Function—The Charge and Care of the Woman's Bilding. MRS. GILPIN-BROWN, MISS MARSHALL, MISS TOBEY, and a Student.

#### Bilding Committee.

Function—Arranging Time and Place for Functions in Bildings. Mr. Abbott, Mr. Stephens.

#### HISTORY OF THE COLLEGE.

The State Normal Scool of Colorado was establisht by an act of the legislature in 1889. The first scool year began October 6, 1890.

At the begining of the second year the scool was reorganized and the course extended to four years. This course admitted grammar scool graduates to its freshman year, and others to such classes as their ability and attainment would allow.

At a meeting of the Board of Trustees, June 2, 1897, a resolution was past admitting only high scool graduates or those who hav an equivalent preparation, and practical teachers. This policy makes the institution a professional scool in the strictest sense.

The Eighteenth General Assembly past an act making the State Normal Scool at Greeley, Colorado, also The State Teachers College of Colorado. In the catalog and in all the official publications hereafter the title, "The State Teachers College of Colorado," will be used.

#### Location.

The Teachers College is located at Greeley, in Weld County, on the Union Pacific, the Colorado & Southern, and the Denver, Laramie & Northwestern railways, fifty-two miles north of Denver. This city is in the valley of the Cache la Poudre River, one of the richest agricultural portions of the State. The streets ar lined with trees, forming beautiful avenues. The elevation and distance from the mountains render the climate mild and helthful. The city is one of Christian homes and contains churches of all the leading denominations. It is a thoroly prohibition town. There ar about 10,000 inhabitants.

#### Bildings.

The main bilding is of red prest bric, trimd with red sandstone. It is one of the best and most commodius normal scool bildings in the United States. This bilding is situated in the midst of a campus containing forty acres overlooking the city. The bilding is heated thruout by steam and is helthful and plesant. It is supplied with water from the city water works.

The Training Scool is a commodius bilding of red prest brick, similar in style to the Administration Bilding. In its construction no pains or expens hav been spared to make it sanitary, fireproof, and in every possible way an ideal bilding for a complete graded scool from the kindergarten to the high scool, inclusiv.

The Simon Guggenheim Hall of Industrial Arts is a beautiful structure in the classic style of arcitecture. It is constructed of gray prest brick. It wil accommodate the departments of Manual Training and Art, including every branch of hand work and art training applicable to the highest type of public scool of the present and immediate future. This bilding is a gift to the scool from Senator Simon Guggenheim.

There is a very commodius and wel arranged residence for the president. It is so arranged and equipt as to be convenient for the varius social functions givn to the students and faculty by the president.

The heating plant is of the most modern type, and is in architecture the same as the other bildings.

The library is a beautiful bilding, commodius and wel adapted to the use for which it was intended. The equipment is thoroly modern.

The greenhouse is of cement, iron, and glas. It is one hundred and sixteen feet long by twenty feet wide, and has connected with it a servis room where the students of the Normal department and children of the Training department ar taut to care for plants they may wish, now and in the future, to hav in their homes.

#### Maintenance.

The maintenance of the State Teachers College is derived from a millage on the entire assessment of the State and special appropriations. The legislature also makes special appropriations for bilding and general development.

#### THE FUNCTION OF THE TEACHERS COLLEGE.

The function of the Teachers College is to make teachers. To do this it must keep abrest of the times. It must lead in

#### GREELEY, COLORADO

public education. It must project the future. The modern conception of education embraces all of human life. This wide and deep and rich notion enlarges the function of an institution that aims to prepare teachers. This function embraces in its relations; the faculty, the child, those preparing to teach, the home, the state, society, and the course of study.

#### Relation to the Faculty.

The faculty is the scool. Its power and influence consist in its faculty. The teachers should be pickt men and women. They should be persons who hav especially fitted themselvs. Normal scool work is unique. To be a teacher of teachers requires very special qualifications and preparation.

Character stands paramount in the equipment of a teacher. Nothing can take its place.

Ability to teach ranks next in the hierarcy of qualification. This is ability to adapt self and subject to the pupil, and to inspire to action. It is a natural gife specially traind.

Scolarship is the reserv power of every strong teacher. It commands respect. The scolarship of a normal scool teacher should first be liberal, then special.

Culture is essential. It givs tone to the entire personality. It is the development of the finer nature. It means good manners, good taste, refined thoughts, elegant expression, pure spirit.

Professional ethics and spirit bind the faculty into one harmonius whole, without which there is a great lac of efficiency. A due recognition of this professional attitude characterizes all the members of the faculty. Due regard for each other in speech and manner should always exist.

#### Relation to the Child.

In the preparation of teachers the end in view is the education of the children of the state. The child is the supreme concern. The function of the normal scool is to giv such an interpretation of the child and its development in all directions as wil best prepare it to enter fully, redily, and righteously into its environment.

#### Relation to Those Preparing to Teach.

A student who enters the State Teachers College should hav maturity of mind. This is absolutely necessary, for the

student who is studying objects in their relation to the education of children has a more complex problem than one who is studying the subject for the subject's sake.

#### ORGANIZATION OF THE COLLEGE.

#### Information for All Students.

The College is organized into five distinct divisions.

1. The Graduate College;

2. The Senior College;

3. The Junior College;

4. The High Scool;

5. The Elementary Scool, including the Kindergarten.

The Junior College embraces all the work done in the first two years of the college proper. This work leads to the Junior College diploma and life state teachers' certificate.

The Senior College embraces the work usually done as third and fourth year college work, and leads to the degree of Bachelor of Arts in Education and the life certificate to teach in Colorado.

The **Graduate College** embraces the work usually done in advance of the four-year college course, and leads to the degree of Master of Arts in Education and the life certificate to teach in Colorado.

The High Scool and Elementary Scool divisions make up the Training Department of the Teachers College, and need no fuller explanation.

#### Admission to the Junior College.

Anyone may take courses in Non-Residence, but to become a resident student and a candidate for a degree and diploma, the regulations given belo must be complied with.

1. Students must be of good moral character and free from contagious diseas.

2. Graduates of acceptable high scools of this and other States ar admitted without examination upon presenting to the Dean of the College their diplomas or certificates of graduation. The minimum of work acceptable for entrance is 30 semester hours (15 units). 3. Practical teachers of mature years, who ar not high scool graduates, may enter and take such work as wil make up the deficiency and then become candidates for graduation and the state certificate, in the same way as other students.

4. Students having done work in other colleges or normal scools, equal in academic standing to The State Teachers College of Colorado, upon application to the Dean of the College, may obtain credit for such work and be givn such advanst standing as is due. In case the student is a graduate of another normal scool or college, he wil go at once to the Dean of the Senior College and apply for advanst standing. If, however, a student is not a college or normal scool graduate, he wil apply to the Dean of the College, who wil refer him to the Dean of the Senior College in case his advanst standing seems sufficient for admission to the Senior College.

#### Advanst Standing.

Students who wish to apply for advanst standing should ask for the Blank Application Form for Advanst Standing. Upon presenting this, properly filld out and accompanied by the credentials calld for, the College wil grant whatever advanst standing seems to be merited. Credits from other normal scools or teachers' colleges of equal rank with The State Teachers College of Colorado ar accepted, hour for hour. Credits from reputable colleges, and universities, ar accepted at their original value.

#### Minimum Terms in Residence.

No diploma of the College is granted for les than three terms of work in residence.

No person who has alredy received one diploma from this institution wil be permitted to receiv another diploma until such person shal hav ernd the ful number of credits required for such diploma, and completed not les than one full additional term of residence work in this institution.

#### Admission to the Senior College.

Graduates from the Junior College of The State Teachers College of Colorado ar admitted to the Senior College.

Graduates of other colleges, who hav ernd one of the regular academic degrees ar admitted to the Senior College with-

out examination, and may receiv advanst standing for a large part of the work done in the third and fourth years of the College. These applications for advanst standing must be treated individually and credit granted by the Dean as each case merits.

#### Admission to the Graduate College.

Graduates of the State Teachers College of Colorado with the degree of A. B. ar admitted to the Graduate College without formality. Graduates of standard colleges from the regular four-year courses ar admitted upon presentation of satisfactory credentials.

#### The Term Hour.

The unit of work in the College is one recitation a week for a term of twelv weeks. This is calld in this catalog a term-hour or credit-hour.

#### Non-Resident Study.

#### Individual and Group Plans of Study.

The non-resident work may be done by individual students corresponding directly with the college or by groups organized under the direction of the college. The regulations governing this work, including the conditions governing the acceptance of non-resident teaching in lieu of resident teaching, ar set forth in a special publication. The Non-Resident Bulletin, may be obtaind by addressing the State Teachers College, Greeley, Colorado.

#### Required and Electiv Work.

I. In the Junior College.—120 term-hours are required for graduation. Each student in the Junior College is required to take Sycology 1 and 2, Education 1 and 11, Sociology 3, Biology 2, English 1, and Teaching 1, 2 and 3.

These ar usually taken in the folloing order:

First Year—Sycology 1 and 2, Education 1, English 1, Biology 2, and Sociology 3.

Second Year-Education 11, and Teaching 1, 2 and 3.

These required courses may be distributed thru the three terms of the year to suit the student's convenience. The total of these required courses is 45 term-hours. The remaining 75 term-hours required for graduation from the Junior College may be selected by the student from the varius departments of the College.

**II.** In the Senior College.—120 term-hours in addition to those required for graduation from the Junior College ar required for graduation and a degree from the Senior College. Of these only 15 term-hours of academic work ar required: namely, Education 18a, 18b, and 18c; Sociology 4, 5, and 6; and Teaching 4, 5, 6, and 7. One of these three-hour courses in Education must be taken in the third year, and one two-year course in Sociology.

#### Diplomas and Degrees.

I. Junior College.—At the end of the second year of study, the student, having ernd credit for 120 term-hours, wil be granted a diploma, which is a life certificate to teach in the public scools of Colorado. The degree of Bachelor of Pedagogy (Pd.B.), wil be conferd upon the graduate.

**II.** Senior College.—At the end of the fourth year of study, the student having ernd credit for 120 term-hours in the Senior College, wil be granted a diploma, which is a life certificate to teach in the public scools of Colorado. The degree of Bachelor of Arts (A.B.) in Education wil be conferd upon the graduate. The degree of Master of Pedagogy (Pd.M.) is conferd after the completion of one year of work in the Senior College.

**III.** Graduate College.—At the end of the fifth year, the student having previusly completed our four-year college course or its equivalent, wil be granted a diploma which is a life certificate to teach in the public scools of Colorado. The degree of Master of Arts in Education (A.M.) wil be conferd upon the graduate meeting the requirements of specialized work as set forth in the Bulletin of the Graduate College.

#### Graduation.

All students who may be candidates for graduation at the close of any term must file a ritten application with the Dean of the College at least thirty days prior to the date of

graduation. This is to giv ample time to the Executiv Committee to check up the credits and to recommend to the State Board of Education the correct list of students for graduation.

#### Major Work and Special Diplomas.

All Special Departmental Diplomas hav been discontinued, and in their place a notation is inserted in the regular diploma indicating the department in which the student has done his major work.

Junior College.—Students in the Junior College may secure this notation by erning credit for not les than 30 nor more than 40 term-hours in one department or group of closely related departments. The Council of Deans must approve the list of courses submitted by a department or group of departments before it can be accepted for major work.

Senior College.—Senior College students may ern a major notation in some department or group of departments. In the Senior College not les than 40 nor more than 60 termhours ar required as a major. At least half of this major work must be done in the Senior College. For example, a student having completed work for a major in the Junior College by erning 30 term-hours in a subject would hav 20 more term-hours (one-half of the 40 required) to ern in the Senior College.

A student may not take more than ten term-hours in either Junior or Senior College, in any subject other than the subject or group of subjects in which he is doing his major work.

Four terms of teaching ar usually required in addition to that done in the Junior College—two terms in the third year and two in the fourth; but no student wil be granted a diploma of the College without teaching at least three terms.

The Superintendent of the Training Department may, at his discretion, accept teaching done in other scools to satisfy the requirements in practis teaching.

### The Junior College

#### FRANCES TOBEY, B.S., Dean.

The scope of the Junior College is the work of the first two years of the college proper. The student completing this course, having ernd credit for 120 term-hours, is granted a diploma, which is a life certificate to teach in the public scools of Colorado. The degree of Bachelor of Pedagogy is conferd upon the Junior College graduate.

The aim of the Junior College student should be the attainment of general efficiency in teaching in graded scools. Such efficiency involves mastery of varied content and of general method. However, the student is privileged to follo a major interest, whereby he may develop special power as teacher of some one subject taut in the scools. It is desirable that such major interest point toward higher specilization in the Senior College in case the student is able to continue his study beyond the Junior College.

#### EDUCATION.

THOMAS C. MCCBACKEN, A.M. ZACHARIAH XENOPHON SNYDER, PH.D. SAMUEL MILO HADDEN, A.M. WILLIAM BARNARD MOONEY, A.B. JOHN R. BELL, A.M., D.LITT. GEORGE EARL FREELAND, M.S., A.M. ROYCE REED LONG, A.B.

The work of this department, altho having to do primarily with fundamental theory underlying the educativ proces, shows also how such theory is of practical value to the teacher. The teacher needs a theoretical background for her work and a broad acquaintance with all fields of educational activity. The purpose of the courses offerd is to meet these needs.

Other courses in education ar listed and described in the Departments of Sycology, Training Scool, Sociology, Biology, and in other departments as courses in methods. The numbers attacht to the varius courses indicate nothing as to the order in which they must be taken.

10. History of Education in Ancient Times.—Open to Senior and Graduate College students. This course wil deal with primitiv education; Hebrew life, educational ideals, and practises; Greek life, civilization, and thought and their dominant educational ideals, practises, and filosofies; Roman education; and the transmission of significant elements of educational theory and practis to later educational periods. Three hours. M. W. F. Fall Term at 9:05.

Mr. McCracken.

32. History of Education.-In Medieval and Renaissance Times.—Open to Senior and Graduate College students. This course wil consist of a brief study of early Christian education, shoing the trend of educational thought in the erly Church, the types of scools which grew up, and the relation of Christian thought and Christian scools to pagan lerning. Special attention wil be paid to the evolution of the varius types of education which grew up during the Middle Ages. The Renaissance wil be studied with special reference to the fundamental changes that took place in educational ideals and aims and in religius thought, the effect of these upon the curriculum and upon educational institutions, the definit contributions which this period made to educational progres, and the problems which the Renaissance movement created for modern education. Three hours. M. W. F. Winter Term at 9:05.

#### Mr. McCracken.

11. Principles of Education.—Junior College; second year, required. Open to Senior College students who hav not had its equivalent. This course deals with the essential factors of education, defines its function both in the social and individual life and outlines its underlying principles. It is designd to set forth the theory of aims, values, and content of education; the place of a sientific basis in education together with the valu

#### GREELEY, COLORADO

and results of sientific reserch; the relation of scools to other educational agencies; the social limitations upon the work of the scools; underlying principles in the program of study; the processes of lerning and teaching. Four hours. T. W. Th. F. Every Term at 8:10 and Fall and Winter Terms at 1:30.

#### Mr. McCracken.

31. Religious and Moral Education.—Open to students of the Senior College. This course wil consist of a study of the movement for more adequate religius and moral education both in the Church and in the educational institutions of our cuntry; the growth and development of the moral nature of children; a study and evaluation of suggested scemes of moral training; and a summary of essential principles in moral education and moral training. Three hours. M. W. F. Fall Term at 2:25.

#### Mr. Yourd.

33. History of Modern Elementary Education.—Open to Senior and Graduate College students. This course wil be introduced by a brief review of the educational heritage of the Renaissance to furnish the setting for the study of the trend of modern education. The main part of the course wil be devoted to the history of modern elementary education, including such subjects as the development of the vernacular scools, the erly religius basis of elementary scools, and the transition to a secular basis, together with the work of such men as Comenius, Locke, Rousseau, Pestalozzi, Herbart, and Froebel. Three hours. M. W. F. Spring Term at 9:05. Mr. McCracken.

27. General Education.—Open to Senior College Students. Required. Graduate students wil not receiv credit for this course, except by special arrangement made in advance with the Dean of the Graduate College. This course wil consist of a series of daily lectures by men eminent in the field of education. Summer, 1915. Lecturers: Dr. G. Stanley Hall, Dr. Edward A. Steiner, Dr. Henry Suzzallo, Dr. Samuel C. Schmucker, Dr. Richard Burton, Dr. David Starr Jordan.

<sup>\*</sup> No student should elect any course in the history of education unles he has had courses in political history covering the same periods of time.

24. Scool Administration.—Open to Senior and Graduate College students. This course wil deal with scool and classroom management, and is designd to meet the needs of supervisors, principals, and clas-room teachers. Each student may make a special study of the problem in which he is particularly interested. Problems peculiar to superintendents and supervisors in villages and small cities wil be considerd. Two hours. T. Th. Fall Term at 10:30.

Mr. Mooney.

9. Theory and Practis of Teaching.—Open to Senior College students. This course is designd to meet the needs of the rural teacher. It will treat of underlying educational principles of instruction, disciplin and the details of clasroom management as they ar applied to the conditions of the rural scool. A study of educational values of studies and the relation of these values to the needs of the pupils will be discust. The work of the course will consider the practical problems of the clasroom in their relation to the life of the community.

Mr. Shriber, Summer, 1915.

26. The Rural Scool Curriculum and the Community.— Open to Senior College students. This course will enter into the problems of the teacher who desires to instruct cuntry children in terms of their own environment. Methods and materials for such instruction will be outlined and discust. Ways and means wherby stereotyped courses of study, in the varius grade subjects may be vitalized and made more significant to cuntry children will be sought. Three hours. M. W. F. Winter Term at 10:30.

Mr. Mooney.

**30.** Rural Education.—Open to Senior College students. This course wil consider rural education as a necessity of national progres. A brief study wil be made of the rural educational systems of other cuntries. Agencies that ar giving emfasis in this and other cuntries to the need for a better rural scool wil be studied, such as the Bureau of Education, Teachers Organizations, Colleges and High Scools, and organized religius and filanthropic bodies. Considerable atten-

tion wil be givn to the question, "What is the best kind or type of rural scool, and how may it be attained, under conditions as they exist in the west in general and in Colorado in particular?" Three hours. M. W. F. Fall Term at 10:30. Mr. Mooney.

13. The Sientific Aspect of Education.—Required in the second year. Every Monday morning the president of the scool meets the entire second year clas. A series of lessons is givn on such subjects as (1) the meaning of education, (2) the body a repository of all experience, (3) nature and nurture, (4) the influence of nature on life, (5) art as a nurture, (6) our institutional life, (7) the evolution of truth, (8) the application of the above in the training scool. One hour. M. Thruout the year at 8:10.

President Snyder.

40. Humane Education.—Open to students of the Senior College. The rites of children and the rites of lesser animals. The varius agencies and laws for the general welfare and protection of both children and animals. Ways and co-operation between humane agencies and teachers. History of the humane movement. Education of children in the principles of humane treatment of animals. Inter-relations between animal diseases and human diseases. Moral effects of neglect and inhuman treatment of animals. Three hours.

Mr. Mooney.

44. Social Education.—Open to Senior College students. This course is intended to meet the needs of students who elect to carry on club and clas work in connection with the Community Cooperation Plan. A study wil be made of educational problems involved in club and clas organization and management. Two hours. T. Th. Fall Term at 9:05.

Mr. McCracken.

12. Current Social Movements in Education.—For a full description of this course see Education Department, Senior College.

25. Administration of Rural Scools.—For full description of this course see Education Department, Senior College,

42. Administrativ and Social Aspects of Education.—For a full description of this course see Education Department, Senior College.

15. Ethics.—For a full description of this course see Education Department, Senior College.

#### Majors in Education.

Students who wish to pursue a Major in Education should plan their work erly in their college course in consultation with the Hed of the Department. Junior College Majors should plan to do from 30 to 40 hours of selected work in the Department of Education and Senior Majors should plan to do from 40 to 60 hours. For combination majors with the Training Department see outline of majors at the end of the Training Department section.

#### THE TRAINING DEPARTMENT.

The folloing persons offer courses in the Training Department for college students:

DAVID DOUGLAS HUGH, A.M., Dean of the Training Scool.

JOHN R. BELL, A.M., LITT.D., Principal of the High Scool.

FRANK W. SHULTIS, A.M., Busines Department of the High Scool.

GEORGE EARL FREELAND, A.M., Principal of the Elementary Scool.

JENNY LIND GREEN, Training Teacher-Seventh Grade.

ELIZABETH HAYS KENDEL, A.B., Training Teacher-Fifth Grade.

CELIA M. LAWLER, PD.M., Training Teacher—Fourth Grade. MAEGARET STATLER, A.B., Training Teacher—Third Grade. BELLA BRUCE SIBLEY, A.B., Training Teacher—Second Grade. KATHRYN M. LONG, A.B., Training Teacher—First Grade.

MILDRED DEERING JULIAN, B.S., Training Teacher-Kindergarten.

#### TRAINING DEPARTMENT.

The Training Scool is the laboratory of a teacher's college. In it the theories of education ar put into practis. The results obtaind in this work help to determin the relativ values of the materials and methods of instruction. The training scool also offers to the yung teacher practis in the acquisition of the technic of his art. Consequently, all candidates for degrees of The State Teachers College ar expected to spend a period of apprentisship in its classes.

The Training Department also provides courses in methodology, organization of the curriculum, and scool administration. While it is difficult in some cases to differentiate these courses from those offerd in other departments, the distinguishing characteristic of this work, in the main, is intended to be found in the fact that these courses ar given by teachers who ar in close tuch with the work of children, and the adaptation of the materials and methods discust to the needs of children wil receiv especial emfasis.

Courses 1 to 15 ar primarily intended for those interested in Elementary Scool work:

1. Observation in the Training Scool.—Junior College and Senior College. (Required of first-year students and also of those in later classes who hay not had its equivalent. Those who are preparing themselvs to be high scool teachers may substitute course 42 for this course. Those who ar majoring in the industrial arts group, manual training, home economics. art. elementary agriculture and stenografy, must substitute course 5. Practical Arts, for this course). This course is ment to prepare the student for the work of teaching. It is in part a laboratory course, based upon the observation of teaching in the training scool classes, and it, in part, consists of a study of the sycological principles underlying the teacher's work. Tn the latter connection, the best literature upon the subject wil be revued. Especial attention is given to the recitation with emfasis upon the folloing points: Creating a need for the new lesson, the assigning of the lesson, the distinction between functional and structural aspects of subject-matter, genetic versus logical modes of organizing the material, types of lessons, summaries and revues, and questioning. Some attention wil also be devoted to clas management and scool room hygiene. Four hours.

Mr. Hugh.

2. Elementary Scool Teaching.—Required of students preparing to be teachers in elementary scools. This work is intended both for yung students who hav not had previus experience in teaching and also for teachers who ar ambitius

to attain greater efficiency in their work. Provision is made for training in all divisions of the elementary scool. An expert teacher is in charge of each grade. Students wil receiv training in the organization of subject-matter, in methods of instruction, and in clasroom management. They meet with their training teachers in weekly conferences and more frequently individually to discus the practical problems of scool work. Three terms, five hours each.

Mr. Hugh, Mr. Freeland, and Training Teachers.

3. Elementary Scool Supervision. — Students who hav served their period of apprentisship in the elementary scool and who hav done work of an exceptionally high character may be allowed to assist in the supervision of teaching in the training department. They wil stil work under the direction of the training teachers but wil have greater responsibilities and a larger share in the administrativ work of the scool. This training is intended for those seeking the more responsible positions in elementary scool work and also for those who ar planning to become training teachers for normal scools. Hours to be arranged.

Mr. Hugh, Mr. Freeland, and Training Teachers

5. Primary Methods.—This course is considerd under two main hedings: 1. The transition of the child from the home or kindergarten to grade work—the nature of the little child, and the principles which govern erly growth. 2. The stimuli by which the child is led to use the tools of wider social intercourse. This study wil include (1) a comparison of typical courses of study with our own; (2) a discussion of the basis of selection of subject-matter; (3) a reorganization of this material by the student into a tentativ course of study; (4) the relation of subject-matter and method; and (5) practical problems in methodology. Four hours.

#### Miss Long.

6. Primary Methods.—The course is based on the needs of the child between the ages of 7 and 8 years. This course leads up to the selection of subject-matter which functions in the child's life. To this end a brief comparison of courses of study in some of our larger city scools, for example, Chicago, New York, Boston, Denver, and our own Training Scool, is made. The latest and most sientific articles on primary methods ar red and discust. The special didactics of subject-matter for the lower grades ar workt out; and many devices for teaching begining reading, fonics, rythm, spelling, songs, as wel as methods for dramatization of stories, multiplication table, and practis in blackboard illustrating ar given. Three hours. Mrs. Sibley.

7. Third and Fourth Grade Methods.—Junior College. Electiv. The course is based on the needs of the child between the ages of 8 and 10. It wil consist of (1) a review of the most significant things in child study common to children of this period; (2) a comparison of courses of study for these grades; (3) the bilding of a course of study; (4) methods of presenting the material of the curriculum of the third and fourth grades. Three hours. Miss Lawler.

8. Fifth and Sixth Grade Methods.—This course wil consist of a brief survey of the needs and interests caracteristic of children in the pre-adolesent period—with the purpose of applying the conclusions of such sycological studies to methods of teaching—and a brief study of the subjects in the curriculum of the elementary grades. Chief emfasis wil be placed upon the practical side of the work, including a consideration of the subject-matter to be taut; influence governing its selection, arrangement, and distribution; methods of presentation; devices, games, and drils for securing accuracy and retention; and observation of classes illustrating certain fazes of the work. Three hours. Miss Kendel.

9. Grammar Grade Methods.—This course wil deal first with the fysical and mental status of the grammar grade pupil —with the instinctiv tendencies and dominant interests of this period. Upon this as a basis, the material actually in use in these grades in varius good scools wil be considerd with an eye to the fitnes of the emfases found. Folloing this preliminary work an attempt will be made to evaluate several of the scool subjects—probably literature, history, and arithmetic or fysiology—and to work out functionally several topics of each. Three hours. Miss Green.

10. The Curriculum of the Elementary Scool.—(For description see Course 10 of the Senior College section of the training department.)

Mr. Hugh.

12. Training Scool Seminar.—(For a description see Course 12 of the Senior College section of the Training Department.)

Mr. Hugh.

11. The Pedagogy of Riting.—This course wil include drils in penmanship and also discussion of the methods of teaching riting in the different grades of the public scool. It is intended for students whose riting is not up to a satisfactory standard or for those who wish to become acquainted with the modern methods of teaching the subject. Three hours.

Mr. Shultis.

15. Story Telling in the Grades.—In this course the folloing fazes of the work wil be considerd: 1. Brief survey of the history of story telling. 2. The educational valu of the story—the characteristics of a good story. 3. Classes of stories: (1) Idealistic stories—a, nursery rhymes; b, fairy tales; c, nature myths; d, folk and fairy tales of different peoples; e, legendary heroes, including stories from the national epics, such as Siegfried, King Arthur, Robin Hood, The Iliad, the Odyssey; (2) Realistic stories: a, stories of real children; b, historical heroes, as, Joan of Arc, Florence Nightingale, etc.

Each student is expected to collect individual bibliografies of stories. Work in practical telling of stories to children wil also be a feature of this course. Two hours.

Miss Statler.

(The folloing ten courses are primarily intended for those majoring in kindergarten work.)

29. Kindergarten Theory.—(For description see Course 29 of the Senior College Section of the Training Department.) Miss Julian.

31. Literature and Story-Telling in the Kindergarten and Primary Grades.—This course includes a study and classifica-

## GREELEY, COLORADO

tion of the different types of stories according to their fitnes for varius ages and purposes in story-telling. A study is made of the educational values of stories for children and of the possibilities of creativ work by the children. The adaptation and selection of a graded list of stories wil form a part of the course. Three hours.

#### Miss Julian.

32. Constructiv Work in the Kindergarten.—This course is intended to prepare teachers to meet the needs of the constructiv instinct as it functions in the play life of the child. The needs that gro out of the child's play wil be workt out experimentally with large bilding blocks, clay, paper, cardboard, and textil materials, etc. Two hours.

#### Miss Julian.

33. Plays and Games for Kindergarten and Primary Children.—This course is a study of the development of games from the spontaneus activities of children, thru the rythmic and dramatic games, into the formal games, and finally the dance. An application of child sycology is made in the selection and presentation of games for different ages. Students hav practis in presenting games. Three hours.

Miss Julian.

34. Kindergarten Occupations.—This course is intended to giv a mastery of the Froebelian materials that ar now considerd good, together with other materials that hav been added. Two hours.

#### Miss Julian.

35. Kindergarten Principles.—This course aims to trace the evolution of the educational principles underlying presentday practis in the kindergarten. A comparativ study wil be made of Rousseau, Pestalozzi, and Froebel as wel as the work of Montessori and other modern educators. Two hours.

Miss Julian.

36. Handwork in the Kindergarten.—The students ar givn practis in presenting different problems and materials to children. Their own work with the materials wil be centerd about some problem. The bilding with gifts wil be illustrativ. Two hours.

Miss Julian.

37. The Kindergarten Program.—This course takes up the study of the different materials of the kindergarten curriculum, together with a detaild arrangement of these materials. Three hours.

Miss Julian.

**38.** The Play Life of Children as a Basis for Education in the Kindergarten.—(For a description see Course 38 of the Senior College section of the Training Department.)

Miss Julian.

39. The Relation of the Kindergarten and the Primary Grades.—The aims, principles, methods, materials and subject of the kindergarten and the grades ar compared. A study is made of the adaptation of the materials and subject-matter to suit the groing needs of the child. Three hours.

Miss Julian.

42. Principles of Teaching as Applied to the Different High Scool Subjects.—Discussions, lectures, readings, and observations. This is an attempt to study in a real and practical way some of the best modern methods, equipment, material, etc., pertaining to the teaching of the different high scool subjects, and to point out some of the special difficulties peculiar to each subject. Each student, before the close of the term, wil make a special study of the subject which he is preparing to teach. This course is open only to present or prospectiv high scool teachers, and should be taken by such insted of Course 1. Winter Term, 5 hours.

Mr. Bell.

## Majors in the Training Scool and Education Departments.

A number of majors ar offerd in these departments. It is desired that students seeking such majors shal file an application at as erly a date as possible in their college course with Mr. Hugh for Training Scool work and with Mr. McCracken for work in the Department of Education. It is understood that a high grade of efficiency in teaching is one of the requirements for these majors, especially for those that deal primarily with Training Scool work. The requirements otherwise ar designd to be somewhat elastic to meet the needs of individual students. Each candidate wil work under the direction of some member of these departments, who wil act as his advisor in the selection of subjects that seem to be best suited to his needs. Junior College majors require 30 to 40 hours of work; Senior College majors, 40 to 60 hours. It wil be noted that the first four majors outlined ar wholly Training Department majors. The folloing three ar joint majors with the Education Department.

Kindergarten and Primary Grade Teaching.—Junior College. Requirements: Training Scool 31, 32, 33, 34, 35, 36, 37, 38 and 39; also Training Scool 5 or 6, Music 3, and Art 1.

Additional Requirements for Senior College: Training Scool 29 and 30. Other courses sufficient to make up the requisit number of hours for a Senior College major may be selected subject to approval.

For efficient servis in kindergarten and primary grade teaching, students should be able to play a piano as required for the game and rythms.

Mr. Hugh and Miss Julian.

**Primary Grade Teaching.**—Junior College Requirements: Training Scool 5, 6 and 7 (any two); Training Scool 39; Sycology 3a, 3b, or 4; Reading 2; Training Scool 15 or Reading 4; Music 3; Art 1; Fysical Training 5 and 7; and a course in Nature-Study, Geografy, or Hygiene.

Mr. Hugh, Miss Long, Mrs. Sibley, and Miss Statler.

Intermediate Grade Teaching.—Junior College Requirements: Training Scool 7 or 8; Reading 2; History 1 or 13; "Tothematics 8; English 4; Sycology 3a, 3b, or Geography 12; Intermediate Control of 12, Intermediate Control of 12

Mr. High, Miss Lawler, Miss Kendel and Miss Rohr.

**Grammar Grade Teaching.**—Junior College Requirements: Training Scool 9; English 5; History 2, 3, or 13; Geografy 12; Mathematics 8; Reading 2; Fysical Education 7 or 12; Music 1 or Art 1; a course in Fysiology or Hygiene, and a course in Nature-Study.

Mr. Hugh, Mr. Freeland, Miss Green, and Miss Foote.

Some substitutions may be allowd in the foregoing Junior College lists. Additional subjects ar required for a Senior College major. These may be selected subject to approval.

For those who hav had the necessary training, the Senior College major may be designated a major in supervision insted of in teaching.

The folloing three majors ar joint majors of the Training Scool and Education Departments. Condidates for these majors wil file application as erly in their college course as possible with Mr. Hugh and Mr. McCracken.

Elementary Scool Supervision. — Senior College Requirements: Elementary Scool Supervision, 10 hours; Training Scool (any two) 5, 6, 7, 8, 9; Training Scool 10 or 12; two of the folloing: Education 10, 32, 34, 12, 29, 17, 25; Education 33 or 24; Education 26 or 28; two of the folloing: Sycology 4, 5, 6, 2. Additional subjects may be required.

Mr. McCracken and Mr. Hugh.

High Scool Supervision. — Senior College Requirements: High Scool Supervision, 5 hours, 10 additional hours optional; Training Scool 44; Education 16 or 19; three of the folloing: Education 22, 29, 12, 20, 42, 43; Education 28 or 34; two of the folloing: Sycology 4, 5, 6, 2. Additional subjects may be required.

Mr. McCracken and Mr. Hugh.

**Public Scool Supervision.**—Senior College Requirements: Elementary and High Scool supervision, 10 hours; Training Scool (any two) 5, 6, 7, 8, and 9; Training Scool 10 or 12, and 44; Education 24; two of the folloing: Education 12. 29 10, 32, 33, 19, 34; Education 20 or 28. 4 Sycology 4, 5, 6, 2. Additters, two of the folloing: and subjects may be required.

Mr. McCracken and Mr. Hugh.

A major in which Training Scool or Education courses ar combined with work in another department, such as History, Mathematics, or English, may be secured by special arrangement. This is especially desirable for departmental teachers in the upper grades or the high scool in order to secure adequate command of both the subject-matter and of the methods of instruction.

## GREELEY, COLORADO

## SYCOLOGY AND CHILD STUDY.

JACOB DANIEL HEILMAN, PH.D. GEORGE EARL FREELAND, A.B., A.M.

The main object of the work of this department is to put before the student such fysical and mental facts about the child as ar essential to his proper care, training, and education. The work in Sycology, however, is not limited to the mental processes of the child. Some of the work deals with principles which ar more or les general in their nature, while much of it treats of individual caracteristics in recognition of the fact that the succes of the teacher is largely dependent upon his ability to understand and reach the individual child. A number of the practical facts ar deducted from or supported by a knolege of the child's fysical and mental make up, but many ar the results of direct experimental investigations.

1. General Sycology.—First year. Required. This is an introductory course designd for such students as hav not had sycology in a higher institution of lerning. The different forms of consciousnes, such as sensations, images, feelings and their complexes wil be described and explaind. The relation of mental processes to each other, to fysiological activities, and to objects and events in the external world wil be discust. Five hours. Every term.

Mr. Freeland.

2. Educational Sycology.—First year. Required. Much of the subject matter of this course is identical with that of Course 1, but it is treated in a different way. In Course 1 the mental processes ar analyzed, described, and explaind, but in this course their servis in the performance of tasks, especially scool room tasks, is discust. The course begins with a consideration of the control of mental and fysical responses in general. It aims to sho how sensory and fysical defects, capacities, instincts, and all of the other mental processes ar involvd in arousing and fixing proper responses. Another feature of the course is the control of the child's responses in lerning such different scool subjects as reading, riting, and spelling. Four hours. Every term.

Dr. Heilman.

3. Child Study.—Second year. Electiv. There ar two courses in child study which ar described under a and b belo. The general purpose of the courses is to giv the student a better knolege of the fysical and mental natures of the child, in order that the methods proposed for its care, training, and education may be better evaluated.

(a) The folloing ar some of the topics which wil be taken up in this course; the need, purpose, and methods of child study; anthropometrical measurements and growth; the effects of food, air, clothing and exercise upon the helth of the child; adolescence and sex hygiene; fysiological age and scool work; the general mental development; mental fatig and scool work; the nature and development of the child's processes of attention, sensation, and perception and their significance in scool work. Three hours, Fall term,

## Dr. Heilman.

(b) This course wil continu the nature and development of the child's mental processes and their significance in scool work. Among them ar specific memories, lasting and immediate retention, imagery and imagination, esthetic and other feelings, and the processes of suggestion and volition. There wil also be a discussion of the sycology of lying, the management of children, children's ideals and their moral and religius lives. The doctrine of children's endowment, their speech development, and the sycology and pedagogy of drawing wil receiv consideration. Three hours. Winter term.

Dr. Heilman.

4. Clinical Sycology.—Second year. Electiv. The development of the ability to study and kno each child and to see what may retard and promote his progres is the object of this course. The methods and tests used to determin the mental status and the intellectual level of the child wil be illustrated and explaind. The effect upon the mental development of the child of fysical and mental abnormalities wil be taken up. A part of the course wil be devoted to the diagnosis, classification, history, training and treatment of backward and feebleminded children. Additional work wil be on the hygiene of generation and the social problems of the feebleminded. Three hours. Spring term.

Dr. Heilman.

#### GREELEY, COLORADO

#### BIOLOGICAL SIENCE.

#### ARTHUR EUGENE BEARDSLEY, M.S.

## Biology.

Equipment.—The department is in possession of ample facilities in the way of specimens and apparatus for the presentation of the courses outlined belo. The department laboratory is on the third floor of the main bilding and the museum of birds and mammals is in the basement of the library bilding. Representativ types of the invertebrates from the Atlantic and Pacific Coasts make possible the thoro treatment of almost any of the lower orders. The museum contains a representativ collection of the birds of Colorado, together with many of the common mammals. A herbarium and a welstockt green-house ar at the disposal of the students in botany.

1. Elementary Biology.—This course includes a study of the folloing series of plants and animals. (1) Ameba, (2) Paramecium, (3) Yeast Plant, (4) Spirogyra, (5) Fern, (6) Erthworm, (7) Grasshopper and other simple forms. It takes up some of the simple problems in the biological field. Three hours.

2. Bionomics.—Required in the first year. A course in the life proces designd to prepare students for the more intelligent study of educational problems. The course is a study of the folloing topics: Tissues and their functions in the living organism: the elements of tissue-cels. Cel life: the simple cel, its structure and functions; studies of simple cels under the microscope. Cel colonies: their life and functions in relation to the environment; their origin; development. Differentiation of cels: the development of tissues; structure of tissues in relation to their functions. Organic life. The unit or individual: its place in the economy of nature; its functions; its development; the relation of function to structure. Variation; animals and plants; heredity; environment; natural selection; evolution; ontogeny; fylogeny. Five hours.

3. Principles of Heredity.—Production of new varieties. Plant breeding as exemplified by Burbank and others. Two hours.

Prerequisite, Biology 2.

#### Botany.

1. Elementary Botany.—A study of the plants in their relations to environment. Field and laboratory work and recitations. Fall term, Three hours.

2. Elementary Botany—Plant Structures.—Junior College. Development of the plant; life history of the plant; structures of plants in relation to their functions; modifications of structure; correlation of structure with function and environment; classification. Spring term. Three hours.

6. Economic Botany.—Senior College and Junior College. Yeasts, Molds, and Bacteria.—This course is primarily for special students in Domestic Economy, but is open to students in any course. Fall term.

## Zoology.

1. Elementary Zoology.—A course in the general principles of Zoology. The work consists of laboratory study of type specimens, together with lectures upon clasification, habits, distribution, etc. Five hours.

## Fysiology and Hygiene.

1. Elementary Fysiology and Hygiene.—Junior College. The tissues of the body; structure of the tissues; cels. Structure and function of the organs of the body; production of energy within the body; the care of the body and the maintenance of helth. Five hours.

2. Bacteria, Profylaxis, and Hygiene.-Electiv. The helth of the students is an important and vital factor in school effi-This course aims to giv specific instruction in the ciency. causes of diseas and the methods of its prevention. Pains wil be taken to thro the stres upon those things which it is possible for any intelligent person to do in the matter of prevention of diseas without the aid of a fysician. Some of the topics for special consideration ar as follows: (1) Bacteriawhat they ar, how they liv and grow, where found; bacteria of the air, of water, and of soils; bacteria of foods; useful bacteria: injurious bacteria; parasites and saprofytes; bacteria which produce diseas (pathogenic bacteria). (2) Profylaxisprevention of diseas; how diseas germs ar carried; how they gain entrance to the body; means by which they may be avoided. (3) Personal hygiene; hygiene of the scool room and of the home. Five hours.

## GREELEY, COLORADO

#### HYGIENE.

GEORGE E. FREELAND, A.B., A.M. ROYCE REED LONG, A.B. ARTHUR EUGENE BEARDSLEY, M.S. JACOB DANIEL HEILMAN, PH.D.

The department of hygiene has been organized with the idea of getting into harmony with the new impetus that has been givn the problems of helth. One of the fundamental considerations of a scool for teachers should be the study of helth as affected by the scool, public place. under which people must the helth as affected by the scool, public place. It is more important that the any scool be helthy than that they lern the facts that are taut there. Before any teacher is prepared to teach she should kno the rules of child helth and be prepared to see that these ar enforst before she attempts to educate the children.

1. Scool Hygiene.—Lectures, recitations, references, reports and observations. This course wil consider such problems as scool desks, the proper method of seating pupils, and a study of the different types of desks from a hygienic standpoint; cleaning the scool house; the best methods of treating the floors, the proper kinds of walls; light relations; comparisons of crayons, considering both the eyes and dangers from dust. Such topics as the hygiene of the teaching profession and the hygienic methods of instruction wil also be taken up for general consideration. Winter term. Four hours,

Mr. Freeland.

2. Hygiene of Instruction.—Lectures, recitations, references, reports and observations in the training scool. The hygiene of instruction embraces methods of teaching all the subjects in the elementary curriculum from the hygienic point of view. The length of the clas periods in different subjects; the value of recesses and how they should be spent in the different grades; the making of a hygienic program; the development of methods especially in the primary department, which conserv the eyes; the different dynamic methods in different subjects, which teach thru action and counter-balance the general sedentary trend of education. Such methods of teaching history, geografy, fysiology, arithmetic, English, etc., wil be developt. Also the different theories of the value of play from both the hygienic and educational standpoint wil be taken up. Winter term. Three hours.

Mr. Freeland.

Public Hygiene and Sanitation.-Lectures, recitations, 3. inspection trips, reference assignments, and reports. A course covering the main facts relating to the dissemination of the control or prevention of disease thru disease, anu warnational and international cocommunity, municipal, state, ..... " "istory of chief operation. Mortality statistics, and a brier epidemic diseases, modes of dissemination; garbage and sewage disposal; water supply, milk, food, air, insects, etc., as related to the public helth; registration of deths, quarantine, disinfection, inspection; the organization, function, and powers of helth authorities wil form the subject matter of the course. Spring term. Three hours. M. W. F. 9:05.

Mr. Long.

4. Industrial Hygiene.—Lectures, recitations, reference asignments, and reports, covering the varius fazes of occupational hygiene. Accidents; diseases due to exposure to occupational poisons, such as lead, mercury, arsenic, etc.; exposure to excessiv temperatures, unusual atmosferic pressure; dusty trades, etc., wil form the material for the course. Spring term. Two hours. T. Th. 9:05.

Mr. Long.

9. Elementary Fysiology and Hygiene.—The tissues of the body; structure of the tissues; cels. Structure and function of the organs of the body; production of energy within the body; the care of the body and the maintenance of helth. Five hours.

Mr. Beardsley.

10. Bacteria, Profylaxis, and Hygiene. — Junior College and Senior College. Electiv. The helth of the students is an important and vital factor in scool efficiency. This course aims to giv specific instruction in the causes of diseas and the methods of its prevention. Pains will be taken to thro the stres upon those things which it is possible for any intelligent person to do in the matter of prevention of diseas without the aid of a fysician. Some of the topics for special consideration ar as follows: (1) Bacteria—what they ar, how they liv and gro, where found: bacteria of the air, of water, and of soils; bacteria of foods; useful bacteria; injurious bacteria; parasites and saprofytes; bacteria which produce diseas (pathogenic bacteria). (2) Profylaxis—prevention of diseas; how diseas germs ar carried; how they gain entrance to the body; means by which they may be avoided. (3) Personal hygiene—hygiene of the scool room and of the home. Five hours.

Mr. Beardsley.

#### MATHEMATICS.

#### GEORGE WILLIAM FINLEY, B.S.

The courses in mathematics ar conducted with a view to imparting such knolege and training as shal be of benefit not only to those who wish to specialize along this line, but to those who wish to prepare for general teaching as wel. Special attention is givn to the practical application of subjects taut so as to link them as closely as possible to the real life of the students. The work is always kept abrest of the newer developments in methods, and students ar given an opportunity to observ the workings in the clas room and thus gain a real knolege of them.

1. College Algebra.—This course takes up the subject of algebra where the high scool work leaves off. It covers a review of the progressions and logarithms and continues with the binominal theorem, permutations and combinations, probability, variables and limits, and infinit series. Five hours. Fall term.

2. College Algebra.—A continuation of Course 1. It takes up undetermind coefficients, partial fractions, continued fractions, summation of series, exponenial and logarithmic series, determinants, and theory of equations. Winter term.

3. Plane Trigonometry.—The work of this course covers the solution of both the right triangle and the oblique triangle with the development of the formulas used. The course is enricht by actual field work with a surveyor's transit by means of which real problems ar brought in and the student led to realize the practical use of this branch of mathematics. Fall term.

4. Analytic Geometry.—This course opens up to the student, in a small way, the great field of higher mathematics. It givs him a broader outlook than he has had before and thus givs him new power. It covers the work as outlined in such text books as Smith and Gale's Analytic Geometry. Winter term.

8. Methods in Arithmetic.—This course is designd for those who wish to prepare for the actual teaching of arithmetic by a study of the best methods that hav been developt in recent years. It takes up a brief discussion of the different methods that hav been used in modern times, the generally accepted methods of the present time, and the developments of the last few years.

#### Major Subject-Mathematics.

Junior College Requirements:

College Algebra, Course 1, 5 hours. College Algebra, Course 2, 5 hours. Trigonometry, Course, 3, 5 hours. Analytic Geometry, Course 4, 5 hours. College Fysics.

## FYSICAL SIENCES.

## FRANCIS LORENZO ABBOTT, B.S., A.M. Fysics.

General statement for Courses 1, 2 and 3. These courses in Fysics not only treat of the general principles of Fysics, but put much emfasis upon the application of these principles as found in machinery, and the many other appliances that ar found in the every-day life of the individual. The recitation work is fully illustrated by experiments. Two hours per week for laboratory work ar required of each student.

1. General Fysics.—Open to Senior College. The work of this term covers the folloing subjects: Properties of matter, resolution of forces, units of force and work, mecanics, hydro-

 $\mathbf{42}$ 

statics, etc., also the subject of heat. Text-book: Kimball's College Fysics. Fall term. Five hours.

2. General Fysics.—Open to Senior College. A course of study in sound and light. Text-book: Kimball's College Fysics. Winter term. Five hours.

3. General Fysics.—Open to Senior College. A course in the study of magnetism and electricity. Text-book: Kimball's College Fysics. Spring term. Five hours.

7. Applied Fysics.—The course is open to all students. A previus course in fysics is not required. The course is especially suited to students of Domestic Sience. Students who hav had a high scool course in fysics and desire to make that work more available in their teaching wil hav an opportunity of doing so by seeing how the principles of fysics ar applied to every-day life. The folloing is a partial outline of the course, given simply to sho what is included in the course:

Electricity and Light.—The varius kinds of heating and cooking appliances and how to use them properly and economically. Kinds and sizes of electric lights. The arrangement, practical and theoretical, to get the proper illumination. Electric fans. Door bels—how to keep in order, etc. Ventilating —new theory of, and how accomplisht. Refrigeration—varius and simple methods. Gas and gasoline—use in cooking and how to use economically. The pressure cooker. The fireles cooker, combination with electric ovens. Subject of radiation for polisht surfaces as applied to cooking utensils. Simple water system for cuntry home. Other subjects in fysics ar treated in like manner. Five hours.

#### Chemistry.

1. Elementary Chemistry.—Open to Senior College. The course is primarily arranged for those wishing to begin the subject, but also offers an excellent opportunity for review work to those students who hav had only a short course in chemistry. Five hours.

2. Qualitativ Chemical Analysis. — A continuation of Course 1. (Open to Senior College.) Requirements: Students must hav had Course 1 or its equivalent. The work of this course takes up the grouping, separating and identification of the common elements. Practically all laboratory work.

3. Applied Industrial Chemistry.—Prerequisit: Courses 1 and 2. Five hours.

Major Subject—Fysics and Chemistry. Junior College requirement:

College Fysics, Course 1, 5 hours per week. College Fysics, Course 2, 5 hours per week. College Fysics, Course 3, 5 hours per week. Chemistry, Course 1, 5 hours per week. Chemistry, Course 2, 5 hours per week. Chemistry, Course 3, 5 hours per week. Mathematics, Geometry. 5 hours per week, selected

upon consultation with the hed of the department.

#### Major Subject—Fysics.

Senior College requirement:

Colege Fysics, Course 1, 5 hours per week. College Fysics, Course 2, 5 hours per week. College Fysics, Course 3, 5 hours per week. Fysics, Course 4, 5 hours per week. Fysics, Course 5, 5 hours per week. Fysics, Course 6, 5 hours per week.

Mathematics, Plain Trigonometry, 5 hours per week. Other courses selected upon consultation with the hed of the department.

## GEOLOGY AND GEOGRAFY. GEORGE A. BARKER, M.S.

The work givn in the department aims not only at preparing the student for geografy teaching from the standpoint of method but also from the standpoint of organization of subject matter. The endeavor will be made in all the courses to sift and sort the material so that the frame work of the sience of geografy will stand out plainly, rather than be buried in an unorganized, unrelated heap of facts.

2. Fysical Geografy.—A course designd for those who hav not had fysical geografy in the high scool. The laboratory and field sides of the subject wil be emphasized. Five hours.

## GREELEY, COLORADO

3. Climatology.—A study of climate not only from the observational side but also from the side of method of presentation. Advantage wil be taken of our excellent wether bureau equipment to compile data; and methods of tabulating this data by means of grafs wil be illustrated. Five hours.

4. Geografy of North America.—A lecture course with extensiv library reading. The continent wil be treated from the foundation of its geologic and climatic controls and upon these wil be bilt the commercial side of the subject. An extensiv collection of lantern slides and museum products wil be used in illustrating the work.

5. Geografy of Europe. — It is recommended that this course follo Course 4, as it is largely based upon the material presented in 4. The relms of American geografy—California, Oregon, etc., wil be used in a study of the regional provinces of Europe. Five hours.

6. Geografy of Asia.—This course finishes the year's survey of the important continents. In addition to Asia a rather rapid survey of the other continents is undertaken in order to round out the year's work. Four hours.

7. Commercial Geografy.—A study of commerce, largely based on museum products and railroad and steamship maps. After a delineation of the underlying controls in commercial geografy the members of the clas will be assigned special topics to present before the clas with the aid of pictures and museum specimens. Field trips to industrial plants will be taken. Four hours.

8. Human Geografy.—The relation of man to his environment and the varius type realms, as for instance the desert, tropical forest, mountain, etc. Five hours.

9. Field Work in Geografy.—A general course in the problems of the field trip. Most of the work wil be done in the field and all fazes of field work wil be taken up, as, for instance, a study of stream action, a trip to an industrial plant, map making in the field, etc. Four hours.

10. Geografy of the Ocean.-A study of the ocean not only

from the standpoint of currents, tides, winds, etc., but a study of the ocean traffic as it is influenced by these and by the presence of fishing banks. Extensiv use wil be made of the pilot charts and other publications of the hydrografic offices. Three hours.

12. Geografy Method.—A course largely based on the geografy course in the State Course of Study. This is the geografy method course required and corresponds to Course 1 in the old course of study.

1. Geology.—A Senior College Course open to Junior College students who hav had fysical geografy. Five hours.

## SOCIOLOGY AND ECONOMICS.

GURDON RANSOM MILLER, PH.B., A.M.

From the viewpoint of education this department aims to make evident to its students the close relation between the Sience of Education and the subject matter of Anthropology, Sociology, and Social Economics. All our courses lay stres upon these relationships.

However, any of our courses wil prove of large value to any students specializing in Sociology or Economics. University or college students or graduates interested in particular fazes of sociology, or social settlement work, should consult the hed of this department for advice in electing courses.

1. Anthropology. — Comprising zoogenic, anthropogenic, and ethnogenic association; invention and growth of language; evolution of habitations, clothing, tools; evolution of ornament, and beginings of art; tribal organizations, the family, and erly evolution of law.

Special attention given to the industrial activities of primitiv peoples, and the possible relation of these activities to the elementary scool curriculum. Four hours. Fall term.

2. Principles of Sociology.—Junior College and Senior College. Including a study of modern social organization; the historical evolution of institutions; law of social progres; lectures and discussion of modern social problems.

A special emfasis is given to the modern scool as a social organization. Four hours. Winter term.

3. Educational Sociology.—Required. A course for teachers in applied sociology; modern social institutions; changing social ideals; social reforms, and their relation to scools, curricula, and teaching. Fours. Each term.

## HISTORY AND POLITICAL SIENCE. Edwin B. Smith, B.S.

1. American History (1492-1789).—The American Aborigines; European conditions leading to the discovery of America; the colonies founded by European nations; the colonial institutions; the struggle for supremacy in North America; the American Revolution; the confederation and the constitution. Fall term. Five hours.

2. American History (1789-1861).—The development of the nation; organization of the national government; the Federalist party; Democratic opposition; Jefferson's policies; difficulties of neutrality; the war of 1812; reorganization after the war; westward expansion; the Monroe Doctrine; Jacksonian democracy; sectional strife; the issue of slavery; Texas and the Mexican war; the Republican party; secession of the southern states. Winter term. Five hours.

3. American History (1861-1915).—The civil war and reconstruction; economic and diplomatic problems; the development of the far west; political and financial readjustment; the civil servis and economic reform; great industrial combinations, the silver movement; the new American diplomacy; the war with Spain, and imperialism; Roosevelts policies; the election of 1912; policies of the Wilson Administration. Spring term. Five hours.

8. Ancient History.—The ancient eastern nations in their relation to Greece and Rome; the history of Greece to the Roman conquest; a general view of Roman history from the erly Republic to the later Empire; the government and institutions being emfasized as a basis for intelligent study of later periods of history. Fall term. Five hours.

9. National Government.—The government of American colonies previus to the Revolution; the process of union; independence and self-government; the Articless of Confederation;

formation of the Federal Constitution; the states' rights theory; origin and development of party organization and machinery; the place of the party in our government; primary legislation; corrupt practises acts; present problems of the government in serving the people. Winter term. Five hours.

12. State and Local Government.—The organization and administration of state government; its relation to the national government; the divisions of the state; the system of local rural government; the town system; the county system; the mixed county and township system. Municipal government: its development thru the several periods; its present condition; recent changes; problems before the cities today. The government of Colorado wil be considerd as a type. A study of current problems wil be included. Fall term. Five hours.

13. The Teaching of History.—The development of history instruction in scools; history as taut in scools today; methods of study, presentation, and material, considerd in connection with present conditions. Spring term. Two hours.

## LATIN AND MYTHOLOGY. JAMES HARVEY HAYS, A.M.

The Latin courses, for the most part, ar taken by those students who hav completed three or four years of Latin in the high scool. To such students as hav completed high scool courses of Latin, an electiv course of four years is offerd. This course has been prepared from the vupoint of the teacher of Latin, and aims to do these things: a. To correct careles and faulty pronunciation; b. to revu in a critical manner the grammar of the language; c. to present the best methods of teaching the subject; d. to afford the students an opportunity to extend their acquaintance with authors beyond those found in the high scool. The texts usual red ar:

1. Cicero.—De Senectute, De Amicitia. Comparison of his style as found in the essay and oration. Five hours.

2. Livy .--- Five hours.

3. Horace: Odes and Epodes.—Study of Latin verse, lyrical poetry. Five hours.

4. Terence and Plautus.—Their place in literature. Roman comedy. Five hours.

5. Teachers' Training Course.—Discussions of method, revues of syntax. Translation. Five hours.

6. Teaching Latin in Training Scool.—Under supervision, Five hours.

7. Prose Composition. — Study of correct Roman style. Sight translation. Five hours.

8. Classical Mythology.—Interpretation of myths. Allusions in texts red. Five hours.

9. Tactitus.—Agricola and Germania. Roman influence in western Europe. Five hours.

10. Roman Satire.—Cicero, Juvenal or Perseus. Five hours.

11. Roman Life .--- Five hours.

Major Subject-Latin.

Junior College requirement:

Latin 1, Cicero: De Senectute and De Amicitia, Five hours.

Latin 8, Classical Mythology. Five hours.

Latin 7, Latin Prose and Sight Translation. Five hours.

Latin 2, Livy. Five hours.

**Note.**—Other courses necessary to satisfy this major ar to be chosen upon consultation with the hed of the department. Senior College requirement:

Latin 3, Horace. Five hours.

Latin 5, Teachers' Training Course. Five hours.

Latin 6, Teaching Latin in Training Scool. Five hours.

Latin 4, Latin Comedy. Five hours.

Latin 9, Tacitus. Five hours.

Latin 10, Latin Satire. Five hours.

High Scool Education. Five hours.

Note.—Remaining courses necessary to be chosen upon recommendation of the hed of the department.

## MODERN FOREN LANGUAGES.

JOHN THOMAS LISTER, A.B., PH.B.

The work of this department is two-fold in purpose: (a) Cultural, (b) Professional.

(a) In accordance with the first aim, the department of-

fers instruction in Modern Foren Languages as a part of a liberal education. The elementary scool teacher needs, by way of indirect preparation for his life's work, the stimulus gaind from and the broader horizon created thru an acquaintance with some language other than the mother tung. These courses ar open to all students, and for work accomplisht credit is given on the regular College diploma.

(b) The professional courses aim to provide the student with training necessary for the equipment of a teacher of a Modern Foren Language. In addition to more extended study of the literature, the student is offerd the opportunity of practis teaching under supervision in the training scool.

Any of the folloing courses wil be given whenever a sufficient number of students apply for them.

#### German.

1. Elementary German.—Beginner's course. Grammar is studied, and reading is begun as erly as possible. Translation of easy English sentences into idiomatic German is givn daily. Conversation in German is practist as far as possible. This course does not presuppose any knolege of German. Fall term. Five hours.

2. Elementary German.—Second term. Continuation of Course 1. Gramar, reading, composition, and conversation will each hav its due consideration. Winter term. Five hours.

3. Elementary German.—Third term. Prerequisit Courses 1 and 2 or equivalent. Rapid review of grammar, reading of easy short stories, sight-reading, conversation, composition, reproduction of short stories. The following texts or their equivalents wil be used: Thomas' Practical German Grammar, von Hillern's Hoeher als die Kirche, Heyse's L'Arrabbiata. Spring term. Five hours.

#### Intermediate German.—Courses 4, 5, 6, 7, 8, 9.

4. Junior College or Senior College. Revue Grammar, reading of short stories, composition, conversation, sight-reading, Thomas' German Grammar, Riehl's Der Fluch der Schoenheit, Auerbach's Brigitta, Bernhardt's German Composition. Fall term. Three hours. 5. Junior College or Senior College. Revue Grammar, reading of easy plays, composition, conversation, sight-reading. Thomas' German Grammar, Schiller's Der Neffe als Onkel, Freytag's Die Journalisten. Fall term. Two hours.

6. Junior College or Senior College. Reading of more difficult short stories. Composition, conversation, sight-reading. Meyer's Der Schuss von der Kanzel, Keller's Dietegen. Winter term. Two hours.

7. Junior College or Senior College. Reading of more difficult plays, conversation, sight-reading. Lessing's Minna von Barnhelm, Lessing's Emilia Galotti. Winter term. Three hours.

8. Junior College or Senior College. Reading of longer stories such as Eichendorff's Aus dem Leben Eins Taugenichts, Kleist's Michael Kohlhaas, etc. Spring term. Three hours.

9. Junior College or Senior College. Reading of one of the folloing plays by Schiller: Wilhelm Tell, Maria Stuart, Jungfrau von Orleans, Wallenstein. Spring term. Two hours.

Advanst German.-Courses 10, 11, 12, 13, 14.

These courses ar open to Junior, Senior, or Graduate College students who hav had three or more years of German in a high scool or two years in college.

- 10. Advanst German.-Fall term. Three hours.
- 11. Advanst German.-Winter term. Three hours.
- 12. Advanst German.-Spring term. Three hours.
- 13. Advanst German.-Winter term. Two hours.
- 14. Advanst German .--- Spring term. Two hours.

#### French.

## Elementary French.—Courses 1, 2, 3.

1. Elementary French.— Beginner's course. Grammar, pronunciation, reading, composition and conversation wil be taken up in regular order. Fall term. Five hours.

2. Elementary French.—Second term. Continuation of Course 1. Grammar, reading, composition, conversation, reproduction of short easy stories in French. Winter term. Five hours.

3. Elementary German.—Third term. Prerequisit Courses 1 and 2 or equivalents. Reading of modern stories of plays, easy stories or plays. Daily dril on turning easy English sentences into French. Spring term. Five hours.

## Intermediate French.—Courses 4, 5, 6.

These courses ar open to either Junior or Senior College students.

4. Intermediate French.—Rapid review of grammar and pronunciation. Reading of Merrimee's Columba or Dumas' La Tulipe Noire, or other works of this grade. Fall term. Three hours.

5. Intermediate French.—Reading of some of the works of Balzac, such as Le Cure de Tours, Eugenie Grandet, Le Pere Goriot. Winter term. Three hours.

6. Intermediate French.—Reading of some of the works of Hugo, such as Hernani, or Ruy Blas. Spring term. Three hours.

#### Advanst French.—Courses 7, 8, 9.

These courses ar designd especially for Sonior College students, but may be taken also by Junior College students who hav had sufficient training to make it advisable. Open also to Graduate College students.

7. Advanst French.-Corneille's works. Five hours.

8. Advanst French.—Racine's works. Five hours.

9. Advanst French.-Moliere's works. Five hours.

#### Spanish.

# Elementary Spanish.—Courses 1, 2, 3.

1. Elementary Spanish.—Beginner's course. Grammar, pronunciation, reading, Composition, conversation. Fall term. Five hours.

2. Elementary Spanish.—Second term. Continuation of Course 1. Winter term. Five hours.

3. Elementary Spanish.—Third term. Prerequisit Courses 1 and 2 or equivalents. Reading of modern stories of plays, with daily dril on turning easy English sentences into Spanish. Spring term, Five hours.

## Intermediate Spanish.—Courses 4, 5, 6.

4. Intermediate Spanish.—Prerequisit Courses 1, 2, and 3 or equivalents. Galdos' works. Fall term. Three hours.

5. Intermediate Spanish.—Prerequisit Course 4 or equivalent. Echegaray' O Locura O Sanidad, Calderon's La Vida es Sueno. Winter term. Three hours.

6. Intermediate Spanish.—Prerequisit Course 5 or equivalent. Cervantes' Don Quijote. Spring term. Three hours.

#### Italian.

1, 2, 3, Elementary Italian. Each course, 5 hours.

# LITERATURE AND ENGLISH.

# ETHAN ALLAN CROSS, PH.M. RAE E. BLANCHARD, A.B. Character of the Courses Offerd.

The courses offerd in Literature and English fall into three classes: 1. Courses in Grammar, Composition, and Rhetoric. 2. Courses in methods of teaching the subject in elementary and high scools. 3. Literary courses,

There is no sharp division making a givn course especially appropriate to a certain college. Some Junior College students wil be found able to pursue with profit courses that are set for Senior or Graduate students; and advanst students who hav not alredy had certain courses in literature sceduled mainly for Junior College may find those courses best adapted to their needs.

# Courses in Grammar and Composition,

1. Grammar and Composition.—Required in the Junior College. The work of this course consists of two parts each equally important.—Grammar and Composition.

Grammar.—A careful review of the essential facts of English Grammar (the facts that function in speech and writing). The parts of speech ar reviewd, and then sentence construction and analysis occupies the remainder of the time. Special lessons ar givn upon matters of unusual difficulty, such as trublesum verbs, shal and wil, predicate complements of all kinds, and verbals (participles, gerunds, and infinitiv) of all the kinds and uses.

The purpose of the work in grammar is to giv the students such a review as wil fit them to teach grammar in the

upper grades, and incidentally to prepare them to pas the county or city examinations in grammar.

Composition.—Twelv themes ar required. These ar from two to four pages in length, very carefully ritten. The weekly themes ar carefully red by the instructor, marked for errors, and returnd to the students promptly.

This is the only required course in English; and, consequently, students ar not past unles they come to understand the essentials of English grammar, and acquire the ability to rite clear, straight-forward English correctly. Spelling, punctuation (especially running two or more independent sentences together with no punctuation or only a comma between; and punctuating a subordinate phrase or clause as a sentence) and paragraf structure get especial attention in the composition work. Two sections. Every term. Five hours.

2. Intermediate Composition.—Junior College or Senior College. A course in riting for students who hav had English 1 and wish to get more practis in riting. Others who hav been conditiond in the composition faze of English 1 may remove the condition by taking this course. Winter term. Three hours.

3. Advanst Composition.—Open to any student who has had Courses 1 and 2 or their equivalents. The course is intended to giv additional practis in riting to those who wish it and ar prepared to profit by a course of this kind. Spring term. Three hours.

#### Courses in Methods.

4. Oral Literature and Composition for the Lower Grades.—Oral literature and composition, including the arrangement of story-sequences, the principles of story-structure, and the treatment of the myth and the folk-epic for children. Junior College, but open to all Senior College students who expect to giv special attention to grade work. This course is advantageusly folloed by Course 4 in Reading, or Course 15 in the Training Scool, which wil use much of the same material for practis in the actual telling of the story. Fall Term. Three hours.

54

5. Literature and Composition for the Upper Grades.— Junior College and Senior College. This course considers literary material for the upper grades, with some attention to the appropriate material and the principles of work in composition. Winter Term. Three hours.

## Courses in Literature.

7. The Epic.—Open to Senior College and Graduate Students. This course consists of a study of the two great Greek epics, The Iliad and The Odyssey. Students ar not askt to do any additional reading during the summer term, but outlines of study for future reference, covering other national epics, wil be furnisht to the students in the clas. The purpose of the course is to furnish teachers in the elementary scools with the materials for story telling and literature studies embracing the hero tales from Greek literature. Fall Term. Five hours.

8. The History of English Literature.—Junior College and Senior College. A reading course folloing the cronological development of our literature from 1400 to 1660. Fall Term. Five hours.

9. The History of English Literature.—Junior College and Senior College. A reading course folloing the cronological development of our literature from 1660 to 1900. Winter Term. Five hours.

10. American Literature.—Junior College and Senior College. A course in American literature folloing the plan of Courses 8 and 9 in English liaterature. Spring Term. Five hours.

11. Lyric Poetry.—Senior College. The nature and themes of lyric poetry. Fall Term. Five hours.

12. Nineteenth Century Poetry.—Senior College. Five hours. Winter Term. Not given til 1916-1917.

17. The Short Story.—Senior College. Fall Term. Five hours.

Requirements for a Major in Literature and English.

Junior College requirement: Courses 1 or 2, and 4, 5, or 6, and 8, 9, and 10. Other courses selected by the student and the hed of the department from those open to the Junior College to make a total of 30 term hours.

Combination Majors .- Those who expect to combine Eng-

lish with some other subject to make a combination major wil be expected to offer 30 hours in English as indicated above.

## READING AND INTERPRETATION.

FRANCES TOBEY, B.S., Director. EMMA CHARLOTTE DUMKE, A.B. MARGARET JOY KEYES, A.B.

The courses in reading take cognizance of the cultural as wel as the practical valu that reading, as an art, offers:

a. Facility in mastery of the printed page, redy visualization and instant realization of units of thought.

b. Training in analysis of a piece of literature as an art unit.

c. Personal culture thru an approximately adequate response (vocal, bodily, imaginativ, emotional, volitional) to a wide range of beauty and truth in literature. This end is sought thru devotion to the ideal of revelation, supplanting the limited and self-centering ideal too long held for the recitation—performance.

d. Mastery of methods of teaching.

1. The Evolution of Expression.—A systematic, directed endevor to reflect, for the inspiration of the clas, the spirit and dominant truth of varied literary units. The ultimate end of this endevor is growth in personal power, manifested thru presence and addres, in spontaneity, life, vigor, purpose, directnes, poise.

Analysis of simple literary units: the essential truth, the parts, the servis of the parts, the relationship of the parts. Fall and Winter Terms. Five hours.

Miss Dumke.

2. Reading in the Grades.—Analysis of literary units, with study of structural plan. Courses of reading for the grades. Dramatizations from standard literature. Methods of teaching. Practis in teaching. A consideration of the relation of forms of expression to mental states. Every Term. Five hours.

3. Voice Culture.—Tecnical dril for freedom, flexibility, and responsivnes of voice. Exercises for clear-cut, accurate

56

articulation. Interpretation of units of literature adapted, by their range of thought and feeling, to develop modulation, color, and variety of vocal response. Fall and Spring Terms. Three hours.

4. Story Telling.—This course is offerd as a complement to English 4, in connection with which it is the most advantageusly taken. The material used is largely subject-matter presented in English 4 for use in the grades. Fall Term. Two hours.

5. Dramatic Interpretation.—Second year. Open to candidates who hav completed courses 1, 2, and 3. Impersonation, The Dramatic Monolog. Fall Term. Five hours.

6. Dramatic Interpretation.—Second year. Open to candidates who hav completed Courses 1, 2, 3, and 5. Analysis and presentation of plays. Winter Term. Five hours.

7. Panume Story-telling without words. Exercises 7. Panume Story-telling without words. Exercises for bodily freedom and responsives. Monologs and plays for bodily freedom and responsive Fall Term. with emfasis upon expressiv and definit action. Four hours.

Miss Keyes.

11. Public Speaking.—Oral composition. Three hours.

12. Public Speaking.—Study of models of oratory. Consideration of history of oratory. Practis in oratorical discourse. Two or three hours.

15. The Festival.—A study of the historic festival, its origan, forms and varius elements. Reserch and original work in outlining unified festival plans, reflecting some significant event, idea, or faze of civilization. Spring Term. Three hours.

13.—Esthetic Dancing.—See Department of Fysical Education.

14. Classical Dancing.—See Department of Fysical Education.

17. Interpretiv Dancing.—See Department of Fysical Education.

Major Subject—Reading and Literary Interpretation. Requirements:

Courses 1, 2, 3, 4, 5, 6, 7, 11, 12, 15. Thirty-seven hours. English courses wil be recommended by the hed of the department.

## **MUSIC.**

JOHN CLARK KENDEL, A.B., Director. NELLIE B. LAYTON, PD.M., Piano. JOSEPHINE KNOWLES KENDEL, Voice. LUCY B. DELBRIDGE, PD.M., Violin. LEE M. LOCKART, Bras and Reed Instruments.

The courses offerd by the department ar of two kinds: (a) Courses which ar elementary and methodical in their nature and ar ment to provide comprehensiv training for teachers who teach vocal music in the public scools.

(b) Courses which treat of the historical, literary, and esthetic side of music and ar ment for those who wish to specialize in scool music and become supervisors.

Courses for the grade teacher and general student: Music 1, 2, 3, and 4.

Courses for supervisors and those who combine music instruction with other subjects. An usic 2, 5, 7, 8, 9, 10, 17, 18,

Courses which ar cultural in their nature and ment for the general or special student: Music 7, 10, 12, 13, 14, 16, 19, and 21.

## **Private Instruction.**

No instruction in voice, pianoforte or violin is provided by the scool, but, if a teacher wishes to take up or continu the study of any of these special branches while attending the College, the opportunity wil be givn by the varius instructors of the music faculty at skeduled rates, for which credit wil be allowd.

All persons contemplating taking private lessons in music of any kind in the institution for credit should see the director of the department to make arrangements as soon as possible and mention their intentions to the Dean of the college when making out their program in order to receiv credit.

In the Conservatory department frequent student recitals ar givn, which provide the students with an opportunity to appear in public resital. An opera is produced annually by the students under the direction of the director of the department. The Philharmonic Orchestra is a Symphony composed of talent from the scool and city, which givs monthly concerts. The standard symphonic and concert works ar studied and played. Advanst students capable of playing the music used by the organization ar eligible to join upon the invitation of the director.

The college band offers an opportunity for those interested in band music to receiv excellent training and prepare numbers for concerts and all functions of the college.

All students majoring in Music, Primary Methods, and Fysical Education ar to complete a prescribed course in piano, or sho taht they hav alredy completed its equivalent. This instruction is provided free by the college.

1. A Course for Beginners.—(Open to Senior College students.) Notation, theory, sight-reading. The course is designd especially for teachers desiring to make sure their knolege of the rudiments of music so that they may be able to teach music in the public scools more efficiently.

2. Methods for the First Eight Grades.—(Open to Senior College.) A very practical course for teachers in which the material used in the public scools is studied and sung, with suggestions as to the best ways to introduce all fazes of the work. Prerequisit for this class Music 1 or its equivalent.

3. Kindergarten and Primary Music.—(Open to Senior College students.) First year. Designd especially for kindergartners and primary teachers. Songs and music adapted to the children of these departments wil be studied and material arranged for every season and function of the year. The care and development of the child voice; the teacher's voice; methods of instruction; practis singing and rythm exercises wil be a part of this course.

4. Rural Scool Music.—First or second year. This course consists of methods and material adapted to the conditions of the rural scool bilding where a number of children from the varius grades ar assembld. Three hours.

5. A Supervisor's Course in Music.-Second year or

Senior College. The material used in the grades and high scool is taken up, and studied from a supervisor's standpoint. Actual practis in conducting works of a standard nature wil be offerd those interested in this course. Open to those majoring in the department.

6. Corus Singing.—(Open to Senior College.) Worth-while music and standard choruses ar studied and prepared to present in concert and at the commencement exercises. Open to all capable of doing the work prescribed. Generally offerd in the Spring term only.

7. History of Music.—(Open to Senior College.) A literary course which does not require technical skil and is open to all students who wish to study music from a cultural standpoint. From Beginning of Music to Beethoven.

8a. Harmony.—(Open to Senior College.) Beginning harmony. The work consists of ritten exercises on bases (both figured and unfigured) and the harmonization of given melodies in two, three, and four voices. These ar corrected by the instructor and subsequently discust with the students individually. Work completed to the harmonization of dominant discords and their inversions.

**8b** and **8c**.—(Open to Senior College.) A Continuation of Course **8a**. Harmonization of all discords. The circle of cords completed, modulation, etc. The harmony courses continu thruout the year, and the work is pland to meet the individual needs of the clas.

9. Advanst Harmony and Counterpoint.—(Open to Senior College.) A continuation of Courses 8a, b, and c.

10. Methods in Appreciation.—(Open to Senior College.) This course is pland to help teachers to present more intelligently the work in Appreciation of Music for which there is such a groing demand in all our scools. A careful graded course suitable for each grade wil be givn. The lives and compositions of the composers from Beethoven to Wagner ar studied.

12. Individual Vocal Lessons.—(Open to Senior College.) Correct tone production, refined diction, and intelligent interpretation of songs from the classical and modern composers. One hour credit granted for twelv lessons that sho satisfactory progres. To make arrangements for this work consult the director of the department.

13. Individual Piano Lessons.—(Open to Senior College.) The piano work is especially arranged to meet the needs of teachers wishing to acquire a repetoire of simple music of the grade required in kindergarten, primary, and fysical education work.

For advanst students the work wil be arranged to fit their individual needs. Credit the same as for Course 12.

14. Individual Violin Lessons.—(Open to Senior College.) The work wil be outlined according to the ability of the student. Credit the same as for Course 12.

15. Scool Entertainments.—(Open to Senior College.) Practical programs for all occasions. Thanksgiving, Christmas and Arbor Day. Patriotic Programs. Programs of Songs of All Nations. A spring musical festival. The term work concludes with the performance of some opera suitable for use in the grades.

16. Individual Bras or Reed Instrument Lessons.—(Open to Senior College.) The work will be outlind according to the ability of the student. Credit the same as for Course 12.

17. Modern Composers.—The lives of the musicians from Wagner to the present day ar studied. Programs of their music ar given by members of the clas and the talking machines. The work is pland to sho the modern trend in music and to make the students familiar with the compositions of the modern writers.

# Requirements for a Major in Music, Pd.B.

Music 1 or its equivalent, 2, 3 (optional), 7, 8a, b, and c, 9, 10, 12, 13, 14 or 16, 15 (optional), 17.

Senior College, Pd. M. 18, 19, 20, 21. Senior College, A.B. 22. Orchestration.

23. The Sychology of Public Scool Music.

#### PRACTICAL ARTS.

SAMUEL MILO HADDEN, A.M., Dean.

WALTER F. ISAACS, B.S., Director of Fine and Applied Arts. IDA MARSHALL, B.S., Director of Home Economics.

JOHN T. MCCUNNIFF, PD.M., A.B., Printing, Mecanical Draw ing.

LULU A. HEILMAN, A.B., Shorthand and Typeriting.

FRANK W. SHULTIS, A.M., Busines Methods.

MAX SHENCK, Bookbinding.

CHARLES M. FOULK, PD.B., Woodwork.

MERLE KISSICK, PH.B., Household Art.

CHARLES HALL WITHINGTON, A.M., Agriculture.

AGNES HOLMES, PD.M., Assistant in Fine and Applied Arts.

## Industrial Art.

The department of Industrial Art is devoted to the tecnic of fundamental processes in industrial art, including manual training, mecanical drawing, wood turning, pattern making, printing, bookbinding, and soft metal work, and a study of the methods and practis of presenting these in elementary, secondary, and trade scools.

The Guggenheim Hall of Industrial Art, with a floor space of 17,000 square feet, is largely devoted to these lines of work.

5. Methods in Practical Arts Subjects.—Required of all first-year students, and also of those in later classes who hav not had its equivalent, who ar majoring in the practical arts group, including manual training, art, home economics, printing, bookbinding, stenografy, and elementary agriculture.

The course deals with the fundamentals of teaching practical arts subjects, which includes a study of materials and processes. Correlation, e. g., inter-relation between included subjects, geografy, arithmetic, and other appliances for the illumination of subjects; the introduction of practical arts subjects in the public scools, with equipment, supplies, etc. Observation of teaching in the training scool classes is part of this course. Four hours. Every term. 4. Pre-Vocational Education.—For a full description of this course see Department of Industrial Art. Senior College. Spring Term.

24. Material Study.—In this course all the materials used in the Woodworking Department wil be discust. The different kinds of material, the sources from which they come, the processes of manufacture, and other lines wil be discust; and Tools and Appliances as an integral part of a public scool equipment is a part of this course. Two hours. Spring Term.

7. Industrial Art in Secondary and Trade Scools.—In this course the folloing topics wil be discust: Industrial art, secondary and trade scools in foren cuntries, the movement in the United States. The course also includes a brief bibliografy of articles that each student has red and reported on in clas. Three hours. Winter Term.

15. Project Design.—This course has for its object the planning of objects suitable for the elementary scool. Complete artistic working drawings that wil embody the best possible principles of artistic design, of things possible of execution in the elementary scool, together with a short, valuable bibliografy of sources from which information Two hours.

1. Figure Moodwork.—This course is for beginners, and is designd to giv a general knolege of woods, a fair degree of skil in using woodworking tools, and an acquaintance with the underlying principles of manual training. It also includes mecanical and freehand drawing in their application to constructiv design and decoration. Five hours. Every Term.

2. Intermediate Woodwork.—This course is designd for those who wish to become more proficient in the use of woodworking tools. It includes constructiv design, the principles of cabinet making and furniture construction, and wood finishing. The different important constructiv joints ar discust and applied wherever possible in the cabinet work done in clas. Five hours. Fall and Winter Terms. Prerequisit: Manual Training 1, or equivalent.

3. Woodwork for the Elementary Scool.-In this course

the folloing topics ar discust: Equipment, materials, kinds of work, methods in teaching, methods in recitation, presentation of lessons, organization of classes, and outlining of work for the elementary scool. Three hours. Fall and Spring Terms.

6. Repair and Bilding Equipment.—This course has for its bases the repairing and bilding of furniture for the different departments of the College, such as the construction of lockers, cases, drafting boards, and such other equipment as can be handled in the department. Prerequisit: Woodwork 1 and 2. Fall and Winter Terms. Five hours.

14. Care and Management.—For a full description of this course, see Senior College, department of Industrial Art. Every Term.

19. Wood Turning.—This course is designed for those who wish a more comprehensiv knolege of the art. The course wil consist of talks, discussions, and practical work regarding varius fazes of the work, such as turning of patterns between centers, face plate turning, finishing, care of tools, constrained of materials, upkeep of lathes, speeds necessary pro-

20. Pattern Making.—The topics upper the binds of consist of the folloing: Woods best suited for varue work, glu, varnish, shellac, dowels, draft, shrinkage, and finish. The practical work wil consist of patterns for hollo castings, bilding up, and segment work. Five hours. On demand.

21. Combination Course with Fysics.—Bilding complete, well-balanst artistic fysical apparatus based on the development work carried on in fysics classes. Prerequisit: Courses 1 and 2. Three hours.

22. Bilding Construction.—For a full description of this course see Senior College, Department of Industrial Arts.

10. Elementary Mecanical Drawing.—This course is designd to giv knolege of the use of drawing instruments and materials, geometrical drawing, elements of projections, strait lines, and circles; problems involving tangents and planes of

64

projections, development of surfaces, elementary isometric and oblique projections, simple working drawings and lettering. Fall Term. Five hours.

11. Advanst Mecanical Drawing.—For full description of this course see Senior College, Department of Industrial Art. Spring Term.

12. Elementary Arcitectural Drawing.—This course includes designs, plans, elevations, and longitudinal sections of framing, doors, windows, sils, rafters, etc., in bilding construction in its application to work for barns, outbildings and residences. It also includes the making of tracings, blueprints, and specifications. Prerequisit: Course 10. Five hours. Fall Term.

17. Elementary Machine Design.—Here is treated the development of the helix and its application to V and square threds; conventions of material, scru-threds, bolts and nuts, rivets, keys, etc. Sketches, drawings, and tracings ar made from simple machine parts, such as collars, face plate, scru center, clamps, brackets, couplings, simple bearings and pulleys. Standardized proportions ar used in all drawings. Winter Term.

18. Advanst Machine Design.—For a full description of this course see Senior College, Department of Industrial Arts. Spring Term.

22. Constructiv Detail Drawing.—For a full description of this course see Senior College, Department of Industrial Art.

16. Historic Furniture.—Lectures illustrated by lanternslides and pictures showing the development of and characteristics fundamental in the Netherlands, England, and erly American period. One hour.

8. Elementary Art Metal.—This is a laboratory course dealing with the designing and constructing of simple artistic forms in sheet bras and copper. The aim is to create objects of artistic worth. The purpose is to realize in concrete form those qualities caracteristic of good constructiv design, such as fine proportion, elegance of form, and correct construction. Five hours. Fall and Winter Terms.

9. Advanst Art Metal.—For a full description of this course see Department of Industrial Art, Senior College.

#### Printing.

1. Elementary Printing.—This course is intended to acquaint the student with the fundamental principles underlying the printing art. In this course the student becomes efficient in hand composition, spacing out jobs, locking up forms, making a job redy for pres, and operating presses. Five hours, Every term.

2. Intermediate Printing.—This course is a continuation of the elementary printing and is designd to make the student more proficient in the lines alredy mentiond; also rule work, and designing programs, window cards, etc., underlaying and overlaying on the pres, making redy half tones, two and threecolor work, proof reading, and operating in Monotype keyboard. Five hours. Fall and Winter Terms.

3. Advanst Printing.—In this course the student is expected to become apt in all the lines of general printing, and more particularly the attention is given to ad composition, and the imposition of four- and eight-page forms. Five hours. Spring Term.

#### Bookbinding.

1. Elementary Bookbinding.—This course includes the folloing: Tools, machines, materials, and their uses, collating and preparing the sheets for soing, soing on tape and cord, preparing of end sheets, trimming, gluing, rounding, bacing, hedbanding and lining of bacs.

Cover materials, planning and making of covers, finishing and lettering of titles, and labeling; all the steps necessary for the binding of full cloth-bound books. Five hours. Every Term.

2. Intermediate Bookbinding.—This course includes the binding of books in half morocco and full lether, including such processes as: Tooling in gold and blank, edge gilding and marbling, and the making and finishing of cardboard boxes and lether cases. Five hours. Winter and Spring Terms. 3. Advanst Bookbinding.—For a full description of this course see Senior College Section. Open to Junior College Students. Five hours. On demand.

Major Subject—Teaching Industrial Art in Elementary Scools.

Junior College requirement:

Courses 1, 2, 3, 4, 6, 8, 10, 12, 15, and 19.

The remaining courses necessary to satisfy the requirement ar to be selected upon consultation with the Dean of Practical Arts.

# Combination Majors.

This department upon consultation wil arrange other combination majors within the department, also upon consultation with the other departments concernd, arrange combination majors, making such combinations as Manual Training and Fysics.

Fine and Applied Arts.

WALTER F. ISAACS, B.S. AGNES HOLMES, PD.M.

The Department of Fine and Applied Arts aims to prepare teachers to meet all the demands made upon regular grade teachers, in public and private scools from the kindergarten up thru the high scool in all branches of drawing and to train special students to act as departmental teachers and supervisors in Fine and Applied Arts. The courses ar open as electivs to all students of the College.

The department is wel equipt. In addition to the regular equipment there is a large museum of ceramics, original paintings, reproductions, and copies of masterpieces, bronzes, marbles, and tapestries. The museum of ceramics is a rare collection of pottery, containing ancient and modern specimens from different cuntries, including Japan, Austria, Holland, France, England, and America.

1. Elementary Drawing and Design.—In this course a wide range of problems in public scool drawing is taken up in a brief manner to giv the student a general knolege of the subject. Those students who are taking their majors in the department lay a foundation for their future work, and others who elect the course find it an aid in their teaching.

The course includes the folloing subjects.

The study of line and space division in the form of borders, units, and surface patterns, from abstract and conventionalized motifs; theory of color; design considerd from the standpoint of utility and construction; freehand drawing of objects in accented outline; linear and aerial perspectiv; nature drawing; simple problems in construction. Lectures on classroom methods ar given frequently. Five hours.

2. Applied Design.—The construction and decoration of notebook covers, desk pads, and similar articles; theory of design in its relation to useful objects; the application of original designs by block printing on curtains, table runners, or pillow covers. Five hours.

3. Light and Shade.—Drawing in charcoal or pencil from stil life or from simple casts. The study of values is emphasized. Some work in colord chalk is introduced to stimulate the student's color vision. Five hours.

4. Design and Composition.—The work begins with the theory of space filling and color harmony; abstract exercises in filling the square and circle, using geometric units, giving attention to line, value, and color. This is folloed by a few practical problems carefully executed. Prerequisit: Courses 1 and 2. Five hours.

5. Water Color Painting.—Groups of stil life objects and flowers ar renderd in water color. The student is allowd freedom of tecnic, but a close study of color values is insisted upon. Prerequisit: Course 3. Five hours.

6. Art Appreciation.—The main principles of esthetics underlying the fine arts ar taken up in illustrated lectures. The course is pland with a view to increasing the pupil's power to select and enjoy good examples of fine art: examples of the world's best art ar studied. Discussion of art in its relation to the home and to industrial life. One hour,

7. Constructiv Design.—Design as a factor in construction; reed and raffia work; construction of mats, bags, purses, book covers, etc., in lether with embossed or colored designs. Five hours. 8. Pottery.—The art of bilding by hand Vases, bowls, decorativ tiles, etc., ar made. The department is equipt with a modern kiln, and the work of students is fired and glazed. A variety of glazes with different colors is used. Embost, incised, and inlaid decorations. Five hours.

9. History of Painting.—The evolution of painting from the beginning of history; the growth of the great scools and their influences; the study of the important masters, discussing their personalities as related to their painting, and their work as an index to the time in which they livd; illustrated by a large collection of fotographs and lantern slides. Lectures with related reading Two hours.

10. History of Sculpture.—The works of the great masters of ancient and modern scools illustrated by pictures and lantern slides. Lectures with related reading. One hour.

11. History of Arcitecture.—Illustrated lectures on the development of arcitecture; interpretations of famus bildings. One hour.

Requirements for a Major in Fine and Applied Arts. In the Junior College, courses 1, 2, 3, 5, 6, 9, 10, and 11 ar required for major work.

> Home Economics. Ida Marshall, B.S. Merle Kissick, Ph.B.

The Junior College Courses in Home Economics ar pland primarily to meet the needs of those wishing to teach these subjects in the elementary scools, and at the same time they giv opportunity to elect considerable work along other lines. However, by confining electivs to this department, to the siences and to art, students may be able to fit themselvs for high scool teaching. While high scool Home Economics teachers may be traind to do good work in a two-years course, it is advisable to take the full four-year course if students wish to secure and hold with credit high scool positions.

Opportunity is given to major in either Domestic Sience

or Household Art, with freedom to elect in either faze of the work.

Even the a student may wish to take equal amounts of both Domestic Sience and Household Art, it is advisable to choose one side of the work as a major and elect from the other side.

# Required Work for the Major in Domestic Sience.

For those majoring in Domestic Sience the folloing courses ar required in the order in which they ar givn.

Note: D. S.-Domestic Sience, H. A.-Household Art.

# Junior College. First Year.

	Credits
Elementary Cooking, (D. S. 1)	5 hours
Elementary Cooking, (D. S. 2)	5 hours

 A college "Required" course.

Note.—If students hav credit for a good course in high scool chemistry, it would be advisable to substitute a required course for it, in the first and second terms.

# Second Year.

In the second year the folloing arrangement per term would be advantageus:

# First Term:

D. S. 4 (3d and 4th hour). Bot. 6, (2d hour). Teaching. Required subject.

Second Term:

D. S. 7, or other elective, (3d and 4th hour). Ind. Physics or H. A. 5. Teaching. Required subject.

### Third Term:

D. S. 5 and 6, (2d hour). H. A. 4, (3d and 4th hour). Teaching. Required subject.

Uniforms.—All students when in Domestic Sience laboratory ar requested to wear wash waist and a white princes apron, to which is attacht a holder and a small hand towel.

# Domestic Sience Courses.

1. Elementary Cooking.—A study of the folloing articles of food is made from the standpoint of composition, nutritiv value, digestibility, growth or manufacture, marketing, adulteration, and methods of preparation: Fruits, vegetables, cereals, egs, milk, meats, fish, and beverages. Special emphasis is laid upon the principles underlying the processes of cooking. Fall Term. Five hours.

2. Elementary Cooking.—A continuation of Course 1. Special study is made of the fatty foods, levens and levening agents, pastry, quick breds, light bred, and cake making. Five hours. Winter Term.

3. Fancy Cooking and Serving.—Meals ar pland, prepared and served at a givn cost. Due consideration is given to diet suited to individual needs, varying with age, helth, and activity. Proper balancing of the menu is studied and carried out in the practical work. Five hours. Spring Term.

Prerequisite: D. S. 1 and 2.

4. Preservation of Foods and Invalid Cookery.—The principles underlying the proces of preserving foods ar studied. Preservativs, and food adulterants ar discust. Fruits and vegetables ar cand and pickld. Fruits ar preservd, and jellies and conservs made. One third of the time wil be devoted to the preparation and serving of invalid dishes suited to the needs of patients suffering from varius diseases. Fall Term. Five hours.

Prerequisite: D. S. 1.

6. Household Sanitation. — The folloing subjects ar studied. House site, ventilation, heating, lighting, plumbing,

72

and disposal of garbage. Electiv. Two hours. Spring Term.

5. Housewifery.—The place of the home and homemaker in the economic world, keeping of accounts, apportionment and judicious expenditures of the income, and the general cost of living ar tucht upon. The greater emphasis is laid upon methods of organization, care of the house and its furnishings, and care of the family. Three hours. Spring Term.

7. Dietary Problems.—An application of the principles of human nutrition. A study is made of the relativ value of the varius articles of food as energy givers and body bilders, and their relativ cost. Practical comparison is made of the nutritiv values of the common foods by computing, preparing, and serving meals at specific costs, in which specified nutrients ar furnisht. Prerequisit, at least one year's work in the study and cookery of foods. Electiv. Winter Term. Five hours.

8. Methods of Teaching Domestic Sience.—A study of the problem of teaching Domestic Sience in the elementary and high scools. It includes the arrangement of courses of study for different scools, and methods of presenting the subject matter, planning of equipment, and laboratory management. Text books reviewd and lesson plans discust. Three hours. Spring Term.

Prerequisit: D. S. 1 and 2, or 1 and 3.

15. Demonstrations.—Each girl wil be given an opportunity to demonstrate some proces of cooking before the entire clas. Electiv. Two hours. Spring Term.

Prerequisit: D. S. 1 and 2, or 1 and 3.

### Courses in Household Art.

1. Handwork.—The work in this course is pland to train the student in the tecnical work of the hand problems of Household Art. Consideration is givn to the fundamental principles both for the Art and Household Art points of view. There is definit correlation in the course between these two departments. The problems ar those which wil train the prospectiv teacher in all fazes of handwork likely to be taut in the Elementary and High Scools, and include the folloing general types: Crocheting tatting, wood-block printing, embroidery, and so on. Required of Domestic Sience and Household Art majors. Five hours. Fall Term.

2. El. Dressmaking.—The relations of the drafted pattern to the lines of the figure and practis in the construction of

74

### GREELEY, COLORADO

drafts for varius types of garments, from underclothing to outside dresses ar considerd. Equal in importance to the work in drafting is the construction of garments from definitly mesured drafts. Accuracy in tecnical work and construction ar the two chief aims of this course. Required of Domestic Sience and Household Art majors. Five hours. Winter Term.

4. Dressmaking.—Attention is directed to the subject of material, patterns, methods of altering to correct measurements of the figure and to the principle involvd in construction, filling, finishing, and design of the problems of dressmaking. Special problems ar linen or gingham dres, tailord wool skirt, crepe de chine waist and lingerie dres. Household Art 2 required of Household Art majors. Electiv for Domestic Sience majors and students outside the department by special arrangement. Five hours. Spring Term.

5. Millinery. — The principle of changing commercial shapes ar considerd thruout the courses. The details in covering tailored hats, with thoro practis in doing the same; the making of frames for dres hats and the problems of working with soft materials, such as chiffon, light silks and muslins; and the sewing of braids and the making of shapes from designs form the main part of this course. Design is considerd in relation to individual caracteristics with harmonius combinations of textures. Practis is afforded to the students of the course in the making of hats for the people in this college and town. Required of Household Art majors. Electiv for Domestic Sience majors and by special arrangement for students from other departments. Five hours. Winter Term.

6. Elementary Textils.—The identification of textil materials in fibers and fabrics by means of the consumer's tests is studied. Attention is givn to the identification of the fibers and fabrics by name, width, prices and to the types of fabrics in weave in relation to strength, structure, color, and beauty. The four main fabrics ar considered in this course: Silk, cotton, wool, and linen. Required of Household Art majors. Junior College. Electiv for Domestic Sience majors. Five hours. Fall Term.

8. Methods of Teaching.-The folloing topics ar treated:

Household Art in relation to the new movements in Education, types of scools and their relation to the subject matter of Household Art, relation between Home Economics and Household Art, study of varius problems, and specific work in the subject matter of Household Art. Detaild study of courses of study for Elementary and High Scools with work on unit lesson plans. Required of Household Art and Domestic Sience majors. Two hours. Spring Term.

### Agriculture.

# C. H. WITHINGTON, M.S., A.M.

The large collection of plants groing upon the college campus, in the arboretum, in the gardens, and in the greenhouses, furnishes very rich illustrativ material for classes in all Agriculture and Nature Study subjects. As a laboratory for the study of landscape gardening the campus furnishes one of the finest in the state.

5. Elementary Agriculture.—This course is pland primarily for teachers in the rural and village scools. The subject matter is selected and the work presented with this end in view. The course covers a year's work in the elementary agriculture for the rural and village scools. All laboratory work wil be presented in such a way that it can be adapted to the needs of the individual teacher. Practical work is givn in greenhouse, field, and garden. Five hours. Fall, Winter, and Spring Term.

6. Plant Propagation.—A discussion of natural and cultural methods of propagation; seeds, seed testing, and seed groing; the treatment required for the different kinds of seeds, the production of seedling stock; grafting, budding, layering; the making of cuttings, and the special requirements for propagating commercial fruits and ornamental plants. Five hours. Fall and Spring Term.

4. Scool Gardening.—Meaning of the scool gardening movement. The relation of gardening to nature study and elementary agriculture. The scool garden as the laboratory of nature study and agriculture. Practis in garden handicraft. Planning and planting the scool garden. Plants in relation to gation of plants, seedage, cuttage, and graftage. The principles of landscape improvement applied to scool and home grounds. How to beautify scool and home grounds. Studies of the best nativ and introduced decorativ plants. Five hours. Spring Term.

7. Seed Testing.—The student becomes familiar with the details of structure of the seeds of all the principal races of agricultural plants, and lerns to distinguish those seeds which ar used as adulterants or as fraudulent substitutes. Practis work is given in making purity and germination tests of seeds, according to the official rules and methods for seed testing. Two hours. Spring term.

8. Vegetable Gardening.—Lectures, readings, and practical exercises. Considerable attention wil be given to garden soils and fertilizers; forcing and market gardening; as wel as other cultural features. Three hours. Spring Term.

15. General Entomology.—The study of our local insect fauna, together with the systematic relation and the identification of the orders and the more important families, genera, and species, and the habits and life histories of representativ species. Lectures and field work. Five hours. Fall, Winter, and Spring Term.

3. Nature Study.—The theory, practis, and materials of nature study. Designd to fit teachers for teaching nature study in the elementary scools. In this course we consider: (a) The Nature Study Idea,—A review of the ritings of Professors L. H. Bailey, S. C. Schmucker, C. F. Hodge, and others on the aims and ideals of nature study teaching. The significance and importance of the nature study movement. (b) The Material of Nature Study,—First hand acquaintanceship with the good and common things of the outside world, the actual, first-hand observation in garden and laboratory, field and plain. Five hours. Spring Term.

11. Elementary Poultry Raising.—A general course dealing with poultry house construction (taking Wood Working 1. as a parallel course), yarding, fattening, killing, dressing, marketing, and a brief description of the more common breeds. Laboratory work consisting of demonstrations in the practis of handling poultry. Two hours. Fall and Spring Term.

12. Practis in Incubation.—Three times a day, seven days a week, for a period of four weeks. This course consists in the care of an incubator by the student thru the incubation period, testing the eggs, and bringing off the hatch. Careful records of fertility, cost of incubation, etc., ar kept. One hour by appointment. Spring term.

13. Practis in Brooding.—Three times a day, seven days a week for a period of four weeks, at hours outside the regular scedule. In this course each student handles a flock of chicks. He has the entire care of brooding and feeding them during the four most critical weeks. A report of cost of fuel and feed, of gain in weight, and of mortality, is required. This course must be preceded by **Practice in Incubation.** One hour by appointment. Spring Term.

14. Practis in Poultry Feeding.—Three times a day, seven days a week, for a period of four weeks, at hours outside the regular scedule. This course consists of the actual care of a flock of fowls by the student, under supervision. Careful record is kept of the feeds used and the egs produced. A financial statement is required at the end of the feeding period. One hour by appointment. Fall, Winter, and Spring Term.

#### **Commercial Arts.**

LULU A. HEILMAN, A.B. FRANK W. SHULTIS, A.M.

In this department two opportunities wil be givn to ern a major. The Shorthand branch requires courses 1, 2, 3, 4, 5, 6, 11, 12, 13, 14, 15; the Accounting branch, courses 21, 22, 23, 24, 25, 26, 27, and 28.

Students who hav done commercial work elsewhere, for which they hav receivd entrance or advanst credit at this institution wil be givn advanst work and wil be allowd to select work from both branches of the department.

1. Principles of Shorthand.—First six lessons in the Gregg

Manual with supplementary exercises.—Five hours. (Senior College).

2. Continuation of Course 1.—Second six lessons in Gregg Manual with supplementary exercises. Five hours. (Senior College).

3. Continuation of Course 2.—Last six lessons in the Gregg Manual with supplementary exercises and beginning dictation. Five hours, (Senior College).

4. Dictation.—Review of principles, phrasing, dictation. Five hours. (Senior College).

5. Speed Class.—Speed dril dictation, beginning offis practis. Five hours. (Senior College.)

6. Offis Practis and Methods.—Offis work in the varius departments of the scool; teaching methods in both shorthand and typeriting. Five hours. (Senior College.)

11. Elementary Typeriting.—Beginning work in tuch typeriting, covering position at the machine, memorizing of keyboard, proper tuch, and correct fingering, with instruction in the care of the machine. One period of practis per day is required. Two hours. (Senior College).

12. Busines Correspondence.—Study of approvd forms of busines letters, proper spacing and placing, finning-in form and circular letters, addressing envelopes, manifolding and tabulating. One period of practis per day is required. Two hours. (Senior College).

13. Preparation of Special Papers. — Copying from ruf draft, tabulating, preparation of special papers, ornamental typeriting, transcribing from shorthand notes. One period of practis per day is required. Two hours.

14. Advanst Typewriting.—Speed practis, direct dictation, transcribing from shorthand notes. One period of practis per day. Two hours.

15. Methods and Offis Practis -- Assignment of lessons,

grading papers, keeping records, making reports; offis work in the varius departments of the scool. Two hours.

16. Offis Practis.—Daily work in the offises of the institution. Two hours.

21. Elementary Accounting.—Fundamental principles of double entry. Use of the journal and ledger. Making of trial balance and statements. Cash book, sales book, and purchase book introduced. Five hours.

22. Intermediate Accounting. — Commercial paper, bil book, invoice book, bils of lading, special column books, whole-sale accounts. Five hours.

23. Advanst Accounting.—Corporation accounts, manufacturing accounts. Five hours.

24. Bank Accounting.—Organization of a bank; methods and principles of banking; commercial paper; loans and discounts; savings deposits. Five hours.

25. Commercial Arithmetic.—A rapid review of the four fundamental processes, and of common and decimal fractions wil be givn. This wil be folloed by a comprehensiv treatment of percentage and its applications. Only modern methods wil be used. Special attention wil be givn to the improvement of accuracy and speed. Five hours.

26.—Business Penmanship.—The work wil consist of drils in freearm movement riting. Legibility and simplicity combined with speed wil be the aim. Five hours.

27. Commercial Law.—Study of contracts; negotiable instruments; agents; partnerships; real property; personal property. Five hours.

28. Methods in Commercial Work.—The commercial field; the course of study; the equipment; special methods; equipment of the teacher; relation of the busines scool to the community. Five hours.

**29.** Farm Accounts.—This course is offerd as an electiv for students of agricultural courses. The work will be simple

enuf to be taken up by those who hav not studied bookkeeping. Five hours.

**30.** Household Accounting.—An electiv course for the students of home economics. Only elementary principles wil be introduced. Five hours.

40. Busines English.—The elementary principles involvd in riting correct English. The sentence, the paragraph, grammatical correctnes, effectivenes, clearnes, punctuation. Five hours. (This course may be taken by majors in this department instead of English 1.)

41. Business English.—Busines letter riting. Advertisement riting. Five hours.

**42.** Business English.—Advanst letter riting. Busines themes. Public speaking. Five hours.

# LIBRARY SIENCE.

#### ALBERT FRANK CARTER, A.B., M.S.

1. Course in General Library Economy.—This includes mecanical preparation of books for the shelvs, ordering, accessioning, care of books, fysical make-up of the book, paper, binding, illustration, etc. A good form of library hand riting must be attaind in this course. Five hours.

2. Reference Work.—The subject covers a study of the standard works of reference, such as the principal encyclopedias, dictionaries, atlases and reference manuals of varius kinds, with comparisons of the several forms, their arrangement, etc. Indexes and aids, periodicals. Public documents, their selection and use. Practical questions and problems assignd. Five hours.

3. Classification and Cataloging.—Books, pamflets, pictures and the varied items that may be obtaind for the public scool library. Decimal system of classification. Dictionary catalog. Alfabeting, Library of Congress cards. Shelf lists. Arrangement of books on shelvs. Five hours.

4 and 5. Practical Work in the Library.—Two hours a day during two terms, plus optional work by the student. This is

allowd only to those who hav taken Courses 1 and 3. Two hours. Each Term.

# FYSICAL EDUCATION AND PLAYGROUND TRAINING.

# ROYCE REED LONG, A.B., Director. MARGARET JOY KEYES, A.B. Aims of the Department.

The department aims (1) to help the student form regular habits of exercise and to develop the organic powers of the individual; (2) to giv such instruction that the average teacher may be able to supervise the play activities of her own scool successfully; and (3) to giv some of the preliminary training to specially qualified students who desire to become teachers of fysical education in the scools, playground directors, or play leaders.

### Equipment.

The fysical examination room contains the usual anthropometric instruments; the gymnasium has apparatus for indoor exercises, and the outdoor gymnasium is supplied with modern playground apparatus; the athletic field has a quartermile cinder track, grandstand, football and baseball fields, tennis courts, and basketball courts.

### **Required Work.**

All students in the Junior College ar required to take fysical education during four of the six terms in order to receiv diplomas from any department in the institution. A wide range of work is offerd, but students must make progres toward greater fysical efficiency to secure credit. Work is on a laboratory basis, two hours of practis work per week for a term being required for one hour of credit. Students taking this work from other departments may, upon approval of the instructor, repeat any of the practical courses and receiv credit for the general fysical education requirement for that term. Students electing Fysical Education as a major subject ar required to take at least thirty hours in the department, and in individual cases more may be required.

### Gymnasium Dres.

All students ar required to wear at fysical training exer-

# GREELEY, COLORADO

cises an approved gymnasium uniform. This uniform for women consists of bloomers, middle blouse, and tennis shoes. The uniform for men consists of a track suit and tennis shoes. These suits may be purchased in Greeley or they may be secured elsewhere before entering the College.

### Fysical Examinations.

Students upon registering ar required to fil out helth history blanks, and ar givn a fysical examination. The work in Fysical Education is based upon the results obtaind in these examinations. Students who ar belo average, or who hav fysical defects likely to interfere with their taking moderately strenuus exercise may hav special work prescribed for them.

### Fysical Education and Playground Teachers.

To meet the increasing demand for teachers who can supervise fysical education in scools and direct playground work, a major course has been outlined. In the matter of courses, the students ar guided in their selection in order best to meet their needs for the work for which they ar preparing. In general these courses include Sycology, Biology, Fysiology and Hygiene, Anatomy, Macanics of Bodily Exercise, History of Fysical Education and Play, Nature and Function of Play and such practical courses in gymnastics, playground games, and athletics as ar necesary to enable them successfully to direct such work.

## **Courses For Women.**

1. Fysiology and Hygiene of Fysical Training.—A study of the effects of muscular activity upon the bodily mecanisms; influence of exercise upon the psycho-motor functions, nutrition, elimination, organic vigor; the effects of varius types of exercise upon hart rate, blood pressure, etc.: and the application of fysiological principles to practical fysical training. A course for students majoring in Fysical Education. Men and women. Fall Term. Three periods. Three hours. (Junior or Senior College).

Mr. Long.

2. Anatomy.—Junior College. This course is for Fysical Education majors, men and women. Five periods per week. Five hours. Winter Term.

Mr. Long.

3. Elementary Light Gymnastics.—Clas organization and conduct; fundamental positions and movements; free arm, dumb bell, wand, and Indian club drils; principles of selection and arrangement of exercises. Practis, reports, organization and leading of drils. Three periods per week. Two hours. Winter Term, Junior College.

### Mr. Long.

4. Advanst Light Gymnastics.—A continuation of Course 3, but more advanst, involving more intricate movements. Prerequisit: Fys. Ed. 3. Spring Term. Three periods. Two hours credit. Junior or Senior College.

### Mr. Long.

5. Outdoor Plays and Games.—A course in plays and games progressivly arranged from simple circle and folk games to the more highly organized group and team games. The course aims to meet the needs of the scool and playground, particularly for the lower grades. Electiv. Fall and Spring Term. Three periods. Two hours credit.

#### Miss Keyes.

6. Children's Singing Games.—A course for those desiring play material for the elementary grades. Traditional games, singing plays and games, gestures, imitation, chasing and catching, games which appeal to the yung thru the energy of movement and imaginativ situations. Winter and Spring Terms. Three hours credit.

#### Miss Keyes.

7. Folk Dances for Scool and Playground.—A course in folk dances arranged to meet the need of the scool and playground. Folk dances of varius nations; their origin, method of presentation; dances which meet fysical, moral and social requirements, yet simple enuf to afford enjoyment to children without a large amount of practis. Fall and Winter Term. Five periods. Three hours credit.

#### Miss Keyes.

8. Esthetic Dancing.—Technic of the dance. Plastic exercises, the development of perfect bodily coordination and rythmical responsivenes. Practis and reports. Junior or Senior College. Three periods. Three hours. Fall and Winter Term.

84

9. Classical Dancing.—Advanst technic, classical dances. Analysis and composition. Appropriate dances for scool, playground or social purposes. Three practis hours only. History of dancing wil be taken up on two days per week. Electiv. Prerequisit: Course 8. Five periods. Five hours credit. Winter and Spring Term.

#### Miss Keyes.

10. Interpretiv Dancing.—Continuation of course 9. Prerequisit, course 9. Three periods. Three hours credit. Spring Term.

# Miss Keyes.

11. Swedish Gymnastics.—Elementary Swedish gymnastics. Attention wil be givn to the day's order, progression, form, control, and execution. Winter and Spring Terms. Two periods. Two hours credit. Junior or Senior College.

Mr. Long.

12. Playground Games.—Group and team games appropriate for contests on the playground, or for scool or college; captain ball, end-ball, newcomb, volley bill, playground ball, and basketball will be played; methods of conducting games, rules governing games, etc., wil be discust. Practis, assignd references and reports. Fall and Spring Terms. Two periods per week. Two hours credit. Sec. I. T. Th. Sec. II. M. W. 9.05. (Junior or Senior College.)

# Mr. Long.

13. Indoor Games.—Selected group and team games. Methods of organization, rules and technic. Two periods per week during Winter Term. One hour credit.

Mr. Long.

14. First Aid.—Lectures, demonstrations and recitations covering the subject of what to do in case of accident or emergency. The Red Cross handbook is made the basis of the work. For men and women. Winter Term. One hour per week. One hour credit.

#### Mr. Long.

15. Mecanics of Exercise.—A course for Fysical Education majors. Men and women. Prerequisit: Fys. Ed. 2. (Junior or Senior College.) Spring Term. Four periods. Four hours credit.

85

Mr. Long.

16. Anthropometry and Fysical Examination.—A course for Fysical Education majors. Signs and symptoms of common fysical defects. Practis in making measurement of the body; discussion of principles as applied to fysical training. Men and women. Second year. Junior or Senior College. Winter Term. Three periods. Three hours credit.

Mr. Long.

17. History of Fysical Education.—The place givn to fysical training in the education of the Greek and Roman, the Olympian, Pythian, and Nemean games; the Roman gladiators; the Medieval Ages; rise of modern fysical training in Sweden and Germany, England and America; the fysical training in modern college, scool, and playground wil be considerd. Lectures, assignd references, reports. Men and women. Junior or Senior College. Fall Term. Two periods. Two hours credit.

Mr. Long.

### Courses for Men.

18. Light Gymnastics.—Free arm drils, wands, dumb bells and Indian clubs. Clas organization and conduct; arrangement of exercises; principles of teaching. Winter and Spring Terms. Two periods. One hour credit. Junior College.

Mr. Long.

19. Elementary Hevy Gymnastics.—Work on the horse, rings, horizontal bar, etc. Progression from simple to complex exercises. Principles of teaching. Winter Term. Three periods. Two hours credit. Junior College.

### Mr. Long.

20. Advanst Hevy Gymnastics.—A continuation of course 17, but more advanst. Spring Term, three periods per week. Two hours credit. Junior or Senior College.

Mr. Long.

21. Playground and Group Games.—A selected list of group and simple team games. Three deep, whip to right, bombardment, spud, prisoners' base, volley ball, and games of a similar nature wil be taken up. Spring Term. Two periods. One hour credit, Junior College.

86

Mr. Long.

22. Team Athletics.—Football, soccer, baseball, playground ball, basketball, and track and field athletics. Practis for skil, and knolege of the fundamental rules of the game ar requirements. Fall, Winter and Spring Terms. Three periods per week. Two hours credit. Junior or Senior College. Mr. Long.

23. Group Teaching and Playground Supervision.—Qualified second year students wil be given groups of first year students to teach the varius games, and practis in the supervision of playground activities. Five periods per week. Three hours credit. Spring Term.

### Mr. Long.

24. Reserch in Fysical Education.—Qualified Senior College and graduate students may elect a subject in reserch in Fysical Education. The folloing subjects ar suggested, but others, depending upon the student's interest and available materials, may be chosen:

(1) The status of Fysical Education in the Scools of Colorado, with proposed plan for improvement.

(2) The Playground and Recreation movement. Its rise, growth and present status.

(3) A Recreational Survey of a selected community, with a suggested plan for improvement.

(4) A Study of the Playground Games of different age periods, sexes and races.

(5) Educational Athletics. Plan for a County or City Scool System.

By arrangement any term. Three or more hours, according to the piece of work accomplisht.

Mr. Long.

### Major Subject-Fysical Education.

Students electing Fysical Education as a major ar expected to complete the following courses in addition to the general college requirements in Education: Biology, Sycolsoils, and the management of soils in crop production. Propaogy, Fysical Education, 1, 2, 3, 4, 5, 6, 7, 8, 11, 12, 13, 14, 15 and 16, with enuf hours in other courses to complete 30 hours. Only students with a vigorus constitution and sound helth ar advised to elect this subject as a major, for without these essential requisits, succes is impossible.

# The Senior College

# GURDON RANSOM MILLER, A.M., Dean.

The Senior College includes the third and fourth years of the work of The State Teachers College.

The Senior College offers to all students and professional teachers, who hav done not les than two years of study beyond the high scool an opportunity for higher professional and scolastic work.

It furnishes special advanst preparation for normal scool, critics and teachers.

It offers superior opportunities for supervisors of all elementary scool work.

Supervisors of special subjects, music, art, manual training, domestic sience and art, agriculture and fysical education, wil find courses adequate to their needs in the Senior College.

High scool teachers wil find here superior professional and scolastic courses adapted to their professional aims.

Principals and superintendents wil find in the program of the Senior College an unusual number of courses, specially intended for mature students of wide professional interests.

Our Teachers Bureau says, "We need more A. B. graduates as candidates for normal scool positions, and for first rate places in the public scool servis."

The Senior College grants the A.B. degree at the successful completion of the fourth year of study.

The Senior College grants the Pd.M. degree at the successful completion of the third year of study.

### EDUCATION.

### THOMAS C. MCCRACKEN, A.M.

The work of this department, altho having to do primarily with fundamental theory underlying the educativ proces, shows also how such theory is of practical value to the teacher. The teacher needs a theoretical background for her work and a broad acquaintance with all fields of educational activity. The purpose of the courses offerd is to meet these needs.

Other courses in education ar listed and described in the Departments of Sycology, Training Scool, Sociology, Biology, and in other departments as courses in methods. The numbers attacht to the varius courses indicate nothing as to order in which they must be taken.

18. Biotics in Education.—Required. The meaning of education; the importance of heredity in education; evolution as a basis for education; functional education; the evolution of truth; life and its evolution; the serial theory of life as groing out of the doctrin of evolution; education in motorization. Three hours. Three terms.

President Snyder.

American Education.—This course wil be introduced 34. by a study of the educational ideals and practises with which the colonists were familiar in the Old Cuntry. A careful study wil be made of typical methods of meeting educational needs in the colonies, of growth in the direction of more complete recognition of the public scool idea, and of the spred of the public scool system westward with the westward expansion of the nation. Attention wil be paid to varius features of our scool system, such as the folloing: the district scool, the high scool, the state university, great denominational and private institutions of lerning, the teachers' institute, the state normal scool, the state superintendency, the county superintendency, the city superintendency, the agricultural college, etc. An attempt wil be made to get a clear comprehension of the dominant conceptions and the present problems of American education thru the study of the men and the movements that ar responsible for their emergence. Two hours. (Not to be given 1915 - 16.)

### Mr. McCracken.

22. Evolution of Secondary Education.—Open to Graduate College students. This course takes up the history of secondary education. Special attention wil be givn to the

study of the American high scool in relation to the life and needs of the American people. The historical study wil prepare the way for the analysis of present conditions, and this wil be used as the basis for the determination of the function and significance of the high scool at the present time, and its responsibility for new adjustments to present social needs. Two hours. T.Th. Spring Term at 9:05.

Mr. McCracken.

Current Social Movements in Education.-Open to 12. mature students of the Junior College and to students of the Graduate College. This course consists of lectures, discussions, readings, and reports, all centering in the thought of education as a faze of the social proces. It wil take up topics such as the following: The scool and society; the scool as a social center; relation of the teacher to the community; the social interpretation of the curriculum, with the significance of the varius subjects of study; the proces of socializing the individual; recent and contemporary sientific and social tendencies, with their bearing on education; problems of child welfare; the rural scool in its relation to rural life; the playground movement; the trend toward vocational education and vocational guidance. Three hours. M.W.F. Spring Term at 10:30.

Mr. McCracken.

16. Theory of High Scool Curriculum.—Open to Graduate College students.

A discussion of educational values and the arrangement of studies to suit the age of the pupil.

An attempt to eliminate waste material and to stres those courses that best prepare for life.

A survey of experiments in the introduction of vocational courses in the curriculum of the secondary scool; this wil lead to a careful study of the varius types of American secondary scools. Three hours. M.W.F. Fall Term at 11:25. (Not to be given 1915-16.)

Mr. Bell.

20. High Scool Administration.—Open to Graduate College students. This course wil deal with the organization, management, and administration of high scools: a critical

90

### GREELEY, COLORADO

examination of typical high scools, emphasizing the function, courses, social needs, equipment, special classes, training and qualification of teachers, and similar matters of administration; and the high scool in its administrativ relation to elementary and higher education. Two hours. T.Th. Winter Term at 11:25. (Not to given 1915-16.)

Mr. Bell.

19. Principles of High Scool Education.—Open to Graduate College students. For students preparing for recommendation as high scool teachers. The course wil be introduced by a brief survey of the sycology of adolescence in its relation to the general problem of interpreting the life of the high scool pupil and the adjustment of teaching method and subject-matter to his stage of development. Attention wil be given to the underlying aims of the high scool as they ar being conceivd by the most progressiv educators. A critical evaluation of the function of the varius subjects taut in the high scool wil be made, and the principles underlying current reconstructions of the curriculum and the content of specific subjects wil be discust. The newer conceptions of the nature and function of the American high scool wil be continually emfasized. Three hours. M.W.F. Spring Term at 11:25.

Mr. Bell.

25. Administration of Rural Scools.—Open to mature Junior College students upon permission of the instructor and to Graduate College students. This is an advanst course in the study of rural education which aims to meet the needs of county superintendents, rural supervisors, and others interested in special problems of cuntry life, both on their social and educational sides. It wil include studies and special reserches in the varius fazes of reconstruction and enrichment of rural education, such as the work of the agricultural high scool, cooperation of the agricultural colleges, of the U. S. Department of Agriculture, other agricultural agencies with the cuntry scools, and forward movements in legislation as they affect the life of the farm and the education of cuntry children. Three hours. M.W.F. Winter Term at 2:25.

Mr. Mooney.

43. Federal Aid to and State Control of Education.— Open to Graduate College students. This course is designd

to bring to the student a knolege of the efforts of the federal government to aid education; also a survey of the scool law of typical states, which wil sho the plan of the state administration of the scool system within its bounds. Two hours. T.Th. Fall Term at 10:30.

# Mr. McCracken.

42. Administrativ and Social Aspects of Education.— Open to mature students of the Junior College upon permission of the instructor and to students of the Graduate College. The plan of this course comprises a brief description of American scools and scool systems with special stres upon the rise of scool supervision; a comparativ study of contemporary study organization and administration with special reference to underlying social and economic problems; a critical examination of typical city and village systems; a survey of the organization, powers, and duties of the Board of Education; also of the qualifications, powers, duties, and opportunities of the superintendent and principal. Two hours. T.Th. Winter Term at 10:30.

Mr. Mooney.

15. Ethics.—Open to students of the Junior College. This course wil treat of the genesis and function of the moral ideal in the history of the race, with special reference to the sientific interpretation of the moral life of today. Attention wil be paid also to the principles underlying the development of the moral consciusnes of the child and the problem of moral training in the public scool. Three hours. M.W.F. Fall Term at 2:25.

# Mr. Yourd.

11. Principles of Education.—For a full description of this course see Education Department, Junior College.

**31.** Religius and Moral Education.—For a full description of this course see Education Department, Junior College.

10. History of Education—In Ancient Times.—For a full description of this course see Education Department, Junior College.

32. History of Education—In Medieval and Renaissance Times.—For a full description of this course, see Education Department, Junior College. **33.** History of Education In Modern Times.—For a full description of this course see Education Department, Junior College.

27. General Education.—For a full description of this course, see Education Department, Junior College.

29. Current Educational Thought.—For a full description of this course see Education Department, Graduate College.

23. Reserch in Education.—For a full description of this course see Education Department, Graduate College.

28. Comparativ Study of Scool Systems.—For a full description of this course see Education Department, Graduate College.

17. Vocational Education.—For a full description of this course see Education Department, Graduate College.

9. Theory and Practis of Teaching.—For a full description of this course see Education Department, Junior College.

44. Social Education.—For a full description of this course see Education Department, Junior College.

### TRAINING DEPARTMENT.

DAVID DOUGLAS HUGH, A.M., Dean

1. Observation in the Training Scool.—For a description see Course 1 of the Junior College section of the Training Department. Mr. Hugh. 2. Elementary Scool Teaching.—For a description see Course 2 of the Junior College section of the Training Department.

Mr. Hugh, Mr. Freeland, and Training Teachers.

3. Elementary Scool Supervision.—For a description see Course 3 of the Junior College section of the Training Department.

Mr. Hugh, Mr. Freeland, and Training Teachers.

5. Primary Methods.—For a description see Course 5 of the Junior College section of the Training Department.

Miss Long.

6. Primary Methods.—For a description see Course 6 of the Junior College section of the Training Department.

Mrs. Sibley.

7. Third and Fourth Grade Methods.—For a description see Course 7 of the Junior College section of the Training Department.

Miss Lawler.

8. Fifth and Sixth Grade Methods.—For a description see Course 8 of the Junior College section of the Training Department.

### Miss Kendel.

9. Grammar Grade Methods.—For a description see Course 9 of the Junior College section of the Training Department.

Miss Green.

10. The Curriculum of the Elementary Scool.—This course wil include the study of the principles underlying the organization of the curriculum of the elementary scool, the time allotments of the different subjects, the selection of the material for the varius scool subjects, such as history, geografy, reading, etc., and also the choice of text-books. The work wil be based on the course of study in the elementary section of the training scool with comparison of the curricula of similar institutions and of the public scools. Experimental work may be done in connection with this course in the elementary scool. Three hours.

Mr. Hugh.

11. The Pedagogy of Riting.—For a description see Course 11 of the Junior College section of the Training Department.

#### Mr. Shultis.

12. Training Scool Seminar.—The purpose of this course is to afford mature students an opportunity to make a thoro study of special problems of interest in connection with the curriculum, methods, or organization of public scool work. An opportunity wil be provided to use the Training Scool in any way practicable in connection with this course as wel as to study the work of public scools. Fall and Winter Terms. Hours to be arranged.

Mr. Hugh.

15. Story-Telling of the Grades.—For a description see Course 15 of the Junior College section of the Training Department.

# Miss Statler.

29. Kindergarten Theory.—Senior College. The filosofy of the kindergarten. A study is made of articles by MacVannel, Thorndyke, Dewey, and others, reports of the I. K. U. and articles in current magazines. Practis is given in teaching classes in theory in the Junior College. T. Five hours.

Miss Julian.

**30.** Kindergarten Conference.—This course wil take up the problems of kindergarten supervision. A critical study wil be made of typical kindergarten programs in different scools. The bearing of modern educational theories upon the kindergarten curriculum wil be considerd. Three hours.

Miss Julian.

31. Literature and Story-Telling in the Kindergarten and Primary Grades.—For a description see Course 31 of the Junior College section of the Training Department.

Miss Julian.

33. Plays and Games for Kindergarten and Primary Children.—For a description see Course 33 of the Junior College section of the Training Department.

Miss Julian.

36. Hand-work in the Kindergarten.—For a description see Course 36 of the Junior College section of the Training Department.

Miss Julian.

# 95

37. Kindergarten Program.—For a description see Course 37 of the Junior College section of the Training Department. Miss Julian.

38. The Play Life of Children as a Basis for Education in the Kindergarten.—The meaning of educational play and its significance in the mental and moral development of the children of the kindergarten and primary grade age ar considerd. The course wil include readings, lectures, observation in the kindergarten, and discussion of methods and materials. Three hours.

Miss Julian.

39. The Relation of the Kindergarten to the Primary Grades.—For description see Course 39 of the Junior College section of the Training Department.

# Miss Julian.

Practis Teaching in the High Scool.---Required of stu-40. dents preparing for recommendation as high scool teachers. Practis teaching in the high scool includes the teaching of a clas one hour a day thruout the year, with full responsibility for the disciplin and management of the room. This teaching wil be under the immediate supervision of the Superintendent of the Training Scool, the Principal of the High Scool, and the Hed of the Department under whose jurisdiction the subject taut falls. Practis teaching is designd not merely to fit the teacher to deal with the problems of teaching the particular clas assignd, but also to make the teacher efficient in all the scool duties which may devolv upon the teacher in actual high scool work. Accordingly, it is made an integral part of the work in this Department for the practis teacher to assume responsibilities for the conduct of morning exercises, assistance in the work of literary societies, direction of literary society and special day programs, and to participate in all other forms of scool life caracteristic of the high scool. Four terms, five hours each.

### Mr. Hugh, Mr. Bell.

41. High Scool Supervision.—Persons who hav shown an unusually high degree of efficiency in high scool teaching may be allowd to assist in the supervision of the high scool work.

This training wil afford them a more comprehensiv view of the work and practis in the supervision of training of younger teachers. This experience is intended primarily for those who ar preparing themselvs for principals and superintendents or to fil other positions of responsibility in public scool work. Hours to be arranged.

Mr. Hugh and Mr. Bell.

42. Principles of Teaching as Applied to the Different High Scool Subjects.—For a description see Course 42, Junior College section of the Training Department.

Mr. Bell.

44. High Scool Practicum.—This course wil consist of the study of a number of practical problems for the high scool teachers. Among these wil be the clasification and causes of crimes and misdemeanors, faults, etc., having to do with high scool government; truancy, its causes and remedies; student government, its history and present valu; play and athletics, valu and best methods of control; high scool incentivs; the high scool as a social center; dental and medical inspection; how to provide for the varying abilities of pupils; electiv versus required studies; retardation and elimination of high scool pupils; home study; etc., etc. Five hours.

Mr. Bell.

NOTE.—For Training Scool majors in the Senior College, see list of majors at the close of the Junior College section of the Training Department.

### SYCOLOGY AND CHILD STUDY

JACOB DANIEL HEILMAN, PH.D.

3. Child Study.—(Extra reading wil be required of the Senior College students.)

4. Clinical Sycology.—(Additional reading required.)

5. Syco-clinical Practis.—Electiv. Students wil assist in determining the mental and fysical condition of the scool child. A term hour wil be granted for two hours of work per week. Fall and Winter Terms.

THE STATE TEACHERS COLLEGE OF COLORADO

Dr. Heilman.

6. Child Hygiene.—(Open to Junior College students who hav had the courses in child study.) Electiv. The purpose of this course is to take up such important fazes of child hygiene as hav not been adequately treated in the other courses in sycology and child study. The hygiene of the eye, ear, nose, and throat is taken up in Sycology 3. In Sycology 4 attention is givn to mental fatig, the hygiene of sex and growth, and the effects of air, food, clothing, and exercise upon the helth of the child. The hygiene of generation receivs adequate treatment in Sycology 5. Among the topics in child hygiene which remain, and which constitute the subject matter of this course, ar malnutrition, faulty postures and disorders of growth, speech defects, and the hygiene of the mouth and nervus system. Two hours. Spring Term.

Dr. Heilman.

# BIOLOGICAL SIENCE

ARTHUR EUGENE BEARDSLEY, M.S.

# Botany.

3. Advanst Botany.—A laboratory and lecture course in advanst botany is offerd, covering a general survey of the plant kingdom, ecology and experimental fysiology. Five hours.

4. Advanst Botany.—A continuation of Course 3. Five hours.

5. Advanst Botany.—A continuation of Courses 3 and 4. Five hours.

7. Bacteriology.—A laboratory and lecture course in practical bacteriology, including the preparation of culture media, the cultivation of bacteria, and the determination of specific forms. Five hours.

8. Bacteriology.—A continuation of Course 7. Five hours.

9. Bacteriology.—A continuation of Courses 7 and 8. Five hours.

### Zoology.

2. Invertebrate Morfology.-The Morfology and the Nat-

ural History of the invertebrates with particular reference to the Protozoans, Porifera and Celenterata. Five hours.

3. Invertebrate Morfology.—Continues Course 2. A study of the Morfology of the Invertebrates and the begining of the study of the Morfology and Natural History of the Vertebrates. Five hours.

4. Vertebrate Morfology.—A course dealing with the cordates. Five hours.

20. General Botany.—A general introduction to Botany, and to the general structure and relationship of plants and their fysiology. Laboratory. Five hours. Fall Term.

21. Plant Fysiology.—Lectures and laboratory work on the fysiology of the common plants, as digestion, growth, reproduction, and reaction of plants to different stimuli, etc. Five hours. Winter Term. Prerequisit, Course 20.

22. Taxonomic Botany.—Collecting and identification of our nativ plants. Five hours. Spring Term. Prerequisit Course 21.

#### HYGIENE.

GEORGE EARL FREELAND, M.S., A.M. ROYCE REED LONG, A.B.

1. Scool Hygiene.-Described under Junior College.

2. Hygiene of Instruction.—Described under Junior College.

3. Public Hygiene and Sanitation.—Described under Junior College.

Mr. Long.

10. Bacteria, etc.-Described under Junior College.

4. Industrial Hygiene.—A course dealing with some of the important facts relating to the dangers to life and helth in varius occupations, including industrial poisoning from led, fosforus, and other metals; the inhalation of noxius gases; the dusty trades; exposure to excessiv temperatures or unusual atmosferic pressures; occupations involving exposure to

communicable disease, etc.; factory inspection, legislation and other measures initiated to prevent accident or disease.

Lectures, Recitations, References and Reports. Tuesdays and Thursdays. Two hours. Spring Term.

Mr. Long.

5. Epidemiology.—A brief account of some of the famous epidemics of history and a study of selected epidemics of typhoid, cholera, smallpox, diftheria, bubonic plague, yellow fever, etc., which throws light on the modes of dissemination together with the preventiv measures employed to control these diseases.

Lectures, recitations, references and reports. Two hours. Fall Term.

Mr. Long.

6. First Aid in Emergencies.—The course wil include the material outlined in the Red Cross text-book on first aid, and references to standard books on minor surgery and bandaging, will be made, together with practis in bandaging.

Lectures, recitations, references, reports, and actual practis. One hour. Winter Term.

Mr. Long.

7. Personal Hygiene.—A course covering the fundamental facts relating to personal helth and efficiency. Foods and feeding habits, clothing, housing and ventilation, baths and bathing, muscular activity, work, rest, and recreation, avoidance of communicable diseas as a helth problem, etc., will form the subject-matter of the course.

Lectures, recitations, reference assignments and reports. Tuesdays and Thursdays. Two hours. Winter Term.

Mr. Long.

8. Child Hygiene.—Senior College. The purpose of this course is to take up such important fazes of Child Hygiene as ar not adequately treated in the other courses in sycology and child study. The hygiene of the eye, ear and nose and throat is considerd in Sycology 3. In Sycology 4 attention is givn to mental fatig, the hygiene of sex and growth, and the effects of air, food, clothing and exercise upon the helth of the child. The hygiene of generation receivs adequate treatment in Sy-

cology 5. Among the topics in Child Hygiene which remain and which wil constitute the subject-matter for this course ar malnutrition, faulty postures, and disorders of growth, speech defects, and the hygiene of the mouth and of the nervus system. Two hours. Spring Term.

Dr. Heilman.

# FYSICAL SIENCE.

# FRANCIS LOBENZO ABBOTT, B.S., A.M. Senior College (Open to Junior College)

4. Advanst Fysics. Radio Activity.—To hav a clear conception of Radio-Activity one must clearly understand the mature of Kathode rays. We ar equipt to illustrate fully the nature of Kathode and X-rays. This is followed by discussion of the Radio-Activ substances and the disintegration products of Radium and Radium Emanations. The X-rays and the Canal Rays are closely asociated with the Kathode rays, and must be studied. Five hours.

5. Historical Fysics.—We believ the student wil have a better appreciation of the sience if he knows something of the lives of the great men of sience and a history of some of the epoch-making experiments. This term's work is devized for the study of the biografies of some of the great sientists, the history of some of the clasical experiments, and the reading of sientific articles found in the varius magazines and periodicals. Five hours. Winter Term.

6. Methods in Teaching Fysics.—It is generally conceded by sience teachers of the secondary scools that Fysics, as now taut, does not accomplish for the student what we believ it should, and that it needs much revision in the method of teaching. In order to sho what is necessary for better presentation of the subject it is treated under two heds: (1) a study of the history of the teaching of Fysics, (2) a detaild course presenting a method which we believ wil make the subject of Fysics more interesting and make the subject of greater value to the student. Five hours. Spring Term.

Students who take Fysics as a major for the A.B. degree ar required to take or hav credit for at least one year of Chemistry, and at least Plane Trigonometry. 8. Radio-Grafic Fysics.—The subject of Radio-telegrafy has become such an important factor in the busines of the world that it is now necessary that teachers of sience giv the subject their consideration.

In giving this course, we keep in mind the special requirements needed by teachers who desire to install a wireles station in their own scools. Students electing this course ar given an opportunity of lerning the wireles code. The Department is equipt with a complete 1 K. W. Hightone Clapp-Eastman transmitting set; also a complete receiving set, together with a wave meter and standard condenser. We can easily communicate with any station in Colorado and can read radiograms sent out from Key West, New Orleans, San Francisco, and Arlington.

Some of the subjects included in this course ar as follows:

Capacity and Inductiv Effects. Oscillary Discharges. Cupling of Circuits. Aerials, Kind and Instalation of Detectors. Dampt and Undampt Waves. Mesurements in Radio-Telegrafy.

Five hours.

4. Chemistry of Foods.-Five hours.

GEOLOGY AND GEOGRAFY. GEORGE A. BARKER, M.S.

13. Mathematical Geografy.—A recitation course designd to bring out the main facts of mathematical geografy. Johnson's Mathematical Geography wil be used as a text book. Three hours.

14. Museum Work in Geografy.—Largely laboratory work and the mecanics of collecting and preparing for display of museum products. Two hours.

1. Historical Geology.—A course based on a knolege of fysical geografy and some knolege of biology. Three hours.

2. A graduate course open to senior college students. Conference.

102

## GREELEY, COLORADO

## MATHEMATICS. George William Finley, B.S.

1. College Algebra.—(See Junior College).

2. College Algebra.—(See Junior College).

3. Trigonometry.--(See Junior College).

4. Analytic Geometry.—(See Junior College).

8. Methods in Arithmetic.—(See Junior College).

5. Differential and Integral Calculus.—This course givs an introduction to the powerful subject of the Calculus. While care is taken to see that the formal side of the subject is thoroly mastered, the course is strengthend by many problems brought in from geometry, fysics, and mecanics. Fall Term.

6. Differential and Integral Calculus.—A continuation of Course 5. Winter Term.

7. Differential and Integral Calculus.—A continuation of Course 6. Spring Term.

9. The Teaching of Secondary Mathematics.—It is the plan to take up in this course a study of the more recent problems that hav arisen with regard to the teaching of secondary mathematics. Problem material, order of topics in each subject, the order of the subjects in the course, the simultaneus teaching of algebra and geometry, the laboratory method: these and similar topics of interest to the teacher of high scool mathematics ar discust at length.

11. Descriptiv Geometry.—This course is pland especially for those interested in mecanical and arcitectural drawing. It takes up the problems arising from the study of the projections of points, lines, planes and solids.

#### Major Subject Mathematics.

Senior College Requirements in addition to the above: Calculus, Course 5, Five hours. Calculus, Course 6, Five hours. Calculus, Course 7, Five hours.

Other courses to complete the requirements to be arranged for by consultation with the hed of the department.

#### SOCIOLOGY AND ECONOMICS.

GURDON RANSOM MILLER, PH.B., A.M.

This department makes special effort to meet the needs of Senior College students in all fazes of sociologic and economic study.

Senior College students wishing to specialize in this field of scolarship should consult the hed of the department regarding special courses, seminar work, and the relation of our courses to those of the other departments.

4. Social Theory.—A history of Sociological theory; a comparativ study of modern social theory, and application of the same in pedagogical practis. Two hours. Fall Term.

5. Applied Sociology.—A study of modern social organization; purposiv social work; social correstivs; the scool as an organization for social betterment; and thus for self-betterment. Two hours, Winter Term.

6. Social Adjustment.—Effect of modern economic changes on society and the scool; adjustment of the scool to the new conditions; industrial education and its effect on general social adjustment. Two hours. Spring Term. (r)

m

7. Social Economics.—Treats of organized industry and production; social and economic values; exchange and banking; economic panics; protection and free trade. Three hours. Fall Term.

8. Social Economics.—Distribution of welth; theory of interest and rent; wages and social stratification; population and social inequality. Three hours. Winter Term.

9. Social Economics.—Labor problems and economic organization; labor unions and legislation; workingmen's insurance; corporations and public ownership; socialism; taxation. Three hours. Spring Term.

17. Women and Social Evolution .--- A study of the woman

#### GREELEY, COLORADO

movement; its history; its economic and sycologic significance; its possible effects on social progres; its relation to education, and its specific relation to the education of women. Four hours. Spring Term.

## HISTORY AND POLITICAL SIENCE.

#### EDWIN B. SMITH, B.S.

These courses ar open to members of the Junior College who hav, as a result of previus experience or study, ability to take advanst courses.

4. Western American History.—The westward movement as an historical proces; the migration from the Atlantic coast into the Mississippi Valley; the Trans-Mississippi West; the history of Colorado as a typical section. Special emphasis wil be placed on the social and economic conditions. Three hours. Spring Term.

5. History of France.—A survey of the condition of the people previus to the revolution; the French Revolution; the era of Napoleon; the restoration; the reign of Louis Phillippe; the second republic and the second empire; Napoleon III. and the Franco-German war; the third republic; the conditions of the people and their problems today. This course, with the history of France as a center, will include some of the cuntries, such as Italy, that are very closely associated. Five hours. Fall Term.

3399

X

6. History of Germany.—A brief study of the erly people; the conditions previus to the Reformation; the development of the people after the German Empire; condition of the people at present; German institutions; the European war. The emfasis of the course wil be upon the Germany of today and conditions in Europe traceable to that cuntry. Five hours. Winter Term.

7. History of England.—This course presupposes a general knolege of English history such as is usually givn in high scools. An intensiv study of social and economic life of the English people from the Norman Conquest to the present

time; special emfasis upon the development of language, literature, customs, and institutions that hav found a permanent place in our American life. Five hours. Spring Term.

10. History of Industry.—A survey of the development of industry to the Industrial Revolution; the industrial history of Great Britain since the Revolution; industry in the United States during the several stages of its development; the effect of industry upon our national development; present industrial problems, including the labor movement and industrial combinations. Five hours. Winter Term.

11. History of Commerce.—A survey of commerce from its beginning; colonial commerce and its consequences to European nations; commerce in the several periods of American development; the present policy of the United States; international complications and international law applying. Five hours. Spring Term.

13. The Teaching of History.—(Sceduled under Junior College).

## MODERN FOREN LANGUAGES.

#### Spanish.

Intermediate Spanish.—Courses 4, 5, 6.

4. Intermediate Spanish.—Three hours. Fall Term.

5. Intermediate Spanish .--- Three hours. Spring Term.

6. Intermediate Spanish .- Three hours. Spring Term.

#### Italian.

Prerequisite. At least one other foren language for a year.

1, 2, 3. Elementary Italian.—Courses wil be givn when ever there is a sufficient demand. Each course carries five hours credit.

#### LITERATURE AND ENGLISH.

## ETHAN ALLEN CROSS, PH.M.

## **Courses in Composition.**

2. Intermediate Composition.—Senior College or Junior College. A practis course in riting somewhat more advanst than the composition work in English 1. Three hours. Winter Term.

3. Advanst Composition.—Senior College. Students ar not admitted to this course until they have shown some skil in riting. The work of the course is chiefly in the narrativ form. Students who wish to try story riting under the direction of an instructor wil find an opportunity in this clas. Three hours. Spring Term.

#### Courses in Methods.

4. Oral Literature and Composition for the Lower Grades. —Junior College, but open to all Senior College students who expect to giv special attention to grade work. This course is advantageusly folloed by Course 4 in Reading, or Training Scool 15, which wil use much of the same material for practis in the actual telling of the story. Three hours. Fall Term.

5. Literature and Composition for the Upper Grades.— Junior College and Senior College. This course considers literary material for the upper grades, with some attention to the appropriate material and the principles of work in composition. Three hours. Winter Term.

6. The Teaching of English in the High Scool.—Graduate College, but open to Senior College students majoring in English. Three hours. Spring Term.

#### Courses in Literature.

7. An Introduction to the Epic.—Junior College. Five hours. Fall Term.

8. The History of English Literature to 1660.—Five hours. Tu., W., Th., F. Fall Term.

9. The History of English Literature, 1660-1900.—Five hours. Tu., W., Th., F. Winter Term.

10. American Literature.—Five hours. Tu., W., Th., F. Spring Term.

11. Lyric Poetry.—A preliminary study of the tecnic of poetry, an examination of a number of typical poems to determine form and theme, and finally the application of the knolege of tecnic in the reading of English lyric poetry from the cavalier poets thru Dryden and Burns to Wordsworth. Five hours. Fall Term.

12. Nineteenth Century Poetry.—A study of English Poetry from Wordsworth to Tennyson, including Coleridge, Byron, Shelley, Keats, and the lesser writers from 1798 to 1832. Five hours. Winter Term. (Not givn til 1916-1917).

13. Victorian Poetry.—Tennyson and Browning and the general choir of English poets from 1832 to 1900. Five hours. Spring Term. (Not givn til 1916-1917).

14. Nineteenth Century Prose.—Graduate College. Five hours. Fall Term.

15. Modern Plays.—Reading and clas discussion of from twelve to twenty plays that best represent the caracteristic thought-currents and the dramatic structure of our time. Five hours. Winter Term.

16. The Novel.—The development, tecnic, and significance of the novel. Five hours. Spring Term.

17. The Short Story.—A study of the construction and the meaning of the short story as a form of literary art, including a reading of a number of representativ stories of today. Five hours, Fall Term. 18. The Essay.—A study of the familiar essay for the purpose of determining the nature and form of this delightful faze of literary composition. The method in this course is similar to that pursued in the short-story course; namely, a reading of a number of typical essays as laboratory material "or a study of technic and theme. Five hours. Spring Term.

19. Shakespeare's Plays. — The Comedies. — A careful reading of the comedies of Shakespeare. The purpose of the three courses, 19, 20, and 21, is to familiarize students who expect to become teachers of English with all of Shakespeare. Five hours. Winter Term. (Not givn til 1916-1917).

20. Shakespeare's Plays. — The Chronicle Plays. — This course is a continuation of Course 19. Five hours. Winter Term.

21. Shakespeare's Plays.—The Tragedies.—This course completes the series begun with 19. Five hours. Spring Term. (Not givn til 1916-1917).

22. Elizabethan Drama Exclusiv of Shakespeare. — A knoledge of the dramatic literature of the erly-seventeenth century is incomplete without an acquaintance with the contemporaries and successors of Shakespeare from about 1585 to the closing of the theaters in 1642. The chief of these dramatists with one or more of the typical plays of each ar studied in this course. Five hours. Spring Term.

# The Requirements for a Major in English in the Senior College.

Students erning a major notation in English in the Senior College must complete forty hours in the department for the notation on the third year diploma, or sixty hours for the fourth year diploma and the degree of Bachelor of Arts in Education. At least one-half of the work in either case must be done in Senior College courses. This work must include Courses 1, 2, or 3; 4, 5, or 6; 8, 9, and 10, if these have not already been taken in the Junior College. The remaining courses to make up the total amount ar electiv.

Combination Majors.—If combinations for a major notation ar made, the amount of work in literature and English must be not les than thirty hours for the third year diploma and forty for the degree of Bachelor of Arts.

110

## GREELEY, COLORADO

## READING AND INTERPRETATION.

#### FRANCES TOBEY, B.S.

8. Art Criteria.—The laws of art in oratory. Five hours. Fall Term.

9. Literary Interpretation.—The lyric, the ballad, the dramatic monolog, dramatic narrativ, the oration, the drama. Five hours. Winter Term.

10. Oral Expression in the High Scool.—High Scool Methods. Three hours. Spring Term.

1. The Evolution of Expression.—Junior College. Open to Senior College students.

2. Reading in the Grades.—Junior College. Open to Senior College students.

3. Voice Culture.—Junior College. Open to Senior College students.

4. Story Telling.—Junior College. Open to Senior College students.

5. Dramatic Interpretation.—Junior College. Open to Senior College students.

6. Dramatic Interpretation.—Junior College. Open to Senior College students.

7. Pontomime.—Junior College. Open to enior College students.

11. Esthetic Dancing.—Junior College. Open to Senior College students.

12. Classical Dancing.—Junior College. Open to Senior College students.

15. The Festival.—Junior College. Open to Senior College students.

16. Interpretativ Dancing. — Junior College. Open to Senior College students.

Major Subject-Reading and Literary Interpretation.

Senior College requirements: Courses 8, 9, 10, and 15. Sixteen hours. High Scool education. Five hours. Other courses as determind in conference with hed of department.

## MUSIC.

JOHN CLARK KENDEL, A.B., Director.

1. A Course for Beginners.—(Open to Junior College).

2. Methods of the First Eight Grades.—(Open to Junior College).

3. Kindergarten and Primary Music.—(Open to Junior College).

5. Supervisors' Course.—(Open to second year Junior College).

6. Corus Singing.—(Open to Junior College).

7. History of Music.--(Open to Junior College).

8. a, b, c.-Harmony.-(Open to Junior College).

9. Advanst Harmony and Counterpoint.—(Open to Junior College).

10. Methods in Appreciation.-(Open to Junior College).

12. Individual Vocal Lessons.-(Open to Junior College).

13. Individual Piano Lessons.—(Open to Junior College).

14. Individual Violin Lessons.—(Open to Junior College).

15. Scool Entertainments.--(Open to Junior College).

16. Individual Bras or Reed Instrument Lessons.—(Open to Junior College).

17. Modern Composers.--(Open to Junior College).

18. Composition and Analysis.—Primary forms, including the minuet, scherzo, march, etc. Simple and elaborate accomplishments. Analysis of compositions of primary forms principally from Mendelssohn and Beethoven.

19. Interpretations and Study of Standard Operas. — Operas of the Classical and Modern scools ar studied, thru the use of the talking machine, and their structure and music made familiar to the clas.

20. Interpretation and Study of the Standard Oratorios and Symphonies.—The Standard Oratorios ar studied. The best known solos and coruses ar presented by members of the

#### GREELEY, COLORADO

clas or by the talking machine, and the content of the work is studied with the hope of catching the spirit of the composer. The Symphonies of Haydn, Mozart, Beethoven, Schubert, Schumann, and other riters of the classical and modern scools ar presented to the clas.

21. Reserch.—A comparativ study of the work done in the Public Scools in cities of different classes. A similar study of the work done in the Normal Scools and Teachers' Colleges of the varius states.

## PRACTICAL ARTS.

#### SAMUEL MILO HADDEN, A.M., Dean.

#### Industrial Art.

JOHN T. MCCUNNIFF, PD.M., A.B., Printing, Mecanical Drawing.

CHARLES M. FOULK, PD.M., Woodwork.

MAX SHENCK, Bookbinding.

4. Pre-Vocational Education.—The course is divided into two definit sections. First, The fundamental basis for prevocational work, the movement from the standpoint of special governmental and state scools, rural scools, state movements, including vocational clubs in relation to community interests, with a type program for the furthering of the movement from state and community standpoints. Second, the course of study and special methods of pre-vocational work in city scool systems. The best courses in the different American and European cities wil be considerd with a summary of what may constitute a typical pre-vocational course for a Western city, as based upon the demands and needs for such work. 3 hours.

5. Methods in Practical Arts Subjects.—For a full description of this course see Industrial Art Department, Junior College. 4 hours.

7. Industrial Art in Secondary and Trade Scools.—For a full description of the course see Industrial Art Department. Junior College.

15. Project Design.—For a full description of this course see Industrial Art Department, Junior College.

24. Material Study.—For a full description of this course see Industrial Art Department, Junior College.

Courses 1, 2, 3, 6, 19, 21, 22, deal with woodworking. For a full description see Industrial Art Department, Junior College.

17. Vocational Education.—For a full description of this course see Department of Education. 3 hours.

14. Care and Management.—This course is designd to furnish the student a thoro knolege of the care of both hand and power equipment, such as the filing and grinding of tools, and the changing and adjustment of power tools to do the different kinds of work which they ar intended to do. The arrangement of the woodworking room, its care and management wil be delt with from the standpoint of efficiency and neatnes. 2 hours.

10. Elementary Mecanical Drawing.—For a full description of the course, see Industrial Art Department, Junior College.

11. Advanst Mecanical Drawing.—This course includes intersections, the cycloid, hypercycloid, and involute curves; their application to spur and bevelgear drawing; developments, advanst projections, lettering, and line shading. 5 hours.

Prerequisit. Course 10.

12. Elementary Arcitectural Drawing.—For a full description of the course see Industrial Art Department, Junior College.

13. Advanst Arcitectural Drawing.—This course is a continuation of Course 12, and deals with the drawing of plans for cement, brick, and stone structures, culminating in a complete set of plans and specifications for a residence or a public building of moderate cost. 5 hours.

Prerequisit: Courses 10 and 12.

17. Elementary Machine Design.—For a full description of the course see Industrial Art Department, Junior College.

114

18. Advanst Machine Design.—A study is made of the transmission of motion by belt and pulley, and gears and cams. Such curves as the involute, cycloid, and epicycloid ar applied in the designing of gears. Sketches, detail, and assembly drawings ar made of intricate pieces of machinery, such as the globe valv, vise, hed stock lathe, and such shop machinery as lathes, band saws, motors, and gas and steam engines. 5 hours. On demand.

23. Constructiv Detail Drawing.—The purpose of this course is to prepare the student to draw in detail the different parts of a bilding or articles to be constructed of wood, stone, iron, brick, or other materials. The subject of proportion, dimension, and strength and the method of preparing and assembling wil be delt with in connection with the making of the detail drawing. The terminology in connection with this course wil be givn full consideration. 5 hours.

20. Pattern Making.—The topics discust in this course wil consist of the folloing: Woods best suited for varius kinds of work, glu, varnish, shellac, dowels, draft, shrinkage and finish. The practical work wil consist of both hollo castings, bilding up, and segment work. 5 hours. On demand.

22. Bilding Construction.—The purpose of this course is to giv the student a knolege of the different parts of a bilding and the best methods of fitting and assembling these parts. The work in this course wil be executed on a reduced scale but in a manner that wil convey the full purpose. The use of the steel square wil be fully demonstrated in finding of lengths and cuts, and also all of its uses brought out. Practical problems wil be workt out by the use of the square and compas. 5 hours. Spring Term.

3. Elementary Art Metal.—For a full description of the course see Industrial Art Department, Junior College.

9. Advanst Art Metal.—This course should be taken after Course 8, since it deals with more advanst ideas in metal work, and includes work in bras, copper, bronze, and German silver. This course deals largely with the designing, decorating, and artistic coloring of metals. It also includes a short course in the chemistry of metal colors, and the use of lacers for protection. Simple artistic jewelry is made the basis for the constructiv work in this course. 5 hours. Spring Term.

1. Elementary Printing.—For a full description of this course, see Junior College Section. Open to Senior College students. 5 hours.

2. Intermediate Printing.—For a full description of this course see Junior College section. Open to Senior College students. 5 hours.

3. Advanst Printing.—For a full description of this course see Junior College section. Open to Senior College students. 5 hours.

1. Elementary Bookbinding.—For a full description of this course see Junior College section. Open to Senior College students. 5 hours.

2. Intermediate Bookbinding.—For a full description of this course see Junior College section. Open to Senior College students. 5 hours.

3. Advanst Bookbinding.—Theoretical study of bookbinding, together with practical work—a combination of Course 2. 5 hours.

Major Subjects-Teaching Industrial Art in Secondary Scools.

Senior College requirement: Courses 7, 13, 16, 19, 24. The remaining courses necessary to satisfy the requirement of forty to sixty hours ar to be selected upon consultation with the Dean of Practical Arts.

#### Combination Majors.

This department, upon consultation, wil arrange other combination majors within the department; also upon consultation with other departments concernd wil arrange combination majors, making such combinations as Industrial Arts and Fysics.

## GREELEY, COLORADO

## Fine and Applied Arts.

WALTER F. ISAACS, B.S. AGNES HOLMES, PD.M.

12. Antique.—Charcoal drawing from antique casts in outline and in light and shade. An intensiv course requiring accurate drawing and close study of values. 5 hours.

13. Commercial Design.—Design considerd in its relation to advertising art. Posters, cover designs, and varius advertising problems ar executed by the student. Lectures on the appreciation of newspaper, magazine, and book illustration. Drawing for reproduction. A course with direct bearing on life and industry, and essential in every course of study. 5 hours.

14. Drawing from Life.—Study from the costumed model. The student is allowd to choose the medium to be used. Offerd for classes of six or more students. 5 hours.

15. Methods in Art Supervision.—The supervision of art education in city systems; the planning of a course of study; methods of teaching; discussions on the modern tendency in art education; rural scool problems. 5 hours.

17. Color Composition.—Department of Fine and Applied Arts. For detaild description see Graduate College.

16. Laboratory Drawing.—The theory and practis of diagrammic drawing; laboratory problems involving the use of the microscope; perspectiv; discussions on the viewpoint of the sientist as contrasted with that of the artist. 2 hours.

18. Oil Painting.—For a full description of this course see Fine and Applied Arts, Graduate College. 5 hours.

All of the courses outlined in the Junior Colege, may be taken for Senior College credit if a standard of work sufficient to justify such credit is maintaind.

## Requirements for a Major in Fine and Applied Arts.

In the Senior College, Courses 12, 13, 14, and 15, ar required for major work. Other courses may be substituted for Course 14, with the consent of the Director of the department.

## Home Economics.

IDA MARSHALL, B.S. MERLE KISSICK, PH.B.

The Senior College courses in Home Economics ar pland to meet the needs of those students who have completed a twoyear college course in Home Economics and ar preparing themselvs for teachers of high scool and college work. Since the aim in all of our work is finally to reach the home thru our teachers who go out from us, it seems unnecessary to add that courses in both the Junior and Senior college wil also meet the neds of the housewife.

Opportunity to major in either Domestic Sience or Household Art is given in the Senior College as in the Junior. For those majoring in Domestic Sience the folloing courses ar offerd:

Third Year.

Food Products (D. S. 9)	5	hours
Dietetics (D. S. 10)	5	hours
Household Management (D. S. 11)	5	hours
Elementary Dressmaking (H. A. 4)	5	hours
Food Chemistry	5	hours

#### Fourth Year.

Experimental Cooking (D. S. 12)	5	hours
Experimental Cooking (D. S. 13)	5	hours
Household Economics (D. S. 14)	5	hours
Elementary Textils (H. A. 6)	5	hours

Note.—Under some circumstances Senior College students may be given Senior College credit for second year work in Domestic Sience, provided they do extra work to satisfy the requirements.

9. Food Production.—This course is a study of food materials, their growth, the conditions under which they ar matured and marketed, problems which relate to their storage and transportation, their adulteration and food laws. 5 hours. Fall Term. 10. Dietetics.—A course in the fundamental principles of dietetics and preparation of practical dietaries, special emphasis being laid upon diet in disease. Prerequisit: General and Food Chemistry; D. S. 1 and 2. 5 hours.

11. Household Management.—A thoro study is made here of the place of the home and home maker in the economic world. The effect of the present economic position upon the home and society. Responsibilities of the housewife for conditions of public hygiene. Organization and management of the household. Division of the income. Household accounts. Domestic Servic Problem. 5 hours. Winter Term.

12. Experimental Cookery.—An experimental study of the varius food products and the changes produced by cooking. Qualitativ and quantitativ study of recipes. Effects produced by varius cooking appliances. 5 hours.

13. A continuation of Course 12.-5 hours.

14. Home Economics Education.—A history of the Home Economics Movement; study of different types of scools; purposes of work in the scools and the value of it. Content of Home Economics and its relation to other subjects of the curriculum. Study of equipment, courses of study, and methods of conducting classes in high scools and colleges. 5 hours. Spring Term.

## Household Art.

The work in Household Art in the Senior College wil be as outlind:

Household A	rt	11				•									5	hours
Seminar		20	• • •	•	•							•			<b>5</b>	hours
Household A	<b>I</b> rt	12	• •			•									5	hours
Household A	Art	10											•		5	hours
Household A	Art	15							•						5	hours
Household A	rt.	14		•			•	•							5	hours

9. Household Decoration.—As a basis for this work in Household Decoration the new movements in sanitary sience ar briefly considerd as to their applicable points. The principles of color, form, line, and textil harmony; types of houses

in exterior; arrangement and decoration of rooms in relation to the house, and the individual rooms; period types of furniture and the esthetic relation of the furnishings of the house ar considerd. Fall Term.

10. Costume.—A survey of ancient costumes to the modern time from an historical and evolutionary standpoint is given, including discussions of Egyptian, Grecian, Oriental, Roman, French, and English costumes. The principles of dres design, color, harmony, and lines ar applied to the study of costumes. Senior College. 5 hours.

11. Advanst Textils.—Fibers ar identified by means of the microscope; fibers and fabrics treated chemically for: identification tests, examination of content and adulteration, and strength; fabrics tested for laundering qualities and dyeing qualifications. Prerequisite: Textils. 5 hours. Spring Term.

12. Economics of Textil Industries.—A study of the trade conditions and living conditions, particularly of the women and children working in the textil industries, wil be considerd. Special problems of individual interest wil be assignd for further investigation. Senior College. 5 hours.

14. Advanst Dressmaking.—Practis is givn in this course for practical application of principles of art and design and construction in work on afternoon and evening gowns. Lighter materials ar used, such as chiffon and silk, giving detail in the handling of such textils. 5 hours.

15. Drafting.—Drafting systems capable of being used for scools and colleges wil be considerd. Actual practis wil be given to this need, that the student may become free with the use of patterns. Senior College. 5 hours.

20. Seminar.—Special problems in the department adopting the line of interest of the individual student wil be assignd for reserch work. Meetings with instructors by arrangement wil be held for reports and discussions. Every Term. 5 hours.

Note.—It will be possible for students in this college to elect several Junior College courses and by arrangement with instructors for special work receive Senior College credit.

#### Agriculture.

#### C. H. WITHINGTON, M.S., A.M.

16. Economic Entomology.—Primarily for students of agriculture. Discussion of the life histories, habits, injuries and methods of controlling the more important insect pests; the economic value of beneficial insects; and the preparation and use of insecticides and apparatus for the control of insects. Lectures, demonstrations, laboratory and field work. Prerequisit: General Entomology. 5 hours. Spring Term.

9. Landscape Gardening.—This course is a study of the ideals of landscape work, and the means adopted to secure the best results in lawns, parks, public grounds, etc. Prerequisit: Plant Propogation. 2 hours. Spring Term.

15. General Entomology.—For a full description of this course see Agricultural Department, Junior College.

17. Entomology Seminar.—For a full description of this course se Agricultural Department, Graduate College.

10. Agricultural Seminar.—For a full desription of this course see Agricultural Department, Graduate College.

#### COMMERCIAL ARTS.

LULU A. HEILMAN, A.B. FRANK W. SHULTIS, A.M.

Students of the Senior Colege who hav ernd a major during their Junior College work, either in Shorthand or Accounting, may continue their senior work in the same department, or they may ern another major in the other department. In either case, thirty additional hours ar required.

#### Courses.

Courses 1, 2, 3, 4, 5, 6, 11, 12, 13, 14, 15, 16, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 40, 41, 42, are open to the students of the Senior College.

17. Offis Training.—Instruction covering such features of the work as the offis clerk and secretary must hav a working knolege of: Handling mail, banking, filing, form and followup letters, offis appliances, busines ethics and deportment, billing, use of the telephone. Advanst speed dril in typeriting. One recitation period and one practis period required daily. No outside preparation. 5 hours.

**31.** Auditing.—Purpose of an audit; qualifications of an auditor; details to examine; errors; frauds; losses; gains; assets; liabilities, balance sheet. 5 hours.

**32.** Cost Accounting.—Importance of cost accounting in a busines. Material cost, labor cost; overhed expense; distribution of expense; preparation of a set of books on manufacturing costs. 5 hours.

33. Public Finance.—Accounting methods used in municipal affairs; accounting in public institutions; scool finance. 5 hours.

**34.** Advanst Banking.—Organization of a bank; the different kinds of banks; trust companies; governmental regulations; federal reserv bank. Set of books.

35. Busines Organization and Management.—Organization of busines enterprises; organization of trusts; mergers; busines efficiency; current legislation affecting busines organization. 5 hours.

**36.** History of Commercial Education.—There wil be a review of the whole field of comercial education; the principles of its growth, and problems affecting its interests wil be studied in the current magazine articles. 5 hours.

#### PHYSICAL EDUCATION.

ROYCE REED LONG, A.B.

24. Reserch in Fysical Education.—Qualified Senior College or graduate students may elect some subject for reserch in Fysical Education. The folloing subjects ar suggested, but others, depending upon the student's interest, and available materials for study, may be chosen.

(1) The status of Fysical Education in the scools of Colorado, with a proposed plan for improvement.

(2) The playground and recreation movement; rise, growth, and present status.

122

(3) Recreational survey of a selected community with suggested plan for improvement.

(4) A study of the playground games of different age periods, sexes, races.

(5) Educational athletics. Plan for a selected county or city scool system.

Any term, by arrangement. 3 or more hours, according to the piece of work accomplished.

Mr. Long.

## The Graduate College

## THOMAS C. MCCRACKEN, A.M., DEAN.

The Graduate College offers advanst instruction leading to the degree of Master of Arts in Education. The principal aim of graduate study is the development of the power of independent work and the promotion of the spirit of reserch. Every department of the College is willing to offer not only the courses regularly sceduled but others of reserch nature which the candidate wishes to pursue. Each candidate for a degree is expected to hav a wide knolege of his subject and of related fields of work.

Persons holding the degrees of Bachelor of Arts, Letters, Filosophy, or Sience from a reputable institution authorized by law to confer these degrees, or holding any other degree or certificate which can be accepted as an equivalent may be admitted as graduate students in the Colorado State Teachers College upon presenting official credentials.

The prospectiv student shal fil out the blank of "Application for Admission" and hand it to the Dean of the Graduate College for his approval. Such blanks may be secured by addressing The State Teachers College, Greeley, Colorado.

# General Plan of Work For the Degree of Master of Arts in Education.

#### General Requirements.

General plan of work for the degree of Master of Arts in Education. General requirements.

1. Residence.—One year of work in residence at the College in advance of the requirements for the A.B. degree. This is three terms of work beyond a four year college course. It is preferable that the Master's work be done in three consecutiv terms. Students may, however, satisfy the residence requirement by attendance for three summer terms under the conditions specified belo.

2. Units of Work.—A year's work shal be interpreted as sixty (60) term-hours. Forty-eight hours credit wil be given for graduate courses pursued and twelve (12) hours credit for the Master's thesis which is required. Twenty (20) hours credit per term during the regular scool year is the maximum, inclusiv of the reserch involvd in the thesis requirement.

3. Special Interpretation of Graduate Work in Summer Term .--- Graduate students shal receiv for each graduate course pursued in the Summer Term a credit of three (3) hours, twelv (12) hours being the maximum credit per summer term, inclusiv of reserch work in connection with the thesis. In the three Summer Terms of residence work the student may ern thirty-six (36) hours credit; the remaining twenty-four (24) hours may be ernd in non-residence in the intervals between Summer Terms. This organization of the work for students who cannot attend for one year of three consecutiv terms is regarded as preferable to the distribution of the work thru four or five summer terms. In fact, the extension of the work thru a longer period than that of three years is regarded as highly undesirable, on account of the lack of continuity and intensivnes in the caracter of the work done. If the work is not completed within three years, new conditions may be imposed upon the candidates or the old conditions may be modified.

## 4. The Nature of Graduate Work.

(1) It shal be in professional lines of work.

In keeping with our function as a Teachers College, graduate work shal be confined to professional lines of work.

(2) It shal represent specialization and intensiv work.

As soon after enrollment as possible, the graduate student shal focus attention upon some specific problem which shal serv as the center for the organization of his year's work, including courses to be taken and special investigations to be conducted. No graduate credit wil be given for scatterd and unrelated courses.

(3) Provision for reserch work in any department.

The graduate student is permitted to choose his thesis subject and to carry on his special reserch in any department, insofar as the department in question offers facilities for theoretic and professional work relativ to the problems of teaching and of education. When this department has been drawn upon for all the available advanst courses relevant to the problem in hand, the work of the student wil be reinforst by the selection of approvd courses from the departments of Education, Sycology, Training Scool, Sociology, and others offering advanst courses which can be correlated with the line of special work which the student is pursuing.

(4) Thesis.

Reserch work culminating in the riting of a thesis upon some vital problem of education shal be an integral part of the work for the Master's degree. The problem of the thesis should form the correlating center of all the courses pursued.

The thesis, as a rule, should giv the origin, growth, and development of the problem. It should contain a resume of all the sifnificant contributions that hav been made toward its solution, and it should bring the status of the problem up to date. It should hav that degree of detail and completenes which wil make it authoritativ for another who wishes to kno the history and present status of the problem in question. It is not essential to the Master's thesis that an original contribution be made, but in many cases this is both desirable and possible. In this matter much will depend on the nature of the problem.

(5) Bredth and range of professional outlook.

In addition to the intensiv and specialized work which is required of candidates for the Master's degree, they ar expected to show familiarity with the fundamentals of professional work over a wide range. The examiners wil feel free to test candidates in this respect even if they hav pursued no courses with the intent of covering the whole field. To indicate rufly what is ment by this requirement, the field in question is that suggested by the folloing list of books or their equivalent. Candidates for the Master's degree should supplement their special work by reading along these lines. The list of readings is only suggestiv and is more or les in the nature of a minimum in the matter of fundamentals. Biological-

(6) Final examination upon the whole course.

There wil be a final examination, oral or ritten, upon the whole course. An oral examination of two hours' duration is customary. This examination wil cover the folloing ground: (a) The field of the thesis and special reserch, including topics closely related thereto; (b) the field covered by the special courses taken by the candidate; (c) the general field of sycology and education in the matters of fundamental knolege and of common interest, as suggested in (5) above.

#### **General Information.**

1. All graduate students must register with the Dean of the Graduate College. All courses taken, both resident and non-resident, must be approved by him in advance.

2. No graduate student may enroll for more than twenty (20) hours of work in any regular term, nor for more than four courses, of a total credit value of twelve (12) hours in the Summer Term. This regulation is essential to the maintenance of the standard of intensiv work for the Master's de-

#### GREELEY, COLORADO

gree. In determining the maximum amount of work permitted, reserch upon the thesis topic must be included within the limit stated. To this end, the student doing reserch work upon his thesis topic must enroll for the same.

3. All work allowd as resident work toward the M.A. degree shal be done in residence at this institution except when it is done by specific arrangement with the Dean of the Graduate College of this institution under the direction of one of the regular summer exchange professors (e.g. Dr. Suzzallo, Dr. Hall, etc.) in institutions of collegiate rank of whose faculty they ar members.

4. In order that the standard of intensiv and specialized work for the Master's degree may be maintained, no graduate credit wil be givn for elementary courses, for scatterd and unrelated courses, for public platform lectures, or public platform lecture courses, for courses in which the element of routine is large as compared with the theoretical and professional aspects.

5. Excess A.B. work may be applied toward the M.A. degree only when arrangement is made in advance with the Dean of the Graduate College so that he may see that the work is made of M.A. standard and that it is in line with the specialization necessary for the M.A. degree.

6. Five hour summer courses of A.B. standard may be allowd to be applied as M.A. work for three hours credit when approvd in advance by the Dean of the Graduate College subject to conditions formerly adopted.

7. The courses which may be taken for graduate credit must be of an advanst caracter, requiring intensiv study and specialization. Certain approve courses in the Junior and Senior Colleges may be pursued for graduate credit; but, when so taken, the character of the work done and the amount of ground to be coverd must be judged by a higher standard than that which applies to the regular Junior or Senior College student. The standard of intensiv work set for the graduate student must be maintaind even if special additional assignments hav to be made to the graduate student who works side by side with the Senior College student.

Satisfactory teaching experience shal be regarded as a 8. prerequisit to graduation with the Master's degree. Teaching in some department of the college or its training scool may, under certain conditions, be included in the graduate work for candidates for the Master of Arts degree. Routine teaching wil not be recognized for graduate credit. Mere experience in the practical activities of teaching is not adequate. When graduate credit is given to teaching, this work must be of an advanst caracter, so organized, controlld, and supervised as to vield some signtific result, assist in the solution of some educational problem, hav some definit constructiv value, or insure some decided growth of the teacher in the scolarship of the subject or professional insight into its value and problems.

9. Fifteen hours credit toward the M.A. degree shal be the maximum amount allowd to be ernd in a regular scool year by anyone who is employd on full time except upon the recommendation of the Dean of the Graduate College and the approval of the Council of Deans.

10. A clas admission card similar to that used in undergraduate work but of different color shal be used for admission to clas in order to indicate clearly to the instructor that the student is to do graduate work. This card should be approvd by the Dean of the Graduate College as wel as by the Dean of the College.

11. Instructors who hav graduate students in their classes shal report in riting to the Dean of the Graduate College their statement of extra work for such students.

12. Graduate credit for leadership of group work with non-resident students shal be given only when approvd in advance by the Dean of the Graduate College and the Dean of the College.

13. Final work toward the M.A. degree shal be done in residence and under the supervision of the Dean of the Graduate College unles special permission to do it in non-residence has been granted by the Council of Deans and upon the recommendation of the Dean of the Graduate College.

130

14. All work for the M.A. degree shal be done with distinction; work barely past shal not be considerd worthy of such an advanst degree.

15. The thesis subject of the graduate student must be approvd in advance by the Dean of the Graduate College and by the Hed of the Department concernd. Before the degree is conferd, the thesis as a whole, and in detail, must be approvd by the Hed of the Department or the Instructor under whose direction the thesis work has been done and also by the Dean of the Graduate College. Also three typeritten copies of the thesis must be placed on file with the Dean of the Graduate College, one copy of which he shal place in the library for permanent reference.

16. Before the candidate for the Master of Arts degree is admitted to final examination, the thesis requirement must be met in full, or the thesis must be in such a state of redines that only minor reconstructions need to be made which wil not delay its being put into final typeritten form for filing before the end of the term in which graduation falls.

17. The final examination wil be presided over by the Dean of the Graduate College and conducted by the Hed of the Department in which the candidate has done the main part of his work. All other members of the faculty under whom the candidate has taken courses counting toward the Master's degree shal be given an opportunity to participate in the examination. An official visitor, or official visitors, from outside the Department in which the candidate has specialized shal be appointed to attend the examination.

#### Directions as to the Form of the Thesis.

Students submitting theses, should present them in typeritten form, upon paper of good quality, of customary size  $(8\frac{1}{2}x11)$ , leaving a margin at the left adequate for binding —fifteen points by the typeriter, twenty if the manuscript is thick. One copy of the thesis wil be bound for the library by our bindery at the student's expens.

A title page should be prepared containing in neat lettering at the top the name of the institution, THE STATE

TEACHERS COLLEGE OF COLORADO; belo this at some distance the title of the thesis, about the middle of the page the statement, A THESIS SUBMITTED IN CANDIDACY FOR THE DEGREE OF MASTER OF ARTS IN EDUCATION, at a lower level of the page the author's name, and at the bottom the addres, and the year.

All theses should contain a brief analysis or table of contents at the beginning, should giv footnote references to literature quoted, and should contain at the end a bibliografy of the literature of their subject. In giving references and bibliografic material, the customary form of publishing houses should be used, which is quite uniformly that of the author first, folloed by title, and in case of magazine references, this by title of magazine, volume or date, and page.

#### Fees For Graduate Courses.

Fees for graduate students in the Summer Term wil be on the same basis as fees for all others. In the regular scool year, and for that part of the work which may be done in nonresidence the fees ar fixt at one dollar (\$1.00) for each term hour of credit. This would mean that for a course in which recitations occur five times a week for one term the fees would be five dollars (\$5.00); for four such courses the fees would be twenty dollars (\$20.00). Students doing graduate work should expect to buy some of the books which they need. The binding of the thesis required for filing in the library wil be chargd to the student at cost.

#### EDUCATION.

## THOMAS C. MCCRACKEN, A.M.

The work of this department, altho having to do primarily with fundamental theory underlying the educativ proces, shows also how such theory is of practical value to the teacher. The teacher needs a theoretical background for her work and a broad acquaintance with all fields of educational activity. The purpose of the courses offerd is to meet these needs.

Other courses in education ar listed and described in the Departments of Sycology, Training Scool, Sociology, Biology, and in other departments as courses in methods. The numbers

132

attacht to the varius courses indicate nothing as to the order in which they must be taken.

29. Current Educational Thought.—Mature students of the Senior College may take the course if granted permission by the instructor to do so.

This course is intended as a common meeting place for all graduate students no matter what their line of specialization. The work of the course wil consist of reviews and discussions of recent books in the varius fields of education. Significant contributions to educational thought and practis found in journals, reports of associations, commissions, and Boards of Education wil also be considerd. 2 hours. T. Th. Winter Term at 9:05.

#### Mr. McCracken.

41. Master's Thesis Course.—The student who expects to work upon his Master's thesis during any term wil register for this course, no matter for which department the thesis is being prepared. The Dean of the Graduate College wil cooperate with the professor under whose general direction the reserch comes, in placing at the disposal of the student all the reserch and conference opportunities that the institution affords. Conference course at hours convenient to student and instructor.

#### Mr. McCracken.

23. Reserch in Education.—Open to mature students of the Senior College upon permission of the instructor. This course is intended for advanst students capable of doing reserch in educational problems. Each student may choose the problem of greatest interest to him, provided sufficient opportunity is at hand for original investigation. The results of such reserch ar to be embodied in a thesis. 5 hours. Winter and Spring Terms. Conference course at hours convenient to student and instructor.

Mr. McCracken, Mr. Freeland, and Mr. Long.

28. Comparativ Study of Scool Systems.—Open to Senior College students upon permission of the instructor. The study of European systems of education, particularly German, French, and English, wil be made for the sake of a comparativ

basis and the suggestions that they furnish as to the current problems in American scool administration. 3 hours. M. W. F. Fall Term at 2:25.

#### Mr. Mooney.

17. Vocational Education.—Mature students of the Senior College may take this course if granted permission by the instructor. This course has for its purpose the interpretation of the subject from the artistic, industrial, and commercial standpoints. The material of the course wil include a discussion of standards for measuring demands, needs in relation to these demands, the use of standard types in relation to education, and the attempted solutions of the problem of vocational education in this and European cuntries. Three hours. Fall Term.

## Mr. Hadden.

14. Advanst Biotics.—This course is intended for students capable of pursuing advanst study in Biotics. The folloing subjects ar offerd for intensiv work under direction of the instructor by conference at hours convenient to both student and instructor:

- 1. The Evolution of the Cel—the fysiological cel belongs to all parts of life, from the unicellular life to the most highly socialized civilization.
- 2. The application of the sience of genetics to the interpretation of human situations.
- 3. Weismann's theory of heredity—the Germ Plasm its continuity—a basis of immortality.
- 4. The Life Series—The Trail of Life from world stuff to the super-man, inclusiv.
- 5. Lamarck; his theory of selection; its comparison with Weismanism.
- 6. Darwin-The Epoch Maker.
- 7. The Genesis of Movement from Atom to Civilization. President Snyder.

10. History of Education—In Ancient Times.—For a full description of this course see Education Department, Junior College.

32. History of Education—In mediaeval and Renaissance Times.—For a full description of this course See Education Department, Junior College.

33. History of Education—In Modern Times.—For a full description of this course see Education Department, Junior College.

22. Evolution of Secondary Education.—For a full description of this course see Education Department, Senior College.

20. High Scool Administration.—For a full description of this course see Education Department, Senior College.

24. Scool Administration.—For a full description of this course see Education Department, Junior College.

12. Current Social Movements in Education.—For a full description of this course see Education Department, Senior College.

16. Theory of the High Scool Curriculum.—For a full description of this course see Education Department, Senior College.

19. Principles of High Scool Education.—For a full description of this course see Education Department, Senior College.

25. Administration of Rural Scools.—For a full description of this course see Education Department, Senior College.

43. Federal Aid to, and State Control of, Education.—For a full description of this course see Education Department, Senior College.

42. Administration and Social Aspects of Education.—For a full description of this course see Education Department, Senior College.

#### TRAINING SCOOL.

#### DAVID DOUGLAS HUGH, A.M., Dean.

2. Elementary Scool Teaching.—For a description see Course 2 of the Junior College Section of the Training Department.

Mr. Hugh, Mr. Freeland, and Training Teachers.

3. Elementary Scool Supervision.—For a description see Course 3 of the Junior College section of the Training Department.

Mr. Hugh, Mr. Freeland, and Training Teachers.

10. The Curriculum of the Elementary Scool.—For a description see Course 10 of the Senior College section of the Training Department.

Mr. Hugh.

12. Training Scool Seminar.—For a description see Course 12 of the Senior College section of the Training Department.

Mr. Hugh.

29. Kindergarten Theory.—For a description see Course 30 of the Senior College section of the Training Department. Miss Julian.

**30.** Kindergarten Conference. — For a description see Course 30 of the Senior College section of the Training Department.

Miss Julian.

38. The Play Life of Children as the Basis for Education in the Kindergarten.—For a description see Course 38 of the Senior College section of the Training Department.

Miss Julian.

40. Practis Teaching in the High Scool.—For a description see Course 40 of the Senior College section of the Training Department.

Mr. Hugh and Mr. Bell.

41. High Scool Supervision.—For a description see Course 41 of the Senior College section of the Training Department. Mr. Hugh and Mr. Bell.

44. High Scool Practicum.—For a description see Course 44, Senior College section of the Training Department.

Mr. Bell.

#### SYCOLOGY AND CHILD STUDY.

JACOB DANIEL HEILMAN, PH.D.

3. Child Study.—(In addition to the regular work of the course the graduate student wil be obliged to rite a thesis on some special topic.)

4. Clinical Sycology.—(Additional work in the shape of a thesis.)

7. Advanst General Sycology.—The student wil be obliged to rite a comprehensiv thesis on some specific mental proces, such as retinal sensations, auditory sensations, attention, memory or some other topic agreeable to the hed of the department. Experimental work should be involved in the thesis,

Dr. Heilman.

8. Advanst Educational Sycology.—A comprehensiv thesis wil be required on some specific subject. Examples: formal disciplin, mental and fysical tests, sex hygiene, speech defects, nutrition, defectiv children, and standards for measuring the work of the scool children.

Dr. Heilman.

#### Major Work.

All of the work described under the Junior College and the Senior College is required for a major in Sycology. For additional work see the hed of the department.

## BIOLOGICAL SIENCE.

ARTHUR EUGENE BEARDSLEY, M.S.

Botany 3, 4, 5-Bacteriology.-See Senior College.

Botany 7, 8, 9.—Invertebrate and Vertebrate Morfology. See Senior College.

8. Zoological Studies.—In this course an intensiv study of a particular group of animals is made. It involves field and laboratory work, readings and the preparation of a full report upon the investigation.

#### FYSICAL SIENCE.

## FRANCIS LORENZO ABBOTT, A.M.

12. Theory of Relativity.—This course requires a comprehensiv review of the hypotheses of the ether and the structure of matter, which study shows the necessity for the Theory of Relativity. A detaild outline of the course may be obtaind from the Dean of the Graduate Scool, or from the hed of the department.

13. History and Methods of Fysics Teaching.—Much of this course must be original work.

## GEOLOGY AND GEOGRAFY.

#### GEORGE A. BARKER, M.S.

15. Plant Geografy.—A course based on Schimper's Plant Geografy and Warming's Oecology of Plants. A thoro knolege of botany is presupposed in this course.

16. Animal Geografy.—At least one course in general zoology is recommended before taking this course. It is largely based on the animal relms which Wallace first workt out, and is designd to bring out the effect of barriers like oceans, mountains, and deserts.

17. Social Geografy of the United States.—A course largely based on the material of the last census. Interstate and foren immigration, the distribution of the negro and his relativ decrease, and the social increase of the population of Colorado wil be some topics treated.

2. Petrology.—The investigation of rocks to determine their mineralogical composition. It is recommended that the pupil hav some knolege of fysics and chemistry and also some knolege of microscopic biology. In addition to the gross study of minerals a large collection of typical rock sections wil be examined with the microscope. This is largely a laboratory course. Conference.

#### MATHEMATICS.

GEORGE WILLIAM FINLEY, B.S.

4. Analytic Geometry.—(See Junior College.)

5, 6, 7. Differential and Integral Calculus.—(See Senior College.)

8. Methods in Arithmetic.—(See Junior College.)

9. The Teaching of Secondary Mathematics.—(See Senior College.)

11. Descriptiv Geometry.—(See Senior College.)

12. Spherical Trigonometry.—Formulas relating to the right triangle. Napier's rules, solution of right triangles; spherical triangles in general; solution of examples, with applications to the celestial sphere.

13. Advanst Calculus.—A continuation of the work begun in courses 5, 6, and 7, with special attention to applications in fysics and mecanics.

## SOCIOLOGY AND ECONOMICS.

GURDON RANSOM MILLER, PH.B., A.M.

20. The Consumption of Welth.—An advanst course in Social Economics; a constructiv analysis of the modern tendency to subject the consumption of welth to sientific treatment, emphasizing the human costs of production versus the human utilities of sientific consumption; a human valuation. Open to students who hav taken not les than two terms of work in Sociology and Economics. Alternates with Course 9, Spring Term.

# HISTORY AND POLITICAL SIENCE. EDWIN B. SMITH, B.S.

15. American Constitutional Development.—An intensiv study of the origin and development of the Constitution; the changes in and the construction of the Constitution in the different periods; and the present attitude toward it. 16. Reserch in History.—Other work in the department may be arranged to be conducted by conference. The folloing subjects ar suggested for courses that may be profitably folloed:

- 1. The establishment of American Government in Colorado.
- 2. History of the Movement for Shorter Hours.
- 3. Humanitarian Movements in the United States in the last Century.
- 4. Erly Public Land System in the United States.
- 5. The Frontier of the Sixties.
- 6. Early effects of the Monroe Doctrine on Europe.
- 4. Western American History.—(Senior College.)
- 10. History of Industry.—(Senior College.)
- 11. History of Comerce.—(Senior College.)
- 13. The Teaching of History.—(Junior College.)

# MODERN FOREN LANGUAGES.

JOHN THOMAS LISTER, A.B., PH.B.

The courses listed in the department of Modern Foren Languages ar of two classes: (a) Those which ar givn in regularly sceduled classes designd especially for undergraduate students, but in which students of the Graduate College may receiv credit by doing extra work; (b) those which ar intended primarily for students of the Graduate College but to which mature undergraduate students wil be admitted provided they sho evidence of ability to carry such courses. The work of these (b) courses is done outside of clas by conferences with the instructor.

#### German.

# Advanst German.-Courses 10, 11, 12, 13, 14.

- 10. Advanst German.—Fall Term. 3 hours.
- 11. Advanst German.—Winter Term. 3 hours.
- 12. Advanst German.-Spring Term. 3 hours.
- 13. Advanst German.—Winter Term. 2 hours.
- 14. Advanst German.-Spring Term. 2 hours.

#### French.

#### Advanst French-Courses 7, 8, 9.

'these courses ar all givn by conference and ar each five hours.

7. Advanst French.—Corneille's works. Careful study Le Cid, Horace, and Polyeucte.

**8.** Advanst French.—Racine's works. Careful study of Athalie, Esther, and Iphegenie.

9. Advanst French.—Moliere's works. Careful study of L'Avare, Le Misanthrope, Tartuffe.

#### Spanish.

6. Intermediate Spanish.—Spring Term. 3 hours.

# LITERATURE AND ENGLISH.

# ETHAN ALLAN CROSS, PH.M. Courses in Composition.

2. Intermediate Composition.—Senior College, but open to Graduate students. Three hours. Winter Term.

3. Advanst Composition.—Senior College, but open to Graduate students. Three hours. Spring Term.

## Courses in Methods.

6. The Teaching of English in the High Scool.—Graduate College. Principles for the selection of literature for high scool pupils considerd critically; illustrativ studies in the treatment of selected pieces; study of types of composition work for the secondary scool, with illustrativ practis in riting. Three hours. Spring Term.

#### Courses in Literature.

7. An Introduction to the Epic.—Students taking this course for graduate credit wil be required to read in addition to the Iliad and Odyssey two other of the national epics. Five hours. Fall Term.

11. Lyric Poetry.—Senior College. Five hours. Fall Term.

12. Nineteenth Century Poetry.—Senior College. Five hours. Winter Term. (Not givn til 1916-1917).

13. Victorian Poetry.—Senior College. Five hours. Spring Term. (Not givn til 1916-1917).

14. Nineteenth Century Prose.—The work of the chief prose writers of the century with the emfasis on those of the Victorian Age. The course does not include the fiction of the period. Five hours. Fall Term.

15. Modern Plays.—Senior College. Five hours. Winter Term.

16. The Novel.—Senior College. Five hours. Spring Term.

17. The Short Story.—Senior College. Five hours. Fall Term.

18. The Essay.—Senior College. Five hours. Spring Term.

19. Shakespeare's Comedies.—Senior College. Five hours. Winter Term. (Not givn til 1916-1917).

20. Shakesepare's Chronicle Plays.—Senior College. Five hours. Winter Term.

21. Shakespeare's Tragedies. — Senior College. Five hours. Spring Term. (Not givn til 1916-1917).

22. Elizabethan Drama Exclusiv of Shakespeare.—Senior College. Five hours. Spring Term.

30. Conference Course.—This course number is intended to cover special study in collecting material for the thesis required for the degree of Master of Arts in the department of English. The assignments wil of necessity be made individually to each student preparing a thesis.

#### GREELEY, COLORADO

# READING AND INTERPRETATION. FRANCES TOBEY, B.S.

16. The Greek Drama.—Literary and Dramatic standards applied to Greek drama. The classical drama and world view (filosofic, social, religius, ethical attitudes). The intensiv study and dramatic presentation of a Greek tragedy. 5 hours.

15. The Festival.—Junior College. Open to Graduate students.

6. Dramatic Interpretation.—Junior College. Open to Graduate students.

8. Art Criteria.—Senior College. Open to Graduate students.

9. Literary Interpretation.—Senior College. Open to graduate students.

10. Oral Expression in the High Scool.—Senior College. Open to Graduate students.

## PRACTICAL ARTS.

SAMUEL MILO HADDEN, A.M., Dean.

# Industrial Arts.

17. Vocational Education.—For a full description of this course see Department of Education, Graduate College. 3 hours.

4. Pre-Vocational Education.—For a full description of this course see Senior College. Open to Graduate College students. 5 hours.

7. Industrial Art in Secondary and Trades Scools.—For a full description of this course see Industrial Art Department, Junior College.

16. Historic Furniture.—For a full description of this course see Industrial Art Department, Senior College, 1 hour. Winter Term.

14. Care and Management.—For a full description of this course see Industrial Art Department, Senior College.

11. Advanst Mecanical Drawing.—For a full description of this course see Industrial Art Department, Senior College.

13. Advanst Arcitectural Drawing.—For a full description of this course see Industrial Art Department, Senior College.

18. Advanst Machine Design.—For a full description of this course see Industrial Art Department, Senior College.

23. Constructiv Detail Drawing.—For a full description of this course see Industrial Art Department, Senior College.

20. Pattern Making.—For a full description of this course see Industrial Art Department, Senior College.

22. Bilding Construction.—For a full description of this course see Industrial Art Department, Senior College.

9. Advanst Art Metal.—For a full description of this course see Industrial Art Department, Senior College.

#### Fine and Applied Arts.

WALTER F. ISAACS, B.S.

17. Color Composition.—An advanst study of color composition in oil or water color. Arrangements of form and color for decorativ effect. The student wil be assignd subjects and wil meet with the instructor for criticism at appointed times. 5 hours.

18. Oil Painting.—This work may be done outside of regular classes to suit the convenience of the student. Regular criticisms wil be givn by the instructor in charge.

The student must submit satisfactory evidence of having a good knolege of drawing and values, and must hav done one term's work, or its equivalent, in oil painting.

Large studies from complicated stil life groups or from life, showing reasonably correct color values wil be required.

Advanst students who hav not had one term of work or its equivalent in oil painting may take this work for Senior College credit. 5 hours. 12. Antique.—For a full description of this course see Department of Fine and Applied Arts, Senior College. 5 hours.

13. Drawing from Life.—For a full description of this course see Department of Fine and Applied Arts, Senior College. 5 hours.

14. Commercial Design.—For a full description of this course see Department of Fine and Applied Arts, Senior College. 5 hours.

16. Laboratory Drawing.—For a full description of this course see Department of Fine and Applied Arts, Senior College. 2 hours.

# Home Economics.

IDA MARSHALL, B.S.

#### MERLE KISSICK, PH.B.

The work of the Graduate College wil consist principally of intensified Senior College work, description of which courses wil be found in Senior College section.

9. Food Production.—(Senior College.) 5 hours.

11. Household Management.—(Senior College.) 5 hours. hours.

14. Home Economics Education.—(Senior College.) 5 hours.

20. Seminar.—An opportunity is here givn to do original reserch work in any faze of Domestic Sience. Each student may choose any subject suitable to her ability. 5 hours.

# Household Art.

Courses in the Senior College by special arrangement wil be offerd as Graduate College courses. This work wil be in addition to the regular Graduate Seminar.

#### Agriculture.

# C. H. WITHINGTON, M.S., A.M.

10. Agricultural Seminar.—Discussion of varius fazes of agricultural investigations. Papers on assignd topics ar presented for discussion by the clas. Prerequisit: General Agriculture. 2 hours. Fall, Winter and Spring Term.

17. Entomology Seminar.—Selected literature and special field investigations of insect problems to be studied and presented for discussion by the clas. Prerequisit: Courses 15 and 16. 3 hours. Fall, Winter and Spring Term.

# **Commercial Arts.**

# LULU A. HEILMAN, A.B. FRANK W. SHULTIS, A.M.

41. Graduate Seminar.—This course wil consist of independent investigations in the field of busines administration. Such topics as the following wil be assignd for report and discussion: Commercial Education in the United States; Commercial Education in Germany; Railway Transportation Problems; Combinations of Capital; Present Tendencies in High Scool Curricula.

# FYSICAL EDUCATION. ROYCE REED LONG, A.B.

24. Research in Physical Education.—(For description of course see Senior College.)

Mr. Long.

# The Training Scool

ZACHARIAH XENOPHON SNYDER, PH.D., President.

## Training Scool Faculty.

DAVID DOUGLAS HUGH, A.M., Dean of the Training Scool. JOHN R. BELL, A.M., LITT.D., Principal of the High Scool. RAE E. BLANCHAED, A.B., English, and Preceptres of Girls. EMMA C. DUMKE, A.B., Reading and Foren Languages—High Scool

GEORGE W. FINLEY, B.S., Mathematics—High Scool. LULU HEILMAN, A.B., Stenografy and Typeriting—High Scool. MARGARET JOY KEYES, A.B., Fysical Interpretation—High Scool. FRANK W. SHULTIS, A.M., Commercial Department. CHARLES HALL WITHINGTON, A.M., Sience—High Scool. GEORGE EARL FREELAND, A.M., Principal of the Elementary Scool. JENNY LIND GREEN, Training Teacher—Seventh Grade. AMY RACHEL FOOTE, A.B., Training Teacher—Sixth Grade. FRIEDA B. ROHR, PD.M., Training Teacher—Sixth Grade. ELIZABETH HAYS KENDEL, A.B., Training Teacher—Fifth Grade. CELIA M. LAWLER, PD.M., Training Teacher—Fourth Grade. MARGARET STATLER, A.B., Training Teacher—Third Grade. BELLA BRUCE SIBLEY, A.B., Training Teacher—Second Grade. KATHRYN M. LONG, A.B., Training Teacher—First Grade. MILDRED DEERING JULIAN, B.S., Kindergarten.

#### Fellows.

ETHEL INGLE, High Scool Latin. LUCY MCLANE, High Scool English. LORENA VANDERLIP, High Scool Dramatics and Fysical Education. DEXTER B. WALKER, High Scool Sience.

# Honorary Fellows.

FERN WATSON, Mathematics, High Scool. JOHN E. KYLE, Fysical Education, Elementary Scool. ANNE LANDRAM, Eighth Grade. IDA VOGEL, Eighth Grade. FLORENCE HEENAN, Seventh Grade. SUE CARY, Sixth Grade. GRACE FILKINS, Fifth Grade. JANE WALKER, Fourth Grade. MARJORIE RICE, Fourth Grade. FLORENCE VICKERS, Third Grade. LILLIAN WEBSTER, Second Grade. ETHEL MAY STEVENSON, First Grade. FRANCES J. GOODALE, Kindergarten.

The folloing members of the College Faculty aid in the supervision and teaching of their respectiv subjects in the Training Scool.

JAMES HARVEY HAYS, A.M., Latin.

ARTHUR EUGENE BEARDSLEY, M.S., Biological Sience.

SAMUEL MILO HADDEN, A.M., Industrial Arts.

FRANCIS LORENZO ABBOTT, A.M., Fysical Sience.

GURDON RANSOM MILLER, A.M., Social Sience.

FRANCES TOBEY, B.S., Reading and Dramatics.

ETHAN ALLEN CROSS, PH.M., English.

JOHN THOMAS LISTER, A.B., Modern Languages.

JACOB DANIEL HEILMAN, PH.D., Child Clinics.

JOHN T. MCCUNNIFF, A.B., Printing and Mecanical Drawing. MAX SHENCK, Bookbinding.

GEORGE A. BARKER, M.S., Fysiografy and Geografy.

CHARLES M. FOULK, PD.B., Manual Training.

WALTER ISAACS, B.S., Drawing and Art.

AGNES HOLMES, PD.M., Drawing.

JOHN CLARK KENDEL, A.B., Music.

ROYCE REED LONG, A.B., Fysical Education.

IDA MARSHALL, B.S., Domestic Sience.

EDWIN B. SMITH, B.S., History.

The Point of View.—The dominant thought underlying the work of the Training Scool is that education is a proces of participation in life and not merely a preparation for life. It is designd, therefore, to make the atmosphere of the Training Scool that of a happy, helpful home, where each individual is provided with something to do suited to his tastes and capacities, and where each in turn contributes to the common good.

Much attention, consequently, is devoted to the spontaneus activities and interests of pupils. The dramatic, constructiv, artistic, story, nature-study, social, and play impulses ar utilized for educational ends. Thru dramatization, for example, the child enters with greater zest into the study of such subjects as reading, literature, and history; and consequently makes greater progres in them. Play safeguards helth to a greater degree than the more formal gymnastic exercises of the classroom. To keep aliv the child's nativ tendency to be interested in and experiment with animals and plants and natural forces is an important factor in education. To stimulate his appreciation of pictures, music, and literature, suited to his stage of development, is essential to a welrounded life. In other words, the aim of the Training Scool is to afford opportunities for a helthful, groing life for the yung people entrusted to its care. It assumes that they wil put forth their most sustaind effort and wil accomplish most when working in harmony with their dominant interests.

The Place of the Three R's.—While emfasis is placed upon the freer forms of scool work, this is not incompatible with the mastery of the essentials of reading, arithmetic, riting, and spelling. When used as tools for the mastery of problems in which there is vital interests, the most effectiv work is accomplisht in these subjects. In addition to this work carefully pland dril exercises ar also provided. By the careful elimination of the dead timber usually found in the varius scool subjects, much rich material can be introduced into the curriculum in such branches as art, music, literature, geografy, history, and nature-study.

Vocational Work.—The best contemporary educational thought, moreover, demands that the scool shal help to fit yung people for a vocation. In the upper grades and the high scool, at least, yung people begin to feel the stres of the lifecareer motiv. Consequently, at this time more attention is paid to manual training, the household arts, agriculture, stenografy, bookkeeping, typeriting, and kindred subjects. Additional vocational courses ar being offerd from which the student may choose his work.

The Social Life of the Scool.—Much importance is attacht to conduct. An effort is made to maintain the social life of the scool on a high plane. Sympathetic and cordial relations between pupils and teachers ar fosterd. Each grade has occasionally some kind of social function to which parents or another group of yung folk ar invited. At noon a room is provided where the children eat their lunches at tables presided over by student teachers. Once a week one grade en-

tertains the other grades at the morning exercises in the Training Scool Auditorium. Varius kinds of clubs ar organized in the upper grades and the High Scool. These and other occasions of similar nature tend to cultivate the amenities of social life, and afford opportunity for initiativ and social cooperation.

The Relation of Home and Scool.—Much of the work of the scool is designd to make the boys and girls more helpful members of the home. Nature-study, gardening, cooking, sewing and handicrafts should function in work in the household. Literature, singing, story-telling, art and oral English render pupils capable of filling a larger place in the home circle. In fact, any scool work that does not carry over into the home life is open to serius question.

**Promotions.**—A flexible system of promotion prevails in the training scool. Each grade in the Elementary Scool is divided into two or more groups, according to the advansment of the pupils, and each group is allowed to proceed at the fastest pace of which it is capable. Whenever the work of the year is completed by any group, it is permitted to begin the next year's work. This provides for the completion of the elementary scool work in les than the eight years usually allotted to it.

Summer Scool.—There is a groing conviction among the educators of the country in favor of scool during a part, at least, of the summer vacation. The right kind of scool work is not inimical to the helth and welfare of youth. Accordingly, a summer session has ben organized for both the Elementary Scool and the High Scool. Credit is allowd for the work done.

**Fysical Education.**—The fysical development and helth of the children ar considerd of prime importance. An outdoor playground, equipt with needed apparatus, the athletic field, and the campus furnish places for supervised play. Games of suitable character, folk dancing, and gymnastics ar taut by wel-traind teachers. The work culminates in the spring in a field day with events suitable for the different grades of children. A sientific examination of the fysical condition of the children is made each year by a child-study specialist and by the director of the department of fysical education. Museums and Excursions.—Another valuable source of information is furnisht by the museums of the institution. Visits ar made by groups of children under the direction of a teacher to the sientific, historical, and other museums belonging to the collegiate departments. A collection of specimens on nature-study, geografy, art, etc., is also available in the Training Scool bilding. Teachers ar encouraged to utilize such material to the fullest possible extent as wel as to make excursions to farms, factories, banks, stores, county offices, and local centers of interest in connection with the scool work.

Scoolroom Libraries.—A significant factor in the education of the children is the use of grade libraries. An ernest effort has been made to secure the best literature available for the children in the different grades. These books ar accessible to the children in each room. They ar used both to supplement the regular studies and also for home reading.

Fees.—All books and material used by the children ar furnisht by the scool except incidental supplies, as pencils, note books, etc. No fee is collected in the first and second grades, except a small charge for materials, amounting to about 25 cents a term. In the remaining grades the incidental fees ar as folloes: Third and fourth, \$1.00 a term; fifth and sixth, \$1.50 a term; seventh and eighth, \$2.00 a term. There are three terms in the scool year.

## Kindergarten.

The kindergarten is an organic part of the Training Scool. Its function is not primarily to entertain and amuse children, but to educate them. This does not mean that formal work in reading, riting and arithmetic is introduced at this time. Education is much broader than the three R's. The problem of the kindergartner is to study the spontaneus activities of the child and to direct them so that he wil become a stronger individual and a more helpful member of the society (family, scool, etc.) to which he belongs. For example, the child's instinctiv tendency to bild with blocks is utilized with a view to increasing his muscular control, to developing his power of thought, and to giving him a clearer insight into the industrial processes of home and neighborhood. His other instinctiv tendencies, such as his interest in nature, in stories, and in association with other children, ar traind in a similar manner. Each has to make its contribution to the maximum development of the child.

The kindergarten is thus the true adjunct of the home. Its mission is to keep the child living up to his highest possibilities by placing him in an environment that wil tuch many sides of his life and that wil call forth his best effort. The kindergarten thus takes the experience that the child brings from the home and uses them. He is given different means of expressing the ideas and images that he has; and by expressing them they ar enlarged and clarified. The broader experiences of the teacher ar given to the child as he is redy to have his own limited experiences enlarged. Perhaps the greatest benefit derived from the kindergarten by the child is the socializing influence. He lerns to take his place in a large group, to consider others, to giv and take, to play fairly, and to consider the good of the group. The modern home does not, as a rule, afford a sufficient group of companions to bring out the best elements in the social life of the child.

In the second year some attention is given to definitnes of movement and skil of execution. The child is helped to work out patterns for his constructions and to work for more finisht results. They ar given some woodwork in making the dol's house and furniture and simple toys. Their sewing and weaving ar not of the old, formal type, but ar given only as the child has need of the objects made. Large materials ar always used. For example, they make work aprons to use in their carpenter's work, bean bags with which they play games, clothes for the dol, and woven rugs for their dol house. They ar permitted to take some of their work home to finish. and ar encouraged to bring to the kindergarten work they have done in the home. There is definit opportunity for more self-control and independent action on the part of the children looking to the requirements of the first grade in the usual public scool system.

#### Kindergarten Course of Study.

Children ar usually admitted to the kindergarten at the age of four years, but as age is not a certain index of development, this is at the discretion of the director of the kindergarten. The course covers two years and is divided into two grades, thus giving opportunity for a careful consideration

#### GREELEY, COLORADO

of the needs of individual children. The program for each group is definit and progressiv, but results ar necessarily judged in terms of fysical development and social co-operation.

The work of the first year aims to secure freedom of movement, simple motor co-ordination, redines of respons and training of the special senses. The children spend much time out of doors in the garden, the sand pile, and in hunting for nature materials to be used in their constructions.

They bild with large blocks on the floor, making houses, barns, etc., that ar large enuf for them to play in. Much of their hand work is experimental—as they find a need for certain things in their play, they ar encouraged to find the material and, the method of using this material that wil best satisfy the needs. In this way they lern to reason. The teachers place is to suggest needs and improvements as the child is redy, and to encourage and inspire the child in his efforts. She plays with him.

## COURSE OF STUDY FOR THE GRADES.

#### Literature and English.

Among the different aspects of the environment of the child, it is the ideal and spiritual, not the factual, which ar properly presented thru the artistic story. Since, then, only the need for treatment which reaches the imagination and the emotions properly engages the department of literature, the handling of material adapted to the general purposes of the curriculum wil be, especially in the lower grades, divided between the History and the English departments, according to the dominant interests to be servd. It wil accordingly be understood that whatever subject-matter is taken over by the department of literature wil be presented, not in mere cronicle, nor, except for needful transition and interpretation, in exposition, but in appropriate literary form-artistic story, poem. or drama. When, as often happens in the lower grades, pieces ar not to be found which present the ideal aspects of the material to be used in a manner suitable to the child, pupil teachers are encouraged and aided to construct such pieces, arranging, working over, and illuminating the factual matter until the desired impression is attaind. This caracteristic function

STATE TEACHERS

of seeking to realize in appropriate forms the feeling elements of experience does not, however, prevent the English department from attempting to develop thru structure, close motivation, and the varius aspects of form, those subtler intellectual activities for which the appreciation and study of literature has always afforded the most perfect training.

A constant factor of all English work is composition, chiefly oral in the lower grades, the effort being to develop more individual and constructiv features as pupils gain in the power to embody the more significant features of their own experience. The impulse to draw and to make dramatic representation is encouraged for vivifying and adding variety to self-expression. The aid given by the study of form is afforded by oral development of the paragraf from the third grade, by attention to the function of the steps of the narrativ, and thru constant emfasis on the need for unity and close connection. In this part of the work, grammar facts and retoric facts ar interrelated and taut from the standpoint of their use as tools for more adequate expression. While grammar is thus nowhere taut for its own sake, the effort of mastering English syntax as a vehicle of expression is aided, from the fifth grade on, by some systematic instruction in the structure and types of the sentence and in the common form of words as used in the sentence.

## Grade 1.

**Purpose:** To enrich the children's lives thru stories and poems that hav from time immemorial appeald to the very yung.

**Material:** Marchen, Fables, and Poems, typical examples of which ar provided in Grimm, Aesop, and Stevenson, with parts of Hiawatha in the last term. Poems typical of these to be memorized may be taken from the Mother Goose Rymes and from Stevenson: e. g., I Saw a Ship A-Sailing; The Wind; My Shadow. **Tecnical English:** Capitals for the beginning of the sentence, and for the words "I" and "O"; period to close statement; question mark to close question.

#### Grade 2.

**Purpose:** To promote natural sympathies by presenting in somewhat idealized form those aspects of primitiv life which best show fundamental and simple human experience.

Material: Artistic stories, songs, dances, and primitiv ritual, illustrativ of the chief fazes of erly domestic, industrial, and social life. The list of poems to be memorized may be extended to include pieces from George MacDonald, Eugene Field, Helen Hunt Jackson, Alice Carey, Longfellow, Isaac Watts, Celia Traxter, and others: e. g., The Baby; The Rocka-by Lady; September; November; Hiawatha's Home; Twinkle, Twinkle, Little Star; Spring, and other poems of the sort. Tecnical English: Capitals for names of persons and places; for names of the days of the week; for names of the months of the year. Abbreviations: Mr., Mrs., St., Ave. Punctuation: Period after abbreviations; periods after initials.

#### Grade 3.

**Purpose:** To lead the children to an appreciation of the stalwart, valorus type of manhood that prevaild in the times of the Vikings.

Material: Story of Siegfried; Wagner Story Book; Wagner Opera Stories; Norse Stories; Norse Mythologies. Material for memorizing is provided in Approved Selections for Reading and Memorizing. Tecnical English: Capitals for the beginning of each line of poetry; the formal beginning of a direct quotation; the principal words in titles or hedings; names of people, cities, months. Abbreviations for the names of the months; the names of a few cities in the state; the units of mesure as required; Dr., Question mark after hedings, titles, and the like that ar interrogativ; comma or colon to set off a direct quotation that needs to be set off; quotation marks to enclose direct quotations; comma to set off the name of the person addrest; apostrofe for possessiv singular; the marks needed for pointing abbreviated expressions in the hedings of letters. Practis in the formation of plurals in "s" and "es." Rule for forming the possessiv singular. Constant attention to oral language; practis in using the irregular verbs that ar most trublesum.

# Grade 4.

**Purpose:** To giv, in an appropriate setting (that of boy life in Homeric times), selected Greek myths in which the

human and religius experience can be clearly and pleasingly presented and can be given point and significance by the occasion on which the story is told.

Material: The boyhod of Achilles as constructed from the suggestions of the Iliad, the Odyssey, and other Greek material; twenty Greek myths. Selections for memorizing ar made from the poetry presented in the year. The selections vary from year to year with the preferences of the children. Helen Hunt Jackson, Riley, Longfellow, Browning, Lowell, Whittier, Bryant, Emerson, MacDonald, Bjornsen, Child, and Shelley ar all levied upon for material. Typical poems that we hav used ar: September, October, When the Frost is on the Pumpkin, Orphant Annie, The Raggedy Man, Hiawatha, The Birds of Killingsworth, The Pied Piper of Hamelin; The First Snowfall, The Corn Song, Indian Legend of the Robin, The Wind and the Moon, The Tree, and the like. Technical English: See preceding lists. Capitals for names applied to God; for adjective derived from proper names. Abbreviations for units of measure and value as required; for ante meridian, post meridian, United States, Company, Doctor, and the like. Contractions for I wil, is not, ar not, was not, wer not, did not does not, can not, should not, would not. Rule for forming plural of words ending in y preceded by a consonant; for adding suffix beginning with a vowel to monosyllables and words accented on the last syllable. Correctiv-work to establish right habits of expression: practis in using the principal parts of the trublesum irregular verbs; special attention to pronunciation of such words as history, geografy, agriculture, government, library, arithmetic, pronounce, propose, prepare, and the like. The work in composition givs as much attention to form as the children ar able to profit from. The stres is stil, of course more largely on content, but the pupils ar helpt to achiev good form so that they get good habits erly.

#### Grade 5.

Purpose: To lead the children to participate in the growth of the ideal of Teutonic manhood from the *invincible fighter* to the *chivalric statesman*.

Material: 1. The life of the North presented in a group of stories. 2. Beowulf, arranged as a series for telling. 3.

The education of the knight presented in story form. 4. The work of King Arthur and the Round Table, presented in a story series. The children hav hitherto found pleasure in and memorized such poems as O Captain! My Captain! Today; Sir Galahad; bits of Idylls of the King, such as the Knights' song from the Coming of Arthur, and the like; easier poems have been taken from Field, Riley, and Stevenson; and many "occasional" or seasonal poems hav been lernd. Tecnical English: See preceding lists. Contractions of would not. must not, and the like. Rules for spelling words ending in silent e; rules for forming the possessivs. Comma to separate words in a series. Language work here begins to grade into elementary grammar: the sentence is presented simply-as over agenst the group of words that does not assert: the basal parts of the sentence ar distinguisht merely as subject and predicate-noun, pronoun, and verb with the simplest inflections; the modifying elements ar likewise simply treated. Correctiv work in oral and ritten recitation is persistently attended to, looking to the pronunciation of such words as get, just, again, attact, going, and the like, as wel as to the clear enunciation of longer words; providing exercises to overcome the habit of misusing like, most, besides, and so on: that high, this big, and the like. In composition the idea of the paragraf is now put clearly before the children and they lern to organize what they say.

#### Grade 6.

**Purpose:** To develop feeling for the deeds and ideals of the heroic individual as a part of the epic life of his people.

Material: Stories of the immigration, establishment, rise, and greatest national achievement of three remarkable peoples; development thru these nation stories of the caracteristic qualities and ideals of each people, and the expression of these in the folk-epic of each. 1. The Greeks—Iliad. 2. The Romans—Aeneid. 3. The Norman French—Song of Roland. Material for memorizing is provided in Approved Selections for Reading and Memorizing. Tecnical English: See preceding lists. Comma to set off elements independent or nearly so; comma to set off adverbial elements at the beginning of a sentence; semi-colon to separate the parts of long compound

sentences; period after numerals or letters used to distinguish topics. Abbreviations for names of important states and cities: abbreviations for titles and the like. e. g., Hon., Gov., Pres., M. D. Continued practis in correct forms of expression to offset had English acquired erly. Constant work upon vocabulary; practis in discriminating meanings of such words as M. D. Continued practis in correct forms of expression to queer, odd, funny, strange, scared, frightened: alert. lively. nimble; prompt, redy, vigilant. Composition takes its topics from all the scools subjects and from the children's interesting experiences. The chief advantage of using the scool subjects for practis riting lies in the eas with which the children can be helpt to see the organization of their material. The danger of self-chosen topics lies in the temptation to rite pages of unorganized sentences. The grammar work of the preceding grade is extended to include most of the useful details of the parts of speech.

# Grade 7.

**Purpose:** To round out the great pictures of heroic life and chivalrus adventure and incidentally open up rich resources for the plesure of the children.

Material: Ballads of the Border from Poetry of the People: The Robin Hood Ballads; Tales of a Grandfather; The Lay of the Last Minstrel; Ivanhoe; The Talisman, and parts of other novels of Scott: Scottish Chiefs: The White Company, and other pieces. Material for memorizing is provided in the Approved Selections for Reading and Memorizing. Book VII. Tecnical English: See preceding lists. Colon before enumerations; punctuatiion in outlining; forms for busines letter, check, invitation. Constant work upon the vocabulary of the children, thru study of prefixes and suffixes; thru discrimination of synonyms. Grammar is carried on in as functional a manner as is practicable. The basal elements of easy sentences should be redily distinguisht by all the pupils before the close of the year; and along with this wil go inevitably a knolege of the commoner constructions of nouns and pronouns, the notions of tense and agreement of verb with subject, the meaning of copulativ, attributiv, transitiv, intransitiv, the common adjuncts in varius forms, and so on. Composition

# GREELEY, COLORADO

here concerns itself with the form side somewhat more explicitly than in preceding grades. The *idea of the paragraf* must be rought into the work of the pupil. It is easy to get much riting or talking from pupils. What is hard to get is *organized riting* or speaking without doing it for the pupil.

## Grade 8.

**Purpose:** To present appreciativly rather than analytically a large number of poems and stories that hav become a part of American culture—a considerable portion of the culture of the common people.

Material: Commonly loved poems of Longfellow, Bryant, Whittier, Holmes, Lowell, Whitman, Miller, Lanier, Halleck, Holland, Sill, Thaxter, Byron, Burns, Blake, Clough, Henley, Southey, Gray, Shelley, Keats, Tennyson,-a dozen or two of themes all within the reach of eighth grade children; in fiction, a novel of Cooper, two stories of Irving, a story of Poe, a story of Hale, a story or two of Hawthorne, and a novel of Hawthorne; along with these, as suits occasion, the classic orations of American history. Compositions, both oral and ritten, runs hand in hand with all the scool subjects, with the conscius aim of securing-not pages of riting or periods of talk-but organization of ideas according to a plan of the English Grammar supplants Literature in the Spring pupils. The time is spent mainly upon the analysis of senterm. tences. But this, of course, involvs the vocabulary of grammar and the fundamental information about the parts of speech. An attempt is made to rationalize the correctiv work that has hitherto occupied the greater part of the children's time.

#### **READING.**

The course in reading aims primarily to supplement the instruction given in the content subjects, such as history, literature, geografy, and nature-study. It folloes, therefore, that reading is taut as a means of obtaining facts not possible to be got at first hand, and of intensifying the experiences narrated in history and literature. While no strict correlation is attempted, as can be seen by a comparison of the courses, yet in the longer literary wholes used in reading, other branches of study ar used for apperceptiv backgrounds. The sustaind effort necessary for the mastery of the words is brought about largely by arousing a desire to know the content of a story rather than by depending upon the usual formal, mecanical dril. Libraries in each room ar designd to furnish attractiv books with which to start the reading habit. This extensiv reading also helps to provide the necesary visual training for fixing the symbols. The clas recitation is largely given over to realizing thought and feeling by means of vocal and bodily expression. Festivals, birthday celebrations of poets, artists, and statesmen, and other special programs ar also occasions for acquiring freedom of expression. Pupils compose and act simple dramatizations, make speeches, debate, and hold conversations in a natural, easy manner. Performances ar used only as a means of intensifying the pupil's experiences, not for the sake of show. Emfasis is placed upon memorizing the literature which is especially used for expression work, and upon dramatization thruout the grades.

# Grade 1.

**Purpose:** To stimulate, thru interesting material, the children's desire to know; and to help them attain a mesure of facility in interpreting ritten and printed symbols of thought.

Material: Stories, simple poetry, rimes, and jingles presented by the teacher; conversations involving the pupils' experiences at home, at scool, and on excursions, or centering about pictures, playthings, construction work, and the like. Among the readers in use ar: The Summers Readers, Mother Goose Pmimers, The Free and Treadwell Readers, The Riverside Primer and First Reader, Little Red Riding Hood, Bowwow and Mew-mew, The McClosky Primer, The Circus Reader, The Sunbonnet Babies, The Overall Boys, The Cave of Men, The Hiawatha Primer, Aesop's Fables. An intensix effort is made to rid the children's speech of the common blemishes of pronunciation and syntax.

#### Grade 2.

Purpose: To supply the children's need for imaginativ material; to develop the social side of the children's nature

thru oral expression and play, and to secure a groing command of the printed vocabulary.

Material: Among the books used in this grade ar the Free and Treadwell Second Reader; the Riverside Second Reader; the Edson-Laing Second-Reader; the Summers' Reader; the Circus Reader; Reynard, the Fox; Aesop's Fables; Eskimo Stories; Child-lore Dramatic Reader; The Early Cave Men (Dopp); Children of the Cliff and Lodrix, the Little Lake Dweller.

# Grade 3.

**Purpose:** To further the independence of the children's study of literature by giving them the tools of the syllable and the diacritical mark; to make them conscius of their audience, the clas, to whom their reading must be intelligible, at least; and to deepen their appreciation somewhat thru their attempts at impersonation.

Material. The Tale of Bunny Cotton Tail; Children's Dramatic Reader, Bk. III.; Grimm's Fairy Stories; Snowdrop and Other Stories; Merry Animal Tales; Lights to Literature, Bk. III.; Approved Selections for Reading and Memorizing, Bk. III.; Nature Myths; Hero Folk of Ancient Britain; and Free and Treadwell's Third Reader.

#### Grade 4.

**Purpose:** To help the children realize more and more completely what they read, thru impersonation and dramatic representation.

Material: Alice in Wonderland; Pinnochio; Water Babies; The Kipling Reader; Child's Garden of Verses; Doras, the Indian Boy; American History Stories; Dramatic Fourth Reader; occasional poems and Christmas stories.

#### Grade 5.

**Purpose:** To secure appreciativ respons thru oral reading, to a varied range of moods, pictures, and human experiences in literature,—thus stimulating the imagination, enriching experience, and giving possesion of personal powers in co-ordinated vocal and bodily expression. To establish habits of curiosity concerning the pronunciation and meaning of unfamiliar words and habits of redy and accurate recognition in logical relationship of units of thought on the printed page.

Material: Heidi, Spyri; Joan of Arc, Carpenter; Little Lame Prince, Mulock; Fanciful Tales, Stockton; King Arthur and His Knights, Radford; Robin Hood and His Merry Men, Pyle; The Ancient Mariner, Coleridge; Dramatic and seasonable poems, e. g., The Inchcape Rock,

#### Grade 6.

**Purpose:** That children may hav practis in getting thought from the printed page and giving it to others; that they may hav the necessary dril to increase their vocabularies and broaden their general knolege.

Material: It is desirable that the children read much. The folloing titles ar suggested: King of the Golden River; Water Babies; Black Beauty; Swiss Family Robinson; Deerslayer; A Little Brother to the Bear; Wood Folk at Scool; Emergencies; Town and City; The Nurnberg Store; A Dog of Flanders; Gulliver's Travels; Story of a Short Life; Adventures of Ulysses; Approved Selections for Memorizing; Four American Inventors.

# Grades 7 and 8.

The reading in grades 7 and 8 is done for the most part in connection with other subjects, such as literature and history.

#### HISTORY.

#### Grade 1.

The history of the first year centers about the home. It is subdivided into three units of work:

1. The child's own home—the home in which he livs; the food—preparation and source of supply in meat shop or grocery store, and ultimately in garden, farm, etc.; the clothing, with simple illustrations of the material used, proces of manufacture; furniture; games of children, etc.

2. The Eskimo, studied during the winter months—a simple type of home life with its varius activities.—The main topics ar food, wepons, utensils, clothing, shelter, modes of transportation, and games.

3. A study of the Indian, based upon Longfellow's Hiawatha. The topics ar much the same as in the last unit.

#### Grade 2.

This year is devoted to a study of simple types of pastoral and agricultural life. It is subdivided into three units:

1. The stories of the simple type of Aryan family, first keeping sheep upon the hillside and then moving down into the lowlands and ultimately engaging in agriculture. Constructive work includes the making of the abode of the sheperd and the more permanent house of the agriculturist. Activities involvd in caring for domestic animals and the ways in which they ar utilized for food and clothing, ar introduced, including such activities as butter and cheese-making, the beginnings of agriculture, the caring for the crops, the making of simple types of tools, such as the plow, ho, and rake, the grinding of flour from the grain and simple ways of preparing it for food. Much opportunity is afforded for constructiv work and for correlation of nature-study and gardening.

2. Stories of Hebrew sheperd life, especially those of Joseph and David.

3. A study of simple pastoral and agricultural types in the West.

#### Grade 3.

This year presents as its chief feature a study of the simple type of community life in an erly German village, and in addition to the simple modes of satisfying the needs for food, clothing, and shelter. This exemplifies a further stage of social evolution in the division of lands and labor, the use of materials, and the development of commerce. Considerable attention is given to houses, furniture, and clothing. The Norse tales of gods and heroes ar interwoven into the stories by being told around the family harth.

# Grade 4.

In the fourth year the child's groing desire for reality is satisfied by a study of the local history of Greeley, including the study of the original settlers of the colony, where they came from, why they came, what problems they had to face in the new situation, how they intended to solv them, etc. The work makes a splendid basis for correlation with the local geografy of this grade. This course is folloed by stories of some of the erly explorers, especially Columbus, Henry Hudson, John Smith, and Miles Standish.

As the material of this year is not rich in literary associations, the English work includes the telling of a series of Greek myths. They ar organized about the story of the boy Achilles, to whom at an appropriate time, the myths ar told. The background of Greek life workt out for the setting of this story furnishes an illustration for the home life of the Greeks.

# Grade 5.

**Purpose:** To secure on the part of the children an appreciation of the chivalrus spirit of Medieval life thru (a) a study of social life in and about a feudal castle; and (b) thru a further study of this organized society, its ideals and motivs as exhibited in the Third Crusade.

#### **Problems:**

- 1. Why, and how people livd in a fortified castle.
- 2. How the knight was traind.
- 3. Why men wanted to go on a crusade.
- 4. How the crusade was carried on.
- 5. Why the crusade faild.
- 6. How did the crusade affect commerce and industry.

# Grade 6.

**Purpose:** To reproduce from a biografical point of view some of the most interesting aspects of the life of those pioneers in America who were the forerunners of the western expansion. **Content:** 

I.—How the Dutch gaind a foothold in America.

II.—How the French explored the basin of the St. Lawrence and the Mississippi Valley.

- 1. The fur-traders-Radisson.
- 2. The Jesuits-Marquette.
- 3. La Salle.

III.—The Westward Movement.

- 1. How the English came to gain a foothold.
- 2. How they gaind the lead.
- 3. How the Ohio Valley was settled—Boone; Clarke.
- 4. How the Rocky Mountain region was settld.
  - a. How people lernd about it. Coronado. Lewis and Clark, Fremont, Kit Carson.
  - b. How people reacht this region.
  - c. How they got along with the Indians.
  - d. How they made a living. The discovery of gold; grazing and agriculture; the Union Colony.

## Grade 7.

This grade includes a systematic study of the history of the United States from the beginning of the Revolutionary War to the close of the Civil War. The work is organized under a number of large problems, among the most significant of which ar the folloing:

1. How the people were living in the Colonies at the outbreak of the Revolutionary War.

- 2. How the Colonies came to wish for more freedom.
- 3. How the Colonies became independent.
- 4. How a new government was inaugurated.

5. What promis the United States gave, in 1790, of becoming a great nation. 6. What the most important problems were which confronted the new government.

7. How the nation lookt to its development.

8. How the North and South developt divergent interests and went to war.

## Grade 8.

The work of this year comprises a somewhat intensiv study of the history of the United States from the time of the Civil War. The purpose is to giv insight into present day conditions and problems. A part of this year is reserved for the study of Civics. The history is organized under the folloing hedings:

I. How the cuntry recoverd from the Civil War.

II. How the West developt.

III. How the United States became a world power.

IV. What the problems ar today.

- 1. How to improve agricultural conditions.
- 2. How to develop manufacturing.
- 3. How to improve facilities for transportation.
- 4. How to conserv national resources.
- 5. How to deal with labor problems.
- 6. How to provide for education.
- 7. How to safeguard the helth of the people.
- 8. How to deal with immigration and alien peoples in the United States.

#### Civics.

A course in civics is givn for one term a year in the seventh and eighth grades. The purpose of this course is to help the children to appreciate the conditions of community life and to stimulate a spirit of co-operation in civic improvement.

The value of this course depends largely upon the method of approach. The problems studied should be vitally related to the everyday interests and observations of the yung peo-

ple. The folloing principles governing the organization of the subject-matter and the methods of instruction may be suggestiv to the teacher:

1. The curriculum shal consist of problems rather than topics.

2. The problems shal be vital and significant to the pupils.

3. The approach to the problem shal consider the aspect which appeals most strongly to the pupils.

4. This course should culminate in such conduct as wil expres a high regard for civic co-operation and obligations.

The foloing outline is illustrativ of the scope and treatment of the problems to be considerd in this course:

# Grade 7.

I. How can the public secure efficient servis thru transportation?

1. By Streets.—How adequate ar they as regards size, number, surface conditions, lighting, signs, etc.? How efficient is the street-car servis as regards time, safety, cost, etc.? What auto servis exists, and how might it be improvd? What is the nature of the delivery servis, and how satisfactory is it?

2. By Roads.—How adequate ar they for traffic? (See problems suggested under 1.) By whom are they kept up?

3. By railroads.—How satisfactory ar they as regards train connections, location, and protection of crossings, depot servis?

II. How can the public secure efficient servis for the protection of life and property?

1. How ar citizens protected from ignorant and unruly persons?

2. How is property protected from fire?

3. How ar titles to property safeguarded?

III. How shal a city be made beautiful?

1. What shal be done with the rubbish?

2. What signs and billboards shal be permitted?

3. How shal houses, streets, lawns, parks, and vacant lots be made attractiv?

IV. What provisions shal be made for recreation and rest?

V. How is money provided to defray the cost of public servis?

(Charts of the factors of civic organization should be workt out as the problems ar solvd, and a thoro summary in terms of the function of these factors should close the course.)

#### Grade 8.

I. How can the public protect itself from dangers to helth arising from the production, transportation, and distribution of foods?

These problems should be workt out in connection with the study of foods that ar most used or that ar most liable to contamination, such as water, milk, butter, bred, meat, egs, and typical fruits and vegetables. Each problem should be approacht from the standpoint of the pupil's actual experience in dealing with the foods. This experience should be enlarged by further observations and experimental work when possible.

II. How can the public protect itself as regards its clothing supply?

1. In regard to the matter of construction of bildings.

2. For the securing of cleanlines.

3. For the protection of life and helth of employees.

4. To prevent the adulteration of goods.

III. How does the public regulate the cost of food and clothing?

1. By legislation affecting trusts.

2. By patents of inventions.

3. By control of facilities for transportation and communication—railroads, telefones, telegraf. The functional study of civics as described in the foregoing is folloed by a formal review of the points taken up, and a logical sequence is workt out.

# Geografy.

Varius aspects of geografy should be presented in the elementary scool. First, it should be descriptiv geografy, for we do most of our traveling in the geografy course. When properly taut with a welth of pictures, specimens, and other illustrativ material, this subject can be made to serv most of the advantages of real travel.

Secondly, the dynamic side of geografy should be emfasized. For example, the hils wear down and giv way to plains; the ice age givs way to a temperate climate. Facts like these emfasize in the child's mind that he is living in a shifting, changing world, ever presenting new problems to solv.

Thirdly, the causal side of geografy should be strest. The child in the upper grades, at least, should be asked the "why" at every turn until he instinctivly looks for the "why" himself. The child who has the question "why" postponed until he studies the natural siences in the high scool has past that plastic period where the questioning attitude wil for all time stamp itself upon his mental outlook. Besides, few children reach the high scool, and no subject in the grades asks so many "whys" as geografy.

Finally, the geografy course should be the real geografy of every-day experience rather than the too often outworn material of the text-book. When the pupil steps out into life, he should find the geografy of the world about him of the same texture and material as the geografy of the scool.

For the convenience of the teacher, some reference material is suggested for the different grades. The attention of teachers in the Training Scool is calld to the Colorado State Course of Study in Geografy and to the Museum catalog of The State Teachers College; also the Tarr and McMurry geografies, and to the welth of material for children in geografical readers and magazines.

#### Grades 1 and 2.

The history, nature-study, English, and geografy in these grades ar so closely connected that no special mention need

be made here of the geografy work as such. The garden work, the constructiv period, the sand table, can all be made a medium for incidental expression in this line.

# Grade 3.

The geografy work of the third grade is very simple and often closely connected with nature-study. Thru informal studies of the food products of the immediate locality, based upon results of garden work, observation of farm life and the home table; thru studies of common bilding materials involving excursions to lumber yard and to bildings in different stages of construction; and thru studies of materials for clothing, etc., an effort is made to giv the pupil some idea of the relation of these products to the life of the people of the community, and to interest him in the lives of people of other cuntries. Simple observations ar made of the direction of winds, of time of sunrise and sunsets and of varius features of the local environment.

#### Grade 4.

In this grade the geografy is approacht thru the actual experience with the industrial life which centers around the home environment, including the manufacturing of beet sugar. Field trips ar taken. In the scool the children take part in making sugar, starch, and in canning food stufs raisd by them in the scool garden. The children lern the relation of the local environment to the growth of these products.

This local geografy is folloed by the study of varius human types and their environment, as, for example, the Eskimo and his dog in the ice desert; the Lapp and his reindeer in the tundra desert; the African and the Filipino in their tropical surroundings; the Chinese and the Japanese as examples of Oriental peoples. The North American Indian, and the pioner of the western United States ar included in this study.

The work starts from the descriptiv and the human-interest standpoint and works backward to the relation of man to his environmental controls. While the study of the people with their varius caracteristics and activities thus forms the chief center of study in this year's work, the pupils lern to understand environmental controls in relation to the life of a people.

# GREELEY, COLORADO

A welth of illustrativ material is drawn upon,—pictures, museum specimens, etc. The children collect and exhibit the varius products studied. The sand table is in constant use for modeling, as such work givs a sense of unity in the final rounding out of any aspect of this subject.

References for the teacher: Herbertson, Man and His Work; Ratzel, History of Mankind; Vols. 1, 2, and 3; Ward, Climate; Semple, Influence of Geographical Environment; Hardy, Introduction to Plant Geography; Newbigin, Animal Geography; Palmer, Beet Sugar Industry of the United States; Johnston, Chemistry of Common Life; McMurtrie, Report on Culture of Sugar Beets; Buffin, Irrigation.

# Grade 5.

The work of this grade centers in Europe. The geografy of the different cuntries is approacht from the standpoint of the activities, industries, etc., of the people; that is, from the standpoint of the child's interest; and the structural features of the cuntry ar studied insofar as they thro light upon the life and occupations of the inhabitants. For example, the study of Holland may be introduced with some such problem as, "Why is Holland a great dairy cuntry?" A study of this problem wil not only raise many questions about the life of the people, but wil also thro much light upon the climate and topografy of the cuntry.

Again, the Norwegian might be studied in his little fishing village at the hed of the fiord, and after a short descriptiv study the pupils might be askt, "Why is the Norwegian in so many cases a fisherman instead of a farmer?" This approach would giv a clu to the rock-bound soil, the cold, foggy climate and the great fishing banks off his shores.

To aid the teacher in making a systematic study of any such units of subject-matter it may be helpful first to organize the material in the usual logical text-book fashion and then to translate it into terms of the child's interest and experience.

In summarizing, the continent of Europe is studied as a unit. Products, industries, cities, rivers, etc., ar located reggionally without reference to national boundaries. One device used is to fil in outline maps, locating the industries, or what not, in crayon or with samples of the products them-

selvs. This method servs the double purpose of, on the one hand, unifying the study of the different cuntries, and on the other hand, emphasizing more fully by constant comparison the likenesses and differences of the varius peoples as wel as impressing more fully upon the minds of the children the picture desirable to be left.

In studying Europe the teacher should be acquainted with the resources the scool offers. Use should be made of the two splendid relief maps in the geografic museum. Among the available reference material is the foloing: Mill's International Geografy, pp. 123-419; L. N. Lyde, The Continent of Europe; MacKinder, Britain and the British Sea; Partsch, Central Europe; Hogarth, Nearer East; Adams, Commercial Geografy; Chisholm's Commercial Geografy; Ripley, Races of Europe; State Course of Study, Sept., 1914., pp. 108-9.

## Grade 6.

In this grade North America is taken up. The teacher should not spend too much of the year upon the geografy of the United States to the neglect of the West Indias, Mexico, Central America, Canada, and New Foundland.

The life, both commercial and cultural, in this grade, is best studied by centering it around an industry typical of some climatic or industrial region which is found the world over. In this way the United States is divided into a number of sections caracterized by certain typical products and forms of industry, such as the cotton or sugar industry in the South, or fruit raising in California. Such activities ar usually made the means of approach to the study of the varius sections. This necessitates the study of their fysical caracteristics, such as climatic conditions, surfac features, soil, etc.

In this way the pupils build up pictures of the conditions under which an industry is carried on. This knolege is later further amplified by a comparison of similar industrial regions in other cuntries. For example, after getting the climatic and economic setting of orange culture in Florida, pupils ar able to infer that somewhat similar conditions must prevail in other cuntries where oranges ar raisd, such as Paraguay, China, East Australia and Natal. Or the cowboy life of Colorado helps pupils to interpret the South American Guancho or the Russian Cossack. Much of this comparison, however, wil be more effectiv when the children take up the study of these other cuntries.

References for teachers: Bartholomew, School Economic Atlas (see product maps in back); Mill, International Geography, pp. 664-812; Hardy, Introduction to Plant Geography; Newbigin, Animal Geography; Freeman and Chandler, World's Commercial Products; Museum Catalog, State Teachers College (frequent use to be made of specimens).

# Grade 7.

The work of the seventh grade consists in interpreting South America, Asia, Africa, and Australia in terms of their relations with the United States. The most significant, tangible relation is probably that of trade. A problem provokes better thinking than a topic; therefore, broad, comprehensiv problems demanding for their solution all the necessary facts ordinarily taut in seventh year geografy courses, ar made the basis for the work.

A problem of live interest at the present time is most stimulating and worth while, and in so far as is possible, the problems ar of present significance.

Illustrativ problems which under present conditions ar much worth while:

I. How much does South American commerce mean to you—to the United States—to South America? Why and how does South America raise and make these things? How do we get them?

II. What should be the attitude of our people toward Asiatic immigration? Study the Japanese, Chineses, etc., near here: the work they do, how they happen to do such kinds of work in our cuntry, whether determind by labor needs or work and training which they get in their own cuntries; to what extent they enter into American life, and why; the experience California has had with them; reasons for any restrictions as affected by conditions in their own cuntry in Asia. Other small problems may wel be used in addition.

III. Why is Africa called the "Dark Continent?" How much might she mean to us if she were more of a commercial power? Has she the possibilities for becoming such a power? IV. To whom does Australia belong? Why? How much does she mean to that nation?

V. Islands of the sea-how were they made? How did they become peopled? How valuable ar they?

# Grade 8.

A course in commercial geografy occupies one term of the eighth grade year. The commercial relations of the United States to the rest of the world form the central topic of the study.

Important articles of trade, such as food, forest, and mine products ar studied in their geografical distribution, their proportionate amounts, and their importance as articles of export and import. Grafs showing relationship ar extensivly used, since figures, as such, hav but little significance in the interpretation of conditions. The part which the United States plays in the exchange of commodities is dwelt upon, the chief markets of the world ar determind, and constant comparisons between this cuntry and other world powers ar an important feature of the work. Fysiografic and climatic factors ar introduced only in so far as they thro light upon problems under discussion.

References: State Course of Study in Geography; Teachers College Museum Catalog; Freeman and Chandler, World's Commercial Products; Toothaker, Commercial Raw Materials; Longman, School Atlas; Bartholomew, School Economic Atlas.

#### ARITHMETIC.

# Grades 1 and 2.

Number instruction in the first two years is informal. Facts ar presented in genetic order i. e., in harmony with the pupil's instinctiv tendencies, such as play, imitation construction, rythm, etc.

First, is the lerning of the number series by ones and later by twos. The rythmic instinct is appeald to in number rymes and songs, counting-out games, etc. The children lern to count objects about them—books, pencils, boxes, tables, desks, chairs, boys, girls, and many others. The use of weights and measures, especially the pint and quart, affords other opportunities for teaching numbers.

# GREELEY, COLORADO

In construction work the use of the rules brings in a recognition of the inch. Use is made of it for simple additions, and of the half and the quarter in fractions. Games with bean bags, ten pins, dominoes, etc., ar used to fix the simple number facts. These afford good motivs as wel for drils in number combinations, and in riting numbers. Use of symbols is not strest until there is need for them, but incidentally a child lerns to kno the pages of a book, house and street numbers, figures in the calendar and on the clock.

## Grade 3.

The objectiv point of this year's work is the mastery of simple combinations in the four fundamental processes. Children begin the combinations by taking a whole and separating it into its parts. Columns of figures ar added as soon as enuf combination facts hav been lernd. Subtraction is taut simultaneously with addition by the Austrian method.

The multiplication table is bilt up rationally with objects such as inch cubes or sticks. Denominate number tables ar also good for this purpose, such as pints and quarts to teach the two's, and feet and yards to teach the three's. Division is not taut separate from multiplication, e. g., What two numbers multiplied make 18? Eighteen divided by 2 is? by 3? by 9? by 6? As soon as pupils lern a few combinations in multiplication or division, they ar givn practis in problems involving these processes.

Concrete material is used freely in teaching the combinations. Inch cubes, marbles, denominate measuring units, money, and number charts and cards ar examples of such material. Games ar also utilized, such as playing store, and number card games similar to flinch. Much weighing and mesuring is done. Application of number facts to gardening and construction is made when possible. The reading and riting of numbers up to 10,000 is taut.

Much stres is placed upon quick, snappy drils. Flash cards, revolving circles, and visualizing cards ar some of the devices used. Oral dril is a daily practis. Frequent tests sho where dril is most needed.

# Grade 4.

The subject matter of this grade is a more extensiv study of the four fundamental operations. The multiplication tables ar completed. Long division is introduced.

Many problems relating to life outside of scool ar used for practis, such as computing household expenses for groceries, milk, meat, etc., or the cost of raising a field of beets, onions, or potatoes. Planning for putting in the scool gardens furnishes mathematical material. Problems ar bilt around the canning experiments which take place in the room. Special holidays afford suggestions for good problems, such as finding the cost of Thanksgiving dinner for five persons. The more common denominate tables of mesure ar now masterd. Rapid oral and ritten dril is now a matter of daily practis.

## Grade 5.

In addition to the review of the four fundamental operations, the study of common and decimal fractions constitutes the main portion of the year's work.

The motivation for much of this work is found in the other scool studies and in the interests connected with home life. Problems involving the use of fractions occur in estimating the amount of lumber needed to make a sled or a book rack, shelves, etc., in their manual training, or the cost of material for caps and aprons for use in the domestic sience laboratory. Need of decimals wil also arise in connection with the use of lumber as it is usually quoted at so much per thousand feet. Figuring a bil of lumber for a board walk, street signs, etc., affords problems of this kind.

After an interesting problem has been found, the next question is to determine the method of its solution. All such work is made objectiv by the use of objects and drawings. Rules ar formulated only after much practis in objectifying the proces.

Work on the tables of denominate numbers is continued and applied more fully. Measuring lumber, for example, is taut objectively. A board foot of lumber is used to sho its meaning. Other pieces of different sizes each containing a board foot, ar also used. Then the children measure and compute the board feet contained in varius pieces of boards.

## GREELEY, COLORADO

Drils of this grade include the simple fractions. Much of this is oral. Work in the four fundamental operations is enlarged, and emphasis is placed on speed and accuracy. Clas contests seem to stimulate interest in dril work.

## Grade 6

The work of this grade covers largely the same ground as the fifth, but the aim is to mecanize the processes and to get a firmer grasp of the principles. A thoro review is made at the beginning of the year of the fifth grade work.

Notation and numeration ar reviewd. The place values of digits ar applied in the reading and riting of numbers. Decimals ar shown to be an extension of the decimal scale downward beyond units place.

During the year the children become habituated to checking results. Casting out the nines is a good means for this purpose, and the children use it continually.

The four fundamental processes in fractions receiv a large amount of dril. The children ar taut a method of finding a common denominator other than by inspection. Constant use is made of cancellation.

In decimals attention is devoted to proper placing of the decimal point in problems of multiplication and division. One good method is enuf to teach. Reduction of fractions is taut, including the reduction of common fractions to decimal and decimal to common.

Work in finding areas is reviewd and extended; also a review of board mesure is made. Much of the review work of this grade is done thru the application of the principles alredy lernd to practical problems within the experience of the children. Pupils keep personal account books of their own receipts and expenditures. Problems may be based upon the busines of the grocer, the blacksmith, the dairyman, the farmer, the dry goods merchant and the housekeeper.

## Grade 7.

The greater part of the year is devoted to getting a clear idea of the meaning and of the varius applications of percentage. The subject is taken up inductivly. There ar no set rules or formulas given at the beginning. These gro out

of the experiences gaind in dealing with practical situations.

The approach to the subject is made thru the study of some busines activity, such as a grocery store. Teacher and children, for example, visit a wholesale grocery; make out an imaginery set of purchases for a stock of goods, upon which they ar allowd discount for cash; arrange to sel their goods for a certain per cent of profit; figure out the taxes and insurance uon their store bilding and stock, etc. In such ways numberles practical applications of percentage may be found in community activities within the range of the children's experience. After the concrete problems ar solvd, the children formulate the rules of percentage.

As in previus years, emfasis is placed upon quick, brisk dril, oral and ritten, upon the arithmetical operations lernd. The children also continu their training in keeping personal accounts of money received and expended.

#### Grade 8.

The work of this year begins with a careful and systematic review of the fundamental operations in integers, and common and decimal fractions. The remaining work of the year is gatherd around some large topic or topics of special interest with a view to realizing the principles of arithmetic alredy lernd, thru their application to significant practical problems. Some advanst work is also introduced.

As illustrativ of the larger topics used for this year's work, the planning of a five room cottage is undertaken. This involves a study of the legal description of the land, the platting of city lots, and the principles of land conveyances, blank deed. abstracts of title, mortgages, deeds of trust, etc. The drawings made by the pupils ar supplemented by a complete set from the mecanical drawing department. In extending the cost of construction the pupils take up such problems as the expense of excavation, laying of the foundation, of lumber. plastering, painting, decorating, and cement side walks. The cost of plumbing, lighting, and heating may be added. The question of insurance and taxes, and the desirability of investment in such a residence opens up new fields for arithmetic work.

The year closes with a brief review of the essentials of arithmetic, stres being placed upon speed and accuracy in the

## GREELEY, COLORADO

processes studied. Considerable attention is givn to mental arithmetic and to the use of short cuts whenever possible.

## MUSIC.

The function of music in the scool is two-fold: first, to develop the latent talent of the child that he may lern to appreciate fully music thru a moderately thoro understanding of the subject based upon his own participation in the work of the class; and, second, to create a love for the beautiful in music and to make intelligent listeners of all the children by having them lern to kno the worth-while in music through hearing as frequently as possible the compositions worthy of being brought before them.

In every grade one day a week is set aside for a lesson in appreciation of music in which either some member of the musical faculty appears to present a short program or the talking machine is brought in to make the children familiar with some musical masterpiece.

#### Grade 1.

Thru the varius fazes of the work in the first grade the child becomes acquainted with some of the general caracteristics of music from the point of view both of appreciation and expression. Musical taste, the emotional reaction purpost by the composer rather than the knolege of musical tools, form the aim of the work. Wel chosen instrumental and vocal selections ar givn for the development of appreciation. Rote songs and rythmic exercises enhance this training on the side of expression, both original and imitativ. More specific ear and tone work may be given as needed thru games and by dril on difficult frases.

### Grade 2.

In teaching music in the second grade, we attempt to giv the children opportunity to expres rythmic feeling. The rythm of the song may be clapt, or some children may sing while others walk, stepping in time to the music. In order to do this, it is necessary to note the relation which the accented tones hav to the unaccented, and to take cognizance of the pulses in each mesure. Such rythmical observations and ex-

pressions ar fundamental with reference to musical movement. We try to hav the pupils discover for themselvs that in marking time with music a stres occurs, and to represent such accented note by slight stres on the left foot. They afterward sho this movement with the hand. Always the emfasis is placed first, upon rythmic thinking; second, upon organized rythmic movement exprest in clapping, walking, varius hand movements, and the folk dance.

In song work, this same principle of musical thinking before expression in singing obtains. The relation between the words of the song and the musical setting is observed by the pupils; the variation in tone quality appealing to the ear first exprest vocally in song.

## Grade 3.

Music, like all other content subjects, should gro in significance with the greater maturity of the children. Rote singing stil forms a prominent feature of the work of this grade, and many songs ar taut, which should gro in interpretiv expression, artistic finish, and independent thought work. In order to accomplish this, some training is givn in voice and rythm in connection with the songs taut. The thinking of musical intervals becomes necessary; reading of simple songs from blackboard and books is taken up; and the valu of signatures, of notes and rests, etc., is dwelt upon incidentally.

#### Grade 4.

In this grade the more formal work in the tecnical study of music is begun,—the eight common keys ar studied thru the singing of carefully selected songs and exercises from the book and blackboard, always keeping the too formal explanation of tecnical dificulties subservient to an effort to keep the spirit of the song alive while driving home the musical fact. Any seasonal songs that ar particularly appropriate ar introduced and taut by rote, and great care is taken to guard the voices of the children from being straind or forced.

#### Grade 5.

The work in sight reading is continued with songs and exercises of increast difficulty. The purpose is to lay a good

# GREELEY, COLORADO

foundation in the rudiments of notation, and to giv a keen grasp of the varius skips and intervals in this grade upon which to bild for the remaining three years of the grammar grades. Two-part singing is introduced and made much of, especially during the last two terms of the scool year.

## Grade 6.

Constant practis in the singing and reading of many songs is continued. A simple explanation of the position of the sharps and flats is givn, and the minor mode is made clear. Members of the clas occasionally make reports upon the biografies of standard composers as a preface to a study of their compositions. Three-part singing is taken up the latter part of the year.

## Grades 7 and 8

Continuation of corus singing; the bass clef introduced. The material is pickt with special reference to holding the interest of the boys at this crucial time in their musical career. The work in musical appreciation is emphasized with the hope of having the pupils familiar with as many as possible of standard concert numbers before they leav the eighth grade. Frequent programs ar givn in which the members of the clas who ar able to play or sing solos acceptably may appear before the clas. Every year when it is at all possible the eighth grade pupils present an operetta before the scool. A scool band is maintaind, which keeps many of the boys interested.

## ART.

Design and construction ar emfasized in this department. Pictorial drawing is taut as an aid to design and construction and to intensify the pupil's appreciation of the beautiful. Pupils who sho a special interest in pictorial drawing ar encouraged to do special work of this kind. All of the work is pland to correlate with the daily activities of the pupil and with the other subjects of the scool curriculum.

# Grades 1 and 2.

**Purpose:** To develop the pupil in freedom of expression, to stimulate his love for the beautiful, and to disciplin his powers of observation.

**Design:** The use of units, borders, surface designs, and decorations for objects, such as portfolios and booklets. The units ar derived mainly from animal and plant forms. Freehand rythmic borders, stick printing, and color study.

**Pictorial Drawing:** Free illustration, memory drawing, simple landscapes in water color or crayons. Freehand cutting and tearing, picture study.

**Construction:** Clay modeling, raffia work, paper cutting, outdoor construction, sand table work.

#### Grades 3, 4, and 5.

**Purpose:** To develop the pupil's originality; to increase his tecnical skil, and to stimulate his appreciation of art and of nature.

**Desgin:** The pupils ar expected to sho more originality and taste with some consideration for suitable application of design; the decoration of holiday gifts; rythmic borders; study of color, including simple value scales; cutting of design units in paper stencils; lettering.

**Construction:** Use of the rule, with measurements involving half and quarter inches; raffia work; clay modeling; booklet making.

**Pictorial Drawing:** Picture study; nature drawing including studies of flowers, fruits, and landscapes; object drawing; illustrations in drawing and cutting; memory drawing; study of color, crayons, pencil, charcoal and brush and ink ar used.

## Grades 6, 7 and 8.

**Purpose:** To train the pupil to appreciate and select good design in wel-made common articles; to develop accuracy and good workmanship; to intensify the pupil's appreciation of art in all its fazes.

**Design:** Design in its relation to the home and the community; borders and surface designs using conventionalized motifs; with careful study of line, space division, values and color; book covers and posters with lettering and ornamental initials; interior decoration; theory of color.

**Construction:** Basketry, clay modeling, the decoration of table runners, pillow covers, etc., by block printing; card board construction.

**Pictorial Drawing:** Study of perspectiv; drawing from memory; rapid sketching; pictorial composition; nature drawing.

Picture Study.—In each grade a number of good pictures ar selectd for study. In this way the children in the eight grades of the elementary scool get acquainted with a large number of good pictures suitable to their ages, and gain markedly in art appreciation. The children ar encouraged to make collections of the reproductions of the pictures studied.

# NATURE STUDY.

Nature study aims to place the child in first-hand sympathetic tuch with nature, by putting him in intimate contact with the common things of the everyday world in which he livs. This can only come where first-hand, discriminating, accurate observations ar made, and where, more than this, some atempt is made to hav the children grasp the significance of the facts observd, to relate these to the other things they hav lernd, and to their own activities.

We believ that the commonest things of the out-door world form the best material for nature study; that the hils and plains, the streams, lakes, and sky, and all that livs there, hold many secrets, which ar all the more mysterius because they ar so familiar; and which ar all the more valuable, because they ar so near to the child.

The scool garden is one of the best laboratories for the study of nature. Here first-hand observations can be made and first-hand training in turning soil, planting and rearing plants, can be given. Here, in addition, a large greenhouse offers many opportunities for the study of plants in winter, while the poultry yard is another source of valuable laboratory lessons. Everywhere, with everything, direct, first-hand observation by the children is emfasized, with the attempt to hav these interpret the significance of the facts lernd as wel. The structural side is not considerd very much, but the functional side of evrything is emfasized, tho this is not pursued to the extreme to find a use for everything.

In general, the folloing procedure is folloed in the nature study lessons: 1. Direct observation of the object as it is, as it livs, and in relation to the other things of its environment.

2. The important fact is lookt for.

3. The significance of the fact.

4. The relation to other facts that may hav been lernd. The inquiry left in the mind of the pupil.

In the lower grades, the work is mainly observational, and concerns itself with acquaintanceship with the commonest animals, plants and inanimate things of the child's everyday world. As the child grows older, more stres is laid upon the significance of the simpler facts observd, until, in the upper grades the entire procedure given is folloed. Here, too, the agricultural side is brought in in the relation of nature study to agriculture. In the eighth grade actual practis is given in groing crops, and caring for animals, while other fazes or industries of agriculture ar studied. The work is so outlined that there is no repetition, altho the same material may be used in several grades, for different fazes and relationships may be studied. The folloing is a suggestiv outline shoing somewhat the scope of the work:

Lower Grades—Fall and Winter.—Fall work in the garden; The maturing of growth; The offis of the flower; The production of seed; Collecting seeds; The harvest; The harvest on the farm; Dispersal of seeds and fruits; Uses of fruits; The storage of crops; Preparations for winter; The ripening of growth in plants; Autumnal coloring and the fall of leavs; How plants spend the winter; The cutting off of the food supply for animals; The migration of birds; Insect studies; Insect homes; How the reptils spend the winter; How the four-footed animals spend the winter.

Wether observations; Studies of the skies; Sno, frost, ice; The clas calendar; Winter studies of trees; The nonmigratory birds; Birds from more northerly regions; Mountain birds that spend the winters here; Hibernation of animals; The preparations of the farmer for winter; Winter occupations of the farmer; Domestic animals; The poultry yard; Studies of chickens, pigeons, turkeys, horses, swine, sheep and cows; Studies of domestic pests; Bird and animal protection; Winter feeding of birds; Work in the greenhouse; The germination of seeds; The growth of plants,

Spring and Summer .--- The return of spring; Temperature changes and their effects on all nature; The growth of trees and plants-budding and blooming of trees; Studies of buds and leavs; Preparations on the farm; Plowing, harroing and fitting the land: Planting of erly crops: The effect of the winter on all life of the farm: Garden preparations: Thoro fitting of the soil: Preparation for erly crops; Planting of erly salad and flower crops; Planting of tender crops in greenhouse or hotbed and transplanting to garden: Cultivation and watering of gardens; Care of same; Enemies; Insect pests; Weeds; Names and recognition of nativ flowering plants; Arbor Day celebration: Planting of trees and shrubs in home and scool; The improvement of the home grounds: Cleaning up the home grounds; Planting; The return of the birds; Recognition and names; Studies of song and plumage; Nest bilding and rearing of young; Food getting; Life habits; Life habits of the commoner four-footed animals of field and home.

Upper Grades—Fall and Winter.—Insect studies; offises of flowers; Relation of insects to seed and fruit production; Studies of caterpillars and larvae; Insect homes; Economic aspects; The destruction of harmful species; Spraying for biting and sucking insects; Insects that destroy stored grains; Birds as insect destroyers; Migration of birds; Birds as weed destroyers; Adaptations of flowers to secure insect visitations to the flower; Adaptations of seeds and fruits to insure dispersal; Protectiv adaptations of plants, of insects; Principal crops of the region; How grown; Their harvest, storage, sale, and use; Harvest of crops grown in scool garden; Preparation for market or table; Storage; Fall operations of the garden; Seed collection and selection; Preparation on the farm for winter; Feeding of animals; Winter preparations of the soil.

How animals spend the winter; Food for winter, storage of; Manner of getting thru winter; Protectiv adaptations; Winter pelage of the fur-bearers; Winter habits; Relation of birds and mammals to man; studies of animal tracks; Study of the rodents; Game laws; Protection of animals; Destruction of harmful species; Winter studies of trees; Identification by winter caracteristics; Adaptations of plants for conserving moisture; Studies of the evergreens; The soils of the region; Effect of elements in soil making; Wind and water

as carriers of soil; The work of plants in making soil; The plant in relation to the soil; Adaptations of plants to the soil; Uses of soil; Elementary studies of plant fysiology; Movements of plants; How plants get their food; Propagation of plants; Experiments to determin soil properties.

**Spring—The Return of Spring.**—Wether changes and effect on all nature; The relation of climate to crops grown; The changes in plant life; The budding and blooming of trees; Studies of plant societies and adaptations; Studies of fishes and reptils; The return of the birds; Bird calendar; Spring plumage of birds; Song; Nests and rearing of young; Food and manner of getting; Economic bird studies; Bird protection.

Spring plowing; Valu of thoro fitting of the land; Planting of crops; Subsequent cultivation; Cultivation to kil weeds and to conserv moisture; Similar preparations in the garden; Planting of erly crops and their care; Preparation for special crops.

Studies of dairy breeds of cattle; Care and handling of milk; The milk test; Water supply of the farm; Danger of contamination; Sanitation on the farm.

Poultry; The eg breeds and meat breeds; Feeding for these purposes; Construction of poultry houses; Care; Rearing of young; Improvement of home grounds in city and cuntry; Orderlines and clenlines the first means; Subsequent improvement and beautification; Varieties of shrubs and trees best suited for the region; Arbor Day; Planting of trees and shrubs in the home grounds; Civic improvement.

#### SPELLING.

In the first two grades spelling is taut for the most part in connection with reading, fonics and ritten language. Drils in word recognition, fonic analysis, and riting, assist in fixing the order of letters in the mind. From the third grade on, formal drils in spelling ar more sharply differentiated from the incidental instruction that occurs in connection with other studies.

In the dril work it is the function of the teacher not merely to hear the children recite words which they hav lernd by their own devices, but to train them to spel. The words se-

lected for the spelling lesson ar chosen from words in which errors hav occurd in the ritten work of the children or in which experience has shown errors ar likely to occur. The teacher is requested to check up the words used by comparison with those found in a standard speller.

The instruction in spelling consist of three parts.-the development of the new words, the dril exercise, and the correction of errors. In introducing new words an attempt is made to make the meaning clear if the children ar not alredy familiar with them. The words are ritten upon the board one at a time, preferably subdivided into syllables or larger parts. The meanings of the words ar developt if they ar not alredy known, and the children ar required to use them in sentences. To facilitate the task of lerning to spel, the familiar parts of the words may be pointed out, for example, "disease" ritten "dis-ease," different letters or combinations of letters (not more than one or two in a word) may be alterd in size, color, and form, or on the other hand the congruity of the spelling and the pronunciation may be brought to the mind of the child. Rules for spelling ar applied wher practicable. In the development part of the lesson also words in which mistakes were made in the previus spelling lesson ar treated as new words in so far as consideration of their form is concerned. If preferrd, this analysis of the form of the word may be reservd for words in which errors hav occurd in the previus spelling lesson.

In the dril exercise each word is ritten, preferably on a sheet of white cardboard, with a rubber pen and in black ink. All words ar presented in script. The chief points to be observed in the dril process ar the folloing:

1. One word only should be presented at a time and a preparatory signal should be given about two seconds before it is exposed.

2. The time of exposure should be so brief as not to allow the attention to flag. The time should be varied with the nature of the word and the grade, from probably five to ten seconds.

3. When the word is shown it should be pronouncst twice, first with a short pause, and then as a whole.

4. After the children hav seen the word, they should be given some time to recall it in a purely memorial fashion, using whatever kind of memory they prefer.

5. If the word is difficult it might be advantageus to sho it a second time with a second memorial recall.

6. The children reproduce the word in riting. It may be best to rite the word in parts.

(Teachers who desire to do so may try using the oral method in the reproduction as wel as the ritten, and also the oral method in the impression. It is desirable, however, that these methods shal be tried at different times and that the teacher shal try to determin the merits of using the oral presentation and reproduction as compared with the method described above.)

7. The time for this reproduction shal be as short as possible, from five to ten seconds is suggested.

8. After this, or the next day, the words should be dictated and ritten as wholes.

9. The words should not be presented more than once or twice during the same lesson. Errors should be corrected before a second presentation is made.

It is desirable to dril upon a comparativly small number of new words each day, probably from two to five. In addition, from five to ten old words should be revued by the same method. The old words, especially those that giv trouble, should be revued daily until they are thoroly masterd. After this they may be tested at increasingly long intervals in dictation exercises.

The correction of errors may be accomplisht in varius ways, but must not be neglected. Emfasis should be directed to the correct forms rather than to the incorrect. Hence, a record should be made by the teacher to the words which ar misspeld and these, as alredy indicated, should be taken up again for careful study and dril on the succeeding day. Notis should be taken of the kinds of errors made by individual children and their attention calld to these where a knoledge of the error would be helpful to the child.

A few of the more important rules for spelling should be taut inductivly and applied to all new words to which they ar applicable until they can be redily used by the children. Attention may be calld particularly to rules for adding suffixes to words ending in silent "e," and to monosyllables ending in a single consonant preceded by a single vowel; also to the order of the letters "e" and "i" in the digraph "ei" or "ie"; as well as to the rules for forming the more difficult plurals of nouns.

Homonyms should be taut together, attention being calld to the different spelling of the same sound.

#### RITING.

In the first and second grades riting is confined to work on the blackboard or large sheets of paper. Words and short sentences, closely related to the reading, story telling, and other thought studies of the children, ar chosen for their ritten expression. The children rite with the whole arm or forearm movement rather than with the fingers. Beginning in the third grade and continuing thru the eighth grade riting is given a place on the daily program with definit instruction and dril. The lessons pland hav a definit relation to the children's needs, ascertaind by a study of the ritten exer-Words or sentences which constitute the largest part cises. of the dril lessons ar ritten on the board for visualization. They ar then erased and the children rite from memory. Letters that hav been poorly formd may be selected for dril, Formal exercises in making ovals, loops, etc., at the beginning of the riting period, if used, must hav definit relation to the letters or words to be ritten in the lesson that folloes and must be used with a specific purpose in view.

The pupil should sit directly facing his desk, both arms on the desk nearly to the elbows, both feet on the floor, hed erect, chest up; any bending forward should be from the hips. The left hand should hold the paper firm. The right arm should rest on the fleshy part of the forearm and the nails of the third and fourth fingers; no other part of the hand or wrist should tuch the paper. The flat part of the wrist should be parallel with the plane of the desk top. The paper should lie obliquely so that the long edge is parallel to the direction of the forearm. The pen should lie between the nuckles of the thum and first finger, and should point toward the right shoulder. The forearm movement is to be used. Children should be encouraged to practis at as high a rate of speed as is consistent with acceptable work.

The teacher should giv each pupil some personal attention every day, trying to get him to criticise his own work. He must appreciate his trouble and consistently try to remedy it. Careles and unintelligent practis only fixes wrong forms. A pupil should sho immediate and markt improvement after receiving the teacher's help.

Every two weeks specimens of the pupil's riting ar to be taken. These ar to be measured by the Ayers scale and filed for future comparison.

In all subjects in which the children use riting, the teachers ar chargd with the responsibility of insisting on the use of the correct position, movement, and form.

## MANUAL TRAINING.

#### Grade 1.

The work done in the first grade is entirely suggested by the subjects developt in the regular lessons along the lines of history, literature, nature study, etc.

In connection with the history work on the development of the home, the children bild and furnish a playhouse of four rooms, cook for Thanksgiving, make decorations and presents for the Christmas tree, and dres clothespins and paper dols. Many representativ senes ar workt out on the sand-tables; for example, the Eskimo winter house with clay molded into blocs, dogs, sledges, dols, etc. These dols ar drest in Eskimo fashion, with fur and eiderdown.

#### Grade 2.

The homes of primitiv people—the Cave Men, the Lake Dwellers, the Clif Dwellers—ar bilt. Twigs, sand, bones, clay, and rocs ar used as bilding material, and very simple arcitectural lines ar folloed. The home lives of these people, their food, clothing, and industrial occupations ar workt out and livd over by the children in this laboratory activity. Simple farming implements ar made of clay, cardboard, and wood.

#### Grade 4.

The construction, care, and use of simple mesuring, cutting and miscellaneus tools, placing stres upon the care of tools and benches, and correct method in the development of work.

The development of a knolege of the folloing fundamental tools: Ruler, try-square, nife, bench hook, hammer, brace, bits, nail-set, glu, bloc plane, jack plane, croscut saw, rip saw.

The folloing list of exercises ar fundamental and important: Mesuring of lengths, mesuring widths, marking, ripping, cutting off, edge planing, end planing, boring, testing, together with simple constructing and finishing exercises.

#### Grade 5.

Simple exercises in the use of sheet metal working tools, laying out simple patterns, raisd forms, uniting with solder, rivets, etc.

#### Grade 6.

Many pupils entering the different grades of the scool hav not had the opportunity to take work in manual training in a lower grade. They come into the manual training classes becaus their work in the so-calld fundamentals is up to standard.

All of these pupils who hav not had an opportunity to do the work outlined for the fourth grade ar required to devote considerable time to the working out of the fundamental exercises as outlined for the fourth grade, that they may hav a proper knolege of the "how and why" of the simple before attempting to deal with the more advanst exercises.

All new mesuring, cutting or miscelleaeus tiols, as a need for such tools is developt, ar explaind from the standpoint of construction, care, use and abuse, both as an individual tool and as a necessary part of a complete equipment.

The folloing new tools are introduced: marking gage, spoke shave, turning saw, and firmer chisels.

#### Grade 7.

A continuation of the work as outlind for the fifth grade.

### Grade 8.

The emfasis in this grade is placed upon such new woodworking tools as the bevel, clamps, smoothing and joiner planes.

Prominent constructiv exercizes in this grade should include joining, uniting with glu, the cutting of varius angles, the smoothing of surfaces of moderate size, cuting of simple joints, i. e., mortis and tenon, half lap.

The different methods of finishing woods for beauty, preservation, and utility should be made an important part of the work.

In all grades below the seventh, the student has become more and more familiar with the reading and making of elementary working drawings.

Each pupil should hav acquired a general knolege of method in mecanical drawing, skil in manipulation of drawing tools, accuracy in planning, a habit of neatnes in execution, a fund of constructiv ideas that wil give the work an individual artistic caracter, and a habit of turning to mecanical drawing as a form of expression that should always precede all constructiv processes.

## SOING AND COOKING.

#### Grade 5.

Position; use of thimble; length of thread; knot; warp and woof; basting, running; overcasting; hemming; gathering. Articles—handkerchiefs, laundry bags, soing bags, dol clothes, simple aprons.

### Grade 6.

Review of former stitches; overhanding; feld seam; bands; gathering; French seam; placket; aprons. Elementary cooking.

## Grade 7.

Button holes; hemstitching; fancy stitches; garments. Cristmas work. Cooking outfit for next year. Study of different materials.

#### Grade 8.

Cooking and Sewing.

#### GREELEY, COLORADO

# FYSICAL EDUCATION.

The purpose of these courses is to secure helth, improved bodily development, recreation, promotion of growth and functions, disciplin, and attention. The means employd to these ends ar play, games and sports, dril, gymnastics. The basis of efficiency in developing the fysical condition is a proper understanding of the individual helth. This understanding is accomplisht by the careful fysical examination given at the beginning of each year. This investigation of the conditions of helth, growth, and general and special development, is carried on by a specialist, and forms a valuable aid in the direction of the child's instruction. All the influences that bear upon the preservation of the best physical conditions for the child ar scrutinized and regulated as far as possible.

#### Grades 1 and 2.

Aim.—Development of co-ordination, muscular and rythm senses; Emfasis of recreativ element; Development of spontaneus activity and attention.

Means.—Use of imitativ games, exercize songs and stories, minute plays; exercise of large fundamental muscle groups; running, skipping, simple marching, easy fancy steps, bean bag and ball tossing; imitation and musical accompaniment derive uniformity and later disciplin.

This work occurs several times during the day, for a few minutes between classes.

## Grades 3 and 4.

Aim.—Training, disciplin, attention, and development of muscular co-ordination and control.

Means.—Simple educational and Swedish gymnastics, by command; simple fancy steps; elementary marching tactics, and story gymnastics, which ar given thru the medium of play. These natural movements of childhood giv opportunity for muscular co-ordination, so highly desirable in all fysical exercises for children. Special attention is given to carriage and posture thru correctiv exercises.

## Grades 5 and 6.

Aim.—Emfasis of development of disciplin; relaxation from clas work; correction of posture and carriage; improvment of general appearance of clas.

Means.—Swedish free exercises; fancy steps and marching; military dril, with organization of company; setting up exercize; manual of arms with wands; competitiv games; field day sports.

At this period, increast growth requires a large amount of carefully adjusted exercise, and attention is given to the fysical condition of the child in planning for his activities.

# Grades 7 and 8.

Aim.—In these grades, individual conditions of growth and development receiv special attention. The teacher directs exercise to assist the formation of correct habits of posture and carriage, and to correct defectiv habits. Disciplin and orderly habit is stil a direct aim.

Means.—Free exercize, marching, dumb bell exercize, wand dril, games, sports and folk dancing for the girls.

The boys have military dril, setting up exercises with wands, dumb bels, etc., and some simple work on the hevy apparatus. Plays, games, and athletic sports ar especially emfasized. This work is given daily during reces periods and for the older boys after scool hours.

## THE HIGH SCOOL.

General Purpose.—The High Scool is an integral part of the Training Department, and, like the Elementary Scool, offers opportunity for the training of student teachers. It differs very considerably in its organization from scools that ar intended primarily to fit yung people for college. This is manifest in the more generus provision for electivs, in the dominant caracter of the courses that ar offerd, and, to some extent, in the methods of instruction. Les emfasis is placed upon the traditional subjects of the preparatory scool, taut chiefly for their disciplinary valu, as the formal study of mathematics and the classics, while more valu is attacht to subjects that ar directly helpful in fitting yung people to become intelligent members of society. Accordingly, such subjects as social economics, industrial history, commercial geografy, household sience and art, applied fysics, and varius forms of manual training ar given much attention. The socalld culture subjects ar not neglected. Literature, history, and art occupy a prominent place in the curriculum. While considerable liberty is allowd in the choice of electivs, students ar required to choose the larger part of their studies from a few groups of closely related subjects. In this way liberty of choice on the part of the pupil is not incompatible with a systematic organization of the subjects pursued. For examples of such groups of studies, see the high scool curriculum.

Mental Habits.—Education should not only equip the student with a body of useful knolege, but should assist him in forming good mental habits, such as modes of analyzing and organizing the material dealing with a problem and of drawing correct conclusions from the data at hand. These habits, to be of permanent value, should be formd in dealing with problems with which the student wil be concernd in later life. The study of such subjects as industrial history, social economics, civics, and varius applications of fysical sience to vital questions of present-day interest affords abundant opportunities of this kind. Hence, from the standpoint of both the knolege and the habits acquired, the newer subjects being workt out in this scool ar believd to hav the highest educational value.

The training of the emotional life, moreover, is considerd of not les value than the cultivation of purely intellectual habits. For this purpose a great deal of emfasis is placed upon the teaching of such subjects as art, music, and literature. In addition to work of this kind in the classroom, an ernest effort is made to surround the students with an environment that wil hav an elevating and refining influence upon their tastes and modes of life. In other words, the scool considers that the best preparation for future living consists in an intelligent understanding of the life about one and a keen appreciation of its finer elements, rather than in the cultivation of tecnical ability to pas examinations in academic subjects that the student wil never use outside of the scool room.

**Disciplin.**—That disciplin is best that soonest enables the youth to direct his own activities to useful ends, while at the same time he is lerning to co-operate with others for the common good. The truest freedom is the result of the greatest selfrestraint. In the College High Scool only such restrictions ar enforst as wil safeguard the individual and protects the rights of the student body. The student should lern to be dependable and self-reliant.

Disciplin is important not only for the present interests of the student and of the scool, but also as a preparation for Modern society is complex and highly organized. citizenship. To liv happily in this great social body, the student must erly lern to adapt himself redily to the varied and everchanging demands of the social circle in which he moves. Experience in clas organizations, in literary societies, in athletic teams, and in the numerous groups organized in the scool for different purposes, soon teaches effectivly the lessons of consideration for others, unselfishnes, gentlenes, curtesy, and all those social virtues and graces which constitute refinement and good breeding. At the same time, such experience brings out the strong qualities of leadership and administrativ ability in those who ar to become moving forces in adult society. To be a good citizen one must not only be good, but be good for something. Civic usefulnes is the result of habits of co-operation with others for a common purpose.

**Equipment.**—High scool students hav the use of all the regular college equipment. This includes the library of 30,000 volumes; the laboratories for chemistry, fysics, biology, sloyd, domestic economy, etc.; the very extensiv museums of natural history, botany, biology, mineralogy, anthropology, modern industries, etc.; the gymnasium and athletic equipment; the art and ceramic studios and exhibits; the stereopticon and slides; and, in short, all the educational apparatus of a wel equipt state institution. This makes the College High Scool probably the best equipt secondary scool in the state.

Fysical Education.—The subject of Fysical Education occupies an important place in the High Scool. The aim is to reach every student in the scool and to giv every student the fullest development possible. The work is under expert direction. The stadium for outdoor sports is well equipt. The work covers the whole field of Fysical Education, including fysical examination, instruction in helth and hygiene, gymnasium work, and all kinds of indoor and outdoor sports, including football, basketball, volleyball, track, baseball, and tennis, soccer, football, etc.

The Curriculum.—With the exception of the requirements in English and a few other subjects, the studies of the High Scool ar electiv. This does not mean, however, that the student may choose his work at random. On the contrary, he is expected to select his course under the guidance of the principal from some group of studies that ar wel-articulated with each other and which constitute from the standpoint of subject matter a substantial and practical high scool education.

The subjects of the curriculum ar accordingly organized into a number of groups, any one of which the student may choose as the basis of his course. Hence he may stres the commercial subjects, manual training, household arts, agriculture, etc., as wel as the more usual subjects of the traditional high scool curriculum. In the latter event, these studies may be chosen either with a view to meeting the college entrance rquirements, or for their life values. A special arrangement is also made to meet the needs of adults who for varius reasons may hav been delayed in the completion of their high scool course. A detaild outline of the studies offerd wil be found in the High Scool Bulletin, which may be obtained by riting to The State Teachers College, Greeley, Colorado.

Requirements for Graduation.—Fifteen units ar required for graduation. A unit consists of a forty-five minute recitation five days in the week for three terms. The time necessary to complete the course depends upon the ability, application, and caracter of the student. Capable students who come to the scool with a clearly defined purpose may take five subjects a day and so make five units a year. Students who cannot carry five subjects without sacrificing the quality of their work, ar reduced to four subjects a day, which is equivalent to four units a year. Credit will be allowd for high scool work

taken elsewhere provided satisfactory evidence regarding it is presented by the student.

A Cottage for Non-Resident Girls.—A plan is under consideration for providing a home where girls who come to Greeley to attend the high scool may obtain board and room at reasonable rates under the supervision of the scool. This wil afford an exceptional opportunity for parents, who hav to send their girls away from home to attend scool, to find a comfortable and safe home for them at a reasonable cost. Those interested in such a plan wil kindly communicate at the earliest possible date with State Teachers' College in regard to it.

Accommodations for Yung Men.—Room and board for yung men can be secured at reasonable rates in private homes. Many yung men find work in the city sufficient to pay for a part or all of their living expenses.

Fees.—The total fees paid by high scool students amount to ten dollars a term. These fees cover the cost of materials, text-books, and supplies used in the varius departments of the scool, where the student works. They also help to defray the cost of the fysical education and library equipment.

### THE LIBRARY.

ALBERT F. CARTER, M.S. ALICE E. YARDLEY, PD.B. MRS. GRACE CUSHMAN, PD.B

For the use of all connected with the scool there is an excellent library and reading room, containing about forty thousand volumes, adjoining the main bilding, and constructed in the most approvd form, with all modern conveniences. It is well lighted, ventilated, and heated, and, with its spaciusnes and artistic features, is well suited to provide a comfortable and attractiv environment for readers. Because in the selection of books there has been careful adaption to the actual needs of the readers, the library has become an essential feature of the scool. The shelvs ar open to all, and no restrictions ar placed upon the use of books, except such as ar nec-

essary to giv all users of the library an equal opportunity and to provide for a reasonable and proper care of the books.

The library is particularly strong in the reference section. Among the reference books ar the folloing: Encyclopedias—The New International, the Encyclopedia Brittanica, Encyclopedia Americana, Johnson's, People's, Iconographic, Encyclopedia of Religion and Ethics, American, The Jewish Encyclopedia, The Catholic Encyclopedia, etc. Dictionaries—The Century, the Encyclopedic, the Standard, the Oxford, Webster's, Worcester, etc.; dictionaries of particular subjects, as Architecture, Education, Horticulture, Painting, Filosofy, Sycology, Tecnology, etc.; Lippincott's Gazetteers; Larned's History of Redy Reference; Harper's Cyclopedia of United States History, etc.

The library subscribes regularly for about three hundred and twenty-five of the best magazines and educational jurnals. It also receivs, thru the curtesy of the publishers, most of the county papers of the state and many of the religius papers of the cuntry. As volumes of the leading magazines ar completed, they ar bound and placed on the shelvs as reference books, forming a magnificent collection such as is rarely seen in any library. To facilitate the use of periodicals, Poole's Index, Reader's Guide, and many other good indexes ar provided.

In the library ar to be found many rare and valuable works, such as Audubon's Birds of America, Audubon's Quadrupeds of North America, Sargent's Sylva of North America, Buffon's Natural History, Nuttall and Michaux's North American Sylva, Linneus' General System of Nature, and the works of Kirby and Spence, Cuvier, Jardine, Brehm, and others.

In addition to the general library, there is a section of government publications containing a nearly complete series of congressional documents and departmental publications. Most of these publications ar receivd regularly by the scool.

# GENERAL INFORMATION CONCERNING THE 'TEACHERS'

# COLLEGE.

Government.—That government of a scool which brings about self-control is the highest and truest type.

Disciplin consists in transforming objectiv authority into subjectiv authority.

The object of scool government is to preserv the thing governd; the aim is to develop the power of self-control in the students; the end is to make the pupils willing subjects of their higher motivs and obedient servants to the laws of man and God. This conception of government put into execution is the only one capable of developing high caracter. The scool aims to develop this power of self-control, to cultivate such sentiment as wil render disciplin unnecessary. Activity is the principle of development. Self-government makes the student strong and fits him for life, while coercion, or government from without, renders him unfit for self-regulation. By thus bringing the students' regulativ powers into use--i. e., by his self-acting-there is produced an abiding tendency to self-government. This is nothing more than training the wil. If in the government of a scool no effort is made to develop the wil, no other opportunity so potent presents itself. The aim is to bild up a symmetry of growth in the three general powers of the mind-intellect, sensibility and wil. Students who cannot conform to such training, and who cannot hav a respectful bearing toard the scool, wil, after due trial and effort on the part of the faculty to hav them conform, be quietly askt to withdraw.

All students who come from abroad, boarding in homes other than their own, ar under the control of the institution while they ar members of the scool. Their place of boarding must be approved by the faculty, and their conduct in the town and elsewhere must always be such as to be above criticism.

**Disciplin.—Moral and Spiritual Influence.**—While the scool is absolutely free from denomination or sectarian influence, yet the aim is to develop a high moral sens and Cristian spirit. As an individual who is weak fysically or mentally

# GREELEY, COLORADO

lacks symmetry of development, so does one who has not his moral and spiritual nature quicknd and developt. One who is being traind to stand in the presence of little children, and to lead, stimulate, and inspire them to higher and nobler lives, should not neglect the training of his higher nature. God has immortalized us with His divinity, and it is out duty to respond by continuusly attaining to a higher life.

The Standard of the Scool.—It is the purpose of the trustees and faculty of the State Teachers College to maintain a high standard of scolarship and professional training. Those who ar graduated shal be thoroly prepared and worthy of all for which their diplomas stand. It is the policy of the scool, by making all graduates "worthy of their hire," to protect those who employ them; for in so doing we protect no les the graduates and the children whom they teach.

**Traind Teachers.**—Traind teachers ar in demand. Many districts and towns employ no others. We have inquiries for good teachers. We expect to supply the demand from the graduates of the Colorado State Teachers College.

## Bureau of Recommendations.

It is the purpose of the Bureau of Recommendations to secure such information as wil insure the selection of the best available person for a given position. The practis of giving ritten recommendations to students to be used at their own discretion has been discontinued. The scool officers receiving letters from this Committee ar requested not to return them to the candidates. Recommendation blanks ar filld out by the teachers and the credentials ar then made up in sets redy for quick reference at any time. These may be given to Boards of Education or other scool offisers at their request, or at the request of the applicant.

It is believed by those in charge of the Bureau of Recommendations that a great deal may be accomplisht toward placing the teaching profession on a higher plane by having Boards of Education and School Offisers send to the Bureau of Recommendations for teachers as much as possible, making their wants known, rather than hav our graduates send out large numbers of promiscuus applications regardles of whether there ar vacancies or not.

By means of a card system and set of blanks, the Bureau of Recommendations can turn almost instantly to the record of any teacher on its lists. Duplicates of credentials ar made up in advance, so that there is no delay in presenting a set of credentials to any scool offiser in quest of teachers. These credentials show at a glance the education, training and experience of a teacher, and include estimates of applicant's capabilities as given in three testimonials from members of the faculty with whom the candidate has actually done work. All of this information is put together in tangible, definit shape, and, if desired, direct correspondence or a personal interview with the applicant may then be arranged on short notis.

The Bureau of Recommendations was organized in the fall of 1911, since which time hundreds of graduates have been assisted in securing positions. Taking the scool year as a whole, the demand for teachers has exceeded the supply.

The Bureau of Recommendations is organized to help graduates of The State Teachers College of Colorado secure the best positions. It provides a systematic method for getting scool boards and teachers together, and makes much easier the solving of the problem of finding the right teacher for a position.

The Bureau of Recommendations Committee is composed of Mr. W. B. Mooney, Scool Visitor, Mr. D. D. Hugh, Dean of the Training Scool, and Mr. Vernon McKelvey, Secretary and Manager of the Bureau. All correspondence should be addrest to the Secretary.

Museum of Fine Arts and Arts-Crafts.—The Art Museum is one of the notable features of the equipment of the institution. It contains excellent copies of ancient, medieval, and modern art. In sculpture there are life-size pieces of Niobe and Child, the Annunciation of the Virgin, the Wrestlers, Spinario, Venus de Milo, The Boy and Swan, David, Nike, or Victory, Jeanne d'Arc, Beatrice, Paul Revere, Plato, Froebel, Armor of Achilles, Beethoven, Judgment, Trojan Shields, Miltonic Shield, Water Nymphs, Declaration of Independence, Treaty of Peace, Frieze of the Parthenon, Singing Boys, Apollo Belvedere, Diana of the Stag, Pestalozzi, Hiawatha,

Chief Ouray, Olympian Hermes, Demosthenes, Greek Slave, Flight of Night, Lincoln, Washington, Shakespeare, Two Doves, etc.

In pictures there ar many very good pieces—oil and water-color—and about ten thousand fine fotografs of the best art of the scools of the world.

In pottery there is a good collection. It is possible that there is no normal scool in the cuntry that has as good a ceramic collection. The specimens ar used in the arts-craft work, to inspire and instruct, to the end of creating a feeling for the beautiful and useful. The ceramics of a number of cuntries ar alredy represented in the museum. Among them are a number of American potteries; a very good Japanese collection; China; Mexico; Italy; Hungary; Holland; France; Ireland, many potteries of England; Sweden, Belgium, Norway, Russia, etc. There is also a very fair collection of Clif Dweller and Indian pottery.

Natural History Museum.---A museum is indispensable to an educational institution. It is the center of information and inspiration. If properly clasified, it brings nature into a small compas and enables the pupil to see the orderly whole. In this age of sience, teachers of public scools must hav a working knolege of the subjects of elementary sience, and also kno how to present them as nature study, that they may be able to lead children to hay a feeling for nature, to love nature, and to know it. The scool has a good, working museum. The specimens ar not in a separate room under lock and key, but the cases ar in the laboratories, halls and rooms where they ar to be used. The museum contains the birds of Colorado, the birds' egs of Colorado and surrounding states. many nests and egs mounted as they ar in nature, many insects of this and other states and cuntries, numerous specimens prepared in liquids, the best collection of Colorado fishes in the state, nearly all the mammals of the state, about 6,000 plants, numerous fossils, an excellent collection of microscopic specimens, charts, maps, living specimens, and a fair collection of minerals. There ar about 25,000 individual specimens in the museum.

The museum is the outgrowth of the field work done in the scool by teachers and pupils. In sience and nature-study

great stres is laid on coming in contact with the objects of nature in their natural habitat. It is the field work that makes the museum so vital in our work. In all the grades of the training scool, the museum has its influence. Specimens suitable to the grade ar in every room. If there ar persons who hav specimens and do not hav places to keep them, the scool wil gladly giv them room in cases where they may put them on deposit for safe-keeping. If there ar persons who hav specimens and care to donate them, the institution wil cheerfully receiv them and giv full credit to the donor. Quite a number of specimens hav been donated by friends of the scool.

The trustees ar arranging to secure, in pairs, stuft specimens of all the large animals of Colorado. During the year a number of specimens wil be added to the collection. At present a taxidermist is at work preparing the smaller animals and collecting all such specimens as ar necessary to complete the collection.

The Christian Association.—Realizing the necessity for religius and social culture in the scool, and believing much good comes of Christian association, a large number of interested students hav organized themselves into the Young Women's Christian Association. Meetings ar held at varius times, and persons who hav given considerable thought to the life and aspirations of yung people ar invited to addres the meetings. Much good is also done by this association in the way of creating closer social relations among the students.

Bible Study—"The Greeley Plan."—Unusual opportunities for Bible Study ar offerd to students thru a system of cooperation between the Churches of Greeley and the Teachers College. Bible courses of College grade ar maintaind in all the larger churches. Under specified conditions, students may receiv College credit for the work done in these classes. This year fully 232 students hav availd themselvs of the opportunity of Bible Study under this plan.

### **Community Cooperation.**

Beginning September, 1916, the College wil offer credit to students doing social servis in the community, such as

directing the work of Boy Scouts, Camp Fire Girls, boys' clubs, girls' clubs, Sunday School classes, Junior Christian Endeavor Societies, Junior Epworth Leagues, and similar organizations. Two credit hours per term ar granted for this work, provided it requires preparation and at least one meeting a week. No credit is granted for less than two consecutiv terms. In certain cases this work, when approved by the Dean of the Training Scool, may be substituted for a part of the required practis teaching. Churches and organizations wishing to avail themselvs of the servis of student helpers under this plan of Community and College Cooperation should communicate with the director, Dean Thomas C. McCracken, at least two weeks before the opening of the term in which the servis is desired.

The Alumni Association.—The Alumni Association is the strongest organization for influence connected with the scool. There are now 3,684 members, estimating the clas of 1915. This means as many centers of influence for better educational work and for their Alma Mater.

Sessions of the Scool.—In the College Department there ar no regular daily sessions which all students ar required to attend. The library is open every morning at 7:30, and regular recitations begin at 8:10. Students are required to be present only during their recitation and laboratory periods; the rest of the time they ar free to employ as they find most to their advantage. Regular recitations ar over for the day at 4:30, and the library closes at 5:00 o'clock in the winter, and at 5:30 in autumn, spring and summer.

In the Training Department there ar two daily sessions, the morning session opening at 9:00 and closing at 12:00, the afternoon session opening at 1:15 and closing at 3:15.

Expenses.—Tuition is free to citizens of this state.

The use of all text-books (our plan of work requires a great many), library books, 35,000 in all; the use of 350 magazines; all materials, such as iron, wood, rattan, raffia, etc., for the Manual Training Department; all food and materials for the Domestic Sience Department; all chemicals in the laboratories; all equipment in the Music Department; and the use of the museum in the Art Department ar furnisht by the scool to the students.

Each student in the College and High Scool Departments deposits two dollars upon entrance as a guarantee to the scool against loss of books, returnable at the end of the scool year or at the time of the student's permanent withdrawal from the scool.

### College Department.

All College students pay the folloing fees each term:

Owing to the expansion of special departments and the necessity of material to carry on the work in those departments, such as food and material for domestic sience; wood, metal and supplies for the manual arts; chemicals and fysical supplies for laboratories; musical supplies; art supplies for public scool arts; publications for distribution to students; text books and general books for the library; and museums which ar in every department of the institution, the folloing incidental fee and fysical education fees ar paid by each student of the College department per term:

Inciden	tal fee		 	\$ 13
Fysical	Education	fee	 	 2

# Total .....\$15

The Fysical Education fee is collected at the offis by the secretary for the Fysical Education department. The secretary is the custodian, but the distribution and expenditure of the funds ar in the hands of the Fysical Education department. The institution, as such, has nothing to do with this beyond its collection.

All persons not citizens of the State of Colorado pay ten dollars (\$10) per term tuition beside the incidental fees of fifteen dollars specified above.

A citizen of the state is one who is eligible to vote at any election in the State of Colorado, or a student whose parents ar legal residents of the state.

A student whose parents reside in another state, does not acquire a legal residence by virtue of having attended the College one year or over.

## Training Department.

# High Scool.

Each student who enters the High Scool shal pay an incidental fee per term of \$8.

This incidental fee is to cover the cost of material and supplies used in the varius departments of the institution in which the student works.

Each student who enters the High Scool shal pay a Fysical Education fee per term of \$2. Total, \$10.

Grades 7 and 8.

Incidental fee per term, \$2.

Grades 5 and 6. Incidental fee per term. \$1.50.

Grades 3 and 4.

Incidental fee per term, \$1.

Kindergarten and Grades 1 and 2. No fees chargd.

### Board and Room.

Table board costs from \$3.50 to \$4.00 per week. Rooms may be had from \$6.00 \$10.00 per month, one or two students in a room. There are a number of chances for students to do work in families whereby they may be able to ern their room and board or part of the same. There is oportunity for self-boarding for those who desire it.

Caps and Gowns.—All members of the Senior clas provide themselvs with college gowns and caps. Gowns may be purchased redy made at prices ranging from \$1.60 to \$6.00. The price of the caps ranges from \$1.60 to \$2.50. The color of both gown and cap is blac.

The Y. W. C. A. has on hand a limited number of caps and gowns which may be rented at a very reasonable rate.

Suggestions to Prospectiv Students.—1. Anyone who contemplates attending a teachers' scool would do wel to rite to us. Do not hesitate to ask questions about the scool; that is what we want. We like to answer them.

2. Any one who purposes attending our scool should rite, as soon as he has made up his mind, letting us know how he wishes to board, and whether he wishes us to make arrangements for him, and letting us know on what train he wil arrive.

For further information, addres the Secretary or President.

Visitors.—The scool is open to visitors. All ar made welcome. The teachers and educators of the state ar especially invited. The scool belongs to the state—it belongs to the teachers of the state. Any one who may hav a day, a week, or a month to spare would be profited by paying us a visit, entering the classes—taking part if he so desires. It should be quite a privilege to visit our scool.

# LOAN FUNDS.

The folloing ar a number of loan funds that are designd to help needy students to complete courses in The State Teachers' College of Colorado. These funds ar audited by a College Auditing Board and reports made to the President of the institution.

I. Students' Relief Fund.—The object of this fund is to afford pecuniary assistance to meritorius students who hav exceptional need of such help. It not infrequently happens that a promising student who has enterd upon his work with the expectation of carrying it thru until graduation, meets with an unexpected loss, thru sicknes or other causes, which compels him either to leav the scool or to continue the work under conditions that ar not conduciv to the best results. To meet the need of these students, a fund has been establisht, calld the Students' Relief Fund, from which money is lent to such students until they ar in a position to repay it.

The money constituting this fund consists of contributions from persons and organizations disposed to help in the work, and of the interest derived from loans. The tresurer of the Board of Trustees of the College is the custodian of the fund.

Applications for loans ar made to the Mentor Committee, which is composed of members of the faculty of the scool. This committee carefully investigates the record of the applicant.

and grants his petition only in case it is satisfied that he is worthy of such help, and wil be in a position to repay the money within a reasonable time. No loan is made unles the student has alredy completed the greater part of his course in the scool, and is consequently wel known to the teachers. In case of a favorable vote of the committee, the money is paid the applicant by the tresurer of the fund upon presentation of an order signd by the president of the scool and the chairman of the committee. The tresurer accepts the student's note for the amount, and collects it when it becomes due.

It is believd that this fund wil be the means of helping many capable and deserving yung people to complete their education and to fil positions of usefulnes in the public scools of the state. It is is ernestly commended to all public-spirited persons as worthy of their consideration and support.

II. Y. W. C. A. Student Aid Fund.—The Young Women's Cristian Association has a fund of several hundred dollars which is kept to aid students who need small sums to enable them to finish a term or a course. The fund is in charge of a committee composed of the tresurer of the society, two members of its Advisory Board and a member of the Faculty. Loans ar made without reference to membership in the society, and at present no interest is chargd.

**III.** Senior College Scolarship Fund.—The Senior College Fund is an accumulation of money contributed by Senior College graduates and others who may be interested in creating a fund for those who pursue courses in the Senior College. This fund now approximates one thousand dollars, from which loans ar made to Senior College students only. It has alredy helpt many worthy students to continue to the end of their Master of Pedagogy courses or to their A.B. in Education. This fund is in charge of a Board of Trustees now heded by the Dean of the Senior College.

IV. Junior College Scholarship Fund.—The Junior College Fund is an accumulation of money contributed by Junior College graduates and others who may be interested in creating a fund for those who pursue courses in the Junior College. This fund is in charge of the Secretary of the Board of Trustees and is subject to the control of the students of the Junior College department.

V. The William Porter Herrick Memorial Fund.-This fund, the gift of Mrs. Ursula D. Herrick, in memory of her husband, the late William Porter Herrick, consists of the principal sum of \$5,000. The proceeds or income of said fund ar to be paid over and expended by the Board of Trustees of The State Teachers College of Colorado in aid of such worthy and promising under-graduate students of the College, of either sex, as the President of said College may from time to time designate; provided, however, that no student who uses tobacco in any form, or who uses intoxicating liquors of any kind as a beverage shal participate in the benefits of this fund. The sum or sums, income or proceeds so expended by the said Trustees shal be considerd in the nature of a loan or loans to such students as may receiv the same, and each of said recipients shal execute a note or notes promising to repay to said Trustees the amount or amounts so receivd, within five years after graduation or quitting the college, without interest; but it is the desire of said donor that no student shal be prest for the payment of said note or notes when the same shal become due and payable, so long as the Board of Trustees shal be satisfied that the recipient is making every reasonable effort, according to his abilities, to repay the same and is not endevoring to repudiate the obligation.

#### GIFTS TO THE COLLEGE.

#### I.-Money and Land-

1.—The Colorado Mortgage & Investment Co\$15,000						
2John T. Cranford, 32 acres of land valud at						
\$2,000 per acre	64,000					
3.—Citizens of Greeley, 8 acres						
Senator Simon Guggenheim, the bilding for Indus-						
trial Arts	53,000					

#### II.-Gifts by Clases-

1891-Life Size Bust of Plato.

1893-Life Size Bust of Pestalozzi.

1894—Large Picture.

1895-Life Size Bust of Shakespeare.

1896-Picture-The Acropolis.

- 1897-Frieze of the Parthenon, three sections, plaster.
- 1898-Mahogany Cabinet and Life Size Bust of Indian.
- 1899—Pictures—The Sistine Madonna, The Last Supper, and The Immaculate Conception.

1900-Flemish Oak Desk.

- 1901—Pictures—The Dance of the Muses, Aurora, Hoffman's Christ.
- 1902-Ninth Avenue Entrance.
- 1903—Bust of Beatrice, Marble, Life Size, on Marble Pedestal.
- 1904-Picture-Spanish Peaks; Adams.
- 1905-Flying Mercury, Bronze, 5 feet 10 inches.
- 1906-Arts-Crafts Clock with Chimes, 7 feet 6 inches high.
- 1907-Staind Glas Window for Library.
- 1908-Staind Glas Window for Library.
- 1909—Art Tapestry.
- 1910-The Tenth Avenu Gateway.
- 1911-The Pool and Fountain.
- 1912-Eighth Avenu Gateway.
- 1913-Large pictures of the profets, for the Chapel.
- 1914-Pioneer Statue.

#### III.—Other Gifts—

- 1.—Two fine pieces of Pottery from Teco Company, Chicago.
- 2.--Three plates from Robinson & Co., England.
- 3.-Six pieces of Porcelain from Haviland, France.
- 4.---A collection of Tiles from Pittsburgh, Pa.
- 5.-Piece of Delft Ware, Holland.
- 6.-Several pieces of Beleek, Ireland.
- 7.-Vase, Hermann Kahler, Holland.
- 8.—Several Ceramic Medallions, Italy.
- 9.-Vase, Owens, Zanesville, by W. C. Wilson, Greeley.
- 10.—Six pieces of Pottery, by Weller, Zanesville.
- 11.—Fifteen Books for Library, F. A. Meredith, Ft. Lupton.

- 12 .- The Infusoria, by Mr. Plumb, Greeley.
- 13.-Twenty Clif Dweller Skuls, by Professor Hewett.
- 14.---A Porcupine.
- 15.-Bust of Sir Walter Scott, by H. T. West.
- 15a.—An American Eagle, mounted, by Mr. Thayer, Greeley.
- 16.—Two mounted Blue Herons, by Mr. Freeman, Greeley.
- 17.-Mastodon Tooth.
- 18.-A number of Books for Library.
- 19.-A collection of Egs, by Tyndall Snyder.
- 20.-A collection of Birds, Colorado and Pennsylvania.
- 21.—A collection of Minerals and Fossils from Pennsylvania.
- 22.-- A Lifting Machine, Dr. Marsh, Greeley.
- 23 .- A Pelican, Mr. Martin, LaSalle.
- 24.-Pair of Tongs, old-timers, Mrs. Cheesman, Greeley.
- 25.-A New England Ferrule, Mrs. Thayer, Greeley.
- 26.—Shrubs and Trees, by Different Classes and by Citizens of Greeley.
- 27.-Collection of Plants, by Prof. F. H. Byington.
- An Oil Portrait of Judge J. M. Wallace, First President of Board of Trustees, Professor Ernesti.
- 29.--- A large Indian Olla, Professor Ernesti.
- 30.-Collection of Rocks, Smithsonian Institution.
- 31.—Collection of Animals, Smithsonian Institution.
- 32.-Melodeon, Mr. and Mrs. Bullard.
- 33.-Egyptian Pottery, H. T. West.
- 34.—Collection South American and Oriental Silver Coins, Flora Cross.
- 35.-Collection of Pictures, Miss Tobey.
- 36.-Collection of Pictures, Miss Krackowizer.
- IV.—GIFTS by Training Scool—
  - 1.-Dance of the Muses, High Scool.
  - 2.—Picture.

3.-A Mission Clock, by Eighth Grade.

4.-Flying Mercury, Plaster, Eighth Grade.

5.-Picture-Holland Scene, Eighth Grade.

6.-Three Madonnas, Eighth Grade,

7.-Portrait of Tennyson, Eighth Grade.

8.—Bust of Lincoln, Eighth Grade.

9.—Bust of Washington, Eighth Grade.

10.-Pictures-Three others, Eighth Grade.

11.-Picture by Senior Clas of High Scool, 1906.

#### V.—On Deposit—

1.-A collection of Birds' Eggs of Iowa, Mr. Crone.

2.---A collection of Minerals, Polisht, Mr. Lyons.

3.-A collection of Coins and Script, A. J. Park.

#### The Greeley Water.

The water supply of Greely is obtaind from the canon of the Cache la Poudre, forty miles from Greeley, in the mountains. The water is past thru settling basins and filters until all foren matter is removed. The supply is clear, pure, and ample for all the needs of the city. The system was constructed at an expense of \$400,000 and is ownd by the city.

### THE STATE TEACHERS COLLEGE OF COLORADO

Programs for the Year 1915-1916.

### DIRECTIONS FOR REGISTRATION.

- 1. Pay fees and get admission card. Offis of the Secretary of the Board of Trustees.
- 2. Register. Room 111.
- 3. Make out your clas program cards. Room 114. If you expect to major in any department, ask to see the hed of the department, who will assist you in making out your program.
- 4. Graduate students present programs to Dean T. C. Mc-Cracken.
- 5. Senior college students present programs to Dean G. R. Miller for his approval.
- 6. Junior College students see Dean Tobey if any special adjustment is necessary.
- 7. All students secure clas admission cards from Dean J. H. Hays.

### **Required** Courses.

The distribution of required courses should be approximately an equal number for each term of the student's attendance. The distribution among the varius years is customarily as folloes:

### 1. Junior College.

First Year—Sycology 1 and 2, Training Scool 1, English 1, Biology 2, Sociology 3, and Fysical Education.

Second Year—Education 11, Teaching 1, 2, and 3, and Fysical Education.

#### 2. Senior College.

Ed. 18a, 18b, 18c—a total of 9 hours; and Sociology 4, 5, 6—a total of 6 hours. One of these courses in Biotics and one in Sociology must be taken in the third year for the degree of Master of Pedagogy (Pd.M.). All these courses must be taken for the degree of Bachelor of Arts (A.B.).

### Room Numbers.

Numbers 1 to 10—Basement, Administration Bilding.
Numbers 100 to 120—First floor, Administration Bilding.
Numbers 200 to 220—Second floor, Administration Bilding.
Numbers 300 to 306—Third floor, Administration Bilding.
Numbers L1 to L13—Library basement.
Rooms G1 to G205, Guggenheim Hall of Industrial Arts.
T1 to T221—Training Scool Bilding.
P—Playground.
C—Cranford Field.
