from Ball FloraPlant®

Blooms had an intense, solid purple color and abundant flowering. Plants had a nice spreading growth habit with dense branching and nice foliage. The uniform plants did well in a summer with many periods of extreme heat.

Begonia (Rex) - Jurassic Jr.™ Fire Spike from Ball Ingenuity®

Plants make attractive mounds of dense and very colorful foliage. Grown mainly for foliage, it does have small pink flowers later in season that also complement the pink shades in the leaves. A great choice to bring color to shady areas while also being very low maintenance. The Jurassic Jr. series provides all the same beauty as the Jurassic series but with ~40% smaller foliage.

Begonia (container, seed) - Hula™ Red Spreading Begonia (PAS1438024) from PanAmerican Seed

This is a new class of begonia that features a great spreading growth habit that looks great in containers and could also be used in the ground. Flowers are more traditional sized but are very prolific and provide abundant color combined with the dark foliage. Plants are very adaptable and can be used in sun or shade locations.

Begonia (ground, seed) – Bionic™ Green Leaf Rose from Syngenta® Flowers

Huge flowers and large foliage made this plant standout. Plant vigor was excellent and produced large blooms with two tone flowers of soft shades of pink. The self-cleaning plants will excel in sun or shade conditions.

Begonia (ground and container, vegetative) - BK Collection Vermillion Red from Beekenkamp Plants

Plants always had abundant, double flowers all season. The compact plants had strong stems and had a very attractive growth habit. Intense red blooms combined with the prolific blooming made them a standout for impressive flower power.

Calibrachoa - Bumble Bee™ Hot Pink from Ball FloraPlant®

From a distance it was impressive all season with good vigor, a great rounded habit and a blanket of bright pink flowers covering the container. Up close, the hot pink blooms stand out with a star-burst pattern of yellow in the center and throat.

Celosia - Flamma Bright Red from Sakata® Seed America

The vivid red color was very intense and did not fade in the bright Colorado sunlight. Excellent branching resulted in prolific flowering and abundant color. Flower heads were tight and did not flop even with overhead irrigation. The overall growth habit on the compact plants was very uniform.

Coleus - Main Street Yonge Street from Dummen Orange®

Plants had rich, red foliage combined with uniform growth habit that looked near perfect. The dark leaf color was noted for standing up to the intense Colorado sunlight without fading. Flower heads were buried by foliage to keep a very clean overall look.

Combination - MixMasters™ Amped Up from Ball FloraPlant®

Three different coleus combined to look good from “Day 1”. Plants were uniform with excellent overall aesthetics and did not flower. Vigor was impressive and only recommended for large containers.

Dahlia - City Lights™ Purple from Selecta One

For the second year in a row, this was a favorite plant from the voting on Consumer Day as well as the industry evaluation due to the abundant rich, dark purple flowers and dark foliage. The consistent appearance was a reason for it being a repeat winner as well as in 2020. Plants were uniform in habit and maintained a fresh appearance by burying its dead.

Geranium (container) - Sunrise™ Brilliant Red 23 from Selecta One®

Flowers were abundant with a bright shade of scarlet/red blooms. Plants had great vigor and produced many large flowers. The medium green foliage was reminiscent of “grandmother’s geraniums”.

Geranium (ground, Interspecific) - Caliente® Coral Salmon from Syngenta® Flowers

Bright coral flower color is very bold against dark green foliage and dark flower stems. The single petaled flowers were very abundant and covered the plants for a spectacular show of color. Plants had great vigor and were very uniform.

Geranium (ground, Zonal) - Dynamo™ Dark Red from Ball FloraPlant®

Flowers have an intense shade of dark red and it was noted that there was nothing else quite like it in the trial. Plants were bred to have medium vigor and filled out nicely with a very uniform growth habit. Flowers were both striking because of their color but also very prolific and created a high degree of flower power.

Gerbera - Garvinea Sweet Sparkle from HilverdaFlorist

Blooms have great eye-catching color and also held high on stems which work well in both the landscape as well as a cut flower bouquet. The hot red/rose color held up to the intense summer sun. Plants were very healthy with above average number of breaks that resulted in more flowers. Entire series is bred for the landscape and were excellent.

Impatiens (seed, container) - Beacon® Portland Mix from PanAmerican Seed®

Nice mix of colors brightened up the shade with abundance of flowers. Besides the obvious outward characteristics of uniform plants covered by many flowers, the Beacon series also provides high resistance to Impatiens downy mildew which can be devastating.

Impatiens (seed, ground) - Imara XDR Rose from Syngenta Flowers

Plants had good vigor with dark green foliage and a compact branching habit. Flowers had a strong rose color that was consistent all season. It also has a high degree of resistance to downy mildew.

Impatiens (shade, New Guinea) - Super Sonic® White from Syngenta® Flowers

Huge clear white flowers bloomed atop uniform plants with a nice dark green foliage that really made the flower color “pop”. Full, well-branched plants filled the container with a well balanced growth habit.

Lantana (container) - Bandolista™ Pineapple from Syngenta® Flowers

Noted for its strong flower color and excellent flowering. The vigorous plants had a nice “sprounding” (spreading/mounding) habit that looked good in both the container and in the ground. This entry loved the heat and looked great throughout the many near 100° days.

Lantana (ground) - Bandolista™ Mango from Syngenta® Flowers

Nice shades of mango live up to the flower name with abundant blooms of bicolor flowers. The heat loving plants had high vigor and would look in good either in the ground or in a basket. No seed set was noticed which led to better flowering. It was also a favorite of the bees

Marigold – Endurance™ Yellow from Syngenta® Flowers

The endurance name fit the flower as it looked good a very long time with many bright yellow blooms. Triploid plants were credited with better heat tolerance, flower power and large blooms. Plant vigor was excellent and buried its dead resulting in superior overall appearance and low maintenance.

Osteospermum - Gelato Prune from Westhoff

Plants had good flower power even during the heat of the summer. Flowers were very large and a nice shade of dark purple. Overall, the growth habit was uniform and the foliage had a nice green color. It is a consistent performer and also won in 2021.

Petunia (container, vegetative) - SureShot™ White from Ball FloraPlant®

Prolific clean white flowers covered the trailing plants which in turn enveloped the entire container. The growth habit was very uniform, and plants were very full. Flower power was excellent all season long.

Petunia (ground, seed) - FotoFinish™ Pink from Syngenta® Flowers

Great choice for the landscape as plants had excellent vigor and a nice spreading habit. The abundant hot pink flowers and good flower size created a lot of high impact flower color that was visible from a long distance.

Petunia (ground, vegetative) - DuraBloom® Electric Lilac from Dummen Orange®

Plants are durable and looked good all season with prolific flowering. Uniformity and vigor was superior all season and resulted in excellent overall aesthetics with relatively low maintenance.

Petunia (ground, mini) - Supertunia Mini Vista® Yellow from Proven Winners®

Plants were loaded with petite yellow flowers to the point the foliage was almost unseen. It would make a great spreader for the landscape or look good in a large planter. Evaluators described it as smaller, yellow version of Supertunia Vista® Bubble Gum® which won CSU Flower trial award more times than any other petunia over the years.

Portulaca - Pazaaz™ Yellow Improved from Danziger

This drought tolerant plant looked good in a container and could also be used as an annual groundcover. The many flowers were noted for opening relatively early for maximum show. Blooms had a strong yellow color while the plants had good uniformity and vigor.

Rudbeckia - Sunbeckia Maya from Bull Plant Genetics

Large striking flowers were very showy with two tone yellow petals and a chocolate colored cone in the middle that reminded some of a Hershey's Kiss. Flowers aged well and maintained their appearance for a very long period both in the ground and container. Plants were very uniform.

Salvia - Rockin'® Deep Purple 2023 from Proven Winners®

Deep purple flowers combined with dark calyx and stems made a great color contrast with the attractive foliage. Plants were very sturdy and did not lodge even with overhead irrigation. Growth habit was very uniform, and plants had excellent vigor. Would make a good choice for either ground or containers.

Sun Impatiens – SunPatiens® Vigorous Peach Candy from Sakata® Seed America

Prolific peach colored flowers blanket the attractive dark green foliage. Blooms kept a nice pattern and were a very nice bicolor with peach and white that maintained vibrant color even in the intense Colorado sun. Plants were noted for their great vigor and uniform shape. Plants would be ideal for the landscape with its ability to provide massive color.

Verbena (ground) – EnduraScape™ Pink Bicolor (Balendpibi')^{PP28,455} from Ball FloraPlant

Flowers had a unique combination of soft lilac pink with darker shades in the middle. Plants looked good in containers with strong vigor and an upright mounded growth habit that did not open up over the entire season.

Verbena (container) - Vanessa™ Compact Neon Pink from Danziger

Bright pink flowers covered the nicely mounded plants. This would make an excellent choice for a hanging basket with a well branched habit. Flower color held strong even in the heat of the summer. There were no signs of powdery mildew even late in the season.

Vinca - Cora® XDR Punch from Syngenta Flowers®

Noted for being “tried and true” due to its large flower and glossy foliage while also having high heat and disease tolerance. Plants had good vigor and uniformity while the large blooms had a nice bright color that was very showy.

Zinnia - Magellan™ Orange from Syngenta Flowers®

Large flowers had a nice pumpkin shade of orange. Flowering was prolific on very uniform plants. Foliage was very healthy with no signs of powdery mildew even into September. Plants buried their dead for a relatively low maintenance plant. It could also be considered as a good substitute for marigolds.

Other Outstanding Plants

Dahlia Labella® Maggiore Fun Chocolate Yellow from Beekenkamp Plants

Flower buds start out as a chocolate color and open to a bright yellow bloom that has excellent contrast with the dark foliage. The plants are upright with a nice compact growth habit and great uniformity resulting in excellent overall aesthetics.

Lantana Bandolista™ Red Chili from Syngenta Flowers®

Flowers had a strong, saturated red/orange color. The heat loving plants looked great in a container but would also look fine in the ground. Plant vigor was excellent with consistent blooming all summer.

Gerbera Garvinea Majestic Light Pink from HilverdaFlorist

Prolific flowering all season was combined with color that did not fade even in the intense sunlight of Colorado. Entire Garvinea series is bred for the landscape and had excellent flower power and uniform, disease free plants.

Sun Impatiens - SunPatiens® Compact Classic White (‘SAKIMP068’) from Sakata® Seed America

Plants had perfect form all season and were covered by a cape of white flowers. The classic white blooms were crisp and clear in color. Can be grown in sun or shade. Plants were compact and disease resistant.

Zinnia Zesty™ Purple form Syngenta Flowers®

Flower color is a “stunner” as the purple color is very striking and there is nothing similar to it in any other series. The color makes it a standout in the landscape. The flower is densely packed with petals and very large with blooming that continues all season. Plants are very uniform, disease free and have excellent overall aesthetics.

For a more complete report and photos of all these winners go to www.flowertrials.colostate.edu.

Consumer's Top-Rated Plants

This was the fourth year that we included a digital evaluation of on our garden for garden visitors to vote for their favorite plants. This new feature was very popular with the public garden visitors. This year we had about 650 visitors submit digital and physical votes. The top consumer voted plants are as follows:

Variety Name	Company
Senecio Angel Wings	Concept Plants
Dahlia City Lights™ Purple	Selecta One
Dahlia Dahlinova XXL Acapulco	Dummen Orange
Rudbeckia Sunbeckia Maya	Bull Plant Genetics
Coleus (Plectranthus) ColorBlaze® Torchlight	Proven Winners
Petunia Crazytunia Black Mamba	Westhoff
Celosia Candela Pink	Beekenkamp Plants
Dahlia Dahlegria™ Magenta Bicolor	Syngenta Flowers
Canna Cannova Bronze Scarlet	Ball Ingenuity
Celosia Flamma Golden	Sakata Seed America

Ratings and Evaluation Day Comments for Varieties Grown in the Ground

Genus	Cultivar	Company Name	Color	New	Light: C or S *	Rating 1-5**	Evaluators' Comments on 8/9/22***
Agastache	Betterbuzz Amarillo	Dümmen Orange	Yellow		sun-c	2.67	[11] Many Flowers, [13] Non-Uniform, [18] Low Vigor, [1] Disease Present, [1] Unique Flower, [1] Unique Flower Color, [4] Uniform <i>a little inconsistent and not very eye-catching, very little growth but is still cute for maybe combo pot fillers, flower color a little dull, flower power is less than average, nice compact habit, quiet color, [2] short and compact, [3] small flowers, small mounds with continual blooms throughout the summer, not super consistent, blooms are a bit dull</i>
Agastache	Betterbuzz Amber	Dümmen Orange	Orange		sun-c	2.88	[10] Uniform, [11] Many Flowers, [12] Low Vigor, [1] Unique Colors, [2] Some Chlorosis, [2] Unique Flower, [2] Vigorous Plant, [3] Non-Uniform, [3] Vibrant Flower Color, [8] Unique Flower Color <i>bloom color is pale but pretty, decent height, flowers held nicely above foliage, nice orange color, good color, has a unique color after flowers bloom and adds dimension to the plant, quiet color, smaller height, soft amber orange flowers, not much structure and shape but overall appearance unified amongst varieties</i>
Agastache	Betterbuzz Rosa	Dümmen Orange	Pink		sun-c	3.15	[12] Uniform, [16] Many Flowers, [1] Few Flowers, [1] Great Foliage, [1] Some Chlorosis, [1] Unique Flower, [2] Unique Colors, [2] Vibrant Flower Color, [4] Non-Uniform, [4] Vigorous Plant, [7] Unique Flower Color, [9] Low Vigor <i>coloration of the flower and plant is very nice, color of blooms appears bleached, dwarfier but many flowers, less structured habit, enjoy the scent from the agastache, nice pale pink flower color, good uniformity, small, nice plants but not uniform, color a little dull, quiet color</i>
Angelonia	AngelDance™ Fuchsia Bicolor	Ball FloraPlant	Purple	NEW	sun-c	3.47	[10] Uniform, [11] Non-Uniform, [13] Unique Flower Color, [18] Many Flowers, [1] Disease Present, [1] Few Flowers, [22] Vigorous Plant, [4] Unique Colors, [4] Vibrant Flower Color, [9] Great Foliage <i>eye catching with flowers to the top, fills out really well, not many flowers, dead plant, great flower color which stand out on tall/vigorous stems, medium amount of flower stocks overall but flowers are evenly spaced, great balance of height, width and flowers, nice bicolor flower too much foliage showing, really neat color variation in the flowers, purple with white ombre effect</i>
Angelonia	AngelDance™ Violet Bicolor	Ball FloraPlant	Purple	NEW	sun-c	3.44	[10] Vibrant Flower Color, [15] Many Flowers, [19] Vigorous Plant, [2] Few Flowers, [3] Unique Colors, [5] Unique Flower Color, [7] Great Foliage, [8] Uniform, [9] Non-Uniform <i>bicolor habit notable and bold, mix of green stocks amongst the purple, growth habit is not as dense or as uniform as some of the others, not as many flowers, presentation not so impactful, purple and white pops well, some height variation between plants and a few are starting to lay down, stocks are aren't clumped together and have empty space to enjoy the foliage, tall, too much foliage showing</i>
Angelonia	AngelMist® Spreading Dark Purple	Ball FloraPlant	Purple	IMP	sun-c	2.97	[10] Uniform, [14] Many Flowers, [1] Few Flowers, [1] Unique Colors, [2] Great Foliage, [3] Low Vigor, [6] Non-Uniform, [6] Vibrant Flower Color, [9] Vigorous Plant <i>flowering is only moderate, flowers appear to be laying down, it's easy to see the center of the plant because there are no flowers above it, just on the edges, low growing ground cover type, messy purple ground nests, nice lower growing variation, looks great and seems to stay roughly 8 inches tall, not a great spreading effect, plants have grown since planted but are very obviously individual, not many flowers</i>

Ipomoea	Sweet Caroline Medusa Green	Proven Winners	Green		sun-c	3.94	[16] Vigorous Plant, [18] Uniform, [1] Disease Present, [1] Vibrant Flower Color, [22] Great Foliage, [4] Few Flowers <i>all green color, great mound/bushy growth habit, healthy foliage color and has a unique leaf shape, mounded, dense growth with supports itself and covers the ground, nice foliage plant [2], vibrant finger foliage not busy but adding depth to the mound, perfect uniformity, cool foliage, unique leaf [4]</i>
Ipomoea	Sweet Caroline Upside Black Coffee™	Proven Winners	Black	NEW	sun-c	3.81	[15] Uniform, [20] Great Foliage, [20] Vigorous Plant, [2] Few Flowers, [2] Unique Flower Color, [5] Non-Uniform, [9] Unique Colors <i>cool multi colored foliage, great contrast of new growth light green while mature is dark purple [2], not uniform, extremely unique foliage, bicolored green and purple, growth habit is very full and shrubby-like when planted in ground beds, for designs, i wouldn't want the two colors in the landscape but they would be ok in a container or as a houseplant, new growth starts green [2], no flowers, looks to be more of a climber but acts as a great ground cover, relatively tall and takes over an area</i>
Ipomoea	Sweet Caroline Upside Key Lime	Proven Winners	Green	NEW	sun-c	2.00	[11] Disease Present, [14] Low Vigor, [2] Few Flowers, [2] Some Chlorosis, [4] Uniform, [6] Great Foliage, [6] Vigorous Plant, [7] Non-Uniform <i>well adaptable to the environment, vibrant neon foliage and growth habit is very vigor/filling, not as vigorous and more weedy looking, leaves have darker edges, not uniform, spreading into other plants, purple outline of some leaves are nice, this one seems to be more of a climber</i>
Juncus	Blue Mohawk	Proven Winners	Green		sun-c	3.56	[17] Great Foliage, [17] Vigorous Plant, [19] Uniform, [1] Color Does Not Match Name, [1] Few Flowers, [1] Some Chlorosis, [1] Unique Colors <i>blue hue of sword blades coming out of the ground, i wouldn't consider this blue, nice blue tinge makes this an attractive grass, very few dead strands give it a great appearance, nice clump former, some brown tips, some had burnt/yellowing tips but was not severe enough to take away from its beauty/ appearance, great compact shape</i>
Juncus	Graceful Grasses® Curly Wurly	Proven Winners	Green	NEW	sun-c	3.89	[13] Uniform, [15] Vigorous Plant, [1] Few Flowers, [1] Unique Flower, [21] Great Foliage, [2] Low Vigor, [4] Non-Uniform <i>architectural, love the unique shape, really unique curly foliage, one of my favorite foliage plants for the year, the grass is not uniform but that is what makes it fun, the curls make the grass unique, unique corkscrew habit, less vigorous than hoped, unusual form, very attractive and fun plant, it grows in dense bundles but does not unify well</i>
Kniphofia	Glowstick	Darwin Perennials	Yellow	NEW	sun-c	3.06	[10] Great Foliage, [13] Vigorous Plant, [1] Unique Colors, [21] Uniform, [23] Few Flowers, [2] Low Vigor, [3] Unique Flower, [3] Unique Flower Color, [3] Vibrant Flower Color <i>bloomed from may to mid july in full, again in september, [9] few blooms in august, iridescent yellow flowers, decent vigor, excellent vegetative growth, nice thin leaves, great height, flowers seem to be disappearing in late july, way past prime, nice coloring of the flowers, name is fitting</i>

Celosia plumosa	Fresh Look Mix		46 X 26	58 X 29	flower color on about half of plants has faded but they probably still look okay for late in the season.	5	5	5	5	5	5
Celosia plumosa	Fresh Look Orange		37 X 24	45 X 38	color has mostly faded although still acceptable overall.	5	5	5	5	5	5
Celosia plumosa	Fresh Look Red		36 X 25	47 X 35	flower color is fading on most of plants but still looks acceptable for late season.	5	5	5	5	5	5
Celosia plumosa	Fresh Look Yellow		40 X 31	43 X 32	color has mostly faded and not very showy. plants are starting to show a little lodging.	5	5	5	5	5	5
Cleome	Sparkler™ 2.0 Lavender		80 X 34	101 X 43	flowering is moderate and plants look like they are losing some vigor.	5	5	5	5	5	4
Cleome	Sparkler™ 2.0 Rose		76 X 39	81 X 46	flowering is moderate but plants are beginning to lodge and look a little chlorotic.	5	5	5	5	5	4
Cleome	Sparkler™ 2.0 White		72 X 45	89 X 41	flowering is moderate but plants look a little chlorotic and are starting to lodge.	5	5	5	5	5	4
Coleus	Coleosaurus Improved	NEW	52 X 46	88 X 67	growth habit is becoming irregular and there is significant flowering throughout the entry.	5	5	5	5	5	5
Coleus	Colocha Rose		29 X 25	32 X 31	looks fair overall with moderate vigor. abundant flowers are beginning to show.	4	4	4	4	4	4
Coleus	Colocha Scarlet		20 X 21	46 X 36	two plants seem to have reverted to a very dark color and the rest have abundant flowers throughout.	4	4	4	4	5	5
Coleus	FlameThrower™ Cajun Spice		24 X 40	46 X 45	overall still looks good although there is some slight lodging on a few.	5	5	5	5	5	5
Coleus	FlameThrower™ Salsa Verde		22 X 40	33 X 47	plants still are nice compact and relatively uniform. color still seems to be the same as during the summer.	4	4	4	5	5	5
Coleus	Limewire		42 X 37	83 X 58	a lot of flowers cover the plant which is a detraction from overall appearance.	5	5	5	5	5	5
Coleus	Main Street Ashburry	NEW	54 X 45	68 X 43	growth habit is opening up slightly but still looks very good overall and does not have any hints of flowers appearing.	5	5	5	5	5	5
Coleus	Main Street Orchard Road		41 X 45	70 X 55	overall still looks acceptable but flowers are starting to appear.	5	5	5	5	5	5
Coleus	Main Street Venice Boulevard		41 X 46	83 X 55	plants are showing significant lodging and has significant flowers.	5	5	5	5	5	5
